1.0 Introduction

This Study addresses the required drainage analysis for The Preserve Tentative Subdivision Map by providing hydrologic and hydraulic analysis, Low Impact Development (LID), treatment control measures and hydromodification management for the proposed development area.

The following information is provided in this Drainage Study:

- A delineation of existing watersheds within the project limits (Figure 2).
- A delineation of proposed watersheds within the project limits (Figure 3).
- Hydrologic analyses for primary watersheds.
- LID Credits and Treatment BMP Sizing Calculations.
- Sacramento Hydrology Model (SAHM) Project Report.
- HEC-HMS analysis of 100-year, 24-hour storm (existing condition vs. developed condition)
- HEC-RAS analysis of Morrison Creek through project limits (10-year and 100-year storms)

1.1 Study Area

The Study Area for this Drainage Study is The Preserve project limits (see Figure 1), which includes offsite open space tributary to the headwaters of Morrison Creek. Morrison Creek flows through the project limits adjacent to the proposed development area. The overall project size is 283.5 acres, but only 100.0 acres will be developed while the remaining area will be classified as open space. Proposed storm drain infrastructure represented herein reflects the storm drain infrastructure needed to serve The Preserve area under buildout land use conditions as shown on the Tentative Subdivision Map. The vertical datum referenced with the elevation data used in this report is NAVD 88.

1.2 Storm Drainage Facility Design Standards

In this Drainage Study, and in accordance with City of Rancho Cordova and County of Sacramento design methods, proposed storm drain facilities have been sized based on the following criteria:

- Underground storm drains: The design of “onsite” storm drain systems will follow the Nolte Method design charts.
- Bio-Retention Basins: Storage volume calculated in the LID Credits and Treatment BMP Sizing Calculations (per the adopted “Stormwater Quality Design Manual” for the Sacramento Region) and included in the SAHM model.
- Hydromodification Basin: The design of the hydromodification (hydromod) basin was sized using the criteria in the SAMH program (comparing existing condition vs developed condition using Low Flow Threshold: 25 percent of a 2-year storm and High Flow

Threshold: 10-year storm). The basin was evaluated for the 10-year, 24-hour storm; 100-year, 24-hour storm and 100-year, 10-day storm with HEC-HMS.

2.0 Hydrology

The Existing Condition Drainage Map (Figure 2) and Developed Condition Drainage Map (Figure 3) delineate the watersheds for each condition within The Preserve. Copies of both maps are included in the Appendix along with output from SacCalc and HEC-HMS.

2.1 Sacramento Method

The Sacramento Method develops hydrographs for use in programs like HEC-HMS and XP-SWMM. This method also calculates peak flows from the hydrographs it develops. The hydrographs are developed based on a design storm, initial losses, constant losses, lag time and land use. The major contributor in loss coefficients is Soil Type. The U.S. Soil Conservation Service (SCS) has classified soils into four hydrologic categories (A, B, C & D) based on infiltration rates from prolonged wetting. Soil Type A has the highest infiltration rate and Type D has the lowest infiltration rate. The majority of The Preserve site is Type C with a small area near the creek being Type C/D. Below is a summary of the coefficients used in the program called SacCalc developed to calculate the Sacramento Method and Nolte Method.

Table 2-1, Hydrology Coefficients

Land Use	Initial Loss (in)	*Constant Losses (in/hr)	Percent Impervious	Precipitation Zone
Open Space (Grassland)	0.10	0.10	2	2
Recreation (Park)	0.10	0.10	5	2
Low Density Residential (6-8 du/ac)	0.10	0.10	50	2

*Notes:

1. Constant losses are based on combination of Type C and D soils.

The Design Storm selected for The Preserve project is the 100-year, 24-hour storm. The 10-year, 24-hour storm and 100-year, 10-day storm were also evaluated for the Developed Condition and are included in Appendix 1. This 100-year, 24-hour storm is appropriate for an analysis of a Hydromod Basin designed to reduce the peak flow from a Developed Condition to the Existing Condition peak flow. The hydrograph created with the Sacramento Method will be used in the Hydromod Basin routing with HEC-HMS. Below is a summary of the peak flows developed by the Sacramento Method.

Table 2-2

Project Development	100-year, 24-hour Peak Flow
Existing Condition	134 cfs
Developed Condition	171 cfs

2.2 HEC-HMS Modeling

The proposed Hydromodification Basin, to be discussed further in this study, is designed for 25 percent of the 2-year storm up to a 10-year storm using SAHM. While this addresses low flow design criteria, the basin is also analyzed for a 100-year, 24-hour storm using HEC-HMS. The 10-year, 24-hour storm and 100-year, 10-day storm were also evaluated for the Developed Condition and are included in Appendix 4. The stage-storage-discharge relationships for the hydromodification basin are provided in Table 1 of Appendix 4 and were applied to the HEC-HMS model. The 100-year, 24-hour hydrograph developed by SacCalc (using the Sacramento Method) for the Developed Condition is routed through the basin and the peak outflow is compared to the Existing Condition peak flow. The Developed Condition outlet peak flow from the basin is 117 cfs. This satisfies the requirement that the Developed Condition shall not exceed the Existing Condition peak flow.

2.3 Nolte Method

The storm drainage infrastructure to be designed within the public streets will be based on the Nolte Method for the Developed Condition. The project site is located in Hydrologic Zone 1.

The Tentative Subdivision Map shows preliminary pipe sizes that will be further evaluated with a detailed hydraulic analysis during improvement plan design.

3.0 Stormwater Quality Control Measures

The Stormwater Quality Design Manual (SQDM) for the Sacramento Region (July 2018) is the governing document for stormwater quality in Sacramento County. From Table 3-2 of the SQDM, the requirements for a single family residential development project over 20 acres are Source Control, Hydromodification Control, LID Control and Treatment Control. The source controls, storm drain markings and others, will be addressed with the grading and improvement plans. Hydromodification controls are determined with SAHM. LID and Treatment Controls are calculated with LID Credits and Treatment BMP Sizing Calculator. The SAHM Project Report and LID Credits and Treatment BMP Sizing output are provided in the Appendix. Included in the Appendix is Figure 4 showing the Stormwater Quality Control Measures.

3.1 Hydromodification Control

The SAHM developed for The Preserve project evaluates 100.0 acres of development. The remaining 185.3 acres within the project limits is left untouched and is not part of the model for the development area. SAHM compares the percent imperviousness of the Existing Condition (pre-project) and the Developed Condition (mitigated). A Hydromodification (Hydromod) Basin was prepared for the Developed Condition with 25 percent of a 2-year storm up to a 10-year storm being routed through the basin with SAMH. All the runoff from the Developed Condition is conveyed to the Hydromod Basin by overland release or storm drain pipe. The mitigated flows discharged from the basin do not exceed the pre-project flows.

3.2 LID Controls

The goal of LID controls is to reduce the impact of development by using design techniques that mimic a site's predevelopment runoff. The design techniques that will be implemented on The Preserve project are disconnected pavement, disconnected roof drains, interceptor trees, bio-retention basin and Stormwater Quality/Hydromod Basin.

The project is required to earn 100 points of LID credits. Each measure listed above earns points and is documented in the LID Credits and Treatment BMP Sizing Calculator (See Appendix A.3). The major contributor of LID credits is the dedication of open space. The Preserve project has 185.3 acres within the project limits that will be dedicated as open space. In addition to open space the project provides 65,000 square feet of bio-retention area to reach 100 points. The project satisfied that requirement by providing two basins adjacent to the Hydromod Basin. The bio-retention basins will route overflow runoff to the Hydromod Basin prior to discharge into the creek. Large storms, greater than a 10-year storm, will bypass the bio-retention areas and go directly to the Hydromod Basin. Diversion structures will be designed upstream of the bio-retention areas to direct larger flows into the Hydromod Basin.

3.3 Treatment Controls

The Preserve project will provide multiple treatment controls as part of the overall design of the project. Each LID control implemented reduces the size of the dedicated Stormwater Quality/Hydromod Basin. The final piece for treatment control is the Hydromod Basin. It has enough capacity to meet the requirements for Volume Based Design (WQV).

Table 3-1

Basin	Required Water Quality Volume (ac-ft)	Storage Volume Provided (ac-ft)	Water Quality Flow from hydromod basin @ storage volume (cfs)	Bio-Retention Area (sq. ft.)
Hydromod Basin	1.73	1.73	1.6	-
Bio-retention Basin 1	-	-	-	39,000
Bio-retention Basin 2	-	-	-	26,700

4.0 Morrison Creek Water Surface Elevation Analysis

Morrison Creek conveys runoff from the east side of Grant Line Road at the projects east boundary through the project limits to the western edge of The Preserve project site. There are two man-made ponds located near the western edge of the project site that store runoff. Per a requirement from the City of Rancho Cordova, The Preserve project evaluated the 10-year and 100-year water surface elevations of Morrison Creek through the project limits. The existing 10-year, 24-hour and 100-year, 24-hour storm flowrates for Morrison Creek are 194 cfs and 361 cfs respectively. These existing flowrates were developed for the Master Drainage Study (MDS) for Rio Del Oro in August 2005 by Wood Rodgers and calculated with the Sacramento Method. The existing flowrates are from US3 (Figure F from the MDS) and include The Preserve project site along with an additional 700 acres for a total drainage area of 1003 acres. The Preserve forms the western boundary of drainage area US3. Included in Appendix 7 are Figure F and the

4.1 HEC-RAS Analysis

The HEC-RAS analysis was prepared for the Existing and Developed Conditions on the project site. The Existing Condition cross sections (Figure 5) for the HEC-RAS model were developed from the existing topography for the project site and supplemental field survey points. The Developed Condition cross sections (Figure 6) used the existing topography, survey points and the preliminary grading plan included with the Tentative Subdivision Map. The Developed Condition 100-year water surface elevations from the HEC-RAS model have been plotted on the Tentative Subdivision Map and added to exhibits in this report.

The cross sections begin at the downstream end of the project site (western boundary) and continue upstream until the final cross section located east of Grant Line Road. The beginning water surface elevation at the downstream cross section is calculated based on a normal depth condition with a slope along the creek flowline at S=0.004. Along the way are two man-made ponds and an existing driveway. The two ponds are assumed full for the HEC-RAS analysis. The water surface for each pond is the lowest overflow elevation. The overflow elevation for the downstream pond is elevation 210.5 and the upper pond overflow elevation is 215.2. The existing driveway crosses the creek upstream of the upper pond. The typical Manning's 'n' Value used for the creek is 0.035. This value is appropriate for the grasses that grow along the creek. The 'n' values were increased to 0.04 at the overflows from the two ponds. The existing overflows from the two ponds show erosion and the output from the HEC-RAS model show higher velocities in these areas.

5.0 Summary

The Preserve project satisfies requirements for Stormwater Quality Control Measures established by the City of Rancho Cordova and County of Sacramento for a Single Family Residential Development with over 20 gross acres of area. The Hydromod Basin designed for Hydromodification will also meet flood control requirements for a 100-year, 24-hour storm event and the outlet invert elevation from the Hydromod Basin will be above the 100-year water surface elevation calculated from the HEC-RAS model of Morrison Creek.

Sacramento Hydrologic Calculator Report

October 3, 2019 10:18

Project Title: Developed Hydrograph for HEC-HMS
Comments:
Prepared by: SMD

Method: Sacramento County HEC-1 method
Date: 6/12/2019

Watershed Hydrologic Summary Data

Watershed	Area (acres)	Mean Elevation (ft)	Lag Times		Basin "n"		Loss Rates		Percent Impervious	
			Method	Lag Time (min)	Method	Basin "n"	Method	Loss Rate (in/hr)	Method	Impervious Area (%)
RES1	48.1	0	Travel Time	-	-	-	Specified	0.1	Computed	-
OS2-3	15.8	0	Travel Time	-	-	-	Specified	0.1	Computed	-
RES2	33.1	0	Travel Time	-	-	-	Specified	0.1	Computed	-
RES3	3	0	Travel Time	-	-	-	Specified	0.1	Computed	-

Travel Time Component Method Data for Lag Time Computation

SAHM

PROJECT REPORT

General Model Information

Project Name:	Divine-BIO1
Site Name:	Divine
Site Address:	
City:	Rancho Cordova
Report Date:	10/11/2019
Gage:	RANCHO C
Data Start:	1961/10/01
Data End:	2004/09/30
Timestep:	Hourly
Precip Scale:	1.056
Version Date:	2019/10/01

POC Thresholds

Low Flow Threshold for POC1:	25 Percent of the 2 Year
High Flow Threshold for POC1:	10 Year

Landuse Basin Data

Pre-Project Land Use

Basin 1

Bypass:	No
GroundWater:	No

Pervious Land Use	acre
C,Grass,Mod (1-2%)	4.8
C,Grass,Steep(2-5%)	81.3
D,Grass,Steep(2-5%)	7.3
Pervious Total	93.4

Impervious Land Use	acre
Imperv,Mod (1-2%)	1.8
Impervious Total	1.8
Basin Total	95.2

Element Flows To:

Surface	Interflow	Groundwater

Mitigated Land Use

Development Area

Bypass:	No
GroundWater:	No

Pervious Land Use	acre
C,Grass,Mod (1-2%)	15.8
C,Grass,VSteep(>5%)	1.3
D,Grass,VSteep(>5%)	1
D,Grass,Steep(2-5%)	2.7
C,Grass,Steep(2-5%)	7.4
Pervious Total	28.2

Impervious Land Use	acre
Imperv,Mod (1-2%)	30.6
Impervious Total	30.6
Basin Total	58.8

Element Flows To:

Surface	Interflow	Groundwater
Surface retention 1	Surface retention 1	

Development Area 2

Bypass:	No
GroundWater:	No

Pervious Land Use	acre
C,Grass,Mod (1-2%)	11.2
C,Grass,VSteep(>5%)	1.1
D,Grass,VSteep(>5%)	1
D,Grass,Steep(2-5%)	2.6
C,Grass,Steep(2-5%)	3.5
Pervious Total	19.4

Impervious Land Use	acre
Imperv,Mod (1-2%)	21.7
Impervious Total	21.7
Basin Total	41.1

Element Flows To:

Surface	Interflow	Groundwater
Surface retention 2	Surface retention 2	

Routing Elements

Pre-Project Routing

Mitigated Routing

Water Quality Basin 1

Bottom Length: 310.00 ft.
Bottom Width: 80.00 ft.
Depth: 8 ft.
Volume at riser head: 4.8579 acre-feet.
Side slope 1: 4 To 1
Side slope 2: 4 To 1
Side slope 3: 4 To 1
Side slope 4: 4 To 1
Discharge Structure
Riser Height: 6 ft.
Riser Diameter: 54 in.
Notch Type: Rectangular
Notch Width: 4.500 ft.
Notch Height: 1.500 ft.
Orifice 1 Diameter: 4 in. Elevation:0 ft.
Orifice 2 Diameter: 4 in. Elevation:1 ft.
Orifice 3 Diameter: 4 in. Elevation:2 ft.
Element Flows To:
Outlet 1 Outlet 2

Appendix 3 - Low Impact Development (LID) Credits and Treatment BMP Sizing Calculations

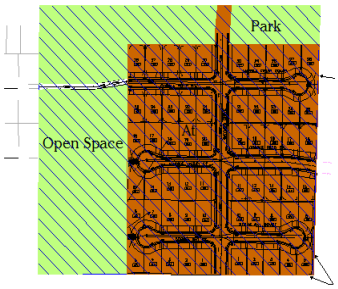
Appendix D-1: Residential Sites: Low Impact Development (LID) Credits and Treatment BMP Sizing Calculations

Name of Drainage Shed: Morrison Creek
Location of project: Sacramento

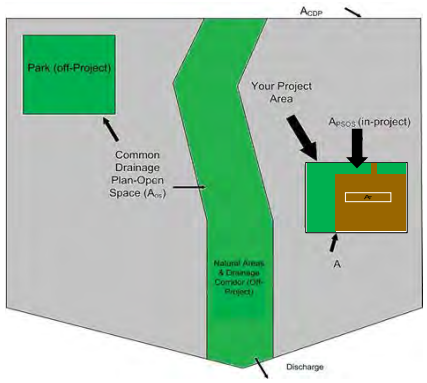
Fill in Blue Highlighted boxes

Step 1 - Open Space and Pervious Area Credits

Is your project within the drainage area of a common drainage plan that includes open space? If not, skip to 1 b.



1 a. Common Drainage Plan Area		acres	A_{CDP}	
Common Drainage Plan Open Space (Off-project)	0	acres	A_{OS}	**see area example below**
a. Natural storage reservoirs and drainage corridors	0	acres		
b. Buffer zones for natural water bodies	0	acres		
c. Natural areas including existing trees, other vegetation, and soil	0	acres		
d. Common landscape area/park	0	acres		
e. Regional Flood Control/Drainage basins	0	acres		
1 b. Project Drainage Shed Area (Total)	285.10	acres	A	
Project-Specific Open Space (In-project, communal)**	205.90	acres	A_{PSOS}	**see area example below**
a. Natural storage reservoirs and drainage corridors	61.80	acres		
b. Buffer zones for natural water bodies	61.80	acres		
c. Natural areas including existing trees, other vegetation, and soil	61.70	acres		
d. Landscape area/park	12.40	acres		
e. Flood Control/Drainage basins	8.20	acres		



** Doesn't include impervious areas within individual lots and surrounding individual units. That is accounted for below using Form D-1a in Step 2.

Area with Runoff Reduction Potential	$A - A_{PSOS}$ =	79.20	acres	A_T
Number of Units in A_T		434		
Number of units per acre in A_T	DU/A_T =	6	DUA	
Assumed Initial Impervious Fraction of A_T (determined using Table D-1a)		0.4	I	
Open Space & Pervious Area LID Credit (Step 1)	$(A_{OS}/A_{CDP}+A_{PSOS}/A)x100$ =	72	pts	

Table D-1a

Dwelling units per acre	Imperviousness
1	0.17
2	0.25
3,4	0.35
5,6	0.40
7	0.50
8,9	0.55
10-14	0.60
15-20	0.70

Step 2 - Runoff Reduction Credits

Runoff Reduction Measures		Effective Area Managed (A_C)	
Disconnected Roof Drains (see Fact Sheet)	use Form D-1a for credits →	4.90	acres
Disconnected Pavement (see Fact Sheet)	use Form D-1b for credits →	0.35	acres
Interceptor Trees (see Fact Sheet)	use Form D-1c for credits →	0.30	acres
Alternative Driveway Design (see Fact Sheet)	use Form D-1d for credits →	0.00	acres
Total Effective Area Managed (Credit Area)	A_C	5.54	acres EAM
Runoff Reduction Credit (Step 2)	$(A_C / A_T)*100$ =	7	pts

Form D-1a: Disconnected Roof Drains Worksheet

See Fact Sheet for more information regarding Disconnected Roof Drain credit guidelines

					Effective Area Managed (A_C)
1. Determine efficiency Multiplier					
Runoff is directed to a dispersal trench or dry well (Type A and B soils only)		1.00			
Runoff is directed across landscaping, determine setback					
25 ft +	Use multiplier of	1.00			
≥ 20 and < 25 ft	Use multiplier of	0.90			
≥ 15 and < 20 ft	Use multiplier of	0.70			
≥ 10 and < 15 ft	Use multiplier of	0.45			
≥ 5 and < 10 ft	Use multiplier of	0.25			
	Efficiency Multiplier →		0.45	Box J1	
2. Determine percentage of roof drains disconnected	→		100.0%	Box J2	
3. Select project density in dwelling units per acre:					
1	Use reduction factor of	0.08			
2	Use reduction factor of	0.13			
3,4	Use reduction factor of	0.19			
5,6	Use reduction factor of	0.23			
7	Use reduction factor of	0.29			
8,9	Use reduction factor of	0.33			
10-14	Use reduction factor of	0.37			
15-20	Use reduction factor of	0.44			
	Reduction Factor →		0.23	Box J3	
4. Determine Area Managed					
	Multiply Box J3 by A_T, and enter the result in Box J4		18.1 acres	Box J4	
5. Multiply Boxes J1, J2 and J4, and enter 60% of the Result in Box J					4.9 acres Box J
This is the amount of area credit to enter into the "Disconnected Roof Drains" Box of Form D-1					

Form D-1b: Disconnected Pavement Worksheet

See Fact Sheet for more information regarding NDC Pavement credit guidelines

			Effective Area Managed (A_C)
Divided Sidewalks			
1. Determine percentage of units with divided Sidewalks	18.2%	Box K1	
Multiply Box K1, A_T, and 0.04 and enter 60% of the result in Box K			0.35 acres Box K
This is the amount of area credit to enter into the "Disconnected Pavement" Box of Form D-1			

Form D-1c: Interceptor Tree Worksheet

See Fact Sheet for more information regarding Interceptor Tree credit guidelines

				Effective Area Managed (A_C)
New Evergreen Trees				
1. Enter number of new evergreen trees that qualify as Interceptor Trees in Box L1.	217	trees	Box L1	
2. Multiply Box L1 by 200 and enter result in Box L2	43400	sq. ft.	Box L2	
New Deciduous Trees				
3. Enter number of new deciduous trees that qualify as Interceptor Trees in Box L3.	217	trees	Box L3	
4. Multiply Box L3 by 100 and enter result in Box L4	21700	sq. ft.	Box L4	
Existing Tree Canopy				
5. Enter square footage of existing tree canopy that qualifies as Existing Tree canopy in Box L5.		sq. ft.	Box L5	
6. Multiply Box L5 by 0.5 and enter the result in Box L6	0	sq. ft.	Box L6	
Total Interceptor Tree Credits				
Add Boxes L2, L4, and L6 and enter it into Box L7	65100	sq. ft.	Box L7	
Divide Box L7 by 43,560 and multiply by 20% to get effective area managed and enter the result in Box L8	0.30	acres	Box L8	
This is the amount of area credit to enter into the "Interceptor Trees" Box of Form D-1				

Form D-1d: Alternative Driveway Design

See Fact Sheet for more information regarding Alternative Driveway Design credit guidelines

1. Select type of driveway

Pervious Driveway:	Multiplier:
Cobblestone Block P	0.40
Pervious Concrete/A	0.60
Modular Block Porous Pavement	0.75
Porous Gravel	
Not Directly-connected	1.00

Box M1

2. Determine percentage of units with Alternative Driveways: Box M2

4. Multiply Boxes M1, M2, A_T and 0.04, and enter the result in Box M
This is the amount of area credit to enter into the "Alternative Driveway Design" Box of Form D-1: 0.00 acres

Step 3 - Runoff Management Credits

Capture and Use Credits

Impervious Area Managed by Rain barrels, Cisterns, and automatically-emptied systems
(see Fact Sheet) enter gallons, for simple rain barrels: 0.00 acres

Automated-Control Capture and Use System
(see Fact Sheet, then enter impervious area managed by the system): 0.00 acres

Bioretention/Infiltration Credits

Impervious Area Managed by Bioretention BMPs
(see Fact Sheet)
Bioretention Area: 65,700 sq ft
Subdrain Elevation: inches
Ponding Depth, inches: 12.0 inches: 8.44 acres

Impervious Area Managed by Infiltration BMPs
(see Fact Sheet)
Drawdown Time, hrs: 12 drawdown_hrs_inf
Soil Infiltration Rate, in/hr: 0.50 soil_inf_rate
Sizing Option 1: Capture Volume, acre-ft: capture_vol_inf: 0.00 acres
Sizing Option 2: Infiltration BMP surface area, sq ft: soil_surface_area: 0.00 acres
Basin or trench? Basin; approximate BMP depth: 0.50 ft

Impervious Area Managed by Amended Soil or Mulch Beds
(see Fact Sheet) Mulched Infiltration Area, sq ft: mulch_area: 0.00 acres

Total Effective Area Managed by Capture-and-Use/Bioretention/Infiltration BMPs: 8.44 A_{LIDc}

Runoff Management Credit (Step 3) A_{LIDC}/A_T*200 = 21.3 pts

Total LID Credits (Step 1+2+3) LID compliant, check for treatment sizing in Step 4: 100.5

Does project require hydromodification management? If yes, proceed to using SacHM.

Adjusted Area for Flow-Based, Non-LID Treatment $A_T - A_C - A_{LIDC}$ = 65.22 A_{AT}

Adjusted Impervious Fraction of A for Volume-Based, Non-LID Treatment $(A_T*I-A_C-A_{LIDC}) / A$ = 0.062 I_A

Further treatment is required, see choose flow-based or volume-based sizing in Step 4

Step 4a Treatment - Flow-Based (Rational Method)

Form D-1e

Calculate treatment flow (cfs): Flow = Runoff Coefficient x Rainfall Intensity x Adjusted Treatment Area

Determine C Factor using Table D-1b: 0.00 C

Determine i using Table D-1c (Rainfall Intensity): 0.18 i

A_{AT} from Step 2: 65.22 A_{AT}

Flow = C * i * A_{AT}: 0.00 cfs

TABLE D-1b

Development Type	Runoff Coefficient (Rational), C
Single-family areas	0.50
Multi-units, detached	0.60
Apartment dwelling areas	0.70
Multi-units, attached	0.75
User Specified	0.00

Table D-1c

Rainfall Intensity		
Roseville	i = 0.20	in/hr
Sacramento	i = 0.18	in/hr
Folsom	i = 0.20	in/hr

Step 4b Treatment - Volume-Based (ASCE-WEF)

Calculate water quality volume (Acre-Feet):	WQV = Area x Maximized Detention Volume (P_0)			
Obtain A from Step 1	285.10	A	24 hrs	Specified Draw Down time
Obtain P_0: Maximized Detention Volume from figures E-1 to E-4 in Appendix E of this manual using I_A from Step 2.	0.07	P_0		
Calculate treatment volume (acre-ft): **Treatment volume = A x (P_0 / 12)**	1.73	Acre-Feet		

v06232012

Appendix 4 - HEC-HMS Output for 10-year, 24-hour storm; 100-year, 24-hour storm and 100-year, 10-day storm

Project: The Preserve Simulation Run: RES10+OS10 thru Basin

Appendix 5 - Design Data Summary Sheet for Bioretention Basin

Table BP-3. Design Data Summary Sheet for Bioretention Planter

Designer: Sean Davis **Date:** 6/14/19

Company: RJA

Project: The Preserve

Location: Rancho Cordova, Morrison Creek

1a. Determine Design Water Quality Volume

a. Contributing drainage area	Area =	100 ac	~~ft²~~
b. Water Quality Volume	WQV =	75,360	ft³

1b. Adjust Volume Up for Hydromodification Management
(If Applicable) Based upon SAHM Modeling

a. Water Quality Volume based on SAHM modeling	V =		ft³
b. SAHM Model Demonstrates Compliance with Flow Duration Standards	(Yes or No)		

2. Design average surcharge depth (d_s)
d_s = 6-12 inches (0.5-1 foot) d_s = ft

3. Design Planter Surface Area (A_s)
$A_s = WQV/d_s$ A_s = ft²

4. Base Course Layers

a. Top Layer (6 in. minimum)	6	in
b. Bioretention Soil Media (18 in. minimum, See App I)	18	in
c. Gravel Layer (9 in. minimum)	9	in

5. Planter Type (check type used)

- ☐ Infiltration without underdrain
- ☑ Infiltration with underdrain
- ☐ Flow-through with impermeable liner

6. Vegetation (describe)

7. Overflow Device (check type used or describe "Other")

- ☐ Drop inlet
- ☑ Standpipe
- ☐ Other

Notes:

Appendix 6 - Design Data Summary Sheet for Water Quality Detention Basin

Table DB-6. Design Data Summary Sheet for Water Quality Detention Basin

Designer:	Sean Davis	**Date:**	10/30/18	
Company:	RSA			
Project:	The Preserve - Dry Basin			
Location:	Rancho Cordova, Morrison Creek			
1a. Design Water Quality Volume				
a. Tributary drainage area		Area =	100 ac.	~~ft²~~
b. Water Quality Volume		WQV =	75,360	ft³
1b. Adjust Volume Up for Hydromodification Management (If Applicable) Based upon SAHM Modeling				
a. Water Quality Volume based on SAHM modeling		V =	75,360	ft³
b. SAHM Model Demonstrates Compliance with Flow Duration Standards		(Yes or No)	Yes	
2. Basin Depths and Water Surface Areas		**ACTUAL DESIGN**		
a. For Wet and Combination Basins				
Permanent pool volume (Vol_{pp})		Vol_{pp} =		acre-ft
Average depth of permanent pool (D_{avg}) (4-8 ft)		D_{avg} =		ft
Water surface area of permanent pool (A_{pp})		A_{pp} =		ft²
Water surface elevation of permanent pool ($WS\ Elev_{pp}$)		$WS\ Elev_{pp}$ =		ft
b. Forebay				
Depth range = 2-4 ft		Depth =		ft
Volume range = 5-10% of WQV		Volume =		acre-ft
Water surface area range		WS Area =		ft²
3. Depth of WQV and Max WS Elevation				
a. Maximum water surface area with WQV (A_{WQV})		A_{WQV} =	32,670	ft²
b. Maximum water surface elevation with WQV ($WS\ Elev_{WQV}$)		$WS\ Elev_{WQV}$ =	2.7	ft
4. For Wet and Combo Basins: Determine maximum dry season inflow to maintain permanent pond in the dry season. Use Table DB-2 and an evaporation rate of 0.45 in/day for the Sacramento area. $Q_{inflow} = -Q_{E-P} + Q_{seepage}$		Q_{E-P} =		acre-ft/mo
		$Q_{seepage}$ =		acre-ft/mo
		Q_{Inflow} =		acre-ft/mo
5. Outlet				
a. Outlet Type:	orifice / Notch / Riser			
b. Drawdown Time		Time =	50	Hours

See SAHM Drawdown Time Results

Design Data Summary Sheet for Water Quality Detention Basin (Page 2 of 2)

Project: The Preserve - Dry Basin

6. Basin Shape

Length-Width Ratio (2:1 minimum)	Ratio =	4:1	L:W

7. Embankment Side Slope

a. Interior Side Slope (4:1 or flatter)	Slope =	4:1	H:V
b. Exterior Side Slope (3:1 or flatter)	Slope =		H:V

8. Maintenance Access Ramp

a. Slope (10% maximum)	Slope =		%
b. Width (15 to 20 feet)	Width =		ft

9. Vegetation (describe)

Native Grasses: This vegetation is most appropriate for dry basin and no irrigation

Irrigated Turf:

Trees:

Emergent Aquatic Plants (specify type/density):

Other:

Notes: Access provided to Basin and outlet structure, but no ramp into basin provided at this time.

Appendix 7 - HEC-RAS Output for Existing Condition 10-year storm and 100-year storm

Sacramento Hydrologic C lator Report

August 2, 2005 1 .20

Project Title: EXISTING
Comments: Onsite existing conditions and offsite existing conditions. Mining tailings have soil type A and very long flow paths.
Prepared by: SGL
Method: Sacramento County HEC-1 method
Date: 6/20/2005

Appendix 10 - Drawdown Calculations

Water Quality

Drawdown Time Results

Pond: Water Quality Basin 1

Days	Stage(feet)	Percent of Total Run Time
1	0.950	6.9747
2	4.662	0.4361
3	8.000	N/A
4	8.000	N/A
5	8.000	N/A

Maximum Stage: 8.000 Drawdown Time: 02 01:41:30

Appendix 11 - Preliminary Grading Plan included with Tentative Map package

NOTES:
1. ALL STORM DRAIN PIPE SIZES ARE PRELIMINARY AND SUBJECT TO CHANGE UPON DESIGN OF IMPROVEMENT PLANS
2. ALL INLETS SHALL BE 12" DIAMETER PIPES UNLESS OTHERWISE NOTED.
3. ALL EXISTING TREES WITHIN LIMIT OF GRADING WILL BE REMOVED. ALL EXISTING TREES OUTSIDE OF LIMIT OF GRADING SHALL BE PROTECTED. PLEASE REFER TO ARBORIST SURVEY REPORT FOR MORE INFORMATION ON TREE SURVEY DATA.
4. PROJECT IS NOT WITHIN 100-YEAR FLOODPLAIN.

Introduction

The proposed The Preserve Residential Development (project) is located north of Douglas Road, in between Security Park Drive and Raymer Way in Rancho Cordova, California. The project proposes the development of 434 single-family residential lots, public parks, and preserve area on a currently undeveloped 284-acre parcel. The proposed development is located within the Sunrise Douglas Community Plan. Existing land uses in the project vicinity include residential to the south, undeveloped residential to the west, and agricultural to the north and east. The project site location and site plan are shown on Figures 1 and 2, respectively.

The purposes of this assessment are to quantify the existing noise and vibration environments, identify potential noise and vibration impacts resulting from the project, identify appropriate mitigation measures, and provide quantitative and qualitative analyses of impacts associated with the project. Specifically, impacts are identified if project-related activities would cause a substantial increase in ambient noise or vibration levels at existing sensitive uses in the project vicinity, or if traffic or project generated noise or vibration levels would exceed applicable Rancho Cordova standards at existing or proposed sensitive uses within the project vicinity.

Noise and Vibration Fundamentals

Noise

Noise is often described as unwanted sound. Sound is defined as any pressure variation in air that the human ear can detect. If the pressure variations occur frequently enough (at least 20 times per second), they can be heard and are designated as sound. The number of pressure variations per second is called the frequency of sound and is expressed as cycles per second, or Hertz (Hz). Definitions of acoustical terminology are provided in Appendix A.

Measuring sound directly in terms of pressure would require a very large and awkward range of numbers. To avoid this, the decibel scale was devised. The decibel scale uses the hearing threshold (20 micropascals of pressure) as a point of reference, defined as 0 dB. Other sound pressures are then compared to the reference pressure, and the logarithm is taken to keep the numbers in a practical range. The decibel scale allows a million-fold increase in pressure to be expressed as 120 dB. Another useful aspect of the decibel scale is that changes in decibel levels correspond closely to human perception of relative loudness. Noise levels associated with common noise sources are provided in Figure 3.

The perceived loudness of sounds is dependent upon many factors, including sound pressure level and frequency content. However, within the usual range of environmental noise levels, perception of loudness is relatively predictable and can be approximated by filtering the frequency response of a sound level meter by means of the standardized A-weighting network. There is a strong correlation between A-weighted sound levels (expressed as dBA) and community response to noise. For this reason, the A-weighted sound level has become the standard tool of environmental noise assessment. All noise levels reported in this section are in terms of A-weighted levels.

Community noise is commonly described in terms of the ambient noise level, which is defined as the all-encompassing noise level associated with a given noise environment. A common statistical tool to measure the ambient noise level is the average, or equivalent, sound level (L_{eq}). The L_{eq} is the foundation of the day-night average noise descriptor, DNL (or L_{dn}), and shows very good correlation with community response to noise.

The day-night average sound level (DNL) is based on the average noise level over a 24-hour day, with a +10-decibel weighting applied to noise occurring during nighttime (10:00 PM to 7:00 AM) hours. The nighttime penalty is based on the assumption that people react to nighttime noise exposures as though they were twice as loud as daytime exposures. Because DNL represents a 24-hour average, it tends to disguise short-term variations in the noise environment.

Vibration

Vibration is like noise in that it involves a source, a transmission path, and a receiver. While vibration is related to noise, it differs in that noise is generally considered to be pressure waves transmitted through air, while vibration is usually associated with transmission through the ground or structures. As with noise, vibration consists of an amplitude and frequency. A person's response to vibration will depend on their individual sensitivity as well as the amplitude and frequency of the source.

Vibration can be described in terms of acceleration, velocity, or displacement. A common practice is to monitor vibration in terms of velocity in inches per second peak particle velocity (IPS, PPV) or root-mean-square (VdB, RMS). Standards pertaining to perception as well as damage to structures have been developed for vibration in terms of peak particle velocity as well as RMS velocities.

As vibrations travel outward from the source, they excite the particles of rock and soil through which they pass and cause them to oscillate. Differences in subsurface geologic conditions and distance from the source of vibration will result in different vibration levels characterized by different frequencies and intensities. In all cases, vibration amplitudes will decrease with increasing distance. The maximum rate, or velocity of particle movement, is the commonly accepted descriptor of the vibration "strength".

Human response to vibration is difficult to quantify. Vibration can be felt or heard well below the levels that produce any damage to structures. The duration of the event has an effect on human response, as does frequency. Generally, as the duration and vibration frequency increase, the potential for adverse human response increases.

According to the Transportation and Construction-Induced Vibration Guidance Manual (Caltrans, June 2004), operation of construction equipment and construction techniques generate ground vibration. Traffic traveling on roadways can also be a source of such vibration. At high enough amplitudes, ground vibration has the potential to damage structures and/or cause cosmetic damage. Ground vibration can also be a source of annoyance to individuals who live or work close to vibration-generating activities. However, traffic, rarely generates vibration amplitudes high enough to cause structural or cosmetic damage.

Environmental Setting – Existing Ambient Noise and Vibration Environment

Existing Noise-Sensitive Land Uses in the Project Vicinity

Noise-sensitive land uses are generally defined as locations where people reside or where the presence of unwanted sound could adversely affect the primary intended use of the land. Places where people live, sleep, recreate, worship, and study are generally considered to be sensitive to noise because intrusive noise can be disruptive to these activities.

The existing noise-sensitive land uses which would potentially be affected by the project consist of residential uses. Specifically, existing single-family residential land uses are located to the south the proposed development (within a subdivision). In addition, existing residences are sparsely located on agriculturally zoned properties north of the project. Although agricultural uses are typically not considered to be noise-sensitive, residences located on agricultural lands would be. The project area and surrounding land uses are shown on Figure 1.

Existing Traffic Noise Levels along Project Area Roadway Network

The FHWA Traffic Noise Model (FHWA-RD-77-108) was used to develop existing noise contours expressed in terms of DNL for major roadways within the project study area. The FHWA Model predicts hourly L_{eq} values for free-flowing traffic conditions. Estimates of the hourly distribution of traffic for a typical 24-hour period were used to develop DNL values from L_{eq} values.

Traffic data in the form of AM and PM peak hour movements for existing conditions were obtained from the client prepared by Kimley-Horn & Associates, Inc. Average daily traffic volumes were conservatively estimated by applying a factor of 5 to the sum of AM and PM peak hour conditions. Using these data and the FHWA Model, traffic noise levels were calculated. The traffic noise level at 100 feet from the roadway centerline and distances from the centerlines of selected roadways to the 60 dB, 65 dB, and 70 dB DNL contours are summarized in Table 1.

In many cases, the actual distances to noise level contours may vary from the distances predicted by the FHWA Model. Factors such as roadway curvature, roadway grade, shielding from local topography or structures, elevated roadways, or elevated receivers may affect actual sound propagation. It is also recognized that existing sensitive land uses within the project vicinity are located varying distances from the centerlines of the local roadway network. The 100-foot reference distance is utilized in this assessment to provide a reference position at which changes in existing and future traffic noise levels resulting from the project can be evaluated. Appendix B contains the FWHA Model inputs for existing conditions.

Existing Overall Ambient Noise Environment within the Project Area

The existing ambient noise environment within the project area is defined primarily by noise from traffic on Grant Line Road and Raymer Way. To generally quantify existing ambient noise levels within the project area, two long-term (48-hour) ambient noise surveys were conducted from July 10-12, 2019 and one short-term (15-minute) ambient noise survey was conducted on July 10, 2019. The ambient noise measurement locations are shown on Figure 1. Photographs of the noise survey locations are provided in Appendix C.

Larson Davis Laboratories (LDL) Model 820 precision integrating sound level meters were used to complete the noise level measurement surveys. The meters were calibrated before use with an LDL Model CA200 acoustical calibrator to ensure the accuracy of the measurements. The equipment used meets all specifications of the American National Standards Institute requirements for Type 1 sound level meters (ANSI S1.4).

The long-term ambient noise survey results are summarized in Table 2. The detailed results of the long-term noise survey are contained in Appendix D in tabular format and graphically in Appendix E. A summary of the short-term noise measurement results is provided in Table 3.

Table 2
Long-Term Noise Level Measurement Results – July 10-12, 2019[1]

				Average Measured Hourly Noise Levels, dB			
				Daytime[3]		Nighttime[4]	
Site[2]	Description	Date	DNL	L_{eq}	L_{max}	L_{eq}	L_{max}
LT-1	Centrally located on project site, near terminus of Edington Drive	7/10-7/11	47	45	62	40	51
		7/11-7/12	47	45	60	39	53
LT-2	Eastern end of project site, approximately 90 feet from centerline of Raymer Way	7/10-7/11	55	50	69	49	65
		7/11-7/12	55	51	72	48	65

[1] Detailed summaries of the noise monitoring results are provided in Appendices D and E.
[2] Ambient noise monitoring locations are identified on Figure 1.
[3] Daytime hours: 7:00 a.m. to 10:00 p.m.
[4] Nighttime hours: 10:00 p.m. to 7:00 a.m.

Table 3
Short-Term Noise Level Measurement Results – July 10, 2019

			Measured Noise Levels, dB[3]	
Site[1]	Description	Time of Day	L_{eq}	L_{max}
ST-1	Southwestern end of the project site	12:23 PM	42	58

[1] Ambient noise monitoring location is identified on Figure 1.
Source: Bollard Acoustical Consultants, Inc. (2019)

The Table 2 data indicate that existing ambient noise levels at the project site were satisfactory relative to the Rancho Cordova General Plan normally acceptable and conditionally acceptable exterior traffic noise level standards of 60 and 65 dB DNL for new residential land uses, respectively. Results from the short-term noise survey indicate that the measured average and maximum noise levels at site ST-1 were 42 dB L_{eq} and 58 dB L_{max}, respectively (Table 3).

Existing Ambient Vibration Environment

During a site visit on July 10, 2019, vibration levels were below the threshold of perception at the project site. Nonetheless, to quantify existing vibration levels at the project site, BAC conducted short-term (15-minute) vibration measurements at the project site on July 10, 2019. The vibration measurement sites are shown on Figure 1. Photographs of the vibration measurement sites are shown in Appendix C.

A Larson-Davis Laboratories Model LxT precision integrating sound level meter equipped with a vibration transducer was used to complete the measurements. The results are summarized below in Table 4.

Table 4
Ambient Vibration Monitoring Results – July 10, 2019

Site[2]	Description	Time	Average Measured Vibration Level, PPV (in. sec)[1]
V-1	Eastern end of the project site	11:36 AM	<0.001
V-2	Centrally located on the project site	12:23 PM	<0.001
V-3	Southwestern end of the project site	12:58 PM	<0.001

[1] PPV = Peak Particle Velocity (inches/second)
Source: Bollard Acoustical Consultants, Inc. (2019)

The Table 4 data indicate that measured average vibration levels within the project area were less than 0.001 in/sec PPV.

Regulatory Setting: Criteria for Acceptable Noise and Vibration Exposure

Federal

The City of Rancho Cordova General Plan establishes criteria for assessing noise impacts associated with increases in ambient noise levels from new roadway projects. However, the City does not currently have criteria for assessing noise impacts associated with increases in ambient noise levels from project-generated traffic within the project vicinity. As a result, the following federal noise criteria established by the Federal Interagency Commission on Noise (FICON) was applied to the project.

Federal Interagency Commission on Noise (FICON)

The Federal Interagency Commission on Noise (FICON) has developed a graduated scale for use in the assessment of project-related noise level increases. The criteria shown in Table 5 was developed by FICON as a means of developing thresholds for impact identification for project-related noise level increases. The FICON standards have been used extensively in recent years by the authors of this section in the preparation of the noise sections of Environmental Impact Reports that have been certified in many California cities and counties.

The use of the FICON standards are considered conservative relative to thresholds used by other agencies in the State of California. For example, the California Department of Transportation (Caltrans) requires a project-related traffic noise level increase of 12 dB for a finding of significance, and the California Energy Commission (CEC) considers project-related noise level increases between 5 to 10 dB significant, depending on local factors. Therefore, the use of the FICON standards, which set the threshold for finding of significant noise impacts as low as 1.5 dB, provides a very conservative approach to impact assessment for this project.

Table 5
Significance of Changes in Cumulative Noise Exposure

Ambient Noise Level Without Project (L_{dn} or CNEL)	Change in Ambient Noise Level Due to Project
<60 dB	+5.0 dB or more
60 to 65 dB	+3.0 dB or more
>65 dB	+1.5 dB or more
Source: Federal Interagency Committee on Noise (FICON)	

Based on the FICON research, as shown in Table 5, a 5 dB increase in noise levels due to a project is required for a finding of significant noise impact where ambient noise levels without the project are less than 60 dB. Where pre-project ambient conditions are between 60 and 65 dB, a 3 dB increase is applied as the standard of significance. Finally, in areas already exposed to higher noise levels, specifically pre-project noise levels in excess of 65 dB, a 1.5 dB increase is considered by FICON as the threshold of significance.

State of California

California Environmental Quality Act (CEQA)

The State of California has established regulatory criteria that are applicable to this assessment. Specifically, Appendix G of the State of California Environmental Quality Act (CEQA) Guidelines are used to assess the potential significance of impacts pursuant to local General Plan policies, Municipal Code standards, or the applicable standards of other agencies. According to Appendix G of the CEQA guidelines, the project would result in a significant noise or vibration impact if the following occur:

A. Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or other applicable standards of other agencies?

B. Generation of excessive groundborne vibration or groundborne noise levels?

C. For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels?

It should be noted that audibility is not a test of significance according to CEQA. If this were the case, any project which added any audible amount of noise to the environment would be considered significant according to CEQA. Because every physical process creates noise, the use of audibility alone as significance criteria would be unworkable. CEQA requires a substantial increase in noise levels before noise impacts are identified, not simply an audible change.

California Department of Transportation (Caltrans)

The City of Rancho Cordova does not currently have adopted standards for groundborne vibration. As a result, the vibration impact criteria developed by the California Department of Transportation (Caltrans) was applied to the project. The Caltrans criteria applicable to damage and annoyance from transient and continuous vibration typically associated with construction activities are presented in Tables 6 and 7. Equipment or activities typical of continuous vibration include: excavation equipment, static compaction equipment, tracked vehicles, traffic on a highway, vibratory pile drivers, pile-extraction equipment, and vibratory compaction equipment. Equipment or activities typical of single-impact (transient) or low-rate repeated impact vibration include impact pile drivers, blasting, drop balls, “pogo stick” compactors, and crack-and-seat equipment (California Department of Transportation 2013).

Table 6
Guideline Vibration Damage Potential Threshold Criteria

Structure and Condition	Maximum PPV (inches/second)	
	Transient Sources	Continuous/Frequent Intermittent Sources
Extremely fragile historic buildings, ruins, ancient monuments	0.12	0.08
Fragile buildings	0.20	0.10
Historic and some old buildings	0.50	0.25
Older residential structures	0.50	0.30
New residential structures	1.00	0.50
Modern industrial/commercial buildings	2.00	0.50

Note: Transient sources create a single isolated vibration event, such as blasting or drop balls. Continuous/frequent intermittent sources include pile drivers, pogo-stick compactors, crack-and-seat equipment, vibratory pile drivers, and vibratory compaction equipment.

PPV = Peak Particle Velocity

Source: California Department of Transportation, Transportation and Construction Vibration Guidance Manual (2013).

Table 7
Guideline Vibration Annoyance Potential Criteria

Human Response	Maximum PPV (inches/second)	
	Transient Sources	Continuous/Frequent Intermittent Sources
Barely perceptible	0.40	0.01
Distinctly perceptible	0.25	0.04
Strongly perceptible	0.90	0.10
Severe	2.00	0.40

Note: Transient sources create a single isolated vibration event, such as blasting or drop balls. Continuous/frequent intermittent sources include pile drivers, pogo-stick compactors, crack-and-seat equipment, vibratory pile drivers, and vibratory compaction equipment.

PPV = Peak Particle Velocity

Local

Rancho Cordova General Plan

The Noise Element of the Rancho Cordova General Plan contains the County's noise-related goals, policies, and actions. The specific noise-related criteria which are generally applicable to this project are reproduced below:

GOAL N.1 **Ensure that all new development will be free of noise disturbances.**

Policy N.1.1 Establish standards and policies consistent with those in Tables 7 and 8 (General Plan Tables N-1 and N-2) to govern maximum sound levels in new development.

Action N.1.1.1: Adopt a noise ordinance with noise level performance standards, including maximum allowable noise exposure, ambient versus nuisance noise, method of measuring noise, and enforcement procedures.

Policy N.1.2 Ensure that the indoor and outdoor areas of new projects will be located, constructed, and/or shielded from noise sources in compliance with the City's noise standards to the maximum extent feasible.

Action N.1.2.1: Require new development of noise-creating uses to conform to the City's maximum noise levels.

Action N.1.2.2: Require an acoustical analysis as part of the environmental review process when noise-sensitive land uses are proposed in areas where current or projected exterior noise levels exceed the City's standards.

Action N.1.2.3: Require any potential noise impacts identified during the acoustical analysis to be mitigated in the project design to the maximum extent feasible.

Policy N.1.4 Mitigate noise created by proposed non-transportation noise sources to comply with the City's noise standards to the maximum extent feasible.

Action N.1.4.1: Limit construction activity to the hours of 7:00 AM to 7:00 PM weekdays and 8:00 AM to 6:00 PM weekends when construction is conducted in proximity to residential uses.

Action N.1.4.3: Require stationary construction equipment and construction staging areas to be set back from existing noise-sensitive land uses.

Policy N.1.5 Mitigate noise created by the construction of new transportation noise sources (such as roadways or new light rail service) to the maximum extent feasible to comply with the City's standards.

Policy N.1.7 To the extent feasible and appropriate, the City shall require the use of temporary construction noise control measures for public and private projects that may include the use of temporary noise barriers, temporary relocation of noise-sensitive land uses or other appropriate measures.

Table 8
Noise Level Performance Standards for New Projects
Affected by or Including Non-Transportation Noise Sources[1]

Stationary Noise Source	Noise Level Descriptor	Daytime (7 AM to 10 PM)	Nighttime (10 PM to 7 AM)
Typical	Hourly L_{eq}, dB	55	45
Tonal, impulsive, repetitive, or consist primarily of speech or music	Hourly L_{eq}, dB	50	40

[1] The City may impose noise level standards which are more or less restrictive than those specified above based upon determination of existing low or high ambient noise levels.

Source: Rancho Cordova General Plan, Noise Element, Table N-1

Table 9
Maximum Transportation Noise Exposure

Land Use	Outdoor Activity Areas[2] L_{dn}/CNEL, dB	Interior Spaces L_{dn}/CNEL, dB	Interior Spaces L_{eq}, dB[2]
Residential	60[3]	45	--
Residential subject to noise from railroad tracks, aircraft overflights, or similar noise sources which produce clearly identifiable, discrete noise events (e.g., the passing of a single train)	60[3]	40[5]	--
Transient lodging	60[4]	45	--
Hospitals, nursing homes	60[4]	45	--
Theatres, auditoriums, music halls	--	--	35
Churches, meeting halls	60[3]	--	40
Office buildings	--	--	45
Schools, libraries, museums	--	--	45
Playgrounds, neighborhood parks	70	--	--

[1] Where the location of outdoor activity areas is unknown, the exterior noise level standard shall be applied to the property line of the receiving land use. Where it is not practical to mitigate exterior noise levels at patio or balconies of apartment complexes, a common area such as a pool or recreation area may be designated as the outdoor activity area.

[2] As determined for a typical worst-case hour during periods of use.

[3] Where it is not possible to reduce noise in outdoor activity areas to 60 dB Ldn/CNEL or less using a practical application of the best-available noise reduction measures, an exterior noise level of up to 65 dB Ldn/CNEL may be allowed provided that available exterior noise level reduction measures have been implemented and interior noise levels are in compliance with this table.

[4] In the case of hotel/motel facilities or other transient lodging, outdoor activity areas such as pool areas may not be included in the project design. In these cases, only the interior noise level criterion will apply.

[5] The intent of this noise standard is to provide increased protection against sleep disturbance for residences located near railroad tracks.

Rancho Cordova Municipal Code (Noise Ordinance)

Section 6.68.070 of the Rancho Cordova Noise Ordinance contains criteria that would be applicable to the project. The code sections which are generally applicable to this project are reproduced below.

6.68.070 Exterior noise standards.

A. The following noise standards, unless otherwise specifically indicated in this chapter, shall apply to all properties within a designated noise area:

Table 10

Noise Area	City Zoning Districts	Time Period	Exterior Noise Standard
1	RE-1, RD-1, RE-2, RD-2, RE-3, RD-3, RD-4, R-1-A, RD-5, R-2, RD-10, R-2A, RD-20, R-3, RD-30, RD-40, RM-1, RM-2, A-1-B, AR-1, A-2, AR-2, AR-5	7:00 a.m. – 10:00 p.m.	55 dBA
		10:00 p.m. – 7:00 a.m.	50 dBA
Source: Rancho Cordova Municipal Code, Chapter 6.68, Code Section 6.68.070(A)			

B. It is unlawful for any person at any location within the city to create any noise which causes the noise levels on an affected property, when measured in the designated noise area, to exceed for the duration of time set forth following, the specified exterior noise standards in any one hour by:

Table 11

Cumulative Duration of the Intrusive Sound	Allowable Decibels
1. Cumulative period of 30 minutes per hour	0
2. Cumulative period of 15 minutes per hour	+5
3. Cumulative period of 5 minutes per hour	+10
4. Cumulative period of 1 minute per hour	+15
5. Level no to be exceeded for any time per hour	+20
Source: Rancho Cordova Municipal Code, Chapter 6.68, Code Section 6.68.070(B)	

C. Each of the noise limits specified in subsection (B) of this section shall be reduced by 5 dBA for impulsive or simple tone noises, or for noises consisting of speech or music.

D. If the ambient noise level exceeds that permitted by any of the first four noise-limit categories specified in subsection (B) of this section, the allowable noise limit shall be increased in 5 dBA increments in each category to encompass the ambient noise level. If the ambient noise level exceeds the fifth noise level category, the maximum ambient noise level shall be the noise limit for that category.

6.68.090 Exemptions.

The following activities shall be exempted from the provisions of this chapter:

E. Noise sources associated with construction, repair, remodeling, demolition, paving or grading of any real property, provided said activities do not take place between the hours of 8:00 p.m. and 6:00 a.m. on weekdays and Friday commencing at 8:00 p.m. through and including 7:00 a.m. on Saturday, Saturdays commencing at 8:00 p.m. through and including 7:00 a.m. on the next following Sunday, and on each Sunday after the hour of 8:00 p.m.; provided, however when an unforeseen or unavoidable condition occurs during a construction project and the nature of the project necessitates that work in process be continued until a specific phase is completed, the contractor or owner shall be allowed to

continue work after 8:00 p.m., and to operate machinery and equipment necessary until completion of the specific work in progress can be brought to conclusion under conditions which will not jeopardize inspection acceptance or create undue financial hardships for the contractor or owner.

It should be noted that although not specifically identified in the Rancho Cordova Municipal Code, the Noise Element of the Rancho Cordova General Plan states that activities conducted on public parks are generally considered to be exempt from the noise standards established in the City's Noise Ordinance.

Impacts and Mitigation Measures

Thresholds of Significance

For the purposes of this report, a noise and vibration impact is considered significant if the project would result in:

- Generation of a substantial temporary or permanent increase in ambient noise levels in the vicinity of the project in excess of standards established in the local general plan or noise ordinance, or other applicable standards of other agencies; or

- Generation of excessive groundborne vibration or groundborne noise levels; or

- For a project located within the vicinity of a private airstrip or an airport land use plan or, where such a plan has not been adopted, within two miles of a public airport or public use airport, would the project expose people residing or working in the project area to excessive noise levels.

The project site is not within the vicinity of a private airstrip, an airport land use plan, or within two miles of a public airport. Therefore, the last threshold listed above is not discussed further.

The following criteria based on standards established by the Federal Interagency Commission on Noise (FICON), California Department of Transportation (Caltrans), Rancho Cordova General Plan and Rancho Cordova Municipal Code were used to evaluate the significance of environmental noise and vibration resulting from the project:

- A significant noise impact would be identified if the project would expose persons to or generate noise levels that would exceed applicable noise standards presented in the Rancho Cordova General Plan or Rancho Cordova Municipal Code.

- A significant impact would be identified if off-site traffic noise exposure or on-site activities generated by the project would substantially increase noise levels at existing sensitive receptors in the vicinity. A substantial increase would be identified relative to the FICON standards provided in Table 5.

- A significant impact would be identified if project construction activities or proposed on-site operations would expose noise-sensitive receptors to excessive groundborne

vibration levels. Specifically, an impact would be identified if groundborne vibration levels due to these sources would exceed the Caltrans vibration impact criteria.

Noise Impacts Associated with Project-Generated Increases in Off-Site Traffic

With development of the project, traffic volumes on the local roadway network will increase. Those increases in daily traffic volumes will result in a corresponding increase in traffic noise levels at existing uses located along those roadways. The FHWA Model was used with traffic input data from the traffic impact analysis (prepared by Kimley-Horn & Associates, Inc.) to predict project traffic noise level increases relative to Existing (2019) and Cumulative (2035) conditions.

Impact 1: Increases in Existing Traffic Noise Levels due to the Project

Traffic data in the form of AM and PM peak hour movements for Existing and Existing Plus Project conditions in the project area roadway network were obtained from the project transportation impact analysis completed by Kimley-Horn & Associates, Inc. Average daily traffic (ADT) volumes were conservatively estimated by applying a factor of 5 to the sum of AM and PM peak hour conditions.

Existing versus Existing Plus Project traffic noise levels on the local roadway network are shown in Table 12. The following section includes an assessment of predicted traffic noise levels relative to the FICON increase significance noise criteria identified in Table 5. The Table 12 data are provided in terms of DNL (L_{dn}) at a standard distance of 100 feet from the centerlines of the project-area roadways. Appendix B contains the FWHA Model inputs.

Blank cell = no traffic data was provided

Source: FHWA-RD-77-108 with inputs from Kimley-Horn. Appendix B contains the FHWA Model inputs.

As indicated in Table 12, project-generated traffic would not result in a substantial increase of traffic noise levels on the local roadway network relative to the FICON significance criteria identified in Table 5. As a result, off-site traffic noise impacts related to increases in traffic resulting from the implementation of the project (Existing vs. Existing Plus Project conditions) are identified as being ***less than significant***.

Impact 2: Increases in Cumulative Traffic Noise Levels due to the Project

Traffic data in the form of AM and PM peak hour movements for Cumulative and Cumulative Plus Project conditions in the project area roadway network were obtained from the project transportation impact analysis completed by Kimley-Horn & Associates, Inc. Average daily traffic (ADT) volumes were conservatively estimated by applying a factor of 5 to the sum of AM and PM peak hour conditions.

Cumulative versus Cumulative Plus Project traffic noise levels on the local roadway network are shown in Table 13. The following section includes an assessment of predicted traffic noise levels relative to the FICON increase significance noise criteria identified in Table 5. The Table 13 data are provided in terms of DNL (L_{dn}) at a standard distance of 100 feet from the centerlines of the project-area roadways. Appendix B contains the FWHA Model inputs.

Source: FHWA-RD-77-108 with inputs from Kimley-Horn. Appendix B contains the FHWA Model inputs.

The Table 13 data indicate that project-generated traffic would not result in a substantial increase of traffic noise levels on the local roadway network relative to the FICON significance criteria identified in Table 5. As a result, off-site traffic noise impacts related to increases in traffic resulting from the implementation of the project (Cumulative vs. Cumulative Plus Project conditions) are identified as being ***less than significant***.

Noise Impacts Associated with Proposed Uses of the Development

The project proposes the development of approximately 434 single-family lots, public parks, and preserve area. Specifically, the proposed project would preserve approximately 180 acres of open space that would be deeded to a third-party conservation entity, as well as for include the creation of approximately 23 acres of public parks north of the proposed residences. The locations of the proposed park and preserve areas are shown on Figure 2. The primary noise sources associated with proposed uses of the development have been identified as public park activities. An assessment of project-related park activity noise levels at the nearest existing noise-sensitive uses follows. The nearest existing noise-sensitive uses to the development have been identified as a single-family residence located on an agriculturally zoned parcel to the northwest, and single-family residences located within a subdivision to the south (shown on Figure 1).

As noted previously, the Rancho Cordova General Plan Noise Element states that activities conducted on public parks are generally considered to be exempt from the noise standards established in the City's Municipal Code (Noise Ordinance). As a result, the following assessment of project-related public park activity noise level exposure at the nearest existing noise-sensitive uses focuses on compliance with applicable Rancho Cordova General Plan noise level criteria only.

Impact 3: Public Park Noise at Existing Noise-Sensitive Uses

According to the project site plans (Parks Exhibit, dated December 11, 2018), the project proposes two large parks at the north and northeast ends of the development. Figure 2 shows the locations of the proposed parks, identified as Parks 1 and 2. Noise generated by public parks vary depending on whether the parks are intended for passive or active use. Passive use includes picnic and sitting areas whereas active use incudes playing fields and play structures. Although the project site plans illustrate the locations of the proposed public parks, the specific park use

types are unknown at the time of writing this report. To provide a conservative estimate of project park noise exposure at existing noise-sensitive uses, it was assumed for the purposes of this analysis that the proposed public parks would have active uses. According to BAC file data, parks consisting of active uses (playing fields) have noise levels of approximately 50 dB L_{eq} and 70 dB L_{max} at a distance of 100 feet (Appendix F).

Based on the reference noise levels presented above, and assuming standard spherical spreading loss (-6 dB per doubling of distance), park activity noise exposure at the nearest existing noise-sensitive uses (single-family residences) was calculated. The results of those calculations are provided in Table 14.

Because park activities would likely consist of human speech (i.e., shouting and cheering during activities), noise associated with park activities would be subject to the Rancho Cordova General Plan's more restrictive daytime and nighttime hourly average noise level standards of 50 and 40 dB L_{eq} (respectively) shown in Table 8. However, it is reasonable to assume that public park hours would be restricted to daytime hours only (7:00 a.m. to 10:00 p.m.). Therefore, project park noise exposure at the nearest existing noise-sensitive uses was assessed relative to the General Plan daytime hourly average noise level standard of 50 dB L_{eq}.

Table 14
Predicted Public Park Activity Noise Levels at Nearest Existing Noise-Sensitive Uses

Noise-Sensitive Receptor[1]	Nearest Park[2]	Distance (ft)[3]	Predicted Noise Levels, L_{eq} (dB)[4]	General Plan Daytime Noise Standard, L_{eq} (dB)
Residences in Subdivision – South	Park 2	1,000	<20	**50**
Residence on Ag. Property – Northwest	Park 2	1,300	28	

[1] Locations of existing noise-sensitive receptors are shown on Figure 1.
[2] Locations of proposed park areas are shown on Figure 2.
[3] Distances measured from center of nearest park area to receptors.
[4] Predicted park activity noise levels at the nearest residences in the subdivision to the south of the project take into consideration the shielding that would be provided by proposed intervening structures of the development (residences), have been conservatively adjusted by -15 dB to account for this screening.

Source: Bollard Acoustical Consultants, Inc. (2020)

As indicated in Table 14, project park noise level exposure is predicted to satisfy the applicable Rancho Cordova General Plan daytime noise level standard at the nearest existing noise-sensitive uses (single family residential uses to the south and northwest of the project site). Because project park activity noise level exposure is predicted to satisfy the applicable Rancho Cordova General Plan noise level criterion, this impact is identified as being ***less than significant.***

Noise Impacts Associated with Project Construction Activities

Impact 4: Project Construction Noise Levels at Existing Noise-Sensitive Uses

During project construction, heavy equipment would be used for grading excavation, paving, and building construction, which would increase ambient noise levels when in use. Noise levels would vary depending on the type of equipment used, how it is operated, and how well it is maintained.

Noise exposure at any single point outside the project work area would also vary depending upon the proximity of equipment activities to that point. The nearest existing noise-sensitive uses (single-family residential within the subdivision to the south) are located approximately 25 feet from where construction activities would occur within the development.

Table 15 includes the range of maximum noise levels for equipment commonly used in general construction projects at full-power operation at a distance of 50 feet. Not all of these construction activities would be required of this project. The Table 15 data also include predicted maximum equipment noise levels at the nearest existing residential uses located approximately 25 feet away, which assume a standard spherical spreading loss of 6 dB per doubling of distance.

Table 15
Construction Equipment Reference Noise Levels and Predicted Noise Levels at 25 Feet

Source: Federal Transit Administration Noise and Vibration Impact Assessment Manual, Table 7-1 (2018)

Based on the equipment noise levels in Table 15, worst-case on-site project construction equipment noise levels at the nearest existing residential uses located 25 feet away are expected to range from approximately 82 to 91 dB. Thus, it is possible that a portion of the project construction equipment could result in substantial short-term increases over ambient maximum noise levels at the nearest existing noise-sensitive uses. Furthermore, it is possible that those

noise levels could exceed the applicable Rancho Cordova General Plan and Municipal Code noise level limits.

As noted in the Regulatory Setting Section of this report, Section 6.68.090 of the Rancho Cordova Municipal Code exempts noise sources associated with construction provided such activities do not take place between specific hours. However, if construction activities are proposed during the hours not exempted by Municipal Code Section 6.68.090, noise levels generated by construction activities would likely exceed the maximum noise level standards identified in Table 15 at the nearest existing residential uses.

Because project construction equipment noise levels could potentially exceed the applicable Rancho Cordova General Plan and Municipal Code noise level standards at the closest existing noise-sensitive uses, noise impacts associated with construction activities are identified as being **potentially significant**.

Mitigation Impact 4:

In order to comply with applicable Rancho Cordova Municipal Code noise level standards, and in order to reduce to potential for an exceedance of applicable Rancho Cordova General Plan noise level criteria, the following measures should be incorporated into project construction operations:

MM 4: To the maximum extent practical, the following measures should be incorporated into the project construction operations:

- Noise-generating construction activities shall occur within the hours and days identified in Section 6.68.090 of the Rancho Cordova Municipal Code and Policy N.1.4 of the Rancho Cordova General Plan.
- Project construction operations shall comply with the construction related noise abatement measures contained Policies N.1.4, N.1.5, and N.1.7 of the Rancho Cordova General Plan.
- All noise-producing project equipment and vehicles using internal-combustion engines shall be equipped with manufacturers-recommended mufflers and be maintained in good working condition.
- All mobile or fixed noise-producing equipment used on the project site that are regulated for noise output by a federal, state, or local agency shall comply with such regulations while in the course of project activity.
- Electrically powered equipment shall be used instead of pneumatic or internal-combustion-powered equipment, where feasible.
- Material stockpiles and mobile equipment staging, parking, and maintenance areas shall be located as far as practicable from noise-sensitive uses.
- Project area and site access road speed limits shall be established and enforced during the construction period.

- Nearby residences shall be notified of construction schedules so that arrangements can be made, if desired, to limit their exposure to short-term increases in ambient noise levels.

Significance of Impact 4 after Mitigation: ***Less than Significant***

Vibration Impacts Associated with Project Activities

Impact 5: Vibration Generated by Project Construction and On-Site Operations

During project construction, heavy equipment would be used for grading, excavation, paving, and building construction, which would generate localized vibration in the immediate vicinity of the construction. The nearest existing sensitive structures (residences) are located approximately 30 feet from construction activities which would occur within the project site.

Table 16 includes the range of vibration levels for equipment commonly used in general construction projects at a distance of 25 feet. The Table 16 data also include predicted equipment vibration levels at the nearest existing residences to the project site located approximately 30 feet away.

Table 16
Vibration Source Levels for Construction Equipment and Predicted Levels at 30 Feet

Equipment	Maximum PPV (inches/second)[1]	
	Maximum PPV at 25 Feet[2]	Predicted PPV at 30 Feet
Large bulldozer	0.089	0.068
Hoe ram	0.089	0.068
Caisson drilling	0.089	0.068
Loaded trucks	0.076	0.058
Backhoe	0.051	0.039
Excavator	0.051	0.039
Grader	0.051	0.039
Loader	0.051	0.039
Jackhammer	0.035	0.027
Small bulldozer	0.003	0.002

[1] PPV = Peak Particle Velocity
[2] Reference vibration level obtained from the Federal Transit Administration (FTA), Transit Noise and Vibration Impact Assessment Manual (2018).

As indicated in Table 16, vibration levels generated from on-site construction activities at the nearest existing residence located approximately 30 feet away are predicted to be well below the strictest Caltrans thresholds for damage to residential structures of 0.30 in/sec PPV shown in Table 6. Further, the predicted vibration levels in Table 16 are well below the threshold for a severe human response as defined by Caltrans in Table 7. Therefore, on-site construction within the project area is not expected to result in excessive groundborne vibration levels at nearby existing residential uses.

Results from the ambient vibration level monitoring at the project site (Table 4) indicate that measured average vibration levels were well below the strictest Caltrans thresholds for damage

to structures and thresholds for annoyance. Therefore, it is expected that the project would not result in the exposure of persons to excessive groundborne vibration levels at proposed uses of the project.

The project proposes residential and park uses within the development. It is the experience of BAC that residential and park uses do not typically have equipment that generates appreciable vibration. Further, it is our understanding that the residential and park components of the project do not propose equipment that will produce appreciable vibration.

Because vibration levels due to and upon the proposed project are expected to satisfy the applicable Caltrans groundborne impact vibration criteria, this impact is considered to be ***less than significant***.

Noise Impacts Upon the Development

The California Supreme Court issued an opinion in *California Building Industry Association v. Bay Area Air Quality Management District (2015)* holding that CEQA is primarily concerned with the impacts of a project on the environment and generally does not require agencies to analyze the impact of existing conditions on a project's future users or residents. Nevertheless, the City of Rancho Cordova has policies that address existing/future conditions affecting the proposed project, which are discussed in the following section.

On-Site Traffic Noise Impacts

Impact 6: Future Exterior Traffic Noise Levels at Proposed Uses

The FHWA Model was used with future traffic data to predict future exterior traffic noise levels at the proposed residential and park uses of the development. The future (Cumulative Plus Project) average daily traffic (ADT) volumes for Grant Line Road and Raymer Way were calculated using data provided in the project traffic impact analysis prepared by Kimley-Horn & Associates, Inc. Specifically, future average daily traffic (ADT) volumes were conservatively estimated by applying a factor of 5 to the sum of AM and PM peak hour conditions. The predicted future Grant Line Road and Raymer Way traffic noise levels at the nearest proposed residential and park uses to the roadways are summarized in Table 17. Detailed FHWA Model inputs and results are provided in Appendix G.

Table 17
Predicted Future Exterior Traffic Noise Levels at Proposed Uses[1]

Roadway[2]	Location	Distance from Centerline (ft)[3]	Future Exterior DNL (dB)[4]
Grant Line Road	Nearest park (Park 1)	1,080	57
	Nearest residential backyards	1,050	57
	Nearest first-floor residential facades	1,060	57
	Nearest upper-floor residential facades	1,060	59
Raymer Way	Nearest park (Park 1)	450	53
	Nearest residential backyards	110	63
	Nearest first-floor residential facades	120	62
	Nearest upper-floor residential facades	120	64
Combined Roadways	Nearest park (Park 1)	--	59
	Nearest residential backyards	--	64
	Nearest first-floor residential facades	--	63
	Nearest upper-floor residential facades	--	65

[1] A complete listing of FHWA Model inputs and results are provided in Appendix G.
[2] Locations of proposed uses are shown on Figure 2.
[3] Distances measured from said locations to the roadway centerline.
[4] A +2 dB offset was applied to upper-floor facades for reduced ground absorption of sound at elevated locations.
Source: Bollard Acoustical Consultants, Inc. (2020)

As indicated in Table 17, predicted future combined Grant Line Road and Raymer Way traffic noise level exposure at the nearest proposed park use of the development (Park 1) would satisfy the applicable Ranch Cordova General Plan exterior noise level standard of 70 dB DNL for playgrounds and neighborhood park uses. However, at the nearest residential backyards, future combined traffic noise level exposure is predicted to exceed the General Plan exterior noise level standard of 60 dB DNL for residential uses. As a result, this impact is identified as being **potentially significant**.

Mitigation Impact 6:

In order to reduce future Grant Line Road and Raymer Way traffic noise level exposure to a state of compliance with the Rancho Cordova General Plan 60 dB DNL exterior noise level standard at the nearest backyards to the roadways, the following noise mitigation measure should be implemented:

MM 6: Solid traffic noise barriers measuring a minimum of 6-feet in height (relative to backyard elevation) should be constructed at the locations illustrated on Figure 2. The traffic noise barriers could take the form of masonry wall, earthen berm, or a combination of the two. Other materials may be acceptable but should be reviewed by an acoustical consultant prior to use.

Table 18 shows the predicted mitigated future combined Grant Line Road and Raymer Way traffic noise levels at the nearest backyards to the roadways. As

shown in Table 18, mitigated future combined traffic noise level exposure is predicted to satisfy the applicable Rancho Cordova General Plan 60 dB DNL exterior noise level standard at the backyards proposed nearest to the roadways.

Table 18
Predicted Future Exterior Traffic Noise Levels – Mitigated[1]

Roadway[2]	Location	Predicted Mitigated Noise Level, DNL (dB)[4]
Combined Roadways	Nearest backyards	58

[1] Predicted mitigated noise levels include consideration of the shielding provided by a 6-foot solid noise barrier at the locations illustrated on Figure 2.

Source: Bollard Acoustical Consultants, Inc. (2020)

Significance of Impact 6 after Mitigation: ***Less than Significant***

Impact 7: Future Interior Traffic Noise Levels at Proposed Residential Uses

After implementation of Mitigation Measure 6 (construction of 6-foot-tall traffic noise barriers), future combined exterior traffic noise levels from Grant Line Road and Raymer Way are predicted to be approximately 58 dB DNL at the first-floor facades of the residences constructed nearest to the roadways. Due to reduced ground absorption at elevated positions and lack of shielding by the noise barriers identified in Mitigation Measure 6, future combined traffic noise levels at the upper-floor facades of those residences are predicted to be approximately 65 dB DNL. In order to satisfy the Rancho Cordova General Plan 45 dB DNL interior noise level standard, minimum noise reductions of 13 dB and 20 dB would be required of the first- and upper-floor building facades (respectively) of the residences constructed adjacent to the roadway.

Standard building construction (stucco siding, STC-27 windows, door weather-stripping, exterior wall insulation, composition plywood roof), typically results in an exterior to interior noise reduction of approximately 25 dB with windows closed and approximately 15 dB with windows open. This level of noise reduction would be adequate to reduce future Grant Line Road and Raymer Way traffic noise levels within all residences in this development to 45 dB DNL or less. As a result, no consideration of additional building facade construction improvements would be required for residences of the proposed development provided mechanical ventilation (air conditioning) is included to allow occupants to close doors and windows as desired for additional acoustical isolation. As a result, this impact is considered to be ***less than significant***.

Impact 8: Public Park Noise at Proposed Residential Uses

According to the project site plan illustrated on Figure 2, public parks are proposed to be located adjacent to residential uses at the north end of the development. Public park activities have been identified as a primary noise source that could impact nearby residential uses proposed within the development.

As noted previously, the Rancho Cordova General Plan Noise Element states that activities conducted on public parks are generally considered to be exempt from the noise standards

established in the City's Municipal Code (Noise Ordinance). Because noise associated with parks is not exempted by the Rancho Cordova General Plan, project public park noise level exposure would be subject to General Plan noise criteria. Because park activities would likely consist of human speech (i.e., shouting and cheering during activities), noise associated with park activities would be subject to the General Plan's more restrictive daytime and nighttime hourly average noise level standards of 50 and 40 dB L_{eq} (respectively) shown in Table 8. However, it is reasonable to assume that public park hours would be restricted to daytime hours only (7:00 a.m. to 10:00 p.m.). Based on the above information, project park noise exposure at the nearest proposed uses was assessed relative to the Rancho Cordova General Plan daytime hourly average noise level standard of 50 dB L_{eq}.

An analysis of predicted public park noise exposure at existing noise-sensitive uses (residential uses) was presented in **Impact 3**. BAC file data referenced in that analysis indicate that parks consisting of active uses have noise levels of up to 50 dB L_{eq} and 70 dB L_{max} at a distance of 100 feet. The nearest proposed residential uses to a public park maintain a separation of approximately 70 feet from the center of the park. Based on the reference noise level presented above, and assuming standard spherical spreading loss (-6 dB per doubling of distance), park activity noise exposure at the nearest proposed residential uses located 70 feet away was calculated to be 53 dB L_{eq}. The predicted park activity noise level of 53 dB L_{eq} at the nearest residential uses would exceed the applicable Rancho Cordova General Plan daytime hourly average noise level standard of 50 dB L_{eq}. As a result, this impact is identified as being **potentially significant**.

Mitigation Impact 8:

In order to reduce to reduce the potential for an exceedance of the Rancho Cordova General Plan daytime hourly average noise level standard of 50 dB L_{eq} at adjacent proposed residential uses, the following public park noise mitigation measure should be implemented:

MM 8: Solid noise barriers measuring a minimum of 6-feet in height (relative to backyard elevation) should be constructed at the locations illustrated on Figure 2. The recommended noise barrier extension could take the form of a solid masonry wall or wood fence. Should the construction of a wood fence be selected as a barrier, the fence slats should overlap by a minimum of two inches and be screwed to the framing rather than nailed. The purpose of the overlapping slats and using screws rather than nails is to ensure that prolonged exposure to the elements does not result in visible gaps through the slats which would result in reduced noise barrier effectiveness. The final barrier design should be reviewed by an acoustical consultant prior to installation.

The construction of 6-foot tall noise barriers at the locations illustrated on Figure 2 would reduce predicted park noise level levels to 48 dB L_{eq} or less at the nearest residential uses, and would satisfy the Rancho Cordova General Plan hourly average daytime noise level standard of 50 dB L_{eq}.

Significance of Impact 8 after Mitigation: ***Less than Significant***

Appendix A
Acoustical Terminology

Acoustics The science of sound.

Ambient Noise The distinctive acoustical characteristics of a given space consisting of all noise sources audible at that location. In many cases, the term ambient is used to describe an existing or pre-project condition such as the setting in an environmental noise study.

Attenuation The reduction of an acoustic signal.

A-Weighting A frequency-response adjustment of a sound level meter that conditions the output signal to approximate human response.

Decibel or dB Fundamental unit of sound. A Bell is defined as the logarithm of the ratio of the sound pressure squared over the reference pressure squared. A Decibel is one-tenth of a Bell.

CNEL Community Noise Equivalent Level. Defined as the 24-hour average noise level with noise occurring during evening hours (7 - 10 p.m.) weighted by a factor of three and nighttime hours weighted by a factor of 10 prior to averaging.

Frequency The measure of the rapidity of alterations of a periodic signal, expressed in cycles per second or hertz.

IIC Impact Insulation Class (IIC): A single-number representation of a floor/ceiling partition's impact generated noise insulation performance. The field-measured version of this number is the FIIC.

L_{dn} Day/Night Average Sound Level. Similar to CNEL but with no evening weighting.

L_{eq} Equivalent or energy-averaged sound level.

L_{max} The highest root-mean-square (RMS) sound level measured over a given period of time.

Loudness A subjective term for the sensation of the magnitude of sound.

Masking The amount (or the process) by which the threshold of audibility is for one sound is raised by the presence of another (masking) sound.

Noise Unwanted sound.

Peak Noise The level corresponding to the highest (not RMS) sound pressure measured over a given period of time. This term is often confused with the "Maximum" level, which is the highest RMS level.

RT_{60} The time it takes reverberant sound to decay by 60 dB once the source has been removed.

STC Sound Transmission Class (STC): A single-number representation of a partition's noise insulation performance. This number is based on laboratory-measured, 16-band (1/3-octave) transmission loss (TL) data of the subject partition. The field-measured version of this number is the FSTC.

Subject: Changes in noise levels associated with the addition of six (6) units for the proposed Preserve Residential Development in Rancho Cordova, California.

Dear Rod,

Bollard Acoustical Consultants, Inc. (BAC) previously prepared a noise and vibration assessment for the Preserve Residential Development project in Rancho Cordova, California (dated September 3, 2020). On January 4, 2021, it was brought to the attention of BAC that the project had been revised to include six (6) additional units. According to the revised traffic impact analysis prepared by the project traffic consultant (Kimley-Horn & Associates, Inc.) dated November 4, 2020, the project proposes a total of approximately 434 single-family residential units. After a review of the revised traffic impact analysis, specifically the revised peak-hour turning movements contained in that report, it was determined that the changes in noise levels associated with the additional units would not be appreciable and would not change the conclusions presented in the noise and vibration assessment previously prepared by BAC. As a result, a revision to the noise and vibration study prepared by BAC dated September 3, 2020 would not be warranted.

Please contact me at (916) 663-0500 or dariog@bacnoise.com if you have any questions or require additional information.

Sincerely,

Dario Gotchet
Senior Consultant

Technical Memorandum

To:	John Zellmer – Ruggeri-Jensen-Azar & Associates Rich Radoycis – Ruggeri-Jensen-Azar & Associates Steve Bowman – Ruggeri-Jensen-Azar & Associates
From:	Christian Kesler – Coleman Engineering Chad Coleman – Coleman Engineering
Date:	September 17, 2018
Project:	Winn Community Development
Subject:	Distribution Pipeline Sizing

PURPOSE

The purpose of this technical memorandum is to detail recommended pipe sizes and connection points for the proposed potable water distribution system for the Winn Communities development in Rancho Cordova, CA. Water modeling has demonstrated that the system is sized appropriately and that the resulting flows and pressures will be provided in accordance with Sacramento County Water Agency (SCWA/County) Operating Goals.

SITE

The Winn Communities Development is located on the east side of the City of Rancho Cordova and is planned to include 434 lots of single family residential housing. The development is located just north of Douglas Road and slightly west of Grant Line Road. Drinking water is to be supplied by Sacramento County Water Agency.

WATER SYSTEM DESIGN CRITERIA

Water system design criteria was determined using the criteria detailed in the *Zone 40 Water System Infrastructure Plan Update* (WSIP) dated February 2018. The criteria itemized in this section include:

- Water demands
- Peaking factors
- Water system materials and sizes
- Water system performance criteria

Water Demands

The system was designed using criteria detailed in the WSIP. Table 3-13 of the WSIP lists the Average Daily Demand per Single Family Residence as 490 gpd/connection. There are 434 lots on the developments which equates to an Average Daily Demand of 212,688 gpd or 148 gpm.

- 490 gpd/connection * 434 lots = 212,688 gpd
- 212,688 gpd /24 hours /60 min = 148 gpm

The demand was split up and applied throughout the nodes in the model as the Average Day Demand (ADD).

Table 6 of the WSIP lists the required fire flow for single family residences less than 3,600 square feet as 1,500 gpm. All residential homes in the proposed Winn development are assumed to be less than 3,600 square feet.

Peaking Factors
Table 5-15 of the WSIP lists the peaking factors that are shown in Table 1 below:

Table 1 – Water System Peaking Factors

Demand	Peaking Factor
Maximum Day Demand (MDD)	2.0 ADD
Peak Hour Demand (PHD)	2.0 MDD

Water System Materials and Sizes
According to the *Sacramento County Water Agency's 2018 Improvement Standards*, the specified pipe material for distribution pipes is cement-lined pipe, polyvinyl chloride pipe, or ductile iron pipe and a Hazen-Williams "C" value of 125 should be used for all three pipe types.

Table 5-14 of the WSIP indicates that the minimum size for all distribution pipes is 8-inches in diameter.

Water System Performance Criteria
The County dictates required performance for water distribution system pipes. Table 2 below lists the applicable operating goals for SCWA water systems, as dictated by Table 5-14 of the WSIP.

Table 2 – Water System Performance Criteria

Operating Goal	Requirement
PHD Minimum Pressure	35 psi
PHD Maximum Pressure	65 psi
ADD Maximum Velocity	5 fps
PHD Maximum Velocity	7 fps
PHD Maximum Unit Headloss	3 ft/1,000 ft
MDD+FF Minimum Pressure	20 psi

Operating Goal	Requirement
MDD+FF Maximum Velocity	10 fps

MODEL

After laying out the water distribution pipe network, Coleman Engineering modeled the system using Bentley WaterCAD v8i to verify conformance with County design and operating criteria. The planned street layout and elevations were detailed by Ruggeri-Jensen-Azar (RJA). Pipe materials, pipe diameters, water demands, etc. were selected by Coleman Engineering. Model elevations were taken from the *Preliminary Grading Plan* prepared by RJA and were verified on Google Earth.

The locations and alignments of existing public water transmission and distribution system pipes were provided by the County. See Figure 2 attached to this memo. Existing County pipes that were modeled to be connected to the new system include:

- 12-inch distribution main in Edington Way
- 8-inch distribution main in Thornberg Way
- 12-inch to 10-inch distribution main in Raymer Way.

According to Table 5-14 of the WSIP, the minimum allowable pressure in a Zone 40 transmission main at peak hour flow conditions is 40 psi. The supply water pressure in the model assumes 40 psi in the 24-inch transmission main in Edington Way. That transmission main supplies all other pipes in the modeled system.

Water system pressures in the development were modeled at ground level. Building heights were not considered in the model since Building MEP's and Fire Sprinkler designers will calculate losses interior to the buildings.

To verify water system performance versus County criteria, the following modeling runs were calculated:

- ADD
- MDD
- PHD
- MDD + Fire Flow
- Redundancy Check #1 - MDD + Fire Flow with the connection at Edington Way out of service
- Redundancy Check #2 - MDD + Fire Flow with the connection at Thornberg Way out of service
- Redundancy Check #3 – MDD + Fire Flow with the connection at Raymer Way out of service

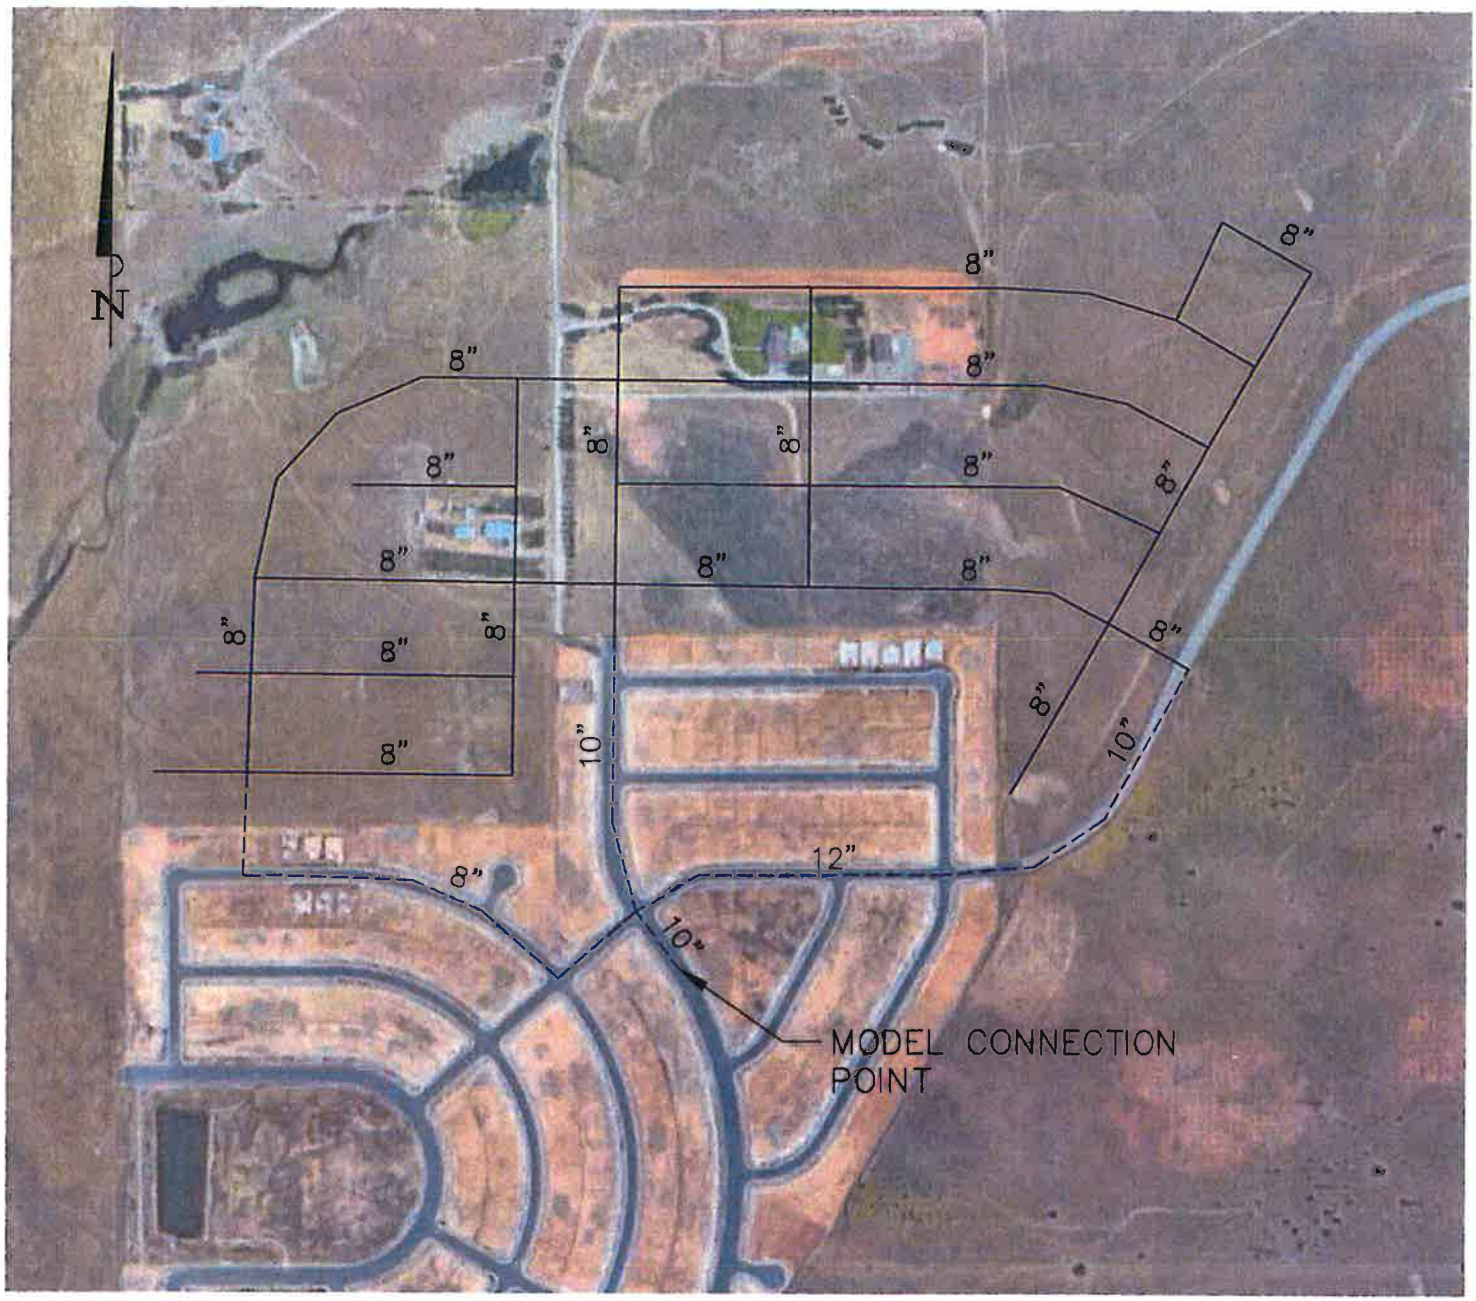
RESULTS

Model result tables are attached as Figure 3. Table 3 below shows the summary of results from the model runs compared to the applicable County operating goals.

Table 3 – Modeling Results vs. Water System Performance Criteria

Operating Goal	Operating Goal	Modeled Minimum	Modeled Maximum	Meets Goal?
PHD Minimum Pressure (psi)	35	36	-	Yes
PHD Maximum Pressure (psi)	65	-	43	Yes
ADD Maximum Velocity (fps)	5	-	0.3	Yes
PHD Maximum Velocity (fps)	7	-	1.2	Yes
PHD Maximum Unit Headloss (ft/1,000 ft)	3	-	0.9	Yes
MDD+FF Minimum Pressure (psi)	20	25	-	Yes
MDD+FF Maximum Velocity (fps)	10	-	9.7	Yes
MDD+FF Minimum Pressure – Redundancy Check #1 Edington Way Out of Service (psi)	20	21	-	Yes
MDD+FF Maximum Velocity – Redundancy Check #1 Edington Way Out of Service (psi)	10	-	9.7	Yes
MDD+FF Minimum Pressure – Redundancy Check #2 Thornberg Way Out of Service (psi)	20	24	-	Yes
MDD+FF Maximum Velocity – Redundancy Check #2 Thornberg Way Out of Service (psi)	10	-	9.7	Yes
MDD+FF Minimum Pressure – Redundancy Check #3 Raymer Way Out of Service (psi)	20	25	-	Yes
MDD+FF Maximum Velocity – Redundancy Check #3 Raymer Way Out of Service (psi)	10	-	9.7	Yes

All of the County operating goals stated in the WSIP were met as shown in Table 3 above. 8-inch diameter pipe throughout the system is calculated to be able to deliver water under all of the conditions that were tested in the model.



During fire flow conditions, the lowest pressures and highest velocities occurred at dead ends, but the criteria were still met at these locations. The modeling results attached as Figure 3 summarize results of the water modeling runs.

The modeling results show that the water distribution pipe networks shown in the attached Figure 1 is calculated to be able to deliver sufficient water to the development. To summarize, the new water system is modeled to include the following features:

- Connections to the 12-inch main in Edington Drive, the 8-inch main in Thornberg Way, and the 10-inch main in Raymer Way
- 8-inch pipes for all distribution mains in the Winn Development

Attachment A: Proposed Sewer Shed Shift Report

Executive Summary

This report has been prepared to present onsite and offsite sewer conveyance facilities to gravity serve the study area as well as identifying off-site contributing areas and downstream impacted areas. It addresses the viability of sewering the project, as well as consistency with the existing interceptor and trunk sewer master plans.

The Preserve is a proposed single family development (**See Exhibit D**). The Preserve is in the eastern part of Sacramento County, approximately 4,500 feet north of the intersection of Douglas Road and Americanos Boulevard. (**See Exhibit A**).

The Preserve encompasses a total of 279± acres, of which 184 acres are designated to be open space. Based on land use, with a minimum of 6 equivalent single-family dwelling (ESD's) per acre (RD-6), the remaining 95 acres will be 440 single family homes and approximately 20± acres of public park and open space. The project proposes two points of connection to the existing system and the 440.0 ESD's have Peak Wet Weather Flows (PWWF) of 0.210 MGD and 0.155 MGD. The flows leave the site at Node WP/MH-1 and Node WP-6/MH-26A.

There are no upstream areas that will contribute flow to the project sewer shed.

The Preserve is part of the BR East Rancho Area 1 Trunk Shed area per the SFEMP and would receive ultimate service from the Aerojet Interceptor Section 2S.

There are no required pump stations or force mains. This project proposes a permanent shed shift of 75± acres of The Preserve to the BR East Rancho Area 2. The designated open space north of Morrison Creek (184 Ac) is not part of the proposed shift (See Attachment A). The offsite facilities that are required to develop The Preserve have been constructed with the North Douglas development.

Section 1: Introduction

This study has been prepared at a Subdivision Plan level. At this level, it serves as a design guide for the creation of the subsequent improvement plans.

The Preserve covers 279± acres. The ground ranges in elevation from 205 feet on the west side to 245 feet above sea level on the east side. The 184 acres north of Morrison Creek are currently in the South Sacramento Habitat Conservation Plan (SSHCP) as a preserve. This property is currently in negotiation to be sold to the SSHCP. As open space, the area is not included in the flow calculations. The proposed open space areas will not be developed and will be set aside for conservation purposes only.

There are no offsite upstream areas that will contribute to the flows produced by The Preserve. The flow created from the project will utilize the existing North Douglas subdivision sewer system.

The Preserve will ultimately be serviced by the Aerojet Interceptor.

Section 2: Design

This study has been prepared in accordance with the current master plans.

Assumptions

Future upstream areas will not be served through The Preserve. It is anticipated that undeveloped areas within the (BR East Rancho Area 1) will be served according to the SFEMP, and will not be served to the south, through The Preserve and North Douglas developments.

Per the approved North Douglas Sewer Study, there are 1390 acres and 8522 ESD's at Node DR-4 in Douglas Road, producing 5.442 MGD. This study proposes to increase Node DR-4 to 1462.5 acres and 8969.6 ESD's producing 5.927 MGD. From Node DR-4, flows travel west in a 24" sewer pipe at a slope of 0.0021. A 24" sewer pipe at s= 0.0021 has a capacity of 6.697 MGD.

High ground water tables typically don't exist in this area of Sacramento County.

Approach: Mater Plan Design Procedures

The following general procedures are used in the development of this Sewer Master Plan:

- Major sewer sheds defined.
- A detailed collection system established.
- Major sheds divided into sub-sheds in order to define the areas, which contribute flows to certain points (nodes) on the collection system.
- Equivalent Single-Family Dwellings (ESDs) should be determined by lot count or by using 6 Equivalent Single-Family Dwellings (ESDs/acre), whichever is greater

The methodology for estimating sewage flows in collectors and trunk lines in the Plan area sewer system is defined in the Sacramento Area Sewer District Standards and Specifications dated March 2019. The primary design criteria used in our analysis are listed in Table 1 below.

Table 1

Category	Conditions	Modifiers
Development Density	Planned Development Density	Minimum Plan Density shall be RD-5
Flow Generation	310 gpd/ESD	I/I-new 1400 gpd/ac < 5 Years 1600 gpd/ac > 5 Years
Peaking Factor	$PF=3.5 - 1.8Q_a^{0.05}$ (local sewers) Where: Q_a = ADWF	
Velocity Criteria	Min. 2 fps at Peak Wet Weather Flow	
Hydraulic Grade Line	Maximum HGL at crown of pipe Peak Wet Weather Flow	
Friction Factor	N=0.013	
Minimum Depth	6.3' at periphery of plan. 6.3' min depth @ last line manhole	8" sewer from periphery to collection point
Minimum Slope	Slope = 0.007 Minimum	Main to last line manhole

Peak Dry Weather Flows are computed based on 310 gallons per day (gpd) per Equivalent Single Family Dwelling Unit (ESD) entering each trunk pipe system. ESD values used in Sewer Master Plans assumed a minimum plan density of 6 ESD's per acre.

Regional San and SASD

Sanitary sewer service in the project area is provided by the Sacramento Regional County Sanitation District (Regional San) and the Sacramento Area Sewer District (SASD).

Regional San is responsible for the interceptor collection (sanitary sewers which are designed to carry flows in excess of 10 million gallons per day) and treatment of wastewater.

SASD is responsible for the local collection facilities (up to 1 MGD) and trunk sewers with capacity of 1 million to 10 million gallons per day.

Regional San and SASD own, operate and are responsible for the public collection, trunk and interceptor sewer systems throughout Sacramento County as well as the Regional Wastewater Treatment Plant located south of Freeport.

Section 3: Sewer Flow Information

Currently there are no existing sewer facilities within The Preserve. When the 75 acres develops, it will produce 440.0 ESD's and have a combined Peak Wet Weather Flow (PWWF) of 0.365 mgd. These flows leave the site at nodes MH-1 and MH-26A, and enter the North Douglas development. We are reducing the Peak Wet Weather Flow (PWWF) at node 2623-EN01 and increasing the Peak Wet Weather Flow (PWWF) at node 2875-EN01. See the approved Sewer Master Study for North Douglas 1, dated March 2004, and prepared by Wood Rodgers, Inc. for reference.

Section 4: Sewer Alignments and Facilities

The most feasible way to serve this project is by gravity through the North Douglas development down to Douglas Road. This is a permanent shed shift. At this time, there are no other alternatives to sewer The Preserve.

Section 5: Conclusion

This study was prepared with the intent of providing support documentation for use in the development of The Preserve improvement plans. As configured, all of the project flows will sewer south through the North Douglas project, and eventually into the Aerojet Interceptor. No offsite upstream sewer flows through The Preserve, thus this study has only accounted for flows originated onsite. This project's 75 developable acres account for approximately 440.0 ESD's and produces a combined Peak Wet Weather Flow of 0.365 MGD's. The Preserve does not adversely affect the downstream system.

NOTES

1. The shown yield may vary once grading and utility concepts are prepared.
2. The shown trail and park configuration is conceptual in nature. Final design will vary based on grading, utilities, client consultation and City consultation.
3. The shown yield and layout may vary if other constraints are identified not known at the time of conceptual site plan preparation.
4. The conceptual site plan is subject to change based on City consultation.
5. Shown residential blocks do not exceed the maximum 800' block length, but the block bounded by Streets A, B, C, D & F (Lots 69 - 134 of the 45'x90' lot type) exceeds the recommended 600' block length.

RE: The Preserve – Unit Count Increase on Sewer and Water Studies

Mr. Shattuck:

As you are aware, the original Tentative Map for The Preserve had a unit count of 434 lots, as the project evolved, the unit count increased to 440 lots.

The Sewer Study reviewed and approved by the Sacramento Area Sewer District (SASD) was based on the current unit count of 440. During our last submittal to the District, we notified them of the increase and updated the sewer shed calculations.

The Water Study for the project was completed in September of 2018 and used the original unit count of 434. The additional 6 lots result in a 1.4% increase in unit count and will have a negligible impact on the water model. The existing water system has sufficient supply to support the development.

If you have any questions, please feel free to call me at (916) 630-8900.

Sincerely,

RUGGERI-JENSEN-AZAR

Traffic Impact Analysis

The Preserve
City of Rancho Cordova, California

DRAFT
November 4, 2020

Prepared for:

Winn Communities

Prepared by:

Kimley»Horn

555 Capitol Mall, Suite 300
Sacramento, California 95814

Phone: (916) 858-5800

EXECUTIVE SUMMARY

This report documents the results of a traffic impact analysis completed for The Preserve project (the "proposed project" or "project"). The vacant project site is located west of the Raymer Way intersection with Grant Line Road in Rancho Cordova, California. The proposed project will consist of approximately 434 single-family detached housing units. Access to the project site will be provided by Raymer Way from the east and Americanos Way from the south. This study was performed in accordance with the County of Sacramento's traffic study guidelines and standards established by the Circulation Element of the City of Rancho Cordova's General Plan.

This analysis includes evaluation of the following transportation facilities:

- 22 Intersections
  - 19 within Rancho Cordova
  - 3 within Sacramento County's jurisdiction
- 17 Roadway Segments
  - 15 within Rancho Cordova
  - 2 within Sacramento County's jurisdiction

Based on the County's requirements, this traffic impact analysis was conducted for the study facilities for the following scenarios:

A. Existing (2019) Conditions
B. Existing (2019) plus Proposed Project Conditions
C. Cumulative (2035) Conditions
D. Cumulative (2035) plus Proposed Project Conditions

Significant findings of this study include:

- The proposed project is estimated to generate 4,014 new daily trips, with 313 new trips occurring during the AM peak-hour, and 416 new trips occurring during the PM peak-hour.
- The addition of the proposed project to the Existing (2019) Conditions results in a significant impact at two (2) study intersections, Intersection #17 (Jackson Road/SR-16 at Grant Line Road) and Intersection #20 (Grant Line Road at Raymer Way). With the application of mitigation measures recommended herein, the impacts to Intersection #17 can be mitigated. However, because the City of Rancho Cordova cannot guarantee that mitigation measure M1 can be implemented, the impact would remain ***significant and unavoidable***. With the implementation of mitigation measure M2, the impact to Intersection #20 is ***less than significant with mitigation***.
- The addition of the proposed project to Cumulative (2035) Conditions results in a significant impact at three (3) intersections. With the application of mitigation measures recommended herein, the impacts to intersections can be mitigated. However, because the City of Rancho Cordova cannot guarantee that these mitigation measures (M3, M4, and M5) can be implemented, the impact would remain ***significant and unavoidable***.

INTRODUCTION

This report documents the results of a traffic impact analysis completed for The Preserve residential project (the "proposed project" or "project"). The vacant project site is located west of the Raymer Way intersection with Grant Line Road in Rancho Cordova, California. The purpose of this impact analysis is to identify potential environmental impacts to transportation facilities as required by the California Environmental Quality Act (CEQA). This study was performed in accordance with the County of Sacramento's traffic study guidelines[1] and standards established by the Circulation Element of the City of Rancho Cordova's General Plan [2].

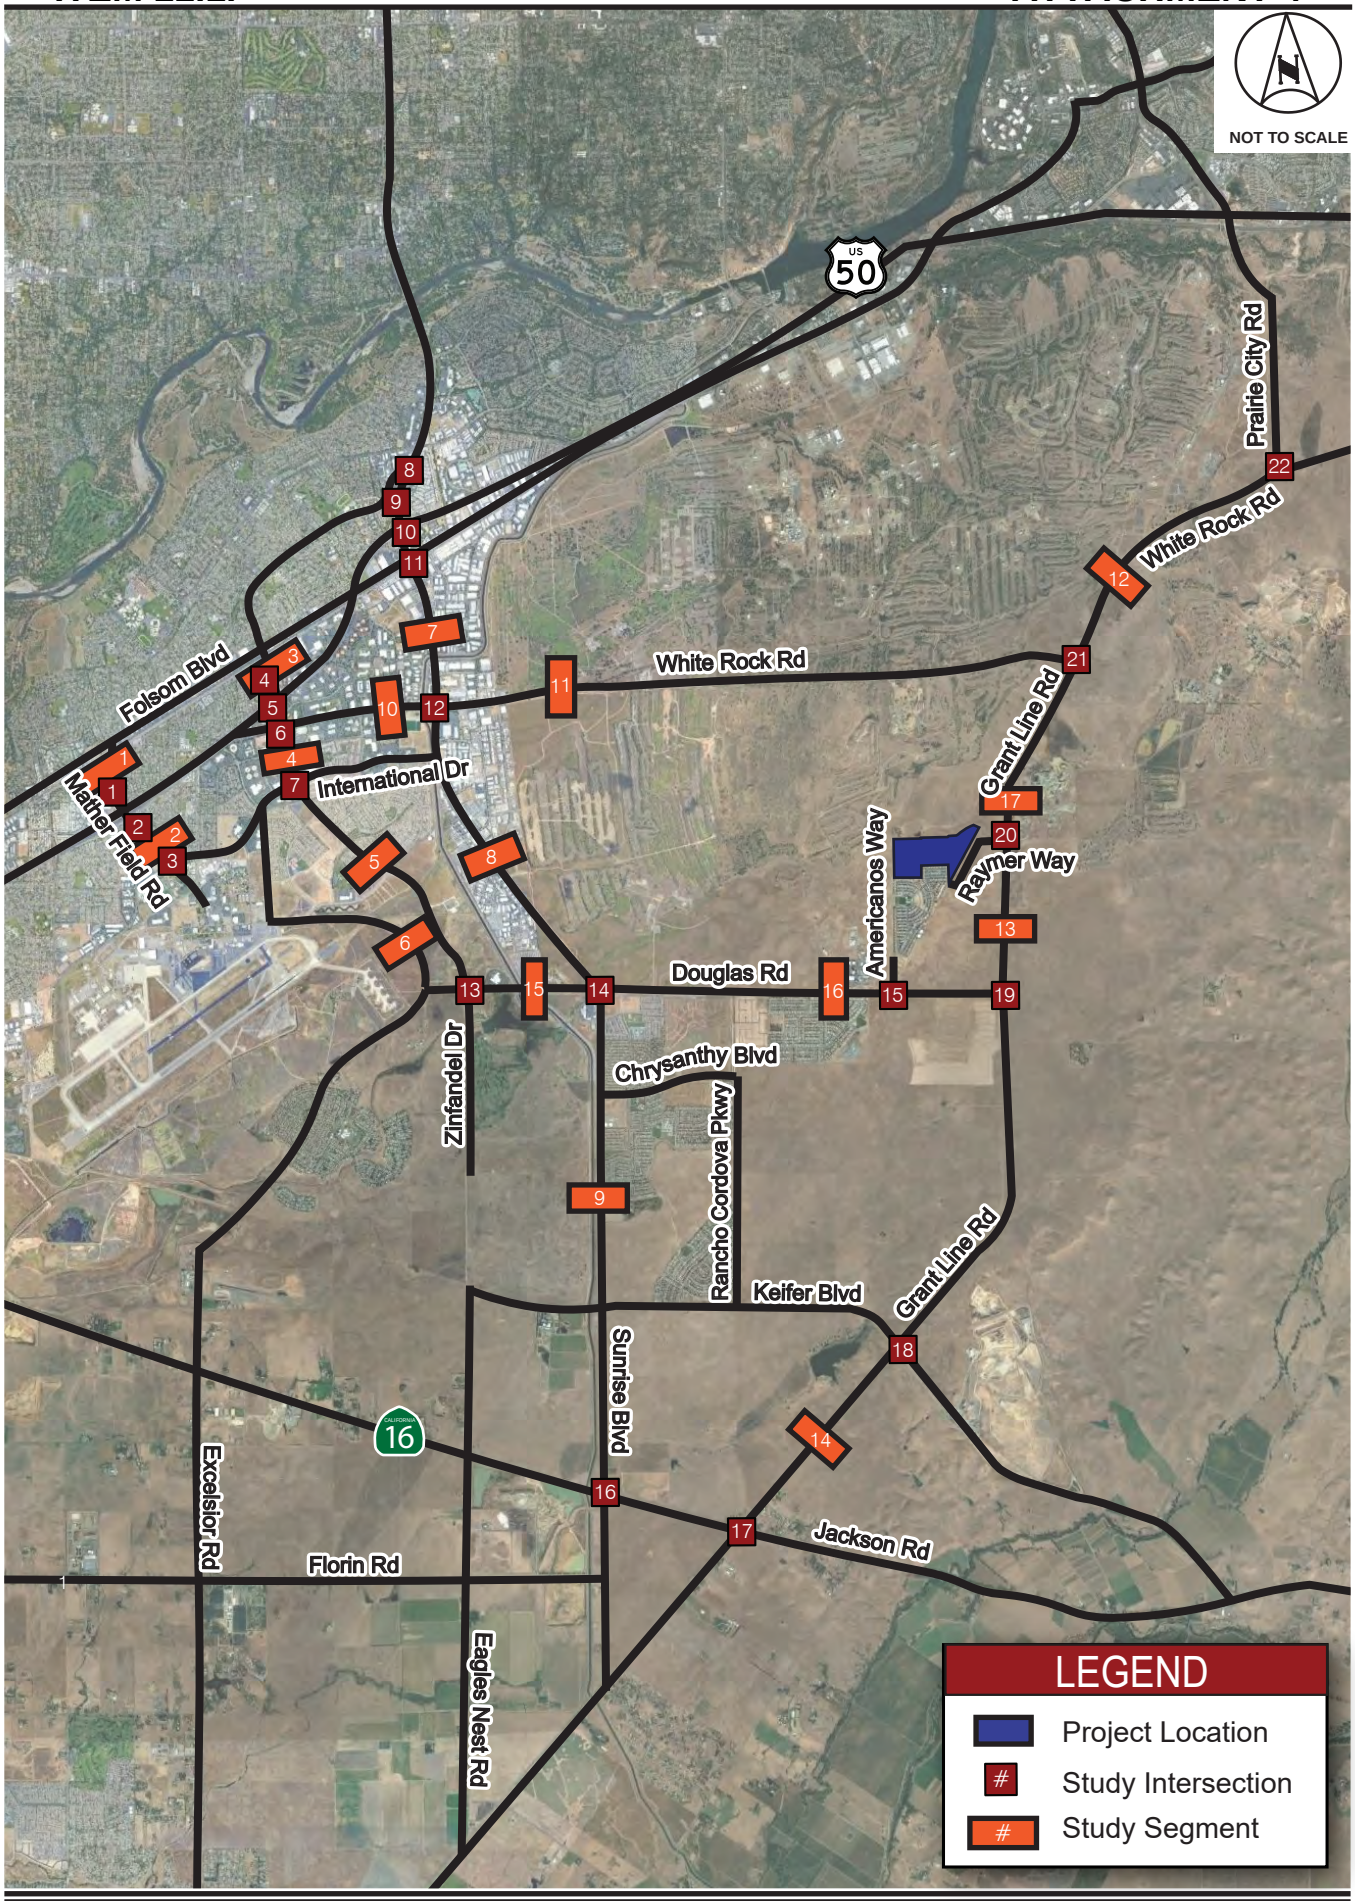
PROJECT DESCRIPTION

The proposed project will consist of approximately 434 single-family detached housing units. Access to the project site will be provided by Raymer Way from the east and Americanos Way from the south. The project location, study intersections and study segments are depicted in **Figure 1.** The proposed project site plan is shown in **Figure 2**. **Figure 3** illustrates the existing study intersections facilities, traffic control, and lane configurations.

Based on the County's requirements, this traffic impact analysis was conducted for the study facilities for the following scenarios:

A. Existing (2019) Conditions
B. Existing (2019) plus Proposed Project Conditions
C. Cumulative (2035) Conditions
D. Cumulative (2035) plus Proposed Project Conditions

The following transportation facilities are included in this evaluation:



Intersections:

1. Mather Field Rd @ US-50 Westbound Ramps
2. Mather Field Rd @ US-50 Eastbound Ramps
3. Mather Field Rd @ International Dr
4. Zinfandel Dr @ US-50 Westbound Ramps
5. Zinfandel Dr @ US-50 Eastbound Ramps
6. Zinfandel Dr @ White Rock Rd
7. Zinfandel Dr @ International Dr

PROJECT AREA ROADWAYS

The following are descriptions of the primary roadways in the vicinity of the project.

United States Route 50 (US-50) is an east-west interstate facility located approximately 5-miles from the proposed project. US-50 connects Rancho Cordova to Sacramento to the west and El Dorado County to the east. Primary access to the project site from US-50 is provided at the Sunrise Boulevard, Zinfandel Drive and Mather Field Road interchanges. Near Zinfandel Drive, US-50 carries approximately 180,000 vehicles per day[3] with five lanes in each direction.

Jackson Road (SR 16) is an expressway connecting Amador County and Sacramento County, along the southern edge of Rancho Cordova's city limits. Jackson Road connects with US-50 west of the project site. South of the project site, between Sunrise Boulevard and Grant Line Road, Jackson Road carries approximately 13,000 vehicles per day[3] with one lane in each direction.

Sunrise Boulevard is a north-south arterial, connecting the project site to north Rancho Cordova and Placer County.

Zinfandel Drive is a north-south arterial, connecting the project site to US-50, as well as the commercial, industrial and residential areas northwest of the project site.

Raymer Way is a local roadway adjacent to the project site and provides access to Grant Line Road to the east.

Americanos Way is a local roadway that will provide access to the project site from the south. This roadway will serve as a connection between the project site and Douglas Road.

TRANSPORTATION IMPACT STUDY METHODOLOGY

This study was performed in accordance with the County of Sacramento's traffic study guidelines[4] and standards established by the Circulation Element of the City of Rancho Cordova's General Plan[5].

Level of Service Definitions

Analysis of transportation facility significant environmental impacts is based on the concept of Level of Service (LOS). The LOS of a facility is a qualitative measure used to describe operational conditions. LOS ranges from A (best), which represents minimal delay, to F (worst), which represents heavy delay and a facility that is operating at or near its functional capacity.

Intersection Analysis

Levels of Service for this study were determined using methods defined in the *Highway Capacity Manual (HCM) 6th Edition* and appropriate traffic analysis software. The HCM includes procedures for analyzing side-street stop controlled (SSSC), all-way stop controlled (AWSC), and signalized intersections. The SSSC procedure defines LOS as a function of average control delay for each minor street approach movement. The AWSC and signalized intersection procedure defines LOS as a function of average control delay for the intersection as a whole. Table 1 presents intersection LOS definitions as defined in the HCM.

* Applied to the worst lane/lane group(s) for SSSC

Roadway Segment Analysis

The analysis of roadway segments involves the comparison of daily segment volumes to the LOS criteria provided in the County's traffic impact analysis guidelines[1]. The criteria provide maximum volumes for given service levels for various facility types. Table 2 replicates the County's roadway segment LOS criteria.

Table 2 – Roadway Segment Level of Service Criteria

Facility Type	# Lanes	Maximum Volume for Given Service Level				
		A	B	C	D	E
Residential	2	600	1,200	2,000	3,000	4,500
Residential Collector w/ Frontage	2	1,600	3,200	4,800	6,400	8,000
Residential Collector w/o Frontage	2	6,000	7,000	8,000	9,000	10,000
Arterial, Low Access Control	2	9,000	10,500	12,000	13,500	15,000
	4	18,000	21,000	24,000	27,000	30,000
	6	27,000	31,500	36,000	40,500	45,000
Arterial, Moderate Access Control	2	10,800	12,600	14,400	16,200	18,000
	4	21,600	25,200	28,800	32,400	36,000
	6	32,400	37,800	43,200	48,600	54,000
Arterial, High Access Control	2	12,000	14,000	16,000	18,000	20,000
	4	24,000	28,000	32,000	36,000	40,000
	6	36,000	42,000	48,000	54,000	60,000
Rural, 2-lane highway	2	2,400	4,800	7,900	13,500	22,900
Rural, 2-lane road, 24'-36' of pavement, paved shoulders	2	2,200	4,300	7,100	12,200	20,000
Rural, 2-lane road, 24'-36' of pavement, no shoulders	2	1,800	3,600	5,900	10,100	17,000

Source: Traffic Impact Analysis Guidelines, Table 2, County of Sacramento Department of Transportation, July 2004.

Based on the County's requirements[4], this LOS analysis was conducted for the study facilities for the following scenarios:

A. Existing (2019) Conditions
B. Existing (2019) plus Proposed Project Conditions
C. Cumulative (2035) Conditions
D. Cumulative (2035) plus Proposed Project Conditions

The following sections present the technical analysis results for the four primary scenarios.

EXISTING (2019) CONDTIONS

To establish existing conditions, new traffic counts were collected for the study intersections and roadway segments. Twenty (20) new weekday AM and PM peak-period intersection turning movement traffic counts were collected on May 22, 2019. These counts were conducted between 7:00 a.m. and 9:00 a.m. and between 4:00 p.m. and 6:00 p.m. Sixteen (16) new roadway segment counts were conducted on May 21, 2019. Weekday AM and PM peak-period turning movement traffic counts were also collected on November 8, 2017, at the Douglas Road intersection with Americanos Way (Intersection #15) and at the Grant Line Road intersection with Raymer Way (Intersection #20). These counts were conducted between 7:00 a.m. and 9:00 a.m. and between 4:00 p.m. and 6:00 p.m.

Existing (2019) peak-hour turn movement volumes are presented in Figure 4, and the traffic count data sheets are provided in Appendix A. Analysis worksheets for this scenario are provided in Appendix B.

Intersections

Table 3 presents the peak-hour intersection operating conditions for this analysis scenario. As indicated in Table 3, the study intersections operate from LOS A to LOS F during the AM and PM peak-hours. It should be noted that U-turn movement volumes were added to the corresponding left-turn movement volumes due to *HCM 6th Edition* analysis methodology limitations.

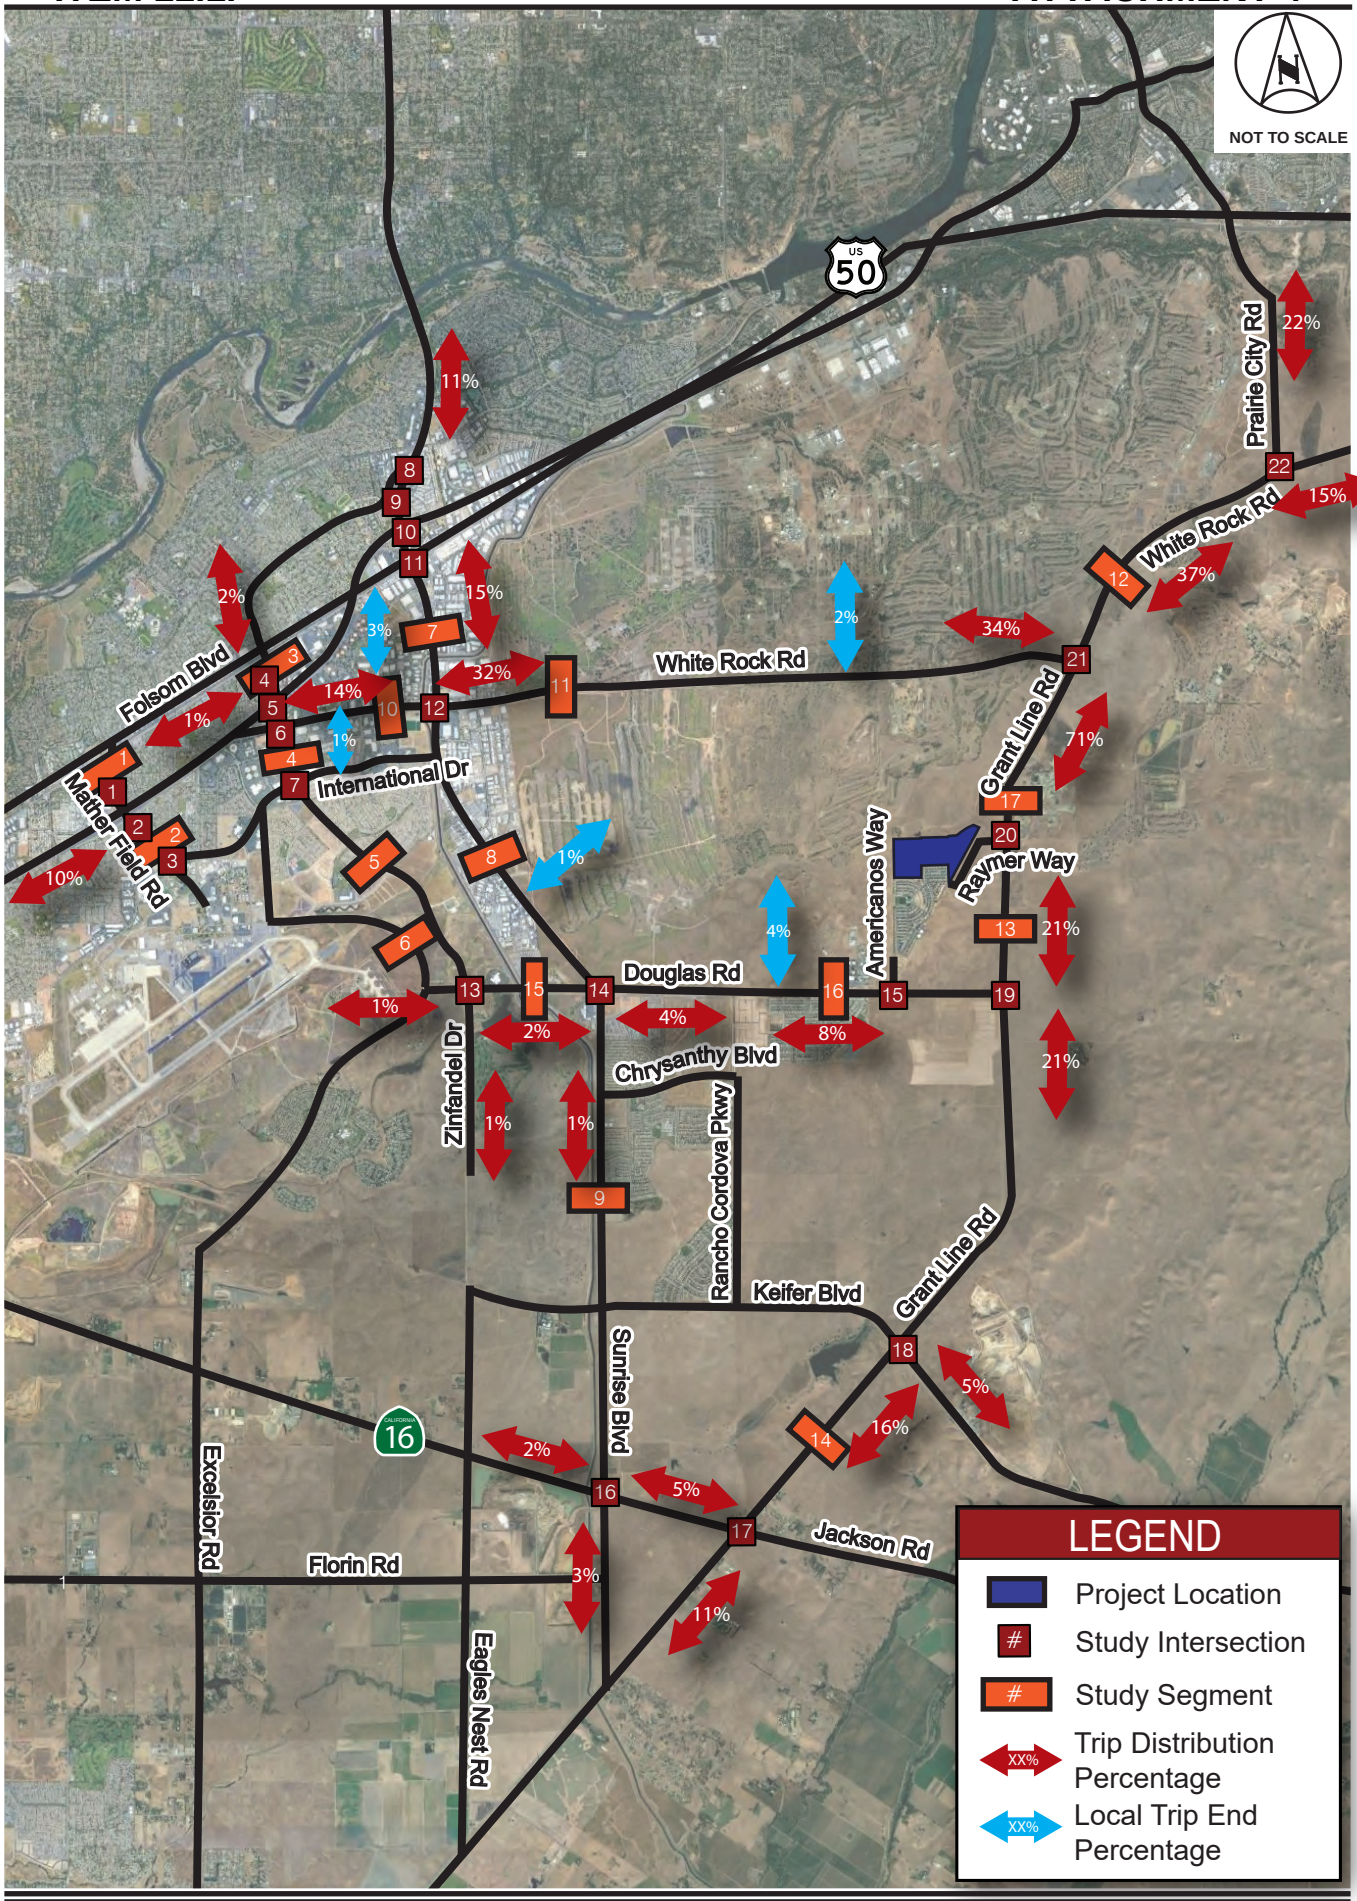
Existing (2019) Peak-Hour Traffic Volumes

ASSESSMENT OF PROPOSED PROJECT

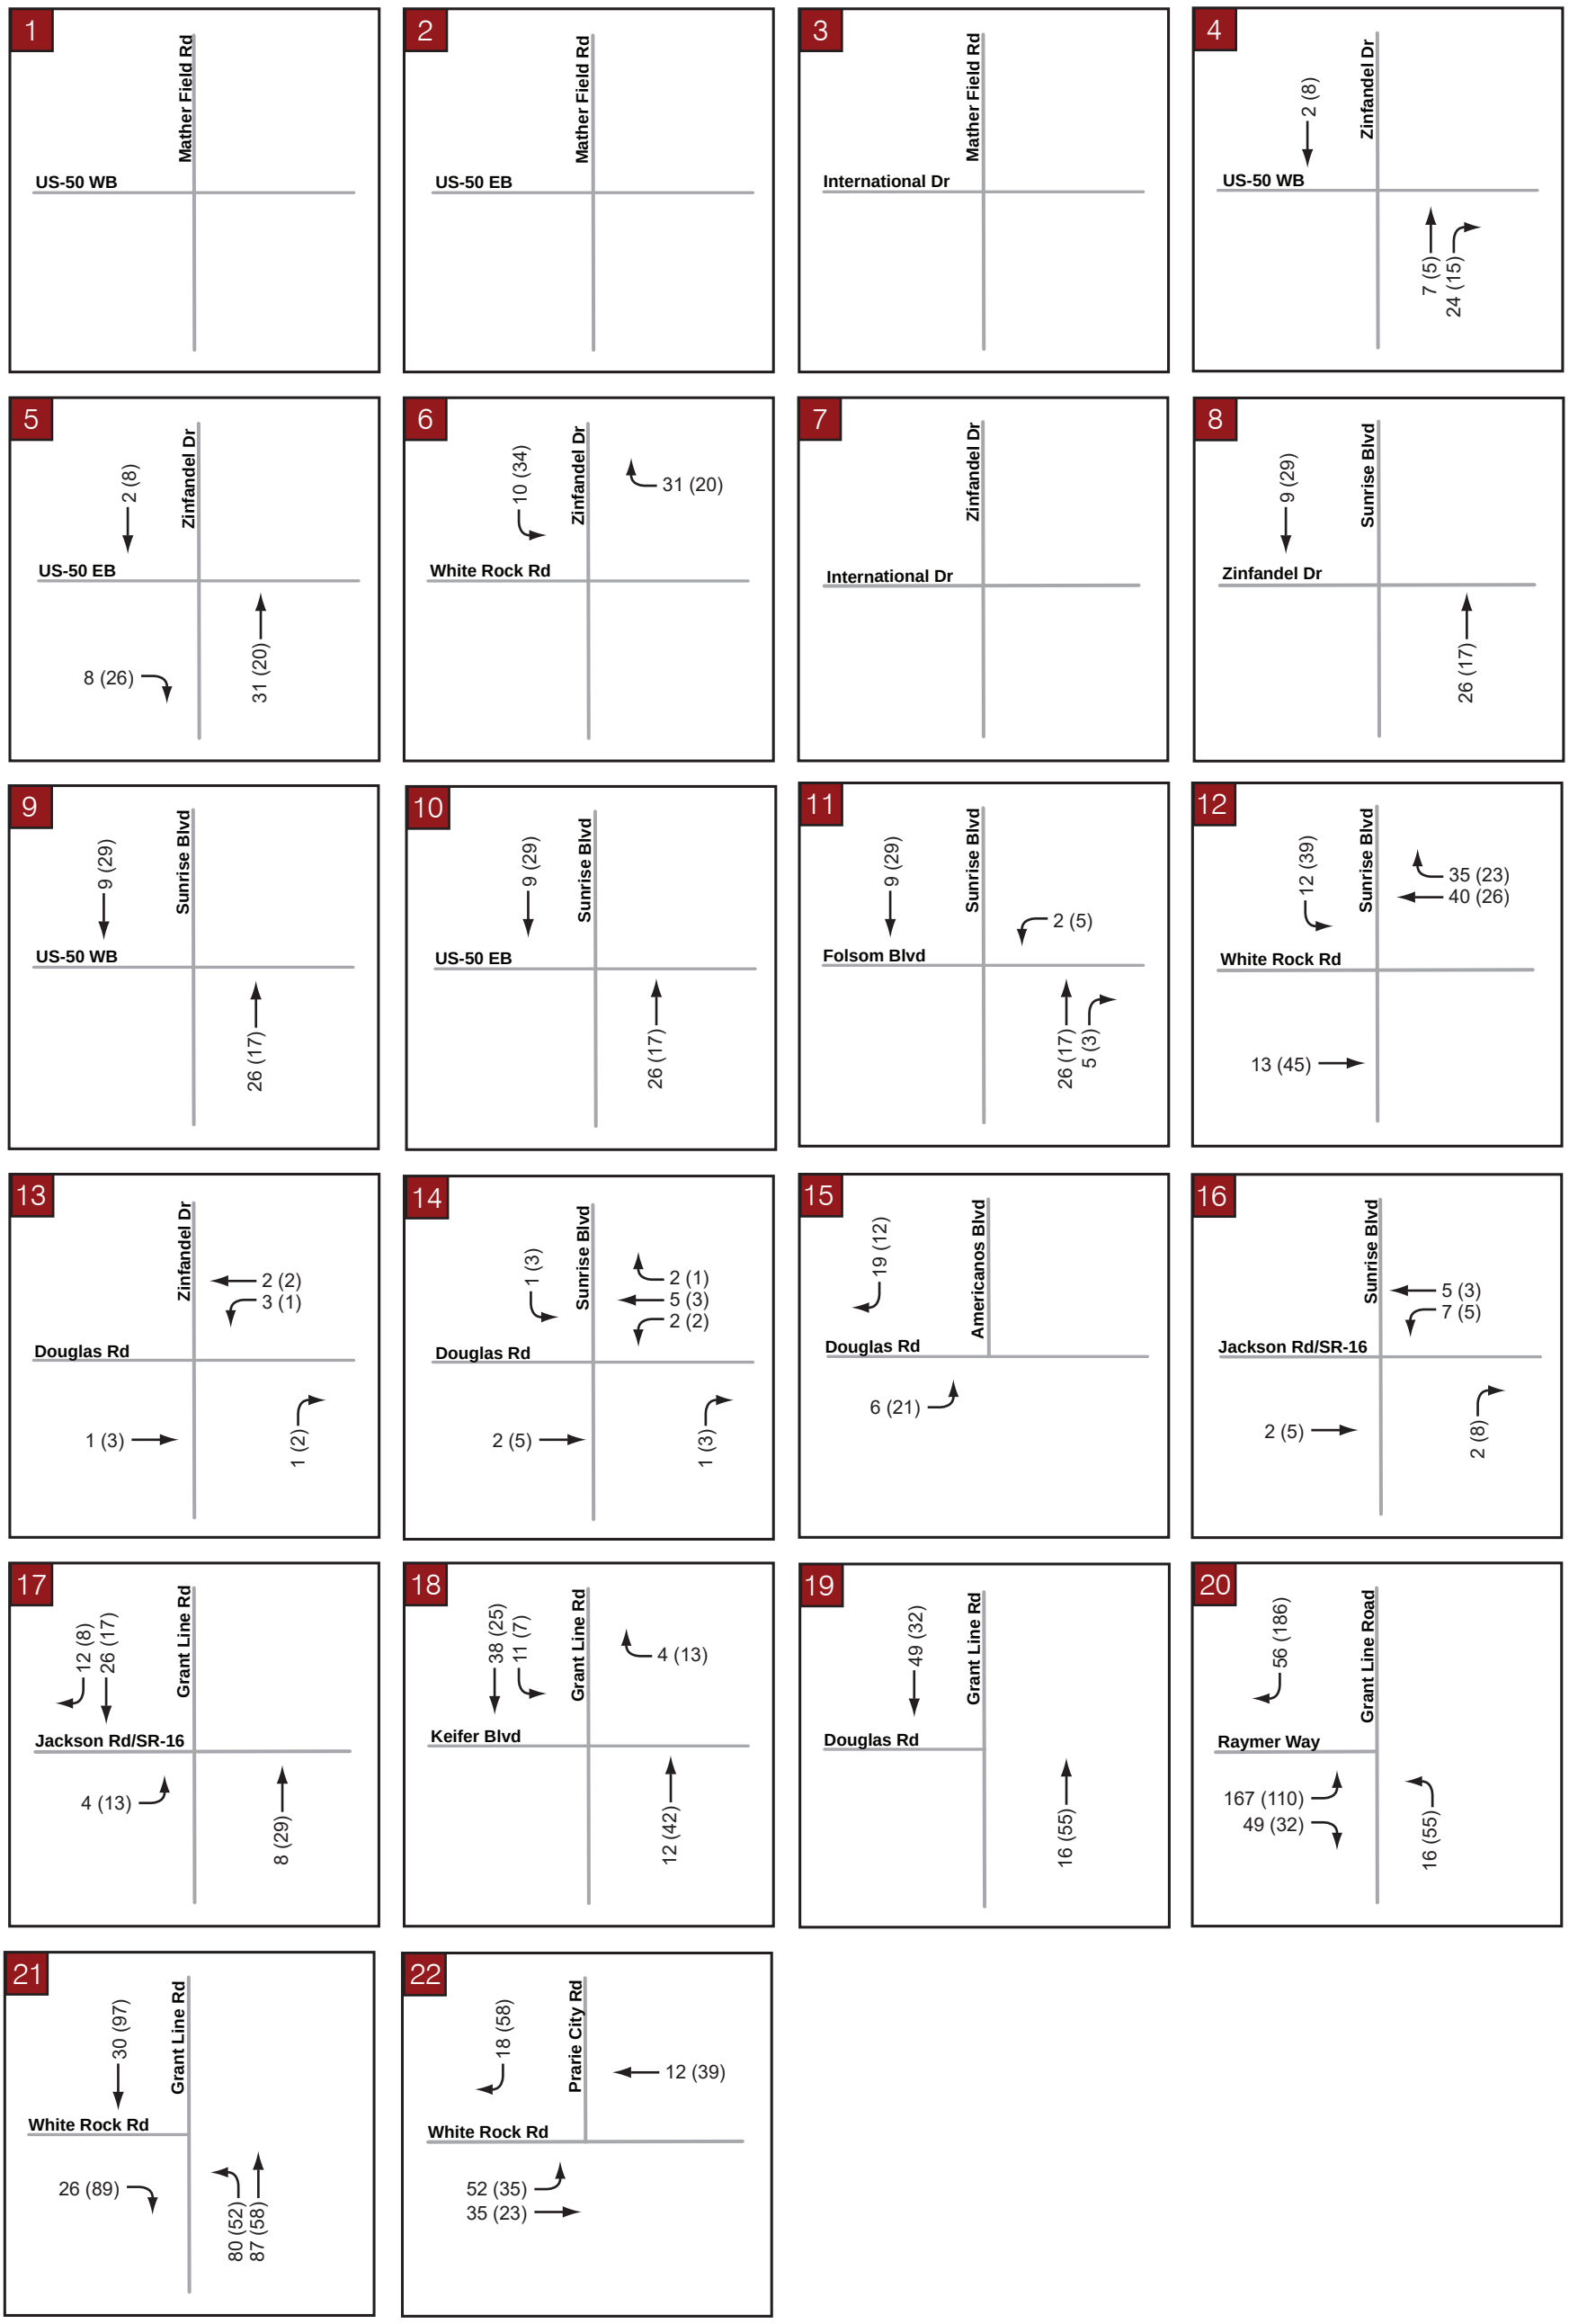
Proposed Project Trip Generation and Assignment



The number of trips anticipated to be generated by the proposed project are approximated using data included in *Trip Generation, 10th Edition,* published by the Institute of Transportation Engineers (ITE). ITE Land Use Code 210 (Single-Family Detached Housing) was used to represent the proposed units and the equation was used to calculate the generated trips. As shown in Table 5, the proposed project is estimated to generate 4,014 new daily trips, with 313 new trips occurring during the AM peak-hour, and 416 new trips occurring during the PM peak-hour.

Table 5 – Proposed Project Trip Generation

Land Use (ITE Code)	Size (Dwelling Units)	Daily Trips	AM Peak-Hour					PM Peak-Hour				
			Total Trips	In		Out		Total Trips	In		Out	
				%	Trips	%	Trips		%	Trips	%	Trips
Single-Family Detached Housing (210)[1]	434	4,014	313	25%	78	75%	235	416	63%	262	37%	154
New Project Trips		**4,014**	**313**		**78**		**235**	**416**		**262**		**154**



[1] *Trip generation based on Institute of Transporation Engineers (ITE), Trip Generation Manual, (10th Edition) equations for Single-Family Detached Housing (Land Use Code 210)*
Daily: Ln(T) = 0.92Ln(X) + 2.71
AM Peak Hour: T = 0.71(X) + 4.80
PM Peak Hour: Ln(T) = 0.96Ln(X) + 0.2
Where: T = trips generated, X = dwelling units

The project trip distribution percentages are provided in Figure 5. The assignments of project trips are depicted in Figure 6.

EXISTING (2019) PLUS PROPOSED PROJECT CONDTIONS

As previously discussed, the number of trips anticipated to be generated by the proposed project was derived using the *Trip Generation Manual, 10th Edition,* published by the Institute for Traffic Engineering (ITE). These trips were assigned to the roadway network based on existing traffic volumes, the City's Travel Demand Model (TDM), and professional judgment. Using these volumes, levels of service were determined at the study facilities. Existing (2019) plus Proposed Project peak-hour turn movement volumes are presented in Figure 7. Levels of service were then determined at the study facilities. Analysis worksheets for this scenario are provided in Appendix C.

Table 6 presents the intersection operating conditions for this analysis scenario. As indicated in Table 6, the study intersections operate from LOS A to LOS F during the AM and PM peak-hours. As noted previously, U-turn movement volumes were added to the corresponding left-turn movement volumes due to *HCM 6th Edition* analysis methodology limitations.

Table 7 presents the roadway segment operating conditions for this analysis scenario. As indicated in Table 7, the study roadway segments operate from LOS A to LOS F.

Table 6 - Existing (2019) plus Proposed Project Intersection Levels of Service

xx(xx)	AM(PM) Peak-Hour Volumes

CUMULATIVE CONDITIONS

Future traffic estimates were prepared using the modified SACMET travel demand model developed by the City of Rancho Cordova for the 2035 General Plan. The interpolated difference between the resulting traffic estimate and the 2008 baseline model results (the growth) was then added to Existing (2019) traffic volumes to establish Cumulative (2035) traffic estimates for this study. Using these volumes, levels of service were determined at the study facilities. Analysis worksheets for this scenario are provided in Appendix D. Figure 8 depicts the assumed lane geometries for the Cumulative (2035) scenario. Cumulative peak-hour turning movement volumes are presented in Figure 9.

Table 8 presents the peak-hour intersection operating conditions for this analysis scenario. As indicated in Table 8, the study intersections operate from LOS A to LOS F during the AM and PM peak-hours.

Table 9 presents the roadway segment operating conditions for this analysis scenario. As indicated in Table 9, the study roadway segments operate from LOS A to LOS F.

LEGEND
Study Intersection
xx(xx) AM(PM) Peak-Hour Volumes

CUMULATIVE PLUS PROPOSED PROJECT CONDITIONS

As previously discussed, the number of trips anticipated to be generated by the proposed project was derived using the *Trip Generation Manual, 10th Edition,* published by the Institute for Traffic Engineering (ITE). The project trips were assigned to the future roadway network based on modified SACMET travel demand model, as provided by the City of Rancho Cordova. Using these volumes, levels of service were determined at the study facilities.

The Cumulative Scenario Project Trip distribution and trip assignment are shown in Figure 10 and Figure 11, respectively. Cumulative plus Proposed Project peak-hour turning movement volumes are presented in Figure 12. Analysis worksheets for this scenario are provided in Appendix E.

Table 10 presents the peak-hour intersection operating conditions for this analysis scenario. As indicated in Table 10, the study intersections operate from LOS A to LOS F during the AM and PM peak-hours.

Table 11 presents the roadway segment operating conditions for this analysis scenario. As indicated in Table 11, the study roadway segments operate from LOS A to LOS F.

IMPACTS AND MITIGATION

Regulatory Setting and Thresholds of Significance

Sacramento County

The Circulation Element of the latest County of Sacramento General Plan[6] includes the following relevant provisions:

> *CI-9. Plan and design the roadway system in a manner that meets Level of Service (LOS) D on rural roadways and LOS E on urban roadways, unless it is infeasible to implement project alternatives or mitigation measures that would achieve LOS D on rural roadways or LOS E on urban roadways. The urban areas are those areas within the Urban Service Boundary as shown in the Land Use Element of the Sacramento County General Plan. The areas outside the Urban Service Boundary are considered rural.*
>
> *CI-35. The applicant/developer of land development projects shall be responsible to install bicycle and pedestrian facilities in accordance with Sacramento County Improvement Standards and may be responsible to participate in the fair share funding of regional multi-use trails identified in the Sacramento County Bicycle Master Plan.*

Sacramento County's traffic study guidelines[1] provide guidelines for the implementation of the General Plan provisions: "The County defines the minimum acceptable operation level for its roadways and intersections to be LOS D for rural areas and LOS E for urban areas. The urban areas are those areas within the Urban Service Boundary as shown in the Land Use Element of the Sacramento County General Plan. The areas outside the Urban Service Boundary are considered rural."

All of the Sacramento County study facilities are within the Urban Services Boundary. Therefore, LOS E is the minimum acceptable LOS for all County facilities.

Thresholds of Significance

Roadways/Signalized Intersections: A project is considered to have a significant effect if it would:

- result in a roadway or a signalized intersection operating at an acceptable LOS to deteriorate to an unacceptable LOS; or
- increase the V/C ratio by more than 0.05 at a roadway or at a signalized intersection that is operating at an unacceptable LOS without the project.

Unsignalized Intersections: A project is considered to have a significant effect if it would:

- result in an unsignalized intersection movement/approach operating at an acceptable LOS to deteriorate to an unacceptable LOS, and also cause the intersection to meet a traffic signal warrant; or
- for an unsignalized intersection that meets a signal warrant, increase the delay by more than 5 seconds at a movement/approach that is operating at an unacceptable LOS without the project.

[6] *Sacramento County General Plan of 2005-2030,* Sacramento County Community Planning & Development Department, November 9, 2011.

City of Rancho Cordova

The Circulation Element of the City of Rancho Cordova's General Plan 2035 includes the following relevant provisions:

> *Policy C.1.2 - Seek to maintain operations on all roadways and intersections at Level of Service D or better at all times, including peak travel times, unless maintaining this Level of Service would, in the City's judgment, be infeasible and/or conflict with the achievement of other goals. Congestion in excess of Level of Service D may be accepted in these cases, provided that provisions are made to improve traffic flow and/or promote non-vehicular transportation as part of a development project or a City-initiated project. Please see Policy C.1.3 for additional policy guidance related to this issue.*
>
> *Examples of system improvements which may be accepted when Level of Service D cannot be maintained include the following, where the improvement or funding is in excess of standard City requirements:*
>
> *• Development of on- or off-street bicycle or pedestrian circulation (not including sidewalks that are constructed as part of roadway improvements);*
> *• Providing or funding public transportation facilities or services;*
> *• Other features as determined appropriate by the City.*
>
> *Policy C.1.3 - Recognize that regional traffic beyond the City's control, as well as circulation system decisions made prior to incorporation or by other agencies, will make it infeasible to achieve the City's desired Level of Service on all roadways. Subject development projects which affect these roadways to the provisions of Policy C.1.2 to provide offsetting improvements to the vehicular and/or non-vehicular transportation system.*

Impacts and Mitigation

Existing (2019) plus Proposed Project Conditions

As reflected in Table 6 and Table 7, the addition of the proposed project results in two (2) significant impacts. Analysis worksheets for the mitigations for this scenario are provided in Appendix F. The following is a discussion of each impact and its associated mitigation.

Intersection Impacts:

I1. Intersection #17, Jackson Road/SR-16 @ Grant Line Road
As shown in Table 6, this intersection operates at unacceptable LOS F during the AM and PM peak-hours without the project, and the project adds more than 5 seconds of delay to the intersection during the AM and PM peak-hours. ***This is a significant impact***.

I2. Intersection #20, Grant Line Road @ Raymer Way
As shown in Table 6, this intersection operates at LOS E and D during the AM and PM peak-hours without the project, and the project results in the intersection operating at LOS F. ***This is a significant impact***.

Mitigations:

M1. Intersection #17, Jackson Road/SR-16 @ Grant Line Road
The significant impact at this intersection during the AM and PM peak-hours can be mitigated by constructing a northbound and southbound left-turn pocket. As shown in Table 12, with the addition of this improvement, the intersection operates at LOS D during the AM and PM peak-

hours. However, a portion of the identified improvement lies outside of the City Limits and beyond the control of the City of Rancho Cordova. Because the City of Rancho Cordova cannot guarantee this measure can be implemented, the impact would remain ***significant and unavoidable***.

M2. Intersection #20, Grant Line Road @ Raymer

The significant impact at this intersection can be mitigated by converting the intersection from side street stop controlled to signalized along the existing Grant Line Road alignment. As shown in Table 12, with this mitigation, the intersection operates at LOS B and LOS C during the AM and PM peak-hours, respectively. Therefore, the impact is ***less than significant with mitigation***.

Table 12 – Intersection Levels of Service – Existing (2019) plus Proposed Project Mitigated Conditions

ID	Intersection	Control	Peak Hour	Existing (2019) plus Proposed Project		Control	Existing (2019) plus Proposed Project (Mitigated)	
				Delay (sec)	LOS		Delay (sec)	LOS
17	Jackson Road/SR-16 @ Grant Line Road	Signal	AM	**103.7**	**F**	Signal	46.3	D
			PM	**120.4**	**F**		40.1	D
20	Grant Line Road @ Raymer Way	SSSC	AM	**146.3 (606 EB)**	**F**	Signal	15.4	B
			PM	**84.1 (545 EB)**	**F**		22.2	C

Bold represents unacceptable operations. Shaded represents significant impact.

Cumulative plus Proposed Project Conditions

As reflected in Table 10 and Table 11, the addition of the proposed project results in three (3) significant impacts. Analysis worksheets for the mitigations for this scenario are provided in Appendix F. The following is a discussion of each impact and its associated mitigation.

Intersection Impacts:

I3. Intersection #20, Grant Line @ Raymer Way

As shown in Table 10, this intersection operates at unacceptable LOS F during the AM peak-hour without the project, and the project adds more than 5 seconds of delay to the intersection during the AM and PM peak-hours. ***This is a significant impact***.

I4. Intersection #21, Grant Line @ White Rock Road

As shown in Table 10, this intersection operates at unacceptable LOS F during the AM peak-hour without the project, and the project adds more than 5 seconds of delay to the intersection during the AM and PM peak-hours. ***This is a significant impact***.

I5. Intersection #22, White Rock Road @Prairie City Road

As shown in Table 10, this intersection operates at unacceptable LOS F during the AM and PM peak-hour without the project, and the project adds more than 5 seconds of delay to the intersection during the PM peak-hour. ***This is a significant impact***.

Mitigations:

M3. Intersection #20, Grant Line @ Raymer Way

The significant impact at this intersection can be mitigated by the addition of two eastbound left-turn lanes, a southbound left turn lane, a westbound left turn lane and restriping the thru-left land to a thru-right lane. It is expected that this these improvements will be implemented with the construction of the Capital South East Connector and related relocation of Grant Line Road. As shown in Table 13, this mitigation measure results in the intersection operating at LOS D during the AM and PM peak-hours. However, since the City of Rancho Cordova cannot guarantee the timing or implementation of Capital South East Connector, the impact would remain ***significant and unavoidable***.

M4. Intersection #21, Grant Line @ White Rock Road

The significant impact at this intersection during the AM and PM peak-hours can be mitigated by the addition of a northbound left-turn lane, a southbound through lane, and an eastbound left-turn lane. As shown in Table 13, this mitigation measure results in the intersection operating at LOS E and LOS D during the AM and PM peak-hours, respectively. However, the identified improvement lies outside of the City Limits and beyond the control of the City of Rancho Cordova. Because the City of Rancho Cordova cannot guarantee this measure can be implemented, the impact would remain ***significant and unavoidable***.

M5. Intersection #22, White Rock Road @ Prairie City Road

The significant impact at this intersection during the PM peak-hour can be mitigated with the addition of a second southbound right-turn lane and the addition of a right-turn overlap signal phase for the southbound right-turn. As shown in Table 13, this mitigation measure results in the intersection operating at LOS E during the AM and PM peak-hours. However, the identified improvement lies outside of the City Limits and beyond the control of the City of Rancho Cordova. Because the City of Rancho Cordova cannot guarantee this measure can be implemented, the impact would remain ***significant and unavoidable***.

Table 13 – Intersection Levels of Service – Cumulative (2035) plus Proposed Project Mitigated Conditions

ID	Intersection	Control	Peak Hour	Cumulative (2035) plus Proposed Project		Control	Cumulative (2035) plus Proposed Project (Mitigated)	
				Delay (sec)	LOS		Delay (sec)	LOS
20	Grant Line Road @ Raymer Way	Signal	AM	**206.3**	**F**	Signal	39.1	D
			PM	**129.1**	**F**		54.3	D
21	Grant Line Road @ White Rock Road	Signal	AM	**88.6**	**F**	Signal	59.2	E
			PM	**166.7**	**F**		46.7	D
22	White Rock Road @ Prairie City Road	Signal	AM	**182.6**	**F**	Signal	72.7	E
			PM	**260.5**	**F**		77.9	E

Bold represents unacceptable operations. Shaded represents significant impact.

CONCLUSIONS

Significant findings of this study include:

- The proposed project is estimated to generate 4,014 new daily trips, with 313 new trips occurring during the AM peak-hour, and 416 new trips occurring during the PM peak-hour.
- The addition of the proposed project to the Existing (2019) Conditions results in a significant impact at two (2) study intersections, Intersection #17 (Jackson Road/SR-16 at Grant Line Road) and Intersection #20 (Grant Line Road at Raymer Way). With the application of mitigation measures recommended herein, the impacts to Intersection #17 can be mitigated. However, because the City of Rancho Cordova cannot guarantee that mitigation measure M1 can be implemented, the impact would remain ***significant and unavoidable***. With the implementation of mitigation measure M2, the impact to Intersection #20 is ***less than significant with mitigation***.
- The addition of the proposed project to Cumulative (2035) Conditions results in a significant impact at three (3) intersections. With the application of mitigation measures recommended herein, the impacts to intersections can be mitigated. However, because the City of Rancho Cordova cannot guarantee that these mitigation measures (M3, M4, and M5) can be implemented, the impact would remain ***significant and unavoidable***.

HCM 6th Ctrl Delay	23.4
HCM 6th LOS	C

Notes

User approved volume balancing among the lanes for turning movement.

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

Unsignalized Delay for [NBR, SBR] is excluded from calculations of the approach delay and intersection delay.

Intersection Summary	
HCM 6th Ctrl Delay	166.9
HCM 6th LOS	F

Notes

User approved volume balancing among the lanes for turning movement.

* HCM 6th computational engine requires equal clearance times for the phases crossing the barrier.

Re: The Preserve
Vehicle Miles Traveled (VMT) Evaluation

Date: August 16, 2021

As requested, we have prepared this memorandum to document our evaluation of Vehicle Miles Traveled (VMT) for your residential development project located just west of the Raymer Way intersection with Grant Line Road in Rancho Cordova.

Overview

The primary purpose of this evaluation was to document the Vehicle Miles Traveled (VMT) per capita for The Preserve residential development and compare it to the VMT per capita value calculated for the City of Rancho Cordova, Sacramento County, and the SACOG region. Kimley-Horn understands that the proposed Project consists of 436 single-family detached units on the vacant parcels. A VMT analysis is required to determine if the addition of the proposed project results in a significant impact for CEQA purposes.

VMT Analysis Methodology

A CEQA VMT analysis was completed using the City's version of SACOG's SACSIM19 travel demand model for consistency of evaluation with the calculated values for the SACOG region. In addition, the analysis was tour-based, meaning that the analysis fully accounts for the entire trip length, including the length outside of the model area. While generally tour-based approaches include trips that are linked to trips that start or end at the project, for consistency with direction provided by City staff, the VMT analysis documented in this memorandum only estimates VMT based on all trips that have one end in a project location. This clarification means that intermediate trips, such as those occurring after someone has left the project area, such as a trip to pick-up lunch while at work, are not included in this analysis. Furthermore, consistent with the California Governor's Office of Planning and Research (OPR) guidelines[1] only automobile trips are considered as a part of this analysis. Heavy vehicle trips and alternative mode trips are not included in VMT analyses.

Kimley-Horn used the City's recently developed travel demand model with a base year of 2016 to perform the VMT analysis. A Traffic Analysis Zone (TAZ) representing the project area with no other land use was used to isolate the proposed project from all surrounding land uses. The 436 residential units were added to the project's TAZ to represent the project. Using the socioeconomic characteristics of developments in the immediate vicinity of the project to develop a profile of the households and persons expected to live in the proposed project, a population of 1,333 was estimated for the proposed project. Using the output trip table from the travel demand model, automobile trips either starting or ending in the proposed project were selected. These trips were factored based on the auto occupancy; single occupancy trips were multiplied by one, two-person vehicle trips were multiplied by 0.5, and three or more person trips

[1] *Technical Advisory on Evaluating Transportation Impacts in CEQA*.

were multiplied by 0.3, in a manner consistent with the methodology outlined by SACOG in its recent VMT analysis guidelines[2]. Each trip was multiplied by the model-determined distance based on the model's skim matrix determining the distance between each TAZ during the peak periods to determine that trip's VMT. Each trip's VMT was totaled to determine the total internal-internal VMT related to the proposed project.

External-internal and internal-external VMT was also calculated based on the methodologies outlined in SACOG's guidelines. A script file provided by SACOG and included in their model for VMT post-processing was run, which determined the VMT for trips that either start or end outside of the model area by TAZ. As the project was separated into its own TAZ, the VMT for the project's TAZ was added to the internal-internal total VMT to determine the total VMT associated with the proposed project. This VMT was then divided by the population of the project to determine a VMT per capita associated with the proposed project. This value was then compared to the Regional VMT Threshold for Residential land use types (15-percent below the Regional Average) to determine whether the project results in a significant impact.

VMT Analysis Results

Using the methodology described above, the VMT per Capita for the proposed Project was calculated. As shown Table 1 below, the proposed Project results in a VMT per capita value of 23.3.

Table 1 – Existing VMT Analysis Results Summary for the Proposed Project

Trip Type	Internal VMT	External VMT	Total VMT
Origin	15,157	610	15,767
Destination	14,677	604	15,281
Total	29,834	1,214	31,048
		Total Population	1,333
		VMT per Capita	**23.3**

In order to place the Project's VMT per Capita value in context, the average VMT per Capita was calculated for the entire SACOG region. The VMT per capita average for the SACOG region was calculated using the same methodology that was used to calculate the Project's average VMT per capita.

As shown Table 2 below, the average VMT per capita in the SACOG region is 23.2. Using the state's guidance, absent other substantial evidence, thresholds should be set 15-percent below the average VMT per capita. Thus, based on the analysis summarized in the tables below, the threshold for the SACOG region would be 19.7 VMT per capita, respectively.

Table 2 – Existing VMT Analysis Results Summary for the SACOG Region

Trip Type	Internal VMT	External VMT	Total VMT
Origin	18,765,997	8,788,214	27,554,210
Destination	18,765,997	8,788,214	27,554,210
Total	37,531,994	17,576,427	55,108,421
		Total Population	2,376,311
		VMT per Capita	**23.2**

Based on the analysis provided above, the project is expected to result in a finding of a significant impact based on the SACOG regional threshold as the project exceeds the threshold by approximately 15-percent.

[2] *VMT computation Procedures (DRAFT)*. Sacramento Area Council of Governments (SACOG). September 30, 2020.

Kimley»Horn

VMT Mitigation Strategies

In an attempt to mitigate the Project's significant impact to less than significant, SACOG's SB 743 guidance document[3] was used to help determine what mitigation strategies would be appropriate for the Project and how much those strategies would reduce the Project's VMT per Capita. SACOG's guidance relies heavily on the information provided by the California Air Pollution Control Officers Association (CAPCOA) guidance document for quantifying VMT reduction measures[4] and both documents were used to determine the strategies that could be implemented to reduce the Project's VMT per Capita.

Based on the CAPCOA guidance, the maximum VMT reduction that can be reasonably be obtained for Projects in a suburban setting is 15-percent, but this includes reductions related to commute trips. After a review of the mitigation strategies, many of the proposed strategies were found to not be applicable for the project as they are based on projects in urban locations or are applicable only to non-residential projects. The mitigation strategies that were considered include those related to parking, reducing work commute trips, or are related to transit. As the Project is located in a developing area with only vacant land and other residential communities surrounding it, there are limited alternatives to driving for work or shopping needs and no restrictions are placed on parking. In addition, the limited access to transit and the inability to implement strategies related to employment and commuting further restricts the Project's ability to reduce its VMT per Capita.

The two feasible mitigation strategies the Project is implementing include constructing a portion of the regional trail system that is planned in the vicinity of the Project and providing monetary support for transit related services through the City of Rancho Cordova's Transit Related Services Special Tax.

The Transit Related Services Special Tax will fund transportation services as determined appropriate by the City Council. Supplemental transportation services may include, but are not limited to, the following:

- Transit Shuttle – shuttle for residents and/or employees between residential areas, employment centers, shopping and service centers and light rail stations and/or other public transit options.
- Guaranteed Ride Home – free taxi rides and rental cars for ride sharers in case of an emergency.
- Transit Subsidies – financial assistance to encourage residents and employees to use transit or other alternative transportation measures.
- Transportation Plans for employers and/or resident groups – plans which guide employers and resident groups on the implementation of trip reduction programs, such as ride share matching or other similar programs.
- Education Programs – various programs such as education of transit options, home office set up, alternative commute opportunities.
- Infrastructure Support – additional bike racks and lockers, transportation alternative and ride share informational boards/kiosks, and transit facilities.
- Transportation Coordinator Training and Support – instruction in mobility (transportation alternatives) for residential groups and work site coordinators.
- Bicycle and Alternative Fuel Vehicle Incentives – incentives for purchasing new bicycles or alternative fuel vehicles.

Based on the CAPCOA guidance, these two measures combined would provide a maximum VMT reduction of 4.5-percent, but the reduction realized would likely be lower. Even with the maximum reduction applied, the VMT per Capita for the project would continue to exceed the regional threshold and therefore the impact would remain significant and unavoidable.

Matt Weir, P.E., T.E., PTOE, RSP_1

Re: The Preserve
Supplemental Analysis for Six Additional Units

Date: February 8, 2021

As requested, we have prepared this memorandum to document the effect of adding six (6) additional units to the Proposed Project. These findings are compared against the Level of Service (LOS) and Vehicle Miles Traveled (VMT) analyses completed previously for your residential development project located west of the Raymer Way intersection with Grant Line Road in Rancho Cordova.

Overview

The primary purpose of this evaluation is to document the effect of adding six (6) additional units to the Proposed Project. Kimley-Horn understands that the Proposed Project previously consisted of 434 single-family detached units on three vacant parcels. The six (6) additional units results in a revised total of 440 single-family detached units.

Trip Generation

To determine the number of additional trips that result from the addition of the Proposed Project (six additional units), a trip generation comparison was completed. The number of trips anticipated to be generated by the Proposed Project was approximated using data included in the *Trip Generation Manual, 10th Edition* published by the Institute of Transportation Engineers (ITE). As shown in **Table 1**, the six additional units are estimated to generate 50 additional new daily trips, with four additional trips occurring during the AM peak-hour and five additional trips occurring during the PM peak-hour.

Table 1 – Trip Generation Summary

Land Use (ITE Code)	Size (Dwelling Units)	Daily Trips	AM Peak-Hour					PM Peak-Hour				
			Total Trips	In		Out		Total Trips	In		Out	
				%	Trips	%	Trips		%	Trips	%	Trips
Single-Family Detached Housing (210)[1]	434	4,014	313	25%	78	75%	235	416	63%	262	37%	154
Single-Family Detached Housing (210)[1]	440	4,064	317	25%	79	75%	238	421	63%	265	37%	156
New Project Trips		**50**	**4**		**1**		**3**	**5**		**3**		**2**

[1] *Trip generation based on Institute of Transporation Engineers (ITE), Trip Generation Manual, (10th Edition) equations for Single-Family Detached Housing (Land Use Code 210)*
Daily: Ln(T) = 0.92Ln(X) + 2.71
AM Peak Hour: T = 0.71(X) + 4.80
PM Peak Hour: Ln(T) = 0.96Ln(X) + 0.2
Where: T = trips generated, X = dwelling units

Kimley»Horn

Level of Service (LOS) Analysis Comparison

The following guidelines were used when evaluating whether the Proposed Project results in a LOS deficiency:

Roadways/Signalized Intersections: A project is considered to have a significant effect if it would:

- result in a roadway or a signalized intersection operating at an acceptable LOS to deteriorate to an unacceptable LOS; or
- increase the V/C ratio by more than 0.05 at a roadway or at a signalized intersection that is operating at an unacceptable LOS without the project.

Unsignalized Intersections: A project is considered to have a significant effect if it would:

- result in an unsignalized intersection movement/approach operating at an acceptable LOS to deteriorate to an unacceptable LOS, and also cause the intersection to meet a traffic signal warrant; or
- for an unsignalized intersection that meets a signal warrant, increase the delay by more than 5 seconds at a movement/approach that is operating at an unacceptable LOS without the project.

Previously, the addition of the Proposed Project to the Existing (2019) Conditions resulted in a deficiency at two (2) study intersections. The addition of the Proposed Project to Cumulative (2035) Conditions resulted in a deficiency at three (3) study intersections. The addition of the Proposed Project did not result in a deficiency at any of the study roadway segments for Existing (2019) or Cumulative (2035) Conditions.

A review was undertaken to determine whether the six (6) project units would result in additional deficiencies. Only intersections and roadway segments that were identified as being close to becoming deficient or were already deficient without the addition of the project, were included in this supplemental review. Specifically, if an intersection was within five (5) seconds of delay to becoming deficient or if a roadway segment had a volume to capacity ratio (V/C ratio) within 0.05 of capacity or was already over capacity it was included in the review.

The additional 50 daily trips, with four new trips occurring during the AM peak-hour, and five new trips occurring during the PM peak-hour, were distributed to the selected study intersections and roadway segments based on the previously developed Existing (2019) and Cumulative (2035) trip distributions. It was determined that the additional trips did not result in any intersections or roadway segments currently operating acceptably to become deficient, nor did the additional trips result in any intersections or roadway segments currently operating at deficient levels to exceed the guidelines described above.

VMT Analysis Conclusions Comparison

As shown in Table 2 below, the proposed Project resulted in a VMT per capita value of 23.3.

Table 2 – Existing VMT Analysis Results Summary for the Proposed Project

Trip Type	Internal VMT	External VMT	Total VMT
Origin	15,157	610	15,767
Destination	14,677	604	15,281
Total	29,834	1,214	31,048
		Total Population	1,333
		VMT per Capita	**23.3**

In order to place the Project's VMT per Capita value in context, the average VMT per Capita was calculated for the City of Rancho Cordova, Sacramento County, and the entire SACOG region.

Kimley»Horn

Based on the previously completed analysis, the project is expected to result in a finding of a significant impact only if the City's threshold were to be based on Sacramento County or SACOG regional data as the project would exceed the threshold based on these data sources. However, the project would be expected to result in a finding of less than significant impact if the City's threshold were to be based on only City of Rancho Cordova data.

As the character of the additional six units would be consistent in terms of size and socioeconomic distribution of the residents of the other 434 units in the Proposed Project, it is reasonable to assume that the distribution and length of trips resulting from the additional units would be consistent with the rest of the units comprising the Proposed Project because the City's travel demand model is used to complete the VMT analysis. The trips generated, distributed, and assigned to the model roadway network would only increase in magnitude with the additional units and the pattern of the trips would remain consistent. While the additional six units would increase the total daily VMT generated by the Proposed Project, there would be a commensurate increase in the Proposed Project's population leading to a VMT per capita value that is consistent with the analysis performed previously.

Conclusions

As noted above, the six units are estimated to generate 50 additional new daily trips, with four additional new trips occurring during the AM peak-hour, and five additional new trips occurring during the PM peak-hour. It was determined that the additional trips do not result in any intersections or roadway segments currently operating acceptably to become deficient, nor did the additional trips result in any intersections or roadway segments currently operating at deficient levels to exceed the guidelines described above. In addition, while the additional six units would increase the total daily VMT generated by the Proposed Project, there would be a commensurate increase in the Proposed Project's population leading to a VMT per capita value that is consistent with the analysis performed previously.

Re: The Preserve
Centennial Drive Considerations

Date: August 16, 2021

Project Understanding

We understand that the City is currently assessing the potential of removing the extension of Centennial Drive to Grant Line Road/Capital SouthEast Connector (thereby removing the link between Rio Del Oro and Grant Line Road/the Capital SouthEast Connector). This memorandum summarizes the efforts that have been undertaken to date to analyze the removal of the extension of Centennial Drive.

Travel Demand Modeling

The initial effort occurred in April 2019 and was documented in a memorandum completed by Kimley-Horn[1]. At that time, the City provided their currently adopted Travel Demand Model (TDM) for the Forecast Year (2035) and provided two roadway network modifications to be assumed as a part of this effort[2]. The two network modifications were as follows:

1) Douglas Road – reduced from 6 lanes to 4 lanes between Rancho Cordova Parkway and Grant Line Road
2) Rancho Cordova Parkway – reduced from 6 lanes to 4 lanes between Chrysanthy Boulevard and Villagio Drive

Two versions of the model were run once these roadway network modifications were completed. The first version of the model did not have any modifications to Centennial Drive and it was assumed to connect between Americanos Boulevard and Grant Line Road. A second version of the model was run with Centennial Drive between Americanos Boulevard and Grant Line Road removed and the centroid connector that previously connected to this portion of Centennial Drive was moved to connect directly to Grant Line Road. The resulting volumes from the two model runs were compared and a difference was taken between the model run without the Centennial Drive connection and the model run with the Centennial Drive connection. The volume difference is displayed graphically in **Exhibit 1**. As shown in **Exhibit 1**, the largest daily volume increase is along White Rock Road immediately west of Grant Line Road while the largest daily volume decrease is along Centennial Drive immediately west of Americanos Boulevard. Minimal daily volume differences occur along Sunrise Boulevard and Rancho Cordova Parkway.

Roadway Segment Volumes and Levels of Service (LOS)

In addition to the volume comparison, a Level of Service (LOS) analysis was completed for select roadways in the vicinity of Centennial Drive, both with and without the Centennial Drive connection between Americanos Boulevard and Grant Line Road. The results of the LOS analysis are shown in **Table**

[1] *The Preserve DRAFT Centennial Drive Assessment*. Kimley-Horn. April 9, 2019.

11	Americanos Blvd	International Rd	Centennial Dr	2	Arterial M	11,170	0.62	B	2	Arterial M	8,330	0.46	A
12	Americanos Blvd	Centennial Dr	Douglas Rd	2	Arterial M	10,070	0.56	A	2	Arterial M	10,240	0.57	A

Note: **Bold** represents unacceptable operations.

The number of lanes assumed for each roadway segment were taken directly from the City's TDM with the exception of Segment #6 and Segment #8 (White Rock Road between Grant Line Road and Prairie City Road, and Grant Line Road between White Rock Road and Douglas Road). While these roadway segments are assumed to be six (6) lanes in the model, they were analyzed as four-lane expressways, consistent with guidelines for the Capital SouthEast Connector.

Roadway Segment Volumes and Levels of Service (LOS) Follow Up

On July 22, 2019, Kimley-Horn met with City Staff where they requested a follow up roadway segment analysis for Baseline and Cumulative conditions based on the Rio del Oro traffic study. The No Project and Plus Project scenarios for Baseline and Cumulative Conditions from the traffic study, as well as the volumes and LOS when the rerouted volumes are taken into account based on the removal of Centennial Drive, are summarized in Exhibit 2 and Exhibit 3, respectively. As shown in Exhibit 2 and Exhibit 3, no additional impacts that haven't been previously identified were shown as a result of the removal of the Centennial Drive extension. In addition, one impact was removed in the Cumulative scenario as a result of the removal of the Centennial Drive extension.

Vehicle Miles Traveled (VMT) Assessment

In addition to the roadway segment analysis, a Vehicle Miles Traveled assessment was also completed. The regional (SACOG) VMT totaled for the two model runs, with and without the Centennial Drive extension. The assessment indicated that VMT was reduced by 6,820 without the Centennial, however it should be noted that the difference reflects a 0.008-percent difference in regional VMT. As the model used to perform this analysis includes an iterative process for assigning traffic to the model network there is inherent randomness introduced and thus this difference should be considered as indication that the removal of Centennial Drive results in a negligible difference to regional VMT.

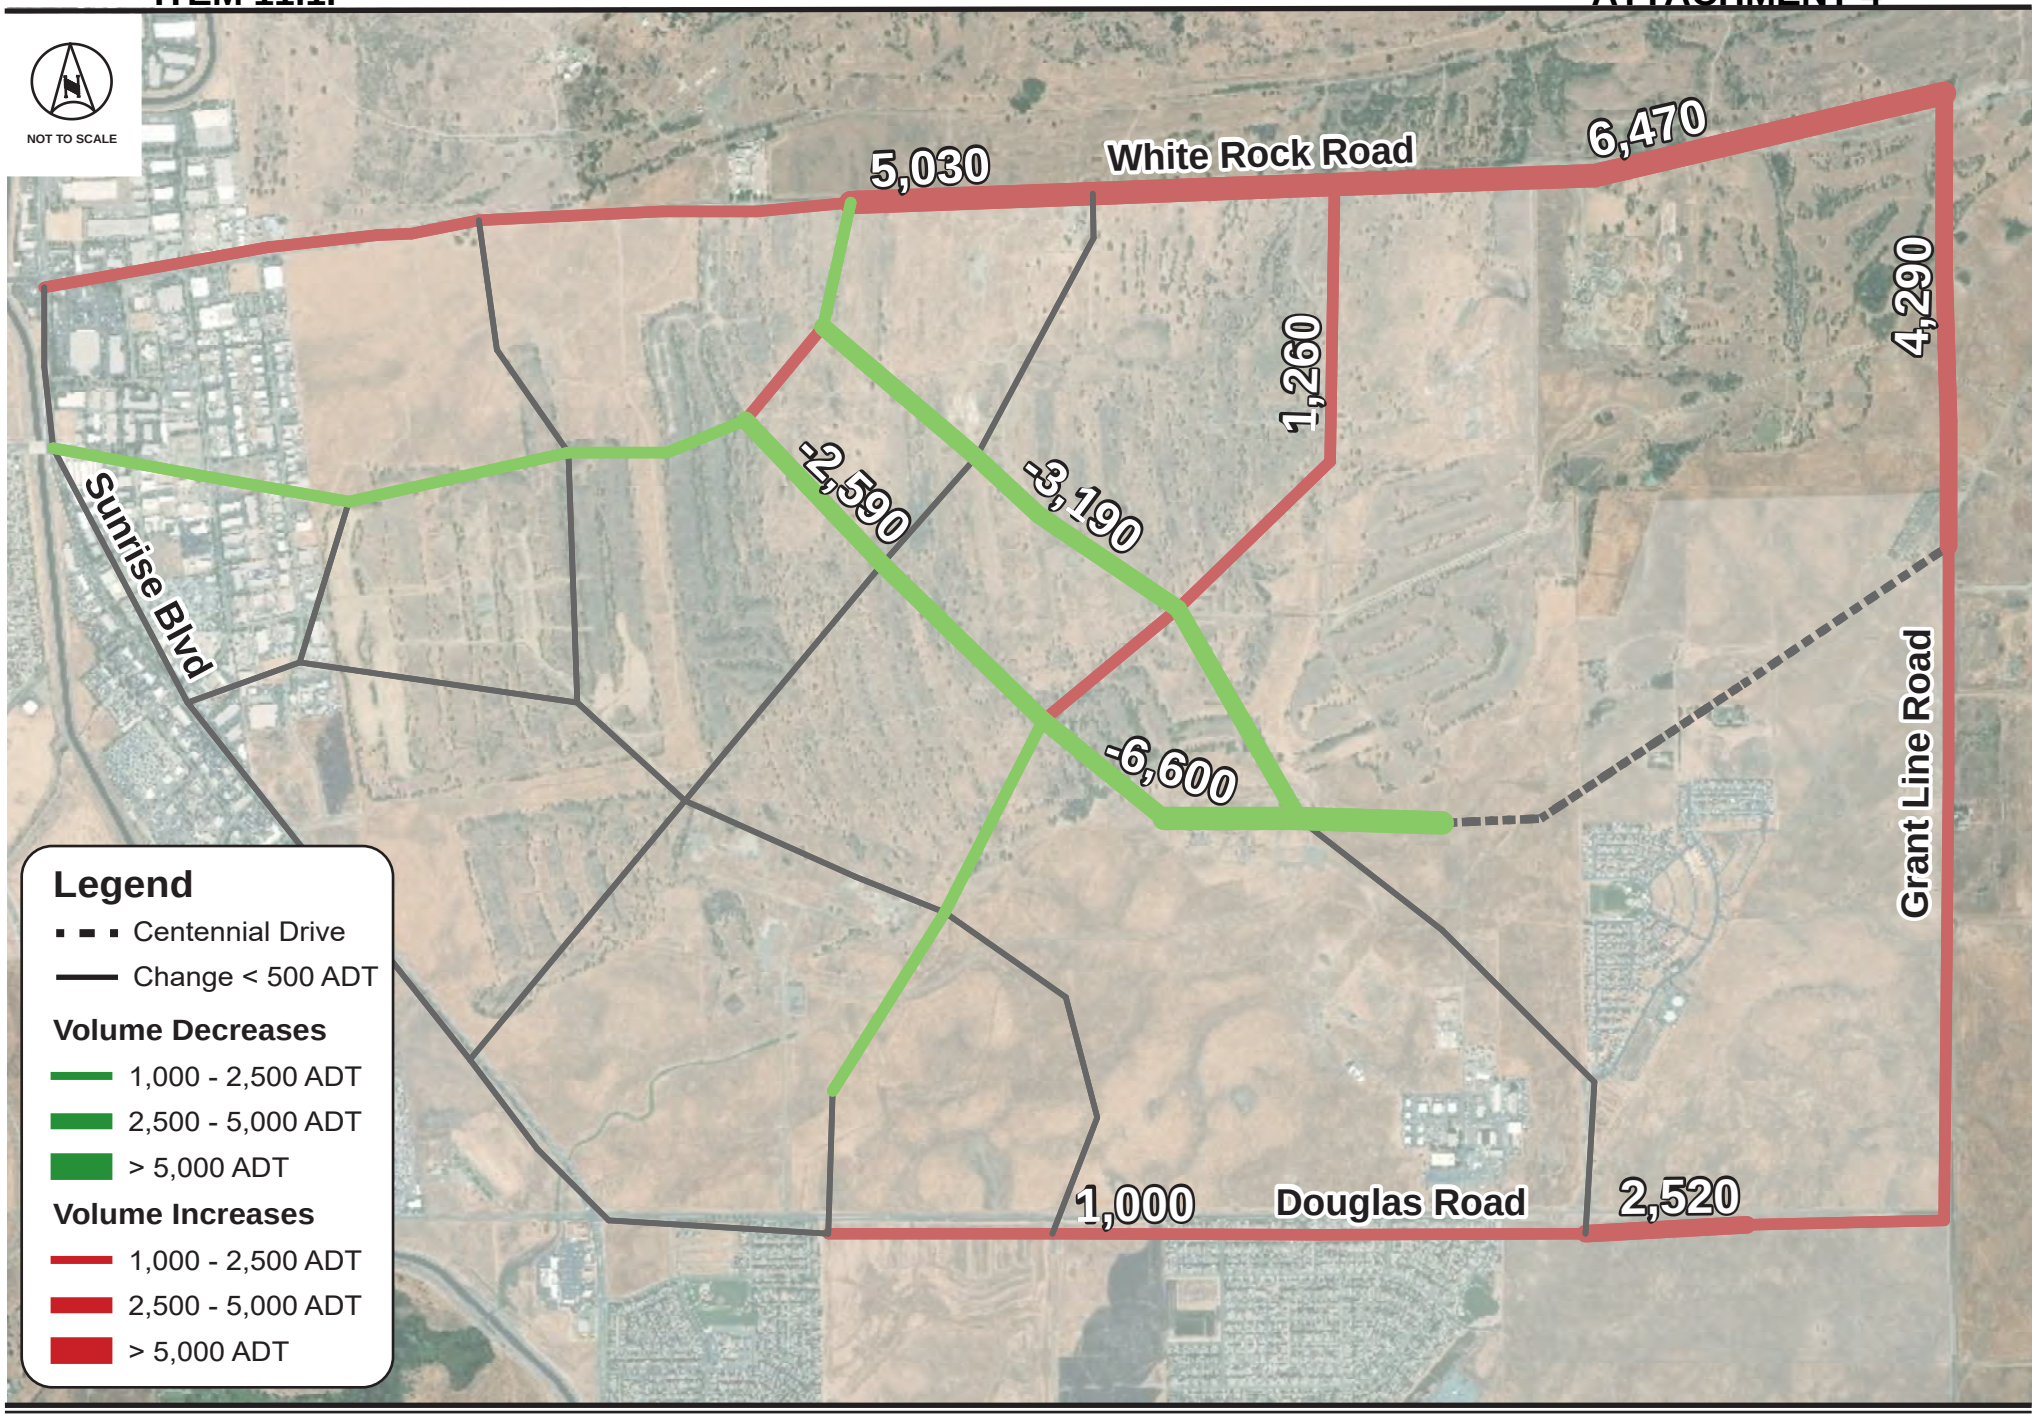
Physical Constraints

The adopted South Sacramento Habitat Conservation Plan (SSHCP) has created conflicts with both the previously planned development of Heritage Falls and the potential construction of Centennial Drive. A review was completed in June 2019 that looked at alternative alignments for Centennial Drive that would run south of the current Centennial Drive alignment, cross the Rio Del Oro preserve and extend through the proposed Project to Grant Line Road. This was documented in a memorandum that was submitted to

the City[3]. The following reasons were cited as to why these alternative alignments were deemed infeasible:

1. The needed road crossing of the Rio Del Oro preserve is not allowed under the project's Biological Opinion and would require an amendment. The environmental consultant to the Rio Del Oro developers indicates that the developers have made it clear on several occasions that they are not interested in amending or revisiting the Biological Opinion, which was controversial and took many years to obtain.

2. Agency approval of an additional crossing through the Rio Del Oro preserve is speculative at best. This stretch of the Rio Del Oro preserve is full of resources and is a linkage preserve intended as a wildlife corridor. It seems unlikely that the USFWS would support an additional crossing.
3. The City's threshold for a collector road with frontage is fewer than 8,000 daily vehicles. The travel demand model states that the estimated traffic volume in the future along Centennial Drive would be 10,250 daily vehicles which would disallow front on driveway access. The high volume of thru-traffic would create a crossing hazard separating the existing neighborhoods of North Douglas and the future The Preserve neighborhood south of the Centennial extension from the planned park and open space amenities in conflict with the design concept for the project. The mere possibility of the future connection to Rio Del Oro would interfere with project design whether or not the connection was ever completed.



Conclusions

As shown in Exhibit 1 and Table 1, the removal of the Centennial Drive connection between Americanos Boulevard and Grant Line Road is not expected to significantly impact the surrounding roadway network. While volumes are expected to fluctuate between increasing by almost 6,500 daily vehicles to decreasing by 6,600 daily vehicles, the change in daily volumes does not impact any roadway segment. When applying these fluctuating volumes to the Rio del Oro roadway segment analysis, no impacts were created that weren't previously identified and one impact for Cumulative (2030) Conditions was removed, as shown in Exhibit 2 and Exhibit 3. In addition, the removal of the Centennial Drive extension has a negligible effect on regional VMT. Finally, when considering alternative alignments for the Centennial Drive extension, three alignments were reviewed and all were deemed infeasible.

1. Introduction and List of Commenters

1. INTRODUCTION AND LIST OF COMMENTERS

1.1 INTRODUCTION

This Final Environmental Impact Report (EIR) contains comments received during the public review period of The Preserve Project (proposed project) Draft EIR. This document has been prepared by the City of Rancho Cordova, as Lead Agency, in accordance with the California Environmental Quality Act (CEQA) and the CEQA Guidelines, Section 15132. The Introduction and List of Commenters chapter of the Final EIR discusses the background of the Draft EIR and purpose of the Final EIR, and provides an overview of the organization of the Final EIR.

1.2 BACKGROUND

The Draft EIR identified the proposed project's potential impacts and the mitigation measures that would be required to be implemented. The proposed project Draft EIR includes the following environmental analysis chapters: Air Quality, Greenhouse Gas Emissions, and Energy; Biological Resources; Cultural and Tribal Resources; Geology and Soils/Mineral Resources; Hazards and Hazardous Materials; Hydrology and Water Quality; Land Use and Planning/Population and Housing; Noise; Public Services and Utilities; and Transportation. The remaining environmental issue areas identified by Appendix G of the CEQA Guidelines are addressed in the Initial Study prepared for the proposed project and included in Appendix A of The Preserve Project Draft EIR, as an attachment to the Notice of Preparation (NOP).

In accordance with CEQA, the City of Rancho Cordova used the following methods to solicit public input on the Draft EIR:

- A NOP for the Draft EIR was released for a 30-day public review period from October 25, 2019 to November 25, 2019. The NOP comment letters are included as Appendix B to the Draft EIR.
- A public scoping meeting was held in Rancho Cordova City Hall, American River South Room on November 13, 2019 to solicit comments regarding the scope of the Draft EIR.
- On November 9, 2021, the Draft EIR was submitted to the State Clearinghouse for distribution to State and local agencies, resulting in a 45-day public review period from November 9, 2021 to December 27, 2021.
- On November 9, 2021, a Notice of Availability (NOA) of the Draft EIR was posted to the City's website, and mailed to local agencies and interested members of the public.
- The Draft EIR was made available for review on the CEQA website at https://ceqanet.opr.ca.gov/2019100515/3

All public comments received on the Draft EIR are listed in this chapter, and written responses to comments are included in Chapter 2, Response to Comments, as discussed in more detail in Section 1.4 of this chapter.

1.3 PURPOSE OF THE FINAL EIR

Pursuant to CEQA Guidelines Section 15132, this Final EIR consists of the following:

1. Comments received on the Draft EIR (Chapter 2 of this Final EIR);
2. Revisions to the Draft EIR (Chapter 3 of this Final EIR); A list of persons, organizations, and public agencies commenting on the Draft EIR (included as Section 1.4 of this chapter); and
3. Any other information added by the Lead Agency.

1.4 LIST OF COMMENTERS

The City of Rancho Cordova received eight comment letters during the public comment period on the Draft EIR for the proposed project. The comment letters were authored by the following agencies, groups, and individual residents.

Agencies

Letter 1 ..... Sacramento County Department of Transportation – Gary Gasperi
Letter 2 ..... California Department of Parks and Recreation – Barry Smith
Letter 3 .....California Department of Transportation – Alex Padilla
Letter 4 ..... Sacramento Regional Transit District – Kevin Schroder
Letter 5 .....Sacramento Metropolitan Air Quality Management District – Joseph J. Hurley
Letter 6 .....Central Valley Regional Water Quality Board – Peter G. Minkel

Groups

Letter 7 ..... Civic Thread – Kathryn Canepa

Residents

Letter 8 .....Don Ross

1.5 CERTIFICATION OF THE FINAL EIR

State law requires that the City make several types of CEQA "findings" at the time of final action on the project. Findings describe the conclusions reached regarding particular issues, including specific evidence in support of those conclusions. The Final EIR typically provides much of the substantial evidence to support these findings. The required findings for the project are as follows:

- Certification of the Final EIR (CEQA Guidelines Section 15090) – These findings support the adequacy of the Final EIR for decision-making purposes. The Lead Agency must make the following three determinations in certifying a Final EIR:

    1. The Final EIR has been completed in compliance with CEQA.
    2. The Final EIR was presented to the decision-making body of the Lead Agency, and the decision-making body reviewed and considered the information in the Final EIR prior to approving the project.
    3. The Final EIR reflects the Lead Agency's independent judgment and analysis.

- Findings Regarding Significant Impacts and Project Alternatives (CEQA Guidelines Section 15091) – These findings explain how the City chose to address each identified significant impact, including the mitigation measures adopted or an explanation of why

such measures are infeasible. A discussion of the feasibility of project alternatives is also required by this section (see also CEQA Guidelines Section 15126.6[f]).

Pursuant to CEQA Guidelines, Section 15093(b), when a Lead Agency approves a project that would result in significant unavoidable impacts, the agency must state in writing the reasons supporting the action (Statement of Overriding Considerations). The Statement of Overriding Considerations shall be supported by substantial evidence. The proposed project would result in significant and unavoidable impacts related to greenhouse gas (GHG) emissions and transportation; thus, a Statement of Overriding Considerations must be adopted if the project is approved. The required Findings of Fact and Statement of Overriding Considerations will be included as part of the resolution considered by the City of Rancho Cordova.

1.6 ORGANIZATION OF THE FINAL EIR

The Final EIR is organized into the following four chapters.

1. Introduction and List of Commenters

Chapter 1 provides an introduction and overview of the document, describes the background of the Draft EIR and the purposes of the Final EIR, provides a list of commenters, and describes the organization of the Final EIR.

2. Responses to Comments

Chapter 2 presents the comment letters received, and responses to each comment. Each comment letter received has been numbered at the top and bracketed to indicate how the letter has been divided into individual comments. Each comment is given a number with the letter number appearing first, followed by the comment number. For example, the first comment in Letter 1 would have the following format: 1-1. The response to each comment will reference the comment number.

3. Revisions to the Draft EIR Text

Chapter 3 summarizes changes made to the Draft EIR text including clarifications, modifications, and amplifications of the analysis. Section 15088.5 of the State CEQA Guidelines states that a lead agency is required to recirculate a Draft EIR when “significant new information” is added to the document after public notice is given of the availability of the Draft EIR for public review under Section 15087 but before certification. Recirculation is not required where the new information added to the EIR merely clarifies or amplifies or makes insignificant modifications in an adequate EIR. The modifications to the Draft EIR identified in Chapter 3 have been examined with these requirements and obligations in mind. The City has determined that the provisions of Section 15088.5 of the CEQA Guidelines are not triggered and recirculation of this EIR is not required. A more detailed description of this determination will be included in the CEQA Findings of Fact described above.

4. Mitigation Monitoring and Reporting Program

CEQA Guidelines, Section 15097, requires lead agencies to adopt a program for monitoring the mitigation measures required to avoid the significant environmental impacts of a project. The intent of the Mitigation Monitoring and Reporting Program (MMRP) is to ensure implementation of the mitigation measures identified within the EIR for the proposed project.

2. Responses to Comments

2. RESPONSES TO COMMENTS

2.1 INTRODUCTION

The Responses to Comments chapter contains responses to each of the comment letters submitted regarding The Preserve Project (proposed project) Draft EIR during the public review period.

2.2 RESPONSES TO COMMENTS

Each bracketed comment letter is followed by numbered responses to each bracketed comment. The responses amplify or clarify information provided in the Draft EIR and/or refer the reader to the appropriate place in the document where the requested information can be found. Comments that are not directly related to environmental issues (e.g., opinions on the merits of the project that are unrelated to its environmental impacts) are either discussed or noted for the record. Where revisions to the Draft EIR text are required in response to the comments, such revisions are noted in the response to the comment, and are also listed in Chapter 3 of this Final EIR. All new text is shown as double underlined and deleted text is shown as ~~struck through~~.

Letter 1

Department of Transportation
Ron E. Vicari, Director

Divisions
Administration
Maintenance & Operations
Engineering & Planning

County of Sacramento

November 16, 2021

Darcy Goulart
Planning Department
City of Rancho Cordova
2729 Prospect Park Dr.
Rancho Cordova, CA 95670

SUBJECT: COMMENTS ON NOTICE OF AVAILABILITY OF THE PRESERVE PROJECT DRAFT EIR.

Darcy Goulart:

1-1 The County of Sacramento, Department of Transportation (SacDOT) has reviewed the Traffic Impact Analysis in Appendix K of The Preserve's Draft EIR. We appreciate the opportunity to review these documents, and have the following comments:

1-2
- Intersection 17 – Grant Line Road at Jackson Road/SR-16
  - The recommended E+P scenario mitigation is to install left turn pockets on the northbound and southbound Grant Line Road approaches. SacDOT concurs with this improvement and notes that signal modifications to implement protected left turn signal phasing should also be assumed. The study states that the impact is significant and unavoidable since a portion of the intersection is outside the City's jurisdiction. However, Sacramento County is prepared to work cooperatively with the applicant and Caltrans to improve this shared intersection.

1-3
- Intersection 20 – Grant Line Road at Raymer Way
  - SacDOT recommends coordinating this E+P improvement and C+P fair share with the Capital Southeast Connector JPA, as well as the quarry access on the east side of this intersection.

1-4
- Intersection 21 – Grant Line Road at White Rock Road
  - SacDOT recommends coordinating this C+P fair share with the Capital Southeast Connector JPA.

1-5
- Intersection 21 – Grant Line Road at White Rock Road
  - SacDOT recommends coordinating this C+P fair share with the Capital Southeast Connector JPA.

LETTER 1: GARY GASPERI, SACRAMENTO COUNTY DEPARTMENT OF TRANSPORTATION

Response to Comment 1-1
The comment is an introductory statement and does not address the adequacy of the Draft EIR.

Response to Comment 1-2
The Sacramento County Department of Transportation's willingness to coordinate on the improvements at the SR 16/Grant Line Road intersection is noted for the record, and the City commits to do so.

Response to Comment 1-3
The comment does not address the adequacy of the Draft EIR.

Nonetheless, as detailed on page 4.10-17 of the Draft EIR, the proposed project would be conditioned to build a signal with turn pockets at Intersection 20. Consistent with the commenter's recommendation, the City of Rancho Cordova would be required to coordinate with the Capital Southeast Connector JPA on the Intersection 20 improvement. As part of that discussion, the City would consider the future east access needs to the Teichert Aggregates quarry sites.

Response to Comment 1-4
The comment does not address the adequacy of the Draft EIR.

However, consistent with the commenter's recommendation, the City of Rancho Cordova would be required to coordinate with the Capital Southeast Connector JPA on the Intersection 21 improvement as well as future construction projects along Grant Line Road. It is noted that the Intersection 21 improvement cited by the commenter is not included as a project condition of approval. As detailed on page 4.10-17 of the Draft EIR, the project conditions of approval include improvements to Intersections 17 and 20.

Response to Comment 1-5
Please see Response to Comment 1-4.

Response to Comment 1-6
Thank you for participating in the public review process of the Draft EIR. Your comments and concerns are noted for the record.

Letter 2

State of California • Natural Resources Agency
DEPARTMENT OF PARKS AND RECREATION
Gold Fields District • 7806 Folsom Auburn Road • Folsom, CA 95630

Gavin Newsom, *Governor*
Armando Quintero, *Director*

December 13, 2021

City of Rancho Cordova
Community Planning Department
Attn: Darcy Goulart, Principal Planner
2729 Prospect Park Drive
Rancho Cordova, CA 95760

Dear Ms. Goulart,

2-1 Thank you for the opportunity to provide comments on the Preserve Project draft Environmental Impact Report. The Gold Fields District of the California Department of Parks and Recreation (the "Department") manages Prairie City State Vehicular Recreation Area (SVRA), which is located to the east of Rancho Cordova and northeast of the Preserve Project.

The Department has operated Prairie City SVRA since 1988, however the park has been used for off highway vehicle (OHV) recreation since 1972. First as the privately owned McGills Cycle Park and then by Sacramento County when they purchased and operated the OHV park in 1975. The State took over operation in 1988.

2-2 Prairie City SVRA provides a valuable regional resource for OHV outdoor recreation. In addition to many miles of trails, tracks, and obstacle courses for all types of OHVs the park unit also hosts many special events including the nationally recognized Hangtown Classic Motocross Race. In addition to OHV special events, the park unit has long hosted a highly popular spring mountain bike race series on Wednesday evenings. Many Rancho Cordova residents likely participate and enjoy these recreation opportunities. The park unit also includes buffer areas that are closed to OHV use and managed for vernal pools and other resource values. While Prairie City SVRA operates within all environmental laws and requirements, as with any OHV activity, sound and some dust are part of the experience. This letter is just a reminder to the City and future residents of the Preserve Project subdivision that this long-standing OHV recreation area is in close proximity and they may occasionally see dust and/or hear OHV use, which are part of the existing condition of the area. Prairie City SVRA strives to be good neighbors with all nearby property owners and we look forward to further collaboration with the City of Rancho Cordova.

2-3

2-4 If you have any questions regarding this letter, please contact Prairie City Sector Manager, Peter Jones, at (916) 985-1097. Thank you.

Sincerely,

Barry Smith, Acting District Superintendent

LETTER 2: BARRY SMITH, CALIFORNIA DEPARTMENT OF PARKS AND RECREATION

Response to Comment 2-1
The comment is an introductory statement and does not address the adequacy of the Draft EIR.

Response to Comment 2-2
The comment provides background on Prairie City State Vehicle Recreation Area and does not address the adequacy of the Draft EIR.

Response to Comment 2-3
While the comment does not address the adequacy of the Draft EIR, the comment is noted for the record and will be considered by City staff in developing the staff recommendation, and by the Planning Commission and City Council in their deliberations and decision-making regarding certification of the EIR and the proposed project.

Response to Comment 2-4
Thank you for participating in the public review process of the Draft EIR. Your comments and concerns are noted for the record.

The Preserve

Dear Ms. Goulart:

3-1 Thank you for including the California Department of Transportation (Caltrans) in the review process for the project referenced above. Caltrans' new mission, vision, and goals signal a modernization of our approach to California's transportation system. We reviewed this local development for impacts to the State Highway System (SHS) in keeping with our mission, vision, and goals for sustainability/livability/economy, and safety/health. We provide these comments consistent with the State's smart mobility goals that support a vibrant economy, and build communities, not sprawl.

3-2 The Preserve (Project) proposes the subdivision and development of 440 single family residences, open space areas, and infrastructure to support the community. The proposed project would require the following discretionary actions by the City of Rancho Cordova: Certification of the EIR; Adoption of the Mitigation Monitoring and Reporting Program; General Plan Amendment (GPA) from Grant Line West Planning Area to Low-Density Residential; GPA to remove the portion of Centennial Drive through the project site, as depicted in the Circulation Element; Rezone from AG-80 (approximately 68.42 acres) and IR (approximately 30.48 acres) to Residential District (RD-5); Tentative Subdivision Map; and Development Agreement. The Project is located northwest of Raymer Way and Grant Line Road, north of the Sunridge Specific Plan area, and east of the Rio Del Oro Specific Plan area in Rancho Cordova. The Project is approximately 4.6 miles from the US 50/Sunrise Blvd interchange, approximately 5 miles from the US 50/Prairie City Road interchange, and approximately 5.2 miles from the SR 16/Grant Line Road intersection. Caltrans submitted a comment letter on November 25, 2019 in response to the Notice to Proceed for the Project. Based on the information received, Caltrans provides the following comments.

Letter 3 Cont'd

Traffic Forecasting & Modeling

- Caltrans requests providing more detail explaining why the VMT per capita estimate of 23.2 shown in Table 4.10-1 is lower than the HPMS and SACSIM19 model estimates. Chapter 4.10 of the Draft Environmental Impact Report (DEIR) within Table 4.10-1 Existing Vehicle Miles Travelled (VMT) per Capita in the SACOG Region identifies the average VMT per capita 23.2. The SACOG User Guide and Model Documentation for SACSIM19 (attached) identifies Highway Performance Monitoring System (HPMS) and SACSIM VMT per Capita estimates within Table 12-19. VMT per Capita estimates for HPMS are 25.1 and estimates for SACSIM are 24.6, both of which are higher than the 23.2 estimate shown in the Table 4.10-1. **3-3**
- Caltrans recommends adjusting the regional VMT per capita which will also adjust the current threshold of significance of 19.7. Please update the threshold and project impact conclusions as appropriate. **3-4**

Freeway Operations

- Caltrans submitted a comment letter on November 25, 2019 in response to the Notice to Proceed that included, among other comments, a request for analysis at four interchanges: **3-5**
  - US 50/Mather Field Road
  - US 50/Zinfandel Drive
  - US 50/Sunrise Blvd
  - US 50/Prairie City Road
- Section 4.10 of the DEIR includes a list of intersections and roadway segments. Of the previously requested interchanges for analysis, this study area includes the ramps at US 50/Mather Field Road, US 50/Zinfandel Drive, and US 50/Sunrise Blvd, but does not include US 50/Prairie City Road. In addition, trips don't appear to be distributed to the on and off ramps at these three interchanges within the study. Please revise the Traffic Impact Analysis to include this information for all locations and update findings if necessary.
- The State Route (SR) 16 analysis methodology, inputs, and fair share mitigation look reasonable for the impacts to the SR 16/Grant Line Road intersection. **3-6**

Letter 3 Cont'd

3-7 Please provide our office with copies of any further actions regarding the Project. We would appreciate the opportunity to review and comment on any changes related to this development.

If you have any questions regarding these comments or require additional information, please contact David Smith, Intergovernmental Review Coordinator, at (530) 682-3791 or by email at David.J.Smith@dot.ca.gov.

3-8 Sincerely,

Alex Padilla

Alex Padilla
Branch Chief, Transportation Planning – South
Planning, Local Assistance, and Sustainability

LETTER 3: ALEX PADILLA, CALIFORNIA DEPARTMENT OF TRANSPORTATION

Response to Comment 3-1
The comment is an introductory statement and does not address the adequacy of the Draft EIR.

Response to Comment 3-2
The comment summarizes the project components and does not address the adequacy of the Draft EIR.

Response to Comment 3-3
The City of Rancho Cordova's Travel Demand Model was used to complete the subject vehicle miles traveled (VMT) analysis. The model is based on the Sacramento Area Council of Governments (SACOG) SACSIM19 model, but is refined within the City Limits for land use, roadway network, and Traffic Analysis Zone (TAZ) structure. The process outlined by SACOG in their VMT methodology document was used to calculate the project's VMT per capita.[1] It is acknowledged that the results may differ from the standard SACSIM19 model, due to the aforementioned modifications made by the City for their City-specific model. It is also reasonable to anticipate that the results may differ from the Highway Performance Modeling System (HPMS), due to their respective data sources and methodology procedures. Additionally, the methodology and findings of the VMT analysis within the Draft EIR were reviewed by the City prior to publication of the Draft EIR and were determined to be adequate.

Response to Comment 3-4
Please refer to Response to Comment 3-3 for a summary of the methodology that was used to estimate the project VMT per capita. The same methodology was applied to estimate the VMT per capita for the entire SACOG region. Consistent with State guidance, the VMT threshold was determined to be 15 percent below the regional VMT per capita. The methodology and findings from this analysis were reviewed and approved by the City prior to publication and were determined to be adequate.

It is noted that the VMT analysis in the Draft EIR is conservative. If the VMT threshold of significance were based on the SACOG or HPMS values, consistent with the commenter's request, then the VMT threshold of significance would be 20.91 or 21.34, respectively. Thus, the project specific VMT per capita of 23.3 would be closer to the threshold, and the threshold would be easier to achieve. Regardless, the conclusion would remain the same as what was presented in the Draft EIR even if the SACOG or HPMS regional VMT values were used to calculate the VMT threshold of significance.

Response to Comment 3-5
The Traffic Impact Analysis includes evaluations of the Mather Field Road, Zinfandel Drive, and Sunrise Boulevard interchanges with U.S. Route 50. As detailed in the Draft EIR on page 4.10-17, the additional traffic generated by the proposed project would not result in inconsistency with the City's acceptable level of service (LOS) standard at the aforementioned locations. Therefore, the Traffic Impact Analysis did not identify improvement requirements at the foregoing interchanges. In addition, Figures 5 and 10 of the Traffic Impact Analysis show the trip distribution

[1] Sacramento Area Council of Governments. *VMT Computation Procedures*. September 30, 2020.

under Existing Plus Project and Cumulative Plus Project conditions, respectively. As indicated therein, the distribution percentages and roadway segment volumes were accounted for in the modeling completed as part of the Traffic Impact Analysis for the Mather Field Road, Zinfandel Drive, and Sunrise Boulevard interchanges with U.S. Route 50.

The Traffic Impact Analysis additionally evaluated the potential effects from project-generated traffic north of the project site along Grant Line Road and White Rock Road to the Prairie City Road/White Rock Road intersection. Based on the locations' proximity to the project site, project-generated traffic would pass through the aforementioned locations before reaching the Prairie City Road interchange with U.S. Route 50. The Traffic Impact Analysis determined that LOS-related improvements were not warranted at the White Rock Road/Grant Line Road and White Rock Road/Prairie City Road intersections. Nor were improvements necessary along the White Rock Road segment from Grant Line Road to Prairie City Road. Accordingly, because the aforementioned locations, which are closer to the project site, do not require improvements to sufficiently accommodate project-generated traffic, the Traffic Impact Analysis also found that an evaluation of the Prairie City Road interchange with U.S. Route 50, located further north of the project site, was not needed.

As part of development of the proposed project, the City has committed to coordinating with the California Department of Transportation (Caltrans), the County, the Capital Southeast Connector JPA, and the developer to make improvements at the two locations identified in the Traffic Impact Analysis requiring LOS-related improvements.

Response to Comment 3-6

The comment concurs with the methodology, inputs, and fair share project contribution used in the Traffic Impact Analysis to assess the project's effects on LOS under Existing Plus Project conditions at the SR 16/Grant Line Road intersection. The Draft EIR analyzes the proposed project's consistency with the City's applicable General Plan LOS standard at the SR 16/Grant Line Road intersection on page 4.10-17 and requires a project condition of approval to address the project's LOS inconsistency. The condition of approval requires the project applicant to pay a fair-share contribution for the required improvements to the SR 16/Grant Line Road intersection through payment of the City's transportation fees.

Response to Comment 3-7

Caltrans is included on the distribution list for the proposed project. Accordingly, consistent with the commenter's request, subsequent project documents will be submitted to Caltrans.

Response to Comment 3-8

Thank you for participating in the public review process of the Draft EIR. Your comments and concerns are noted for the record.

Public Transit Since 1973

December 27, 2021

Darcy Goulart, Planning Manager
Community Development Department
City of Rancho Cordova
2729 Prospect Park Drive Rancho Cordova, CA 95760

NAME OF DEVELOPMENT: The Preserve Project
TYPE OF DOCUMENT: Draft Environmental Impact Report

The Sacramento Regional Transit District (SacRT) has reviewed the Draft Environmental Impact Report (Draft EIR) for the Preserve Project (project). The proposed project site consists of 279.3 acres located northwest of Raymer Way and Grant Line Road, north of the Sunridge Specific Plan area and east of the Rio Del Oro Specific Plan area, within the City of Rancho Cordova. The proposed project would include subdivision of the project site to develop 440 single-family residences and associated parks, open space areas, and infrastructure to support the community. Of the 279.3 acres within the project site, 185.3 acres of currently undeveloped land on the northern parcels would remain as open space following development of the proposed project. A total of 8.65 acres are planned for two park areas located at the northern end of the development area, and an additional 9.77 acres of land would be designated Community Space. Finally, 0.45 acre of the project site would be designated green infrastructure which would include enhanced landscaped areas and trails with connection to the surrounding parks. Off-site improvements could be required, including utility connection or road development to the east of the site boundary and along the existing Raymer Way to the intersection with Grant Line Road, which could include expansion of the roadway or modifications to Morrison Creek.

SacRT has the following comments regarding the Draft EIR:

4-1 Mitigation Measure 4.1-7 declared "Off-site credits shall be purchased in order to reduce annual greenhouse gas (GHG) emissions by 617.30 MTCO2e per year". SacRT would appreciate the opportunity in the future to discuss with the city and future developers' options beyond the purchasing of credits to offset the GHG emissions.

4-2 As stated on page 436, "Transit services would not be available within the project site; however, from the proposed project's extension of the Edington Drive stub street, the nearest SRT bus stop would be only 1.5 miles to the southeast, near the Borderlands Drive/Canyonlands Drive intersection, providing residents of the proposed project access to SRT Route 175". SacRT appreciates the acknowledgement of limited transit services near and none within the project site. We suggest the city contact SacRT when transit needs increase and consider the collection of fees as transit is expected to expand as increased community demand is established.

4-3 Please provide clarification on mitigation measure 4.10-2(b) located on page 438 and Policy C.1.9 located on page 343 regarding the funding of the CordoVan. The text from mitigation measure 4.10-2(b) provides a general list of options for transit support, compared to the Project Consistency section for Policy C.1.9 that states "the project applicant…will pay a fair share contribution to provide monetary support for the City's CordoVan regional shuttle service".

4-4 Staff appreciated the opportunity to comment, and we look forward to reviewing the additional information and working together to address our requests. If you have further questions regarding these recommendations, please contact me at (279) 234-8374 or kschroder@sacrt.com.

4-5

Sincerely,

Kevin Schroder
Senior Planner

CC:
James Boyle, Director of Planning, SacRT
Sarah Poe, Planner, SacRT

LETTER 4: KEVIN SCHRODER, SACRAMENTO REGIONAL TRANSIT DISTRICT

Response to Comment 4-1
The comment is an introductory statement summarizing the project components, but does not address the adequacy of the Draft EIR.

Response to Comment 4-2
The comment is noted for the record and will be considered by City staff in developing the staff recommendation, and by the Planning Commission and City Council in their deliberations and decision-making regarding certification of the EIR and the proposed project.

Response to Comment 4-3
Please see Response to Comment 4-2.

Response to Comment 4-4
As part of its approval, the proposed project would be annexed into the City's Transit Related Services Tax district, which is a primary source of funding for the CordoVan shuttle service. The City anticipates expanding CordoVan services to the project site, as residents move into the proposed residences.

CEQA requires a VMT analysis as part of evaluating transportation impacts. As detailed under Impact 4.10-2 of the Draft EIR, starting on page 4.10-25, the proposed project would have a significant and unavoidable impact under Existing Plus Project conditions related to VMT. Nonetheless, as set forth by Mitigation Measure 4.10-2(b), the project would be required to "provide monetary support for the City's transportation services…" to address the identified VMT impact. Such services may include Transit Shuttle, Guaranteed Ride Home, Transit Subsidies, Education Programs, etc.

Response to Comment 4-5
The Sacramento Regional Transit District (SacRT) is included on the distribution list for the proposed project. Subsequent project documents will be submitted to SacRT. Thank you for participating in the public review process of the Draft EIR. Your comments and concerns are noted for the record.

SACRAMENTO METROPOLITAN AIR QUALITY MANAGEMENT DISTRICT

Letter 5

December 27, 2021

Darcy Goulart, Planning Manager
City of Rancho Cordova Planning Division
2729 Prospect Park Dr.
Rancho Cordova, CA 95670
dgoulart@cityofranchocordova.org

Subject: **Notice of Availability of The Preserve Project Draft EIR**
SCH #2019100515H / Sac Metro Air District Project # SAC202102838

Dear Darcy Goulart:

Thank you for providing the Sacramento Metropolitan Air Quality Management District (Sac Metro Air District) with the Draft Environmental Impact Report (Draft EIR) for The Preserve Project (Proposed Project). The City of Rancho Cordova is the California Environmental Quality Act (CEQA) Lead Agency for the Proposed Project.

5-1 The Proposed Project would include subdivision of the site to develop a total of 440 single-family lots and various associated improvements including, but not limited to, parks, a preserve area, landscaping, circulation improvements, and utility installation. Improvements would only occur on the parcels located south of Morrison Creek. The proposed project would include 8.65 acres of public parks north of the proposed residences, 9.77 acres of community space that would include bioretention and hydromodification areas, and 0.45-acre of the project site would be designated green infrastructure that would include enhanced landscaped areas and trails with connection to surrounding parks. Of the 279.3 acres within the project site, 185.3 acres of undeveloped land on the northern parcels would remain as open space/preserve, which would include Morrison Creek and an associated 100-foot setback from the creek.

Sac Metro Air District Staff comments on the Proposed Project follow.

California Environmental Quality Act Review:

Construction

5-2 Table 4.1-6 on page 4.1-35 has an incomplete description of the Sac Metro Air District Thresholds of significance. The Threshold of Significance for PM10 is Zero (0). If all feasible BACT/BMPs are applied, then 80 pounds/day and 14.6 tons/year. The Threshold of Significance for PM2.5 is Zero (0). If all feasible BACT/BMPs are applied, then 82 pounds/day and 15 tons/year. These thresholds apply during both the construction and operational phases. The table in the final EIR should include the complete threshold of significance.

777 12th Street, Ste. 300 • Sacramento, CA 95814
Tel: 916-874-4800 • Toll Free: 800-880-9025
AirQuality.org

Letter 5 Cont'd

5-3 Table 4.1-8 on page 4.1-40, uses a Non-zero construction threshold; to use the non-zero threshold, the project must implement the Sac Metro Air Districts Basic Construction Emissions Control Practices. The Project Specific Impacts and Mitigation measures described in section 4.1-1 on page 4.1-40 should include a commitment to implement the Sac Metro Air District Basic Construction Emissions Control Practices. See the Sac Metro Air District CEQA Guide, Chapter 3-Construction-Generated Criteria Air Pollutant and Precursor Emissions for further information.

5-4 *Greenhouse Gases*

The discussion of Operational GHG Emissions includes inconsistent statements with other sections of the Draft EIR. Specifically, the project notes in the last paragraph on page 4.1-54 that "because the project is located within the jurisdiction of SMAQMD, the project is required to implement BMPs 1 and 2." However, the project includes natural gas service and does not require "EV ready" charging in the residential units. Consequently, it is not complying with BMPs 1 and 2 from the Sac Metro Air District Tier 1 Best Management Practices.

BMP 1 requires that the project be designed and constructed without natural gas infrastructure. As noted in the summary of project modeling on page 4.9-33, the project's natural gas consumption is anticipated to total approximately 10,654,300 kBTU/yr, or 106,568 therms.

BMP 2 requires the project to exceed CalGreen Tier 2 Standards by providing "EV-Ready parking spaces." The project does not include a requirement to install "EV Ready" Parking spaces in the proposed units.

5-5 The Sac Metro Air District recommends that the final EIR include a commitment to implement the Sac Metro Air District Tier 1 best practice. This would require eliminating the natural gas appliances in all units, eliminating the Natural Gas service lines, and requiring the installation of EV Ready parking equipment in every residential unit.

5-6 Mitigation Measure 4.1-7, described on pages 4.1-56 of the Draft EIR, anticipates that Off-site credits shall be purchased to reduce annual greenhouse gas (GHG) emissions by 617.30 MTCO2e per year. This calculation presumes the implementation of the Sac Metro Air District Tier 1 best practices, which is contradicted by other portions of the Draft EIR. The final analysis should be corrected to reflect the project's actual anticipated emissions. The Sac Metro Air District recommends that the project achieve any required reductions on-site to the extent feasible.

Design Comments:

5-7 *Urban Heat Island (UHI) Effects*

According to the Capital Region Transportation Sector Urban Heat Island Mitigation Project (UHI Project), the urban heat island effect already presents a severe challenge to our region, with urbanized areas in Sacramento some 3 to 9 degrees Fahrenheit warmer than their surrounding areas. Higher ambient temperatures increase the formation of ozone, a respiratory system irritant. These higher temperatures can lead to heat stress, heat stroke, and even heat mortality during extreme heat and extended heat waves, especially for the elderly, the young, and those with pre-existing health conditions. The urban heat island results from converting undeveloped land to urbanized land.

Letter 5 Cont'd

The Pr

5-8 For construction, we recommend (1) all new pavements, including sidewalks, roads, bike lanes, pedestrian paths, and parking lots, having an albedo of at least 0.25-0.5, and (2) all new structures utilize certified cool roofs. The California Energy Commission's Title 24, Part 6, suggests an aged solar reflectance of at least 0.63 for low-sloped roofs and at least 0.20 for steep-sloped roofs, with a minimum thermal emittance of 0.75. The Cool Roof Rating Council provides a product directory of roofs.

5-9 We recommend that the landscaping plan incorporate new trees to shade new pavements and structures to the extent feasible. The Sacramento Tree Foundation's Shady Eighty guide is a directory of air-quality supportive trees, a more extensive tree list is available on page 153 of the UHI Technical Analysis Report.

Rules statement

5-10 All projects undergoing CEQA review must implement Sac Metro Air District Basic Construction Emission Control Practices, also available on our website, to use the non-zero particulate matter CEQA thresholds of significance. Additionally, all projects are subject to Sac Metro Air District rules and regulations in effect at the time of construction. Please visit our website to find a list of the most common rules that apply at the construction phase of projects.

5-11 We thank the City of Rancho Cordova for the opportunity to collaborate on this document. You may contact me at jhurley@airquality.org or (279) 207-1130 if you have questions regarding these comments.

Respectfully,

-JJ Hurley

Joseph J. Hurley
Associate Air Quality Planner/Analyst
CEQA and Land Use Section

cc: Paul Philley, AICP, Program Supervisor, CEQA and Land Use Section

LETTER 5: JOSEPH J. HURLEY, SACRAMENTO METROPOLITAN AIR QUALITY MANAGEMENT DISTRICT

Response to Comment 5-1

The comment is an introductory statement, summarizes the project components, and does not address the adequacy of the Draft EIR.

Response to Comment 5-2

Although noted at other points in Chapter 4, the commenter is correct that Table 4.1-6 did not explicitly specify that the presented thresholds are only applicable when all feasible BACT/BMPs are applied. To improve clarity and in response to the commenter's concern, Table 4.1-6, on page 4.1-35 is hereby revised as follows:

Table 4.1-1
SMAQMD Thresholds of Significance

Pollutant	Construction Threshold	Operational Threshold
NO_X	85 lbs/day	65 lbs/day
ROG	-	65 lbs/day
PM_{10}	80 lbs/day and 14.6 tons/yr*	80 lbs/day and 14.6 tons/yr*
$PM_{2.5}$	82 lbs/day and 15 tons/yr*	82 lbs/day and 15 tons/yr*

* The above thresholds for PM only apply when all feasible BACT/BMPs are applied. If all feasible BACT/BMPs are not applied, then the applicable threshold of significance for PM is 0.

Source: SMAQMD Thresholds of Significance Table, April 2020.

The above revisions are included for clarification purposes, and do not change the analysis or conclusions presented in the Draft EIR.

Response to Comment 5-3

The discussion following Table 4.1-8, on page 4.1-41, lists the SMAQMD's Basic Construction Emissions Control Practices, and includes the following excerpt:

> Compliance with the foregoing measures is required per Rule 403, and the City would enforce compliance with Rule 403 as a condition of approval of the proposed project. Thus, project construction is assumed to include compliance with the foregoing BMPs.

Based on the above, the proposed project would be required to comply with the SMAQMD's Basic Construction Emissions Control Practices, and the non-zero construction thresholds are appropriate for comparison in Table 4.1-8.

Nonetheless, to improve clarity and in response to the commenter's concern, page 4.1-40 is hereby revised as follows:

> "Table 4.1-2 below presents the estimated construction-related emissions of ROG, NO_X, PM_{10}, and $PM_{2.5}$ associated with the proposed project in comparison with the SMAQMD thresholds of significance as described above. The construction modeling assumptions are described in the Method of Analysis section above. As discussed in further detail below, project construction would comply with the SMAQMD's Basic Construction Emissions Control Practices.

As shown in Table 4.1-2, construction activities would result in emissions of ROG, NO_X, PM_{10}, and $PM_{2.5}$ below the applicable SMAQMD thresholds of significance. Therefore, construction activities associated with development of the proposed project would not substantially contribute to the SVAB's non-attainment status for ozone or PM. Accordingly, construction of the proposed project would not violate an air quality standard or contribute to an existing or projected air quality violation, and a less-than-significant impact would occur associated with construction.

Table 4.1-2
Maximum Unmitigated Construction-Related Emissions

Pollutant	Project Emissions	Construction Threshold	Exceeds Threshold?
NO_X	54.00 lbs/day	85 lbs/day	**NO**
ROG	28.63 lbs/day	-	**NO**
PM_{10}	20.32 lbs/day and 0.53 tons/yr	80 lbs/day and 14.6 tons/yr*	**NO**
$PM_{2.5}$	11.87 lbs/day and 0.28 tons/yr	82 lbs/day and 15 tons/yr*	**NO**

* The above thresholds for PM only apply when all feasible BACT/BMPs are applied. If all feasible BACT/BMPs are not applied, then the applicable threshold of significance for PM is 0.

Source: CalEEMod, May 2021.

It should be noted that construction activity related to implementation of the proposed project is required to comply with all SMAQMD rules and regulations. […]"

In addition, page 4.1-41 is hereby revised as follows:

"In addition, the control of fugitive dust during construction is required by SMAQMD Rule 403, and enforced by SMAQMD staff. The SMAQMD's Basic Construction Emissions Control Practices (BMPs) for dust control include the following:

- Water all exposed surfaces two times daily. Exposed surfaces include, but are not limited to soil piles, graded areas, unpaved parking areas, staging areas, and access roads;
- Cover or maintain at least two feet of free board space on haul trucks transporting soil, sand, or other loose material on the site. Any haul trucks that would be traveling along freeways or major roadways should be covered;
- Use wet power vacuum street sweepers to remove any visible trackout mud or dirt onto adjacent public roads at least once a day. Use of dry power sweeping is prohibited;[…]"

The foregoing revisions are for clarification purposes, and do not affect the analysis or conclusions presented in the Draft EIR.

Response to Comment 5-4

The commenter is correct that the project description does not commit to the prohibition of natural gas. As the project site is located within the jurisdiction of SMAQMD, the analysis generally assumed compliance with SMAQMD requirements. However, to ensure that the project will comply with BMPs 1 and 2, page 4.1-56 is hereby revised to include the following mitigation measures:

Implementation of the following mitigation measures would reduce the above potential impact to a *less-than-significant* level.

4.1-7 *To achieve Tier 1, BMP 1, the project applicant shall commit to one of the following options:*

A. All structures proposed as part of the project shall be construction without natural gas infrastructure; or

B. Off-site credits shall be purchased in order to reduce annual greenhouse gas (GHG) emissions by 571.93 $MTCO_2e$ per year. Credit purchases shall adhere to all of the following:

1. Off-site credits shall be real, quantifiable, permanent, verifiable, enforceable, and additional, consistent with the standards set forth in California Health and Safety Code Section 38562, subdivisions (d)(1) and (d)(2). Such credits shall be based on protocols that are consistent with the criteria set forth in subdivision (a) of Section 95972 of Title 17 of the California Code of Regulations. Such credits must be purchased through one of the following:

(i) A California Air Resources Board (CARB)-approved registry, such as the Climate Action Reserve, the American Carbon Registry, and the Verified Carbon Standard;

(ii) Any registry approved by CARB to act as a registry under the California Cap and Trade program; or

(iii) Through the California Air Pollution Control Officers Association (CAPCOA) GHG Rx and the Sacramento Metropolitan Air Quality Management District (SMAQMD);

(iv) In the event that no credits meeting these criteria are available within California, the applicant may purchase credits elsewhere so long as: (a) the Governor or the Governor's designee has made the findings set forth in Government Code Section 12894; (b) and these findings have been submitted to the Legislature; and (c) California has accepted the credits as meeting the linkage standards contained in Government Code Section 12894 or its successor statute.

2. The applicant must show that the emission reductions from identified projects are real, permanent through the duration of the project (if it is a one-time purchase), enforceable, and are equal to the pollutant type and amount of the project impact being offset. In addition, any off-site purchase shall be subject to review and approval by the City of Rancho Cordova Community Development Department.

Should the applicant select Option B, it is noted that the provisions of Mitigation Measure 4.1-9 still apply in full.

Proof of compliance shall be submitted for review and approval by the City of Rancho Cordova Community Development Department prior to approval of final improvement plans.

4.1-8 *To achieve Tier 2, BMP 2, all single-family residences included as part of the proposed project shall include EV ready infrastructure. Proof of compliance shall be submitted for review and approval by the City of Rancho Cordova Community Development Department prior to approval of final improvement plans.*

4.1-~~7~~9 *To achieve Tier 2, BMP 3, off-site credits shall be purchased in order to reduce annual greenhouse gas (GHG) emissions by 617.30 $MTCO_2e$ per year. Credit purchases shall adhere to all of the following:*

1. *Off-site credits shall be real, quantifiable, permanent, verifiable, enforceable, and additional, consistent with the standards set forth in California Health and Safety Code Section 38562, subdivisions (d)(1) and (d)(2). Such credits shall be based on protocols that are consistent with the criteria set forth in subdivision (a) of Section 95972 of Title 17 of the California Code of Regulations. Such credits must be purchased through one of the following:*

    (i) *A California Air Resources Board (CARB)-approved registry, such as the Climate Action Reserve, the American Carbon Registry, and the Verified Carbon Standard;*
    (ii) *Any registry approved by CARB to act as a registry under the California Cap and Trade program; or*
    (iii) *Through the California Air Pollution Control Officers Association (CAPCOA) GHG Rx and the Sacramento Metropolitan Air Quality Management District (SMAQMD);*
    (iv) *In the event that no credits meeting these criteria are available within California, the applicant may purchase credits elsewhere so long as: (a) the Governor or the Governor's designee has made the findings set forth in Government Code Section 12894; (b) and these findings have been submitted to the Legislature; and (c) California has accepted the credits as meeting the linkage standards contained in Government Code Section 12894 or its successor statute.*

2. *The applicant must show that the emission reductions from identified projects are real, permanent through the duration of the project (if it is a one-time purchase), enforceable, and are equal to the pollutant type and amount of the project impact being offset. In addition, any off-site purchase shall be subject to review and approval by the City of Rancho Cordova Community Development Department.*

The foregoing revisions ensure what was implied in the discussion and, therefore, do not identify a new or more significant environmental impact. As such, the conclusions presented in the Draft

EIR remain the same and, pursuant to the CEQA Guidelines, recirculation of the Draft EIR is not warranted.

Response to Comment 5-5
See Response to Comment 5-4.

Response to Comment 5-6
See Response to Comment 5-4.

Response to Comment 5-7
The comment provides background information regarding the Urban Heat Island effect, and does not address the adequacy of the Draft EIR.

Response to Comment 5-8
The comment includes suggestions related to the albedo of paving materials. Such features are planning considerations, and are outside the purview of CEQA. Additionally, the comment does not address the adequacy of the Draft EIR. Nonetheless, the suggestions are noted for the record and have been forwarded to the decision-makers for their consideration.

Response to Comment 5-9
The comment includes suggestions related to project landscaping. Such features are planning considerations, and are outside the purview of CEQA. Additionally, the comment does not address the adequacy of the Draft EIR. Nonetheless, the suggestions are noted for the record and have been forwarded to the decision-makers for their consideration.

Response to Comment 5-10
The comment references SMAQMD's rules, and does not address the adequacy of the Draft EIR.

Response to Comment 5-11
The comment is a conclusion statement and does not address the adequacy of the Draft EIR. Thank you for participating in the public review process of the Draft EIR. Your comments and concerns are noted for the record.

COMMENTS TO REQUEST FOR REVIEW FOR THE DRAFT ENVIRONMENTAL IMPACT REPORT, PRESERVE PROJECT, SCH#2019100515, SACRAMENTO COUNTY

6-1 Pursuant to the State Clearinghouse's 9 November 2021 request, the Central Valley Regional Water Quality Control Board (Central Valley Water Board) has reviewed the *Request for Review for the Draft Environmental Impact Report* for the Preserve Project, located in Sacramento County.

Our agency is delegated with the responsibility of protecting the quality of surface and groundwaters of the state; therefore, our comments will address concerns surrounding those issues.

I. Regulatory Setting

Basin Plan

6-2 The Central Valley Water Board is required to formulate and adopt Basin Plans for all areas within the Central Valley region under Section 13240 of the Porter-Cologne Water Quality Control Act. Each Basin Plan must contain water quality objectives to ensure the reasonable protection of beneficial uses, as well as a program of implementation for achieving water quality objectives with the Basin Plans. Federal regulations require each state to adopt water quality standards to protect the public health or welfare, enhance the quality of water and serve the purposes of the Clean Water Act. In California, the beneficial uses, water quality objectives, and the Antidegradation Policy are the State's water quality standards. Water quality standards are also contained in the National Toxics Rule, 40 CFR Section 131.36, and the California Toxics Rule, 40 CFR Section 131.38.

The Basin Plan is subject to modification as necessary, considering applicable laws, policies, technologies, water quality conditions and priorities. The original Basin Plans were adopted in 1975, and have been updated and revised periodically as required, using Basin Plan amendments. Once the Central Valley Water Board has adopted a Basin Plan amendment in noticed public hearings, it must be approved by the State Water Resources Control Board (State Water Board), Office of

Letter 6
Cont'd

6-2 cont'd

Administrative Law (OAL) and in some cases, the United States Environmental Protection Agency (USEPA). Basin Plan amendments only become effective after they have been approved by the OAL and in some cases, the USEPA. Every three (3) years, a review of the Basin Plan is completed that assesses the appropriateness of existing standards and evaluates and prioritizes Basin Planning issues. For more information on the *Water Quality Control Plan for the Sacramento and San Joaquin River Basins*, please visit our website:
http://www.waterboards.ca.gov/centralvalley/water_issues/basin_plans/

Antidegradation Considerations

All wastewater discharges must comply with the Antidegradation Policy (State Water Board Resolution 68-16) and the Antidegradation Implementation Policy contained in the Basin Plan. The Antidegradation Implementation Policy is available on page 74 at:
https://www.waterboards.ca.gov/centralvalley/water_issues/basin_plans/sacsjr_201805.pdf

In part it states:

Any discharge of waste to high quality waters must apply best practicable treatment or control not only to prevent a condition of pollution or nuisance from occurring, but also to maintain the highest water quality possible consistent with the maximum benefit to the people of the State.

This information must be presented as an analysis of the impacts and potential impacts of the discharge on water quality, as measured by background concentrations and applicable water quality objectives.

The antidegradation analysis is a mandatory element in the National Pollutant Discharge Elimination System and land discharge Waste Discharge Requirements (WDRs) permitting processes. The environmental review document should evaluate potential impacts to both surface and groundwater quality.

II. Permitting Requirements

Construction Storm Water General Permit

Dischargers whose project disturb one or more acres of soil or where projects disturb less than one acre but are part of a larger common plan of development that in total disturbs one or more acres, are required to obtain coverage under the General Permit for Storm Water Discharges Associated with Construction and Land Disturbance Activities (Construction General Permit), Construction General Permit Order No. 2009-0009-DWQ. Construction activity subject to this permit includes clearing, grading, grubbing, disturbances to the ground, such as stockpiling, or excavation, but does not include regular maintenance activities performed to restore the original line, grade, or capacity of the facility. The Construction General Permit requires the development and implementation of a Storm Water Pollution Prevention Plan (SWPPP). For more information on the Construction General Permit, visit the State Water Resources Control Board website at:
http://www.waterboards.ca.gov/water_issues/programs/stormwater/constpermits.shtml

Letter 6
Cont'd

6-2 cont'd

Phase I and II Municipal Separate Storm Sewer System (MS4) Permits[1]
The Phase I and II MS4 permits require the Permittees reduce pollutants and runoff flows from new development and redevelopment using Best Management Practices (BMPs) to the maximum extent practicable (MEP). MS4 Permittees have their own development standards, also known as Low Impact Development (LID)/post-construction standards that include a hydromodification component. The MS4 permits also require specific design concepts for LID/post-construction BMPs in the early stages of a project during the entitlement and CEQA process and the development plan review process.

For more information on which Phase I MS4 Permit this project applies to, visit the Central Valley Water Board website at:
http://www.waterboards.ca.gov/centralvalley/water_issues/storm_water/municipal_permits/

For more information on the Phase II MS4 permit and who it applies to, visit the State Water Resources Control Board at:
http://www.waterboards.ca.gov/water_issues/programs/stormwater/phase_ii_municipal.shtml

Industrial Storm Water General Permit
Storm water discharges associated with industrial sites must comply with the regulations contained in the Industrial Storm Water General Permit Order No. 2014-0057-DWQ. For more information on the Industrial Storm Water General Permit, visit the Central Valley Water Board website at:
http://www.waterboards.ca.gov/centralvalley/water_issues/storm_water/industrial_general_permits/index.shtml

Clean Water Act Section 404 Permit
If the project will involve the discharge of dredged or fill material in navigable waters or wetlands, a permit pursuant to Section 404 of the Clean Water Act may be needed from the United States Army Corps of Engineers (USACE). If a Section 404 permit is required by the USACE, the Central Valley Water Board will review the permit application to ensure that discharge will not violate water quality standards. If the project requires surface water drainage realignment, the applicant is advised to contact the Department of Fish and Game for information on Streambed Alteration Permit requirements. If you have any questions regarding the Clean Water Act Section 404 permits, please contact the Regulatory Division of the Sacramento District of USACE at (916) 557-5250.

Clean Water Act Section 401 Permit – Water Quality Certification
If an USACE permit (e.g., Non-Reporting Nationwide Permit, Nationwide Permit, Letter of Permission, Individual Permit, Regional General Permit, Programmatic

[1] Municipal Permits = The Phase I Municipal Separate Storm Water System (MS4) Permit covers medium sized Municipalities (serving between 100,000 and 250,000 people) and large sized municipalities (serving over 250,000 people). The Phase II MS4 provides coverage for small municipalities, including non-traditional Small MS4s, which include military bases, public campuses, prisons and hospitals.

Letter 6
Cont'd

6-2 cont'd

General Permit), or any other federal permit (e.g., Section 10 of the Rivers and Harbors Act or Section 9 from the United States Coast Guard), is required for this project due to the disturbance of waters of the United States (such as streams and wetlands), then a Water Quality Certification must be obtained from the Central Valley Water Board prior to initiation of project activities. There are no waivers for 401 Water Quality Certifications. For more information on the Water Quality Certification, visit the Central Valley Water Board website at: https://www.waterboards.ca.gov/centralvalley/water_issues/water_quality_certification/

Waste Discharge Requirements – Discharges to Waters of the State

If USACE determines that only non-jurisdictional waters of the State (i.e., "non-federal" waters of the State) are present in the proposed project area, the proposed project may require a Waste Discharge Requirement (WDR) permit to be issued by Central Valley Water Board. Under the California Porter-Cologne Water Quality Control Act, discharges to all waters of the State, including all wetlands and other waters of the State including, but not limited to, isolated wetlands, are subject to State regulation. For more information on the Waste Discharges to Surface Water NPDES Program and WDR processes, visit the Central Valley Water Board website at:https://www.waterboards.ca.gov/centralvalley/water_issues/waste_to_surface_water/

Projects involving excavation or fill activities impacting less than 0.2 acre or 400 linear feet of non-jurisdictional waters of the state and projects involving dredging activities impacting less than 50 cubic yards of non-jurisdictional waters of the state may be eligible for coverage under the State Water Resources Control Board Water Quality Order No. 2004-0004-DWQ (General Order 2004-0004). For more information on the General Order 2004-0004, visit the State Water Resources Control Board website at: https://www.waterboards.ca.gov/board_decisions/adopted_orders/water_quality/2004/wqo/wqo2004-0004.pdf

Dewatering Permit

If the proposed project includes construction or groundwater dewatering to be discharged to land, the proponent may apply for coverage under State Water Board General Water Quality Order (Low Threat General Order) 2003-0003 or the Central Valley Water Board's Waiver of Report of Waste Discharge and Waste Discharge Requirements (Low Threat Waiver) R5-2018-0085. Small temporary construction dewatering projects are projects that discharge groundwater to land from excavation activities or dewatering of underground utility vaults. Dischargers seeking coverage under the General Order or Waiver must file a Notice of Intent with the Central Valley Water Board prior to beginning discharge.

For more information regarding the Low Threat General Order and the application process, visit the Central Valley Water Board website at: http://www.waterboards.ca.gov/board_decisions/adopted_orders/water_quality/2003/wqo/wqo2003-0003.pdf

Letter 6
Cont'd

For more information regarding the Low Threat Waiver and the application process, visit the Central Valley Water Board website at: https://www.waterboards.ca.gov/centralvalley/board_decisions/adopted_orders/waivers/r5-2018-0085.pdf

Limited Threat General NPDES Permit

6-2 cont'd

If the proposed project includes construction dewatering and it is necessary to discharge the groundwater to waters of the United States, the proposed project will require coverage under a National Pollutant Discharge Elimination System (NPDES) permit. Dewatering discharges are typically considered a low or limited threat to water quality and may be covered under the General Order for *Limited Threat Discharges to Surface Water* (Limited Threat General Order). A complete Notice of Intent must be submitted to the Central Valley Water Board to obtain coverage under the Limited Threat General Order. For more information regarding the Limited Threat General Order and the application process, visit the Central Valley Water Board website at: https://www.waterboards.ca.gov/centralvalley/board_decisions/adopted_orders/general_orders/r5-2016-0076-01.pdf

NPDES Permit

If the proposed project discharges waste that could affect the quality of surface waters of the State, other than into a community sewer system, the proposed project will require coverage under a National Pollutant Discharge Elimination System (NPDES) permit. A complete Report of Waste Discharge must be submitted with the Central Valley Water Board to obtain a NPDES Permit. For more information regarding the NPDES Permit and the application process, visit the Central Valley Water Board website at: https://www.waterboards.ca.gov/centralvalley/help/permit/

If you have questions regarding these comments, please contact me at (916) 464-4684 or Peter.Minkel2@waterboards.ca.gov.

LETTER 6: PETER G. MINKEL, CENTRAL VALLEY REGIONAL WATER QUALITY BOARD

Response to Comment 6-1
The comment is an introductory statement and does not address the adequacy of the Draft EIR.

Response to Comment 6-2
The comment provides background information regarding applicable regulations and required permits. The comment does not address the adequacy of the Draft EIR and has been noted for the record.

Response to Comment 6-3
Thank you for participating in the public review process of the Draft EIR. Your comments and concerns are noted for the record.

Letter 7

CIVIC THREAD

December 27, 2021 VIA EMAIL

Darcy Goulart, Planning Manager
City of Rancho Cordova, Community Development Department
2729 Prospect Park Drive
Rancho Cordova, CA 95760

RE: The Preserve Draft Environmental Impact Report (SCH #2019100515)

Dear Darcy Goulart:

7-1 Civic Thread has reviewed the Draft Environmental Impact Report for The Preserve (SCH #2019100515) and we offer the following comments.

7-2 While the development will be sited in an area that is currently mostly undeveloped and does not offer many connection opportunities, we commend the applicant for including the Morrison Creek Trail in the project, which will provide important recreational opportunities for residents and provide connection to other sites as this area of Rancho Cordova gets developed. We are also glad to see that green infrastructure elements have been included in the project, which will contribute to a pleasant walking and biking environment.

Ensuring that high connectivity for pedestrians and bicyclists is built into a development from the beginning is critical to fostering a built environment that is conducive to active transportation, netting benefits for air quality and public health. While multiple areas on the development tentative map are in close proximity to the Morrison Creek Trail, it is unclear whether there are accessible connection points to the trail. As a general best practice, making connection points to the trail as frequent as possible will be more effective in increasing convenient access to open space. To that end, we recommend the following:

7-3 1. **CRPD Neighborhood Park 2 on Parcel F: include a connector path through the park from Street 'H' to the Morrison Creek Trail. The Morrison Creek Trail follows the north edge of the park, but would have greater connective value if a**

916-446-9255 • www.civicthread.org

Letter 7
Cont'd

7-3 cont'd

dedicated path was put in for bicyclists to access the trail from the street (see Figure 1).

2. Parcel L: It is unclear whether this parcel has a path that connects the Street 'C' cul-de-sac to the Morrison Creek Trail through Parcel L. Without bicycle/pedestrian connection points, cul-de-sacs reduce internal connectivity within neighborhoods. The distance to the trail from the Street 'C' cul-de-sac is short and will provide connective benefit if a path is installed (see Figure 2).
3. Parcel M: We are glad to see that a sidewalk goes through Parcel M to the street. We recommend including a path on the other side of the street that connects to the Morrison Creek Trail and a marked pedestrian crossing that connects the two pathways. Bike ramps should be included at each curb (see Figure 3).
4. Parcel D: Include a pedestrian/bicycle connector path to the Morrison Creek Trail at CRPD Neighborhood Park 1 at the closest point at the intersection of Street 'K' and Street 'L' with a bike ramp at the curb (see Figure 4).
5. Parcel J: Per our letter submitted in July 2019, if Parcel J at the west end of Street 'D' is part of a neighborhood bicycle travel way, widen the parcel to at least 25' and construct a 10'-wide sidewalk that's bifurcated at the eastern terminus and includes bike ramps at the curb. Parcel J is a logical entry point to access the Morrison Creek Trail but needs to be widened to allow for a sidewalk and landscaping on both sides (see Figure 5).

Figure 1. Parcel F proposed connector path through neighborhood park. Connector path could also connect at the left corner of the park to reduce amount of construction necessary.

Letter 7
Cont'd

7-4 The Preserve DEIR also proposes a zoning change from Agricultural 80 to low-density residential (RD-5), which allows 4.1—5 units per acre. While this is in keeping with the project objective "Develop a residential mixed-density community that is consistent with the General Plan conceptual land use designation for the Grant Line West Planning Area", **consider rezoning a portion of the project area to RD-6 or RD-7, which would allow for higher-density single family homes and duplexes and increase the density to 5.1—6.0 or 6.1—7.0 dwelling units per acre, respectively**. Benefits of this include the potential for a more diverse set of housing options and potentially greater affordability for residents, as well as making it more likely that the development achieves the goal of a mixed-density community.

7-5 An important component supporting a mixed-density community will be transit access. The DEIR notes that the nearest bus stop is 1.5 miles away from the site at Borderlands Drive and Canyonlands Drive, providing hourly service from Sacramento Regional Transit Route 175. To access the bus stop on foot, residents will need to walk 30-45 minutes, which is unlikely to be appealing if they have access to a car. While it is more likely that residents may choose to access this bus stop via bicycle, the bicycle infrastructure on the most direct routes is lacking. The most direct bicycle routes are through the Camden at Somerset Ranch development, following either Raymer Way and Rockdale Drive to Americanos Boulevard, or Edington Drive to Americanos Boulevard. Raymer Way, Rockdale Drive, and Edington Drive do not have bicycle infrastructure. Americanos Boulevard then connects to Douglas Road, which provides access to Borderlands Drive and the bus stop. While Americanos Boulevard and Douglas Road both have Class II bike lanes, on Douglas Road the lanes run parallel to a road with two travel lanes on either side. We recommend the following to improve connectivity and cyclist and pedestrian safety:

7-6
1. **The developer should work with the City of Rancho Cordova on offsite improvements to upgrade the bike lanes on the stretch of Douglas Road in between Americanos Boulevard and Borderlands Drive to Class II-B buffered bike lanes to increase bicyclist safety and comfort. At a minimum, high visibility markings such as green paint should be applied to the lanes along Americanos Boulevard and Douglas Road (see Figure 6).**
2. **A portion of the Americanos Boulevard bike lane going southward has a painted buffer that separates the main travel lane from the bike lane and right-hand turn lane onto Douglas Road. Because this is an important connection from the Plan Area to surrounding areas, we recommend including as an offsite**

Letter 7
Cont'd

7-6 cont'd

improvement the addition of conflict striping as the bike lane transitions from the side of the road to the center to accommodate the right-hand turn lane.

3. We also recommend working with Sacramento Regional Transit to scope the inclusion of a bus stop within the development itself in later stages of the project.
4. Please consider the comfort and safety of cyclists and pedestrians when implementing measures to improve Level of Service, as slower traffic (lower LOS grades) tends to be safer for those using active transportation. Improving conditions for pedestrians and cyclists will help the project meet its VMT goals.
5. Consider the inclusion of a mobility hub at a central location on site to provide car sharing options for residents that may wish to forgo vehicle ownership.

Figure 6. Suggested area to upgrade bike lane on Douglas Road between Americanos Boulevard and Borderlands Drive to provide safer cyclist access to nearby bus stop.

Finally, to facilitate placemaking efforts, **please consider the inclusion of an additional small-scale neighborhood park/playground in the center of the Plan Area** to improve access to open space and offer urban cooling benefits.

Development projects that lead to more walking and active travel are critical to our community's future. Civic Thread is working to support increased physical activity such as walking and bicycling in local neighborhoods as well as helping to create community environments that support walking and bicycling. The benefits include improved public

909 12th Street, Suite 125, Sacramento, CA 95814
916-446-9255 • www.civicthread.org

Letter 7
Cont'd

7-6 cont'd

health and physical fitness, better air quality, a stronger sense of cohesion and safety in neighborhoods, and more sustainable communities and local economies.

7-7

Please notify Civic Thread of future routings or notices for this project. Thank you for your consideration of these comments and recommendations, and please don't hesitate to contact us if you have any questions.

Sincerely,

Kathryn Canepa
Project Manager, Civic Thread

LETTER 7: KATHRYN CANEPA, CIVIC THREAD

Response to Comment 7-1
The comment is an introductory statement and does not address the adequacy of the Draft EIR.

Response to Comment 7-2
The comment does not address the adequacy of the Draft EIR, but instead, introduces requests subsequently made in Comment 7-3 that relate to connection points to the Morrison Creek Trail. Please see Response to Comment 7-3.

Response to Comment 7-3
The requests included as part of Comment 7-3 do not address the adequacy of the Draft EIR. Nor are the requested project modifications necessary to prevent potential environmental impacts, as required under CEQA. Nevertheless, the following discussions address the five requests made in the comment and are based on iterative collaboration between the project applicant and the City. It should be noted that most of the requested connections are proposed as part of the project, and one is being considered, depending on topographical feasibility.

1. CRPD Neighborhood Park 2 on Parcel F: A connector path as part of the proposed project is planned at the commenter's suggested location.
2. Parcel L: The requested connector path is under review.
3. Parcel M: A connector path is planned at this general location and is designed to safely accommodate the slope.
4. Parcel D: A connection from CRPD Neighborhood Park 1 to the Morrison Creek Trail would be proposed as part of the design of the park and is included in the project applicant's conceptual plan.
5. Parcel J: The parcel is a utility corridor and is not part of a neighborhood bicycle travel way.

Response to Comment 7-4
The comment does not address the adequacy of the Draft EIR. The comment requesting increased density is noted for the record and will be considered by City staff in developing the staff recommendation, and by the Planning Commission and City Council in their deliberations and decision-making regarding certification of the EIR and the proposed project.

Response to Comment 7-5
The comment does not address the adequacy of the Draft EIR, but instead, introduces requests subsequently made in Comment 7-6 that relate to connection to transit and bicycle facilities. Please see Response to Comment 7-6.

Response to Comment 7-6
The requests included as part of Comment 7-6 do not address the adequacy of the Draft EIR, nor are necessary to prevent potential environmental impacts, as required under CEQA. However, the following discussions address the six requests made in the comment.

1. The request to upgrade the bike lanes on Douglas Road and Americanos Boulevard is not proposed as part of the project. The applicant and City do not currently have plans to

include such upgrades; nonetheless, the request will be forwarded to the decision makers for their consideration.

2. The requested addition of conflict striping to the Americanos Boulevard bike lane is not proposed as part of the project. The applicant and City do not currently have plans to include such striping; nonetheless, the request will be forwarded to the decision makers for their consideration.
3. The requested consultation with SacRT about the possibility of including a bus stop within the project site is under discussion by the project applicant.
4. As discussed under Impact 4.10-3 of the Draft EIR on page 4.10-27, the proposed project's street frontage, roadways, and access points would be designed in accordance with all applicable standards established in the City's Municipal Code, including those set forth in Chapter 22.110 pertaining to safety of primary and minor residential streets. Additionally, although not a requirement under CEQA, the project would be conditioned, if approved, to construct the intersection improvements set forth on page 4.10-17 of the Draft EIR.
5. The requested mobility hub is not proposed as part of the project. The applicant and City do not currently have plans to include a mobility hub; nonetheless, the request will be forwarded to the decision makers for their consideration.
6. The design concept of the proposed project concentrates connected park and open space amenities along the citywide trail system, to provide access to open space areas based on the close proximity of future residents and direct pedestrian connection points provided as part of the project. Neighborhood residents would have access to three parks in the immediate project vicinity, including two within the project site as well as the existing Hillside Park located in the Camden at Somerset Ranch subdivision to the south of the project site. In addition, open space areas that provide areas for rest and relaxation have been strategically placed along the Morrison Creek Trail. Altogether, the inclusion of the proposed amenities allows for open space recreation and urban cooling benefits.

Response to Comment 7-7

Civic Thread is included on the distribution list for the proposed project. Subsequent project documents will be submitted to Civic Thread. Thank you for participating in the public review process of the Draft EIR. Your comments and concerns are noted for the record.

Letter 8

From: Don Ross <hvpower@sbcglobal.net>
Sent: Thursday, November 18, 2021 10:06 AM
To: Darcy Goulart
Cc: president@sacramentoaudubon.org; customerservice@audubon.org; r2info@wildlife.ca.gov; hcpb@wildlife.ca.gov; bera.district@mail.house.gov
Subject: The Preserve Project SCH# 2019100515

8-1 To the Attention of Darcy Goulart, Planning Manager, City of Rancho Cordova, Community Development Department.

I wish to Provide information as to the home and migration of numerous varieties of birds, that this development would severely impact.

8-2 I have lived in the Kensington Estates since my home was built in 2018. I have been a witness with videos of at least 20 varieties of birds not including multiple varieties of Water Fowl, that make the area their home or move through the area on their annual Migration. I believe my home development was built on a natural Bird estuary, and a resting area for migrating Birds of several varieties. I am no bird expert, but there are many varieties and colors I had never seen before. I believe the housing development I live in has drastically affected the natural habitat and flight path. I strongly believe this, because I have witnessed the birds seasonal habitation of the Land being considered for The Preserve Project.

8-3 This will harm the varieties that make the area their seasonal home, and those that use this land to feed and rest as they migrate. I would like to request a thorough study be conducted on the seasonal and migratory species that make the area their home for breeding, and those that feed, rest and move through the area each year between January and December. I request the results be shared with all those that received this notice on The Preserve Project SCH# 2019100515, and that the California and U.S. Fish and Wild Life services look into my witnessed observations. I am willing to share videos that are just from my backyard, of the different varieties I have seen from Humming birds to hawks, with many additional varieties I have never seen before. This Project should be delayed until a full seasonal impact study can be performed, If the study is properly conducted, the area would allow nothing more than the current Zoning. I believe the word should get out that this is a natural habitat that should remain "NATURAL".

Thank you for your part in saving the remaining areas for those who are here first, "The Birds", Don

(916) 837-5372

LETTER 8: DONALD ROSS, RESIDENT

Response to Comment 8-1
The comment is an introductory statement and does not address the adequacy of the Draft EIR.

Response to Comment 8-2
The comment does not address the adequacy of the Draft EIR.

Nonetheless, it is noted that the Draft EIR evaluates potential project impacts to bird species on pages 4.2-45 through 4.2-55. As discussed therein, the inclusion of the mitigation measures required as part of the project would ensure that all potential impacts to birds are reduced to less-than-significant levels.

The comment is noted for the record and will be considered by City staff in developing the staff recommendation, and by the Planning Commission and City Council in their deliberations and decision-making regarding certification of the EIR and the proposed project.

Response to Comment 8-3
As detailed throughout Chapter 4.2, Biological Resources, of the Draft EIR, a Biological Resources Assessment (BRA) was prepared for the proposed project by ECORP Consulting, Inc. (see Appendix D to the Draft EIR). The BRA included findings from a field reconnaissance of the project site, which surveyed for wildlife species covered under the South Sacramento Habitat Conservation Plan (SSHCP), as well as findings from multiple field surveys of the project site for other special-status species protected under CEQA. In addition, the BRA included a literature review, which consisted of a query of the California Natural Diversity Database (CNDDB) for the U.S. Geological Survey (USGS) Buffalo Creek quadrangle and the eight surrounding USGS quadrangles for special-status species that have occurred in the foregoing study area, as well as a query of the U.S. Fish and Wildlife Service (USFWS) Information for Planning and Consultation (IPaC). As such, the BRA serves as a thorough study on the seasonal and migratory bird species that make the project area home for the purposes of nesting, foraging, and migration.

The 108.25-acre study area for the proposed project is depicted in Figure 4.2-1 of the Draft EIR on page 4.2-3 and includes the 98.9-acre proposed development area for The Preserve Project, as well as a total of 7.85 acres in which potential off-site improvements are proposed. The identified special-status wildlife species that have potential to occur within the study area are detailed in Table 4.2-2 of the Draft EIR, which starts on page 4.2-11.

Potential project impacts to special-status bird species protected under CEQA and migratory birds and raptors protected under the federal Migratory Bird Treaty Act are detailed under Impacts 4.2-4 through 4.2-7, which starts on page 4.2-45 of the Draft EIR. Applicable mitigation measures are set forth therein, the implementation of which would ensure that all identified potential project impacts to the foregoing species are reduced to less-than-significant levels.

With respect to the commenter's views regarding the merits of the proposed project, such views are noted for the record. All comments, whether substantiated by facts or simply reflecting the position of the commenter, will be considered by City staff in developing the staff recommendation, and by the Planning Commission and City Council in their deliberations and decision-making regarding certification of the EIR and the proposed project.

Response to Comment 8-4

Thank you for participating in the public review process of the Draft EIR. Your comments and concerns are noted for the record.

3. Revisions to the Draft EIR Text

3. REVISIONS TO THE DRAFT EIR TEXT

3.1 INTRODUCTION

The Revisions to the Draft EIR Text chapter provides all corrections, additions, and revisions made to the Draft EIR. Section 15088.5 of the State CEQA Guidelines states that a lead agency is required to recirculate a Draft EIR when “significant new information” is added to the document after public notice is given of the availability of the Draft EIR for public review under Section 15087 but before certification. Pursuant to this section, the term "information" can include changes in the project or environmental setting, as well as additional data or other information. New information added to an EIR is not considered "significant" unless the EIR is changed in a way that deprives the public of a meaningful opportunity to comment upon a substantial adverse environmental effect of the project or a feasible way to mitigate or avoid such an effect (including a feasible project alternative) that the City has decided not to implement.

"Significant new information" requiring recirculation includes any of the following:

1. A new significant environmental impact would result from the project or from a new mitigation measure proposed to be implemented.
2. A substantial increase in the severity of an environmental impact would result unless mitigation measures are adopted that reduce the impact to a level of insignificance.
3. A feasible project alternative or mitigation measure considerably different from others previously analyzed would clearly lessen the environmental impacts of the project, but the project's proponents decline to adopt it.
4. The Draft EIR was so fundamentally and basically inadequate and conclusory in nature that meaningful public review and comment were precluded.

Recirculation is not required where the new information added to the EIR merely clarifies or amplifies or makes insignificant modifications in an adequate EIR. The changes presented herein offer minor clarifications and amplifications of the analysis contained in the Draft EIR and do not constitute significant new information that, in accordance with CEQA Guidelines Section 15088.5, would trigger the need to recirculate portions or all of the Draft EIR. In other words, recirculation of the Draft EIR is not required.

It should be noted that in addition to the text revisions presented in Chapter 3 of this Final EIR in response to public comments, this chapter provides other text revisions to the Draft EIR initiated by the City of Rancho Cordova based upon further review of the document since publication.

3.2 DESCRIPTION OF CHANGES

New text is <u>double underlined</u> and deleted text is ~~struck through~~. Text changes are presented in the page order in which they appear in the Draft EIR.

2 Executive Summary

For clarification purposes, Table 2-1 beginning on page 2-6 in Chapter 2, Executive Summary, of the Draft EIR is hereby revised to reflect revisions made to mitigation measures as part of this

Final EIR in the relevant chapters, as presented throughout this chapter. Rather than include the entirety of Table 2-1 with revisions shown where appropriate, only the impacts for which mitigation has been revised or added are presented below. The revisions to the Executive Summary table are for clarification purposes only and do not change the conclusions of the Draft EIR. Please refer to the end of this chapter for Table 2-1.

4.1 Air Quality, Greenhouse Gas Emissions, and Energy

Table 4.1-6, on page 4.1-35 of the Draft EIR, is hereby revised as follows:

Table 4.1-1
SMAQMD Thresholds of Significance

Pollutant	Construction Threshold	Operational Threshold
NO_X	85 lbs/day	65 lbs/day
ROG	-	65 lbs/day
PM_{10}	80 lbs/day and 14.6 tons/yr*	80 lbs/day and 14.6 tons/yr*
$PM_{2.5}$	82 lbs/day and 15 tons/yr*	82 lbs/day and 15 tons/yr*

* The above thresholds for PM only apply when all feasible BACT/BMPs are applied. If all feasible BACT/BMPs are not applied, then the applicable threshold of significance for PM is 0.

Source: SMAQMD Thresholds of Significance Table, April 2020.

The above revisions are included for clarification purposes, and do not change the analysis or conclusions presented in the Draft EIR.

Page 4.1-40 of the Draft EIR is hereby revised as follows:

"Table 4.1-2 below presents the estimated construction-related emissions of ROG, NO_X, PM_{10}, and $PM_{2.5}$ associated with the proposed project in comparison with the SMAQMD thresholds of significance as described above. The construction modeling assumptions are described in the Method of Analysis section above. As discussed in further detail below, project construction would comply with the SMAQMD's Basic Construction Emissions Control Practices.

As shown in Table 4.1-2, construction activities would result in emissions of ROG, NO_X, PM_{10}, and $PM_{2.5}$ below the applicable SMAQMD thresholds of significance. Therefore, construction activities associated with development of the proposed project would not substantially contribute to the SVAB's non-attainment status for ozone or PM. Accordingly, construction of the proposed project would not violate an air quality standard or contribute to an existing or projected air quality violation, and a less-than-significant impact would occur associated with construction.

Table 4.1-2
Maximum Unmitigated Construction-Related Emissions

Pollutant	Project Emissions	Construction Threshold	Exceeds Threshold?
NO_X	54.00 lbs/day	85 lbs/day	**NO**
ROG	28.63 lbs/day	-	**NO**
PM_{10}	20.32 lbs/day and 0.53 tons/yr	80 lbs/day and 14.6 tons/yr*	**NO**

$PM_{2.5}$	11.87 lbs/day and 0.28 tons/yr	82 lbs/day and 15 tons/yr*	**NO**
* The above thresholds for PM only apply when all feasible BACT/BMPs are applied. If all feasible BACT/BMPs are not applied, then the applicable threshold of significance for PM is 0.			
Source: CalEEMod, May 2021.			

It should be noted that construction activity related to implementation of the proposed project is required to comply with all SMAQMD rules and regulations. […]"

In addition, page 4.1-41 is hereby revised as follows:

"In addition, the control of fugitive dust during construction is required by SMAQMD Rule 403, and enforced by SMAQMD staff. The SMAQMD's Basic Construction Emissions Control Practices (BMPs) for dust control include the following:

- Water all exposed surfaces two times daily. Exposed surfaces include, but are not limited to soil piles, graded areas, unpaved parking areas, staging areas, and access roads;
- Cover or maintain at least two feet of free board space on haul trucks transporting soil, sand, or other loose material on the site. Any haul trucks that would be traveling along freeways or major roadways should be covered;
- Use wet power vacuum street sweepers to remove any visible trackout mud or dirt onto adjacent public roads at least once a day. Use of dry power sweeping is prohibited;[…]"

The foregoing revisions are for clarification purposes, and do not affect the analysis or conclusions presented in the Draft EIR.

Page 4.1-56 of the Draft EIR is hereby revised to include the following mitigation measures:

Implementation of the following mitigation measures would reduce the above potential impact to a *less-than-significant* level.

4.1-7 To achieve Tier 1, BMP 1, the project applicant shall commit to one of the following options:

A. All structures proposed as part of the project shall be construction without natural gas infrastructure; or

B. Off-site credits shall be purchased in order to reduce annual greenhouse gas (GHG) emissions by 571.93 $MTCO_2e$ per year. Credit purchases shall adhere to all of the following:

1. Off-site credits shall be real, quantifiable, permanent, verifiable, enforceable, and additional, consistent with the standards set forth in California Health and Safety Code Section 38562, subdivisions (d)(1) and (d)(2). Such credits shall be based on protocols that are consistent with the criteria set forth in subdivision (a) of Section 95972 of Title 17 of the California Code of Regulations. Such credits must be purchased through one of the following:

(i) A California Air Resources Board (CARB)-approved registry, such as the Climate Action Reserve, the American Carbon Registry, and the Verified Carbon Standard;

(ii) Any registry approved by CARB to act as a registry under the California Cap and Trade program; or

(iii) Through the California Air Pollution Control Officers Association (CAPCOA) GHG Rx and the Sacramento Metropolitan Air Quality Management District (SMAQMD);

(iv) In the event that no credits meeting these criteria are available within California, the applicant may purchase credits elsewhere so long as: (a) the Governor or the Governor's designee has made the findings set forth in Government Code Section 12894; (b) and these findings have been submitted to the Legislature; and (c) California has accepted the credits as meeting the linkage standards contained in Government Code Section 12894 or its successor statute.

2. The applicant must show that the emission reductions from identified projects are real, permanent through the duration of the project (if it is a one-time purchase), enforceable, and are equal to the pollutant type and amount of the project impact being offset. In addition, any off-site purchase shall be subject to review and approval by the City of Rancho Cordova Community Development Department.

Should the applicant select Option B, it is noted that the provisions of Mitigation Measure 4.1-9 still apply in full.

Proof of compliance shall be submitted for review and approval by the City of Rancho Cordova Community Development Department prior to approval of final improvement plans.

4.1-8 *To achieve Tier 2, BMP 2, all single-family residences included as part of the proposed project shall include EV ready infrastructure. Proof of compliance shall be submitted for review and approval by the City of Rancho Cordova Community Development Department prior to approval of final improvement plans.*

4.1-~~7~~9 *To achieve Tier 2, BMP 3, off-site credits shall be purchased in order to reduce annual greenhouse gas (GHG) emissions by 617.30 $MTCO_2e$ per year. Credit purchases shall adhere to all of the following:*

1. *Off-site credits shall be real, quantifiable, permanent, verifiable, enforceable, and additional, consistent with the standards set forth in California Health and Safety Code Section 38562, subdivisions (d)(1) and (d)(2). Such credits shall be based on protocols that are consistent with the criteria set forth in subdivision (a) of Section*

95972 of Title 17 of the California Code of Regulations. Such credits must be purchased through one of the following:

(i) A California Air Resources Board (CARB)-approved registry, such as the Climate Action Reserve, the American Carbon Registry, and the Verified Carbon Standard;
(ii) Any registry approved by CARB to act as a registry under the California Cap and Trade program; or
(iii) Through the California Air Pollution Control Officers Association (CAPCOA) GHG Rx and the Sacramento Metropolitan Air Quality Management District (SMAQMD);
(iv) In the event that no credits meeting these criteria are available within California, the applicant may purchase credits elsewhere so long as: (a) the Governor or the Governor's designee has made the findings set forth in Government Code Section 12894; (b) and these findings have been submitted to the Legislature; and (c) California has accepted the credits as meeting the linkage standards contained in Government Code Section 12894 or its successor statute.

2. The applicant must show that the emission reductions from identified projects are real, permanent through the duration of the project (if it is a one-time purchase), enforceable, and are equal to the pollutant type and amount of the project impact being offset. In addition, any off-site purchase shall be subject to review and approval by the City of Rancho Cordova Community Development Department.

The foregoing revisions do not identify a new or more significant environmental impact and the conclusions presented in the Draft EIR remain the same.

4.6 Biological Resources

The following staff-initiated change to Mitigation Measure 4.2-3(a) has been included to incorporate a mitigation measure from the South Sacramento Habitat Conservation Plan that was inadvertently omitted from the Draft EIR. Page 4.2-42 of Chapter 4.2, Biological Resources, is hereby revised as follows:

- ***WS-5 (Erosion Control Materials in Western Spadefoot Habitat):*** *If erosion control (BMP-2) is implemented within western spadefoot modeled habitat (Figure 3-17 [of the SSHCP]), non-entangling erosion control material will be used to reduce the potential for entrapment. Tightly woven fiber netting (mesh size less than 0.25 inch) or similar material will be used to ensure that western spadefoots are not trapped (no monofilament). Coconut coir matting and fiber rolls containing burlap are examples of acceptable erosion control materials.*

- ***WS-6 (Western Spadefoot Encounter Protocol)****: If Covered Activities must be implemented in modeled habitat (Figure 3-17) during the breeding and dispersal season (after October 15 and before May 15), and a western spadefoot is encountered during construction activities, the approved biologist will notify the Wildlife Agencies immediately. Construction activities will be*

suspended in a 100-foot radius of the animal until the animal leaves the project site on its own volition. If necessary, the approved biologist will notify the Wildlife Agencies to determine the appropriate procedures related to relocation. If the animal is handled, a report will be submitted, including date(s), location(s), habitat description, and any corrective measures taken to protect the western spadefoot within 1 business day to the Wildlife Agencies. The biologist will report any take of listed species to the U.S. Fish and Wildlife Service and California Department of Fish and Wildlife immediately. Any worker who inadvertently injures or kills a western spadefoot or who finds dead, injured, or entrapped western spadefoot(s) must immediately report the incident to the approved biologist.

The foregoing revision includes the full measures required by the South Sacramento Habitat Conservation Plan, and does not affect the analysis or conclusions presented within the Draft EIR.

4.6 Hydrology and Water Quality

The following staff-initiated change has been included to eliminate an outdated reference to Mitigation Measure 4.4-2. Page 4.6-14 of the Draft EIR is hereby revised as follows:

As discussed in further depth in Chapter 4.4, Geology and Soils/Mineral Resources, of this EIR, development of the SWPPP would include plans to treat stormwater runoff in accordance with the standards of the California Stormwater Management Practice New Development and Redevelopment Handbook and the MS4 Permit standards. The plan would include drainage design from all paved surfaces, including streets, parking lots, driveways, and roofs, as well as landscaping. In addition, the project would be subject to Chapter 16.44 of the City's Municipal Code and Section 11 of the City's Improvement Standards. ~~Implementation of BMPs to control erosion, and, thus, sediment related pollution, is further mandated by Mitigation Measure 4.4-2 within Chapter 4.4 of this EIR.~~ Chapter 16.44 of the City's Municipal Code regulates grading and erosion by requiring all projects that grade more than one acre of land submit an application for review by the City prior to approval of a grading permit. The application must include a grading and erosion plan which would be reviewed for safety of grading and potential for erosion. The project would be subject to compliance with Chapter 16.44 of the City's Municipal Code and the project applicant would be required to prepare a grading and erosion plan. The grading and erosion plan would include erosion control measures and sediment control measures to ensure the stability of the ground surface and soil within the project site during construction activities.

The following staff-initiated change has been included for consistency. Pages 4.6-15 through 4.6-16 of the Draft EIR are hereby revised as follows:

Compliance with the State's Construction General Permit, Chapter 11 of the Improvement Standards, and Chapter 16.44 of the Rancho Cordova Municipal Code, as described above ~~and required by Mitigation Measure 4.4-2 within this EIR~~, would minimize the potential degradation of stormwater quality and downstream surface water associated with construction of the proposed project. In addition, BMPs would be required to be designed in accordance with the California Stormwater Quality Association Stormwater Best Management Practice Handbooks for Construction and for New Development/Redevelopment and Chapter 11 of the Improvement Standards (or other similar source as approved by the City). In order to further minimize the potential for, and effects from, accidental spills of hazardous, toxic, or petroleum substances during construction activities, Mitigation Measure 4.6-1~~(b)~~ below requires

the project to prepare and implement a Spill Prevention Countermeasure and Control Plan (SPCC). Without implementation of the aforementioned measures, the proposed project could result in a ***significant*** impact related to short-term construction-related water quality.

In addition, Mitigation Measure 4.6-1 of Chapter 4.6 of the Draft EIR, Hydrology and Water Quality, is hereby revised as follows:

~~*4.6-1(a) Implement Mitigation Measure 4.4-2*~~

4.6-1~~(b)~~ Prior to the commencement of ground-disturbing activities, the project applicant shall submit, and obtain approval of, a Spill Prevention Countermeasure and Control Plan (SPCC) to the Sacramento County Environmental Management Department. The SPCC shall specify measures and procedures to minimize the potential for, and effects from, spills of hazardous, toxic, or petroleum substances during all construction activities, and shall meet the requirements specified in the Code of Federal Regulations, Title 40, Part 112.

The forgoing staff-initiated revisions are for consistency and clarification purposes, and do not affect the analysis or conclusions in the Draft EIR.

Table 2-1
Summary of Impacts and Mitigation Measures

Impact	Level of Significance Prior to Mitigation	Mitigation Measures	Level of Significance After Mitigation
4.1 Air Quality, Greenhouse Gas Emissions, and Energy			
4.1-7 Generation of GHG emissions that may have a significant impact on the environment or conflict with an applicable plan, policy or regulation of an agency adopted for the purpose of reducing the emissions of GHGs.	S	*4.1-7 To achieve Tier 1, BMP 1, the project applicant shall commit to one of the following options:* *A. All structures proposed as part of the project shall be construction without natural gas infrastructure; or* *B. Off-site credits shall be purchased in order to reduce annual greenhouse gas (GHG) emissions by 571.93 $MTCO_2e$ per year. Credit purchases shall adhere to all of the following:* *1. Off-site credits shall be real, quantifiable, permanent, verifiable, enforceable, and additional, consistent with the standards set forth in California Health and Safety Code Section 38562, subdivisions (d)(1) and (d)(2). Such credits shall be based on protocols that are consistent with the criteria set forth in subdivision (a) of Section 95972 of Title 17 of the California Code of Regulations. Such credits must be purchased through one of the following:* *(i) A California Air Resources Board (CARB)-approved registry, such as the Climate Action Reserve, the American Carbon Registry, and the Verified Carbon Standard;* *(ii) Any registry approved by CARB to act as a registry under the*	LS

		habitat description, and any corrective measures taken to protect the western spadefoot within 1 business day to the Wildlife Agencies. The biologist will report any take of listed species to the U.S. Fish and Wildlife Service and California Department of Fish and Wildlife immediately. Any worker who inadvertently injures or kills a western spadefoot or who finds dead, injured, or entrapped western spadefoot(s) must immediately report the incident to the approved biologist.	
4.6 Hydrology and Water Quality			
4.6-1 Violate any water quality standards or waste discharge requirements or otherwise substantially degrade surface or ground water quality during construction.	S	~~*4.6-1(a) Implement Mitigation Measure 4.4-2.*~~ *4.6-1~~(b)~~ Prior to the commencement of ground-disturbing activities, the project applicant shall submit, and obtain approval of, a Spill Prevention Countermeasure and Control Plan (SPCC) to the Sacramento County Environmental Management Department. The SPCC shall specify measures and procedures to minimize the potential for, and effects from, spills of hazardous, toxic, or petroleum substances during all construction activities, and shall meet the requirements specified in the Code of Federal Regulations, Title 40, Part 112.*	LS

4. Mitigation Monitoring and Reporting Program

4. MITIGATION MONITORING AND REPORTING PROGRAM

4.1 INTRODUCTION

Section 15097 of the California Environmental Quality Act (CEQA) requires all State and local agencies to establish monitoring or reporting programs for projects approved by a public agency whenever approval involves the adoption of either a "mitigated negative declaration" or specified environmental findings related to an Environmental Impact Report (EIR).

The following is the Mitigation Monitoring and Reporting Program (MMRP) for The Preserve Project (proposed project). Unless otherwise noted, the cost of implementing the mitigation measures as prescribed by this MMRP shall be funded by the project applicant.

4.2 COMPLIANCE CHECKLIST

The MMRP contained herein is intended to satisfy the requirements of CEQA as they relate to the EIR for the proposed project prepared by the City of Rancho Cordova. This MMRP is intended to be used by City staff and mitigation monitoring personnel to ensure compliance with mitigation measures during project implementation. Mitigation measures identified in this MMRP were developed in the EIR that was prepared for the proposed project.

The Preserve Project EIR presents a detailed set of mitigation measures that will be implemented throughout the lifetime of the project. Mitigation is defined by CEQA Guidelines, Section 15370, as a measure that:

- Avoids the impact altogether by not taking a certain action or parts of an action;
- Minimizes impacts by limiting the degree or magnitude of the action and its implementation;
- Rectifies the impact by repairing, rehabilitating, or restoring the impacted environment;
- Reduces or eliminates the impact over time by preservation and maintenance operations during the life of the project; or
- Compensates for the impact by replacing or providing substitute resources or environments.

The MMRP will provide for monitoring of construction activities as necessary and in-the-field identification and resolution of environmental concerns.

Monitoring and documenting the implementation of mitigation measures will be coordinated by the City of Rancho Cordova. The table in Section 4.3 of this chapter identifies the mitigation measure, the monitoring action for the mitigation measure, the responsible party for the monitoring action, and timing of the monitoring action. The applicant will be responsible for fully understanding and effectively implementing the mitigation measures contained within the MMRP. The City will be responsible for monitoring compliance.

4.3 MITIGATION MONITORING AND REPORTING PROGRAM

The following table indicates the mitigation measure number, the impact the measure is designed to address, the measure text, the monitoring agency, implementation schedule, and an area for sign-off indicating compliance.

MITIGATION MONITORING AND REPORTING PROGRAM The Preserve Project					
Impact Number	**Impact**	**Mitigation Measure**	**Monitoring Agency**	**Implementation Schedule**	**Sign-off**
4.1 Air Quality, Greenhouse Gas Emissions, and Energy					
4.1-3	Expose sensitive receptors to substantial pollutant concentrations.	*4.1-3* *Prior to the initiation of any ground-disturbing activities, the project applicant shall ensure that all heavy-duty off-road diesel-powered equipment to be used during the grading phase of construction of the proposed project (including owned, leased, and subcontractor equipment) shall be CARB Tier 4 or cleaner.* *In addition, all off-road equipment working at the construction site must be maintained in proper working condition according to manufacturer's specifications. Idling shall be limited to five minutes or less in accordance with the In-Use Off-Road Diesel Vehicle Regulation as required by CARB. Portable equipment over 50 horsepower must have either a valid SMAQMD Permit to Operate (PTO) or a valid statewide Portable Equipment Registration Program (PERP) placard and sticker issued by CARB.* *The aforementioned requirements shall be noted on improvement plans and submitted for review and approval by the City of Rancho Cordova Community Development Department.*	City of Rancho Cordova Community Development Department	Prior to the initiation of any ground-disturbing activities	
4.1-7	Generation of GHG emissions that may have a significant impact on the environment or conflict with an applicable	*4.1-7* *To achieve Tier 1, BMP 1, the project applicant shall commit to one of the following options:*	City of Rancho Cordova Community Development Department	Prior to approval of final improvement plans

		protocols in the event that a western pond turtle enters an active construction zone (i.e., outside the buffer zone). • ***WPT-4 (Western Pond Turtle Habitat Dewatering and Exclusion):*** *If construction activities will occur in western pond turtle aquatic habitat, aquatic habitat for the turtle will be dewatered and then remain dry and absent of aquatic prey (e.g., crustaceans and other aquatic invertebrates) for 15 days prior to the initiation of construction activities. If complete dewatering is not possible, the Implementing Entity will be contacted to determine what additional measures may be necessary to minimize effects to western pond turtle. After aquatic habitat has been dewatered 15 days prior to construction activities, exclusion fencing will be installed extending a minimum of 300 feet into adjacent uplands to isolate both the aquatic and adjacent upland habitat. Exclusionary fencing will be erected 36 inches above ground and buried at least 6 inches below the ground to prevent turtles from attempting to burrow or move under the fence into the construction area. In addition,*			

MITIGATION MONITORING AND REPORTING PROGRAM The Preserve Project					
Impact Number	**Impact**	**Mitigation Measure**	**Monitoring Agency**	**Implementation Schedule**	**Sign-off**
		high-visibility fencing will be erected to identify construction limits and to protect adjacent habitat from encroachment of personnel and equipment. Western pond turtle habitat outside construction fencing will be avoided by all construction personnel. The fencing and work area will be inspected by the approved biologist to ensure that the fencing is intact and that no turtles have entered the work area before the start of each work day. Fencing will be maintained by the contractor until completion of the project. If, after exclusion fencing and dewatering, western pond turtles are found within the project footprint or within 300 feet of the project footprint, the Third-Party Project Proponent will discuss the next best steps with the Implementing Entity and Wildlife Agencies. • ***WPT-5 (Avoid Western Pond Turtle Entrapment):*** *If a Covered Activity occurs within western pond turtle modeled habitat (Figure 3-19 [of the SSHCP]), all excavated steep-walled holes and trenches more than 6 inches deep will be covered with plywood (or similar material) or provided with one or more escape ramps constructed of earth fill or wooden planks at the end*

		maintenance vehicles will observe a 20-mile-per-hour speed limit within western pond turtle modeled upland habitat (Figure 3-19 [of the SSHCP]). • ***WPT-8 (Western Pond Turtle Encounter Protocol):*** *If a western pond turtle is encountered during construction activities, the approved biologist will notify the Wildlife Agencies immediately. Construction activities will be suspended in a 100-foot radius of the animal until the animal leaves the project site on its own volition. If necessary, the approved biologist will notify the Wildlife Agencies to determine the appropriate procedures related to relocation. If the animal is handled, a report will be submitted, including date(s), location(s), habitat description, and any corrective measures taken to protect the turtle, within 1 business day to the Wildlife Agencies. The biologist will report any take of listed species to the U.S. Fish and Wildlife Service immediately. Any worker who inadvertently injures or kills a western pond turtle or who finds one dead, injured, or entrapped must immediately report the incident to the approved biologist.*			

MITIGATION MONITORING AND REPORTING PROGRAM The Preserve Project					
Impact Number	**Impact**	**Mitigation Measure**	**Monitoring Agency**	**Implementation Schedule**	**Sign-off**
		• ***WPT-9 (Western Pond Turtle Post-Construction Restoration):*** *After completion of ground- disturbing Covered Activities, the applicant will remove any temporary fill and construction debris and will restore temporarily disturbed areas to pre-project conditions. Restoration work includes such activities as re-vegetating the banks and active channels with a seed mix similar to pre-project conditions. Appropriate methods and plant species used to re-vegetate such areas will be determined on a site-specific basis in consultation with the Implementing Entity. Restoration work may include replanting emergent aquatic vegetation and placing appropriate artificial or natural basking areas in waterways and wetlands. A photo documentation report showing pre- and post-project conditions will be submitted to the Implementing Entity 1 month after implementation of the restoration.*			
4.2-4	Have a substantial adverse effect, either directly or through habitat modifications, on burrowing owl.	*4.2-4 Prior to initiation of ground-disturbing activities, the project applicant shall comply with SSHCP AMMs WBO-2 through WBO-7. If western burrowing owl is found within the survey area, WBO-3 through 7 shall be implemented as required based on the results of surveys conducted per WBO-2.*	City of Rancho Cordova Community Development Department	Prior to initiation of ground-disturbing activities	

MITIGATION MONITORING AND REPORTING PROGRAM The Preserve Project					
Impact Number	**Impact**	**Mitigation Measure**	**Monitoring Agency**	**Implementation Schedule**	**Sign-off**
		• ***WBO-1 (Western Burrowing Owl Surveys):*** *Surveys within modeled habitat are required for both the breeding and non-breeding season. If the project site falls within modeled habitat, an approved biologist will survey the project site and map all burrows, noting any burrows that may be occupied. Occupied burrows are often (but not always) indicated by tracks, feathers, egg shell fragments, pellets, prey remains, and/or excrement. Surveying and mapping will be conducted by the approved biologist while walking transects throughout the entire project site plus all accessible areas within a 250-foot radius from the project site. The centerline of these transects will be no more than 50 feet apart and will vary in width to account for changes in terrain and vegetation that can preclude complete visual coverage of the area. For example, in hilly terrain with patches of tall grass, transects will be closer together, and in open areas with little vegetation, they can be 50 feet apart. This methodology is consistent with current survey protocols for this species (California Burrowing Owl Consortium 1993). Adjacent parcels under different land ownership will be surveyed only if*			

MITIGATION MONITORING AND REPORTING PROGRAM The Preserve Project					
Impact Number	**Impact**	**Mitigation Measure**	**Monitoring Agency**	**Implementation Schedule**	**Sign-off**
		access is granted or if the parcels are visible from authorized areas. If suitable habitat is identified during the initial survey, and if the project does not fully avoid the habitat, pre-construction surveys will be required. Burrowing owl habitat is fully avoided if project-related activities do not impinge on a 250- foot buffer established by the approved biologist around suitable burrows. See Chapter 10 (of the SSHCP) for the process to conduct and submit survey information. • ***WBO-2 (Western Burrowing Owl Pre-Construction Surveys):*** *Prior to any Covered Activity ground disturbance, an approved biologist will conduct pre-construction surveys in all areas that were identified as suitable habitat during the initial surveys. The purpose of the pre-construction surveys is to document the presence or absence of burrowing owls on the project site, particularly in areas within 250 feet of construction activities. To maximize the likelihood of detecting owls, the pre-construction survey will last a minimum of 3 hours. The survey will begin 1 hour before sunrise and continue until 2 hours after sunrise (3 hours total), or begin 2 hours before*			

MITIGATION MONITORING AND REPORTING PROGRAM The Preserve Project					
Impact Number	**Impact**	**Mitigation Measure**	**Monitoring Agency**	**Implementation Schedule**	**Sign-off**
		sunset and continue until 1 hour after sunset. Additional time may be required for large project sites. A minimum of two pre-construction surveys will be conducted (if owls are detected on the first survey, a second survey is not needed). All owls observed will be counted and their location will be mapped. Surveys will conclude no more than 2 calendar days prior to construction. Therefore, the Third-Party Project Proponent must begin surveys no more than 4 days prior to construction (2 days of surveying plus up to 2 days between surveys and construction). To avoid last-minute changes in schedule or contracting that may occur if burrowing owls are found, the Third-Party Project Proponent may also conduct a preliminary survey up to 15 days before construction. This preliminary survey may count as the first of the two required surveys as long as the second survey concludes no more than 2 calendar days in advance of construction. • ***WBO-3 (Burrowing Owl Avoidance):*** *If western burrowing owl or evidence of western burrowing owl is observed on the project site or within 250 feet of*			

MITIGATION MONITORING AND REPORTING PROGRAM The Preserve Project					
Impact Number	**Impact**	**Mitigation Measure**	**Monitoring Agency**	**Implementation Schedule**	**Sign-off**
		the project site during pre-construction surveys, then the following will occur: ***During Breeding Season:*** *If the approved biologist finds evidence of western burrowing owls within a project site during the breeding season (February 1 through August 31), all project-related activities will avoid nest sites during the remainder of the breeding season or while the nest remains occupied by adults or young (nest occupation includes individuals or family groups foraging on or near the site following fledging). Avoidance is establishment of a minimum 250-foot buffer zone around nests. Construction and other project-related activities may occur outside of the 250-foot buffer zone. Construction and other project-related activities may be allowed inside of the 250-foot non-disturbance buffer during the breeding season if the nest is not disturbed, and the Third-Party Project Proponent develops an avoidance, minimization, and monitoring plan that is approved by the Implementing Entity and Wildlife Agencies prior to project construction based on the following criteria:*			

MITIGATION MONITORING AND REPORTING PROGRAM The Preserve Project					
Impact Number	**Impact**	**Mitigation Measure**	**Monitoring Agency**	**Implementation Schedule**	**Sign-off**
		○ *The Implementing Entity and Wildlife Agencies approve of the avoidance and minimization plan provided by the project applicant.* ○ *An approved biologist monitors the owls for at least 3 days prior to construction to determine baseline nesting and foraging behavior (i.e., behavior without construction).* ○ *The same approved biologist monitors the owls during construction and finds no change in owl nesting and foraging behavior in response to construction activities.* *If there is any change in owl nesting and foraging behavior as a result of construction activities, the approved biologist will have authority to shut down activities within the 250-foot buffer. Construction cannot resume within the 250-foot buffer until any owls present are no longer affected by nearby construction activities, and with written concurrence from the Wildlife Agencies.* *If monitoring by the approved biologist indicates that the nest is abandoned*			

MITIGATION MONITORING AND REPORTING PROGRAM The Preserve Project					
Impact Number	**Impact**	**Mitigation Measure**	**Monitoring Agency**	**Implementation Schedule**	**Sign-off**
		prior to the end of nesting season and the burrow is no longer in use, the non-disturbance buffer zone may be removed if approved by the Wildlife Agencies. The approved biologist will excavate the burrow in accordance with the latest California Department of Fish and Wildlife guidelines for burrowing owl to prevent reoccupation after receiving approval from the Wildlife Agencies. *The Implementing Entity and Wildlife Agencies will respond to a request from the Third-Party Project Proponent to review the proposed construction monitoring plan within 21 days.* ***During Non-Breeding Season:*** *During the non-breeding season (September 1 through January 31), the approved biologist will establish a minimum 250-foot non-disturbance buffer around occupied burrows. Construction activities outside of this 250-foot buffer will be allowed. Construction activities within the non-disturbance buffer will be allowed if the following criteria are met to prevent owls from abandoning over- wintering sites:*			

MITIGATION MONITORING AND REPORTING PROGRAM The Preserve Project					
Impact Number	**Impact**	**Mitigation Measure**	**Monitoring Agency**	**Implementation Schedule**	**Sign-off**
		○ *An approved biologist monitors the owls for at least 3 days prior to construction to determine baseline foraging behavior (i.e., behavior without construction).* ○ *The same approved biologist monitors the owls during construction and finds no change in owl foraging behavior in response to construction activities.* ○ *If there is any change in owl foraging behavior as a result of construction activities, the approved biologist will have authority to shut down activities within the 250-foot buffer.* ○ *If the owls are gone for at least 1 week, the Third-Party Project Proponent may request approval from the Implementing Entity and Wildlife Agencies that an approved biologist excavate usable burrows and install one-way exclusionary devices to prevent owls from re-occupying the site. After all usable burrows are excavated, the buffer zone will*			

MITIGATION MONITORING AND REPORTING PROGRAM The Preserve Project					
Impact Number	**Impact**	**Mitigation Measure**	**Monitoring Agency**	**Implementation Schedule**	**Sign-off**
		be removed and construction may continue. *Monitoring must continue as described above for the non-breeding season as long as the burrow remains active.* • ***WBO-4 (Burrowing Owl Construction Monitoring):*** *During construction of Covered Activities, 250-foot construction buffer zones will be established and maintained around any occupied burrow. An approved biologist will monitor the site to ensure that buffers are enforced and owls are not disturbed. The approved biologist will also train construction personnel on avoidance procedures, buffer zones, and protocols in the event that a burrowing owl flies into an active construction zone.* • ***WBO-5 (Burrowing Owl Passive Relocation):*** *Passive relocation is not allowed without the express written approval of the Wildlife Agencies. Passive owl relocation may be allowed on a case-by-case basis on project sites during the non-breeding season (September 1 through January 31) with the written approval of the Wildlife Agencies if the other measures*			

MITIGATION MONITORING AND REPORTING PROGRAM The Preserve Project					
Impact Number	**Impact**	**Mitigation Measure**	**Monitoring Agency**	**Implementation Schedule**	**Sign-off**
		described in this condition preclude work from continuing. Passive relocation must be done in accordance with the latest California Department of Fish and Wildlife guidelines for burrowing owl. Passive relocation will only be proposed if the burrow needing to be removed or with the potential to collapse from construction activities is the result of a Covered Activity. If passive relocation is approved by the Wildlife Agencies, an approved biologist can passively exclude birds from their burrows during the non-breeding season by installing one-way doors in burrow entrances. These doors will be in place for 48 hours to ensure that owls have left the burrow, and then the biologist will excavate the burrow to prevent reoccupation. Burrows will be excavated using hand tools only. During excavation, an escape route will be maintained at all times. This may include inserting an artificial structure into the burrow to avoid having materials collapse into the burrow and trap owls inside. Other methods of passive relocation, based on best available science, may be approved by the Wildlife Agencies over the 50-year Permit Term.			

MITIGATION MONITORING AND REPORTING PROGRAM The Preserve Project					
Impact Number	**Impact**	**Mitigation Measure**	**Monitoring Agency**	**Implementation Schedule**	**Sign-off**
		• ***WBO-6 (Burrowing Owl Timing of Maintenance Activities):*** *All activities adjacent to existing or planned Preserves, Preserve Setbacks, or Stream Setback areas will be seasonally timed, when safety permits, to avoid or minimize adverse effects on occupied burrows.* • ***WBO-7 (Rodent Control):*** *Rodent control will be allowed only in developed portions of a Covered Activity project site within western burrowing owl modeled habitat. Where rodent control is allowed, the method of rodent control will comply with the methods of rodent control discussed in the 4(d) Rule published in the U.S. Fish and Wildlife Service's (2004) final listing rule for tiger salamander.*			
4.2-5	Have a substantial adverse effect, either directly or through habitat modifications, on raptors and nesting birds.	*4.2-5(a) Prior to initiation of ground-disturbing activities, the project applicant shall comply with SSHCP AMMs RAPTOR-2 through RAPTOR-4. Raptor surveys conducted per RAPTOR-2 shall include surveying for golden eagle although it is not a SSHCP Covered Species. If raptor species (including golden eagles) are found nesting within the survey area, RAPTOR-3 and RAPTOR-4 shall be implemented as required based on the results of surveys conducted per RAPTOR-2. The following AMMs do not apply to Swainson's*	City of Rancho Cordova Community Development Department	Prior to initiation of ground-disturbing activities	

MITIGATION MONITORING AND REPORTING PROGRAM The Preserve Project

		4.5-2(c) Prior to issuance of a demolition permit for any on-site structures, the project applicant shall consult with certified Asbestos and/or Lead Risk Assessors to complete and submit for review to the Community Development Department an asbestos and lead survey. If asbestos-containing materials or lead-containing materials are not discovered during the survey, further mitigation related to asbestos-containing materials or lead containing materials shall not be required. If asbestos-containing materials and/or lead-containing materials are discovered by the survey, the project applicant shall prepare a work plan to demonstrate how the on-site asbestos-containing materials and/or lead-containing materials shall be removed in accordance with current California Occupational Health and Safety (Cal-OSHA) Administration regulations and disposed of in accordance with all CalEPA regulations, prior to the demolition and/or removal of the on-site structures. The plan shall include the requirement that work shall be conducted by a Cal-OSHA registered asbestos and lead abatement contractor in accordance with Title 8 CCR 1529 and Title 8 CCR 1532.1 regarding asbestos and lead training, engineering controls, and certifications. The applicant shall submit the work plan to the Community Development Department for review and approval. Materials containing more than one (1) percent asbestos that is friable are also	City of Rancho Cordova Community Development Department	Prior to issuance of a demolition permit for any on-site structures

		subject to SMAQMD regulations. Removal of materials containing more than one (1) percent friable asbestos shall be completed in accordance with SMAQMD Rule 902.			
		4.5-2(d) Prior to issuance of a demolition permit for any on-site structures, the project applicant shall retain the services of a licensed environmental professional to prepared a Phase II Environmental Assessment (ESA) for the project site. The Phase II ESA shall evaluate, at a minimum, potential lead contamination in the soils in the vicinity of the structures located on APN 072-0300-008, as well as potential termiticide contamination in the soils in the vicinity of the wooden structures located on APN 072-0300-002 and APN 072-0300-008. In the event that the lead and/or termiticide contamination is determined to occur, the project applicant shall implement all recommended measures in the Phase II ESA necessary to address such hazards. Such measures may include, but shall not be limited to, capping contaminated soil in place and deed-restricting the subject property, excavation and off-haul of contaminated soils by a licensed contractor, or other appropriate methods deemed acceptable by the Sacramento County Environmental Management Department (EMD). The lighting plan shall include, but not necessarily be limited to, the following provisions: • *Shield or screen lighting fixtures to direct the light downward and prevent light spill on adjacent properties;* • *Place and shield or screen flood and area lighting needed for construction activities and/or security so as not to disturb adjacent residential areas and passing motorists;* • *For public lighting, prohibit the use of light fixtures that are of unusually high intensity or brightness (e.g., harsh mercury vapor, low-pressure sodium, or fluorescent bulbs) or that blink or flash;* • *Use appropriate building materials (such as low-glare glass, low-glare building glaze or finish, neutral, colored paint and roofing materials), shielded or screened lighting, and appropriate signage to prevent light and glare from adversely affecting motorists on nearby roadways; and* • *The proposed location, mounting height, and aiming point of all outdoor lighting used during project operations and/or construction.*		for any development on the project site	

CITY OF RANCHO CORDOVA

RESOLUTION NO. XX-2022

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA APPROVING A GENERAL PLAN AMENDMENT TO THE SAFETY ELEMENT FOR THE MULTI-JURISDICTIONAL LOCAL HAZARD MITIGATION PLAN AND THE LAND USE AND CIRCULATION ELEMENT FOR THE PRESERVE PROJECT NO. DD9835

WHEREAS, City of Rancho Cordova recognizes the treat natural hazards pose to people and property within our community; and

WHEREAS, undertaking hazard mitigation actions will reduce the potential for harm to people and property within our community; and

WHEREAS, the Federal Disaster Mitigation Act of 2000 emphasizes the need for pre-disaster mitigation of potential natural hazards; and

WHEREAS, the City of Rancho Cordova adopted the updated Multi-Jurisdictional Local Hazard Mitigation Plan (LHMP) on March 7, 2022; and

WHEREAS, the Amendment includes revised language describing the Multi-Jurisdictional Local Hazard Mitigation Plan and a link to the current Local Hazard Mitigation Plan; and

WHEREAS, the property referred to as The Preserve ("Project") is proposed by Winn Communities, referred to as "Applicant"; and

WHEREAS, The Preserve project is planned as a 439 single family development, with parks/open space, natural resources, trails and associated infrastructure and roads on approximately 279-acres in the City; and

WHEREAS, the tentative subdivision map meets the requirements of the Subdivision Map Act and the Rancho Cordova Municipal Code as set forth in findings below, and the City Council has conducted a properly noticed public hearing for the approval of the Tentative Subdivision Map attached hereto in accordance with the Subdivision Map Act requirements; and

WHEREAS, on April 4, 2022, the City Council of the City of Rancho Cordova conducted a properly noticed public hearing pursuant to Government Code section 65090 and has duly considered all written and verbal testimony presented during the hearing; and

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA HEREBY RESOLVES AS FOLLOWS:

FINDINGS

CEQA

Safety Element Amendment

1. **Finding**. The proposed General Plan Amendment is exempt from CEQA under Guidelines Section 15061(b)(3), General Rule

Evidence. The proposed text amendment to add language into the plan regarding the already adopted LHMP into the Safety Element of the General Plan is exempt from the California Environmental Quality Act (CEQA), pursuant to State CEQA Guidelines Section 15061(b)(3) (Common Sense Exemption). The activity is covered by the general rule that CEQA applies only to projects that have the potential for causing a significant effect on the environment. Where it can be seen with certainty that there is no possibility that the activity in question may have a significant effect on the environment, the activity is not subject to CEQA. The LHMP acts as a guidebook for hazard mitigation strategies but does not implement any specific project, action, or funding.

Land Use and Circulation Element Amendments
The City Council adopted a Resolution certifying The Preserve Project Environmental Impact Report (EIR), which included all findings required under CEQA regarding environmental impacts of the Project, mitigation measures and alternatives, adopted a Statement of Overriding Considerations, and adopted a Mitigation Monitoring and Reporting Program. The Draft EIR contains a description of the Project, including the proposed amendments to the General Plan, description of the environmental setting, identification of project impacts, and mitigation measures for impacts found to be significant, as well as an analysis of project alternatives, identification of significant irreversible environmental changes, growth-inducing impacts, and cumulative impacts. The Draft EIR identifies issues determined to have no impact or a less-than-significant impact and provides analysis of potentially significant and significant impacts. The Draft EIR identified the following impacts that were determined to be significant and unavoidable, which requires the City Council to adopt a Statement of Overriding Considerations.

General Plan Consistency- According to Section 23.155.060 of the Zoning Code, in order to amend the General Plan to modify the Land Use Map (Exhibit A), the Circulation Element (Exhibit B) and the Safety Element (Exhibit C) the following findings shall be made:

A. Finding: The proposed amendment is internally consistent with the General Plan.

Evidence: The proposed project area with the proposed land use designation as shown in Exhibit A: Proposed General Land Use Map is consistent with the General Plan Grant Line West Planning Area conceptual plan. The density is consistent with the conceptual plan and preserves a large amount of land that contains various natural resources. The removal of Centennial Drive from the project site as depicted on Figure C-1 of the General Plan was thoroughly analyzed in the EIR. It was concluded that the removal of this section of Centennial Drive would not create inconsistencies with the roadway network LOS standards. In addition, the project is consistent with several of the General Plan goals as stated above. The amendment to the Safety Element is merely a text addition to include language and a link to the approved Local Hazard Mitigation Plan (LHMP).

B. Finding: The proposed amendment would not be detrimental to the public interest, health, safety, convenience, or welfare of the City.

Evidence: The proposed Project will not be detrimental to the public interest, health, safety, convenience, or welfare of the City as the project is expected to result in an improved jobs/housing ratio than what currently exists and includes the designation of public uses including parks and other public or quasi-public uses. The Preserve Project integrates sustainable development practices by preserving a large area of land containing various species and habitats to the north of the proposed residential development. It is a similar development pattern as the project to the south, known as Camden at Somerset Ranch.

C. Finding: In the case of amendments to the General Plan map, the site is physically suitable (including absence of physical constraints, access, compatibility with adjoining land uses, and provisions of utilities) for the requested/anticipated land use developments.

Evidence: The site is physically suitable for the proposed density of development. The proposed plan is consistent with the General Plan conceptual Grant Line West Planning Area. Natural Resource areas have been avoided to the extent possible. The proposed circulation plan enhances and expands roadway systems in the area with connections to existing roads. The project land use uses are consistent with the surrounding areas that includes residential and natural resources designations. The project infrastructure that includes utilities will connect into existing infrastructure. The removal of Centennial Drive from the project site as depicted on Figure C-1 of the General Plan was thoroughly analyzed in the EIR. It was concluded that the removal of this section of Centennial Drive would not create inconsistencies with the roadway network LOS standards. In addition, the project is consistent with several of the General Plan goals as stated above. The amendment to the Safety Element is merely a text addition to include language and a link to the approved Local Hazard Mitigation Plan (LHMP).

D. Finding: The proposed project has been reviewed in compliance with the provisions of CEQA.

Evidence: The Preserve Environmental Impact Report identifies all known and protected resources within the project area. Required protection and mitigation measures have been incorporated into The Preserve Mitigation Monitoring Report Program. The Preserve project is consistent with the General Pan Natural Resources Element Goals NR-2, and NR-3 regarding protection and preservation of wildlife, plant habitats, wetlands and creek corridors. The amendment to the Safety Element is merely a text addition to include language and a link to the approved Local Hazard Mitigation Plan (LHMP) and is considered to be exempt from CEQA pursuant to Section 15601(b)(3).

The City Council approves the attached General Plan Amendment as shown in (Exhibit's A) Land Use Map; (Exhibit B) Circulation Map and (Exhibit C) Safety Element, as attached.

Section 7. EFFECTIVE DATE.

This Resolution shall become effective upon the effective date of City Council Ordinance No. XX-2022 adopting The Preserve Project Rezone.

PASSED AND ADOPTED by the City Council of the City of Rancho Cordova this 4th day of April 2022, by the following vote:

Related Plans and Programs

The Safety Element relates to several other plans and programs, including the following:

- **Plans and activities of the Federal Emergency Management Agency (FEMA).** FEMA is the federal agency charged with preparing the nation for all hazards and effectively managing federal responses and recovery efforts following any national incident (e.g., major flood, earthquake, tornado, hurricane). FEMA also initiates proactive mitigation activities, trains first responders, and manages the National Flood Insurance Program and the U.S. Fire Administration. FEMA will coordinate with the City's designated emergency responders.

- **Governor's Office of Emergency Services (OES)**. The OES coordinates overall state agency response to major disasters in support of local government. The office is responsible for assuring the state's readiness to respond to and recover from natural, manmade, and war-caused emergencies, and for assisting local governments in their emergency preparedness, response and recovery efforts. OES Headquarters is located in the City of Rancho Cordova and they will review and support the City's adoption of a local Emergency Management Plan.

- **California Environmental Quality Act (CEQA)**. CEQA is the State's environmental review process that requires public agencies to identify the significant environmental effects of a project, including potential safety hazards, and either avoid the significant environmental effects, where feasible, or mitigate the significant environmental effects, where feasible. All qualifying projects within the Rancho Cordova General Plan Planning Area will be subject to environmental analysis consistent with CEQA.

Multi-Jurisdictional Local Hazard Mitigation Plan (LHMP). ~~The LHMP assesses natural hazards of concern to Sacramento County and Cities within; evaluates risk to life safety, public health, property, and the environment; and evaluates mitigation measures to reduce these risks and vulnerabilities, minimize losses and increase community resilience~~. The Local Hazard Mitigation Plan (LHMP) for Sacramento County planning area was developed in accordance with the Disaster Mitigation Act of 2000 (DMA 2000) and followed FEMA's 2011 Local Hazard Mitigation Plan guidance. The LHMP incorporates a process where hazards are identified and profiled, the people and facilities at risk are analyzed, and mitigation actions are developed to reduce or eliminate hazard risk. The implementation of these mitigation actions, which include both short and long-term strategies, involve planning, policy changes, programs, projects, and other activities. (Add website link to the LHMP).

- **Local Emergency Management Plan**. As provided for in State law, local jurisdictions are required to establish plans and ordinances addressing emergency management operations. This includes identifying hazards that may pose a major threat to the City and how to address these potential threats should an emergency occur. OES provides requirements and guidelines for such plans.

CITY OF RANCHO CORDOVA

ORDINANCE NO. XX-2022

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA REZONING THE PRESERVE PROPERTY FROM AGRICULTURAL 80 AND INDUSTRIAL RESERVE TO RESIDENTIAL DENSITY 5 (RD-5)

THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA DOES ORDAIN AS FOLLOWS:

WHEREAS, The Preserve, is located in the eastern part of the City, is envisioned as an integral part of the City; and

WHEREAS, The Preserve ("Project") includes subdivision of 279.3 acres to develop 439 single-family residences and associated parks, open space areas, and infrastructure to support the community. Of the 279.3 acres within the project site, 185.3 acres of currently undeveloped land on the northern parcels would remain as open space following development of the Project. A total of 8.65 acres are planned for two park areas located at the northern end of the development area, and an additional 9.77 acres of land would be designated Community Space. Finally, 0.45-acre of the project site would be designated green infrastructure which would include enhanced landscaped areas and trails with connection to the surrounding parks. Off-site improvements could be required, such as utility connection or road development to the east of the site boundary, as well as along Raymer Way up to the intersection with Grant Line Road. Other off-site improvements could include expansion of the roadway or modifications to Morrison Creek; and

WHEREAS, The Preserve proposed zoning of RD-5, is consistent with the Grant Line West Planning Area conceptual plan in the General Plan; and

WHEREAS, the environmental review of The Preserve Project commenced with the release of the Notice of Preparation on October 25, 2019 to public agencies and interested parties for consultation on the scope of the EIR; and

WHEREAS, a Draft Environmental Impact Report ("Draft EIR") was released for a 45-day public and agency review on November 9, 2021. The Draft EIR assesses the potential environmental effects of implementation of the Project, identifies means to eliminate or reduce potential adverse impacts, and evaluates a reasonable range of alternatives to the Project; and

WHEREAS, on April 4, 2022, the City Council held a properly noticed public hearing at which it received a report from City Staff regarding The Ranch Special Planning Area and oral and written testimony from the public, and deliberated on the item; and

WHEREAS, the public hearing was noticed in accordance with the requirements set forth in Government Code section 65090 and 65091.

NOW THERFORE, **THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA DOES ORDAIN AS FOLLOWS:**

Section 1. **Recitals.**

The foregoing recitals are true and correct and made a part of this Ordinance

Section 2: Rezone Findings.

A. Finding: The proposed amendment is internally consistent with the General Plan**.**

Evidence: The project is consistent with the General Plan Amendment in that; It would Consolidate the remaining parcels in the Grant Line West Planning Area of the City of Rancho Cordova General Plan in a manner that concentrates development south of Morrison Creek to avoid and minimize potential conflicts with the South Sacramento Habitat Conservation Plan. Develop a residential mixed-density community that is consistent with the General Plan conceptual land use designation for the Grant Line West Planning Area. Develop a residential community that is contiguous to and compatible with adjacent existing development and that provides a range of housing choices. Utilize existing utility capacity for maximum efficiency. Develop a residential community that can provide timely housing to help meet current demand during a period of housing shortages in the region and throughout the State. Contribute to the overall bicycle and pedestrian connectivity of the City by building key components of the regional trail system and providing strong connections for both existing and future residents. Enhance the City's network of parks, trails and open spaces for the enjoyment of all residents.

B. Finding The proposed amendment would not be detrimental to the public interest, health, safety, convenience, or welfare of the City.

Evidence: The proposed Project will not be detrimental to the public interest, health, safety, convenience, or welfare of the City as the project is expected to result in an improved jobs/housing ratio than what currently exists and includes the designation of public uses including parks and other public or quasi-public uses. The Preserve Project integrates sustainable development practices by preserving a large area of land containing various species and habitats to the north of the proposed residential development. It is a similar development pattern as the project to the south, known as Camden at Somerset Ranch.

C. Finding: CEQA Compliance.

Evidence **:** In compliance with the California Environmental Quality Act ("CEQA"), on April 4, 2022, by Resolution, the City certified the Preserve Project EIR (State Clearinghouse #2019100515) adopted environmental findings pursuant to CEQA guidelines Section 15091, adopted a statement of overriding considerations, and adopted a mitigation monitoring program for The Preserve project.

D. Finding: If a map amendment the site is physically suitable (including absence of physical constraints, access, compatibility with adjoining land uses and provisions of utilities) for the requested zoning code.

E.

Evidence: The Preserve Project is not a map amendment. However, site is physically suitable for the proposed density of development. The proposed plan is consistent with the General Plan conceptual Grant Line West Planning Area. Natural Resource areas have been avoided to the extent possible. The proposed circulation plan enhances and expands roadway systems in the area with connections to existing roads. The project land use uses are consistent with the surrounding areas that includes residential and natural resources

designations. The project infrastructure that includes utilities will connect into existing infrastructure.

F. Finding: If a text amendment, the amendment is internally consistent with the other applicable provisions in the zoning code.
Evidence: A text amendment is not part of The Preserve Project.

Section 3: Adoption of the Rezone

The City Council hereby adopts the Rezone of The Preserve, attached as Exhibit A.

Section 4: Severability.

If any section, subsection, clause or phrase of this Ordinance is for any reason held to be invalid or unconstitutional by the decision of a court of competent jurisdiction, it shall not affect the remaining portions of this Ordinance that can be given effect without the invalid provision and, to this end, the provisions of this Ordinance are severable. This City Council hereby declares that it would have adopted this Ordinance irrespective of the invalidity of any particular portion thereof and intends that the invalid portions should be severed and the balance of the Ordinance enforced.

Section 5: Publication and Effective Date.

Within fifteen (15) days after adoption, a summary of this Ordinance shall be published once in the Grapevine Independent or the Sacramento Bee, a newspaper of general circulation printed and published in Sacramento County and circulated in the City of Rancho Cordova, in accordance with Government Code section 36933. This Ordinance shall take effect and be enforced thirty (30) days after its adoption.

CITY OF RANCHO CORDOVA

RESOLUTION NO. XX-2022

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA APPROVING A TENTATIVE SUBDIVISION MAP FOR THE PRESERVE PROJECT ASSESSOR PARCEL NUMBER APNS 073-0010-010 & 011 AND 072-0300-001, 002, 005, AND 008 PROJECT NO. DD9835

WHEREAS, the property referred to as The Preserve ("Project") is proposed by Winn Communities, referred to as "Applicant"; and

WHEREAS, The Preserve project is planned as a 439 single family development, with parks/open space, natural resources, trails and associated infrastructure and roads on approximately 279-acres in the City; and

WHEREAS, the tentative subdivision map meets the requirements of the Subdivision Map Act and the Rancho Cordova Municipal Code as set forth in findings below, and the City Council has conducted a properly noticed public hearing for the approval of the Tentative Subdivision Map attached hereto in accordance with the Subdivision Map Act requirements; and

WHEREAS, on April 4, 2022, the City Council held a properly noticed public hearing at which it received a report from City Staff regarding The Preserve Project and oral and written testimony from the public, and deliberated on the item; and

WHEREAS, the public hearing was noticed in accordance with the requirements set forth in Government Code section 65090 and 65091.

NOW, THEREFORE, THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA HEREBY RESOLVES AS FOLLOWS:

Section 1. FINDINGS

In accordance with Government Code section 66473.5, the proposed Tentative Subdivision Map with attached Conditions of Approval ("Tentative Map") attached hereto is consistent with the applicable General and Specific Plan objectives, policies, land uses and programs. Section 66474 of the Government Code requires a City to deny approval of a tentative map if any of the findings are found to be true. In the case of the proposed map, none of the required findings were found to be true. The following evidence supports the map request:

1. *Finding: That the proposed map is not consistent with applicable general and specific plans as specified in Section 65451*.

   Evidence: The proposed project is consistent with the proposed General Plan Amendment for The Preserve Project land use designation. The proposed map, which includes 439 lots, is consistent with the land use designation of Low Density Residential. The overall density is within the 4.1-5.0 dwelling units per acre range. While the proposed density is less intense than what the General Plan had initially contemplated, the density preserve the natural resources and habitat north of the Project site.

2. *Finding: That the design or improvement of the proposed subdivision is not consistent with applicable general and specific plans.*

   Evidence: The proposed Tentative Subdivision Map is consistent with the proposed General Plan Amendment designation of Low Density Residential. The overall layout of the site provides connections to existing roadways and the subdivision to the south. The overall density is within the 4.1-5.0 dwelling units per acre range. While the proposed density is less intense than what the General Plan had initially contemplated, the density preserve the natural resources and habitat north of the Project site.

3. *Finding: That the site is not physically suitable for the type of development.*

   Evidence: The site is physically suitable to subdivide. The existing properties will be split into 439 single family residential lots. It will also include amenities such as parks, community spaces and green infrastructure. The site can be adequately served by all necessary utilities and will provide the appropriate roadway connections.

4. *Finding: That the site is not physically suitable for the proposed density of development.*

   Evidence: The site is physically suitable for the proposed density of development. The proposed RD-5 density meets the density range of 4.1-5.0 dwelling units per acre. The proposed subdivision map is consistent with the proposed General Plan designation. Improvements are provided as shown on the Tentative Subdivision Map.

5. *Finding: That the design of the subdivision or the proposed improvements are likely to cause substantial environmental damage or substantially and avoidably injure fish or wildlife or their habitat.*

   Evidence: An Environmental Impact Report was prepared for The Preserve project DD9835 where the construction of single-family lots, parks/open space, and the protection of natural resources were addressed in accordance with the requirements of the California Environmental Quality Act (CEQA). The Draft EIR contains a description of the Project, description of the environmental setting, identification of project impacts, and mitigation measures for impacts found to be significant, as well as an analysis of project alternatives, identification of significant irreversible environmental changes, growth-inducing impacts, and cumulative impacts. The Draft EIR identifies issues determined to have no impact or a less-than-significant impact and provides analysis of potentially significant and significant impacts. The Draft EIR identified the following impacts that were determined to be significant and unavoidable, which requires the City Council to adopt a Statement of Overriding Considerations The proposed project is consistent with the project analyzed in the Environmental Impact Report.

6. *Finding: That the design of the subdivision or the type of improvements is not likely to cause serious public health problems*.

   Evidence: The proposed subdivision has taken into consideration the existing environment and preserving a large area that has significant natural resources and habitat. Proposed development has been planned outside of the protected natural preserve. The proposed Tentative Subdivision Map includes necessary improvements to serve the project. No public health problems will result from approval of the tentative subdivision map.

7. *Finding: That the design of the subdivision or the type of improvements will conflict with easements, acquired by the public at large, for access through or use of property within the proposed subdivision. In this connection, the legislative body may approve a map if it finds that alternate easements, for access or for use, will be provided, and that these will be substantially equivalent to ones previously acquired by the public.*

   Evidence: The proposed improvements on the tentative subdivision map and included within the project are consistent with the City of Rancho Cordova Ordinances and Standards and do not conflict with public easements and related necessary access through the project. The streets proposed include public streets.

B. Approval.

The City Council approves the attached Tentative Subdivision Map (Exhibit A) for The Preserve Project with attached conditions of approval (Exhibit B) as attached.

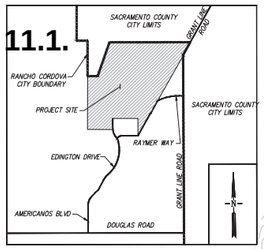
Section 7. EFFECTIVE DATE.

This Resolution shall become effective upon the effective date of City Council Ordinance No. XX-2022 adopting The Preserve Project Rezone.

PASSED AND ADOPTED by the City Council of the City of Rancho Cordova this 4th day of April 2022, by the following vote:

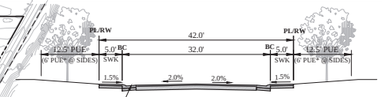
AYES:

NOES:



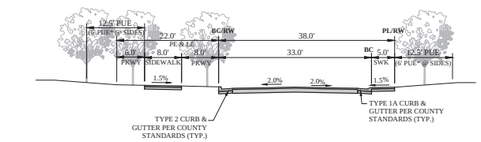
ABSENT:

ABSTAIN:



_____
Donald Terry, Mayor

ATTEST:



_____
Stacy Leitner, CMC
City Clerk

TENTATIVE MAP NOTES

1. THIS EXHIBIT IS FOR TENTATIVE MAP PURPOSES ONLY. ALL SITE CHARACTERISTICS ARE VERIFIED PRIOR TO IMPROVEMENT PLANS.
2. MINOR MODIFICATIONS MAY BE MADE TO PARCEL/LOT LINES AT FINAL MAP.
3. FOR PRELIMINARY PLANNING PURPOSES ONLY. BOUNDARY, TOPO, EASEMENTS AND SITE CONDITIONS TO BE VERIFIED PRIOR TO FINAL MAP AND ENGINEERING.
4. PURSUANT TO GOVERNMENT CODE SECTION 66456.1 THE SUB-DIVIDER MAY FILE MULTIPLE FINAL MAPS BASED UPON THIS TENTATIVE MAP. THE FILING OF A FINAL MAP ON A PORTION OF THIS TENTATIVE MAP SHALL NOT INVALIDATE ANY PART OF THIS TENTATIVE MAP, INCLUDING THE AUTHORITY OF THE LOCAL AGENCY TO IMPOSE REASONABLE CONDITIONS RELATING TO THE FILING OF MULTIPLE FINAL MAPS.
5. ALL UTILITY SYSTEMS ILLUSTRATED ON THE TENTATIVE MAP ARE SUBJECT TO CHANGE AT THE TIME OF FINAL DESIGN.
6. GRADING SHOWN ON THIS TENTATIVE MAP ILLUSTRATES A GENERAL GRADING CONCEPT AND IS SUBJECT TO CHANGE AT THE TIME OF FINAL DESIGN.
7. ALL EXISTING STRUCTURES TO BE REMOVED AND ALL EXISTING WELLS & SEPTIC SYSTEMS TO BE ABANDON AND/OR REMOVED.
8. ALIGNMENT OF MORRISON CREEK TRAIL IS SCHEMATIC. EXACT ALIGNMENT WILL BE DEVELOPED WITH PARK PLANS.

SHEET
PL3

FUHRMAN LEAMY LAND GROUP
DESIGN · SERVICE · SOLUTIONS
2140 PROFESSIONAL DRIVE, SUITE 115 ROSEVILLE, CA 95661

DATE: January 21, 2022
PROJECT: WIN 18076

	Conditions of Approval	Timing/ Implementation	Enforcement/ Monitoring	Verification (date and Signature)
On-Going				
1.	The approved entitlement is for a General Plan Amendment (GPA), Rezone (RZ), Development Agreement, (DA), and Tentative Subdivision Map (TSM), for The Preserve described in the City Council staff report dated April 4, 2022 and project plans (Exhibit A to the Resolution) with the conditions herein, for project number DD9835.	On-Going	Planning	
2.	The Applicant shall hold harmless the City, its Council Members, officers, agents, employees, and representatives from liability for any award, damages, costs and fees incurred by the City and/or awarded to any plaintiff in an action challenging the validity of this permit or any environmental or other documentation related to approval of this permit. Applicant further agrees to provide a defense for the City in any such action.	On-Going	Planning	
3.	The TSM approval is valid for three years from the date of City approval, unless an extension of time is subsequently approved per Government Code Section 66452.6(e), or as otherwise stated in the Project development agreement.	On-Going	Planning	
4.	The project shall comply with the adopted Mitigation Monitoring and Reporting Program for The Preserve project.	On-Going	Planning	
5.	Applicant/Developer shall not carry a negative account balance with the City for the processing of the project. If a negative account balance occurs, it will be the developer's responsibility to pay the balance due, in order to avoid delays in the processing of future permits or recordation of maps. Please email the Finance Department at billings@cityofranchocordova.org for the status of your account with the City.	On-Going	Finance	
6.	In accordance with Government Code Section 65864 through 65869.5 and Zoning Code 23.158, all active Development Agreements must maintain a minimum deposit balance of $5,000	On-Going	Planning	

	Conditions of Approval	Timing/ Implementation	Enforcement/ Monitoring	Verification (date and Signature)
	and report to the Planning Department annually. This report should include the status of the project, payment of fees, and any change in ownership.			
7.	Applicant shall be responsible for all damage to City streets associated with construction of the project and shall repair any damage as soon as possible.	On-Going	Public Works	
8.	SMUD has existing underground 12kV facilities along Bear Hollow Dr., Zinfandel Dr., and Spoto Dr. that will need to remain. The Applicant shall be responsible for maintaining all CalOSHA and Sate of California Public Utilities Commission General Order No. 128 safety clearances during construction and upon building completion. If the required clearances cannot be maintained, the Applicant shall be responsible for the cost of relocation.	On-Going	SMUD	
9.	SMUD reserves the right to use any portion of its easements on or adjacent to the subject property that it reasonably needs and shall not be responsible for any damages to the developed property with said easement that unreasonably interferes with those needs.	On-Going	SMUD	
10.	The Applicant shall submit payment as needed for Plan Review/ Plan Check Fees required by the Cordova Recreation and Parks District (CRPD).	On-Going	CRPD	
11.	Noise sources associated with construction, repair, remodeling, demolition, paving and/or grading of any real property must adhere to the development standards outlined within the City's Noise Element, RCMC 6.68 and RCMC 16.18.1407(F).	On-Going	Code Enforcement/Police

17.	The Landowner shall support the annexation of the Project into the Police Services CFD and cover Landowner's fair-share costs of the CFD annexation, not to exceed $7,000 for the Property. City agrees that the CFD will provide that on lands designated for all residential land use categories, the base year Police Special Tax shall be $450.00 annually per residential dwelling unit, including multi-family units. The special tax imposed by the CFD will be payable on a parcel within the Property only after a building permit has been issued by City for the construction of a building on that particular parcel, and there will be no undeveloped land tax imposed by the CFD. The CFD shall further provide that on each July 1 commencing July 1, 2012, the Police Special Tax shall be escalated by the increase, if any, in the City CPI Index. However, in no event shall the tax per parcel for any fiscal year be less than the amount established for the prior fiscal year. The CFD shall specify that the Police Special Tax shall commence being payable annually following the issuance of a building permit for each parcel subject to the Police Special Tax.	The annexation shall occur prior to the recordation of any small lot final map. The annual fee commences when a building permit is issued.	Finance

	accomplished in a manner that does not pose a toxic threat to fish and other aquatic organisms in receiving waters.			
33.	Provide a permanent concrete stamp, or other permanently applied message to the satisfaction of the City not including paint, which reads “No Dumping-Flows to Creek” or other approved message at each storm drain inlet	Prior to approval of improvement plans.	Public Works	
34.	The improvement plans shall provide post & cable fencing around basins as required by City of Rancho Cordova Drainage Maintenance and Planning staff.	Prior to approval of improvement plans	Public Works	
35.	All landscape corridor walls, where required, shall be designed of masonry construction using graffiti resistant materials. Wall design and materials shall be subject to City’s approval and according to the design standards of the Public Works Department.	Prior to approval of improvement plans	Public Works and Planning	
36.	The drainage impact fees shall be paid to the satisfaction of the City of Rancho Cordova’s Public Works Department.	Prior to approval of improvement plans	Public Works	
37.	**Drainage System Design:** The applicant shall submit and obtain City approval of plans and specifications for the construction of public improvements and all grading. The drainage system shall be designed in accordance with the approved Drainage Study to accommodate runoff from the ultimate development and shall meet Section 9 “Storm Drainage Design” of the City of Rancho Cordova’s Improvement Standards, construction standards, and Floodplain Management Ordinances in effect at the time of first submittal of the improvement plans, provided impacts to the site plan do not reduce total lot count for the project.	Prior to approval of improvement plans	Public Works	
38.	**Permits:** The applicant shall obtain applicable California Department of Fish	Prior to approval of improvement	Public Works	

	Conditions of Approval	Timing/ Implementation	Enforcement/ Monitoring	Verification (date and Signature)
	and Wildlife, U.S. Army Corps of Engineers, and other required state and federal permits.	plans		
39.	All development within the City must comply with the regulations of the Federal Emergency Management Agency (FEMA) and the City of Rancho Cordova Floodplain Management Ordinance. All new structures shall be protected from the 100-year (1 percent) flood event. Certified pad elevations (certified by a registered Civil Engineer or licensed Land Surveyor) shall be set at least one and two tenths foot (1.2') above all sources of 100-year flooding (see Section 9-1 of improvement standards). The overland release path must be shown on the plans and the hydraulic computation must be provided to estimate the flow depths along the overland release paths. The calculations must be in conformance with Section 9-15 Improvement Standards.	Prior to approval of improvement plans	Public Works	
40.	**Stormwater Quality– During Construction:** SWPPP –the applicant shall prepare a Storm Water Pollution and Prevention Plan (SWPPP) to be executed through all phases of grading and project construction. The measures included in the SWPPP shall be consistent with the City's Improvement Standards and Land Grading and Erosion Control Ordinance. The SWPPP shall be submitted to the State Water Resources Control Board for approval and to the City for review. During construction, the project applicant shall implement Best Management Practices (BMPs) in accordance with the SWPPP and the City's Improvement Standards. **General Construction Permit –** The project applicant shall file a Notice of Intent (NOI) to obtain coverage under the California State Water Resources General Construction Activity Storm Water Permit (General Construction Permit). Permits are issued by the State Water Resources Control Board, which can provide all information necessary to complete and file the necessary documents. Applicants shall comply with the	Prior to approval of improvement plans	Public Works	

	Conditions of Approval	Timing/ Implementation	Enforcement/ Monitoring	Verification (date and Signature)
	terms of the General Construction Permit, the City of Rancho Cordova Municipal Code, and the City's NPDES Permit Requirements.			
41.	**LAND DEDICATION / EASEMENTS:** All drainage courses and appurtenant access roads to be conveyed to the City shall be dedicated and conveyed in fee title as separate parcels. Underground pipelines and open channels shall be located in the public right-of-way or parcels to be conveyed to the City. Parcels to be conveyed shall be a minimum of 25 feet wide. The applicant shall provide minimum 16 foot wide maintenance service roads, consisting of 12 feet of pavement and 2 foot decomposed granite shoulders on each side, along the entire water course(s) to be conveyed. No conditional easements shall be placed on these drainage parcels.	Prior to issuance of Building Permits.	Public Works	
42.	To obtain sewer service, construction of SASD sewer infrastructure will be required. Current SASD Standards and Specifications apply to any offsite or onsite public sewer construction or modification. These improvements must be shown on the plans. Field modifications to new or existing precast manhole bases are not allowed.	Prior to Approval of Improvement Plans	SASD	
43.	SASD requires each building on each lot with a sewage source to have a separate connection to SASD's sewer system. If there is more than one building in any single parcel and the parcel is not proposed for split, then each building on that parcel must have a separate connection to a private onsite sewer line or a separate connection to the SASD public sewer line. These improvements must be shown on the plans.	Prior to Approval of Improvement Plans	SASD	
44.	Alignment of all main lines and structures must provide a minimum of 1 foot vertical clearance and 5 feet horizontal clearance from all other utilities and improvements. Sewer is to be located a minimum of 10 feet (measured horizontally) from any structure or footing.	Prior to Approval of Improvement Plans	SASD	

	Conditions of Approval	Timing/ Implementation	Enforcement/ Monitoring	Verification (date and Signature)
	Show public sanitary sewer and water supply facilities in accordance with the Health and Safety Code.			
Prior to Issuance of Building Permit				
45.	Applicant shall submit improvement plans to the satisfaction of the Public Works Department. Improvement plans shall include, but shall not be limited to, all streets, water, sewer, storm drain, lighting, signage and striping, utility undergrounding, and other associated facilities for all streets and other public areas depicted on the tentative map or tentative map phase.	Prior to issuance of Building Permits	Public Works	
46.	All existing overhead utilities shall be undergrounded:	Prior to issuance of the first building permit within a TM phase, model homes excluded	Public Works	
47.	Prior to issuance of the first building permit within a TM phase: All streets and improvements shown on the TM phasing plan, all streets necessary for access to the proposed homes, associated improvements included in the approved improvement plans, and other infrastructure as necessary for adequate public access and use shall be substantially complete to the satisfaction of the Public Works Department. Prior to occupancy all streets and improvements shown on the TM phasing plan shall be fully constructed and completed to the satisfaction of the City Engineer. When developer opens model homes to public visitation, any roads not suitable for public access shall be barricaded to the satisfaction of the Public Works Department.	Prior to issuance of the first building permit within a TM phase, model homes excluded	Public Works	

	Conditions of Approval	Timing/ Implementation	Enforcement/ Monitoring	Verification (date and Signature)
48.	The owner must contact Permit Services Unit at PermitServices@sacsewer.com or by phone at (916) 876-6100 to determine if sewer impact fees are due. Fees are to be paid prior to the issuance of building permits.	Prior to Issuance of Building Permit	SASD	
49.	Provide separate public water service to each parcel. All water lines shall be located within a right-of-way or within easements dedicated to SCWA. Easements shall be reviewed and approved by SCWA prior to Improvemetn Plan approval of Final Map approval.	Prior to Improvement Plans or Final Map	SCWA	
Prior to Acceptance of Improvements				
50.	Provide maintenance and operations manual for drainage basins. The manual shall include, but is not limited to: • As-built topography of the basin. • Cut and fill quantities. • Plat map. • Depth volume rating curve. • As builts for steel, concrete and other structures. • Inverts of inlets, outlets, etc. • Updated model based on as-built topography. • Document any sensitive resources.	Prior to acceptance of improvement plans	Public Works	
Prior to Final Inspection				
51.	During and upon completion of the installation of the landscaping for the project, the project landscape architect/designer shall certify that the installed landscape complies with the approved plans. Certification shall be accomplished by completion of site visits at key installation milestones. Key milestones at a minimum shall include:	Prior to final building inspection of the first unit	Public Works	

	Conditions of Approval	Timing/ Implementation	Enforcement/ Monitoring	Verification (date and Signature)
	rough grade, soil amendment verification, Plant material inspection, irrigation coverage test underdrain installation (as applicable) and final installation. Certification shall include signed site observation reports, photographs and documentation verifying implementation of soil report recommendations. Failure to submit complete and accurate documentation to the Planning Department will delay final approval/occupancy of the project.			
52.	Upon completion of the installation of the landscaping, the designer shall certify that the landscape complies with all city water conserving landscape requirements. Certification shall be accomplished by completion of a certificate of compliance on a form approved by the director of the city public works department. Failure to submit a complete and accurate certificate of compliance will delay final approval of the project and/or discontinue water service per RCMC 22.180.090. Upon receipt of the certificate of compliance and site inspection from City staff, the landscaping performance bond will be released.	Prior to final Building Inspection	Public Works	
53.	As-built reproducible grading and improvement plans (1 full size and 1 half size hard copy), as well as a compact disc containing said plans in AutoCAD and pdf format, and a GIS shape file, or equivalent to the satisfaction of the City Engineer shall be submitted and approved by the Public Works Department.	Prior to final building inspection	Public Works	

Advisory

1. SASD - The project has a conditionally approved Level 3 sewer study. Any changes to the sewer study may require an addendum.

2. SCWA – Water supply will be provided by the Sacramento County Water Agency.

3. SCWA - No water supply mains shall be located under structures such as box culverts and bridges. If the project will

build box culverts and bridges to the ultimate width, water mains shall cross above ground attached to the side of the structure. Structures shall be designed accordingly. If the ultimate width is not being built, water mains shall cross underground routed outside of and around the ultimate structure footprint. 15-foot wide water main easements shall be dedicated for the portion outside of ROW. The crossing shall be be approved by the Agency Engineer. Underground crossings and attachments to structures shall be included in the environmental impact analysis. Additional environmental permitting and other associated costs will be at applicant's expense.

4. SCWA - Destroy all abandoned wells on the proposed project site in accordance with the requirements of the Sacramento County Environmental Health Division. Clearly show all abandoned/destroyed wells on the improvement plans for the project. Prior to abandoning any existing agricultural wells, applicant shall use water from agricultural wells for grading and construction.

5. Prior to the issuance of any building permits for the project, the project developer/owner shall pay Zone 40 development fees applicable at the time of building permit issuance in accordance with Title 4 of the Sacramento County Water Agency (SCWA) Code.

6. Prior to the issuance of any building permits for the project, the project shall conform to the specific provisions of the City of Rancho Cordova Landscaping Ordinance (Municipal Code Title 23, Chapter 23.716).

CITY OF RANCHO CORDOVA

ORDINANCE NO. XX-2022

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA APPROVING DEVELOPMENT AGREEMENT FOR THE PRESERVE PROJECT

THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA DOES ORDAIN AS FOLLOWS:

Section 1. Recitals

A. In order to strengthen the public planning process, encourage private participation in comprehensive planning and reduce the economic risk of development, the Legislature of the State of California adopted Section 65864, et seq., of the Government Code (the "Development Agreement Statute"), authorizing the City, and any person having a legal or equitable interest in the real property, to enter into a development agreement and establish certain development rights in the property, which is the subject of the development project application. Pursuant to Government Code section 65868, Development Agreements may be amended by mutual assent of the parties.

B. The Preserve Project ("Project") is a residential development with parks/open space, trails, natural resources, and associated infrastructure and roads on an approximately 279-acre site in the City. The Project includes 439 residential units; and

C. In compliance with the requirements of the California Environmental Quality Act ("CEQA"), the City prepared an Environmental Impact Report for the Project ("EIR").

F. The property is owned by TDW Enterprises LP (referred to as "Landowner").

G. The Landowner has agreed to enter into a development agreement for The Preserve Project. The attached development agreement, attached hereto as Exhibit A ("Development Agreement").

H. On April 4, 2022, the City Council, pursuant to Resolution No. **-2022, certified the EIR, adopted mitigation findings pursuant to CEQA guidelines Section 15091, adopted a statement of overriding considerations, and adopted a mitigation monitoring program for the Project, which covered the attached Development Agreement.

I. On April 4, 2022, the City Council, as the legislative body for purposes of Development Agreement approval, held a properly noticed public hearing pursuant to Government Code section 65867, and considered all comments received, in writing, and all testimony received at the public hearing.

Section 2: Findings

On the basis of (a) the foregoing Recitals, which are incorporated herein, (b) The Preserve, (c) the City of Rancho Cordova's General Plan, (d) the Environmental Impact Report for The Preserve, and (e) on the basis of the specific conclusions set forth below, the City Council finds and determines that:

A. Finding: *The development agreement is consistent with the General Plan objectives, policies, land uses, and implementation programs and any other applicable Specific Plans.*
Evidence: The Development Agreement is consistent with the objectives, policies, general land uses and programs specified and contained in the City's General Plan. In accordance with Government Code section 65867.5(b), the Development Agreement vest the Landowners' right to proceed with development of the property. The Development Agreement does not amend or revise the development standards of the Rancho Cordova Municipal Code (RCMC). Therefore, the Development Agreement will be consistent with the General Plan if development under the RCMC is consistent with the City's General Plan. The findings and evidence to support this General Plan consistency determination are set forth in the project approval Resolutions. Furthermore, (a) the land use designation for The Preserve site allows for residential, parks/open space, and natural resources, (b) the project is consistent with the fiscal policies of the General Plan with respect to provision of infrastructure and public services, and (c) the Development Agreement includes provisions relating to financing, construction and maintenance of public facilities, park development fees and similar provisions.

B. Finding**:** *The development agreement is in conformance with the public convenience and general welfare of persons residing in the immediate area and will not be detrimental or injurious to property or persons in the general neighborhood or to the general welfare of the residents of the city as a whole.*
Evidence: As described above, the development agreement and the project it allows for, are consistent with the proposed General Plan Amendment and Zoning Code for this site and therefore the development agreement promotes the orderly development of property as well as the preservation of property values, as area properties and their values would be, in part, based on this exact use occurring on this site in the future.

C. Finding: *The development agreement will promote the orderly development of property or the preservation of property values*.
Evidence**:** As described above, the development agreement and the project it allows for, are consistent with the proposed General Plan Amendment and Zoning Code for this site and therefore the development agreement promotes the orderly development of property as well as the preservation of property values, as area properties and their values would be, in part, based on this exact use occurring on this site in the future.

D. Finding: The development agreement does not pertain to any property in the protected 200-year floodplain, unless the development agreement contains conditions that will provide an urban level of protection to the property consistent with California Government Code Section 65865.5.
Evidence: The Development Agreement does not pertain to any property in the protected 200-year floodplain.

E. **CEQA Compliance.** In compliance with the requirements of CEQA, the City prepared an EIR for The Preserve project. On April 4, 2022, the City Council adopted Resolution No. **-2022 certifying the EIR and adopting environmental findings, a statement of overriding consideration and a mitigation monitoring and reporting program for The Preserve Project approvals. Resolution No. **-2022 is incorporated herein by reference.

Section 3: Approval of Development Agreement.

The City Council hereby approves the Development Agreement, attached hereto as Exhibit A, in a form approved by the City Attorney, and authorizes the City Manager to execute the Development Agreement. The attached Development Agreement is as follows:

A. Development Agreement by and between the CITY OF RANCHO CORDOVA and TDW ENTERPRISES LP;

Section 4: Recordation.

Within ten (10) days after the Development Agreement is executed by the City Manager, the City Clerk shall submit the Development Agreement to the County Recorder for recordation.

Section 5: Severability.

If any section, subsection, clause or phrase of this Ordinance is for any reason held to be invalid or unconstitutional by the decision of a court of competent jurisdiction, it shall not affect the remaining portions of this Ordinance that can be given effect without the invalid provision and, to this end, the provisions of this Ordinance are severable. This City Council hereby declares that it would have adopted this Ordinance irrespective of the invalidity of any particular portion thereof and intends that the invalid portions should be severed and the balance of the Ordinance enforced.

Section 6: Publication and Effective Date.

Within fifteen (15) days after adoption, a summary of this Ordinance shall be published once in the Grapevine Independent or the Sacramento Bee, a newspaper of general circulation printed and published in Sacramento County and circulated in the City of Rancho Cordova, in accordance with Government Code section 36933. This Ordinance shall take effect and be enforced thirty (30) days after its adoption.

PASSED AND ADOPTED by the City Council of the City of Rancho Cordova this _____ day of _____, 2022, by the following vote:

AYES:

NOES:

ABSENT:

ABSTAIN:

DEVELOPMENT AGREEMENT

BY AND BETWEEN

THE CITY OF RANCHO CORDOVA

AND

TDW ENTERPRISES, LP, a California Limited Partnership and

Winn Development II, a California Limited Liability Company

RELATIVE TO THE PRESERVE PROJECT

DEVELOPMENT AGREEMENT
RELATIVE TO THE PRESERVE PROJECT

This Development Agreement ("Agreement" or "Development Agreement") is entered into as of this __ day of _____, 2022, by and between the CITY OF RANCHO CORDOVA, a municipal corporation ("City"), and TDW Enterprises, LP, a California Limited Partnership ("TDW") and Winn Development II, LLC a California Limited Liability Company ("Winn Development") (TDW and Winn Development are collectively referred to as "Developer"), pursuant to the authority of Government Code section 65864 et. seq., relating to Development Agreements. City and Developer are hereinafter collectively referred to as the "Parties" and singularly as "Party."

RECITALS

A. Authorization. To strengthen the public planning process, encourage private participation in comprehensive planning and reduce the economic risk of development, California Government Code section 65864, *et seq.* (the "Development Agreement Statute") and Rancho Cordova Municipal Code chapter 23.158, authorize the City and any person having a legal or equitable interest in real property to enter into a Development Agreement, establishing certain development rights in the Property which is the subject of the development project application.

B. Definitions. All capitalized terms as used herein are defined in Section 3 of this Agreement or otherwise herein.

C. Property. The subject of this Agreement is the development of those portions of the parcels of land consisting of approximately 98.9 acres located in the City of Rancho Cordova, County of Sacramento, depicted in **Exhibit A** and more particularly described in **Exhibit A-1** and Recitals D-F, inclusive, which collectively constitute the "Property" and have been entitled under the marketing name "The Preserve" (and referred to in this Agreement as the "Project"). At the time of approval of the Development Agreement, Developer owns some, but not all, of the Property, but provided that Winn Development acquires those additional parcels identified in Recitals E and F in fee title on or before December 31, 2022, and satisfies the conditions of Section 4.1.1, below, and completes lot line adjustments, all of the Property will be subject to this Agreement and Developer shall be bound by this Agreement. Developer represents that any and all other persons holding legal or equitable interests in the Property shall also be bound by this Agreement.

D. TDW Property. Developer owns in fee title the parcels identified by APN 073-0010-010 and APN 073-0010-011, consisting of approximately 115.27 acres, located in the City of Rancho Cordova, County of Sacramento (the "TDW Property"). Only the portion of the TDW Property constituting approximately 30.4 acres, which is more particularly described in **Exhibit B-1** and depicted in **Exhibit B-2** is within the collective definition of "Developer's Property," and shall be subject to the terms of this Agreement.

E. Whitlow Property. The David B. Whitlow Family 2015 Trust, Gurmeet Singh Dillon, and Satwant Singh Dhillon (collectively referenced as "Whitlow") own in fee title the parcel identified by APN 072-0300-005, consisting of approximately 41.5 acres, located in the City of Rancho Cordova, County of Sacramento (the "Whitlow Property"). Winn Development has an option to acquire the Whitlow Property and Winn Development intends to acquire the Whitlow Property in fee title after approval of the Entitlements and will succeed Whitlow as the owner of the Whitlow Property on or before December 31, 2022. Upon satisfaction by Developer of the conditions of Section 4.1.1, below, the portion of the Whitlow Property constituting approximately

35.7 acres and more particularly described in **Exhibit C-1** and depicted in **Exhibit C-2** will be considered within the definition of "Developer's Property," and shall be subject to the terms of this Agreement.

F. Divine Property. The David and Alaina Divine Family 1985 Revocable Trust ("Divine") own in fee title the parcel identified by APN 072-0300-002, consisting of approximately 41.29 acres, located in the City of Rancho Cordova, County of Sacramento (the "Divine Property"). Winn Development intends to acquire the Divine Property in fee title after approval of the Entitlements and will succeed Divine as the owner of the Divine Property on or before December 31, 2022. Upon satisfaction by Developer of the conditions of Section 4.1.1, below, the portion of the Divine Property constituting approximately 32.8 acres and more particularly described in **Exhibit D-1** and depicted in **Exhibit D-2** will be considered within the collective definition of "Developer's Property," and shall be subject to the terms of this Agreement.

G. Public Hearing and Approval of this Agreement. On _____, 2022, the City Council of the City of Rancho Cordova, serving as the City's planning agency for purposes of Development Agreement review pursuant to Government Code section 65867 and Rancho Cordova Municipal Code chapter 23.158, held a public hearing to consider this Development Agreement. Following the hearing, the City Council introduced City of Rancho Cordova Ordinance No. XX-2022 approving this Agreement. City approved Ordinance No. XX-2022 on _____, 2022.

H. Environmental Review. In compliance with the California Environmental Quality Act ("CEQA"), on _____, 2022, the City certified a Final Environmental Impact Report titled "[insert name of document]" pursuant to CEQA Guidelines Section 15090 (the "FEIR").

I. Development Agreement Ordinance. City and Developer have taken all actions mandated by, and fulfilled all requirements set forth in, Rancho Cordova Municipal Code chapter 23.158, the Development Agreement Ordinance of the City of Rancho Cordova.

J. Consistency with General Plan. Having duly examined and considered this Development Agreement and having held properly noticed public hearings hereon, in City Ordinance No. XX-2022, City found that this Development Agreement satisfies Government Code section 65867.5 and section 23.158.060.A of the Rancho Cordova Municipal Code because this Agreement is consistent with the requirements of the City of Rancho Cordova General Plan.

K. Negotiations. The Parties have, in good faith, negotiated terms set forth in this Development Agreement, which terms are intended to carry out the legislative purposes of the Development Agreement Statute and Rancho Cordova Municipal Code chapter 23.158, and which provide for the mutually desirable development of the Property.

AGREEMENT

1. Incorporation of Recitals. The preamble, the recitals, all defined terms set forth herein, and all exhibits attached hereto, are hereby incorporated into this Development Agreement as if set forth herein in full.

2. **Relationship of City and Developer**. This Development Agreement is a contract that has been negotiated and voluntarily entered into by City and Developer. Neither Party is an agent of the other Party. City and Developer renounce the existence of any form of joint venture or partnership between them. Nothing contained in this Agreement, or in any document executed in connection with this Agreement, may be construed as making City and Developer joint venturers or partners.

3. **Definitions**.

"CC&R Enforcement" means enforcement by a Homeowners Association, a Property Owners Association and/or the City, of covenants, conditions, and restrictions that are recorded against the single family portions of the Property to protect, preserve, and maintain the appearance, condition, and compatibility with residential neighborhood uses as allowed by the Rancho Cordova Municipal Code for single family development.

"City CCI Index" means the construction cost index applied by City in Section 6.1 authorizing the subject fee, assessment, or tax to adjust fees to account for changes to the costs of construction as published by the Engineering News Record, and as may be revised by the City for such Fees.

"City CPI Index" means the consumer price index applied by City in Sections 6.2, 7.2.6 and 8 authorizing the subject fee, assessment, or tax to adjust for changes in the costs of performing and/or providing municipal services as published by the United States Department of Labor Bureau of Labor Statistics.

"City Council" means the City Council of the City of Rancho Cordova.

"Community Places Fee" means the Community Places Fee that the Developer agrees to pay under Section 6.1.(iii).

"Community Renovation Fee" means the Community Renovation Fee that the Developer agrees to pay under Section 6.2.

"CRPD" means the Cordova Recreation and Park District.

"Developer's Property" is the Property subject to this Agreement, with legal descriptions attached as Exhibits B-1, C-1 and D-1 and depicted in Exhibits B-2, C-2 and D-2.

"EDU" means the single-family residential equivalent dwelling unit, as applied within the context of the applicable improvement, facility, or service. All other land uses are assigned EDUs based on their relative impact compared to a single family unit with respect to the applicable improvement, facility, or service.

"Effective Date" of this Development Agreement means the effective date as determined under Section 4.1.1 of this Agreement.

"Entitlements" means (a) a General Plan Amendment; (b) zoning amendment; (c) a large lot tentative subdivision map; (d) small lot tentative subdivision map; (e) the FEIR and all CEQA findings and statement of overriding considerations, if any, all as approved by the City on XX by Ordinance XXXX and on XX by Resolution XXXX (f) this Development Agreement, approved by City on XX, by Ordinance No. XX (the "Adopting Ordinance").

"Exactions" shall have the meaning set forth in Section 5.7 of this Agreement.

"General Plan" means the City of Rancho Cordova General Plan, including all appendices thereto, approved by City and in effect as of the Effective Date of this Agreement.

"Homeowners Association" means an association of owners within the portions of the Property zoned for single family use, if one is formed and operated, in part, to provide CC&R Enforcement.

"Park Development Fee" means the Park Development Fee that the Developer agrees to pay under Section 6.1(iii).

"Project" means the planned development of the Property pursuant to the Entitlements, which was approved under the marketing name of "The Preserve."

"Property" means the land described by legal description in Exhibits A-1 through D-1 and depicted in Exhibits B-2 through D-2.

"Public Facilities" means the public facilities owned by the City or other public agency.

"Subsequent Entitlements" mean those additional permits, plans, and approvals that may be approved following approval of the Entitlements, and which will allow for implementation of the Entitlements by subdivision, development and construction within the Project. Subsequent Entitlements may include, without limitation, small lot tentative subdivision maps, small lot final subdivision maps, parcel maps for non-residential areas, lot line adjustments, conditional use permits, and design review permits.

4. Term and Termination.

4.1 Term.

The term of this Development Agreement commences on the Effective Date and extends for a period of twenty (20) years from the Effective Date, unless said term is terminated, modified, or extended as provided herein. This Development Agreement automatically terminates upon expiration of the 20-year term unless otherwise extended by the Parties, and shall then be of no further force and effect. If and when this Development Agreement expires, Developer shall thereafter retain no vested rights under this Development Agreement, and City shall have the right to modify or repeal the Entitlements and apply new laws, regulations, and fees to the development of the Property subject to any other vested rights that may exist under common law.

4.1.1 The Adopting Ordinance shall provide that the Effective Date occurs on the later date on which Winn Development acquires fee title to the Whitlow Property and the Divine Property. If Developer fails to acquire fee title to the Whitlow Property and the Divine Property prior to December 31, 2022, the terms of this Agreement shall be null and void without further action by either Party. This Agreement is not effective as to the underlying landowners of the Whitlow Property and the Divine Property (identified in Recitals E and F), and said underlying landowners shall have no rights or obligations under this Agreement. In the event of a legal challenge to the Adopting Ordinance, the Entitlements or the EIR, the deadline for acquisition of the Whitlow Property and Divine Property shall be extended by the same number of calendar days necessary to resolve the legal challenge in favor of the City and Developer, subject to the maximum three (3) year extension provided under Section 4.3.

4.2 Tolling and Extension During Legal Challenge or Moratoria. Developer may, at its discretion, extend the term of this Development Agreement for a maximum period of three (3) years if:

4.2.1. a lawsuit is filed by an entity or party that is not a Party to this Agreement challenging any of the Entitlements or if Developer is unable to undertake development of the Project due to the imposition by the City or other public agency of a development moratorium for imminent health or safety reasons unrelated to the performance of Developer's obligations under this Agreement;

4.2.2. the Developer is unable to proceed, or reasonably elects not to proceed with the Project because of litigation described in Section 4.2.1 above; and

4.2.3. the Developer submits to City written notice that this Agreement is tolled.

During any such period that this Agreement and development of the Project are being tolled by Developer, Developer may, at its sole expense and risk, submit applications to process Subsequent Entitlements, including but not limited to tentative subdivision maps and improvement plans for the Property, provided City shall not be obligated to approve and may defer approval of any final subdivision maps, improvement plans, or building permits for the Property during any such tolling period.

4.3 Length of Extension. The tolling period will begin when City receives written notice from the Developer. The tolling period may only extend the term of this Agreement until a final order of judgment is issued upholding the challenged Entitlements, the case is dismissed, a moratorium on development is terminated by the City or other public agency, or the three (3) year maximum tolling period is reached, whichever is shorter. The Developer may also elect to end the tolling period at any time and proceed with the Project at its risk, effective upon delivery of written notice to City.

5. Vested Rights. The Developer shall have the vested right to proceed with development of the Property in accordance with the Entitlements, and to have Subsequent Entitlements considered for approval or denial, based upon the terms, standards and requirements set forth in the Entitlements. City agrees that it shall not use its authority in considering any application for a Subsequent Entitlement to change the policy decisions reflected by the Entitlements. Except as provided in this Section 5, below, this Agreement does not vest Developer's rights to pay development impact fees, Exactions, processing fees, inspection fees, plan check fees, or other permit processing fees or charges.

5.1 Permitted Uses, Density and Intensity, Maximum Height and Size of Structures, and Reservation or Dedication of Land Vested. The permitted uses of the Property, the density and intensity of use, the maximum height and size of proposed buildings, set-backs, provisions for reservation or dedication of land or payment of fees in lieu of dedication for public purposes, the location and maintenance of on-site and off-site improvements, the location of public utilities, and other terms and conditions of Development shall be those set forth in the Entitlements, including the approved Small Lot Subdivision Map layouts showing the intended total units to be Developed and any designated acreages of the proposed land uses.

5.2 Vested Against Moratorium, Quotas, Restrictions or Other Growth Limitations. Subject to applicable law relating to the vesting provisions of Development

Agreements, City agrees that, except as otherwise provided in or limited by the provisions of this Agreement, this Development Agreement vests the Entitlements against subsequent City ordinances, resolutions, rules, regulations, initiatives, and official policies and orders that directly or indirectly limit the rate, timing, or sequencing of Development, or prevent or conflict with the permitted uses, or the density or intensity of uses, or the terms, provisions, standards, or requirements for Development, as set forth in the Entitlements. To the extent allowed by the laws pertaining to development agreements, however, Developer will be subject to any growth limitation ordinance, resolution, rule, regulation, policy or order which is adopted on a uniformly applied, Citywide or area-wide basis, and directly concerns an imminent public health or safety condition, in which case City shall treat in a uniform, equitable, and proportionate manner all properties, public and private, which are impacted by that public health or safety issue.

5.3 Vested Rights Exclude Design and Construction. All ordinances, resolutions, rules, regulations, initiatives, and official policies governing design, improvement, and construction standards and specifications applicable to the Project, and to public improvements to be constructed by the Developer shall be those in force and effect at the time the applicable permit approval is granted, unless such ordinances, resolutions, rules, regulations, initiatives or official policies are inconsistent with the Entitlements or the specific terms of this Agreement, in which case the Entitlements and the terms of this Agreement shall prevail.

5.4 Vested Rights Exclude Changes in State or Federal Law. This Agreement shall not preclude the application to Development of the Property of changes in City laws, regulations, plans or policies, the terms of which are specifically mandated and required by changes in state or federal law or regulation. In the event that state or federal laws or regulations enacted after the Effective Date of this Development Agreement prevent or preclude compliance with one or more provisions of this Agreement or any Entitlements, such provisions of the Agreement shall be modified or suspended insofar as it is necessary to comply with such state or federal laws, regulations, plans, or policies. Any such amendment or suspension of this Agreement or Entitlements shall be approved by the City Council in accordance with the Municipal Code and this Agreement.

5.5 Vested Rights Exclude Building and Fire Codes. The Project shall be constructed in accordance with all applicable local, state, and federal building codes and standards, including the Building, Mechanical, Plumbing, Electrical, and Fire Codes, City standard construction specifications, and Title 24 of the California Code of Regulations (collectively “Building Code”), in effect at the time the applicable building, grading, encroachment or other construction permit is granted for the Project. If no permits are required for infrastructure improvements, such improvements will be constructed in accordance with the provisions of the Building Code in effect at the time of approval by City of the improvement plans for such infrastructure. If a permit that has been granted expires, the Project shall be required to be constructed in accordance with the provisions of the Building Code in effect at the time the applicable replacement permit to the expired building, grading, encroachment or other construction permit is granted for the Project.

5.6 Vested Rights Exclude Processing Fees and Charges. Developer shall pay those processing, inspection, and plan check fees and charges required by City under ordinances, resolutions, rules, regulations, initiatives, and official policies which are in effect when such fees or charges are due under then-existing code or policy.

5.7 Vested Rights Limited for Development Impact Fees, Exactions and Dedications. Developer shall pay all development impact fees, connection or mitigation fees, and Exactions required by City to support the construction of any public facilities and improvements or

the provision of public services in relation to Development of the Property (together "Exactions") authorized by City after the Effective Date, as long as said Exactions otherwise comply with applicable law, and are either (i) required on a Citywide basis, (ii) apply uniformly to all properties within City that are zoned with density and uses similar to those of the subject properties in the Entitlements, or (iii) apply on a fair share basis to all properties that are similarly situated within the portions of the City where new development is occurring. Except as otherwise provided in this Agreement, Exactions required by City to be paid by Developer that do not meet one of the preceding criteria shall only be the Exactions that were authorized on the Effective Date or which have been identified in the Conditions of Approval. Furthermore, notwithstanding anything to the contrary in this Section 5.7, in consideration of Developer's obligations under Section 8 hereof to pay an affordable housing fee, development of the Property shall not be subject to any impact fee, mitigation fee, or exaction related to the provision of affordable housing or inclusionary housing, or other such fee or exaction related to the provision of affordable housing or inclusionary housing that may be subsequently adopted by City during the period that this Section 5.7 is vested by this Agreement.

5.8 Subsequent Entitlements. Subject to Section 12 hereof, City shall accept for processing, review, and action any and all applications submitted by Developer for Subsequent Entitlements, necessary or convenient for the exercise of Developer's rights under the Entitlements for the use and development of the Property.

5.9 Term of Tentative Maps. Consistent with the authority provided in Government Code section 66452.6(a)(1), the term of any tentative subdivision map approved for all or any portion of the Property shall be the later of the date this Agreement expires (including any extensions) or the date on which the tentative map expires pursuant to City approval of the tentative map pursuant to the City of Rancho Cordova Municipal Code, including without limitation Section 22.20.060 ("Expiration of Tentative Map Approval"), as it may be modified from time to time by state law.

5.10 CC&R Enforcement and Property Maintenance Code. Developer agrees to establish, with input and direction from the City, to record covenants, conditions and restrictions ("CC&Rs") against the individual parcels within the Project upon sale that will protect, preserve, and maintain the appearance, condition, function and operation of the single family home development in a similar manner to the City's Property Maintenance Code within Sections 16.18.1700 through 16.18.1709 of the City's Municipal Code, as may be amended from time to time. City may impose a condition, as part of Subsequent Entitlements, for the Developer to include a copy of the Property Maintenance Code as part of individual home sale documents. City may impose a condition, as part of Subsequent Entitlements for single family development, for the Developer to establish a mechanism acceptable to City to provide for CC&R Enforcement within the single family portions of the Property by Developer and/or a Homeowners Association. The City shall be a third-party beneficiary to the duties and covenants imposed by the CC&Rs and shall be entitled to, without obligation take appropriate legal action to enforce the duties and covenants. If an action is commenced, the City shall be entitled to recover costs including reasonable attorney's fees.

6. Park Development Fee and Community Places Fee Obligations.

6.1. Park Development Fee and Community Places Fee.

(i) Dedication of Park Land and In-Lieu Fee:

Developer's obligation is to dedicate 6.48 acres of park land to CRPD pursuant to California Government Code Section 66477 (the "Quimby Act") and Municipal Code Section 22.40.035(A) and (C), calculated by 439 EDU x 0.01475 (factor). The Quimby Act requirement shall be fully satisfied by the dedication of 8.65 acres of neighborhood park land, with the park land to be dedicated depicted on **Exhibit E**. Pursuant to Municipal Code Section 22.40.025, the City Council has determined that Cordova Parks and Recreation District ("CRPD") is the appropriate local agency for conveyance of the park land and CRPD has concurred in the calculation of required park land and also to accept the dedication of park land. City acknowledges that the terms related to dedication of the park land as between Developer and CRPD will be memorialized in a Park Development Agreement between Developer and CRPD, except for the Park Development Fee identified in Section 6.1(iii), no additional park land or park land in-lieu fee is owed by Developer for Development of the Project.

(ii) Dedication of Open Space Land and In Lieu Fee:

Developer is dedicating approximately 10.22 acres of City Open Space, consisting of Community Places and Green Infrastructure, as defined in the City's Open Space Guidelines and as depicted on **Exhibit F**. This dedication shall satisfy Developer's obligation to dedicate 1.295 acres of Community Places and any other Green Infrastructure land dedication requirements under the City's Open Space Guidelines (calculated by 439 EDU x 0.00295 (factor) (amount of land dedication as determined by Rancho Cordova General Plan and Open Space Guidelines). City acknowledges that no additional open space land dedication or open space in lieu fee is owed by Developer for Development of the Project

(iii) Park Development Fee and Community Places Fee:

In addition to the dedication of park land as required under the Quimby Act, the Developer will pay a Park Development Fee in the amount of $11,473.50 per Single Family EDU and a Community Places Fee in the amount of $1,641.89 per Single Family EDU when each building permit for residential development is issued within the Project. In the event Developer constructs the neighborhood park, the Park Development Fee will be reduced through the application of credits to reflect Developer construction of the neighborhood park within the Project, pursuant to the term of a Park Development Agreement between CRPD and the Developer. The Park Development impact fee credits will be determined in accordance with the provision of Section 6.3 of this Agreement. Pursuant to the terms of a future Credit Agreement with the City, the Community Places Fee payable to the City may also be reduced to reflect Developer Turnkey Construction of neighborhood green or other community places amenities as agreed upon by the City.

(a) The Park Development Fee and the Community Places Fee will be adjusted on January 1, 2023, and annually thereafter no later than January 15th by the method provided in City CCI Index as follows: A "mean" index will be computed by averaging the index for 20 U.S. cities with the index for San Francisco by resort to the October issue of the Engineering News Record magazine Construction Cost Index of the year in which the calculation is being made.

(b) An adjustment factor shall be computed by dividing the "mean" index as calculated in subsection (a) of this section by the "mean" index for the previous October.

(c) The adjusted Park Development and Community Places Fees shall be calculated by multiplying the adjustment factor, as calculated in subsection (b) of this Section, by the Park Development and Community Places Fees in place prior to the annual adjustment.

(d) Payment of the Park Development Fee and Community Places Fee shall be calculated subject to Fee Credits that may be owed to Developer pursuant to Section 6.3.

Except as provided in Section 5.7, no additional Park Development Fee or Community Places Fee shall be owed by Developer for Development of the Project.

6.2. Community Renovation Fee. Developer agrees that it shall pay City the total sum of $1,291.09 for each single family dwelling unit (the "Community Renovation Fee"); provided that the Community Renovation Fee shall not be paid for any unit constructed on any parcel dedicated to the City for affordable housing uses, if any. Beginning January 1, 2023, the Community Renovation Fee shall be adjusted annually on each January 1 based upon City CPI Index. The Community Renovation Fee shall be paid to City upon issuance of a building permit for each residential unit within the Property. It shall be used by City, at its sole discretion, to acquire, renovate, repair, improve, or maintain community facilities, parks, neighborhood greens, or other public land or facilities in the City. This payment is made voluntarily by Developer. It is paid in addition to all other existing park and commmunity places fees, and construction and dedication obligations, including without limitation any fees paid pursuant to the Quimby Act, and the Park Development and Community Places Fees described in Section 6.1 above. Developer agrees that it shall not claim any credit against or right to reimbursement from any other existing park fees, and construction and dedication obligations, including Quimby Act fees, or the Park Development and Community Places Fees as a result of paying the Community Renovation Fee required under this Section 6.2. The City Council may, at any time, elect to terminate or reduce this obligation to pay the Community Renovation Fee, which termination shall not require an amendment of this Agreement.

6.3 Credits for Construction of Park and Recreational Improvements or Neighborhood Green or Community **Places Amenities.**

(i) Park Development Fee Credits. If Developer construct(s) park and recreational improvements to the land dedicated or provide(s) equipment for park and recreational facilities, the Park Development Fee will be reduced to reflect the construction of the park and recreational improvements or provision of equipment and Developer shall be entitled to Park Development Fee Credits. The amount of Park Development Fee Credits shall be determined in accordance with the provisions of Municipal Code Section 22.40.085, shall be subject to the same annual adjustments set forth in Section 6.1(iii)(a)-(c) of this Agreement, and shall be available to Developer, only, and not applied generally to reduce the overall cost of improvements or fees paid generally for Park Development. Developer shall not be obligated to construct park and recreational improvements or to provide park and recreational equipment and in no event shall Developer be required to construct improvements or provide equipment in excess of the Park Development Fee obligation stated in this Agreement.

(ii) Community Places Fee Credits. Pursuant to the terms of a future Credit Agreement with the City, the Community Places Fee payable to the City may also be reduced to reflect Developer Turnkey Construction cost for the facilities built within the City Community Places parcels. The maximum credit provided to the Developer pursuant to the Credit Agreement shall not exceed the total amount of Community Places Fees paid by the Developer. No credits or reimbursements from any source other than the Community Places Fees paid by the Developer shall be provided to the Developer.

(iii) Credit Agreements. City and Developer shall enter into a separate Credit and Reimbursement Agreement to memorialize the terms of any Community Places Fee Credits under this Section. CRPD and Developers shall enter into a separate Park Development Agreement to memorialize the terms of the Park Development Fee Credits, which credits shall be available to Developer upon posting of a bond to cover the cost of all improvements to be constructed by Developer(s).

7. Infrastructure and Maintenance Finance.

7.1 Infrastructure Finance. Prior to approval of a final Small Lot Subdivision Map, or for residential properties that do not require subdivision, prior to issuance of building permits, City and Developer will cooperate to establish one or more of what are collectively referred to herein as the "Infrastructure Finance Mechanisms": Community Facilities Districts, ("CFD(s)") pursuant to and as authorized by Government Code sections 53311 et seq., the Statewide Community Infrastructure Program ("SCIP") (or other similar program established by the California Statewide Community Development Authority), the Bond Opportunities for Local Development ("BOLD") program (or other similar program through the California Municipal Finance Authority), or other public finance programs that may be available in the future to fund necessary Backbone Infrastructure, Public Facilities, and/or Development Impact Fees. City and Developer shall cooperate with the formation of the Infrastructure Finance Mechanisms, and shall take related actions as follows:

(i) Developer, in its sole and exclusive discretion, shall have the right from time to time to request City to establish one or more Infrastructure Finance Mechanisms to finance Project infrastructure, including without limitation roadway, drainage, landscape, utility, open space and/or park improvements, and/or the Impact Fees related thereto ("Public Improvements"). Upon receipt of such Developer request, City shall implement such requests subject to applicable state and federal law and other controlling laws.

(a) City's participation in forming any Infrastructure Finance Mechanisms (and the operation thereafter) and in issuing any debt in connection therewith ("Project Debt" and/or "Bonds") approved by City shall include all of the usual and customary municipal functions associated with such tasks, including without limitation, the formation and administration of special districts, the issuance of land secured debt financing, the monitoring and collection fees and taxes, the creation and administration of agency funds, the enforcement of debt obligations, and other functions or duties authorized or required by the laws, regulations, or customs relating to such tasks.

(b) There shall be no limitation on the number or kinds of Infrastructure Finance Mechanisms used on the Project/Property so long as the applicable public finance mechanisms comply with the City's guidelines adopted by Resolution 162-2018 in effect at the time of approval of the financing. Additionally, when allowable, City shall specify that any and all apportionments may be based on land uses rather than benefits received, so that such

apportionment can consider and take into account market acceptance, feasibility, and affordability.

(c) Establishing any Infrastructure Finance Mechanism to finance the construction of Public Improvements, the payment of impact fees and/or land secured debt financing shall be initiated upon the request of Developer in connection with the Development of any phase of the Project, or by City in cooperation with Developer. In such regard, Developer shall submit to City the phasing plan for any facilities to be financed, including without limitation, the priority and financing needs related to such Public Improvements and the type of Infrastructure Finance Mechanism that Developer desires, and phases and Bond issuance related thereto, which Developer elects to use for specified purposes at the earliest possible time.

(ii) As required by applicable law, City may be required to enter into one or more joint community facilities agreements or other comparable agreements with other government entities that will own or operate any of the Public Improvements to be financed by an Infrastructure Finance Mechanism for the Project. The City and Developer agree that they shall take any and all steps necessary to procure the authorization and execution of any required joint community facilities agreement or other comparable agreements before issuance of any Infrastructure Finance Mechanism or other Bonds that finance the construction or acquisition of Public Improvements to be owned or operated by such other governmental entities.

(iii) Developer's request shall be made to the City in written form and shall outline the purposes for which the Infrastructure Finance Mechanism through and/or Project Debt will be established or issued, the general terms and conditions upon which it will be established or issued, the specific list of Public Improvements, and a proposed timeline for its establishment and/or issuance. Said Developer request shall include the substantive provisions to be included in the Rate and Method of Apportionment ("RMA") or other applicable implementation provision for the Infrastructure Finance Mechanism, as well as the relevant and analogous information as required by applicable law. City's consideration of Developer's request shall be consistent with the requirements of this Development Agreement.

(iv) Regardless of the number or kind of Infrastructure Finance Mechanisms used on the Project/Property, the "Special Tax Rate" established for said CFD(s) in conjunction with special tax rates/assessment established for City services (as reflected in Section 7.2 of this Development Agreement) shall not cause the total tax burden on taxed property to exceed 1.75% of the estimated sales price of a dwelling unit to be constructed unless a greater amount is mutually agreed upon by the City and Developer. The sales prices shall be determined in conjunction with an absorption study or appraisal prepared for the CFD at the time of preparation of the RMA.

(v) Based on the phasing plan submitted to the City, the Developer shall have the right to identify the initial and each subsequent phase as a different improvement area of an Infrastructure Finance Mechanism ("Improvement Area") or a future annexation area ("Future Annexation Area") under the applicable law for that Infrastructure Finance Mechanism. The City has determined that the Public Improvements benefit the area burdened by the Infrastructure Finance Mechanism and each Improvement Area as a whole, and therefore, any of the Public Improvements may be financed in any Improvement Area without regard to the specific benefit to such Improvement Area or Future Annexation Area.

(vi) The Parties agree that in the event Infrastructure Finance Mechanism(s) are established, Developer shall have the ability to establish an annual increase of the Special Tax

Rate or other applicable tax rate in an amount increasing no more than 2% per annum and as described by the RMA, or other applicable implementation provision for the Infrastructure Finance Mechanism.

(vii) The appraised or assessed value-to-lien ratio for any Bond issue for an Infrastructure Finance Mechanism will be four to one (4:1) unless a lesser amount is mutually agreed to by City and Developer. City shall not require Developer or any property owner within the CFD(S) to provide a Letter of Credit or other credit enhancement as security for the payment of special taxes in the CFD.

Contemporaneously with the formation of an Infrastructure Finance Mechanism, Developer and City shall execute an acquisition and funding agreement ("Acquisition Agreement") that shall apply to the acquisition and construction of the Public Improvement for each and every Improvement Area. The Acquisition Agreement shall be structured so that it is automatically applicable to any financing by special taxes levied in, or bonds issued for a subsequent phase annexed into its respective Improvement Area of the Infrastructure Finance Mechanism, without requiring any modifications to the Acquisition Agreement or any further approvals by the City.

7.2 Maintenance and Service Finance Mechanisms. Prior to approval of a final Small Lot Subdivision Map, or for residential properties that do not require subdivision, prior to issuance of building permits, City and Developer will complete all actions needed to form, annex into, and/or implement the funding mechanism(s) that have been identified in this Agreement, only, and which includes financing districts and special taxes that have been identified in this Agreement, only, to pay to maintain existing and new public improvements associated with or needed to serve the Project. Developer shall participate in, vote in favor of, and pay all costs incurred by City associated with such actions consistent with this Agreement and the Entitlements. The amount of special taxes or assessments to be included in each new maintenance or services district referred to herein shall not exceed the amounts reasonably determined by City during the formation of such finance district to fund the operations, maintenance, and/or services to be financed thereby. The provisions of this Section 7.2, including all subsections, apply only to the maintenance of improvements that are not included for maintenance in a private Homeowner's Association.

The following is the list of funding mechanisms for maintenance and services:

7.2.1. Annexation into Street, Lighting and Landscape Maintenance. Developer and City agree that the Developer will participate in or provide a funding mechanism for maintenance services for the fair share of existing and all new public improvements associated with the Project, including, but not limited to, streets, bridges, culverts, traffic signals, traffic signs, striping and legends, intelligent transportation systems (ITS) operations, streetlights and safety lights, and landscape maintenance for public frontage and medians. This may be accomplished through annexation to the City's Community Facilities District No. 2014-2 (Street, Lighting and Landscape Maintenance), or other financial mechanism as may be proposed and provided by the Developer for the same purpose of providing a financial mechanism to fund the operation and maintenance of the Project's public improvements. If the Developer does not provide another financial mechanism, prior to the recordation of the final Small Lot Subdivision Map, Developer will support the annexation of the Project into CFD 2014-2, and cover the Developer's fair share costs of the CFD annexation currently estimated at Five Thousand Dollars ($5,000) per annexation.

7.2.2 Park Maintenance. Developer and City agree that the Developer will participate in or provide a funding mechanism for maintenance services for the Project's associated fair share financial impacts to the operation, maintenance, and capital replacement of existing and proposed public parks that are maintained by CRPD. This may be accomplished through annexation to the appropriate Communities Facilities District for park maintenance, or other financial mechanism as may be proposed and provided by the Developer for the same purpose of providing a financial mechanism to fund the operation and maintenance of the Project's public park improvements. If the Developer does not provide another financial mechanism, the Developer will support the annexation of the Project into the appropriate CFD for park maintenance and cover the Developer's fair share costs of the CFD annexation currently estimated at Seven Thousand dollars ($7,000) per annexation.

7.2.3. Community Places and Neighborhood Greens Maintenance. Developer and City agree that the Developer will participate in or provide a funding mechanism for maintenance services for the Project's associated fair share impacts to the operation and maintenance community places and Neighborhood Greens. This may be accomplished through annexation to the City's Communities District No. 2018-2 (Community Places and Neighborhood Greens), or other financial mechanism as may be proposed and provided by the Developer for the same purpose of providing a financial mechanism to fund the Project's associated fair share financial impacts to the operation and maintenance of the Project's public community places and Neighborhood Green improvements. If the Developer does not provide another financial mechanism, the Developer will support the annexation of the Project into CFD 2018-2 (Community Places and Neighborhood Greens), and cover the Developer's fair share cost of the CFD annexation currently estimated at Five Thousand Dollars ($5,000) per annexation.

7.2.4. Annexation into Stormwater Utility Fee. The Developer will participate in or provide a funding mechanism for maintenance services for the Project's stormwater drainage and flood protection system. This will be accomplished through annexation to the City's Stormwater Utility Fee District. Prior to recordation of the final Small Lot Subdivision Map, Developer shall support the annexation and cover Developer's fair share costs of the annexation, currently estimated at Seven Thousand Dollars ($7,000) for the annexation. The base year FY 2020/2021 rate for the Stormwater Utility Fee is $134.93 per single family residential unit. The annual tax or fee will be adjusted annually per the method described in the CFD.

7.2.4.1 Enhanced Stormwater Utility Fee Zone. The Project is required to install low impact development measures (LID) for stormwater management pursuant to the City's state stormwater permit. Prior to recordation of the final Small Lot Subdivision Map, the Developer shall, to the satisfaction of the Public Works Director, either (i) annex into and approve a fee for a new zone in the City's Stormwater Utility Fee District that shall provide LID maintenance services in the Property, or (ii) establish another financial mechanism to provide LID maintenance services in the Property.

7.2.5 Transit Services Funding. The Developer will participate in the provision of a funding mechanism for transit-related services. This may be accomplished by annexation to the City's Transit Related Services Special Tax Area by voting to approve a special tax for the parcels created for this subdivision approval, or other financial mechanism as may be proposed and provided by the Developer for the same purpose of providing a funding mechanism to fund transit-related services. The tax shall be the per parcel annual amount as specified in an approving ordinance (with appropriate annual inflation adjustment) as established at the time of voting by the City Council. The election to provide for the tax shall be completed prior to the recording of the final map. Costs associated with the annexation and election of the annual tax

shall be borne by the Developer through payment of the annexation costs currently estimated at Five Thousand Dollars ($5,000) per annexation.

7.2.6. Annexation into CFD No. 2013-2 (Police Services). Prior to recordation of the first final Small Lot Subdivision Map, or for residential properties that do not require subdivision, prior to issuance of building permits, the Developer shall support the annexation of the Project into CFD No. 2013-2 (Police Services) and cover Developer's fair share costs of the CFD annexation, currently estimated at Five Thousand Dollars ($5,000) for the annexation. City agrees that the CFD will provide that on lands designated for all residential land use categories, the base year FY 2021/2022 Police Maximum Services Special Tax shall be $594.72 annually per residential dwelling unit, including multi-family units (if any). The special tax imposed by the CFD will be payable on a parcel within the Property only after a building permit has been issued by City for the construction of a building on that particular parcel, and there will be no undeveloped land tax imposed by the CFD. The CFD shall further provide that on each July 1 commencing July 1, 2022, the base year Police Special Tax shall be escalated by the increase, if any, in the City CPI Index. However, in no event shall the tax per parcel for any fiscal year be less than the amount established for the prior fiscal year. The CFD shall specify that the Police Special Tax shall commence being payable annually following the issuance of a building permit for each parcel subject to the Police Special Tax.

The Developer acknowledges that no final Small Lot Subdivision Map, or for residential properties that do not require subdivision, prior to issuance of building permits, shall be submitted to City for approval prior to annexation of the Property to the Police Services CFD; provided Developer may at its own risk, process and obtain approvals of any tentative subdivision maps for the Property and submit applications for and process, but not obtain final approval of, any final subdivision maps and improvement plans related thereto.

7.2.7. Amounts and Effect of Alternative HOA Maintenance. If and to the extent Developer proposes and City approves that a Homeowners Association that includes the Property may perform any of the maintenance obligations that would otherwise be performed by the districts described in sections 7.2.1, 7.2.2 or 7.2.3 above, the applicable maintenance financing districts shall include a mechanism whereby the amount of the special taxes or assessments to be levied thereby shall be credited by the savings to be realized by the districts from the performance of such maintenance obligations by the Homeowners Association and the relieving of the districts from having to perform such maintenance obligations. This provision is subject to the reasonable discretion of the City that the performance by the Homeowners Association is adequate. City shall defer the annexation of the Property into an assessment district so long as City is assured of the adequacy of the performance thereof by the Homeowners Association.

7.2.8. Special Taxes. Provided that City has provided Developer with budgets for the maintenance services to be provided and Developer has no objections to those budgets, after formation of the assessment districts described in this Section, Developer agrees that it will not vote to repeal or amend any of the special taxes being imposed in the amounts or as set forth above in Sections 7.2.1 through 7.2.6, inclusive. In the event Developer objects to any special tax referenced in Section 7.2.1 through 7.2.6, inclusive, after the formation of the applicable assessment districts and during the term of this Agreement, Developer shall have the opportunity to meet and confer with City about the reasons for the objection and shall also have an opportunity to be heard by the City Council on any objections. If the City Council overrules those objections, the Developer may seek relief from a court of competent jurisdiction for continued payment of the special tax that is the subject of the objection. If, after exhausting all

such remedies, a Developer continues to fail to pay the special tax, City shall be entitled to those remedies allowed for in Sections 7.2.1 through 7.2.6, as well as any remedies City has in law for failure to pay a special tax.

7.3 Infrastructure Phasing Plan. The Infrastructure Phasing Plan (**Exhibit G**) addresses sequencing and full build-out of major public onsite and offsite infrastructure necessary to support the Project including but not limited to, major roadways, signals, trails, offsite paseos, sewer, water, drainage facilities, parks and neighborhood greens, and other utilities. The phasing plan may be amended from time-to-time upon written approval by the Public Works Director. Prior to issuance of building permits (except permits for model homes) within an individual map phase, all streets and improvements shown on the phasing plan, all streets necessary for access to the proposed homes, associated improvements included in the approved improvement plans and other infrastructure as necessary for adequate public access and use shall be substantially complete to the satisfaction of the Public Works Director. These improvements including sound walls and landscaping shall be fully constructed to the satisfaction of the City's Public Works Department prior to the first occupancy. The credit for the proposed signal at the intersection of Raymer Way and Grant Line Road shall be based on the actual cost, but not more than the four hundred thousand dollars ($400,000) through the Citywide Transportation Development Impact Fee Program. The terms of this credit shall be incorporated into a Credit and Reimbursement Agreement between City and Developer.

7.4 Centennial Drive. The Entitlements include a General Plan Amendment to remove Centennial Drive within the boundary of the Project from the City's Circulation Element of the General Plan. City acknowledges and agrees that Developer has no obligation to construct this portion of Centennial Drive and that this provision is vested for the Term of this Agreement and, thereafter, unless and until a subsequent General Plan Amendment is adopted by the City.

7.5 County Reciprocal Funding Agreement. City has evaluated in the FEIR the potential impacts to roads outside the City boundaries and whether this Project has any obligation to contribute towards any impacts that may be included within a reciprocal funding agreement with the County of Sacramento ("County") that addresses the impacts of projects on Sacramento County roadways, as well as other cross-jurisdictional roadway impacts related to planned development in the City and County. City has concluded, based upon a review of the Traffic Impact Analysis in the FEIR that Developer shall not be required to contribute to any fees under the County Reciprocal Funding Agreement.

7.6 Purchase of Credits. City acknowledges that Developer may have the opportunity to purchase credits from other owners of property within the City. To the extent the purchase of credits from a third party are allowed under a Credit and Reimbursement Agreement, City will allow for those credits to be applied against any similar fees owed under this Agreement. The Credit will identify any applicable geographic limitations on the use of credits purchased from other owners of property.

8. Affordable Housing Plan. This Section 8 is the Affordable Housing Plan for the Project required by Rancho Cordova Housing Element Policy H.1.5. It has two components: the Property's fair share of the Regional Housing Needs Allocation (RHNA) and affordable housing performance by an in-lieu fee pursuant to the City's Housing Element Action H.1.2.1 and Action H.1.5.1.

8.1 Regional Housing Needs Allocation for The Preserve. The Project is less than 100 gross acres, therefore pursuant to Housing Element Action H.1.2.1, the RHNA acreage obligation is zero (0) acres of land zoned for high density housing at a minimum of 30 dwelling uniters per acre, and zero (0) acres of land zoned for medium density housing at a minimum of 10 dwelling units per acre.

8.2 Affordable Housing In-Lieu Fee. Developer shall pay City a fee of $6,264.48 for each single-family dwelling unit (the "Affordable Housing In-Lieu Fee"). Beginning January 1, 2023, the Affordable Housing Fee shall be adjusted annually on January 1 based upon the October to October index value increase found in the 20 City Building Cost Index published in Engineernig News Records (ENR), averaged with the ENR's index of the City of San Francisco between October and October of each year. The Affordable Housing Fee shall be paid to City upon issuance of a building permit for each residential unit within the Property. It shall be used by City, at its sole discretion, to acquire, renovate, repair, improve or otherwise create any units of affordable housing to households with incomes ranging from zero to 120% of the Sacramento County area median income. City acknowledges that Developer's payment of the Affordable Housing In-Lieu Fee satisfies Developer's obligation to provide affordable housing or inclusionary housing or such other exaction related thereto associated with Development of the property.

9. Dedication of Public Rights of Way and Other Public Lands. Within thirty (30) days of receipt of a written dedication request from City, regardless of the status of any final or tentative maps, Developer shall grant irrevocable dedications of rights of way and easements to City, in a form acceptable to City, for those portions of the Property required to construct such infrastructure or improvements. Consistent with Developer's right to construct infrastructure in phases (as defined in Section 7.3), Developer has the right to dedicate (whether in fee, by easement or right of way) by phases, including but not limited to land required for public improvements, park land and open space land, and with reference only to the land included within a particular phase. This provision shall be included as a note on all tentative subdivision maps. The cost of preparing the dedication documents, including the engineering and surveying costs related thereto, shall be paid by the Developer initiating or necessitating the request for the dedication. In addition to granting such irrevocable offers of dedication, Developer shall also grant temporary construction easements for reasonable access onto the Property to construct such infrastructure or improvements, which shall be assignable to any Developer who intends to construct such infrastructure or improvements. Developer shall obtain the consent of any and all beneficiaries under any deeds of trust or mortgages or other such holders of monetary claims or liens against the Property to subordinate their interests therein to such dedicated rights of way and easements.

9.1 Off-site Improvements (Acquisition). Developer may be required to perform off-site improvements included in **Exhibit G**. If Developer is unable to secure suificient title or interest in lands, or access to the lands, despite Developer's best faith effort, nothing shall prohibit Developer from exercising any and all rights available to it pursuant to Government Code section 66462.5 prior to the filing of any final or parcel map for which such off-site improvement was conditioned. If Developer is unable to secure the Real Property Interests necessary for off-site improvements, Developer shall provide evidence to City that Developer has exercised all reasonable efforts to acquire the Real Property Interests. Developer may thereafter request and, at City's sole and absolute discretion, City may agree to assist in the acquisition of the necessary Real Property Interests, subject to the additional conditions in this Section. City shall provide to Developer a reasonable estimation of all costs the City may reasonably incur (including the costs of eminent domain proceedings, legal fees

and costs, and the value of the Real Property Interests) and Developer shall provide this amount to the City as Security. Upon receipt of the Security in a form acceptable to the City Attorney, City shall commence negotiations to purchase the necessary Real Property Interests to allow Developer to construct the public improvements. If necessary, and only after such negotiations by City and in accordance with the procedures established and to the extent allowed by law, City shall within a reasonable time frame and so as not to delay construction of improvements to serve the Project consider the exercise of its power of eminent domain to acquire such Real Property Interests, including securing an order for immediate possession. Any such acquisition by the City is subject to the City's sole and absolute discretion, which is expressly reserved by City, to consider whether or not it chooses to exercise its eminent domain power and to make all necessary findings to acquire such Real Property Interests, including a finding of public necessity. After Developer has provided the Security in a form acceptable to the City Attorney, the City shall not withhold any building permits based on the lack of the necessary title to Real Property Interests for off-site improvements. However, notwithstanding any provision contained in this Agreement to the contrary, the City shall not have any obligation to acquire the Real Property Interests.

10. Amendment or Cancellation.

10.1 Amendment by Mutual Consent, Minor Revisions. This Agreement may be amended in writing from time to time by mutual consent of the Parties hereto, and in accordance with the procedures of state law and the Municipal Code. Any amendment of this Agreement that does not constitute a Minor Revision as defined herein shall require amendment of this Agreement. Any such amendment that does not constitute a Minor Revision may be requested and made with respect to the Property, or a portion thereof, in which case only the owner(s) of such portion of the Property subject thereto shall be required to apply for and sign such partial amendment of this Agreement. A Minor Revision shall mean any change to this Agreement which does not relate to the term (excluding automatic extensions), permitted uses, density or intensity of use, height or size of buildings, provisions for reservation or dedication of land, or monetary contributions by the Developer, or other similar or material provisions, in so far as the revision meets any applicable City-wide standards. The City Manager, with the consent of the Developer, has the discretion to approve Minor Revisions without the requirement for a public hearing or approval by the City Council.

10.2 Cancellation by Mutual Consent. Except as otherwise permitted herein, this Agreement may be canceled in whole or in part only by the mutual written consent of the Parties or their successors in interest, in accordance with Government Code section 65868 and the Municipal Code. Any fees paid pursuant to this Agreement and spent by City prior to the date of cancellation shall be retained by City.

10.3 Automatic Termination Upon Completion and Sale of Residential Unit. This Agreement shall automatically be terminated, without any further action by either Party or need to record any additional document, with respect to any single-family residential lot for residential use, upon completion of construction and issuance by City of a final inspection for a dwelling unit upon such residential lot and conveyance of such improved residential lot by Developer to a bona-fide good faith purchaser thereof. In connection with its issuance of a final inspection for such improved lot, City shall confirm that: (i) all improvements which are required to serve the lot, as determined by City pursuant to the Entitlements and Subsequent Entitlements, have been accepted by City; and (ii) the lot is included within any financing districts or mechanisms required by Section 7 or other financing mechanism acceptable to City, to the extent required hereby. Termination of this Agreement for any such residential lot as

provided for in this Section 10.3 shall not in any way be construed to terminate or modify any assessment district or Mello-Roos Community Facilities District lien affecting such lot at the time of termination.

10.4 Termination upon Request. This Agreement may also be terminated, at the election of the then property owner, with respect to any legally subdivided parcel designated for residential or nonresidential use (other than parcels designated for public use), when recording a final subdivision map for such parcel, or receiving a certificate of occupancy or final inspection, whichever is applicable, by giving written notice to City of its election to terminate the Agreement for such parcel, provided that: (i) all improvements which are required to serve the parcel, as determined by City pursuant to the Entitlements and Subsequent Entitlements, have been accepted by City; (ii) the parcel is included within any financing districts or mechanisms required by Section 7, or other financing mechanisms acceptable to City, to the extent required hereby; (iii) all other financial obligations to City under this Agreement that are outstanding or as to the parcels subject to the request for termination, have been satisfied, including without limitation, satisfaction of all obligations under Sections 6 - 8 hereinabove to pay Park Development Fee, Community Renovation Fees, Community Places Fees, Affordable Housing Fees, and/or planning reimbursements, that are then outstanding for the portion thereof subject to such termination; and (iv) the Developer of such portion of the Property is not in Default of this Agreement and no notice of Default has then been issued by City with respect to such portion of the Property. City shall cause any written notice of termination approved pursuant to this Section to be recorded with the Sacramento County Recorder against the applicable parcel at Developer's expense. Termination of this Agreement for any such residential parcel as provided for in this Section 10.4 shall not in any way be construed to terminate or modify any assessment district or Mello-Roos Community Facilities District lien affecting such parcel at the time of termination.

10.5 Termination on Preserve Buffer. This Agreement shall terminate as to the buffer parcels (N, O, P, Q and R) shown in **Exhibit E** or any parcels thereof when (i) the Developer has completed all its obligations under the Development Agreement and the Entitlements regarding the buffer, and (ii) the South Sacramento Habitat Conservation Agency Joint Powers Authority (HCP) accepts the transfer of title and maintenance responsibility for the buffer to the JPA. The City shall, upon request by the Developer or the HCP and receipt of written notice of the above from the Developer or the HCP, cause a notice of termination to be recorded or provide other evidence of termination of the Agreement on the subject buffer to the Developer or the HCP.

11. <u>Annual Review</u>.

11.1 Annual Review. City reserves the right to annually monitor and review each Developer's good faith compliance with the terms of this Agreement and the Entitlements.

11.2 Monitoring. City has discretion to monitor the continuing compliance of the terms of this Agreement and the Entitlements by updating decision-makers, conducting field inspections in compliance with applicable laws, implementing and interpreting requirements, monitoring any litigation relating to the Property, and taking any other actions that are within the City's exercise of its legal, permit or contractual obligations.

11.3 Annual Review Date. City intends to conduct an annual review each year during the term of this Agreement in September of each year after the Effective Date.

11.4 Initiation of Review. City's Planning Director initiates the annual review by giving Developer written notice that City will conduct the annual review. The Planning Director's

written notice will include an estimate of the total costs City expects to incur in connection with the review. Within thirty (30) days of City's notice, Developer must provide evidence to the Planning Director to demonstrate good faith compliance with this Development Agreement. The burden of proof, by substantial evidence of compliance, is upon the Developer. City's failure to timely initiate the annual review is not a waiver of the right to conduct a review at a later date or otherwise enforce the provisions of this Development Agreement. Developer is not in default under this Agreement by virtue of a failure by City to timely initiate review.

11.5 Staff Reports. City shall deposit in the mail to Developer a copy of all staff reports and related exhibits concerning contract performance at least twenty (20) days prior to any annual review. City shall also, to the extent practicable, make reasonable efforts to provide simultaneous notice to Developer by e-mail or other then-available means of electronic technology.

11.6 Costs. Costs reasonably and directly incurred by City in connection with the annual review and monitoring shall be paid by Developer in accordance with the City's schedule of fees and billing rates in effect at the time of review. The costs that Developer may be required to pay are not limited to the amount in the Planning Director's estimate.

11.7 Non-compliance with Agreement; Hearing. If the Planning Director determines, on the basis of substantial evidence, that Developer has not complied in good faith with the terms and conditions of this Development Agreement during the period under review, the City Council may initiate proceedings to modify or terminate the Agreement, at which time an administrative hearing shall be conducted before the City Council in accordance with the procedures of state law (Government Code sections 65090 and 65091). As part of that final determination, the City Council may impose conditions on the Project that it considers necessary and appropriate to protect the interests of City. Developer shall notify the City in writing at least seven (7) days before the hearing of any and all issues of non-compliance by City with the terms of this Development Agreement, and the City Council shall review and make findings concerning the compliance of all Parties to the Agreement. If the City contends that Developer has not complied in good faith with the terms and conditions of this Development Agreement, City shall provide Developer in writing the basis for that conclusion no later than seven (7) business days before the hearing of any and all issues of noncompliance by the City Council.

11.8 Appeal of Determination. The decision of the City Council as to a Developer's compliance shall be final. Any court action or proceeding to challenge, review, set aside, void, or annul any compliance determination by the City Council must be commenced within ninety (90) days of the final decision of the City Council in accordance with the California Code of Civil Procedure, or the Developer forfeits the right to seek judicial review.

12. Violation of Entitlements. In addition to complying with all terms of this Agreement, Developer agrees to perform all terms, conditions, and requirements of all other Entitlements. Any failure by Developer to perform any material term, condition, or requirement of any of the other Entitlements or Subsequent Entitlements is a violation of this Agreement, subject to default under Section 13 or if such a violation is identified as part of an Annual Review it is subject to the procedures set forth in Section 11.

13. Default and Opportunity to Cure. Subject to any applicable extension of time agreed to by the Parties in writing, failure by any Party to perform any term or provision of this Agreement required to be performed by such Party, including without limitation any violation of Section 12, constitutes an event of default ("Event of Default"). For purposes of this Agreement,

a Party claiming another Party is in default shall be referred to as the "Complaining Party," and the Party alleged to be in default shall be referred to as the "Party in Default." Except as provided in Section 11, a Complaining Party shall not exercise any of its remedies as the result of such Event of Default unless such Complaining Party first gives notice to the Party in Default as provided in Section 23, and the Party in Default fails to cure such Event of Default within the applicable cure period.

13.1 Procedure Regarding Defaults.

13.1.1. Notice of Default. If an Event of Default occurs, prior to exercising any remedies, the Complaining Party shall give the Party in Default written notice of such default, including a description of the factual basis for the alleged default. After City as the Complaining Party provides notice of an Event of Default by Developer, if such Event of Default is not cured within thirty (30) days after the Developer's receipt of such notice, City may thereafter cease to issue any permit or approve any entitlement for which an application has been filed for any portion of the Property then owned or controlled by the Party in Default until the Default is cured pursuant to the procedures in this Section 13 or if the Event of Default is discovered or determined in the course of the Annual Compliance Review and there is a determination under the procedures set forth in Section 11 that there is no default.

13.1.2. Cure. The Party in Default must cure the default within thirty (30) days from the Notice of Default. The Complaining Party may pursue all available remedies if the Party in Default fails to cure the default within the 30-day time period. If the nature of the alleged default is such that it cannot reasonably be cured within thirty (30) days, the 30-day time period will be tolled if: (a) the cure is commenced at the earliest practicable date following receipt of the notice; (b) the cure is diligently prosecuted to completion at all times thereafter; (c) at the earliest practicable date (in no event later than thirty (30) days after the Party in Default's receipt of the notice), the Party in Default provides written notice to the Complaining Party that the cure cannot practicably be completed within such thirty (30) day period; and (d) the cure is completed at the earliest practicable date. In no event shall Complaining Party be precluded from exercising remedies if a default is not cured within ninety (90) days after the first notice of default is given. If the Event of Default is discovered or determined in the course of the Annual Compliance Review, in addition to other remedies and potential cures, City shall have the statutory authority pursuant to Government Code section 65865.1 to decide to terminate or modify the Development Agreement following the opportunity to cure as provided in this Section 13.1.2.

13.1.3. Failure to Assert. Any failures or delays by a Complaining Party in asserting any of its rights and remedies as to any default shall not operate as a waiver of any default or of any such rights or remedies. Delays by a Complaining Party in asserting any of its rights and remedies shall not deprive the Complaining Party of its right to institute and maintain any actions or proceedings which it may deem necessary to protect, assert, or enforce any such rights or remedies.

13.1.4. Legal Proceedings. If the Party in Default fails to cure a default in accordance with the provisions of Section 13.1.2, the Complaining Party, at its option, may institute legal proceedings pursuant to this Agreement or terminate this Agreement. Upon the occurrence of an Event of Default, the Parties may pursue all other remedies at law or in equity, which are not otherwise provided for or prohibited by this Agreement or City's regulations governing development agreements, expressly including the remedy of specific performance of this Agreement. In no event, except as provided in Sections 17, 20, and 21 of this Agreement, will either Party be liable to the other Party for any monetary damage for claims arising out of this

Agreement, and both Parties hereby expressly waive any such monetary damages. Notwithstanding the foregoing, City may immediately institute any legal proceedings relating to this Agreement without the notice and opportunity to cure required in the case of an emergency or immediate danger to public health, safety, or welfare.

14. Estoppel Certificate. Either Party may, at any time, and from time to time, deliver written notice to the other Party requesting that the other Party certify in writing that, to the knowledge of the certifying Party: (i) this Agreement is in full force and effect and a binding obligation of the Parties; (ii) this Agreement has not been amended or modified either orally or in writing, or if so amended, identifying the amendments; and, (iii) the requesting Party is not in default in the performance of its obligations under this Agreement, or if in default, describing therein the nature and amount of any such defaults. A Party receiving a request hereunder shall execute and return such estoppel certificate, or give a written detailed response explaining why it will not do so, within thirty (30) days following the receipt of each such request. Each Party acknowledges that such an estoppel certificate may be relied upon by third parties acting in good faith. A certificate provided by City establishing the status of this Agreement with respect to the Property or any portion thereof shall be in recordable form and may be recorded at the expense of the recording Party.

15. Severability. If any part of this Agreement is for any reason held to be unenforceable, the rest of the Agreement remains fully enforceable. If, however, a provision of this Agreement is determined to be invalid or unenforceable and the effect is to deprive a Party of an essential benefit of this Agreement, then the Party so deprived may request that the other Party meet and confer in an attempt to amend the Agreement in a manner that is acceptable to both Parties and/or terminate this entire Agreement upon written notice to the other Party.

16. Applicable Law. California law applies to this Agreement without regard for any choice-of-law rules that might direct the application of the laws of any other jurisdiction. Venue for all legal proceedings arising out of this Agreement shall be the Superior Court for the State of California, County of Sacramento.

17. Attorneys' Fees and Costs in Legal Actions by Parties to the Agreement. Should any legal action be filed by either Party for breach of this Agreement or to enforce any provisions herein, the prevailing party in the action is entitled to reasonable attorneys' fees, expert witness fees, court costs, and any other costs as may be fixed by the Court.

18. Agreement Runs with the Land. Except as otherwise provided for in this Agreement, all of the provisions, rights, terms, covenants, and obligations contained in this Agreement are binding upon the Parties and their respective heirs, successors and assignees, representatives, lessees, and all other persons acquiring the Property, or any portion thereof, or any interest therein, whether by operation of law or in any manner whatsoever. All of the provisions of this Agreement are enforceable as equitable servitudes and constitute covenants running with the land pursuant to applicable laws, including but not limited to Section 1468 of the California Civil Code. Each covenant to do, or refrain from doing, some act on the Property, or with respect to any owned property: (i) is for the benefit of such properties and is a burden upon such properties; (ii) runs with such properties; and (iii) is binding upon each Party and each successive owner during its ownership of such properties or any portion thereof, and shall be a benefit to and a burden upon each Party and its property hereunder and each other person succeeding to an interest in such properties.

19. Bankruptcy. The obligations of this Agreement are not dischargeable in bankruptcy unless so adjudicated by a court of competent jurisdiction. In the event of a bankruptcy by Developer, Developer shall include City as an interested party entitled to notice.

20. Indemnification from Construction, Improvement, Operation, and Maintenance Claims. Developer agrees to indemnify, defend with counsel selected by City, and hold harmless City, and its elected and appointed councils, boards, commissions, officers, officials, agents, employees, and representatives, from any and all claims, costs (including legal fees and costs incurred by City or awarded to plaintiffs) and liability for any personal injury or property damage which may arise directly or indirectly as a result of any actions or inactions by Developer, or any actions or inactions of Developer's contractors, subcontractors, agents, or employees in connection with the construction, improvement, operation, or maintenance of the Property or the Project. Developer has no indemnification obligation with respect to the gross negligence or willful misconduct of City, or its elected and appointed councils, boards, commissions, officers, officials, agents, employees, and representatives or with respect to the maintenance, use, or condition of any improvement after the time it has been dedicated to and accepted by City or another public entity (except as provided in an improvement agreement or maintenance bond). The provisions of this Section 20 shall survive the termination of this Agreement.

21. Cooperation and Indemnification of City in Event of Legal Challenge to This Agreement or Entitlements. In the event of any legal or equitable action or other proceeding instituted by any third party challenging the validity of any provisions of this Agreement or the Entitlements, or seeking to overturn or invalidate any approval granted pursuant to this Agreement:

21.1 The Parties agree to cooperate in defending against the action or proceeding;

21.2 The Developer shall be solely responsible for its own costs and any costs incurred by City for such defense;

21.3 Developer will indemnify, defend with counsel selected by City and hold harmless City, and its elected and appointed councils, boards, commissions, officers, officials, agents, employees, and representatives from any and all claims, costs (including legal fees and costs incurred by City or awarded to plaintiffs) and liability;

21.4 Neither Developer nor City shall settle any action or proceeding on grounds that include non-monetary relief or admissions of liability without written consent of the other Party. Neither Developer nor City shall settle any action with any monetary relief without the written consent of other Party, unless City is solely liable and agrees to pay such monetary relief; and

21.5 The provisions of this Section 21 shall survive the termination of this Development Agreement.

22. Third Party Beneficiaries. This Development Agreement is made and entered into for the sole protection and benefit of Developer and City and their successors and assigns. No other person, agency or entity shall have any right of action based upon any provision in this Agreement.

23. Notices. All notices and other communications required or permitted under this Agreement, the enabling legislation, or the procedure adopted pursuant to Government Code section 65865, must be in writing and must be delivered in person or sent by certified mail, postage prepaid, or by facsimile or electronic mail.

Notice required to be given to City shall be addressed as follows:

Field Cod

Either Party may change the address stated herein by giving notice in writing to the other Party, and thereafter notices shall be addressed and transmitted to the new address.

24. Assignment and Release. From and after recordation of this Agreement against the Property, Developer shall within forty-five (45) days of the recording of the sale of the Property, or any portion thereof, assign this Agreement as to the Property, or such portion thereof, in connection with any sale, transfer or conveyance thereof, provided that Developer has paid City any and all fees or amounts due to City arising out of this Agreement or the processing of the Entitlements, or the development of the portion of the Property to be assigned. The assignment will recognize and include in the assignment payment of fees such as permit fees and impact fees that will become due and payable at the time of building permit issuance or certificate of occupancy and which have not yet become due and payable at the time of the assignment and transfer of the Property (or portion thereof). The form of the assignment and assumption agreement is attached hereto as **Exhibit H**. The assignment will be effective after (i) written notice to the City of the intent to assign this Agreement, (ii) confirmation by the Planning Director

that Developer is not in default of any provision of this Agreement, (iii) confirmation by the Planning Director that Developer has paid to City any and all fees or amounts that are due to City at the time of the assignment, subject to any limitations on the scope of fees, Exactions, assessments or charges set forth in this Agreement, and (iv) Developer has provided to the City Planning Director the express written assignment by Developer and assumption by the assignee of such assignment in the form attached hereto as **Exhibit H**. Upon the satisfaction of each of the preceding items and the conveyance of Developer's interest in the Property related thereto, Developer shall be released from further liability or obligation related to the portion of the Property so conveyed and the assignee will be considered the "Developer," with all rights and obligations related thereto, with respect to such conveyed property (the "Assigned Property").

25. Mortgagee Protection. The parties hereto agree that this Agreement shall not prevent or limit Developer, in any manner, at Developer's sole discretion, from encumbering the Property or any portion thereof by any mortgage, deed of trust or other security device securing financing with respect to the Property. City acknowledges that lenders providing any such financing may require certain Agreement interpretations and modifications, and agrees upon request, from time to time, to meet with Developer and representatives of such lenders to negotiate in good faith any such request for interpretation or modification. City will not unreasonably withhold its consent to any such requested interpretation or modification, provided such interpretation or modification is consistent with the intent and purposes of this Agreement. Any lender or other such entity (a "Mortgagee") that obtains a mortgage or deed of trust against the Property shall be entitled to the following rights and privileges:

(a) Neither entering into this Agreement nor a breach of this Agreement shall defeat, render invalid, diminish or impair the lien of any mortgage on the Property made in good faith and for value, unless otherwise required by law.

(b) The Mortgagee of any mortgage or deed of trust encumbering the Property, or any part thereof, for which Mortgagee has submitted a request in writing to City in the manner specified herein for giving notices, may request to receive written notification from City of any Event of Default by Developer in the performance of Developer's obligations under this Agreement.

(c) If City receives a timely request from a Mortgagee requesting a copy of any notice of an Event of Default given to Developer under the terms of this Agreement, City shall provide a copy of that notice to the Mortgagee within ten (10) days of sending the notice of Event of Default to Developer. The Mortgagee shall have the right, but not the obligation, to cure the Event of Default during the remaining cure period allowed to Developer under this Agreement.

(d) Any Mortgagee who comes into possession of the Property, or any part thereof, by any means, whether pursuant to foreclosure of the mortgage, deed of trust, or deed in lieu of such foreclosure or otherwise, shall take the Property, or part thereof, subject to the terms of this Agreement; provided, however, notwithstanding anything to the contrary above, any Mortgagee, or successor or assign of such Mortgagee, who becomes an owner of the Property through foreclosure shall not be obligated to pay any fees or construct or complete the construction of any improvements, unless such owner desires to continue Development of the Property consistent with this Agreement and the Entitlements, in which case the owner by foreclosure shall assume the obligations of Developer hereunder in a form acceptable to City.

(e) The foregoing limitation on Mortgagees and owners by foreclosure shall not restrict City's ability pursuant to Section 9 of this Agreement to specifically enforce against such Mortgagees or owners any dedication requirements under this Agreement or dedication requirements under any conditions of any other Entitlements.

26. Priority of Enactment. In the event of conflict between this Development Agreement and the Entitlements, this Development Agreement is controlling, and the Parties will meet and confer in good faith to amend the Entitlements accordingly.

27. Form of Agreement; Recordation; Exhibits. This Agreement shall be deemed "entered into" for purposes of Government Code section 65868.5 as of the date of execution by the City and the City will record this Agreement and any subsequent amendment to this Agreement, with the County Recorder within ten (10) days as required by Government Code section 65868.5. In the event that Developer fails to meet the requirements of Section 4.1.1, the Developer shall sign and City will record documentation prepared by the City to evidence termination of this Agreement. City will also record any termination of this Agreement, including any parts or provisions of this Agreement, except when this Development Agreement automatically terminates due to the expiration of the Term of this Agreement. Any amendment or termination of this Development Agreement that affects less than all of the Property must describe the portion of the property that is the subject of the amendment or termination. This Agreement is executed in three duplicate originals, each of which is deemed to be an original. This Agreement consists of __ pages and __ exhibits, which constitute the entire understanding and agreement of the Parties.

28. City Manager Authorization. The City of Rancho Cordova, a municipal corporation, has authorized this Development Agreement to be executed in duplicate by its City Manager and attested to by its City Clerk under the authority of Ordinance No. _____adopted by the Council of the City on the __ day of , 2021, and has caused this Agreement to be executed.

FORM OF ASSIGNMENT AND ASSUMPTION AGREEMENT

EXHIBIT H
FORM OF ASSIGNMENT AND ASSUMPTION AGREEMENT

ASSIGNMENT AND ASSUMPTION AGREEMENT
RELATIVE TO _____

THIS ASSIGNMENT AND ASSUMPTION AGREEMENT (hereinafter, the "Agreement") is entered into this _____ day of _____ 20__, by and between _____, a _____ (“Developer”), and _____, a _____ ("Assignee").

RECITALS

On _____, 2022, the City of Rancho Cordova and TDW Enterprises, LP, a California Limited Partnership (“TDW”) and Winn Development II, LLC (“Winn Development”) (TDW and Winn Development II are collectively referred to as “Developer”) entered into that certain agreement entitled "Development Agreement relative to the Preserve Project” ("Development Agreement"). Pursuant to the Development Agreement, Developer agreed to develop certain property more particularly described in the Development Agreement ("Property"), subject to certain conditions and obligations as set forth in the Development Agreement. The Development Agreement was recorded against the Property in the Official Records of Sacramento County on _____, 2022, as Instrument No. 2022-_____.

Developer intends to convey a portion of the Property to Assignee, commonly referred to as Parcel(s) _____, and more particularly identified and described in Exhibit A, attached hereto and incorporated herein by this reference (hereinafter the "Assigned Parcel").

Developer desires to assign and Assignee desires to assume all of Developer’s rights, title, interest, burdens and obligations under the Development Agreement with respect to and as related to the Assigned Parcel.

ASSIGNMENT AND ASSUMPTION

NOW, THEREFORE, Developer and Assignee hereby agree as follows:

Developer hereby assigns, effective as of Developer's conveyance of the Assigned Parcel to Assignee, all of the rights, title, interest, burdens and obligations of Developer under the Development Agreement with respect to the Assigned Parcel. Developer retains all the rights, title, interest, burdens and obligations under the Development Agreement with respect to all other property within the Property owned by Developer.

Assignee hereby assumes all of the rights, title, interest, burdens and obligations of Developer under the Development Agreement with respect to the Assigned Parcel, and agrees to observe and fully perform all of the duties and obligations of Developer under the Development Agreement with respect to the Assigned Parcel. The parties intend hereby that, upon the execution of this Agreement and conveyance of the Assigned Parcel to Assignee, Assignee shall become substituted for Developer as the "Developer " under the Development Agreement with

respect to the Assigned Parcel and Developer shall be released of and from any obligations or liabilities under the Development Agreement with respect to the Assigned Parcel.

All of the covenants, terms and conditions set forth herein shall be binding upon and shall inure to the benefit of the parties hereto and their respective heirs, successors and assigns.

The Notice address described in Section 23 of the Development Agreement for the Assignee with respect to the Assigned Parcel shall be:

_____
_____
_____
Attn: _____

IN WITNESS HEREOF, the parties hereto have executed this Agreement as of the day and year first above written. This Agreement may be signed in identical counterparts.

MEMORANDUM

ITEM 12.1.

DATE: April 4, 2022

TO: Honorable Mayor and Council Members

FROM: Stacy Delaney, Community Enhancement and Investment Senior Management Analyst

SUBJECT: **UPDATE ON FISCAL YEAR 2022/23 COMMUNITY ENHANCEMENT & INVESTMENT FUND APPLICATIONS RECEIVED FOR COUNCIL CONSIDERATION**

RECOMMENDATION

Staff to introduce and provide an update on the Fiscal Year 2022/23 Community Enhancement & Investment Fund grant applications received for Council consideration.

RESULT OF RECOMMENDED ACTION

City Council will receive a summary of Community Enhancement & Investment Fund grant applications, copies of applications and supplemental documents received for Council consideration. Staff will return with an update on April 18, 2022 and provide the Council with an adjusted summary of the grant applications received, including evaluation of each application for compliance with the established criteria and an overall recommendation. Additionally, a summary of internally led initiatives and the Legacy Fund allocation will be included.

BACKGROUND

The application period for the Fiscal Year 2022/23 Community Enhancement & Investment Fund opened on February 7, 2022 and closed on March 18, 2022. During this time, we received 94 grant applications. One application was withdrawn, leaving 93 for consideration.

Staff is in the process of reviewing each application according to the application criteria and prioritization method listed within the Fiscal Year 2022/23 Grant Application Process and Criteria document. While uncertainties about the COIVD-19 pandemic continue, and while California has moved past its "Blueprint for a Safer Economy", there may be future state and/or Sacramento County actions and/or orders which may restrict or prohibit certain activities from happening due to responses to the pandemic.

This information is being monitored closely to provide the best recommendation possible.

FISCAL IMPACT AND FUNDING SOURCE

The latest projection, shows that Measure H will provide approximately $11.4 million in revenue in Fiscal Year 2022/23. It is anticipated that the Community Enhancement & Investment Fund

process will run concurrent with the City's budget process with adoption planned in June of 2022.

PLANNING FOR THE FUTURE

CITY OF
COMMUNITY ENHANCEMENT
& INVESTMENT FUND
RANCHO CORDOVA

Recap of Applications Received

Community Enhancement & Investment Fund grant applications were accepted from February 7, 2022, to March 18, 2022:

- 94 grant applications received, 1 withdrawn, leaving 93
- Totaling more than $10 million dollars
- Anticipate recommending $2.85 million dollars in community grant projects
- Recommendations will be presented starting at the April 18th City Council Meeting

Timeline to CEIF Budget Adoption

- Broad overview tonight
- **April 18 Regular Meeting** start the recommendations on the community grant applications, internal departments and legacy fund allocation, and any Council requested items for consideration
- **May 2 Regular Meeting** continue the review of community grant applications and any other sections as needed
- **May 16 Regular Meeting** make preliminary budget decisions by this date; no later than May 24th
- **June 6 Regular Meeting** adopt CEIF Resolution concurrent with the City's budget process

App.	Category	Application Name	Applicant's Project Description	FY 2022/2023 Requested
1	Arts, Culture, History, Entertainment & Sports	Learning STEAM Let's Build a Light Sculpture!	This project proposes a semester-long program tailored for seventh and eight graders to teach them about methods and technology involved in the fabrication of an acrylic light sculptures. Each class session will be 60 to 90 minutes long and held once per week. The light sculpture will consist of 8 acrylic panels vertically attached to a 3D printed base. A row of LED lights embedded in the base below each panel will illuminate the panels through their edges, causing the patterns drawn or engraved on the panels to glow. The LEDs will be addressable, meaning that the color and brightness of each LED can be programmatically altered to allow for varying animated light patterns. The light patterns will be controlled by a smartphone connected to the art piece through a dedicated Wi-Fi connection on the phone. The students will build the sculpture during the final sessions of the semester and will see how the elements and technology learned throughout the semester will apply to the sculpture.	$ 11,180.00
2	Arts, Culture, History, Entertainment & Sports	Rancho Cordova River City Concert Band: Enhancements	This project would provide funds to the Rancho Cordova River City Concert Band (RCRCCB) for equipment, musical talent, and related expenses, thereby enhancing its potential to provide high-quality musical performance events in the City of Rancho Cordova and to equip the RCRCCB to represent the City of Rancho Cordova as musical ambassadors within the region. The goal of the volunteer-driven RCRCCB is to engage with and represent the community of Rancho Cordova with superior musical performances, foster musical interest among children, bring world-class guest artists, conductors and composers to the Rancho Cordova stage, and to provide performance opportunities for skilled community musicians.	$ 20,000.00
3	Arts, Culture, History, Entertainment & Sports	Nu Art Education: Theater Arts & SEL Integration Program at Williamson Elementary School	NorCal School of the Arts outreach program proposes to provide every classroom at Williamson Elementary School with 10 theatre arts and social-emotional learning (SEL) integrated classes as well as an after school production for students wanting to engage in further after school theatre arts programming. Grant funds provided by the City will enable NorCal School of the Arts to serve more than 500 students during school in the Fall of 2022. During the Spring of 2023, students will have the option to participate in an after-school program that will culminate in a fully-produced musical at the school. NorCal teaching artists are trained in weaving SEL strategies into theatre arts lessons. These classes will also act as a professional development opportunity for the Williamson Elementary classroom teachers to learn how to integrate SEL strategies through theatre arts. Teachers will have access to all the curriculum and Theatre/SEL-Integrated resources to continue the exercises once the program is completed.	$ 25,000.00
4	Arts, Culture, History, Entertainment & Sports	Little Glory and the Wamdemic! Education Through Story Telling	This project proposes to fund the illustration and publication of the book, Little Glory and the Wamdemic! It features multi-cultural characters, colorful illustrations, rhyming words, and humor. It also addresses water conservation and coping with depression and anger. It is a true story of how to make lemonade when life gives you lemons.	$ 5,000.00
5	Arts, Culture, History, Entertainment & Sports	Sacramento Performing Arts Conservancy: Cordova Youth Spotlight Orchestra Expansion	This proposed project builds on progress in 2021/22, the pilot year of the Cordova Youth Spotlight Orchestra (CYSO). It expands student membership from 24 to 32 students. It opens beginning strings to all elementary grades. Based on learnings from the pilot, this project increases the frequency of classes from once to twice a week and seeks funds to pay all student tuition and supplies. Twenty-four scholarship students completed one year of instruction: 11 in orchestra and 13 in beginning strings. These students want to continue developing their skills, and new students are needed to expand the orchestra by 30% to 32 members or more. This project extends the beginning strings class to all elementary grades with parent participation required for students in grades 1 through 3 and encouraged for grades 4 through 6. In 2021, almost half of the CYSO applicants were elementary students who had no experience playing a musical instrument. Sacramento Performing Arts Conservancy accommodated them by adding a beginning strings class. By the end of the year, four beginning students were promoted to the orchestra, and beginning strings students outnumbered orchestra students. Students will receive instruction twice a week for 34 weeks beginning in September 2022 and ending in May 2023. Like the pilot project, students will perform at least two concerts for the Rancho Cordova community. Additional mini concerts were held during the pilot project and are likely to be held again.	$ 22,000.00

App.	Category	Application Name	Applicant's Project Description	FY 2022/2023 Requested
6	Arts, Culture, History, Entertainment & Sports	Application Withdrawn	Application Withdrawn	$ -
7	Arts, Culture, History, Entertainment & Sports	Mandarins of Sacramento: Imperial Winds	Mandarins proposes to introduce “Imperial Winds”, a winter performing arts ensemble focusing on brass and woodwind instruments, to be based in Rancho Cordova. Winter Winds ensembles present an original show each year, approximately 8–10 minutes in length, and refine it throughout the winter season. Shows are performed and are judged in various musical and visual categories. Musical repertoires vary widely among corps and include symphonic, jazz, big band, contemporary, rock, wind band, vocal, rap, Broadway, and Latin music, among other genres. Winter Winds ensembles do not have any required instrumentation. In fact, there are purposely less regulations and restrictions against winds groups, in regard to instrumentation. These less stringent rules exist in order to encourage experimentation and freedom of expression. Winds groups also often incorporate percussion elements and guard elements into their performances, resulting in a unique mix of electric synergy. Imperial Winds will address a current need in the community – high schools in Rancho Cordova only offer winter percussion and winter guard programs and Sacramento State only offers an independent winter percussion group. It will be open to all interested woodwind and brass players between the ages of 16-23 years of age. Experience camps will be held in November and December during which students will have the opportunity to hone the musical skills and learn basic movements used in the performances. In January, any interested student is eligible to audition for the forty available competitive openings in the ensemble. The ensemble will continue to practice and perfect their music and visual performance as a team.	$ 20,050.00
8	Arts, Culture, History, Entertainment & Sports	Sacramento Theatre Company: After-School Musical Production and In-Class Theatre Arts	Sacramento Theatre Company teaching artists work alongside classroom teachers, and will introduce theatre arts integration concepts and techniques that will also enhance the teacher's ability to teach their students. This proposed program also engages parent and community participation with set building days, creating props and costumes, and helping with publicity. Decades of research demonstrates participation in theatre arts offers students a toolbox of fundamental skills that will enhance their ability to succeed in school and beyond. The benefits of theatre arts education for low-income children are especially profound. Specifically, studies have shown that theatre arts instruction and the creative process associated with theatre helps students to better succeed at school as they garner new ways of learning, creating, and focusing. This is a semester long-after-school theatre arts program. The project proposal includes professional development for the teachers in Theatre Arts Integration strategies for the classroom. In the 2021-2022 school year, STC was funded at White Rock Elementary School through a grant and funding would ensure their presence for another year. The program begins with theatre classes in every classroom for the purpose of engaging student interest in theatre arts prior to the start of the after-school program as well as to provide alternative arts integration methods to teach math, English and science through the arts to reach multiple learning styles.	$ 20,000.00
9	Arts, Culture, History, Entertainment & Sports	Western Swing Society: The “Swing Sweet Home” Project	The Western Swing Society (WSS) "Swing Sweet Home" Project is meant to engage the community of Rancho Cordova and nationwide about the preservation of Western Swing music, traditional dance, and history. The goal is to expand the outreach further into Rancho Cordova by posting monthly concerts from their dancehall in Rancho Cordova and post so others can see the activities going on in the heart of Rancho Cordova. Dances are held every 1st Sunday of the month that showcase a featured guest band, the house band, and are enjoyed by dancers who take to the dance floor. Recording live performances from the dances of classic tunes and making them available online for the community to enjoy is the purpose of the grant request.	$ 7,272.84
10	Arts, Culture, History, Entertainment & Sports	Phoenix Productions: Rancho Cordova Rise-Up Theatre Company Development and Construction Project	This grant will provide funds to Rancho Cordova Rise-up Theatre Company (RCRUT) for the continuing development of a high-quality, thriving theatre company and the construction of a 99-seat complex in the arts section of Rancho Cordova for the benefit of RCRUT and other Rancho Cordova non-profit performing arts organizations. Funding would provide plays, musicals, large and small events, and theatre complex construction.	$ 150,000.00

App.	Category	Application Name	Applicant's Project Description	FY 2022/2023 Requested
11	Arts, Culture, History, Entertainment & Sports	FCUSD: Mills Middle School Drumline	Drumline intends to teach students how to become active members in a working and performing percussion ensemble. This course intends to attract those students who are less apt to sign-up for traditional band/orchestra courses, while continuing to offer the same fundamental musical training that motivates and inspires positive creativity. All students will learn to play and will be expected to demonstrate competency on battery percussion (snare/bass/tenor-drums), and orchestral percussion (marimba/xylophone/bells/timpani etc.). Grades are based on participation, attendance, practice, and rehearsal technique. Drumline performs at concerts, assemblies, school rallies and sporting events throughout the school year. Their sporting events attract members of the Rancho Cordova Community who will hear, see, and experience the community pride represented by Mills performance drumline. Drumline shows are cross-curricular in that they incorporate dance and movement, theatrical performance, and artistic set-design to create a narrative or explore a theme. Such productions are a reflection of the opportunities to celebrate and exchange ideas and interests unique to community culture, demonstrating positive personal and cultural awareness. Drumline will aid in creating repertoire for school and community building such as pep-rallies and athletic events. If funded, in years 2-4, a small amount of subsequent funding is requested ($1,500 each year).	$ 15,000.00
12	Arts, Culture, History, Entertainment & Sports	Sacramento Children's Museum: “XOXO" An Exhibit About Love & Forgiveness"	Sacramento Children's Museum requests funding for a new exhibit called "XOXO" which is about love and forgiveness. If funded, it would debut in the Fall of 2022. This exhibit will help children explore their feelings and learn how we emotionally connect with others. Funding will also provide free admission to Rancho Cordova families on Sundays. For the past 10 years, the Sacramento Children’s Museum (SCM) has been a cornerstone educational and community resource in Rancho Cordova, providing children ages birth-8 with exciting, hands-on learning opportunities. Children learn STEM, art and literacy concepts through play in their 15 exhibit areas.	$ 46,450.00
13	Arts, Culture, History, Entertainment & Sports	Symphony d'Oro Rancho Cordova: Season 2022-23	This proposed project would provide funding to Symphony d'Oro Rancho Cordova to be expended for music, performance venue rental, recording fees, guest performing artist/composer fees and related expenses to continue and expand would-class orchestral music offerings in traditional and non-traditional venues in the City of Rancho Cordova.	$ 26,000.00
14	Arts, Culture, History, Entertainment & Sports	Sacramento Children’s Museum: General Operations Support	The Sacramento Children's Museum requests funding for three years to support their rebuilding efforts so that they can create more engaging and innovative learning experiences for children. Funding will ensure their stability as they move forward in rehiring staff, increasing hours and capacity, and bringing back community events. With funding support they aim to increase education staffing, hire marketing staff, implement a retention plan for current staff, host six large special events annually, and offer 50% of events at no cost to visitors.	$ 150,000.00
15	Arts, Culture, History, Entertainment & Sports	Sacramento Philharmonic & Opera: Rancho Cordova Pop-Up Concerts	With grant funding , the Sacramento Philharmonic & Opera would be able to again present a free concert series (at least five concerts, depending on the number of musicians) in locations throughout Rancho Cordova. These concerts would take place in different venues throughout Rancho Cordova and would feature small groups of musicians (4-6) who could perform a variety of classical, pops, and other styles of music. Due to the flexible nature of these concerts, they could tailor each presentation to make it most engaging for the intended audience and for the location. For these performances, they would look to again collaborate and communicate with established partners to assess dates and times for performances that they could perform in conjunction with, and potential new opportunities for concerts that would be impactful for the community.	$ 15,000.00
16	Arts, Culture, History, Entertainment & Sports	Hummingbird Theatre Company: 2022-23 Season	Hummingbird Theatre Company wants to make theatre accessible to the people. They believe in engaging audiences with performances that no only reflect thoughtfully, laugh longer, and feel more, but also inspire pride in their hometown of Rancho Cordova. This season, they would like to bring some laughter and cheer to the children of Rancho Cordova by presenting “From the Page to the Stage” Literary Adaptation Children’s Show in either November or December of 2022. This production would be a one-hour touring show suited for all ages, where they would bring classic children’s stories and tales to life by adapting and performing them onstage. Their show in April, would be geared towards the whole family, as they would like to present “The Greatest Showcase” – a Musical Theatre Broadway Review. This show would feature local talented performers singing, dancing, and acting out songs from musical theatre favorites, such as Phantom of the Opera, Shrek the Musical, Hamilton, and Rent.	$ 29,800.00

App.	Category	Application Name	Applicant's Project Description	FY 2022/2023 Requested
17	Arts, Culture, History, Entertainment & Sports	CCCF: Rancho Cordova Youth Poet Laureate	The project would provide funds to the Cordova Community Council (CCC) to further develop and conduct a Youth Poet Laureate program for the City of Rancho Cordova which is in alignment with the National Youth Poet Laureate program. Using a timeline that aligns with the National Youth Poet Laureate program, the CCC would design a Rancho Cordova schedule and program which would eventually put local contestants in line to compete for the national title. The CCC inherited this project late in 2021-22, too late to engage in the national program. By extending the project into 2022-23, the CCC believes a local program can align with the curriculum and standards developed for the national program and launch with the cooperation of local schools and teen organizations. The National Youth Poet Laureate program celebrates the nation's top youth poets who are committed to artistic excellence, civic engagement and social justice. As part of this national framework, which CCC has joined, the national organization works with local youth literary arts organizations to identify and celebrate exceptional youth poets who use their voice to inspire change.	$ 10,000.00
18	Arts, Culture, History, Entertainment & Sports	Department of Sound: Valley Producer Pop-ups	Department of Sound provides opportunities to youth through music and podcasting education. They seek to hold 10 Valley Producer Pop-up events throughout Rancho Cordova to engage young people in the community through music and podcast production. They are a Sacramento-based 501(c)(3) providing opportunities to youth through music and podcasting education, focused on students aged 11-24 in under-serviced communities. As of 2022, they've partnered with 13 schools in 4 districts in Northern California. In addition to their existing partners, they seek to collaborate with other local organizations such as Unseen Heroes' NeighborGood Market, Robert Family Development Center Pop-up events, Anatolia Community Center, local events, Creative Kids Craft Fair, and the Chamber of Commerce Business Expo & Job Fair. The pop-up events include music production petting zoos featuring musical instruments, audio equipment, and production software for participants of all ages to experiment with and create content. Pop-Ups also include beat showcases, in which students share their music and podcast projects with the community. The benefits of music and sound include mental health benefits, improved social skills, attendance, and academic performance, and potential economic opportunities in the music and entertainment industry, as well as a sense of belonging for students through shared experiences of creativity.	$ 35,268.80
19	Arts, Culture, History, Entertainment & Sports	Ankur, Inc.: Festival of Knowledge	A grant would provide funds to Ankur to organize and host the Festival of Knowledge a whole day/night event, symbolizing and celebrating education, arts, and culture. The event displays the talent that children and adults have in various arts and cultural fields. This includes an essay competition, music, dance performances, drawing exhibitions, public speaking, etc.	$ 12,500.00
20	Arts, Culture, History, Entertainment & Sports	Marathi Mandal Sacramento: Ganesh Festival	Marathi Mandal Sacramento (MMSAC) is a non-profit and charitable organization that brings together Marathi speaking families in the greater Sacramento area. Their mission is to celebrate the Maharashtrian culture, traditions, and customs. They organize activities and events and are seeking grant funds to hold the Ganesh Festival in Rancho Cordova. The festival generally falls in mid-August to September and marks the birthday of the elephant-headed Lord Ganesha. Ganesha is known as the God of wealth, sciences, knowledge, wisdom and prosperity.	$ 2,000.00
21	Arts, Culture, History, Entertainment & Sports	Sacramento Telangana Association: Festival of Flowers	A grant would provide funds to Sacramento Telangana Association (STA) to organize and host the "Bathukamma" Festival known as the Festival of Flowers. Every year during the September - October timeframe the festival is held and celebrates the inherent relationship between earth, water, plants, flowers, and human beings. They are partnering with other nonprofits and organizations for wider community outreach. A grant would allow STA to help educate and organize this unique festival in Rancho Cordova.	$ 12,000.00
22	Arts, Culture, History, Entertainment & Sports	Sacramento Telangana Association: International Kite Festival	Sacramento Telangana Association (STA) proposes to bring the International Kite Festival to the City of Rancho Cordova. Across the world and the United States, many cities have similar festivals held annually and attracts kite flyers from all over. STA and Rancho Cordova Travel and Tourism (RCTT) will be partnering to bring an International Kite Festival to the City of Rancho Cordova. RCTT will help promote it with an objective of promoting tourism to the City of Rancho Cordova. This will be a free event open to all ages.	$ 3,000.00

App.	Category	Application Name	Applicant's Project Description	FY 2022/2023 Requested
23	Arts, Culture, History, Entertainment & Sports	Sacramento Telangana Association: Festival of Colors	A grant would provide funds to Sacramento Telangana Association (STA) to organize and host the Festival of Colors. STA will be partnering with WeEmbrace and other community organizations to celebrate the Festival of Colors in 2023. This festival marks the arrival of spring and is a celebration of fertility, color, and love, and a time for people to get together and enjoy themselves with friends, families and the community. STA partners with WeEmbrace serving families of individuals with disabilities.	$ 3,000.00
24	Arts, Culture, History, Entertainment & Sports	Kannada Sangha of Sacramento: 2023 Multi Cultural Community Event Festival of Arts & Culture	Kannada Sangha of Sacramento (KSS) celebrates multiple events in the greater Sacramento area during the year to bring community members on to one stage to share happiness, educate the significance of art and culture and encourage community involvement. KSS is a non-profit and charitable organization committed to preserve and promote the art, culture, and history of India through multi-cultural activities in the community. KSS also conducts educational and leadership workshops for the community members. KSS is seeking grant funds to celebrate Ranga Vasantha which will be the Festival of Art & Culture in the April to May timeframe. The festival is an event which is conducted to welcome spring. People perform stage plays depicting mythological characters or Indian folk dances. This also gives an opportunity for high school students to actively participate on stage and help in lighting and dialog prompting arrangements.	$ 12,000.00
25	Arts, Culture, History, Entertainment & Sports	FCUSD: Community Cultural Appreciation Concert	The Folsom Cordova Unified School District (FCUSD) serves students and families from a variety of diverse cultures. FCUSD wishes to create an opportunity for students and the community to engage in and celebrate the diverse cultures through music. FCUSD would create an opportunity to appreciate the Armenian culture by creating an opportunity to learn about and hear folk music. The project would include working with an Armenian musical group to provide a learning opportunity for both students and the general community. The Cordova High School Performing Arts Center would be the venue for the project. The performance group, Chookasian Armenian Concert Ensemble would be secured to do a matinee performance during school for students and on the same day, do an evening performance for the community. Both events would be free of charge to students and the community to attend. The performances would occur during March 2023.	$ 7,912.00
26	Arts, Culture, History, Entertainment & Sports	Indian Association of Sacramento: Teej Festival	The Teej Festival brings diverse women to a single platform to celebrate togetherness with singing, traditional dance performances, enjoying a grand feast and praying to Lord Shiva, an Indian God. The Indian Association of Sacramento (IAS) is a non-profit organization that aims to share and showcase the cultural beauty with their fellow citizens in the greater Sacramento area and keep the culture alive for future generations. IAS is responsible for development and delivery of this project.	$ 9,000.00
27	Arts, Culture, History, Entertainment & Sports	FCUSD: Athletic Improvement Plan	This proposed project would provide for increased opportunities for student-athletes for afterschool sports. This plan encourages physical fitness as a positive outlet for afterschool sports. This project will enhance the educational programs and athletic programs at Cordova High School, Mills Middle School, and Mitchell Middle School. Evidence supports that one of the best Positive Behavior Intervention and Supports (PBIS) for students is athletics. During the COVID-19 pandemic the need to support Social Emotional Learning (SEL) for our students is greater than ever and athletics is one of the best models for SEL. Ensuring our athletic programs have the necessary equipment, supplies, and means to support our students is paramount to the success of our community.	$ 200,000.00
28	Arts, Culture, History, Entertainment & Sports	Ranch Cordova Student Athlete Coalition: Cordova High School Athletic Improvement Plan	The Rancho Cordova Student Athlete Coalition (RCSAC) has worked with Folsom Cordova Unified School District staff to identify academic and athletic needs at Cordova High School. The purpose of RCSAC is to equitably and efficiently support and recognize the diverse Rancho Cordova student-athletes while maintaining, improving, and upgrading all that is Rancho Cordova athletics. Funding will support tutoring programs, educational field trips, advertising and marketing, physical improvements such as a new marquee and signage, some general facility improvements, recognition awards, and salaries for additional coaches, trainers, and enrichment staff. RCSAC has a booster club component and through this, aims to increase the fundraising efforts at Cordova High School. This is a multiyear request.	$ 196,500.00

App.	Category	Application Name	Applicant's Project Description	FY 2022/2023 Requested
29	Arts, Culture, History, Entertainment & Sports	Rancho Cordova Track Club: Implements and Equipment	The Rancho Cordova Track Club seeks funding to provide the youth-athletes participating in track and field and cross country the proper tools to develop in their events. The implements and equipment they are seeking will make practice and competition much easier for the coaches to demonstrate to the youth-athletes; and help them perform to the best of their ability. These implements and equipment will be used for years to come and help many generations of youth-athletes. Rancho Cordova Track Club will continue to host events and provide opportunities for youth-athletes in Rancho Cordova and the greater Sacramento area. Their vision is to be the track and field, cross country, and road race destination.	$ 25,000.00
30	Arts, Culture, History, Entertainment & Sports	CCCF: Youth Sports Fee Assistance	This project would provide funds to the Cordova Community Council for distribution by the Rancho Cordova Athletic Association (RCAA) to create and manage a fee assistance program for children unable to participate in youth sports programs due to family financial barriers. Cordova Community Council will work with RCAA to establish criteria for assistance, operational guidelines for distribution of funds, as well as bookkeeping and reporting operations. This is a multiyear request.	$ 22,000.00
31	Arts, Culture, History, Entertainment & Sports	CCCF: Youth Sports Leagues Promo Campaign 2022-23	The project would provide funds to the Cordova Community Council to assist the Rancho Cordova Athletic Association (RCAA) to continue efforts to improve and expand promotion of youth sports leagues in the City of Rancho Cordova. The project will utilize digital and traditional outreach efforts to boost the profile of youth sports leagues, including collaborative efforts which include mass distribution of flyers, development of high quality and effective signage and an expanded means to extend information to grow year-to-year league participation by 5 percent. This project will build upon previous upgrading of youth sports leagues digital profiles at www.rcathletics.org. The elevation of publicity for youth sports is critical to success for these leagues. During league COVID shutdowns, Rancho Cordova recreational leagues reported that many families have left their leagues to play in “pay to play” private leagues, especially among older players. Leagues will need to be rebuilt with younger players and parents with less experience in skills such as coaching and officiating. This is a nationwide challenge of the post-COVID era. This proposal would also continue to expand the outreach to schools in Rancho Cordova that are part of the Elk Grove and Sacramento City Unified school districts.	$ 42,000.00
32	Arts, Culture, History, Entertainment & Sports	Rancho Cordova Track Club: Outdoor Synthetic Track	Rancho Cordova Track Club is in need of a home track and field location for local Rancho Cordova community athletes and other track club members. They are seeking grant funds to build a new outdoor synthetic track on existing Rancho Cordova (City owned) property. Future plans would include building fields and amenities that would support additional Rancho Cordova youth leagues such as baseball, soccer, football, cheerleading, rugby, and lacrosse. New build items would include an 8-lane synthetic track, steeplechase pit, long jump pit, discus ring, and moving the existing hammer cage to the new home track location.	$ 3,000,000.00
33	Arts, Culture, History, Entertainment & Sports	CCCF: Renovation and Maintenance of Youth Sports Facilities	This project would provide funds to the Cordova Community Council (CCC) on behalf of the Rancho Cordova Athletic Association to be expended for materials and services to improve and maintain youth sports fields and facilities located on property owned by the Folsom Cordova Unified School District (FCUSD) and/or Cordova Recreation and Park District (CRPD). The project is currently operating in the City of Rancho Cordova, wherein the school district or park district provides labor or other services for field or facility improvements and repairs on their property with material and other services costs, and volunteer effort provided by the Rancho Cordova Athletic Association (RCAA). The projects are selected by a consortium of Rancho Cordova youth sports league leaders organized under the RCAA, a project of the CCC. The sports leagues which stand to benefit from this project include Rancho Cordova Little League, Cordova Girls Softball, Rancho Cordova Soccer, Rancho Cordova Track Club, Cordova Blue Marlins, Cordova Cordettes, Cordova Jr. Lancers, and possibly others.	$ 50,000.00

App.	Category	Application Name	Applicant's Project Description	FY 2022/2023 Requested
34	Arts, Culture, History, Entertainment & Sports	Sacfit: Parkway Half Marathon	Sacfit proposes to continue funding of the Parkway Half Marathon and Otter Run to align as a first-class major active-lifestyle event with the City of Rancho Cordova. There are two components of the request. First, maintain the start and finish line configuration from the previous year's grant, which considers the start line in William Pond Park (to facilitate larger volume parking accommodations) and all finish lines and the entire Kid's Otter Dash within the Rancho Cordova City limits. The section along the American River Parkway, from River Bend to Sunrise, is the main route for the Parkway Half Marathon. A grant to continue the Parkway Half Marathon route and finish line within the Rancho Cordova City limits aligns the City with a major running event, as well as a meets the goal of having a community health a fitness event. The alignment of the Parkway Half Marathon with Rancho Cordova elevates the City as a primary regional supporter of the Parkway. Having the race route and finish line within the City and connected to other existing events should be beneficial to all local residents. Second, maintain support for the Kid's 1k "Otter Dash" run. The goal is to align this event to the morning of Kids' Day in the Park. As Kids' Day is no cost to participants, the object is to continue with keeping the Otter Run at no charge to all Rancho Cordova children as well.	$ 15,000.00
35	Arts, Culture, History, Entertainment & Sports	Mather Wrestling Club	The sport of wrestling is offered for girls and boys at both Mills and Mitchell Middle Schools and Cordova High School. The Mather Wrestling Club is a youth sports and fitness club providing an outlet for youth (girls and boys) between the ages of 8 to 14. The club promotes community pride and supports the growth and development of youth. Participation in the club will include an application and anticipated fee of $75. Scholarships will be made available to those who cannot afford the participation fee up to the allotted grant funds made available to award scholarships. An optional competition would be offered. Club members will need a USA wrestling card to compete and tournament fees to be paid by wrestler at the venue. Parents would provide transportation. Coach Zilles will be at tournaments with pre-planning for those wishing to compete at a local event. Coach Zilles has been coaching wrestling at Mitchell Middle School for the past 6 years.	$ 24,000.00
36	Arts, Culture, History, Entertainment & Sports	Sacramento Area Bicycle Advocates: Capacity Building for Community Bicycling in Rancho Cordova	Sacramento Area Bicycle Advocates (SABA) and Bicycle Advocates of Rancho Cordova (BARC) seek funding for a host of activities that encourage bicycling in Rancho Cordova. Activities include valet bicycle parking at community events, bicycle repair and maintenance clinics, social rides, bicycle education, and a bicycle apprenticeship program and outreach. SABA and BARC have provided experiences for Rancho Cordova community members with grant funds from the City. These funds have provided bicycle encouragement activities for Rancho Cordova citizens, and has built capacity in BARC, with the goal that it become a self-sufficient bicycling non-profit. These activities have all been a part of a larger community cycling program for Rancho Cordovan citizens. BARC will provide valet bike parking at a full set of venues this year. With funding from the 2021-22 grant plus a sponsorship acquired by SABA, they supported four Rancho Cordova community members in becoming Licensed Certified Instructor's (LCI) with the League of American Bicyclists. They will provide RIDEshops - quick education and refresher skill builders - before social rides and BARC will organize and implement two bike rodeos. SABA will provide a senior LCI to coach the new LCI's, increasing the reach of the events. SABA's vision is to open a "Bicycle Fix-it Kitchen", a place where community members can work on their own bicycles, or have them worked on by mechanics who have completed SABA's mechanic apprenticeship program. This program teaches basic mechanic skills. SABA's apprenticeship program will produce a cohort of bicycle mechanics who can work in the community on bicycles in need of basic repair.	$ 18,585.00

App.	Category	Application Name	Applicant's Project Description	FY 2022/2023 Requested
37	Education	916 Ink: Find Your Voice Creative Writing Workshop Series	916 Ink will partner with classroom teachers to provide high-quality, creative writing workshops for 175 third through twelfth grade students. Each student will receive 18 hours of California arts and common core standards-aligned instruction with trained teaching artists and become a published author in an anthology of student work. Find Your Voice is a semester-length, school site–based program. Students generate original poetry, fiction, and creative nonfiction. 916 Ink releases one anthology of student work per school site at the conclusion of each program. During the COVID-19 pandemic, 916 Ink's staff found that students were struggling to process their feelings of anxiety and social isolation due to the shift to distance-learning and the suspension of many wraparound services that schools provided. Using best practices in trauma-informed curriculum design, 916 Ink staff pivoted quickly to design a series of creative writing lessons. Students develop social emotional learning skills through interactive writing prompts, revision-based activities, and lessons in literary devices. This helps students realize the impact of obstacles, relationships, and decisions they make. Our workshop method creates a safe environment for exploration and experimentation for participating students. The writing and sharing of stories builds empathy, increases confidence, and gives youth the agency to understand the power of their personal narratives. We structure our workshops to stimulate social emotional learning, including small group settings, peer collaboration and reflection exercises, multiple modes of response, active listening practice and peer-to-peer feedback.	$ 52,506.96
38	Education	FCUSD: Mills Middle School Positive Behavior Intervention Supports	The Positive Behavior Intervention Supports (PBIS) team at Mills Middle School supports the student engagement and the behavioral success of all students. Additionally, the program supports and promotes the climate and culture of the school. They do this through the use of reward and incentive programs as well as student engagement programs. All students begin the school year with 100 merits. Students are required to maintain 96-100 merits to be eligible for participation in school social activities including but not limited to: dances, rallies, assemblies, Friday rewards, Mills scholar events, access to the blacktop at lunch, sporting events, field trips and more. The program is restorative and students may earn merits back at any time by completing merit recovery which includes restorative conversations, helping a teacher in the classroom, campus beautification, letters of apology, participating in conflict mediation, lunch detention, etc. Students with 96 or more merits are rewarded bi-monthly with our rewards. Each month Mills has a "Behavior of the Month" which is one of their Mustang Pride 5 P's (Positive, Polite, Productive, Prompt and Prepared) behaviors. Lessons are taught during Advisory class that promote the monthly behavior. Students may earn Mills Bills for exhibiting the positive behavior to use at the Student Store. Students are rewarded by being nominated at Mustang of the Month and/or receiving Mills Bills for demonstrating the Behavior of the Month or the Mustang Pride 5 P's. The program also includes academic goal setting and field trips. This is a multiyear request.	$ 20,000.00
39	Education	CL3: Mentors at Cordova High, Mills, and Mitchell	This project is to continue the Mentors at Cordova High and MACH @ Mills programs, and expand the program to Mitchell Middle School. The MACH program is a free community-based mentoring program focused on promoting positive behavior, improved academics and attendance, community service, and life and vocational skill development while rewarding participants for their accomplishments. Students identified by school staff, teachers, and the MACH program coordinator, are invited to participate in the program. Students receive guidance and direction to help get them on or keep them on a positive path. Participants earn rewards for demonstrating improvement in their attendance, grades, and/or behavior as well as for participating in community service opportunities. Rewards include educational experiences, school based rewards, and social rewards. MACH participants attend weekly meetings where expectations are set, guest speakers from the community deliver life skill or messages about particular vocations, and program participants share and celebrate their successes. Monthly Saturday support sessions and weekly group tutoring sessions are held to provide participants with homework support as needed. Funding is being requested for the continuation of the year-round MACH program at Cordova High School to include an increase in the funding in the educational rewards category so that we can take selected MACH members on a field trip to the Museum of Tolerance to participate in their full day Tools for Tolerance Teen workshop; for the continuation and further development of the MACH @ Mills program that was implemented in 2021; and to expand the MACH program to include Mitchell Middle School. Beyond the immediate benefit the students participating in the program receive through the rewards they earn and the successes they achieve, the community at large benefits through the reduction in behavioral issues in the community amongst participants and through their contributions as volunteers.	$ 103,000.00

App.	Category	Application Name	Applicant's Project Description	FY 2022/2023 Requested
40	Education	Center for Land Based Learning: The Student and Landowner Education and Watershed Stewardship Program with George Washington Carver School of Arts & Science	The Student and Landowner Education and Watershed Stewardship (SLEWS) program engages high school students in habitat restoration through a series of hands-on field days at real projects that develop science skills and environmental stewardship in youth. Through his program, they would work with students from George Washington Carver School of Arts and Science to complete a restoration project that would incorporate hands-on, place-based, environmental education activities. SLEWS connects classroom learning to the real world to enhance high school education and provides students with transformative experiences in nature to increase their appreciation, commitment and respect for sustainable agriculture and the natural world. SLEWS staff recruit and train volunteers from non-profits, public agencies, and universities to mentor students throughout their SLEWS year. In the program, students "adopt" their restoration site for the duration of the school year, visiting and working on the project for three or more full-day field trips. Through hands-on activities such as water quality and bird box monitoring, students develop science and inquiry skills needed for lifelong learning. Because they partner with restoration professionals from public agencies, local watershed groups, and nonprofit organizations, SLEWS projects have a real and lasting impact on the land. Since its inception, students have planted over 75,021 native trees/shrubs, 332,967 grass/forbs plugs, and installed 827 wildlife structures. By including students in habitat restoration, SLEWS addresses the needs for healthier land and more wildlife habitat, and the need to instill conservation and stewardship values in high school students. With grant funds, they would be able to expand the SLEWS Program to include Carver and offer local youth these experiences.	$ 15,000.00
41	Education	SCUSD: Carver College Prep and Summer Bridge Program	The Carver College Prep and Summer Bridge program will create a space where students from George Washing Carver School of Arts and Science and throughout Rancho Cordova can reconnect to school, make up graduation credit and prepare for the college application process. Students will be able to choose to participate in one or both of the courses available in the summer program. Students continue to struggle with the transition to full in-person learning. Their challenges are multi-dimensional: they continue to lose valuable time learning in-person with their peer groups and teachers; they continue to have difficulty socially because of their previous isolation; they continue to lose opportunities to prepare for the college application process including taking college admissions tests. College application process has become very uncertain of their options and opportunities. The Carver College Prep/Summer Bridge Program will provide more guidance and access. This is a multiyear request.	$ 29,150.00
42	Education	Soil Born Farms: Rancho Cordova Food, Health and Environmental Career Pathway Program	Soil Born Farms will continue to grow the impact and sustainability of Rancho Cordova's K-12 food, health, and environmental career pathway. School garden support systems will be expanded, curriculum will be integrated at the district level, and students will dig into experiential learning at Soil Born Farms. The proposed project will build on past years' successes and continue to grow a comprehensive, standards-based career pathway in partnership with target Rancho Cordova schools, including Cordova Gardens, White Rock, Cordova Meadows, A.M. Winn, Mills Middle School, Cordova High School, and additional sites based on school interest.	$ 72,875.00
43	Education	FCUSD: Physical Education Enhancement	This proposed project seeks to enhance the physical education programs at each of Folsom Cordova Unified School District's (FCUSD) school sites in Rancho Cordova to promote a healthy active lifestyle and lifelong exercise learners. If funded, it will allow school sites the opportunities to update equipment and accessories to provide students with a more robust fitness experience. Traditionally, the physical education programs have gained support from parent organizations and site funds. This has not been available for various reasons at this time. Grant funds would be used at all FCUSD sites in Rancho Cordova.	$ 110,000.00
44	Education	PRO Youth - Governments Engaging Youth in the City of Rancho Cordova	Youth @ City Council and Summer @ City Hall provide Rancho Cordova youth opportunities to learn about City functions and civic processes. Participants gain a unique perspective into City Hall as they interact with City staff and leaders while also gaining valuable skills that support their success as students and community leaders. The program provides a two-pronged approach for 60 youth, ages 13-18, to engage in government and civic education in the City of Rancho Cordova. Students will learn more about the history of Rancho Cordova and be provided with opportunities to share their views and suggestions for continuing to improve community relationships by making the City a welcome and safe place for all. Youth participants will meet and interact with local and regional leaders in the private, public, and non-profit sectors to learn about those leaders' views of the business/economic climate in Rancho Cordova and share their own views on innovative and creative ways the City can thrive.	$ 81,188.00

App.	Category	Application Name	Applicant's Project Description	FY 2022/2023 Requested
45	Education	FCUSD: Enhanced Family Life Education for Cordova High School Students	The health education staff at Cordova High School would like to purchase parent simulator dolls to provide hands-on parenting experience. The goal is to educate students about the responsibility of caring for a baby and the importance of preventing pregnancy until ready to take on the responsibility of parenting. According to Sacramento County Public Health, In 2018, the teen birth rate was 5.5 births for every 1,000 females ages 15-19. An estimated eight percent of young men will become fathers before their 20th birthday. Teen pregnancy has a significant impact economically. Teen parenting costs taxpayers an average of $5,500 per year for each teen parent. Teen parents and their children usually require an increased amount of public service support throughout their entire lives related to behavioral problems, chronic medical conditions, and increased need for foster care. The economy also has lost tax revenue due to the teen mom having low academic achievement which often leads to the mom being unemployed or underemployed. One effective way to prevent teen pregnancy is through comprehensive family life education. Comprehensive family life education includes topics about healthy relationships and methods to prevent pregnancy; including abstinence and proper use of birth control. Per California law, high school students must receive family life education at least one time during high school. The family life curriculum that is taught in the health classes is Positive Prevention Plus which is an evidence-based curriculum that is compliant with California's law.	$ 5,000.00
46	Education	Boys & Girls Club: Navigator Elementary	The Boys & Girls Club program would continue its work at Navigator Elementary, providing a comprehensive after-school program Monday-Friday for over 100 Navigator students during the school day through targeted outreach activities. Despite the COVID-19 pandemic, the Club has continued to serve hundreds of youth on the campus of Navigator Elementary; providing academic support and enrichment programs designed to keep youth on track and successful both in and out of school. The Club has become a trusted partner and valued member of the school team; providing additional academic support and resources to the schools most vulnerable students. Twice weekly the Boys & Girls Club facilitates High-Yield Learning Activities (HYLA) at recesses that are open to all students on campus. Their Site Coordinator is always "on call" at Navigator during the school day, there to assist with students who have behavioral issues and need time away from the classroom environment. They work with those students to process through their behavior/feelings, offer guidance, and redirect the youth back in to the classroom in a better frame of mind. The Club focuses on helping youth in three critical areas; academic success, good character and citizenship and healthy lifestyles.	$ 75,000.00
47	Education	FCUSD: Book Recovery and Expansion	During the 2020-21 and 2022-23 school years, FCUSD library staff encouraged families to check out books from their school library. This initiative helped curb learning loss, contributed to social-emotional learning while at home, and emboldened students to continue their love of reading despite distancing from one of their favorite places on campus. This was a successful campaign, as thousands of books went home with students at curbside pickups. Due to circumstances beyond families' and the district's control, many of these books did not return to campus. Several titles were school libraries' most popular novels, non-fiction texts and picture books. They would like to recover these lost books with the help of grant funding. In Rancho Cordova, 22 percent of students met or exceeded state reading standards. In Folsom, 52 percent of students met or exceeded state reading standards. According to the American Association of School Libraries, when spending for libraries rises, better reading scores follow. Furthermore, the average age of Rancho Cordova school library collections is 1999, which is a 23-year-old collection. This means many non-fiction books are outdated and need replacement titles for factually accurate information. New titles, which better reflect student background and life experience, ought to be added to library collections. As an educational institution, newly purchased titles are essential so that they can align themed and non-fiction books to supplement their curriculum and select material that reflects each school's population. Their request is for one additional new library-bound book per Rancho Cordova student this year, with the goal to fully realize a 20:1 ratio in four years. This is a multiyear request.	$ 153,000.00

App.	Category	Application Name	Applicant's Project Description	FY 2022/2023 Requested
48	Education	SCUSD: “A Day in the Life” A Collaboration with George Washington Carver School of Arts and Science and California Capital Film Office	"A Day in the Life" program is a collaboration between California Capital Film Office and George Washington Carver School of Arts and Science. California Capital Film Office will work directly with Carver students to produce a 10-15 minute documentary relevant to the City of Rancho Cordova. Student documentaries will have the possibility of being showcased in the annual Documentary Film Festival with the school participating as one of several viewing locations. As a Waldorf school, arts integration is fundamental to student learning; however, Carver has lost many of their arts programs due to limited funding. The partnership with California Capital Film Office provides students the opportunity to engage in every aspect of film production, explore career possibilities in the film industry, learn about the people and the City, highlight the City of Rancho Cordova, enter and host the annual Documentary Film Festival while earning community service credit. The finished product would be of broadcast quality and able to be screened. The students would be guided through the whole process.	$ 48,500.00
49	Education	Save the Snakes: Snakes to Schools Project	The Snakes to School project seeks to educate elementary through high school-aged students, teachers, parents, and other outdoor enthusiasts in the Sacramento region about snake ecology, snake conservation, and snakebite first aid. Although there is only one venomous snake (the Northern Pacific rattlesnake) in the Sacramento area, encounters with them are common and serious rattlesnake bites do occur. Many snakes that live in human occupied areas are killed regardless of if they are harmful or not, because of fear. Snakes play a crucial role in ecosystems by maintaining ecosystem health and environments, however, their role is often highly overlooked. To address these issues, Save The Snakes seeks to empower our community members to safely coexist with snakes through their education and outreach programs. Their community of wildlife biologists and educators will implement all objectives of the Snakes to Schools project to mitigate human-snake conflict in the Sacramento area through effective education about snake ecology and wildlife conservation. The overall goals of the Snakes to Schools project are to successfully educate communities and learners about snakes found in the Sacramento area, which will build awareness and understanding of snakes, reduce snakebite, and lessen conflict between humans and snakes.	$ 6,300.00
50	Education	FCCP: VSP Professional Pathways	Folsom Cordova Community Partnership (FCCP) is proposing to provide professional pathways to students who want direct employment placement with VSP. VSP is one of their recent partnerships added to provide students who completed a career assessment the opportunity for training and future job placement. FCCP’s Youth Engagement Specialist will provide one-on-one support to help with outreach, recruitment, enrollment and ongoing support to students during their training. Enrolled students will be provided further support to address barriers that arise. FCCP’s partnership with VSP is a direct investment into Rancho Cordova’s workforce development. The career assessment fosters career awareness but more importantly reveals the top three areas of interest.	$ 25,009.20
51	Education	FCCP: Youth Career Centers	The goal of this project is to continue providing career development services for students at Cordova, Walnutwood and Kinney High Schools. The Youth Career Center (YCC) will allow students to graduate with firsthand exposure to a wider array of career opportunities, an informed sense of their career direction, and a strong correlation between continuing education and achieving their career goals. FCCP has established a solid base and has exceeded outcomes in the three previously funded fiscal years and continues to see the number of students they assist grow each year. The components of this project include: intentional career planning, integrated workplace experiences, and adulting skills.	$ 55,865.60
52	Education	SAC Connect: The Connect Workshop	The Connect Workshop is an 8-week workforce development training program for underrepresented youth/young adults ages 16-24 that provides independent living skills, lessons, and tasks to enhance mental heath and wellness. Participants who attend the weekly groups will receive a monetary stipend upon completion of group curriculum and tasks. Up to 32 youth and young adults will participate in the weekly groups and complete two community service projects. The Connect Workshop project is a curriculum designed to provide youth and young adults with the relevant research, job training and education to assist in supporting long-term employment and/or applying to an educational program. Youth and young adults will have the opportunity to employ career fields, job shadowing, college tours, networking and more through the Connect Workshop project. The location of the group meeting is TBD.	$ 80,000.00

App.	Category	Application Name	Applicant's Project Description	FY 2022/2023 Requested
53	Education	FCCP: Financial Empowerment	Folsom Cordova Community Partnership (FCCP) was able to create a financial empowerment program through a pilot grant from the Office of Child Abuse Prevention (OCAP). Although this grant came to an end, it provided them with seed money to develop and adopt Consumer Financial Protection Bureau's (CFPB) financial empowerment curriculum and tools to the unbanked and underbanked. They have created visuals, activities and handouts to provide an experience that addresses all learning modalities in multiple languages; English, Spanish, Farsi, Russian and adding Armenian, Hindi and Ukrainian. Each language series has specific adoptions based on cultural specifics regarding money and banking practices. They have piloted and administered this teaching series in both classroom and web-based modules as well as through one-on-one financial coaching. They have been funded by Calmoney Smarts based on their success and demand for financial empowerment to serve an additional 80 participants throughout Sacramento County. They are seeking grant funding to increase their capacity further to serve and target 80 Rancho Cordova residents to receive a comprehensive financial empowerment curriculum.	$ 59,963.60
54	Education	Sacramento Splash: Youth Environmental Leadership Camp	Youth Environmental Leadership Camp (YELC) is an immersive summer program for 6th/7th grade students. Campers will attend a 1-week camp, Monday - Friday from 8:30 a.m. – 5:30 p.m., in groups of 15 where youth will design and implement climate-smart solutions aimed at improving air/water quality and/or natural habitats where they live. They will be conducting four weeks of camp. During the week-long camp, each day they will cover topics related to climate change including but not limited to: air quality, water, energy, transportation, food/consumption/waste, land use, and natural habitats. The campers will visit local sites for hands-on guided experiences related to these topics. Campers will sample and collect data, gaining experience using some of the tools and materials that scientists and engineers use in their work. Campers will get the chance to engage with professional environmental scientists, engineers, social scientists, and environmental protection activists to learn about their careers and what they did to work in their specific fields of expertise. After the camp, Splash will convene YELC campers monthly in a 2-hour after-school club for the remainder of the 12-month rolling year. Campers will work together on a team project that will have a positive impact on the environment and climate in their community. They will learn about project management, from identifying & defining a problem, to planning & budgeting, project implementation and measuring their success and impact. Throughout the process, they will have the support of mentors and staff. Splash will provide a small project budget for each team to use in implementation of their team project. Projects will be brainstormed, developed, and led by campers in groups of 4-6. Mentors will guide the projects, and will also coach campers on their collaboration, engagement, listening and communication skills.	$ 45,000.00
55	Education	Folsom Lake College: Rancho Cordova/Folsom Lake College Promise Program	Folsom Lake College proposes to continue the partnership with Rancho Cordova to offer the Rancho Cordova/Folsom Lake College Promise program, providing two years of virtually fee-free education to Rancho Cordova residents. Funding of tuition, fees, books, and basic needs will continue to ensure access to education for Rancho Cordova students and veterans. Recent high school graduates who are Rancho Cordova residents receive funding. For those students who are not eligible for a California Promise Grant or Los Rios Promise grant, the funding would cover their tuition and fees. For those who qualify for one of the aforementioned grants, the Rancho Cordova Promise would provide "first dollar" aid for books, supplies, and basic needs in the amount equivalent to students' unit load. In essence, Rancho Cordova residents taking anywhere from 6-18 units would receive Promise support as participants in the Rancho Cordova/Folsom Lake College Promise Program. In addition to its support for new students, Folsom Lake College proposes to continue offering support to veteran students who are Rancho Cordova residents using the same funding parameters outlined above. Further, the college proposes to extend eligibility for the Promise program to students who are retraining/refining career skills because of pandemic displacement. Fall 21 data shows 20 new Rancho Cordova students whose goals are noted as updating career skills or pursuing a career education related certificate. As part of its expansion of the Promise program, Folsom Lake College will offer support to new students from Rancho Cordova who are pursuing career education certificates or updating job skills. This is a multiyear request.	$ 145,400.00

App.	Category	Application Name	Applicant's Project Description	FY 2022/2023 Requested
56	Education	Animation Intern Education	Animation Intern Education (AI) will provide instruction to 60 students split between two classes (30 students per class) to learn how to be Production Assistants (PA). At the completion of class, students will receive a certificate of completion. Students who complete the class will be added to the City of Sacramento Film Office hiring list as PA's. Two PA classes will be taught during the grant cycle. One class of 30 students in the Fall of 2022 and one class of 30 students in the Spring of 2023. At the completion of the class, students will receive a certificate of completion. Four computer units (hardware and software) will be purchased with the grant money to be used to create animation curriculum to be used in future classes for students.	$ 201,000.00
57	Education	Kiwanis Club of Rancho Cordova Foundation: The Kiwanis Family Literacy Initiative of the Book Buddies' Club	"The family that reads together, succeeds together" is the motto of the Book Buddies' family literacy initiative of the local Kiwanis Club. Through a vibrant, multi-agency network, Kiwanians engage the broader community in promoting reading at home, while giving books to local youth. The initiative helps families to embrace reading at home as a way to compensate for the negative impact on learning that the pandemic has had, especially for at-risk children in the community. The Kiwanis Club will expand its family literacy focus in order to help families to overcome any deficits children are experiencing because of COVID-19 and distance learning. By providing free books to local children and youth, the Kiwanis Club of Rancho Cordova creates and expands home libraries for youngsters. By providing information that promotes reading at home and embedding other family literacy activities within family-focused community events and programs, the initiative broadens the impact and visibility of the club's and community's commitment to family literacy. They will continue to distribute books through schools in Rancho Cordova, and will now include two Sacramento City Unified School District campuses in this initiative: A.M. Winn and Abraham Lincoln Elementary Schools. They will also incorporate book giveaways at community events.	$ 4,500.00
58	Education	Studio T Arts and Entertainment: Side Hustle Academy	The Side Hustle Academy was created in 2020 as a response to the pandemic. Through a grant from the City of Sacramento, they were able to build all necessary infrastructure for the program and test and refine the process across 75 youth in multiple cohorts. In addition to the training curriculum and youth-business partnership curation, they provide participants with up to three months of ongoing support to help them complete projects and monetize their new skills. The program provides underserved youth career opportunities that promote long-term economic growth, while also supporting local small businesses in the transition to a digital world. They will match 6-12 youth with local small businesses in order to create positive outcomes for both groups. Studio T will provide youth participants 120+ hours of digital marketing curriculum and training, then pair them with small businesses hit hard by the pandemic and still struggling to establish a digital presence. The participants will utilize digital expertise and innate talents to build online branding and marketing campaigns for up to 6 small businesses in the City of Rancho Cordova. Youth keenly discern the difference between quality content and design that will work and content that will not. This makes them a gold mine for content creators and focus groups for shaping what works online. With the heavy impact of COVID-19 on our youth workforce and our small business community, they seek to enhance youth employment opportunities while helping small businesses reboot, rebrand, and relaunch in the digital community.	$ 39,790.00
59	Education	California Capital Film Office, Corp.: Life! Camera! Action!	Life! Camera! Action! (LCA) is a leadership and life skills development program that will use digital video and the art of storytelling to teach Rancho Cordova youth, 12-17 years of age to become productive citizens. Partnering with the Rancho Cordova Police Activities League, LCA will be a program that will provide students opportunities to use technical and digital media to explore issues important to them and their community by developing Public Service Announcements (PSA) from concept to delivery. Students will be formed into groups and each group will decide on a PSA they want to make. They will be instructed on how to use camera equipment, lights, sound and more. Students will be shown how to download their footage from the camera memory card into a computer and introduced to the editing program Final Cut. Each group will edit their film into a 30-second PSA. Music, effects, and credits will be added. Students will be guided through the color correction process, a process that colors the film to broadcast quality.	$ 26,395.00

App.	Category	Application Name	Applicant's Project Description	FY 2022/2023 Requested
60	Education	Suvidha International: Robotics Training Program for Students	The proposed robotics program will help elementary and middle school students in grades 4-8 in designing and coding the robots to perform specialized real world operations. The program makes the students engage in STEAM subjects, hones their computer programming skills and creativity, and develops engineering skills, leadership skills, and presentation skills. These skills will also help students in excelling their regular academics and make them successful engineers in cutting edge career spaces such as aerospace engineering, computer science, medicine, and automotive manufacturing. The proposed robotics program is the continuation of previous calendar year. The program will also incorporate additional components including python coding classes and stress management training. The first year program students will have entry level training while the second year program students will have more in-depth training including maze follower. The program will continue to use previous year's robotic gear for current year training. The program will also facilitate team building activities through youth empowerment and stress-management program for students. As students learn to reduce stress and manage emotions through interactive fun games and activities, they gain the skills to build more positive relationships with their peers, parents, and coaches and can be great team members. The students also gain the ability to focus and perform well academically at school. This is a multiyear request.	$ 17,600.00
61	Education	Suvidha International: Speech and Debate Programs	The proposed educational program will help elementary and middle school students with speech and debate training sessions. The speech and debate program will provide the students with valuable skills that they will use for the rest of their lives, including but not limited to researching, writing, critical thinking, organization, persuasion, conflict resolution and communication proficiency. These educational tools are necessary in every part of our lives and successfully mastering them at a young age will allow the participants to utilize them in their day-to-day activities. Whether it is online or in person, the skills will help them articulate their opinions in a constructive format, delivering their thoughts in a clear and concise manner. They will also communicate with peers their own age, develop a level of confidence in themselves, and leave a positive impression upon the people around them. The program will engage the students and the skills acquired will help them excel in their academics and place them on a path to becoming successful future leaders in politics, business, law, academics, entertainment, and many other fields. The speech program will provide a foundation for various types of speech, categorized as oratorical, persuasive, impromptu, dramatic, humorous, and poetic. The programs attendees will be encouraged to focus their training in their preferred speech category. The introductory training classes will include demo sessions for each of the speech categories to help familiarize the students with their choices. The debate program will provide an overview of different styles of debate, categorized as parliamentary, public forum, Lincoln-Douglas, spontaneous argumentation, team policy, and cross-examination. The elementary and middle school student program attendees will receive more comprehensive training in the debate category of their choice. This is a multiyear request.	$ 7,500.00
62	Education	Falkon Academy: Competitive Robotics	The aim of this proposed project is to build competitive VEX robotics and FTW drone teams for students who are 9-15 years of age. Riverview STEM Academy has VEX robotics as part of their curriculum. These teams will build robots and drones and compete in regional and potentially state and national levels. Falkon has developed custom curriculum to teach youth. The VEX Robotics Design System, which was created by Innovation First, Inc., is recognized as a leading classroom robotics platform. It has been designed to nurture creative advancement in robotics and knowledge of science, technology, engineering, and math education. It could be compared to Lego Robotics. The added advantage of VEX robotics is that its being used at Riverview STEM.	$ 23,914.00

63	Education	FCUSD: Elementary Field Trip Partnership with Sly Park for Rancho Cordova Schools	Folsom Cordova Unified School District would like to bring more STEM focused field trip opportunities to their Rancho Cordova schools/students. Every 5th grade class will have a Sly Park experience which will result in academic gains through greater engagement. This is a growing, high demand area of study that has the potential to create substantial economic benefits for our children and community. "The study found that, regardless of gender, ethnicity or socioeconomic status, youth who take educational trips have better grades (59 percent), higher graduation rates from high school (95%) and college (63%), and greater income (12% higher annually). In fact, 89% said educational trips had a positive, lasting impact on their education and career because the trips made them more engaged, intellectually curious and interested in and out of school." -National Education Association, NEA	$ 45,000.00
64	Education	Maximum Reach 4 Economic Equity: Thinking Like a CEO: From Non-Employer to Employer	Thinking Like a CEO is a 12-month program wherein participants receive classroom instruction with hands-on experiences to address the knowledge and skills gaps as well as the thought patterns and behaviors that impede small business success. Through the proposed program, they will also receive one-on-one business coaching to develop sales and revenue generation capacity, and support services to practice and experience how hiring professional service providers for day-to-day tasks allows them to drive their business goals and achieve professional results. Participants apply their training to their businesses in real time. Each deliverable is developed and customized for their unique business needs. The program walks participants through identifying and documenting their unique goals and objectives, budgeting to meet these goals and objectives, branding and representing their businesses, building sales capacity, and finally leading teams. Their+G79 instructional team is composed of local certified professionals, including a Balanced Scorecard champion, a doctor of behavioral sciences, a Forbes 50 Champion, a multi-business entrepreneur, and a professional copy writer.	$ 75,000.00
65	Education	California PAL: The California Police Activities League's Rancho Cordova Youth Apprenticeship Readiness Accelerator Program	California PAL will provide overall coordination and management of the Youth Apprenticeship Readiness Accelerator (YARA) program. The Youth Center in Rancho Cordova is the proposed facility for the YARA program. The program will include two cohorts each consisting of 12 Rancho Cordova youth. The Cohorts will participate in a comprehensive suite of activities to explore and prepare them for living wage employment through this pre-apprenticeship program. The program will begin with the participants attending California PAL's flagship program, Life After High School Destination Success, a 4-day, 3-night conference held at Fresno State University providing college and career preparedness and workforce development skills including college/career readiness workshops and fair, life skills, resume and business interviews and motivational guest speakers from the trades. The YARA program will be the follow-up to ensure a successful pathway towards achieving career goals and living wage jobs. At the core of YARA is the Laborers Training & Retraining Trust Fund for Northern California's (LTC) Pre-Apprenticeship Construction Training, a 6-week (40 hours/week) program that includes certificates in Fundamentals of Construction, OSHA 10, First Aid/CPR, Confined Space, Traffic Control and Hazardous Waste courses. The participants will be presented a comprehensive experience with a combination of hands-on and classroom learning to prepare the participants for the next step in their workforce development journey, including but not limited to entering a formal apprenticeship or post-secondary education. A building project and graduation week activities will also be part of the program.	$ 50,000.00
66	Other	Rancho Cordova Moose Lodge: Parking Lot Improvement Initiative	The Rancho Cordova Moose Lodge parking lot has multiple sink holes and disintegrating asphalt. The proposed project will provide the Rancho Cordova Moose Lodge members and residents with a repaired and resurfaced parking lot for improved safety and accessibility. It will also benefit the many activities held in the parking lot for the community.	$ 68,000.00
67	Other	BAPS Charities: Joy Of Others Walk-Run	BAPS Charities is proud to once again support Susan G. Komen® and their fight to address breast cancer from multiple fronts. The walk is organized to celebrate the families and inspires people to carry forth the spirt of service. They are seeking funding for shirts, facility and logistics support, drinks, awards, certificates, and flyers and plan to do the fundraising walk at a Rancho Cordova park.	$ 5,000.00

App.	Category	Application Name	Applicant's Project Description	FY 2022/2023 Requested
68	Other	Blessings in a Backpack: Rancho Cordova	Blessings in a Backpack (BIAB) provides weekend food for 350 children in the local community who have food shortage issues over the weekends. Their belief is that kids should not worry about where their next meal will come from. BIAB began providing weekend food to 30 children in 2014, and have grown to over 350 kids, currently. Participating students receive free breakfast and lunch, Monday through Friday, during the school year. BIAB helps to fill that void with weekend meals geared for just that child. It's not feasible for BIAB to feed the entire family, not just from a cost standpoint, but also the children aren't all capable of bringing a big bag of food home. Whether the child receives a prepackaged kit or bulk food, it's completely manageable and easily fits in their backpack. BIAB is currently sending weekend food home for students from Williamson, Rancho Cordova, Cordova Villa, Cordova Gardens, and Cordova Meadows Elementary Schools. They also serve students at Abraham Lincoln Elementary School within Sacramento City Unified School District. This is a multiyear request.	$ 25,000.00
69	Other	Whisker Warriors Animal Defense Fund: Spay, Neuter, and Vaccine Program	The application intends to continue the funding of the spay/neuter program for canines and felines and a small number of rabbits in Rancho Cordova and the continuation of the caring of community (homeless) felines. Education and spay/neuter services are needed to reduce pet overpopulation. Felines continue to be unaltered and abandoned, which increase the need for immediate action.	$ 43,000.00
70	Other	FCUSD: CHS Locker Room Facilities Update	Enhancing the physical education locker rooms at Cordova High School to improve the aesthetics, provide a safe environment, and increase natural light, will provide a top-notch facility for students and the community. The project would allow the maintenance department to complete the renovation of the boys and girls locker room at Cordova High School. The funds would be used to purchase new lockers and windows in the existing locker rooms. Funds would also be used to install the lockers and windows.	$ 380,000.00
71	Other	SafeStation®	SafeStation® is an identification, detection, and mitigation system that gives facilities' owners and the public confidence to gather and enjoy sporting events, performing arts, shopping, traveling, or just going back to work in person. The system provides a multi-step processing sequence to reduce the risk of infectious diseases entering facilities. The system combines several technologies into one integrated packaged solution that allows efficient processing and screening of large quantities of entrants into a venue. The detection technology includes not only standard metal detection but also the latest in thermal imaging to measure human body temperature in a safe, quick and non-contact process that allows near instant detection of persons having a fever. Furthermore, it takes the next step by employing spread mitigation technologies that are safe to humans but deadly to viruses and bacteria. It uses far-UVC 222 nm light wash wavelength doses (again, in low exposure, human safe quantities) to neutralize as many pathogens as possible residing on a person and their belongings.	$ 32,800.00
72	Other	Rebuilding Together Sacramento: Home and Neighborhood Improvement Campaign	This project will support Rebuilding Together's commitment to improving homes and neighborhoods in the City of Rancho Cordova. This is a two-year request to improve 30 homes each year. Both years, 13-15 homes will receive extensive health, safety, efficiency, and beautification upgrades and 10-12 will receive minor safety modifications. The work will vary per home but will include upgrades such as landscaping, fencing, roofs, accessibility modifications, HVAC, electrical, plumbing, carpentry, and energy efficiency. The work will occur throughout the year by volunteer groups, contractors, students, AmeriCorps members, etc. The selection process includes community outreach, an application process, and a home preview using a safe and healthy homes assessment. The assessment is focused on identifying deficiencies in the homes related to the principles of keeping the home safe, dry, ventilated, pest-free, accessible, energy-efficient, and maintained. They also identify exterior improvements to enhance the look of the home and neighborhood. The homeowner is also interviewed to identify any other issues such as food insecurity. Community and City resource information is shared with those in need of additional assistance. Tackling substandard housing in neighborhoods cannot be accomplished by one organization in isolation no matter the quality of services and resources invested. They leverage the strengths of volunteers and partners including nonprofit and faith-based organizations, local businesses, financial institutions, occupational therapists, and other service providers to accomplish the project goals.	$ 150,000.00

App.	Category	Application Name	Applicant's Project Description	FY 2022/2023 Requested
73	Other	Sacramento Valley Live Steamers Railroad Museum: Locomotive Storage Building	In this proposal, the Sacramento Valley Live Steamers Railroad Museum, in collaboration with the City of Rancho Cordova, and the Cordova Recreation and Park District, intends to invest in the community through the construction of a locomotive storage building adjacent to the Hagan community barn for the secure keeping of the museum's locomotives. After 45-years of existence in Rancho Cordova, parents and grandparents bring their families to ride on the same train they have fond memories of enjoying as a child. To keep the trains moving down the track, the locomotives need a house for protection and shelter between run days. The museum has outgrown the capacity of existing storage facilities. In addition to the security the building will bring, the structure will also serve as an educational aid demonstrating to children and visitors what was once a common sight in towns throughout our nation, the locomotive house. The locomotive storage building is designed to be reminiscent of a locomotive house that might have been seen on one of California's many short line railroads. Such a building existed at the terminus of the (former) Southern Pacific line that traverses Rancho Cordova up to Folsom and then to Placerville. This structure has been designed to meet the current need for locomotive storage and the foreseen needs of the museum's future in Rancho Cordova.	$ 338,634.00
74	Other	Rancho Cordova Food Locker: Capacity Expansion	In this proposal, Rancho Cordova Food Locker (RCFL) plans to purchase and install two large refrigeration units (a cooler and a freezer) to handle the increased quantities of frozen foods provided by Sacramento Food Bank & Family Services and other local businesses and private donors. RCFL plans to use grant funds for two purposes. First, to design, purchase, and install new commercial-grade refrigeration equipment in the most appropriate location(s) to best meet operational needs. The new refrigeration equipment would be pallet-jack-friendly. The two units could be collocated either in a newly rented/leased warehouse for food storage and processing, or the cooler could be installed at the current facility instead of the contracted warehouse. The new refrigeration unit would also allow the RCFL to end its lease of one smaller walk-in cooler. The new equipment would greatly expand RCFL's food-processing capacity and also greatly improve its cost efficiency for storage. Second, if any grant funds remain after installation of the refrigeration units, RCFL would apply such residual funds toward the monthly rental costs for the off-site contracted warehouse still in the procurement stage.	$ 250,000.00
75	Other	CCCF: Mills Station Building Exterior Painting	This project would provide funds to the Cordova Community Council to enter into a contract with a painting professional to paint the exterior of the Mills Station Building, home of the MACC. The iconic Mills Station Building exterior was last painted upon arrival at its current location on Mills Station Road around 1998. The building is showing wear and paint is peeling in several locations. In keeping with its stature in the community, this project would fund pressure washing, scraping peeling paint, spot prime as needed, and applying two coats of fresh paint to exterior walls and trim.	$ 28,500.00
76	Other	Boy Scouts of America: Troop 363 Tents	Local Troop 363 needs to replace their current tents that are over 10 years old. The tents are used year-round, and the current tents require constant repair or replacement of the poles after almost every use. The current tent model is discontinued, making it difficult to keep up with the worn parts. A major component of the scouting program is camping and being in the outdoors. Troop 363 camps every month, including in the snow. In the summer, they camp up to twice a month. Scouting is designed to take place outdoors. It is in the outdoors that Scouts share responsibilities and learn to live with one another while learning skills that will last a lifetime. Giving back to the community is another aspect of the Scouting program. The Citizenship in the Community Merit Badge is an Eagle Scout required merit badge. Community service is also a component of rank advancement in Scouting. Troop 363 has done many projects in Rancho Cordova.	$ 5,291.84

App.	Category	Application Name	Applicant's Project Description	FY 2022/2023 Requested
77	Other	CCCF: RCAA Capacity Building Feasibility Study	This project would provide funds to the Cordova Community Council (CCC) to hire a consultant to explore the feasibility, potential structure, cost and benefits of creating a professional staff position to operate, expand and enhance the activities of the Rancho Cordova Athletic Association (RCAA). The CCC is currently spending great effort to keep a number of RCAA projects moving forward, but the demands of this expanding effort are growing beyond staff resources currently available to support it. This project envisions a deeper understanding of the demands and importance of this sector and solutions to its most pressing issues. This project would hire a qualified consultant to guide the RCAA in the areas of project management, fundraising and league coordination to advance and enhance youth sports offerings in the City of Rancho Cordova. Youth sports leagues are at a crossroads. Blessed with strong and dedicated leadership for many decades, there is a wide understanding among experienced leaders that over the next few years this cadre will "age out" and likely retire, leaving a big leadership gap. Continuity is a concern which could be alleviated by the formation of a staff position focused on preserving and planning for these eventual transitions. Second, Rancho Cordova is on the cusp of population explosion and more -- not less -- youth sports will be needed to make Rancho Cordova a desirable hometown for young families. A forward-looking plan of how to prepare for this growth is needed. Third, a crisis of youth sports support infrastructure is looming. A unified system that could address these needs should be developed, however league leaders currently do not have the capacity to address. Fourth, facility development and access issues, fundraising needs and opportunities, unified planning for future needs, unified publicity campaigns and more are fertile grounds for elevating youth sports in the city, making Rancho Cordova a leader in this area.	$ 45,000.00
78	Other	Boy Scouts of America: Troop 1601	Local Troop 1601, the first all-girl troop in Rancho Cordova, was established in 2019. The Troop started up with no camping supplies or tents. Scouts are expected to hold fundraisers to obtain much needed equipment and tents to participate in camping and the outdoors as this is a major component to the Scouting program. Unfortunately, COVID-19 restrictions and shut-downs prevented the girls from raising the necessary funds to purchase many items to participate in the opportunities. Troop 1601 is requesting funding to purchase new tents for year-round use to include snow camping in the winter. The troop is also in need of a patrol box for setting up a kitchen at campsite, a 3-burner camping stove and three lanterns. Troop 1601 has missed out on opportunities to go snow camping such as the annual Klondike-a competition between troops focused on cold weather activities. While Troop 1601 is relatively new in the Scouting world, they have participated in volunteer activities in Rancho Cordova. The new tents and camp equipment will allow the Troop to deliver a quality outdoor program.	$ 4,825.09
79	Other	Rancho Cordova HART: Winter Sanctuary and Homeless Services in Rancho Cordova	Rancho Cordova HART's mission is to provide services to the homeless in our community by continuing to provide life-changing services. Unhoused neighbors will receive much-needed shelter and services during the coldest months of the year. Funds will be allocated to bus passes, services to provide clients with rental assistance, move-in costs, application/background check fees, and the general operation of the Winter Sanctuary Shelter Program. Citizens and faith communities operate the Winter Sanctuary Shelter Program in Rancho Cordova to provide free overnight shelter, warmth, meals, and connection to mainline health and housing-related services for men and women who are experiencing homelessness in our area during the coldest months of winter. Potential guests are invited to arrive at the intake site each evening during the program to create a consistent meeting place. Guests of the winter sanctuary meet with the outreach navigator and, most importantly, become part of the HART family and Rancho Cordova community. Housing Counseling/Relocation - Rancho Cordova HART partners with Sacramento Self-Help Housing (SSHH) to assist those on the street or in the Winter Shelter Program, to achieve housing. SSHH helps by rapidly connecting clients with landlords, property owners, and housing program options. HART will support by using the grant funds to remove the barriers to housing by covering the costs of security deposits, bus passes, or similar "move-in costs." These funds will also go to supporting those moving out of the new transitional house.	$ 33,900.00

App.	Category	Application Name	Applicant's Project Description	FY 2022/2023 Requested
80	Other	Habitat for Humanity: Home Repairs and Neighborhood Revitalization in Rancho Cordova	Habitat for Humanity of Greater Sacramento is seeking support to work in partnership with the City of Rancho Cordova to fund 25 or more home repair projects for low-income Rancho Cordova homeowners to help beautify the neighborhood, increase neighborhood pride, and support underserved low-income homeowners with deferred home repairs. Renovation include work to correct critical exterior life/safety and structural deficiencies as well another high-priority exterior habitability repairs, and maintenance related exterior repairs such as painting and landscaping. Example renovations include replacing leaking and structurally unsound roofs and porches, correcting leaking windows, exterior painting/landscaping, substantial accessibility and aging in place upgrades, dry rot remediation, and health and safety related critical exterior repairs. The majority of the labor on Habitat projects is typically provided by volunteers. Where possible they leverage grant funding by actively soliciting in kind donations of materials to reduce project costs or layering on additional funding pools to stretch grant dollars farther and impact more Rancho Cordova households.	$ 300,000.00
81	Other	FCCP: Rancho Resilience & Reinvestment Project	This proposed project is aimed at supporting Rancho Cordova residents hit the hardest by the economic and social impacts of COVID-19. They will offer wrap-around case-managed coaching services focused on holistic support of each participant's needs. Resource Specialists offering a strengths-based, culturally responsive empowerment model will work with participants toward their financial, educational, employment, housing, domestic violence, recovery and stress reducing goals. The outcome of this program is to revitalize the community, create participant support networks and recovery to those most impacted by COVID-19. Triple R will offer participants a chance to change their lives 180 degrees. Coaches will work with participants to identify and access next steps in their social and economic recovery. Immigrants, refugees and communities of color were impacted at disproportionately with loss of employment, income and access to services throughout the pandemic. While this program does not only focus on these groups, FCCP has a strong relationship with each community in Rancho and this program will work to help participants help themselves. These supports will build community cohesion through networking, provide a positive outlet for self-discovery, inquiry, understanding and knowledge of support systems available. As each participant deepens in their own goals accomplishment and participation in programs this will provide a socio or economic benefit to the city by promoting community relations, residents' well-being, safety and increased economic stability. This is a multiyear request.	$ 1,752,074.00
82	Other	Salvation Army of Rancho Cordova Corps: Community Hub Program	This proposed project is to assist low-income elementary children and their families by purchasing school supplies and related items for them. Each student will have $100 to shop at a local store for school supplies or school related items only. This may include things such as writing materials, paper, notebooks, binders, backpacks, desk supplies, folders, hand sanitizer, school uniforms, shoes, socks, jackets, sweaters, etc.	$ 5,000.00
83	Other	Soil Born Farms: Center for Food, Health and the Environment	This proposed project is to create new entrance signage and landscaping at Soil Born Farms, marking the final phase of major driveway and parking lot developments at the historic American River Ranch. These improvements are key steps in developing the site into a premier interpretive facility for food, health, and the environment.	$ 313,969.00
84	Other	FCUSD: Homeless Student Services	Education is a key element for the success of every great city. Students experiencing homelessness face unique challenges in accessing and succeeding in school. In partnership with the Department of Homeless Student Services of the Folsom Cordova Unified School District they propose to assign a fund to support the most vulnerable students in Rancho Cordova. The Department of Homeless Student Services identifies and supports students experiencing homelessness as described under federal law McKinney Vento Homeless Student Act. This act was enacted in 1987 to ensure that children and youth experiencing homelessness have access to the same free, appropriate public education and services as their non-homeless peers. Homeless Student Services works in collaboration with schools and community partners towards this goal. Gift cards would be purchased and distributed so students can get clothing, shoes, food, etc. This is a multiyear request.	$ 15,000.00

App.	Category	Application Name	Applicant's Project Description	FY 2022/2023 Requested
85	Other	FCUSD: Outdoor Kindergarten Learning Area at Cordova Meadows	FCUSD wants to build an outdoor learning area with a shaded structure and tables in the kindergarten playground area at Cordova Meadows Elementary School. There is an area of the kindergarten playground that once housed a large redwood tree. As parts of the tree were dying and creating a safety hazard it had to be removed. Unfortunately, when the tree was removed, the shade it provided was eliminated. Since it has been removed, they would like to turn the area into an inviting, outdoor learning area. If funded, they will cement part of it with tables and a shade structure. In the other part of it, they will include bark and tree stump jumping stones for the students to play on. In this area, they would also put some garden boxes for the children to grow plants.	$ 27,000.00
86	Other	Sacramento Valley Spark: Spark Mobile	In this proposed project, Sacramento Valley Spark will bring interactive games, a cooling center, and neighborhood cleanup tools to community events around the region. The Spark Mobile will provide a flexible platform for taking Sacramento Valley Spark's unique creative energy to numerous (at least six) Rancho Cordova events over the course of a year. Through the "Spark" drive-thru and "art stops" events Sacramento Valley Spark has shared the art, music and energy of the local Burning Man community. The artistically wrapped Spark Mobile will bring hula hoop lessons, silent disco, and scores of additional interactive games to events in Rancho Cordova and contingent on funding, around the region. In addition to the interactive activities, the spark mobile will include a water tank to provide a cooling zone (misters) and tools to help the community clean up. Sacramento Valley Spark and other groups have taken action to clean up our communities. The truck can support those efforts by providing grabber sticks, buckets and other supplies to these trash pickups. While they envision seeking funding from additional agencies, contingent on funding, they'll commit to activities at least six Rancho Cordova events.	$ 10,000.00
87	Other	Sierra Service Project: Rancho Cordova School-Year Service Program	Sierra Service Project (SSP) seeks funding to continue its long-standing home repair and youth service program. This project will focus on engaging groups of local middle and high school students during the school year in hands-on home repair and community-based service projects. Youth will gain skills, and the community will benefit. Since 2015, SSP has hosted over 1,400 volunteer days and completed 106 exterior home repair projects for 74 low-income City residents. In 2022, they are focusing projects on equipping local youth volunteers. Objectives of this program are reciprocal and benefit youth volunteers and the home repair or community-based project beneficiaries. In coordination with City of Rancho Cordova staff and the new volunteer platform, coordinate two regular monthly work days to aid in volunteer recruitment and project scheduling. Also work with school, church, and other youth volunteer groups to commit to multiple work days during the school year in advance of the funding cycle. This proactive approach will keep interested groups accountable, and help them plan projects for faster completion and set clear expectations for beneficiaries. Additionally, focus on building long-term relationships within the community.	$ 70,700.00
88	Other	Sierra Service Project: Rancho Cordova Summer Service Program	Sierra Service Project (SSP) seeks funding for a new youth summer program in Rancho Cordova. This project focuses on negating middle and high school students in hands-on home repair and community-based service projects during a week of their summer break. Youth will gain skills, have fun, and the community will benefit. Since 2015, SSP has hosted over 1,400 volunteer days and completed 106 exterior home repair projects for 74 low-income city residents. They are proposing a summer service-learning program in 2023. Objectives of this program are reciprocal and benefit local youth, youth from outside the community, and home repair and community-based project beneficiaries. For the first time, SSP is proposing to establish a summer site in Rancho Cordova. Currently their other summer community partners are based throughout California in Del Norte and San Diego Counties, and in the Navajo Nation in Arizona. In 2022, their summer program will host over 800 volunteers who dedicate a week of their summer to service-learning. By adding a site in Rancho Cordova, they will be adding a closer option for our pool of volunteers from the middle of the state, including the Bay Area and the greater Sacramento region. They will invite youth volunteers from Rancho Cordova, and other regions, to join together to spend a week completing home repairs for low-income residents, and projects with community-based organizations. The program will offer day and overnight programs, to accommodate the needs and interests of both local and outside volunteer groups.	$ 92,800.00

App.	Category	Application Name	Applicant's Project Description	FY 2022/2023 Requested
89	Other	KITNCUT: Learning Tools For A Successful Community	This proposed project is to empower the Rancho Cordova community for economic success through domestic violence awareness and hands-on technical training. By equipping the residents with the new abilities of proven techniques for safety and lifelong learning, this project's goals are to contribute to job placement and retention in Rancho Cordova. Victims of intimate partner violence lose a total of 8 million days of paid work each year and the cost of intimate partner violence exceeds $8.3 billion per year. Furthermore, between 21-60% of victims of intimate partner violence lose their jobs due to reasons stemming from the abuse. People try to leave abusive relationships, but they lack the tools to change. This project will use technical training and a series of awareness events to equip women and the community with the lifelong tools to be economically independent. The participants in the training will learn how to make self-defense tools, domestic violence awareness materials, and artistic displays that reflect their experiences. By using modern manufacturing equipment, the participants will be exposed to viable manufacturing careers. This project will be aligned with the California Mobility Center's Career Pathways model which intends to establish pipelines from underrepresented communities into economically viable manufacturing careers needed to support Clean Mobility. The culmination of job training, self-empowerment, and domestic violence awareness will lead to enhanced community connectedness. In connected communities, members gain a sense of belonging and purpose from the experience of both deriving value from and adding value to their community. Stronger connections increase a person's sense of hope and self-worth, and the ability to cope adaptively in the face of adversity. As a result, community connectedness is a protective factor that enhances well-being, fosters resilience, and promotes prevention.	$ 112,000.00
90	Other	Benevolent and Protective Order of Elks, Rancho Cordova Lodge #2484: Facility Improvements for Use by Local Fundraising Entities	The Rancho Cordova Elk's Lodge is requesting funds to improve the kitchen capacity, efficiency, and to reduce operating expenses. With a location just off Sunrise Boulevard, just four miles south of Highway 50, the lodge can be adapted to provide the location for any number of events at a significantly lower cost than commercial providers. It is difficult to find locations in the Rancho Cordova area that provide meeting space, access, parking and a full commercial kitchen to provide a location for non-profit events that support the community – and at an affordable price. The Elk's Lodge cannot currently fund the improvements to improve capacity and the flexibility needed to support a variety of events. The Elk's Lodge can provide a significant asset to the community. Costs can be kept to a minimum, with no mark-up on food costs or labor – straight pass through on support costs and a minimal rate to cover Lodge operating expenses (estimating 15 – 20% of revenues). The current Elk's Lodge has some shortcomings that should be addressed to maximize it's potential. The Kitchen has a limited capacity to provide enough meals in a timely manner, and to adapt to a variety of uses. The only griddle is small, and needs to be replaced with a larger unit for breakfast and quick meal preparation. The dishwasher is undersized and it's capacity is not adequate for proposed needs. Upgrading and adding several other appliances will also improve the capacity and flexibility of use.	$45, 245.34
91	Other	Sacramento Children's Museum: Exterior Entryway Enhancements	Sacramento Children's Museum (SCM) requests funding support to renovate the Museum's exterior front entrance. There are two components to this project. The first is the construction of an exterior canopy above the entrance doors. This canopy will be composed of aluminum columns and beams draped with woven wire mesh panels in the Museum's brand colors. The second component is the addition of a concrete seating area bench outside the front doors. This seating area bench will match that at the entrance to Rancho Cordova City Hall, with a gathering area in front. Sacramento Children's Museum is a favorite family destination for Rancho Cordova residents and families from afar. This new exterior entryway design will differentiate the building from others nearby and make the building more identifiable as a Children's Museum. This also has the potential to draw in more families who simply pass by the Museum. These transformations also will enhance the Museum experience for the thousands of children and adults who visit each year. The colorful canopy will provide guests with a glimpse of the playful adventures awaiting them inside, leaving a lasting impact for children and their families. The outdoor seating bench area is another great addition for guests. It can serve as a gathering area for school field trips, family picnics, and outdoor Museum-led programs.	$ 194,652.00

App.	Category	Application Name	Applicant's Project Description	FY 2022/2023 Requested
92	Other	KITNCUT: Empowering Our Peace-Keepers to De-escalation	This project proposes to enforce the training of officers to de-escalation techniques. The project team plans to accomplish this by having Jiu Jitsu trainer and author, Tom Deblass in for a conference to teach against use of excessive force. This paired with training from the Dr. King Center in George will be provided. Travel and lodging and seminar price will be covered by the grant, and they would like to host a Q & A for the officers with both parties. They will partner with and encourage local Jiu Jitsu gym owners to attend, so they can further the lessons offered by Mr. Deblass. They plan to leverage existing mental health services in the community to bridge the divide of reactive to responsive in our officers. The non-violent communication talks will be continued by John Brewer, certified NVC specialist in town. The de-escalation techniques already being taught would help our officers stay safer in dangerous situations, giving them more tools to communicate with people they are in contact with. This will empower police officers and give them pride in their ability to not discharge their weapons unnecessarily.	$ 111,000.00
93	Other	Greater Sacramento Urban League: Black Child Legacy Campaign Rancho Cordova Service Extension	To address the disparities and to breakdown the barriers, Sacramento County's Board of Supervisors asked to create a plan for change to address the higher mortality rate of black children than other children in Sacramento County. In response, the Black Child Legacy Campaign (BCLC) was launched in 2015, with the goal of saving children's lives by transforming community systems of support. Currently, seven neighborhoods within the City of Sacramento have full-fledged BCLC operations and offer a comprehensive menu of programs and services managed by seven community-based organization in each respective neighborhood. The Greater Sacramento Urban League is the organization leading the BCLC efforts in Oak Pak. Some residents of Rancho Cordova come to the Oak Park office for services and to participate in their programs. Due to the structure of the BCLC funding agreement and limited staff capacity, they are not always able to provide the level of support and allow participation in their programs to residents of Rancho Cordova. An award of funding will allow them to provide fuller services and program participation to Rancho Cordova residents reaching out to them in Oak Park, as well as allow them to deliver services and offer programs on occasion physically within the City of Rancho Cordova.	$ 70,000.00
94	Other	Boys Scouts of America: Pack 387 Pinewood Derby/ Space Derby Tracks	Pack 387 is in need of a pinewood derby and space derby track so scouts can participate in these annual pack events. They currently borrow a track from another pack in the Sacramento area so they can hold these events locally. One of the most popular events that people think of when looking back on their Cub Scouting past is the Pinewood Derby. Pack 387 is a new pack in Rancho Cordova and the tracks will be used for their annual Pinewood Derby and Space Derby races. These events teach youth about camaraderie and sportsmanship as well as experience the sense of accomplishment and excitement of competition. These tracks would also be a great event to bring out for youth events in Rancho Cordova that Pack 387 participate in.	$ 2,543.00
End of Grant Applications Submitted during grant cycle (February 7, 2022 - March 18, 2022)				**$ 10,422,664.93**

Fiscal Year 2022/23 Community Enhancement Investment Fund Project List

App.	Category	Application Name	Applicant's Project Description	FY 2022/2023 Requested
N/A	Arts, Culture, History, Entertainment & Sports	CCCF: MACC Programming and Operations for FY 22/23	This project was approved as a multiyear request beginning in FY 2021/22 and ending in FY 2023/24.	$ 180,610.00
CC1	Arts, Culture, History, Entertainment & Sports	Arts in Public Places Bucket	Under prior Council direction, established funding for future public art projects in the City. This is an estimated amount.	$ 50,000.00
CC2	Arts, Culture, History, Entertainment & Sports	Performing Arts Bucket	Under prior Council direction, established funding for performing arts projects in the City. This is an estimated amount.	$ 30,000.00
CC3	Arts, Culture, History, Entertainment & Sports	Youth Sports Growth and Startup Fund Bucket	Under prior Council direction, established funding for youth sports for the purpose of growing an existing league or starting a new league in Rancho Cordova, including, but not limited to, the purchase of new equipment, new uniforms, fees, and other required costs. This is an estimated amount.	$ 30,000.00
CC4	Education	Field Trips & Assemblies Bucket for FCUSD	Under prior council direction, established funding for future field trips/assemblies and other experiential learning opportunities for Rancho Cordova public school students/schools. This is an estimated amount.	$ 35,000.00
CC5	Education	Field Trips & Assemblies Bucket for SCUSD	Under prior council direction, established funding for future field trips/assemblies and other experiential learning opportunities for Rancho Cordova public school students/schools. This is an estimated amount.	$ 7,500.00
CC6	Education	Field Trips & Assemblies Bucket for EGUSD	Under prior council direction, established funding for future field trips/assemblies and other experiential learning opportunities for Rancho Cordova public school students/schools. This is an estimated amount.	$ 7,500.00
N/A	Other	Rancho Cordova Chamber of Commerce: Explore	This project was approved as a multiyear request beginning in FY 2021/22 and ending in FY 2023/24.	$ 53,000.00
N/A	Other	Rancho Cordova PAL: Adventure Van	This project was approved as a multiyear request beginning in FY 2021/22 and ending in FY 2023/24.	$ 21,000.00
CC7	Other	Local Community Service Partnerships Bucket	Under prior Council direction, established funding to grow and strengthen community partnerships in Rancho Cordova. Small community grants are available through an ongoing application process for up to $5,000 each and no more than $10,000 per organization in a calendar year. Other details and restrictions are found on our website. This is an estimated amount.	$ 75,000.00
Additional items that will be factored into the discussion, budget, and presentation anticipated on April 18, 2022.				**$ 489,610.00**

Project Information

Project Name

Learning STEAM. Let's Build a Light Sculpture!

Project Synopsis

A semester long program tailored for seventh and eighth graders to teach them about science, technology, engineering, art and math (STEAM) through a hands-on project.

Project Description

This program is a hands-on after-school or weekend classroom activity for seventh and eighth graders. Each class session will be 60 to 90 minutes long and held once per week. In each session, I will introduce the students to an aspect of the methods and technology involved in the fabrication of an acrylic light sculpture. The light sculpture will consist of 8 acrylic panels vertically attached to a 3D printed base. A row of LED lights embedded in the base below each panel will illuminate the panels through their edges, causing the patterns drawn or engraved on the panels to glow. The LEDs will be addressable, meaning that the color and brightness of each LED can be programmatically altered to allow for varying animated light patterns. The light patterns will be controlled by a smartphone connected to the art piece through a dedicated WiFi connection on the phone. The sculpture will be similar to the one shown in the attached file "SplineWaveDescription.pdf", the only exception being that it will consist of eight instead of sixteen acrylic panels. The students will build the sculpture during the final sessions of the semester and will see how the elements and technology learned throughout the semester will apply to the sculpture. In the interest of safety, the sculpture will be designed in a manner that allows students to simply snap or screw the pieces together. No soldering, cutting, or other potentially unsafe activity will be involved.

Project Team

I will be able to teach and facilitate the class myself. I plan to limit enrollment to 20 students per semester.

Project Goals

The goal of this program is to give students an opportunity to learn STEM in a fun and engaging way, through the creation of an art piece that they can take home, enjoy, and proudly display. This will hopefully encourage them to pursue STEM related subjects in high school and college.

Funding Request

Application #1

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total project cost

Estimated $13,180.

Estimated breakdown of project expenditures

Materials and supplies for two semesters at 20 students per semester (Micro-controllers, acrylic, wiring, 3D printer filament, etc.): $3,650 Labor: Pre-assembly of project components (4 hours per student x 20 students/semester x 2 semesters x $25/hour): $4,800 Development of course materials: $1,200 Class preparation (load software in laptops, set up slide presentation, etc.): $840 Class instruction time (estimated 23 hours over two semesters x $25/hour): $690 Other costs (Administrative or facility fees charged by school, possible cost overruns, etc.): $2,000

Matching Funds

I propose charging an enrollment fee of $50 per student per semester. At an enrollment rate of 20 students per semester for two semesters, this would yield $2,000 to help cover the above costs.

Include any other funding contributions

None

Ongoing operations and maintenance costs (if applicable)

Not applicable

Total Community Enhancement & Investment Funds requested

$11,180 (Total project cost of $13,180 less $2,000 from student enrollment fees)

Is this a multiyear request?

No

How many years have you received funding for this project?

0

When will your request for funding sunset for ongoing programs?

Not applicable

Do you plan to ask annually for funding?

No

What other funding will you seek to support your project?

Other than the $2,000 I expect to receive through the student enrollment fees, I don't have a specific plan to receive additional funding. I can try to appeal to the school superintendent for additional funding if needed.

Project Schedule, Timeliness and Adaptability

Project Schedule

March 2022: CEIF grant application, submission, and approval April – July 2022: Develop and prepare curriculum May – July 2022: Announcements and advertising July 2022: Prepare for fall 2022 semester July – September 2022: Procurement of light sculpture materials. Preliminary fabrication. August – November 2022: Execute curriculum for fall 2022 semester December 2022: Prepare for spring 2023 semester January – April 2023: Execute curriculum for spring 2023 semester May – June 2023: Analysis and reporting

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

I will be limiting the program to just the fall 2022 and spring 2023 semesters.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

The curriculum can be taught on-line over Zoom, if needed.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical address of project location

Mills Middle School, 10439 Coloma Road, Rancho Cordova, CA 95670
Rancho Cordova, CA 95742

Other physical addresses if project/program is at multiple sites

Not applicable

Have you received a letter of support for the project/program from the property owner?

No

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site or a park/park facility?

Yes, at a public K-12 school site

Which school district is the public K-12 school site located in?

Folsom Cordova Unified

Read-Only Content

Please acknowledge that you read and understand the above Supplemental Endorsement Form requirements.

Yes

Public Record Unless otherwise exempt under applicable law, applications and application materials are public records. All information received from an applicant, whether received in connection with a grant application or in connection with any grant-funded activities performed are subject to disclosure pursuant to the California Public Records Act, unless otherwise exempt. Next Steps Applicants will receive acknowledgement once their application is received. When the application period closes, staff will review each application according to the application criteria and prioritization method listed within the Fiscal Year 2022/2023 Grant Application Process and Criteria document. Should staff have any questions or need clarification on your application, they will contact you. You are invited to attend any of the public City Council Meetings. It is anticipated at this time that the Community Enhancement & Investment Fund team will present information to the City Council starting in April and continuing through June. We may invite applicants to present their project and we may make selection recommendations to Council during the May City Council meetings. In addition, the Community Enhancement & Investment Fund team will send periodic updates to grant applicants via e-mail. It is possible that all funding decisions for the Fiscal Year 2022/2023 Community Enhancement & Investment Fund could be made in May and formally adopted by City Council by early June. Staff intends to notify all applicants of the funding decisions made by the end of June. If you have not signed up to receive automatic notifications when council meeting agendas are posted, you can do that by using the link below:
https://www.cityofranchocordova.org/residents/what-s-happening/sign-up-for-e-news

Thank you,
City of Rancho Cordova

Community Enhancement and Investment Fund 2022/2023 Grant Project - "Learning STEAM. Let's Build a Light Sculpture!"
Project Timeline

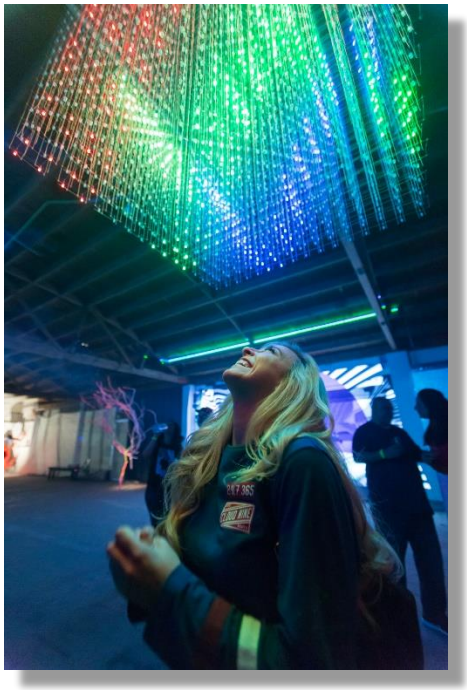
Click on the tabs below to see the curriculum outline and budget for the project.

Application #1

Community Enhancement and Investment Fund 2022/2023 Grant Project - "Learning STEAM. Let's Build a Light Sculpture!" Curriculum Outline			
Topic Name	**Description**	**Number of Class Sessions**	**Supplies and Resources Needed**
Overview of project	Describe to the students the goal of the project: To build an animated desktop light sculpture that can be controlled from your smart phone.	1	Projector or some means to present PowerPoint slides.
3D printing and Fusion 360	Introduce students to 3D printing. Give them an opportunity to choose something on Thingiverse and 3D print it for them. Show them the basic steps: (1) CAD design in Fusion 360, (2) exporting the STL, (3) slicing and generating g-code using Cura, (4) creating the 3D print.	2	Access to 3D printer. Laptops with Cura installed. PLA filament.
Electronics	Teach students about Ohm's law and LEDs. Give them a simple hands-on breadboard project using a battery, resistor, LEDs, and switches.	2	Electronics supplies.
Web programming	Introduce the students to web programming and the elements of HTML. Show them how to build a simple web page locally on their laptop and how to send a simple GET request to a server.	2	Laptops with Internet access.
Intro to Arduino programming	Introduce students to the elements of an Arduino program. Have them write a simple "hello world" program.	1	Arduino UNO, laptops with Arduino IDE installed.
FastLED	Have the students write a program to drive an 8x8 LED matrix.	1	Arduino UNO, laptops with Arduino IDE installed. LED matrix, breadboard, resistors, wiring, etc.
I2C	Show how to set up I2C communication between an Arduino and NodeMCU.	2	Arduino UNO, laptops with Arduino IDE installed, NodeMCU, breadboard, resistors, wiring, etc.
IoT using NodeMCU	Modify the NodeMCU code	1	Arduino UNO, laptops with Arduino IDE installed, NodeMCU, breadboard, resistors, wiring, etc.
Project build and integration.	Start assembling the pieces that make up the light sculpture. Snap and screw together assembly only. All wiring will be pre-soldered. The acrylic panels will be pre-engraved with a pattern which the students can choose from.	2	All parts required to make up the project: The Arduino UNO, NodeMCU, wiring, acrylic panels, 3D printed base, LED matrices. Laptops with Arduino IDE installed.
Discussion and review.	End of curriculum. Discussion and review session.	1	
Total number of class sessions		**15**	

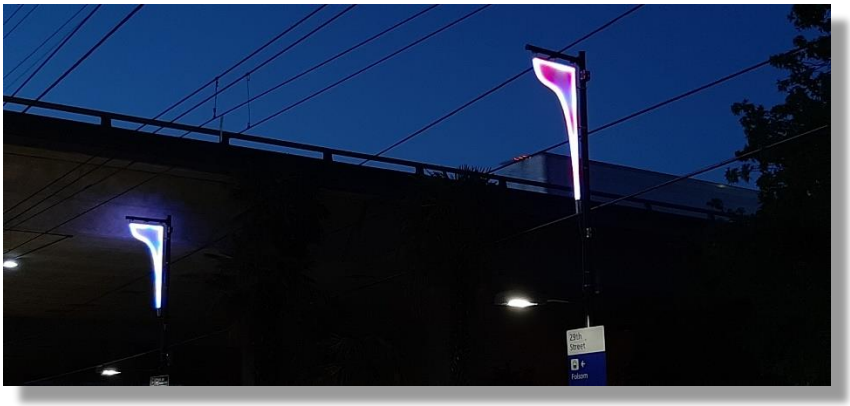
Application #1

Community Enhancement and Investment Fund 2022/2023 Grant Project - "Learning STEAM. Let's Build a Light Sculpture!" Project Budget			
Number of students	**20**		
Description	**Quantity**	**Unit Price**	**Extended Price**
Materials and supplies:			
Arduino Uno	40	20	800
NodeMCU	40	10	400
3D printer filament	14	30	420
Acrylic sheets (est. 10 sheets per student)	400	1	400
Wiring	40	5	200
Barrel jacks (5-pack)	8	10	80
Switches, resistors, etc.	40	5	200
8x8 LED matrix	40	20	800
Electrical tape	10	15	150
Paper and ink for printing course materials	40	5	200
Total materials and supplies			**3,650**
Labor (quantity in hours):			
Pre-assembly of project components (4 hours per student)	160	30	4,800
Develop course materials	40	30	1,200
Class preparation (load software in laptops, set up slide presentation, etc.)	28	30	840
Class session time	23	30	690
Total labor			**7,530**
Other costs:			
Estimated fees charged by school for hosting after school activities			1,000
Other potential costs			1,000
Total other costs			**2,000**
Total project budget			**13,180**



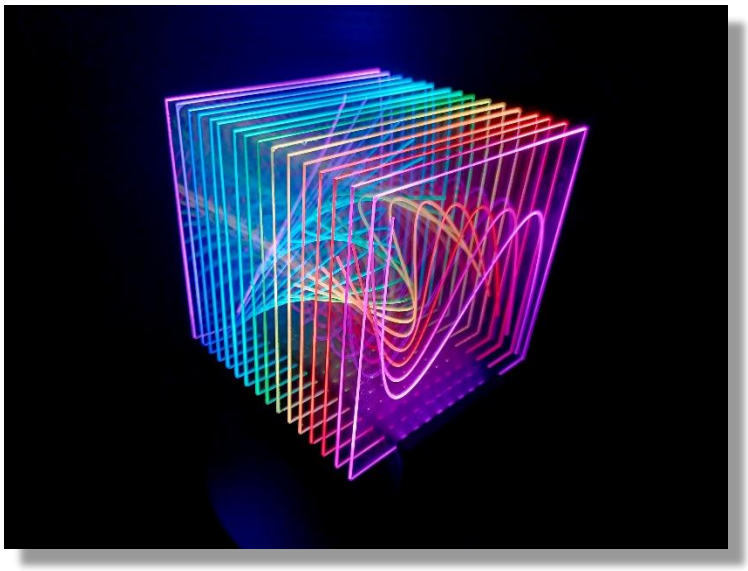
Application #1

About the Artist



Throughout his life, Sacramento based artist, Chris Biddle, has been fascinated by both art and technology, intrigued by the infinite ways in which the two fields could be merged. The idea of creating light sculptures using LEDs literally lit his path!

"I already had a strong career background in computer programming and knew a lot about electrical engineering through having earned a bachelor's degree in physics. Building and programming my own LED sculptures, therefore, was quite attainable and I felt would be a great way of leveraging my skills."



Chris started his work on LED driven art by building a small cube matrix of 27 LEDs at a hackathon in 2013. He showed how the cube could be controlled through a WiFi connection and a web page. The idea was a prize winner at the hackathon, and he moved on to building larger cubes. In 2015, he sold a cube to the newly opened Warehouse Artist Lofts on R Street as part of their curated collection in the community room. He later built a large-scale multi-color cube of 4,096 LEDs and, in 2018, was awarded a $5,000 Creative Economy grant from the City of Sacramento to modify the cube with interactivity and to display it at various events within the city. The most notable of these events was Alex Trujillo's LIGHT.WAV tech art showcase held in Midtown, Sacramento.

Chris' latest large-scale work, completed in July of 2021, can be seen at the 29th and R Street Light Rail Station in Midtown. As a partnership project for Regional Transit and Midtown Association, he installed a set of six LED panels on the banner poles at the station to attract ridership and to help beautify the Midtown and Alhambra corridor.

"Large or small, each art piece has its own set of unique challenges that can sometimes be frightening to overcome. But when I overcome those fears with a can-do attitude, I feel I am at my best. Backed by a commitment to my faith and family, that brings me a sense of fulfillment and makes me whole."

Spline Wave

Artist: Christopher Biddle
Medium: LED edge lit acrylic
Completed: November 1, 2021
Price: $225

Splines are continuous functions defined by polynomials. Because of their continuity, they provide designers with an aesthetically pleasing, best fitting curve through a given set of points. The curve on each panel in the art piece was designed by fitting a spline through a set of four points, then moving the points slightly in each successive panel. The resulting design was then engraved into the acrylic, yielding a beautiful, graceful, and dynamic 3D wave pattern.

The lighting is provided by an 8 x 16 matrix of multi-color LEDs shining through the edges of the panels from the base. Each LED is individually addressable, allowing for an infinite combination of moving colors, with varying brightness and animation rates. The matrix is controlled by an Arduino Uno, a popular micro-controller often used in robotics.

A set of pre-defined lighting patterns have been programmed into the art piece, and these patterns can be selected through your smart phone. To do so, follow these simple steps:

1. With the art piece nearby and running, access the available WiFi connections on your smart phone.

2. Look for a connection called “EL1601 Night Light”.

3. Connect to it using the password “Z1mb@bw3” (That is “Zimbabwe”, but substituting 1, @ and 3 for the letters i, a, and e).

4. Once connected, open the web browser on your phone and go to

   http://192.168.4.1

   You will see a page with various links that will allow you to change the patterns and brightness levels.

   Note: If you are a guest temporarily viewing this art piece, please be sure to leave the Run Mode “On” when leaving, and to leave the Pattern Selection at “Cycle All Patterns”.

If you have any questions about the art piece, please feel free to contact the curator Cheryl Gleason at cheryl@cordovacouncil.org or myself at contact@light23.com. Thank you!

Christopher Biddle

Application #1

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR SCHOOL SITE USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a public K-12 school site, you must request the endorsement of the school superintendent of that school district.

One supplemental form is required per school district.

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by the corresponding school superintendent for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. Each participating school superintendent reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

To be filled out by grant applicant

Project/Program Name: Learning STEAM. Let's Build a Light Sculpture!

Name of Organization: Light23 Company

Name of Applicant and Title: Christopher Biddle, Company Founder

Applicant's Phone: (916) 616-5404 **Applicant's Email:** ckbiddle@pacbell.net

Submit a copy of your application with this page to the school superintendent(s). For your application packet to be considered complete the signed and dated endorsement form must be received by the City of Rancho Cordova by March 18, 2022. The superintendent will submit the form directly to the City's Community Enhancement & Investment Fund team. You must submit this form and a copy of your application to the appropriate superintendent or his or her designee no later than March 4, 2022. For Elk Grove Unified School District use BGrewal@egusd.net. For Folsom Cordova Unified School District use agriffin@fcusd.org. For Sacramento City Unified School District use dianne-brown@scusd.edu.

To be filled out by School Superintendent or designee

Endorsement Given — No. We invite the requestor to work with our staff to develop integrated

Endorsement Withheld — programming at no cost to students in advance of the next school year.

Conditional approval of facility rental only

Superintendent's or Designee's Printed Name: Dr. Sarah Koligian Sarah Koligian

Date: 3/17/22

School District: Elk Grove Unified Folsom Cordova Unified ■ Sacramento City Unified Other

Comments (Optional):

The school superintendent or designee will send this form directly to CEIFGrants@cityofranchocordova.org no later than March 18, 2022. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

Project Name

Rancho Cordova River City Concert Band Enhancements

Project Synopsis

Continuing Expansion for Community Musical Performance Programs

Project Description

This project provides funds to the Rancho Cordova River City Concert Band (RCRCCB) for equipment, musical talent, and related expenses, thereby enhancing its potential to provide high-quality musical performance events in the City of Rancho Cordova and to equip the RCRCCB to represent the City of Rancho Cordova as musical ambassadors within the region. The goal of the volunteer-driven RCRCCB is to engage with and represent the community of Rancho Cordova with superior musical performances, foster musical interest among children, bring world-class guest artists, conductors and composers to the Rancho Cordova stage, and to provide performance opportunities for skilled community musicians. We strive to provide a rich social environment to those seeking life enrichment through musical interaction while providing connection through our community. The band performs a wide range of music from traditional band literature to contemporary arrangements in addition to premiering new compositions. RCRCCB is proud to be the 2022 recipient of the Rancho Cordova Distinguished Community Service Organization Volunteer Award. The RCRCCB continues to partner with the community of Rancho Cordova to provide an extensive range of music to multiple venue types including full band concerts and small ensemble presentations. The band has continued to cooperatively engage and support multiple events within Rancho Cordova such as the 15th Birthday of Rancho Cordova event, artist receptions at Rancho Cordova City Hall, the Pop-up Gallery at the MACC, and Memorial Day and Veterans' Day observances. The band looks forward to continuing this partnership with the City of Rancho Cordova and the Cordova Community Council Foundation.

Project Team

The Band is currently an incorporated volunteer performing group operating as an independent 501(c)(3) federal tax-exempt nonprofit organization in the State of California. The implementing team will be led by Tom Seaton, Conductor; Melanie Freer, President; and the Board of Directors of the organization. Members of the band, consisting of 50-70 volunteer musicians will participate in implementation.

Application #2

Project Goals

Goal #1: Bring high-quality musical performance events to Rancho Cordova's citizens and visitors Goal #2: Strengthen Rancho Cordova's Arts profile image Goal #3: Further enhance the Rancho Cordova Arts' goal of making the city "a place for art and artists" Goal #4: Incorporate community outreach and integration with audience members to foster musical interest and enhancement in the community (especially with our youth)

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total project cost

Total Project Cost: $380,018 = $40,986 + $339,032

Estimated breakdown of project expenditures

Operating budget (materials, storage, music, consultants, and maintenance): $40,986 In-kind contributions for operational materials: $339,032 = $12,343 (outside partnerships) + $326,689 (RCRCCB Members)

Matching Funds

In-Kind Contributions: $1,192 Rancho Cordova Food Locker: Use of their 26 foot, liftgate truck for movement of sensitive equipment to and from our concerts. $4,234.86 Rise Up Theater Company: Photography, videography, livestreaming, vocalists for concerts $6,916.60 Koreana Plaza: Concert venue for at least two concerts per year with staging, lighting, closed circuit TV, audio/sound system, backdrop. $326,689 Rancho Cordova River City Concert Band Volunteers based on volunteer hours for concerts, ensembles, rehearsals, administrative tasks, virtual performance and livestreaming. $33.61/volunteer hour

Include any other funding contributions

Cordova Community Council RCRCCB has partnered with the Cordova Community Council Foundation (CCC) for years to provide high-quality musical performances in Rancho Cordova. The CCC generously contributes consulting services as well as a financial stipend for operational expenses.

Ongoing operations and maintenance costs (if applicable)

Operating budget (materials, storage, music, consultants, and maintenance): $40,986

Total Community Enhancement & Investment Funds requested

$20,000

Is this a multiyear request?

No

How many years have you received funding for this project?

5

When will your request for funding sunset for ongoing programs?

As RCRCCB intends to continue to perform, afford educational opportunities, and provide a space for local musicians to enhance their skills for years to come, sunsetting for this project is not anticipated. We would not have been able to achieve success without financial support in prior years and anticipate applying for funding in the future to maintain operations, invest in enhanced performance opportunities, and continue to develop the music community in Rancho Cordova and beyond. We are continuing to develop and foster partnerships within Rancho Cordova to bring musical experiences to the community in new and integrative ways.

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

We will continue to seek the generous sponsorship of the Cordova Community Council. The Rancho Cordova River

City Concert Band continues to seek other fundraising opportunities through our fundraising committee efforts. Before COVID, we held an annual Santa Pancake Breakfast Fundraiser. We currently are working on becoming a part of "The Big Day of Giving" annual fundraiser. Other fundraising efforts include a donation bin at our concert, Amazon Smile, and Fundraisers held through Facebook as different members request donations for their birthdays be donated to the Band.

Project Schedule, Timeliness and Adaptability

Project Schedule

• “Brushes & Beats” concert event at Soil Born Farm* • Rancho Cordova Veterans Day Event 2022* • Community Concert Koreana Plaza in Rancho Cordova Fall/Winter 2022 • Community Concert Rancho Cordova Performing Arts Center Fall/Winter 2022 • Community Concert Koreana Plaza in Rancho Cordova Spring 2023 • Rancho Cordova Memorial Day Event 2023* • Rancho Cordova 20 year Anniversary Celebration 2023* • Community Concert Rancho Cordova Performing Arts Center Spring/Summer 2023 • Music ensembles at Rancho Cordova events and gatherings including City Hall Events, Rancho Cordova Artist Receptions,*Retirement Home Concerts, Rancho Cordova Santa Train, collaborative partnership musical theater production with Rise Up Theater Company * These events are in collaboration with the Cordova Community Council ** All in-person events are subject to COVID-19 regulations

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

• Leverage: This project leverages existing community assets, previous City investments, and the musical art expertise of the Rancho Cordova River City Concert Band. • Return on Investment: The value of positive publicity through proper, effective promotion will bring Rancho Cordova the notoriety it seeks as a pioneer in supporting its community through arts. This positive value easily has the capacity to exceed the investment. • Capacity: The Project Team has a proven track record and well-documented capacity for delivery of this project. • Timeline for Execution: This fund would be accessible to meet existing needs immediately upon funding and would be expended by the Rancho Cordova River City Concert Band during the grant period 2022-2023.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

The Rancho Cordova River City Concert Band has a proven track record of being pioneers in the field of virtual performances. The international group known as the Association of Concert Bands has featured the Rancho Cordova River City Concert Band and our virtual engineer to help other community music groups with the knowledge necessary to perform in a virtual environment. The Band's YouTube channel is where our virtual performances are freely accessible. (https://www.youtube.com/channel/UCLBZg31MzxoLRZ7cSr_Gt8Q) The Cordova Community Council has been kind enough to e-blast these different performances in celebration of a variety of holidays. We have even collaborated with the schools, MACC and the Symphony d'Oro to produce a virtual concert.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical address of project location

9792 Business Park Drive
Sacramento, CA 95827

Other physical addresses if project/program is at multiple sites

*Please note: Letter of Support from the Mandarins was not requested because all rehearsal fees are through a separate Grant. Cordova High School PAC; 2239 Chase Dr.; Rancho Cordova, CA 95670 Koreana Plaza Market; 10971 Olson Dr.; Rancho Cordova, CA 95670 Soil Born Farms; 2140 Chase Dr.; Rancho Cordova, CA 95670 Rancho Cordova

City Hall; 2729 Prospect Park Dr.; Rancho Cordova, CA 95670 MACC; 10191 Mills Station Rd.; Sacramento, CA 95827 Carmichael Park; 5750 Grant Ave; Carmichael, CA 95608

Have you received a letter of support for the project/program from the property owner?

Requested, and will submit to city by March 18, 2022

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site or a park/park facility?

Yes, at a public K-12 school site

Which school district is the public K-12 school site located in?

Folsom Cordova Unified

Public Record Unless otherwise exempt under applicable law, applications and application materials are public records. All information received from an applicant, whether received in connection with a grant application or in connection with any grant-funded activities performed are subject to disclosure pursuant to the California Public Records Act, unless otherwise exempt. Next Steps Applicants will receive acknowledgement once their application is received. When the application period closes, staff will review each application according to the application criteria and prioritization method listed within the Fiscal Year 2022/2023 Grant Application Process and Criteria document. Should staff have any questions or need clarification on your application, they will contact you. You are invited to attend any of the public City Council Meetings. It is anticipated at this time that the Community Enhancement & Investment Fund team will present information to the City Council starting in April and continuing through June. We may invite applicants to present their project and we may make selection recommendations to Council during the May City Council meetings. In addition, the Community Enhancement & Investment Fund team will send periodic updates to grant applicants via e-mail. It is possible that all funding decisions for the Fiscal Year 2022/2023 Community Enhancement & Investment Fund could be made in May and formally adopted by City Council by early June. Staff intends to notify all applicants of the funding decisions made by the end of June. If you have not signed up to receive automatic notifications when council meeting agendas are posted, you can do that by using the link below:

Application #2

Rancho Cordova River City Concert Band Enhancements

Continuing Expansion for Community Musical Performance Programs

Project Description

This project provides funds to the Rancho Cordova River City Concert Band (RCRCCB) for equipment, musical talent, and related expenses, thereby enhancing its potential to provide high-quality musical performance events in the City of Rancho Cordova and to equip the RCRCCB to represent the City of Rancho Cordova as musical ambassadors within the region.

The goal of the volunteer-driven RCRCCB is to engage with and represent the community of Rancho Cordova with superior musical performances, foster musical interest among children, bring world-class guest artists, conductors and composers to the Rancho Cordova stage, and to provide performance opportunities for skilled community musicians. We strive to provide a rich social environment to those seeking life enrichment through musical interaction while providing connection through our community. The band performs a wide range of music from traditional band literature to contemporary arrangements in addition to premiering new compositions.

RCRCCB is proud to be the 2022 recipient of the Rancho Cordova Distinguished Community Service Organization Volunteer Award. The RCRCCB continues to partner with the community of Rancho Cordova to provide an extensive range of music to multiple venue types including full band concerts and small ensemble presentations. The band has continued to cooperatively engage and support multiple events within Rancho Cordova such as the 15th Birthday of Rancho Cordova event, artist receptions at Rancho Cordova City Hall, the Pop-up Gallery at the MACC, and Memorial Day and Veterans' Day observances. The band looks forward to continuing this partnership with the City of Rancho Cordova and the Cordova Community Council Foundation.

Application #2

Objectives

Goal #1: Bring high-quality musical performance events to Rancho Cordova's citizens and visitors
Goal #2: Strengthen Rancho Cordova's Arts profile
Goal #3: Further enhance the Rancho Cordova Arts' goal of making the city "a place for art and artists"
Goal #4: Incorporate community outreach and integration with audience members to foster musical interest and enhancement in the community

Project Team

The Band is currently an incorporated volunteer performing group operating as an independent 501(c)(3) federal tax-exempt nonprofit organization in the State of California.

The implementing team will be led by Tom Seaton, Conductor; Melanie Freer, President; and the Board of Directors of the organization. Members of the band, consisting of 50-70 volunteer musicians will participate in implementation.

Project Criteria

This project meets multiple factors of the Community Enhancement Fund criteria as follows:

- **Community Pride:** Represent Rancho Cordova as musical ambassadors both within the city and touring abroad.
- **Civic Engagement:** Community outreach to bring engaging quality musical events to children, families, and the community.
- **Quality of Life:** Provide performance opportunities for skilled community musicians who seek enrichment through musical interaction while providing musical art experiences to families in Rancho Cordova.
- **Arts and Culture:** Bring exciting arts and culture to Rancho Cordova families through this musical outreach.
- **Growth and Education:** Support and recruit skilled local volunteer musicians to continue to grow and develop as lifelong learners of music. This unique platform allows us to foster the same growth and development in the youth of Rancho Cordova.
- **Children and Youth:** Foster musical interest in children with live musical art experiences.

Prioritization Criteria

- **Leverage:** This project leverages existing community assets, previous City investments, and the musical art expertise of the Rancho Cordova River City Concert Band.
- **Return on Investment:** The value of positive publicity through proper, effective promotion will bring Rancho Cordova the notoriety it seeks as a pioneer in supporting its community through arts. This positive value easily has the capacity to exceed the investment.
- **Capacity:** The Project Team has a proven track record and well-documented capacity for delivery of this project.

Application #2

- **Timeline for Execution:** This fund would be accessible to meet existing needs immediately upon funding and would be expended by the Rancho Cordova River City Concert Band during the grant period 2022-2023.

Metrics

Goal	Metrics
Goal #1: Bring high-quality musical performance events to Rancho Cordova's citizens and visitors	Quality musical performances will be presented by the full ensemble and small ensembles in a wide variety of venues, measured by attendance.
Goal #2: Strengthen Rancho Cordova's Arts profile image	Elevate RCRCCB's ability to serve as an ambassador of the city as measured by audience growth and an expanded performance calendar to include more and new venues both within Rancho Cordova and through touring.
Goal #3: Further enhance the Rancho Cordova Arts' goal of making the city "a place for art and artists"	Incorporation of unique, world-class guest musical talents will further enhance the draw to Rancho Cordova as an arts destination. Given the uncertainty of the pandemic to our in-person attendance, we will measure this by the social media outreach and response through platforms such as You Tube, Facebook, and NextDoor, which will incorporate links to view and share our concerts (including virtual and livestreamed concerts) on a local, national and international scale.
Goal #4: Incorporate community outreach and integration with audience members to foster musical interest and enhancement in the community (especially with our youth)	By expanding RCRCCB's performance materials, musicians will have the tools and repertoire of music necessary to provide a diversity of music that is both engaging and enjoyable for musicians and audiences alike. Given the uncertainty of the pandemic to our in-person attendance, we will measure this by the social media outreach and response through platforms such as You Tube, Facebook, and NextDoor, which will incorporate links to view and share our concerts (including virtual and livestreamed concerts) on a local, national and international scale.

Our Proposal

The Rancho Cordova River City Concert Band Enhancements Project builds upon successes initiated under the 2017-18 Community Enhancement Fund allocations which have brought stability and musical improvement to this valuable volunteer organization by providing support for music stands and percussion equipment.

Building the band to equity with other musical performing groups in the region will require continued effort. This request continues to leverage prior investments in a unique community asset which has proven to be a critical tool in improving community image, engages new sectors of the Rancho Cordova community and lifts the city through high quality classical music and contemporary musical performances.

Funding Request

Total Project Cost: $380,018 = $40,986 + $339,032

Estimated Breakdown of Project Expenditures:

Operating budget (materials, storage, music, consultants, and maintenance): $40,986

In-kind contributions for operational materials:

$339,032 = $12,343 (outside partnerships) + $326,689 (RCRCCB Members)

How many years have you received funding for this project?
We have received funding for this project in five prior years.

When will your request for funding sunset for ongoing programs?
As RCRCCB intends to continue to perform, afford educational opportunities, and provide a space for local musicians to enhance their skills for years to come, sunsetting for this project is not anticipated. We would not have been able to achieve success without financial support in prior years and anticipate applying for funding in the future to maintain operations, invest in enhanced performance opportunities, and continue to develop the music community in Rancho Cordova and beyond. We are continuing to develop and foster partnerships within Rancho Cordova to bring musical experiences to the community in new and integrative ways.

Project Location:
Rehearsals occur Monday evenings 6:45pm – 9:15pm at Mandarins of Sacramento, Inc.; 9792 Business Park Drive; Sacramento, CA 95827.

Performances will take place in a variety of locations including, but not limited to: the Cordova High School Performing Arts Center, Koreana Plaza Market, Soil Born Farms, Rancho Cordova City Hall, Mills Station Art & Culture Center, Hagan Park, and Carmichael Park.

Application #2

Matching Funds (including any in-kind contributions):

In-Kind Contributions:

Rancho Cordova Food Locker
The Rancho Cordova Food Locker has generously allowed the band to use their 26 foot, liftgate truck for movement of sensitive equipment to and from our concerts. The use of a liftgate truck is essential for safe transportation of our equipment. In turn, we collect food and donations for the Rancho Cordova Food Locker at our concerts.

$1,192.00: Estimated value of the in-kind donation usage of the truck is calculated as follows:

- 6 concerts x $181/truck rental for each concert = $1086.00 (Enterprise Truck rental rate)
- 6 concerts x 34 miles/concert x $0.25/mile (Enterprise Truck rental rate) = $51.00
- 6 concerts x 25 miles/concert x 15 miles/gallon of gas x $5.50/gallon gas = $55.00

Rise Up Theater Company
The Rise Up Theater Company has become an integral partner with RCRCCB to bring the Arts to life in Rancho Cordova. They have been instrumental in videography and livestreaming our performances for our YouTube channel to bring music to those who are unable to make it to our in-person performances. The Summerset Retirement home in Rancho Cordova has the capacity to have their residents view our performances on their large screen television in live-time thanks to the efforts of this partnership. The Rise Up Theater Company has also brought their vocal talents alongside RCRCCB in performances at our concerts to both showcase their musical gifts as well as encourage audience participation in sing-a-longs. We look forward to reciprocating in this partnership by bringing our instrumentalists to provide music during their future theater productions.

$4,234.86: Estimated value of In-Kind Annual Contributions from the Rise Up Theater Company

- 6 concerts x 2 hours livestreaming/videography x 3 persons= 54 hours
- 6 events post-production collaboration with RCRCCB visual/digital artist x 4 hours= 24 hours
- 6 events x 2 hours x 2 singer/performers (on average) with RCRCCB = 24 hours
- 12 rehearsals x 1 hour x 2 singer/performers (on average) with RCRCCB = 24 hours
  54 hours +24 hours + 24 hours + 24 hours = 126 hours x $33.61/volunteer hour = $4,234.86

Koreana Plaza
Koreana Plaza has generously allowed the band to use its food court area for conducting annual holiday fall/winter and spring/summer concerts. The use of this space has brought instrumental music to the citizens of Rancho Cordova. Koreana Plaza has been a gracious host by setting up a stage, sound system, a back drop curtain and beautiful colored lights. They also provide closed-circuit television cameras which project the band on their huge wall of screens for all audience members to view.

$6,916.60: Estimated value of In-Kind Annual Contributions from Koreana Plaza

- 2 concerts x 5 hours (2 concert hours and 3 set-up/cleanup hours)/concert
  - $180/hour (non-profit rate for the Cordova PAC) x 10hours = $1800
  - $30 application fee per event (per the Cordova PAC rates) x 2 events/year = $60
- Elevated stage Estimate (ABA Daba Daily Rental for similar stage) = $500 x 2 concerts = $1000
- Backdrop (Elite Party Rental, Rancho Cordova) 4 x 10 foot sections = 4 x $29/section = $116 x 2 concerts = $232.00
- Lighting (ABA Daba Daily Rental for similar) $61 x 5 lights = $305 x 2 concerts = $610
- Closed Circuit TV to allow all guests to see. Estimate = $500/ concert x 2 concerts = $1000
- Sound/Audio system (Elite Party Rental, Rancho Cordova) = $99 x 2 concerts = $198
- Volunteer hours to set up staging, lighting, sound system, audience seating
  - 3 persons x 10 hours/concert x $33.61/hour volunteer rate x 2 concerts/year = $2016.60

The Rancho Cordova River City Concert Band Members

Band members contribute thousands of volunteer hours throughout the year to the community and provide a minimum of four concerts by the full band, and a minimum of four additional performances by ensemble groups. It is projected the band will be central performers in the following events during the grant period:

- "Brushes & Beats" concert event at Soil Born Farm*
- Rancho Cordova Veterans Day Event 2022*
- Community Concert Koreana Plaza in Rancho Cordova Fall/Winter 2022
- Community Concert Rancho Cordova Performing Arts Center Fall/Winter 2022
- Community Concert Koreana Plaza in Rancho Cordova Spring 2023
- Rancho Cordova Memorial Day Event 2023*
- Rancho Cordova 20 year Anniversary Celebration 2023*
- Community Concert Rancho Cordova Performing Arts Center Spring/Summer 2023
- Music ensembles at Rancho Cordova events and gatherings including City Hall Events, Rancho Cordova Artist Receptions,*Retirement Home Concerts, Rancho Cordova Santa Train, collaborative partnership musical theater production with Rise Up Theater Company

  * These events are in collaboration with the Cordova Community Council
  ** All in-person events are subject to COVID-19 regulations

$326,689: Value of in-kind annual contributions from the Rancho Cordova River City Concert Band, calculated at the most recent California standard of $33.61 per volunteer hour* include:

- 8 concerts x 3 hours per concert x 60 musicians: 1440 hours
- 40 rehearsals x 2.5 hours per rehearsal x 60 musicians: 6000 hours
- 50 small ensemble concerts/rehearsals x 2 hours x 10 musicians: 1000 hours

- Virtual recording productions may be substituted for concerts of any kind with use of a virtual digital artist. If used 8 times x 35 hours per recording = 280 hours
- Livestreaming and recording concerts for future viewing on our YouTube Channel requires the use of our virtual digital artist for editing and production. If used 8 times
- Executive board meetings, budget meetings, grant writing, newsletters, and bookkeeping: 1000 hours

* Rate obtained from the state-level value of volunteer time breakdown from https://independentsector.org/resource/vovt_state_2021/

Cordova Community Council

RCRCCB has partnered with the Cordova Community Council Foundation (CCC) for years to provide high-quality musical performances in Rancho Cordova. The CCC generously contributes consulting services as well as a financial stipend for operational expenses.

Community Enhancement Funding Request Total: $20,000

Performance Venues and Festival Participation	$3,000
Production Materials and Musical Equipment	$4,500
Equipment Protection	$6,000
Musical Guests and Local Talent Partnership	$4,500
Community Outreach and Publicity	$2,000
TOTAL	$20,000

Performance Venues and Festival Participation: Our band has successfully performed in multiple outdoor and indoor venues; however, attaining concert venues which provide a stage large enough for our 50-70 member ensemble, appropriate lighting, appropriate sound and technical staff can be very costly to rent and very challenging to find. Securing venues which can provide these amenities will enhance the quality of our performances, attract guest performers, conductors and composers which will in turn attract a broader audience. The band plans to apply to represent the Rancho Cordova Community at both the San Francisco Golden Gate Park Festival and the National Association of Concert Bands Convention in 2023. There are associated costs involved with the application process for this event including but not limited to application fees, recording fees, and photography suitable for promotional materials. Additional costs may include safe, and appropriate equipment transportation.

Production Materials and Musical Equipment: The band uses production materials to continue to provide high level performances to the Rancho Cordova community. We typically perform over six concerts per year and hold weekly rehearsals. We are currently working on improving our livestreaming and recording abilities to bring music to vulnerable residents who cannot attend our concerts in person such as seniors at our community senior centers and assisted living facilities. We would like to invest in equipment to bring our music to life through livestreaming and recording platforms. Our new partnership with the Rise Up Theater Company has brought knowledge and manpower to produce these events at a quality level representative of Rancho Cordova's strength and beauty. Our band membership has had an increased level of turnover due to the effects of the COVID pandemic. We have surprisingly gained many new members while others await the final lifting of restrictions, mandates and safety when masks are no longer needed to protect one another. As such, some of the materials we have been using over the past several years have been worn down and need replacement or supplementation. It is necessary to provide appropriate equipment and supplies to all musicians at

performances and rehearsals. Our schedule of performances for the upcoming season is very busy and diversified and will require a variety of music for smaller ensemble groups and for the whole band. Funds will be used for supplies which may include additional chairs, stands, music folders, and lighting equipment as well as sheet music and music books.
Many compositions require specific percussion instruments in order to perform them. While most band members provide their own instruments, percussion equipment is not typically owned by the percussionists but provided by the band. As the band is looking to incorporate percussion instrument sounds in smaller ensemble settings, we are looking to acquire electronic percussion equipment for those smaller venues. The added benefit to incorporate electronic percussion equipment is the reduction of liability in moving our larger pieces and using them in inclement conditions which can really cause undue wear and tear to the instruments.

Equipment Protection: With a growing arsenal of delicate musical instruments, a paper music library, and other equipment, it is essential to maintain storage space which provides adequate protection which is secure, climate controlled and rodent proof. It is necessary to ensure that the equipment purchased in prior years is protected during transportation to performances and while being stored in a facility. Cases – specifically, for brass and percussion – are needed to protect existing instruments as well as the volunteers handling instruments during transport to and from rehearsal and concert venues.

Musical Guests and Local Talent Partnership: The band brought the 2015 National Association of Concert Bands' Convention to Rancho Cordova. The band has proudly performed and maintains in its library "River City" by world-renowned composer Jacob de Haan commissioned specifically for the band. With the composer in attendance and actively interacting with the audience, the band performed the 2019 West Coast premiere of "The Sword of Titan" a composition by renowned and prolific band and movie score composer/orchestrator Rossano Galante.

Continuing the momentum of bringing the City of Rancho Cordova to the national and world stage, the band strives to attain and bring exclusive compositions, arrangements, guest artists, composers and conductors to our community. Jerry Brubaker is a prolific and world-renowned composer/arranger of over 200 works who was a member of the US Navy band for over 30 years as French horn soloist. The band commissioned a piece in 2021 from Jerry Brubaker titled "Proudly They Served." The Band plans on performing the live world premiere of "Proudly They Served" as the central theme for the Cordova Community Council's 2022 Memorial Day event at the Rancho Cordova Performing Arts Center. Additionally, the band wants to support and collaborate with local artists and musicians to showcase the amazing talent we have here in the Rancho Cordova area. Funding for additions original compositions, arrangements suited specifically for the band's membership, and for guest artists, conductors and composers to visit Rancho Cordova would enhance the Rancho Cordova Arts' goal of making the City an arts destination.

Community Outreach and Publicity In order to enhance community outreach efforts, increase civic engagement, increase community pride, and be a visible manifestation of the community enhancement funds locally and abroad, it is essential for us to produce high-quality promotional materials and to consult with public relations and marketing professionals. Outreach materials to help the band engage the audience to participate in our performance, plan to attend future concerts, and become involved in instrumental music fosters the sense of community and stimulates the interest of individuals to become involved in music. The band has the opportunity to encourage people to want to play a musical instrument (especially young persons) or to dust off an instrument that may have not been used in some time to play once again.

Rancho Cordova River City Concert Band Request for Supplemental Endorsement for Measure H Grant

1 message

Melanie Freer <floutistfreer@gmail.com> Thu, Mar 3, 2022 at 10:16 AM
To: "agriffin@fcusd.org" <agriffin@fcusd.org>

Hello Ms. Angela Griffin Ankhelyi,

Please find the enclosed request from the Rancho Cordova River City Concert Band for the endorsement of the Folsom Cordova Unified School District for school site usage. Our Band looks forward to renting the Rancho Cordova Performing Arts Center for free in-person band concerts this upcoming year.

I have enclosed a copy of the Band's 2022-2023 Measure H Grant proposal as I believe this is supposed to accompany our request to your school superintendent. Thank you so much for your continued support of the performing arts in Rancho Cordova.

I can be reached most easily at 916-878-6161 should you have any questions.

Sincerely,

Melanie Freer, President
Rancho Cordova River City Concert Band

RCRCCB Supplemental Endorsement Form 2022-2023 Folsom Cordova Unified.pdf
146K

Application #2

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR SCHOOL SITE USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a public K-12 school site, you must request the endorsement of the school superintendent of that school district.

One supplemental form is required per school district.

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by the corresponding school superintendent for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. Each participating school superintendent reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

To be filled out by grant applicant

Project/Program Name: Rancho Cordova River City Concert Band Enhancements

Name of Organization: Rancho Cordova River City Concert Band

Name of Applicant and Title: Melanie Freer, President

Applicant's Phone: 916-878-6161 **Applicant's Email:** floutistfreer@gmail.com

Submit a copy of your application with this page to the school superintendent(s). For your application packet to be considered complete the signed and dated endorsement form must be received by the City of Rancho Cordova by March 18, 2022. The superintendent will submit the form directly to the City's Community Enhancement & Investment Fund team. You must submit this form and a copy of your application to the appropriate superintendent or his or her designee no later than March 4, 2022. For Elk Grove Unified School District use BGrewal@egusd.net. For Folsom Cordova Unified School District use agriffin@fcusd.org. For Sacramento City Unified School District use dianne-brown@scusd.edu.

To be filled out by School Superintendent or designee

Project Information

Project Name

NorCal School of the Arts Theater Arts & SEL Integration Program at Williamson Elementary School

Project Synopsis

NorCal School of the Arts Outreach Program will provide every classroom at Williamson Elementary with 10 Theater Arts & SEL integrated classes as well as an after school production for students wanting to engage in further after school theater arts programming. Williamson Elementary is a Title 1 school in FCUSD.

Project Description

Funds provided by the City of Rancho Cordova's Enhancement Fund will enable NorCal School of the Arts to serve 537 students at Title one school, Williamson Elementary with Theater Arts & Social-Emotional Learning-Integrated classes during school in the fall of 2022. During the spring of 2023, students will have the option to participate in an after-school program that will culminate in a fully-produced musical at the school. Each Williamson Elementary classroom will experience ten Theater Arts & SEL-Integrated classes led by a NorCal professional teaching artist throughout the school day. NorCal teaching artists are trained in weaving social-emotional learning strategies into theater arts lessons. These classes will also act as a professional development opportunity for the Williamson Elementary classroom teachers to learn how to integrate SEL strategies through theater arts. Throughout this program, NorCal School of the Arts will serve as a resource for classroom teachers. Teachers will have access to all the curriculum and Theater/SEL-Integrated resources to continue the exercises once the program is completed. Social-emotional learning activities are imperative as a COVID-responsive strategy for helping students reengage with their peers in the classroom. This project benefits the children and families from Williamson Elementary as it supports the growth and development of young students. It enhances the quality of educational services to Rancho Cordova students because it acts as a professional development opportunity for teachers while engaging students in the arts. With the goal being to nurture safe, emotionally healthy, and engaged students, this COVID responsive Theater Arts and SEL-Integrated program will help students express their emotions and engage in creative activity as a means of working through the effects of covid-19 and over dependence on electronics, which more and more studies are revealing a detrimental impact on our children.

Project Team

Michele Hillen-Noufer - Executive Director Michele Hillen-Noufer, M.Ed., AEA, SAG is the Executive Director for

NorCal School of the Arts. She is a member of Actors' Equity Association and SAG/AFTRA and has a master's degree in education, is an arts advocate and administrator. Michele is an arts integration specialist and keeps her skills current by teaching at NorCal and local elementary schools and providing workshops and professional development opportunities for conferences and in-services for educators. Kevin B. Johnson - Teaching Artist aka K' Von Blakemore-Johnson is an Equity actor, singer, dancer, director and visual artist. He was taught theatre for over 30 years. For NorCal School of the Arts he has taught at Williamson Elementary in FCUSD, F.C. Joyce in Twin Rivers Unified School District as well as several schools in the Sacramento City Unified School District. Elaine Lenae Douglas - Teaching Artist Elaine Lenae Douglas has been performing for many theater companies in Sacramento and other nearby areas for over 20 years. Elaine Douglas is a graduate from the University of California Berkeley with a double major in sociology and ethnic studies. She later obtained a teaching and administrative services credential from California State University, where she studied theater arts as a minor. Mitch Worrell-Olsen - Teaching Artist Mitchell Worrell-Olson is an ever studying student of the theatrical arts. He is a Sac State Graduate with a Theater degree and is currently in the process of preparing for grad school applications where he hopes to pursue a PhD in Theater and Performance with the hopes of teaching at the collegiate level one day. For a comprehensive list of NorCal staff and faculty go to https://www.norcalsota.org/

Project Goals

NorCal School of the Arts goal at Williamson Elementary School is to provide classes for students that also act as a professional development to teachers on theatre arts and SEL integration techniques for the classroom. These classes will further engage students and support the emotional and academic well-being of students. NorCal School of the Arts will provide an after-school theatre program to help students obtain life skills related to increased ability and confidence with public speaking, self-management, communication and collaboration. Student involvement in theater arts and SEL-integrated activities provides students critical thinking opportunities to help them in school and beyond. Student engagement in the arts also positively impacts cognition. Upon the completion of the program, NorCal's Executive Director will provide an impact report to include video and photo documentation of teaching artists in the classroom/rehearsal room and the students' final presentation. The impact report will contain attendance records; weekly lesson plans with the specific ELA, SEL, and VAPA standards achieved; as well as survey results. NorCal management will observe teaching artists in the classroom and review daily reports. After each class, classroom teachers will fill out a survey via Google Docs that is programmed to go directly to the teaching artist and the Executive Director/Program Manager so that feedback can be immediately incorporated into the next lesson. Student progress will be notated throughout the process. Formative assessments will be woven into the lesson plans throughout the artistic process of both the classes and the after-school theater program. The curriculum will be created through a backward design approach with the summative assessment (final outcomes) referred to during the curriculum creation process.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total project cost

31,100

Estimated breakdown of project expenditures

Teaching Artists for 10 class SEL/Theater Arts integrated classes: $17,100 ($60.00 a class at 19 classrooms, $20 lesson plan prep fee a class) (serving the entire student body of 528 students) Administration/project management for 30 weeks: $5,000 Director, Choreographer & Music Director for show: $6,000 Production costs: set, costumes, light rental, sound equipment rental $3,000

Matching Funds

$6,100

Include any other funding contributions

other grants pending

Application #3

Ongoing operations and maintenance costs (if applicable)

n/a

Total Community Enhancement & Investment Funds requested

$25,000

Is this a multiyear request?

No

How many years have you received funding for this project?

1

When will your request for funding sunset for ongoing programs?

The program will be completed by the end of April/early May 2023.

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

NorCal School of the Arts applies for many grants throughout the year to enable programs to continue at school sites. As much as possible, we want students to have an on-going experience with theater arts so it isn't just a one year offering. Once committed to a site, we do everything we can to come back year after year to enable students to continue to grow their skills in the art form. NorCal School of the Arts has been successful in obtaining grants from California Arts Council and the City of Sacramento Office of Arts & Culture.

Project Schedule, Timeliness and Adaptability

Project Schedule

September 2022 Meet with school principal to schedule classroom visitations and regular day/time for each classroom, decide on show title for spring show and discuss goals. October - December 2022 NorCal School staff will implement 10 theater arts/SEL integrated classes in each classroom at Williamson Elementary School. This will have the added benefit of generating excitement about a spring musical. Final class of the 10 class series will include a final presentation for students to share skills obtained. January Auditions & registration take place for April production. NorCal School of the Arts (NorCal) invites parent involvement with organized parent meetings that help to explain process, rehearsal schedules, time commitment, and to solicit parent engagement (community building). January-April Rehearsals begin 3-4 days a week, After- school, 3 to 4 days a weeks for 1-2 hours of rehearsal each day. Community and parent engagement occurs by actively getting them involved in building sets, creating costumes and props, and helping with publicity. days over two weekends. to engage parents and community to support the final production April Dress and tech rehearsals, final presentation, performance, & assessments Note: At Williamson Elementary, the principal, Leslee Cottrell, is extremely supportive of NorCal School of the Arts programming and realizes the need for the students and teachers to have SEL strategies integrated into the arts. This grant would provide an amazing opportunity for students to participate in the arts while receiving the added benefit of addressing student emotional health. Theater Arts & SEL integrated classes and rehearsals include: Physical and vocal exercises, Improvisation games and SEL welcoming signature activities, movement and main lesson. Students devise a final piece and engage in the creative process together to support building community.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

Executive Director, Michele Hillen-Noufer, M. Ed, has over 20 years experience producing children's plays, musicals and educational programs grounded in academic and vapa standards. NorCal School of the Arts has had great success in after school programs in another Rancho Cordova school since 2018. The timeline provided is completely reasonable and NorCal has had a track record of success.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

The program proposed is also designed for a virtual platform and can be transferred to a virtual or hybrid format. NorCal School of the Arts has provided the proposed programs both virtually and "in-person" in the past. In SCUSD during Fall 2020, NorCal School of the Arts was in 70 classrooms virtually providing Theater Arts & SEL integrated classes and this school, NorCal is in 150 classrooms in person in SCUSD.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical address of project location

2275 Benita Dr.
Rancho Cordova, CA 95670

Other physical addresses if project/program is at multiple sites

Have you received a letter of support for the project/program from the property owner?

Yes (includes if you are the property owner)

Letter of Support from Property Owner (not K-12 schools or park/park facility)

NorCal LTR.pdf

Is your project/program intended to operate or take place at a public K-12 school site or a park/park facility?

Yes, at a public K-12 school site

Which school district is the public K-12 school site located in?

Folsom Cordova Unified

Public Record Unless otherwise exempt under applicable law, applications and application materials are public records. All information received from an applicant, whether received in connection with a grant application or in connection with any grant-funded activities performed are subject to disclosure pursuant to the California Public Records Act, unless otherwise exempt. Next Steps Applicants will receive acknowledgement once their application is received. When the application period closes, staff will review each application according to the application criteria and prioritization method listed within the Fiscal Year 2022/2023 Grant Application Process and Criteria document. Should staff have any questions or need clarification on your application, they will contact you. You are invited to attend any of the public City Council Meetings. It is anticipated at this time that the Community Enhancement & Investment Fund team will present information to the City Council starting in April and continuing through June. We may invite applicants to present their project and we may make selection recommendations to Council during the May City Council meetings. In addition, the Community Enhancement & Investment Fund team will send periodic updates to grant applicants via e-mail. It is possible that all funding decisions for the Fiscal Year 2022/2023 Community Enhancement & Investment Fund could be made in May and formally adopted by City Council by early June. Staff intends to notify all applicants of the funding decisions made by the end of June. If you have not signed up to receive automatic notifications when council meeting agendas are posted, you can do that by using the link below:

Application #3

Williamson Elementary School

Home of the Wildcats

To whom it may concern:

I am writing to express our support and excitement for the opportunity to have NorCal School of the Arts return in the 2022-23 school year with their Theater Arts Program integrated with Social Emotional Learning (SEL) at Williamson Elementary. During this school year, thanks to last year's City of Rancho Cordova Enhancement fund award, each classroom is receiving 10 Theater Arts & SEL classes. Williamson classroom teachers were thrilled to see their students and especially their English Language Learners engage creatively with the lessons, expressing their emotions and learning valuable communication and collaboration skills.

Now, more than ever, our students need SEL strategies as we return to a new normal and educators compete with social media influences as well as the overuse of electronics. The arts are a perfect way to deliver Social Emotional Learning strategies as the Arts already provide so many opportunities for students to connect, build community and act as an outlet for self-expression and creativity.

With our past arts programming, the teachers and families have seen that bringing the arts into our school deepens the concepts that they are trying to teach in their class and engages students to want to come to school. Our resources have been unable to support a theater program at our school for many years and we welcome this opportunity to continue to partner with NorCal School of the Arts. Bringing a continued Theater Arts/SEL program to Williamson Elementary would help all students but especially students who learn differently and excel in other ways such as through movement, singing and verbal expression. It would help our students connect to each other in a meaningful way and this Arts Integration program in the classroom would also act as a continued professional development for the classroom teacher, giving the teacher some new strategies and perspectives to address students' emotional needs.

Here are just a few of the many positive comments I have seen from the classroom teachers.

"Thank you so much for bringing this program to our students. They needed this so much and we are grateful to have NorCal at our school."

"Thank you. This is a dream come true!"

"Thank you for this opportunity."

Thank you, City of Rancho Cordova, for your consideration for Williamson Elementary. Thank you for investing in our youth as we continue to try to nurture our students' talents and prepare them for a successful future.

Sincerely,

2275 Benita Drive Rancho Cordova, CA 95670 | [P] 916.294.9185 | www.fcusd.org/we

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR SCHOOL SITE USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a public K-12 school site, you must request the endorsement of the school superintendent of that school district.

One supplemental form is required per school district.

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by the corresponding school superintendent for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. Each participating school superintendent reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

To be filled out by grant applicant

Project/Program Name: NorCal School of the Arts Theater Arts & SEL Integration Program at William

Name of Organization: NorCal School of the Arts

Name of Applicant and Title: Michele Hillen-Noufer, Executive Director

Applicant's Phone: 916-955-9462 **Applicant's Email:** michele.hillen@norcalsota.org

Submit a copy of your application with this page to the school superintendent(s). For your application packet to be considered complete the signed and dated endorsement form must be received by the City of Rancho Cordova by March 18, 2022. The superintendent will submit the form directly to the City's Community Enhancement & Investment Fund team. You must submit this form and a copy of your application to the appropriate superintendent or his or her designee no later than March 4, 2022. For Elk Grove Unified School District use BGrewal@egusd.net. For Folsom Cordova Unified School District use agriffin@fcusd.org. For Sacramento City Unified School District use dianne-brown@scusd.edu.

To be filled out by School Superintendent or designee

Endorsement Given Yes

Endorsement Withheld

Conditional approval of facility rental only

Superintendent's or Designee's Printed Name: Dr. Sarah Koligian

Date: 3/17/22

School District: Elk Grove Unified Folsom Cordova Unified ■ Sacramento City Unified Other

Comments (Optional):

The school superintendent or designee will send this form directly to CEIFGrants@cityofranchocordova.org no later than March 18, 2022. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

Project Information

Project Name

Little Glory and the Wamdemic! Education Through Story Telling

Project Synopsis

Get the book, Little Glory and the Wamdemic! illustrated and published. It features engaging multi-cultural characters, colorful illustrations, rhyming words and humor. It also addresses water conservation and coping with depression and anger. It is a true story of how to make lemonade when life gives you lemons. If I am awarded the grant, I will do story telling in the RC school district every 3 weeks at different sites for 1 year. Each instructor will get a copy of the book and each child will get a potted plant to feel like part of the solution.

Project Description

Please see project description phases 1-6 in the attached supplemental document.

Project Team

I, Kimberly Austin is solely responsible for the development and delivery of this project. However, I do intend on hiring an illustrator. Hopefully he or she will be a Rancho Cordova illustrator suggested by Cheryl Gleason at Cordova Council.org. I will also get the book published either through Amazon self-publishing or through the I Street Press at Sacramento Public Library. Plants for the children may be provided by Soil Born Farms in Rancho Cordova if possible.

Project Goals

Goal#1 Find an illustrator. I will right down all illustrators I contact and the date. I will make note of the correspondence between the illustrators and I. I will make a note if I like their portfolio. If I like their body of work, I will move forward with meeting with them and engaging in a contract. Every part of this process will be documented. Goal#2 Get the illustrations in the book completed. During the illustration process, I will ask the illustrator to send me sketches of pages to be approved. I will document this process carefully with dates of approvals and dates of when final pages will be completed. Goal#3 Choose a publisher. I will carefully document the call with the publishers. What the process involves, cost, time and dates of the entire process. Show the signed contract Goal#4 Complete the publishing process. Document the start and finish date of publishing Goal#5 Volunteer for 1 year doing story time reading Little Glory and the Wamdemic! at schools in the Rancho Cordova district, Hagen Park Recreation Center and possibly Soil Born Farms in Rancho Cordova.

Application #4

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total project cost

$8,070

Estimated breakdown of project expenditures

• Illustrator $3,000 to $5,000 TBD • Publishing $200 • Plants $450 • Pots $550 • Books for 18 classes $250 • General Commercial Liability insurance for no less than 1 million dollars $400 • Sexual Molestation and abuse insurance for no less than $500,000 $600 • Auto Mobile liability insurance no les than 1 million is $620 a year • No rental fee for the school • No rental fee for the park • No event fees

Matching Funds

N/A

Include any other funding contributions

Any project cost above the $5,000 grant will be paid by me Include any other funding contributions including your own: My labor to create the rock animals for the children and the cost of materials. $200 for the rocks and $70 for the paints.

Ongoing operations and maintenance costs (if applicable)

I may plan to ask for money in the future for additional story times and more books for the teachers and plants in pots for the children.

Total Community Enhancement & Investment Funds requested

$5,000.00

Is this a multiyear request?

No

How many years have you received funding for this project?

0

When will your request for funding sunset for ongoing programs?

In the year of 2024

Do you plan to ask annually for funding?

No

What other funding will you seek to support your project?

None other than what was mentioned above

Project Schedule, Timeliness and Adaptability

Project Schedule

1/22/2022 – 5/22/2022 find an illustrator 7/1/2022 sign the contract with an illustrator 10/31/2022 Book illustration completed 11/1/2022 Publishing complete/Project complete 1/1/2023 start volunteer story telling

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

1. Find an illustrator, keep records of the process 2. Illustrations complete. Approve sketches after pages to stay on track 3. Find a publisher sign a contract a keep in touch with publisher regarding timeliness 4. Document each part of the publishing process and the suggested time it will take 5. Make a schedule showing specific dates and times of the volunteer schedule

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Application #4

Yes, I will be able to adjust. If there is a change I would be able to read to the children via Zoom and drop the book and plants off with the instructor or person in charge of the group of children that day.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Application #4

Project Description Phase 1-6

Phase one

I have lived in the same house in Rancho Cordova for 26 years, approximately 1 mile from Cordova Meadows Elementary School. My master plan started as a water conservation project. I removed all the grass in my front yard with a rototiller and replaced the landscape with a variety of rocks with different textures, shapes, sizes and colors. I carefully laid the rocks in various patterns to create designs with movement. I planted trees, water friendly shrubs, grasses and bushes to add even more color and texture.

Phase two

Began when I wanted to make a big lizard out of rock providing a “free” walking rock art museum of sorts for the kids in the neighborhood. My mother who has dementia, with a child like glint in her eyes asked me to make a big turtle instead sooo… I made a big turtle made of several river rocks with smooth glass black eyes. By this time the pandemic was in full swing, isolation had begun. A family walked by and a little boy yelled out look Glory there is your dream house with the turtle. I was plenty depressed about not going to the office and feeling shut in, all alone and bored stiff. The pandemic hit me like Wham! Thus, the word, Wamdemic in the title of my book. Life as I knew it came to a screeching holt. I did not know little Glory from Adam, but after hearing what the little boy said I wanted to create another creature for Glory and other children to get excited about. I called my girlfriend and told her all about what I was doing, I was so thrilled about the project. She said Kimberly that sounds like a children’s book to me.

Application #4

Phase 3

Involved purchasing a lot more rocks and plenty of paint. If I was going to write a children's book about the front yard, I was going to have to make a lot more creatures and animals to feature in the book. In all, I made 9, a cat, bird, 3 dragon flies, 3 rabbits, Ghecko, Scorpion, Snake, frog and a turtle. They are all placed near shrubs, plants and ground cover to mimic a natural habitat and make it more interesting for the children to find them and point them out.

(Attached are pictures of my front yard Little Glory's Animal Rock Garden)

Phase 4

I wrote the actual story. Little Glory and the Wamdemic! It is a true story, loosely based on how the rock garden got started. It is about how Mrs. Kimberly and a little girl name Glory learned to cope with the isolation of the pandemic and turned lemons into lemonade. It features the neighborhood's multi- cultural neighborhood, painted rock animals, painted rock creatures, trees, shrubs and succulents. Plant life, animals and creatures will be labeled through-out the book. Little Glory and the Wamdemic takes about 12 minutes to read out loud.

Phase 5

Involves getting the book illustrated and self- published through Amazon or I Street Press at Sacramento Public Library TBD.

Phase 6

This phase brings everything full circle, back to the Rancho Cordova Community. I will sign a written commitment to volunteer at 5 schools in my area, Soil Born Farm in Rancho and the Hagan Park Recreation Center here in Rancho Cordova for one year. I will do 1 story telling event every 3 weeks between them. After story- telling, I will talk about water conservation, how little Glory and Mrs. Kimberly overcame anger and depression from being shut in during the Pandemic by channeling that negative energy into a creative expression and making

something wonderful. I will share how a community of different nationalities come together in one place to enjoy the rock garden. I will have an open question and answer time to engage with the children about the book and what they did during the pandemic to create a more positive environment for themselves. I will ask them questions about what trees and shrub names they remember. The back of the book has a question & answer page for parents or teachers to interact with their child or children. At the end of story telling, I will give away a book to the class and a small potted succulent plant to each student for them to feel like a real part of the story. The child could paint the pot and water their little plant to awaken their own creative, nurturing side.

This is my first book and I am over joyed to share my experience through this book with my community. Hopefully sharing my story will help children work through some of their feelings regarding the pandemic or other obstacles that come up in their life by demonstrating a creative way to help themselves feel better. The project shows community pride, beautifying the neighborhood by creating something that can be enjoyed by all. The book is both fun and educational, it teaches children about nature and water conservation.

Application #4

Contacts Made

I have sent emails to 5 principals, attached a letter telling them all about myself and pictures of my front yard project and visited all 5 schools personally. I communicated via email the March 4th deadline. (attached the letter I sent to principals)

Principal Kim Christierson at White Rock Elementary located at: 10487 White Rock Rd. Rancho Cordova CA 95670 is currently working on the school budget and said she will contact me.

Principal Jessica Hutchinson at Rancho Elementary School located at: 2562 Chassella Wy Rancho Cordova, CA 95670 called me back and said she will read the email and get back with me.

Principal John Bliss with Cordova Gardens Elementary School located at: 2400 Dawes St. Rancho Cordova, CA 95670 signed my letter and said he is looking forward to me volunteering at his school. I have attached his letter.

Principal Amber Fontaine at Cordova Meadows Elementary School located at: 2550 La Loma Dr. Rancho Cordova CA 95670 office manager Kelley said she will talk to the principle regarding my email and be in touch.

Principal Christy Wilkerson at Cordova Villa Elementary School located at: 10359 S White Rock Rd, Rancho Cordova CA 95670 front office lady said they will give her my message. I am waiting to hear back from her.

I have also visited the Hagen Parks and Recreation and written the administrator there. I spoke to Brandy Dionne with Hagen Parks and Recreation on 3/3/2022. She spoke to Christina James, they are going to endorse me and sign the letter. They will send it directly to the Chamber of Commerce before the deadline of March 18, 2022. I attached her letter.

I spoke to Emily Hain at Soil Born Farms who helps plan the community events. She is going to check with her supervisor to see if they can provide the starter plants and if I could volunteer on a Sat. to read to the children that visit the farm.

I spoke to Angela Griffen Ankhelyi, Director of Communication who instructed me to get a letter from the principles of the schools I wanted to volunteer at. She would then give the letters to the Superintendant Dr. Sarah Koligian to sign.

Application #4

I am going to call the lady in charge of the art museum on Folsom Blvd for a referral to local illustrators. I will retain all rights to my book and will ask the Chamber of commerce to sign an agreement stating this fact.

Personal letters of recommendation:

I have a letter from a parent from when I was Kimberly the Clown. (letter attached)

I have a letter from elected Rancho Cordova Clerk, Chris Clarke. I will email this letter seperately

I have a letter from the owner and teacher of Folsom Montessori School where I worked as Kimberly the Klown for many years

I will email a letter from a neighbor of a child who enjoys Little Glory's Rock Garden in my neighborhood before the deadline of March 18th.

Required Insurance:

I will get all the required insurances listed. I have no employees (need no workmen's comp).

Personal Letters of recommendations

3/4/2022

Kimberly Austin, as Kimberly the Klown, was associated with our school in the late 90's and early 2000's. She provided entertainment at our school's "Last Day Celebrations" every year. She wore many hats: she led the children in movement games and activities, she did face painting and she gave a magic show.

In addition to the children, as the owner of Folsom Montessori School, I looked forward to her visits! We held our Last Day Celebrations at a local park with our preschool classes celebrating in the morning and our kindergarten class celebrating in the afternoon. Kimberly began with face painting and in this way interacted with each child individually. She is a very sweet, peaceful, kind person and the children loved to be with her.

Application #4

Kimberly was a magician! The children were captivated by her magic tricks. They would remember them from year to year!

She also led the children in games like sack races, musical chairs, etc. She was very successful organizing the games and leading the children. She would end the game time with a parachute game that involved the children's parents. This was a much, anticipated highlight!

Putting all this together, I was honored to have Kimberly the Klown as the highlight of our annual celebrations. She was professional. She arrived on time, set up her activities, engaged children as a group and individually, interacted with the parents successfully, was flexible with timing of activities as needed. She was confident and very successful leading the group activities on her own and also incorporating the parents and teacher as "her helpers".

Our students and their parents loved Kimberly and looked forward to her visits every year!

Later, Kimberly did a wonderful art installation for our school. She made three very large paintings to install on our fence. She incorporated elements from our classroom and playground plus our school's love for the Earth! Each of our students had the opportunity to paint with Kimberly as she made these wonderful paintings!

In conclusion, I highly recommend Kimberly Austin for any event or activity involving children. I would be delighted to have the opportunity to have Kimberly introduce and read her book to our students. Her concept to read and to give children books and plants is an inspiration!

February 25, 2022

Application #4

To Whom It May Concern:

I am sharing my experiences working with Kimberly Austin in her role as Kimberly Klown. My daughters each attended the Folsom Montessori School for about 2 and half years. They were first introduced to Kimberly Klown at the end of school year party. It was an event that was looked forward to as the year end celebration. Kimberly was able to create a clown character that did not scare little children but excited them and made the end of year party fun. She had just the right amount of costume and fun to pull them in. She also knew just the right amount of makeup and hair to keep the human friendly face so young children immediately took to her.

The children that attended the school often had birthday parties that Kimberly Klown hosted. These were the best parties for both kids and parents. Kimberly took over the fun festivities and made sure that all the kids were included and had fun. There were magic tricks, creative activities and of course, cake. Even after leaving the school, my children would still attend or have their own parties that included Kimberly Klown.

On a personal note, I came to know Kimberly outside of her work. I did not realize that my daughter was unaware that Kimberly Klown was dressing up as a character. Because she was so good with children and connected with them, she didn't see this as an act. One day, my daughter saw Kimberly in her regular clothes. She asked me, "why is she dressed like that?" I understand the confusion. Kimberly was always genuine in her connection with children and her ability to understand and see what children need. She exudes great warmth and kindness that cannot be faked.

Application #4

FCUSD

February 28, 2022

Dear Mayor and City Council,

My name is Chris Clark, and I represent area 4 of the Folsom Cordova Unified School District. I am writing this letter in support for the Community Enhancement & Investment fund grant that will be submitted on behalf of Kimberly Austin.

Mrs. Austin and her husband have lived in the same house in Rancho Cordova for 26 years. She is a 54 year old grandma of 4 beautiful grandchildren. When her 3 children were growing up, she was a PTO president at Cordova Meadows elementary school, a member of the PTA at Mitchell Middle School and in later years volunteered for the mentorship program at Cordova High School. She has worked as a reading assistant at White Rock Elementary School and donated countless volunteer hours at Cordova Meadows after school program helping 3rd graders to read for several years. She has also and donated a hanging mural to the Rancho Cordova library that stayed up for many years until it was remodeled.

During the pandemic, she has transformed her front yard into Little Glory's Animal Rock Garden. The landscape is all rock, shrubs, trees and bushes. She has created several painted rock animals. She engaged in this project so the children in the neighborhood would have a "free art museum of sorts" something to enjoy during the Pandemic. Also during the pandemic, she has written a children's educational picture book and called it “Little Glory and the Wamdemic!” It will feature the neighborhood's multi- cultural members, rock animals, trees, shrubs and succulents.

Funding from this grant will help pay for the illustration and publication of the book, also to purchase copies of the book to give away to kids in the immediate neighborhood at underserved schools in Rancho Cordova, and to pay for plants to give away after her reading engagements in our local schools.

Sincerely,

Christopher B. Clark
Board Member
Folsom Cordova Unified School District
cbclark@fcusd.org
916-370-3383

Application #4

Hello Principle Christierson, Hutchin, Bliss, Fontaine and Wilkerson, my name is Kimberly Austin. I have attached a pre-written letter if choose to use it and pictures of my front yard rock garden. Thank you in advance for taking the time to read my letter.

My story is a little long to share in an email, but I will give you the shortest version I can provide with the most details as possible for you to get to know me as a person and story teller in a hurry LOL. I have been a Licensed Covered CA health insurance, Medicare and life insurance agent for the past 8 years. My license number is 0G82912. To be licensed in the state of California you must have an extensive background and credit check. I had my first and second Covid vaccine and would be perfectly willing to wear a I-95 face mask and take recent finger prints to participate on the school grounds.

In my past, when my kids were very young, I wore many hats. My husband and I have lived in the same house in Rancho Cordova for 26 years. I am a 54 year old grandma of 4 beautiful grandchildren, that roll is my crown and glory. :-) When my 3 children were growing up, I was PTO president at Cordova Meadows elementary school, a member of the PTA at Mitchell Middle School and in later years volunteered for the mentorship program at Cordova High School. I worked as a reading assistant at White Rock Elementary School and donated countless volunteer hours at Cordova Meadows after school program helping 3rd graders to read for several years. I was Kimberly the Klown for many years and was featured on a 2pg. spread in the local newspaper Time and Money. I also had an enjoyable career painting children's murals in homes throughout Northern CA. I volunteered at Shriner's Hospital doing face painting and donated a hanging mural to the Rancho Cordova library that stayed up for many years until it was remodeled. I donated those same paintings to a day care in Rancho Cordova where they hang today.

Turning the hands of time to 2022. During the pandemic, I transformed my front yard into Little Glory's Animal Rock Garden. The landscape is all rock, shrubs, trees and bushes. I created several painted rock animals. I engaged in this project so the children in the neighborhood would have a "free art museum of sorts" something to enjoy during the Pandemic. I grew up in a poor neighborhood in Los Angeles. Just 2 blocks from my home was a place called St. Elmo's Village. Artist painted the sidewalks and created random sculptures made of junk. The small, shabby surrounding properties were painted with bright wild colors and designs. Walking through St. Elmo's village is one of my fondest childhood memories and no doubt contributed to who I am today. Now, children of all ages are stopping by my house to enjoy what I have created for them. I told my girlfriend about what I was doing and she said it sound like a children's book to her. Sooooo....I wrote a children's educational picture book and called it Little Glory and the Wamdemic! I chose this title because the Pandemic hit me like WHAM! Life as I knew it came to a screeching holt! This book is mostly a true story about how Kimberly and a little girl name Glory learned to cope with the isolation of the pandemic and turned lemons into lemonade. It features the neighborhood's multi- cultural people, painted rock animals, trees, shrubs and succulents. The book takes about 12 minutes to read out loud.

I am submitting an application for the Community Enhancement & Investment fund grant. I must attach an endorsement form signed by the Super Intendent of Schools Dr. Sarah Koligian. This guideline was communicated to me by Randi Kay Stephens, MPA Community Enhancement & Investment and is a requirement of the grant application. In order to get her endorsement, I must write all the principles of the elementary schools I intend to volunteer at and get their approval to volunteer at their schools.

I am asking for the grant to help pay for the illustration and publication of my children’s book, to purchase copies of the book to give away to the children I am reading to and to provide them with one small potted succulent plant.

Application #4

I will sign a written commitment to volunteer at 5 schools in my area and the Hagen Park Rec Center here in Rancho Cordova for one year and do 1 story telling event every 3 weeks between them.

After reading the book to the group of children, I will talk about water conservation, how little Glory and Mrs. Kimberly overcame anger and depression from being shut in during the Pandemic by channeling that negative energy into a creative expression by making something wonderful. I will share how a community of different nationalities come together in one place to enjoy the rock garden. I will have an open question and answer time to engage with the children about the book and what they did during the pandemic to create a more positive environment for themselves. I will ask them questions about what trees and shrub names they remember. The back of the book will have a question & answer page for the parents to interact with their child or children. At the end of story telling, I will give away a book and a small potted succulent for them to feel like a part of the story. The child could paint the pot and water their little plant to awaken their own creative, nurturing side. This is my first book and I am thrilled to share my experience through this book with my community. I am just fine with reading outdoors if it makes people more comfortable.

I need to send in my information and submit the grant in approximately 8 days. I will give you a call to discuss if you want me to volunteer at your school. Perhaps we can meet in person, do a screen sharing on join me or simply talk over the phone. Whatever would work best for you and your schedule would be greatly appreciated. If you agree with me volunteering at your school as a story teller, it will most likely not happen until next year 2023. Please draft a short letter saying you agree, or you can sign my pre-drafter letter I have attached and email it back to me or I can come by the school and pick up the letter personally.

Attached is the pre-drafter letter and a pictures of my front yard, Little Glory's Animal Rock Garden.

Thank you in advance.

Sincerely,

Kimberly Austin

916-601-0867

To whom it may concern,
My name is John Blair, Principal of Cordova Gardens Elementary. We are excited to work with Kimberly next year, 22-23
John P. Blair 3/1/22

Application #4

March 4, 2022—An account of our child's experience with Gloria's Rock Garden starting in 2020

To whom it concerns,

I wanted to take a moment to write about the impact of Kimberly Austin's Rock Garden on our lives.

Our eldest daughter was two years old when we discovered the rock garden on one of our neighborhood walks. The rock lizard, with it's rich green body and bright orange spots captured her attention immediately. The gem-like scales covering its rock-based body ignited her imagination so that it was the only thing she would talk about for hours at the time.

"We have to see the lizard!"

"The lizard has gems on its back."

"Daddy can see the lizard."

We've been to visit the rock garden more times than I can count. For a long while, it was our mandatory morning walk. It's a walk I've taken holding her chubby little hands as she toddled along side me. We've gone on that walk in the early bake of midsummer heat, in the dusky light of evening, and probably in the rain. I did that walk (waddle) in the third trimester of pregnancy, carrying little sister along for the ride, and then with her wrapped against my chest, trying to hurry before it was too hot to be outside.

It started with the lizard, but soon her joy encompassed the other creatures hidden in the artfully scaped garden. The turtle with the red bird on their back—three little bunnies nested in a patch of grass—a delightfully round and welcoming frog and a cat sunning itself on a log. The rock garden became a cornerstone in our family's journey through our daughters first medical crisis since coming home from the NICU, and then through the pandemic that stretched out longer than any of us could have expected or imagined.

The world is full of adventure, curiosity and beautiful little discoveries to fill the minds of children. It also happens that those very things can be found a dozen houses away from us, on the corner of our morning walk, tucked away amidst the rocks and shoots of grass in our wonderful neighbor's front yard.

Sincerely,

Jill Davies (with the full support of Charlie, now 4 years old)

Application #4

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR CORDOVA RECREATION & PARK DISTRICT (CRPD) PROPERTY/FACILITY USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a park or park facility, you must request the endorsement of the Cordova Recreation & Park District (CRPD).

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by a representative of CRPD for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. The CRPD representative reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

To be filled out by grant applicant

Project/Program Name: Little Glory and the Wamdemic! (Reading to the children)

Name of Organization: N/A

Name of Applicant and Title: Kimberly Jacqueline Austin

Applicant's Phone: 916-601-0867 **Applicant's Email:** Kimberlyaustin5678@yahoo.com

Submit a copy of your application with this page to the Cordova Recreation & Park District. For your application packet to be considered complete the signed and dated endorsement form must be received by the City of Rancho Cordova by March 18, 2022. The CRPD representative will submit the form directly to the City's Community Enhancement & Investment Fund team. You must submit this form and a copy of your application to CRPD no later than March 4, 2022. Submit it via e-mail to Cristina James at cjames@crpd.com.

To be filled out by Cordova Recreation & Park District Representative

Endorsement Given Yes

Endorsement Withheld

Conditional approval of facility rental only

General Manager's or Designee's Printed Name: Brandi Dionne, Recreation Supervisor

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR SCHOOL SITE USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a public K-12 school site, you must request the endorsement of the school superintendent of that school district.

One supplemental form is required per school district.

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by the corresponding school superintendent for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. Each participating school superintendent reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

To be filled out by grant applicant

Project/Program Name: Little Glory and the Wamdemic! Education Through Story Telling

Name of Organization: Kimberly Austin, Individual

Name of Applicant and Title: Kimberly Austin

Applicant's Phone: 916-601-0867 **Applicant's Email:** kimberlyaustin5678@yahoo.com

Submit a copy of your application with this page to the school superintendent(s). For your application packet to be considered complete the signed and dated endorsement form must be received by the City of Rancho Cordova by March 18, 2022. The superintendent will submit the form directly to the City's Community Enhancement & Investment Fund team. You must submit this form and a copy of your application to the appropriate superintendent or his or her designee no later than March 4, 2022. For Elk Grove Unified School District use BGrewal@egusd.net. For Folsom Cordova Unified School District use agriffin@fcusd.org. For Sacramento City Unified School District use dianne-brown@scusd.edu.

Project Information

Project Name

Cordova Youth Spotlight Orchestra (CYSO) Expansion

Project Synopsis

This project builds on students' progress in 2021-2022, the pilot year of the CYSO. It expands student membership from 24 students to 32. It opens beginning strings classes to all elementary grades. Based on learnings from the pilot, this project increases the frequency of classes from once to twice a week and seeks funds to pay all students' tuition and supplies.

Project Description

This project builds on students' progress in 2021-2022, the pilot year of the Cordova Youth Spotlight Orchestra. Twenty-four scholarship students completed one year of instruction: 11 in orchestra and 13 in beginning strings. These students want and need to continue developing their skills, and new students are needed to expand the orchestra by 30% to 32 members or more. This project extends the beginning strings class to all elementary grades with parent participation required for students in grades 1 through 3 and encouraged for grades 4 through 6. In 2021 almost half of the CYSO applicants were elementary students who had no experience playing a musical instrument. SPAC accommodated them by adding a beginning strings class. By the end of the year, four beginning students were promoted to the orchestra, and beginning strings students outnumbered orchestra students. Students will receive one hour of instruction twice a week for 34 weeks beginning September 8, 2022, and ending May 25, 2023. One of the learnings from the pilot project was that students did not progress quickly enough with only one hour of instruction per week. Like the pilot project, students will perform at least two Spring concerts, possibly in public parks, for the Rancho Cordova community in the Spring. Additional mini concerts were held in the Fall of the pilot project and are likely to be held again. With a second year of instruction, less interference from COVID, and more class hours, students will be better prepared to perform classical masterpieces with confidence and excellence.

Project Team

The Sacramento Performing Arts Conservatory (SPAC) is responsible for the development and delivery of this project. SPAC is a nonprofit 501 c3 organization governed by a volunteer CEO, CFO, and a distinguished 12-member Board of Directors. SPAC has been bringing violin, piano, orchestra, and art classes and events to schools and communities in the Sacramento area since 2005. Leveraging a large inventory of musical instruments and ongoing partnerships with schools, businesses, and community groups,

SPAC has enabled hundreds of disadvantaged youths to learn to play an instrument and perform before public audiences. More information is available at the SPAC website www.sacramentoconservatory.com.

Project Goals

The project will be successful if the following goals are met: - CYSO enrollees increase to at least 30. - 80% of enrolled students complete the year of instruction and perform in two concerts. - At least two public concerts are performed in Rancho Cordova. - Concerts are attended by a total of 300 Rancho Cordova residents/commuters. - Students' intonation, rhythm, and technical skills improve by a measurable degree based on semi-annual assessments. - 90% of students and parents give classes an Excellent or Good rating in year-end evaluations - Average class attendance is 80%, evidenced by sign-in sheets - The project is completed within budget

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total project cost

$25,345

Estimated breakdown of project expenditures

$6,120 Instructor/conductor fees $5,000 Symphonic arrangement fees (9 classical compositions x 10 levels) $8,100 Rent $2,125 Insurance $1,000 Concert venue fees $2,000 advertising $1,000 supplies and materials (music sheets, shoulder rests, music stands, books, rosin, bows, tuners, etc.)

Matching Funds

TBD

Include any other funding contributions

$3,345 from SPAC

Ongoing operations and maintenance costs (if applicable)

N/A

Total Community Enhancement & Investment Funds requested

$22,000

Is this a multiyear request?

No

How many years have you received funding for this project?

1

When will your request for funding sunset for ongoing programs?

As the deleterious economic effects of the pandemic fade and the economy improves and as the reputation of CYSO grows, less financial support will be needed and the more sustainable the program will become. More students will be able to pay tuition, and special performances will be able to generate income. It is unlikely, however, that the CYSO will ever be completely self-sustained, especially because it is SPAC's mission to make music instruction available to students whose families cannot afford private lessons.

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

- Grants from public agencies, including Sacramento County, Sacramento Office of Arts and Culture, Sacramento Regional Community Foundation - Private donations - Community and corporate contributions

Project Schedule, Timeliness and Adaptability

Project Schedule

August 20, 2022: Advertise on Peach Jar and begin registering students. September 8: Begin weekly classes and begin planning for December concert, December 13-14: Perform first concert. December 29: Assess performance, attendance, and production services against objectives. January 2, 2023: Advertise for and register second semester students February 6: Begin planning for April and

May concerts April - May: Perform two culminating public concerts. May 27: Assess performance, attendance, and production services. June 15: End 2022-2023 program.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

The class schedule follows the school calendar of the Folsom-Cordova USD. The project begins, ends, and takes weeks off according to the school calendar.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

The project will adjust to public and school health orders as it has in the past. Classes can be broken up into small groups and held outdoors as needed. On the other hand, as health orders become less restrictive and the risk of spreading disease diminishes, the orchestra can incorporate wind and brass instruments.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical address of project location

10124 Coloma Road
Rancho Cordovq, CA 95670

Other physical addresses if project/program is at multiple sites

Have you received a letter of support for the project/program from the property owner?

Requested, and will submit to city by March 18, 2022

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site or a park/park facility?

Yes, at a park/park facility

Which school district is the public K-12 school site located in?

Other: No K-12 school site will be used.

Read-Only Content

Please acknowledge that you read and understand the above Supplemental Endorsement Form requirements.

Public Record Unless otherwise exempt under applicable law, applications and application materials are public records. All information received from an applicant, whether received in connection with a grant application or in connection with any grant-funded activities performed are subject to disclosure pursuant to the California Public Records Act, unless otherwise exempt. Next Steps Applicants will receive acknowledgement once their application is received. When the application period closes, staff will review each application according to the application criteria and prioritization method listed within the Fiscal Year 2022/2023 Grant Application Process and Criteria document. Should staff have any questions or need clarification on your application, they will contact you. You are invited to attend any of the public City Council Meetings. It is anticipated at this time that the Community Enhancement & Investment Fund team will present information to the City Council starting in April and continuing through June. We may invite applicants to present their project and we may make selection recommendations to Council during the May City Council meetings. In addition, the Community Enhancement & Investment Fund team will send periodic updates to grant applicants via e-mail. It is possible that all funding decisions for the Fiscal Year 2022/2023 Community Enhancement & Investment Fund could be made in May and formally adopted by City Council by early June. Staff intends to notify all applicants of the funding decisions made by the end of June. If you have not signed up to receive automatic notifications when council meeting agendas are posted, you can do that by using the link below: https://www.cityofranchocordova.org/residents/what-s-happening/sign-up-for-e-news

Thank you,

Joanna Baisden, Ph.D.

Board Chair

Sacramento Performing Arts Conservatory

Dear Joanna Baisden,

The Rancho Cordova Moose Lodge is pleased to offer the Cordova Youth Spotlight Orchestra the use of our facilities, from 4:30 p.m. to 6:30 p.m., two evenings a week to hold music classes for local elementary through high school students. It has long been the mission of all Moose Lodges throughout the United States to help provide aid within their own communities, so we are extremely grateful that our lodge has the opportunity to help enhance the lives of students within our local area.

Our lodge offers its full support to the CYSO in its goal of expanding the musical repertoire of local students, and in its continued success of encouraging the talented youth of Rancho Cordova. Please feel free to let us know if we can be of help in any other way.

Sincerely,

John Ingrim

Project Information

Project Name

Imperial Winds (Indoor Winter Winds Ensemble)

Project Synopsis

The unexpected switch from in-person to on-line classes that occurred during Covid19 has been difficult for many students. Although they saw each other on screen during the school day, social interaction was limited by the subject matter and lack of personal contact. Upon return to the classroom, many teachers have voiced concerns that this lack of personal contact between students has accompanied a decrease in overall morale and a sense of uncertainty. Bringing people together in musical ensembles can tap into individual and mutual interests, motivate musical expression, and create a venue for contributing ideas across generations and cultures. The experience reinforces that music-making and musical creativity are open to all because music brings people together, creates a sense of belonging and purpose, and celebrates diversity of expression (Source: Campbell, 2018; Donovan & Pascale, 2012). “Winter Percussion” (featuring drums & mallet instruments) and “Winter Guard” (featuring color guard with flags and sabers) are nationally recognized programs which have provided a venue for young people to achieve the extraordinary through performance and competition since 1993. Similar to marching band/drum corps, students are the focal point of the performance. However, instead of performing on a football field, winter winds performs in a basketball gym or arena. Typically more theatrical than marching band/drum corps, the performers are much closer to the audience. In 2015, Winter Winds (featuring brass and woodwind instruments) was created as a natural extension of these existing indoor divisions. Although Winter Guard and Winter Percussion programs are locally available, to date, no Winter Winds programs exist in the City of Rancho Cordova. To fill this gap, Mandarins has developed “Imperial Winds", a program which will introduce brass and woodwind students to an indoor, high-energy, performance-based musical activity featuring brass and woodwind instruments.

Project Description

Mandarins proposes to introduce “Imperial Winds”, a winter performing arts ensemble focusing on brass and woodwind instruments, to be based in Rancho Cordova. Winter Winds Performing Art ensembles present an original show each year, approximately 8–10 minutes in length, and refines it throughout the winter season. Shows are performed on basketball arenas or gyms and are judged in various musical and visual categories, or "captions". Musical repertoires vary widely among corps and include symphonic, jazz, big band, contemporary, rock, wind band, vocal, rap, Broadway, and Latin music, among other genres. Winter Winds ensembles do not have any required instrumentation. In fact, there are purposely less regulations and restrictions

Application #7

against winds groups, in regard to instrumentation. These less stringent rules exist in order to encourage experimentation and freedom of expression. One winds group may be entirely comprised brass, another only of woodwind instruments, and yet another a mixture of both woodwinds and brass. Winds groups also often incorporate percussion elements and guard elements into their performances, resulting in a unique mix of electric synergy. Imperial Winds will address a current need in the community – high schools in Rancho Cordova only offer Winter Percussion and Winter Guard programs and Sacramento State only offers an independent Winter Percussion/Guard group. Imperial Winds will be open to all interested woodwind and brass player between the ages of 16 – 23 years of age. Experience camps will be held in November and December during which students will have the opportunity to hone the musical skills and learn basic movements used in the performances. In January, any interest student is eligible to audition for the forty (40) available competitive openings in the ensemble. Thereafter, the ensemble will continue to practice and perfect their music and visual performance as a team.

Project Team

Daniel Fong: Dan Fong marched nine years with the Sacramento Mandarins as a soprano and mellophone soloist and one season with the Seattle Imperials. Dan wrote every Mandarins field show brass chart from 1982 until 2011 and was Mandarins' Brass Caption Head from 1982-1993, from 2005-2008, and from 2012- 2016. He currently arranges music for the Mandarins Brass Academy, a program that teaches brass students of all skill levels in the Sacramento region. Santiago Sabato: Santiago Sabato joined Mandarins Drum Corps as a trumpet player in 2006 and 2007 to 2009 as Drum Major. He pursued and achieved a Masters of Music in Instrumental Wind Conducting, a Bachelor of Music in Music Education and Trumpet Performance from Sacramento State University and a Teaching Credential in Music. He has taught all grade levels from kindergarten through college and is currently the Director of Athletic Bands at Sacramento State University where he runs the Marching Band, Indoor Percussion Ensemble, Winter Guard, and Pep Band. Ryan Lee: Ryan Lee marched in the Mandarins Drum Corps on trumpet, baritone and euphonium and has performed with Mandarins Entertainment, He has taught Mandarins educational programs and is a visual instructor for the drum corps. In addition, he has worked with over thirty music programs at the middle school, high school, collegiate and independent levels, in several states and in a variety of capacities. He also adjudicates marching arts and pageantry competitions across the country. Ryan holds a B.S. in Business Administration with a Human Resource Management & Organizational Behavior Concentration (Minor in Music) and an MBA in Entrepreneurship & Global Business from CSU Sacramento. He also has an Ethical Leadership Certification from NASBA Center for the Public Trust. It brings a strong sense of fulfilment to combine his passions for music and business in his role with the Mandarins.

Project Goals

The goal of Mandarins is to offer students an experience which challenges and stimulates growth on many levels through an activity that promotes musical growth and development by involving a variety of core musical skills, standards, and abilities. Imperial Winds goals include: • To perform instrumental compositions representing various genres, styles, and cultures. • Performing with expression, technical accuracy, sound quality, and articulation. • Perform in solo settings, with small segmental ensembles, and as part of a greater overall ensemble production. • Physically: improve muscle tone, conditioned response with/to music and other stimuli, simultaneous coordination of head, arms, legs, body stature as well as poise and control while experiencing physical and mental pressure. • Mentally: improve multi-levels of thought organization such as reading music, blending sound with other musicians, portrayal of moods harmonious with other performers and musicians, an understanding of how and why they execute each move, and advance awareness of what the next move/note/step will be and why it is there. • Socially: improve functioning in a group situation by setting common goals, cooperating, and striving for success as a team. The cumulative result is a student with deeper feelings of understanding, a more disciplined focus (which finds its way into study habits in scholastic efforts), and a higher level of self-confidence. Mandarins will showcase the finished program at a free community event in Rancho Cordova during the season. The program will further benefit the Rancho Cordova community as there are many outlets (other than the anticipated competitions) for performances available to a winds ensemble, including rallies, community showcases, or school assemblies which can showcase the activity to the community. Students and faculty will be introduced to the program and the audiences enjoy the show for its entertainment value.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$115,700

Estimated Breakdown of Project Expenditures

(Please Refer to attached projected budget for complete breakdown of costs) Music Arrangement/License for Use $2,100 Drill Writer/Show Coordinator $1,800 Instructors (3) $7,500 Instruments: (40 Brass and Woodwind instruments, including trumpet, $75,000 trombone, baritone, euphonium, mellophone, contrabass, clarinet, saxophone, and flute) Vinyl Floor: Required to prevent

damage at performance venues. $1500 Painted each year to enhance the design of the show. Floor must be cleaned and repainted each year. Costumes: $250 each x 40 performers. Per Covid 19 protocols $10,000 Costumes are not reusable and become the property of the performer at the end of the season. Props $3,000 Music/Drill sheets $400 Insurance $1500 Transportation: Includes rental of truck and fuel for transportation $8,000 of props, floor, instruments to and from exhibitions, competitive venues and rehearsal site. Also includes transportation of staff via separate vehicles. Entry fees $800 T-Shirts for members and staff $2,500 Miscellaneous Office Supplies $600 Employer paid payroll taxes (FICA, FUTA) and payroll services $1000 TOTAL $115,700

Matching Funds

N/A

Include Any Other Funding Contributions

Music Arrangement/License for Use $1,050 Drill Writer/Show Coordinator $900 Instructors (3) $3,750 Vinyl Floor: $750 Costumes: $5,000 Props $1,500 Music/Drill sheets $200 Insurance $750 Transportation: $4,000 Entry fees $400 T-Shirts for members and staff $1,250 Miscellaneous Office Supplies $600 Employer paid payroll taxes (FICA, FUTA) and payroll services $500 TOTAL $20,650 **Instruments will be provided by KHS America pursuant to sponsorship agreement. This sponsorship is valued at $75,000. Total $95,650

Ongoing Operations and Maintenance Costs (if applicable)

Instruments: Miscellaneous repairs and padding necessary each year. Replacement every 4-8 years Vinyl Floor: Floor must be cleaned and repainted each year and replace after five years. Painted each year to enhance the design of the show. Costumes: For sanitary reasons, costumes are not reusable and become the property of the performer at the end of the season. Props: Frames for props are reusable but props are rebuild and designed each year. Insurance: Liability and comprehensive policy to cover injury and loss of instruments is a yearly expense

Total Community Enhancement & Investment Funds Requested

$20,050

Is this a multi-year request?

No

How many years have you received funding for this project?

0

When will your request for funding sunset for ongoing programs?

Mandarins intends to offer this program to young people between 16-22 years of age each year. The program occurs each year from November through April and is fully competed by April of each year. However, Mandarins is only seeking a grant for the inaugural season on 2022/23, after which membership fees and other funding sources should cover ongoing costs. However, if unforeseen circumstances arise, such as additional mandated shut down, Mandarins may request supplemental funding at a future date.

Do you plan to ask annually for funding?

No

What other funding will you seek to support your project?

Mandarins uses a variety of fundraisers each year for its programs and will incorporate the same strategies for Imperial Winds as follows: • Member fees and tuition for experience camps will be charged to help defray ongoing costs; • A portion of the profits from Mandarins annual fundraising activities (DCI Capital Classic Drum Corps Show hosted by the Mandarins, Bingo, online souvenir sales, Mandarins birthday bash, and events held at the Mandarins Music Center will be earmarked for Imperial Winds; • A partnership with KHS America for use of instruments for the Winter Arts season; • Continue ongoing fundraising programs of donor campaigns, additional grants, charging admission for specified musical performances and events, challenges, used equipment sales, and virtual events. • Sponsorships from local businesses.

Project Schedule, Timeliness and Adaptability

Project Schedule

The “Winter Winds” season runs from early November to end of April each year. Rehearsals, will not be held every weekend in the beginning, but become more frequent as the season progresses. For example, in November and December, Mandarins plans to meet on Sundays two times each month with auditions in early January. Beginning in January through February, rehearsals will be held every Sunday. During March and April, rehearsals may further increase to both Saturday and Sunday, if needed. Additional rehearsals may be held during winter break from school. Rehearsals time can range from four (4) to six (6) hours each session, increasing in time as music is combines with movements and drill patterns. Competitions typically start late January and culminate in

the Championships held in late April. Mandarins anticipates participating in at least three (3) competitions during the 2022/23 inaugural season. The competitive schedule will be released in January of each year by the event coordinators. A typical performance starts with the crew (typically the parents) rolling out a large printed or painted vinyl tarp across the gym floor to serve as the stage for the show. Props are also utilized depending on the theme of the show. Possible additional exhibition performances may occur between February and April.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

The Imperial Winds will follow the rules and guidelines set out by the Winter Guard International (WGI) Sport of the Arts. WGI is the nation's premier organization producing indoor color guard, percussion, and winds competitions. A non-profit youth organization, WGI serves as the governing body for the indoor color guard, percussion, and winds activities. Similar to sports schedules, WGI follows a set season lasting from November to April each year. The season culminates in April, when winter ensembles meet in a championship competition. In 2022/23 Mandarins will follow the WGI schedule beginning the first experience camp in November 2022 and completing the program in April of 2023.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Mandarins mantra since the emergence of Covid19 has been "Safety is our highest priority". Mandarins also recognizes a lack of social interaction may have a profound effect of the mental health of the young people we serve, our alumni, volunteers and patrons. Mandarins can and will adjust the Imperial Winds ensemble if California Public Health and/or Sacramento County Health Orders change as follows: • If pandemic restrictions preclude in-person gatherings, Mandarins will pivot to a virtual classroom, offering virtual workshops for performers. Students may be treated to guest instruction by renowned and talented artists and will create and participate in "Zoom performances". • If indoor gatherings are prevented, then Imperial Winds will move out-of-doors and rehearse in the parking lot of Mandarins Music Center. • Even without further restrictions, Mandarins has purchased and will use a commercial portable Surface Sanitation System at the event center to slow or stop the spread of Covid19; • Social distancing and hand sanitation practices will continue to be required at all rehearsals and competitions. • Instruments will be assigned and sanitized after use. Mandarins Health and Safety Team will work with the Director and staff of the Imperial Winds, providing an open line of communication and sharing up-to-date information and protocols from the World Health Organization, the State of California, and the Centers for Disease Control and Prevention.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

Mandarins Music Center 9792 Business Park Drive
SACRAMENTO, CA 95827

Other Physical Addresses (if project/program is at multiple sites)

Exhibitions and competitive performances are held at venues contracted by Winter Guard International (WGI) and/or the Northern California Percussion Alliance (NCPA). These venues are typically held at high school gymnasiums in northern California, including Sacramento County, and are exclusively chosen by WGI and NCPA. Mandarins does not determine where these venues occur. All show sites for the Spring 2023 season will be determined in late December 2022 or January 2023.

Have you received a letter of support for the project/program from the property owner?

Yes (includes if you are the property owner)

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Imerial Winds Rehearal Space.pages.pdf

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

No

Project Information

Project Name

Sacramento Theatre Company After-School Musical Production and In-Class Theatre Arts Integration Program (STC-SPP)

Project Synopsis

STC teaching artists work alongside classroom teachers, they will introduce theatre arts integration concepts and techniques that will also enhance the teachers' ability to teach their students. This program also engages parent and community participation with set building days, creating props and costumes, and helping with publicity. The format of this program provides a multitude of positive student, educator, and community benefits. Decades of research demonstrates participation in theatre arts offers students a toolbox of fundamental skills that will enhance their ability to succeed in school and beyond. The benefits of theatre arts education for low-income children are especially profound. Specifically, studies have shown that theatre arts instruction and the creative process associated with theatre helps students to better succeed at school as they garner new ways of learning, creating, and focusing.

Project Description

This is a semester long, after-school theatre arts program that is organized and taught by professional STC teaching artists as well as an increased number of Theatre Arts Integration Classes during the school day in every classroom (5 sessions in each classroom whereas least year we provided 3 in each classroom.) The project proposal includes professional development for the teachers in Theatre Arts Integration strategies for the classroom. In the 2021-2022 School year STC was funded at White Rock Elementary School through the City of Rancho Cordova Enhancement Fund and funding would ensure our presence for another year. The program begins with theatre classes in every classroom for the purpose of engaging student interest in theatre arts prior to the start of the after-school program as well as to provide alternative arts integration methods to teach math, English and science through the arts to reach multiple learning styles. They also gain life skills such as enhanced empathy, greater sense of confidence, a deeper understanding of their identity which for many, has the impact of alleviating mental health issues. Since theatre instruction nurtures creative thinking, it encourages students to unlock possibilities and to foster innovations toward solutions in all areas of their life. Students also become more proficient at many skills that will help them later in the job market, including; Public Speaking, Time Management, Project Management Skills, Communication and Collaboration Skills. By getting children involved in theatre at a young age, they better understand their world and the value of theatre in developing common values within the context of their

Application #8

community. Moreover, studies have shown that theatre not only provides our children with positive after-school activities but also leads to other responsible civic engagement and has a direct correlation to a reduction of crime and delinquency.

Project Team

Miranda D. Lawson is a Florida native who has worked and traveled across the country working in the arts field. She studied a BFA in music with a concentration in musical theatre and began her career in the film and tv industry. After moving to Sacramento she began working at the Sacramento Theatre Company and moved her way up in the ranks as a performer, teaching artist, director/choreographer, Associate Artist, and YPC Program and Adult Education Manager. STC is her home and her passion, and being able to impact the community by bringing the arts to them and nurturing the next generations of artists is her life's work and she is so pleased to have the opportunity to do so. Lyn Alessandra graduated from UC Davis in 2016 with a B.A. in Dramatic Arts and minors in Managerial Economics and French. She has worked as a stage manager in various cities, including in Dallas, Los Angeles, and here in Sacramento at Broadway at Music Circus in the summers. She has also toured as a union stage hand on Dr. Seuss's How the Grinch Stole Christmas. Lyn has a passion for theatre, and loves to share it with students of all ages. She enjoys teaching and inspiring students to delve into every topic theater can offer them. She is a proud member of Actor's Equity Association. When she isn't in rehearsals, she is playing with her two dogs or baking. Lisa Dillon has been dancing, in some form or another, since she was 4. She trained in Sacramento, Lake Tahoe and Santa Barbara. She performed locally for many years in Best of Broadway and periodically in Music Circus, Garbeau's Dinner Theater, Davis Musical Theater Company and others. She taught tap and jazz at Broadway Academy of Performing Arts and currently teaches dance/fitness fusion. Her passion is in Children's Musical Theater where she has worked as Director, Choreographer, Technical Director and Producer. Lisa started working for STC in January 2017 with Schools Partnership and is overjoyed to continue to teach and grow with STC.

Project Goals

In addition to professional productions, STC School of the Arts offers a host of theatre arts training and engagement opportunities that reach over 5000 students annually. With STC's School Partnership Program currently in 12 schools, it is one of the most notable programs in California. In 2016, STC's School Partnership Program was selected as one of the top arts humanities based programs in the country and in recognition, received a National Arts and Humanities youth Program Finalist Award. To maintain our high standards, we are committed to continually assessing and evaluating the services we provide to the students and educators in our community. STC's SPP goals for White Rock Elementary are to train and offer professional development to teachers on theatre arts intelligences and teach core subjects: Social Studies, Science, ELA through theatre arts strategies. STC's School Partnership Program has a goal to provide students with a comprehensive after-school theatre program to help them become more proficient at many job skills. Student involvement in the program provides students with fundamental building blocks for success in school and beyond. STC teaching artists measure impact through the observation and documentation at the beginning and end of the residency. School site and classroom teachers are also involved in the evaluation process through a written survey. The impact of STC-SPP's previous evaluations indicate that students are increasing their writing, listening and oral expression skills. These evaluations indicate that students are increasing their ability to concentrate and make helpful learning connections between their theatre lessons and other academic areas. Consequently, students are building key academic and social emotional skills that have led to a positive impact on their oral and written development, especially for English Language learners and students with special needs and learning disabilities.

Project Schedule, Timeliness and Adaptability

Project Schedule

The workshops and the entire program will be at no cost to the student and is open to every student in the school in accordance with the following schedule organized by Sacramento Theatre Company's SPP. After school program: October – meet with school principal and after-school programming personnel to work out scheduling, space, show title and overall curriculum. November/December – STC/SPP provides 3 theatre workshops/classes in every classroom to: 1) introduce the program to all students to generate excitement and interest, 2) after school theatre workshops on how to audition, 3) information about the STC/SPP theatre residency. KINDER classes begin (STC teaching artists go into the Kinder classrooms once a week for a theatre class throughout the residency). The workshops and entire program will be at no cost to the student and open to all students. STC/SPP solicits parent/community engagement with organized parent meetings that are held to explain program details, rehearsal schedules, time commitment, and to solicit parent engagement (community building). September – STC/SPP organizes and oversees student registration and auditions. October-January – STC/SPP oversees: student rehearsals, 3-4 days a week. After school, 3-4 day a week for 1-2 hours each day. Community and parent engagement by actively getting them involved in building sets, creating costumes and props and helping with publicity. Final production in Jan/Feb. STC/SPP oversees dress and tech rehearsals, final presentation, performance and assessments. Theatre Arts Integration classes during the school day (5 classes for each classroom) at White Rock Elementary, the principal is committed to bringing arts integration to the school. This school does not have the on—going resources to fund arts integration, so this grant will help fund a continuation of STC's after school program to include the time during school. There is no cost to students. STC has been providing Sacramento area schools with theatre

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

This program is designed to be completed within the academic year. Step 1: Sept. Teacher Training. 1 session. Includes a professional development seminar on arts integration and why it is effective in engaging students in both the standard educational and art forms. We hold teacher meetings to establish and discuss standards for the classroom that teachers would like addressed through the theatre arts integration experience. Step 2: Oct-Dec. Lessons. 3 sessions with each class. Created by the teaching artist, lessons will describe the activities and what the teaching artists, students and classroom teachers will be doing throughout the course of the program. The lesson plan will also list the standards addressed (ELA, math/science/civics/VAPA) as well as describe the formative assessments as well as a rubric to specify the goals of the learning outcomes. Step 3. Dec. Evaluation. 1 Session. After the lessons are completed, the students and teachers will be asked to fill out evaluation forms. Throughout the process, the teaching artist will weave formative assessments into the lessons. Activities during lessons depend on grade level and classroom topics and include a combination of the following; physical and vocal exercises. Improvisation games and music games, songs to teach rhythm, notes, key

signatures, etc. Creative movement and blocking to bring text/music to life. Discussion led by the teaching artists on the text for understanding plot points, character objectives, beat changes, emotional inner life of the characters and character relationships. Theatricalizing a story or piece of history the class is studying. Bringing a poem/text to life by reciting and adding movement.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

The program is prepared to pivot and adjust to any public health situation. We are capable of performing virtual programming as well as hybrid.

Fax 916-294-9072 CANEN PETERSON, PRINCIPAL

March 5, 2020

To whom it may concern:

I am writing to express our support for continuing and expanding arts integration here at White Rock Elementary School. We have had the pleasure of having Sacramento Theater Company for the last few **years a**nd it has been just amazing. I am writing to let the City of Rancho Cor**dova know that we are** committed to provide resources and support to both sustain and build on our efforts in bringing the arts to White Rock Elementary School.

The response to STC over the last coup**le years with our teachers a**nd our community h **reviews f**or not just their dedication for the arts but the support and the nurturing aspect that the arts brings to our students. The teach**ers have seen th**at bringing the arts into our school deepens the concepts thatthey are trying to teach in their class. It has opened up their world in terms of understanding the terms and vocabulary that the arts bring.
In closing Sacramento Theater Compan**y has become a much needed and very much appreciated** component of White Rock **Elementary experience. Whatever** additional funding the City of Rancho Cordova can provide STC to expand the services will directly support high **needs students who are excited and grateful for the experience.**

Best Regards,

Canen Peterson

Application #8

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR SCHOOL SITE USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a public K-12 school site, you must request the endorsement of the school superintendent of that school district.

One supplemental form is required per school district.

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by the corresponding school superintendent for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. Each participating school superintendent reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

To be filled out by grant applicant

Project/Program Name: Sacramento Theatre Company After-School Musical Production

Name of Organization: Sacramento Theatre Company

Name of Applicant and Title: Dawn Spinella

Applicant's Phone: 916-446-7501 ext 105 **Applicant's Email:** development@sactheatre.org

Submit a copy of your application with this page to the school superintendent(s). For your application packet to be considered complete the signed and dated endorsement form must be received by the City of Rancho Cordova by March 18, 2022. The superintendent will submit the form directly to the City's Community Enhancement & Investment Fund team. You must submit this form and a copy of your application to the appropriate superintendent or his or her designee no later than March 4, 2022. For Elk Grove Unified School District use BGrewal@egusd.net. For Folsom Cordova Unified School District use agriffin@fcusd.org. For Sacramento City Unified School District use dianne-brown@scusd.edu.

To be filled out by School Superintendent or designee

Endorsement Given No

Endorsement Withheld App received after the due date

Conditional approval of facility rental only

Superintendent's or Designee's Printed Name: Dr. Sarah Koligian Sarah KeCigian

Date: 3/17/22

School District: Elk Grove Unified Folsom Cordova Unified ■ Sacramento City Unified Other

Comments (Optional):

The school superintendent or designee will send this form directly to CEIFGrants@cityofranchocordova.org no later than March 18, 2022. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

Project Information

Project Name

The “Swing Sweet Home” Project

Project Synopsis

The Western Swing Society (WSS) “Swing Sweet Home” Project is to engage the community of Rancho Cordova and nation-wide about the preservation of Western Swing Music, traditional dance, and history. The goal is to expand our outreach further into the Rancho Cordova Community by posting our monthly concerts from our dancehall in Rancho Cordova and post so others affected by COVID-19 precautions, senior centers, or enthusiasts from all around can see the activities going on in the heart of Rancho Cordova. “Swing Sweet Home” project offers monthly free virtual footage footage of our concerts to the community of Rancho Cordova and beyond showcasing Western Swing music, county dance, and tidbits of Country music history that stemmed from the greater Sacramento area & making it accessible right into your home. We hold monthly dances every 1st Sunday of the month that showcase a featured guest band, our house band, and are enjoyed by our dancers who take to the dance floor. Recording live performances from our dances of classic tunes everyone knows and loves and being able to have them available online for the community to enjoy is the purpose.

Project Description

Our monthly dances are scheduled with 2 live bands performing from the hours of 1pm-5pm. The musical talent is strictly volunteer driven. Along with the music comes the dancing from our members and guests who are in attendance. During the duration of our monthly dances this project will record songs from our talented performers and post them on social media. This grant will allow us the privilege of having the proper equipment to record various clips of our musical performances that we host in Rancho Cordova and posting them on Facebook, youtube, Instagram, and our website for everyone to enjoy for free. The online presence will allow us to reach out to the Rancho Cordova community and entertain our many community members with our traditional country/western music sound ,celebrate our wide range of diversity of our members, and show appreciation for our Rancho Cordova community. For those who aren’t able to travel to Rancho Cordova, due to health precautions or transportation issues, the virtual option will allow us to entertain our community-free of charge and allow them a virtual concert for their enjoyment.

Project Team

The organization involved is the Western Swing Society that has been run by volunteers for over 30+ years. The team is spearheaded by Meghan Enriquez (Mae McCoy) who is not only a performer but a board member in community relations. During her time working with Rancho Cordova Police Department she brought a senior program alliance with Esktaton in July of 2021. The project team goes as follows: Mae McCoy (M. Meghan Enriquez): “Swing Sweet Home” Project Manager /Social Media will communicate with community members and others via social media to keep them engaged. She will notate any song requests from our community members and be the liaison to the band leaders. Part of her position is to encourage community engagement via social media. Mrs. Enriquez will oversee the project as a whole for quality and record keeping. Rex Barnes: President of the Western Swing Society is involved in the set-up of the stage and the optics of the project. Ronnie Elkan: Vice President/Musical Director of Western Swing also doubles as musical director and will make sure the guest band is booked for the virtual concert clips every month. Gary Blodgett: Sound Engineer & Equipment Director will be in charge of musical direction of the project ensuring sound quality to the concerts. Mr. Blodgett also secures our equipment.

Project Goals

Facebook Page growth from engagement- Metrics from “likes” would reflect the progression of our outreach. Currently at 1K followers, we hope for that number to steadily grow as we add video clips to our posting on a regularly basis Youtube Channel development that will give us metrics on how many people we are reaching and our engage with our “ Swing Sweet Home” project. Website our website http://www.westernswingsociety.net will post the videos clips and keep a link of the various clips we accumulate Memberships: We anticipate a rise of membership to the Western Swing Society once the community is aware of the existence of such a preservationist organization.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Project Schedule, Timeliness and Adaptability

Project Schedule

"Swing Sweet Home" will begin at the purchase & delivery of equipment required to launch which is anticipated by Sunday, September 3rd, 2022. And continue thereafter recording the 1st Sunday of the month (w/exception to October 2022 During our Hall of Fame Weekend.) The virtual concert clips will be posted within one between the 2 and 3rd week of every month. During the Hall of Fame Weekend in October we will provide more clips of our 3-day long festivities, online, free of charge.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

As previously mentioned, our "Swing Sweet Home" concern clips will be recorded every 1st Sunday of the month and posted within 1-2 weeks of recording on our social media outlets free of charge. This project will continue on that said timeline.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

The "Swing Sweet Home" project is designed to weather the changes that may occur with the California Public Health and/or Sacramento County Health Orders. The program is predicated on providing free online viewership of our performances. In the event of a drastic shift in health orders, our performers can record their music from home and the Western Swing Society can continue to post "Swing Sweet Home" without procuring additional fees. "Swing Sweet Home" is designed for the connection between local entertainers and community members through these uncertain times.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Project Information

Project Name

RANCHO CORDOVA RISE-UP THEATRE COMPANY'S DEVELOPMENT AND CONSTRUCTION PROJECT

Project Synopsis

This project will provide funds to Rancho Cordova Rise Up Theatre Company (RCRUT) for the continuing development of a high-quality, thriving theatre company and the construction of a 99-seat theatre complex in the arts section of Rancho Cordova for the benefit of RCRUT and other Rancho Cordova non-profit performing arts organizations.

Project Description

This grant will provide funds to RCRUT to implement Phase III & IV of RCRUT's 18-month Development and Construction Plan ("Plan"). For details of the extensive 18-Month Development and Construction Plan see Attachment A. Please note that Attachment A is the proprietary property of RCRUT, prepared by its counsel and Executive Producer and is not for dissemination or publication. Phase I & II of the Plan have already been, or will be, accomplished through private donations, volunteerism and fundraising events/productions that have taken place. Briefly, RCRUT has already finalized its non-profit status, drafted and approved a full development and construction plan, organized its board and committees, launched its website, partnered with already existing Rancho Cordova non-profits, performing arts groups, businesses and fraternal organizations and produced eight productions and events at the MACC. The goal of Phase III & IV of RCRUT's Plan is to: (1) Continue the development of an on-going, high quality, Rancho Cordova theatre company; (2) Construct a permanent 99-seat performance complex for that RCRUT company to be used for performances and rehearsals; (3) Share that complex with other already existing and thriving Rancho Cordova performing arts entities (Orchestras, Choirs, Dance Companies and other Theatre Companies); and (4) Continue to bring together, for mutual support, Rancho Cordova performing arts groups and thereby help Rancho Cordova in its continuing goal of becoming a community where theatre, music and all performing arts are prominent. The creation of a theatre company and the construction of a theatre

complex, even in an existing structure, is a long term project. Moreover the financing of this endeavor by a non-profit organization through fundraising events and productions adds to the gargantuan tasks and takes thousands of volunteer hours. This grant will allow the completion of this task within the 18-month timeline set forth in the RCRUT 4-phase.

Project Team

Courtney Conklin, President and Artistic Director- Courtney, a mother and resident of Rancho Cordova is the founder of Rise Up Theatre Company, has a 20-year award winning history of producing, directing, and distributing, both artistically and financially profitable, live theatrical and film productions. Mary Gorak, Vice President and Executive Producer- Mary holds a Juris Doctorate with 30-years'experience in civil and entertainment law and over 50-years' theatrical experience, including starting multiple theatres for municipalities, producing over 40 individual productions, including an award winning Off Broadway musical currently in preparation for its Broadway run, and training Tony award winning actors. Carrie DeHerrera, Secretary and Managing Director-Carrie, a mother and disabled veteran, holds a Bachelors in Management, Masters in Business Administration, and a Doctorates in Organizational Leadership with 20-years' experience leading Government Organizations. Gian Montesini, Chairman and Producer-Gian has been involved in theatre in many capacities since the 80's. Originally from Brazil, he moved to California in the late 90's and continued to pursue his passion for the arts, organizing amateur and professional theatre groups like Big Idea Theatre, Scaramelo, Rebels Without Applause and, more recently, helping with Rise Up Theatre Co. Ann Pierson, Treasurer-Ann is a local resident in Rancho Cordova, has a 40-year history in financial accounting. Her primary expertise lies within the healthcare industry, budgeting, Tax needs and legal matters, she has worked with companies both private, nonprofit and state owned. Ann is an avid arts enthusiast and participates in The Polar Express, Wine Tours, Train events and more across the Sacramento Region. Walt Pierson, Technical Director. Josh Pierson, Photograph, Film, and Graphics. Talen Andersen, Musical Director. **See Attachment for Additional Project Team, Partners, and Community Support)

Project Goals

Goal #1 Increase community appreciation for and participation in the arts. Rise Up Theatre Company is striving to not only provide quality theatrical performances for citizens to participate in and enjoy, but by constructing a complex for other non-profit organizations to use as performance and rehearsal space inside the city limits, RCRUT is increasing the communities access to music, choral, dance and film. The access to all these performing arts forms to citizens, who may not be able to access such events outside Rancho Cordova, will now make them available within our community. Goal #2 Enhance community pride and the image of Rancho Cordova as a community where theatre, music, dance and film are prominent. Rancho Cordova Rise Up Theatre Company's constructing a complex in Rancho Cordova where citizens can see, on an ongoing and permanent basis, high quality performing arts will instill community pride and encourage residents to call Rancho Cordova their home. Goal #3 Promote the quality of life and civic engagement for citizens of Rancho Cordova. Theatre and the arts provide audiences and participants with not only emotional feelings of enjoyment and well-being; they expand their world view and mutual understanding. In addition, the construction of a permanent performing arts complex to be used by Rancho Cordova non-profit performing arts companies, orchestras, bands and choirs will bring a continuing stream of audiences and participants into a single location in the city of Rancho Cordova. This steady stream of arts patrons will attract and support businesses such as dining and transportation.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$500,000

Estimated Breakdown of Project Expenditures

Phase III and IV of the Plan Cost: $300,000.00 Phase III and IV coincide with the Community Enhancement & Investment 12 Month Funding Period (July 1, 2022 – June 30, 2023) 50% of the costs of Phase III & IV ($150.000) will be funded by private donations, funding events, theatrical productions and in-kind volunteerism. The other 50% of Phase II & IV, ($150.000) is the funding requested from the Community Enhancement and Investment fund.

Matching Funds

Rancho Cordova Rise Up Theatre Company was founded by three high-power professionals who each are providing Professional In-Kind Services and $10,000.00 seed money each. Moreover, even though they are acting as the Company's Administration, the Equity Board is not seeking, and has pledged not to take, any payment or remittance of any kind for the hundreds of hours of work provided until the theatre company and theatre complex are completely self-sustaining. They have made this pledge and investment of time and personal funds because of their ultimate goal: creating a professional theatre company and theatre facility that helps build and maintain Rancho Cordova, their home's, position and reputation as a center for the arts. President and Artistic Director, Courtney Conklin has a 20 year award winning history of producing, directing and distributing financially profitable live theatrical and

film productions. She bills between $3,000 and $5,000 per production and has made a personal investment pledge of $10,000.00. Secretary and Managing Director, Carrie DeHerrera, PhD, holds a Doctorate in Organizational Leadership and is the founder and CEO of a successful for-profit company. She bills $150.00 per hour for her professional services and has made a personal investment pledge of $10,000.00. Vice President and Executive Producer, Mary Gorak, J.D. has 30 years in civil and entertainment law, holds a Masters in Theatrical Producing with over 50 years experience producing theatre and has created theatre companies for municipalities including: Milpitas, CA; Healdsburg, CA; Santa Rosa, CA and Lebanon, Ohio. She bills $375.00 per hour for legal services, $10,000 to $20.000 for Theatrical Development Plans and has pledged $10,000.00.

Include Any Other Funding Contributions

N/A

Ongoing Operations and Maintenance Costs (if applicable)

N/A

Total Community Enhancement & Investment Funds Requested

$150,000

Is this a multi-year request?

No

How many years have you received funding for this project?

0

When will your request for funding sunset for ongoing programs?

Rancho Cordova Rise Up Theatre Company has never sought or received any previous funding from the Community Enhancement & Investment Fund. All previous funding has been provided by the Executive Board, has come from profits from performances or has been raised through fundraising events. Going forward RCRUT will continue to raise funds through direct donations, ticket sales, fundraising events and corporate and municipal grants. This specific request to help fund RCRUT's Development and Construction Plan is a single year request and all funds will be used in fiscal year 2022/2023, unless, as outlined above, construction is halted and then funds will be kept in a trust fund until completion. However, historically live theatre and the arts receive only about 50-60% of their operational funds through ticket sales, fundraising events and private donations: grants have always been a vital piece of funding. Once RCRUT's Development and Construction plan is fully realized and the needs of the company and complex are defined, RCRUT will seek additional Community Enhancement & Investment grant funds to maintain a high quality theatre company and a thriving performance complex in Rancho Cordova.

Do you plan to ask annually for funding?

No

What other funding will you seek to support your project?

Phase I and II of the Plan Cost: $200,000.00 Phase I and II will be completed by July 1, 2022, prior to the receipt of any Community Enhancement & Investment Funds The costs of Phase I & II have been or will be accomplished from fundraising events, theatrical productions, private donations and monetary pledges from the Executive Board. Phase III and IV of the Plan Cost: $300,000.00 Phase III and IV coincide with the Community Enhancement & Investment 12 Month Funding Period (July 1, 2022 – June 30, 2023) 50% of the costs of Phase III & IV ($150.000) will be funded by private donations, funding events, theatrical productions and in-kind volunteerism. The other 50% of Phase II & IV, ($150.000) is the funding requested from the Community Enhancement and Investment fund.

Project Schedule, Timeliness and Adaptability

Project Schedule

Theatrical Productions and Fundraising Events, which will be funded in part by Community Enhancement & Investment Fund Grant, will take place from July 1, 2022 through June 30, 2023. All such productions and events are in Phase II and IV of Rancho Cordova Rise Up Theatre Company's Development and Construction Plan. Please note that productions and events in Phase I & II will have been completed prior to grant funding. The design and construction of the 99-seat theatrical complex in the Rancho Cordova Arts District will be begun and completed between July 1, 2022 and June 30, 2023.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

This project begins with a major advantage that ensures timeliness: Phase I & II of the Development and Construction Plan will have been funded independently through outside sources and completed by a board and management team already in place prior to the

2022/2023 fiscal year. This team will already function successfully. They will have developed a method of theatrical and fundraising events utilizing Rancho Cordova facilities, community and support. They will have established partnerships with Rancho Cordova non-profits and have begun to build an audience. They will also be well on the way to finalizing the survey for an already existing building to renovate and adapt into a 99-seat theatre complex.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Rancho Cordova Rise Up Theatre Company Plan is prepared to adapt. A large portion of theatrical productions and fundraising events can be filmed and streamed. In fact Rancho Cordova Rise Up Theatre Company has already provided for such adjustments. Board Member Josh Pierson is the owner/operator of a successful film company and has, and will provide streaming services if necessary. Contract negotiation with contractors and architects for the theatre complex construction can go forward via zoom and email even in a shut down as can the design and permit process. It is highly unlikely that construction will be halted due to health restriction: even in the height of the 2020 pandemic shutdown construction projects went forward. However, it there is a complete work stoppage, all funding from this grant as well as funds raised independently for the complex construction can be carried over into the next fiscal year in an attorney trust fund.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

10468 Neiretto Court
Rancho Cordova, CA 95670

Other Physical Addresses (if project/program is at multiple sites)

Rancho Cordova Rise Up Theatre Company has partnered and made arrangements with two non-profit organizations who have agreed to allow the Theatre Company to use their facilities free of charge for rehearsal and performances. Letters of Support memorializing these agreements are included with this application. These are: Mills Station Arts & Culture Center in Rancho Cordova (MACC): In the last three months RCRUT has produced at the MACC the comedy, “The Do-gooder Debacle”, a reader’s theatre fundraising event “A Radio Play” and is currently scheduled for another fundraiser “Photos with the Easter Bunny” and a full scale Broadway musical in the next three months. Both RCRUT and MACC look forward to a long partnership. Summerset Senior Living Facility, Rancho Cordova/Gold River (Summerset Facility): Summerset Facility Residents were provided free tickets to performances at the MACC. After a group of resident seniors attended plays, Summerset Staff felt a mutually beneficial relationship was possible. RCRUT has and will continue to use a portion of Summerset Facility for auditions and rehearsal, and residents will be able to enjoy those rehearsals and be provided free tickets to performances.

Have you received a letter of support for the project/program from the property owner?

Yes (includes if you are the property owner)

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Rise Up Theatre Letter CEIF (The MACC).pdf

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

No

PROJECT DESCRIPTION

This grant will provide funds to Rancho Cordova Rise Up Theatre Company to implement Phase III & IV of RCRUT's 18-month Development and Construction Plan ("Plan"). ***For details of the extensive 18-Month Development and Construction Plan see Attachment A. Please note that Attachment A is the proprietary property of Rancho Cordova Rise Up Theatre, prepared by its counsel and Executive Producer and is not for dissemination or publication.***

Phase I & II of the Plan have already been, or will be, accomplished through private donations, volunteerism and fundraising events/productions that have taken place. Briefly, RCRUT has already finalized its non-profit status, drafted and approved a full development and construction plan, organized its board and committees, launched its website, partnered with already existing Rancho Cordova non-profits, performing arts groups, businesses and fraternal organizations and produced eight productions and events at the MACC.

The goal of Phase III & IV of RCRUT's Plan is to: (1) Continue the development of an on-going, high quality, Rancho Cordova theatre company; (2) Construct a permanent 99-seat performance complex for that RCRUT company to be used for performances and rehearsals; (3) Share that complex with other already existing and thriving Rancho Cordova performing arts entities (Orchestras, Choirs, Dance Companies and other Theatre Companies); and (4) Continue to bring together, for mutual support, Rancho Cordova performing arts groups and thereby help Rancho Cordova in its continuing goal of becoming a community where theatre, music and all performing arts are prominent.

The creation of a theatre company and the construction of a theatre complex, even in an existing structure, is a long term project. Moreover the financing of this endeavor by a non-profit organization through fundraising events and productions adds to the gargantuan tasks and literally takes hundreds of thousands

of volunteer hours. This grant will allow the completion of this task within the 18-month timeline set forth in the RCRUT 4-phase plan and will create for the city of Rancho Cordova a high quality theatre company and thriving theatre complex.

Application #10

PROJECT TEAM

Rancho Cordova Rise Up Theatre Company's Team

Courtney Conklin
President and Artistic Director

Courtney, a mother and resident of Rancho Cordova is the founder of Rise Up Theatre Company, has a 20-year award winning history of producing, directing, and distributing, both artistically and financially profitable, live theatrical and film productions.

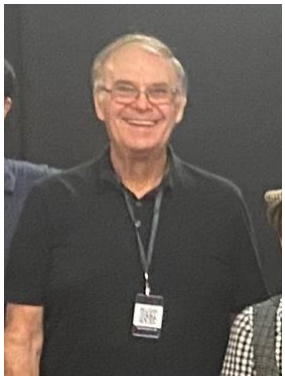
Mary Gorak
Vice President and Executive Producer

Mary holds a Juris Doctorate with 30-years'experience in civil and entertainment law and over 50-years' theatrical experience, including starting multiple theatres for municipalities, producing over 40 individual productions, including an award winning Off Broadway musical currently in preparation for its Broadway run, and training Tony award winning actors.

Carrie DeHerrera
Secretary and Managing Director

Carrie, a mother and disabled veteran, holds a Bachelors in Management, Masters in Business Administration, and a Doctorates in Organizational Leadership with 20-years' experience leading Government Organizations.

Application #10



Gian Montesini
Chairman and Producer

Gian has been involved in theatre in many capacities since the 80's. Originally from Brazil, he moved to California in the late 90's and continued to pursue his passion for the arts, organizing amateur and professional theatre groups like Big Idea Theatre, Scaramelo, Rebels Without Applause and, more recently, helping with Rise Up Theatre Co. Gian is also an avid musician and can be seen performing with his jazz band "Foreign & Domestic" at local wineries and breweries.

Ann Pierson
Treasurer

Ann is a local resident in Rancho Cordova, has a 40-year history in financial accounting. Her primary expertise lies within the healthcare industry, budgeting, Tax needs and legal matters, she has worked with companies both private, nonprofit and state owned. Ann is an avid arts enthusiast and participates in The Polar Express, Wine Tours, Train events and more across the Sacramento Region.

Walter Pierson
Technical Director

Walt is a Local Rancho Cordova homeowner, who went to school and received a certificate as a recording engineer, spent several years working in the musical industry as a DJ, and progressed his knowledge in the technical arts by doing event work including owning his own successful production company called "Magical Memories". In his later years he is known for his production work on community events and productions such as The Polar Express in James Town as well as Train productions and Wine Tours.

Application #10

Josh Pierson
Photography, Film and Graphics

Josh, a father and Rancho Cordova homeowner, is a respected, award-winning filmmaker. The founder and operator of a successful film production company and freelance photography business also works full-time for VSP here in Rancho Cordova as a Sr. Video Producer/Digital Media Specialist. He has won two regional advertising awards and one national advertising award for video work. With his deep roots in film, music, and photography with a feature film on many streaming platforms, photos and articles published in worldwide and regional magazines he is invaluable for digital media marketing as well as live production.

Talen Andersen
Musical Director

Talen Andersen is a performer, composer, and educator based out of the Sacramento area. He has been involved in the performing arts for over a decade, and received his B.A. in Music with a concentration in Music Education from William Jessup University. He currently teaches private music lessons at Music Institute of Roseville, and teaches general music and drama at Bradshaw Christian School. He believes in the life enriching qualities of the performing arts for all who dedicate the passion for it.

COMMUNITY SUPPORT

Rancho Cordova's Rise Up Theatre community support.

Cheryl Gleason
MACC Curator

Jay Evans
Producer and Radio Play Organization

Tom Seaton
Conductor for RCRCCB

Fred Radford
Set Design and Building
Well known for the set design and building for William Jessup Productions.

Claire Radford
Props and Set Decoration

Terri Harris
Liscenced General Contractor
SHECAN2
Commercial and private property renovation and construction.

PROJECT PARTNERS

Rancho Cordova Rise Up Theatre Company's Project Partner

PROJECTS GOALS

Goal #1 *Increase community appreciation for and participation in the arts.* Rise Up Theatre Company is striving to not only provide quality theatrical performances for citizens to participate in and enjoy, but by constructing a complex for other non-profit organizations to use as performance and rehearsal space inside the city limits, RCRUT is increasing the communities access to music, choral, dance and film. The access to all these performing arts forms to citizens, who may not be able to access such events outside Rancho Cordova, will now make them available within our community.

Goal #2 *Enhance community pride and the image of Rancho Cordova as a community where theatre, music, dance and film are prominent.* Rancho Cordova Rise Up Theatre Company's constructing a complex in Rancho Cordova where citizens can see, on an ongoing and permanent basis, high quality performing arts will instill community pride and encourage residents to call Rancho Cordova their home.

Goal #3 *Promote the quality of life and civic engagement for citizens of Rancho Cordova.* Theatre and the arts provide audiences and participants with not only emotional feelings of enjoyment and well-being; they expand their world view and mutual understanding. In addition, the construction of a permanent performing arts complex to be used by Rancho Cordova non-profit performing arts companies, orchestras, bands and choirs will bring a continuing stream of audiences and participants into a single location in the city of Rancho Cordova. This steady stream of arts patrons will attract and support businesses such as dining and transportation.

GOALS	METRICS
Goal #1 *Increase community appreciation for and participation in the arts.* Rise Up Theatre Company is striving to not only provide quality theatrical performances for citizens to participate in and enjoy, but by constructing a complex for other non-profit organizations to use as performance and rehearsal space inside the city limits, RCRUT is increasing the communities access to music, choral, dance and film. The access to all these performing arts forms to citizens, who may not be able to access such events outside Rancho Cordova, will now make them available within our community.	Participation will be measured by: ● Participants in Rise Up's plays and musicals by individual performers & staff; ● Audience attendance at and reaction to performances and fundraisers; ● Participation by other Rancho Cordova non-profit performing entities in Rise Up's productions ● Use of the complex by other Rancho Cordova non-profit performing arts groups ● Feedback from participants and audiences
Goal #2 *Enhance community pride and the image of Rancho Cordova as a community where theatre, music, dance and film are prominent.* Rancho Cordova Rise Up Theatre Company's constructing a complex in Rancho Cordova where citizens can see, on an ongoing and permanent basis, high quality performing arts will instill community pride and encourage residents to call Rancho Cordova their home.	Enhancement of pride and image will be measured by: ● Print and Television Press Coverage ● Internet Pod and Press Coverage ● Internal Business and Fraternal Organization Coverage ● Public Survey Responses
Goal #3 *Promote the quality of life and civic engagement for citizens of Rancho Cordova.* Theatre and the arts provide audiences and participants with not only emotional feelings of enjoyment and well-being, the construction of a permanent performing arts complex to be used by Rancho Cordova non-profit performing arts companies, orchestras, bands and choirs will bring a continuing stream of audiences and participants into a single location in the city of Rancho Cordova. This steady stream of individuals will attract businesses that support arts patrons such as dining and transportation.	Promotion and engagement will be measured by: ● Audience surveys of use of other Rancho Cordova Businesses and Services ● Survey of Rancho Cordova Business in arts district ● Agreements with Rancho Cordova Business for package offers to Audience Participants ● Anecdotal Reports from Participants and Businesses.

Application #10

FUNDING REQUEST

EQUITY BOARD FUNDING PLEDGE

Rancho Cordova Rise Up Theatre Company was founded by three high-power professionals who each are providing Professional In-Kind Services and $10,000.00 seed money each. Moreover, even though they are acting as the Company's Administration, the Equity Board is not seeking, and has pledged not to take, any payment or remittance of any kind for the hundreds of hours of work provided until the theatre company and theatre complex are completely self-sustaining. They have made this pledge and investment of time and personal funds because of their ultimate goal: creating a professional theatre company and theatre facility that helps build and maintain Rancho Cordova, their home's, position and reputation as a center for the arts.

Executive Board Administrative Positions, In-Kind & Monetary Investment:

- President and Artistic Director, Courtney Conklin has a 20 year award winning history of producing, directing and distributing financially profitable live theatrical and film productions. She bills between $3,000 and $5,000 per production and has made a personal investment pledge of $10,000.00.
- Secretary and Managing Director, Carrie DeHerrera, PhD, holds a Doctorate in Organizational Leadership and is the founder and CEO of a successful for-profit company. She bills $150.00 per hour for her professional services and has made a personal investment pledge of $10,000.00.
- Vice President and Executive Producer, Mary Gorak, J.D. has 30 years in civil and entertainment law, holds a Masters in Theatrical Producing with over 50 years experience producing theatre and has created theatre companies for municipalities including: Milpitas, CA; Healdsburg, CA; Santa Rosa, CA and Lebanon, Ohio. She bills $375.00 per hour for legal services, $10,000 to $20.000 for Theatrical Development Plans and has pledged $10,000.00.

REQUEST FROM COMMUNITY ENHANCEMENT & INVESTMENT FUND: <u>$150,000.00</u>
FOR 50% OF PHASE III & IV OF THE DEVELOPMENT AND CONSTRUCTION PLAN

<u>FUNDING SUMMARY</u>:

Total Project Cost: $500,000.00

This total project cost is for the entire 18-Month Development and Construction Plan ("Plan"): Phase I, II, III & IV. The 18-month time period begins January 1, 2020 and ends June 30, 2023.

Phase I and II of the Plan Cost: $200,000.00

<u>Phase I and II will be completed by July 1, 2022, prior to the receipt of any Community Enhancement & Investment Funds</u> The costs of Phase I & II have been

Application #10

or will be accomplished from fundraising events, theatrical productions, private donations and monetary pledges from the Executive Board.

Phase III and IV of the Plan Cost: $300,000.00

Phase III and IV coincide with the Community Enhancement & Investment 12 Month Funding Period (July 1, 2022 – June 30, 2023) 50% of the costs of Phase III & IV ($150.000) will be funded by private donations, funding events, theatrical productions and in-kind volunteerism. The other 50% of Phase II & IV, (**$150.000) is the funding requested from the Community Enhancement and Investment fund.**

PROJECT SCHEDULE

Theatrical Productions and Fundraising Events, which will be funded in part by Community Enhancement & Investment Fund Grant, will take place from July 1, 2022 through June 30, 2023. All such productions and events are in Phase II and IV of Rancho Cordova Rise Up Theatre Company's Development and Construction Plan. Please note that productions and events in Phase I & II will have been completed prior to grant funding. The design and construction of the 99-seat theatrical complex in the Rancho Cordova Arts District will be begun and completed between July 1, 2022 and June 30, 2023.

PROJECT TIMELINESS

This project begins with a major advantage that ensures timeliness: Phase I & II of the Development and Construction Plan will have been funded independently through outside sources and completed by a board and management team already in place prior to the 2022/2023 fiscal year. This team will already function successfully. They will have developed a method of theatrical and fundraising events utilizing Rancho Cordova facilities, community and support. They will have established partnerships with Rancho Cordova non-profits and have begun to build an audience. They will also be well on the way to finalizing the survey for an already existing building to renovate and adapt into a 99-seat theatre complex.

PROJECT ADAPTABILITY

Rancho Cordova Rise Up Theatre Company Plan is prepared to adapt. A large portion of theatrical productions and fundraising events can be filmed and streamed. In fact Rancho Cordova Rise Up Theatre Company has already provided for such adjustments. Board Member Josh Pierson is the owner/operator of a successful film company and has, and will provide streaming services if necessary. Contract negotiation with contractors and architects for the theatre complex construction can go forward via zoom and email even in a shut down as can the design and permit process. It is highly unlikely that construction will be halted due to health restriction: even in the height of the 2020 pandemic shutdown construction projects went forward. However, it there is a complete work stoppage, all funding from this grant as well as funds raised independently for the complex construction can be carried over into the next fiscal year in an attorney trust fund.

PROJECT PREVIOUS/ONGOING FUNDING

Rancho Cordova Rise Up Theatre Company has never sought or received any previous funding from the Community Enhancement & Investment Fund. All previous funding has been provided by the

Executive Board, has come from profits from performances or has been raised through fundraising events. Going forward RCRUT will continue to raise funds through direct donations, ticket sales, fundraising events and corporate and municipal grants.

This specific request to help fund RCRUT's Development and Construction Plan is a single year request and all funds will be used in fiscal year 2022/2023, unless, as outlined above, construction is halted and then funds will be kept in a trust fund until completion.

However, historically live theatre and the arts receive only about 50-60% of their operational funds through ticket sales, fundraising events and private donations: grants have always been a vital piece of funding. Once RCRUT's Development and Construction plan is fully realized and the needs of the company and complex are defined, RCRUT will seek additional Community Enhancement & Investment grant funds to maintain a high quality theatre company and a thriving performance complex in Rancho Cordova.

PROJECT LOCATION/FACILITY USE

Rancho Cordova Rise Up Theatre Company's office and mailing address is: Rancho Cordova Rise Up Theatre Company, 10468 Neiretto Court, Rancho Cordova, CA 95670. The legal office and agent for service of process is: The Law Offices of Mary J. Gorak, 4801 Dover Lane #507, Sacramento, CA 95842.

Currently no Rancho Cordova Rise Up Theatre Company Theatrical Productions or Fundraising Events are scheduled to take place at any school sites or parks in Rancho Cordova. However, if at any time appropriate sites become available, letters of approval and support will be submitted.

Rancho Cordova Rise Up Theatre Company has partnered and made arrangements with two non-profit organizations who have agreed to allow the Theatre Company to use their facilities free of charge for rehearsal and performances. Letters of Support memorializing these agreements are included with this application. These are:

- Mills Station Arts & Culture Center in Rancho Cordova (MACC): In the last three months RCRUT has produced at the MACC the comedy, "The Do-gooder Debacle", a reader's theatre fundraising event "A Radio Play" and is currently scheduled for another fundraiser "Photos with the Easter Bunny" and a full scale Broadway musical in the next three months. Both RCRUT and MACC look forward to a long partnership.

- Summerset Senior Living Facility, Rancho Cordova/Gold River (Summerset Facility): Summerset Facility Residents were provided free tickets to performances at the MACC. After a group of resident seniors attended plays, Summerset Staff felt a mutually beneficial relationship was possible. RCRUT has and will continue to use a portion of Summerset Facility for auditions and rehearsal, and residents will be able to enjoy those rehearsals and be provided free tickets to performances.

CLOSING REMARKS

The creation of the Company is the result of an alliance of the business, civic, education and artistic communities, which feeds back to the community by making a financial, educational and artistic contribution.

BUSINESS

- Attract tourism by being marketed broadly to draw an audience.
- Cooperates with the city and the chamber of commerce in promoting the city as a destination.
- Ties in with other events, points of interest in the area, and local products and services.
- Is a "quality of life" asset to encourage businesses to locate in the city.
- Brings significant business to local hotels and inns, restaurants, retail stores, and historical sites.

CIVIC

- Helps to maintain the city position and reputation as the center of the arts.
- Becomes a city institution synonymous with the town.
- The standard of excellence is a source of civic pride.
- Fosters community team spirit. Similar to the city parade: half the people in town participate and the other half watches and cheers.
- Symbolically mirrors the quality of life seen in the city.
- Ties in with other non-profit civic organizations such as the Museum and Orchestra.

EDUCATION

- Provides training and apprenticeship programs in all aspects of theater production.
- Assist performers and others in obtaining Union membership for career advancement.
- Affiliates with the school system in many ways: artist-in-residences, special performances and backstage tours for children, programs designed for at-risk youth and a fully equipped theater space for performances.

ARTISTIC

- Establishes professional opportunities for talented city performers and artists.
- Maintains the highest standards of professional excellence achieved by the use of seasoned professionals in the field as well as the training of local participants.
- Showcases a broad spectrum of performers in the most collaborative of art forms: actors, dancers, singers, and musicians.
- Has broad appeal to the local as well as the out of town audience, older and younger audiences, sophisticated as well as inexperienced theatre goers.
- Because of the high production values, it gives the audience excellent value for its entertainment dollar.
- Embodies an artistic vehicle –the traditional American musical enthusiasm, optimism and the best of our ideals.

Application #10

RANCHO CORDOVA RISE UP THEATRE COMPANY

The Rise Up Theatre Company is a performing arts company led by Founding Member and Artistic Director, Courtney Conklin

and Managing Director, Carrie DeHerrera.

Rise Up Theatre anticipates producing up to 12 plays and musical each year ranging from the best current work to re-invigorated classic plays, to new plays by contemporary writers.

The Rise Up Theatre Company engages theatre artists of every discipline – actors, designers, composers, playwrights – who work on individual productions throughout each season.

DONATIONS

Ticket sales only cover about 50% of RUT's costs. To bridge that gap, we depend on the support of generous people, like you, who are inspired by what we do and want to see more people entertained, enriched, engaged, and educated through performing arts and community theatre.

As a non-profit (501c3) organization, we depend on the generosity of our patrons and volunteers. Your donations provide the means for Rise Up Theatre Company to grow and further the arts as an integral part of the community.

If you would like to support our growing theatre company you may donate through Venmo:

Please make checks payable to: Rise Up Theatre Company.

MISSION

Here at Rise Up Theatre, it is our mission to bring the community together one production at a time through quality community theatre and visual performing arts, with integrity, honesty, and inclusion.

We rise by lifting others.

The Company hopes to reach over 20,000 people each year through its performance and fundraising programs. We value and promote diversity and inclusion in every aspect of our business.

VOLUNTEERS

Whether it is on the stage or behind the scenes there are always opportunities available! Experience is not required to fulfill a position. We are happy to teach and learn as we go. As a non-profit company, we rely on donations of time and money from the community to accomplish our goals.

RUT is made up of members of the community who support RUT with their time, their talents, and their treasure. If you are interested in being a part of RUT's success and growth and would like more information on how you can become a member of this dynamic group of highly-engaged individuals, Please visit www.riseuptheatreco.com for more information.

Application #10

BYLAWS

OF

PHOENIX PRODUCTION COMPANY

DBA'S THEREWITHIN

A CALIFORNIA PUBLIC BENEFIT CORPORATION

Application #10

ARTICLE I

GENERAL PROVISIONS

SECTION 1. PRINCIPAL OFFICE

The principal office of the corporation for the transaction of its business is located in Rancho Cordova, California.

SECTION 2. OTHER OFFICES

The Board may at any time establish branch or subordinate offices at any place or places within or without the State of California, where it is qualified to do business.

SECTION 3. CHANGE OF ADDRESS

The county of the corporation's principal office can be changed only by amendment of these Bylaws and not otherwise. The Board of Directors may, however, change the principal office from one location to another within the named county by noting the changed address and effective date below, and such changes of address shall not be deemed an amendment of these Bylaws:

_____ Dated: _____
_____ Dated: _____
_____ Dated: _____

Initials:

___ President ___Vice President ___Secretary ___Treasurer ___Chairperson

ARTICLE II

OBJECTIVE AND PURPOSES

SECTION 1. OBJECTIVES AND PURPOSES

The Corporation is a nonprofit public benefit corporation and is not organized for the private gain of any organization or person. The specific purposes of the corporation are to provide public performances and instruction in theatrical forms including without limitation (i) fostering and stimulating interest in classic and contemporary works including but not limited to; Comedy, Drama, Musicals, Improvisations, dance and film medias; (ii) to provide instruction in theatrical and film methods such acting, directing, improvisation, dancing, script writing, playwriting, production, and technical skills; (iii) to sponsor special events involving the public performance of any or all of the above art forms as well as other performing arts by the corporation's performing troupe as well as by other community performing arts groups; and (iv) to directly engage in and to provide facilities for others to engage in the promotion of the arts; (v) with the intent of developing the abilities and interests of the company and community at large while uniting persons interested in the participation of the foregoing activities.

ARTICLE III
BOARD OF DIRECTORS

SECTION 1. NUMBER

The corporation shall have consist of not less than five (5) directors and not more than eleven (11) Directors, the exact number to be fixed by resolution of the Board from time to time. Collectively they shall be known as the Board of Directors. One of the Directors shall be the President of the corporation. The remaining Directors shall be elected by a majority of the Directors. The Directors other than the President of the Corporation shall serve a three (3) year term, provided that an appointment or election to fill the vacancy shall be for the unexpired term of the office in which the vacancy occurs. The Directors shall continue to hold office until their successors are elected and qualified.

SECTION 2. POWERS

(a) *General Corporation Powers.* Subject to the provisions of the California Nonprofit Public Benefit Corporation law and any limitations in the Articles of Incorporation and Bylaws relating to action required or permitted to be taken or approved by the members, if any, of this corporation, the activities and affairs of this corporation shall be conducted, and all corporate powers shall be exercised by or under the direction of the Board of Directors.

(b) Specific Powers. The Directors shall have the power to; (i) select and remove all officers, agents, and employees at the corporation; (ii) prescribe any powers and duties for them that is consistent with the law and fix their compensation.

(c) Self-Dealing Transactions. The Board of Directors shall not approve any transaction to which one or more of its directors has a material or financial interest.

SECTION 3. DUTIES

It shall be the duty of the directors to:

(a) Perform any and all duties imposed on them collectively or individually by law, by the Articles of Incorporation of this corporation, or by these Bylaws;

(b) Appoint and remove, employ and discharge, and, except as otherwise provided in these Bylaws, prescribe the duties and fix the compensation, if any, of all officers, agents and employees of the corporation;

(c) Supervise all officers, agents and employees of the corporation to assure that their duties are performed properly;

(d) Meet at such times and places as required by these Bylaws;

SECTION 4. FEES AND COMPENSATION OF DIRECTORS

Directors and members of committees may receive such compensation, if any, for their services and such reimbursement for expenses incurred on behalf of the corporation as may be fixed or determined by resolution of the Board of Directors; provided, however, that such compensation shall be reasonable, and shall be comparable to the compensation paid for a like position by similar nonprofit organizations; and provided further that a Director may not vote on matters relating to his or her compensation in a capacity other than as a Director.

SECTION 5. REPRESENTATION OF SHARES OF OTHER CORPORATION

The Board of Directors and/or the Executive Committee shall have full and sole power to authorize and direct the President and (1) The Secretary or (2) any Assistant Secretary of the Corporation to vote, represent, and exercise on behalf of the corporation, (i) all rights incident to any and all shares of any other corporation or a corporation standing in the name of the corporation and to specify the particular actions to be taken with respect to such shares provided that the officers of the corporation have the authority to vote, represent, and exercise on behalf of the corporation all rights and such shares if such shares constitute less than 10% of the assets of the corporation.

SECTION 6. RESTRICTION REGARDING INTERESTED DIRECTORS

The property of this corporation is irrevocably dedicated to charitable and social welfare purposes and no part of the net earnings, contributions, or assets of the corporation shall ever inure to the benefit of any of its directors or officers, or to the benefit of any private person, except the corporation shall be authorized and empowered to pay reasonable compensation for services rendered and to make payments and distributions in furtherance of the purposes set forth in its articles of incorporation and otherwise in the amended and restated Bylaws (the “Bylaws”).
The corporations shall not participate in or intervene in any political campaign (including the publishing or distribution of statements) on behalf of or in opposition to any candidate for public office.

SECTION 7. SPECIAL MEETINGS

Meetings shall be held at the principal office of the corporation unless otherwise provided by the board or at such place within or without the State of California which

has been designated from time to time by resolution of the Board of Directors. In the absence of such designation, any meeting not held at the principal office of the corporation shall be valid only if held after all board members have been given written notice of the meeting as hereinafter provided for special meetings of the board.
Any meeting may be held by conference telephone, electronic video screen communication, or other communications equipment. Participation in a meeting through use of conference telephone constitutes presence in person at that meeting so long as all directors participating in the meeting are able to hear one another. Participation in a meeting through use of electronic video screen communication or other communications equipment (other than conference telephone) constitutes presence in person at that meeting if all of the following apply; (i) Each director participating in the meeting can communicate with all of the other directors concurrently; (ii) Each director is provide the means of participating in all matters before the board, including, without limitation, the capacity to propose, or to interpose an objection to, a specific action to be taken by the corporation; (iii) The corporation adopts and implements some means of verifying that all persons participating in the meeting are directors of the corporation or are otherwise entitled to participate in the meeting; and that all actions of, or votes by, the board are taken and cast only by directors and not by persons who are not directors.

SECTION 8. REGULAR AND ANNUAL MEETINGS

(a) *Annual Meetings.* The annual meeting of directors shall be held on the first Tuesday following a Monday in October, directors shall be elected by the Board of Directors in accordance with this section. Cumulative voting by directors for the election of directors shall not be permitted. The candidates receiving the highest number of votes up to the number of directors to be elected shall be elected. Each director shall cast one vote, with voting being by ballot only.

(b) *Regular Meetings.* In addition to the annual meeting, regular meetings shall be held once each calendar quarter, the first Tuesday following a Monday of the following months; (i) February, (ii) May, (iii) August and (iv) December.

SECTION 9. SPECIAL MEETINGS

Special meetings of the Board of Directors may be called by the Chairperson of the board, the President, the Vice President, the Secretary, or by any two directors, and such meetings shall be held at the place, within or without the State of California, designated by the person or persons calling the meeting, and in the absence of such designation, at the principal office of the corporation.

SECTION 10. NOTICE OF MEETINGS

Regular meetings of the board may be held without notice. Special meetings of the board shall be held upon four (4) days' notice by first-class mail or forty-eight (48) hours' notice delivered personally or by telephone or email. If sent by mail or email, the notice shall be deemed to be delivered on its deposit in the mails or on its delivery to the service provider. Such notices shall be addressed to each director at his or her address as shown on the books of the corporation. Notice of the time and place of holding an adjourned meeting need not be given to absent directors if the time and place of the adjourned meeting are fixed at the meeting adjourned and if such adjourned meeting is held no more than twenty-four (24) hours from the time of the original meeting. Notice shall be given of any adjourned regular or special meetings to directors absent from the original meeting if the adjourned meeting is held more than twenty-four (24) hours from the time of the original meeting.

SECTION 11. CONTENTS OF NOTICE

Notice of meetings not herein dispensed with shall specify the place, day and hour of the meeting. The purpose of any board meeting need not be specified in the notice.

SECTION 12. WAIVER OF NOTICE AND CONSENT TO HOLDING MEETINGS

(a) Meetings. The transactions of any meeting of the board, however called and noticed or wherever held, are as valid as though the meeting had been duly held after proper call and notice, provided a quorum, as hereinafter defined, is present and provided that either before or after the meeting each director not present signs a waiver of notice, a consent to holding the meeting, or an approval of the minutes thereof. All such waivers, consents, or approvals shall be filed with the corporate records or made a part of the minutes of the meeting.
(b) Action. Any action required or permitted to be taken by the Board may be taken without a meeting, if all members of the Board, individually or collectively consent in writing to such action. Any and all written consents shall be filed with the minutes of the proceedings of the Board.

SECTION 13. QUORUM FOR MEETINGS

A quorum shall consist of a majority of the Board of Directors. Except as otherwise provided in these Bylaws or in the Articles of Incorporation of this corporation, or by law, no business shall be considered by the board at any meeting at which a quorum, as hereinafter defined, is not present, and the only motion which the Chair shall entertain at such meeting is a motion to adjourn. However, a majority of the directors present at such meeting may adjourn from time to time until the time fixed for the next regular meeting of the board.

Initials:

___ President ___Vice President ___Secretary ___Treasurer ___Chairperson

When a meeting is adjourned for lack of a quorum, it shall not be necessary to give any notice of the time and place of the adjourned meeting or of the business to be transacted at such meeting, other than by announcement at the meeting at which the adjournment is taken, except as provided in Section 9 of this Article.

The directors present at a duly called and held meeting at which a quorum is initially present may continue to do business notwithstanding the loss of a quorum at the meeting due to a withdrawal of directors from the meeting, provided that any action thereafter taken must be approved by at least a majority of the required quorum for such meeting or such greater percentage as may be required by law, or the Articles of Incorporation or Bylaws of this corporation.

SECTION 14. MAJORITY ACTION AS BOARD ACTION

Every act or decision done or made by a majority of the directors present at a meeting duly held at which a quorum is present is the act of the Board of Directors, unless the Articles of Incorporation or Bylaws of this corporation, or provisions of the California Nonprofit Public Benefit Corporation Law.

SECTION 15. CONDUCT OF MEETINGS

Meetings of the Board of Directors shall be presided over by the Chairman or, if no such person has been so designated or, in his or her absence, the President of the corporation or, in his or her absence, by the Artistic Director or, in the absence of each of these persons, by a Chairperson chosen by a majority of the directors present at the meeting. The Secretary of the corporation shall act as secretary of all meetings of the board, provided that, in his or her absence, the presiding officer shall appoint another person to act as Secretary of the Meeting.

Meetings shall be governed by Roberts' Rules Of Order, as such rules may be revised from time to time, insofar as such rules are not inconsistent with or in conflict with these Bylaws, with the Articles of Incorporation of this corporation, or with provisions of law.

SECTION 16. VACANCIES

Vacancies on the Board of Directors shall exist (1) on the death, resignation or removal of any director, and (2) whenever the number of authorized directors is increased. The Board of Directors may declare vacant the office of a director who has been declared of unsound mind by a final order of court, or convicted of a felony, or been found by a final order or judgment of any court to have breached any duty under Section 5230 and following of the California Nonprofit Public Benefit Corporation Law. Directors may be removed without cause by a majority of the directors then in office.

Vacancies on the board may be filled by approval of the board or, if the number of directors, then in office is less than a quorum, by (1) the unanimous written consent of the directors then in office, (2) the affirmative vote of a majority of the directors then in office at a meeting held pursuant to notice or waivers of notice complying with this Article of these Bylaws, or (3) a sole remaining director. A person elected to fill a vacancy as provided by this Section shall hold office until the next annual election of the Board of Directors or until his or her death, resignation or removal from office.

SECTION 17. RESIGNATIONS

Any director may resign effective upon giving written notice to the Chairperson of the Board, the President, the Secretary, or the Board of Directors, unless the notice specifies a later time for the effectiveness of such resignation. No director may resign if the corporation would then be left without a duly elected director or directors in charge of its affairs, except upon notice to the Attorney General.
A director who is absent without reasonable cause from one-third or more of board meetings during any year of that members term shall be deemed to have automatically resigned from the board unless voted otherwise by a Quorum.

SECTION 18. NON-LIABILITY OF DIRECTORS

The directors shall not be personally liable for the debts, liabilities, or other obligations of the corporation.

SECTION 19. INDEMNIFICATION BY CORPORATION OF DIRECTORS, OFFICERS, EMPLOYEES AND OTHER AGENTS

To the extent that a person who is, or was, a director, officer, employee or other agent of this corporation has been successful on the merits in defense of any civil, criminal, administrative or investigative proceeding brought to procure a judgment against such person by reason of the fact that he or she is, or was, an agent of the corporation, or has been successful in defense of any claim, issue or matter, therein, such person shall be indemnified against expenses actually and reasonably incurred by the person in connection with such proceeding.

If such person either settles any such claim or sustains a judgment against him or her, then indemnification against expenses, judgments, fines, settlements and other amounts reasonably incurred in connection with such proceedings shall be provided by this corporation but only to the extent allowed by, and in accordance with the requirements of, Section 5238 of the California Nonprofit Public Benefit Corporation Law.

Initials:

___ President ___Vice President ___Secretary ___Treasurer ___Chairperson

SECTION 20. INSURANCE FOR CORPORATE AGENTS

The Board of Directors may adopt a resolution authorizing the purchase and maintenance of insurance on behalf of any agent of the corporation (including a director, officer, employee or other agent of the corporation) against any liability other than for violating provisions of law relating to self-dealing (Section 5233 of the California Nonprofit Public Benefit Corporation Law) asserted against or incurred by the agent in such capacity or arising out of the agent's status as such, whether or not the corporation would have the power to indemnify the agent against such liability under the provisions of Section 5238 of the California Nonprofit Public Benefit Corporation Law.

Initials:

___ President ___Vice President ___Secretary ___Treasurer ___Chairperson

ARTICLE IV
OFFICERS

SECTION 1. OFFICERS

The officers of the corporation shall be a President, a Secretary, and a Chief Financial Officer who shall be designated the Treasurer. The corporation may also have, as determined by the Board of Directors, a Chairperson of the Board, one or more Vice Presidents, Assistant Secretaries, Assistant Treasurers, or other officers. Any number of offices may be held by the same person except that neither the Secretary nor the Treasurer may serve as the President or Chairperson of the Board.

SECTION 2. QUALIFICATION, ELECTION, AND TERM OF OFFICE

Any person may serve as officer of this corporation. Officers shall be elected by the Board of Directors, at any time, and each officer shall hold office until he or she resigns or is removed or is otherwise disqualified to serve, or until his or her successor shall be elected and qualified, whichever occurs first.

SECTION 3. SUBORDINATE OFFICERS

The Board of Directors may appoint such other officers or agents as it may deem desirable, and such officers shall serve such terms, have such authority, and perform such duties as may be prescribed from time to time by the Board of Directors.

SECTION 4. REMOVAL AND RESIGNATION

Any officer may be removed, either with or without cause, by the majority of the Board of Directors, at any time. Any officer may resign at any time by giving written notice to the Board of Directors or to the President or Secretary of the corporation. Any such resignation shall take effect at the date of receipt of such notice or at any later date specified therein, and, unless otherwise specified therein, the acceptance of such resignation shall not be necessary to make it effective. The above provisions of this Section shall be superseded by any conflicting terms of a contract which has been approved or ratified by the Board of Directors relating to the employment of any officer of the corporation.

SECTION 5. VACANCIES

Any vacancy caused by the death, resignation, removal, disqualification, or otherwise, of any officer shall be filled by the Board of Directors. In the event of a vacancy in any office other than that of President, such vacancy may be filled temporarily by appointment by the President until such time as the Board shall fill the vacancy.

Initials:

___ President ___Vice President ___Secretary ___Treasurer ___Chairperson

Vacancies occurring in offices of officers appointed at the discretion of the board may or may not be filled as the board shall determine.

SECTION 6. PRESIDENT

The President shall be the chief executive officer of the corporation and shall, subject to the control of the Board of Directors, supervise and control the affairs of the corporation and the activities of the officers. He or she shall perform all duties incident to his or her office and such other duties as may be required by law, by the Articles of Incorporation of this corporation, or by these Bylaws, or which may be prescribed from time to time by the Board of Directors. Unless another person is specifically appointed as Chairperson of the Board of Directors, he or she shall preside at all meetings of the Board of Directors. If applicable, the President shall preside at all meetings of the members. Except as otherwise expressly provided by law, by the Articles of Incorporation, or by these Bylaws, he or she shall, in the name of the corporation, execute such deeds, mortgages, bonds, contracts, checks, or other instruments which may from time to time be authorized by the Board of Directors.

SECTION 7. VICE PRESIDENT

In the absence of the President, or in the event of his or her inability or refusal to act, the Vice President shall perform all the duties of the President, and when so acting shall have all the powers of, and be subject to all the restrictions on, the President. The Vice President shall have other powers and perform such other duties as may be prescribed by law, by the Articles of Incorporation, or by these Bylaws, or as may be prescribed by the Board of Directors.

SECTION 8. SECRETARY

The Secretary shall (i) Certify and keep at the principal office of the corporation the original, or a copy of these Bylaws as amended or otherwise altered to date; (ii) Keep at the principal office of the corporation or at such other place as the board may determine, a book of minutes of all meetings of the directors, and, if applicable, meetings of committees of directors and of members, recording therein the time and place of holding, whether regular or special, how called, how notice thereof was given, the names of those present or represented at the meeting, and the proceedings thereof; (iii) See that all notices are duly given in accordance with the provisions of these Bylaws or as required by law; (iv) Be custodian of the records and of the seal of the corporation and see that the seal is affixed to all duly executed documents, the execution of which on behalf of the corporation under its seal is authorized by law or these Bylaws; (v) Keep at the principal office of the corporation a membership book containing the name and address of each and any members, and, in the case where any membership has been terminated, he or she shall record such fact in the membership book together with the date on which such membership ceased; (vi) Exhibit at all reasonable times to any

director of the corporation, or to his or her agent or attorney, on request therefor, the Bylaws, the membership book, and the minutes of the proceedings of the directors of the corporation; (vii) In general, perform all duties incident to the office of Secretary and such other duties as may be required by law, by the Articles of Incorporation of this corporation, or by these Bylaws, or which may be assigned to him or her from time to time by the Board of Directors.

SECTION 9. TREASURER

Subject to the provisions of these Bylaws relating to the "Execution of Instruments, Deposits and Funds," the Treasurer shall (i) Have charge and custody of, and be responsible for, all funds and securities of the corporation, and deposit all such funds in the name of the corporation in such banks, trust companies, or other depositories as shall be selected by the Board of Directors; (ii) Receive, and give receipt for, monies due and payable to the corporation from any source whatsoever; (iii) Disburse, or cause to be disbursed, the funds of the corporation as may be directed by the Board of Directors, taking proper vouchers for such disbursements; (iv) Keep and maintain adequate and correct accounts of the corporation's properties and business transactions, including accounts of its assets, liabilities, receipts, disbursements, gains and losses; (v) Exhibit at all reasonable times the books of account and financial records to any director of the corporation, or to his or her agent or attorney, on request therefor; (vi) Render to the President and directors, whenever requested, an account of any or all of his or her transactions as Treasurer and of the financial condition of the corporation (vii) Prepare, or cause to be prepared, and certify, or cause to be certified, the financial statements to be included in any required reports.
In general, perform all duties incident to the office of Treasurer and such other duties as may be required by law, by the Articles of Incorporation of the corporation, or by these Bylaws, or which may be assigned to him or her from time to time by the Board of Directors.

SECTION 10. CHAIRPERSON

The chair of the board shall, if present; (i) Preside at all Regular Board Meetings. They may call special meetings, including special meetings of committees whenever they deem it necessary; (ii) The chair of the board shall exercise and perform such other powers and duties as may from time to time be assigned by the board or prescribed by the bylaws; (iii) The chair of the board shall also preside over the annual meeting.

ARTICLE V
COMMITTEES

SECTION 1. EXECUTIVE COMMITTEE

(a) The Board of Directors may, by a majority vote of directors, designate two (2) or more of its members (who may also be serving as officers of this corporation) to constitute an Executive Committee and delegate to such Committee any of the powers and authority of the board in the management of the business and affairs of the corporation, except with respect to; (i) The approval of any action which, under law or the provisions of these Bylaws, requires the approval of the members or of a majority of all of the members; (ii) The filling of vacancies on the board or on any committee which has the authority of the board; (iii) The fixing of compensation of the directors for serving on the board or on any committee; (iv) The amendment or repeal of Bylaws or the adoption of new Bylaws; (v) The amendment or repeal or any resolution of the board which by its express terms is not so amendable or repeal able; (v) The appointment of committees of the board or the members thereof; (vi) The expenditure of corporate funds to support a nominee for director after there are more people nominated for director than can be elected; (vii) The approval of any transaction to which this corporation is a party and in which one or more of the directors has a material financial interest, except as expressly provided in Section 5233(d)(3) of the California Nonprofit Public Benefit Corporation Law.

(b) By a majority vote of its members then in office, the board may at any time revoke or modify any or all of the authority so delegated, increase or decrease but not below two (2) the number of its members, and fill vacancies therein from the members of the board. The Committee shall keep regular minutes of its proceedings, cause them to be filed with the corporate records, and report the same to the board from time to time as the board may require.

SECTION 2. OTHER COMMITTEES

The corporation shall have such other committees as may from time to time be designated by resolution of the Board of Directors. Such other committees may consist of persons who are not also members of the board. These additional committees shall act in an advisory capacity only to the board and shall be clearly titled as "advisory" committees.

SECTION 3. MEETINGS AND ACTION OF COMMITTEES

Meetings and action of committees shall be governed by, noticed, held and taken in accordance with the provisions of these Bylaws concerning meetings of the Board of Directors, with such changes in the context of such Bylaw provisions as are necessary to substitute the committee and its members for the Board of Directors and its members, except that the time for regular meetings of committees may be fixed by resolution of the Board of Directors or by the committee. The time for special meetings of committees may also be fixed by the Board of Directors. The Board of Directors may also adopt rules and regulations pertaining to the conduct of meetings of committees to the extent that such rules and regulations are inconsistent with the provisions of these Bylaws.

Initials:

___ President ___Vice President ___Secretary ___Treasurer ___Chairperson

ARTICLE VI

EXECUTION OF INSTRUMENTS, DEPOSITS AND FUNDS

SECTION 1. EXECUTION OF INSTRUMENTS

The Board of Directors, except as otherwise provided in these Bylaws, may by resolution authorize any officer or agent of the corporation to enter into any contract or execute and deliver any instrument in the name of and on behalf of the corporation, and such authority may be general or confined to specific instances. Unless so authorized, no officer, agent, or employee shall have any power or authority to bind the corporation by any contract or engagement or to pledge its credit or to render it liable monetarily for any purpose or in any amount.

SECTION 2. CHECKS AND NOTES

Except as otherwise specifically determined by resolution of the Board of Directors, or as otherwise required by law, checks, drafts, promissory notes, orders for the payment of money, and other evidence of indebtedness of the corporation shall be signed by the Treasurer and countersigned by the President of the corporation.

SECTION 3. DEPOSITS

All funds of the corporation shall be deposited from time to time to the credit of the corporation in such banks, trust companies, or other depositories as the Board of Directors may select.

SECTION 4. GIFTS

The Board of Directors may accept on behalf of the corporation any contribution, gift, bequest, or devise for the charitable or public purposes of this corporation.

Initials:

___ President ___Vice President ___Secretary ___Treasurer ___Chairperson

ARTICLE VII

CORPORATE RECORDS, REPORTS AND SEAL

SECTION 1. MAINTENANCE OF CORPORATE RECORDS

The corporation shall keep at its principal office in the State of California:

(a) Minutes of all meetings of directors, committees of the board and, if this corporation has members, of all meetings of members, indicating the time and place of holding such meetings, whether regular or special, how called, the notice given, and the names of those present and the proceedings thereof;

(b) Adequate and correct books and records of account, including accounts of its properties and business transactions and accounts of its assets, liabilities, receipts, disbursements, gains and losses;

(c) A record of its members, if any, indicating their names and addresses and, if applicable, the class of membership held by each member and the termination date of any membership;

(d) A copy of the corporation's Articles of Incorporation and Bylaws as amended to date, which shall be open to inspection by the members, if any, of the corporation at all reasonable times during office hours.

SECTION 2. CORPORATE SEAL

The Board of Directors may adopt, use, and at will alter, a corporate seal. Such seal shall be kept at the principal office of the corporation. Failure to affix the seal to corporate instruments, however, shall not affect the validity of any such instrument.

SECTION 3. DIRECTORS' INSPECTION RIGHTS

Every director shall have the absolute right at any reasonable time to inspect and copy all books, records and documents of every kind and to inspect the physical properties of the corporation.

SECTION 4. RIGHT TO COPY AND MAKE EXTRACTS

Any inspection under the provisions of this Article may be made in person or by agent or attorney and the right to inspection includes the right to copy and make extracts.

SECTION 5. ANNUAL REPORT

The board shall cause an annual report to be furnished not later than one hundred and twenty (120) days after the close of the corporation's fiscal year to all directors of the corporation and, if this corporation has members, to any member who requests it in writing, which report shall contain the following information in appropriate detail; (i) The assets and liabilities, including the trust funds, of the corporation as of the end of the fiscal year; (ii) The principal changes in assets and liabilities, including trust funds, during the fiscal year; (iii) The revenue or receipts of the corporation , both unrestricted and restricted to particular purposes, for the fiscal year; (iv) The expenses or disbursements of the corporation, for both general and restricted purposes, during the fiscal year.

The annual report shall be accompanied by any report thereon of independent accountants, or, if there is no such report, the certificate of an authorized officer of the corporation that such statements were prepared without audit from the books and records of the corporation.

Initials:

___ President ___Vice President ___Secretary ___Treasurer ___Chairperson

ARTICLE XIII

FISCAL YEAR

SECTION 1. FISCAL YEAR OF THE CORPORATION

The fiscal year of the corporation shall begin on the first day of January and end on the thirty first day of December in each year.

Initials:

___ President ___Vice President ___Secretary ___Treasurer ___Chairperson

ARTICLE VIIII

AMENDMENT OF BYLAWS

SECTION 1. AMENDMENT

(a) *Amendment.* Subject to any provision of law applicable to the amendment of Bylaws of public benefit nonprofit corporations, these Bylaws, or any of them, may be altered, amended, or repealed and new Bylaws adopted as follows; (i) Subject to the power of members, if any, to change or repeal these Bylaws under Section 5150 of the Corporations Code, by approval of the Board of Directors unless the Bylaw amendment would materially and adversely affect the rights of members, if any, as to voting or transfer, provided, however, if this corporation has admitted any members, then a Bylaw specifying or changing the fixed number of directors of the corporation, the maximum or minimum number of directors, or changing from a fixed to variable board or vice versa, may not be adopted, amended, or repealed (ii) By approval of the majority of members, if any, of this corporation.

(b) *Certain Amendment.* Notwithstanding the above sections of this Article, this corporation shall not amend its Articles of Incorporation to alter any statement which appears in the original Articles of Incorporation of the names and addresses of the first directors of this corporation, nor the name and address of its initial agent, except to correct an error in such statement or to delete such statement after the corporation has filed a "Statement by a Domestic Non-Profit Corporation" pursuant to Section 6210 of the California Nonprofit Corporation Law.

ARTICLE X

PROHIBITION AGAINST SHARING CORPORATE PROFITS AND ASSETS

SECTION 1. PROHIBITION AGAINST SHARING CORPORATE PROFITS AND ASSETS

No member, director, officer, employee, or other person connected with this corporation, or any private individual, shall receive at any time any of the net earnings or pecuniary profit from the operations of the corporation, provided, however, that this provision shall not prevent payment to any such person of reasonable compensation for services performed for the corporation in effecting any of its public or charitable purposes, provided that such compensation is otherwise permitted by these Bylaws and is fixed by resolution of the Board of Directors; and no such person or persons shall be entitled to share in the distribution of, and shall not receive, any of the corporate assets on dissolution of the corporation. All members, if any, of the corporation shall be deemed to have expressly consented and agreed that on such dissolution or winding up of the affairs of the corporation, whether voluntarily or involuntarily, the assets of the corporation, after all debts have been satisfied, shall be distributed as required by the Articles of Incorporation of this corporation and not otherwise.

Dear Applicant:

We're pleased to tell you we determined you're exempt from federal income tax under Internal Revenue Code (IRC) Section 501(c)(3). Donors can deduct contributions they make to you under IRC Section 170. You're also qualified to receive tax deductible bequests, devises, transfers or gifts under Section 2055, 2106, or 2522. This letter could help resolve questions on your exempt status. Please keep it for your records.

Organizations exempt under IRC Section 501(c)(3) are further classified as either public charities or private foundations. We determined you're a public charity under the IRC Section listed at the top of this letter.

If we indicated at the top of this letter that you're required to file Form 990/990-EZ/990-N, our records show you're required to file an annual information return (Form 990 or Form 990-EZ) or electronic notice (Form 990-N, the e-Postcard). If you don't file a required return or notice for three consecutive years, your exempt status will be automatically revoked.

If we indicated at the top of this letter that an addendum applies, the enclosed addendum is an integral part of this letter.

For important information about your responsibilities as a tax-exempt organization, go to www.irs.gov/charities. Enter "4221-PC" in the search bar to view Publication 4221-PC, Compliance Guide for 501(c)(3) Public Charities, which describes your recordkeeping, reporting, and disclosure requirements.

Sincerely,

Stephen A. Martin

City Of Rancho Cordova
Attn: Community Enhancement & Investment Fund Division
2729 Prospect Park Drive
Rancho Cordova, CA 95670

Dear Committee Members,

As the Art Director at the Mills Station Arts & Culture Center (MACC), I am personally happy to provide this support letter for Rancho Cordova Rise Up Theatre Company.

As the grant committee is well aware, the MACC serves the community by providing high-quality exhibits focusing on history, diverse cultures and promotes local artists. By having cultural entertainment centers we enhance the quality of life in the community and , provide the arts as a positive outlet for self-discovery and promote community pride here in Rancho Cordova. Since the start of covid we have expanded programing with the use of the upstairs gallery to spotlight local artists, and still maintain our lectures, movies and other events to increase attendance at the MACC.

Rancho Cordova Rise Up Theatre Company's use of the MACC upstairs as a site for theatrical productions and fundraising events directly supports our goals. By working with Rise Up Theatre, we reaching out and connecting more of the community both to the exhibits and to the theater performances.

Since January of this year, RCRUT has produced the comedy, "The Do-gooder Debacle" and a reader's theatre fundraising event "A Radio Play". Both productions had nearly full houses and brought audiences that might not otherwise have come to the MACC. Moreover, since these events occurred at night, when the MACC is not open to the public, and RCRUT provided all production funds for these performances, their partnership with the MACC was a great return on our investment. I can not speak highly enough about Rise Up Theatre group with their desire and care of the MACC, always leaving it just as they found it.

Three events are currently scheduled for the next four months. RCRUT will be presenting the fundraising event "Photos with the Easter Bunny". The fundraiser will be over six days and will bring a large number of families to the MACC. RCRUT will also present a full comedic play over three weekends in May, followed by a full-scale Broadway musical. This musical will be partnered with the Rancho Cordova River City Concert Band thereby meeting another of the MACC goals, bringing together non-profits in Rancho Cordova. As with past events and performances the photos and musical will be scheduled subject to MACC availability and no MACC funds will be expended. A real "Win Win Situation".

We look forward to a long partnership with Rancho Cordova Rise Up Theatre Company and believe this worthwhile organization is a perfect beneficiary for Rancho Cordova Community Enhancement & Investment Fund Grant funding.

Warm Regards,

Cheryl Gleason
Art Director / Curator
Mills Station Arts & Culture Center

Project Information

Project Name

Mills Middle School Drumline

Project Synopsis

Drumline intends to teach students how to become active members in a working and performing Percussion Ensemble. This course intends to attract those students who are less apt to sign-up for traditional Band/Orchestra courses, while continuing to offer the same fundamental musical training that motivates and inspires positive creativity. This creativity will be used to instill school and community pride in local parades and our sporting events.

Project Description

Drumline students learn to become active members in a working and performing arts percussion ensemble. All students will learn to play and will be expected to demonstrate competency on battery percussion (snare/bass/tenor-drums), and orchestral percussion (marimba/xylophone/bells/timpani etc.). Grades are based on participation, attendance, practice, and rehearsal technique. Drumline performs at concerts, assemblies, school rallies and sporting events throughout the school year. Our sporting events attract members of the Rancho Cordova Community who will hear, see, and experience the community pride represented by our Mills Performance drumline. Drumline shows are cross-curricular in that they incorporate dance and movement, theatrical performance, and artistic set-design to create a narrative or explore a theme. Such productions are a reflection of the opportunities to celebrate and exchange ideas and interests unique to community culture, demonstrating Positive Personal and Cultural Awareness. Drumline will aid in creating repertoire for school and community building such as pep-rallies and athletic events, which promotes Social Responsibility.

Project Team

Drumline Team (Music Director: Jimmie Adams), Administrator (Dana Carrigan), Clerk (Robin Dowty)

Project Goals

1. To create an award winning performance drumline 2. Performs at school rallies, assemblies and athletic events 3. Perform at local community events, parades, and special events

Funding Request

Application #11

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$15,000

Estimated Breakdown of Project Expenditures

Battery Percussion/Drum Cost Breakdown Snare Drums (Battery Percussion-$6,500) *10-13” High Tension Marching Snare Drums *10-Marching Snare Drum Carriers Bass Drums (Battery Percussion-$5,000) *1-16” Marching Bass Drum/Carrier *1-18” Marching Bass Drum/Carrier *1-20” Marching Bass Drum/Carrier *1- 22” Marching Bass Drum/Carrier *1-24” Marching Bass Drum/Carrier Tenor Drums (Battery Percussion-$3,000) *2- Sets of Tenor drums *2- Tenor drum carriers Mallets/Sticks-($500) *30 pair- Ralph Hardiman marching sticks *5 pair-Bass drum mallets *5 pair-mallets *2 pair-Tenor drum mallets *10 practice pads

Matching Funds

N/A

Include Any Other Funding Contributions

$1,000 (Fundraising and Title I)

Ongoing Operations and Maintenance Costs (if applicable)

Annual budget to operate program-$1,500.00 -Replacement Drum heads -Percussion Mallets/Sticks - Replacement parts

Total Community Enhancement & Investment Funds Requested

$19,500.00 (over three years; initial $15,000 start up and 3 annual installments of $1,500 for maintenance/repair costs.

Is this a multi-year request?

Yes

Number of Years

4

If you answered yes above, describe your sustainability plan and whether the project is viable as a single year request.

It will take two years to build the drumline into a performance ready unit that will be able to perform at community events etc. This jumpstart request will allow us time to build to the point where we are self sufficient and able to raise our annual maintenance and repair budget through community events and annual concerts.

How many years have you received funding for this project?

0

When will your request for funding sunset for ongoing programs?

5 years

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

Local community support

Project Schedule, Timeliness and Adaptability

Project Schedule

Drumline is on-going every school year and follows the Folsom Cordova school calendar. Beginning in August 2022 through May 2023. Subsequent years will be August 2023--May 2024, August 2024--May 2025, etc.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

Our initial purchase will be of the necessary equipment to run this project, which is a one-time purchase. This includes Battery Percussion Instruments, Mallets, sticks, etc. The project will run during the school year, with the first year ending in May of 2023.

Application #11

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Yes, Mills drumline will be able to adjust our program for the 2022-2023 school year should closure be necessary. Instruction can continue online and practice/rehearsals can be conducted outdoors on-site, adhering to all California Public Health and/or Sacramento County Health orders/protocol.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

10439 Coloma Road
Rancho Cordova, CA 95670

Other Physical Addresses (if project/program is at multiple sites)

N/A

Have you received a letter of support for the project/program from the property owner?

No

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Mills Middle School Drumline Supplemental Endorsement form (2).pdf

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

Yes, at a public K-12 school site

Which school district is the public K-12 school site located in?

Folsom Cordova Unified

TO: Measure H Grant Selection Committee
FROM: Kevin Sims
RE: Mills Middle School Music Program Grant Application
DATE: March 2, 2022

The Mills Middle School administration have historically supported its music program. Principal Carrigan's vision of a drumline class to me is a great idea! I know that the Mills and Cordova High School's band programs will benefit from FCUSD's only drumline class. And they have the right person to pull it off!

Jimmie Adams has made quite an impression in his short time as the music teacher at Mills Middle School. His excitement and energy is infectious! When we worked together earlier this year and I was able to witness how well his students respond to his instruction. His personality has had a positive impact in his groups. I see how respectful they are of him. His expertise as a percussionist and educator is on full display in his development of the new 2022-23 middle school drumline curriculum.

Percussionist require separate instruction unique to the instrument. Those techniques are usually only taught when the music requires it. We have a separate percussion instructor that only works with our section during the fall and winter seasons. What gets me excited is that Mr. Adams will focus those teachings in one class, but he needs more than the support of his administration. That's where Measure H can come through for the kids.

At Cordova High, we have an award-winning music program that has suffered greatly during the COVID school years of 2019-21. Retention has been challenging due partly to the "new normal" of not having activities outside of the school day, so it looks less appealing to our students. Our drumline is a big part of our program, from: field shows and parades in the fall, to winter percussion ensemble. (Winter percussion is a group that performs a "field-show type" of choreographed routine in a gym.) The Mills drumline class could help us as we rebuild our band program, which will take years.

I ask that the City of Rancho Cordova to join me in supporting and investing in the Mills Middle School Music Program's grant request. Your approval will make a positive impact on our music program and the next generation of band members.

Respectfully,

Kevin Sims
Instrumental Music Director

Application #11

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR SCHOOL SITE USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a public K-12 school site, you must request the endorsement of the school superintendent of that school district.

One supplemental form is required per school district.

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by the corresponding school superintendent for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. Each participating school superintendent reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

To be filled out by grant applicant

Project/Program Name: Mills Middle School Drumline

Name of Organization: Mills Middle School (Folsom Cordova Unified School District)

Name of Applicant and Title: Jimmie Adams (Mills Middle School Music Director)

Applicant's Phone: 916-294-9045 ext. 710201 **Applicant's Email:** jadams@fcusd.org

Submit a copy of your application with this page to the school superintendent(s). For your application packet to be considered complete the signed and dated endorsement form must be received by the City of Rancho Cordova by March 18, 2022. The superintendent will submit the form directly to the City's Community Enhancement & Investment Fund team. You must submit this form and a copy of your application to the appropriate superintendent or his or her designee no later than March 4, 2022. For Elk Grove Unified School District use BGrewal@egusd.net. For Folsom Cordova Unified School District use agriffin@fcusd.org. For Sacramento City Unified School District use dianne-brown@scusd.edu.

To be filled out by School Superintendent or designee

Endorsement Given Yes

Project Information

Project Name

"XOXO: An Exhibit About Love & Forgiveness" - A New Interactive Exhibit About Emotions at Sacramento Children's Museum

Project Synopsis

Sacramento Children's Museum requests $46,450 for a new exhibit called "XOXO: An Exhibit About Love & Forgiveness," to debut in Fall 2022. This exhibit will help children explore their feelings and learn how we emotionally connect with others. Funding also will provide free admission to Rancho Cordova families on Sundays.

Project Description

Sacramento Children's Museum (SCM) is requesting $46,450 in funding support to bring a new exhibit to our Museum called "XOXO: An Exhibit About Love & Forgiveness" in Fall 2022. Originally developed by Children's Museum of Pittsburgh, this exhibit encourages children to play, act silly, and consider what makes them sad, mad, and happy through interactive experiences. Families can also explore how we learn about love and forgiveness together through simple activities that get us to feel and talk about these emotions. For example, in this exhibit, visitors can hold hands with someone to illuminate a hidden message about love; build and explore a variety of facial expressions using Empathy Blocks; and draw what makes them angry or sad and crank it through a paper shredder and turn it into art. This 1,500-square-foot exhibit will be located in our newly renovated expansion space and will be available to all Museum visitors from September 17, 2022 to December 31, 2022. In addition, support from the Rancho Cordova Community Enhancement & Investment Fund will allow SCM to offer free Museum admission for Rancho Cordova residents on Sundays for the duration of the exhibit. This exhibit benefits the community in many ways. First, this exhibit helps foster children's healthy social and emotional development – a goal that aligns with the City's dedication to supporting the growth and development of children and youth. The XOXO Exhibit provides a safe place for children to learn how to recognize and express the range of feelings they have and to share these feelings. Second, because this exhibit will only be at the Museum for a limited time, we expect it to attract more families and school groups – bringing more visitors to the Museum and to the City of Rancho Cordova. Lastly, about 1,500 children and adults from Rancho Cordova will be able to visit the Museum for free during this three-month time frame.

Project Team

The Children's Museum of Pittsburgh is the original exhibit developer. The following SCM staff will be responsible for overseeing the installation and presentation of the exhibit: Sharon Stone Smith - SCM Executive Director; Meghan Toland - SCM Deputy Director; Rachelle Ahmad - SCM Education Manager; and Mia Wilson - SCM Facilities Maintainer.

Project Goals

Through the "XOXO: An Exhibit About Love & Forgiveness" Exhibit, SCM aims to achieve the following goals: 1) Help foster children's emotion awareness skills; 2) Empower parents, teachers, and other caregivers with tools to support children's healthy social and emotional development; and 3) Increase Museum attendance by 15 percent. We will measure the success of the exhibit in meeting these goals through feedback from visiting families, questionnaires sent to teachers of school field trip groups, and attendance data.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$54,200

Estimated Breakdown of Project Expenditures

$16,000 - Exhibit rental fee; $5,000 - Travel and set-up expenses; $4,000 - Marketing costs; $12,750 - Complimentary Sunday admission for Rancho Cordova residents (estimated at 100 tickets per week); $1,750 - Lost revenue due to reduced earnings from Museums for All tickets (estimated 18 low-income discounted tickets per week); $9,700 - Additional floor staffing/security per rental agreement; $5,000 - Administrative fee for staff coordination in set-up, producing programs, maintenance, and tear down.

Matching Funds

N/A

Include Any Other Funding Contributions

SCM will contribute the $6,000 deposit and discounted access to low-income families using Museums for All Program.

Ongoing Operations and Maintenance Costs (if applicable)

N/A

Total Community Enhancement & Investment Funds Requested

$46,450

Is this a multi-year request?

No

How many years have you received funding for this project?

0

When will your request for funding sunset for ongoing programs?

June 30, 2023

Do you plan to ask annually for funding?

No

What other funding will you seek to support your project?

SCM has received a 50% discount off the exhibit from Children's Museum of Pittsburgh due to our sharing the exhibit with San Francisco-based Children's Creativity Museum.

Project Schedule, Timeliness and Adaptability

Project Schedule

Exhibit delivery date to SCM: September 10, 2022. Installation dates: September 10-17, 2022. Grand opening date: September 17, 2022. Exhibit end date: December 31, 2022.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

SCM has a fixed rental period for this exhibit. The exhibit dates are scheduled for September 17, 2022 to December 31, 2022.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

SCM will be able to create videos and at-home kits that would coordinate with the exhibit if the Museum was forced to close due to California Health and/or Sacramento County Health Orders. This traveling exhibit will be located in a separate space from the regular operations of the Museum, allowing us to easily control capacity reductions.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

2701 Prospect Park Dr
Rancho Cordova, CA 95670

Other Physical Addresses (if project/program is at multiple sites)

Have you received a letter of support for the project/program from the property owner?

Yes (includes if you are the property owner)

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

No

OWNER

EXHIBIT

XOXO: An Exhibit About Love and Forgiveness for SAC Kids

Application #12

VENUE

SCALE $\frac{1}{8}$" = 1'-0"

DATE 11-29-2021

Application #12

YOU ARE ABOUT TO ENTER AN EXHIBIT ABOUT FEELINGS

This will be fun and sometimes, scary.

You will play, act silly, and consider what makes you sad, mad and happy, think about love and think about forgiveness.

You'll also ask questions, listen, and learn more about the people with you. You might reveal a secret or discover a forgotten memory. You will definitely share, connect, converse, think and feel.

So take a deep breath, and explore these powerful feelings and the effects they have on yourself and others.

Go on. Take a risk. Be brave.

Application #12

“EVERYONE LONGS TO BE LOVED. AND THE GREATEST THING WE CAN DO IS LET PEOPLE KNOW THAT THEY ARE LOVED AND CAPABLE OF LOVING.”

-Fred Rogers

Application #12

HOLDING HANDS

Some things are impossible to do alone. Hold hands and touch the sensors to complete the circuit and reveal the message. Holding hands is a universal demonstration of friendship, trust and compassion.

Application #12

RESPONSE WALLS

Writing is an important way to express your emotions. Answer questions about love and forgiveness, and then tie them to a wall for others to read. The result is a constantly changing collection of tags that form an emotional narrative of thoughts and feelings.

EMPATHY BLOCKS

Create unique faces and build a variety of expressions by combining a variety of diverse eyes, noses and mouths in multiple configurations. The facial features are printed directly onto hand-made wooden blocks, adding to the personal experience of looking carefully at another person's face.

STORY PUZZLE

Words and symbols are used to tell stories, make connections and stimulate conversation. The two puzzle shapes fit together to form paths, shapes and patterns, while also expressing key themes of love and forgiveness. A large tabletop allows several groups to work at the same time, letting them create their own unique puzzles, or perhaps join with another to form one big shared story.

BALANCE

Sit on the teeter totter and work together to balance a ball encased in a long, clear tube. Balance is achieved when the ball is centralized. This unique interpretation of a classic playground experience requires teamwork, communication and cooperation as both participants much work in tandem to succeed.

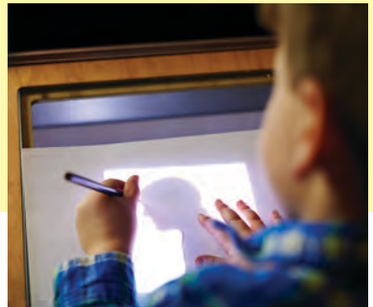
EMBRACE

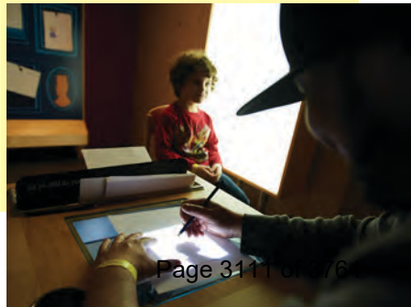
When embraced or hugged, each egg shaped sculpture responds with its own positive sound – ahhh, mmmm, chirping, cooing or laughing.

Application #12

RELEASE THE NEGATIVE

Write or draw something that makes them angry, sad or afraid on a piece of paper. Then, place it into a slot and turn the crank to manually shred the paper. Shredding the paper helps to release the negative thoughts or feelings and turns the negative into something positive – a colorful display wall of patterns, created using clear jars filled with the shredded paper.





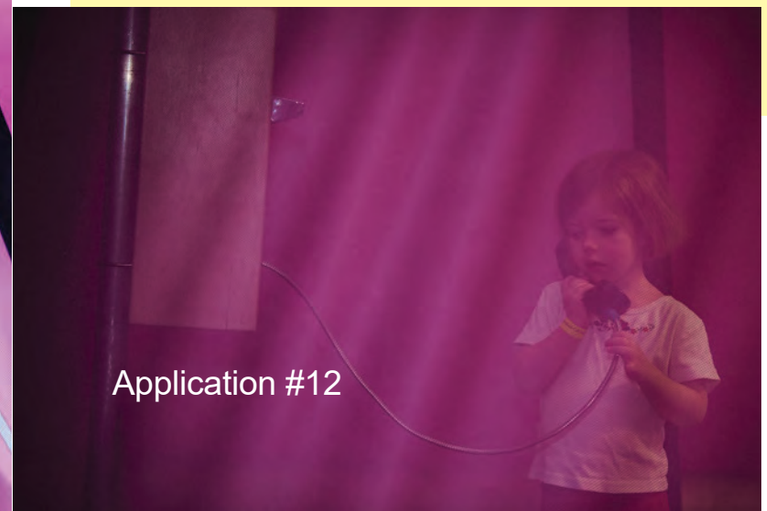
Application #12

SILHOUETTES

Trace a friend's profile, also known as a silhouette, onto a sheet of paper. Or sit still as you have your silhouette drawn. Tracing requires concentration and careful attention to the person sitting for the portrait. Once drawn, silhouettes can be displayed and compared – allowing participants to note the similarities and differences in each other. A unique set up of light boxes make the process accessible to all ages and abilities.

TONE PHONES

What you say is important, but how you say it is just as important. Speak into the telephone handset and watch as your voice changes the shapes on projected on the screen. How is a loud, angry tone different from a soft, kind tone? Tone of voice conveys emotions that impact how our words are heard and understood.



PHONE BOOTHS

The sound of someone's voice conveys feelings and emotions that a text message can't. Talk to someone you know or meet a new friends using custom designed telephones housed in round tent-like booths, which provide a comfortable setting to have a private conversation.

REFLECTION TABLE

Manipulate colorful granulated material across an internally lit sculpted landscape – covering and uncovering the surface of the table. As certain areas are uncovered, soothing music is played. Once covered, the music fades away and other areas and sounds are discovered in the table.

ART MAKING STATION

The act of making and giving is a way to express love, admiration, and caring. Die cut and personalize a special box or envelope, use your silhouette drawing to create a card or silkscreen print, make a necklace using their token, or write letters to loved ones. Rotating activities will allow for new experiences and programming throughout the course of the exhibit.

Application #12

ENVIRONMENT

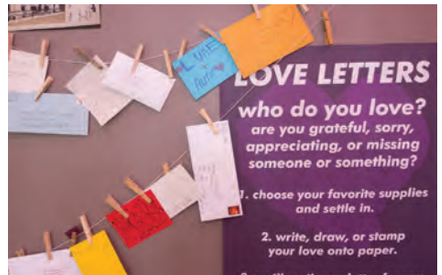
XOXO is a flexible space that uses color and materials to create an inviting setting to explore the themes of the exhibit. The exhibit is organized around two sets of tensile fabric pavilions, allowing for both separation of activities and good visibility throughout the space. Flexible seating can be arranged to accommodate multiple purposes, such as special programmed performances, tot yoga and story time.

All furnishing are built of solid wood. A portable floor is also provided to complete the exhibit space. The graphics package includes a set of double-sided, wood sign holders, graphic files for entry and accent scenic graphics, and a paint color guide.

The design team will assist with planning, including gallery layout and art direction.

Another organizing element for the exhibit is a set of mirrored easels. Each easel has a carefully selected inspirational quote about either love or forgiveness. This theme of looking at oneself and those we love closely is carried throughout the exhibit. Another set of easels are matched with specific components to complement the narrative of the experience.

TAKE A PICTURE



Use frames and words to record a memory of your visit, start a conversation or follow up on ideas experienced in the exhibit. Provided words and phrases, include “I love you” and “I’m sorry”, can help people express feelings that may be hard in other situations. This is an optional addition for host venues. Use your own cameras and phones, or plan a formal program around this interactive experience.

STORY TIME

Slow down and relax with songs, stretches, and stories brought to life by educators and guest performers by participating in Story Time. A special collection of books and music is provided to support and enhance the content of XOXO. The reading area can be used for additional programs provided by host venues.

LOVE LETTERS

Where will you send a message of love, gratitude, forgiveness, understanding, humor, curiosity, or joy?

Using traditional hand letter writing materials including postcards, stamps, and even a manual typewriter, craft a message or image to someone or something you love.

This program was developed by artist Dalia Shevin to explore the magic of snail mail, the wonders of writing by hand, and the delight of discovering how much love our words can hold.

This experience is an optional addition for host venues.

PUBLIC PROGRAMMING

Programming is a great way to energize and deepen exhibit experiences, cultivate new audiences, and build valuable partnerships. For the exhibit, each host museum will be able to modify public programming suggestions to fit their community.

THEATRICAL PERFORMANCE

THE GIFT tells the story of a heartwarming couple, one dollar and eighty-seven cents, and the very first wedding anniversary of young performers. Based loosely on O. Henry's classic tale The Gift of the Magi, THE GIFT uses physical theatre, masks, participatory theatre, and circus to explore the role of gift giving in expressing and creating love. An original theatrical performance conceived and crafted to bring XOXO: An Exhibit About Love & Forgiveness to life can be adapted or performed at your museum.

MUSICIANS & PERFORMERS

Children's Museum of Pittsburgh works with educational musicians and performers, whose workshops and songs can be customized to relate to themes related to love and forgiveness. Various styles of songwriting and personal experiences in an educational and heartfelt program are easily customizable for a wide range of audiences.

AUDIO CARDS

Museum partner, Saturday Light Brigade, helps kids record an interview, greeting, or song onto a CD that can be decorated and affixed to a special card and given to a loved one. This program has been done for Mother's Day and Father's Day. Hosting museums can reach out to their local radio station and see if a similar program could be offered to their visitors.

YOGA

This program encourages participants to take a break and learn some yoga poses with their toddler, including stretching, breathing and meditating exercises. By introducing our youngest visitors to the practice of Yoga, we are imparting a method for managing stress and achieving personal awareness that they can carry with them into adulthood.

AND MORE!

Children's Museum of Pittsburgh continues to develop more one-of-a-kind programs that will be available for host museums to adapt and execute with local professionals.

Project Information

Project Name

Symphony d'Oro Rancho Cordova, Community Enhancement & Investment Project - Season 2022-23

Project Synopsis

This project will provide funding to the Symphony d'Oro Rancho Cordova to be expended for music, performance venue rental, recording fees, guest performing artist/composer fees and related expenses to continue and expand world class orchestral music offerings in traditional and non-traditional venues in the City of Rancho Cordova. The Symphony takes pride in sponsoring young local talented performers and composers who bring original compositions to the community in concerts.

Project Description

The Symphony d'Oro is a versatile orchestral ensemble which has entertained audiences in Rancho Cordova, the Sacramento region, and worldwide, with concerts and productions featuring all types and styles of music including: classical; jazz; pop; cinematic; Broadway; patriotic; modern; cabaret style and even a drag show. We perform any kind of good music – and good music is everywhere. Our project continues this Rancho Cordova tradition with a season oof free concerts by the full orchestra and supporting performances at Rancho /Cordova events by our small ensembles.

Project Team

The Symphony d'Oro Rancho Cordova (formerly the Rancho Cordova Civic Light Orchestra, incorporated in July 2013) is a 501(c)(3) tax exempt, amateur orchestra serving the citizens of Rancho Cordova. It is an informal-audition, developmental orchestra with a mission to entertain and educate Rancho Cordova community audiences by providing high quality, free musical performances. Individually, the implementing team will be led by Pete Nowlen, Conductor; Lorraine Crozier, President (and point of contact); and the Board of Directors of the Symphony d'Oro Rancho Cordova. Members of the ensemble, consisting of 50+ musicians, will jointly implement the project.The Symphony d'Oro will manage financial transactions in support of this grant, provide oversight for the expenditure of funds and be responsible for reporting requirements of the grant.

Project Goals

Goal #1 Open the world of high-quality, high variety, orchestral music to Rancho Cordova citizens and visitors; Goal #2 Further the Rancho Cordova Arts goal of making the city an arts destination; Goal #3 Engage the community and enhance community pride Goal #4 Improve the image of Rancho Cordova and continue to reach an expanded audience This project meets several criteria set forth

for Community Enhancement grants: • Civic Engagement: Bring classical musical arts to families within the city free of charge either online or in approachable locations within the city. Free concerts allow families with children to attend concerts without undue cost. We plan to continue some online performance outreach each season as it serves those who are unable or unwilling to attend live events in person. We expect that there may be some concerns in older or health challenged persons going forward and an online presence serves these citizens. • Community Pride: A symphony orchestra provides a focus for, and support of, community gatherings and is a source of pride and accomplishment for Rancho Cordova. • Quality of Life: Provide family arts experiences not otherwise available to the families of Rancho Cordova, uplifting all. • Arts and Culture: This is an arts outreach project aimed at Rancho Cordova families and businesses, and social groups, and volunteer organizations. • Children and Youth: Educating and inspiring children with musical arts experiences within their community. • Education: The Symphony's "down to earth" presentation style and variety of performances demystifies classical music and allows for enjoyment by everyone. Music speaks to everyone and doesn't require formal training to be enjoyed. Additional information including measuring metrics is included in the attachment to this application.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$56,000 projected total costs for the season. $26,000 grant request

Estimated Breakdown of Project Expenditures

Grant funding request expenses: Storage rental charges $3,600; Equipment Transportation/Rental, or rehearsal technical support $2,500; Online, Social Media Development and Advertising $1,000; Funding for guest artists and composers $6,500; Concert Venue and rehearsal space fees $8,000; Music Purchases and Rental $2,000; Ensemble Video Recording $2,400 Expenditures paid by other sources: Payroll $18,000; Insurance $6000; Accounting $1000; Musician Fees $3000; $1000 advertising; Miscellaneous $1000 See attachment to this application for a detailed explanation of the need for the funding request.

Matching Funds

In-kind contributions Orchestra members contribute a conservatively-estimated 5,100 hours annually to bring music to the City of Rancho Cordova. They volunteer their time in private practice, rehearsals, performances (including setting up, taking down, and transporting equipment, often in their own vehicles), board meetings, and interfacing with venue owners, the press, and city government. They serve as a member of the Cordova Community Council Board of Directors, and additionally on its Arts Advisory Board. In addition to full-orchestra concerts, they perform in numerous small ensembles at Rancho Cordova Artist Receptions, Rancho Cordova Chamber of Commerce luncheons and they are looking forward to a return to the holiday offering at the MACC supporting the visual artists in Rancho Cordova. Despite the mandatory health restrictions imposed this year, our musicians showed up for rehearsal and recorded numerous pieces of music, including those with guest artists, for our YouTube concerts. Symphony Board Directors continued regular (and special) meetings continuing to plan and implement a season of music and entertainment for the community. The Independent Sector of the "Do Good Institute" valued a volunteer service hour at $28.54 on April 20, 2021. Based on that value, the volunteer contribution of the Symphony d'Oro Rancho Cordova is $145,554.00. Each Symphony musician contributes $100 in dues per year, with exceptions for full-time students.

Include Any Other Funding Contributions

The Symphony is sponsored by the Cordova Council Community Foundation in the amount of $10,000 this year; Big Day of Giving estimate $5000; Online donations and dues $3000; Fundraising Concert est. net $6000 - this number is speculative.

Ongoing Operations and Maintenance Costs (if applicable)

N/A

Total Community Enhancement & Investment Funds Requested

$26,000

Is this a multi-year request?

No

How many years have you received funding for this project?

7

When will your request for funding sunset for ongoing programs?

Application #13

The Symphony's mission is to provide high quality, free concerts to the citizens of Rancho Cordova and its visitors. Since we do not charge for our concerts we anticipate applying for funding annually.The Symphony is committed to performing free concerts and providing high quality musical access to all members of the community, but particularly to our families. It is financially difficult for a family with three to four children to bring them to a musical event. The need for rehearsal and performance venue fees, transportation and technical recording expertise, as well as funding for guest artists and commissioned music is not something which the Symphony can afford to provide on its own without charging for attendance at events. Thus, we do expect to make an appropriate request in the following grant period.

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

Funding sources are listed above and are anticipated in these amounts.

Project Schedule, Timeliness and Adaptability

Project Schedule

All acquisitions and performances covered under this application would take place between July 1, 2022 and June 30, 2023.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

The Symphony's annual seasons dovetails the grant funding period. We begin our season each year with a fall concert; a holiday concert in December; an early spring concert and a late frying concert. Thus, all funds for performance venues, artists and composers (which are the largest expenditures) and expended during the grant period. This season we anticipate the following concerts:Our programming for the 2022-23 season is stellar and is projected to include: a performance to a silent comedy movie and cartoons in a concert called “Hurray for Hollywood”, a live concert featuring pianist Carlos McMillan-Fuentes, and compositions by largely unrecognized female composers. We will offer a free holiday concert at the Performing Arts Theater featuring vocalists performing parts of “Hansel and Gretel”.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Yes!T he 2021-22 season has been highly successful despite the uncertainty of knowing when live performances could resume. We are truly looking forward to our first live performance in nearly two years on April 9, 2022, and then finishing off our season with a stellar offering “Beethoven and Beatles”, a concert devoted entirely to the two biggest rock stars in the music world. However prior to this we recorded two concerts which we broadcast on the Symphony's YouTube channel - "Mozart Madness" and "Winter Rhapsody". Both featured our composer in residence Carlos McMillan-Fuentes at the piano with the Symphony. Winter Rhapsody featured a fantastic original composition by Mr. Fuentes which was orchestrated especially for the symphony and was a world premiere performance. Funds which we have requested in the categories of performance venue rental will be repurposed if needed to record and broadcast concerts to the public . The recorded concerts have been highly successful and each has garnered nearly 1000 views won YouTube. They have also played to a world wide audience!

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

9792 Business Park Drive
Sacramento, CA 95827

Other Physical Addresses (if project/program is at multiple sites)

The Symphony has a signed lease with the Mandarins for rehearsal space. This lease is a two year lease and is currently paid for by another Community Enhancement and Investment Grant which is administered by the Cordova Community Council on behalf of the Symphony and the River City Concert Band. Otherwise we don't have a physical address or office. A copy of the lease is available upon request.

Have you received a letter of support for the project/program from the property owner?

No

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

No

SYMPHONY d'ORO
rancho cordova

DISTINGUISHED 2019 Volunteer SERVICE ORGANIZATION ★ AWARD ★ RANCHO CORDOVA

Symphony d'Oro Rancho Cordova, Community Enhancement & Investment Project – Season 2022-2023

Project Description

This project will provide funding to the Symphony d'Oro Rancho Cordova to be expended for music, performance venue rental, recording fees, guest performing artist/composer fees and related expenses to continue and expand orchestral music offerings in traditional and non-traditional venues in the City of Rancho Cordova. The Symphony d'Oro is a versatile orchestral ensemble which has entertained audiences in Rancho Cordova, the Sacramento region, and worldwide, with concerts and productions featuring all types and styles of music including: classical; jazz; pop; cinematic; Broadway; patriotic; modern; cabaret style and even a drag show. We perform any kind of good music – and good music is everywhere.

In the spirit of bringing live music to unusual places to engage the public, the Symphony has frequently performed in the "public square" of the Koreana Plaza Food Court, and is finally able to resume live performances in this venue in 2022-2023. Additionally, the Symphony's numerous small ensembles have performed at art galleries, City Hall, museums, churches, and civic buildings in Rancho Cordova and the greater Sacramento Metropolitan area.

Despite the pandemic induced difficulties of the 2021-22 season, the Symphony continues to perform and achieve high levels of support from, and integration with, the community of Rancho Cordova. As noted in previous applications, this support is remarkable. The Symphony has enjoyed an outstanding level of support for its first two recorded concerts this season. Our composer in residence, Carlos McMillen-Fuentes, performed spectacular solos with the ensemble in the Mozart concert and also composed an original piece for solo piano and orchestra "A Winter Rhapsody" which was also recorded and streamed on YouTube for the Christmas holiday. Each of these concerts has nearly 1000 views on YouTube, which is a terrific result.

Rancho Cordova continues to be justifiably proud of its support for the arts and its musical performing organizations, including the Symphony d'Oro. Musicians outside of Rancho Cordova are impressed with the support Rancho Cordova provides to the Symphony. The Symphony is confident that its partnership with Rancho Cordova will continue for many years to come.

Application #13

This request seeks to maintain and improve the quality and frequency of music performed, by providing the means to perform high quality performances in community venues such as the performing arts theater at Cordova High School, Rancho Cordova City Hall, and Koreana Plaza. Each venue has unique cost requirements for rents, transport and/or rental of performance equipment, and insurance. Similarly, each venue serves a different type of audience and supports different varieties and styles of music. This allows the symphony to continue to provide and educate the community with an unlimited variety of music, and bring in superior local musicians to perform with, and compose for, the orchestra. Alternatively, funds from this grant will provide the means to record and broadcast concerts if live performances are not feasible due to health restrictions.

The Symphony carries out its mission with a high level of support from, and integration with the Cordova Community Council Foundation.

Project Team

The Symphony d'Oro Rancho Cordova (formerly the Rancho Cordova Civic Light Orchestra, incorporated in July 2013) is a 501(c)(3) tax exempt, amateur orchestra serving the citizens of Rancho Cordova. It is an informal-audition, developmental orchestra with a mission to entertain and educate Rancho Cordova community audiences by providing high quality, free musical performances. The Symphony has performed for audiences that collectively total in the thousands of residents, and will continue to seek innovative ways to bring music to the community. The 2021-22 season has been highly successful despite the uncertainty of knowing when live performances could resume. We are truly looking forward to our first live performance in nearly two years on April 9, 2022, and then finishing off our season with a stellar offering "Beethoven and Beatles", a concert devoted entirely to the two biggest rock stars in the music world.

Individually, the implementing team will be led by Pete Nowlen, Conductor; Lorraine Crozier, President (and point of contact); and the Board of Directors of the Symphony d'Oro Rancho Cordova. Members of the ensemble, consisting of 50+ musicians, will jointly implement the project.

The Symphony d'Oro will manage financial transactions in support of this grant, provide oversight for the expenditure of funds and be responsible for reporting requirements of the grant.

Project Goals

Goal #1 Open the world of high-quality, high variety, orchestral music to Rancho Cordova citizens and visitors;
Goal #2 Further the Rancho Cordova Arts goal of making the city an arts destination;
Goal #3 Engage the community and enhance community pride
Goal #4 Improve the image of Rancho Cordova and continue to reach an expanded audience

This project meets several criteria set forth for Community Enhancement grants:

- **Civic Engagement:** Bring classical musical arts to families within the city free of charge either online or in approachable locations within the city. Free concerts allow families with children to attend concerts without undue cost. We plan to continue some online performance outreach each season as it serves those who are unable or unwilling to attend

live events in person. We expect that there may be some concerns in older or health challenged persons going forward and an online presence serves these citizens.

- **Community Pride:** A symphony orchestra provides a focus for, and support of, community gatherings and is a source of pride and accomplishment for Rancho Cordova.
- **Quality of Life:** Provide family arts experiences not otherwise available to the families of Rancho Cordova, uplifting all.
- **Arts and Culture:** This is an arts outreach project aimed at Rancho Cordova families and businesses, and social groups, and volunteer organizations.
- **Children and Youth:** Educating and inspiring children with musical arts experiences within their community.
- **Education:** The Symphony's "down to earth" presentation style and variety of performances demystifies classical music and allows for enjoyment by everyone. Music speaks to everyone and doesn't require formal training to be enjoyed.

Prioritization Criteria

- **Leverage:** This project leverages existing event organization expertise of the Cordova Community Council and volunteer contributions by Rancho Cordova Arts where needed and the artistic expertise of the Symphony d'Oro team.
- **Return on Investment:** With proper promotion, the value of positive publicity brought to Rancho Cordova as it positions itself as a place that cares about art could easily exceed costs. The Symphony receives regular recognition from regional print, radio and television media.
- **Capacity:** The project team will be led by the Symphony d'Oro Rancho Cordova which has a proven track record and well documented capacity for delivery of a project of this scope.

Project Metrics

Goal	Metrics
Goal #1 Open the world of high-quality orchestral music to all Rancho Cordova citizens and visitors	Quality musical experiences are presented during a schedule of free concerts by the full orchestra and small ensembles. Online YouTube performances will be substituted when needed due to mandated county health requirements.
Goal #2 Further the Rancho Cordova Arts goal of making the city an arts destination	Rancho Cordova's deliberate actions as a cutting-edge arts community is enhanced and recognized measured by community attendance, feedback and news coverage. Online performances and presentations have continued throughout the pandemic shutdown.

Goal #3 Engage the community and enhance community pride – work in tandem with other volunteer organizations	Rancho Cordova's deliberate actions as a cutting-edge arts community is enhanced and recognized measured by community attendance at symphony performances and by Symphony and small ensemble performances in support of other organizations such as Whisker Warriors; Food Locker; Rancho Cordova Arts; Rancho Cordova Chamber of Commerce.
Goal #4 Improve the image of Rancho Cordova	Amenities such as a community orchestra are well-documented as improving the image of the communities in which they are located

Funding request

Total Measure H funds requested: $26,000

Description/breakdown of proposed expenditures

Storage rental charges	$3,600
Equipment Transportation/Rental, or rehearsal technical support*	$2,500
Online, Social Media Development and Advertising	$1,000
Funding for guest artists and composers	$6,500
Concert Venue and rehearsal space fees**	$8,000
Music Purchases and Rental	$2,000
Ensemble Video Recording	$2,400

Specific Justification for the Request

Storage Rental Charges: We rent climate-controlled storage space on Coloma Road, allowing us to keep all equipment and other assets in one protected environment. As we upgrade our equipment and continue each year to acquire fresh, new music, we believe it is money well spent bringing long-term benefits to the Symphony and community.

***Equipment Transportation and Rental, Technical Support*:** Each of our performance sites have special requirements and provide different amenities. As such transportation of chairs and music stands is often required for performances. One of our most successful and enjoyable performance venues is Koreana Plaza. We have typically performed twice per season at this venue and when we do so we hire a moving crew and rent a vehicle for transporting the heavy equipment, including keyboard, portable organ, chairs and stands for all musicians, percussion cabinet and equipment, timpani and other electronic equipment to the performance site. This is a significant logistical cost. The same cost would apply to performances going forward at City Hall. Without the equipment we cannot perform our concerts and it is important that the equipment be transported, set up and returned to storage in a way which preserves the equipment and our investment. Occasionally, we need to rent specific equipment (typically instrumental such as expensive percussion equipment which we do not own).

*As an alternative – should county health requirements prohibit us from rehearsing live these funds would be repurposed and used to pay a technician to monitor our rehearsals and collect recordings for online distribution.

Funding for Guest Artists and Composers: We have been extremely fortunate in our ability to bring local world class performers (pianists, singers, violinists, a performer on the Native American flute, and a gifted drag queen) to our concerts, providing a rare treat to Rancho Cordova audiences. We have now presented **four** world premiere compositions since our inception. Three of the compositions were created specifically for the Symphony and were composed by local musicians who were raised in the Rancho Cordova community. The funding we seek will allow us to continue bringing these artists to the community. Our programming for the 2022-23 season is stellar and is projected to include: a performance to a silent comedy movie and cartoons in a concert called "Hurray for Hollywood", a live concert featuring pianist Carlos McMillan-Fuentes, and compositions by largely unrecognized female composers. We will offer a free holiday concert at the Performing Arts Theater featuring vocalists performing parts of "Hansel and Gretel".

Concert & Rehearsal Venue Fees**: Rancho Cordova has a limited number of concert-quality facilities, and with the exception of the "public square" Koreana Plaza, and Rancho Cordova's City Hall, there are significant charges to use the performance venue. The state of the art Performing Arts Center is a wonderful place to bring music to the community, but it is expensive -- (the charges average $2,500.00 for performances, including rehearsals) and we plan to perform there four times during the term of this grant. Shows like "Hurray for Hollywood" and "Hansel and Gretel" require a stage and screen for appropriate audience viewing, lighting and the sophisticated sound management which is available only at the theater.

**As an alternative to live performance these monies may be repurposed and used to hire a technician to edit and assemble concerts for online presentation. This would occur in the event county health mandates prohibit live concert gatherings. Should a live concert not be feasible due to health restrictions we will record and broadcast our concerts on the Symphony YouTube channel.

Social Media and Technical Outreach Development and Advertising
An attractive and relevant online presence is essential for any enterprise. We wish to continue in this vein next season by reaching higher numbers of people through Google advertising, emailing, and social media.

Music Rentals and Purchases
A critical component of any performing musical ensemble is acquiring music. Without a library of music, we cannot perform. We continue building our library so that when we are asked to perform, we are ready to go with old favorites and fresh new repertoire. Occasionally, there is a piece we wish to perform but it is not available for purchase and must be rented. This coming season, assuming live concerts at the Performing Arts Theater are allowed, we plan to rent the rights to a silent movie and cartoons and feature the symphony performing music to the films.

Video Recordings
We want to maintain our very popular recording program by video recording at least one concert each season going forward. This allows us to reach a much larger audience and further promote the community of Rancho Cordova. The pandemic taught us that there is more than one way to put on a successful concert. Recorded concerts allow us to reach shut ins, people who struggle with transportation or illness. Additionally, it promotes Rancho Cordova arts programs to a significantly wider audience, enhancing the city's reputation.

In-kind contributions

Orchestra members contribute a conservatively-estimated 5,100 hours annually to bring music to the City of Rancho Cordova. They volunteer their time in private practice, rehearsals, performances (including setting up, taking down, and transporting equipment, often in their own vehicles), board meetings, and interfacing with venue owners, the press, and city government. They serve as a member of the Cordova Community Council Board of Directors, and additionally on its Arts Advisory Board. In addition to full-orchestra concerts, they perform in numerous small ensembles at Rancho Cordova Artist Receptions, Rancho Cordova Chamber of Commerce luncheons and they are looking forward to a return to the holiday offering at the MACC supporting the visual artists in Rancho Cordova. Despite the mandatory health restrictions imposed this year, our musicians showed up for rehearsal and recorded numerous pieces of music, including those with guest artists, for our YouTube concerts. Symphony Board Directors continued regular (and special) meetings continuing to plan and implement a season of music and entertainment for the community.

The Independent Sector of the "Do Good Institute" valued a volunteer service hour at $28,54 on April 20, 2021. Based on that value, the **volunteer contribution of the Symphony d'Oro Rancho Cordova is $145,554.00.**

Each Symphony musician contributes $100 in dues per year, with exceptions for full-time students.

Additional Funding

The Symphony participates in the Sacramento region Big Day of Giving campaign each May, and produces annual creative fundraisers which not only offset expenses but also bring the name of Rancho Cordova to the fore as a center for the Arts in the region.

Unfortunately, the Covid-19 pandemic caused all live performances to be cancelled so the Symphony is in a delicate financial circumstance, as are all arts groups. The basic cost of doing business has increased substantially in the past two years particularly in the area of insurance, and costs of video recording and performance venues.

Prior Grant Funding

Symphony d'Oro has participated in the Measure H grant program since the inception of the program. We are certain that it has helped us to grow rapidly into a well-managed, high-quality, and versatile musical ensemble. The program has allowed us to become integrated into the City of Rancho Cordova in service to the community. Specific numerical information is available upon request.

When Will Request Sunset?

The Symphony is committed to performing free concerts and providing high quality musical access to all members of the community, but particularly to our families. It is financially difficult for a family with three to four children to bring them to a musical event. The need for rehearsal and performance venue fees, transportation and technical recording expertise, as well as funding for guest artists and commissioned music is not something which the Symphony can afford to provide on its own without charging for attendance at events. Thus, we do expect to make an appropriate request in the following grant period.

Annual Funding
The symphony anticipates an annual request for funding under the enhancement and investment fund.

Project schedule

All acquisitions and performances covered under this application would take place between July 1, 2022 and June 30, 2023.

Adaptability

As indicated in the preceding discussion points, the Symphony has planned for a flexible 2022-23 season. We plan to continue in person rehearsals at the Mandarin facility in Rancho Cordova, and eagerly look forward to live performances this season in April and June.

Should Covid-19 health restrictions be reimposed the Symphony is planning a flexible season for 2022-23. During its 2021-22 season the Symphony demonstrated its flexibility by video recording professional level performances and broadcasting them via its own YouTube channel not only to Rancho Cordova but to a world-wide audience. While performing live is the preference the Symphony is well able to adjust to health restrictions and satisfy its contractual obligations with recorded concerts to the public. The Symphony has returned to live rehearsal this season and developed strategies for rehearsal while keeping musicians healthy and able to perform. In short, we will remain flexible, but will continue to provide music to Rancho Cordovans regardless of any health res

Project Information

Project Name

Sacramento Children's Museum General Operations Support

Project Synopsis

Sacramento Children's Museum requests $150,000 per year for three years to support our rebuilding efforts so that we can create more engaging and innovative learning experiences for children. Funding will ensure our stability as we move forward in rehiring staff, increasing hours and capacity, and bringing back community events.

Project Description

For the past 10 years, Sacramento Children's Museum (SCM) has been a cornerstone educational and community resource in Rancho Cordova, providing children ages birth-8 with exciting, hands-on learning opportunities. Children learn STEM, art and literacy concepts through play in our 15 exhibit areas; create meaningful family experiences at our community events; and benefit from our social service programs. Unfortunately, the COVID-19 pandemic has impacted the Museum's operations in all areas, including finances, staffing, and programming. We are asking for your help to support our rebuilding efforts so that we can create more engaging and innovative educational experiences for children in our community. SCM is requesting general operations funding of $150,000 per year over the next three years to ensure the Museum's stability as we move forward in rehiring staff, increasing hours and capacity, and bringing back events, educational programming, and community outreach. A grant from the Community Enhancement & Investment Fund will support the following: 1) Annual Family-Friendly Events: The City of Rancho Cordova will be a title sponsor for our annual events for each year of funding. These events are: Summer Family Game Nights, Princesses and Pirates Ball, Trick or Treat at SCM, Holiday Party, Free Museum Day, Dogs with Jobs, Earth Day, and Pride Festival. Many of these events are free for guests. 2) Staffing: We are currently open by reservation only for reduced capacity and at reduced hours, and most of our classes and school programs are on hold. Your support will help SCM return to pre-COVID staffing levels so we can serve more children and open the Museum fully. 3) Increased Cleaning and Safety Measures: Ensuring the health and safety of our guests is one of our top priorities, especially since many of our guests are 5 and under and cannot be vaccinated. Grant funding will enable us to keep up with updated COVID-19 cleaning and sanitation standards.

Project Team

Sharon Stone Smith - SCM Executive Director; Meghan Toland - SCM Deputy Director; and Rachelle Ahmad - SCM Education Manager.

Project Goals

With funding support, we aim to achieve the following goals: 1) Increase Education Staffing by 1 FTE (full-time equivalent), and maintain in subsequent years; 2) Hire Marketing staff to 1 FTE, and maintain in subsequent years; 3) Implement a retention plan for current staff, and implement in subsequent years; and 4) Host 6 large special events annually, with 50% of events to be provided at no cost to visitors. We will measure our success in meeting these goals by whether or not we fill each of these open positions; develop and implement a retention plan; and host a minimum of six community events per year.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$150,000 per year

Estimated Breakdown of Project Expenditures

100% staff salaries and wages

Matching Funds

Include Any Other Funding Contributions

Earned revenue from ticket sales

Ongoing Operations and Maintenance Costs (if applicable)

N/A

Total Community Enhancement & Investment Funds Requested

$150,000 per year

Is this a multi-year request?

Yes

Number of Years

3

If you answered yes above, describe your sustainability plan and whether the project is viable as a single year request.

Although this project is viable as a single-year request, SCM is seeking multi-year support to ensure we have the resources and staffing needed to recover from a devastating suspension due to the COVID-19 pandemic. During the pandemic, SCM's earned revenue dropped to zero, and philanthropy has not made up the difference. As the COVID-19 pandemic enters its third year, the only certainty is that nothing is certain. SCM seeks multi-year funding to ensure stability as we move forward in rehiring staff, increasing hours and capacity, and bringing back events, educational programming and community outreach. The viability of Museum operations will come from increased Museum admission and program support.

How many years have you received funding for this project?

2

When will your request for funding sunset for ongoing programs?

Funds requested are for ongoing support of Museum operations. Therefore, there is not a specific start and end date.

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

SCM generates income from admissions, group sales, sponsorships, and store sales. SCM regularly seeks grants and community support.

Application #14

Project Schedule, Timeliness and Adaptability

Project Schedule

We expect to fill the Marketing Position by September 1, 2022, and hire Education Staff by January 1, 2023. We plan to develop our Retention Plan by January 1, 2023, and implement it on an ongoing basis afterward. There is not a specific start and end date for the community events and cleaning measures, as these are ongoing.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

Funds requested are for ongoing support of Museum operations. Therefore, there is not a specific start and end date for the Museum's regular hours. Specific dates will be available for the annual family-friendly events.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

During the last three years, our Museum has pivoted our programming so that we would be able to offer consistent programming. We will continue to offer drive-thru, outdoor, and online options as needed. In addition, we will create in-home education kits if local health ordinances change. Further, if Sacramento County Health orders change, in-person events will be postponed until in-person meetings are allowed.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

2701 Prospect Park Dr
Rancho Cordova, CA 95670

Other Physical Addresses (if project/program is at multiple sites)

Have you received a letter of support for the project/program from the property owner?

Yes (includes if you are the property owner)

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

No

Project Information

Project Name

Sacramento Philharmonic & Opera – Rancho Cordova Pop-Up Concerts

Project Synopsis

With funding from the Rancho Cordova Community Enhancement & Investment Fund, the Sacramento Philharmonic & Opera would be able to again produce and perform at least five (5) small pop-up concerts for individuals in Rancho Cordova to enjoy for free, in an accessible manner, throughout the community.

Project Description

With funding from the Community Enhancement Fund, the Sacramento Philharmonic & Opera would be able to again present a free concert series (at least five concerts, depending on the number of musicians) in locations throughout Rancho Cordova to enrich community members' lives and expand our music's impact in the city. As in 21-22, these concerts would take place in different venues throughout Rancho Cordova and would feature small groups of musicians (4-6) who could perform a variety of classical, pops, and other styles of music. Due to the flexible nature of these concerts, we could tailor each presentation to make it most engaging for the intended audience and for the location. For these performances, we would look to again collaborate and communicate with established partners to assess dates and times for performances, festivals (such as Kids Day in the Park, iFest International Festival, etc.) that we could perform in conjunction with, and potential new opportunities for concerts that would be impactful for the community (and with these new opportunities, we would be more than willing to work with the City Council and staff on coordination). As with this previous year, Rancho Cordova community members would be able to attend the performances free of charge, and we would be sure to thank the Community Enhancement Fund publicly at each concert for their support in making it possible. Fostering community is a core part of our mission and engaging our community members through music accessibly, in a manner that works for them, is incredibly important to our work. We would love the opportunity to again give back to Rancho Cordova via these performances and allow residents the chance to hear and interact with our music. Funding from the Community Enhancement Fund can help make this a possibility for our community.

Project Team

Sacramento Philharmonic & Opera staff would be responsible for producing these concerts. Specifically, Director of Operations and Community Engagement Charla Jeanne Lawson, Executive Director Giuliano Kornberg, and the SP&O Operations team would be

responsible for: collaborating with Rancho community partners and the City of Rancho Cordova on selecting performance sites, dates, and times; hiring musicians; and working with the musicians to select appropriate repertoire for that location.

Project Goals

Our vision is to be a collaborative leader in the cultural growth of the Greater Sacramento region and take the necessary steps to ensure that the SP&O represents, and is accessible to, our regional community. Our pop-up concerts are one of the main ways that we work to achieve this, and we greatly look forward to continuing to give the people of the Rancho Cordova community free, accessible experiences outside the concert hall. Through this project, we also hope to foster deeper relationships with individuals and organizations that we currently collaborating with (such as the MACC, Children's Museum, etc.) and strive to use next year's concerts as a springboard for further engagement with the Rancho Cordova community going forward. We additionally are more than willing to collaborate with City Council members, to try and ensure that we are performing in high-impact areas and locations that achieve their objectives. Lastly, during and after these performances, we would look to gather testimonials from attendees, partnering organizations, and City staff, and use this feedback to make sure that future concerts would serve the Rancho Cordova community.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$15,000

Estimated Breakdown of Project Expenditures

$10,000 – Musician wages and fringe benefits $2,000 – Soloist Fees (will be allocated to musician wages if no soloists are ultimately deemed necessary for concerts) $750 – Musician travel, parking, cartage, and other travel expenses $2,250 – Administrative Overhead

Matching Funds

N/A

Include Any Other Funding Contributions

N/A

Ongoing Operations and Maintenance Costs (if applicable)

N/A

Total Community Enhancement & Investment Funds Requested

$15,000

Is this a multi-year request?

No

How many years have you received funding for this project?

1

When will your request for funding sunset for ongoing programs?

June 30, 2023

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

In addition to collaborating with community partners in Rancho Cordova, we would look to develop relationships with Rancho Cordova-based individuals and corporations/foundations who could be willing to fund and underwrite further performances. Once these individuals and institutions are identified, we would make sure that we reached out to them to let them know about the concert schedule, so that they could attend and see the impact that our music has on the community. After attending the concerts, we would then seek to have conversations with them about our plans for further concerts, and additionally see if they had any ideas or recommendations on where we could perform. Through these conversations, we would assess if they were interested in a potential donation or sponsorship – and with this support, along with potential continued support from the Community Enhancement & Investment Fund, we could perform more concerts in and throughout Rancho Cordova.

Project Schedule, Timeliness and Adaptability

Project Schedule

The concerts for this project will take place periodically from July 2022 to June 2023, with the exact performance schedule determined by location, availability, and what works best for the community partners that we'd collaborate with.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

We have spent the bulk of our time this year (FY2022) establishing relationships with key individuals such as Shelly Blanchard, Cheryl Gleason, and Randi Kay Stephens, and organizations such as the Children's Museum and the MACC. With these relationships in-tact, we would begin planning for the concerts in the summer of 2022, so that we could have enough time to schedule these performances and give ourselves sufficient time to complete the project by June 30, 2023 most effectively.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Yes – if/as health and safety requirements change, we would look to program and perform these concerts in only outdoor locations, in areas where adequate social distancing could be observed.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

10191 Mills Station Rd
Sacramento, CA 95827

Other Physical Addresses (if project/program is at multiple sites)

Have you received a letter of support for the project/program from the property owner?

No

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

No

Project Information

Project Name

Hummingbird Theatre Company's 2022-2023 Season

Project Synopsis

As Rancho Cordova's leading Theatre Company we want to make theatre accessible to the people. We believe in engaging audiences with performances that not only make them reflect thoughtfully, laugh longer, and feel more, but also inspire pride in their Hometown of Rancho Cordova.

Project Description

Please replace the submission referenced here with this new one: Submission #: 1510688 IP Address: 153.48.247.250 Submission Date: 03/04/2022 4:36 Project Name Hummingbird Theatre Company's 2022-2023 Season This season we would like to bring some laughter and cheer to the children of Rancho Cordova by presenting our "From the Page to the Stage" Literary Adaptation Children's Show in either November or December of 2022. This This production would be a one-hour touring show suited for all ages, where we would bring Classic children's stories and tales to life by adapting and performing them onstage, helping create an interest in both reading and the performing arts in local children. Our spring show in April, would be geared towards the whole family, as we would like to present "The Greatest Showcase" – a Musical Theatre Broadway Review. This show would feature local talented performers singing, dancing, and acting out songs from musical theatre favorites, such as Phantom of the Opera, Shrek the Musical, Hamilton, and Rent.

Project Team

Hummingbird Theatre: Danielle Mercado, Director. Sarah Feuerbach, Assistant Director. Beth Beam, Concept Designer and Fabricator. Jennifer Reeves, Prop Master. Tom Colburn, Sound. Carolyn Duncan, Tay Winslow, Jarod Wiggins, Company members, etc.

Project Goals

Our mission is to bring quality Performing Arts Theatre performances to the community of Rancho Cordova. Our goal is to make this amazing art form accessible to all, and to provide our audiences with an artistic and emotional experience they won't forget.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$29,800

Ongoing Operations and Maintenance Costs (if applicable)

N/A

Total Community Enhancement & Investment Funds Requested

29,800

Is this a multi-year request?

No

How many years have you received funding for this project?

2

When will your request for funding sunset for ongoing programs?

June 30, 2023

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

N/A

Project Schedule, Timeliness and Adaptability

Project Schedule

Application #16

“From the Page to the Stage” Literary Adaptation Children’s Show: -Auditions at the End of July 2022 -Rehearsals during August through October 2022 -Performances in November/December 2022 "The Greatest Showcase" Musical Theatre Broadway Review: -Auditions: Early January 2023 -Rehearsals: January through March 2023 -Performances: April 2023

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

We have our second show wrapping up in April 2023, and even if it had to be pushed back due to Covid-19 or some other outstanding reason, we still have plenty of time to have everything completed by June 30, 2023.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Yes. We have faced this before, and we are able to use face masks and social distancing in our favor, we have rescheduled when absolutely necessary, and we could also potentially make at least part of our productions virtual.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

2197 Chase Dr
Rancho Cordova, Ca 95670

Other Physical Addresses (if project/program is at multiple sites)

3141 Bridgeway Drive, Rancho Cordova, Ca 95670

Have you received a letter of support for the project/program from the property owner?

Requested, and will submit to city by March 18, 2022

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

Yes, at a park/park facility

Application #16

Rancho Cordova Community Enhancement Fund
Proposal for Hummingbird Theatre Company 2022/2023 Season

OVERVIEW We are requesting $29,800 in Community Enhancement Funds to provide a full theatrical season offered to the citizens of Rancho Cordova. The program will be located in the City of Rancho Cordova at various locations, and will offer entertainment, culture and nightlife to the residents of Rancho Cordova. Young adults as well as older performers from all over the Sacramento and Rancho Cordova areas will participate in helping bring this vision to life.

This program serves two main purposes:

- To expand access to theater arts opportunities for local performers in dance, music, and acting with coaching from expert and professional actors, directors, and dance instructors supporting the development of artistic and technical skills; and
- To engage the community in artistic programming and civic engagement, culminating in performances open to the public.

BACKGROUND Hummingbird Theatre Company was established in Rancho Cordova in 2017 by longtime resident, Danielle Mercado. Mercado holds her Master of Arts in Theatre Directing from Roosevelt University- Chicago College of Performing Arts. Prior to that, she obtained her Bachelor of Arts degree in Theatre Arts from Sacramento State University. She also taught theatre and ran the Theatre Program at Bradshaw Christian School for six years. She began Hummingbird as a passion project, merely wanting to put on a Shakespeare in the Park style show at the amphitheater just 200 feet from her house. Her first year, she put on "A Midsummer Night's Dream" with 30 cast members, costumes, choreography, and over 800 people attending over two weekends. Hummingbird has grown since putting on other plays at the MACC in addition to a Musical Theatre Gala and a Traveling Children's Hospital Touring Show. With Community Enhancement Fund support, Hummingbird can sustain a broader community theatre presence and grow larger audiences.

PURPOSE The purpose of this project is to provide high-quality, professional level entertainment to the residents of Rancho Cordova, as well as make a name for our town artistically, which will increase arts engagement in our City. Hummingbird Theatre currently generates program funding by teaching classes at the Cordova Recreation & Park District and doing face-painting booths at community events. As a result, we must wait a long time in between performances in order to save the funds necessary to do a show. We cannot plan a season in advance as we do not have the means to finance it. We are also forced to do our sets, costumes, tech and other production needs as cheap as possible. This undermines the quality of our performances and can reflect poorly on our community's artistic abilities.

Our grant proposal will strengthen Rancho Cordova's only community theatre with a fully funded season. This would help attract high numbers of audiences, create exceptional quality performing arts, and entice some of the greater Sacramento area's best talent to come play

here in Rancho Cordova. We are also offering a variety of shows: A children's literary adaptation touring show, a musical theatre Broadway review show, and a historical drama. We can capture input from our audiences and assess what types of performances best fit the needs of our community.

PROGRAM ELEMENTS

"From the Page to the Stage" Literary Adaptation Children's Show- Nov/ Dec 2022
Classic children's stories and tales adapted and written for the stage. A one-hour touring show suited for all ages. Performed by actors 15+ who stay in character and interact with audience members.

Musical Theatre Broadway Review – April 2023
Our Musical Theatre Cabaret features talented performers singing, dancing, and acting out songs from musical theatre favorites, such as Phantom of the Opera, Hamilton, and Rent. This is a multi- weekend ticketed event that includes appetizers and drinks.

PROGRAM GOALS AND COMMUNITY BENEFITS

This program brings expanded access to performing arts and a broader vision to our community.

The goal is to model community performing arts programs in Folsom, El Dorado Hills and Elk Grove. Each of the cities listed above have established community and/or youth theatre programs that are well known and a huge draw to the public. By investing in live theatre programs, the City of Rancho Cordova sends a message that art is important to our community. With this investment, minds are changed and hearts won as they make their way into Rancho Cordova to see what we have created. Our city becomes more attractive to buyers, investors, and by reputation.

A city-funded theatre program shows support of artists, who will come from all over the Sacramento area in order to be involved with any of Hummingbird's productions. Their friends and family will come see them perform. By providing stipends for key roles, we can make for more talented casts and by default, better live shows. The community benefits from competition amongst actors for the best roles and we can afford to pick the best actors we can, therefore, making the experience better for everyone involved.

We will also have the means to provide our audiences with elevated sets, sound, lights, props, costumes, and special effects. This will enhance the experience as a whole and keep our fans coming back and clamoring for more. This will drive business into the community, as people coming here for rehearsal or shows will spend money on restaurants and recreational shopping.

Our productions will also use residents within Rancho Cordova as cast members, including youth and seniors. Our specialty is "bridging the gap" between high school and college, giving

young adults a purpose and sense of belonging in the theatre group. This creates a civically engaged youth that is not turning to more illicit means to fill their time. Seniors are the largest growing segment of our community. Providing opportunities for them to stay civically engaged brings vibrancy to our community and enhances their overall health.

Hummingbird Theatre Company will provide a summary report of the program goals and impacts. Our outcomes will include an assessment of:

- o Number of people participating and demographic information
- o Number of hours of additional coaching (acting, voice, movement, and technical theater skills)
- o Number of audience members attending
- o Number of volunteers and hours participating
- o Summary of outreach and marketing strategies
- o Summary report of lessons learned and any leveraged opportunities with partners

Production revenues and program savings will be used to support future community performances including additional dance, acting and voice coaching. The production photos will be used in promotions by program partners and bring greater exposure to the culturally diverse talent in the Rancho Cordova community. Program outcomes may also be used to advance other grant opportunities expanding on the benefits to the performing arts community.

PARTNER COMMITMENTS

Each of the partners and participating professionals will bring unique expertise to the production and the opportunity for actor and audience skill development.

The program is a collaborative effort between the City of Rancho Cordova, Cal Cap Studios, The Rancho Cordova Dept of Parks and Recreation, The Rancho Cordova City Library, theatre professionals from the greater Sacramento area, and Hummingbird Theatre Company.

The partners who helped develop the proposal and program for the 2020-21 season include: Rebecca Sloan (Executive Producer - Cordova Accelerated Performing Arts); Shelly Blanchard (Executive Director - Cordova Community Council); Diane Standring (Musical Director); Natalie Quilici (Choreographer); Tom Colburn (Sound Engineer); Danielle Mercado (Director); Sarah Feuerbach (Director/ Costumer); Beth Beam (Set and Lighting Designer); and Jennifer Reeves,

Tay Marchelle, Jarod Wiggins, Carolyn Duncan (Acting Company Members- Hummingbird Theatre Company).

Danielle Mercado is Hummingbird Theatre Company's Founder and Mainstage Director. She has been directing shows for over a decade and is an expert at working with all ages. She will lead the season as she has for many years, being the main contact for all communication and leading all productions. Mercado holds a Master of Arts in Directing from Roosevelt University Chicago College of Performing Arts, Bachelor of Arts in Theatre Arts Sacramento State University, Imagination Theatre Director Scholarship, Capital Stage Assistant Director- Sacramento State University Teaching Artist and Assistant Director, Miss Sacramento County Board of Directors, Bradshaw Christian School Drama Teacher and Director from 2010-2015.

Rebecca Sloan will provide management support including serving as liaison to the City, CRPD, FCUSD, SCUSD, and EGUSD. Sloan will assist with budget management, outcomes reporting, and community engagement/outreach to expand community participation. Sloan was the Executive Producer for the Cordova Accelerated Performing Arts youth summer program in 2019. Sloan also served as the Measure P (School) bond campaign co-chair and was a parent volunteer in the Folsom High School Theater Program from 2012-2016. Sloan has a Bachelor of Arts in Communications/ Minor in Drama and a Master of Arts in Public Policy and Administration.

FINANCIAL ASSUMPTIONS

Expenditures	Estimate	Total
Rehearsal Space	Assumes rehearsal space costs $25/hr. If we are able to secure donated space, the program will realize savings.	$6600
Production Space	Rental of the Village Green Park Amphitheater, Building 1 at the Hagan Community Center or a similarly-priced location for the Cabaret, Rancho Cordova Library Performance- Free	$4600
Staff		$11,000
Production Expenses		$5800
Miscellaneous Expenses		$1800
Estimated Expenses		$29,800
Revenues	Estimate	Total
City of Rancho Cordova Grant		$29,800
Donation of Rehearsal Space Assumes commitment of Cal Cap Studios or other vacant commercial space		*$10,000 in kind*
Donation of Producing/Advising by Rebecca Sloan	10 hours/month at $50/hour= $6,000	*$6,000 in kind*
Donation of Professional Services	Producing 400 hrs at $50/ hr = $20,000 Directing 310 hrs at $50/hr= $15,500 Dramaturgy 39 hrs at $50/hr= $1,950 Costuming 210 hrs at $50/hr= $10,500 Sewing 140 hrs at $25/hr= $3,500 Musical Directing 130 hrs at $50/hr= $6,500 Choreography 130 hrs at $50/hr= $6,500 Carpenter 70 hrs at $50/hr= $3,500 Set/Lighting Designer 75 hrs at $60/hr = $4,500 Skilled Building 212 hrs at $40/hr= $8,500 Fabricating Props/Sets 42 hrs at $60/hr= $2500 Acting $15/hr Musical- $2,700 per actor x 17 actors = $45,900 Children's Tour- $1,230 per actor x 14 actors = $17,220 TOTAL ACTING = $63,120	*$161,870 in kind*

	Sound Design/Engineer 300 hrs at $25/hr= $7500 Advertising 68 hrs at $50/hr= $3,400 Graphic Design 40 hrs at $60/hr= $2,400 Print 133 hrs at $18/hr= $2,400 Secretarial 130 hrs at $20/hr= $2,600 Tech/ Manual Labor 115 hrs at $20/hr= $2,300 per person 4 on Musical, 2 on all other productions = $6,200 TOTAL IN KIND = $171,070 - $9200 budgeted for Staff Stipends	
Production Revenues	(Ticket and concession sales) Musical Theatre Cabaret = Est. $6750 Children's Theatre Tour = $0 **Number will actually be less because of credit card and online processing fees* ***assumes ticket sales to support additional actor stipends and coaching classes.*	$6750*
Estimated Total Revenues		$36,550

Hummingbird Theatre Company Community Enhancement Fund proposal is flexible with multiple program elements across the 12-month year. The proposal includes individual program elements and individual budgets for each community production. The City can decide to grant funding for any or all program proposals. The planning funding is essential to growing a sustainable community theatre program supported by community volunteers and audiences. Ticket revenues are not assumed for now to create the flexibility to provide for free performances for the community or reduced-price tickets to help expand audiences. An assessment of audience demand would allow for better revenue forecasts for future year budgeting.

FINANCIAL BREAKDOWN

Project Name: Hummingbird Theatre Company 2022/2023 Season

PLANNING

Community engagement, partnership and relationship building including FCUSD, EGUSD, SCUSD, CRPD, Cordova Community Council, Arts Council, other Cordova community organizations and professional theatre community to establish performing arts presence in the Rancho Cordova community. The planning element includes the Managing Program Director working in collaboration with the Managing Program Producer. The producer's time is estimated at 120 hours/annually as an in-kind contribution.

Total Planning Costs: $6,000

"FROM PAGE TO STAGE" A TOURING CHILDREN'S SHOW

Nov/ Dec 2022 at touring locations in Rancho Cordova.

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR CORDOVA RECREATION & PARK DISTRICT (CRPD) PROPERTY/FACILITY USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a park or park facility, you must request the endorsement of the Cordova Recreation & Park District (CRPD).

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by a representative of CRPD for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. The CRPD representative reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

To be filled out by grant applicant

Project/Program Name: Hummingbird Theatre Company 2022/2023 Season

Name of Organization: Hummingbird Theatre Company

Name of Applicant and Title: Danielle Mercado - Managing Program Director & Theatre Director

Applicant's Phone: 530-306-4182 **Applicant's Email:** hummingbirdtheatreco@gmail.com

Submit a copy of your application with this page to the Cordova Recreation & Park District. For your application packet to be considered complete the signed and dated endorsement form must be received by the City of Rancho Cordova by March 18, 2022. The CRPD representative will submit the form directly to the City's Community Enhancement & Investment Fund team. You must submit this form and a copy of your application to CRPD no later than March 4, 2022. Submit it via e-mail to Cristina James at cjames@crpd.com.

To be filled out by Cordova Recreation & Park District Representative

Endorsement Given

Endorsement Withheld

Conditional approval of facility rental only

General Manager's or Designee's Printed Name: CRISTINA JAMES

Date: 3/7/22

Comments (Optional):

The CRPD representative will send this form directly to CEIFGrants@cityofranchocordova.org no later than March 18, 2022. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

Project Information

Project Name

Rancho Cordova Youth Poet Laureate

Project Synopsis

The project would provide funds to the Cordova Community Council to further develop and conduct a Youth Poet Laureate program for the City of Rancho Cordova which is in alignment with the National Youth Poet Laureate program.

Project Description

A Youth Poet Laureate program meets several criteria used in evaluating CEIF projects, including: (1) supports arts and culture as a positive outlet for self-discovery; (2) Supports the growth and development of youth; (3) promotes opportunities for youth civic engagement; (4) provides an opportunity to increase community pride by showcasing outstanding youth; (5) encourages enhancement of education in the areas of literature and poetry; (6) and provides an enhancement to quality of life for youth in the community. Using a timeline that aligns with the National Youth Poet Laureate program, the CCCC would design a Rancho Cordova schedule and program which would eventually put local contestants in line to compete for the national title. The CCC inherited this project late in 2021-22, too late to engage in the national program. By extending the project into 2022-23, the CCC believes a local program can align with the curriculum and standards developed for the national program and launch with the cooperation of local schools and teen organizations. The National Youth Poet Laureate program celebrates the nation's top youth poets who are committed to artistic excellence, civic engagement and social justice. As part of this national framework, which CCC has joined, the national organization works with local youth literary arts organizations to identify and celebrate exceptional youth poets who use their voice to inspire change. In the early months of our investigation, it was discovered that Rancho Cordova youth literary groups and organizations are rare and therefore it will take some foundation-building to bring this to fruition. Extending into 2022-23 will allow CCC to plan for the work it will take to make this a success.

Project Team

Cordova Community Council, Shelly Blanchard, Executive Director Cheryl Gleason, Curator and Coordinator of the Mills Station Arts and Culture Center

Project Goals

Goal #1 To develop a year-long timeline and schedule of local outreach and activity that is in alignment with proven national models Metric: Success measured by participation Goal #2: Select a Rancho Cordova Youth Poet Laureate in an open process that is standardized to assure fairness and wide participation Metric: Success measured by participation Goal #3: Provide Rancho Cordova Youth Poet Laureate honoree with a reliable schedule of events at which to showcase talent Metric: Schedule of events is developed which assures exposure to a combined total of no less than 500 audience members Goal #4: Increase knowledge about Youth Poet Laureate activities among Rancho Cordova youth, setting the stage for future growth of the program Metric: Measured by participation in preliminary activities and competition events
