Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$10,000

Estimated Breakdown of Project Expenditures

$1000 National Urban Word Membership and training materials $2000 Publicity and outreach to community youth $2000 Guest speakers and leaders for training workshops, plus food and beverage and other support materials $1000 Prizes and materials for Rancho Cordova competitions $3500 Labor and administrative services, including planning and execution of activities, bookkeeping, monitoring and reporting. $500 Miscellaneous supplies and expenses

Matching Funds

No cash match is included in this project at this time. In-kind donations include: integration into CCC activities which would support the project, such as MACC integrations and public speaking opportunities; publicity assistance utilizing CCC communications tools; leadership and support of CCC staff in the development and delivery of the project.

Include Any Other Funding Contributions

None

Ongoing Operations and Maintenance Costs (if applicable)

None

Total Community Enhancement & Investment Funds Requested

$10,000

Is this a multi-year request?

No

How many years have you received funding for this project?

1

When will your request for funding sunset for ongoing programs?

Unknown

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

Unknown

Project Schedule, Timeliness and Adaptability

Project Schedule

July 2022: Finalize funding agreement August 2022: Begin outreach to high school students September 2022: Offer workshops and practice opportunities for local students October 2022: Competition and naming of one or more Rancho Cordova Youth Poet Laureates October-November 2022: Applications open for regional and national competition *** Four Youth Poet Laureate Regional Ambassadors will be chosen, one from each of the 4 regions of the nation, with Rancho Cordova located in the WEST region. They will be selected by a panel of judges. The candidate must have held the Youth Poet Laureate Title through an official National Youth Poet Laureate Program in their city to apply. November 2022: Performance at opening of 2022 State of the City event January 2023: Selections for National Poet Laureate Competition announced April 2023: National Youth Poet Laureate Commencement April 2023:

Performance at a MACC Student Art Event at the MACC, City Council meeting, Board of Supervisors meeting May 2023: Performance at iFest and Rancho Cordova Community Council Luncheon, possibly others.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

This project timeline is driven by the national competition schedule and traditional school calendar. Assuming interest on the part of students, these calendars will dictate deadlines for completion.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

If public health orders make in-person events impossible, this project could be shifted to a virtual protocol, however participation rates would likely be affected and is therefore not preferred.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

10191 Mills Station Road, the Mills Station Arts and Culture Center
Suite 117
Rancho Cordova, CA 95827

Other Physical Addresses (if project/program is at multiple sites)

Have you received a letter of support for the project/program from the property owner?

No

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

No

Project Information

Project Name

Department of Sound Valley Producer Pop-Ups

Project Synopsis

Department Of Sound provides opportunities to youth through music and podcasting education, recognizing access to music and sound to be a universal right, not a luxury. We seek to hold 10 Valley Producer Pop-Up events throughout Rancho Cordova to engage young people in the community through music and podcast production.

Project Description

Dept. Of Sound is a Sacramento-based 501(c)(3) providing opportunities to youth through music and podcasting education, focused on students aged 11-24 in under-serviced communities. We've served 5,000+ students globally through school programs and virtual, hybrid, and in-person offerings. As of 2022, we've partnered with 13 schools in 4 districts in Northern California and trained 25+ teachers to smoothly integrate our programs into classrooms. If funded, we aim to hold 10 Valley Producer Pop-up events in Rancho Cordova from July '22 - June '23 to engage community youth and introduce music and podcast production. We aim to join recurring events such as street fairs and festivals to connect with community members over time and build rapport with students. In addition to our existing ecosystem of partners, we seek to collaborate with other local organizations such as Unseen Heroes' NeighborGood Market, Robert Family Development Center Pop-Up Events, Anatolia Community Center, the Rancho Cordova iFest, Creative Kids Craft Fair, and the Chamber of Commerce Business Expo & Job Fair. Our Pop-Ups include Music Production Petting Zoos featuring musical instruments, audio equipment, and production software for participants of all ages to experiment with and create content. Pop-Ups also include Beat Showcases, in which students share their music and podcast projects with the community. We are also launching a Pop-Up series featuring Native Music Artists from the Yocha Dehe Wintun Nation showcasing traditional Indigenous music, instruments, culture, and contemporary expressions. The need for accessible music education is essential to foster youth development and strengthen communities. The benefits of music and sound include mental health benefits, improved social skills, attendance, and academic performance, and potential economic opportunities in the music and entertainment industry, as well as a sense of belonging for students through shared experiences of creativity.

Project Team

John Hamilton, Founder & Chief Executive Officer 15 years music industry experience, internationally touring DJ, producer & engineer with award-winning collaborators / Marquee, Webster Hall, Coachella, & Golden 1 Center / Valley One Entertainment, The DNA Project, Resident DJ & producer for the Sacramento Kings NBA Lori Divine, Chief Financial Officer 30 years CFO experience in not-for-profit organizations / The Child Abuse Prevention Council, The Boundless Freedom Project, WRMA, CalLife, SMUD Satya Celeste, Chief Operations Officer 15 years experience in not-for-profit management and content production / PRASAD Project, Lentil As Anything, SYDA Foundation, Kevin Anderson & Associates Benwar Shepard, Director of Education Award-winning music educator with 20 years experience teaching in schools, communities, and private lessons / Executive Director of Bigger Than Us Arts, Sacramento Youth Bands, Element Brass Band, Sacramento Brass Band Collective Sabina Palmieri, Marketing Lead 8 years experience in marketing and media spearheading digital content production, brand partnerships, digital marketing & social media / REVOLT TV, Next Level Marketing, RED Distribution Christian Avila, Multimedia Lead Emmy-nominated editor with 10 years of video production experience. Directed and produced short films and music videos for major hip hop artists. Produced videos at the Sacramento Kings. Worked on the Property Brothers Bigger Than Us Arts Sacramento-based Arts Education organization bringing music, visual, and performing arts directly to the community, working with schools, after-school programs, churches, neighborhood associations, community leaders, and other arts organizations The Library of MusicLandria Sacramento-based Musical Instrument Library, breaking down barriers to creativity through hands-on learning

Project Goals

Overall Goal: From July 2022 to June 2023 - Host 10 live Valley Producer Pop-Ups at existing community events in partnership with 2-3 local organizations and reach 1000-1500 people in the Rancho Cordova community. Impact numbers will be gathered at all events and participants will be encouraged to complete feedback surveys. Project Goal #1: By July 15, 2022 - Outreach potential partners with our existing local partners, Bigger Than Us Arts, Musiclandria, Yocha Dehe Wintun Nation, and SMUD. Contact 10 organizations, local fairs, festivals, or other existing events, including Unseen Heroes' NeighborGood Market, Robert Family Development Center Pop-Up Events, Anatolia Community Center, Rancho Cordova iFest, Creative Kids Craft Fair, and Chamber of Commerce Business Expo & Job Fair.. Project Goal #2: July - August 2022 - Confirm partnerships with 2-3 Rancho Cordova-based organizations and provide letters of support based on negotiated locations. Project Goal #3: August 2022 - June 2023 - Prior to each upcoming event, post social media campaigns geo-targeted to Rancho Cordova, aiming to reach 1500 community youth. Project Goal #4: August-November 2022 - Coordinate and hold 4 monthly events in Rancho Cordova, documenting attendance and community engagement, to be reported in December 2022 Project Goal #5: April-June 2023 - Coordinate and hold 6 bi-monthly events in Rancho Cordova, documenting attendance and community engagement, to be reported in June 2023 Project Goal #6: Engage with young people and introduce potential new students to music and podcast production while spreading awareness about the importance of music and arts in the Rancho Cordova community. Project Goal #7: August 2022-June 2023 - Connect with potential new partners aligned with our work, such as school administrators, media representatives, Sacramento Public Library representatives, local corporate sponsors and partners, and independent organizations, venues, and community centers.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

80,823.75

Estimated Breakdown of Project Expenditures

Live Event Coordination: 5 hrs per event @ $50/hr = $250 per event Live Event Music Teacher Staffing: 5 hrs per event, plus 1 hr prep and 1 hr breakdown @ $75/hr = $1575 per event Marketing & Social Media Outreach: 2 hrs per event @ $45 = $90 per event Event Registration Costs: estimated $350 per event Videography & Documentation: $300 per event Subtotal: $2565 per event Admin & Operations: $2565 x 25% = $641.25 per event Contingency: $3206.25 x 10% = $320.62 Subtotal: $3526.88 per event Total: $35,268.80 for 10 events in Rancho Cordova

Matching Funds

Blavatnik Family Foundation - $35,268.80

Include Any Other Funding Contributions

Yocha Dehe Wintun Nation Community Fund (confirmed) - $25,000 to Live Events SMUD (exact figure pending, confirmed 3-Year Partner) - $20,555 to Live Events

Ongoing Operations and Maintenance Costs (if applicable)

N/A

Total Community Enhancement & Investment Funds Requested

$35,268.80

Is this a multi-year request?

Yes

Number of Years

2

If you answered yes above, describe your sustainability plan and whether the project is viable as a single year request.

We have received funds from the Blavatnik Family Foundation to support Valley Producer Pop-Ups for 2022 and 2023, as well as funds from our partner Yocha Dehe Wintun Nation for 2022. We have also requested funds for Live Events from our existing 3-year partner, SMUD, and we expect to hear a response before May 2022. While this project is viable as a single year request, the value of Valley Producer Pop-Ups is exponential when ongoing relationships can be forged with parents and community members and young people can be encouraged to participate in our free, in-depth programming.

How many years have you received funding for this project?

1

When will your request for funding sunset for ongoing programs?

November 2023

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

We anticipate raising additional funds through grants; city, county, state and federal stimulus funding; contracts with schools and community centers; and donations from local businesses and other sponsors. Given our proactive approach involving diverse revenue streams and our fundraising success in the past three years, we are confident that we will be able to raise sufficient funding for this project.

Project Schedule, Timeliness and Adaptability

Project Schedule

Year One: By July 15, 2022 - Outreach potential partners; contact 10 organizations, local fairs, festivals, or other existing events July - August 2022 - Confirm partnerships with 2-3 Rancho Cordova-based organizations and provide letters of support based on negotiated locations. August 2022 - June 2023 - Post social media campaigns geo-targeted to Rancho Cordova in the two weeks prior to each live event August-November 2022 - Coordinate and hold 4 monthly events in Rancho Cordova December 2022 - Report on first 4 Live Events April-June 2023 - Coordinate and hold 6 bi-monthly events in Rancho Cordova June 2023 - Report on final 6 Live Events for Year One Year Two: August 2022-June 2023 - Strengthen the community by connecting with potential new partners at Live Events, such as school administrators, media representatives, Sacramento Public Library representatives, local corporate sponsors and partners, and independent organizations, venues, and community centers. July 2023 - Confirm plans for Year Two events, preferably continuing with existing partners August 2023- June 2024 - Post social media campaigns geo-targeted to Rancho Cordova in the two weeks prior to each live event for Year Two August-November 2023 - Coordinate and hold 5 bi-monthly events in Rancho Cordova December 2023 - Report on first 5 Live Events April-June 2024 - Coordinate and hold 5 bi-monthly events in Rancho Cordova June 2024 - Report on final 5 Live Events for Year Two

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

We currently hold Valley Producer Pop-Ups throughout the Sacramento area, and based on our experience hosting these events in 2021 and 2022, we are confident we will be able to successfully coordinate and host 10 events per year in Rancho Cordova. Events are led by Director of Education, Benwar Shepard, with coordination support from the Department Of Sound team and teaching support from graduates of our Valley Producer Fellowship program and BTU Arts instructors. Footage from each event will also be used to create social media assets to assist in outreaching young people to attend future events.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

We design as much of our programming as possible to be flexible and responsive to changing COVID-19 protocols, including our Live Events. In 2020 in response to COVID-19, we began offering virtual resources and events, and we have since developed our hybrid model options for programming. We are intentionally planning the Rancho Cordova Valley Producer Pop-Up events based on when it is likely to be safer to have outdoor activities, as historically shown with COVID spikes occurring more in winter months with indoor activities. We currently implement and monitor standard COVID protocols for our events, including providing hand sanitizer for all participants before and after the Music Production Petting Zoos, socially distanced stations, masks, and sanitizing protocol for each station between participants. In the event we find ourselves unable to hold live events planning, we will continue to outreach and engage students in conjunction with our partners, and encourage students to participate in our regular Virtual Beat Showcases, specifically designed to connect and engage students COVID-lockdowns, and we would encourage them to participate in our online, self-paced music and podcast production course, the Valley Producer Program, which includes virtual office hours with music instructors.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

Project Information

Project Name

Festival of Knowledge: Basant Panchami

Project Synopsis

To celebrate and promote art and culture in our community and hence to bring harmony, unity and integrity among youth and adults.

Project Description

Festival of Knowledge: One whole day/night event, symbolizing and celebrating education, arts, and culture. Everybody is invited and welcome to attend. The event displays the talent that Kids and Adults have in various Arts and Cultural fields. This includes Essay Competition, Music, Dance Performances, Drawing Exhibitions, Public Speaking, External Artist Performances etc. This event provides a platform for kids and adults to showcase their talents and creativity. It boosts confidence to face the public and motivates them to improve and be more creative.

Project Team

Ankur consist of 4 Board Members as follows: Atanu De: President Sreetama Mookherjee: Vice President Shovick Bhattacharya: Treasurer Debashis Maity: Secretary. Apart from them there is a Community Council Member, and 22 Committee Members.

Project Goals

Goal 1: To organize cultural events and festivals for promoting culture, history and tradition. Goal 2: Provide entertainment, while building self confidence in kids. Goal 3: Bring Community Pride: Our event received an overwhelming popularity enticing other entities to show high interest in associating themselves with us. Goal 4: To foster creativity and literary skills.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total project cost

$15,524

Estimated breakdown of project expenditures

1. Rental charges for the Event facility $1,534 2. External Artist for Musical Performance $1,000 3. Event Promotion (Flyers, Video, Photography, Website updates) $250 4. Event Setup (Decoration, Sound, Lighting, etc.) $750 5. Insurance Compliance $700 6. Festive Dinner $2,000 7. Festive Lunch and Snacks $1,100 8. Cultural Program $1,200 9. Storage and Delivery Logistics $5,500 10. Event Cleanup $500 11. COVID Specific Social Distancing and sanitizing Kits for ensuring Protection : $700 12. Live Streaming Technician and Zoom Subscription : $290

Matching Funds

$2000

Include any other funding contributions

$1000

Ongoing operations and maintenance costs (if applicable)

None

Total Community Enhancement & Investment Funds requested

$12,500

Is this a multiyear request?

No

How many years have you received funding for this project?

4

When will your request for funding sunset for ongoing programs?

We expect to request for funding sunset by year 2026. We are requesting only partial funding. Our events makes use of existing funding, resources, and partnerships, which includes: • Individual annual membership; • Corporate grants for volunteer hours and employee donation match; • Requesting grants; • Fundraising activities like Picnic etc. • . Advertisement revenue from Vendors, Business owners for providing space during our Cultural events and on our website.

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

We will reach out to other local sponsors and organizations for funding. We will also seek corporate matching. We will organize fundraising events as well.

Project Schedule, Timeliness and Adaptability

Project Schedule

Event Rehearsals: September 2022 till January 2023. Festival of Knowledge Event: January 28th, 2023, Saturday.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

We have already started planning for Festival of Knowledge 2023. Rehearsals for cultural events will start around September 2022. To adhere to the timeliness of the project/event we have identified and formed committees with specific responsibilities. We have also reached out to Hagan Park Community Center to reserve their facility for the specific date (Jan 28th 2023). Keeping the pandemic situation(if any) in mind, we will ensure to follow the state/county guidelines at the time of the event.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

As stated above (Timeliness Section), if ANKUR cannot hold the event indoor due to COVID or any other restrictions, then we will do the following : 1. Have virtual workshops over Zoom with our Volunteers and Cultural Team for rehearsals. 2. Invest on pre-recorded programs leveraging Quality Recording and Live Digital Tools. 3. Multiple Vendors along with Volunteers will be engaged so that we can produce a quality virtual program. From 2020 we have had a great experience in conducting our events both in-person and virtual. We will use best practices and lessons learned from these events to ensure that we continue to hold our events per City, County, State and Federal health and safety guidelines. Alternatively if California Public Health and/or Sacramento County Health Orders permit then we have also planned to have the event outdoor using Open Auditorium and/or Social Distancing. At this moment we are keeping all our options open and will plan accordingly.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical address of project location

Hagan Community Center
2197 Chase Dr
Rancho Cordova, CA 95670

Other physical addresses if project/program is at multiple sites

Have you received a letter of support for the project/program from the property owner?

Requested, and will submit to city by March 18, 2022

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site or a park/park facility?

Public Record Unless otherwise exempt under applicable law, applications and application materials are public records. All information received from an applicant, whether received in connection with a grant application or in connection with any grant-funded activities performed are subject to disclosure pursuant to the California Public Records Act, unless otherwise exempt. Next Steps Applicants will receive acknowledgement once their application is received. When the application period closes, staff will review each application according to the application criteria and prioritization method listed within the Fiscal Year 2022/2023 Grant Application Process and Criteria document. Should staff have any questions or need clarification on your application, they will contact you. You are invited to attend any of the public City Council Meetings. It is anticipated at this time that the Community Enhancement & Investment Fund team will present information to the City Council starting in April and continuing through June. We may invite applicants to present their project and we may make selection recommendations to Council during the May City Council meetings. In addition, the Community Enhancement & Investment Fund team will send periodic updates to grant applicants via e-mail. It is possible that all funding decisions for the Fiscal Year 2022/2023 Community Enhancement & Investment Fund could be made in May and formally adopted by City Council by early June. Staff intends to notify all applicants of the funding decisions made by the end of June. If you have not signed up to receive automatic notifications when council meeting agendas are posted, you can do that by using the link below:

Subject: Special Request From Ankur Inc. for a higher amount of Grant for Financial Year 2022 - 2023
Date: Friday, March 4, 2022 2:06:01 PM

Hello

On behalf of Ankur Inc.(a non-profit organization), I would like to thank the "City of Rancho Cordova" for supporting us for our noble cause over the past several years. With your continuous help and support, we are truly encouraged to continue our mission of fostering the skills in the area of arts and culture, hence imparting positivity, harmony and creativity among kids, youth and adults.

In this regard, I would like to bring to your kind attention that in recent times, during the pandemic, we lost a few members who were big sponsors, and as well as our source of funding from a few local sponsors got challenged. Besides that, due to the recent spike in inflation, we are experiencing a significant rise in expenses across all categories. While we will continue reaching other sources (local sponsors, members and corporates), we would like to sincerely request you to please evaluate if a higher amount of grant can be arranged for the upcoming financial year 2022 - 2023. If you require any details to justify this additional funding, we will be happy to provide the details.

Looking forward to your consideration on this request. Thank you once again, in advance!

Atanu De
President - Ankur Inc.

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR CORDOVA RECREATION & PARK DISTRICT (CRPD) PROPERTY/FACILITY USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a park or park facility, you must request the endorsement of the Cordova Recreation & Park District (CRPD).

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by a representative of CRPD for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. The CRPD representative reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

To be filled out by grant applicant

Project/Program Name: Festival Of Knowledge - Basant Panchami

Name of Organization: Ankur Inc.

Name of Applicant and Title: Sreetama Mookherjee - Vice President

Applicant's Phone: 9165243056 **Applicant's Email:** ankursacpr08@gmail.com

Submit a copy of your application with this page to the Cordova Recreation & Park District. For your application packet to be considered complete the signed and dated endorsement form must be received by the City of Rancho Cordova by March 18, 2022. The CRPD representative will submit the form directly to the City's Community Enhancement & Investment Fund team. You must submit this form and a copy of your application to CRPD no later than March 4, 2022. Submit it via e-mail to Cristina James at cjames@crpd.com.

Project Information

Project Name

Marathi Mandal Sacramento - Ganesh Festival

Project Synopsis

Marathi Mandal Sacramento (MMSAC) is an initiative to bring together Marathi speaking families in the Greater Sacramento area. We are a non-profit and charitable organization. Our mission is to celebrate the Maharashtrian culture (Maharashtra is a state in India), its traditions and customs amongst the community in Sacramento and surrounding areas. We achieve this by organizing regular activities and events that will reflect the spirit of our community. Typically in a calendar year, MMSAC celebrate 5 main events.

Project Description

Ganesh Festival is an auspicious Hindu festival which generally falls in mid-August to September. It marks the birthday of the beloved elephant-headed Lord Ganesha. Ganesha is known as the God of wealth, sciences, knowledge, wisdom and prosperity, and that's why most Hindus remember him and seek his blessings before starting any important work

Project Team

MMSAC Executive Committee - Hrishikesh Shende (President) - Prashant Mengshetti (Secretary) - Pritam Bhosle (Joint Secretary) - Shilpa Joshi (Treasurer)

Project Goals

1. Celebrate the Ganesh Festival in a location where we can gather and celebrate this auspicious occasion 2. Location where we can hang some decorations and serve food 3. Bring together the Marathi community and celebrate the Maharashtrian culture NOTE: MMSAC has previously organized this celebration in Rancho Cordova in the past, therefore would like to seek the same location. The venue was loved by the community members.

Public Record Unless otherwise exempt under applicable law, applications and application materials are public records. All information received from an applicant, whether received in connection with a grant application or in connection with any grant-funded activities performed are subject to disclosure pursuant

to the California Public Records Act, unless otherwise exempt. Next Steps Applicants will receive acknowledgement once their application is received. When the application period closes, staff will review each application according to the application criteria and prioritization method listed within the Fiscal Year 2022/2023 Grant Application Process and Criteria document. Should staff have any questions or need clarification on your application, they will contact you. You are invited to attend any of the public City Council Meetings. It is anticipated at this time that the Community Enhancement & Investment Fund team will present information to the City Council starting in April and continuing through June. We may invite applicants to present their project and we may make selection recommendations to Council during the May City Council meetings. In addition, the Community Enhancement & Investment Fund team will send periodic updates to grant applicants via e-mail. It is possible that all funding decisions for the Fiscal Year 2022/2023 Community Enhancement & Investment Fund could be made in May and formally adopted by City Council by early June. Staff intends to notify all applicants of the funding decisions made by the end of June. If you have not signed up to receive automatic notifications when council meeting agendas are posted, you can do that by using the link below: https://www.cityofranchocordova.org/residents/what-s-happening/sign-up-for-e-news

Project Information

Project Name

Festival of Flowers (Multicultural Integration Project)

Project Synopsis

Thank you for the opportunity to apply for the community enhancement fund grants program for the fiscal year 2022/2023. City of Rancho Cordova support to the Festival of Flowers will contribute towards achieving our common goal of promoting the City of Rancho Cordova image in terms community pride, Civic engagement, and quality of life. This festival became a huge cultural attraction in the region and making the city as a cultural Capitol of the region with multicultural integration

Project Description

Sacramento Telangana Association is a Non-Profit organization committed to persevere and promote the culture and arts of India and bridge the gap between the multiethnic and integrate the multiple cultures into the community by active civic engagement. Every year during the September - October timeframe Sacramento Telangana Association organizes the festival called "Bathukamma"-Festival of Flowers which celebrates the inherent relationship between earth, water, plants, flowers, and the human beings in a community to integrate and live-in harmony. The festival heralds the beauty of nature, collective spirit of people, the indomitable spirit of women folks and the scientific approach of the agrarian people towards preserving the resources of nature in a celebrative way. Sacramento Telangana Association request community enhancement grant funds to celebrate festival of flowers. This festival encourages and helping active civic engagement and provides a strong sense of place for residents through the arts, music, culture, education, and entertainment and in last 6 years this festival become medium of integration for different cultures into the community. For the year 2022 we are partnering with other nonprofits and faith organizations for wider community outreach. In the last 7 years during celebration, we were able to invite, attract approximately ~12000 community members to participate and to part of this festival from different ethnic and culture backgrounds, which includes elected representatives, public officials, business leaders and community leaders and volunteers. The Measure H grants would allow us to help progress, educate and organize this unique festival in the center of the City of Rancho Cordova. Bathukamma –Festival of Flowers can become major touristic attractions and promote the image of a City of Rancho Cordova as a cultural capitol.

Project Team

Application #21

Sacramento Telangana Association board has leadership and skill to organize the event with help of dedicated community volunteers, our team contains members from various professionals, doctors, business owners, educators, and community leaders. 1. Satish Pasupulati – Sr. Engineer/Entrepreneur/Community Leader-Founder 2. Laxma Legala – IT Professional/Community Volunteer 3. Anil Reddy – Community Volunteer 4. Srinivas Reddy Kumbam –Entrepreneur 5. Srinath Babu – Sr.Engineer,State of California 6. Dr.Venu Bellum, MD Kaiserpermanete, Rancho Cordova 7. Dr.Nataraj Podishetty - Plant Sciences ,UC Davis

Project Goals

Festival of Flowers –Bathukamma, it's our goal to integrate different cultures and ethnicities of Greater Sacramento region by providing experience of arts, music, culture, education and. This festival is connecting the different sectors of the community by active civic engagement and provides a strong sense of place for residents as a community pride and promoting the community relations through the arts, music, culture, education, and entertainment. This festival is an open event and free for all the community members, it indeed remains a celebration of the women's glory the symbolic women power. This festival is the dedication to worship womanhood and nature's system through valuing the flowers. It's important to educate our future generations about different cultures, traditions, and diverse world. The world is becoming increasingly small and cultural understanding is important. Bathukamma festival helps our community children learn to accept and respect different cultures and traditions of other countries which makes them better citizens. This festival includes several exciting programs like Dancing, Art exhibition, educational workshop on making bathukamma and tasting authentic Telangana food which will be served free. This festival support Rancho Cordova community by bringing visitors from all over Sacramento area cities Folsom, Roseville, Rocklin and from Stockton, Yuba city, Fremont, San Ramon, Fresno, Modesto, and Fairfield. Which will bring new revenue to the economy and create new opportunities, partnerships to improve Rancho Cordova's quality of life.

Project Schedule
September 24/25th 2022 3PM -10PM

Project Location
STA requested endorsement from FCUSD to take place at a public K-12 school site in Rancho Cordova City. An alternate back up location will be on one of the CRPD parks within the City of Rancho Cordova limits.

Financial Sustainability
The continued success and growth of Festival of Flowers means that places City of Rancho Cordova as cultural capital of this region and it provides the quality of life, since last 5 years our active community engagement increasing, and we can attract more business community with generous sponsorships.

Sacramento Telangana Association (STA) is developing a sustainability plan, considering the success we have experienced in last 6 years in terms of membership and events we conducted year over year which helped to forecast the anticipated growth and expansion for future.

STA Board of Directors, trustees, advisory council members and other core members of the organization developed plan and strategies helping organization with financially stability with steady source funds from various like sponsorships from business community, member community and other tickets-based events.

1. STA board of trustees contributed total of $10000 for organization.
2. STA will collect membership fee $100 per core members for 2 years terms from 50+ members
3. Enhance/Expand Non-Profit volunteer grants ($6000) from corporation like Intel, HP, Esurance, and other technology business.

4. STA will expand our vendor/sponsor base contributions ($13000) for the active marketing purpose for sponsoring the event
5. STA is committed to expand the community outreach contributions with our members and the surrounding metropolitan area
6. STA will enhance the private partnerships with corporations who are actively supporting the Non-Profit Organizations.

Sacramento Telangana Association strongly believe with the above strategy we will be self-sustainable financially in celebrating the festival of flowers in the future.

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR SCHOOL SITE USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a public K-12 school site, you must request the endorsement of the school superintendent of that school district.

One supplemental form is required per school district.

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by the corresponding school superintendent for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. Each participating school superintendent reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

Project Information

Project Name

International Kite Festival(iKFest)

Project Synopsis

International Kite festival to the city of Rancho Cordova, across the world and USA many cities have similar festivals held annually and this kite festival attracts kite flyers from all over the world.

Project Description

Sacramento Telangana Association (STA)and Rancho Cordova Travel and Tourism (RCTT) will be partnering in introducing first ever International Kite Festival to the City of Rancho Cordova for the year 2023. We would like to bring a new International Kite festival to the city of Rancho Cordova, across the world and USA many cities have similar festivals held annually and this kite festival attracts kite flyers from all over the world. There are several internationally recognized and respected kite festivals taking place in the USA. From those voted best kite festivals in the world by Kite Trade Association International such as the Washington State International Kite Festival, to those attracting hundreds of thousands of kite enthusiasts every year, there are more kite festivals in the USA than most realize. This will be our first International Kite festival can include largest kite, smallest kite, most unique kite, highest flying kite, and most colorful kite. STA will be partnering with RCTT in promoting and working in collaboration with an objective of promoting tourism to the city of Rancho Cordova. We are anticipating greater level enthusiasm and participation. International Kite Festival is a free event open to all ages and planning to provide light snacks and refreshments for the participants.

Project Team

STA and RCTT board have leadership and skill to organize the event with help of dedicated community volunteers, our team contains members from various professionals, doctors, business owners, educators, and community leaders. 1. Marc Sapoznik – RCTT Executive Director 2. Anil Kondakrindi – Community Organizer 3. Srinath Babu -STA Board member 4. Srinivas Reddy Kumbam – Entrepreneur 5. Satish Pasupulati – Sr. Engineer/Entrepreneur/Community leader 6. Dr.Venu Bellum – Kaiser Permanente, Rancho Cordova 7. Shantha Gadam – STA Women's Committee Chairman 8. Laxma Legala – STA Board of Trustee

Project Goals

Our goal is to have 200+ colorful kite flies in City which can provide us platform to show the creativity and bringing community together. Kiting is truly a universal activity, limited only by the imagination International Kite festival helps the community to

introduce people to the fun of kite flying, the rich history of kites, the stunning artistry of kite makers, and how kites can be used as educational tools. In partnership with Rancho Cordova Travel and Tourism with an objective of promoting tourism to the city of Rancho Cordova. 1. Helps to build cultural connections 2. Community Engagement 3. Education and Entertainment

Measure H Grant Amount Requested	: **$3000**
Project Title	: International Kite Festival(iKFest)
Project Timeframe	: January 15th ,2023
Project Location	: CRPD Parks in Rancho Cordova

Project Description

Sacramento Telangana Association (STA)and Rancho Cordova Travel and Tourism (RCTT) will be partnering in introducing first ever International Kite Festival to the City of Rancho Cordova for the year 2023.

We would like to bring a new International Kite festival to the city of Rancho Cordova, across the world and USA many cities have similar festivals held annually and this kite festival attracts kite flyers from all over the world.

There are several internationally recognized and respected kite festivals taking place in the USA. From those voted best kite festivals in the world by Kite Trade Association International such as the Washington State International Kite Festival, to those attracting hundreds of thousands of kite enthusiasts every year, there are more kite festivals in the USA than most realize.

This will be our first International Kite festival can include largest kite, smallest kite, most unique kite, highest flying kite, and most colorful kite.

STA will be partnering with RCTT in promoting and working in collaboration with an objective of promoting tourism to the city of Rancho Cordova. We are anticipating greater level enthusiasm and participation.

International Kite Festival is a free event open to all ages and planning to provide light snacks and refreshments for the participants.

Project Team

STA and RCTT board have leadership and skill to organize the event with help of dedicated community volunteers, our team contains members from various professionals, doctors, business owners, educators, and community leaders.

1. Marc Sapoznik – RCTT Executive Director
2. Anil Kondakrindi – Community Organizer
3. Srinath Babu -STA Board member
4. Srinivas Reddy Kumbam –Entrepreneur
5. Satish Pasupulati – Sr. Engineer/Entrepreneur/Community leader
6. Dr.Venu Bellum – Kaiser Permanente, Rancho Cordova
7. Shantha Gadam – STA Women's Committee Chairman
8. Laxma Legala – STA Board of Trustee

Project Goals

Our goal is to have 200+ colorful kite flies in City which can provide us platform to show the creativity and bringing community together. Kiting is truly a universal activity, limited only by the imagination

International Kite festival helps the community to introduce people to the fun of kite flying, the rich history of kites, the stunning artistry of kite makers, and how kites can be used as educational tools.

In partnership with Rancho Cordova Travel and Tourism with an objective of promoting tourism to the city of Rancho Cordova.

1. Helps to build cultural connections
2. Community Engagement
3. Education and Entertainment

Project Cost

Project Information

Project Name

Festival of Colors (Holi)

Project Synopsis

Festival of Colors(Holi) for the year 2023, this festival marks the arrival of spring

Project Description

Sacramento Telangana Association(STA) will be partnering with WeEmbrace and Other community organizations In celebrating the Festival of Colors(Holi) for the year 2023, this festival marks the arrival of spring and is a celebration of fertility, color, and love, mostly we see this festival as a time for people to get together and enjoy themselves with friends, families and communities without any concern for caste, creed region, religion, men, women, children's or ethnicity of the community which intern connects the communities of the City of Rancho Cordova. During 2018,2019,2022 this festival was celebrated with help of City of Rancho Cordova community enhancement funds, this was well received by the community and generated huge enthusiasm and encouragement. STA active partnership with WeEMBRACE serving Families of Individuals with disabilities is helping us to reaching to greater community participation, especially children in our community and for 2023 we are projecting there is greater level enthusiasm and participation. This is first time we are successfully collaborating and partnership with other community organizations and showing the results how successfully we can unify and bring the community on to a one unifying platform to promote the great civic engagement and broader community outreach.

Project Team

STA and WeEmbrace board have leadership and skill to organize the event with help of dedicated community volunteers, our team contains members from various professionals, doctors, business owners, educators, and community leaders. 1. Anil Kondakrindi – Community Organizer 2. Meena Kalyansundaram- WeEmnrace 3. Srinath Babu -STA Board member 4. Srinivas Reddy Kumbam – Entrepreneur 5. Satish Pasupulati – Sr. Engineer/Entrepreneur/Community leader 6. Dr.Venu Bellum – Kaiser Permanente, Rancho Cordova 7. Shantha Gadam – STA Women's Committee Chairman 8. Laxma Legala – STA Board of Trustee

Project Goals

City of Rancho Cordova sponsoring this color festival as part of community enhancement funds for last 3 years, during festival there were lot of kids participated and enjoyed this event at Stone Creek Park, Capitol Village and Children's Museum these years, with the

past experiences we strongly believe this festival reaching more kids in the community in providing the entertainment and education to next generations. In partnership with WeEmnrace we can spark a passion for life-long learning, entertainment, and education. This event provides a venue where children's will have opportunity to explore to the new environment and exercise both their bodies and their minds 1. Helps to build cultural connections 2. offers opportunities for children to play with colors which will help in fulfilling the sensory needs which are very important for kids over all development. 3. Community Engagement 4. Education and Entertainment This festival support Rancho Cordova community by bringing visitors from all over Sacramento area cities Folsom, Roseville, Rocklin and from Stockton, Yuba city, Fremont, San Ramon, Fresno, Modesto and Fairfield. Which will bring new revenue to the economy and create new opportunities, partnerships to improve Rancho Cordova's quality of life.

Project Information

Project Name

Kannada Sangha of Sacramento (KSS)-2023 Multi Cultural Community Event. Festival of Arts & Culture-Ranga Vasantha 2023

Project Synopsis

Kannada Sangha of Sacramento celebrates multiple events (Indian festivals) in greater Sacramento area during the year to bring all community members on to one stage to share happiness, educate the significance of our Art & culture and encourages community involvement.

Project Description

Kannada Sangha of Sacramento is Non-Profit Organization with 501(c) (3) status, committed to preserve and promote the Art, Culture, history of India and bridge the gap between multiethnic and multi-cultural activities in the community. KSS also conducts educational and leadership workshops for the community members. Apart from the above main event, KSS conducts Camping, Sports, educational, medical awareness webinars, Charity (monthly Dinner for homeless people) and Blood drive as part of annual events. KSS also partner with other non-profit organizations to conduct 5K rum marathons. Kannada Sangha of Sacramento request Community Enhancement Funds to celebrate Ranga Vasantha which will be Festival of Art & Culture (Ranga Vasantha) in April-May 2022 - 2023. Ranga Vasantha is an event which is conducted to welcome the spring. This event will be performed in the month of April - May every year. This event showcases the Art and Culture of Multi Ethnicity. During this event we get to see people performing stage play depicting mythological characters or Indian folk dances. This also gives an opportunity for High school students to actively participate on stage and help in lighting and dialog prompting arrangements. Over the last 10 years we were able to invite over 500 people to participate or celebrate the event. This includes delegates and people from different ethnic background, Dignitaries from school districts, public officials, and different community leaders. Community Enhancement grants would allow us to help progress, educate and organize this unique festival in and around City of Rancho Cordova. Financial Year 2023, KSS is planning to conduct this event at one of the locations in FCUSD schools or Sacramento School District and will be attended by more than 500 people. The cultural program will go on for 4 hours and it will be free of cost.

Project Team

Kannada Sangha of Sacramento (KSS) board has experienced leadership and management skills to organize this event with the help of dedicated community volunteers. KSS has team of professionals and dedicated community leaders. Board of Directors: 1.

Prabhakar Rao 2. Shobha Rao 3. Gurudutt Vasudeva Murthy 4. Dilip Nayak 5. Laxmi Rao Executive Committee: 1. President: Pushpa Viswanathan. 2. Vice President: Mrudula Kulkarni 3. Secretary: Prasanna Kumar Bhat 4. Treasurer: Krishnamurthy Venkataramana 5. Joint Treasurer: Sowmya Kiran

Project Goals

The Ranga Vasantha festival supports our Rancho Cordova community by bringing visitors from Greater Sacramento Area. During this event we have booths for small business which includes Banks and real estate. This small business booths encourages people to buy the newly constructed homes. This will bring new revenue to the economy and create new opportunities, partnerships to improve Rancho Cordova value of life. Our organization actively involves in fund raising for natural disasters. We organize and participate Marathons for noble cause.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$15,000.00

Application #24

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR SCHOOL SITE USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a public K-12 school site, you must request the endorsement of the school superintendent of that school district.

One supplemental form is required per school district.

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by the corresponding school superintendent for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. Each participating school superintendent reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR SCHOOL SITE USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a public K-12 school site, you must request the endorsement of the school superintendent of that school district.

One supplemental form is required per school district.

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by the corresponding school superintendent for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. Each participating school superintendent reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

Project Information

Project Name

Community Cultural Appreciation Concert

Project Synopsis

The Folsom Cordova Unified School District serves students and families from a variety of diverse cultures. Our district is a wonderful blend of people with rich heritage and cultural pride. FCUSD wishes to create an opportunity for students and our community to engage in and celebrate the diverse cultures through music.

Project Description

FCUSD would like to create an opportunity to appreciate the Armenia culture by creating an opportunity to learn about and hear folk music. The project would include working with an Armenian musical group to provide a learning opportunity for both students and the general community. The Cordova High School Performing Arts Center would be the venue for the project. The performance group, Chookasian Armenian Concert Ensemble would be secured to do a matinee performance during school for our students and on the same day, do an evening performance for the community. Both events would be free of charge to our students and the community to attend. The performances would occur during March 2023.

Project Team

Mindy Andrus, Coordinator Lisa Vaca, Administrative Assistant Mark Cornfield, CHS Theatre Teacher (TBD) Kevin Simms, CHS Music Teacher (TBD)

Project Goals

To provide a cultural experience for students and the community through showcasing an Armenian Music performing group.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$7,912.

Estimated Breakdown of Project Expenditures

Day Performance Group Matinee for students: $2,000. Evening Performance Group for the community: $3,900. Teacher Stipend: $1,141 + benefits: $1,312. Theater Technician: $ 300. Programs: $ 200. Advertising: $ 200. Total: $7,912.

Matching Funds

Cordova High School Performing Arts Center Administrative Services Ticketing Service

Include Any Other Funding Contributions

Music Teachers: Lesson development & scheduling for matinee

Ongoing Operations and Maintenance Costs (if applicable)

N/A

Total Community Enhancement & Investment Funds Requested

$7,912.

Is this a multi-year request?

No

How many years have you received funding for this project?

0

When will your request for funding sunset for ongoing programs?

May 2023

Do you plan to ask annually for funding?

No

What other funding will you seek to support your project?

N/A

Project Schedule, Timeliness and Adaptability

Project Schedule

Spring 2022 book Chookasian Armenian Concert Ensemble Spring 2022 book CHS Performing Arts Center & Add to District Calendar Fall 2022 Introduce project to secondary music and theater teachers January 2023 Provide supplemental packet with information about the performing group to teachers January-March 2023 Advertise for the community performance, setup ticket system, print programs. March 2023 Matinee student performance and evening community performance

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

The concerts will take place in March of 2023. Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Should public health guidelines change, the performances could be done virtually through a Zoom Conference call. Access would be provided to students and to the community in advance of the concert.

Project Information

Project Name

Teej Festival

Project Synopsis

Teej festival is the most widely celebrated Hindu festival by women. This festival brings diverse women to a single platform to celebrate togetherness with singing, traditional dance performances, enjoying a grand feast and praying to Lord Shiva, an Indian God.

Project Description

Teej festival invites all local women and men of Indian origin and community for celebrations. This festival is a great way to celebrate diverse cultural heritage, culture and traditions. The women attend the event in colorful traditional attire. The event will have ritual prayers, diverse and vibrant cultural performances including singing and dancing and feast of food. The festival celebrations make the families and community joyful, strengthen the bonding and unites the community. The project directly meets the City's Community Enhancement Funds guidelines and selection criteria in the following ways: • Education – Teej festival provide an opportunity for Indian community to bring all the Indian origin women and men together to a single platform to celebrate and also to showcase our cultural diversity to local community. • Children and Youth – The children and youth will lean about Indian cultural traditions and how they unit the community. • Business/Economic Development – Indian community spends significant money during festival to purchase clothes, food, decoration items and jewelry, which helps local businesses.

Project Team

The Indian Association of Sacramento (IAS) is a non-profit organization that serves as the single platform to preserve the rich cultural heritage of India. At IAS, we aim to share and showcase the cultural beauty with our fellow citizens in the greater Sacramento area and keep the culture alive for future generations. IAS is responsible for development and delivery of this project. The project team consists of Indian Association of Sacramento Executive Team, Board of Trustees and volunteers. Vandna Sharma - President, Indian Association of Sacramento Ranju Verma - Vice - President, Indian Association of Sacramento Darshana Amin - Volunteer, Indian Association of Sacramento Gobi Ramasamy - Treasurer, Indian Association of Sacramento Bhavin Parikh - Trustee, Indian Association of Sacramento Bhaskar Vempati - Trustee, Indian Association of Sacramento Satheesh Nagaraj - Trustee, Indian Association of

Sacramento

Project Goals

Teej festival strengthens relationships and fosters community pride by bringing diverse Indian women and men and community together from all walks of life. Festival allows individuals to offer gratitude and prayers to the Universe and showcase their culture by dressing in traditional cultural attire, singing devotional songs, presenting cultural dances, and sharing traditional foods and learning about new tastes. Both adults and kids play together and live in a colorful world of differences. The local Indian population is over 50,000. This is a great opportunity for Indian and local community to come together to celebrate Teej Festival.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$11,000

Project Information

Project Name

Athletic Improvement

Project Synopsis

The Athletic Improvement grant will support for Cordova High School, Mills, and Mitchell Middle Schools.

Project Description

The Athletic Improvement Plan will support the increased opportunities for student-athletes for afterschool sports. This plan encourages physical fitness as a positive outlet for afterschool sports. This project will enhance the educational programs and athletic programs at Cordova High School, Mills Middle School and Mitchell Middle School. Evidence supports that one of the best Positive Behavior Intervention and Supports (PBIS) for students is athletics. During the COVID-19 pandemic the need to support Social Emotional Learning (SEL) for our students is greater than ever and athletics is one of the best models for SEL. Ensuring our athletic programs have the necessary equipment / supplies and means to support our students is paramount to the success of our community.

Project Team

The Team responsible for ensure that this project is implemented will be made up of site administrators and district representation. Team members: Principal Jerad Hyden, Principal Amy Strawn, Principal Dana Carrigan, along with the Athletic Directors from each school and Peter Maroon, District Director of Athletics.

Project Goals

Our goals are to ensure that students have access to after school athletic programs and remove financial barriers. State and district general funding only provide coaching stipends and funds for safety items. Working with the policies of the school district and the CIF, we want to encourage student-athletes to participate in local school sports programs. We can accomplish these goals by: - Updating equipment and supplies to maintain and improve competitive edge on an annual basis - Cover transportation cost for athletics (reducing financial barrier) - Provide a safe environment during the largest community gatherings - Provide additional funds for stipends and increase enrichment needs - Upgrade / update facilities as part of the district master plan - Promote school pride and recognition

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total project cost

$200.000

Estimated breakdown of project expenditures

Use of Fund in the following areas: $4,000 Advertising / marketing $39,500 Employee salaries, taxes and benefits (including additional coaches, trainers, and enrichment staff) $3,500 Recognition awards (certificates, awards, supplies, varsity blocks, banners and championship t-shirts) $5,000 Travel and meals $10,000 Security for football games $60,000 Inventory / Sports equipment (uniforms, sports machines) $37,250 Student-Athlete Transportation Fee $40,750 Facility Improvement $200,000 Total

Matching Funds

0

Include any other funding contributions

0

Ongoing operations and maintenance costs (if applicable)

0

Public Record Unless otherwise exempt under applicable law, applications and application materials are public records. All information received from an applicant, whether received in connection with a grant application or in connection with any grant-funded activities performed are subject to disclosure pursuant to the California Public Records Act, unless otherwise exempt. Next Steps Applicants will receive acknowledgement once their application is received. When the application period closes, staff will review each application according to the application criteria and prioritization method listed within the Fiscal Year 2022/2023 Grant Application Process and Criteria document. Should staff have any questions or need clarification on your application, they will contact you. You are invited to attend any of the public City Council Meetings. It is anticipated at this time that the Community Enhancement & Investment Fund team will present information to the City Council starting in April and continuing through June. We may invite applicants to present their project and we may make selection recommendations to Council during the May City Council meetings. In addition, the Community Enhancement & Investment Fund team will send periodic updates to grant applicants via e-mail. It is possible that all funding decisions for the Fiscal Year 2022/2023 Community Enhancement & Investment Fund could be made in May and formally adopted by City Council by early June. Staff intends to notify all applicants of the funding decisions made by the end of June. If you have not signed up to receive automatic notifications when council meeting agendas are posted, you can do that by using the link below:

We hope to make school athletics and facilities a jewel for the City of Rancho Cordova and its citizens. See Attachments #1 & #2 for specific project items.

Project Team

President- Conrade Mayer Vice President- Jennifer Laret Secretary- Amy Wallace Treasurer- Dennis Lamantia The team responsible to ensure that all aspects of the plan are implemented will be made up of members of the RCSAC team, Cordova Hight School Principal Jerad Hyden, Vice Principal Michele Brown, Athletic Director Mark Beamish, and various Folsom Cordova Unified School District representatives. RCSAC will also be working with the Site Council at Cordova High School so we can enhance the programs that currently exists and to ensure we are not duplicating any efforts.

Project Goals

Create a year-round academic support plan for student athletes Increase the number of student athletes & reduce the number of athletes needing academic contracts Create a robust post-high school academic plan Social Media Plan- Improve community communication Marketing/Branding Plan Facility Improvements Address specific team needs Sponsor events that encourage alumni interaction and create mentorship opportunities

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total project cost

Application #28

$196,500

Estimated breakdown of project expenditures

$30,000- Tutoring Program (tutor stipends, food, tutoring company) $8,000- Educational fieldtrips to Los Rios Colleges & local universities $7,500- Advertising/Marketing (includes parent outreach) $80,000- Front Marquee & marquee by Performing Arts Center $10,000- Schoolwide updated signage including signage down Chase drive, murals on school walls down Chase drive. $10,000- General facility improvements $26,000- Employee Salaries (including additional coaches, trainers, and enrichment staff.) $25,000- Recognition awards (certificates, awards, supplies, varsity blocks, banners, championship t-shirts, and banquets.)

Matching Funds

$30,000 (fundraisers)

Include any other funding contributions

$25,000 (corporate donations)

Ongoing operations and maintenance costs (if applicable)

$25,000 (this would apply to some of the athletic equipment that would need maintenance)

Total Community Enhancement & Investment Funds requested

$196,500

Is this a multiyear request?

Yes

Number of years

5

If you answered yes above, describe your sustainability plan and whether the project is viable as a single year request.

RCSAC has created a booster club component. The booster club will be able to increase the fundraising efforts at Cordova High. The booster club money raised will eventually offset the measure H money requested.

How many years have you received funding for this project?

1

When will your request for funding sunset for ongoing programs?

The funds requested will sunset when Cordova High School is able to sustain a booster club to support and meet the equitable difference. Developing a booster club and securing corporate sponsorship is a top priority for RCSAC.

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

We will be looking to do fundraising on a frequent basis with each of the teams as well as looking at school wide fundraising events.

Project Schedule, Timeliness and Adaptability

Project Schedule

The timeline for this project would start July 1, 2022 and would be completed by June 30, 2022.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

The majority of the items on the list have to do with tutoring and academic assistance for the student athletes. These services would be provided during the timeline above. The physical projects identified have a working plan and budget so that they can be completed in that timeline.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

The tutoring program can be adapted to a virtual platform. The marketing plan, social media development, and site improvements would still be able to be accomplished if health orders change.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical address of project location

Cordova High School
2239 Chase Drive
Rancho Cordova, CA 95670

Other physical addresses if project/program is at multiple sites

Have you received a letter of support for the project/program from the property owner?

No

Letter of Support from Property Owner (not K-12 schools or park/park facility)

RCSAC- 2022 Athletic Improvement Plan- Attachment #1.docx
RCSAC Athletic Improvement Plan Facility Priority List 2022- Attchement #2.xlsx
LOR - RC Grant (RCSAC).pdf

Is your project/program intended to operate or take place at a public K-12 school site or a park/park facility?

Yes, at a public K-12 school site

Which school district is the public K-12 school site located in?

Folsom Cordova Unified

Public Record Unless otherwise exempt under applicable law, applications and application materials are public records. All information received from an applicant, whether received in connection with a grant application or in connection with any grant-funded activities performed are subject to disclosure pursuant to the California Public Records Act, unless otherwise exempt. Next Steps Applicants will receive acknowledgement once their application is received. When the application period closes, staff will review each application according to the application criteria and prioritization method listed within the Fiscal Year 2022/2023 Grant Application Process and Criteria document. Should staff have any questions or need clarification on your application, they will contact you. You are invited to attend any of the public City Council Meetings. It is anticipated at this time that the Community Enhancement & Investment Fund team will present information to the City Council starting in April and continuing through June. We may invite applicants to present their project and we may make selection recommendations to Council during the May City Council meetings. In addition, the Community Enhancement & Investment Fund team will send periodic updates to grant applicants via e-mail. It is possible that all funding decisions for the Fiscal Year 2022/2023 Community Enhancement & Investment Fund could be made in May and formally adopted by City Council by early June. Staff intends to notify all applicants of the funding decisions made by the end of June. If you have not signed up to receive automatic notifications when council meeting agendas are posted, you can do that by using the link below:

March 4th, 2022

To Whom It May Concern:

As the proud Principal of Cordova High School, tasked with providing opportunities for students which prepare them for post-secondary success – it is my pleasure to write this strong letter of support in continuing partner with the Rancho Cordova Student Athlete Coalition (RCSAC).

In alignment of our collective mission, supporting our most marginalized students is critical to our success. Given a diverse population of learners which include: English Language Learners, Special Education, and students from single-parent households facing incredible educational barriers – RCSAC seeks to increase year-round academic supports for student via targeted tutoring. I have continued to witness the support provided for academic assistance and the added benefit to our current existing after-school tutoring model, including college access and student recognition.

Additionally, RCSAC has worked incredibly hard to revamp our marketing and facilities plan which included extensive upgrades to our CHS campus, including: the weight room, stadium, storage facilities, and the parking area adjacent to the gym. RCSAC has created a comprehensive plan which seeks to provide upgrades, refreshed signage, and enhanced branding. Most importantly, RCSAC has helped facilitate the addition of key campus equipment, including three new golf carts, as well as provided relief for some of our deserving sport programs.

I urge you to give this application your most serious consideration. Should you or your staff have any questions regarding this letter, please do not hesitate to call. Thank you for the consideration as we partner to positively impact student outcomes.

Respectfully submitted,

Jerad A. Hyden
Principal
Cordova High School
(916) 294-2450 x810150
jhyden@fcusd.org

Application #28

RCSAC- Athletic Improvement Plan

ACADEMIC SUPPORT PLAN

Study Hall Time & Dates

- Year -Round for all students
- Tuesday 3-4:30pm- Prep for block Wednesday schedule
- Wednesday 3-4:30 pm- Prep for block Thursday schedule
- Thursdays 1:30-3:00 pm- often games/practices are not until 3:00, Student Athletes would stay on campus in study hall and would academically use this time.
- Saturday- Times and Dates TBD

Study Hall Locations

- Auxiliary Gym Classroom
- Library
- Individual Classrooms/MACH Room
- Offsite Location: PAL Community Center (purpose would be to also build a community relationship)

Staff

- CHS Teachers & Staff
- Outside Academic Support- Example: Miss Jane (math coach), retired or previous teachers, volunteers, non-CHS coaches
- All Non-CHS staff would be cleared

Grade Checks: Year-Round**One of the academic challenges is that the Student Athletes keep up the academic standards only during their sport's specific season.

- Google Classrooms set up for each sport. Coaches and RCSAC academic coordinators would be "teacher of record."
- Bi-Weekly electronic grade check through Google classroom.
- Student Athlete is responsible for their own grade check. Student Athlete would use Powerschool to record grades.

POST- HIGH SCHOOL ACADEMIC PLAN

Enhanced Coordination with Los Rios Community College District

- Robust communication plan- Enhanced Social Media and email postings on application deadlines, special financial aid meetings, and Promise Plus applications
- Per Los Rios- Current enrollment in the Promise Plus program is approximately 60-70 students. Goal would be 100 students from Cordova and Kinney High Schools.
- Start communication and education on Los Rios programs during Freshman year vs. Junior or Senior year.
- Create a focused plan educating the students on athletic opportunities within the Los Rios Community College District
- Field trips to each of the Los Rios locations beginning Freshman year. The student athlete would attend 1 field trip per year culminating in a grand total of 4 field trips by

the end of their Senior year. The field trips would specifically focus on athletic programs and facilities.
- Los Rios would like to offer college level classes at the CHS site so that students would have 9-12 units when they enroll in Los Rios.

Recognition Program for Student Athletes when they commit to a College, University, or Trade-School
- Recognition on school kiosk
- Recognition on RCSAC social media pages
- Recognition in the Rancho Cordova Grapevine
- Recognition in the Rancho Cordova city newsletter and on city social media pages

SOCIAL MEDIA PLAN

Develop a Facebook, Instagram, and possibly YouTube page
Pages would post the following:
- Game & Practice Schedules
- Athletic Accomplishments: wins, special awards, any other honors.
- Upcoming parents' meetings
- Volunteer opportunities
- Links to school gear
- Link with other Rancho Cordova social media pages to enhance community engagement and volunteerism.
- Work with CHS students to post content (specifically with student government students)

MARKETING/BRANDING PLAN

- Work with site staff to develop branding guidelines for site. Create a consistent messaging and marketing plan by having recognizable logos, colors, and uniform guidelines.
- Create a band guidebook for staff, coaches, and clubs to reference.
- Remove signage that is not consistent with brand guidelines.
- Create a new entrance into Cordova High Stadium
- Uniforms: All teams should have uniforms with the same logos and color pallet outlined in the guidebook.
- Spirit wear sales: Sales of branded gear would be available to students and families. These sales would take place online and at home games and meets.
- Create a marketing plan to attract sponsors for teams and field signage.

FACILITIES IMPROVEMENTS

Gym
- Update all current logos with new branding
- Inspirational messages installed on upper gym walls.
- Organize banners and hang most recent banners and awards.
- Repair or remove rusted screen.
- Clean out storage areas

Football Field & Field Maintenance

- Refurbish equipment.
- Find location to store equipment.
- Create a maintenance schedule.
- Work with coaches to assign volunteers to help with maintenance.

General Facility - Storage Containers (currently in production)

- Move containers within fence perimeter.
- Clean out existing containers.
- Exchange damaged and/or unusable containers for newer more secure containers.
- Move containers to more logical locations. Move containers that are not sports related to locations on the upper campus that would make sense.
- Recommend security for sports related containers.

General Facility- Future Enhancements

- New Marque- larger marque to recognize student accomplishments, post local Rancho Cordova events, and additional athletic schedules and information.
- Decorative fence around entire perimeter of school and stadium. A new fence would put CHS within the standards set forth by the City of Rancho Cordova and would tie in with the existing fence installed at Coloma and Chase as well as what is existing at Mills Middle School.
- New Entrance into Lancer Stadium. It is currently confusing where the existing entrance is. A new entrance would not only enhance the look at CHS but would make it easier for visiting teams and families to locate the entrance.
- Screen attached to fencing around Lancer Stadium. By screening the field in, it would force spectators to pay to view the games vs. watching for free through the fence.
- New Signage on Chase drive. New signage would enhance the look of CHS and would be in line with the cities' current signage initiative.
- Paint light posts black to match fencing on Chase drive
- Paint storage containers red and or black to match branding guidelines.
- Bigger kiosk and signage for performing arts theater.
- Repaint CHS Amphitheater- Repaint Block C and Class Names
- Repaint and refresh college mural: Remove Wisconsin and replace with Chico, Stanislaus, or local Los Rios Icons.
- General clean up items: Clean up boneyard, remove extra unneeded conduit, work with custodians and maintenance staff on general repairs.
- Enhanced security for athletic equipment areas.
- Motorized entrance gate into the D wing area.

SPECIFIC TEAM NEEDS

General Team Needs

- Update uniforms and warmups
- Create a uniform replacement schedule.
- General equipment needs. Inspect, refurbish, and replace equipment as needed. Refurbish and update equipment within branding guidelines.
- Update safety equipment
- Coach Training: Enroll each coach in Positive Coaching Alliance.
- Weight Training Coaches (possibly offer community work out options in addition to student athlete work outs)

EVENTS/ALUMNI/VOLUNTEERING

- Create events that encourage community participation and community pride.
- Events that honor our alumni. Alumni runs, picnics, etc.
- Participate in volunteer opportunities throughout the city. Work with the Cordova Food Locker, Interfaith Council and other Rancho Cordova groups on city wide projects and events.
- Lancer Picnic
- Cordova Beer Fest
- Student Turkey Trot

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR SCHOOL SITE USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a public K-12 school site, you must request the endorsement of the school superintendent of that school district.

One supplemental form is required per school district.

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by the corresponding school superintendent for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. Each participating school superintendent reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

To be filled out by grant applicant

Project/Program Name: Rancho Cordova Student Athlete Coalition- Athletic Improvement Plan

Name of Organization: Rancho Cordova Student Athlete Coalition

Name of Applicant and Title: Jennifer Laret- Vice President

Applicant's Phone: 916-712-9933 **Applicant's Email:** jennifer@a4promo.com

Submit a copy of your application with this page to the school superintendent(s). For your application packet to be considered complete the signed and dated endorsement form must be received by the City of Rancho Cordova by March 18, 2022. The superintendent will submit the form directly to the City's Community Enhancement & Investment Fund team. You must submit this form and a copy of your application to the appropriate superintendent or his or her designee no later than March 4, 2022. For Elk Grove Unified School District use BGrewal@egusd.net. For Folsom Cordova Unified School District use agriffin@fcusd.org. For Sacramento City Unified School District use dianne-brown@scusd.edu.

To be filled out by School Superintendent or designee

Endorsement Given Yes

Endorsement Withheld

Conditional approval of facility rental only

Superintendent's or Designee's Printed Name: Dr. Sarah Koligian Sarah Koligian

Date: 3/17/22

Project Information

Project Name

The Rancho Cordova Track Club Implement/Equipment

Project Synopsis

To provide the youth-athletes participating in Track and Field/ Cross Country the proper tools to develop in their events.

Project Description

The implements and equipment we are seeking will make practice and competition much easier for the coaches to demonstrate to the youth-athletes; and help them perform to the best of their ability. These implements and equipment will be used for years to come and help many generations of youth-athletes. We will continue to host events and provide opportunities for youth-athletes in Rancho Cordova and the greater Sacramento area. Our Vision is to be the Track and Field, Cross Country, and Road Race destination.

Project Team

Dennis Lamentia, Anthony Davis, Danielle Davis, Jen Laret, and Josh Gruver

Project Goals

1) Provide implements and equipment for all youth-athletes that participate in The Rancho Cordova Track Club. 2) Use such equipment and implements to develop youth-athletes in track and field events. 3) Continue to host high caliber events and give opportunities to youth-athletes to perform their events with the implements and equipment.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

Matching Funds

We will be seeking community resources such as sponsors and other entities that have a vested interest in community engagement.

Include Any Other Funding Contributions

We will continue to host events to contribute funding for equipment and implements.

Ongoing Operations and Maintenance Costs (if applicable)

We will host events/ practice that these implements, and equipment will be used. Some costs for maintenance will need to occur for the implements and equipment but we will handle those costs.

Total Community Enhancement & Investment Funds Requested

$25,000

Is this a multi-year request?

Yes

Number of Years

2

If you answered yes above, describe your sustainability plan and whether the project is viable as a single year request.

We will continue to host events, work with community sponsors, and seek grant opportunities.

How many years have you received funding for this project?

0

When will your request for funding sunset for ongoing programs?

This is an ongoing operation as we continue grow as an organization.

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

We will seek community sponsorships, grants and other organizations.

Project Schedule, Timeliness and Adaptability

Project Schedule

We plan to operate year-round once equipment and implements arrive.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

We will use the equipment and implements long after June 30, 2023.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Yes, we can operate under modifications and by virtual instruction.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

11230 Gold Express Drive
Rancho Cordova, California 95670

Other Physical Addresses (if project/program is at multiple sites)

Have you received a letter of support for the project/program from the property owner?

Requested, and will submit to city by March 18, 2022

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

No

Project Information

Project Name

Youth Sports Fee Assistance (Rancho Cordova Athletic Association RCAA)

Project Synopsis

This project would provide funds to the Cordova Community Council for distribution by the Rancho Cordova Athletic Association to create and manage a fee assistance program for children unable to participate in youth sports programs due to family financial barriers. Cordova Community Council will work with RCAA to establish criteria for assistance, operational guidelines for distribution of funds, as well as bookkeeping and reporting operations.

Project Description

This project meets CEIF project criteria in several ways: (1) supports growth and development of children and youth; (2) improves stakeholder involvement by supporting sustainability of new and legacy youth sports organizations; (3) increases community pride by showcasing a city which cares and focuses on welfare and opportunity of all children, regardless of economic status; (4) Improves the quality of life for city residents; (5) supports sports as a positive outlet for building stronger community connections, promoting physical fitness and an enhanced participation in sporting activities.

Project Team

Cordova Community Council, Shelly Blanchard, Executive Director Rancho Cordova Athletic Association • League Leadership from: o Rancho Cordova Soccer o Rancho Cordova Little League o Rancho Cordova Girls Softball o Rancho Cordova Jr. Lancers Football and Cheer o Rancho Cordova Youth Basketball o Cordova Blue Marlins o Cordova Cordettes o Crossover Basketball o Rancho Cordova Track Club o Cordova Recreation and Park District rec leagues o Others

Project Goals

The RCAA has set a 2022 goal of increasing league participation by 5 percent over pre-COVID 2019 registration. The involvement of more children with the help of fee assistance is a component of this strategic goal. Here is how it fits in: Goal #1 Open opportunity for play to children from families who cannot afford to pay Metric: Compare with 2019 attendance and measure growth attributable to assistance program. Goal #2 Assist leagues which are offering fee assistance to the detriment of operating budgets to maintain high quality play for all children Metric: Compare league data from 2019 to 2022 Goal #3 Live up to the vision that Rancho Cordova is

an inclusive community “Where All Kids Play.” Metric: Illicit testimonials through simple survey of participants Goal #4 Build enrollment among participating leagues Metric: Compare growth from base year utilizing league data

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$22,000

Estimated Breakdown of Project Expenditures

Fee Assistance Distributions: $20,000 Cordova Community Council project administration including bookkeeping, compliance monitoring and reporting services: $2,000

Matching Funds

It is possible that this project will receive funding from the Rancho Cordova Community Golf Classic to be held on April 30. The project has received previous funding at $2500 per year, however the tournament was canceled in 2020 and 2021 due to COVID. Thus, 2022 is a rebuilding year and it is not known at time of application what the results may be.

Include Any Other Funding Contributions

This project enjoys the support of the Cordova Community Council, which offers publicity tools and other intangibles, such as translation services, graphic arts support, website services, and by integrating this project into other existing youth sports initiatives managed by the Cordova Community Council on behalf of the Rancho Cordova Athletic Association.

Ongoing Operations and Maintenance Costs (if applicable)

It is projected that ongoing support at $20,000 annually will be needed through 2025-26

Total Community Enhancement & Investment Funds Requested

$44,000

Is this a multi-year request?

Yes

Number of Years

2

If you answered yes above, describe your sustainability plan and whether the project is viable as a single year request.

This project is viable as a single year request. The purpose of a multi-year request is to provide flexibility needed for optimum operations as the CEIF funding cycle does not align well with youth sports leagues operations, which are planned on a calendar year, not a fiscal year.

How many years have you received funding for this project?

2

When will your request for funding sunset for ongoing programs?

We are hoping that with the development of a full-time staff professional to support the RCAA in the future, that other funding sources can be found to support underprivileged youth in the community, however that structure is currently not in place. If that can be established, it is possible that this project funding could be ready for sunset in 2025-26.

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

This project currently is supported by the individual leagues at a lower level. The RCAA is watching for additional grant opportunities, however at this time there is a lack of capacity at the league and RCAA organizational level to launch a robust fund drive for this purpose. While we believe ample support for this exists elsewhere, the lack of grant and sponsorship outreach capacity is currently an issue.

Project Schedule, Timeliness and Adaptability

Application #30

Project Schedule

This is an on-going process, based on league registration calendars. All leagues have the opportunity to access the funds during their individual registration period with a reimbursement request due to the Cordova Community Council within 30 days from the close of league registration.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

This is a two-year campaign that would commence upon funding approval and continue for 24 months. The RCAA has developed a schedule and system for the application and reimbursement protocols. The schedule for execution of this project is highly dependent on league schedules. Through the RCAA, some standardization of registration schedules has been accomplished in order to optimize planning to assure equal access to these funds by all participating leagues (in other words, the money does not run out too early for sports later in the year) and assure equal application opportunities and distribution of funds to families throughout the year and in multiple sports. Training has also been provided in order to encourage leagues to take advantage of this opportunity. With the fundamentals now in place, plus the return of sports league activity which has recently commenced post-COVID, it is expected this project is now ready for more optimum operations.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Youth sports leagues have a proven record of adjustments to meet health orders as they have changed over the past two years. A total cancellation of youth sports, as seen in 2020, would erase the need for this project, and thus cancel this project.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

2729 Prospect Park Drive
Suite 117
Rancho Cordova, CA 95670

Other Physical Addresses (if project/program is at multiple sites)

While these sports leagues do operate on Cordova Recreation and Park District and Folsom Cordova Unified School District properties, this program is administrative in nature and has no bearing on the facilities, so all questions below will be answered in the negative.

Have you received a letter of support for the project/program from the property owner?

No

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

No

Fee Assistance Program Policies and Rules

The Rancho Cordova Athletic Association Fee Assistance Program, funded by the City of Rancho Cordova Community Enhancement Fund, has been established to meet an RCAA goal of "All Kids Play." The intended outcome is to make participation in RCAA member youth sports leagues accessible to all Rancho Cordova families, especially those encountering financial barriers. Fee Assistance is available through each league until funds are exhausted.

Who is eligible?
Fee Assistance is available to eligible players age 4 through 17
The fund will pay 75% of program registration fees up to $300 per qualified player

1. Applicants must be a resident of the City of Rancho Cordova and show proof of residency or valid driver's license or California State issued identification card.
2. Funding is available for 75% of program fees. Additional funds may be requested in extreme circumstances.
3. Fee assistance must be requested at the time of registration.
4. Fee support it available to multiple children within the same family. Please fill out a separate application for each child.
5. Applicants must re-apply each season to receive assistance.
6. If there is a credit on your league account, the credit will be applied first, then the assisted amount.
7. The RCAA will make every effort to ensure confidentiality amongst applicants.
8. Information provided by applicants will only be provided to League fee assistance administrator as required and shall only be used to determine eligibility for fee assistance.
9. Approved participants will not be separately identified nor be treated any differently than any other
10. member who has paid full price. Participants shall not be discriminated
11. against because of race, sex, color, national origin, age, sexual orientation or disability.
12. In the event of a league season cancelation, only the amount paid by the participant will be refunded. League registration refund cancelation policies and apply.
13. Submittal of an application does not guarantee fee assistance.

Application and Registration Process

Persons seeking fee assistance should complete the application and submit for review and processing at the time of league registration. All supporting documentation for approval must accompany the application. If you have questions or need assistance completing the application, please contact the league. Applications will be reviewed and processed within 5-10 business days.

You must submit the following documentation at the time of submittal:

- Fee Assistance Program Application
- Proof of residency (utility bill or valid driver's license or California State issued identification card)
- Approved income verification documents (see below)
- League registration form

Once approved, program participants will be registered and any remaining balance will be collected. All funds must be paid according to league policies. All incomplete applications will be denied funding.

Acceptable Forms of Income Documentation (Submit one)

- Verification of free or reduced school lunch program participation
- PGE bill indicating enrollment in the Care Credit program
- Phone bill indicating enrollment in the Life Line program
- CalFresh/EBT statement
- Other governmental issued aid statement (i.e. Medicaid, or other)
- Documentation of foster child status

If applicant is unable to provide the documentation listed above, please consult with your League Registrar.

Project Information

Project Name

Youth Sports Leagues Promo Campaign 2022-23

Project Synopsis

This project provides funds to the Cordova Community Council to assist the Rancho Cordova Athletic Association to continue efforts to improve and expand promotion for youth sports leagues in the City of Rancho Cordova.

Project Description

The project will utilize digital and traditional outreach efforts to boost the profile of youth sports leagues, including collaborative efforts which include mass distribution of flyers, development of high quality and effective signage and an expanded means to extend information to grow year-to-year league participation by 5 percent. The criteria addressed by this project include: (1) Supports the growth and development of children; (2) promotes opportunity for civic engagement; (3) enhances community pride; (4) improves quality of life; (5) supports sports as a positive outlet for building stronger community connections, promoting physical fitness and enhanced participation in sporting activities. This project will build upon previous upgrading of youth sports leagues digital profiles at www.rcathletics.org. The elevation of publicity for youth sports is critical to success for these leagues. During league COVID shutdowns, Rancho Cordova recreational leagues reported that many families have left their leagues to play in “pay to play” private leagues, especially among older players. Leagues will need to be rebuilt with younger players and parents with less experience in skills such as coaching and officiating. This is a nationwide challenge of the post-COVID era. This proposal would also continue to expand the outreach to schools in Rancho Cordova that are part of the Elk Grove and Sacramento City Unified school districts.

Project Team

• Cordova Community Council • Rancho Cordova Athletic Association • League Leadership from: Rancho Cordova Soccer, Rancho Cordova Little League, Rancho Cordova Girls Softball, Rancho Cordova Jr. Lancers Football and Cheer, Rancho Cordova Youth Basketball, Cordova Blue Marlins, Cordova Cordettes, Crossover Basketball, Rancho Cordova Track Club, Cordova Recreation and Park District rec leagues and possibly others.

Project Goals

Application #31

Goal #1 Grow Rancho Cordova youth sports league registration by 5 percent in calendar 2022 Metric: Measure league enrollment against base year 2019 enrollment Goal #2 Assist leagues to recover from CVOID-19 shutdown impacts to registration and enrollment Metric: Use year-to-year enrollment data to measure progress Goal #3 Improve and expand traditional forms of outreach, including signage programs, flyer distributions and improved special event participation Metric: Utilize year-to-tear enrollment data to measure effectiveness

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$42,000

Estimated Breakdown of Project Expenditures

100,000 high quality flyers for monthly distribution in city elementary schools commencing August 2022 through May 2023 (graphic design and printing) $10,000 Upgraded temporary sign program (10 rotations, 20 large format signs per rotation) (graphic design, printing and installation) $9,000 Project collateral giveaways and special events $5,000 Targeted advertising buys in social media and other available media $2,000 Website and app development and maintenance $6,000 Upgrading and replacement of outreach assets, including branded tent, tablecloths, etc. $4,000 Cordova Community Council services $6,000 TOTAL REQUEST $42,000

Matching Funds

None, however this project is an enhancement of substantial efforts carried out by individual leagues and has the in-kind support of the Cordova Community Council outreach tools including eblasts, with enhanced profiles at Cordova Community Council outreach events including Kids Day, Christmas Tree Lighting and Fourth of July parade, among others.

Include Any Other Funding Contributions

None

Ongoing Operations and Maintenance Costs (if applicable)

None

Total Community Enhancement & Investment Funds Requested

$42,000

Is this a multi-year request?

No

How many years have you received funding for this project?

5

When will your request for funding sunset for ongoing programs?

The RCAA has received support for league promotion under the Community Enhancement Grant program since 2015. During that period, the funds have been used to create and update a clearinghouse website, linking all youth sports together for improved visibility and impact. Flyers in both English and Spanish enjoyed wide distribution through the schools, supported by high quality signage posted outside schools which has enjoyed full cooperation by school leadership. In 2018, the project began tracking registration data to measure the success of the project. While there has been overall growth in youth sports participation as a result of these efforts, there is still work to be done. Growth tracking was suspended in 2020 and 2021 due to COVID, but has been rebooted in 2022 with a goal of 5 percent overall registration growth in the calendar year. Prior to the pandemic, data showed that the alarming deterioration in participation had been halted and growth was occurring, even though the Cordova Girls Softball League was operating under challenging conditions due to work on their home field and the Cordova Community Swimming Pool was closed. The COVID pandemic brought recreational youth sports to a halt in March 2020. As the pandemic continued, players with sufficient family income migrated to “pay to play” leagues which continued to operate, sometimes in defiance of local public health rules. Others have migrated to neighboring counties, where restrictions are more lenient. Overall, the deterioration of enrollment due to the pandemic was significant. This project was adversely impacted by COVID 19 and the financial/performance failure of the previous provider. However, with the assignment of additional Cordova Community Council staff resources and the return of youth sports following the pandemic, the project is once again gaining momentum.

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

It is hoped that a future project to expand staff support for the RCAA will lead to increased capacity for fundraising for this project.

Project Schedule, Timeliness and Adaptability

Project Schedule

This project was adversely impacted by COVID 19 and the financial/performance failure of the previous provider. However, with the assignment of additional Cordova Community Council staff resources and the return of youth sports following the pandemic, the project is once again gaining momentum. Looking forward, this new round of activity would follow this project schedule: August 2022: Finalize funding agreement and begin online/sign/flyer program in the schools, plus in-person staffing of information booths at Rancho Cordova school "back-to-school nights." September-December 2022: Continue online/sign/flyer program in schools, activity at Christmas Tree Lighting event January-May 2023: Continue online/sign/flyer program in schools, display and activity at Kids Day in the Park June-July 2023: Continue online flyer program, modified sign program with participation at Fourth of July Parade and festival events August 2023: Resume school year operations, including online/sign/flyer program and back-to-school nights

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

After trial and error, and lots of feedback from participating leagues, the RCAA believes they have hit upon the most effective strategy given available human resources. The RCAA's new website went live in March 2022 and will be an important tool as a clearinghouse for educating parents about registration deadlines and how to access league sign-up information, and financial aid if needed.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

If all sports leagues are canceled, as occurred in 2019 and 2020, there is likely to be little the RCAA can do to continue this program until leagues are allowed to play. However, leagues have become more adept at adapting to these changing environments. This project supports them, so is therefore dependent upon them being active.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

2729 Prospect Park Drive
Suite 117
Rancho Cordova, CA 95670

Other Physical Addresses (if project/program is at multiple sites)

Have you received a letter of support for the project/program from the property owner?

Requested, and will submit to city by March 18, 2022

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

Yes, at a public K-12 school site

Which school district is the public K-12 school site located in?

Elk Grove Unified
Folsom Cordova Unified
Sacramento City Unified

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR SCHOOL SITE USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a public K-12 school site, you must request the endorsement of the school superintendent of that school district.

One supplemental form is required per school district.

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by the corresponding school superintendent for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. Each participating school superintendent reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

To be filled out by grant applicant

Project Information

Project Name

Outdoor Synthetic Track for Rancho Cordova Track Club

Project Synopsis

Financing to build a new outdoor synthetic track on existing Rancho Cordova city owned property. Future plans would include building fields and amenities that would support additional Rancho Cordova youth leagues such as baseball, soccer, football, cheerleading, rugby, and lacrosse.

Project Description

Rancho Cordova Track Club is in need of a home track & field location for local Rancho Cordova community athletes and other track club members. New build items would include an 8 lane synthetic track, steeplechase pit, long jump pit, discus ring, and move existing hammer cage from Cordova High School to new home track location.

Project Team

Rancho Cordova Track Club Board: Dennis Lamantia- Rancho Cordova Track Club President Jennifer Laret- Rancho Cordova Track Club Vice President Josh Gruver- Race Director & Head Coach of Rancho Cordova Track Club Anthony Davis- Board Member & Coach Danielle Davis- Secretary

Project Goals

To build a multi-use sports facility that will support local sports. Sports would include but would not be limited to: track & field, soccer, baseball, football, lacrosse, rugby, etc. Current rental conditions are not conducive to youth sports leagues' current running budgets and fees. Current rental fees are hindering league growth and expansion. Facility availability is limited and current schedules for leagues are secondary to high school athletics making time availabilities late into the evening or not available at all. The hope for this location is that it would become a self-sustaining facility by hosting regional sporting events. Ultimately bring revenue into the city due to spectators staying in local hotels, eating at local restaurants, shopping at local stores, and using other local amenities.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$3,000,000.00

Estimated Breakdown of Project Expenditures

Build synthetic track, synthetic turf, concrete rings for discus, and shot put.

Matching Funds

Fundraising by local youth leagues Corporate Sponsorships

Include Any Other Funding Contributions

Fundraising by local youth leagues Corporate Sponsorships

Ongoing Operations and Maintenance Costs (if applicable)

TBD

Total Community Enhancement & Investment Funds Requested

$3,000,000.00

Is this a multi-year request?

No

How many years have you received funding for this project?

0

When will your request for funding sunset for ongoing programs?

When the facility is built

Do you plan to ask annually for funding?

No

What other funding will you seek to support your project?

Local sponsors, corporate sponsors, usage fees, club membership fees

Project Schedule, Timeliness and Adaptability

Project Schedule

Based on property availability and available financing.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

Based on property availability and available financing.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

No

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

TBD

Rancho Cordova, CA 95670

Other Physical Addresses (if project/program is at multiple sites)

Have you received a letter of support for the project/program from the property owner?

No

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

No

Project Information

Project Name

Renovation and Maintenance of Youth Sports Facilities

Project Synopsis

This project provides funds to the Cordova Community Council on behalf of the Rancho Cordova Athletic Association to be expended for materials and services to improve and maintain youth sports fields and facilities located on property owned by the Folsom Cordova Unified School District and/or Cordova Recreation and Park District using labor provided by either the property owner or other approved labor source.

Project Description

The project duplicates a program already operating in the City of Rancho Cordova, wherein the school district or park district provides labor or other services for field or facility improvements and repairs on their property with material and other services costs, and volunteer effort provided by the Rancho Cordova Athletic Association (RCAA). The projects are selected by a consortium of Rancho Cordova youth sports league leaders organized under the RCAA, a project of the Cordova Community Council Foundation (CCCF). CCCF provides coordination, reporting, bookkeeping and oversight. The sports leagues which stand to benefit from this project include Rancho Cordova Little League, Cordova Girls Softball, Rancho Cordova Soccer, Rancho Cordova Track Club, Cordova Blue Marlins, Cordova Cordettes, Cordova Jr. Lancers, Rancho Cordova Track Club, and possibly others. This project meets Community Enhancement Fund criteria by advancing community pride, promoting civic engagement, improving quality of life offerings to residents, and by providing growth and education opportunities for youth and children in the community through quality sports programs. This project leverages existing community assets and previous City investments. In partnership with the Cordova Community Council Foundation, the Project Team has proven capacity to deliver the project.

Project Team

Cordova Community Council Foundation, Shelly Blanchard, Executive Director Folsom Cordova Unified School District Cordova Recreation and Park District

Project Goals

Goal #1: Continue to enhance facilities in a variety of projects, including by not limited to, addressing rodent infestations and other turf issues including insufficient play-condition dirt on playing surfaces; enhancing playing conditions in area gymnasiums with wall

padding and safety cages; curing of unsightly conditions at sports fields which generally improve the facility and are of benefit to the surrounding neighborhood; proactive efforts such as the addition of sun shades to baseball dugouts and other venues; and COVID safety enhancements, such as the addition of sanitizer dispensers; and other restoration and maintenance issues at public sports facilities in Rancho Cordova. Metric: Enhancements accomplished with the help of this fund are reported annually in a report to the City. Goal #2: Attract and retain tournament play through upgrading sports facilities Metric: Report on progress is provided in an annual report to the City, measured by participation levels. Goal #3 Improve playing conditions to retain Rancho Cordova youth athletes who are migrating to other leagues in other communities due to facility issues Metric: Report on progress in this area in an annual report to the City Council, measured by participation levels Goal #4 Leverage this fund through matching grant opportunities and in-kind contributions from the Cordova Recreation and Park District and Folsom Cordova Unified School District Metric: Measured using feedback from in-kind donors and grant success.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$50,000

Estimated Breakdown of Project Expenditures

$45,000 for materials and services match, to be determined by leagues actively participating the RCAA during monthly meetings
$5,000 for administrative, coordination, oversight and bookkeeping (Cordova Community Council)

Matching Funds

Volunteer time provided by parent coaches and volunteers in youth sports is huge. Improvements which support this volunteer pulse point further leverages an enormous community asset, and improved field conditions grows the leagues. Here are the numbers for the Rancho Cordova sports leagues represented by RCAA: o $8.086 million: 900 coaches/volunteers @ 300 hours per season o $22,462: RCAA volunteers 15 @ 50 volunteers hours per year The project also relies on in-kind contributions of labor from the Cordova Recreation and Park District and the Folsom Cordova Unified School District.

Include Any Other Funding Contributions

None

Ongoing Operations and Maintenance Costs (if applicable)

These enhancements are focused on reducing operations and maintenance costs to youth sports leagues and public agency hosts

Total Community Enhancement & Investment Funds Requested

$50,000

Is this a multi-year request?

No

How many years have you received funding for this project?

7

When will your request for funding sunset for ongoing programs?

Large projects which have replaced the Girls Softball complex at Mills Middle School, the pool at Hagan Community Park, and eventually will renovate the Rancho Cordova Little League home fields should, over time, reduce the need for renovation projects. However, new facilities also come with a higher standard of care and maintenance, and until participation growth catches up with these costs, youth leagues are likely to require continued support of this kind. During the pandemic, youth sports leagues canceled play. One unintended consequence of this has been the loss of dedicated volunteers, who have migrated to pay-to-play leagues and teams in neighboring communities in Placer and El Dorado County. The loss of these volunteers are expected to take time to rebuild, but in the meantime these facilities will need to be recovered and maintained. In addition, as the renaissance of youth sport leagues in Rancho Cordova continues, greater participation is likely to drive the need for additional space and maintenance efforts. Until some sort of equilibrium is reached wherein paid participation is able to offset these costs, it is likely some subsidy will be needed into the future. RCAA has discovered that unwinding years of neglect at many of these publicly-owned facilities has been daunting and on-going.

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

Local leagues depend heavily on volunteers to help maintain fields and facilities. In addition, it is the obligation of public property owners like the school and park district to provide maintenance. The enhancements which are accomplished through this grant program elevate playing conditions for Rancho Cordova children, and include the on-going support of community volunteers which reduce the need for additional cash.

Project Schedule, Timeliness and Adaptability

Project Schedule

July 2022 Contract completed August 2022 Convene RCAA to build project list September 2022 Approve preliminary project list and begin fall projects January 2023 Approve remaining projects and begin spring projects June 2023 Complete all projects

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

Getting projects completed as part of this program has been challenging, especially during the pandemic, when partner organizations were often unavailable to provide the labor support that is envisioned by this partnership. The Cordova Community Council has dedicated additional staff resources to help manage these projects, providing additional leadership and follow-up to expedite these projects. However, it is an on-going challenge that grant awards are made after work schedules for partner agencies have been completed for the year, forcing RCAA projects to be inserted into work schedules on an "as available" basis.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

These projects were adversely impacted during the pandemic, particularly in the area of volunteer service. In addition, since public facilities were closed, and worker shortages were common, many planned projects could not be accomplished. There has been much progress in the area of work accommodations after two years of pandemic experience and moving forward it would be expected that adjustments would be easier. However, if there were to be a complete shutdown of youth sports, as was the situation in 2020, it would be expected that the volunteer corps would also disappear and labor shortages at public agencies would cause a slowdown or cancellation of these projects.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

2729 Prospect Park Drive
Suite 117
Rancho Cordova, CA 95670

Other Physical Addresses (if project/program is at multiple sites)

Various sites to be determined. Projects mainly take place at Cordova Recreation and Park District and Folsom Cordova Unified School District properties hosting youth sports league play.

Have you received a letter of support for the project/program from the property owner?

Requested, and will submit to city by March 18, 2022

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

Yes, at a park/park facility
Yes, at a public K-12 school site

Project Goals

Goal #1: Continue to enhance facilities in a variety of projects, including by not limited to, addressing rodent infestations and other turf issues including insufficient play-condition dirt on playing surfaces; enhancing playing conditions in area gymnasiums with wall padding and safety cages; curing of unsightly conditions at sports fields which generally improve the facility and are of benefit to the surrounding neighborhood; proactive efforts such as the addition of sun shades to baseball dugouts and other venues; and COVID safety enhancements, such as the addition of sanitizer dispensers; and other restoration and maintenance issues at public sports facilities in Rancho Cordova.

Goal #2: Attract and retain tournament play through upgrading sports facilities

Goal #3: Improve playing conditions to retain Rancho Cordova youth athletes who are migrating to other leagues in other communities due to facility issues

Goal #4: Recover facilities neglected due to the COVID 19 pandemic during which time volunteer activities have been curtailed and league play has been canceled.

Metrics

Goal	Metrics
Goal #1 Enhance playing conditions at Rancho Cordova facilities	Enhancements accomplished with the help of this fund are reported annually in a report to the City
Goal #2 Attract and retain tournament play through upgrading sports facilities	Report on progress in this area in an annual report to the City, measured by participation levels

Goal #3 Improve playing conditions to retain Rancho Cordova youth athletes who are migrating to other leagues in other communities due to facility issues	Report on progress in this area in an annual report to the City Council, measured by participation levels
Goal #4 Leverage this fund through matching grant opportunities benefitting youth sports	Report on progress in this area in an annual report to the City, measured by grant application activity and success

Funding Request

- **This is a one year request**
- **Funding request: $50,000**

  $45,000 for materials and services match, to be determined by leagues actively participating the RCAA

  $5,000 for administrative, coordination, oversight and bookkeeping (Cordova Community Council)
- **Matching Funds and In-Kind Contributions:** Volunteer time provided by parent coaches and volunteers in youth sports is huge. Improvements which support this volunteer pulse point further leverages an enormous community asset, and improved field conditions grows the leagues. Here are the numbers for the Rancho Cordova sports leagues represented by RCAA:
  - $8.086 million: 900 coaches/volunteers @ 300 hours per season
  - $22,462: RCAA volunteers 15 @ 50 volunteers hours per year

(Value of volunteer time calculated at $29.95 per hour in California/Independent Sector, a national membership organization that brings together the charitable community, foundations and corporations to advance the common good.)

Project Schedule and Timeliness

July 2022	Contract completed
August 2022	Convene RCAA to build project list
September 2022	Approve preliminary project list and begin fall projects
January 2023	Approve remaining projects and begin spring projects
June 2023	Complete all projects

Because facilities are utilized during prescribed athletic seasons, work is mostly completed during off-season periods and completed before a particular season begins. This creates natural deadlines for the completion of the projects and motivates leagues and volunteers to complete projects before they are needed.

One challenge which has been encountered in the past is the availability of staff at the Folsom Cordova Unified School District to participate as the leverage partner. In these cases, the projects have experienced delays. Projects leveraging labor from the Cordova Recreation and Park District have not been delayed by labor issues.

Adaptability to public health agency orders

Experience has shown that this project is not directly affected by Health Orders and other COVID 19 restrictions. However, the availability of volunteers can be affected could produce unavoidable delays.

History of support and sustainability

The RCAA has received support for sports facility improvements under the Community Enhancement Grant program since 2015. During that period, the funds have been used to correct long-neglected safety problems at facilities across the city, including recovery of the former Mills Little League site located on Dawes Street.

This project enabled both Cordova Girls Softball and Rancho Cordova Little League to continue to offer playing locations during other renovations. In particular, it sustained the Cordova Girls Softball league through the construction of their new facility. Not only have families in both leagues benefitted, but the neighborhood has benefitted, as well. The massive clean-up of the property corrected dangerous conditions created by long-neglected tree trimming, and clearing of over-growth has calmed homeless activities in the area – appreciated by the neighborhood and Cordova Gardens Elementary School community.

The minor investment in the Cordova Blue Marlins for a travel trailer has enabled that program to continue operations during the period that Hagan Park Community Pool has been unavailable. In the case of Little League, the fund has allowed for incremental improvements to their Ahlstrom Park home fields while the City of Rancho Cordova wrestles with the many challenges which need to resolved to provide for a modern, updated facility for this legacy organization.

The funds have also assisted in the long-desired launch of basketball offerings for youngsters in the elementary grades and has boosted care of turf at Stone Creek Park, home to Rancho Cordova Soccer, the largest youth sport league in Rancho Cordova which is offering excellent recreational play to more than 1,000 children each year.

The program has recently provided a small investment in the Rancho Cordova PAL Jr. Giants Program, which serves the neediest children in the community, and is expanding each year, by providing funds for a storage container for Jr. Giants program needs and equipment.

Indeed, this program has filled gaps for virtually every Rancho Cordova youth sport league and is sparking the development of new leagues. While relatively minor in terms of dollars, these

small investments in volunteer-driven recreational sports leagues which are providing the backbone for youth sports in the community have been transformative over the years, providing an excellent investment in the families of Rancho Cordova. We can think of no greater community enhancement than that.

Finally, the project represents community collaboration at its best. Because the youth sports community works together through RCAA to set spending priorities, competition for resources is replaced by a collegial and collaborative approach that considers wide community needs over a more singular perspective. The project has also built new partnerships between community taxpayers and user groups and school and park district officials, with each gaining new understanding of the challenges faced by all involved in providing recreational sports opportunities for children.

What is the future need?

Large projects which have replaced the Girls Softball complex at Mills Middle School, and eventually will renovate the Rancho Cordova Little League home fields should, over time, reduce the need for renovation projects. However, new facilities also come with a higher standard of care and maintenance, and until participation growth catches up with these costs, youth leagues are likely to require continued support of this kind.

During the pandemic, youth sports leagues canceled play. One unintended consequence of this has been the loss of dedicated volunteers, who have migrated to pay-to-play leagues and teams in neighboring communities in Placer and El Dorado County. The loss of these volunteers are expected to take time to rebuild, but in the meantime these neglected fields will need to be recovered. In the year ahead, it is expected funds from this grant will be needed to

In addition, as the renaissance of youth sport leagues in Rancho Cordova continues, greater participation is likely to drive the need for additional space and maintenance efforts. Until some sort of equilibrium is reached wherein paid participation is able to offset these costs, it is likely some subsidy will be needed into the future. RCAA has discovered that unwinding years of neglect at many of these publicly-owned facilities has been daunting and on-going.

Project Location

All projects in this program have been on property owned by the Folsom Cordova Unified School District and Cordova Recreation and Park District. Together, these two governmental agencies provide all the facilities supporting recreational youth sports leagues in the community.

Partner Endorsements

This collection of projects will require the participation of the Cordova Recreation and Park District and the Folsom Cordova Unified School District. The required supplemental endorsement document has been submitted.

I acknowledge that I have read and understand the Supplemental Endorsement Form requirements.

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR CORDOVA RECREATION & PARK DISTRICT (CRPD) PROPERTY/FACILITY USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a park or park facility, you must request the endorsement of the Cordova Recreation & Park District (CRPD).

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by a representative of CRPD for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. The CRPD representative reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

To be filled out by grant applicant

Project/Program Name: Renovations and Maintenance of Youth Sports Facilities

Name of Organization: Cordova Community Council/Rancho Cordova Athletic Association

Project Information

Project Name

Parkway Half Marathon

Project Synopsis

Continue funding the Parkway Half Marathon and Otter Run to align as a first-class major active-lifestyle event with the City of Rancho Cordova

Project Description

There are two components of the request 1. Maintain the start and finish line configuration from the previous year's grant, which considers the start line in William Pond Park (to facilitate larger volume parking accommodations) and all finish lines and the entire Kids Otter Dash within the Rancho Cordova City limits, similar to the Eppie's Great Race configuration (and what is now the Great American Triathlon). The section along the American River Parkway, from River Bend to Sunrise, is the main route for the Parkway Half Marathon, and travels through the most pristine, remote, and expansive portions of the Parkway. As such, a grant to continue the Parkway Half Marathon route and finish line within the Rancho Cordova city limits aligns the city with a major running event, as well as a meets the goal of having a community health a fitness event. The Parkway Half also raise awareness for, as well as greatly contributes and promotes, Rancho Cordova as an active lifestyle community in concert with other local jurisdictions health resources and environments. The alignment of the Parkway Half Marathon with Rancho Cordova elevates the City as a primary regional supporter of the Parkway, as proceeds from the race are donated to fund projects and improvements along the Parkway. Having the race route and finish line within the City and connected to other existing events should be beneficial to all local residents. 2. Maintain support for the Kid's 1k "Otter Dash." This is known as the Otter Run. The goal is to align this event to the morning of Kids' Day in the Park. As Kids' Day is no cost to participants, the object is to continue with keeping the Otter run at no charge to all Rancho Cordova children as well. The participants in the event have all the safety, supervision, and environmental needs of a race event. Plus they are provided with a shirt, medal, and snacks.

Project Team

Parkway Half Marathon is produced by Sacfit, a charitable non-profit 501(c)(3) organization. Tax identification number 11-3782144. The race committee is primarily volunteer experts working with industry specialists in producing race events, including Rich Hanna's Capital Road Race Management (CRRM). Sacfit, aligned with CRRM, has a track record of success for the past 13 years. The race is

Application # 34

unique in that it has a separate half marathon runners' and walkers' course. There is, also, a 5k run/walker and 1k kids Otter Dash. The Parkway Half Marathon is an established, first-class race, and is the third largest in the region. Over 30,000 participants, mostly first-time half marathoners, have enjoyed the race over the past 13 years. It is the only race that provides: full color shirts, finisher medals, full lunch, more aid stations of any other half marathon, and nearly two dozen bands along the course. The finish line pavilion provides space community organizations, beer garden, music and activities for children. The primary goal of the race is to provide a positive race experience for the participants to inspire regular fitness engagement. The secondary is to help upgrade and improve the Parkway. The race has raised over $370,000, with 100% of those proceeds used to benefit the Parkway. The most recent project was a collaborative effort with the City of Rancho Cordova, the Cordova Recreation and Park District, the Rotary Club of Rancho Cordova and the Parkway Half Marathon, led the project to install an ADA accessible, dog friendly, bike safe and runner/walker useable water fountain in Hagan Community Park next to the Parkway bike and pedestrian path.

Project Goals

1. The goal of keeping the finish line inside the city limits is to provide a vehicle where the event is recognized as a city event. Provide opportunity to rebrand race. Provide the best affordable half marathon race to the community. Drive out-of-town participants to use Rancho Cordova's hospitality services. 2. The goal of sponsorship of the 1k Kids race is to provide a free event with all the excitement of a race event in concert with the existing Kids Day event in the afternoon. 3. The sponsorship of aid stations staffed by youth organizations as a direct follow through of funds from the grant to local youth programs

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

Total project cost: Approx. $85,000

Estimated Breakdown of Project Expenditures

Estimated breakdown of project expenditures: • Race Timing and Event Management - $30,000 • Aid Stations - $2,500 • Shirts - $12,000 • Medals - $15,000 • Food - $6,000 • Permits - $10,500 • Insurance - $1,000 • Marketing - $5,000 • Equipment Rental - $3,000

Matching Funds

3500 bottles of water, food samples for participants, goodie bag items.

No

How many years have you received funding for this project?

1

When will your request for funding sunset for ongoing programs?

N.A

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

Running related sponsors of in-kind items for the participants.

Project Schedule, Timeliness and Adaptability

Project Schedule

Application # 34

Permitting with County Parks – September 2022 • Website update and registration opening – October 2022 • Recruitment of volunteers, timing management – October 2022 • Securing sponsors – October 2022 thru March 2023 • First email broadcast – October 2022 • Second email broadcast – December 2022 • Medal and shirt design – January 2023 • Securing vendors, additional permits – Jan thru March 2023 • Third email broadcast – March 2023 • Medal cast and Shirt printing – April 2023 • Race event – April 29, 2023

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

This is an annual race that has been successfully conducted over the past 13 years on time and on the specified date. Because this is a major event that markets a certain date, the event must occur as advertised so that it's participants can plan and train for the event. With the resources and infrastructure, we have developed, nurtured, and grown of the years, these factors have cemented a track record of successful completion for this event.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Yes. Having to operate this event virtually over the past two years, we have the experience, nimbleness, and infrastructure to operate virtually.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

2300 Rod Beaudry Drive
Rancho Cordova, California 95827

Other Physical Addresses (if project/program is at multiple sites)

Have you received a letter of support for the project/program from the property owner?

No

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

No

Project Information

Project Name

Mather Wrestling Club

Project Synopsis

Excited to be offering the Mather Wrestling Club as a youth sports and fitness club providing an outlet for youth (girls and boys) between the ages 8 to 14. The club offers the benefits of exercise in a controlled positive and fun environment during the summer months.

Project Description

The sport of wrestling is offered for girls and boys at both Mills and Mitchell Middle Schools and Cordova High School. The Mather Wrestling Club is a youth sports and fitness club providing an outlet for youth (girls and boys) between the ages 8 to 14. It will benefit the community of Rancho Cordova by creating a venue that all youth can come. The club promotes community pride and supports the growth and development of youth. Participation in the club will include an application and anticipated fee of $75. Scholarships will be made available to those who cannot afford the participation fee up to the allotted funds made available to award scholarships. Optional Competition: Club members will need USA wrestling card to compete. $40 each. https://www.usawmembership.com Tournament fees generally $10-15 each to be paid by wrestler at the venue. Tournament transportation: Parents provide. Coach will be at tournaments with pre-planning for those wishing to compete at a local event. Coach Bio: Coach Zilles has been coaching wrestling at Mitchell Middle School for the past 6 years. Coach Zilles is a certified coach by the National Federation of State High School Associations and is First Aid/CPR/Concussion recognition and prevention trained. After serving eight years in the Marine Corps, Coach Zilles returned to complete his education at Sacramento State where he earned his degree in Geologic Sciences and currently practices with a local consulting firm. Coach Zilles is a resident of Mather, works in Rancho Cordova at Kleinfelder, Inc. (engineering firm), and is a product of Rancho Cordova Schools (St. John Vianney, Mills, and Cordova). He also has 3 Children attending(ed) Folsom-Cordova Schools; Mather Heights, Mitchell Middle, and Cordova High School.

Project Team

Joe Zilles, Coach

Project Goals

Application #35

The long-term goal to this wrestling club is to offer a positive and fun environment, introduce kids to the sport, teach sportsmanship, promote enthusiasm and team spirit, and build a path for those interested to follow as they transition to Middle and High Schools. As an introductory club, we will teach basic and fundamental skills centered around three basic concepts (Takedown, Breakdown, and Pinning Combinations) that the kids can use to compete in a novice level local tournament. Each day will start with a warm-up (agility and skill) and stretching followed by instruction and practice of the element taught that day. Fun activities such as relay races, or challenge type exercises will be interjected from time to time in the curriculum. Metrics of success: Participation should grow from year to year.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$24,000

Estimated Breakdown of Project Expenditures

Printed club T-shirts $2,000 various sizes Printed Club shorts $1,000 various sizes Participatory swag: bag, water bottle, medals $200 Mat cleaner $100 Mat tape $100 Club snacks $400 First aid supplies $200 Insurance $2,000 Business license /other administration fees (County, State, Federal, website maintenance) $1,500 Wrestling Mat $12,000 Storage $1,800/yr Scholarships $2,500

Matching Funds

None at this time.

Include Any Other Funding Contributions

None at this time. Have applied for 501C status to seek donations.

Ongoing Operations and Maintenance Costs (if applicable)

Requested funds to support storage of equipment beyond the club dates. Monthly storage unit costs have been included $150/month=$1,800/year.

Total Community Enhancement & Investment Funds Requested

24,000

Is this a multi-year request?

Yes

Number of Years

3

If you answered yes above, describe your sustainability plan and whether the project is viable as a single year request.

The club experience is intended to build strong local interest in the sport and provide a smooth and confident transition for elementary grade kids to Middle School and High School. Since the club is intended to draw kids from all over Rancho Cordova, it is meant to supplement the Middle School wrestling programs a t Mills and Mitchell Middle Schools, as well as Cordova High School. The greater the participation, the better the chances are of success and sustainability. The first year will provide the platform from which to gauge the interest and fine tune things like instruction and take in feed back from parents and participants. The second and third years will show strong interest and participation will grow. as it grows a continued sense of success will drive re-evaluations of club curriculum, increased participation, staffing, and other needs. The club participation fees collected can be used to offset future costs of materials outlined in the cost section.

How many years have you received funding for this project?

1

When will your request for funding sunset for ongoing programs?

August 2025

Do you plan to ask annually for funding?

Yes

Application #35

What other funding will you seek to support your project?

Applied for 501C status. will seek community donations form local businesses.

Project Schedule, Timeliness and Adaptability

Project Schedule

Multi-year for first 3 years. Club dates: Mondays and Wednesdays, 5:00-6:30 Summer Start July End August

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

This program is intended to support the local middle school programs prior to each school season (Nov-Feb).

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Yes. as done recently, we had to pivot our start dates to accommodate local requirements to adhere to changing health concerns.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

Mitchell Middle School, 2100 Zinfandel Dr.
Rancho Cordova, CA 95670

Other Physical Addresses (if project/program is at multiple sites)

Have you received a letter of support for the project/program from the property owner?

No

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

Yes, at a public K-12 school site

Which school district is the public K-12 school site located in?

Folsom Cordova Unified

Project Information

Project Name

Capacity Building for Community Bicycling in Rancho Cordova

Project Synopsis

Sacramento Area Bicycle Advocates (SABA) and Bicycling Advocates for Rancho Cordova (BARC) seek funding for a host of activities that encourage bicycling in Rancho Cordova. Activities include valet bicycle parking at community events, bicycle repair and maintenance clinics, social rides, bicycle education, and a bicycle apprenticeship program and outreach.

Project Description

SABA and BARC have provided experiences for Rancho Cordova community members with funds from the CEIF for the last four years. These funds have provided bicycle encouragement activities for Rancho Cordova citizens, and has built capacity in BARC, with the goal that it become a self-sufficient bicycling non-profit. Activities such as bike valet, social rides, education about bicycle mechanics and cycling skills, have all been a part of a larger community cycling program for Rancho Cordovan citizens. With the pandemic receding, more activities and events are returning to the calendar. BARC will provide valet bike parking at a full set of venues this year. BARC will kindly park your bicycle at the July 4th celebration, the Capitol Air Show and other regular events. With funding from the 2021-22 grant plus a sponsorship acquired by SABA, we supported four Rancho Cordova community members in becoming Licensed Certified Instructor's (LCI) with the League of American Bicyclists. We will provide RIDEshops - quick education and refresher skillbuilders - before social rides and BARC will organize and implement two bike rodeos. SABA will provide a senior LCI to coach the new LCI's, increasing the reach of the events. SABA's vision is to open a "Bicycle Fix-it Kitchen", a place where community members can work on their own bicycles, or have them worked on by mechanics who have completed SABA's mechanic apprenticeship program. This program teaches basic mechanic skills that are marketable and a service in Rancho Cordova where only one bike shop exists. Few families have the resources to have a bike serviced in the bike shop in town which caters to racing, leaving them with bicycles in need of basic repair. SABA's apprenticeship program will produce a cohort of bicycle mechanics who can work in the community on bicycles in need of basic repair. The result of our work doubles the impact to support residents in choosing a bicycle for daily trips or recreation.

Project Team

Application #36

SABA: Debra Banks, Executive Director, Robert Christiansen, Program Manager, Jeremiah Rohr, Office Manager BARC: Nick Buchen, Executive Director, Austin Allen, Fayzah Mughal and Karl Haas, Board Members, BARC

Project Goals

Goal 1: Continue implementation of a community cycling program in Rancho Cordova. a. BARC will provide Bike Valet services to at least five festivals in Rancho Cordova. b. BARC will hold a set (4-5) of Social Rides around Rancho Cordova that encourage and boost confidence in riding. These will be open to all residents in Rancho Cordova. c. BARC will provide two energizer activities during May is Bike Month. d. BARC & SABA will host two Bike Rodeo's. e. SABA will continue to bring lightly used bicycles in safe and good working order to events in underserved neighborhoods for community members in need. Goal 2: Build capacity in Rancho Cordova to service bicycles within the community. a. SABA and BARC will hold (8) bike repair clinics, and (4) of them will be in association with other events (Bike Valet or social rides). b. SABA will run a mechanic apprenticeship program to teach a cohort basic bicycle mechanic skills. Matched with SABA's master mechanics, this cohort will have classroom training and will service bicycles in the neighborhoods. SABA anticipates working on at least 100 bikes throughout these repair events, which keep people rolling and bicycles out of garages, basements or worse, landfills. Goal 3: Continue building capacity in BARC as a bicycle advocacy organization. a. BARC will continue to broaden its reach within Rancho Cordova by tabling at community events. Engaging the community on topics such as bicycle infrastructure, new developments in street design and other infrastructure about bicycle facilities will help deepen the community's understanding of how good street design can encourage cycling. b. BARC and SABA will distribute a variety of bicycling information. At tabling events, BARC will distribute lights for bicycles so that riders are safe in dusk lighting and tip books on cycling safety. c. Building a database of volunteers will provide credibility to BARC's advocacy, measured by the growing number of participants on its roster.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$18585

Estimated Breakdown of Project Expenditures

These are totals for each set of activities (staffing, materials (printing, promotional materials), mileage, equipment). A spreadsheet with a breakdown for each set of activities is available. Bike Valet: $ 3250 Social Rides: $ 982 Bike Mechanics: Ride Ready Repair Clinics + Apprenticeship program: $ 5402 Bike Education & Rodeos: $ 4585 BARC Capacity Building: $ 2500 Grant Management: $ 1866

Matching Funds

SABA has allocated $1663. in matching funds to strengthen the set of tools to manage and implement the Apprenticeship program.

Include Any Other Funding Contributions

SABA has two direct channels of lightly used bicycles that can be checked and equipped with lights, a lock and helmet. We expect to give away at least 30 bicycles to community members in need and who can't afford a bicycle.

Ongoing Operations and Maintenance Costs (if applicable)

We do not foresee long term maintenance costs.

Total Community Enhancement & Investment Funds Requested

$18585

Is this a multi-year request?

No

How many years have you received funding for this project?

4

When will your request for funding sunset for ongoing programs?

We expect BARC to be a self-sufficient bicycle organization in 2024.

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

SABA has partnerships with the 50Corridor TMA and BikeLab to deepen and broaden this scope of activities. In addition, SABA will be hosting May is Bike Month for the entire SACOG region, which means that SABA will promote and amplify the events that BARC and SABA are hosting in Rancho Cordova-throughout May. SABA also has a relationship with the Sacramento Bike Kitchen that assists with providing lightly used bicycles for those in need and can't afford a new bicycle. We expect this partnership to assist with both bicycles and in realizing the long-range vision of a "Bicycle Fix-it Café". SABA has received a SMUD Shine grant to implement a bicycle mechanic apprenticeship program in South Sacramento. We will be using some of the tools purchased through our SHINE Grant for the Apprenticeship program. Plus, the tools that we are beginning to acquire from CEIF funds that are not disposables (cables, chains, brake pads, etc) will be purchased and then handed over to the Rancho Cordova "Bicycle Fix-it Kitchen" when realize that larger vision.

Project Schedule, Timeliness and Adaptability

Project Schedule

Spring 2022 Summer 2022 Fall 2022 Winter 2022-23 Spring 2023 BARC: Social Ride w/new LCI's BARC: Bike Valet at Kids Day &/or IFest BARC: May is Bike Month energizer activity SABA: Ride Ready Repair, Bike Mechanic Apprentice Program BARC: Social Ride w/new LCI's BARC: BikeValet: July 4th plus a Bike Mechanic SABA: Ride Ready Repair, Mechanic Apprentice Program BARC: Social Ride w/new LCI's BARC: Bike Valet: Cap City Air Show: plus a Bike Mechanic BARC: Bike Valet at Family Fall Festival BARC: May is Bike Month Bike Rodeo! SABA: Ride Ready Repair, Mechanic Apprentice Program at Mather BARC: Social Ride w/new LCI's BARC: Light's ON! 3-4 evenings to be determined once Daylight Savings time changes SABA: Ride Ready Repair, Mechanic Apprentice program at Mather BARC: Social Ride w/new LCI's BARC: Bike Valet: Kids Day and IFest. BARC: May is Bike Month energizer activities BARC: May is Bike Month Bike Rodeo! SABA: Ride Ready Repair + Apprentice program at Mather Spring 2022: BARC: Social Ride w/new LCI's; Bike Valet at Kids Day &/or IFest; May is Bike Month energizer activity; SABA will launch Ride Ready Repair, Bike Mechanic Apprentice Program. Summer 2022: BARC: Social Rides, Bike Valet & SABA: Continuation of Apprenticeship Program Fall 2022: BARC: Social Rides, Bike Valet, a Bike Rodeo & SABA: continuation of Apprenticeship program Winter 2022: BARC: Social Ride, Light distribution, & SABA: Continuation of Apprenticeship program Spring 2023: BARC: Social ride, Bike Valet, May is Bike Month Energizer & Bike Rodeo. SABA: Completion of Apprenticeship Program.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

Given that all of our events are being held by two partnering organizations, we do not expect to have any challenges to execute all of the activities. The majority of events are seasonally based, with the least going in during the winter months (except Light's ON!). Many events and activities are based on either Rancho Cordova community calendar or during May (is Bike Month). We do not anticipate and problems completing by June 30, 2023.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

The only activities that would be completely shuttered due to a new variant of the Coronavirus is Bike Valet. Everything else can be delivered either virtually, or on an individual basis. Ex: Social rides can be drawn up and promoted through social media channels, with earned swag to people who participate in all of them. Same is true for May is Bike Month energizer activities. The Mechanic Apprenticeship program is created to be virtual and in-person. All in-person events are held outdoors and we would adhere to the latest guidance issued by Rancho Cordova or the CDC. SABA has created a process for Ride Ready Repair clinics that is 95% touch free, with minimal contact with bicycle owners. We hope to not need to pivot for pandemic reason, but if we do indeed need to, we are ready.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

Variety of locations throughout Rancho Cordova
Rancho Cordova,, CA 95670

Other Physical Addresses (if project/program is at multiple sites)

Mather Community Campus 10566 Peter A McCuen Blvd, Mather, CA 95655

Have you received a letter of support for the project/program from the property owner?

No

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

No

Subject: Letter of Support for SABA's Community Enhancement and investment Fund

Dear Ms. Banks:
I am writing to express BARC's board of directors' support for the Sacramento Area Bicycle Advocates (SABA) application for Measure H Community Enhancement and Investment Funds. SABA has supported BARC in building a foundation, as well as assisting us with a path forward to organizational status as a self-sufficient bicycle advocacy group. We have learned how to independently run bike valet events, and SABA has been instrumental in supporting our organization to obtain four Licensed Certified Bicycle Instructors from the League of American Bicyclists.

SABA has remained active in the Rancho Cordova community, offering services like bicycle skills courses and bicycle repair clinics to our residents. In partnering with SABA, BARC's goal and hope is to expand outreach and service opportunities, as well as to establish an active, engaged, and proud bicycling community in the city of Rancho Cordova. BARC fully supports this request for Measure H Funds, and encourages its approval. Our partnership is vital to the growth of a community bicycling program in Rancho Cordova.

Sincerely,

Nick Buchen, Director
Bicycling Advocates for Rancho Cordova

Project Information

Project Name

Find Your Voice Creative Writing Workshop Series

Project Synopsis

916 Ink will partner with classroom teachers to provide high-quality, creative writing workshops for 175 3-12 grade Rancho Cordova students. Each student will receive 18 hours of California Arts and Common Core standards-aligned instruction with trained teaching artists and become a published author in an anthology of student work.

Project Description

Find Your Voice is a semester-length, school site–based program. Each student participating in a workshop series completes 18 hours of creative writing instruction; learns effective communication skills; creatively makes decisions and solves problems; polishes three to five pieces of creative work for publication; and becomes a published author. Students generate original poetry, fiction, and creative nonfiction. 916 Ink releases one anthology of student work per school site at the conclusion of each program. During the COVID-19 pandemic, 916 Ink's staff found that students were struggling to process their feelings of anxiety and social isolation due to the shift to distance-learning and the suspension of many wraparound services that our schools provided. Using best practices in trauma-informed curriculum design, our staff pivoted quickly to design a series of creative writing lessons using the traditional storytelling arc The Hero's Journey. Each step in the journey is examined through a trauma-informed lens. Students develop social emotional learning skills through interactive writing prompts, revision-based activities, and lessons in literary devices. This helps students realize the impact of obstacles, relationships, and decisions they make. Our workshop method creates a safe environment for exploration and experimentation for participating students. The writing and sharing of stories builds empathy, increases confidence, and gives youth the agency to understand the power of their personal narratives. We structure our workshops to stimulate social emotional learning, including small group settings, peer collaboration and reflection exercises, multiple modes of response, active listening practice and peer-to-peer feedback. By participating in high-quality, arts-integrated enrichment underserved student subgroups can improve their academic attitudes, academic behaviors, and experience social-emotional development, all of which are long-term predictors of success.

Project Team

Ian Hadley, Executive Director, 916 Ink Nikki Cardoza, Director of Resources, 916 Ink Paulette Greenhouse, Program Manager, 916 Ink Emma Hoppough, Production Coordinator, 916 Ink Angela Tannehill, Creative Designer, 916 Ink Our 15 workshop facilitators are committed and passionate individuals who come from the literary and/or education communities. These teaching artists have a wide range of professional, artistic, and cultural perspectives and experiences.

Project Goals

By the end of each 12-session workshop series, we anticipate that 175 students will: complete 18 hours of ELA instruction; learn effective communication skills; creatively make decisions and solve problems critically; polish three to five pieces of creative work for publication; and become a published author. An ability to read and write is essential for thriving in our increasingly complex and literate world. Those who possess strong communication skills are equipped with the power to connect with, comprehend, and interpret the world around them. Not only does this benefit the individual but it also ultimately benefits the community at large, allowing for a dynamic and growth-oriented populace. Our pre/post evaluation results show that after successful completion of a workshop series: 84 percent of youth improve in terms of social-emotional development, with 78 percent believing they are good at using their imagination and 77 percent enjoying meeting people who are different from them. Additionally, 87 percent of students reported improved attitudes toward writing, with 70 percent looking forward to writing down their ideas and 60 percent believing the stories that they can tell matter to others. 916 Ink's evaluation toolkit includes nine data collection tools developed by a leading evaluation firm that measure immediate, intermediate, and long-term outcomes. 916 Ink utilizes a pre and post program survey to measure the program's impact on literacy skills, attitudes towards writing, reading, school, vocabulary, communication, mental health, and personal goals. Where applicable, teachers and parents are also asked to complete surveys on outcomes. Attendance is taken at each session and demographic data collected. Twenty-eight individual outcome elements are grouped into three primary domains: 1) Academic Attitudes, 2) Academic Behaviors, and 3) Social-Emotional Development.

Project Schedule

Fall semester (September 12, 2022 - December 9, 2022 Robert J. McGarvey Elementary Cordova Meadows Elementary Walnutwood High School Spring semester (January 23, 2023 - May 5, 2023) AM Winn Elementary Kinney High School George Washington Carver High School

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

916 Ink works directly with school site partners to schedule our workshop series and publication of anthologies to mirror as much as possible a typical school semester. Our program is designed with 12 sessions and is intended to take place weekly during the school year, we factor in all school holidays and in-service days for specific districts when scheduling to ensure completion of each program leaving 4-6 weeks at the end of the program to publish and distribute the student anthologies before the summer break.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

916 Ink has created a virtual version of our Find Your Voice Creative Writing Workshop Series based on best practices in on-line teaching and curriculum development. We are prepared to shift all programs to an virtual program should that be necessary. In the 2021-22 school year we hosted programs successfully in-person and virtually for Rancho Cordova students.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical address of project location

2550 La Loma Dr.
Rancho Cordova, CA 95670

Other physical addresses if project/program is at multiple sites

George Washington Carver High School, 10101 Systems Pkwy, Sacramento, CA 95827 Robert J. McGarvey Elementary, 4350 Sophistry Dr, Rancho Cordova, CA 95742 Kinney High School, 2710 Kilgore Rd, Rancho Cordova, CA 95670 Walnutwood High School, 10850 Gadsten Way, Rancho Cordova, CA 95670 AM Winn Elementary, 3351 Explorer Dr, Sacramento, CA 95827

Have you received a letter of support for the project/program from the property owner?

Requested, and will submit to city by March 18, 2022

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site or a park/park facility?

Yes, at a public K-12 school site

Which school district is the public K-12 school site located in?

Elk Grove Unified
Folsom Cordova Unified
Sacramento City Unifed

Public Record Unless otherwise exempt under applicable law, applications and application materials are public records. All information received from an applicant, whether received in connection with a grant application or in connection with any grant-funded activities performed are subject to disclosure pursuant to the California Public Records Act, unless otherwise exempt. Next Steps Applicants will receive acknowledgement once their application is received. When the application period closes, staff will review each application according to the application criteria and prioritization method listed within the Fiscal Year 2022/2023 Grant Application Process and Criteria document. Should staff have any questions or need clarification on your application, they will contact you. You are invited to attend any of the public City Council Meetings. It is anticipated at this time that the Community Enhancement & Investment Fund team will present information to the City Council starting in April and continuing through June. We may invite applicants to present their project and we may make selection recommendations to Council during the May City Council meetings. In addition, the Community Enhancement & Investment Fund team will send periodic updates to grant applicants via e-mail. It is possible that all funding decisions for the Fiscal Year 2022/2023 Community Enhancement & Investment Fund could be made in May and formally adopted by City Council by early June. Staff intends to notify all applicants of the funding decisions made by the end of June. If you

have not signed up to receive automatic notifications when council meeting agendas are posted, you can do that by using the link below: https://www.cityofranchocordova.org/residents/what-s-happening/sign-up-for-e-news

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR SCHOOL SITE USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a public K-12 school site, you must request the endorsement of the school superintendent of that school district.

One supplemental form is required per school district.

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by the corresponding school superintendent for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. Each participating school superintendent reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

To be filled out by grant applicant

Project/Program Name: Find Your Voice Creative Writing Workshop Series

Name of Organization: 916 Ink

Name of Applicant and Title: Nikki Cardoza, Director of Resources

Applicant's Phone: 530-417-1796 **Applicant's Email:** nikki@916ink.org

Submit a copy of your application with this page to the school superintendent(s). For your application packet to be considered complete the signed and dated endorsement form must be received by the City of Rancho Cordova by March 18, 2022. The superintendent will submit the form directly to the City's Community Enhancement & Investment Fund team. You must submit this form and a copy of your application to the appropriate superintendent or his or her designee no later than March 4, 2022. For Elk Grove Unified School District use BGrewal@egusd.net. For Folsom Cordova Unified School District use agriffin@fcusd.org. For Sacramento City Unified School District use dianne-brown@scusd.edu.

Project Information

Project Name

Mills Middle School Positive Behavior Intervention Supports

Project Synopsis

The PBIS team at Mills Middle School supports the student engagement and the behavioral success of all students. Additionally, the program supports and promotes the climate and culture of the school. We do this through the use of reward and incentive programs as well as student engagement programs.

Project Description

Rewards / Incentives and Student Engagement: 1. Merit System: All students begin the school year with 100 merits. Students are required to maintain 96-100 merits to be eligible for participation in school social activities including but not limited to: dances, rallies, assemblies, Fun Friday rewards, Mills Scholar events, access to the blacktop at lunch, sporting events, field trips and more. The program is restorative – students may earn merits back at any time by completing Merit Recovery which includes restorative conversations, helping a teacher in the classroom, campus beautification, letters of apology, participating in conflict mediation, lunch detention, etc. Students with 96 or more merits are rewarded bi-monthly with our Fun Friday rewards. 2. Behavior Expectations: Each month Mills has a Behavior of the Month which is one of our Mustang Pride 5 P's (Positive, Polite, Productive, Prompt and Prepared) behaviors. Lessons are taught during Advisory class that promote the monthly behavior. Students may earn Mills Bills for exhibiting the positive behavior to use at our Student Store. Students are rewarded by being nominated at Mustang of the Month and/or receiving Mills Bills for demonstrating the Behavior of the Month or the Mustang Pride 5 P's. 3. Student Rewards: Mills Bills/Student Store (weekly), Fun Friday events (bi-monthly), Mega Mills Raffle (6x year) Student of the Quarter (quarterly), Mills Scholars (for students who earn a 3.0 GPA or higher and excellent attendance for the first and/or second semester) events, Behavior of the Month challenges rewards, Mustang Round Up end of the year activities. Also includes academic goal setting (iReady/Renaissance Diagnostics - 3x year) and CAASSP (State Testing Raffle & Reward). 4. Field Trips (ex. Yosemite, college visits. STEM fieldtrips, grade level fieldtrips, Mills Scholars fieldtrips)

Project Team

PBIS/Climate Team (Climate Coach: Stephanie Cecil), Administrators (Dana Carrigan & Molly Griffin), Clerk (Robin Dowty)

Application #38

Project Goals

1. Create a comprehensive Tier 1 PBIS program. Complete Tiered Fidelity Index (TFI) as program audit and re-apply for PBIS "Gold" recognition through www.pbisca.org. Received Silver level recognition in August 2021. 2. Continue to support student engagement. Using Merit system and "Fun Fridays" to track students who qualify for rewards bi-monthly. Continue to use Advisory for Merit Mondays, student and staff led behavior expectation and explanation videos for Student of the Quarter,Mills Scholars, Merit System and Push In System. 3. Increase attendance awareness and celebrations. Recognize Attendance All-Stars and Most Improved Attendance.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total project cost

$20,000.00

Estimated breakdown of project expenditures

Rewards & Incentives: $15,000 (Merit Rewards/Fun Fridays, Mill Scholars Recognition Events, Student of the Quarter, Mills Bills/Student Store, Mega Mills Raffle, Mustang Round Up) Field Trips: $5,000

Matching Funds

None

Include any other funding contributions

$2,500 (Fundraising and Title 1)

Ongoing operations and maintenance costs (if applicable)

None

Total Community Enhancement & Investment Funds requested

$20,000.00

Is this a multiyear request?

Yes

Number of years

3

If you answered yes above, describe your sustainability plan and whether the project is viable as a single year request.

Rewards / Incentives and Student Engagement: The Mills PBIS program and Student Store has existed for 5+ years and continues to provide all students with weekly, monthly, quarterly and annual rewards for positive behavior. This results in greater school connectedness and supports academic achievement.

How many years have you received funding for this project?

2

When will your request for funding sunset for ongoing programs?

N/A

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

Fundraising, donations, site Title 1 funds

Project Schedule, Timeliness and Adaptability

Application #38

Project Schedule

PBIS is on-going every school year and follows the Folsom Cordova school calendar. Beginning in August 2022 through May 2023. Subsequent years would be August 2023 – May 2024, August 2024 – May 2025, etc.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

As the rewards, incentives and student engagement occur bi-weekly, monthly, quarterly, each semester and annually, the PBIS team will be able to manage the projects and funding throughout the 2022-2023 school year (August 2022-May 2023).

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Yes, Mills PBIS team will be able to adjust our program for the 2022-2023 school year should school closure be necessary. Similar to the 2020-2021 and 2021-2022 school years, Mills PBIS team will be able to make adjustments to our reward programs using drive thru, mail home and grab-and-go rewards.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Project Information

Project Name

Mentors at Cordova High, Mills, and Mitchell

Project Synopsis

This project is to continue the Mentors at Cordova High and MACH@ Mills programs, and expand the program to Mitchell Middle School, with continued focus on promoting positive behavior, improved academics and attendance, community service involvement, and life and vocational skill development, while rewarding participants for their accomplishments.

Project Description

The MACH Program is a FREE community-based mentoring program focused on promoting positive behavior, improved academics and attendance, community service, and life and vocational skill development while rewarding participants for their accomplishments. Students identified by school staff, teachers, and the MACH program coordinator, are invited to participate in the program. Students receive guidance and direction to help get them on or keep them on a positive path. Participants earn rewards for demonstrating improvement in their attendance, grades, and/or behavior as well as for participating in community service opportunities. Rewards include Educational Experiences, School based rewards, and Social rewards. MACH participants attend weekly meetings where expectations are set, guest speakers from the community deliver life skill or vocation messages, and program participants share and celebrate their successes. Monthly Saturday Support sessions and weekly group Tutoring sessions are held to provide participants with homework support as needed. Funding is being requested for the continuation of the year-round MACH program at Cordova High School to include an increase in the funding in the educational rewards category so that we can take selected MACH members on a field trip to the Museum of Tolerance to participate in their full day Tools for Tolerance Teen workshop; for the continuation and further development of the MACH @ Mills program that was implemented in 2021; and to expand the MACH program to include Mitchell Middle School. Beyond the immediate benefit the students participating in the program receive through the rewards they earn and the successes they achieve, the community at large benefits through the reduction in behavioral issues in the community amongst participants and through their contributions as volunteers. Long term the community benefits through the outcomes achieved by the MACH program as these students continue on to become productive adults.

Project Team

Application #39

In addition to our MACH Program Coordinator Conrade Mayer, our MACH @ Mills Facilitator Eric Mejia, and our CL3 Board, our project team currently includes administration & staff members from CHS, Kinney, and Mills, CHS Alumni members, MACH Alumni, MACH parents, Rancho Cordova residents, local businessowners, and various partner organizations such as FCUSD, Cordova Community Council, City of Rancho Cordova, and RC PAL.

Project Goals

1. Ensure the continuation of the year-round CL3 MACH Program at Cordova High and Mills Middle School. 2. Establish a modified version of the MACH program at Mitchell Middle School. 3. Maintain 75 to 125 participants in the MACH Program at Cordova High, 20 to 35 participants in the MACH program at Mitchell Middle School, and 20 to 35 participants in the MACH program at Mills Middle School. 4. Promote and reward positive behavior, improved academics and attendance, community service involvement, and life and vocational skill development amongst participants. 5. Engage community members and businessowners in various roles with this mentoring program. 6. Encourage parental involvement by providing specific parent engagement activities.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total project cost

293,700

Estimated breakdown of project expenditures

MACH Program Contracted Services & Professional Support = $102,200 (includes MACH Program Coordinator $70,000 + MACH @ Mills Program Facilitator Stipend $5,000 + MACH @ Mitchell Program Facilitator Stipend $5,000 + Professional Math Tutoring Services $7,200 + School Psychologist, Counselor, PBIS support and District Interventions $15,000) + MACH Mentors = $68,000 + MACH Program Support = $90,000 [includes CHS MACH Program Support $60,000 (Educational Rewards $25,000 + School Based Rewards $7,500 + Social Rewards $20,000 + Parent Engagement Activities $5,000 + Program Materials $2,500) + MACH @ Mills Program Support $15,000 (Educational Rewards $4,000 + School Based Rewards $2,000 + Social Rewards $6,000 + Parent Engagement Activities $2,500 + Program Materials $500) + MACH @ Mitchell Program Support $15,000 (Educational Rewards $4,000 + School Based Rewards $2,000 + Social Rewards $6,000 + Parent Engagement Activities $2,500 + Program Materials $500)] + School Facility & Transportation Use = $30,000 (includes Facility Use CHS $12,000 + Facility Use Mills $6,000 + Facility Use Mitchell $6,000 + Transportation use of school vans $6,000) + Insurance = $3,500

Include any other funding contributions

Other Grants & Misc Donations = $20,000 + Fundraisers = $15,000

Ongoing operations and maintenance costs (if applicable)

N/A

Total Community Enhancement & Investment Funds requested

103,000

Is this a multiyear request?

No

How many years have you received funding for this project?

6

When will your request for funding sunset for ongoing programs?

Based on continuing need in our community to create equity and offer support services for some of our most vulnerable populations – at risk and under-performing students from single parent and low-income households, no sunset date is planned as we expect we will continue to need funding for ongoing program offerings.

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

Other funding will be sought from corporate grants, individual donors, and fundraisers.

Project Schedule, Timeliness and Adaptability

Project Schedule

August 1, 2022 through July 31, 2023 - Continue existing MACH Program at Cordova High and Mills Middle School - Establish modified MACH Program at Mitchell Middle School - Invite students to join both programs - Establish program calendars - Develop and implement fundraising plan - Provide mentoring on daily/weekly basis year-round for MACH and during school year for MACH at Mitchell and Mills - Host regularly scheduled support sessions - Participate in monthly community service projects in support of existing City sponsored community enhancement projects and/or community events - Participate in school-based service projects - Host a minimum of two specific parent engagement activities - Administer rewards - Provide regular updates to CHS, Mitchell & Mills Administration

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

Our project timeline typically coincides with the beginning of a new school year and ends after the completion of summer school, in order to assess student progress more accurately. If needed, we can adjust our timeline to run July through June. Our ability to complete this project in the timeline laid out has been demonstrated consistently for the past six years.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Yes. Program can operate virtually if required, with modifications also made to the types of rewards students would earn, as demonstrated during the 2019-2020 and 2020-2021 school years.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical address of project location

2239 Chase Dr
Rancho Cordova, CA 95670

Other physical addresses if project/program is at multiple sites

Cordova High School 2239 Chase Dr, Rancho Cordova, CA 95670 Mills Middle School 10439 Coloma Rd, Rancho Cordova, CA 95670 Mitchell Middle School 2100 Zinfandel Dr, Rancho Cordova, CA 95670

Have you received a letter of support for the project/program from the property owner?

No

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site or a park/park facility?

Yes, at a public K-12 school site

Which school district is the public K-12 school site located in?

Folsom Cordova Unified

Public Record Unless otherwise exempt under applicable law, applications and application materials are public records. All information received from an applicant, whether received in connection with a grant application or in connection with any grant-funded activities performed are subject to disclosure pursuant to the California Public Records Act, unless otherwise exempt. Next Steps Applicants will receive acknowledgement once their application is received. When the application period closes, staff will review each application according to the application criteria and prioritization method listed within the Fiscal Year 2022/2023 Grant Application Process and Criteria document. Should staff have any questions or need clarification on your application, they will contact you. You are invited to attend any of the public City Council Meetings. It is anticipated at this time that the Community Enhancement & Investment Fund team will present information to the City Council starting in April and continuing through June. We may invite applicants to present their project and we may make selection recommendations to Council during the May City Council meetings. In addition, the Community Enhancement & Investment Fund team will send periodic updates to grant applicants via e-mail. It is possible that all funding decisions for the Fiscal Year 2022/2023

Community Enhancement & Investment Fund could be made in May and formally adopted by City Council by early June. Staff intends to notify all applicants of the funding decisions made by the end of June. If you have not signed up to receive automatic notifications when council meeting agendas are posted, you can do that by using the link below: https://www.cityofranchocordova.org/residents/what-s-happening/sign-up-for-e-news

Thank you,
City of Rancho Cordova

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR SCHOOL SITE USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a public K-12 school site, you must request the endorsement of the school superintendent of that school district.

One supplemental form is required per school district.

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by the corresponding school superintendent for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. Each participating school superintendent reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

To be filled out by grant applicant

Project/Program Name: Mentors at Cordova High, Mills, and Mitchell

Name of Organization: Cordova Lancers, Leaders & Legends

Name of Applicant and Title: Conrade Mayer, MACH Program Coordinator

Applicant's Phone: 916-247-8242 **Applicant's Email:** cl3mentees@gmail.com

Submit a copy of your application with this page to the school superintendent(s). For your application packet to be considered complete the signed and dated endorsement form must be received by the City of Rancho Cordova by March 18, 2022. The superintendent will submit the form directly to the City's Community Enhancement & Investment Fund team. You must submit this form and a copy of your application to the appropriate superintendent or his or her designee no later than March 4, 2022. For Elk Grove Unified School District use BGrewal@egusd.net. For Folsom Cordova Unified School District use agriffin@fcusd.org. For Sacramento City Unified School District use dianne-brown@scusd.edu.

To be filled out by School Superintendent or designee

Endorsement Given Yes

Endorsement Withheld

Conditional approval of facility rental only

Superintendent's or Designee's Printed Name: Dr. Sarah Koligian Sarah Koligian

Date: 3/17/22

School District: Elk Grove Unified Folsom Cordova Unified ■ Sacramento City Unified Other

Comments (Optional):

The school superintendent or designee will send this form directly to CEIFGrants@cityofranchocordova.org no later than March 18, 2022. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

Project Information

Project Name

The Student and Landowner Education and Watershed Stewardship (SLEWS) Program with George Washington Carver School of Arts & Science

Project Synopsis

The Student and Landowner Education and Watershed Stewardship (SLEWS) engages high school students in habitat restoration through a series of hands-on field days at real projects that develop science skills and environmental stewardship in youth. Through this program we would work with students from George Washington Carver School of Arts and Science to complete a restoration project that would incorporate hands-on, place-based, environmental education activities.

Project Description

The Student and Landowner Education and Watershed Stewardship (SLEWS) Program engages high school students in meaningful environmental stewardship on local habitat restoration projects. SLEWS connects classroom learning to the real world to enhance high school education and provides students with transformative experiences in nature to increase their appreciation, commitment and respect for sustainable agriculture and the natural world. SLEWS staff recruit and train volunteers from non-profits, public agencies, and universities to mentor students throughout their SLEWS year. In the program, students “adopt” their restoration site for the duration of the school year, visiting and working on the project for three or more full-day field trips. Through hands-on activities such as water quality and bird box monitoring, students develop science and inquiry skills needed for lifelong learning. Since the program began in 2001, we have engaged more than 8,000 students & teachers in 11 counties in California. This award winning program has been recognized by national, state, & local partners for excellence in conservation education & our SLEWS Academy has trained 8 other organizations to run SLEWS Programs in their regions. Because we partner with restoration professionals from public agencies, local watershed groups, and nonprofit organizations, SLEWS projects have a real & lasting impact on the land. Since its inception, students have planted over 75,021 native trees/shrubs, 332,967 grass/forbs plugs, and installed 827 wildlife structures. By including students in habitat restoration, SLEWS addresses the needs for healthier land & more wildlife habitat, and the need to instill conservation and stewardship values in high school students. With your support, we would be able to expand the SLEWS Program to include George Washington Carver School of Arts & Science and offer Rancho Cordova youth these valuable experiences.

Project Team

Application #40

Allie Dumas - SLEWS Program Manager, Center for Land-Based Learning; TBD - Biology and Environmental Science Teacher, George Washington Carver School of Arts and Science; La Niecia H. Kobelt., Principal, George Washington Carver School of Arts and Science; Nadine Mitchell, Front Office Manager, George Washington Carver School of Arts and Science; Restoration Partner - TBD, we are in communication with the Sacramento Tree Foundation currently, but past and current partners include Solano Resource Conservation District, Yolo County Resource Conservation District, Natural Resources Conservation Service, Sacramento Tree Foundation, Sacramento Valley Conservancy, and Audubon California; Landowner - TBD, we work with our restoration partners the summer prior to the field season to select project sites for the upcoming year based on program funding and number of schools interested. Sacramento Valley SLEWS sites are typically in Yolo, Sacramento, and Solano Counties. Our 2021-2022 SLEWS season included 4 different native hedgerow projects of varying sizes; The Maples and La Tourangelle in Woodland, Free Spirit Farms in Winters, and Good Humus Farms in Capay. Each site consisted of various agricultural techniques from organic farming and vegetable growth to orchards and olive oil production.

Project Goals

The mission of the Center for Land-Based Learning is to inspire, educate, and cultivate future generations of farmers, agricultural leaders and natural resource stewards. The focus of our youth programming is to introduce students to the education and career pathways available to them in agriculture and natural resources. We equip students with the workforce development and leadership skills they need to be competitive in the job market. At the heart of our work are the experiential learning opportunities available to students that bring to life the topics they learn during field day trips. For our SLEWS Program, field day visits are critical to students as they experience firsthand the work required to become environmental stewards and restore habitats. These hands-on opportunities help students explore and build their careers in agriculture, science, and technology. Our youth programs are developing the problem-solvers needed for a healthy, robust and sustainable world. Post-field day survey results indicate 83% of students are more interested in careers related to agriculture or natural resources after participating in the SLEWS program and an impressive 94% would consider doing SLEWS activities on their own or with others outside of the program. Additionally, 66% of students shared what they learned with family and friends, demonstrating the impact of SLEWS going beyond the students themselves. In addition to our surveys, the SLEWS Program Manager conducts debriefing sessions after each field day to receive feedback from partners and mentors on the quality of the restoration work, the flow of the day's agenda, and the student and mentor experience. After the season is complete, the Manager meets with teachers and partners to assess the program as a whole and identify program strengths and areas of improvement for the following season.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total project cost

$19,050

Estimated breakdown of project expenditures

SLEWS Manager Salary & Benefits: 240 hours - $32.76/hr - $7,863 total Volunteer SLEWS Mentors (5 @21 hrs each): 105 hrs - $30/hr - $3,150 total (covered by matching source) SLEWS Staff Transportation (mileage): 300 miles - $0.58/mile - $175 total Substitute Teacher: 3 days - $175 - $525 total School Transportation: 3 days - $750/day - $2,250 total Participation Fee: 3 days - $300/day - $900 total (covered by matching source) Field Day Food: 3 days - $275/day - $825 total Field Day Gear (porto potty & general supplies): 3 days - $250/day - $750 total CLBL Admin Overhead (staff, salary & benefits, insurance, printing, communications): 1 project - $2,612/project - $2,612 total

Matching Funds

We currently have funding from a variety of sources including support through the Yocha Dehe Community Partnership, SMUD Shine, NRCS, and Yolo Resource Conservation District. With this program we will be able to match $4,050.

Include any other funding contributions

Our volunteer mentors guide students through restoration tasks and allow students to develop strong personal connections with professionals in the natural resources, restoration, and agriculture fields. Volunteers donate their time and expertise as an in-kind donation ensure students receive a well rounded perspective about the field of environmental work. Additionally, we are looking to further our reach with the assistance of our in-house alumni coordinator.

Ongoing operations and maintenance costs (if applicable)

N/A

Total Community Enhancement & Investment Funds requested

$15,000

Is this a multiyear request?

No

How many years have you received funding for this project?

1

When will your request for funding sunset for ongoing programs?

While we had previously received funding last year, we were unable to achieve the project due to the schools limitation on field trips during COVID. This would be the second year the SLEWS Program has applied for funding through the Community Enhancement Fund. This project would allow George Washington Carver students to participate in the SLEWS Program. Our goal is to secure funding from the Community Enhancement Fund in subsequent funding cycles to allow students to participate in the SLEWS Program for years to come. We are now in our 21st year of running the SLEWS Program in the Sacramento Valley and have long-established relationships with restoration partners and local high schools. Our program is funded through the receipt of foundation and corporate grants on a rolling basis and through contracts we develop with our restoration partners. Past and current funders include: Natural Resources Conservation Service, Yocha Dehe Community Fund, Yolo Community Foundation, Sacramento Municipal Utility District, Mary A. Crocker Trust, Teichert Foundation, Youth Outside, Yolo County Resource Conservation District, and Solano Resource Conservation District.

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

As stated above some of our past and current funders include: Natural Resources Conservation Service, Yocha Dehe Community Fund, Yolo Community Foundation, Sacramento Municipal Utility District, Mary A. Crocker Trust, Teichert Foundation, Youth Outside, Yolo County Resource Conservation District, and Solano Resource Conservation District. We will continue to sustain these funding sources to ensure the success of our programming.

Project Schedule, Timeliness and Adaptability

Project Schedule

June - September 2022 Tour potential projects site, finalize site selection Planning meetings with George Washington Carver High School staff, restoration partners, and SLEWS Program Manager Landowner Agreement (if applicable) and Financial Agreement (with school) completed and on file September - October 2022 Mentor recruitment and training for all projects Classroom visits to recruit students to program Distribute Student Pre-Surveys and Student Applications and Waivers Site team meetings to schedule field days and outline restoration activities November - December 2022 Plan, coordinate, and implement first field day Write blog post for Youth Programs blog January - February 2023 Plan, coordinate, and implement second field day Write blog post for Youth Programs blog March - April 2023 Plan, coordinate, and implement third and final field day Write blog post for Youth Programs blog Distribute SLEWS Student Post-Survey May-June 2023 Create SLEWS 2022-23 project posters and video End of program teacher meetings and partner debriefs Program Assessment; identify program successes and areas for improvement

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

With 20 years of history and collaboration with high school teachers, restoration professionals, private landowners, state and national agencies, universities and non-profit organizations, the SLEWS Program is an established and successful approach to youth engagement. Our timeline is tried-and-true, and we typically complete between 20-25 field days annually in the Sacramento Valley and up to 50 statewide. We work with teachers and restoration partners to schedule field trips that work for both the school calendar and the restoration timeline to ensure project completion. Winter is the best season to perform the robust planting portion of our SLEWS projects, thus many of our projects finish up in March. We always aim to have all field days program-wide completed by the end of April, as student availability diminishes in May and June due to testing and finals. The timeline of our programming year and field day schedule is designed to ensure our projects are completed well before the end of June.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

The SLEWS Program typically works with classes of 20-30 high school students for in-person field days. Our field days are entirely outdoors, which is advantageous when it comes to COVID-19 guidelines, but we are prepared to adjust our program to

accommodate whatever school and state guidelines are in place at the time. We have spent the last two seasons navigating the changes COVID requires and devising alternate activities when appropriate. While a virtual option is not conducive to SLEWS we have had great success during the past two seasons going above and beyond the recommended standard of protection including the requirement of vaccination for our mentors and mask requirements at all field days. In the event that our program cannot operate in a normal capacity next fall, we will work with the teacher and restoration partner to devise ways we can continue to serve students and give them a comparable experience. This may include assisting the school with arranging safer transportation options, reducing the student capacity on field days, updating cleaning procedures, connecting with classes of students virtually, hosting volunteer days to keep restoration projects on track, or even considering completing the project on a Saturday when school is not in session.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical address of project location

Not yet known.
Not yet known., California Not yet known.

Other physical addresses if project/program is at multiple sites

We have not yet identified an exact location for this project, as each summer we work with our restoration partners to select appropriate SLEWS field sites for participating schools. Once we know the number of SLEWS projects that will be funded, the SLEWS Program Manager tours potential project sites with restoration partners over the summer.

Have you received a letter of support for the project/program from the property owner?

No

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site or a park/park facility?

Yes, at a public K-12 school site

Which school district is the public K-12 school site located in?

Sacramento City Unifed

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR SCHOOL SITE USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a public K-12 school site, you must request the endorsement of the school superintendent of that school district.

One supplemental form is required per school district.

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by the corresponding school superintendent for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. Each participating school superintendent reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

To be filled out by grant applicant

Project/Program Name: Ranga Vasantha- Festival of Arts & Culture

Name of Organization: Kannada Sangha of Sacramento (KSS)

Project Information

Project Name

Carver College Prep/Summer Bridge Program

Project Synopsis

The Carver College/Prep Summer Bridge Program will create a space where students from Carver and throughout Rancho Cordova can reconnect to school, make up graduation credit and prepare for the college application process. Students will be able to choose to participate in one or both of the courses available in the summer program: Summer Bridge/ College Prep.

Project Description

CARVER COLLEGE PREP PROGRAM: Based on the 2020 Rancho Cordova Education Attainment Information, gathered from the 2020 American Community survey census data and the survey from Common Core Data available for Public Elementary through Secondary Schools, and in comparison to neighboring communities such as Gold River, Fair Oaks, Mather, Carmichael, La Riviera, Rosemont and Sacramento-Roseville, Rancho with Cordova has the lowest percentage of people with a Bachelor's Degree or higher, with a 27% total. Rancho Cordova also has the smallest proportion of percent of people with an associate's Degree at 19.5%. Finally, Rancho Cordova has the smallest proportion of people with a master's degree or higher (0.9%.) More than 80% of school age children that reside in Rancho Cordova attend public high schools. Schools reopened for in person learning for the 2021- 2022 school year. Students continue to struggle with the transition to full in-person learning, especially with the ongoing interruptions caused by COVID-19/Omicron restrictions and quarantine requirements. Their challenges are multi-dimensional: they continue to lose valuable time learning in-person with their peer groups and teachers; they continue to have difficulty socially because of their previous isolation; they continue to lose opportunities to prepare for the college application process including taking college admissions tests. College application process has become very uncertain of their options and opportunities. The Carver College Prep/Summer Bridge Program will provide more guidance and access.

Project Team

• La Niecia Kobelt - Principal, George Washington Carver School of Arts and Science, • Astrid Qirko Kinn - College Advisor, Kinn College Consulting and George Washington Carver School of Arts and Science, • Credit Recovery Instructor, George Washington Carver School of Arts and Science, • Campus Monitor, George Washington Carver

School of Arts and Science

Project Goals

1. Participants in Summer Bridge, 2. Students will enroll in credit recovery courses at Carver, 3. Students will take up to two courses for credit recovery or enrichment, 4. Students will engage in social-emotional learning in every class. 5. Increase graduation and college admissions rates at Carver and the Rancho Cordova Community Participants in Carver's College Prep//Summer Bridge will prepare for, register and take the August 2022 SAT exam. All participants will complete a personal statement essay. All participants will meet at least twice on-to-one with the college adviser. All participants will complete applications for at least five (5) colleges/universities. All students will prepare for and participate in a mock interview with a college admissions representative. Metrics: We will measure the programs' success by the number of students participating in these activities. We will measure the number of credits students earn. We will also provide a pre- and post-survey of College prep success. Students will complete a survey eliciting their input on school reopening. Our goal is that everyone participating in this program will be enrolled in college by June of each year.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total project cost

The total project cost is $42,150

Estimated breakdown of project expenditures

Standardized Test Preparation Course: $5,000, Individual College Advising: $8,000 (includes at least one individual one hour meeting with college advisor and preparation of various seminars/webinars on how to apply to college/university), Personal Essay instruction: $2,000, SAT registration fee: $43.00 per 50 students: $2,150, Financial aid seminars - (Estimate: 10 one hour recorded webinars open to students and parents (Prepared and presented by College Advisor), Individual lunch for two-week period for attending students: $3,000 Miscellaneous, office supplies, paper products for advertising through flyers, hand-outs, etc. $1,000, Administration and Registrar: $3000, Credentialed Teacher: $3000, Campus monitor: $2000,

Matching Funds

Matching Funds $13,000

Include any other funding contributions

Operations Costs: Carver High School will provide three classrooms, restrooms and custodial services and all utilities for the two-week period.

Ongoing operations and maintenance costs (if applicable)

Accounted for in the matching funds: $13,000

Total Community Enhancement & Investment Funds requested

Total Community Enhancement Funds Requested $29,150

Is this a multiyear request?

Yes

Number of years

3

If you answered yes above, describe your sustainability plan and whether the project is viable as a single year request.

In order to prepare and recruit participants, the planning team will need to meet in mid-May to create information materials, visit local high schools and advertise for the program. The two-week program will run from Monday, August 8 to Friday, August 19, 2022. After the session has concluded, the planning team will meet in late August to

review and analyze data for results. There is an ongoing need for college prep and credit recovery opportunities for students. Therefore it is viable as a single year; however, with the current economic challenges for students and families students will require opportunities for the next few years.

How many years have you received funding for this project?

1

When will your request for funding sunset for ongoing programs?

The 2024-2025 school year.

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

Carver will seek charitable donations and grants if we do not receive this grant.

Project Schedule, Timeliness and Adaptability

Project Schedule

May 2nd : Planning Team meet & prepare materials, May 9th: Advertisement & Team meeting, May 16th: Recruitment / Enrollment Opens, continue advertisement through June. May 23rd: Finalize student and teacher materials August 5th-6th : Setup classrooms & materials, August 9th – 20th: College Prep/Summer Bridge Sessions, August 24th : Team meeting to review and analyze data.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

Carver College Prep/Summer Bridge takes place at the beginning of the school year in August 2022. The goal is for seniors to have the work for college applications & admission completed before school starts in September of 2022.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Due to Distance Learning during the COVID Closures, the Carver College Prep/Summer Bridge Program is digital. Every student has a Chromebook; therefore, students may complete the sessions in-person or virtually. Hardcopy materials will be distributed to students the week prior to the first session.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical address of project location

10101 Systems Parkway
Sacramento, California 95827

Other physical addresses if project/program is at multiple sites

N/A

Have you received a letter of support for the project/program from the property owner?

No

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site or a park/park facility?

Yes, at a public K-12 school site

Which school district is the public K-12 school site located in?

Sacramento City Unifed

Public Record Unless otherwise exempt under applicable law, applications and application materials are public records. All information received from an applicant, whether received in connection with a grant application or in connection with any grant-funded activities performed are subject to disclosure pursuant to the California Public Records Act, unless otherwise exempt. Next Steps Applicants will receive acknowledgement once their application is received. When the application period closes, staff will review each application according to the application criteria and prioritization method listed within the Fiscal Year 2022/2023 Grant Application Process and Criteria document. Should staff have any questions or need clarification on your application, they will contact you. You are invited to attend any of the public City Council Meetings. It is anticipated at this time that

the Community Enhancement & Investment Fund team will present information to the City Council starting in April and continuing through June. We may invite applicants to present their project and we may make selection recommendations to Council during the May City Council meetings. In addition, the Community Enhancement & Investment Fund team will send periodic updates to grant applicants via e-mail. It is possible that all funding decisions for the Fiscal Year 2022/2023 Community Enhancement & Investment Fund could be made in May and formally adopted by City Council by early June. Staff intends to notify all applicants of the funding decisions made by the end of June. If you have not signed up to receive automatic notifications when council meeting agendas are posted, you can do that by using the link below:

Application #41

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR SCHOOL SITE USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a public K-12 school site, you must request the endorsement of the school superintendent of that school district.

One supplemental form is required per school district.

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by the corresponding school superintendent for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. Each participating school superintendent reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

To be filled out by grant applicant

Project/Program Name: Ranga Vasantha- Festival of Arts & Culture

Name of Organization: Kannada Sangha of Sacramento (KSS)

Name of Applicant and Title: Prabhakar Rao, Board of Director

Applicant's Phone: 916-281-5529 **Applicant's Email:** prabhaker49@yahoo.com

Submit a copy of your application with this page to the school superintendent(s). For your application packet to be considered complete the signed and dated endorsement form must be received by the City of Rancho Cordova by March 18, 2022. The superintendent will submit the form directly to the City's Community Enhancement & Investment Fund team. You must submit this form and a copy of your application to the appropriate superintendent or his or her designee no later than March 4, 2022. For Elk Grove Unified School District use BGrewal@egusd.net. For Folsom Cordova Unified School District use agriffin@fcusd.org. For Sacramento City Unified School District use dianne-brown@scusd.edu.

To be filled out by School Superintendent or designee

Endorsement Given

Endorsement Withheld DiAnne Brown

Conditional approval of facility rental only

Superintendent's or Designee's Printed Name:

Project Information

Project Name

Rancho Cordova Food, Health and Environmental Career Pathway Program

Project Synopsis

Soil Born Farms will continue to grow the impact and sustainability of Rancho Cordova's K-12 food, health and environmental career pathway. School garden support systems will be expanded, curriculum will be integrated at the district level, and students will dig into experiential learning at Soil Born Farms.

Project Description

Please see the full Project Description included as an attachment.

Project Team

Soil Born Farms is a non-profit urban agriculture and education project based in Rancho Cordova whose mission is to empower people to participate in a local food system that encourages health, nurtures the environment and grows a sustainable community. Our Youth Education programs – the Growing Together School Garden Initiative and our on-farm Roots and Wings programs – will be responsible for the proposed project. Since 2005 our Youth Ed team has worked to develop and support school garden and farm experiences that provide standards-based nutrition, science and common core education to low-income schools throughout the Sacramento region. Youth Education Manager Shannon Hardwicke will serve as project lead, coordinating partnerships, intern/volunteer/teacher training, and curriculum integration with FCUSD. Youth Educators Emily Hain and Lacey Carlson will spearhead on-farm field trips. This proposal's budget includes $27,000 for the new part-time RC Coordinator to focus exclusively on partnering with and serving Rancho Cordova School sites. This position will be created by restructuring our current staff roles or creating a new contract position. The individual filling this role will be familiar with the local community and have experience with public school systems. As a whole the project team will work in close collaboration with teachers and administrators at Rancho Cordova school sites and leadership at Folsom Cordova and Sac City Unified School Districts. Individuals actively co-creating this pathway's vision alongside Soil Born Farms include CHS Principal Jerad Hyden (letter of support attached); FCUSD Career Technical Education Coordinator Alicia Caddell (letter of support attached); FCUSD Assistant Superintendent Jim Huber; and Cordova Gardens Elementary Principal John Bliss.

Application #42

Project Goals

GOAL 1: Increase the impact of Rancho Cordova schools' Food, Health and Environmental Career Pathway through more frequent field trips to Soil Born Farms for all grade levels, benefitting 1,600 to 1,800 youth annually. Objectives: - Increase Cordova High School field trips to 35 annually (up from 22/yr currently), engaging classes from multiple subject areas and creating multiple visits per student. Begin offering Soil Born Farms to CHS teachers for class use independent of field trips. - Re-engage Mills Middle School in farm field trips, frequency TBD based on teacher needs/interest. Cultivate a new lead garden teacher for the school site. - Facilitate 3 cross-age mentoring opportunities between Cordova High School and Mills Middle/Cordova Gardens students. - Increase field trips for Rancho Cordova elementary schools to 25 annually, serving 4-6 schools (up from 13 field trips serving 3 elementary schools currently). GOAL 2: Build support systems for school garden programs that make it easy for teachers, administrators and students to utilize and sustain garden education. Objectives: - Train and place 16 college interns with Rancho Cordova Elementary Schools to provide garden lesson support throughout the 2022/23 school year. - Train 40 volunteers from partner service organizations (Habitat for Humanity, Master Gardeners), and match graduates with school sites to provide garden maintenance and technical assistance beginning spring/summer 2023. - Collaborate with FCUSD Curriculum and Instruction Department to integrate school garden curriculum into the district's existing professional development offerings. - Host 2 virtual teacher trainings, and publish weekly educational videos to support teachers and students as they learn in the garden. - Provision partner school gardens with organic plant starts and seeds for seasonal plantings 2x's per year, with varieties selected for integration with lessons.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total project cost

$116,600

Estimated breakdown of project expenditures

Note: Please see budget attachment for greater detail. Requested Funds: Program Manager (.5 FTE): $20,000; RC Coordinator (.5 FTE): $22,500; Field Trip Staffing (.5 FTE): $10,000; Personnel Taxes and Benefits: $10,500; Educational Supplies: $2,500; Plant Starts for School Gardens: $750; Indirect (10%): $6,625; Total Request: $72,875

Matching Funds

The following matching funds support this proposal, totaling $43,725: - Kelly Foundation grant ($5,000) supporting staff time, supplies and scholarships for class field trips to the farm. - RCA Community Fund grant ($25,000) supporting the intern and volunteer training program, coordination with community partners, and matching volunteers with school garden sites. - $13,725 in matching funds will be secured through community donations.

Include any other funding contributions

Cordova High School's Agriculture Academy has expressed their ability to cover the cost of substitute teachers (needed during field trips to stay on campus with students who are unable to visit the farm) and support materials/supplies for career pathway curriculum.

Ongoing operations and maintenance costs (if applicable)

N/A

Total Community Enhancement & Investment Funds requested

$72,875

Is this a multiyear request?

No

How many years have you received funding for this project?

6

When will your request for funding sunset for ongoing programs?

This request is for one year, but establishing a comprehensive food and agriculture education pathway for Rancho Cordova youth is a multi-year process. We are grateful for the City of Rancho Cordova's ongoing support of this vision. Our approach to sustainability involves empowering schools to gradually take on more ownership and responsibility for their school garden coordination, maintenance and use - while also recognizing that teacher and school resources are limited. After many years working directly in school garden development and instruction, Soil Born Farms' staff now provides a framework of support for partner schools through the provision of curriculum, seasonal garden kits and plant starts, teacher training, garden technical assistance, and garden-based extracurricular activities for youth. The activities in this proposal add to this web of support. What we and countless other school garden programs across the country have learned is that it is relatively easy to build a school garden; it takes tenacity and creativity to integrate school garden learning into the culture and structure of our education system.

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

Soil Born Farms pursues Youth Education Program funding from private foundations and state and federal grants. We are currently preparing a California Farm to School Incubator Grant proposal that will support further connections between our farm education center, local schools, and community organizations. We will continue to support school sites in pursuing small grants and donations to fund supplies and maintenance. Continued support from the City of Rancho Cordova and Folsom Cordova and Sac City Unified School Districts will be needed for ongoing training/technical assistance and, if desired, further expansion or deepening of school garden programs.

Project Schedule, Timeliness and Adaptability

Project Schedule

JULY - SEPTEMBER 2022: Recruit and hire new RC Coordinator position. Recruit and train college interns. Develop school garden teacher teams at school campuses. Offer initial orientation and training for teacher teams. Meet with FCUSD Curriculum and Instruction Dept. to identify partnership opportunities. Meet with teachers and admin to troubleshoot field trip barriers. Work with community partners to recruit garden support volunteers. Set up field trip schedules including elementary, junior high and high school. Start farm field trips. Students begin school garden lessons with intern and teacher support. OCTOBER - DECEMBER: Disseminate fall plants for school gardens. Offer fall teacher training. Host farm field trips. Facilitate cross-age mentorship activity. Wrap up fall interns. Host two volunteer training sessions. Continue building vision for collaboration activities with Soil Born and FCUSD. JANUARY - MARCH: Recruit and train spring interns. Host winter teacher training. Facilitate cross-age mentorship activity. Host spring teacher training. Host a planning meeting with school/district leadership. Disseminate spring plants for school gardens. Host two volunteer training sessions. APRIL - JUNE 2023: Complete school year programs. Host one final cross-age mentorship activity. Evaluate programs. Prepare gardens for summer. Assign volunteer garden care teams. Lay out partnership work plan for the fall of 2023.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

We are confident in our team's ability to complete the proposed scope of work by June 30, 2023. Our staff's long history in school garden support, coordination and instruction provide a strong foundation for reaching program goals. Established partnerships with local school sites and districts allow us to jump into implementation feet first. School and community partners are enthusiastic to work with Soil Born Farms, and have been actively planning with our Youth Education staff about the scope of work proposed here.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Soil Born Farms' team has gained a wealth of experience adapting to shifting circumstances over the past 2 years of the pandemic. We are confident that our creativity and resolve will carry us through whatever hurdles may come, pandemic-related or otherwise. Should COVID protocol change, we would adjust using a combination of virtual lessons/farm tours/teacher trainings; in-person small group lessons in outdoor settings; and other solutions as necessary. However, we feel optimistic that activities will be able to take place in person given that FCUSD has been in session on campus since December 2020. The larger barrier to continuity is the capacity of individual teachers to commit to school garden participation amidst the requirements and stressors of COVID. The school sites we work with are determined by the receptivity of teachers and school leadership, which has been in a state of flux due to the incredible challenges of COVID and high levels of staffing changes. We will continue to work toward school garden systems that are resilient to these variables.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical address of project location

2140 Chase Drive
Rancho Cordova, CA 95670

Other physical addresses if project/program is at multiple sites

The project will take place at Soil Born Farms' headquarters at the American River Ranch at 2140 Chase Drive in Rancho Cordova, as well as at multiple school sites in Rancho Cordova. Soil Born Farms has permission to operate programs at the American River Ranch site through our long-term lease with the County of Sacramento, which is on file with the City of Rancho Cordova.

Have you received a letter of support for the project/program from the property owner?

No

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site or a park/park facility?

Yes, at a public K-12 school site

Which school district is the public K-12 school site located in?

Folsom Cordova Unified
Sacramento City Unifed

Project Description – Soil Born Farms

PROPOSED SCOPE OF WORK

The proposed project will build on past years' successes and continue to grow a comprehensive, standards-based Food, Health and Environmental Career Pathway in partnership with target Rancho Cordova schools, including Cordova Gardens, White Rock, Cordova Meadows and A.M. Winn Elementary Schools; Mills Middle School; Cordova High School, and additional sites based on school interest.

A portion of requested funds will be used to establish a new Rancho Cordova Career Pathway Coordinator (RC Coordinator) position, a key step in solidifying a powerful and lasting education pathway. We have the experience, programmatic expertise, and strong relationships with local schools to fully realize this vision - one where kids from low-income urban neighborhoods receive dynamic farm- and garden-based education from kindergarten through high school graduation. The RC Coordinator will work in close partnership with Folsom Cordova Unified School District (FCUSD) to weave the pieces of this pathway into the culture and policies of the district, and to establish Soil Born Farms as a permanent education partner for targeted school sites. COVID has had a substantial impact on our Youth Education programs, with staffing levels reduced and the number of youth served still dramatically lower than pre-pandemic. But after a decade of groundwork, Soil Born Farms' team is more determined than ever to see this work through. A staff person dedicated to local schools will allow us to capitalize on this moment of regrowth, and best serve the students who share our roots in the neighborhoods of Rancho Cordova.

With support from the City of Rancho Cordova, this year Soil Born Farms' Youth Education team will collaborate with schools and community partners on three action areas:

1) Leveraging volunteers and trainees for school garden support:

Soil Born Farms will roll out a new volunteer training and placement strategy to provide on-the-ground support of school garden sites. This model creates a win-win system where volunteers are recruited by partner organizations and colleges, trained by Soil Born Farms, and matched with school garden programs to support class instruction and garden maintenance. We have established partnerships with the University of California Master Gardeners, Habitat for Humanity of Greater Sacramento, and Sacramento State College of Education - all of which maintain strong volunteer bases with a service or training hour requirement, and have missions aligned with Soil Born Farms' work.

Volunteers will complete training tracks at Soil Born Farms targeted to their area of support. Upon graduation volunteers will be matched with school garden sites, working in tandem with teachers and school staff. Habitat for Humanity volunteers will tackle garden maintenance including irrigation, tending crops in the summer, and small construction projects. Sacramento State teaching credential students will provide support to teachers during garden lessons, gaining work experience and earning college credit in the process. And UC Master Gardener volunteers will offer technical support, providing green thumb advice to help gardens thrive.

2) Integrate school garden teacher training with FCUSD professional development:

Soil Born Farms' Growing Together program offers a K-12 School Garden Curriculum, which is aligned with state standards and designed for urban school gardens in our Sacramento growing climate. Through the proposed project we will collaborate with the Folsom Cordova Unified School District Curriculum and Instruction Department to identify ways to integrate school garden curriculum with

district teacher training, with the aim of launching garden curriculum in more classrooms. Soil Born Farms will also continue offering virtual teacher training and weekly support videos on curriculum and gardening skills.

3) Increase on-farm learning as a core component of the Food, Health and Environmental Career Pathway:
Soil Born Farms' education center provides a tremendous opportunity for city kids to explore the natural world. Our 55-acre site is an organic farm, but also so much more - it is a learning laboratory that fuses experiences in nature studies, agroecology, natural resource management, health and wellness, cooking and nutrition. Students dig into field trips aligned with school curricula, bringing topics from the classroom to life in a beautiful outdoor setting.

Though many Rancho Cordova classes participate in field trips to Soil Born Farms, there is potential for more engagement across grade levels and subject areas. As mentioned, we are in the process of building our field trip program back to pre-COVID levels of service. We want to give local schools priority as we ramp up, but are in need of dedicated staff time to help under-resourced Rancho Cordova classes overcome the barriers that prevent them from visiting the farm more often. These pinch points include issues like class schedule blocks that are too short for in-depth farm field trips, and the struggle to obtain field trip permission slips for each student. Solutions are within reach, but require focused time of the proposed RC Coordinator position to collaborate with teachers and school leadership on long-term strategies for success.

Needs and opportunities for each age range include:

High School: Cordova High School neighbors Soil Born Farms, and is enthusiastic about planning and piloting the use of our education center as a frequent hands-on learning laboratory. 22 Cordova High School field trips are currently hosted at the farm annually, with opportunity for many more. This collaboration is a natural fit for the school's Agriculture and Culinary Academies, general science classes, and floriculture program. We would also like to enable teachers to host their own lessons on the farm, separate from formal field trips. These in-school interactions on the farm inspire students to participate in our related Teen Empowerment and Job Training programs, where teens develop essential life and job skills under the mentorship of Soil Born staff.

Middle School: Also within walking distance, Mills Middle School will re-engage with visits to Soil Born Farms. New teacher and student leadership will be cultivated following a recent departure of their lead garden teacher. Solutions will be sought for the limitations of the junior high schedule, with potential for day-long or club field trips. Cross-age mentoring activities between Mills Middle School and Cordova High and/or Cordova Gardens Elementary will be facilitated, with older grades receiving training and leading younger students in the garden. This activity was very successful when piloted in 2020/2021, with enthusiastic buy in from teens, younger students and school leadership. We see cross-age mentoring as a key strategy for motivating kids to stay engaged with the Career Pathway throughout their schooling.

Elementary School: Our strongest involvement in farm field trips has always come from elementary schools, momentum that we will build on through this proposal. Classes from 3 Rancho Cordova campuses are currently participating in a total of 13 field trips per year. Potential exists to at least double field trips hosted and work with 4-6 elementary school sites. Cordova Gardens Elementary in particular is located very close to our site and is eager for a higher level of on-farm engagement.

COMMUNITY BENEFIT

The Folsom Cordova Food, Health and Environmental Career Pathway Program benefits Rancho Cordova on many levels, fostering an environment at school, at home and in the community that supports academic learning, pathways to gainful employment for youth, healthy eating and physical activity, environmental stewardship, and community connection. The proposed project fulfills many of the Community Enhancement and Investment Fund criteria:

Children and Youth / Education: Garden-based education integrates experiential learning with common core standards, supporting a child's academic achievement, health, and social-emotional learning.
Community Pride: Youth develop pride in their campus by caring for school gardens. Field trips to Soil Born Farms help students develop connection to place, and appreciate the ecosystems of the American River Parkway and the agrarian history of the Sacramento Valley.
Quality of Life: School gardens inspire students and their families to grow and eat fresh food for improved mental and physical health. Studies confirm that children are eager to eat vegetables when they have participated in growing them. Farm and garden experiences allow kids to explore outdoors, interact with peers, and make a difference in their community - all healthy additions to the 4 to 9+ hours of screen time that adolescents consume daily.
Culture: Garden curriculum and crops celebrate the diverse ethnicities of our community. As kids plant, harvest and cook, they learn about different agricultural and culinary traditions, connecting to their own heritage and those of their classmates.
Business/Economic Development: The suite of garden-based learning opportunities within this Career Pathway provides students with concrete job, life and leadership skills that prepare them for future employment or post-secondary education, with a focus on the booming food, health, environment and agriculture sectors of the Sacramento region. Experiences in these areas of study position students to make informed decisions as they chart a course toward higher education and living wage careers. California's $50 billion agriculture sector is the largest in the country by far, supported by a host of professionals in agronomy, engineering, finance, business management, mechanics, inspections, processing, etc. Related work in health and wellness and natural resource management provide hundreds of additional career prospects. On the heels of the economic upheaval of the pandemic, we believe the Food, Health and Environmental Career Pathway is more relevant than ever, and will position young people for essential work that is perennially in demand.

LEVERAGE and SUSTAINABILITY

Our approach to delivering high-quality education leverages many resources including university interns, community volunteers, grant funding, donations, school staff time, school district funding, and the energy of youth working and learning in the gardens. The work proposed here is part of our broader sustainability strategy for school garden programs, the longevity of which is challenged by limited school budgets, heavy teacher workloads, changes in school leadership, and the need for summertime garden upkeep. We continue to build solutions for long term viability. Additional strategies are in play at Soil Born Farms that support school garden sustainability (closely related to but not included in this funding request):

- Developing an MOU that details FCUSD and Soil Born Farms' educational partnership, and will maintain the continuity of agricultural education regardless of future teacher or administrative staffing changes. This process is underway and a first iteration of the MOU is expected to be completed 2022/23.
- Providing extracurricular opportunities at Soil Born Farms that complement school garden learning, including year-round paid teen job training, an after school teen empowerment program, summer day camps for youth of all ages, and family-centered activities on the farm.

- Partnering with school districts on joint funding opportunities, including an upcoming CA Farm to School Incubation Program grant.

OUTCOMES

The proposed work will create support structures that make it easy for overburdened teachers to conduct school garden lessons, and for students to dig into hands-on garden learning at every stage of their education. Schools will receive help finding solutions to logistical challenges, so that field trips to Soil Born Farms become an easy, frequent and prominent part of Rancho Cordova students' educational career. And Soil Born Farms will become a fully integrated partner in FCUSD's delivery of hands-on food, health and environmental education. Stepping back for a wide angle view, our intention is that by engaging youth at many points throughout their education, a new generation of young people will seek meaningful careers in food systems, health and environmental stewardship, and will sustain the work of growing equitable urban food systems at an even broader level.

To Whom It May Concern:

As the proud Principal of Cordova High School, tasked with providing opportunities for students which prepare them for post-secondary success – it is my pleasure to write this strong letter of support in continuing to build our Sustainable Agriculture Pathway through our comprehensive Career Technical Education Department with Soil Born Farms.

In alignment of our collective mission, supporting our most marginalized students is critical to our success. Given a diverse population of learners which include: English Language Learners, Special Education, and students from single-parent households facing incredible educational barriers – the Agriculture Pathway is a rigorous and engaging program which provides direct access for these deserving group of students.

A partnership with Soil Born Farms through their Youth Education would leverage much-needed hands-on resources and experiences for our students and would allow us to articulate in creating more enriching curricular and instructional opportunities for our students. Additionally, the ongoing collaboration would articulate with our current capstone course (*Greenhouse Management*), while improving both our ornamental horticulture and animal sciences courses utilizing a cross-curricular articulation with culinary to facilitate campus sustainability through the *farm-to-fork* movement. With access to Soil Born Farm, including the added materials and equipment, such as the greenhouse, tool shed, and urban cultivation; we will provide student exposure and opportunities for viable careers right out of high school, as well as the acquisition of required skills and knowledge to be successful in post-secondary options towards earning a relevant degree.

I urge you to give this application your most serious consideration. Should you or your staff have any questions regarding this letter, please do not hesitate to call. Thank you for the consideration as we partner to positively impact student outcomes.

Respectfully submitted,

Jerad A. Hyden
Principal

Attn: Mr. Shawn Harrison

March 3, 2022

Dear Mr. Harrison,
I am writing to offer my support of the Measure H grant application for a MOU with the Folsom Cordova Unified School District and our Rancho Cordova schools.

The proposed MOU to create student participation, STEAM education programs and matriculation from Cordova Gardens Elementary School, Mills Middle School and Cordova High School is supported. This includes field trips, working in the gardens, student internships and student use of the Soil Born facilities for high school and FFA projects.

I appreciate the collaboration with Soil Born Farms for our students and Career Technical Education Programs and look forward to the development of future opportunities and growth.

Sincerely,

Alicia Caddell, M.A.
CTE Coordinator

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR SCHOOL SITE USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a public K-12 school site, you must request the endorsement of the school superintendent of that school district.

One supplemental form is required per school district.

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by the corresponding school superintendent for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. Each participating school superintendent reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

To be filled out by grant applicant

Project/Program Name: Rancho Cordova Food, Health and Environmental Career Pathway Program

Name of Organization: Soil Born Farms Urban Agriculture and Education Project

Name of Applicant and Title: Shawn Harrison, Founder and Co-Director

Applicant's Phone: 916-363-9685 **Applicant's Email:** grants@soilborn.org

Submit a copy of your application with this page to the school superintendent(s). For your application packet to be considered complete the signed and dated endorsement form must be received by the City of Rancho Cordova by March 18, 2022. The superintendent will submit the form directly to the City's Community Enhancement & Investment Fund team. You must submit this form and a copy of your application to the appropriate superintendent or his or her designee no later than March 4, 2022. For Elk Grove Unified School District use BGrewal@egusd.net. For Folsom Cordova Unified School District use agriffin@fcusd.org. For Sacramento City Unified School District use dianne-brown@scusd.edu.

Project Information

Project Name

Physical Education Enhancement

Project Synopsis

Enhancing the Physical Education programs at each of our school sites in Rancho Cordova to promote a healthy active lifestyle and lifelong exercise learners.

Project Description

The Physical Education Enhancement project will allow school sites the opportunities to update equipment and accessories to provide students with a more robust fitness experience. Ensuring our physical education programs have the necessary equipment / supplies and means to support our students is paramount to the success of our community and developing lifelong learners. Due to the pandemic, our school site PTO/PTA's have not been able to operate and provide support for the past two years. Traditionally our physical education programs have gained support from our parent organizations and site funds. This has not been available for various reason at this time. Evidence supports that one of the best Positive Behavior Intervention and Supports (PBIS) for students is physical fitness. During the COVID-19 pandemic the need to support Social Emotional Learning (SEL) for our students is greater than ever and physical education is one of the best models for SEL.

Project Team

The Team responsible for ensure that this project is implemented will be made up of site administrators and district representation. Site principals, physical education teachers, FCUSD Director of Athletics and Physical Education.

Project Goals

Our goal is to ensure that all of our students have access to updated equipment and accessories at each school site. To promote lifelong learning about exercise and healthy lifestyles. And to ensure our schools have the most up to date equipment for our students.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Application #43

Total project cost

$110,000

Estimated breakdown of project expenditures

Grant funds will be used at all FCUSD sites in Rancho Cordova. -Elementary sites: $2000 x 10 = $20,000 -Preschool sites: $1,000 -Middle school sites: $12,000 x 2 = $24,000 -High school site: $64,000 -Alternative site: $1,000

Matching Funds

0

Include any other funding contributions

0

Ongoing operations and maintenance costs (if applicable)

0

Total Community Enhancement & Investment Funds requested

$110,000

Is this a multiyear request?

No

How many years have you received funding for this project?

0

When will your request for funding sunset for ongoing programs?

July 2023

Do you plan to ask annually for funding?

No

What other funding will you seek to support your project?

School based fundraising and sponsorships.

Project Schedule, Timeliness and Adaptability

Project Schedule

The timeline for this project is from July, 2022 and to be completed by June 30, 2023.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

All sites will submit equipment and accessories itemized requests to be purchased by mid October in order to ensure products are delivered prior to June 2023.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Project can be adjusted as needed to ensure funds are used for purchase of equipment or services.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Project Information

Project Name

PRO Youth - Governments Engaging Youth in the City of Rancho Cordova

Project Synopsis

Youth@City Council and Summer@City Hall provide Rancho Cordova youth opportunities to learn about city functions and civic processes. Participants gain a unique perspective into City Hall affairs as they interact with city staff and leaders while also gaining valuable skills that support their success as students and community leaders.

Project Description

PRO Youth and Families is proposing to provide a two-pronged approach for 60 youth (ages 13-18) to engage in government and civic education in the City of Rancho Cordova through the Youth @ City Council Program and Summer @ City Hall program. A Community Investment Project will also be included in both programs. Each of these programs provides high-quality, meaningful and engaging opportunities for youth to become civically-engaged city advocates and develop skills to grow into innovators, business owners, employees, neighbors, and leaders. The proposed programs and projects will allow Rancho Cordova's youth to learn more about the robust, proud history of Rancho Cordova and be provided with opportunities to share their views and suggestions for continuing to improve community relationships by making the city a welcome and safe place for all. Youth participants will meet and interact with local and regional leaders in the private, public, and non-profit sectors to learn about these leaders' views of the business/economic climate in Rancho Cordova and share their own views on innovative and creative ways the city can thrive. Please see attached Grant Proposal for additional information.

Project Team

David Augusto, Program Manager, is adept at working with youth in the Sacramento region in support of their professional and educational goals. He is committed to educating young people on the importance of civic engagement and advocacy through leadership, life skills, and professional development. Last year he ran the first virtual Summer @ City Hall and a hybrid model of Youth @City Council in Rancho Cordova. He also manages the implementation of mentoring, civic engagement, and advocacy programs across SCUSD, EGUSD, SJUSD. David has a Bachelor's Degree in Sociology and a Minor in Urban Studies and Planning from CSU Long Beach. David will be assisted by Program Coordinators, Nick Soliz, who has a Bachelors from CSU Sacramento in Political Science and is also a former Youth@City Council alumni, and Samreen Siddiqui, who has a Bachelor's Degree from UCLA in

Sociology and Labor Studies as well as experience in youth development.

Project Goals

The goals for these programs are to: (1) build civically engaged young people who become involved stakeholders in the success of Rancho Cordova, (2) support the healthy development of youth in the city, and (3) develop employable young people. The goals were established to create environments where youth feel safe, are encouraged to make healthy decisions, be productive citizens, and become connected to their schools and communities.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total project cost

$81,168

Estimated breakdown of project expenditures

Personnel: (Program Coordinators (2 @ .40 FTE), Program Manager (.20 FTE), Program Director (.20 FTE)) $60,409 Statutory Taxes & Benefits @ 10% of personnel $ 6,041 Intern Stipends (15 @ $400/each) $ 6,000 Participant Stipends (45 @ $100/each) $ 4,500 Travel – Mileage (3,000 @ $0.585) $1,775 Indirect @ 5% of Personnel & Benefits $ 2,463 Total Request $81,168

Matching Funds

Total Matching Funds: $20,463 In-kind contributions Nutritious Snacks $ 3,000 Program & Office Supplies $ 3,000 Rent $12,000 Indirect @ 5% of Personnel & Benefits – In-kind $ 2,463

Include any other funding contributions

$20,463

Ongoing operations and maintenance costs (if applicable)

$0

Total Community Enhancement & Investment Funds requested

$81,168

Is this a multiyear request?

No

How many years have you received funding for this project?

4

When will your request for funding sunset for ongoing programs?

9/30/2022

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

PRO Youth has a diversified funding portfolio including grants/contracts from federal, state, county, city, school districts, and private foundations as well as individual giving revenue. PRO Youth has proven sustainable for 40 years and has a comprehensive, board-approved strategic business plan to guide programming and funding.

Project Schedule, Timeliness and Adaptability

Project Schedule

October 3, 2022 - September 29, 2023. Evaluations will be complete and available by October 31, 2023.

In addition to providing the project timeline identified above, describe how you will be able to complete your

project by June 30, 2023.

In the years that PRO Youth & Families has implemented the Youth @City Council and Summer @ City Hall programs in the City of Rancho Cordova, we have continued to find ways to increase access and remove barriers for youth to participate in these programs and accomplish project goals within the funding period. Our timeline is structured with pre-and-post work to allow us to adjust to any changes in the K-12 school year calendar, adjust for Summer, and meet the project completion date.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

The program team has demonstrated success in administering programs in virtual/hybrid models via Zoom and is equipped to continue virtual/hybrid programming in order to comply with any local health and safety protocols from October 3, 2022, to September 29, 2023. Although the program can be implemented through a virtual/hybrid model the program team is actively transitioning back to in-person with guidance from local and public health authorities continuously assuring all partners are compliant with California Public Health and/or Sacramento County Health recommendations. The health, safety, and well-being of the Rancho Cordova community is of the utmost importance to PRO Youth and Families.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical address of project location

2729 Prospect Park Drive, Rancho Cordova, CA / Rancho Cordova City Hall
Rancho Cordova, California 95670

PROPOSAL

GOVERNMENTS ENGAGING YOUTH IN THE CITY OF RANCHO CORDOVA

YOUTH @ CITY COUNCIL - SUMMER @ CITY HALL - COMMUNITY INVESTMENT PROJECT

A. Project Name: PRO Youth - Governments Engaging Youth in the City of Rancho Cordova

B. Project Synopsis: Youth@City Council and Summer@City Hall provide Rancho Cordova youth opportunities to learn about city functions and civic processes. Participants gain a unique perspective into City Hall affairs as they interact with city staff and leaders while also gaining valuable skills that support their success as students and community leaders.

C. Project Description: PRO Youth and Families is proposing to provide a two-pronged approach for 60 youth (ages 13-18) to engage in government and civic education in the City of Rancho Cordova through the Youth @ City Council Program and Summer @ City Hall program. A Community Investment Project will also be included in both programs. Each of these programs provides high-quality, meaningful and engaging opportunities for youth to become civically-engaged city advocates and develop skills to grow into innovators, business owners, employees, neighbors, and leaders.

The proposed programs and projects will allow Rancho Cordova's youth to learn more about the robust, proud history of Rancho Cordova and be provided with opportunities to share their views and suggestions for continuing to improve community relationships by making the city a welcome and safe place for all. Youth participants will meet and interact with local and regional leaders in the private, public, and non-profit sectors to learn about these leaders' views of the business/economic climate in Rancho Cordova and share their own views on innovative and creative ways the city can thrive.

Youth @ City Council is a civic engagement program designed to develop young leaders and foster civic engagement. The program provides education related to the values of democracy and local, county and state government. It utilizes a wide range of first-hand opportunities, including participating in City Council meetings. Participants initiate and develop a culminating project which requires each of them to identify an issue which they research, compose a legislative proposal for and present that proposal during a program graduation ceremony. At the completion of the program and successful presentation of legislative proposals, student participants receive a $100 stipend. Providing stipends to youth is becoming a best-practice, particularly for programming that requires high levels of engagement and leadership from youth. Providing stipends helps support equity, overcome barriers to participation, and demonstrate the value of their time, commitment to learning, and service to the community. This program takes place throughout the academic school year.

Summer @ City Hall is a four-week intensive summer program where youth learn about local government, careers in local government, and how to advocate for community change. It includes classes and field trips to city facilities. Fifteen to twenty participants will earn a paid internship three afternoons each week during which they will job shadow a city employee. Student interns with at least 90% attendance receive a $400 stipend at the end of the four weeks. Participants who are not matched with an internship, but complete at least 90% attendance at the end of the four weeks will receive a $100 stipend. As mentioned previously, providing stipends for participants is important to address equity, overcome barriers, and demonstrate the value of their time, commitment to learning, and service to the community. Financial literacy modules will also be included as a component of the program.

The Community Investment Project is a youth-led project designed to empower youth with networking skills and motivation to leverage their voice and become strong advocates for positive change. Students will have the opportunity to research, analyze, and advocate issues that affect their families, schools, and neighborhoods. In the outreach phase youth will be presented with a community survey to revise and administer in the city of Rancho Cordova. Data collected from the survey will inform participants on civic engagement and advocacy project areas that might be of interest to explore. Both programs will complete one youth-driven advocacy project.

D. Project Team: David Augusto, Program Manager, is adept at working with youth in the Sacramento region in support of their professional and educational goals. He is committed to educating young people on the importance of civic engagement and advocacy through leadership, life skills, and professional development. Last year he ran the first virtual Summer @ City Hall and a hybrid model of Youth @City Council in Rancho Cordova. He also manages the implementation of mentoring, civic engagement, and advocacy programs across SCUSD, EGUSD, SJUSD. David has a Bachelor's Degree in Sociology and a Minor in Urban Studies and Planning from CSU Long Beach. David will be assisted by Program Coordinators, Nick Soliz, who has a Bachelors from CSU Sacramento in Political Science and is also a former Youth@City Council alumni, and Samreen Siddiqui, who has a Bachelor's Degree from UCLA in Sociology and Labor Studies as well as experience in youth development.

E. Project Goals: The goals for these programs are to: (1) build civically engaged young people who become involved stakeholders in the success of Rancho Cordova, (2) support the healthy development of youth in the city, and (3) develop employable young people. The goals were established to create environments where youth feel safe, are encouraged to make healthy decisions, be productive citizens, and become connected to their schools and communities.

F. Funding Request: $81,168

1. **Estimated breakdown of project expenditures:**

Personnel: (Program Coordinators (2 @ .40 FTE), Program Manager (.20 FTE), Program Director (.20 FTE))	$60,409
Statutory Taxes & Benefits @ 10% of personnel	$ 6,041
Intern Stipends (15 @ $400/each)	$ 6,000
Participant Stipends (45 @ $100/each)	$ 4,500
Travel – Mileage (3,000 @ $0.585)	$1,775
Indirect @ 5% of Personnel & Benefits	$ 2,463
Total Request	$81,168
In-kind contributions	
Nutritious Snacks	$ 3,000
Program & Office Supplies	$ 3,000
Rent	$12,000
Indirect @ 5% of Personnel & Benefits – In-kind	$ 2,463
Total In-kind	$20,463

2. **Matching Funds:** $20,463
3. **Include any other funding contributions:** $20,463
4. **Ongoing operations and maintenance cost if applicable:** $0
5. **Total community enhancement funds requested:** $81,168
6. **Is this a multi-year request?** No

7. **Number of years:** N/A
8. **If you answered yes above, describe your plan.** N/A
9. **How many years have you received funding for this project?** 4
10. **When will your request for funding sunset for ongoing program?** 9/30/2022

G. **Project Schedule:** October 3, 2022 - September 29, 2023. Evaluations will be complete and available by October 31, 2023.

In the years that PRO Youth & Families has implemented the Youth @City Council and Summer @ City Hall programs in the City of Rancho Cordova, we have continued to find ways to increase access and remove barriers for youth to participate in these programs and accomplish project goals within the funding period. Our timeline is structured with pre-and-post work to allow us to adjust to any changes in the K-12 school year calendar, adjust for Summer, and meet the project completion date.

H. **Timelines: Overview of Y@CC and S@CH program calendars.**

Youth @ City Council

- October - Material creation for program recruitment and outreach.
- November - Recruitment and outreach phase.
- December - Application screening and applicant meet and greet through Mock Interviews
- January - May
    - Y@CC programming will occur once a week for 1.5 hours.
    - Students will be preparing to present their community project proposals in a Mock City Council format during the last month of programming.

Summer @ City Hall

- April - Material creation for program recruitment and outreach.
- May - Recruitment and outreach phase.
- June - Application screening and applicant meet and greet through Mock Interviews.
    - If internships are available, competitive interviews will be conducted for limited spots.
- July - August - S@CH Programming. 2-hour sessions Monday through Thursday, for 4-weeks.
    - Participants will have completed a Community Investment Project in collaboration with the City of Rancho Cordova.
- August- Post program survey and data review.

I. **Adaptability:** The program team has demonstrated success in administering programs in virtual/hybrid models via Zoom and is equipped to continue virtual/hybrid programming in order to comply with any local health and safety protocols from October 3, 2022, to September 29, 2023. Although the program can be implemented through a virtual/hybrid model the program team is actively transitioning back to in-person with guidance from local and public health authorities continuously assuring all partners are compliant with California Public Health and/or Sacramento County Health recommendations. The health, safety, and well-being of the Rancho Cordova community is of the utmost importance to PRO Youth and Families.

J. **Project Location:** Rancho Cordova City Hall, 2729 Prospect Park Drive, Rancho Cordova, CA

K. **Submitted by:** This application is submitted on behalf of PRO Youth and Families: a nonprofit agency with a 40-year history in the Sacramento region. PRO's President/CEO is Staci Anderson and the signatory for this project PRO's CFO, Phyllis Deats. PRO Youth and Families is located at 3780 Rosin Court Suite #120, Sacramento, CA 95834. For questions or comments, please contact Staci Anderson at 916-576-3300 or stacia@proyouthandfamilies.org.

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR SCHOOL SITE USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a public K-12 school site, you must request the endorsement of the school superintendent of that school district.

One supplemental form is required per school district.

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by the corresponding school superintendent for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. Each participating school superintendent reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

To be filled out by grant applicant

Project/Program Name: PRO Youth - Governments Engaging Youth in the City of Rancho Cordova

Name of Organization: PRO Youth & Families

Name of Applicant and Title: Staci Anderson, President and CEO

Applicant's Phone: **Applicant's Email:** stacia@proyouthandfamilies.org

Submit a copy of your application with this page to the school superintendent(s). For your application packet to be considered complete the signed and dated endorsement form must be received by the City of Rancho Cordova by March 18, 2022. The superintendent will submit the form directly to the City's Community Enhancement & Investment Fund team. You must submit this form and a copy of your application to the appropriate superintendent or his or her designee no later than March 4, 2022. For Elk Grove Unified School District use BGrewal@egusd.net. For Folsom Cordova Unified School District use agriffin@fcusd.org. For Sacramento City Unified School District use dianne-brown@scusd.edu.

To be filled out by School Superintendent or designee

Project Information

Project Name

Enhanced Family Life Education for Cordova High School Students

Project Synopsis

The health education staff at Cordova High School (CHS) would like to purchase parent simulator dolls to provide hands-on parenting experience. The goal is to educate students about the responsibility of caring for a baby and the importance of preventing pregnancy until ready to take on the responsibility of parenting.

Project Description

According to Sacramento County Public Health, In 2018, the teen birth rate was 5.5 births for every 1,000 females ages 15-19. An estimated eight percent of young men will become fathers before their 20th birthday. Teen birth rates are highest among Hispanic and Black adolescents. Approximately 55% of CHS student body identifies as one of these high risk groups. Teen pregnancy has a significant impact economically. Teen parenting costs taxpayers an average of $5,500 per year for each teen parent. Teen parents and their children usually require an increased amount of public service support throughout their entire lives related to behavioral problems, chronic medical conditions, and increased need for foster care. The economy also has lost tax revenue due to the teen mom having low academic achievement which often leads to the mom being unemployed or underemployed. One effective way to prevent teen pregnancy is through comprehensive family life education. Comprehensive family life education includes topics about healthy relationships and methods to prevent pregnancy; including abstinence and proper use of birth control. Per California law, high school students must receive family life education at least one time during high school. Health classes are offered two times per year at CHS. The family life curriculum that is taught in the health classes is Positive Prevention Plus. Positive Prevention Plus is an evidence-based curriculum that is compliant with California's law. Please see attachment for complete description

Project Team

Amanda Holoway: CHS health teacher Teal LeBaron: CHS Physical Education and Health department head Rhonda Franks: FCUSD Student Assistance Programs

Project Goals

By the end of their family life education lessons, teens will be empowered to make responsible family life choices as evidenced by verbalizing various ways to prevent pregnancy and the importance of family planning By the end of their family life education

lessons, teens will be empowered to make responsible family life choices as evidenced by explaining the physical, social, emotional and economic challenges of teen pregnancy By the end of their family life education lessons, teens will be empowered to make responsible family life choices as evidenced by identifying how teen pregnancy and parenthood affects teen parents, their children, families and society

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total project cost

$9,200

Estimated breakdown of project expenditures

Staffing $3,600 Curriculum $600 Simulator Dolls $5,000

Matching Funds

$4,200

Include any other funding contributions

multiple FCUSD departments including Cordova High School, Health Services, and Curriculum & Instruction

Ongoing operations and maintenance costs (if applicable)

Health education staff, student workbook purchase

Total Community Enhancement & Investment Funds requested

$5,000

Is this a multiyear request?

No

How many years have you received funding for this project?

0

When will your request for funding sunset for ongoing programs?

The purchasing of the simulation dolls will sunset by June 30, 2023. However, family life education will continue to be taught per CA Education Code for an indeterminate amount of time.

Do you plan to ask annually for funding?

No

What other funding will you seek to support your project?

Future purchase of additional simulation dolls and the funding for these dolls is to be determined.

Project Schedule, Timeliness and Adaptability

Project Schedule

August: Purchase simulator dolls November: Teach first cohort family life education lessons April: Teach second cohort family life education lessons

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

To purchase the dolls, we will receive a quote within 60 days from time of purchase from Nasco Educations. Once we receive this quote, we will work with FCUSD's budget department to complete a purchase order and order 10-12 dolls online. Per California law, high school students must receive family life education at least one time during high school. Health classes are offered two times per year at CHS. To comply with state mandates, the family life curriculum will be taught during each semester.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Application #45

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Throughout the pandemic teachers have been able to adjust their lessons to meet changes in health mandates and still provide students with a valuable educational experience. Should we have to return to on-line lessons again, students will receive lessons via Zoom or Microsoft Teams. Students are able to pick up and drop off supplies at the school site as needed and assignments can be submitted on-line through Google Classroom.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical address of project location

Cordova High School
2239 Chase Dr.
Rancho Cordova, CA 95670

Other physical addresses if project/program is at multiple sites

n/a

Have you received a letter of support for the project/program from the property owner?

Yes (includes if you are the property owner)

Letter of Support from Property Owner (not K-12 schools or park/park facility)

CHS Letter of Support.pdf
HS Letter of Support.pdf

Is your project/program intended to operate or take place at a public K-12 school site or a park/park facility?

Yes, at a public K-12 school site

Which school district is the public K-12 school site located in?

Folsom Cordova Unified

Read-Only Content

Public Record Unless otherwise exempt under applicable law, applications and application materials are public records. All information received from an applicant, whether received in connection with a grant application or in connection with any grant-funded activities performed are subject to disclosure pursuant to the California Public Records Act, unless otherwise exempt. Next Steps Applicants will receive acknowledgement once their application is received. When the application period closes, staff will review each application according to the application criteria and prioritization method listed within the Fiscal Year 2022/2023 Grant Application Process and Criteria document. Should staff have any questions or need clarification on your application, they will contact you. You are invited to attend any of the public City Council Meetings. It is anticipated at this time that the Community Enhancement & Investment Fund team will present information to the City Council starting in April and continuing through June. We may invite applicants to present their project and we may make selection recommendations to Council during the May City Council meetings. In addition, the Community Enhancement & Investment Fund team will send periodic updates to grant applicants via e-mail. It is possible that all funding decisions for the Fiscal Year 2022/2023 Community Enhancement & Investment Fund could be made in May and formally adopted by City Council by early June. Staff intends to notify all applicants of the funding decisions made by the end of June. If you have not signed up to receive automatic notifications when council meeting agendas are posted, you can do that by using the link below: https://www.cityofranchocordova.org/residents/what-s-happening/sign-up-for-e-news

Thank you,
City of Rancho Cordova

Project Description:

According to Sacramento County Public Health, In 2018, the teen birth rate was 5.5 births for every 1,000 females ages 15-19. An estimated eight percent of young men will become fathers before their 20th birthday. Teen birth rates are highest among Hispanic and Black adolescents. Approximately 55% of CHS student body identifies as one of these high risk groups.

Teen pregnancy has a significant impact economically. Teen parenting costs taxpayers an average of $5,500 per year for each teen parent. Teen parents and their children usually require an increased amount of public service support throughout their entire lives related to behavioral problems, chronic medical conditions, and increased need for foster care. The economy also has lost tax revenue due to the teen mom having low academic achievement which often leads to the mom being unemployed or underemployed.

One effective way to prevent teen pregnancy is through comprehensive family life education. Comprehensive family life education includes topics about healthy relationships and methods to prevent pregnancy; including abstinence and proper use of birth control. Per California law, high school students must receive family life education at least one time during high school. Health classes are offered two times per year at CHS. The family life curriculum that is taught in the health classes is Positive Prevention Plus. Positive Prevention Plus is an evidence-based curriculum that is compliant with California's law.

In addition to teaching Positive Prevention Plus, the health education staff at CHS would like to add a hands-on simulation experience to their student's family life education. This experience would allow students to take home a simulation doll for a few days. Students would take care of the doll as if it were a real baby. This experience would include students identifying the need and responding to the doll when it cries. Also, students will need to ensure adequate childcare is available when the student is not able to care for the baby. Students will learn about how much it costs to buy food and diapers and other items needed to care for a child. This simulation would provide a deeper insight into the time commitment and responsponsibilities of parenting and will emphasize the importance of delaying having children until the students are physically, financially, and emotionally ready.

This simulation experience aligns with several of the City of Rancho Cordova's goals. First of all, these lessons align with the goals to empower responsible citizenship and promote a positive image of Rancho Cordova by educating teens about the importance of making responsible decisions regarding family planning. As previously stated, teen pregnancy is expensive and resource intensive for communities to support. By preventing teen pregnancy, this frees up resources and helps the city to achieve its goal of ensuring the availability of the best public services in the region while practicing sound financial management.

CHS health education staff is asking the City of Rancho Cordova for a $5000 grant to pay for the simulation dolls. The school district is able to fund core curriculum material. However,

funding for additional supplies, such as the simulation dolls, is limited. The simulation dolls cost about $400 per doll. To purchase enough dolls for a class to receive this enhanced family life education experience would exceed the supply budget for CHS health education classes. By preventing as few as 1 teen pregnancy this on-time $5,000 investment will more than pay for itself because as previously stated, it costs taxpayers approximately $5,500 per year to support a teen mom.

Thank you for taking the time to consider this application. This additional hands-on experience to the family life education curriculum will increase teen knowledge about caring for a family which will prevent teen pregnancies and the impact that teen pregnancies have on an individual, their children, their family, and the greater Rancho Cordova community.

To Whom It May Concern:

I would like to express support for the Cordova High School Enhanced Family Life Education application for the City of Rancho Cordova Community Enhancement Fund. This funding would allow the Health Education Department the opportunity to create a comprehensive family life unit with state-of-the-art simulation dolls to positively impact student learning. With teen pregnancy rates on the rise for our most vulnerable student groups, CHS is uniquely positioned to provide critical intervention at a time during teen development which may have a substantial impact on prevention methods.

During this school year, as a result of a lack of available funding, our dedicated Health Teacher Ms. Holway, still attempted to incorporate this learning into her scope and sequence. Unfortunately, students utilized bags of flour as replacement for the simulation dolls and it was apparent that providing this technology would further support the intended learning outcomes for our students.

If awarded, the Health Department will work towards valuable goals of preventing unwanted pregnancy while balancing the importance of clear family planning for students. Additionally, students will be able to better understand the physical, social, and emotional impact and challenges associated with teen pregnancy and young parenthood.

I urge you to give this application your most serious consideration. Should you or your staff have any questions regarding this letter, please do not hesitate to call.

Respectfully submitted,

Jerad A. Hyden

Principal

March 2nd, 2022

To Whom It May Concern:

I would like to express my support for the Cordova High School Enhanced Family Life Education application for the City of Rancho Cordova Community Enhancement Fund. This funding would allow the Health Education Department at Cordova High School the opportunity to create a comprehensive family life unit with state-of-the-art simulation dolls to positively impact student learning. With teen pregnancy rates on the rise for our most vulnerable student groups, CHS is uniquely positioned to provide critical intervention at a time during teen development which may have a substantial impact on prevention methods.

As a School Nurse Administrator, I endorse the work done by Ms. Holway at CHS to teach her students a comprehensive family life unit. Prevention education is essential, and the information taught in our health classes is foundational to future generations.

If awarded, the Health Department will work towards valuable goals of preventing unwanted pregnancy while balancing the importance of clear family planning for students. Additionally, students will be able to better understand the physical, social, and emotional impact and challenges associated with teen pregnancy and young parenthood.

I encourage you to give this application your most serious consideration. Should you or your staff have any questions regarding grant request, please do not hesitate to call.

Kerri L. Kaye, RN, MSN, BSN

Application #45

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR SCHOOL SITE USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a public K-12 school site, you must request the endorsement of the school superintendent of that school district.

One supplemental form is required per school district.

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by the corresponding school superintendent for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. Each participating school superintendent reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

To be filled out by grant applicant

Project/Program Name: Enhanced Family Life Education for Cordova High School Students

Project Information

Project Name

Boys & Girls Club at Navigator Elementary

Project Synopsis

The Boys & Girls Club program would continue its work at Navigator Elementary, providing a comprehensive after-school program Monday-Friday for over 100 Navigator students. The Club would serve an additional 250 Navigator students during the school day through targeted outreach activities.

Project Description

The Boys & Girls Club at Navigator Elementary has been a constant in the lives of Rancho Cordova youth and families since 2018. Despite the Covid-19 pandemic, the Club has continued to serve Navigator students and their families. With the Club being back on campus for the 21/22 school year primary areas of focus for the program include health, safety, and education. On a typical day, the Boys & Girls Club serves over 300 youth on the campus of Navigator Elementary; providing academic support and enrichment programs designed to keep youth on track and successful both in and out of school. The Club has become a trusted partner and valued member of the school team; providing additional academic support and resources to the schools most vulnerable students. The Club has become an integral part of the school day, and a part of the Navigator team. Our Site Coordinator is traditionally on campus most of the school day and because of a close partnership with school administration, as well as teachers, the Club has been able to further positively impact all students at Navigator by providing school day support. Twice weekly the Boys & Girls Club facilitates High-Yield Learning Activities (HYLA) at recesses that are open to all students on campus. Our Site Coordinator is always “on call” at Navigator during the school day, there to assist with students who have behavioral issues and need time away from the classroom environment. We work with those students to process through their behavior/feelings, offer guidance, and redirect the youth back in to the classroom in a better frame of mind. Club data consistently shows that greater engagement in Club activities leads to decreases in high school dropout rates and truancy, drug and alcohol use and other risky behaviors as well as increases in good behavior and healthy lifestyle choices. The Club focuses on helping youth in three critical areas; Academic Success, Good Character and Citizenship and Healthy Lifestyles.

Project Team

Kimberly Key, Chief Executive Officer Kim has been an integral part of the Boys & Girls Clubs of Greater Sacramento

for over 18 years. She was first introduced to the Club as a volunteer at our Teichert Branch, teaching art classes. From there she joined the board of directors while she was in the field of commercial banking for Bank of the West. She served as Board President for over 5 years, assisting the Club to open more sites and serve more Sacramento-area youth than ever before. Kim's passion for the organization and its mission led to her accepting the role of CEO in 2015. Jon Rango, Chief Operating Officer Jon has been in the field of youth development for 27 years and with Boys & Girls Clubs for 18. Before coming to the Boys & Girls Clubs of Greater Sacramento, Jon was an Area Director for Boys & Girls Clubs of the North Valley. It was there he oversaw ASES and 21st Century school-based programs and worked closely with several school districts. He also has the opportunity to help start a Boys & Girls Club inside of the county's juvenile hall, only the second in the state at the time. Lisa Spiegler, Director of Quality, Impact and Evaluation Lisa currently creates program curriculum for all Club sites and has been with the Boys & Girls Club for 12 years. Her wide-ranging experience working with youth and overseeing programs has made her an invaluable part of the Boys & Girls Club team. In addition to program management, Lisa is our on-boarding coordinator, training new staff at school sites on classroom management, program expectations, as well as organizational and district policies and procedures. Andrew Gambalie, Navigator Elementary Site Coordinator Andrew has been with Boys & Girls Clubs for over 5 years, and the 21-22 school year is his first at Navigator. Andrew has been able to continue the Club's expectations of high-quality youth development programming for our Navigator Club members.

Project Goals

1) A minimum of 100 unduplicated youth will become Boys & Girls Club members for the 22/23 school year. 2) A minimum of 200 Rancho Cordova youth and their families will receive additional Club programs and services, including participating in the Club's weekend meal program. 3) 85% of Club members will improve school attendance. 4) 85% of Club members will show improvement in a single academic subject or overall GPA. 5) 90% of Club members will improve social-emotional skills through participation in BGCSAC's Smart Moves program. All data for the above goals will be tracked in the Club's member tracking system (Visions). Data will be collected via progress reports/report cards, youth surveys, and attendance logs.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total project cost

$132,255

Estimated breakdown of project expenditures

Site Manager - $38,000 Youth Development Professionals (3) - $56,202 Total Wages - $94,202 Payroll Taxes & Benefits - $16,030 Total Wages & Benefits - Direct Services - $110,232 Program Supplies - $6,000 Club Technology - $4,000 Total Operating Costs - $10,000 Administrative Costs (10%) - $12,023

Matching Funds

Corporate Contributions & Restricted Funding - $57,255

Include any other funding contributions

N/A

Ongoing operations and maintenance costs (if applicable)

N/A

Total Community Enhancement & Investment Funds requested

$75,000

Is this a multiyear request?

No

How many years have you received funding for this project?

4

Application #46

When will your request for funding sunset for ongoing programs?

The Club has steadily been able to increase its corporate donations and restricted funding contributions to support the program at Navigator. Current projections of expected income could see the request to the City of Rancho Cordova sunset in 3-4 years.

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

The Club has continued to seek and receive corporate support from the Rancho Cordova community. In addition, the Club has pass-through funding that it applies for through Boys & Girls Clubs of America.

Project Schedule, Timeliness and Adaptability

Project Schedule

The Boys & Girls Club at Navigator Elementary will begin August 2022 and run through May 2023.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

The Club's program will run over the course of the 22/23 school year. Throughout the year, the Club should have no challenges meeting the project schedule or goals and objectives.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

The Boys & Girls Club has operated both in-person and virtual programs since the onset of the pandemic. The Club will be able to safely and successfully meet all goals and objectives even if required to modify the program based on potential health orders/restrictions. The Club has established safety policies and protocol that will ensure the safe facilitation of both in-person and virtual programs.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical address of project location

10679 Bear Hollow Dr.
Rancho Cordova, CA 95670

Other physical addresses if project/program is at multiple sites

N/A

Have you received a letter of support for the project/program from the property owner?

No

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site or a park/park facility?

Yes, at a public K-12 school site

Which school district is the public K-12 school site located in?

Folsom Cordova Unified

Public Record Unless otherwise exempt under applicable law, applications and application materials are public records. All information received from an applicant, whether received in connection with a grant application or in connection with any grant-funded activities performed are subject to disclosure pursuant to the California Public Records Act, unless otherwise exempt. Next Steps Applicants will receive acknowledgement once their application is received. When the application period closes, staff will review each application according to the application criteria and prioritization method listed within the Fiscal Year 2022/2023 Grant Application Process and Criteria document. Should staff have any questions or need clarification on your application, they will contact you. You are invited to attend any of the public City Council Meetings. It is anticipated at this time that the Community Enhancement & Investment Fund team will present information to the City Council starting in April and continuing through June. We may invite applicants to present their project and we may make selection recommendations to Council during the May City Council meetings. In addition, the Community Enhancement & Investment Fund team will send periodic updates to grant applicants via e-mail. It is possible that all funding decisions for the Fiscal Year 2022/2023 Community Enhancement & Investment Fund could be made in May and

formally adopted by City Council by early June. Staff intends to notify all applicants of the funding decisions made by the end of June. If you have not signed up to receive automatic notifications when council meeting agendas are posted, you can do that by using the link below:

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR SCHOOL SITE USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a public K-12 school site, you must request the endorsement of the school superintendent of that school district.

One supplemental form is required per school district.

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by the corresponding school superintendent for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. Each participating school superintendent reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

To be filled out by grant applicant

Project/Program Name: Boys & Girls Club at Navigator Elementary

Name of Organization: Boys & Girls Clubs of Greater Sacramento

Name of Applicant and Title: Jon Rango - Chief Operating Officer

Applicant's Phone: 916-392-1350 **Applicant's Email:** jrango@bgcsac.org

Submit a copy of your application with this page to the school superintendent(s). For your application packet to be considered complete the signed and dated endorsement form must be received by the City of Rancho Cordova by March 18, 2022. The superintendent will submit the form directly to the City's Community Enhancement & Investment Fund team. You must submit this form and a copy of your application to the appropriate superintendent or his or her designee no later than March 4, 2022. For Elk Grove Unified School District use BGrewal@egusd.net. For Folsom Cordova Unified School District use agriffin@fcusd.org. For Sacramento City Unified School District use dianne-brown@scusd.edu.

JAMES TUCKER, PRINCIPAL

March 3, 2022

To Whom it May Concern;

It's my pleasure to write this letter in support of the Boys and Girls Club at Navigator Elementary School. The Boys and Girls Club serves nearly 75 students daily at our school. Their after-school program supports students academically and socially with a variety of enrichment opportunities.

Our students really enjoy this program and benefit from the mentorship of its club's leaders. We often have a waiting list of students who wish to join due to the positive reputation the program has in our community.

The collaboration and partnership we have with the Boys and Girls Club is lucrative for both students and staff. They provide a safe, productive program for our students after school and work closely within the behavioral systems we have in place during the school day. Their program provides a valuable service to our community.

We look forward to continuing our partnership with the Boys and Girls Club here at Navigator Elementary because we know that it benefits our students and their families.
If you have any questions, please feel free to reach out to me.

Sincerely,

James Tucker

Project Information

Project Name

Book Recovery and Expansion

Project Synopsis

Book recovery and collection expansion for FCUSD Rancho Cordova school libraries.

Project Description

During the 2020-2021 and 2022-2023 school years, FCUSD library staff encouraged families to check out books from their school library. This initiative helped curb learning loss, contributed to social-emotional learning while at home, and emboldened students to continue their love of reading despite distancing from one of their favorite places on campus. This was a successful campaign, as thousands of books went home with students at curbside pickups. Due to circumstances beyond families' and our control, many of these books did not return to campus. Several titles were our libraries' most popular novels, non-fiction texts and picture books. We would like to recover these lost books with the help of a Community Enhancement Grant. Additionally, it is critical that we support the social-emotional learning of students and curb learning loss by increasing the number of books students have access to. In Rancho Cordova, 22 percent of students met or exceeded state reading standards. In Folsom, 52 percent of students met or exceeded state reading standards. According to the American Association of School Libraries, when spending for libraries rises, better reading scores follow. Furthermore, the average age of Rancho Cordova school library collections is 1999, which is a 23-year-old collection. This means many non-fiction books are outdated and need replacement titles for factually accurate information. New titles, which better reflect student background and life experience, ought to be added to library collections. As an educational institution, newly purchased titles are essential so that we can align themed and non-fiction books to supplement our curriculum and select material that reflects each school's population. Our request is for one additional new library-bound book per Rancho Cordova student this year, with the goal to fully realize a 20:1 ratio in four years.

Project Team

11 Library clerks at 12 Rancho Cordova K-12 sites, and the district librarian.

Project Goals

In Rancho Cordova, school sites have on average, 11 library books per student. The American Library Association

study on highly effective school libraries recommends 15-20 books per student. We would like to build libraries in our Rancho Cordova schools to be at the maximum recommendation of the American Library Association for a ratio of 20 books per students. Plentiful access to a wide variety of library books will contribute to an equitable and high-level educational support for all students in Rancho Cordova. The average consumer purchased book is not suitable for school libraries. Library-bound books are more costly. This is because unlike a traditional hardback books, they are their binding is reinforced for more extensive use. According to the California Department of Education, since the demise of the School and Library Improvement Block Grant in 2009, the primary source of library funding for 51 percent of schools comes from fundraising activities. In Folsom, funding for additional library staff time and material is donated by the PTO or businesses or purchased from largely successful Scholastic Book Fairs. For Rancho Cordova, the Community Enhancement Grant would fill that gap in funding for our libraries and students. Substantial research has demonstrated that a school library with a rich collection of materials makes a positive impact on literacy and academic achievement of students. We want to encourage students to read broadly and satiate their curiosity for learning. To do that, our goal is to reach the recommended 20 books per student in the Rancho Cordova schools. The material purchased will support intellectual growth, classroom connections, personal development, individual interests, and the recreational needs of students.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total project cost

$153,000

Estimated breakdown of project expenditures

0

Ongoing operations and maintenance costs (if applicable)

0

Total Community Enhancement & Investment Funds requested

$153,000

Is this a multiyear request?

Yes

Number of years

4

If you answered yes above, describe your sustainability plan and whether the project is viable as a single year request.

When we have reached 20 books per child in Rancho Cordova school libraries the project will be completed. With district and grants funds, we estimate this will take 4 years. After this time, the district can maintain the collection at 20 books/student. It is sustainable as a single year request. An additional book per child is a benefit in and of itself.

How many years have you received funding for this project?

0

When will your request for funding sunset for ongoing programs?

When we have reached 20 books per child in Rancho Cordova school libraries. With district and grants funds, we estimate this will take 4 years. After this time, the district can maintain the collection at 20 books/student.

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

School based fundraising, library grants and district funds, when available.

Project Schedule, Timeliness and Adaptability

Project Schedule

The timeline for this project is from September 2022 and to be completed by May 30, 2023.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

District librarian will purchase material from book vendor. She will liaison with library staff who will work with school site teachers to select material. Library staff at each site will add library books to collection.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

As was conducted during school shutdowns, library staff would offer curbside pickup and read to students virtually to ensure they are able to access high-quality and grade-level literature.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Project Information

Project Name

"A Day in the Life": A Collaboration with George Washington Carver School of Arts and Science and California Capital Film Office

Project Synopsis

"A Day in the Life" program is a collaboration between California Capital Film Office and George Washington Carver School of Arts and Science. California Capital Film Office will work directly with Carver students to produce a, no shorter than 10 minutes and no longer than 15 minutes short documentary relevant to the city of Rancho Cordova. Student documentaries will have the possibility of being showcased in the Annual Documentary Film Festival with George Washington Carver SAS participating as one of several locations.

Project Description

As a Waldorf school, arts integration is fundamental to student learning; however, Carver has lost many of their arts programs due to limited funding. The partnership with California Capital Film Office provides students the opportunity to engage in every aspect of film production, explore career possibilities in the film industry, learn about the people and the city, highlight the City of Rancho Cordova, enter and host the Annual Documentary Film Festival while earning community service credit. The short documentaries focus on the day in the life in Rancho Cordova. This could be as follows; • A historical documentary as far as a landmark, building, history of the city, or past public figure who was born in Rancho Cordova. • A short doc about a public figure such as a sports star, film or RC personality, or business leader who lives or works in Rancho Cordova. • A celebrity who was born and lived their early life in Rancho Cordova. People that come to mind include, Lester Holt, Chris Bosio, MLB pitcher Geoff Jenkins, MLB player Jerry Manuel, MLB player/manager Max Venable, MLB player Seneca Wallace, NFL quarterback Gerald Willhite, NFL runningback • "A Day in the Life" of a Rancho leading figure, i.e. The Police Chief, The City Manager, a business leader who works in RC. • How the pandemic affected Rancho Cordova. Perhaps find a resident who had a particularly hard time. • How Rancho Cordova fits into the Sacramento region at large. • The many outdoor parks, river areas, and activities areas RC offers. • The effects of climate change in the greater river areas of rancho Cordova • A doc that looks at the new arts center that is slated to break ground on Folsom Blvd across from the MACC. A series of short documentaries by young students at a high school in Rancho Cordova. The finished product would be of high quality that is of broadcast quality and able to be screened. The students would be guided through the process from beginning to end.

Project Team

La Niecia Kobelt: Principal, George Washington Carver SAS: Oversee the overall program, students, approve topics, provide facility; Charles Lago (Director of the California Capital Film Office), Would act as the "Executive Producer" He would oversee the program and be heavily involved in the choosing of the topics and help with contacting people who would need to be interviewed or who we would need to gain access to etc.; Jose Ruiz (Executive Assistant to Charles Lago and Office Manager of the film office), Would work directly with each team to help craft their ideas. Would also act as "The Producer" of each film made.; Rafael Portillo (DP/Editor California Capital Film Office), Would be the main technical director on each film, and oversee the editing and post-production process.

Project Goals

• A series of short documentaries by young students at a high school in Rancho Cordova. • The finished product of high quality that is of broadcast quality and able to be screened. • The students would be guided through the process from beginning to end - "From Concept to Delivery" aided by filmmakers, writers, and editors who do this for a living. • Students product and ownership • A panel of three judges made up of three notable people, i.e. The Mayor, a notable film producer, and perhaps a TV journalist would choose 1st 2nd 3rd place winners. • Prizes awarded solicited through sponsorship. • A ceremony is held at City Hall, and the awards are presented by the Mayor or during a city council meeting which is televised. • Enter films in the Annual Documentary Film Festival that will take place every year in June. • The films (or a selection of the films) would be included in the festival screening program and shown as part of the festival. • After each screening, the group of students who made that film would give a short presentation as to how they came up with the idea and discuss the filmmaking process.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total project cost

$48,500

Estimated breakdown of project expenditures

• Camera body $1,295 X 4 = $5180 • Lenses $599 X 4=$2396 • 4 Track portable recorders $249 X 4= $996 • Bodypack handset lavalier mics $159 X 3 = $477 • Shotgun Microphone $399 X 3= $1197 • Telescopic boom pole $149 X 3 = $447 • Total Equipment Cost without Taxes = $7219 with taxes =$8,000 • Cal Cap Film Office Equipment - $6,500 (for entirety of the program) • Cal Cap Film Office Support Staff - $3,500 • Program Technical Director $6,000 • Program Producer - $6,000 • Program Executive Producer - $5,000 • School Administrative Cost - $3,500 • School Custodial Services - $5000 for festival and after school hours • Staffing Cost: $30,500 • Advertisement: Shirts, Hats, flyers, outreach, recruitment= $5000 Total Grant requested: $48,500

Application #48

Without the staffing allocation for a film teacher, Carver will continue to seek community partnerships with organizations and our Parent Guild.

Project Schedule, Timeliness and Adaptability

Project Schedule

-Semester 1: September – January; Production- Topics, Interviews, filming; -Semester 2: January – April: Editing and final production; May: Film Entries and selection for Annual Documentary Film Festival; June1 –June 14: Film Festival and surveys

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

Student will have multiple deadlines to complete projects throughout the year. In addition, students will be motivated to complete their short documentaries to enter the Annual Documentary Festival that begins the first week of June and ends prior to graduation the week of June 13th.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Every student has a Chromebook and is capable of completing interviews and film work virtually and digitally.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Public Record Unless otherwise exempt under applicable law, applications and application materials are public records. All information received from an applicant, whether received in connection with a grant application or in connection with any grant-funded activities performed are subject to disclosure pursuant to the California Public Records Act, unless otherwise exempt. Next Steps Applicants will receive acknowledgement once their application is received. When the application period closes, staff will review each application according to the application criteria and prioritization method listed within the Fiscal Year 2022/2023 Grant Application Process and Criteria document. Should staff have any questions or need clarification on your application, they will contact you. You are invited to attend any of the public City Council Meetings. It is anticipated at this time that the Community Enhancement & Investment Fund team will present information to the City Council starting in April and continuing through June. We may invite applicants to present their project and we may make selection recommendations to Council during the May City Council meetings. In addition, the Community Enhancement & Investment Fund team will send periodic updates to grant applicants via e-mail. It is possible that all funding decisions for the Fiscal Year 2022/2023 Community Enhancement & Investment Fund could be made in May and formally adopted by City Council by early June. Staff intends to notify all applicants of the funding decisions made by the end of June. If you have not signed up to receive automatic notifications when council meeting agendas are posted, you can do that by using the link below: https://www.cityofranchocordova.org/residents/what-s-happening/sign-up-for-e-news

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR SCHOOL SITE USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a public K-12 school site, you must request the endorsement of the school superintendent of that school district.

One supplemental form is required per school district.

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by the corresponding school superintendent for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. Each participating school superintendent reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

To be filled out by grant applicant

Project/Program Name: Ranga Vasantha- Festival of Arts & Culture

Name of Organization: Kannada Sangha of Sacramento (KSS)

Name of Applicant and Title: Prabhakar Rao, Board of Director

Applicant's Phone: 916-281-5529 **Applicant's Email:** prabhaker49@yahoo.com

Submit a copy of your application with this page to the school superintendent(s). For your application packet to be considered complete the signed and dated endorsement form must be received by the City of Rancho Cordova by March 18, 2022. The superintendent will submit the form directly to the City's Community Enhancement & Investment Fund team. You must submit this form and a copy of your application to the appropriate superintendent or his or her designee no later than March 4, 2022. For Elk Grove Unified School District use BGrewal@egusd.net. For Folsom Cordova Unified School District use agriffin@fcusd.org. For Sacramento City Unified School District use dianne-brown@scusd.edu.

To be filled out by School Superintendent or designee

Project Information

Project Name

Snakes to Schools Project

Project Synopsis

The Snakes to Schools Project seeks to educate elementary through high school-aged students, teachers, parents, and other outdoor enthusiasts in the Sacramento region about snake ecology, snake conservation, and snakebite first aid.

Project Description

Human-snake conflict is an increasingly common problem around the world, stemming from a lack of education about snakes. As human encroachment increases in many areas, the likelihood of human-snake conflict also increases. In the USA, the Center for Disease Control and Prevention estimates that annually 7,000 to 8,000 people are bitten by a venomous snake. Globally, it's much higher. According to the World Health Organization, each year over 2.7 million people around the world suffer a serious snakebite envenomation. Although there is only one venomous snake (the Northern Pacific rattlesnake, Crotalus oreganus oreganus) in the Sacramento area, encounters with them are common and serious rattlesnake bites do occur. Our community would benefit from additional education about rattlesnakes and other snakes in the region. Many snakes that live in human occupied areas are killed regardless of if they are harmful or not, because of fear. Snakes play a crucial role in ecosystems by maintaining ecosystem health and environments, however, their role is often highly overlooked. To address these issues, Save The Snakes seeks to empower our community members to safely coexist with snakes through our education and outreach programs. Our community of wildlife biologists and educators will implement all objectives of the Snakes to Schools project to mitigate human-snake conflict in the Sacramento area through effective education about snake ecology and wildlife conservation. The overall goals of the Snakes to Schools project are to successfully educate communities and learners about snakes found in the Sacramento area, which will build awareness and understanding of snakes, reduce snakebite, and lessen conflict between humans and snakes.

Project Team

The Snakes to Schools project will be led by the nonprofit organization Save The Snakes.

Project Goals

This project seeks to effectively communicate the importance of snakes in the Sacramento region; communicate and express how humans can and need to live in harmony with snakes. This will be accomplished by organizing awareness talks/workshops at schools

that can be attended by learners. Parents will also be welcome and encouraged to join. These talks/workshops will educate the learners on the ecological importance of snakes, identification of venomous vs non-venomous snake species, snake ecology and their role within different ecosystems, precautionary measures to avoid snakebites, and what to do in the event of a snakebite. Participants of these presentations will receive educational materials that are innovative and interesting to increase interest in snakes within learners at schools and to educate local communities about snakes. During the presentations, Save The Snakes will use educational tools such as snake specimens, live snakes, and innovative engagement quizzes to create interest in snakes. The use of interactive objects for learning purposes has been shown to engage learners longer and create an increased desire to learn. By introducing learners to live snakes, and other educational materials, we aim to reduce fear of snakes, promote snake awareness and understanding, and create snake ambassadors within the Sacramento community. Over a period of ten months, Save The Snakes will educate 500 learners from ten schools such that these learners can act as snake ambassadors in their communities. Additionally, we aim to generate support for snakes and snake conservation in the Sacramento area online, at community talks, and at events open to the public. By tabling at local events, using print/electronic media, and social media platforms, we aim to publicize our efforts to convey the importance of snake conservation and habitat preservation to communities.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total project cost

$6300

Estimated breakdown of project expenditures

Education and Awareness Materials Printing - $500 Materials printed for educational purposes, conservation cards, stickers, etc. Program Materials Design - $1,000 40 hours at a rate of $25 per hour to create program materials (conservation cards, educational materials, PowerPoint presentations) Program Coordination - $500 20 hours at a rate of $25 per hour to contact and secure program work at schools, libraries and events Program Implementation - $2,500 100 hours at a rate of $25 per hour to conduct program work at schools, libraries and events Program Expenses - $1,200 Program supplies (Costs for care and maintenance of educational animals) Fuel for vehicle - $300 Fuel for main vehicle (Costs for driving to schools, events etc.) Communications - $300 Phone calls made to stakeholders and creating website for program

Project Information

Project Name

VSP Professional Pathways

Project Synopsis

VSP Professional Pathway will support students interested in pursuing a career with VSP as a direct pathway. FCCP Youth Engagement Specialist will provide marketing, outreach, recruitment and enroll students in VSP 8 week training. Enrolled students will be supported by the Youth Engagement Specialist with challenges that arise, identify barriers and provide support services to be able to complete VSP's 8 week job training, increasing direct employment placement with VSP. Youth Engagement Specialist will follow up with a 30 and 60 day follow up after placement with VSP to provide additional support to successful placement.

Project Description

FCCP is proposing to provide professional pathways to students who want direct employment placement with VSP. VSP is one of our recent partnerships we added to provide students who completed a career assessment indicated interest in VSP direct support to enroll and complete VSP training and future job placement. FCCP's Youth Engagement Specialist will provide 1 on 1 support to help with outreach, recruitment, enrollment and ongoing support to students during their VSP training. Enrolled students will be provided further support to address barriers that arise and pre and post completion VSP Professional Pathways training. FCCP's partnership with VSP is a direct investment into Rancho Cordova's workforce development and filling vacancy in Rancho Cordova. The goal of this project is to integrate opportunities for students to participate in VSP's Professional Pathways. FCCP will utilize the data collected from our YCC participants' Career Assessment Interest Profile, a self-assessment, career exploration tool that helps youth discover the type of work activities and occupations that are of interest to them. The Career Assessment fosters career awareness but more importantly reveals the top 3 areas of interest for a significant number of youth to be Social, Enterprising and Conventional leading to working and serving the people and careers with a need to be able to integrate rules and attention to details. Providing a direct avenue for youth to be able to pursue further information and training with VSP would allow them to further examine and inform their career trajectory. ●VSP Career Planning – FCCP staff will assist an additional 10 students with completing their Career Assessment and set up an intake orientation to learn about VSP to see if it is a viable career path that they would pursue. ●Enrollment and Youth Engagement – FCCP staff will assign a Youth Engagement Specialist to support their

enrollment and job placement with VSP

Project Team

FCCP has been operating youth and adult employment programs in Rancho Cordova for over twelve years. For the past six years, FCCP has operated a full-service Job Center offering a wide range of employment support to Rancho Cordova community members. This grant continues our successful extension of these services tailored to high school students by bringing the services directly to them. With transportation a major barrier for many of our students, bringing services into their high schools is a necessity. This project will receive strategic design and oversight by Robert Sanger and Shinder Gill. Robert Sanger has led FCCP as Executive Director for the past eleven years with a total fifteen-year history with FCCP serving Rancho Cordova families and youth. He participates in the City's Education Stakeholders Committee and many other endeavors to improve the quality of life for Rancho Cordova residents and students. Shinder Gill has over 20 years of experience working in family and social services and close to five years combined workforce and youth development experience having managed various youth and employment projects in Sacramento, in particular social and emotional development and research with at risk youth. The day-to-day project management will be conducted by Doris Cortez. Doris has worked in youth and employment programs for close to three years with training specific to working with high risk youth including foster youth, parenting, criminal justice involved and youth with disabilities and/or behavioral challenges. Primary onsite staff will include Yalda Hadi, with experience in education, youth development and refugee youth mentoring and career exploration experience, in particular to underserved populations. This project will be executed in collaboration with Cordova and Kinney High Schools. FCCP has received full support from the administrators of both sites who have expressed a desire for the continuation of this project. Letters of support via email

Project Goals

● FCCP will serve a minimum of 10-12 unduplicated high school youth in this second half of the program per year. This will be measured by sign in sheets at each Youth Career Center locations (Cordova and Kinney High Schools). ● VSP Career Exploration - 60% of youth will enroll and complete VSP Professional Pathways curriculum Pathway/Goal Setting – ● Youth will be supported by Student Engagement Specialist who will provide case management and address barriers that arise to support completion of the their training. ● Employer Engagement - Student Engagement Specialist will work with enrolled students to prepare for workforce development and entry into professional career pathways with VSP. Support will be provided in resume, and interview preparation. ● Follow Up- Student Engagement Specialist will provide 30 and 60 day follow up to provide continued support post completion and possible VSP worksite placement to assist with resources and referrals.

Funding Request

$56,134.40

Application #50

Is this a multiyear request?

No

How many years have you received funding for this project?

1

When will your request for funding sunset for ongoing programs?

Services are specific to the community of Rancho Cordova. This project is dependent on City of Rancho Cordova Community Enhancement funds. We will continue to explore sustainable funding for this project, however, because the geographical scope is very narrow, it is difficult to find alternative funding sources.

Do you plan to ask annually for funding?

No

What other funding will you seek to support your project?

We will continue to explore sustainable funding for this project, however, because the geographical scope is very narrow, it is difficult to find alternative funding sources.

Project Schedule, Timeliness and Adaptability

Project Schedule

● Jan 1, 2023 to March, 2023 – Continue outreach, recruitment and annulment into VSP Professional Pathways. ● March, 2023 to June 10, 2023 – Support enrolled students in VSP Professional Pathway towards completing the program and placement into directo VSP workforce entry level placement on job site. ● May 28, 2023 to June 30, 2023 –Student Engagement Specialist will support follow up support services and provide resources and referrals necessary.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

Result oriented monitoring outcomes will be established and tracked and address areas of focus by the Director of Programs and Youth Services Manager to ensure the outlined project schedule is completed by 6/30/23.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

FCCP iwill assess students' service delivery model and make adjustments accordingly. Adapattabilit will align with those made by FCCP with the onset of COVID-19 to be able to provide services using digital platforms such as zoom, google meets to engage students synchronously, hold student office hours and created semi hybrid online and in-person services. FCCP has a COVID worksite plan in place and regularly updates it in accordance with the Sacramento County Health Order and CDC guidelines. FCCP YCC continues to explore google classroom and virtual platforms to integrate both synchronous and asynchronous learning activities strategies and continue to safely provide services and stay in compliance with CDC guidelines. FCCP will continue to stay informed in navigating the principles of change based on research.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical address of project location

10826 Gadsten Way
Bldg E
Rancho Cordova, CA 95670

Other physical addresses if project/program is at multiple sites

This project will be primarily located at Cordova, Walnutwood and Kinney High Schools at 2239 Chase Drive, 10850 Gadsten Way and 2710 Kilgore Road, Rancho Cordova respectively. Preparation activities and summer services will be offered at Folsom Cordova Job Center at 10826 Gadsten Way, Rancho Cordova on the Community Education Center Campus. Activities for this project will take place within Folsom Cordova Unified School District

Have you received a letter of support for the project/program from the property owner?

Yes (includes if you are the property owner)

Letter of Support from Property Owner (not K-12 schools or park/park facility)

City of Rancho Cordova 01_12_2022 8_10 PM - 6.pdf

Is your project/program intended to operate or take place at a public K-12 school site or a park/park facility?

Yes, at a public K-12 school site

Which school district is the public K-12 school site located in?

Folsom Cordova Unified

Public Record Unless otherwise exempt under applicable law, applications and application materials are public records. All information received from an applicant, whether received in connection with a grant application or in connection with any grant-funded activities performed are subject to disclosure pursuant to the California Public Records Act, unless otherwise exempt. Next Steps Applicants will receive acknowledgement once their application is received. When the application period closes, staff will review each application according to the application criteria and prioritization method listed within the Fiscal Year 2022/2023 Grant Application Process and Criteria document. Should staff have any questions or need clarification on your application, they will contact you. You are invited to attend any of the public City Council Meetings. It is anticipated at this time that the Community Enhancement & Investment Fund team will present information to the City Council starting in April and continuing through June. We may invite applicants to present their project and we may make selection recommendations to Council during the May City Council meetings. In addition, the Community Enhancement & Investment Fund team will send periodic updates to grant applicants via e-mail. It is possible that all funding decisions for the Fiscal Year 2022/2023 Community Enhancement & Investment Fund could be made in May and formally adopted by City Council by early June. Staff intends to notify all applicants of the funding decisions made by the end of June. If you have not signed up to receive automatic notifications when council meeting agendas are posted, you can do that by using the link below:

Application #50

City of Rancho Cordova
Fiscal Year 2022/2023 Grant Application
Community Enhancement Fund

Applicant: Folsom Cordova Community Partnership

Project Name: Professional Pathway

Project Synopsis: VSP Professional Pathway will support students interested in pursuing a career with VSP as a direct pathway. Enrolled students will be supported by a Youth Engagement Specialist designed to engage, identify barriers and support services to be able to complete VSP's comprehensive job training to be able increase direct employment placement with VSP.

Project Description: Describe the project and how it benefits the community based on the City's Community Enhancement Fund guidelines and project criteria.

FCCP is proposing to provide professional pathways to students who want direct employment placement with VSP. VSP is one of our recent partnerships we added to provide students who completed a career assessment indicated interest in VSP direct support to enroll and complete VSP training and future job placement. FCCP's Youth Engagement Specialist will provide 1 on 1 support to help with outreach, recruitment, enrollment and ongoing support to students during their VSP training. Enrolled students will be provided further support to address barriers that arise and pre and post completion VSP Professional Pathways training. FCCP's partnership with VSP is a direct investment into Rancho Cordova's workforce development and filling vacancy in Rancho Cordova.

The goal of this project is to integrate opportunities for students to participate in VSP's Professional Pathways. FCCP will utilize the data collected from our YCC participants' Career Assessment Interest Profile, a self-assessment, career exploration tool that helps youth discover the type of work activities and occupations that are of interest to them. The Career Assessment fosters career awareness but more importantly reveals the top 3 areas of interest for a significant number of youth to be Social, Enterprising and Conventional leading to working and serving the people and careers with a need to be able to integrate rules and attention to details. Providing a direct avenue for youth to be able to pursue further information and training with VSP would allow them to further examine and inform their career trajectory.
The components of this project include:

- VSP Career Planning – FCCP staff will assist an additional 10 students with completing their Career Assessment and set up an intake orientation to learn about VSP to see if it is a viable career path that they would pursue.
- Enrollment and Youth Engagement – FCCP staff will assign a Youth Engagement Specialist to support their enrollment in VSP training curriculum and provide ongoing support during the enrollment and identify resources to support their completion of the program and possible

employment placement. Effective student engagement ensures that the student is able to process and explore goodness to fit with the employer.

Project Team: The project team will include Yalda Hadi Youth Engagement Specialist and, Doris Cortez-Youth Services Manager, Shinder Gill-Director of Programs, and Robert Sanger-Executive Director.

FCCP has been operating youth and adult employment programs in Rancho Cordova for over twelve years. For the past six years, FCCP has operated a full-service Job Center offering a wide range of employment support to Rancho Cordova community members. This grant continues our successful extension of these services tailored to high school students by bringing the services directly to them. With transportation a major barrier for many of our students, bringing services into their high schools is a necessity. This project will receive strategic design and oversight by Robert Sanger and Shinder Gill. Robert Sanger has led FCCP as Executive Director for the past eleven years with a total fifteen-year history with FCCP serving Rancho Cordova families and youth. He participates in the City's Education Stakeholders Committee and many other endeavors to improve the quality of life for Rancho Cordova residents and students. Shinder Gill has over 20 years of experience working in family and social services and close to five years combined workforce and youth development experience having managed various youth and employment projects in Sacramento, in particular social and emotional development and research with at risk youth. The day-to-day project management will be conducted by Doris Cortez. Doris has worked in youth and employment programs for close to three years with training specific to working with high risk youth including foster youth, parenting, criminal justice involved and youth with disabilities and/or behavioral challenges. Primary onsite staff will include Yalda Hadi,, with experience in education, youth development and refugee youth mentoring and career exploration experience, in particular to underserved populations.

This project will be executed in collaboration with Cordova and Kinney High Schools. FCCP has received full support from the administrators of both sites who have expressed a desire for the continuation of this project. Letters of support via email tfrom Jerad Hyden, Principal of Cordova High School, and Assistant Principal Allen Sims of Kinney High School are attached.

Project Goals: The goals of this project include:

- FCCP will serve a minimum of 10 unduplicated high school youth in this second half of the program per year. This will be measured by sign in sheets at each Youth Career Center locations (Cordova and Kinney High Schools).
- VSP Career Exploration - 60% of youth will enroll and complete VSP Professional Pathways curriculumPathway/Goal Setting –
- Youth will be supported by Student Engagement Specialist who will provide case management and address barriers that arise to support completion of the their training.
- Employer Engagement - Student Engagement Specialist will work with enrolled students to prepare for workforce development and entry into professional career pathways with VSP. Support will be provided in resume, and interview preparation.
- Follow Up- Student Engagement Specialist will provide 30 and 60 day follow up to provide continued support post completion and possible VSP worksite placement to assist with resources and referrals.

Funding Request:
Total Project Cost: $56,134.40

Estimated Breakdown of Project Expenditures: Provided on attached spreadsheet.

Matching Funds: $31,009.20

Ongoing (beyond FY 2022/2023) Operations and Maintenance Costs, if applicable: N/A

Total Community Enhancement Funds Requested: $25,009.20

FCCP is requesting a total of $25,009.20 in Community Enhancement funding for this VSP Professional Pathways project for half of 2023- Jan 2023-June -2023 program year. FCCP understands that if there are remaining funds from the VSP Professional Pathways-2022-2023 program year, the City of Rancho Cordova will deduct the remaining 2023 VSP Professional Pathways program year funds from any awarded amount for this project.

Is this a multi-year request? No If yes, number of years: N/A

If you answered yes above, describe your sustainability plan: N/A

How many years have you received funding for this project? Started December 2022

When will your request for funding sunset for ongoing programs? Services are specific to the community of Rancho Cordova. This project is dependent on City of Rancho Cordova Community Enhancement funds. We will continue to explore sustainable funding for this project, however, because the geographical scope is very narrow, it is difficult to find alternative funding sources.

Project Schedule

- Jan 1, 2023 to March, 2023 – Continue outreach, recruitment and annulment into VSP Professional Pathways.
- March, 2023 to June 10, 2023 – Support enrolled students in VSP Professional Pathway towards completing the program and placement into directo VSP workforce entry level placement on job site.
- May 28, 2023 to June 30, 2023 –Student Engagement Specialist will support follow up support services and provide resources and referrals necessary.

Project timeliness

Result oriented monitoring outcomes will be established and tracked and address areas of focus by the Director of Programs and Youth Services Manager to ensure the outlined project schedule is completed by 6/30/23.

Adaptability

FCCP iwill assess students' service delivery model and make adjustments accordingly. Adapattabilit will align with those made by FCCP with the onset of COVID-19 to be able to provide services using digital platforms such as zoom, google meets to engage students synchronously, hold student office hours and

created semi hybrid online and in-person services. FCCP has a COVID worksite plan in place and regularly updates it in accordance with the Sacramento County Health Order and CDC guidelines. FCCP YCC continues to explore google classroom and virtual platforms to integrate both synchronous and asynchronous learning activities strategies and continue to safely provide services and stay in compliance with CDC guidelines. FCCP will continue to stay informed in navigating the principles of change based on research.

Project Location and Physical Address: This project will be primarily located at Cordova, Walnutwood and Kinney High Schools at 2239 Chase Drive, 10850 Gadsten Way and 2710 Kilgore Road, Rancho Cordova respectively. Preparation activities and summer services will be offered at Folsom Cordova Job Center at 10826 Gadsten Way, Rancho Cordova on the Community Education Center Campus. Activities for this project will take place within Folsom Cordova Unified School District. Letters of support are attached and the Supplemental Endorsement Form will arrive to the City of Rancho Cordova directly.

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR SCHOOL SITE USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a public K-12 school site, you must request the endorsement of the school superintendent of that school district.

One supplemental form is required per school district.

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by the corresponding school superintendent for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. Each participating school superintendent reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

To be filled out by grant applicant

Project/Program Name: VSP Professional Pathways

Name of Organization: Folsom Cordova Community Partnership

Name of Applicant and Title: Shinder Gill(Director of Programs) & Robert Sanger(Executive Director)

Applicant's Phone: (916) 294-9107 **Applicant's Email:** sgill@thefccp.org/rsanger@thefccp.

Submit a copy of your application with this page to the school superintendent(s). For your application packet to be considered complete the signed and dated endorsement form must be received by the City of Rancho Cordova by March 18, 2022. The superintendent will submit the form directly to the City's Community Enhancement & Investment Fund team. You must submit this form and a copy of your application to the appropriate superintendent or his or her designee no later than March 4, 2022. For Elk Grove Unified School District use BGrewal@egusd.net. For Folsom Cordova Unified School District use agriffin@fcusd.org. For Sacramento City Unified School District use dianne-brown@scusd.edu.

To be filled out by School Superintendent or designee

Endorsement Given Yes

Endorsement Withheld

Conditional approval of facility rental only

Superintendent's or Designee's Printed Name: Dr. Sarah Koligian Sarah Koligian

Date: 3/17/22

School District: Elk Grove Unified Folsom Cordova Unified ■ Sacramento City Unified Other

Comments (Optional):

The school superintendent or designee will send this form directly to CEIFGrants@cityofranchocordova.org no later than March 18, 2022. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

Project Information

Project Name

Youth Career Centers

Project Synopsis

Youth Career Centers will help youth to explore technical, vocational and career pathway trajectories by utilizing work readiness assessment methodologies. Project activities will include skill development in soft skills, interviewing preparation, communication, and work based learning. All services will be provided on school sites with trained youth career mentors.

Project Description

The goal of this project is to continue providing career development services for students at Cordova, Walnutwood and Kinney High Schools. To an important extent, the Youth Career Center (YCC) will allow students to graduate with first hand exposure to a wider array of career opportunities, an informed sense of their career direction, and a strong correlation between continuing education and achieving their career goals. FCCP has established a solid base and has exceeded outcomes in the three previously funded fiscal years and continues to see the number of students we assist grow each year. The components of this project include: ●Intentional Career Planning – Through conducting career exploration and career assessments FCCP staff will assist students with building an employment plan that reinforces educational goals and sets them on viable career pathways providing access to reliable information to assist with alignment align with their educational goals ●Integrated Workplace Experiences – FCCP staff will utilize our ever-growing network of local business connections to connect and broadening youth experiences to job shadowing opportunities, part-time jobs and internships to help students begin their career pathways, gain work-based learning, develop marketable technical and professional skills and connect their educational plans to their career development and future self-sufficiency. Effective employer engagement ensures that the right young people engage with the right employer or employee volunteer through the right activity at the right time in their school life. FCCP will assist in identifying goodness to fit between the young person and employer and provide ongoing support to ensure they are able to successfully achieve their potential. ●Adulting Skills – FCCP staff will teach students valuable skills they are requesting including financial goal setting, understanding debt and credit, healthy relationships, social and emotional development and nutrition

Project Team

Application #51

FCCP has been operating youth and adult employment programs in Rancho Cordova for over twelve years. For the past six years, FCCP has operated a full-service Job Center offering a wide range of employment support to Rancho Cordova community members. This grant continues our successful extension of these services tailored to high school students by bringing the services directly to them. With transportation a major barrier for many of our students, bringing services into their high schools is a necessity. This project will receive strategic design and oversight by Robert Sanger and Shinder Gill. Robert Sanger has led FCCP as Executive Director for the past eleven years with a total fifteen-year history with FCCP serving Rancho Cordova families and youth. He participates in the City's Education Stakeholders Committee and many other endeavors to improve the quality of life for Rancho Cordova residents and student. Shinder Gill has over 20 years of experience working in family and social services and close to five years combined workforce and youth development experience having managed various youth and employment projects in Sacramento, in particular social and emotional development and research with at risk youth. The day-to-day project management will be conducted by Doris Cortez. Doris has worked in youth and employment programs for close to three years with training specific to working with high risk youth including foster youth, parenting, criminal justice involved and youth with disabilities and/or behavioral challenges. Primary onsite staff will include Victoria, Youth Mentor, with three years of experience in education, youth development and refugee youth mentoring and career exploration experience, in particular to underserved populations.

Project Goals

●FCCP will serve a minimum of 100 unduplicated high school youth in this program per year. This will be measured by sign in sheets at each Youth Career Center locations (Cordova, Walnutwood and Kinney High Schools). ●Career Exploration - 60% of youth will take Career Interest Assessments providing information about potential careers matching their interests and abilities. Upon completing these assessments students will research job openings, labor market information, and educational pathways in their areas of career interest. Career Interest Assessment information will be given to students and recorded in secure student Youth Career Center database to track areas of career interest for reporting and internship development. ●Pathway/Goal Setting – 60% of youth will receive assistance developing a My Action Plan (MAP) identifying short, medium, and long range goals and action steps necessary to pursue their area of career interest. The MAP will be given to students with a copy maintained by Youth Career Center staff to track student progress toward identified goals. ●Resume Development/Job Attainment - 70% of youth will receive training on resume development, interviewing skills, and job attainment including how to complete online applications and pre-employment assessments. A minimum of 55 youth will develop a professional resume each program year. ●Adulting Workshops – A minimum of 30 youth will attend Adulting workshops and receive education related to financial literacy, healthy relationships, nutrition and understanding insurance. Youth will be pre- and post-tested to measure gains. ●Employer Engagement - FCCP will develop 20 new employer relationships sites per program year including educating employers about opportunities to partner with the high schools and employ students. ●Student Jobs/Internships – FCCP will assist students seeking internships or part time work to provide financial resources for themselves. A minimum of 15 youth placed.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total project cost

$141,732,65

Estimated breakdown of project expenditures

Please see attached budget spreadsheet with project expenditures.

Matching Funds

$85,867.60

Include any other funding contributions

In Kind services will be provided and indicated on budget spreadsheet attached.

Ongoing operations and maintenance costs (if applicable)

N/A

Total Community Enhancement & Investment Funds requested

$55,865.60

Is this a multiyear request?

No

How many years have you received funding for this project?

Application #51

4

When will your request for funding sunset for ongoing programs?

Services are specific to the community of Rancho Cordova. This project is dependent on City of Rancho Cordova Community Enhancement funds. We will continue to explore sustainable funding for this project, however, because the geographical scope is very narrow, it is difficult to find alternative funding sources.

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

We will continue to explore different funding sources on an ongoing basis.

Project Schedule, Timeliness and Adaptability

Project Schedule

● July 1, 2022 to August 11, 2023 – Provide Adulting, Job Readiness and Financial Literacy Workshops at FCCP's Job Center for out of school youth. Develop new employer host sites for internships, job shadowing or part time employment for students in a variety of career fields. ● August 12, 2022 to May 27, 2023 – Youth Career Centers will operate onsite at Cordova and Kinney High Schools. Students will receive assistance with career exploration, pathway/goal setting, resume development, job application assistance and financial literacy training. FCCP staff will continue to develop employer relationships and internship sites, matching students based on areas of career interest. ● May 28, 2023 to June 30, 2023 –Youth Career Services will be provided at FCCP's Job Center on the Walnutwood/Adult Education Campus until school restarts in August. Youth Career Center staff will provide ongoing activities including financial literacy and adulting workshops. Students will also receive ongoing assistance with resume development, job applications and interview preparation. Youth Career Center staff will continue to conduct employer outreach to develop internship sites and part time job opportunities for Cordova and Kinney High School youth. Graduated youth will receive priority enrollment in FCCP's Out of School Youth Program for 18 to 24 year olds which includes a paid work experience component in their career field of interest.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

Result oriented monitoring outcomes will be established and tracked and address areas of focus by the Director of Programs and Youth Services Manager to ensure the outlined project schedule is completed by 6/30/23.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

FCCP made adjustments to our YCC service modality with the onset of COVID-19 by integrating digital platforms such as zoom, google meets to engage students synchronously, hold student office hours and created semi hybrid online and in-person services. FCCP has a COVID worksite plan in place and regularly updates it in accordance with the Sacramento County Health Order and CDC guidelines. FCCP YCC continues to explore google classroom and virtual platforms to integrate both synchronous and asynchronous learning activities strategies and continue to safely provide services and stay in compliance with CDC guidelines. FCCP will continue to explore virtual gallery walks for students to be able to create and display their career aspiration projects and work and have an opportunity to learn from their peer's experiences and projects. FCCP will continue to stay informed in navigating the principles of change based on research.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical address of project location

10826 Gadsten WAy
Bldg E
Rancho Cordova, CA 95670

Other physical addresses if project/program is at multiple sites

This project will be executed in collaboration with Cordova, Walnutwood and Kinney High Schools. FCCP has received full support from the administrators of both sites who have expressed a desire for the continuation of this project. Letters of support from Jerad Hyden, Principal of Cordova High School, Annie Conover, Principal of Walnutwood High School and , Assistant Principal Allen Sims of Kinney High School are attached.

Have you received a letter of support for the project/program from the property owner?

No

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site or a park/park facility?

Yes, at a public K-12 school site

Which school district is the public K-12 school site located in?

Folsom Cordova Unified

Public Record Unless otherwise exempt under applicable law, applications and application materials are public records. All information received from an applicant, whether received in connection with a grant application or in connection with any grant-funded activities performed are subject to disclosure pursuant to the California Public Records Act, unless otherwise exempt. Next Steps Applicants will receive acknowledgement once their application is received. When the application period closes, staff will review each application according to the application criteria and prioritization method listed within the Fiscal Year 2022/2023 Grant Application Process and Criteria document. Should staff have any questions or need clarification on your application, they will contact you. You are invited to attend any of the public City Council Meetings. It is anticipated at this time that the Community Enhancement & Investment Fund team will present information to the City Council starting in April and continuing through June. We may invite applicants to present their project and we may make selection recommendations to Council during the May City Council meetings. In addition, the Community Enhancement & Investment Fund team will send periodic updates to grant applicants via e-mail. It is possible that all funding decisions for the Fiscal Year 2022/2023 Community Enhancement & Investment Fund could be made in May and formally adopted by City Council by early June. Staff intends to notify all applicants of the funding decisions made by the end of June. If you have not signed up to receive automatic notifications when council meeting agendas are posted, you can do that by using the link below: https://www.cityofranchocordova.org/residents/what-s-happening/sign-up-for-e-news

Thank you,

To Whom It May Concern:

I would like to express support for the Folsom Cordova Community Partnership's application for the City of Rancho Cordova Community Enhancement Fund. This funding would allow the Folsom Cordova Community to continue to operate a Youth Career Center on the Cordova High School campus. The presence of a Youth Career Center on our school campus, housed in our College and Career Center in the CHS Library, has proved extremely beneficial to supporting our most disenfranchised learners. With an expediential increase in the number of newly immigrated refugee students, the Youth Career Center has proactively worked to offer their assistance each week through dedicated services and supports which are truly invaluable to our team.

To date the Youth Career Center has served over 100 Unduplicated Youth and have had close to 300 Total Youth Visits to get assistance with resume development, interview preparation, career and college exploration, job applications and understanding employer expectations.

If awarded, the Folsom Cordova Community Partnership will continue to offer on-campus activities to expose student to a wider array of career opportunities, help them develop a more informed sense of their career direction and build a strong correlation between continued education and achieving their career goals. Additionally, the Youth Career Center will connect students with work opportunities in the local community including internships, job shadowing and part time jobs to help develop technical and professional skills for their future success.

I urge you to give this application your most serious consideration. Should you or your staff have any questions regarding this letter, please do not hesitate to call.

Respectfully submitted,

Jerad A. Hyden

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR SCHOOL SITE USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a public K-12 school site, you must request the endorsement of the school superintendent of that school district.

One supplemental form is required per school district.

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by the corresponding school superintendent for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. Each participating school superintendent reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

To be filled out by grant applicant

Project/Program Name: Youth Career Centers

Name of Organization: Folsom Cordova Community Partnership

Name of Applicant and Title: Shinder Gill(Director of Programs) & Robert Sanger(Executive Director)

Applicant's Phone: (916) 294-9107 **Applicant's Email:** sgill@thefccp.org/rsanger@thefccp.

Submit a copy of your application with this page to the school superintendent(s). For your application packet to be considered complete the signed and dated endorsement form must be received by the City of Rancho Cordova by March 18, 2022. The superintendent will submit the form directly to the City's Community Enhancement & Investment Fund team. You must submit this form and a copy of your application to the appropriate superintendent or his or her designee no later than March 4, 2022. For Elk Grove Unified School District use BGrewal@egusd.net. For Folsom Cordova Unified School District use agriffin@fcusd.org. For Sacramento City Unified School District use dianne-brown@scusd.edu.

To be filled out by School Superintendent or designee

Endorsement Given Yes

Endorsement Withheld

Conditional approval of facility rental only

Superintendent's or Designee's Printed Name: Dr. Sarah Koligian

Date: 3/17/22

School District: Elk Grove Unified Folsom Cordova Unified ■ Sacramento City Unified Other

Comments (Optional):

The school superintendent or designee will send this form directly to CEIFGrants@cityofranchocordova.org no later than March 18, 2022. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

Project Information

Project Name

The Connect Workshop

Project Synopsis

The Connect Workshop Group is an 8-week workforce development training program for underrepresented youth/young adults ages 16-24 that provides independent living skills lessons and task to enhance mental health and wellness. Participants who attend the weekly groups will receive a monetary stipend upon completion of group curriculum and tasks.

Project Description

The 8-week Connect Workshop group is a workforce development training program designed to enhance youth and young adults' employment skills, teach transitional living skills, and enhance mental health and wellness. Up to 32 youth and young adults/annually will participate in the weekly group and complete two community service projects and receive a monetary stipend upon completion. The Connect Workshop Project is a curriculum designed to provide youth and young adults with the relevant research, job training and education to assist in supporting long term employment and/or applying to an educational program. Youth and young adults will have the opportunity to employ career fields, job shadowing, college tours, networking and more through the Connect Workshop Project. The Connect Workshop Project is designed for youth/young adults ages 16-24 with special emphasis on underrepresented minority communities in Sacramento County. The location of the group meeting is TBD.

Project Team

SAC Connect Co-Owners and Licensed Clinical Social Workers, Chenee Robinson and Shanece Okoro Duncan, developed the Connect Group curriculum, oversight of weekly groups, development and evaluation of the pre/posttest, and exit survey. SAC Connect staff including group facilitators and peer mentors are responsible for implementation of the group to include facilitation of the weekly groups, participant monitoring and organizing community service project opportunities.

Project Goals

The Connect group will service 32 youth and young adults by the conclusion of the Program. This will be measured by weekly attendance and the number of monetary stipends disbursed. 100% of The Connect participants will identify a career and/or education path by the conclusion of the program. This will be measured by pre and exit surveys.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total project cost

$80,000

Estimated breakdown of project expenditures

Staff Wages: -Program Manager: $15,600 ($30/hr for 10hrs/week) -Facilitator: $10,400 ($20/hr for 10hrs/week) -Facilitator: $10,400 ($20/hr for 10hrs/week) -Peer Mentor $2,000 ($500/group) -Peer Mentor $2,000 ($500/group) Youth Stipend: $32,000 Supplies: $6,000 Program incentives/giveaways: $1,600 ($400/group)

0

When will your request for funding sunset for ongoing programs?

N/A

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

N/A

Project Schedule, Timeliness and Adaptability

Project Schedule

The 1st Connect Group anticipated start date is 7/20/2022 and will run a new group quarterly with a two week break between groups. 1st Quarter- July 20, 2022- September 7, 2022 2nd Quarter- September 28, 2022-November 16, 2022 3rd Quarter- December 7, 2022-18, February 1, 2023 4th Quarter-February 22, 2023-April 19, 2023 Final Evaluation/Review- April 22, 2023-May 21, 2023

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

SAC Connect staff diligently adheres to creating and keeping deadlines/making modifications as needed to adjust to the current climate of the community (i.e. COVID-19), team collaboration, goal setting and meeting goals, and emphasizes a long-term commitment to and passion for mission-driven work. SAC Connect has experience implementing timeline driven programs which included meeting with funding monitoring points of contact monthly, submitting monthly, quarterly, and financial reports, and providing program updates as needed.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

This group can be provided virtually if the Public Health and/or Sacramento County Health Orders change. SAC Connect has laptops that youth can check out in the event they don't have one at home and if youth don't have access to internet the SAC Connect Office has internet that can be used by participants and space to adhere to social distancing requirements/PPE. Additionally, the community service projects required for the group can be adapted to align with Public Health Orders if needed.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical address of project location

225 30th Street, Suite 312
Sacramento, California 95816

Other physical addresses if project/program is at multiple sites

The program can be offered virtually and within the participants community/residence.

Have you received a letter of support for the project/program from the property owner?

Requested, and will submit to city by March 18, 2022

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site or a park/park facility?

No

Public Record Unless otherwise exempt under applicable law, applications and application materials are public records. All information received from an applicant, whether received in connection with a grant application or in connection with any grant-funded activities performed are subject to disclosure pursuant to the California Public Records Act, unless otherwise exempt. Next Steps Applicants will receive acknowledgement once their application is received. When the application period closes, staff will review each application according to the application criteria and prioritization method listed within the Fiscal Year 2022/2023 Grant Application Process and Criteria document. Should staff have any questions or need clarification on your application, they will contact you. You are invited to attend any of the public City Council Meetings. It is anticipated at this time that the Community Enhancement & Investment Fund team will present information to the City Council starting in April and continuing through June. We may invite applicants to present their project and we may make selection recommendations to Council during the May City Council meetings. In addition, the Community Enhancement & Investment Fund team will send periodic updates to grant applicants via e-mail. It is possible that all funding decisions for the Fiscal Year 2022/2023 Community Enhancement & Investment Fund could be made in May and formally adopted by City Council by early June. Staff intends to notify all applicants of the funding decisions made by the end of June. Rancho Cordova, CA 95670

Subject: SAC Connect Landlord Letter of Recommendation

To whom it may concern,

In addition to being a commercial real estate broker with Newmark, I am also the Asset Manager for S&L Partnership, the owner and property manager for 225 30th Street, the building that SAC Connect Therapeutic & Wellness Services uses as their office space and for programs. In addition to simply being a good tenant and paying rent on time every month, SAC Connect also runs some excellent programs including their Job Readiness Program which helps underserved members of our community research, prepare and apply for jobs. I am lucky to have such an organization as a tenant in our building and our community is lucky to have them serving Sacramento. Please call or email if you have any questions.

Project Information

Project Name

Financial Empowerment

Project Synopsis

FCCP will provide financial empowerment to residents of Rancho Cordova ages 16+ to increase financial literacy. The project will use an approved, CFPB Your Money, Your Goals curriculum to teach financial transformation and tools to make effective money and debt management to be able to have a healthy financial lifestyle. Improving financial independence and understanding debt and credit has a positive, detrimental impact on future financial health.

Project Description

Folsom Cordova Community Partnership (FCCP) was able to create a financial empowerment program through a pilot grant from the Office of Child Abuse Prevention (OCAP). Although this grant came to an end, it provided us with seed money to develop and adopt Consumer Financial Protection Bureau's (CFPB) financial empowerment curriculum and tools to the unbanked and underbanked in our communities. We have created dynamic visuals, activities and handouts to provide a vibrant experience that addresses all learning modalities in multiple languages; English, Spanish, Farsi, Russian and adding Armenian, Hindi and Ukrainian. Each language series has specific adoptions based on cultural specifics regarding money and banking practices. We have piloted and administered this teaching series in both classroom and web-based modules as well as through one on one financial coaching. Through this pilot period we have delivered financial empowerment education to over 200 community members. We have been funded by Calmoney Smarts based on our success and demand for financial empowerment to serve an additional 80 participants throughout Sacramento. This project will allow us to increase our capacity further to serve and target specifically, 80 Rancho Cordova to receive a comprehensive financial empowerment curriculum and leading to financial independence. Financial Empowerment addresses the City of Rancho Cordova's mission to support and value the development of youth and community members and provide opportunity towards economic advancement .

Project Team

FCCP for the past 11 years started and built and operated a full-service Job Center offering a wide range of employment support to Rancho Cordova community members. This grant continues our successful extension of these services tailored to Rancho Cordova residents by bringing the services directly to them. With transportation a

major barrier for many of our students, bringing services into the community, particularly underserved is a necessity. This project will receive strategic design and oversight by Robert Sanger and Shinder Gill. Robert Sanger has led FCCP as Executive Director for the past eleven years with a total fifteen-year history with FCCP serving Rancho Cordova families and youth. He participates in the City's Education Stakeholders Committee and many other endeavors to improve the quality of life for Rancho Cordova residents and students. Shinder Gill has over 20 years of experience working in family and social services and close to five years combined workforce and youth development experience having managed various youth and employment projects in Sacramento, in particular social and emotional development and research with at-risk youth. The day-to-day project management will be conducted by Doris Cortez. Doris has worked in youth and employment programs for close to three years with training specific to working with high risk youth including foster youth, parenting, criminal justice involved and youth with disabilities and/or behavioral challenges. Primary onsite financial empowerment staff will include Micaela Cantu(Spanish language), Anna Kyrylyuk(Ukrainian & Russian language), Suman Makwana(HIndi) and Noune Manukyan(Armenian & Farsi).

Project Goals

FCCP will serve a minimum of 80 unduplicated Rancho Cordova residents in this program per year. This will be measured by registration and tracking during virtual module attendance. Provide "YOUR MONEY, YOUR GOALS" program curriculum to support positive cash, credit, and saving management skills. Provide The YOUR MONEY, YOUR GOALS utilizing the Digital Toolkit Provide in-person cohorts in the community and web-based delivery offering a culturally competent financial education program. Financial behavior scale pre and post-70% participants will complete pre and post behavioral scale to demonstrate increased understanding of financial goal planning, understanding credit card debt, learning how to manage and pay bills, understand loan process and saving for emergencies Entire Module Completion 60% of the participants will complete the entire Modules 1-9 increasing their capacity to increasing generational and long term healthy financial future.

How many years have you received funding for this project?

0

When will your request for funding sunset for ongoing programs?

Services are specific to the community of Rancho Cordova. This project is dependent on City of Rancho Cordova

Community Enhancement funds. We will continue to explore sustainable funding for this project, however, because the geographical scope is very narrow, it is difficult to find alternative funding sources.

Do you plan to ask annually for funding?

No

What other funding will you seek to support your project?

We will continue to explore and examine other funding sources. For this particular project we will target banking institutions to help provide funding to assist participants in navigating and building financial prosperity.

Project Schedule, Timeliness and Adaptability

Project Schedule

● July 1, 2022 to July 31,2022, – Review and update plan for created infrastructure of Your Money, Your Goals(YMYG). Identify staff to add to existing framework of Spanish and Farsi and work to add Hindi and Ukrainian to be trained on the YMYG toolkit ● August 1, 2022-August 31, 2022- Staff training on targeted outreach, identify community partnerships to maximize staff resources to facilitate workshops/cohorts and client engagement strategies ● August 1, 2022 to May 27, 2023 – Financial Empowerment Specialist will provide YMYG in person and web based to the residents of Rancho Cordova. FCCP staff will continue to work with and identify underserved community liaisons to establish cohorts. Facilitate the nine module packet system available for ease of home-based delivery of YMYG curriculum education. Conduct Pre-Post financial behaviors surveys to gather measurable financial changes demonstrating competency. ● May 28, 2023 to June 30, 2023 –Financial Empowerment will wrap up and conduct analysis of client changes in financial wellbeing or financial management as measured by the pre-/post-service assessment tool

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

Result oriented monitoring outcomes will be established and tracked and address areas of focus by the Director of Programs and Employment/Youth Services Manager and Financial Engagement Specialists to ensure the outlined project schedule is completed by 6/30/23.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

FCCP made adjustments to our Financial Empowerment service modality with the onset of COVID-19 by integrating digital platforms such as zoom, google meets to engage students synchronously, hold student office hours and created semi hybrid online and in-person services. FCCP has a COVID worksite plan in place and regularly updates it in accordance with the Sacramento County Health Order and CDC guidelines. FCCP YCC is exploring google classroom and virtual platforms to integrate both synchronous and asynchronous learning activities strategies and continue to safely provide services and stay in compliance with CDC guidelines. FCCP is exploring virtual gallery walks for students to be able to create and display their career aspiration projects and work and have an opportunity to learn from their peer's experiences and projects. FCCP will continue to stay informed in navigating the principles of change based on research.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical address of project location

10826 Gadsten Way
Bldg E
Rancho Cordova, CA 95670

Other physical addresses if project/program is at multiple sites

We will be providing majority of the services in the community in cohorts and virtually. Mobilizing staff will allow us to maximize our resources and reach Rancho Cordova residents in the community.

Have you received a letter of support for the project/program from the property owner?

No

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site or a park/park facility?

No

Public Record Unless otherwise exempt under applicable law, applications and application materials are public records. All information received from an applicant, whether received in connection with a grant application or in connection with any grant-funded activities performed are subject to disclosure pursuant to the California Public Records Act, unless otherwise exempt. Next Steps Applicants will receive acknowledgement once their application is received. When the application period closes, staff will review each application according to the application criteria and prioritization method listed within the Fiscal Year 2022/2023 Grant Application Process and Criteria document. Should staff have any questions or need clarification on your application, they will contact you. You are invited to attend any of the public City Council Meetings. It is anticipated at this time that the Community Enhancement & Investment Fund team will present information to the City Council starting in April and continuing through June. We may invite applicants to present their project and we may make selection recommendations to Council during the May City Council meetings. In addition, the Community Enhancement & Investment Fund team will send periodic updates to grant applicants via e-mail. It is possible that all funding decisions for the Fiscal Year 2022/2023 Community Enhancement & Investment Fund could be made in May and formally adopted by City Council by early June. Staff intends to notify all applicants of the funding decisions made by the end of June. If you have not signed up to receive automatic notifications when council meeting agendas are posted, you can do that by using the link below:
https://www.cityofranchocordova.org/residents/what-s-happening/sign-up-for-e-news

Thank you,
City of Rancho Cordova

Project Information

Project Name

Sacramento Splash - Youth Environmental Leadership Camp (YELC)

Project Synopsis

YELC is an immersive summer program for 6th/7th grade students. Campers will attend a 1-week camp, M-F from 8:30 a.m. – 5:30 p.m., in groups of 15. Youth will design and implement climate-smart solutions aimed at improving air/water quality or natural habitats where they live. We will hold 4 camp weeks.

Project Description

YELC is an immersive summer program for 6th/7th grade students. Campers will attend a 1-week camp, M-F from 8:30 a.m. – 5:30 p.m., in groups of 15 where youth will design and implement climate-smart solutions aimed at improving air/water quality and/or natural habitats where they live. We will be conducting 4weeks of camp. During the week-long camp, each day will cover topics related to climate change including but not limited to: air quality, water, energy, transportation, food/consumption/waste, land use, and natural habitats. The campers will visit local sites for hands-on guided experiences related to these topics. Campers will sample and collect data, gaining experience using some of the tools and materials that scientists and engineers use in their work. Campers will get the chance to engage with professional environmental scientists, engineers, social scientists, and environmental protection activists to learn about their careers and what they did to work in their specific fields of expertise. After the camp, Splash will convene YELC campers monthly in a 2-hour after-school club for the remainder of the 12-month rolling year. Campers will work together on a team project that will have a positive impact on the environment and climate in their community. They will learn about project management, from identifying & defining a problem, to planning & budgeting, project implementation and measuring their success and impact. Throughout the process, they will have the support of mentors and staff. Splash will provide a small project budget for each team to use in implementation of their team project. Projects will be brainstormed, developed, and led by campers in groups of 4-6. Mentors will guide the projects, and will also coach campers on their collaboration, engagement, listening and communication skills. This project is aligned to the following grant criteria: Children and Youth, Education, Community Pride, and Quality of Life.

Project Team

YELC will be executed by the staff of Sacramento Splash. We will have 2 FTE working on the program during the summer camp weeks along with the assistance of 2 field guides. Throughout the school year, the 2 FTE we will be partnering with 12 volunteer mentors to assist on the monthly mentoring meetings with the cohorts and the different community projects. Mentors will be employees or retirees from SMUD, Regional San, City of Sacramento, the CA Department of Natural Resource and Department of Water Resources, and many other organizations.

Project Goals

Goal #1 (G1): Reflect the socio-economic, racial and ethnic diversity of the greater Sacramento population, with particular emphasis on those underrepresented in the outdoors, science and engineering. Measure #1 (M1): Teachers from schools with disadvantaged populations nominate student candidates for YELC; Splash produces final list of 60 participants. G2: Local youth grow in a safe, supportive community while learning, working, and playing together. M2: Program evaluations at end of camp completed by students and parents. G3: Campers develop intellectual, physical and emotional connections with nearby nature. M3: Program evaluations at end of camp completed by campers and parents. G4: Campers understand how air and/or water quality impacts all life, how people impact these and how they can improve it. M4: Campers complete all camp activities, and their journal entries reflect impact. G5: Campers learn to conduct scientific investigations (observe, collect, measure, analyze, draw, document) and report findings for a local stream or aquatic habitat, as well as compare reference sites or historical data. M5: Campers' reports are evaluated by Splash leads and professional mentors. G6: Campers learn to define a natural habitat problem, write and present a small project plan with budget, implement plan, and present the results. M6: Plan and Results reports will be reviewed by Splash lead staff & mentors with constructive feedback, plan and results report out will be presented to peers, Splash staff, and mentors. Camper small projects must show improvement or projected improvement over a planned duration in the natural habitat involved.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$103,695

Estimated Breakdown of Project Expenditures

Delivery/implementation of camp and camper-driven environmental projects: $38,569 Personnel $7,600 Food $600 General Office Supplies $1,500 Participant Incentives and Materials $30,000 Field Trips $10,000 Transportation $9,427 Indirect Costs/Overhead $6,000 Camper-Driven Environmental Projects Funding

Matching Funds

$37,907

Include Any Other Funding Contributions

$20,000

Ongoing Operations and Maintenance Costs (if applicable)

N/A

Total Community Enhancement & Investment Funds Requested

$45,000

Is this a multi-year request?

No

How many years have you received funding for this project?

1

When will your request for funding sunset for ongoing programs?

Funding will be needed annually to help run YELC. We plan on providing scholarships for some youth coming from title 1 schools and schools with a high percentage of free/reduced lunch program recipients.

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

Application #54

We will be applying for grant funding from foundations and other municipalities. We will also be working to secure business sponsorships and, we will be reaching out to our donors on the Big Day of Giving and in our yearly appeal letter to assist with general cost of the project. In ongoing years, we will likely charge 25% of our campers who are not need based campers to help subsidize the costs of the program. But aim to ensure that 75% of campers remain subsidized and from low-income communities.

Project Schedule, Timeliness and Adaptability

Project Schedule

- Jul 2022-May2023: Campers meet with mentors monthly after school to complete project plan, implement, measure progress. Campers write about their experiences, track & analyze data. - Jun 2023: Campers present results of project to peers, Splash Staff, mentors, and incoming camp group. Finishing campers "Graduate" from YELC. - Jun 2023: Post-assessment of campers to measure learning and program surveys to campers & parents to measure impact and challenges of YELC - with mixture of qualitative & quantitative measures, as well as attitudinal statements. - April 2023: Partner teachers determine candidate students interested in joining YELC. Splash selects campers, ensuring target representation of underrepresented groups. Splash applications/permissions slip packets are sent to parents and received back completed. - May 2023: Finalize camp program, schedule, and list of participants. Splash trains mentors. - Jun 2023: “Meet and Greet”/Orientation for campers & mentors to YELC. Pre-assessment of campers. - Jun and Jul 2023: Four, 1-week, Monday through Friday, 8:30am – 5:30pm YELC sessions.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

If grant funding is received, Splash would have completed the summer camp phase of YELC for the pilot year (Jun’22). We will have all planning and arrangements made the for the second half of the pilot year; the monthly mentor sessions (Jul’22-May’23). We will have a schedule and a better understanding of when cohorts will be meeting and the types of projects the youth will be pursing by the start of this grant’s period. As we begin to plan the following year, we will review evaluations from the summer program portion and make adjustments to the 2023/2024 season. Partner teachers will select interested student candidates after their classes have experienced Splash's "Investigating Vernal Pools" and/or "Splash in the Class" programs, which are delivered between Jan-Apr every year, as this is the most active and vibrant time for vernal pool habitats. Furthermore, YELC requires a significant initial camper time-commitment, so camps must start during the summer. Therefore, we will be tied to local school calendars as well as nature.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Yes, we would be able to operate our program if health options change. Due to the nature of our program, the camper group size is already small. If necessary, we could be able to provide virtual laboratory and field experience through live on-line observation and measurement, including microscope use, with digital journaling.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

4426 Excelsior Road
Mather, CA 95655

Other Physical Addresses (if project/program is at multiple sites)

Have you received a letter of support for the project/program from the property owner?

Yes (includes if you are the property owner)

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

No

Application #54

Supplemental Document
Sacramento Splash – Youth Environmental Leadership Camp

Last year Sacramento Splash applied for and received a community enhancement grant from the City of Rancho Cordova in the amount of $29,000 for the development of the Youth Environmental Leadership Camp (YELC.) YELC is an immersive summer program for 6th/7th grade students. Campers will attend a 1-week camp, M-F from 8:30 a.m. – 5:30 p.m., in groups of 10 (per COVID restrictions for Summer 2022) where youth will design and implement climate-smart solutions aimed at improving air/water quality and/or natural habitats where they live. We will be conducting 3 weeks of camp in Summer 2022.

During the week-long camp, each day will cover topics related to climate change. The campers will visit local sites for hands-on guided experiences related to these topics. Campers will sample and collect data, gaining experience using some of the tools and materials that scientists and engineers use in their work. Campers will get the chance to engage with professional environmental scientists, engineers, social scientists, and environmental protection activists to learn about their careers and what they did to work in their specific fields of expertise.

After the camp, Splash will convene YELC campers monthly in a 2-hour after-school club for the remainder of the 12-month rolling year. Campers will work together on a team project that will have a positive impact on the environment and climate in their community. They will learn about project management, from identifying & defining a problem, to planning & budgeting, project implementation and measuring their success and impact. Throughout the process, they will have the support of mentors and staff. Splash will provide a small project budget for each team to use in implementation of their team project. Projects will be brainstormed, developed, and led by campers in groups of 4-6. Mentors will guide the projects, and will also coach campers on their collaboration, engagement, listening and communication skills. Each Project Team will aim to complete its project within the program year. At the end of that time, each Team will present their project to camp staff, mentors, parents, and the next set of YELC campers. YELC will lay the foundation for - inspiring the next generation of scientists and environmental stewards who are dedicated to conserving energy and protecting air, water, and ecosystems from the impacts of urban life. All of this will take place while we are also teaching these youth leaders transferable skills that can be applied to any future career path.

During the fall, Splash's CEO used her extensive network to identify potential YELC Development Team members and recruit those interested in helping develop this program. The Development Team that has now been formed consists of members of Splash's Board of Trustees and staff, a former Board member, and local industry and climate/nature experts spanning a broad range of related backgrounds and experiences, and a retired Department of Water Resources Engineer. The Team documented a charter, which was approved by the Board of Trustees.

Application #54

During the later fall into winter, the YELC Development Team identified the themes for each day of the immersive camp week: Climate Change/Air Quality, Energy/Transportation, Water, Food/Waste/Consumption, & Land Use/Habitat. The Team has explored other camps in the Sacramento and Bay Areas to understand what exists that focuses on environment/climate projects and/or leadership and contacted organizers for information that might help our efforts. We have defined overarching learning objectives for the Program and drafted a camp schedule of field trips to one or more sites relevant to each day's theme, discussion topics, hands-on activities, speakers, and more. The Team is in progress on recruiting mentors for the program and has drafted Mentor Roles & Responsibilities.

We were able to establish a partnership with Paratransit who will be providing the transportation for the summer camp during the day. Funding for transportation was generously paid for by - Supervisor Don Nottoli.

The Team has also created communications/marketing-related materials including a flyer and online application for the potential campers. On March 8th, the application went live, and we are awaiting submissions.

At the time of our December grant update to the City, Splash has used $15,265.11 of the funding awarded. Roughly 100 hours have been volunteered by members of the Development Team to date. Splash has applied for numerous grants and has been awarded $30,000 from Regional San for the execution of the program over the summer. We have also received $11,000 in TOT funds from Sacramento County. We are currently waiting to hear from 5 additional foundations regarding grant applications.

We have recieved an in-kind donation of journals for the campers ($360 value), and we are awaiting to hear if we will be receiving additional in-kind donations of backpacks ($450 value) and lunches ($3,375 value).

The $45,000 of funding that we are requesting from the 2022/2023 Community Enhancement and Investment Fund from the City of Rancho Cordova will be used for the 2022/2023 YELC 2-hour after-school club and for the summer camp portion of the 2023/2024 camp year.

For the 2023/2024 summer camp year we plan on increasing the number of campers participating in the program from 30 to 60, and we will be operating the camp over a span of four weeks.

PROGRAM SUMMARY

Splash's YELC is an immersive summer program for middle-school students. Splash will emphasize recruitment of campers from groups underrepresented in the outdoors and STEM programs. Campers will attend a 1-week camp, in groups of 10* (until COVID restrictions are removed), where youth will become change-agents who design and implement climate-smart solutions aimed at improving air/water quality and/or natural habitats where they live. Campers will learn about project management, budgeting, and project implementation through the support of mentors and staff while learning water management, pollution prevention, and watershed ecology. After the camp, Splash will convene YELC campers monthly in a 2-hour after-school club for the remainder of the 12-month rolling year, where mentors will guide students to implement projects. Mentors are community leaders, naturalists, and environmental professionals who will ensure campers deliver a positive impact within their community. YELC will lay the foundation for an on-going, youth-led movement to conserve energy and protect air, water, and ecosystems from the impacts of urban life.

WHY IS THIS PROGRAM IMPORTANT?

For many decades conservationists in Sacramento County have seen streams, vernal pools and other wetlands diminish and degrade, despite many federal, state and local laws and agencies designed to protect them. The world is quickly realizing that initiatives to implement projects that will aid in reaching carbon neutral goals will take massive efforts. Youth driven action will be critical to reaching the global goals to mitigate climate change. Over the years many climate-focused advocates and agency staffers have been working on these issues, yet many of them are retiring. Splash plans to identify and mentor young people to become the next generation of environmental leaders. This project will give students hands-on experience to identify air, water, energy, or other natural habitat-impacting problems and develop climate-smart solutions and ecosystem restoration projects. For example, they may work with their community leaders, Splash, and professionals to ensure that stormwater discharges from new development will not impact local creeks or vernal pools, plan a solar farm to supplement power and decrease energy costs, or create a park out of an empty lot. These are just examples of the limitless ideas that a camper may want to work on. Splash will support any climate-smart project a camper wants to implement. YELC will lay the foundation for an on-going, youth-led leadership movement while teaching these youth leaders transferable skills that can be applied to any future career path.

PROGRAM FOCUSES

- Children/Youth
- Education
- Environment / Nature & Water Literacy and Connection

Application #54

- Becoming Scientists & STEM careers
- Serving Leadership
- Community Pride
- Quality of Life

PARTICIPANT COUNT & DEMOGRAPHICS

- Estimated Number of Participants per week: 10* (until COVID restrictions are removed)
- Splash will emphasize recruitment of campers from socio-economic, racial, and ethnic groups underrepresented in the outdoors and STEM programs. This will be based on candidate nominations from teachers at schools in disadvantaged populations (especially Title 1 schools) based on higher rates of Free/Reduced Lunch data according to the school districts located in the region, focused on students who demonstrated the most interest in or benefit from Splash's existing Programs, "Investigating Vernal Pools" and "Splash in the Class." Also, the location of the schools will be a consideration to enable us to prioritize those school areas with less green space nearby.

PROGRAM DESIGN/DETAILED DESCRIPTION

YELC primarily targets providing expanded STEM learning, career-field exposure, and a project development, management, and implementation opportunity for middle-school students during summer and after-school. Youth will attend a 1-week summer camp at the Splash Center in Mather, in groups of 10, where they will learn water management, energy saving, pollution prevention, watershed ecology and more through lessons, assignments, field observation, collection, measurement, analysis, drawing, documenting, and reporting findings. This program integrates science, mathematics, engineering, writing, inquiry, and exploration. Campers will learn about project management, budgeting, and project implementation with the support of mentors and staff. Campers will have meaningful experiences outdoors, connecting with nature, something that an urban concrete existence limits and which was further limited by the increase in screen time caused by the Covid-19 pandemic's requirement for distance learning. Campers will be helping improve the quality of life in their community both physically and socially and building connections that minimize the need for possible intervention, promote systemic social change, and will encourage and support them to thrive.

After the camp week, Splash will convene YELC campers monthly in a 2-hour after-school club for the remainder of the 12-month rolling year as the campers work in teams, collaborating to develop a climate-smart project focused on improving or restoring a natural habitat in their community. They will develop a project plan with budget, implement the plan, and present their project and its results at the end of the year to

their peers, professional mentors, Splash leaders, and to the next year's incoming group of campers. The campers may work with community leaders, Splash naturalists, and other professionals along the way to ensure that they can deliver a positive impact to nature in their community, feeling the empowerment of success and service to others. Campers will become change-agents and will be the foundation for an on-going, youth-led leadership movement to conserve energy and protect air, water, and ecosystems from urban impacts.

Starting with youth who already have created a connection to nature and Splash will help campers be engaged initially, but we will also ensure activities during the camp week are both engaging and interactive. Splash will also do everything possible to ensure that the participants feel safe, welcomed, respected, and important to the Program and their communities. Campers will not just be recipients of information, but will be encouraged to actively take part with observation, exploration, inquiry, opinion, and prediction. By keeping the groups small, camp leaders will be able to be sure they have encouraged every camper to ask questions and/or be asked questions and to extrapolate what they learn. They will be supervised as they interact with nature, with the professionals mentoring them, and with each other, to ensure safety, encourage collaboration, and to help them reach the best outcomes with their projects and their Program experience. During the year, camp leaders will stay in touch with participants not only through the monthly after-school sessions, but also through email, to ensure questions get answered and progress continues on all projects. We hope that our Program will develop in the participants an eco-centric mindset as well as place-based attachments that help them care about nature and their community, while introducing them to STEM careers that they could pursue.

PROGRAM PARTNERS

- Splash will recruit volunteer mentors through outreach and personal relationships. SMUD, Regional Sanitation District, Department of Water Resources, CA Natural Resources Agency, CA Department of Fish and Wildlife, Go-Biz, along with other youth focused nonprofits such as Green Tech, Clean Start, Sierra Nevada Journeys, Soil Born Farms, Effie Yeaw Nature Center, and the American River Parkway Foundation.
- Connections to UC Davis, Sacramento State and the Los Rios Community Colleges, along with working with Sacramento Vice Mayor Jay Schenirer will ensure mentors have experience working with youth within the region and with the communities which our program is targeting.

PROGRAM MEASURES OF SUCCESS

Program Goal	Program Objective(s)	Program Activities	Program Outcomes (include target numbers and percent)	Evaluation Method
Promote equity with a concerted application of resources toward those youth in greatest need.	Reflect the socio-economic, racial and ethnic diversity of the greater Sacramento population, with particular emphasis on those underrepresented in the outdoors, science and engineering.	• Teachers from schools with disadvantaged populations nominate student candidates with diversity in mind • Splash produces final list of 30 participants.	• >50% of participants come from schools with >65% free/reduced lunch participants • Best effort at diversity coming from the recruited Sacramento youth population	• List of participants in total • List of participants in each camp week
Create a safe environment, both physically and emotionally, in all settings, honoring culture and community	Local youth grow in a safe, supportive community while learning, working, and playing together.	• Site maintained to superior physical safety standards. • Staff experienced in supporting participants with respect and a sense of community.	• 0 safety incidents at our site • 100% of participants report having had a positive experience at our site.	• Safety record • Program evaluations at end of camp completed by participants.
Provide opportunities for young people to become active and engaged community members	Students develop intellectual, physical and emotional connections with nearby nature.	• Field experiences in nearby nature-observation, measurement, exploration, inquiry, etc. • Lessons in water management, pollution prevention, and watershed ecology. • Community natural habitat problem identification, definition, solution planning, implementing.	• 60% increase in awareness and understanding of local ecosystems, their resources, and threats to them. • 50% increase in interest in nature/science	• Pre-&Post-assessments completed by participants.
Increase STEM understanding and success	Participants understand how air and/or water quality impacts both aquatic life and human life, how people impact these and how they can improve it.	• Field experiences in nearby nature-observation, measurement, exploration, inquiry, etc. • Lessons in water management, pollution prevention, and watershed ecology.	• 60% increase in knowledge of these topics.	• Participants complete all lessons, assignments, and lab reports; journal entries reflect impact. • Pre-&Post-assessments completed by participants.

Increase STEM understanding and success And Provide opportunity for collective action	Participants learn to conduct scientific investigations and report findings for a local stream or aquatic habitat, as well as compare reference sites or historical data.	• Field experiences in nearby nature-observation, measurement, exploration, inquiry, analysis, drawing, documenting. • Community natural habitat problem identification, definition, solution research, planning, implementing. • Work/collaborate with peers, Splash leaders and professional mentors	• 100% completion of all assignments/tasks/steps	• Participants' report is evaluated by Splash leads and mentors.
Problem Solving, planning, budgeting, presenting	Participants learn to define a climate smart project, write and present a small project plan with budget, implement plan, and present the results.	• End-of-year presentation to peers, Splash leaders, professional mentors, new group of participants of project showing positive actual results or projected results, if there has not been sufficient time yet to measure actual results	• 100% of participant projects show improvement made or projected to be made in a nearby natural habitat • 100% of participants contribute to mathematics, science, and writing aspects of the project.	• Plan and Results reports will be reviewed by Splash leaders & mentors with constructive feedback, plan and results report out will be presented to peers, Splash staff, mentors and in-coming new participants. • Participant projects must show improvement or projected improvement over a planned duration in the natural habitat involved.
Build 21st century skills including leadership, workforce development, life, resiliency, and social-emotional skills	Exposure to careers dealing with science or the environment	• Professional mentors working in STEM fields will provide insight and coaching to participants throughout their project	• 100% of participants understand possible STEM career pathways available to them. • 35% of participants continue on as mentors to the next year's program.	• Post-assessments completed by participants. • Tracking list of participants returning to mentor.

Application #54

ORGANIZATION STATEMENT OF QUALIFICATIONS

Sacramento Splash is a non-profit organization dedicated to helping children understand and value our natural world through science education and outdoor exploration. We believe that all youth deserve the opportunity to learn and play in nature and our vision is of a generation of youth who take an active role in its protection.

Splash was started in 1999, but officially incorporated in 2008. We offer a variety of environmental science programs designed to introduce Sacramento area children to the wonders of science by teaching them about local habitats. We provide curricula and activities that make science relevant, engaging, and simply fun! We have also provided public nature tours of the vernal pools at Mather Field and of Morrison Creek for the benefit of children of all ages!

Splash is in a unique position to run the YELC Program and pass the torch of environmental stewardship to the next generation. Over our more than 20 years, we've built an extensive collaborative network with public school teachers, environmental educators and advocates, government agencies, industry, and developers. We've trained thousands of teachers and connected over 56,000 kids with nature. We have demonstrated to the region that we are committed to and effective at teaching hands-on science and the importance of protecting our natural resources.

Our long-standing relationships with teachers allow us to particularly access hard-to-reach populations of students with barriers to the outdoors and STEM. We provide outreach to more than 200 public schools and 8 municipalities and hold special learning and awareness events in the community, tables at community events, STEM education nights at schools and interface regularly with regional funders at consortiums, conferences, and round tables (on hold during Covid restrictions).

Our staff, who will build-out the YELC Program activities and lead camp sessions have more than 40 years of experience between them, writing our curricula, coordinating our programs, and delivering our field trips (in-person and virtually). They regularly have been working with this age range and demographic, so they know well how to interact with and motivate them. They are all active naturalists and well-known, respected experts in the area.

We successfully pivoted during the pandemic to provide on-line curricula, class sessions, live web-cam, virtual field trips, and "Live from Critterville" experiences. We continue to get tremendous positive feedback from teachers and students alike, such as:

- "Not only did my class learn a lot, but I did as well. This generation is our future and it is important for them to see different parts of our ecosystem and how it is important to the area. One girl was sad to hear that only 5-10% of the Vernal pools still exist. She wants to grow up and make sure they are taken care of." – 5th grade teacher

- "One area of the 5th grade Next Generation Science Standards related to matter in ecosystems that we strive to engage with is the human impact on our world. The "Splash in the Class" presentation gave my students a chance to apply what they had learned about a healthy ecosystem to our very own local streams and waterways. Students were inspired by the presentation, coming away with not only a deeper understanding of their connection to the environment, but an interest in finding creative solutions to keep our watershed healthy and clean." – 5th grade teacher
- "I learned about the Western Spadefoot, most commonly found in vernal pools and grasslands. Sometimes, this toad will let out a fume of rosted peanuts and garlic, which will cause sneazing! I also learned how my family could stop urban runoff…we could find liter and pick it up or we could go to a car wash instead of washing <it> at a drive way!" – 5th grader
- "I really liked the field trip and I never had a field trip in my house and that was a really good first one." – 5th grader

PROGRAM BUDGET

TOTAL: $96,290 – please see accompanying MS Excel file

- YEAR 1 – Program Build-out, first camp weeks: $37,446
- YEAR 2 – First full Program year: $58,844

YOUTH ENVIRONMENTAL LEADERSHIP CAMP

When is the camp?

June 13–17th, 2022
June 20–24th, 2022
June 27–July 1st, 2022

What Will We Provide?

- FUN EXPERIENCES
- All Program Materials
- Transportation to All Field Trips
- Exposure to Environmental Science Careers

How Do I Apply

Complete this application form

Oh the places we will go...and the things we will do!

	Day 1 – Monday	Day 2 – Tuesday	Day 3 – Wednesday	Day 4 – Thursday	Day 5 – Friday
Theme	**Climate Change & Air Quality**	**Energy**	**Water**	**Food, Waste, & Consumption**	**Land Use & Habitat**
Field Trip	Air Quality Monitoring Station	Dairy Digester or Solar Farm Site	Nimbus Fish Hatchery & Cordova Creek Restoration Site	Water Treatment Plant, The Bufferlands, Nicolaus Dairy	Cosumnes River Preserve
Activities	• Measure air pollutants • Plant tree seedlings	• Make and cook with a solar oven • Use a solar pump • Make a wind turbine	• Survey stream health • Make a map • Assess Water Quality	• Check out a lab! • Plant/harvest veggies	• See wildlife • Scavenger Hunt • Take part in a mock land decision

...plus speakers from each field, creative journaling, and more!

A week of fun experiences...

Campers will spend five (5) weekdays with us, going on field trips, making things that actually work, learning about air, water, energy, food & waste, nature, and more!

...followed by making a difference in your community!

Campers will participate in a year-long mentor-guided team project to benefit the community.

Who can participate?

6th and 7th Graders from the Sacramento region who already have some interest in the environment or natural habitats, and are interested in growing their knowledge through hands on learning!

Subject: Approval of Funding for Youth Environmental Leadership Camp

Dear Ms. Wieser:

We received your Confluence Program application from Sacramento Splash (Splash) requesting funding for the Youth Environmental Leadership Camp (YELC). I'm pleased to inform you that your request is approved and will be fully funded in the amount of $30,000, provided Splash meets the following conditions:

1. Splash staff will work with Regional San's Public Affairs staff to collectively design a meaningful experience for the campers' time at the wastewater treatment plant and Nicolaus Dairy.

2. Splash staff will provide pre- and post-camp surveys to gauge campers' knowledge on key Regional San topics and issues. Splash staff will work with Regional San's Public Affairs staff to craft these survey questions once we establish the campers' planned experience at the wastewater treatment plant and Nicolaus Dairy.

3. Where appropriate, Regional San's logo will be featured on any materials where other funding partners are recognized.

Funding in the amount of $15,000 will be issued upon Splash's acceptance of the aforementioned conditions. The final $15,000 in funding will be issued once Splash completes the camps and provides Regional San the pre- and post-camp survey results. Regional San reserves the right to confirm funding is being utilized for the approved purposes.

If you have any questions regarding this funding approval, please contact Nicole Coleman at colemann@sacsewer.com or (916) 876-6246.

Sincerely,

Nicole Coleman
Public Affairs Manager

Project Information

Project Name

Rancho Cordova/Folsom Lake College Promise Program

Project Synopsis

Folsom Lake College proposes to continue its partnership with Rancho Cordova in implementing the Rancho Cordova/Folsom Lake College Promise program, providing two years of virtually fee-free education to Rancho Cordova residents. Funding of tuition, fees, books, and basic needs will continue to ensure access to education for Rancho Cordova students.

Project Description

See attached project description.

Project Team

Dr. Whitney Yamamura—President, Folsom Lake College Dr. Kellie Butler—interim Vice-President of Student Services, Folsom Lake College Dr. Monica Pactol—Vice-President of Instruction—Folsom Lake College Hannah Blodgett, interim Dean of Student Success, Folsom Lake College Brian Robinson—Dean of Rancho Cordova Center Michele Steiner—Regional Director of Philanthropy—Los Rios Community College District

Project Goals

The Rancho Cordova/Folsom Lake College Promise Program will be guided by the following goals in the next three years: Program Growth--through more targeted outreach, the team will strive towards annual participation of 100 students/year. Increased Retention--through use of peer mentors and additional support staff, the team will work towards 85% retention per semester. Increased Success--through the use of peer mentors, success coaches, and faculty liaisons, the team will work towards 72% course success/semester. Streamlined support--through the deployment of BankMobile, the team will seek an increase in Promise dollars distributed directly to students each academic year.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Application #55

Total Project Cost

$157,900

Estimated Breakdown of Project Expenditures

Tuition, Fees, Supplies: $46/unit X 12 units X 100 students X 2 semesters = 110,400 Support for Center Clerk: $35,000 Total Request: $145,400

Matching Funds

Folsom Lake College will contribute $12,500 to support the Center Clerk.

Include Any Other Funding Contributions

None.

Ongoing Operations and Maintenance Costs (if applicable)

n/a

Total Community Enhancement & Investment Funds Requested

$145,400

Is this a multi-year request?

Yes

Number of Years

3

If you answered yes above, describe your sustainability plan and whether the project is viable as a single year request.

Folsom Lake College intends to request three years of funding.

How many years have you received funding for this project?

6

When will your request for funding sunset for ongoing programs?

Folsom Lake College intends to request annual funding.

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

Folsom Lake College is exploring possible donors as well as investigating further grant opportunities to help support Promise students.

Project Schedule, Timeliness and Adaptability

Project Schedule

The project timeline is ongoing and part of a multi-year request; some elements are subject to county and Los Rios covid protocols; however, in general the Promise students' experience is guided by the following timelines: November-August—Recruitment and application to the Promise program; the application for the Rancho Cordova Promise program opens in November of each year and remains open until the two weeks before the fall term begins. Calling campaigns for Rancho Cordova applicants to Folsom Lake College who have not filled out the Promise application launched in March, May, and July to ensure maximum access to the program for Rancho Cordova residents. August—Promise kickoff at the Rancho Cordova Center—Students receive a welcome to the Promise Program, information about their funding and Promise requirements, including how to maintain funding through their second year. Also students attend orientations on various aspects of being a Promise student. August-May—Promise students take 6-18 units (of which 6 units must be with FLC) primarily with FLC but where appropriate with the other three Los Rios Colleges as well. In addition to taking classes, students receive support from peer mentors and other staff associated with the Promise program.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

While some refinements to the program are new, Folsom Lake College has been administering the Promise Program since 2017 and has the team and infrastructure in place to support students through June 30, 2023.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Folsom Lake College and the City of Rancho Cordova have collaborated since the beginning of the pandemic to ensure that Promise students continue to not only receive the education which the project is funding, but also the support necessary to be successful as online students. Examples of adaptability include not only moving all students to the online modality at the beginning of the pandemic, but also providing chromebooks for those Rancho Cordova Promise students who needed technology. In the program's third year, the college moved to extending Promise support to veterans. Additionally, the college has made changes in the ways funds are distributed as a result of collaborating with the city of Rancho Cordova in the National League of Cities cohort city program.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

Folsom Lake College Rancho Cordova Center--10259 Folsom Blvd.
Rancho Cordova, Ca. 95670

Other Physical Addresses (if project/program is at multiple sites)

Have you received a letter of support for the project/program from the property owner?

Yes (includes if you are the property owner)

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

No

Application #55

Rancho Cordova/Folsom Lake College Promise Program—Program Description:

This project is a continuation of the Rancho Cordova/Folsom Lake College Promise Program whereby recent high school graduates who are Rancho Cordova residents receive funding for tuition, books, fees, and supplies. For those students who are not eligible for a California Promise Grant or Los Rios Promise grant, the funding would cover their tuition and fees. For those who qualify for one of the aforementioned grants, the Rancho Cordova Promise would provide "first dollar" aid for books, supplies, and basic needs in the amount equivalent to students' unit load. In essence, Rancho Cordova residents taking anywhere from 6-18 units would receive Promise support as participants in the Rancho Cordova/Folsom Lake College Promise Program.

In addition to its support for new students, Folsom Lake College proposes to continue offering support to Veteran students who are Rancho Cordova residents using the same funding parameters outlined above. Further, the college proposes to extend eligibility for the Promise program to students who are retraining/refining career skills because of pandemic displacement. Fall 21 data shows 20 new Rancho Cordova students whose goals are noted as updating career skills or pursuing a career education related certificate. As part of its expansion of the Promise program, Folsom Lake College will offer support to new students from Rancho Cordova who are pursuing career education certificates or updating job skills.

As noted above, the means of dispersing funds to Promise students is being refined as a result of a survey of Promise students administered by Folsom Lake College's Office of Institutional Research and as a result of Folsom Lake College's participation in the National League of Cities program with the City of Rancho Cordova. In the survey, some students expressed challenges getting books directly from the Folsom Lake College bookstore while participants in the National League of Cities program learned of postsecondary education students' challenges with things like basic needs and transportation. To that end, Folsom Lake College will pivot from establishing funds for books and supplies in the college bookstore to providing students with a grant so that books and supplies can be purchased from other sources, and students will have funds available for other financial needs.

To build further on refinements made since the program's inception, Folsom Lake College will continue its Promise peer mentoring program whereby up to ten students from each first year Promise class will be selected to serve as paid peer mentors for the following year's incoming class at a rate of $15/hour for 12 hours per week for 32 weeks per year. For the 2022-23 academic year, Folsom Lake College will support peer mentors with existing funds. This mentoring program aligns with best practices outlined by the Northern California College Promise Coalition, an organization with which the college has partnered in the 2021-22 academic year.

To ensure the Promise students stay on track and reach their goals, Folsom Lake College will employ a Center Student Personnel Assistant who is partially funded by Promise funds. This team member's duties will include:

- Outreach
- Recruitment of new Promise students.
- Tracking of student progress.
- Communication with current and potential Promise students
- Recruiting Promise peer mentors.

The duties associated with this position align with best practices discussed in the National League of Cities program as well as with resources provided by the Northern California College Promise Coalition and the Campaign for College Promise. Further, it was a request of respondents in the fall Promise survey.

Continued funding of this program will help to ensure that Rancho Cordova residents have continued access to virtually fee-free postsecondary education in coming years. Even with interruptions to instruction brought on by the pandemic, the Rancho Cordova/Folsom Lake College Promise program has continued to provide educational access and support to hundreds of Rancho Cordova residents, giving many who had not considered college a viable option the opportunity to pursue higher education. Indeed, some of the students from the earliest Promise cohorts have already transferred to four-year schools, and some have completed their four-year degrees. Survey respondents in the fall survey noted that such achievements would likely not have been possible without the support of the city of Rancho Cordova.

Project Information

Project Name

Animation Intern Education

Project Synopsis

Animation Intern Education (AI) will provide instruction to 60 students split between two classes (30 students per class) to learn how to be Production Assistance (PA). At the completion of class, students will receive a certificate of completion. Students who complete the class will be added to the City of Sacramento Film Office hiring list as PAs. City of Sacramento Film Office has a requirement that any films done in Sacramento requires the film crew to hire PA and other positions from the their hiring list.

Project Description

Two PA classes will be taught during the grant cycle. One class of 30 students in the Fall 2022 and one class of 30 students in the Spring 2023. At the completion of the class, students will receive a certificate of completion. Four computer units (hardware and software) will be purchased with the grant money to be used to create animation curriculum to be used in future classes for students.

Project Team

Shawn Sullivan, Amy Sullivan, Industry Professionals to be determined by Shawn Sullivan, Instructional Teacher and Instructional Assistances to be determined by Shawn Sullivan.

Project Goals

1. Production Assistance (PA) classes provided to 60 students (split between two classes) to provide jobs as PAs as part of the workforce development. 2. Four computer units (hardware and software) to be purchased to create animation content and curriculum developmemt.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$201,000

Estimated Breakdown of Project Expenditures

Production Assistance Classes (two classes of 30 students each) for a total of $137,000 Cost per student equals $2,283. Computer equipment including hardware and software $16,000 x 4 units equals $64,000 Total budget cost $201,000

Matching Funds

Project Schedule, Timeliness and Adaptability

Project Schedule

July 1, 2022 - June 30, 2023 - development of animation content/curriculum via computer units July 1, 2022 - December 31, 2022 - Production Assistant class (completed within 12-16 weeks via Zoom) for 30 students. January 1, 2023 - June 30, 2023 - Production Assistant class (completed within 12-16 weeks via Zoom) for 30 students.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

Shawn Sullivan and his instructional team will conduct two PA classes (30 students per class) during the grant period. One class in the fall of 2022 and one class in the spring of 2023. Additionally, Shawn Sullivan and his instructional team will be able to build animation content/curriculum during the grant period to be used in future animation curriculum classes.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Yes, both the PA classes and the creation of amination content/curriculum can be done remotely via Zoom and asynchronous.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Project Information

Project Name

The Kiwanis Family Literacy Initiative(FLI) of the Book Buddies' Club

Project Synopsis

"The family that reads together, succeeds together" is the motto of the Book Buddies' Family Literacy Initiative (FLI) of the local Kiwanis Club. Through a vibrant, multi-agency network, Kiwanians engage the broader community in promoting reading at home, while giving books to local youth, of whom many live in poverty.

Project Description

The FLI helps families to embrace reading at home as a way to compensate for the negative impact on learning that the pandemic has had, especially for at-risk children in our community. Our Kiwanis Club will expand its family literacy focus in order to help families to overcome any deficits children are experiencing because of COVID and distance learning. The FLI will strengthen the capacity of children and youth to succeed in life through literacy and education. Literacy is a core skill vital to personal and professional fulfillment. The FLI engages young people, their families, and the community in activities that encourage reading and strengthening literacy skills. By providing free books to local children and youth, the Kiwanis Club of Rancho Cordova creates and expands home libraries for youngsters. By providing information that promotes reading at home and embedding other family literacy activities within family-focused community events and programs, the FLI broadens the impact and visibility of our club's and community's commitment to family literacy. The FLI will continue to distribute books through schools in Rancho Cordova, and will now include two Sacramento City USD campuses in this initiative: A.M. Winn and Abraham Lincoln Elementary Schools. We propose to connect through schools' ASES After School Programs, Book Vending Machines, and other school-based programs and events, as determined by the schools. We will also partner with the Rancho Cordova Police Activities League (PAL) and the Cordova Community Council (CCC) to do outreach through their programs and activities.

Project Team

FLI is staffed by the volunteers of the Kiwanis Club of Rancho Cordova. Club members develop the funds needed, purchase books and coordinate the distribution process, maintain all financial and book distribution records, provide all required reporting, and promote the project and its funding and outreach partners. FLI committee co-chairs are Nora Stroke (the 2021-2022 Kiwanis Club President) and Linda Burkholder (Kiwanis Club member and a Past President). Committee members include Cindy Cogil, Kathleen

Ross, Delores Lee, and Deborah Barrell. Other members of the club actively volunteer during distribution FLI events and project activities.

Project Goals

I. Expand family literacy activities in homes. A. Develop and distribute family literacy information sheets in multiple languages at events. B. Create a website with a link for on-line family literacy video presentations, activity guides and tip sheets. C. Deliver at least six family literacy presentations at community events. D. Include a link to the Sacramento Public Library website on the Kiwanis Club's website page for FLI. II. Provide free age-appropriate books to children and youth in Rancho Cordova. A. Distribute at least 3000 books to local young people. III. Engage teenagers involved in PAL's Youth Leadership Council and the Key Club at Cordova High School in reading and discussing books about inspirational young leaders and service. A. Provide books to members of the Youth Leadership Council of PAL and the Key Club at Cordova High School who participate in discussions about the concepts of leadership and service presented in the books.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$ 12,400.

Estimated Breakdown of Project Expenditures

$ 9,000 - purchase of books for children and youth 1,500 - Production of bookmarks, stickers and family literacy handouts 1,900 - Creation of family literacy videos and messages on Kiwanis Club website

Matching Funds

$ 3,000 - allocated from Kiwanis Club of Rancho Cordova Foundation budget 4,500 - requested from Kiwanis International Children's Fund 100 - donated by MERO Pictures (which is also donating $1000 in in-kind videography and photography) 300 - donated by Kiwanis Club member Assemblyman Ken Cooley We also receive free books from our book vendors based on the dollar amount we spend on purchasing books.

Include Any Other Funding Contributions

We are receiving funding from a club member, Assemblyman Ken Cooley and from MERO Pictures. We have also requested funding from the Kiwanis International Children's Fund.

Ongoing Operations and Maintenance Costs (if applicable)

Not applicable.

Total Community Enhancement & Investment Funds Requested

$ 4,500.

Is this a multi-year request?

No

How many years have you received funding for this project?

2

When will your request for funding sunset for ongoing programs?

Unknown.

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

We will also be applying for funding from the Kiwanis CalNevHa Foundation.

Project Schedule, Timeliness and Adaptability

Project Schedule

The project timeline is July 1, 2022 to June 30, 2023.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

Our school-based activities will happen during the school year for FCUSD and SCUSD. Other outreach activities with PAL and the CCC may happen outside of school calendars. However, all grant funds must be spent by June 30, 2023.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Yes, we will adjust project activities based on any requirements of California Public Health and Sacramento County Health orders. We have been able to adapt already, within our school- based and community-based activities.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

10035 Mills Station Road
Space 100
Sacramento, CA 95827

Other Physical Addresses (if project/program is at multiple sites)

Multiple Rancho Cordova school sites in FCUSD; AM Winn and Abraham Lincoln Elementary Schools in SCUSD; PAL and CCC event locations.

Have you received a letter of support for the project/program from the property owner?

Yes (includes if you are the property owner)

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Letter of Support PAL.pdf

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

Yes, at a public K-12 school site

Which school district is the public K-12 school site located in?

Folsom Cordova Unified
Sacramento City Unified

CORDOVA COMMUNITY COUNCIL

Stacy Delaney
City of Rancho Cordova
Community Enhancement and Investment Fund
2729 Prospect Park Dr.
Rancho Cordova, CA 95670

Dear Stacy:

The Cordova Community Council (CCC) has partnered with the Kiwanis Club of Rancho Cordova for many years. We are proud of our cooperative work to celebrate and improve the quality of life for young people and families in our city.

The Kiwanis Club has a goal to redefine their partnership with the CCC to provide thematic children's books and family literacy activities at CCC-led events such as Kids Day in the Park and iFest. The CCC encourages the city to approve the application of the Kiwanis Club for a Community Enhancement and Investment Fund CEIF grant to support this planned expansion for the Book Buddies Family Literacy Initiative within CCC programs.

Funding from the city in 2022-2023 will also assist our local Kiwanis Club to apply for another year of matching funds from the Kiwanis International Children's Fund. The club secured a grant from their parent organization for this current project year, in large part because of the grant provided this year by the city. Leveraging another Children's Fund matching grant is likely if the city once again funds this project. The local Club feels confident about this because the Children's Fund Board has invited our Kiwanis Club to speak about the Family Literacy Initiative and its funding from the city at an upcoming conference.

The CCC is excited at the prospect of entering a new phase in our collaboration with the local Kiwanis Club. We heartily endorse their focus on family literacy and creating home libraries for young people in Rancho Cordova. We urge favorable consideration of the Kiwanis Club of Rancho Cordova's application for a Community Enhancement and Investment Fund grant to support their important work and our collaborative efforts on behalf of children and families in Rancho Cordova.

Sincerely,

Shelly Blanchard

Shelly Blanchard, Executive Director
Cordova Community Council Foundation

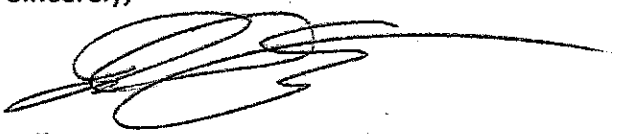
Rancho Cordova City Hall
2729 Prospect Park Drive
Rancho Cordova, Ca 95670



To whom it may concern,

The Rancho Cordova Police Activities League (PAL) is excited to partner with the Kiwanis Club of Rancho Cordova in order to encourage the reading of books by the youth engaged in PAL activities. In particular, Kiwanis plans to provide members of PAL's Youth Leadership Council (YLC) with books featuring inspiring young leaders. Volunteers from the Kiwanis organization will assist PAL in facilitating a book study with our YLC members about the book provided. Taking a deeper dive in to a book about the qualities of a strong youth leader will motivate our YLC members to be even more committed to positive leadership roles. This will allow YLC to then begin teaching younger PAL youth about these books and family literacy through story time and videos. The Kiwanis Club will also provide age-appropriate, and as available thematic books about baseball, to children who register in PAL's Junior Giants baseball program. Each of these books will include bookmarks, as well as tip sheets for adults on how to encourage reading in the home. The books will be used as an aspect of the Junior Giants read around the bases program which requires each participant to log 120 minutes of reading time. Once completed these youth will be eligible to attend the Junior Giants Day at Oracle Park and share their experience with other Junior Giants players and the Giants organization.

PAL always encourages its young participants to focus on success in school and community service. By partnering with the Kiwanis Club, a service organization of volunteers in our community, we have another way to promote civic engagement, community service, and literacy.

Thank you for considering the Kiwanis Club's application for funding to support of collaborative efforts.

Sincerely,

Officer Jose De La Cruz #1034
Rancho Cordova Police Department
PAL Executive Director

Application #57

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR SCHOOL SITE USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a public K-12 school site, you must request the endorsement of the school superintendent of that school district.

One supplemental form is required per school district.

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by the corresponding school superintendent for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. Each participating school superintendent reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

To be filled out by grant applicant

Project/Program Name: Kiwanis Club Rancho Cordova Family Literacy Initiative - Book Buddies Club

Name of Organization: Kiwanis Club of Rancho Cordova

Name of Applicant and Title: Linda Burkholder, Co-Chair of Book Buddies' Club

Applicant's Phone: 916-612-8267 **Applicant's Email:** lindaburkholder1254@gmail.com

Submit a copy of your application with this page to the school superintendent(s). For your application packet to be considered complete the signed and dated endorsement form must be received by the City of Rancho Cordova by March 18, 2022. The superintendent will submit the form directly to the City's Community Enhancement & Investment Fund team. You must submit this form and a copy of your application to the appropriate superintendent or his or her designee no later than March 4, 2022. For Elk Grove Unified School District use BGrewal@egusd.net. For Folsom Cordova Unified School District use agriffin@fcusd.org. For Sacramento City Unified School District use dianne-brown@scusd.edu.

Project Information

Project Name

Studio T Arts - Side Hustle Academy

Project Synopsis

We created Side Hustle Academy in late 2020 as a response to the pandemic. Through a six-figure grant from the city of Sacramento, we were able to build all necessary infrastructure for the program and test and refine our process across 75 youth in multiple cohorts. In addition to our training curriculum and youth-business partnership curation, we provide participants with up to three months of ongoing support to help them complete projects and monetize their new skills. Through years of program experience with difficult-to-serve populations, we have learned that these youth already have deeply entrepreneurial tendencies. By focusing those instincts through the lens of professional experience and training that meets them where they are, we unleash their talents and provide them with the skills to enter high-demand career paths with incomes that allow them to escape generational cycles of poverty.

Project Description

Our program is designed to break the pattern of poverty within Rancho Cordova's low-income communities by providing underserved youth career opportunities that promote long-term economic growth, while also supporting local small businesses in the transition to a digital world. By leveraging a model successfully piloted under a grant from the City of Sacramento, we will match 6-12 youth with local small businesses in order to create positive outcomes for both groups and to expand on the support we began as many Rancho Cordova small businesses are not only in need of content, but brand development for e-commerce . Studio T will provide youth participants 120+ hours of digital marketing curriculum and training, then pair them with small businesses hit hard by the pandemic and still struggling to establish a digital presence. Our participants will utilize digital expertise and innate talents to build online branding and marketing campaigns for up to 6 small businesses in the City of Rancho Cordova. By providing workforce development opportunities for youth and economic development in the form of increased revenue to small businesses, we will enhance Rancho Cordova's community with a leveraged investment that benefits city residents for years to come. Our youth are already experts in the world of digital content. Studies from Pew Research and Common Sense Media show teens spend over 7 hours per day consuming content on screens. Low-income youth spend, on average, two hours more than peers from high-income households. Youth keenly discern the difference between quality content and design that will work and content that will not. This makes them a gold mine for content creators and focus groups for shaping what works online. With the heavy impact of COVID-19

on our youth workforce and our small business community, we seek to enhance youth employment opportunities while helping small businesses reboot, rebrand, and relaunch in the digital community.

Project Team

Tamaira Sandifer, affectionately known as “Miss Tee” by thousands of youth nationwide. Many of the families Miss Tee and her teams serve face poverty, hunger, and a systematic lack of opportunity, she has made it her daily work to include financial education, life and social skills training, and entrepreneurship coupled with real-world skill development and enthusiastic empowerment. As the creator of the distance learning platform-PassToClass.com and Side Hustle Academy, her impact exploded across the country serving 192,000 youth and 7,800 educators nationwide during the pandemic. Sandifer built a Sacramento-based Social Media Production Studio to support local small businesses with digital content support during COVID while training youth apprentices in creative-based entrepreneurism: video production, photography, graphic design, event production (virtually and live), and social media management. She was recently named ‘Woman of the Year’ 2022 by Assembly Member Kevin McCarty and the California Legislative Women’s Caucus, and was also recognized by Forbes Magazine among the inaugural For(bes) The Culture 50 Champions list "Introducing the Black and Brown leaders making the most impact through their capital, creativity, connections and commitment." Amanda Sanchez - Graphic designer, web developer, and content creator who utilizes her 20 years of experience to support the Studio T community as both a vendor and volunteer. As the mother of two aspiring dancers, she recognized the positive impact dance has on youth and was inspired to offer her award-winning skills to help the organization. In 2019, with Sanchez’s help, Studio T conceptualized PasstoClass.com, a distance learning website. Her technical knowledge and sleek aesthetic made it possible for teachers to supplement their P.E. classes with dance. Driven and dedicated, her efforts have enabled thousands of kids to access Studio T’s quality educational content.

Project Goals

- 6-12 Youth complete 24 weeks of digital media and marketing training - 6-12 Youth paired with small business clients - Up to 20 small business clients recruited - Up to 6 small business client projects completed - 80% or more youth participants rate experience as positive in post evaluations

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$39,790.00

Estimated Breakdown of Project Expenditures

Digital Media staff - to manage program $7,800 Executive Director - Lead program trainer $9,500 Equipment rental $1,800 Audio/ Annual Music and Digital Content licensing $1,500 Stipends for youth participants - $250 each $6,000 Facility rental - production studio (modified with COVID Guidelines $7,200 Program Evaluation $1,500 Printing (yard signs, flyers, posters, youth tshirts) & Digital Marketing Material $1,200 Indirect Administration costs $3,290

Matching Funds

Program evaluation expenses and digital subscription costs are matched through volunteer support and Adobe licenses donated totaling a match amount of: $6,930

Include Any Other Funding Contributions

N/A

Ongoing Operations and Maintenance Costs (if applicable)

N/A

Total Community Enhancement & Investment Funds Requested

$39,790.00

Is this a multi-year request?

No

How many years have you received funding for this project?

1

When will your request for funding sunset for ongoing programs?

June 30, 2023

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

We will also seek funding for technology to expand our computer lab and extend our ability to reach and training youth virtually. As well as, provided on going services to our small businesses who need specific support based on current needs. The goal to to get our small businesses to a place where their sales increase online affording them the additional financial resources to hire our youth to continue services part time.

Project Schedule, Timeliness and Adaptability

Project Schedule

Our project schedule occurs in three phases: Phase 1 - Planning & Recruitment (30-60 days post-award notice) Phase 2 - Youth Training & Development (60-90 days) Phase 3 - Business Campaign Execution & Evaluations (60-90 days) PHASE 1 - PLANNING & RECRUITMENT After the grant award, we will execute initial logistics, contract negotiations, and other miscellaneous items. Our focus for this period will be spreading the word to partner agencies so that youth candidates can be nominated for the program. Within 60 days, we would confirm youth participants and begin the training cohort. PHASE 2 - YOUTH TRAINING & DEVELOPMENT Once youth are nominated and selected, we would begin the training academy program. Participants attend 2-3 hours of live training (initially planned as virtual, in-person when safety allows) and complete 8-10 hours of self-paced content each week. Content outline is below. - Practical Workforce development: Skills assessment testing, leading a team, accountability, Customer service expectations, goal setting. - Branding: Teaching the value and types of brands. Allowing the students to identify different aspects of a brand and discover what makes a brand successful. - Strategy: How to understand if you are winning – Defining campaign goals, objectives and measurements of success. (ie: # of likes, # of sales, # of followers…) How to effectively market the campaign. - Platforms: Understanding social media platforms (FB, IG, SC, TT, YT) and their respective audiences and missions. When and how to use, optimize, algorithms, A/B test, metrics, consumer interaction, formats for images and video, and peak traffic times. - Media Design: Developing eye-catching graphics & engaging video (scripting, graphic design, photo-editing, animation, camera basics, and editing basics) PHASE 3 Youth would be matched with their small business partner, and campaign planning and collaboration would begin. Post Campaign Evaluations

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

Flexibility is built into the project at multiple points, for example, an extra 30-day buffer in the month of December. A sample month-by-month schedule is below; however, we are prepared to condense the academy and business project timelines if unexpected time constraints occur. JUNE/JULY 2022 - Award notifications received. Phase 1 begins. SEPTEMBER 2022 - Phase 2 begins, 12 weeks of training for youth participants at 8-12 hours/week JANUARY 2023 - Phase 3 begins, youth participants paired with small business clients. MARCH 31 - Target date for client project completion, followed by two months of additional support for participants. JUNE 1 - All client projects have been completed for 30 days or more, evaluations completed, additional youth coaching concluded.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Side Hustle Academy was built as a COVID response program and operated with our first 75 youth participants in a completely virtual environment. The digital nature of the work makes it possible for youth to work with their matched small business client completely virtually or in person. In addition, they can participate in all live training provided by Studio T via Zoom and our production studio. While we hope to be able to work with these youth and small businesses in person, we are fully prepared to operate remotely.

Studio T Arts & Entertainment

Supporting Youth & Educators of all subjects

Through 20+ years of dance and community with area school districts and community-based organizations, churches, and Urban Housing developments, Studio T and the PassToClass platform was created. Our mission is to help youth develop critical creative and life skills through exposure to the arts. To inspire them to maintain a positive academic focus through partnerships with schools in resource starved communities. We seek to train youth to use the arts as an entrepreneurial tool to generate income, creativity, and healing.

Studio T changes the lives of vulnerable youth and their families through the power of the performing arts, culturally-relevant and engaging experiences, and creative entrepreneurship that actually pays young people. Essentially, we transform difficult-to-serve youth who live in low-income, minority communities, into vibrant young leaders who can earn a dollar, pay it forward, and express themselves in positive ways. Sacramentan youth flock to Studio T because it's a place where they can belong, gain hope, and shine joyfully as themselves while gaining upward mobility.

In addition, we run an online learning platform called "Pass to Class" that engages over 192,000 educators across the nation. We bring joy and hope through dance, as well as build self-esteem, creativity, confidence, and an unshakable respect for the arts. Dance is our primary engagement tool-- a culturally relevant way for us to connect with diverse youth-- but we are also a youth development nonprofit. Why? Because when we couple the arts with real-world skill development and enthusiastic empowerment, we witness explosions of academic growth and powerful transformations of entire families. Too many of our families face poverty, hunger, and a systematic lack of opportunity, so our daily work includes financial education, life and social skills training, and entrepreneurship. To that end we provide 3 programs that accompany our dance offerings to divert young people off the streets by giving them skills and a positive social alternative. Our programs are: 1. Side Hustle Academy; 2. PasstoClass.com; and 3. LVL Up Campaign.

Application #58

Miss Tee Joins Groundbreaking Leaders On For(bes) The Culture List of 50 Champions, Including Colin Kaepernick, Issa Rae, Dr. Kizzmekia Corbett, Dwayne Wade, Angel Rich and Amanda Gorman. A Sacramento-based youth advocate, philanthropist and Studio T Arts & Entertainment Founder Tamaira 'Miss Tee' Sandifer has been recognized by Forbes Magazine among the inaugural For(bes) The Culture 50 Champions list "Introducing the Black and Brown leaders making the most impact through their capital, creativity, connections and commitment."

Ms Tee is committed to providing arts to all, including sharing her model with others in the field and with those in a position to influence policy. Tee not only shares her knowledge with current leaders in the field, she is helping develop the next generation of leaders. She trains her young staff to carry on her vision, and not just teach, but become leaders in the communities they touch.

PassToClass.com is Ready to use Curriculum

Teachers can use Pass to Class to meet students where they are, right now. It helps students engage their bodies, express their emotions, have a positive association with school, and focus on learning. Simply log in to PassToClass.com and get quick access to 100+ hours of videos. You can share them in Google Classroom, Canvas, and other learning communities. You can also share links to videos or share them right in the classroom on any monitor or smart board.

Programs include:

The Pass To Class online program also meets California state standards for PE and Visual And Performing Arts (VAPA) in a socially and culturally relevant way.

We are very intentional about the creating content that keeps our educators connected to our youth and our youth connected to school. A vital facet of making this connection is cultural and socially relevant content that youth really want. As well as quality content our educators use to stay connected to the cultural climate of their students. From music to movement, you can trust the quality and integrity of each video. ***No parental advisory*** necessary.

We align our work with the VAPA standards for the State of California public schools. We have concentrated our effort for the past 20+ years in developing the following standards through our hip hop dance program. We include foundational hip hop movement that develops motor skills and technical expertise that teaches our students the quality, force, and speed in which they should move. We also teach our students the names of each foundational move, so they are all able to describe, perform, and analyze them.

Our students express themselves while creating choreography, improvisation, and learning choreography without imitating it. We encourage our students to bring their own styles and decisions within the choreography being taught. We also have performances for students to share their growth with their peers and their community. This helps them develop teamwork and a dependence on their peers.

We use aesthetic valuing by having our students give constructive criticism back to one another when performing in front of each other. We package this in a “hype circle” format. We also share dance videos that help them see movement, set design, costuming, and lighting, which helps them with aesthetic choices. Based on past success of Studio T Arts graduates, we know our students can create career paths in performing arts today. We also connect dance with school subjects such as math and audiovisual such as recording Tik Tok's and other videos for social media. They learn how to perform on these platforms and monetize their talent through them.

Application #58

Here are some fun samples educators use in the classroom:

One-Move Grove - Teachers start class off right with some physical movement and students start by mastering popular single moves.

Brain Breaks - Short, rapid, in-seat movements intended to get the child's blood flowing so he/she can refocus during intense lesson time.

Full Dance Routines - Build confidence and express emotions with more extensive programs, and "performances."

Daily Encouragements - Quick encouragement for students AND educators to boost your day, lesson plan, or your classroom's energy. Addresses social and emotional wellness for students, educators, and parents to help propel you to your best self.

Integrate with existing classroom management

This off the shelf curriculum is already available on Canvas or you can leverage the existing Pass-To-Class online platform. Teachers can immediately and easily integrate the program into their existing Google Classroom and Zoom sessions.

SEL Online Learning Program

The *Pass to Class* online program is based on hip-hop dance as a way to connect with students in a culturally relevant way, while also giving them key tools to understand and express their own emotions.

This plug-and-play program provides off the shelf culturally relevant distance learning curriculum with programs that have proven to inspire students and improve their behavior. What starts with dance quickly becomes a way to help teachers engage students in all subjects, with fun activities, brain breaks and confidence builders.

What Educators and Students are Saying

"I didn't know how to express myself. Dance gave me the tools to express myself so I can let go and feel everything and release. Dance is my outlet. It changes the game." - Keke, middle school student

"The platform, content and delivery method has given us a tool that engages students in distance learning. This fun creative and healthy outlet not only exercises their body and mind, it also helps their social emotional wellbeing. We look forward to continuing to expand the use of the platform in our distance learning plan."
-- Matt Perry Ed.D, Assistant Superintendent, Sacramento County Office of Education

"This program has been wildly popular and engages students from all backgrounds. She empowers students, helping them feel a positive connection to school and a sense of self respect for themselves. She has found an outlet for them to be active, healthy, and engaged with students from diverse backgrounds. Students involved in

the program have become positive members of our community. This is the type of innovative program I'm looking for to keep my students engaged and help them persevere through these difficult times."
- Andrea Egan, Principal at C. K. McClatchy High School

"This program meets students where they are and has helped them improve by a full grade. It makes learning creative, engaging and culturally relevant for underserved communities."
–Nathan Street, Ed.D. Greensboro Country Schools

To Whom it May Concern:

There are so many organizations and individuals who are working diligently to help our youth navigate this world we live in. Sometimes one organization stands out above the rest. For Sacramento, that organization is Studio T Arts & Entertainment established by Tamaira Sandifer. Serving more than 5,000 youth in school districts throughout Northern California, Studio T works to instill real life skills, hope and a sense of belonging to her students.

Ms. Tee, as many know her, is a literal powerhouse who has recognized the benefit of dance in the everyday lives of youth who need a creative outlet – and for many – a reason to stay off the streets, out of jail, and to stay alive. She works as a tireless champion in the development of every child to build confidence, character and a conquering spirit that believes anything is possible. What sets Ms. Tee and this organization apart is that through their work, not only have they saved lives, they have created, nurtured, and established the arts leaders of tomorrow Some of her students have moved from her studio to the national stage as some of Hollywood's most sought after dancers. Many, not destined to be professional dancers, have found dance to be an outlet for their emotions. Dance has allowed them the opportunity to process their emotions through movement – and move forward in their lives.

> *"One of the best forms of therapy that we have found is dance. It gives them a way to express themselves. Sometimes they don't know how to say I'm scared. Sometimes they don't know how to say I'm stressed out. Our objective is, if we can get them relieving their anger and stress and pressure this way, you won't find them doing some other unsavory things that are more detrimental than helpful," – Tee Sandifer*

Through this organization Ms. Tee and her team set out to change the course of their lives. Her mission is clear – to impact as many youths as she could, through the arts and dance.

Sincerely,

Application #58

September 3, 2019

To Whom it May Concern,

It is with unmitigated enthusiasm that I write this letter of recommendation for Tamaira “Miss Tee” Sandifer in her effort to seek grant funding to offer free dance instruction to students at schools in our community.

Last school year, Miss Tee sought me out to offer her unique services. Within minutes of our meeting, I realized she was a special person committed to empowering young people to meet their potential through dance. Miss Tee is deeply rooted in our community, having built relationships with students and families in some of Sacramento’s most impoverished areas. While her official role is the Founder and CEO of Studio T Arts and Entertainment / Urban Dance Academy, her role at California Middle School was different - she sought to offer her services to students attending Cal - for free. About 25 Cal students were treated to world class dance instruction every Thursday after school for the entire school year. She took students with varied experience and molded them into a family - a family who could perform like trained skilled dancers.

What Miss Tee brought to Cal was not just dance lessons, she brought community to some of the poorest and most at- risk students in the city. She monitored their academic, social-emotional, and behavioral achievements and struggles. Miss Tee forged relationships with our administrative team, and several teachers on campus to better support the students in her dance class.

Tamaira Sandifer’s resume is impressive - she knows her trade, and is committed to using dance as a vehicle to keep students engaged in school and making positive lifestyle choices. I wholeheartedly support her mission, and hope she can receive the funding needed to continue her services here at Cal Middle, and other local schools.

Sincerely,

Andrea Egan
Principal, California Middle School

Application #58

October 14, 2020

To Whom it May Concern:

I am writing today to endorse the work of Tamaira Sandifer – Miss Tee – and recommend her for this funding opportunity.

Miss Tee has always been a true community leader and advocate. She developed and implemented the National Day of Dance in Sacramento, at a time when no one thought that a dance event at a major municipal venue was a plausible idea. She has proved the naysayers wrong and carried it out brilliantly, shedding a light on the diverse dance in our community as well as bringing dance to forefront of our cultural landscape.

Last year, Miss Tee was a featured presenter and performer at the first Sacramento Creativity Summit for high school students, a full day of creative workshops, performances and presentations for 300 students from 10 school, held at the newly opened Sofia Theatre in Sacramento. Her presentation was mesmerizing, as she captured the essence of creativity for theater full of youth, inspiring them not to give up on their dreams, lose confidence in their innate creativity, or believe that their circumstances or environments limit who they are. And, of course, her teaching and performance were evidence of the message.

And, I am honored to say that I have had the pleasure of working with Miss Tee during the past six months, while COVID-19 has severely hit our community and made difficult and inequitable systems for youth more visible for all to see. We've sat on committees together and discussed and planned the work that needs to be done. And she is in the forefront of this work. She and the amazing artists and youth she works with have jumped in with resources, positive messaging, support for those in need and teaching – both in person where students gather for much needed supplies and services and virtually, with a variety of online classes and resources demonstrating her powerful teaching and dance skills. Her work stands up without her activism – yet her activism magnifies the reach of her work.

Tee is always the first to say, "what can I do?" when art and messaging is needed. And it has never been needed more than now.

I am happy to help her work in any way I can and to recommend her for support.

Sincerely,

Melissa Cirone

Re: 3 Point 0 Inc., dba Studio T Urban Dance Academy

To Whom It May Concern:

I'm pleased to submit this letter of support for 3 Point 0, Inc., dba Studio T Urban Dance Academy. For more than a decade, Tamaira Sandifer, founder and operator of Studio T, has been committed to supporting schools, providing performing arts opportunities and encouraging fitness for children and youth in the Greater Sacramento area. Through Studio T's educational programs, youth achieve artistic and academic success to help prepare them for the future. As a member of the Sacramento County Board of Supervisors representing District 1, I recognize the importance and need for quality after-school programs that offer creative and positive outlets for students. Studio T's dedication to underserved and at-risk children and youth sets them apart.

Please contact me or my staff at 916-874-5485 or SupervisorSerna@saccounty.net should you have any question or require more information.

Respectfully,

Phil Serna
Supervisor, District 1

Project Information

Project Name

Life! Camera! Action!

Project Synopsis

LCA is a leadership and life skills development program that will use digital video and the art of storytelling to teach Rancho Cordova youth, 12-17 years old to become productive citizens. Partnering with the Rancho Cordova Police Activities League, LCA will be an innovative program that will provide students opportunities to use technical and digital media to explore issues important to them and their community by developing Public Service Announcement from concept to delivery. This program can be done on an individual basis (one on one) or depending on how many students sign up, split into groups of 4-6. For the purpose of the "Project Description," the project is described as "groups of students".

Project Description

1. Brainstorm Issues: As some students may not know what a PSA is, we will show examples of relevant PSA's and discuss with the whole group. Students will then be formed into groups and each group will decide on a PSA they want to make. 2. Deciding on the PSA and Storyboarding: Students sketch how their film will look, frame by frame. Is it a text only PSA, voice over, music, and/or video that they plan to use in their film. Film Office staff will catch any hiccups, for instance if the film is too long, confusing, or if they forgot to cite sources. 3. Research and Plan: Students walk through how to research the subject matter of their PSA as they need to be accurate. At this step students collate any materials they may need such as visual aids, and graphics. Shoot locations are decided as well as equipment needed discussed. 4. Filming the PSA: Students two groups at a time make their PSA. They are instructed on how to use camera equipment, lights, sound and keeping track of time as far as "takes". the PSA and be instructed on the various "takes" needed. Each group will decide as to the on camera person in their group guided by film office staff. 5. Editing/Effects/Music: Students will be shown how to download their footage from the camera memory card in to a computer and introduced to the editing program Final Cut. Each group will edit their film into a 30 second PSA. Music, effects and credits added. . 6. Color Correction and Locking Picture: Students will be guided through the color correction process, a process that colors the film to broadcast quality. Da Vinci program is used for this. Once the students are happy with the PSA, film office staff will instruct them on "picture lock". The PSA is now complete and ready to be shown. The PSA's will be juried and the top three will receive an award, 1/23 place. Film Office will use its connections to have the winning PSA's broadcast on local TV. A screening will be held at the youth center.

Project Team

Charles Lago, Director California Capital Film Office: Will oversee the overall program and supervise Film Office Staff and select invited instructors, and liaise with PAL personnel. Rafael Portillo, Lead Editor and Camera Operator at California Capital Film Office: Lead instructor in the filming process. Will instruct students on camera use and will oversee the editing process of all the PSA's. Jose Ruiz, Production Manager, California Capital Film Office: Will work closely with students in the development of their PSA's. Will guide them through the pre-planning, producing and prodcution process. Bryce Nicastro, Graphics and Design California Cap;ital Film Offcie: Will work with students to develop story boards, come up with graphic images to use in PSA and help with music selection. Tina Aldama, PAL Program Director: Will oversee the program on behalf of the Rancho Cordova Police Activitioes Leauge. Officer Jose De La Cruz, Youth Services Officer Rancho Cordova Police Dept: Will oversee and supervise the students selected for the program.

Project Goals

- Teach students about different types of cameras, microphones, editing software and lighting equipment. This skills are invaluable for student filmmakers, cinematographers or to generally work in film. - In the age of social media, teach students how to make impactful and meaningful video presentations. - Teach Students Team Work – Learning film is a great way for students to learn to work well with each other and apply dedication to a project. - Bring awareness to social issues that are important to young people today. Developing a PSA is a great way for students to learn about a subject as they research their PSA and spread a message to peers and adults. - Teach the students to have their work examined by experts and receive criticism - Teach students something new without prior knowledge and experience, and how to think constructively about social issues that are important to them. - Get students interested in the arts, primarily through film which will lead to other areas of creativity. - Teach students to see other points of view through each other's PSA's. - Teach students to collaborate with each other, dividing tasks, and manage tasks and deadlines. - Teach the students how to set goals and what is required to achieve those goals

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$26,395.00

When will your request for funding sunset for ongoing programs?

N/A

Do you plan to ask annually for funding?

No

What other funding will you seek to support your project?

NONE

Project Schedule, Timeliness and Adaptability

Project Schedule

PAL's preference is the program is held at the new Rancho Cordova Youth Center opening August 2022. We will start as soon as we are able to at the youth center. We anticipate this will be a bi-weekly program for 3-4 months and competent by February 2023.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

As soon as the youth center is completed, PAL will have already put out the word about this program through their sources. They are optimistic there will be a strong response. We plan to begin the program in late August/early September. Will will plan on a class every two weeks and we anticipate this program will take 4 months (9 classes) to complete. Once the classes and PSA's are filmed and locked, we will plan for a community screening at the youth center where all PSA's will be screened with filmmakers introduced for a Q&A about the process of making their PSA's. At this event prizes will be awarded (hopefully by the Police Chief with Mayor in attendance) The program will be completed by February 2023.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Yes. This program could be done over zoom if need be. Not preferred but possible.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

Rancho Cordova Youth Center
10455 Investment Circle
Rancho Cordova, CA 95670

Other Physical Addresses (if project/program is at multiple sites)

Some of the classes may take place at: The California Capital Film Office 9845 Horn Road, Suite 100, CA 95827

Have you received a letter of support for the project/program from the property owner?

No

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

No

To whom it may concern,

The Rancho Cordova Police Activities League (PAL) is excited to partner with the California Capital Film Office to bring Life! Camera! Action! to Rancho Cordova. PAL will work in conjunction with the California Capital Film Office to help youth to develop form scratch PSA's that are important to them. California Capital Film Office staff will instruct kids how to develop PSA's from step one to completion, provide all the equipment and instruction needed, and help them bring their PSA's to broadcast level and will do this at the future Rancho Cordova Youth Center. PAL will introduce the kids who will participate in the program, work with film staff at the Youth Center and help facilitate the classes and events.

PAL always encourages its young participants to focus on success in school and community service. By partnering with the California Capital Film Office we have another way to promote civic engagement, community service, and bring light to issues that matter to our youth.

Thank you for considering the California Capital Film Office's application for funding to support of collaborative efforts.

Sincerely,

Officer Jose De La Cruz #1034
Rancho Cordova Police Department
PAL Executive Director

Project Information

Project Name

Robotics Training Program for City Resident Students

Project Synopsis

The proposed Robotics Program will help elementary and middle school students (Grades 4 through 8) of Rancho Cordova City in designing and coding the robots to perform specialized real world operations.

Project Description

The program makes the students engage in STEAM subjects, hones their computer programming skills and creativity, and develops engineering skills, leadership skills and presentation skills. These skills will also help students in excelling their regular academics and make them successful engineers in cutting edge career spaces such as aerospace engineering, computer science, medicine, and automotive manufacturing. The proposed Robotics Program is the continuation of previous calendar year and will include students from grades 4 and 5. The program will also incorporate additional components including python coding classes and stress management training. The first year program students will have entry level training while the second year program students will have more in-depth training including maze follower. The program will continue to use previous year's robotic gear for current year training. The program will also facilitate team building activities through youth empowerment and stress-management program for students. As students learn to reduce stress and manage emotions through interactive fun games and activities, they gain ability to build more positive relationships with their peers, parents and coaches and can be great team members. The students also gain the ability to focus and perform well academically at school. The project directly meets the City's Community Enhancement Funds guidelines and selection criteria in the following ways: • Children and Youth – This program specifically focuses on the future of our community youth. • Education – The program inspires young people to be science and technology leaders and provide an opportunity for students to learn engineering, leadership, and presentation skills through a unique and appealing platform. • Community Pride –The youth will have an opportunity to represent the City of Rancho Cordova in local Robotics Competitions.

Project Team

Suvidha International Foundation, A California Registered non-profit, plans to help the students with multiple educational activities including providing robotic training to talented and underprivileged Rancho Cordova Elementary and Middle Schools' students. Suvidha International Foundation is responsible for development and delivery of this project. Sudheer Pandinchara, local robotics

expert and organizer and Bhaskar Vempati, President of Suvidha International Foundation will develop and implement the project. The short bios of project team projects including prior experience are listed below Sudheer Padinchara • MS Degree in Computer Science • Coach for FIRST (For Inspiration and Recognition of Science and Technology) LEGO League competition for past 8 years • Coached teams ranging from Kindergarten, Elementary, Middle and High School students. • Created several coaches for past five years. • Mentored a team to an international robotics competition in Turkey. • Taught LEGO Robotics to public via the Sacramento Public Library branch, Orangevale. • Piloted a virtual robotics summer program for Natomas Unified Middle School. Bhaskar Vempati • Ph.D in Mechanical Engineering • Coach for FIRST (For Inspiration and Recognition of Science and Technology) LEGO League for years in 2018 and 2019. • Coached teams ranging from Elementary students. • Mentored a team to championship qualifiers in year 2019. • Helped team win a project innovation award in 2019. Robotic Coaches • Adult and youth coaches from local Robotics expert teams mentor the program teams throughout the process.

Project Goals

The project allows students to: 1) Learn the robotics and designing 2) Learn python programming language and coding skills 3) Enhance the engineering and research skills by designing and coding robots to perform specialized activities. 4) Learn stress-management techniques to handle their workload and emotions 5) Develop leadership and teamwork skills 6) Develop critical thinking, problem solving and management skills 7) Improve the communication skills 8) Learn effective presentation skills In proposed program, the students learning python coding, developing collaborative and leadership skills and be able to design and code robots to carry multiple special automated operations involved in real world activities including line following, maze following and sumobot. The students/ robotics designs account for real-world challenges such as the wear and tear of robotic parts and battery power in designing the repeated automated operations. The students will demonstrate their robotic design and coding skills at the competition scheduled at the end of the program. The skills learned through the program will engage the students in STEAM program and help them excel in their academics and place them on a straight road to becoming successful future engineers.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$20,100

Estimated Breakdown of Project Expenditures

Description Sub Total 1 Spike Prime Lego Kits & Expansion Sets (New) $6,000.00 2 Spike Prime Lego Kits & Expansion Sets (Existing) $0.00 3 Additional Sensors & Lego Parts $1,250.00 4 Awards and Trophies $2,500.00 Fastest Line Follower (Grades 4-5) Strongest Sumobot (Grades 4-5) Champion Team (Grades 4-5) Maze Solving (Grades 6-8) Strongest Sumobot (Grades 6-8) Champion Team (Grades 6-8) Four Consolation Prizes 5 Tables $800 6 Robotics Mats for Teams $1,250 7 E-certificate to all the teams $0 8 Python Coding Training $1,000 9 Youth Empowerment Program (Half) $1,500 10 Workshop Supplies $400.00 11 Event Day Venue Rental Costs (City Hall) $0 12 Event Day Electronic Equipment (City Hall) $0 13 Event Day Supplies $500.00 14 Zoom Subscription (Jan - May) $400.00 15 Volunteer T-shirts $500.00 16 Event Day Food for Volunteers $1,000.00 17 Insurance $500.00 Total Funds from City $17,600.00 18 Suvidha International Foundation $2,500.00 Total Project Funds from City $20,100.00

Matching Funds

N/A

Include Any Other Funding Contributions

$2,500 from Suvidha International Foundation

Ongoing Operations and Maintenance Costs (if applicable)

N/A

Total Community Enhancement & Investment Funds Requested

$17,600

Is this a multi-year request?

Yes

Number of Years

4

If you answered yes above, describe your sustainability plan and whether the project is viable as a single year request.

The program is not viable as a single year project as it can only help us in training limited students. The program will include new students every year and previous students will go through incremental expert training in successive four years. After five years program, students will be an expert robotic design and coders and can pursue their careers on their own afterwards. The program will use the previous program years' robotics gear and equipment in future years.

How many years have you received funding for this project?

1

When will your request for funding sunset for ongoing programs?

June 30, 2025

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

We will also aim to get funding from other local sponsors.

Project Schedule, Timeliness and Adaptability

Project Schedule

The 2022-2023 program will start in November 2023 and end in May 2023 with a competition. Student Selection: Nov 2022 - Jan 2023 Kick-Off Meeting: Jan 2023 Python Coding: Feb 2023 Youth Empowerment Training: Feb 2023 Robotics Design and Coding: Mar 2023 Scrimmage: May 2023 Competition: May 2023

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

The 2022-2023 program will start in November 2023 and end in May 2023 with a competition. We select students from Nov 2022 to January 2022. Then we will have a kick-off meeting in January 2023. We will assign adult and youth mentors from local robotic experts to each of the teams. These coaches and our organization will guide the student teams on a weekly basis. We will organize scrimmage (trail run) two weeks before the competition. The final competition will be held on May 20, 2023 at City Hall.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Our program involves mostly virtual classes and few in-person team sessions at team's designated meeting places and final competition. However, if COVID-19 health orders prevent us to meet in-person, we will simply redesign our team meetings and competition and conduct them virtually. Our project coach, Sudheer Padinchara successfully conducted virtual robotic classes and competitions in 2020 and 2021. His expertise will assist us in conducting 100% virtual classes if Sacramento County Health Orders do not permit us to meet in-person.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

599 Broken Top Ct
Folsom, CA 95630

Other Physical Addresses (if project/program is at multiple sites)

The program will happen over zoom. The scrimmage and final competition will be scheduled at City Hall, Rancho Cordova

Have you received a letter of support for the project/program from the property owner?

No

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

No

Project Information

Project Name

Speech & Debate Programs

Project Synopsis

The proposed educational Program will help elementary and middle school students and resident students (grades 4 through 8) of Rancho Cordova City with speech and debate training sessions.

Project Description

The speech and debate programs will provide the students with valuable skills that they will use for the rest of their lives, including but not limited to researching, writing, critical thinking, organization, persuasion, conflict resolution and communication proficiency. These educational tools are necessary in every part of our lives and successfully mastering them at a young age will allow the participants to utilize them in their day-to-day activities. Whether it is online or in person, the skills (researching, writing, critical thinking, organization, persuasion, conflict resolution and communication) will help them articulate their opinions in a constructive format, delivering their thoughts in a clear and concise manner. They will also communicate with peers their own age, develop a level of confidence in themselves, and leave a positive impression upon the people around them. The program will engage the students and the skills acquired will help them excel in their academics and place them on a straight path to becoming successful future leaders in politics, business, law, academics, entertainment, and many other fields. The speech program will provide a foundation for various types of speech, categorized as oratorical, persuasive, impromptu, dramatic, humorous, and poetic. The programs attendees will be encouraged to focus their training in their preferred speech category. The introductory training classes will include demo sessions for each of the speech categories to help familiarize the students with their choices. The debate program will provide an overview of different styles of debate, categorized as Parliamentary, Public Forum, Lincoln-Douglas, Spontaneous Argumentation, Team Policy, and Cross-Examination. The elementary and middle school student program attendees will receive more comprehensive training in the debate category of their choice.

Project Team

Suvidha International Foundation, a California registered non-profit, plans to help the Rancho Cordova Elementary and Middle Schools' students with speech and debate skills. Suvidha International Foundation is responsible for the development and delivery of this program. Bhaskar Vempati, President of Suvidha International Foundation and Saritha Jasthi, Suvidha International Foundation

Volunteer will develop and implement the project. A youth team of ten-member expert speech and debate coaches will support the program. These youth coaches have a wealth of expertise to share with their younger peers, having won competitions at regional, state, and national levels. Our team has conducted several speech and debate programs in Greater Sacramento area for the past two years and community spirit has flourished amongst the participants, as demonstrated by their eagerness to assist the next generation in achieving similar successes. Short bios of project team leads (including prior experience), are listed below. Saritha Jasthi • MS Degree in Computer Science • Coached teams ranging from Elementary, Middle and High School students. • Mentored a team to conduct similar events for the past four years. • Served as a judge for several local speech and debate competitions Bhaskar Vempati • Ph.D in Mechanical Engineering • Organized several speech and debate competitions in the Greater Sacramento area • Mentored/mentoring several of the youth coaches • Acted as the judge for multiple local speech and debate competitions Youth Coaches • A ten-member team of local expert speech and debate coaches who won competitions at county level, state level and national level are available to support the speech and debate program. Judges • Several local speech and debate adepts will lend their expertise to the competition by way of their judging skills.

Project Goals

The project allows students to develop effective 1) Researching capabilities 2) Critical thinking dexterity 3) Organizational competence 4) Team building skills 5) Writing proficiency 6) Use of body gestures (eye contact, stance, and expressions) 7) Speech delivery virtuosity (proper speed, tone, diction, language, clarity, and fluency) 8) Conflict resolution adroitness According to the Stanford article, “The Power of Speech & Debate Education,” (https://snfi.stanford.edu/skills), there are lifetime benefits for students who commit to speech and debate programs. Forbes published an article titled “How to Find the Millennials Who Will Lead Your Company,” (https://www.forbes.com/sites/robertsher/2014/03/02/how-to-find-the-millennials-who-will-lead-your-company/?sh=3d697bc37178), which suggests that the leaders of the future are ex-debaters. As that article notes, debate teaches “how to persuade, how to present clearly, and how to connect with an audience,” exactly the skills businesses look for in their young employees. “You’ll find ex-debaters in every area of public life, from Bruce Springsteen to Oprah Winfrey to Nelson Mandela. 60% of Congressional representatives participated in debate, as well as at least a third of the Supreme Court. There are ex-debaters excelling in business, law, politics, academia, and many other fields.” The proposed program helps the students learn effective communication, collaborative, and leadership skills. The student program attendees will demonstrate their newly garnered skills at the competition scheduled at the end of the program. The educational tools gained through the program will engage the students, help them excel in their academics and place them on a straight path to becoming successful future leaders in several prominent areas including business, law, politics, academia, entertainment, and media.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$7500

Estimated Breakdown of Project Expenditures

Zoom Link (for weekly virtual sessions, one for each of the Speech & Debate programs) $500 Awards and Trophies (Speech) $1,000 Awards and Trophies (Debate) $1,000 Student Coach Scholarships (Speech) $1,500 Student Coach Scholarships (Debate) $1,500 Event Day Venue Rental Costs (City Hall) $0 Event Day Electronic Equipment (City Hall) $0 Event Day Supplies $500 Event Day Food for Volunteers $1,000 Insurance $500 Total Funds $7,500

Matching Funds

Total Community Enhancement & Investment Funds Requested

$7,500

Is this a multi-year request?

Yes

Number of Years

Application #61

5

If you answered yes above, describe your sustainability plan and whether the project is viable as a single year request.

The program is viable as a single year project but it can only help the limited students in first year. If funds are available, the program will be able to train new students every year and make them learned valuable skills listed in the program description

How many years have you received funding for this project?

0

When will your request for funding sunset for ongoing programs?

June 30, 2026

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

We will request funding from local sponsors to support additional students in future years

Project Schedule, Timeliness and Adaptability

Project Schedule

The program will start in September 2022 and end in November 2022 with a competition. Speech Program : Student Selection: August 2022 Kick-Off Meeting: September 2022 Weekly Speech Sessions - September 2022 - November 2022 Speech Competition - November 2022 Debate Program: Student Selection: August 2022 Kick-Off Meeting: September 2022 Weekly Debate Sessions - September 2022 - November 2022 Debate Competition - November 2022

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

The programs will start in August 2022 and end in November 2022. The programs will enroll students in August 2022. After enrolling students, we will have kick-off calls in first half of September. The weekly speech and debate sessions start in September 3rd week. The weekly sessions will continue till first week of November. The final competition will be held either in November 2nd week or third week. The plan is same for both the speech and debate programs. Our team including Saritha Jasthi, Bhaskar Vempati and youth coaches along with volunteer judges will execute the program as described above plan.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Our project involves virtual classes and in-person competition. However, if COVID-19 health orders prevent us from meeting in-person, we will simply redesign our competition and conduct it over Zoom. Our team, Saritha Jasthi and Bhaskar Vempati successfully conducted several virtual speech and debate programs for the past two years. Our expertise gained from past experience will assist us in conducting 100% virtual classes including competitions if Sacramento County Health Orders do not permit us to meet in-person

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

599 Broken Top CT
Folsom, CA 95630

Other Physical Addresses (if project/program is at multiple sites)

The program happens over zoom sessions. The final speech and debate competitions will be held at City Hall to save venue costs.

Have you received a letter of support for the project/program from the property owner?

No

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

Project Information

Project Name

Falkon Academy Competitive Robotics

Project Synopsis

The aim of this project is to build competitive VEX Robotics and FTW Drones Teams for kids from ages 9yrs to 15yrs. Rancho Cordova, RiverView Stem Academy elementary school has VEX robotics as part of STEM curriculum. But there no opportunities in the community to go competitive for middle and high-school. Falkon Academy would like to fill that gap.

Project Description

The aim of this project is to build competitive VEX Robotics and FTW Drones Teams with kids from ages 9yrs to 15yrs old. These teams will build VEX Robots and FTW Drones and compete in regional and hopefully state and national level. Rancho Cordova, RiverView Stem Academy elementary school has VEX robotics as part of STEM curriculum. But after the kids move out of Riverview to Middle school and then to high school there is no VEX robotics programs available in the community. Falkon academy would like to help fill this gap. We want to build competitive teams and take them to state and national level. (It should be noted that these competitions are very competitive, around 60,000 kids compete national level. So winning is not guaranteed). But Falkon can guarantee that kids will learn lot of new things that are not taught in typical school curriculum. Falkon has developed custom curriculum to teach kids with lots of examples. We want to develop their own pain-point identification through observation and come up with their own unique solutions. This is how startup's are built. And this is how new products are developed. (https://medium.com/@gojilabs/a-startups-guide-to-product-management-understanding-customer-pain-points-33b431ff2992). With out this mindset and there would not be products like iPhone, Impossible Burgers, Tesla Cars and many other innovative products. VEX Robotics Description: The VEX Robotics Design System, which was created by Innovation First, Inc., is recognized as a leading classroom robotics platform. It has been designed to nurture creative advancement in robotics and knowledge of science, technology, engineering, and math (STEM) education. It could be compared to Lego Robotics. But cheaper. The added advantage of VEX robotics is that its being used in Riverview STEM. I would look at it as another avenue for kids to learn robotics and compete past elementary school. VEX Robotics has primarily two categories. VEX IQ and VEX V5.

Project Team

Application #62

Falkon Academy Organization Name Some of the key members are: Ashwin Thirunahari Director/Coach Veronica Griffin Coach Ryan Vermillion Area Manager Ashwin Thirunahari has started offering classes and building teams. And he already has two teams from Folsom. He was able to build this team without any marketing. Just talking to few friends. This shows there is big interest in the community. He is running his class in his garage Ashwin Thirunahari has Masters in Electrical Engineering. And has patents on drone technology. Veronica Griffin has been coaching VEX IQ Teams, and this team has already won State Championship and selected for World. She is running her class from garage. Ryan Vermillion is Area Manager for Skyhawks Sports programs. He runs 100 programs for 3000kids per year throughout Sacramento area.

Project Goals

June-July 2022 Start Marketing to Community/parents for team formation and Build Interest July 2022 Start initial Classes – if possible Order Kits This is last opportunity to exit the proposal. Once kits are ordered they cannot be returned. But they can be sold atleast ¾price or donate to schools August – September Build at least 5 teams. With 5 members each. Two teams will compete in VEX IQ. Two teams will compete in VEX V5. One team will compete in Drones. September Start Training October Attend at least one competition Nov – Feb Attend 4 -5 competitions Refine the robots over the period March Attend State competition if selected. April Attend Nationals if selected.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

Various Options: $10,928 to $104,914. A Good Program will be $23,914

Estimated Breakdown of Project Expenditures

1) Required Kits Kit Name Cost 2 VEX V5 Competition Kit ($1899 each) $3798 2 VEX IQ Competition Kit ($650 each) $1300 Drone Kit (Around $2000) $2000 1 VEX V5 Game Pad. $500 each $500 1 VEX V5 Perimeter. $799 each $799 1 VEX V5 Tile Set. $249 set $249 1 VEX IQ Pitching Field. $119 each $119 1 VEX IQ Perimeter $163 each $163 Special Parts – Pneumatics kits, gears, wheels etc. $1800 Shipping $200 Total $10,928 2) Enhanced Learning Kits - Optional. The required kits above, will provide competition graded parts. But its not enough for every kid to learn the basics. Overtime they will all learn. But at Falkon Academy we like to give every kid a kit for 3 months. So they can really understand how every thing works. Really build the expertise. These classroom kits are great value add. Also using the classroom kits, kids can build prototypes and a spare robot for competitions in case their main robot falls apart. Having this kits will also address “Adaptability” Concerns. We will be able to distribute the kits to take home, so we can run the program over Zoom. Kit Name - Nice to have kits 1 VEX V5 Classroom bundle $7988 – Nice to have, for enhanced learning experience $7988 1 VEX IQ Classroom bundle $4998 – Nice to have, for enhanced learning experience $4998 Total $12,986 3) Cost of Coaching: $80 per kid/per month for 8 months in a year. $16,000 4) Miscellaneous Expenses: $5,000 This covers, Competition Registrations, Snacks, Insurance, Internet, projectors, etc. 5) External Rental Space. $12/sft/year (Rancho Cordova): $60,000 A dedicated space is highly recommended. But not essential. If the program is not done at a central dedicated space, it would have to be run at parent-volunteer garage space. If the program is done at a school Site, then this cost can be waived.

Matching Funds

N/A

Include Any Other Funding Contributions

We may seek sponsorship of competitive teams from other local companies, restaurants. This is only possible after we have some teams that start winning. We may be able to offer after school enrichment camps to raise some funds.

Ongoing Operations and Maintenance Costs (if applicable)

The equipment will last 3years. After which they need to be replaced. There will be lost and broken equipment that need to be replaced. This may cost about $3000/year. We plan to raise our own funds to cover this expense.

Total Community Enhancement & Investment Funds Requested

Provided 4 options above. Our request is for Option B, Option C or Option D.

Is this a multi-year request?

No

How many years have you received funding for this project?

0

When will your request for funding sunset for ongoing programs?

Application #62

June 30, 2023.

Do you plan to ask annually for funding?

No

What other funding will you seek to support your project?

We may seek sponsorship of competitive teams from other local companies, restaurants. This is only possible after we have some teams that start winning. We may be able to offer after school enrichment camps to raise some funds.

Project Schedule, Timeliness and Adaptability

Project Schedule

June-July 2022 Start Marketing to Community/parents for team formation and Build Interest July 2022 Start initial Classes – if possible Order Kits This is last opportunity to exit the proposal. Once kits are ordered they cannot be returned. But they can be sold atleast ¾price or donate to schools August – September Build at least 5 teams. With 5 members each. Two teams will compete in VEX IQ. Two teams will compete in VEX V5. One team will compete in Drones. September Start Training October Attend at least one competition Nov – Feb Attend 4 -5 competitions Refine the robots over the period March Attend State competition if selected. April Attend Nationals if selected.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

This project need to completed by Apr 30, 2023. Thats when world competitions end.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Although Robotics Programs are better experienced at a central location in a classroom setting. But we can still run the programs virtually. We have to use “Enhanced Learning Kits” and distribute to kids as take home kits. We can run Virtual Reality Robotics Programs, and also compete in virtual world. This is another great learning experience. This builds a different set of programming skills and is very innovative.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

W.E. Mitchell Middle School
2100 Zinfandel Drive
Rancho Cordova, CA 95670

Other Physical Addresses (if project/program is at multiple sites)

If the project does not become viable at the school site, then we will run the program at parent-volunteer Garage space. Or we can rent a space outside

Have you received a letter of support for the project/program from the property owner?

Requested, and will submit to city by March 18, 2022

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

Yes, at a public K-12 school site

Which school district is the public K-12 school site located in?

Application #62

Folsom Cordova Unified

Application #62

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 GRANT APPLICATION
COMMUNITY ENHANCEMENT & INVESTMENT FUND

"Lets make Rancho Cordova hub for Robotics and Hi Tech"

Project Name : Falkon Academy Competitive Robotics

Contact: Ashwin Thirunahari

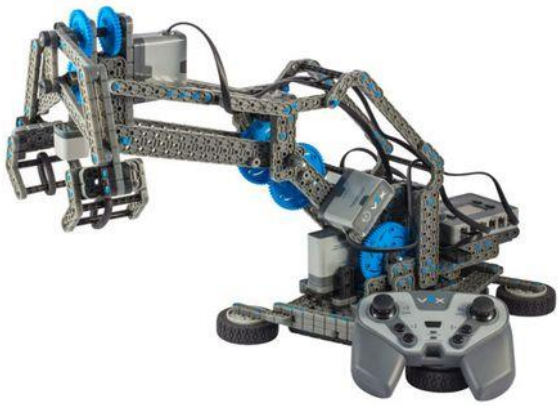
Phone Number: 916 221 1123

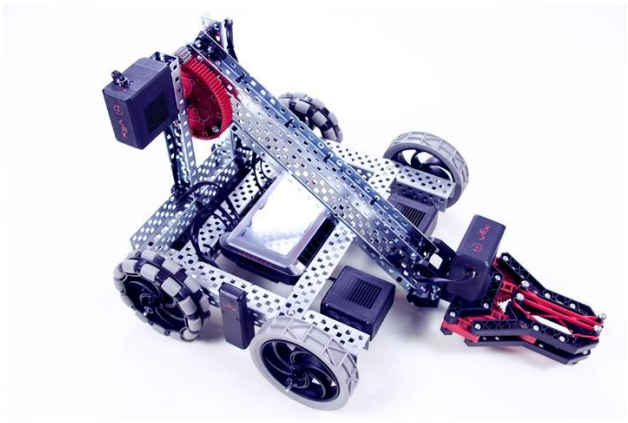
Email: ashwin@skyhawks.com

Project Synopsis: The aim of this project is to build competitive VEX Robotics and FTW Drones Teams for kids from ages 9yrs to 15yrs. Rancho Cordova, RiverView Stem Academy elementary school has VEX robotics as part of STEM curriculum. But there no opportunities in the community to go competitive for middle and high-school. Falkon Academy would like to fill that gap.

Application #62

Project Description: The aim of this project is to build competitive VEX Robotics and FTW Drones Teams with kids from ages 9yrs to 15yrs old. These teams will build VEX Robots and FTW Drones and compete in regional and hopefully state and national level. Rancho Cordova, RiverView Stem Academy elementary school has VEX robotics as part of STEM curriculum. But after the kids move out of Riverview to Middle school and then to high school there is no VEX robotics programs available in the community. Falkon academy would like to help fill this gap. We want to build competitive teams and take them to state and national level. (It should be noted that these competitions are very competitive, around 60,000 kids compete national level. So winning is not guaranteed). But Falkon can guarantee that kids will learn lot of new things that are not taught in typical school curriculum. Falkon has developed custom curriculum to teach kids with lots of examples. We want to develop their own pain-point identification through observation and come up with their own unique solutions. This is how startup's are built. And this is how new products are developed. (https://medium.com/@gojilabs/a-startups-guide-to-product-management-understanding-customer-pain-points-33b431ff2992). With out this mindset and there would not be products like iPhone, Impossible Burgers, Tesla Cars and many other innovative products.





VEX Robotics Description: The VEX Robotics Design System, which was created by Innovation First, Inc., is recognized as **a leading classroom robotics platform**. It has been designed to nurture creative advancement in robotics and knowledge of science, technology, engineering, and math (STEM) education. It could be compared to Lego Robotics. But cheaper. The added advantage of VEX robotics is that its being used in Riverview STEM. I would look at it as another avenue for kids to learn robotics and compete past elementary school.

VEX Robotics has primarily two categories. VEX IQ and VEX V5.

At any of the VEX competitions, the representation from Sacramento is very minimal. Most teams are from Bayarea, Davis, Modesto, Stockton. There are only couple of teams from Placer and Natomas. Whereas Rancho Cordova and Folsom has only couple of teams in VEX IQ category. **None** from VEX V5 category.

Application #62

Below is description of different categories.

	**VEX IQ** is a snap-together **robotics** system, making it fast and easy to build an endless variety of robots. Watch code come alive on a physical robot and apply key STEM skills. Organized parts storage reduces classroom clutter **IQ** Electronics are Simple, Flexible and Powerful Students can build and change their robots fast. This is for kids from 4th grade to 7th grade.
	**VEX V5**. Invigorating students with a passion for STEM with **robotics**! **VEX V5** represents our fifth generation of education **robotics** systems developed with 20 years of experience using **robotics** to teach STEM principles. **V5** electronics are approachable, flexible and powerful, using state of the art technology to ensure relevant education outcomes. This is for kids 7th grade to 11th grade.
	**FTW** (**For The Win**) Robotics is a STEM-based experiential educational Drones. In this program **Drones** are used as an effective way for students of all ages to explore engineering, computer science, and aviation. This is for kids from 5th grade to 11th grade.

Letter from Riverview STEM Team – Selected for World Championship.

Attached is a letter and a video from some of the kids from River View Stem. After Riverview Stem they became an independent team and now is selected for World Championship.

They want to **continue their passion for robotics** and take it to the next level. But its turning out to be expensive as an independent team. They **plan to be part of Falkon Robotics**, so they will **have access to the community and be able to share costs**. They will also have access to curriculum and facilities.

They expressed their concern that after Riverview STEM there are no avenues for the kids besides being an independent team.

Video from the Riverview STEM Team: https://youtu.be/pinvCAF7b6s

Letter from the Riverview STEM Team is **at the end of the document**. And can also be accessed from: https://docs.google.com/document/d/1KIbh3nFSW-_v2JOhJEk75729cLmOGsFERSgt-69hpxU/edit?usp=sharing

Falkon is funding them through small Scholarship for travel expenses.

Falkon Robotics Project Team:

Falkon Academy	Organization Name

Some of the key members are:

Ashwin Thirunahari	Director/Coach
Veronica Griffin	Coach
Ryan Vermillion	Area Manager

Ashwin Thirunahari has started offering classes and building teams. And he already has two teams from Folsom. He was able to build this team without any marketing. Just talking to few friends. This shows there is big interest in the community. He is running his class in his garage Ashwin Thirunahari has Masters in Electrical Engineering. And has patents on drone technology.

Veronica Griffin has been coaching VEX IQ Teams, and this team has already won State Championship and selected for World. She is running her class from garage.

Ryan Vermillion is Area Manager for Skyhawks Sports programs. He runs 100 programs for 3000kids per year throughout Sacramento area.

Project Goals (Timeline):

June-July 2022	Start Marketing to Community/parents for team formation and Build Interest
July 2022	Start initial Classes – if possible Order Kits **This is last opportunity to exit the proposal. Once kits are ordered they cannot be returned. But they can be sold atleast ¾price or donate to schools**
August – September	Build at least 5 teams. With 5 members each. Two teams will compete in VEX IQ. Two teams will compete in VEX V5. One team will compete in Drones.
September	Start Training
October	Attend at least one competition
Nov – Feb	Attend 4 -5 competitions Refine the robots over the period
March	Attend State competition if selected.
April	Attend Nationals if selected.

Expenses Outline:

1) **Required Kits**

Kit Name	Cost
2 VEX V5 Competition Kit ($1899 each)	$3798
2 VEX IQ Competition Kit ($650 each)	$1300
Drone Kit (Around $2000)	$2000
1 VEX V5 Game Pad. $500 each	$500
1 VEX V5 Perimeter. $799 each	$799
1 VEX V5 Tile Set. $249 set	$249
1 VEX IQ Pitching Field. $119 each	$119

Application #62

1 VEX IQ Perimeter $163 each	$163
Special Parts – Pneumatics kits, gears, wheels etc.	$1800
Shipping	$200
Total	$10,928

2) **Enhanced Learning Kits - Optional.**

The required kits above, will provide competition graded parts. But its not enough for every kid to learn the basics. Overtime they will all learn. But at Falkon Academy we like to give every kid a kit for 3 months. So they can really understand how every thing works. Really build the expertise. These classroom kits are great value add.

Also using the classroom kits, kids can build prototypes and a spare robot for competitions in case their main robot falls apart.

Having this kits will also address "Adaptability" Concerns. We will be able to distribute the kits to take home, so we can run the program over Zoom.

Kit Name - Nice to have kits	
1 VEX V5 Classroom bundle $7988 – Nice to have, for enhanced learning experience	$7988
1 VEX IQ Classroom bundle $4998 – Nice to have, for enhanced learning experience	$4998
Total	$12,986

3) **Cost of Coaching:** $80 per kid/per month for 8 months in a year. $16,000

4) **Miscellaneous Expenses:** $5,000

This covers, Competition Registrations, Snacks, Insurance, Internet, projectors, etc.

5) **External Rental Space. $12/sft/year (Rancho Cordova):** $60,000

A dedicated space is highly recommended. But not essential. If the program is not done at a central dedicated space, it would have to be run at parent-volunteer garage space. If the program is done at a school Site, then this cost can be waived.

Advantages of dedicated space:

1) A dedicated space will provide opportunities for the kids to communicate with other teams and learn from each other.

2) A dedicated space will also provide place to store the material. Otherwise there is a high chance that the material will be lost. Robotics comprises of 1000s of parts. And replacing parts is very expensive.
3) A dedicated space will inculcate professionalism and responsibility in kids. As its not home. (As an example: We have seen during pandemic, kids were attending school zoom sessions from bed. Although robotics programs are not zoom sessions, but still a home-based program may not inculcate similar professionalism as a dedicated space would.)
4) No frequent interrupts from siblings, parents, visitors and neighbors, unlike garage space.
5) Heating in winter and air-conditioner available during summer, unlike garage space.
6) Easy access to restroom and water, unlike garage space where families can feel inconvenient.
7) Robotics typically need 3hrs to 8hrs of work per week. And and most families don't like to have so many kids spend that many hours at their place. And using restrooms, asking for water etc.
8) Don't have to find a volunteer garage space. Robotics takes up 2 car garage space. And most families don't like to dedicate that much of space.
9) With dedicated space, we can host competitions.
10) With dedicated space, we can offer programs for 50 to 100 kids.
11) With dedicated space, we can offer summer programs and raise some money.

<u>Disadvantage of dedicated space:</u>

1) Big expense to rent, and other costs like insurance, and maintenance.
2) Increased distance of travel to one central location for all of Rancho Cordova. Garage spaces can be distributed across multiple locations across Rancho Cordova.

Not having a dedicated space, is one of the reasons why robotics is not catching up in our area. With a dedicated space, we can run professional programs.

Endorsement from School – for Dedicated space.

We have approached W.E. Mitchell Middle School for space to run robotics. The school expressed lot of interest. And Endorsed us.

<u>Options for Funding:</u>

Option A) Minimally Funded Project/Garage Based:

Buy Only Required Kits **$10,928**

Application #62

Such a program will be run through people garages. Not an ideal program as kids learn a lot from each other.

Coaching fee and Miscellaneous fee will be paid by parents.

This project is self sustainable, for 3 years. After 3 years, we may have to replace with new kits.

Option B) 2nd Level Funded Project/Garage Based. – Minimum Recommended $23,914

This funding will provide complete equipment for Competitions and Enhanced Learning Experience. It will cover the cost of Required Equipment (1, above) and Enhanced Learning Kits (2,above)

This program will run from Parent-Volunteer Garages.

Option C) Run the program at Mitchell Middle School. – Minimum Recommended $23,914

Endorsement from W.E Mitchell Middle School is provided.

This funding will provide complete equipment for Competitions and Enhanced Learning Experience. It will cover the cost of Required Equipment (1, above) and Enhanced Learning Kits (2,above)

The dedicated space will be provided by the school. Which is huge cost saver.

The cost of coaching will be borne by the parents.

Note: We may need to work with school to open the program to all kids of Rancho Cordova. And not be dedicated to only Mitchell Middle School Students.

Option D) Fully funded Project Cost: $104,914

This option will fully fund the project, by providing all the expenses, documented in the "Expenses Outline" section above.

This project will provide an external space, instead of a school site. – This option can be centrally located to all of Rancho Cordova. It will take out the dependence on schools. And It will be easier to open up to all the schools in Rancho Cordova.

As, City will also pay for all the coaching. This may benefit low-income kids as well.

Ongoing (beyond FY 2022/2023) operations and maintenance costs if applicable:

The equipment will last 3years. After which they need to be replaced. There will be lost and broken equipment that need to be replaced. This may cost about $3000/year. We plan to raise our own funds to cover this expense.

Application #62

Total Community Enhancement & Investment Funds requested:

Provided 4 options above. **Our request is for Option B, Option C or Option D.**

Is this a multiyear request? NO

How many years have you received funding for this project? 0

Do you plan to ask annually for funding? NO.

What other funding will you seek to support your project?

We may seek sponsorship of competitive teams from other local companies, restaurants. This is only possible after we have some teams that start winning.

We may be able to offer after school enrichment camps to raise some funds.

Adaptability

Although Robotics Programs are better experienced at a central location in a classroom setting. But we can still run the programs virtually. We have to use "Enhanced Learning Kits" and distribute to kids as take home kits.

We can run Virtual Reality Robotics Programs, and also compete in virtual world. This is another great learning experience. This builds a different set of programming skills and is very innovative.

Physical Address/School District

Waiting for Endorsement letter from W.E. Mitchell Middle School.

If this is not done, we will run the project

1) from parent-volunteer garages if Option or rent a space if Option C: is funded.

Closing Comments:

As expressed in this document, there is a big need and interest for robotics in the community. So funding to get this project started will have a big impact in our youth.

Let's together build the next generation work force. And make Rancho Cordova hub of Robotics and New Tech.

LETTER From Riverview STEM TEAM - Must Read

March 3, 2022

To Whom It May Concern,

My name is Fallon Griffin. I am eleven years old and one day want to pursue a career in robotics and mechanical engineering.

My passion for robotics started with watching the TV show BattleBots when I was two years old. My parents were kind enough to encourage my passion with Little bits, Legos, k'nex and any other building toys that could move.

I was fortunate to go to Riverview STEM Academy through elementary school and it was there I discovered VEX IQ. We used VEX for our Project Lead the Way (PLTW) curriculum. In 4th Grade I signed up for the VEX robotics team started by Mrs. Lanich. I never knew there were robotics competitions for my age group. It was on this team that I was able to put all my knowledge about design, engineering, teamwork and programming to good use.

VEX IQ Challenge is a creative competition where each year a new challenge is released for teams to compete in. The first year we were tasked to create a robot to stack cubes on platforms, and for

extra points, stack balls on top of them. There are three components to the competitions, driver controlled matches, autonomous skills matches and judged awards. It was frustrating more than fun at first, robotics is not for those who view failure negatively. Failure in robotics is essential in working towards a final working product. Each gear ratio that wouldn't work teaches us more about what will work and why. These competitions gave me real world understanding about concepts that I had studied before, but was finally getting to see work.

In 5th grade, because I was homeschooled due to the pandemic, there was nowhere for me to compete or have a team. I truly appreciated the tech lab at Riverview and for the opportunity to come early and stay late at school with my teammates, my friends, and work on a sport that I loved. My parents were willing to let me continue robotics, and two of my friends were excited to join, and for a year all my birthday and Christmas presents were robotics parts and a field for the garage. Measuring six by eight feet it takes up most of the space.

My team was able to stay together and compete as an independent team thanks to each of our parents. **We have qualified for State Championship every year since we started and won the State Design Award in 2021 qualifying us for World's!** My experience with robotics only propels my desire to pursue robotics in the future. I am sad to know that many of my elementary school friends who were part of robotics with me at Riverview are not doing it anymore because they don't have the space or parts to make a team. We all fell in love with this sport, but don't have fields or equipment to keep competing.

Soon, my team will outgrow my parents' garage as we transition to the older VEX competitions for middle and highschoolers. Also, the cost to fund a highschool robotics team will only grow with the complexity of the robot. Soon I may find myself without a team and a space to pursue my passion.

I hope that robotics could be recognized as a league locally. I wish we had fields and a tech lab to pull all the kids interested in pursuing robotics competitively and recreationally in one spot. I want to coach and mentor younger kids in this sport and inspire them to love science and engineering as much as I do. This sport is unique as it not only provides a fun environment for kids to compete in, but trains the next generation of engineers, programmers and roboticists.

My team is named Generation Artemis, because we will grow up seeing humanity return to the moon. I want to be part of the next generation of engineers who confront climate change, sustainable farming and space exploration with scientific innovations. **Please consider the importance of a supporting robotics league and facility locally.**

Sincerely,
Fallon Griffin

Project Information

Project Name

Elementary Field Trip partnership with Sly Park for Rancho Cordova Schools!

Project Synopsis

FCUSD would like to bring more STEM focused field trip opportunities to our students. Our project benefits the community by offering STEM based educational opportunities to our students.

Project Description

This is a growing, high demand area of study that has the potential to create substantial economic benefits for our children and community. “The study found that, regardless of gender, ethnicity or socioeconomic status, youth who take educational trips have better grades (59 percent), higher graduation rates from high school (95%) and college (63%), and greater income (12% higher annually). In fact, 89% said educational trips had a positive, lasting impact on their education and career because the trips made them more engaged, intellectually curious and interested in and out of school.” -National Education Association, NEA

Project Team

FCUSD & John Bliss(CGE), Amber Fontaine (CME), Christy Wilkerson (CVE), James Tucker (NVE), Ted Bosque (PJS), Jessica Hutchison (RCE), Lari Powell (RSA), Kim Christierson (WRE), Leslee Cottrell (WME)

Project Goals

Every 5th grade class will have a Sly Park experience which will result in academic gains through greater engagement. We will measure our goal by student surveys, teacher engagement feedback, and monitoring academic achievement before and after each event.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$45,000.00

Application #63

Estimated Breakdown of Project Expenditures

Sly Park Options! Sly Park Options Cost Description Virtual Science Camp ● 5 days online ● 5th Grade $1500 per class Students receive sequenced daily lessons to support citizen science and environmental stewardship. Hybrid Science Camp Option A ● 4 days online ● 1 day on-site ● 5 Grade $1600 per class Modeled after the Virtual Science Camp. Structured for 4 days of online learning experiences and 1 day of in person instruction at your school site Hybrid Science Camp Option B ● 4 days on-site ● 1 day online ● 5th Grade $2000 per class (min 2 classes) Modeled after the Virtual Science Camp. Structured for 4 days of exploratory learning experiences on your school campus and 1 day for an online follow-up lesson/check-in at a later date

Matching Funds

N/A

Include Any Other Funding Contributions

school site budgeting

Ongoing Operations and Maintenance Costs (if applicable)

N/A

Total Community Enhancement & Investment Funds Requested

$45,000.00

Is this a multi-year request?

No

How many years have you received funding for this project?

3

When will your request for funding sunset for ongoing programs?

Received funding for 3 years but have been unable to use until this year due to COVID.

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

School site funding

Project Schedule, Timeliness and Adaptability

Project Schedule

We would have this in place by August 9th, 2022 and continue throughout the school year, ending May 26th, 2023. In addition to this funding, we will use site funds to sustain the programs that produce the most effective results in terms of overall learning and STEM engagement and academic gains, beyond 2023.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

We will begin scheduling field trips 08/09/2022 and complete all field trips by 05/25/23. All data will be collected by 05/26/23.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Yes We have been able to provide virtual field trips during the pandemic and can do so again if necessary.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

Application #63

1965 Birkmont Dr
Rancho Cordova, CA 95742

Other Physical Addresses (if project/program is at multiple sites)

Our field trips are located throughout our local rancho Cordova Schools and/or at the Sly Park Location

Have you received a letter of support for the project/program from the property owner?

No

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Elementary Field Trip - Funding request (1).pdf

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

Yes, at a public K-12 school site

Which school district is the public K-12 school site located in?

Folsom Cordova Unified

Project Criteria
Education - We will improve the quality, availability, and accessibility of STEM education. We will also connect our students to STEM related resources in our community to foster an interest in STEM that goes beyond the classroom and into our greater community.

Timelines:
We will begin scheduling field trips 08/09/2022 and complete all field trips by 05/25/23. All data will be collected by 05/26/23.

Adaptability:
Sly Park field trips are virtual, onsite, or overnite at the Sly Park campus.

Project Location:
Our field trips are located throughout at our local Rancho Cordova Schools and/or at the Sly Park location.

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR SCHOOL SITE USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a public K-12 school site, you must request the endorsement of the school superintendent of that school district.

One supplemental form is required per school district.

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by the corresponding school superintendent for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. Each participating school superintendent reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

To be filled out by grant applicant

Project/Program Name: STEM Field Trips for Elementary Schools

Name of Organization: Folsom Cordova Unified School District

Name of Applicant and Title: Lari Powell - Principal at Riverview STEM Academy

Applicant's Phone: 916-294-2435 **Applicant's Email:** lpowell@fcusd.org

Submit a copy of your application with this page to the school superintendent(s). For your application packet to be considered complete the signed and dated endorsement form must be received by the City of Rancho Cordova by March 18, 2022. The superintendent will submit the form directly to the City's Community Enhancement & Investment Fund team. You must submit this form and a copy of your application to the appropriate superintendent or his or her designee no later than March 4, 2022. For Elk Grove Unified School District use BGrewal@egusd.net. For Folsom Cordova Unified School District use agriffin@fcusd.org. For Sacramento City Unified School District use dianne-brown@scusd.edu.

To be filled out by School Superintendent or designee

Endorsement Given Yes

Endorsement Withheld

Conditional approval of facility rental only

Superintendent's or Designee's Printed Name: Dr. Sarah Koligian Sarah Koligian

Date: 3/17/22

School District: Elk Grove Unified Folsom Cordova Unified ■ Sacramento City Unified Other

Comments (Optional):

The school superintendent or designee will send this form directly to CEIFGrants@cityofranchocordova.org no later than March 18, 2022. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

Project Information

Project Name

Thinking Like a CEO: From non-Employer to Employer

Project Synopsis

Three to five of Rancho Cordova's small businesses owners learn to operate their businesses as employing CEOs rather than as the only employee in their businesses.

Project Description

Thinking Like a CEO is a 12-month program wherein participants receive: • Classroom instruction with hands-on experiences to address the knowledge and skills gaps as well as the thought patterns and behaviors that impede small business success • One-on-one business coaching to develop sales and revenue generation capacity , • Support services to practice and experience how hiring professional service providers for day-to-day tasks allows them to drive their business goals and objectives from a CEO perspective and achieve professional results. Participants apply their training to their businesses in real time. Each deliverable is developed and customized for their unique business needs. The program walks participants through identifying and documenting their unique goals and objectives, budgeting to meet these goals and objectives, branding and representing their businesses, building sales capacity, and finally leading teams. Our instructional team is composed of local certified professionals, including a Balanced Scorecard champion, a doctor of behavioral sciences, a Forbes 50 Champion, a multi-business entrepreneur, and a professional copy writer. Support services are provided by local independent businesses who grant them special philanthropic pricing, and our coaches specialize in revenue generation.

Project Team

Maximum Reach 4 Economic Equity Cornelius Strategies for Business and Life Moorepark Enterprises Rising Star Coaching Howard II Enterprises TeeSandi Consulting Entrepreneurship Empowered Burgess Brothers Quality Media Consultant Group

Project Goals

Students gain business management knowledge, skills and tools including business and project analysis, project planning tools, strategic mapping, budgeting and forecasting, pricing strategies, team building and communication skills, task delegation and follow-up, business writing skills, digital marketing, revenue generation, product placement, interviewing and hiring or contracting professional services. Project Information

Project Name

The California Police Activities League's Rancho Cordova Youth Apprenticeship Readiness Accelerator Program (YARA).

Project Synopsis

The California Police Activities League (California PAL) a 501(c)3 incorporated nonprofit, is spearheading a unique program in partnership with the Laborers Training and Retraining Trust Fund for Northern California (LTC) and The Salvation Army Sacramento to mobilize a powerful collaborative that includes construction trades, CBO's, employers, education, and law enforcement, creating a wraparound project that reflects California PAL's commitment to reducing the wealth equity gap, leads to an effective bridge to quality jobs and a better quality of life. YARA will positively impact community/economic development by creating pathways to high quality employment and High Road jobs by establishing a program with industry-recognized certifications and leadership development. Underserved youth in Rancho Cordova will be presented employment options through career exploration, workforce training and additional opportunities for life-long careers that are not typically afforded to this demographic. CALPAL's history of supporting minority youth from underserved communities is consistent with our proposed target populations in Rancho Cordova, specifically disadvantaged or low-income communities experiencing disproportionate unemployment. By providing exposure and pathways to employment our participants will have access to educational and workforce development resources that were previously not available to them. CALPAL was established in 1972 with the intention of reducing juvenile crime and focus on establishing safer and stronger communities by "Building the Bond Between Cops & Kids." Our successful programs have proven time and time again that dedicated community policing by our Police and Sheriff's Departments in conjunction with their local PAL program and California PAL, is an effective solution that provides a huge positive influence in our communities and make a difference in the lives of our youth.

Project Description

California PAL will provide overall coordination and management of the YARA program. California PAL's future office site, the Rancho Cordova PAL facility, will be a shared facility with Rancho Cordova PAL and will serve as the location for the YARA program. The program will include 2 cohorts each consisting of 12 Rancho Cordova youth. The Cohorts will participate in a comprehensive suite of activities to explore and prepare them for living wage employment through this pre-apprenticeship program. The program will begin with the participants attending California PAL's flagship program, Life After High School Destination Success, a 4-day, 3-night conference held at Fresno State University providing college and career preparedness and workforce development skills including

college/career readiness workshops & Fair, life skills, resume & business interviews and motivational guest speakers from the trades. The YARA program will be the follow-up to ensure a successful pathway towards achieving career goals and living wage jobs. At the core of YARA is the Laborers Training & Retraining Trust Fund for Northern California's (LTC) Pre-Apprenticeship Construction Training, a 6 week (40 hours/week) program that includes certificates in Fundamentals of Construction, OSHA 10, First Aid/CPR, Confined Space, Traffic Control and Hazardous Waste courses. The participants will be presented a comprehensive experience with a combination of hands-on and classroom learning to prepare the participants for the next step in their workforce development journey, including but not limited to entering a formal apprenticeship or post-secondary education. A building project and graduation week activities will also be part of the program.

Project Team

CALPAL: Jennifer Lopez, Executive Director: With over 15 years experience in non-profit management/fund-development and 9 years experience in youth development/engagement, Ms. Lopez will be the overall sponsor of YARA representing CALPAL as the lead operational and fiscally responsible organization. Bryan Ferreria, Director of Operations: In the role of YARA Program Manager, he will coordinate the tactical operations of the program including youth recruitment, partner engagement, scheduling and reporting. Kenneth Ramirez, Director of Development: CALPAL's point of contact and liaison for the YARA program and Measure H focals in addition to grant administration. LTC: Leonard Gonzales (Executive Director): Primary focal for YARA to coordinate the construction curriculum and certification courses of the program, supervise the acquisition and use of tools and PPE. LTC has an extensive history serving underserved and underrepresented communities throughout Northern California. Salvation Army: Captain Larry J. Carmichael, MSOL (Social Services Officer): Liaison to the Sacramento Salvation Army who will be providing tracking and reporting as recognized by the State Workforce Development Board. Both LTC and Salvation Army will work with industry leaders to identify and secure course instructors, industry partners for demonstration projects and construction businesses to provide monetary and in-kind support. Rancho Cordova PAL: Tina Aldama (PAL Program Director): Oversee activities including scheduling and facility preparation at the Rancho Cordova PAL location, maintain communication with participants. Deputy Jose De La Cruz (Youth Services Officer/PAL Director) Help in recruiting and acquiring law enforcement officers to act as advisors for the youth participants. Advisory Council: A council made up of local leaders will be established to promote trades, create employment opportunities & pathways and reduce barriers to employment & training.

Project Goals

The primary goal of YARA is to enable the youth participants to determine a pathway to gain skills leading to a lifelong career. This will be achieved by the defined program curriculum and the advisors in place to assist and ensure the participants identify and take the next step in their workforce development journey. As stated by Captain Larry Carmichael, Sacramento City Social Services officer: https://sacramento.salvationarmy.org/sacramento_metro/construction-training-program?random=107 "The Salvation Army truly believes that the Construction Training Program is another way to take social services to a higher level- a hand up & not a hand out. We realize that construction-related jobs are still in high demand and this gives our clients a real opportunity to learn new skills and find employment in the very near future." Measures will be both quantitative and qualitative to measure the effectiveness of the program to include the following: - Participant attendance - Obtaining Certification Cards in the industry recognized course modules - Program completion - Defined action(s) in place for each participant to continue their workforce development experience, (Apprenticeship, college, etc.) Additionally, surveys will be initiated to assess and compile the effectiveness of the program from the participants' perspective. Example questions include: - Overall value of the program and the importance of defining a plan to obtain skills that lead to employment - Understanding of the curriculum - Trust and value in the advisors - Next step(s) identified for continuing education/job skills - Suggestions on how the program can be modified or improved

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$58,000 - $50,000 requested from Measure H with an additional $8,000 from Laborers Training and Retraining Trust Fund for Northern California and The Salvation Army Sacramento.

Estimated Breakdown of Project Expenditures

Title: Executive Director, (10%) +Benefits - $4,832.00 Title: Director of Operations, (10%) +Benefits - $4,242.00 Title: Director of Development, (10%) - $4,242.00 Coordination and Operations, Rancho Cordova PAL - $4,392.00 Equipment (rental or purchase) Training Expenses $25,000.00 Supplies - $500 Meeting/Travel $4,792.00 Other (specify): Salvation Army Program Assistance $2,000.00

Matching Funds

N/A

Application #65

Include Any Other Funding Contributions

Laborers Training and Retraining Trust Fund for Northern California and The Salvation Army Sacramento will be providing a total of $8,000 to cover the costs of instruction.

Ongoing Operations and Maintenance Costs (if applicable)

N/A

Total Community Enhancement & Investment Funds Requested

$50,000

Is this a multi-year request?

No

How many years have you received funding for this project?

1

When will your request for funding sunset for ongoing programs?

Upon completion of the second cohort and graduation week activities, within the one-year funding cycle, no additional funding will be requested from Measure H. Funding for subsequent years will be sought from other sources such as grants, partner organizations, trade and government resources.

Do you plan to ask annually for funding?

No

What other funding will you seek to support your project?

Harbor Freight – Potential donation of tools/related equipment to be used by youth participants and potential stipends. Construction Companies/Local Businesses – Possible monetary donations to support program curriculum.

Project Schedule, Timeliness and Adaptability

Project Schedule

Funding starts July 1 Recruiting for Cohorts 1 & 2: July 15, 2022 Cohort 1 orientation: July 22, 2022 Life After High School: July,29 – August 2, 2022, or August 5 – August 8, 2022 Cohort 1 curriculum begins: August 15 – September 23, 2022 Cohort 2 orientation: September 26, 2022 Cohort 2 curriculum begins: October 3 – November 11, 2022 Graduation week activities/ceremony for both cohorts: November 16, 2022

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

Both cohorts are targeted to be completed prior to the end of the funding period. The timeline above will secure the necessary resources and equipment required to implement and achieve the goals of the program. Cohort 2 orientation: September 26, 2022 Cohort 2 curriculum begins: October 3 – November 11, 2022 Graduation week activities/ceremony for both cohorts: November 16, 2022

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

If necessary, the program can be conducted in a virtual, online environment with minimum modifications.

March 17, 2022

To Whom It May Concern:

We are pleased to inform you that The Laborer's Training & Retraining Trust Fund for Northern California (LTC) is partnering with the California Police Activities League and The Salvation Army Sacramento County Operations. Together, we are dedicated to achieving the goals to carry out community-based programs and/or services in the area of community and workforce development for the benefit of the City of Rancho Cordova.

The LTC service region covers the 46 Northern California counties. We provide training to over 15,000 Laborers annually and assist with certifying and re-certifying members on a daily basis. We take great pride in preparing a quality skilled workforce to our signatory contractors. We are excited about the opportunity to work with youth and young adults within the City of Rancho Cordova.

The Construction industry is an important and strategic area of growth in our region. We believe strongly in ability to train and prepare participants with key skills training that facilitates their entry into high-demand, high-paying jobs in Construction.

Sincerely,

Leonard Gonzales, Executive Director
Laborers Training & Retraining Trust Fund for Northern California

DOING THE MOST GOOD

March 17, 2022

To whom it may concern:

We are pleased to inform you that The Salvation Army Sacramento County Operations is partnering with the California Police Activities League and the Laborer's Training & Retraining Trust Fund of Northern California. It is The Salvation Army's intent to provide vital services to program participants in partnership and in support of California PAL's workforce development program to take place within the City of Rancho Cordova. United in this partnership we are confident that we will see individual lives transformed for good and in working together we will have a profound impact on the youth of Rancho Cordova.

March 9, 2022

City of Rancho Cordova
Community Enhancement and Investment Fund
Rancho Cordova City Hall
2729 Prospect Park Drive
Rancho Cordova, CA 95670

To whom it may concern:

The Rancho Cordova Police Activities League is excited to partner with the California Police Activities League and the Laborer's Training & Retraining Trust Fund for Northern California. We are dedicated to achieving the goals outlined in the Community Enhancement and Investment Fund grant, to carry out community-based programs and/or services in the areas of arts and culture, community development and services, economic or workforce development and health and human services. Each year we look to leverage our collective resources to develop methods in which we can better serve the youth of Rancho Cordova and expand our programs.

This grant represents an exciting opportunity to work, support and benefit from the training and leadership development of youth in the City of Rancho Cordova. It is part of our overall partnership to participate in Californian PAL's conferences and programs to develop wonderful opportunities for youth that will benefit from our continual guidance. Coupled with Rancho Cordova PAL's sustained efforts and reach within the city, the outcomes of the grant will be exponential. We are already taking advantage of this partnership by collaborating with shared resources that we plan to utilize in the city of Rancho Cordova.

Thank you for considering the California Police Activities League application for funding to support our collaborative efforts.

Sincerely,

Officer Jose De La Cruz #1034
Rancho Cordova Police Department
PAL Executive Director

Application #65

Project Information

* **Project Name**
Rancho Cordova Moose Lodge Parking Lot Improvement Initiative

* **Project Synopsis**
The RC Moose Lodge parking lot has become a safety issue for vehicles and pedestrians alike due to the multiple sink holes and disintegrating

* **Project Description**
The proposed project will provide the Rancho Cordova Moose Lodge members and residents with a repaired and resurfaced parking lot for improved safety and accessibility. It will also benefit the many activities held in the parking lot such as the Police Activities League (open to the public), Trunk or Treat and our Annual Rib Cook Off.

* **Project Team**
Our Parking Lot Committee consisting of several volunteers will oversee the project. The Committee consists of Charles Parsons, retired County of Sacramento Safety Inspector and current Lodge President, Joe Gough a past Governor and Parking Lot Committee Chair and a Project Manager

* **Project Goals**
To repair and resurface those areas of the parking lot needing attention. According to preliminary projects plan estimates, this work can be completed in a couple of days. One of the contractors we're considering is currently contracting with the City of Rancho Cordova replacing all the (Central Valley Engineering and Asphalt) old street corners to get them up to code and ADA compliant.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

* **Total project cost**
68000

* **Estimated breakdown of project expenditures**
contractors provided a summary total cost of labor and material of $68,000.00. Remove 3 inches of existing asphalt and haul off. Compact Subgrade. Import, place and compact 3 inches of asphalt concrete over approximately 17,000 square feet. Restripe per existing layout.

SKIPPED

* **When will your request for funding sunset for ongoing programs?**
June 30, 2023

* Do you plan to ask annually for funding?
No

* **What other funding will you seek to support your project?**
We are requesting assistance from our general membership and Moose International.

Application #66

Project Schedule, Timeliness and Adaptability

* **Project Schedule**
Project start date: As as funding is available. July 7th completing by July 10th 2022.

* **In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.**
All contractors have projected this work can be completed within 2-3 days maximum and we intend to complete as soon as funding becomes available.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

* **Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.**
Our parking lot served as our Lodge during the initial closures of businesses due to the pandemic. We used our parking lot to service to go meals and in place outside dining following City of Rancho Cordova and Sacramento County Health guidelines.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

* Physical address of project location
10124 Coloma Road
Coloma Road
Rancho Cordova CA 95670

Other physical addresses if project/program is at multiple sites
SKIPPED

* Have you received a letter of support for the project/program from the property owner?
Requested, and will submit to city by March 18, 2022

Letter of Support from Property Owner (not K-12 schools or park/park facility)
SKIPPED

* Is your project/program intended to operate or take place at a public K-12 school site or a park/park facility?
No

If you answered yes to the above, and your project/program is intended to operate or take place at a public K-12 school site or a park/park facility, instead of a support letter, you must request the endorsement of the entity using the appropriate Supplemental Endorsement Form. You must submit the form to the appropriate contact by March 4, 2022 along with a copy of your grant proposal. The forms and submittal instructions are available at http://www.cityofranchocordova.org/residents/community-enhancement-investment-fund/grant-applications.

For Public K-12 School Sites: By the application deadline, the City of Rancho Cordova must receive the Supplemental Endorsement Form that's been signed and dated by the corresponding school superintendent for the application to be considered a complete submittal. It's the applicant's responsibility to ask for the endorsement in the time allotted. Each participating school superintendent reserves the right to withhold their endorsement of a project/program. Refer to the Fiscal Year 2022/2023 Supplemental Endorsement Form for more information and important deadlines at http://www.cityofranchocordova.org/residents/community-enhancement-investment-fund/grant-applications.

For Park/Park Facilities: By the application deadline, the City of Rancho Cordova must receive the Supplemental Endorsement Form that's been signed and dated by the Cordova Recreation & Park District for the application to be considered a complete submittal. The CRPD representative reserves the right to withhold their endorsement of a project/program. Refer to the Fiscal Year 2022/2023 Supplemental Endorsement Form for more information and important deadlines at http://www.cityofranchocordova.org/residents/community-enhancement-investment-fund/grant-applications.

Public Record
Unless otherwise exempt under applicable law, applications and application materials are public records. All information received from an applicant, whether received in connection with a grant application or in connection with any grant-funded activities performed are subject to disclosure pursuant to the California Public Records Act, unless otherwise exempt.

Next Steps
Applicants will receive acknowledgement once their application is received. When the application period closes, staff will review each application according to the application criteria and prioritization method listed within the Fiscal Year 2022/2023 Grant Application Process and Criteria document. Should staff have any questions or need clarification on your application, they will contact you. You are invited to attend any of the public City Council Meetings. It is anticipated at this time that the Community Enhancement & Investment Fund team will present information to the City Council starting in April and continuing through June.

We may invite applicants to present their project and we may make selection recommendations to Council during the May City Council meetings. In addition, the Community Enhancement & Investment Fund team will send periodic updates to grant applicants via e-mail.

It is possible that all funding decisions for the Fiscal Year 2022/2023 Community Enhancement & Investment Fund could be made in May and formally adopted by City Council by early June. Staff intends to notify all applicants of the funding decisions made by the end of June.

If you have not signed up to receive automatic notifications when council meeting agendas are posted, you can do that by using the link below:

Attachments: PkngLotQuote.PrevailWages.RCMooseForRCgrant.pdf; RCMoosePkgnLotPic02.17.22.pdf

Randi/Stacy:

I'm enclosing a scan of the quote from our most compliant bid for resurfacing our Rancho Cordova Moose Lodge Parking Lot which includes prevailing wages. We've included a rudimentary sketch of the parking lot area that shows where the resurfacing will take place.

I've also included the picture you sent to us and asked we notate the area being improved. This is probably a better rendering since it is more to scale and is in color.

We look forward to meeting with Development Services Team next Thursday on the 24th @ 10:30AM.

Thank you and have a good weekend!

[External]

Hi Joe –

I'm confirming receipt of your application by email following the call we had this morning to discuss your project.

Here's the link to request a meeting with the Development Services Team:
https://www.cityofranchocordova.org/businesses/business-resources/development-services-team/request-a-meeting.
The city will hold 30 minutes on February 24th at 10:30 a.m. for your now.

Please note the font on the application is small and you'll need to zoom in to review the text. 😊

Please do share supplemental information by email.

Thanks,
Randi Kay

Project Information

Project Name

Joy Of Others: Walk-Run

Project Synopsis

Be a part of our annual In the Joy Of Others Walk | Run! The participation by you and your family as walkers and fundraisers will provide critical support to BAPS Charities so that we may continue providing charitable and humanitarian services in your community and communities the world over.

Project Description

The walk is organized to celebrate the most fundamental element of any community – families – and inspires tens of thousands of people to carry forth the spirit of service. Along with our continuous activities and programs, BAPS Charities is proud to once again support Susan G. Komen® and their fight to address breast cancer from multiple fronts. 1 in 8 women will be diagnosed with the disease during their lifetime and will impact every family in one way or another.

Project Team

BAPS Charities Sacramento - Umesh Patel - Niraj Dhanani - Paragi Patel

Project Goals

The walk, like all BAPS Charities activities, is driven by the belief that In the Joy of Others, Lies Our Own. We serve and help our local communities where we live with Health Fairs, Blood Drives, Food Drives, Flu/Covid Shot Drives and Walkathons.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total project cost

Application #67

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR CORDOVA RECREATION & PARK DISTRICT (CRPD) PROPERTY/FACILITY USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a park or park facility, you must request the endorsement of the Cordova Recreation & Park District (CRPD).

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by a representative of CRPD for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. The CRPD representative reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

To be filled out by grant applicant

Project/Program Name: Joy of others walk-Run
Name of Organization: BAPS charities
Name of Applicant and Title: Viral Dhanani, outreach Volunteer
Applicant's Phone: 408-909-6331 **Applicant's Email:** dhananiral@gmail.com

Submit a copy of your application with this page to the Cordova Recreation & Park District. For your application packet to be considered complete the signed and dated endorsement form must be received by the City of Rancho Cordova by March 18, 2022. The CRPD representative will submit the form directly to the City's Community Enhancement & Investment Fund team. You must submit this form and a copy of your application to CRPD no later than March 4, 2022. Submit it via e-mail to Cristina James at cjames@crpd.com.

To be filled out by Cordova Recreation & Park District Representative

(Endorsement Given)

Endorsement Withheld

Conditional approval of facility rental only

General Manager's or Designee's Printed Name: CRISTINA JAMES
Date: 3/7/22
Comments (Optional):

The CRPD representative will send this form directly to CEIFGrants@cityofranchocordova.org no later than March 18, 2022. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

Project Information

Project Name

Blessings in a Backpack - Rancho Cordova

Project Synopsis

We provide weekend 50 for children in our local elementary schools, who have food shortage issues, on the weekends.

Project Description

Kids should worry about being a kid and not where their next meal will come from. Blessings in a Backpack (BIAB) began providing weekend food to 30 children in 2014, and we've grown to over 350 kids, currently. Our students all receive free breakfast and lunch, Monday through Friday, during the school year, but for too many kids that is their last meal until they come back to school on Monday. BIAB helps to fill that void with weekend meals geared for just that child. It's not feasible for us to feed the entire family, not just from a cost standpoint, but also the children aren't all capable of bringing a big bag of food home. Whether the child receive our prepackaged kits or our bulk food, it's completely manageable and easily fits in their backpack. We are currently sending weekend food home for 230 students from Williamson, Rancho Cordova, Cordova Villa, Cordova Gardens and Cordova Meadows Elementary Schools. We also send food for 20 students who attend Blanche Sprentz Elementary School, 60 students at Abraham Lincoln Elementary School in Lincoln Village, which is in the SCUSD and Pasadena Avenue Elementary School in the SJUSD.

Project Team

Janice and Rickey Davis

Project Goals

My short term goal is to get the 3 remaining elementary schools on board with our program. White Rock Elementary has been a part of our program for several years, and we were sad when they opted out this year. We would like to add 150 children to our program, bringing the total to 500. We will reach out to more schools in the Lincoln Village area if we don't hear back from the Rancho Cordova schools.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The

funds are intended for community enhancement & investment.

Total project cost

$49,050

Estimated breakdown of project expenditures

$1,800 Rent $47,250 Food costs

Matching Funds

n/a

Include any other funding contributions

$10,000 donation from Travelers

Ongoing operations and maintenance costs (if applicable)

n/a

Total Community Enhancement & Investment Funds requested

$25,000

Is this a multiyear request?

No

How many years have you received funding for this project?

3

When will your request for funding sunset for ongoing programs?

June 30, 2023

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

I write grants, we host a charity golf tournament, and we have companies that host food drives, which help to cut our food bill down.

Project Schedule, Timeliness and Adaptability

Project Schedule

Our program runs the entire school year.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

Our kids are out of school the end of May.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Yes, we can always go back to a drive-thru setup.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical address of project location

9249 Folsom Bl.

Application #68

Sacramento, CA 95827

Other physical addresses if project/program is at multiple sites

The above address is where our food locker is located. Although we send food for 8 schools, we do not go on any of their campuses. The schools come to our location every 2 weeks to pick up bulk food, or we ship prepackaged kits to each location.

Have you received a letter of support for the project/program from the property owner?

No

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site or a park/park facility?

No

Application #68

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR SCHOOL SITE USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a public K-12 school site, you must request the endorsement of the school superintendent of that school district.

One supplemental form is required per school district.

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by the corresponding school superintendent for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. Each participating school superintendent reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

School District: Elk Grove Unified Folsom Cordova Unified ■ Sacramento City Unified Other

Comments (Optional):

The school superintendent or designee will send this form directly to CEIFGrants@cityofranchocordova.org no later than March 18, 2022. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

Application #68

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR SCHOOL SITE USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a public K-12 school site, you must request the endorsement of the school superintendent of that school district.

One supplemental form is required per school district.

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by the corresponding school superintendent for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. Each participating school superintendent reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

Project Information

Project Name

Spay/Neuter/Vaccine Program

Project Synopsis

Provide free spay/neuter for cats, dogs and rabbits in Rancho Cordova.

Project Description

Enhance the Quality of Life in Rancho Cordova by offering and promoting spay/neuter services for canines and felines in our community and caring for Community (Homeless) Cats. Education and spay/neuter services are urgently needed to reduce pet overpopulation. Canines, specifically, have had very limited support. A small number of rabbit spay/neuters are covered also. Felines continue to be unaltered and abandoned by residents, especially in rental housing, which increases the need for immediate action.

Project Team

Sacramento SPCA Community Spay & Neuter Clinic Rancho Cordova Animal Services Whisker Warriors Animal Defense Fund dba Rancho Cordova Whisker Warriors

Project Goals

Fully support spay/neuter and vaccinations for Rancho Cordova Community Cats (Homeless/Strays). Fully support the Return to Field Program in Rancho Cordova. Fully support spay/neuter, vaccinations, microchips and flea prevention for resident dogs and cats. Support Homeless Individuals residing in Rancho Cordova with free spay/neuter/vaccines for their pets. Support spay/neuter for domesticated rabbits owned by residents and rabbits fostered for adoption. Support the costs of caring for Community Cat populations in Rancho Cordova. Support residents with dog and cat food for their pets on an emergency basis. Support Veterans in Mather Veterans Village with food and supplies for their companion animals.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Application #69

Total project cost

$63,020

Estimated breakdown of project expenditures

Spay/Neuter Voucher Program 31,010 Other Costs covered under Voucher Program 12,670 Co-pay of funds 3,670 Community Cat Care/Maintenance 7,140 Pet Food for Community Members 2,000 Outreach/Volunteer aid & recognition 2,600 Other costs covered by RCWW 2,600

Matching Funds

Matching Funds: $18,010 raised by Whisker Warriors through fund-raising and in-kind donations Costs covered by RC Whisker Warriors: • Co-pay of funds agreed to be covered in 2020: $3,670 • All Community Cat care $7,140 • Pet Food for Community members/feral feeders $7,000 ($5,000 covered by CoVID Grant) • Outreach & volunteer incentives $2,600 • Other costs include: Flea Treatments for resident animals (provided to residents with vouchers, to be applied by SPCA &CSN): $1,200 Shelters and feeding stations. Anticipated costs for materials $1,000 Humane Traps Purchase of additional traps for controlling cat population $400

Include any other funding contributions

Due to COVID related inefficiencies in the spay/neuter surgery process and illness of staff, we anticipate that at least $10,000 of the current fiscal year funding will be unused. We request that all unused funds be rolled over, reducing the amount of the current grant.

Ongoing operations and maintenance costs (if applicable)

none

Total Community Enhancement & Investment Funds requested

$43,000

Is this a multiyear request?

No

How many years have you received funding for this project?

7

When will your request for funding sunset for ongoing programs?

Other communities who have undertaken the challenge of animal overpopulation understood that fully meeting our goal of zero population growth will take years. Now that we have become more well known within the community, we anticipate the need for services will be similar for up to 4 more years. We have a particular challenge/opportunity with so much rental housing in our community. Covid has impacted our over-all plan. So many animals could not even get appointments for spay/neuter.

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

We have received a COVID Grant for $5,000 to help with pet food needs. We also received a $4,000 grant from the Glide Foundation which will be partially used for feral food. Holiday Lights generated $455.55 in donations from the community. Blaze Pizza held a one-day fundraising event for the Whisker Warriors which generated $319.00. We also received $5,000 in TOT Grant funds for spay/neuter for residents in the unincorporated Sacramento County region.

Project Schedule, Timeliness and Adaptability

Project Schedule

This project is ongoing. We receive calls for service every day.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

COVID has created inefficiencies that are hard to overcome. However, we are hopeful that both spay/neuter clinics can now proceed to serve more residents so we can meet our goals.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Our program already has virtual components. All vouchers are provided through email or text message. The clinics have drive-up operations for drop off and pick up of animals.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical address of project location

3368 CRISTOM DRIVE
Rancho Cordova, CA 95670

Other physical addresses if project/program is at multiple sites

We provide services for any residence or business located in Rancho Cordova.

Have you received a letter of support for the project/program from the property owner?

Yes (includes if you are the property owner)

Letter of Support from Property Owner (not K-12 schools or park/park facility)

approval to use home.jpg

Is your project/program intended to operate or take place at a public K-12 school site or a park/park facility?

No

Community Enhancement Grant Application_Y2022-23.docx

Public Record Unless otherwise exempt under applicable law, applications and application materials are public records. All information received from an applicant, whether received in connection with a grant application or in connection with any grant-funded activities performed are subject to disclosure pursuant to the California Public Records Act, unless otherwise exempt. Next Steps Applicants will receive acknowledgement once their application is received. When the application period closes, staff will review each application according to the application criteria and prioritization method listed within the Fiscal Year 2022/2023 Grant Application Process and Criteria document. Should staff have any questions or need clarification on your application, they will contact you. You are invited to attend any of the public City Council Meetings. It is anticipated at this time that the Community Enhancement & Investment Fund team will present information to the City Council starting in April and continuing through June. We may invite applicants to present their project and we may make selection recommendations to Council during the May City Council meetings. In addition, the Community Enhancement & Investment Fund team will send periodic updates to grant applicants via e-mail. It is possible that all funding decisions for the Fiscal Year 2022/2023 Community Enhancement & Investment Fund could be made in May and formally adopted by City Council by early June. Staff intends to notify all applicants of the funding decisions made by the end of June. If you have not signed up to receive automatic notifications when council meeting agendas are posted, you can do that by using the link below: https://www.cityofranchocordova.org/residents/what-s-happening/sign-up-for-e-news

Thank you,

Application #69

CITY OF RANCHO CORDOVA

FISCAL YEARS 2022-2023

COMMUNITY ENHANCEMENT FUND GRANT APPLICATION

Spay/Neuter/Vaccine Program

Project Description:

Enhance the Quality of Life in Rancho Cordova by offering and promoting spay/neuter services for canines and felines in our community and caring for Community (Homeless) Cats. Education and spay/neuter services are urgently needed to reduce pet overpopulation. Canines, specifically, have had very limited support. A small number of rabbit spay/neuters are covered also. Felines continue to be unaltered and abandoned by residents, especially in rental housing, which increases the need for immediate action by the Project Team below.

Project Team:
Sacramento SPCA
Community Spay & Neuter Clinic
Rancho Cordova Animal Services
Whisker Warriors Animal Defense Fund dba Rancho Cordova Whisker Warriors

Project Goals:
Fully support spay/neuter and vaccinations for Rancho Cordova Community Cats (Homeless/Strays).
Fully support the Return to Field Program in Rancho Cordova.
Fully support spay/neuter, vaccinations, microchips and flea prevention for resident dogs and cats.
Support Homeless Individuals residing in Rancho Cordova with free spay/neuter/vaccines for their pets.
Support spay/neuter for domesticated rabbits owned by residents and rabbits fostered for adoption.
Support the costs of caring for Community Cat populations in Rancho Cordova.
Support residents with dog and cat food for their pets on an emergency basis.
Support Veterans in Mather Veterans Village with food and supplies for their companion animals.

Funding Request:
Total Project Cost [see Attachment A for detailed analysis] for 2021-2022

Spay/Neuter Voucher Program	31,010
Other Costs covered under Voucher	12,670
Co-pay of funds	3,670
Community Cat Care/Maintenance	7,140
Pet Food for Community Members	2,000
Outreach/Volunteer aid & recognition	2,600
Other costs covered by RCWW	2,600
Matching Funds from RCWW	(18,010)
Total Request	**$43,000**

Matching Funds: **$18,010** raised by Whisker Warriors through fund-raising and in-kind donations

Costs covered by RC Whisker Warriors:

- Co-pay of funds agreed to be covered in 2020: **$3,670**
- All Community Cat care **$7,140**
- Pet Food for Community members/feral feeders **$7,000 ($5,000 covered by CoVID Grant)**
- Outreach & volunteer incentives **$2,600**
- **Other costs include:**
  Flea Treatments for resident animals (provided to residents with vouchers, to be applied by SPCA &CSN): **$1,200**
  Shelters and feeding stations**.** Anticipated costs for materials **$1,000**
  Humane Traps Purchase of additional traps for controlling cat population **$400**

Total contributions from RC Whisker Warriors: **$18,010**

Total Measure H funds requested: $43,000

CoVID impact to fund utilization in 2020-2021

The inability of the spay/neuter clinics to be efficient due to the safety protocols mandated by the pandemic created a huge backlog in requested spay/neuter surgeries. The wait for surgeries continue to be up to 5 months. CSNC has stopped taking canine appointments, since they are booked for 8 months. We anticipate $10,000 of our 2021-2022 grant funding will be unused. If that indeed occurs, we understand that this current grant will be reduced by any unspent funds.

Project Schedule:
Support for Community Cats will occur throughout the year, intensifying around the breeding seasons of Spring and Fall. Trapping will facilitate spay/neuter services to hold populations in check. The number of animals requiring spay/neuter this year will be greater due to a number of factors:

- The CoVID pandemic has reduced the capacity for spay/neuter surgeries in the region. Appointments are currently extended out 5 months as of March 2022. As restrictions are relaxed, the clinics can be more efficient.
- The Sacramento SPCA had a grant to fully fund 10 ferals per day, which is now expired as of March 2022.

The clinics performing low-cost spay/neuter in the Sacramento Region are at capacity. The Northern California Community Cat Alliance, of which we are an active member, is working on solutions to allow more Community Cats to be altered, thus reducing the over-population pressures in shelters. Costs for spay/neuter services at the clinics have increased, which requires more funding to support surgeries.

Whisker Warriors Animal Defense Fund
Non-profit organization, 501c3 status
Tax ID 82-4933796

P.O. Box 1415
Rancho Cordova, CA 95741
RCWhiskerWarriors@gmail.com

The SPCA has increased their prices for felines by $9 per surgery. We will be utilizing their program more going forward, since our volunteers are working on their own, we don't have a central leader. We are hoping the SPCA does start taking rabbits again.

The Sacramento SPCA has received grant funds to be able to alter feral cats at most Sunday clinics for no cost. But the number of spots are limited and the demand is high. Community Spay & Neuter Clinic performs free surgeries for Community Cats on a limited basis, as long as their grant funds hold out, but we don't anticipate we can rely on this funding in FY 2022-2023. The RC Whisker Warriors take advantage of this program and any other grant funding whenever possible, but the number of slots for feral cats (the free program) are now booked out for months in advance.

E-voucher numbers are provided by RC Whisker Warriors. RC Whisker Warriors are responsible for determining that the pet owner lives in our city, or the feral trapper is trapping within the city limits. Only 5 total vouchers are allowed per resident per year, 4 from the same species, unless the person is using TNR (Trap-Neuter-Return) on community cats. Animal Services passes out postcards with our contact information to obtain the free services.

A detailed billing will be provided by the Sacramento SPCA and Community Spay & Neuter Clinic to the RC Whisker Warriors monthly for approval, invoices will then be sent to the City of Rancho Cordova for payment.

5 year plan

Other communities who have undertaken the challenge of animal overpopulation understood that fully meeting our goal of zero population growth will take years. Now that we have become more well known within the community, we anticipate the need for services will be similar for up to 4 more years. We have a particular challenge/opportunity with so much rental housing in our community. CoVID has impacted our over-all plan. So many animals could not even get appointments for spay/neuter.

At the end of that period, we anticipate the need for Community Enhancement Funds to support this effort will be minimal. We believe that investing the funds now will pay dividends in the future. For instance, San Francisco had an aggressive program in place, and now they have NO kittens! If anyone wants to adopt one, they have to import them from other cities or rescue agencies.

We have found that residents who contact us have very limited funds. They love their pets and/or don't want the stray cats to starve. Many are receiving food from us to continue to support these stray cats.

Reports:
Use of Funds Reports will be provided to the City semi-annually by the 15th calendar day of the month for the previous 6 months of activity.

Program Outcome Reports will be provided semi-annually, by the 15th calendar day of the month for the previous 6 months of activity.

Teeth removal	$5 for baby teeth (each tooth)	Prior approval by WW required	Per tooth $10, other services case by case	Prior approval from WW required		$100
Total other costs covered by vouchers						**$12,670**

The proposed structure for the Voucher Program will be as follows:

1. Appointment, if needed, will be made by Whisker Warriors or resident directly
2. Voucher number provided to SPCA/CSNC upon arrival
3. SPCA/CSNC completes surgeries and may contact us if other services are needed that are not specifically included in voucher plan. CSNC can use the voucher for vaccines without Spay/Neuter surgeries at their Wellness clinics.
4. SPCA/CSNC compiles all data on spay/neuter surgeries or other services performed and submits detailed billing via email to Tera Kolvenbach by the 10th day of the month for duties performed the previous month. If submitting billing directly to the city, Tera must be copied.
5. Tera approves the billing and submit the bill to the City of Rancho Cordova for payment.

Locations for Spay/Neuter and vaccine Voucher Services:

Sacramento SPCA: 6201 Florin-Perkins Road, Sacramento, CA 95828
Community Spay & Neuter Clinic: 3839 Bradshaw Road, Sacramento, CA 95827

Vouchers
Paper Vouchers cannot be accepted by the SPCA/CSNC without being crimped.
Electronic vouchers for both free roaming (feral) and resident's animals – one per animal

Appointments
SPCA: One cat can be presented for Spay/neuter M-Sat without an appointment. More than one cat and all dogs require an appointment. Request an appointment online at https://www.sspca.org/clinics
CSNC: Contact (916)368-7314 for an appointment. Online appointment requests: https://communityspayneuter.com

Emergency Contacts
SPCA: Email Lydia Caronna-Craig, Spay Clinic Manager, Sacramento SPCA at lcaronna@sspca.org for emergency
CSNC: Marie Naumann (916) 368-7314

Forms to be provided to Residents
Electronic voucher number

Special accommodations
SPCA: One feral spay/neuter per day Monday – Saturday without an appointment

Transportation

Transportation reimbursement will be provided by RC Whisker Warriors when needed by residents, and to help volunteers with the costs of transporting Community Cats to spay/neuter clinics and back to their colonies. RC Whisker Warriors will not transport animals owned by residents.

Total	**$2,600**

Funds can be allocated to other elements of the grant if the allocation for one element is exceeded. except for funds allocated to Outreach/Volunteer Costs & Recognition, which cannot be exceeded.

Sustainability

The Rancho Cordova Whisker Warriors believes that the need for our services will continue at this high rate for several more years. We will actively seek more donations. However, we do not envision that the need for support will completely be eliminated.

The Whisker Warriors do provide services to the community above and beyond the services funded through the Community Enhancement Fund grant. Leveraging partnerships is key to fulfilling our mission.

Some of the areas in which we have used donations and partnerships to fulfill our mission:

- **Animal Education** is a priority. We provide education to families at the numerous events we attend each year in the city. We are still hoping to put together a plan to go into the schools and provide classroom education.

- **Trailer Parks & Apartments** We are concentrating efforts on partnering with the managers of these sites to control the population of animals in these locations.
- **Senior aid** We have been successful in engaging local businesses in our requests for donations for seniors. The end result is that we have been able to provide at-risk seniors with a stable source of cat and dog food through the Meals-On-Wheels program without the use of any grant funds. We also have been able to fully support dry cat food for an increasing number of homeless cat colonies in Rancho Cordova outside of the grant funds. We continue to seek opportunities to help seniors and other residents in need.
- **Veterans Village at Mather** We have had sufficient donations to provide pet beds, toys, treats and dog and cat food for the companion animals for all the Veterans at the Village. With all Phases now open (146 apartments), there are increased needs for both dog and cat food and supplies.
- **Adoptions** We are partnering with the SPCA to foster kittens and cats that we bring to the shelter, or animals surrendered to the shelter. NorCal Freedom for Paws now adopts out dogs through PetSmart and other venues. We are also partnering with the Sacramento SPCA, Fat Kitty City and Animal Outreach of the Mother Lode to foster kittens and cats for adoption through their programs.
- **Care for Community Cats** Humane trapping of new colony members and colony maintenance, including building of shelters and feeding stations, is provided by either Whisker Warriors or other trappers in the region. Animal Services Officers rely on us to help mitigate issues with stray or feral cats for residents. We also will partner with them on the return to field program with the SPCA. We partner with the Northern California Community Cat Alliance to provide services within Sacramento County. Volunteers with Sac Ferals and Cat Core Sacramento work with apartment managers, businesses and residents to provide solutions.

Thank you for caring for the animals of Rancho Cordova!

Project Information

Project Name

CHS Locker Room Facilities Update

Project Synopsis

Enhancing the Physical Education Locker Room at Cordova High School to improve the aesthetics, provide a safe environment, increase natural light and top notch facilities for our students and the community.

Project Description

The project would allow the maintenance department to complete the renovation of the boys and girls locker room at CHS. The funds would be used to purchase new lockers and windows in the exiting locker rooms. Funds would also be used to install the lockers and windows.

Project Team

The Team responsible for ensure this project is completed will include Jim Bonovich, Director of Maintenance, Matt Washburn, Chief Operation Officer, Peter Maroon, Director of Athletics and Jerad Hyden, Principal.

Project Goals

Our goal is to provide our students at CHS with safe locker room environment, that is aesthetically pleasing, with natural sunlight and new lockers.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total project cost

$380,000

Estimated breakdown of project expenditures

Funds will be used to: 1. Lockers and accessories - $269,000 2. Locker Installation - $53,000 3. Retrofit Windows Install - $36,000 4. Windows Delivered - $22,000

Matching Funds

FCUSD has provided $745,000 for the completion of this project. The scope of the work included asbestos abatement, electrical, drywall, wall finishes, ceiling finishes and lights, epoxy flooring, HVAC upgrade, HVAC ducted system replacement, and painting. Labor cost has also been incurred by FCUSD.

Include any other funding contributions

N/A

Ongoing operations and maintenance costs (if applicable)

N/A

Total Community Enhancement & Investment Funds requested

$380,000

Is this a multiyear request?

No

How many years have you received funding for this project?

0

When will your request for funding sunset for ongoing programs?

This project will sunset on July 2023.

Do you plan to ask annually for funding?

No

What other funding will you seek to support your project?

None.

Project Schedule, Timeliness and Adaptability

Project Schedule

This project work is to be completed in the summer of 2022.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

The majority of the work has been started, the last phase of this project work will be done this upcoming summer. Ordering lockers and windows can be done as soon as the grant is approved to expedite the process.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Project can be adjusted as needed to ensure funds are used for purchase of equipment or services.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical address of project location

Cordova High School 2239 Chase Dr.
Rancho Cordova, California 95670

Other physical addresses if project/program is at multiple sites

Have you received a letter of support for the project/program from the property owner?

Yes (includes if you are the property owner)

Application #70

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site or a park/park facility?

Yes, at a public K-12 school site

Which school district is the public K-12 school site located in?

Folsom Cordova Unified

Public Record Unless otherwise exempt under applicable law, applications and application materials are public records. All information received from an applicant, whether received in connection with a grant application or in connection with any grant-funded activities performed are subject to disclosure pursuant to the California Public Records Act, unless otherwise exempt. Next Steps Applicants will receive acknowledgement once their application is received. When the application period closes, staff will review each application according to the

application criteria and prioritization method listed within the Fiscal Year 2022/2023 Grant Application Process and Criteria document. Should staff have any questions or need clarification on your application, they will contact you. You are invited to attend any of the public City Council Meetings. It is anticipated at this time that the Community Enhancement & Investment Fund team will present information to the City Council starting in April and continuing through June. We may invite applicants to present their project and we may make selection recommendations to Council during the May City Council meetings. In addition, the Community Enhancement & Investment Fund team will send periodic updates to grant applicants via e-mail. It is possible that all funding decisions for the Fiscal Year 2022/2023 Community Enhancement & Investment Fund could be made in May and formally adopted by City Council by early June. Staff intends to notify all applicants of the funding decisions made by the end of June. If you have not signed up to receive automatic notifications when council meeting agendas are posted, you can do that by using the link below:

Application #70

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR SCHOOL SITE USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a public K-12 school site, you must request the endorsement of the school superintendent of that school district.

One supplemental form is required per school district.

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by the corresponding school superintendent for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. Each participating school superintendent reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

To be filled out by grant applicant

Project/Program Name: CHS Locker Room Facilities Update

Name of Organization: FCUSD Athletic Deparment

Name of Applicant and Title: Peter Maroon, Director of Athletics

Applicant's Phone: 916-294-9388 **Applicant's Email:** pmaroon@fcusd.org

Submit a copy of your application with this page to the school superintendent(s). For your application packet to be considered complete the signed and dated endorsement form must be received by the City of Rancho Cordova by March 18, 2022. The superintendent will submit the form directly to the City's Community Enhancement & Investment Fund team. You must submit this form and a copy of your application to the appropriate superintendent or his or her designee no later than March 4, 2022. For Elk Grove Unified School District use BGrewal@egusd.net. For Folsom Cordova Unified School District use agriffin@fcusd.org. For Sacramento City Unified School District use dianne-brown@scusd.edu.

To be filled out by School Superintendent or designee

Endorsement Given Yes

Endorsement Withheld

Conditional approval of facility rental only

Superintendent's or Designee's Printed Name: Dr. Sarah Koligian

Date: 3/17/22

School District: Elk Grove Unified Folsom Cordova Unified ■ Sacramento City Unified Other

Comments (Optional):

The school superintendent or designee will send this form directly to CEIFGrants@cityofranchocordova.org no later than March 18, 2022. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

Project Information

Project Name

SafeStation®

Project Synopsis

SafeStation is an identification, detection and mitigation system that gives facilities owners and the public confidence to responsibly gather and enjoy sporting events, performing arts, shopping, traveling, or just going back to work - in person, again... finally. SafeStation® is the only system that provides a multi step processing sequence to reduce the risk of infectious diseases entering your facility and carriers unknowingly spreading disease to other guests and your valuable employees. https://www.safestation365.com/

Project Description

SafeStation® combines several proven and long standing technologies into one integrated packaged solution that allows efficient processing and screening of large quantities of entrants into a venue. SafeStation® detection technology includes not only standard metal detection but also the latest in thermal imaging to measure human body temperature in a safe, quick and non-contact process that allows near instant detection of persons having a fever (suggesting infection of a communicable disease). Further, SafeStation® takes the next step by employing spread mitigation technologies that are safe to humans but deadly to viruses and bacteria. SafeStation® does NOT and CANNOT claim to "sanitize" or "purify" humans and their clothing and belongings, but uses far-UVC 222 nm lightwash wavelength doses (again, in low exposure, human safe quantities) to neutralize as many pathogens as possible residing on a person and their belongings. In some platforms O3 infused HEPA filtered air is also used as an additional option. Where inanimate objects may be processed separate from guests, an even higher and more effective far-UVC 222 nm dose is used in that product configuration. The result is a guest or tens of thousands of guests who are screened for possession of weapons and for elevated body temperature suggesting infection of contagious disease PRIOR to entering your building or venue. Further, you will have a best practice and best in class process of using efficient, non-invasive, passive elements to reduce the possibility of these guests carrying disease into your venue ON them, not just IN them.

Project Team

Eric Bland, George Pappas, Tim Casey, Jason Stapleton

Project Goals

The SafeStation launch team endeavors to complete phase one of prototyping three product type deployments in Q2, 2022 including a gateframe unit for more fixed installations, a portable unit geared towards EMS applications and also a ceiling mounted fan unit for space sanitization. Goal is to place units in qualified venues for data and voice of customer gathering to refine the designs for commercial use and sale by Q4, 2022. The SafeStation team, based in Rancho Cordova, would like to place units for use and to the benefit of Rancho Cordova venue(s) and public services for this data and VOC feedback phase, and also promote SafeStation as an incubator and startup company that chose to base itself in and build a business and create jobs in Rancho Cordova going forward. SafeStation intends to be a fully functioning LLC with goals of profitably supplying solutions across the United States Q1 2023 and beyond.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total project cost

$32,800 to complete Phase 1 prototyping round as described.

Estimated breakdown of project expenditures

Materials and components: $9500 Agency approvals: $7500 Engineering & Development Costs: $6500 Freight in for materials & components: $4800 Field installation / commissioning costs: $2500 Build labor and testing costs: $2000

Matching Funds

N/A

Include any other funding contributions

Current members have contributed sweat equity as well as monetary contributions to secure Trademark, initial prototype components, travels and attendance at a trade show and some marketing materials (literature, website, brand materials).

Ongoing operations and maintenance costs (if applicable)

This will depend upon the scalability of the operation beginning in 2023. However, the SafeStation team currently has a warehouse and R&D space as part of another related company in Rancho Cordova that is prepped to also serve as the SafeStation HQ and warehouse. This space will be subleased from the other company (already agreed) and annual fixed costs/O/H (not COGS) of the self sustaining business in 2023 are initially projected at $275,000 annually.

Total Community Enhancement & Investment Funds requested

$32,800

Is this a multiyear request?

No

How many years have you received funding for this project?

0

When will your request for funding sunset for ongoing programs?

June 30, 2023

Do you plan to ask annually for funding?

No

What other funding will you seek to support your project?

We are seeking to secure some additional investment funds from an industry partner and contract manufacturer as part of a manufacturing partnership agreement on an ongoing basis. This is pending.

Project Schedule, Timeliness and Adaptability

Project Schedule

Project has already begun at Phase 0, with 2 initial prototype units in existence, one in the field. Phase 1 prototyping requires additional funding and is scheduled for Q2/Q3 2022. Phase 1 prototype schedule is July/August 2022 for completion and data collection. Production readiness is scheduled for December, 2022 with full launch Q1 2023. Continuous improvement will always occur to refine and update the products, but Phase 1 prototype completion is targeted for October, 2022.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

Initial proof of concept work has already completed and supply chain has been 75% established already. Correct human resources already in place with executive leadership, engineering, production and sales personnel already engaged. This phase of the project (what is being described in this application) is targeted to complete in the next 6 months, not next 15 months.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

This project could adjust according to health orders. SafeStation was "born" during the 2020 stay at home orders and significant marketing, sales and engineering headway was achieved and the brand and product plans were developed. Product is and could be built and tested outside of California and Sacramento County and no on site personnel in CA or Sacramento County are technically required at this phase of SafeStation development.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical address of project location

3127 Fite Circle
Suite D
Sacramento, California 95827

Other physical addresses if project/program is at multiple sites

SafeStation is looking to place products (as explained) at location(s) in Sacramento County and specifically Rancho Cordova but these locations have not yet been deiced or negotiated as of March 11, 2022 (COULD be a school site or park facility BUT this is not yet known). SafeStation is currently located in a Rancho Cordova building with one prototype unit installed for testing and proof of concept review. Thus, per the question below, no "letter of support" is yet available at this time.

Have you received a letter of support for the project/program from the property owner?

No

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site or a park/park facility?

No

Project Information

Project Name

Home and Neighborhood Improvement Campaign

Project Synopsis

This project will enhance the residents' quality of life, community pride, and engagement. It will result in improvements at 30 homes owned by residents with low-income, older adults, those with disabilities, or families with children. 13-15 homes will receive critical, health, safety, efficiency, and beautification upgrades. The remaining homes will receive minor safety modifications.

Project Description

This project will support Rebuilding Together's commitment to improving homes and neighborhoods in the City. The two year home improvement campaign will enhance the residents' quality of life, community pride, and engagement. This project is also aligned with the Housing Element's goal to encourage the improvement, rehabilitation, and revitalization/reinvestment of the City's existing residential neighborhoods. This is a two-year request to improve 30 homes each year. Both years, 13-15 homes will receive extensive health, safety, efficiency, and beautification upgrades and 10-12 will receive minor safety modifications. The work will vary per home but will include upgrades such as landscaping, fencing, roofs, accessibility modifications, HVAC, electrical, plumbing, carpentry, and energy efficiency. The work will occur throughout the year by volunteer groups, contractors, students, Americorps members, etc. The selection process includes community outreach, an application process, and a home preview using a safe and healthy homes assessment. The assessment is focused on identifying deficiencies in the homes related to the principles of keeping the home safe, dry, ventilated, pest-free, accessible, energy-efficient, and maintained. We also identify exterior improvements to enhance the look of the home and neighborhood. The homeowner is also interviewed to identify any other issues such as food insecurity. Community and City resource information is shared with those in need of additional assistance. Tackling substandard housing in neighborhoods cannot be accomplished by one organization in isolation no matter the quality of services and resources invested. We leverage the strengths of volunteers and partners including nonprofit and faith-based organizations, local businesses, financial institutions, occupational therapists, and other service providers to accomplish the project goals.

Project Team

Rebuilding Together has improved over 8,000 homes and 98 nonprofit facilities, and hosted home improvement events for 30 years in the Sacramento area. In 2014, we developed a strong relationship with the City that has resulted in hundreds of homes improved

through our various programs since 2014. The staff is experienced at working with volunteers, contractors, and partners to improve homes and neighborhoods. In 2022, the occupants in 10 of the Rancho Cordova homes benefited from a partnership with Occupational Therapy graduate students. They met with the homeowners, performed home safety assessments, and provided support and education about safe living. Their findings were incorporated into the home's scope of work. Additional Volunteers and Partners may include, but are not limited to: ● Trained "House Captains" and "Volunteer Coordinators" oversee the work on some of the homes. ● Typically, 25-50 volunteers per home ● Workforce development programs, businesses, faith organizations, schools, service clubs ● SMUD: Weatherization audits, energy saving measures ● Sacramento Tree Foundation ● Republic Services ● Real Estate Associations ● Agency on Aging and other sponsors: Funding for accessibility modifications Staff involved in the project to varying degrees include: Executive Director: Grant management, planning, and staff supervision. Rebuild Event Program Manager and Assistant: Coordinate the outreach, home previews and selection, work scope planning, supply management, resource development, labor recruitment and training, logistics, partnership development, reporting, evaluation, and homeowner relations. The team works closely with the City staff to coordinate outreach and services. Safe at Home Manager and Assistant: Provide home safety services at the homes. Resource Development and Marketing Manager: Coordinates community outreach Financial Administrator: Financial tracking and invoicing. Contractors: Provide skilled labor as needed.

Project Goals

The ultimate project goal is to decrease the number of individuals living in substandard housing and improve the housing stock in the City of Rancho Cordova. Specifically, we will achieve the following goals: 1) Quality of Life: Improve the health, safety, efficiency, and curb appeal at 13-15 homes. The homes are selected using a Safe and Healthy Homes assessment tool. The goal is to address 80% of the deficiencies identified. Provide the participants with information about other community resources and additional assessments and support provided by Occupational Therapy graduate students. 2) Safety: Increase the residents' safety and independence by 50% in an additional 15-17 homes by providing safety items such as shower and bath grab bars, stair handrails, shower stools, toilet risers, etc. 3) Community Engagement and Civic Pride: Provide opportunities for the homeowners to meet other residents and learn about City services. Provide opportunities for residents to volunteer to improve the community. Coordinate services with other City services as needed. 4) Workforce Development: Provide training opportunities for young adults and underserved individuals in training programs at a minimum of 5 homes.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total project cost

$180,000 x 2 years =$360,000

Estimated breakdown of project expenditures

$80,000 x 2 years = $160,000 - Project Management which includes personnel, insurance, mileage, rent, etc. $100,000 x 2 years = $200,000 - Home-related expenses such as supplies, contractors, equipment, permits, volunteer support, etc.

Matching Funds

$70,000 x 2 years = $140,000 (8 hours x 250 volunteers x $35)

Include any other funding contributions

$50,000 x 2 years = $100,000

Ongoing operations and maintenance costs (if applicable)

N/A

Total Community Enhancement & Investment Funds requested

$150,000 x 2 years = $300,000

Is this a multiyear request?

Yes

Number of years

2

If you answered yes above, describe your sustainability plan and whether the project is viable as a single year request.

We are requesting the grant for a two-year period of time to maximize the use of the funds and achieve the best results. It typically takes up to 3-5 months to ramp up before repairs can occur. By moving to a two-year project the startup time is eliminated the second year. We can select all the homes earlier to avoid starting over the next year. It allows for more time building relationships with the homeowners and partners, raising funds and recruiting volunteers. This approach is more attractive to funders because of the wider spread impact. We are confident in the ability to secure financial, human and in-kind resources due to 30 years of experience. The project is valid if it is only funded for one year.

How many years have you received funding for this project?

7

When will your request for funding sunset for ongoing programs?

We will continue to need City funding to provide the same type of project in the future. We will continue to seek and leverage outside services and support to increase the impact on each home.

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

Yes, our Board of Directors and staff is committed to working in communities, such as Rancho Cordova, where there is an interest in neighborhood improvement and the residents' well-being. Our close working relationship with Rancho Cordova staff has resulted in a positive experience for all and tremendous results. We plan to continue asking for funding as the need is growing, particularly among the low-income, older adult population who have limited housing options. We seek sponsorships from organizations such as businesses, service clubs, faith-based groups to support the project. We layer additional funds to provide additional critical repairs such as roofs as needed.

Project Schedule, Timeliness and Adaptability

Project Schedule

If we are awarded funding for two years, the project will occur between August 2022 and June 2024.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

Year One Community outreach: August - November Outreach includes mailings, coordination with City staff, Code Enforcement, communication with local organizations, etc. We also consider homes that have participated in our other home improvement services in the City. Application processing and home previews: October - December 10 If appropriate applications are received, some homes will be selected in the Fall so work can begin earlier than January. The homes that receive minor home safety work only will occur beginning in August. Scope of work development: A plan is created for each home based on need, labor, and budget. Some of the homes are selected for one-day projects and others with heavier scopes will occur over time, but be completed prior to June 30 . Workdays: Volunteer workdays will be scheduled throughout the year depending on volunteer availability and the scope of work. Skilled contractors will be scheduled as needed. Year Two: Outreach and home previews will occur during the first year to ensure that an adequate number of homes are selected for the next year. The timeline in Year One will be repeated during Year Two, although work will begin in the Fall on those homes selected the prior year.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Yes, we modified our model the past two years resulting in 100% CEIF grant compliance. We have integrated some of the adjustments and lessons learned into our current model which is flexible in case the orders change again.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical address of project location

The opportunity is available to any homeowner in Rancho Cordova.

Application #72

Rancho Cordova, CA 95670

Other physical addresses if project/program is at multiple sites

The opportunity is available to any homeowner in Rancho Cordova. Physical address of project location Street: TBD Unit Number: n/a City: Rancho Cordova State: CA Zip: Rancho Cordova

Have you received a letter of support for the project/program from the property owner?

No

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site or a park/park facility?

No

Public Record Unless otherwise exempt under applicable law, applications and application materials are public records. All information received from an applicant, whether received in connection with a grant application or in connection with any grant-funded activities performed are subject to disclosure pursuant to the California Public Records Act, unless otherwise exempt. Next Steps Applicants will receive acknowledgement once their application is received. When the application period closes, staff will review each application according to the application criteria and prioritization method listed within the Fiscal Year 2022/2023 Grant Application Process and Criteria document. Should staff have any questions or need clarification on your application, they will contact you. You are invited to attend any of the public City Council Meetings. It is anticipated at this time that the Community Enhancement & Investment Fund team will present information to the City Council starting in April and continuing through June. We may invite applicants to present their project and we may make selection recommendations to Council during the May City Council meetings. In addition, the Community Enhancement & Investment Fund team will send periodic updates to grant applicants via e-mail. It is possible that all funding decisions for the Fiscal Year 2022/2023 Community Enhancement & Investment Fund could be made in May and formally adopted by City Council by early June. Staff intends to notify all applicants of the funding decisions made by the end of June. If you have not signed up to receive automatic notifications when council meeting agendas are posted, you can do that by using the link below: https://www.cityofranchocordova.org/residents/what-s-happening/sign-up-for-e-news

Thank you,
City of Rancho Cordova

Application #72

ATTACHMENT: Rebuilding Together

He took his first shower in five years thanks to the work of Rebuilding Together and the City of Rancho Cordova.

There are too many examples of work supported by the City of Rancho Cordova to include. This is one example of the impact as expressed by the homeowner.

The improvements included landscaping, exterior paint, fence repair, wheelchair ramp, hoist for her husband to get into the shower and into bed, and a water heater. Prior to the work, she gave him sponge baths. After the work was completed, he was able to get into the shower for the first time in 5 years.

The work was performed by volunteers, contractors, and staff. Additional resources were leveraged to complete the work.

Impact: Beautification, accessibility, safety, security, and hot water.

LETTER FROM A HOMEOWNER

My husband and I are just one of the families that Rebuilding Together has done so much for this year. I am writing because I wanted to let you know how great this program and all of the people who work for it are. I cannot tell you how much we appreciate all that was done with the funding the City of Rancho Cordova provided.

My husband had a stroke 5 years ago and I retired from my job to stay home to take care of him. He had a caregiver for 1 year while I continued to work but I probably don't have to tell you how expensive that is.

Since we had to live on our combined social security paychecks there was no way we could even keep up with all of the maintenance an older home requires. If it was not for Rebuilding Together and the City of Rancho Cordova I don't know what may have happened.

All of the people who have worked on it have been so kind and cheerful and never made us feel like we were just a couple of old people who couldn't do anything for ourselves.

Thank you and thank the City for making this possible. We need programs and people like this now more than ever.

Project Information

Project Name

Locomotive Storage Building

Project Synopsis

Sacramento Valley Live Steamers Railroad Museum, in collaboration with the City of Rancho Cordova and the Cordova Recreation and Park District, intends to invest in the community through the construction of a locomotive storage building adjacent to the Hagan Community Barn for the secure keeping of the museum's locomotives.

Project Description

After 45-years of existence in Rancho Cordova, parents and grandparents bring their families to ride on the same train they have fond memories of enjoying as a child. That is something community members can be proud of, as the Sacramento Valley Live Steamers Railroad Museum certainly improves the quality of life for the residents of the city. To keep the trains moving down the track, the locomotives need a house for protection and shelter between run days. The museum has outgrown the capacity of existing storage facilities. In addition to the security the building will bring, the structure will also serve as an educational aid demonstrating to children and visitors what was once a common sight in towns throughout our nation, the locomotive house. The locomotive storage building is designed to be reminiscent of a locomotive house that might have been seen on one of California's many shortline railroads. Such a building existed at the terminus of the (formerly) Southern Pacific line that traverses Rancho Cordova up to Folsom and then to Placerville. This structure has been designed to meet the current need for locomotive storage and the foreseen needs of the museum's future in Rancho Cordova.

Project Team

President Andy Berchelli – experienced project manager. Has overseen several key projects including the replacement of the museum's tractor three years ago, rebuilding of a major bridge on the railroad, and overseeing a previous grant that funded over $100,000 to build an irrigation system for the museum grounds. Vice-president Dennis Gramith – experienced leader. Dennis is a retired fire chief with Sacramento Metropolitan Fire District. As a museum volunteer for over forty years, Dennis has many longstanding relationships with key personnel at the park administrator's office and at city hall. Volunteer Philip Huntingdale- a structural engineer along with the collaboration of Clausen Engineers, Emeryville, California. Both engineers have vast experience in the design, construction management, and supervision of overall commercial building projects.

Application #73

Project Goals

Goal: Construct Locomotive Storage Building complete and ready for occupancy. Metrics: 1. Secure Measure H Funding 2. Enter into a contract with General Contractor (Contractor). The contractor secures permits. 3. Site work completed for construction. Concrete completed. 4. Building closed in and secured. 5. Rail, racking, and transfer table completed final inspection. 6. Contractors obtain Certificate of Occupancy.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Project Schedule, Timeliness and Adaptability

Project Schedule

June, 2022 - Measure H grant awarded to SVLSRM. July, 2022 - Rancho Cordova Recreation and Park District (RCRPD) advertise for Request For Proposal (RFP) to general contractors. General contractors present bids to the Park District for evaluation. Include allowing the SVLSRM to help analyze the proposals. August, 2022 - With construction contract secured. Contractor shall assign Project Manager and obtain grading permit. Contractor shall publish and submit first and subsequent progress report, and submit to Measure H facilitators. Sep, 2022 - Site work underway, included the trees removed, track removed, fence/gate installed, and erosion control and refuge measures installed. Initial site work shall be completed. October, 2022 - Pull Building Permits. Groundbreaking

ceremony at the Fall Meet with RCRPD and Rancho Cordova leadership invited to attend. November, 2022 - Ground work completed. Concrete foundations poured and complete. December, 2022 - Masonry walls erected and complete. This includes installing steel door frames within embedded masonry walls. January, 2023 - Roof framing and decking installed, water tight, and complete. Metal doors shall be installed and all locking hardware complete. Building shall be secure. February, 2023 - Electrical work completed. Floor finish shall be installed. Locomotive storage racking shall be underway. March, 2023 - Transfer table and racking shall be completed. Paint the exterior of the building. Finish site work, including rock cover and finish erosion control in place. April, 2023 - Contractor shall conduct a final walkthrough. Contractor shall file Notice of Completion and obtain Certificate of Occupancy. May, 2023 - On May 21, 2023 the building will be finished and a ceremony dedicating the Locomotive Storage Building to the community of Rancho Cordova with a final report to Measure H.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

Oversight and accountability of this project will be fulfilled under the direction of Andy Berchielli and Dennis Gramith. Both these individuals have a longstanding history with the City of Rancho Cordova and the Cordova Recreation and Park District. They have an outstanding reputation and a track record demonstrating the ability to see such a project through to completion within the time allotted by this grant.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Yes, we will be able to make the adjustments necessary. This project is outside thus construction workers can be socially distanced and will comply with all local, state, and federal health mandates.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

2197 Chase Drive
Rancho Cordova, CA 95670

Other Physical Addresses (if project/program is at multiple sites)

N/A

Have you received a letter of support for the project/program from the property owner?

Requested, and will submit to city by March 18, 2022

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

Yes, at a park/park facility

March 14, 2022

Measure H Committee,

The Sacramento Valley Live Steamers Railroad Museum (SVLSRM) is applying for a measure H Grant to construct a Locomotive Storage building at our Hagan Park location that houses our organization.

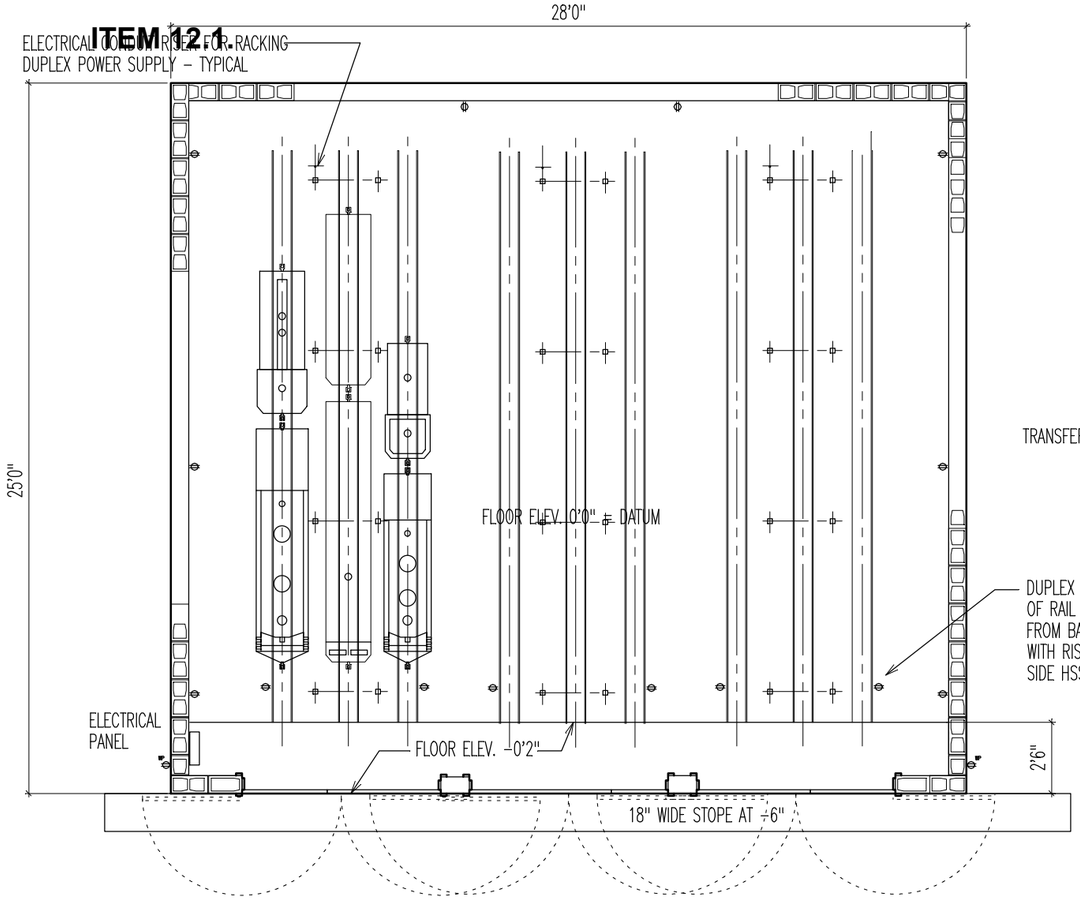
The SVLSRM has been a member of the community for over forty years. The membership includes members in the city of Rancho Cordova, and surrounding areas in California. The railroad consists of over a mile of mainline track used to provide an educational experience to members of the community. SVLSRM provides public rides on the first weekend of each month beginning in March, as well as the annual Fourth of July in the park, our Pumpkin Patch event in October and Santa Train the first two weekends of December. We also provide rides on our portable track at the Rancho Cordova Christmas Tree Lighting. We served over 10,000 riders in 2021.

The SVLSRM is constantly rejuvenating the railroad and adding features for the public enjoyment. In the last few years an elevated G scale railroad (garden railroad) has added to the enjoyment of the family members and community children. Our organization, 222 members are growing and many are at the park providing a clean area and maintaining our approximately 8 acres. In 2021 the members have contributed 4,592 hours in volunteer time to maintain the park, track, storage facilities, and restrooms for the public enjoyment of public runs and birthday parties.

During the last few years the existing facility has out grown the storage space available for locomotives and public riding cars. The pandemic created a need for more ride cars and gondolas that were used to maintain social distancing of the family riders when we were able to operate. We took pride in providing rides later in 2020 and early 2021 with separating the passenger cars. The public welcomed the SVLSRM opportunity to ride the trains during those trying times.

The Board has determined the need for additional storage and is submitting this request for funding to solve the needs of the organization and its equipment.

Please consider the SVLSRM for your March 2022 Measure H Grant. The goal is to be able to continue and expand the services expected by the public.



This budget was prepared by Philip Huntingdale, a Structural Engineer along with the collaboration of Clausen Engineers, Emeryville, California. Both engineers have vast experience in the design, construction management and supervision of overall commercial building projects. The budget has assumed prevailing wages and has tried to evaluate where construction costs are at present time. The cost of materials and labor are currently evolving upward rapidly and it is hard to get a firm cost for some parts of the project. SVLSRM will have final approval of any changes and all construction plans.

The Board is very appreciative of the support we have received over the years from the City of Rancho Cordova and Rancho Cordova Recreation and Parks. We would like your consideration of SVLSRM request for Measure H funding.

Please let us know if anything further is needed.

SVLSRM Locomotive Storage Building
PROJECT SPECIFICATIONS

March 9, 2022

A. Project Outline -

The SVLSRM wishes to construct Locomotive Storage building for storage of SVLSRM equipment and members equipment.

The storage building will be accessed from existing steaming bay number 5. The building will have a transfer table located at the north-west end of the bay, planned to be 16 feet long, and slide laterally about 36 feet. The building will be located at the north-west end of the transfer table. Generally the building is 25 feet by 28 feet, about 10 feet of height. The floor and foundation is concrete, walls are concrete block, and roof is metal decking. The building will have three 7 feet wide by 7 feet high metal double hinged doors. Each door will access three storage double stacked tracks, randomly spaced to suit various sized locomotives.

The transfer table includes an undercarriage for the lateral movement, and a table panel will provide vertical movement. The steaming bay is about 24 inches above grade, storage building floor slab about 14 inches above grade, and second level storage about 40 inches above the floor slab elevation. The vertical lift for the table panel will be about 48 inches, by electric activated scissor lift.

The SVLSRM wishes to obtain a Turn Key proposal for the Project.

B. Project Scope -

Turn Key construction is such that a general contractor will be responsible for the complete project. That is to say the coordination of the project is their responsibility. The General Contractor would be responsible for building documents procured, any site surveying, permits, construction of all phases of the building and transfer table, coordinate all required services, and obtain the Notice of Completion, Release of Leans, and Certificate of Occupancy. Money distribution and approvals of such are generally coordinated thru the owner and SVLSRM coordinators by way of the source of the financing. All work shall be as stated in this document and consistent with commercial building standards of the industry. SVLSRM shall have final approval of construction documents (plans and specifications) and any changes or change orders.

Application #73

C. Specifications -

1. The Contractor shall be responsible for providing the design for the project. The project shall be designed by registered Structural Engineer in the State of California (Project Engineer). Design shall comply with the applicable building codes in order to obtain City of Rancho Cordova Building Permit and any other government permits for specialty work included.

2. The Contractor shall pay all taxes and licenses required. Contractor shall be fully insured including commercial general liability, property loss coverage for the improvements until building is turned over to Owner, with SVLSRM named as an additional insured. Contractor shall provide a project manager to serve as liaison between owner and SVLSRM. Contractor shall have weekly job site meetings, include Owner and SVLSRM project coordinators. Contractor shall coordinate all inspections including " special inspections" required by the Building Code. Work shall occur during normal business hours of 7:00 AM and 5:00 PM., or as otherwise required by the Rancho Cordova Park Department. SVLSRM has a few events during the year that will need some coordination between the contractor and SVLSRM. Employees of all contractors and sub contractors shall be appropriately dressed for being within the park. No alcohol or illegal drugs shall be permitted within the park. Equipment shall not be maintained within the park. The contractor shall keep premises clean, and remove all debris generated by this Project. The Contractor shall maintain sanitary conveniences for all workers for the duration of the Project.

   SVLSRM project coordinator shall be furnished all design, drawings, submittals, shop drawings, and any correspondence related to the project on a timely basis during the term of the project.

2. Site preparation shall included clearing Project site of all vegetation, trees, and root structure in order to construct the Project.

3. Building site will require some engineered fill and site grading. The work shall be directed by a Geotechnical Engineer as may be required by the design and site conditions. Building pad shall have base rock, vapor barrier, and sand placed below the floor slab as specified by the Engineer. Provide drain swale around project.

4. The foundation and floor slab shall be placed with reinforcing as required by the Engineer. The floor slab shall have control joints placed at 8 feet centers. The slab shall have #4 reinforcing bars spaced at 12" minimum centers each way, and placed at mid depth of slab on "adobies" appropriate for application. Floor shall slope 1" per 10 feet from the rear wall to the front doors. Slabs shall have a grade control of 1/8" in 10 feet. Concrete shall have a minimum strength of 3,000 PSI at 28 days. Provide add mixtures to reduce any need to add water to the mix after batching. Floor finish shall be steel trowel. Floor shall have curing compound applied following steel troweling. The control joints shall be saw cut following finish trolling and as soon a possible after set up. Joints shall be filled with joint sealer - Metzer McGuire MM80 for smooth and level with the adjacent concrete finish at least two months after placing concrete. The floor slab shall have a non-skid, gray epoxy floor coating system applied after complete curing of the concrete.

5. Concrete block walls shall have 8" x 16" x 8" block, standard gray. Provide 8" x 16" x 8" opening in block, located about 8" above the floor, and spaced at about 8 feet centers along the side walls for vents. Walls shall be reinforced as required by the Engineer. Walls shall be fully grouted. Steel door frames shall be fully grouted into place as part of the wall assembly.

6. Doors shall be 16 gage galvanized steel, solid core, with 14 gage welded, galvanized steel, masonry frames per SDI Guidelines SDI-100. Door hardware shall be a follows:
    a. Door hinges - 4 per leaf, 4 ½ 4 ½ Hager BB1199 Stainless Steel, NRP hinges.
    b. Door lockset on operable leaf - Best Lock co., Series 9, Storeroom (D) - Outside always locked, open with key and rotating lever; Inside always unlock, open by rotating lever. Keying with interchangeable core, 3 3/4" backset. Rose Style C- 3" convex, 26D satin chromium. Keying shall be with removable cores, construction during before turning over the SVLSRM, and finish as directed by SVLSRM. Assume that each door will have separate keys, and master key. Provide 15 keys of each configuration.
    c. Door dead bolt - best Lock Co., T Series Tubular Deadbolts, K-Turnknob - Operates by turning the key in the outside cylinder and turning the inside turn lever. Keying to match lockset.
    d. Door guard - granger, Rockwood Door Latch Guard: 11 in Lg, 3 3/32 in Wd, Satin Stainless Steel.
    e. Door cane bolt top and bottom of fixed leaf - Medium Duty Cane Bolt, 12", stainless steel.
    f. Door Hold - one each leaf - Magnetic Door Holder Solid Brass.
    g. Door to drip flashing - Pemko 346C Clear Anodized Aluminum Rain Drip Cap.

7. Roof structure shall be structural steel as designed by the Engineer. Metal decking shall be 16 ga. Minimum in configuration as specified by the Engineer. Self drilling, self sealing fasteners shall be used. Decking shall be underlaid with vinyl faced insulation, R-30 minimum, secured appropriately to prevent sagging.

8. Provide seamless aluminum gutters and down spouts to grade.

9. Roof vent and wall vent covers - Roof vent shall be preprinted in color to match roof panels. Screening along opening shall be screened. Wall vents shall have galvanized steel screening of 1/2” x 1/2" x 16 ga. mesh trimmed with galvanized steel frame and secured firmly on outside of building.

10. The concrete block, doors and frames shall be painted. Block wall finished with United Coating “Canyon Tone” Stain as manufactured by United Coating (GAF), Spokane, Washington sealer applied in two coats as per manufacturers specifications. Doors, and building trim shall be painted to a commercial building standard with Sherwin Williams or equal coatings.

11. Transfer Table - Concrete apron slab extend across the front of the building as shown on the drawings. Concrete shall be 4" minimum thickness with control joints, reinforcing, slope longitudinally from middle and drain to edges, and finish to light broom finish in direction of slope. Embedded angle track shall be level. Transfer table shall have functions are presented in the proposed drawings and have lifting capacity for 3,500 pound locomotives. The transfer table support trolley assembly including undercarriage, rail support, and rails, and access bridge, shall be steel fabricated and finished with a Sherwin Williams or equal industrial coating system. Track will be 7.5" gauge and provide level adjustments to reach the rail within the building and steaming bay 5 as sown on drawing 4. Scissor lift hoisting assembly shall be (double long) model no. S35-048-0040-DL with 36" wide by 144" table as manufactured by Autoquip, 1-877-360-6777 or approved equal. Lift shall be activated by a internal 24 v DC, 2 h.p. lift motor, push button controller, with adjustable height limiting switch, gravity down, with recharger include, and flex 120 volt plug in cord long enough to plug in outside receptacle mounted on anchor post when parked. The batteries shall be housed within a fabricated steel on board box with provision for SVLSRM furnished padlock security system. Engineering shall be provided for the table per the code, and the Autoquip company may provide the complete transfer table.

12. Provide storage track and racking for locomotives weighing 3,500 pounds spread over 10 feet of rack length. Clearance between supports shall be 22" minimum, and as shown of drawing 5. Engineering shall be provided for support assembly per the code.

13. Provide LED lighting at a minimum level of 50 fc. throughout. Provide 20 amp. fourplex receptacles at 8 feet around the inside perimeter, and 2 outside on the front wall, and 20 amp. duplex on each outer rail support beam (6) and one on the transfer table anchor post, all located at 48" above floor level except on racking. Service shall be provided thru a panel located inside the building and supplied by underground from the existing Round House building. Yard wall light shall be LED with adequate spread for the transfer table yard.

14. Grade around building and transfer table slab shall have 3" crushed rock (3/4" gradation) placed a minimum of 2 feet around the perimeter of the project and with P.T. wood cutoff board. In addition, provide covering of all existing rock area in the steaming bays with 2" crushed rock (½" gradation) at the completing of the project.

D. Reconnaissance -

1. Contractor shall be familiar with the property before providing a proposal

E. Contract Documents -

1. Standard AIA 101 shall be used for the contract.

2. Contact shall be complete with Certificate of Occupancy by August 15, 2023.

3. Drawing included as part of this document:

1	Locomotive Storage Building	March 9, 2022
2	locomotive Storage Building Yard Plan	March 9, 2022
3	Locomotive Storage Site Plan	March 9, 2022
4	Locomotive Storage Transfer Table	March 9, 2022
5	Locomotive Storage Racking	March 9, 2022

Application #73

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR CORDOVA RECREATION & PARK DISTRICT (CRPD) PROPERTY/FACILITY USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a park or park facility, you must request the endorsement of the Cordova Recreation & Park District (CRPD).

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by a representative of CRPD for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. The CRPD representative reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

To be filled out by grant applicant

Project/Program Name: Locomotive Storage Building

Name of Organization: Sacramento Valley Live Steamers Railroad Museum

Name of Applicant and Title: Andy Berchielli, President

Applicant's Phone: 916-752-6697 **Applicant's Email:** president@svlsrm.org

Submit a copy of your application with this page to the Cordova Recreation & Park District. For your application packet to be considered complete the signed and dated endorsement form must be received by the City of Rancho Cordova by March 18, 2022. The CRPD representative will submit the form directly to the City's Community Enhancement & Investment Fund team. You must submit this form and a copy of your application to CRPD no later than March 4, 2022. Submit it via e-mail to Cristina James at cjames@crpd.com.

To be filled out by Cordova Recreation & Park District Representative

(Endorsement Given)

~~Endorsement Withheld~~

Conditional approval of facility rental only

General Manager's or Designee's Printed Name: CRISTINA JAMES

Date: 3/14/22

Comments (Optional): CRPD Does NOT TAKE Responsibility for Project Management or Cost.

The CRPD representative will send this form directly to CEIFGrants@cityofranchocordova.org no later than March 18, 2022. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

Project Information

Project Name

RCFL Capacity Expansion

Project Synopsis

RCFL plans to purchase and install two large refrigeration units (a cooler and a freezer) to handle the greatly increased quantities of cold/frozen foods provided by Sacramento Food Bank & Family Services (SFBFS) and other local businesses/private donors.

Project Description

RCFL plans to use grant funds for two purposes: 1) First, to design, purchase, and install new (or perhaps used) commercial-grade refrigeration equipment in the most appropriate location(s) to best meet operational needs. The new refrigeration equipment would be large and pallet-jack-friendly. The two units could be collocated either in a newly rented/leased warehouse for food storage and processing, or the cooler could be installed at RCFL's current facility instead of the contracted warehouse. The freezer would accommodate the donation of hundreds of turkeys for the annual Thanksgiving and Christmas Giveaways. This is currently RCFL's most vexing problem for storing frozen foods. The cooling unit would accommodate the huge donations of produce and other refrigerated items, especially during the warmer months. This is consistently problematic due to the short shelf-life of such foods. The new refrigeration unit would also allow RCFL to end its lease of one smaller walk-in cooler at a cost savings of over $800/month. The new equipment would greatly expand RCFL's food-processing capacity and also greatly improve its cost efficiency for storage. 2) Second, if any grant funds remain after installation of the refrigeration units, RCFL would apply such residual funds toward the monthly rental costs for the off-site contracted warehouse still in the procurement stage. Such funds would continue until the grant period expires, or until the residual grant funding is exhausted, whichever occurs first. Due to inflation, undetermined size/configuration of the units, volatile supply chain issues, permits, engineering costs, and other considerations, estimated costs are very uncertain. Therefore, any inadvertent overestimation of purchase/installation costs would be used to help RCFL achieve sustainability despite this period of operational "sea-change." If costs are underestimated, RCFL would bear the burden of those unanticipated excess costs. (continued)

Project Team

Walter Little; Chair, RCFL Board of Directors (BOD) Mr. Gary Greeson; Vice Chair, RCFL BOD Mr. Ross Johnson;

Application #74

Treasurer, RCFL BOD Ms. Shelly Blanchard; Secretary, RCFL BOD Ms. Miriam Sammartino; Sacramento Diocese Chief of Catholic Charities, RCFL BOD Ms. Carrie Johnson; RCFL Executive Director

Project Goals

Goal #1: To expand RCFL's capacity for storage and handling of refrigerated and frozen food donations/purchases to meet current and expected future demands. Metric #1: To have an appropriate engineering contractor design the needed commercial grade refrigeration units (one cooler and one freezer) by December 31, 2022. Metric #2: To sign appropriate contracts for purchase and installation of the refrigeration units at the selected site(s) by December 31, 2022. Metric #3: To complete installation of the City-permitted, commercial grade cooler and freezer units at the selected location(s) by May 31, 2023. Goal #2: To improve RCFL's capacity-building efforts by extending financial support for the sought rented/leased off-site food storage/processing warehouse still in procurement. (See Note below under "Estimated breakdown of project expenditures.") Metric #4: To augment (as residual grant CEIF funds permit) the grant funds anticipated from SFBFS to cover the monthly rental/lease costs of the sought off-site food storage and processing warehouse by June 30, 2023 Metric #5: To improve facility and operational compliance with applicable SFBFS food-handling regulations (as demonstrated by results of any periodic SFBFS inspections) by June 30, 2023.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$250,000

Estimated Breakdown of Project Expenditures

Refrigeration-units design plans, & applicable City permits: $15,000 Installation/upgrade of electrical service: $10,000 Forklift-rated concrete foundation & pathways (if required): $30,000 Purchase/delivery/installation of refrigeration units: $175,000 Inflation adjustment for costs (Mar 2022 thru Jun 2023) $20,000

_____ Total: $250,000

Note: Any grant funds remaining after installation of the refrigeration units is complete would be used for monthly rental/lease payments for the off-site food storage and processing warehouse (now still in the procurement stage).

Matching Funds

The Catholic Diocese of Sacramento is directly supportive of RCFL activities and has its Chief of Catholic Charities on RCFL's BOD to oversee the latter's activities. The Diocese has also donated to RCFL in the past, and future financial support is anticipated contingent upon funding available. In addition, the Diocese donates the use of the current facilities on the grounds of St. John Vianney Catholic Church. RCFL's long-term objective (consistent with the Strategic Plan to achieve sustainability) is to transition to an off-site operation large enough to meet future demand. Such demand will be generated not only by existing/projected economic challenges, but also by State law governing food recycling. Rental/lease of the sought food-storage warehouse is planned as a transition step toward the long-term objective. Therefore, the value of the current donated facilities is estimated to be at least $5,000 per month, or a $60,000 annual contribution. Moreover, as a mostly volunteer-based operation, RCFL has about 20 regular volunteers, and another 50-100 volunteers who are earning high school credit, performing community service, or helping at the annual Thanksgiving and Christmas Giveaways. An average of 8 volunteers/day, 4 hours/day, 3 days/week, provide a total of 4,800 hours of free labor. If their wages were only $15 per hour, that amounts to a $72,000 annual contribution. Other Funding Contributions: RCFL has ultimate responsibility for monthly rental payments for the contracted off-site food storage and processing warehouse through the end of the contract term. If SFBFS and CEIF grant funding are inadequate, RCFL will make those payments.

Include Any Other Funding Contributions

RCFL has ultimate responsibility for monthly rental payments for the contracted off-site food storage and processing warehouse through the end of the contract term. If SFBFS and CEIF grant funding are inadequate, RCFL will make those payments. In addition, to expedite the project's completion, RCFL may pay out-of-pocket up front for

allowable expenses (with prior coordination through City staff) and then reimburse itself whenever the grant funding is deposited into RCFL's account.

Ongoing Operations and Maintenance Costs (if applicable)

N/A

Total Community Enhancement & Investment Funds Requested

$250,000

Is this a multi-year request?

No

How many years have you received funding for this project?

0

When will your request for funding sunset for ongoing programs?

N/A

Do you plan to ask annually for funding?

No

What other funding will you seek to support your project?

RCFL's website has a donation feature, and financial support for RCFL's operations from the general public as well as local businesses has been tremendous since its inception. In addition, RCFL has applied to SFBFS for a $65k grant to pay monthly costs of the rented/leased off-site warehouse.

Project Schedule, Timeliness and Adaptability

Project Schedule

March through May, 2022 (Project preparation): - Find suitable warehouse space [allowing installation of refrigeration unit(s)] and sign rental/lease agreement - Develop revised operational procedures to address off-site location - Purchase pallet racks and contract for assembly/installation with SFBFS grant funds - Research options for engineering design of new commercial refrigeration units, or purchase of existing used units in case costs or delays preclude new equipment - Decide where cooling unit will be located (in new warehouse, or at current RCFL facility) - Research suitable contractors for purchase/installation of both units June through December, 2022: - Complete Metric #1 (Purchase engineering designs for cooler and freezer units) - Coordinate engineering designs with contractor candidates in order to obtain bids - Select contractor for purchase/installation of the units and complete Metric #2 (Sign contract for purchase/installation of units) - Ensure contractor obtains appropriate City permits - Ensure contractor installs appropriate electrical service at installation site(s) January through June, 2023: - Complete Metric #3: to complete installation of the commercial units at the selected location(s) by May 31, 2023 - Complete Metric #4: to augment, as residual CEIF funds permit, any grant funds from SFBFS to cover the monthly rental/lease costs of the off-site warehouse - Complete Metric #5: If SFBFS conducts any inspections by May 31, 2023, to promptly review results and correct any significant discrepancies noted.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

RCFL's Executive Director, Executive Committee, and BOD will oversee all related activities to keep this project on schedule.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

RCFL expects that it will still be able to fulfill its oversight responsibilities despite possible changes in California Public Health and/or Sacramento County Health Orders. However, it is unknown whether such changes might greatly

affect the contractor's ability to perform their contracted responsibilities. If such changes include "stay-at-home" directives for "non-essential" workers, this project would likely have to halt. But, if such changes are issued and they reinstate previous less-severe restrictions, RCFL anticipates that the contractor would be able to comply with them by providing Personal Protective Equipment for its employees and also implementing proven-effective operational requirements (e.g., social distancing, ventilation, and other measures).

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

10497 Coloma Road
Rancho Cordova, CA 95670

Other Physical Addresses (if project/program is at multiple sites)

If the cooler unit is to be installed on the current RCFL facility, the St. John Vianney Parish and/or the Sacramento Diocese would have to approve the installation. They are supportive and this grant application may be considered as a letter of support since it was vetted through the Parish, and the Catholic Diocese of Sacramento (the property owner of record). The Diocese also provides direct oversight through appointment of RCFL Corporation Directors/Officers. If both the cooler and freezer units are to be installed in the rented/leased warehouse, its owner would have to approve the installation and also any associated modifications of the warehouse to accommodate their operation (e.g., electrical, and perhaps plumbing). Physical address: RCFL has not yet obtained a letter of support since the sought warehouse has not yet been found, and the location of the cooler has not yet been decided. If the cooler unit is to be installed on the current RCFL facility, the latter's physical address is as shown above. Whenever a suitable warehouse is found, RCFL will: 1) seek a letter of support from the owner, or 2) ensure that the contract expressly includes the owner's approval to make the essential modifications to accommodate the refrigeration unit(s) and provide a copy of the contract to the City. (continued)

Have you received a letter of support for the project/program from the property owner?

Yes (includes if you are the property owner)

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Atch 1 to 2022-2023 CEIF Online Grant Application.docx

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

No

Application #74

Attachment 1 – Continuation of Content in Online Application Form

Project Description (continued)

Based on current information, RCFL believes this is the most reasonable and cost-effective option to address RCFL's desperately needed expansion of warehouse capacity. The new refrigeration equipment would also provide extra capacity as demand for RCFL services continues to rapidly grow. Recent patron statistics confirm sharp increases, which are expected to continue due to the current economic volatility.

By providing food to the hungry, RCFL's operations directly and favorably affect the City's most vulnerable and economically challenged groups, such as children, the unemployed and under employed, the elderly, the physically challenged, recent immigrants, and the homeless. This in turn enhances the City's efforts to improve education for children/youth, civic engagement, community pride, public safety, and overall quality of life.

Project Location (continued)

If the cooler unit is to be installed on the current RCFL facility, the St. John Vianney Parish and/or the Sacramento Diocese would have to approve the installation. They are supportive and this grant application may be considered as a letter of support since it was vetted through the Parish, and the Catholic Diocese of Sacramento (the property owner of record). The Diocese also provides direct oversight through appointment of RCFL Corporation Directors/Officers.

If both the cooler and freezer units are to be installed in the rented/leased warehouse, its owner would have to approve the installation and also any associated modifications of the warehouse to accommodate their operation (e.g., electrical, and perhaps plumbing).

Physical address:

RCFL has not yet obtained a letter of support since the sought warehouse has not yet been found, and the location of the cooler has not yet been decided. If the cooler unit is to be installed on the current RCFL facility, the latter's physical address is:

Rancho Cordova Food Locker
10497 Coloma Road
Rancho Cordova, CA 95670

Whenever a suitable warehouse is found, RCFL will:

1) seek a letter of support from the owner, or
2) ensure that the contract expressly includes the owner's approval to make the essential modifications to accommodate the refrigeration unit(s) and provide a copy of the contract to the City.

Project Information

Project Name

Mills Station Building Exterior Painting

Project Synopsis

This project would provide funds to the Cordova Community Council Foundation to enter into a contract with a painting professional to paint the exterior of the Mills Station Building, home of the MACC.

Project Description

The iconic Mills Station Building exterior was last painted upon arrival at its current location on Mills Station Road around 1998. The building is showing wear and paint is peeling in several locations. In keeping with its stature in the community, this project would fund pressure washing, scraping peeling paint, spot prime as needed and apply two coats of fresh paint to exterior walls and trim.

Project Team

Cordova Community Council Foundation, Shelly Blanchard, Executive Director City of Rancho Cordova Facilities, Matt Thomas

Project Goals

Refreshing the exterior of the building meets the following CEIF criteria: (1) Supports the arts, culture, history and entertainment as a positive outlet for self-discovery, inquiry and enhanced recreational experience; (2) promotes opportunities for civic engagement; (3) invokes community pride; (4) improves quality of life by promoting the MACC as a safe and enriching environment.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$28,500

Estimated Breakdown of Project Expenditures

The City of Rancho Cordova facilities team responded to a Cordova Community Council request for addressing peeling paint issues at the MACC with a proposal from a qualified local contractor for material and labor for painting the exterior of the building, including trim, windows and doors. The proposal was shared with the Cordova Community Council as evidence of support for the project, and identifies a city-qualified vendor.

Matching Funds

None

Include Any Other Funding Contributions

None

Ongoing Operations and Maintenance Costs (if applicable)

Aside from future expected maintenance, there are no on-going costs of this request.

Total Community Enhancement & Investment Funds Requested

$28,500

Is this a multi-year request?

No

How many years have you received funding for this project?

0

When will your request for funding sunset for ongoing programs?

N/A

Do you plan to ask annually for funding?

No

What other funding will you seek to support your project?

None

Project Schedule, Timeliness and Adaptability

Project Schedule

Project would commence upon funding approval and within a schedule to be determined by the City of Rancho Cordova Facilities Department and qualified vendor.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

There are no known impediments to completing this project within standard exterior painting projects which are subject to labor availability and weather. It is hoped the project could be completed during a time period when there is no active exhibit in operation at the MACC.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

This project would not likely be susceptible to health orders.

Project Location

Remember, we are a local contractor that is here to stay when you need us again!! Completely licensed and insured.

To reserve a paint date, please sign and fax or mail a copy of this proposal to the above address.

Start Date: TBD End Date: TBD

Acceptance of Proposal - The above prices, specifications and conditions are satisfactory and are hereby accepted. You are authorized to do the work as specified. Payment will be made as outlined above.

Signature_____
Date of Acceptance_____

Credit rated with Dun & Bradstreet No. 09 249 9797

Contractors are required by law to be licensed and regulated by the Contractors State License Board, which has jurisdiction to investigate complaints against contractors if a complaint is filed within four years of the date of the alleged violation. A complaint regarding a latent act or omission pertaining to structural defects must be filed within 10 years of the date of the alleged violation. Any questions concerning a contractor may be referred to the Registrar, Contractors State License Board, P.O. Box 26000, Sacramento, CA 95826

Terms & Conditions: The terms and conditions on the reverse side are expressly incorporated into this Agreement. Owner acknowledges receipt of "NOTICE TO OWNER." "Notice of Cancellation," a Notice required by Business & Professions Code section 7030 and an EPA document discussing lead in paint, each of which are hereby fully incorporated into this Agreement.

Application #75

NOTICE TO OWNER: Under the California Mechanics Lien Law any contractor, subcontractor, laborer, supplier or other person who helps to improve your property, but is not paid for his work or supplies, has a right to enforce a claim against your property. This means that after a court hearing, your property could be sold by a court officer and the proceeds of the sale used to satisfy the indebtedness. This can happen even if you have paid your contractor in full if the subcontractor, laborers or suppliers remain unpaid. To preserve their right to file a claim or lien against your property, certain claimants such as subcontractors or material suppliers are required to provide you with a document entitled "Preliminary Notice". General contractors and laborers for wages do not have to provide you this notice. A Preliminary Notice is not a lien against your property. Its purpose is to notify you of persons who may have a right to file a lien against your property if they are not paid. To extra protection for yourself and your property, you may wish to take one or more of the following steps: 1. Require that your contractor supply you with a payment and performance bond (not a license bond), which provides a guarantee that all work and proper payments will be completed. This payment and performance bond as well as a copy of the construction contract may be filed with the county recorder for your further protection. 2. Require that payments be made directly to subcontractors and material suppliers through a joint control company, approved by the Registrar of Contractors. 3. Before making payment on any completed phase of the project, require your contractor to provide you with unconditional lien releases signed by each material supplier, subcontractor and laborer involved on that project phase. Anyone signing this release loses the right to file a claim against your property. To protect yourself under this option you must be certain that all material suppliers, subcontractors and laborers have signed.

You, the homeowner (buyer) or tenant have the right to require the contractor to furnish you with a performance and payment bond, however the contractor can require you to pay for that bond. You, the buyer, may cancel this transaction at any time prior to midnight of the third business day after the date of this transaction. Or if this is a contract for the repair of damages resulting from an earthquake, flood, fire, hurricane, riot, storm, tidal wave, or other similar catastrophic occurrence for which a state of emergency has been declared, you the buyer may cancel this transaction at any time prior to midnight of the seventh business day after the date of this transaction. See the attached notice of cancellation form for an explanation of this right.

You may cancel this transaction, without any penalty or obligation, within three business days from the above date. If you cancel, any property traded in, any payments made by you under the contract or sale, and any negotiable instrument executed by you will be returned within 10 days following receipt by the seller of your cancellation notice, and any security interest arising out of the transaction will be canceled.

If you cancel, you must make available to the seller at your residence, in substantially as good condition s when received, any goods delivered to you under this contract or sale, or you may, if you wish, comply with the instructions of the seller regarding the return shipment of the goods at the seller's expense and risk.

If you do make the goods available to the seller and the seller does not pick them up within 20 days of the date of your notice of cancellation, you may retain or dispose of the goods without any further obligation. If you fail to make the goods available to the seller, or if you agree to return the goods to the seller and fail to do so, then you remain liable for performance of all obligations under the contract.

To cancel this transaction, mail or deliver a signed and dated copy of this cancellation notice, or any other written notice, or send a telegram to TSV painting at 9891 Horn Rd., Ste. B, Sacramento, CA 95827 not later than midnight of the thee days after the contract was signed by you.

I hereby cancel this transaction:

Project Information

Project Name

Boy Scouts of America, Troop 363 Tents

Project Synopsis

Troop 363 needs to replace our current tents that are over ten years old. The tents are used year-round, and the current tents require constant repair or replacement of the poles after almost every use. Our current tent model is discontinued, making it difficult to keep up with the worn parts.

Project Description

A major component of the Scouting program is camping and being in the outdoors. Troop 363 camps every month, including in the snow. In the summer, we may camp twice a month. The Boy Scouts of America Mission Statement is "to prepare young people to make ethical and moral choices over their lifetimes by instilling in them the values of the Scout Oath and Scout Law." One of the eight methods used by the BSA to accomplish this is the outdoor program. Scouting is designed to take place outdoors. It is in the outdoors that Scouts share responsibilities and learn to live with one another while learning skills that will last a lifetime. Giving back to the community is another aspect of the Scouting program. The Citizenship in the Community Merit Badge is an Eagle Scout required merit badge. Community Service is also a component of rank advancement in Scouting. Troop 363 has done many projects in Rancho Cordova. We have helped with several city tree planting projects Assisted older and handicapped residents with their yard work. We volunteer for the Thanksgiving and Christmas dinner giveaways at the Rancho Cordova Food Locker. The Troops Honor Guard has done flag ceremonies for several Rancho Cordova organizations as well as for the city. While we are asking for new tents to continue with Scout development, we have and continue to give back to our city. This is where our scouts live and go to school. Giving back to our city makes it a better place for all residents.

Project Team

Adult leaders and parents of Troop 363 Scouts will be responsible for the procuring of the tents. Older Scouts, under the guidance of Troop leaders, will instruct the Scouts on how to set up, maintain and care for the new tents.

Project Goals

Application #76

While we have already researched the tent that we feel best fits our needs, availability of most tents is subject to supply chain issues. If funding is approved, the tents will be ordered as soon as possible. Once they arrive and are found to be free of defects, any and all paperwork required by the city will be turned in.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$5,291.84 is the cost of the tents and the footprints that help protect the bottom of the tent to help them last longer.

Estimated Breakdown of Project Expenditures

6 Eureka El Capitan 3+ Outfitter tents-$2,103.78 including tax 6 Eureka El Capitan 3+ footprints- $328.44 including tax 6 Eureka El Capitan 4+ Outfitter tents-$2,498.30 including tax 6 Eureka El Capitan 4+ footprints-$361.32 including tax

Matching Funds

N/A

Include Any Other Funding Contributions

We are requesting funding for 12 tents. To replace our currents tents, we need a total of 14 tents. We have Troop funds for one 3+ and one 4+ tent and footprints. We had hoped to have more funds, but the pandemic has made it harder to fundraise. We know that we are not the only non-profit that has this problem. We currently have $880.00 set aside to purchase the two tents mentioned above.

Ongoing Operations and Maintenance Costs (if applicable)

N/A

Total Community Enhancement & Investment Funds Requested

$5,291.84

Is this a multi-year request?

No

How many years have you received funding for this project?

0

When will your request for funding sunset for ongoing programs?

June 30, 2023

Do you plan to ask annually for funding?

No

What other funding will you seek to support your project?

None

Project Schedule, Timeliness and Adaptability

Project Schedule

Once funding is approved, the tents and footprints will be ordered. Since funding is later in the year, the tents we would like to purchase should be in stock. We anticipate the purchase and delivery of the tents to be done before the end of 2022.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

If the tents, we are looking at buying are out of stock or supply issues persists, we will research similar tents and purchase from that supplier.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Application #76

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

This project only involves in person contact with Troop members. Masking, if necessary, is not an issue since we have been masking during most of our meetings.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Dear Rancho Cordova Community Enhancement Fund,

Troop 363 meets at the American River Grange No.172 and stores their equipment on the premises. Troop 363 not only meets here, but they also do work here to help keep up the property in addition to the numerous Eagle Scout projects they have done here in support of our building and property.

They have the permission of the American River Grange No.172, to store any equipment and supplies needed for the running of Troop, on our property.

Project Information

Project Name

RCAA Capacity Building Feasibility Study

Project Synopsis

This project would provide funds to the Cordova Community Council to hire a consultant to explore the feasibility, potential structure, cost and benefits of creating a professional staff position to operate, expand and enhance the activities of the Rancho Cordova Athletic Association. The Cordova Community Council is currently spending great effort to keep a number of RCAA projects moving forward, but the demands of this expanding effort are growing beyond staff resources currently available to support it. This project envisions a deeper understanding of the demands and importance of this sector and solutions to its most pressing issues. Rancho Cordova is no longer a small town wherein the burden of running an excellent citywide sports program can be managed by a handful of dedicated coaches and volunteers. The complexity of social media and publicity needs, facility needs and growing legal burdens will require a stronger sports infrastructure to insure success. As an example, it has been reported to the RCAA that the City of Folsom Parks and Recreation Department employs three people to handle scheduling and youth sports related issues in that neighboring jurisdiction.

Project Description

This project would hire a qualified consultant to explore the potential of developing a professional staff position to guide the Rancho Cordova Athletic Association in the areas of project management, fundraising and league coordination to advance and enhance youth sports offerings in the City of Rancho Cordova. Youth sports leagues are at a crossroads. Blessed with strong and dedicated leadership for many decades, there is a wide understanding among experienced leaders that over the next few years this cadre will "age out" and likely retire, leaving a big leadership gap. Continuity is a concern which could be alleviated by the formation of a staff position focused on preserving and planning for these eventual transitions. Second, Rancho Cordova is on the cusp of population explosion and more -- not less -- youth sports will be needed to make Rancho Cordova a desirable hometown for young families. A forward-looking plan of how to prepare for this growth is needed. Third, a crisis of youth sports support infrastructure is looming. Where will the umpires, referees and coaches come from? Youth sports leagues are already turning away participants due to shortages in these areas. A unified system that could address these needs should be developed, however league leaders currently do not have the capacity to address. Fourth, facility development and access issues, fundraising needs and opportunities, unified planning for future needs, unified publicity campaigns and more are fertile grounds for elevating youth sports in the city, making

Rancho Cordova a leader in this area. Physical fitness, education and social benefits are well known -- now is an opportune moment to explore the value of these goals and create the supportive structure needed to get there. Finally, what is the economic benefit to the City of a robust youth sports scene? Finding the answer to that question may surprise with hard dollar values which would be beneficial to all City residents.

Project Team

Cordova Community Council Foundation, Shelly Blanchard, Executive Director

Project Goals

Goal #1: Explore the "as is" environment and general health of Rancho Cordova youth sports leagues, identifying sustainability, facility and related issues and whether they could be improved by professional support Goal #2: Identify various models of collaborative youth sport league management and coordination which result in enhanced offerings and excellent experiences for youth sports participants and whether this could be improved by professional staff support. Metric: These findings would be included in a report to the RCAA Goal #3: Determine costs and benefits of developing a youth sports "one stop" for attracting new sports offerings and tournament play to the City of Rancho Cordova, and whether this could be accomplished by professional staff support Metric: These findings would be included in a report to the RCAA Goal #4: Research and explore fundraising potential for enhancing play facilities, sports fee assistance, outreach to non-English speakers and a wide variety of funding mechanisms which are available but not tapped due to lack of capacity of leagues and RCAA staff support Metric: These findings would be included in a report to the RCAA Goal #5: Explore benefits of professional staff effort to recruit, stabilize and retain coaches, referees, umpires and other officials whose shortage is threatening the demise of youth sports in Rancho Cordova and whether this could be improved by professional staff support Metric: These findings would be included in a report to the RCAA Goal #6: Explore the economic costs and benefits of enhancing the image of Rancho Cordova as a youth sports leader in California, including identifying opportunities wherein Rancho Cordova could take the lead or fill an existing gap Metric: These findings would be included in a report to the RCAA Goal #7: Identify strategies to boost overall youth sports league participation in Rancho Cordova Metric: These findings would be included in a report to the RCAA

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$45,000

Estimated Breakdown of Project Expenditures

$43,000 for contract consultant to investigate and complete a wide-ranging feasibility study $2,000 for the Cordova Community Council to identify and monitor the work of the contractor, and assure compliance with CEIF rules, provide bookkeeping and reporting functions.

Matching Funds

None

Include Any Other Funding Contributions

None

Ongoing Operations and Maintenance Costs (if applicable)

None

Total Community Enhancement & Investment Funds Requested

$45,000

Is this a multi-year request?

No

How many years have you received funding for this project?

0

When will your request for funding sunset for ongoing programs?

N/A

Do you plan to ask annually for funding?

No

What other funding will you seek to support your project?

None

Project Schedule, Timeliness and Adaptability

Project Schedule

Timeline: August 2022: CEIF Funding agreement finalized September 2022: Identify qualified consultant November 2023: Preliminary report for circulation to RCAA leagues and City of Rancho Cordova (presentation to annual RCAA Member League Retreat for full discussion) January 2023: Issue preliminary report February 2023: Issue final report

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

The Cordova Community Council participated in a similar exercise twice in recent years. The first was to ascertain what was needed to build capacity around the arts, which eventually led to the formation of the RC Arts non-profit organization and a City of Rancho Cordova Arts Strategic Plan. The second effort aimed to construct a framework for future success of the Rancho Cordova Community Food Locker. Using those successful efforts as a guide, it strikes us as necessary to undertake a similar effort on behalf of youth sports leagues, a backbone of community life, which is suffering due to lack of capacity, unable to find time and resources to fully plan for a bright future. Because of this overall understanding by a particularly dedicated leadership team currently in place, but mindful that many will "age out" soon, the time is now to perform this deep dive and prepare for the future.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Yes. This project is primarily administrative and adjustments could be easily accomplished to achieve completion.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

2729 Prospect Park Drive
Suite 117
Rancho Cordova, CA 95670

Other Physical Addresses (if project/program is at multiple sites)

Have you received a letter of support for the project/program from the property owner?

Project Information

Project Name

Boy Scouts of America, Troop 1601 -Tents , Patrol Box, Camp Stove & Lanterns

Project Synopsis

Troop 1601, First all-girl troop in Rancho Cordova established on February 1, 2019 which also happens to be the first day girls were allowed to join the Boy Scouts of America and enjoy all opportunities available. These girls started the BSA program with no prior scouting experience but with much enthusiasm to take on the task at hand. Troop 1601 started up with no camp supplies or tents. The scouts expected to hold fundraisers to obtain much needed equipment and tents to participate in camping and the outdoors as this is a major component of the Scouting program. Unfortunately, Covid-19 restrictions and shut-downs prevented the girls from raising the necessary funds to purchase many items to participate in these opportunities. Another scout troop passed on a few of their oldest tents to assist our troop with starting their adventure. These tents were in poor condition or not serviceable, many were missing parts. We have tried to repair or find replacement parts; however, these tents are no longer available to purchase. Troop 1601 is requesting new tents for year-round use to include snow camping in the winter. The troop is also in need of a patrol box for setting up a kitchen at campsite, a 3-burner camping stove and 3 lanterns. Currently, we are borrowing equipment from various parents and then trying to make sure it gets returned in same condition. This makes it difficult, when trying to make sure all equipment has been obtained and returned just for an outing.

Project Description

The Scouting program offers youth a wide variety of experiences of which mainly focuses around the outdoors and camping not available in many organizations. BSA has opened up this same experience and opportunity to girls. The All-Girl Troop 1601 has only been able to experience a few camp trips since being established, either due to lack of equipment or restrictions/shut downs of Covid-19. Troop 1601 has missed out on opportunities to go snow camping such as the annual Klondike-a competition between troops focused on cold weather activities. The Boy Scouts of America Mission Statement is" to prepare young people to make ethical and moral choices over their lifetimes by instilling in them the values of the Scout Oath and Scout Law." Scouting was purposely created to take place outdoors. Here, scouts learn to share responsibilities, connecting with others, and skills that will last a lifetime. Another aspect of Scouting is giving back to the community. Community service is closely tied to rank advancement in the Scouting program. The Citizenship of the Community Merit Badge is an Eagle Scout required merit badge. While Troop 1601 is relatively new in the Scouting World, we may not have participated in as many community events as other organizations, but we did what we could

under the circumstances and are excited to become an active part of the community. Of the many opportunities available to volunteer in Rancho Cordova, we have volunteered in several events, such as a Pancake Breakfast and Dinner at the United Methodist Church. They also participated in Scouting for Food, volunteered for the Thanksgiving and Christmas Dinner donation drive at the Rancho Cordova Food Locker and provided flag Honor Guards for the City of Rancho Cordova. While we are asking for new tents and other camp equipment to offer a quality program, we give back to our community. The new tents and camp equipment will allow the Troop to deliver a quality outdoor program.

Project Team

Adult leader and parents of Troop 1601will be responsible for obtaining the tents, camp stove, patrol box and lanterns. Older Scouts or Troop leaders will teach the Scouts how to set up, maintain and care for the new tents and camp equipment.

Project Goals

We have researched the tents that will best suit our needs along with the patrol box, camp stove and lanterns, but realize the availability is subject to supply chain issues. If funding is approved, the tents and equipment requested will be ordered immediately. Once all items are received and defect-free, any and all paperwork required by the City will be turned in.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

The cost of the tents, footprints to protect the bottom of tent and increase its life, camp stove, griddles, patrol camp kitchen and lanterns that best suit our needs is $ 4825.09

Estimated Breakdown of Project Expenditures

4 Eureka El Capitan 3+ Outfitter Tent= $ 1525.24 inc. tax; 4 Eureka El Capitan 3+ footprints = $ 238.12 inc. tax; 4 Eureka El Capitan 4+ Outfitter Tent = $ 1811.26 inc. tax; 4 Eureka El Capitan 4+ footprints = $ 261.96 inc. tax; 1 Camp Chef Explorer 3 burner stove = $271.88 inc. tax; 1 burner griddle = $ 81.66 inc. tax; 2 burner griddle = $125.06 inc. tax; 1 Chuck Box Camp Kitchen $ 379.54 inc. tax; and 3 Life + Gear Adventure 2200 Lumens LED Lantern with Power Bank $ 130.47 inc. tax.

Matching Funds

N/A

Include Any Other Funding Contributions

We are looking for funding for a total of 8 tents. These will replace our current tents that are missing parts, torn or not useable. Along with the tents, we will need the footprints to lengthen their life span. Also we are in need of a camp stove, camp kitchen box, and lanterns. Due to the pandemic and loss of fundraising opportunities, we only have $47.55 saved to purchase the items above.

Ongoing Operations and Maintenance Costs (if applicable)

Total Community Enhancement & Investment Funds Requested

$4825.09

Is this a multi-year request?

No

How many years have you received funding for this project?

0

When will your request for funding sunset for ongoing programs?

June 30, 2023

Do you plan to ask annually for funding?

No

What other funding will you seek to support your project?

None

Project Schedule, Timeliness and Adaptability

Project Schedule

Once funding is approved, Tents, footprints stove, griddles, lanterns and camp kitchen will be ordered. Since funding is later in the year, the items should be in stock. We expect all items we wish to purchase will be delivered or picked up prior to the end of the year.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

If the tents and equipment we are looking at are out of stock or manufacturer is having supply issues, we will research and purchase similar items from a like supplier.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

This project only involves in-person contact with Troop members. If necessary, masking up as required. This is the same policy as used at most of our meetings.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

2720 Kilgore Rd.
Rancho Cordova, CA 95670

Other Physical Addresses (if project/program is at multiple sites)

N/A

Have you received a letter of support for the project/program from the property owner?

Yes (includes if you are the property owner)

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

No

To Whom it May Concern,

The American River Grange is the proud host of Troop 1601, the first all-girl scout troop in the City of Rancho Cordova and one of the first in Northern California. They hold their weekly meetings at our facility on Kilgore Road each Tuesday evening. They also hold special events on some weekends at our hall and grounds.

We have a storage container located within our backyard which facilitates the storage of their troop gear.

In return for the use of our facilities, they have agreed to assist with quarterly clean up and yard maintenance events along with Troop 363, one of the oldest boy scout troops in Rancho Cordova.

Please provide attentive consideration of their request for assistance as they are a young troop that needs to grow within our community. I see great things in their future as they become an active unit and have more participation and visibility in and around Rancho Cordova.

Respectfully,

William C. Thomas, Grange Master/President

Project Information

Project Name

Winter Sanctuary and Homeless Services in Rancho Cordova

Project Synopsis

Rancho Cordova HART will provide a rotating Winter Shelter and essential housing counseling and supportive services to the homeless in Rancho Cordova.

Project Description

Rancho Cordova HART's mission is to provide services to the homeless in our community by continuing to provide life-changing services. Our unhoused neighbors will receive much-needed shelter and services during the coldest months of the year. Funds will be allocated to bus passes, services to provide clients with rental assistance, move-in costs, application/background check fees, and the general operation of the Winter Sanctuary Shelter Program. Winter Sanctuary Shelter Program - Citizens and faith communities operate the Winter Sanctuary Shelter Program in Rancho Cordova to provide free overnight shelter, warmth, meals, and connection to mainline health and housing-related services for men & women who are experiencing homelessness in our area during the coldest months of winter. Potential guests are invited to arrive at the intake site at 5 pm each evening during the program to create a consistent meeting place. Guests of the winter sanctuary meet with the outreach navigator and, most importantly, become part of the HART family and Rancho Cordova community. Housing Counseling/Relocation - Rancho Cordova HART partners with Sacramento Self-Help Housing (SSHH) to assist those on the street or in the Winter Shelter Program, to achieve housing. SSHH helps by rapidly connecting clients with landlords, property owners, and housing program options. HART will support by using the community enhancement funds to remove the barriers to housing by covering the costs of security deposits, bus passes, or similar "move-in costs." These funds will also go to supporting those moving out of the new transitional house.

Project Team

1) Rancho Cordova HART operates the local rotating winter shelter program and will connect homeless individuals and families to the homeless outreach navigator for housing referrals, education, and services. HART mentors will also work with clients on additional issues such as transportation to the DMV, filling in applications to rent, or other resources (in-kind and volunteer). Since 2013, Rancho Cordova HART has been mobilizing the community to come together as volunteers to help individuals and families residing in Rancho Cordova who are experiencing homelessness. Rancho Cordova HART is a local collaboration between the faith-

based community, businesses, residents, Folsom Cordova Unified School District, Elica Health, and Sacramento Veteran's Stand Down. Rancho Cordova HART's agenda is dedicated to the needs of the city's homeless population. For the past seven years, Rancho Cordova HART has hosted a successful and welcoming winter shelter for the homeless in the city. During the off-season, HART acts as a local resource to the homeless population and also assists with supporting and maintaining the city's new transitional house. 2) Sacramento Self-Help Housing (SSHH) is an organization that serves individuals and families who have insufficient housing resources. Since 1990, they have been helping people who are homeless, in danger of becoming homeless, in crisis, or who have special needs, to find stable and affordable housing. SSHH operates various programs that assist individuals with their housing needs. Some of these programs include temporary and permanent housing, housing counseling, financial education, tenant-landlord services, and community outreach. SSHH participates in Rancho Cordova HART as a supporting guide to ensure that HART has the resources it needs to assist its clients. SSHH helps during the HART winter shelter season and makes it possible for HARTs to create housing opportunities.

Project Goals

In general, the goal is to operate a rotating winter shelter program during the coldest months of the year in 2022, where our homeless neighbors can receive essential services and get connected to mainstream housing resources. The following are our measures for success. Organize a 2022 winter sanctuary program for 12+ program participants per night 1) Provide 700+ nights of lodging 2) Provide 5+ veterans lodging and services 3) Work with SSHH to provide services to 15+ winter sanctuary program participants 4) Organize 200+ volunteers to support the winter sanctuary program 5) Assist 10+ unhoused individuals or families achieve housing

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

83,900

Estimated Breakdown of Project Expenditures

1. Rent of intake site - $3,000 2. Gas and Expenses for transportation van - $2,000 3. Housing Counseling Services - $25,000 4. Bus Passes - $700 5. Insurance - $1,200 6. In-Kind Expenses for Host Churches - $50,000 7. Food Gift Cards - $2,000

Matching Funds

Item number 7 in the above budget will be donated by members of churches. Facilities and staff/volunteers for each night of the winter shelter are donated by the faith communities that make up Rancho Cordova HART. $50,000 is an estimate based on our 2019 winter shelter program. If we hope to expand the number of winter shelter weeks (which we presume to do), the number will go up. A better estimate of the in-kind donations from our faith-based community partners will be tracked in the reports.

Include Any Other Funding Contributions

None

Ongoing Operations and Maintenance Costs (if applicable)

None

Total Community Enhancement & Investment Funds Requested

$33,900

Is this a multi-year request?

No

How many years have you received funding for this project?

5

When will your request for funding sunset for ongoing programs?

The winter sanctuary program will be done, at the latest, by March 2023. The other services are ongoing.

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

Application #79

Rancho Cordova HART prioritizes sustainability. Volunteers oversee all administrative tasks and program services, which reduces administrative costs to $0.00. Rancho Cordova HART has secured ongoing funding to support some program costs from its community members and organizational partners. These include submitting grant applications to funders, fundraising events, and individual solicitations.

Project Schedule, Timeliness and Adaptability

Project Schedule

1) July 2022 – June 2023: Ongoing housing services 2) December 2022 - March 2023: Rancho Cordova HART winter shelter season

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

The housing counseling program will be ongoing. We will work closely with SSHH and the navigator to make sure the funds are used by June 20, 2023.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

The public health orders have not, and we anticipate, will not impact our housing services program. SSHH's navigator has pivoted through the pandemic to continue to provide services to our community. We can offer her support virtually or through other means of communication. If the public health order does not allow us to operate a winter shelter we will need to adjust this aspect of the program. Many HART groups have pivoted to provide respite day warming/cooling centers. We will do the same. Though it does not allow for overnight guests, this retains the service connection and resource distribution sentiment of the winter sanctuary program.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

11223 TRINITY RIVER DRIVE
RANCHO CORDOVA, CA 95670

Other Physical Addresses (if project/program is at multiple sites)

Rancho Cordova HART is located at 11223 Trinity River Drive, Rancho Cordova, CA 95670. The Rancho Cordova HART Winter Shelter intake site is to be determined.

Have you received a letter of support for the project/program from the property owner?

Requested, and will submit to city by March 18, 2022

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Letter for City.docx

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

No

Project Information

Project Name

Home Repairs and Neighborhood Revitalization in Rancho Cordova in partnership with Habitat for Humanity

Project Synopsis

Habitat for Humanity of Greater Sacramento is seeking support to work in partnership with the City of Rancho Cordova to fund 25 or more home repair projects for low-income Rancho Cordova homeowners to help beautify the neighborhood, increase neighborhood pride, and support underserved low-income homeowners with deferred home repairs. Habitat for Humanity of Greater Sacramento's overarching goals with this project are to both substantially improve the quality of life of low-income Rancho Cordova homeowners, in particular veterans and seniors, who are in need of critical home repairs to bring their homes into a safe, habitable condition, as well to uplift the neighborhood landscape through the beautification and revitalization of these properties that have deferred maintenance issues. Renovations include work to correct critical exterior life/safety and structural deficiencies as well as other high priority exterior habitability repairs, and maintenance related exterior repairs such as painting and landscaping. Funding will provide for significant capacity expansion of an existing Home Repair program and will allow us to target and prioritize low-income Rancho Cordova homeowners as part of our ongoing efforts in the Greater Sacramento region. For an example of the types of projects this funding would support, please see this video of Veteran and Senior Rancho Cordova Homeowner Miles whose home was repaired through support from the Rancho Cordova Community Enhancement Fund, Measure H funding: https://www.youtube.com/watch?v=6z5e3C7XPUA

Project Description

We estimate this funding will allow us to make significant critical health and safety related and beautification repairs on at least 25 (at minimum) qualified low-income owner-occupied homes in Rancho Cordova thus both improving community pride and quality of life for the residents and their neighbors. Habitat for Humanity of Greater Sacramento will close our fiscal year 21/22 having completed over 75 home repairs for low-income homeowners in the greater Sacramento region (in addition to Habitat's other ongoing home building and Neighborhood Revitalization programs). Example renovations include replacing leaking and structurally unsound roofs and porches, corrected leaking windows, exterior paint/landscaping, substantial accessibility and aging in place upgrades, dry rot remediation, and health and safety related critical exterior repairs. If we receive this requested grant support, planned activities include: •Conducting outreach to increase awareness of the repair program within the City of Rancho Cordova • Screen applicants to establish eligibility and conduct on-site reviews by a construction supervisor to define project scope. • Plan and

execute the selected projects under program supervision from a licensed general contractor and with on-site construction professionals as project supervisors. The majority of the labor on Habitat projects is typically provided by volunteers. Where possible we leverage grant funding by actively soliciting in kind donations of materials to reduce project costs or layering on additional funding pools to stretch Measure H dollars farther and impact more Rancho Cordova households. • Evaluate the effectiveness of this program; report to the City with: a listing of who received assistance, a narrative of their eligibility for funding, description of the work performed, cost of the work charged to the grant, other funding or in kind resources leveraged, and testimonials from the homeowner partners impacted.

Project Team

Habitat's staff of professionals play a huge part ensuring that projects are completed on schedule and on budget. Overseen by our CEO Leah Miller (20+ years nonprofit, real estate, and leadership experience), our Director of Construction Michael Gordon (43+ years construction experience) plans and directs all aspects of our home construction and repair activities. Project Site Superintendent Brian Bushta (10+ years construction experience, 3 years with Habitat) manages the volunteers, subs, and day-to-day details for the project and ensures that the build site is safe, and work is completed on schedule. Our Manager of Homeowner Services Cory Stevenson (JD Western Reserve University Law School) is responsible for outreach, recruiting and qualifying prospective families, and guiding them throughout the process. Our COO Shannin Stein (25+ years non-profit experience) supports the homeowner services team with compliance, insurance, and reporting on grant activities. Our Chief Development Officer Laine Himmelmann (10+ years fundraising experience) oversees the overall fundraising, marketing/media/public relations, and volunteer recruitment and scheduling for the organization. Our Controller Farrah Shields (10+ years finance and accounting experience) is responsible for ensuring donated funds are used efficiently, applied as directed, and that Habitat complies with the terms of grant funding.

Project Goals

Our goal is to repair/renovate 25 or more low-income owner-occupied homes with deferred exterior maintenance issues in Rancho Cordova, transitioning the occupants from substandard living conditions, with potentially serious life/safety and structural deficiencies, to homes with significantly improved habitability and pride of ownership. As evidenced in the photos and testimonials in our previous grant report, celebrating and articulating to homeowner partners who is making the work we are doing possible in Rancho Cordova (the City of Rancho Cordova) is also an important piece of this partnership that adds to the increase of pride of community. Our additional short-term goal by providing these exterior home repairs is also to benefit the neighborhood at large by beautifying the streetscape through repairing these homes. We anticipate these 25+ repairs would directly impact between 40-65 Rancho Cordova individuals with critically needed preservation and maintenance support and untold numbers of neighbors who would benefit from the uplifted streetscape. Our long term goal is to alter the decision-making calculus when seniors need to decide where to live out their lives. The critical home repairs we do are often the make-or-break deciding factor on whether residents are able to choose to age in place or are forced to seek other housing. The beautification repairs (painting and landscaping) can also have significant impact on both the neighborhood and the mental health and pride of ownership for the resident. We will provide an end of grant report to include data on a) who received assistance, b) a narrative of their eligibility for funding, c) description and photos of the work performed, d) costs of the work charged to the grant, e) other funding or in-kind resources leveraged f) homeowner testimonials and impact photos.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

300,000

Estimated Breakdown of Project Expenditures

Our estimated breakdown of the $300,000 grant would be: - 40% Sub-contracted services, site services, and labor/site supervisor – $120,000 - 50% Building materials (lumber, siding, etc.) – 50% of total grant request - $150,000 - 10% Administrative costs (social services and operations labor) - $30,000 The request for construction labor is the site supervisor's salary which includes evaluating each project, ordering materials, scheduling trade partners, and supervising the repairs. A substantial amount of the labor, particularly on "Brush with Kindness" repair projects (landscaping, fencing) will be provided by volunteers. We have also included 10% of the grant go to support the administrative/operational needs including marketing to the Rancho Cordova community, review and selection of homeowners, homeowner support, bi-annual reporting with the City of Rancho Cordova, documentation for reporting, and the weekly communication with City of Rancho Cordova staff. Every inquiry/application from prospective home repair partner families must be reviewed, homeowner communicated with, and for those homeowners whose applications are accepted, walked through the contract and process from application to finish of repairs. As evidenced by our 19/20 Measure H CEF grant where we promised 3-4 home repairs and delivered 5, as well as with our current 21/22 CEF grant where we will leverage other

funding to do 15 home repairs (our scope of services promised 10-12) we will continue to be efficient, frugal, deliberate, and look for opportunities to stretch the CEF grant by leveraging and laying on additional partnerships. As the breakdown of costs can differ substantially per type of repair (for reference, a "brush with kindness" beautification repair is typically under $5,000, but a critical home repair depending on the work needed, can be up to $30,000 with a roof), our plan with this grant would be to have a mix of critical and beautification repairs.

Matching Funds

We currently have grant commitments and applications pending to further expand our Neighborhood Revitalization/Home Repair Program at large across the greater Sacramento and Yolo County region. If any of these applications are approved these funds would work in conjunction with Rancho Cordova funding (and layered on top of where possible as we are doing with a variety of current Rancho Cordova home repair projects from our 21/22 Measure H funding). Rancho Cordova Community Enhancement Funds would only be used in Rancho Cordova and other funding would be used as directed by the granter in the Greater Sacramento area (or layered over Rancho Funding to stretch Measure H dollars farther) SMUD: $1 million 2022-2023 MOU in progress, County of Sacramento $20,000 TOT funding approved, $35,000 Aging in Place Nancy Fisher fund, Air Warrior Courage Foundation$15,000 (pledged), Rock the Block $100,000 in hand. Rancho Cordova applicants have always been eligible for funding through our program and will continue to be so. However our work relies on resources; if this request is denied then Rancho Cordova applicants are competing with a much larger pool of applicants and we will always prioritize on the greatest need and veterans when making decisions as to which applicants to serve. Approving our grant request gives Rancho Cordova residents a dedicated source of funding to address their needs without competing with applicants from all of Greater Sacramento and Yolo County. Habitat home build and repair projects are made possible through volunteer labor and hundreds and hundreds of volunteers. Additionally, if awarded this grant, we would look for opportunities for in-kind support and matching funds (such as SMUD funding and TOT funding) within the city of Rancho Cordova to stretch the allocated dollars farther and repair more homes and neighborhoods.

Include Any Other Funding Contributions

While we have other funding contributions for our repairs program at large (see above), we do not have any other funding that is Rancho Cordova specific and that would help us prioritize the City of Rancho Cordova and Rancho Cordova homeowners. If this request is denied then Rancho Cordova applicants are competing with a much larger pool of applicants. This grant would help us put Rancho Cordova applicants to the top of the list through a dedicated funding source specifically for Rancho Cordova families, seniors, and veterans in need of home repair services. Additionally, while we have included a modest 10% of the grant towards the weekly operations/admin support needed for qualifying and working directly with the homeowner partners and reporting, the majority of the homeowner services, as well as finance, and volunteer services staff time would be covered through other areas of our $8 Million budget such as from our ReStore ($1 million unrestricted revenue annually), Habitat homeowner mortgage payments (unrestricted revenue), and general unrestricted donations.

Ongoing Operations and Maintenance Costs (if applicable)

There would be no additional or ongoing costs related to the projects that would be covered and made possible through this request.

Total Community Enhancement & Investment Funds Requested

300,000

Is this a multi-year request?

No

How many years have you received funding for this project?

2

When will your request for funding sunset for ongoing programs?

Though we anticipate that the need for what we do and what this program does (providing affordable home preservation and repairs for low-income homeowners), will be an ongoing need both in the City of Rancho Cordova and our greater Sacramento region - this request will support all the projects included in this request with no ongoing funding needed for the specific projects funded within this request.

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

Habitat will look to leverage funding from SMUD, the County of Sacramento, and a variety of other corporate, individual, and in-kind supporters to stretch City of Rancho Measure H dollars farther and help more people in need of affordable shelter, home preservation, and neighborhood revitalization support.

Project Schedule, Timeliness and Adaptability

Project Schedule

Upon notification of grant award: 1. Begin outreach activities to local organizations. 2. Open application process specifically to low-income Rancho Cordova residents. 3. Marketing campaign and work with media partners to broadcast opportunity to residents. 3. Begin application review and selection process. 4. Begin on-site reviews to define scopes of work and estimated costs. 5. Projects selected by no later than January and put into the construction que for completion no later than July 30. 2023. 6. Estimated time to complete each project can vary from a few days (beautification projects) to 4-6 weeks for critical home repairs depending on scope of work, weather, etc. 7. Completion of a minimum of 25 home repair projects for low-income Rancho Cordova homeowners by June 30, 2023.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

Careful consideration and conversation is always had with all Habitat leadership team members from homeowner services, construction, finance, development, and operations before requesting funding for a grant to ensure we can perform within the timeline, promises, and expectations of the grant. Both years we have been granted funds by the City of Rancho Cordova, we have/will exceed expectations in terms of impact numbers. Even during COVID in 2020 when our organization was shut down for 6 weeks, we were able to deliver and complete all projects within the time period and exceed expectations. We will do the same this current grant period with a larger funding allotment. Additionally, last month we hired an additional site supervisor dedicated exclusively to home repairs so we now have two full-time construction site supervisors dedicated to our home repair program. We also added two additional homeowner services team members on top of our Homeowner Services Manager to be able to better support our homeowner partners and qualify families quicker. Habitat is an organization which prides ourselves on always doing what we say we are going to do. Based on the surge of Rancho Cordova applications, our proven capacity, and our increased program and construction support added to our team over the past few months, we feel confident that the need is there as is our capacity to make a larger impact with larger grant support. Based on our current construction schedule, the need and interest for our repair services within the Rancho Cordova community, and our staff capacity, if awarded this grant, we will finish all projects by June 30th, 2023.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

In March of 2020, Habitat for Humanity was forced to close our retail outlet, the ReStore, with shelter in place orders. As the ReStore is a primary supporter of Habitat's operating costs including rent and staff, that meant temporarily furloughing 90% of the Habitat staff for 6 weeks and temporarily shutting down all the construction sites. Since bringing our staff back and reopening the construction sites in early May of 2020, we have been building forward bigger than ever and with the needed modifications when modifications were needed (less volunteers per site and tier-based allowances for who can volunteer, highly stringent safety measures and protocols on and off the construction site, doing exclusively exterior home repairs , etc.) to continue to operate safely and efficiently. While we are now back to our traditional pre-covid volunteer numbers and modes of operation, building forward through COVID taught our team how to be nimble and adapt to any situation while still staying on our build schedule and maintaining our commitments to funders and those we serve. As an essential business and with the modifications we have made and could make again to ensure we can continue to build forward and operate, this program will be able to continue to adjust, operate and perform as needed based on any California Public Health and Sacramento County Health orders.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Project Information

Project Name

Rancho Resilience & Reinvestment Project (Triple R)

Project Synopsis

Program supporting Rancho residents hit the hardest by the economic and social impacts of COVID-19. Services will offer wrap-around case-managed coaching services focused on wholistic support of each participant's needs. Resource Specialists offering a strengths-based, culturally responsive empowerment model will work with participants toward their financial, educational, employment, housing, domestic violence recovery and stress reducing goals. The outcome of this program is to revitalize the community, create participant support networks and recovery to those most impacted by COVID.

Project Description

Triple R will offer participants a chance to change their lives 180 degrees. Coaches will work with participants to identify and access next steps in their social and economic recovery. Immigrants, refugees and communities of color were impacted at astronomical levels with loss of employment, income and access to services throughout the pandemic. While this program does not only focus on these groups, FCCP has a strong relationship with each community in Rancho and this program will work to help participants help themselves. These supports will build community cohesion through networking, provide a positive outlet for self-discovery, inquiry, understanding and knowledge of support systems available. As each participant deepens in their own goals accomplishment and participation in programs this will provide a socio or economic benefit to the city by promoting community relations, residents' well-being, safety and increased economic stability.

Project Team

FCCP will be the main organization responsible for this project. The Director along with the Community Supports Manager will supervise a team of Resource Specialists committed to participant goals accomplishment, connection with resources and supportive activities. FCCP houses Rancho Cordova Job Center for easy referral and has myriad established community partnerships to fulfill this program's needs. FCCP currently has MOU's with WEAVE (domestic violence support provider), CSUS department of Social Work and Early Child Education, Chaplain University-nursing, Rancho Cordova Grocery Outlet, Mi Rancho Market, SMUD, SETA, EFSP and Sacramento's Family Support Collaborative to name a few. FCCP's Accounting department will support billing, payment and tracking of requests for support.

Application #81

Project Goals

Provide up to 480 participants with over 3200 supportive services to enhance their social and/or economic recovery from the pandemic. 960 Mental Health Rehabilitation Supports will be offered 1920 Stress Reduction workshops will be offered At least 80 Vocational Tuition Assistance supports 160 Food Vouchers/Gift Cards provided At least 80 Rental, Utility and/or Car Repair supports

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$1,752,074.00/year

Estimated Breakdown of Project Expenditures

Salaries + Benefits $587,184.00 Program Expenses $162,890 DIrect Community Supportive Services $1,002,000 *budget attached

Matching Funds

$52,000 will be secured for management positions and $25,000 for training from other programs.

Include Any Other Funding Contributions

FCCP has myriad short-term COVID funding grants that will end in this fiscal year. Some salary has been secured for management position from other related programs.

Ongoing Operations and Maintenance Costs (if applicable)

N/A

Total Community Enhancement & Investment Funds Requested

$1,752,074.00/year

Is this a multi-year request?

Yes

Number of Years

2

If you answered yes above, describe your sustainability plan and whether the project is viable as a single year request.

We will do our best if only one year is funded. Considering the wide-spread impacts of the pandemic, FCCP expects to be supporting community members through recovery for at least the next two-three years. FCCP continues to write for grants that will support our most impacted community members.

How many years have you received funding for this project?

0

When will your request for funding sunset for ongoing programs?

June 30, 2024

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

Participants will have access to other grants already held or to be held by FCCP such as: SETA Safety Net funding CBDG CARES funding Emergency Shelter and Food Program funding any other COVID recovery funds available

Project Schedule, Timeliness and Adaptability

Project Schedule

Program will need 4 weeks for start up and plans to be fully operational within 2 months. Completion date will be based on funding but is expected to be June 30, 2024 if fully funded.

Application #81

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

FCCP has a long history of supportive programs to the community. FCCP will outreach the program aggressively through social media, partners and businesses/institutions participants frequent. FCCP has a strong management team of qualified, skilled and tenured leaders. FCCP's Accounting department routinely processes related payment requests and tracking of qualifying data. Many of the proposed supports are already established through on-going MOUs and community relationships. This should prove advantageous to not only identifying participants but also providing connections and support.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

FCCP transitioned with-in three days of the original California Public Health order and has taken most documentation, meetings and programming online. FCCP will continue to adjust services to the needs of the community while adhering to the most current order with as little impact to participant access as possible.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

10665 Coloma Rd, Ste 200
Rancho Cordova, CA 95670

Other Physical Addresses (if project/program is at multiple sites)

Have you received a letter of support for the project/program from the property owner?

Requested, and will submit to city by March 18, 2022

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

No

Project Information

Project Name

Community Hub Program

Project Synopsis

This project is to assist and usher low income elementary children. Project is aim to purchase school supplies and related items to the low income children. They will have the equal opportunities to compete and thrive in their academic environment.

Project Description

This project is to ensure low income elementary students are given a fair opportunity to learn and thrive in their perspective schools. We would like to secure funding to provide necessary materials (school supplies, uniforms, backpacks, etc.) to low income elementary school children. This project will bring unity in community and opportunities for low income children and family to strive and thrive in our community.

Project Team

The Salvation Army of Rancho Cordova Corps

Project Goals

The purpose of the Community Hub program is to enhance the physical and mental well-being of the residents of Rancho Cordova by providing cultural and educational opportunities. This project goal is to provide necessary materials for low income elementary children to attend school without fear and shame of not having necessary items to study. Our goal is to ensure and instill confidence to the low income students to thrive and succeed in their environment.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$5,000.00

Application #82

Estimated Breakdown of Project Expenditures

1. Back to School shopping for low income elementary children Total: $5,000.00 a. Each student will have $100 to shop at the local store. Money can only be purchased toward school supply or school related items only. b. School supplies includes: Any writing materials, Papers or notebooks, Binders, backpack, desk supplies, color papers, and Folders. c. School related items includes: Tissues, Hand sanitizers, School Uniforms, Shoes (No sandals or flip flops), any type of socks, and Jackets or sweaters.

Matching Funds

None at this time.

Include Any Other Funding Contributions

No match fund at this time. We will provide volunteers to help with this event.

Ongoing Operations and Maintenance Costs (if applicable)

This program is designed to continue beyond 2022. Key to the success of the program will be the partnership with the local businesses and city of Rancho Cordova. The operation cost will be varied and will be raised through fundraisers and support from the city of Rancho Cordova. TSA is known for many successful fundraising events due to positive and loving relationship with donors, and also positive relationship with the partnership with the city of Rancho Cordova.

Total Community Enhancement & Investment Funds Requested

$5,000.00

Is this a multi-year request?

Yes

Number of Years

2

If you answered yes above, describe your sustainability plan and whether the project is viable as a single year request.

1. 45 days of the grant award, we expect to work with local school and community center to gather list of low income students. We will also be contacting local stores (Target or Walmart) to see if they can assist with this event. 2. Within 3 Months of the grant award, we expect to have complete list of students who qualify for this event. We would expect to secure a store to hold the event. 3. On September 3rd 2022, we expect to hold the event.

How many years have you received funding for this project?

0

When will your request for funding sunset for ongoing programs?

In year 2.

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

None.

Project Schedule, Timeliness and Adaptability

Project Schedule

1. Year 1 of the grant award, we expect to launch the program by shopping with the local elementary students in need. The program will be done with the local stores, such as (Target or Walmart). We will be with the students as they purchase each items. 2. Year 2-3 of the grant award, complete the following: a. Review all program procedures and make necessary refinements b. Establish effective strategy to better serve the low income students. Look for effective strategy to reach more low income students. c. Continue local community partners – elementary and middle schools, and other social service providers in Rancho Cordova. Formally establish relationships to facilitate community outreach and education. 3. Within 4th year of grant award, Be self sustaining with the local businesses and private doners for the funding of the program. 4. Continue programming on a annual basis 5. Work with TSA Development team to ensure funding is available to sustain program

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

This is one day event. We will only hold this event one time a year. We are not planning any additional program addition to the program above.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Yes we are able to adjust according to the California Public Health and/or Sacramento County Health Orders.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

10370 Old Placerville Rd.
107
sacramento, California 95827

Other Physical Addresses (if project/program is at multiple sites)

We will be shopping at local store, but it will depend on the store cooperation. We are planning to shop at either Target or Walmart.

Have you received a letter of support for the project/program from the property owner?

No

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

No

Project Information

Project Name

Soil Born Farms: Center for Food, Health and the Environment

Project Synopsis

New entrance signage and landscaping will be installed at Soil Born Farms, marking the final phase of major driveway and parking lot developments at the historic American River Ranch. These improvements are key steps in developing the site into a premier interpretive facility for food, health and the environment.

Project Description

Please see the full Project Description included as an attachment.

Project Team

- Shawn Harrison of Soil Born Farms, project lead. - Mark Thomas and Associates, designer and construction manager. - Theron Roschen and Paul Junker from Interwest Consulting Group, permitting and project management assistance. - Liz Bellas of Sacramento County Regional Parks Department, landowner. - Cordova Recreation and Park District leadership and planning staff.

Project Goals

GOAL: Elevate the visibility and appeal of Soil Born Farms through the development of a welcoming and attractive entrance, readying the American River Ranch for further improvements that will enable the site to serve as a preeminent interpretive center for issues of food, health and the environment. OBJECTIVES: 1. Finalize design and installation of entrance and marquee signage. 2. Complete landscape design, permitting and site preparation, and install plantings at site entrance and along the driveway corridor.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$313,969

Estimated Breakdown of Project Expenditures

Construction: $200,969; Design Support: $63,000; Construction Management: $50,000; Total Project Cost: $313,969

Matching Funds

Soil Born Farms will contribute Shawn Harrison's time for project coordination as in-kind match.

Include Any Other Funding Contributions

Matching funds totaling $2,400,000 have been sourced to date, detailed here: 1) Interpretive Center Entrance, Driveway and Parking Lot Upgrades: a) Entrance Signage and Landscape: Requested under this proposal; b) Driveway widening and tree mitigation: Funded by the City of Rancho Cordova; c) Parking Lot Construction: Design funded by the City of Rancho Cordova; $950,000 construction funding provided by Wildlife Conservation Board under direction of Lower American River Conservancy. 2) Utility Upgrades (water, gas, sewer lines; electrical service): Design and installation funded by the City of Rancho Cordova and County of Sacramento. All upgrades are near completion in 2022. 3) Farm Stand and Culinary Building Design: Funded by the City of Rancho Cordova. Design is under review with the City of Rancho Cordova. 4) Animal Barn and Program Design: $25,000 awarded from the Confluence Program administered by Sacramento Area Sewer District & Sacramento Regional County Sanitation District; $142,545 awarded from the Wildlife Conservation Board Lower American River Conservancy Program. 5) Pathways Design: $19,500 awarded from the American River Parkway Foundation Teichert-Parkway Fund to design a pedestrian pathway system for the American River Ranch, enhancing the property as an education and recreation resource of the American River Parkway. 6) Other: Private Donation of $1,000,000 has been pledged for construction of the Farm Stand and Kitchen building.

Ongoing Operations and Maintenance Costs (if applicable)

Ongoing maintenance of plantings and infrastructure will be provided by Soil Born Farms.

Total Community Enhancement & Investment Funds Requested

$313,969

Is this a multi-year request?

No

How many years have you received funding for this project?

4

When will your request for funding sunset for ongoing programs?

This request is for one year, but the development of Soil Born Farms' Center for Food, Health and the Environment as a regional destination and community education resource is a multi-year process.

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

Soil Born Farms will solicit funding for additional site development phases through the Wildlife Conservation Board's Lower American River Conservancy Program; the CA Farm to School Incubator Grant Program; from private donors including Dave and Maxine Clark who have made a $1,000,000 donation pledge to future construction; and continued funding requests to the City of Rancho Cordova's Measure H funding.

Project Schedule, Timeliness and Adaptability

Project Schedule

Project design finalization and permitting will take place July - October 2022, followed by site preparation, sign fabrication and installation, irrigation, planting and mulching. Installation is expected to be complete by April 2023.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

No delays are anticipated for the final design and installation of entrance signage and landscaping proposed here. Driveway and parking lot installation are near completion and will be finalized in the spring of 2022, well before this scope of work begins in July. Initial design work has already been completed with Mark Thomas and Associates (see attached Scope of Work document), readying the project for final design and permitting upon award.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

This is a construction and design project and should not be impacted by shifting health orders.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

2140 Chase Drive
Rancho Cordova, CA 95670

Other Physical Addresses (if project/program is at multiple sites)

Soil Born Farms has permission to operate programs and conduct development projects at the American River Ranch through our long-term lease with the County of Sacramento, which is on file with the City of Rancho Cordova.

Have you received a letter of support for the project/program from the property owner?

No

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

No

Project Description; Scope of Work; Estimate - Soil Born Farms.pdf

Read-Only Content

Thank you,
City of Rancho Cordova

This is an automated message generated by Granicus. Please do not reply directly to this email.

Application #83

Project Description

Describe the project in detail and how it benefits the community based on the City's Community Enhancement & Investment Fund guidelines and selection criteria. If you need more room to answer the question, please attach a separate document to your application.

The terminus of Chase Drive in Rancho Cordova offers direct access to a rare combination of community amenities not found anywhere else in the Sacramento Region. The corridor includes the 55-acre historic American River Ranch, the 63.5-acre Hagan Park, Cordova High School including the new Theater Arts center, Mills Middle School, Cordova Gardens Elementary and unprecedented access to the American River Parkway. These combined amenities currently attract a diversity of visitors and have the potential to engage many more through the development of dynamic health, recreational, educational, entertainment, agriculture, environmental and culinary experiences. Toward this end, Soil Born Farms is working diligently with the City of Rancho Cordova and other regional partners to create a Center for Food, Health and the Environment at the American River Ranch. This legacy project will anchor and tie these community amenities together, creating a preeminent location for visitors to access vital health resources, learn, celebrate and recreate.

PROPOSED SCOPE of WORK

The City of Rancho Cordova has been instrumental in funding backbone infrastructure improvements necessary to activate next steps of the interpretive center construction. The entrance signage and landscaping proposed here will bring completion to recent driveway and parking lot upgrades, which have created major improvements to the site's accessibility, safety, aesthetic appeal, and capacity to host visitors. Proposed actions under this request include:

- Design and installation of attractive Soil Born Farms entrance and marquee signage at Chase Drive. This will replace the temporary signage currently in place. Conceptual designs for this element and the landscaping plan were previously done by Mark Thomas and Associates. These plans will be modified slightly based on changes to the new driveway alignment.
- Design and installation of landscaping at the site entrance and along the length of the newly installed driveway. Landscaping will include a combination of native and drought tolerant plants consistent with landscaping in the completed parking lot.
- Please see Scope of Work and Project Drawing attachment for detail.

These steps will add to the charm of the Chase Drive corridor, and will increase Soil Born Farms' visibility to visitors from the Sacramento region and beyond. The upgraded entrance look will tie seamlessly into new bike/pedestrian pathway installation under the City of Rancho Cordova's Chase Drive - American River Parkway Connection Project (which also includes lighting, ADA design, and high visibility crosswalks). Combined, these improvements will ready Soil Born Farms to install a planned bike/pedestrian connector pathway paralleling the new driveway, providing safe, dedicated access from our site to 5 schools within walking distance, Hagan Community Park, and the American River Parkway pathway used by millions of recreationalists each year.

Application #83

SITE DEVELOPMENT ACCOMPLISHMENTS

With support from the City of Rancho Cordova and other partners, many major infrastructure upgrades are underway or have been completed. These are essential steps in preparing the site for new construction outlined in the American River Ranch Master Plan, toward the goal of establishing the Center for Food, Health and the Environment. Accomplishments to date include:

- Widened 2-way driveway entrance (completed)
- Paved, lighted parking lot with ADA stalls (completing spring 2022)
- Backbone utility upgrades of water, gas, sewer and electrical (completing in 2022)
- Farm Stand and Culinary Building final design (In final design review)
- Animal Barn design (currently underway in partnership with Cordova High School's Agriculture Academy, with funding from the Wildlife Conservation Board)
- ADA pathways with interpretive signage throughout the property (design planning currently underway with funding from the American River Parkway Foundation)
- This recent infrastructure complements the existing equipment barn, caretaker house, schoolhouse, farmhouse kitchen, outdoor theater, office building and outdoor patio - many of which have been constructed or renovated by Soil Born Farms.

These upgrades have paved the way for future site and program development including:

- Entrance Bike/Pedestrian Path: A dedicated, paved pathway paralleling the driveway, and connecting to Hagan Park and Chase Drive.
- Demolition, Drainage and Paving: Final preparation in advance of construction of the Farm Stand and Culinary Building and Animal Barn requires demolition of the existing buildings, drainage work, basic grading and paving.
- Animal Barn Construction: An animal program plan is currently being developed in consultation with the Cordova High School Agriculture Academy. A new joint-use Animal Barn will serve as a learning ground for high school students to practice research, holistic land management, animal science, sustainable agriculture and job skills. It will also provide exciting interpretation and education for visiting youth field trips and drop-in visitors. The barn and farm pastures will host a variety of animals including chickens, turkeys, sheep, rabbits and goats.
- Farm Stand and Culinary Building Construction: Providing healthy food access, culinary education for youth and adults, and sales for local farmers and food artisans. The facility will provide dynamic job training for high school aged youth focused on retail, customer service, culinary arts, farm value-added product development, catering, event management and sustainable food production.
- Visitor Center: Design and construction of a facility to interpret the rich history of this land, and the interface between food, health and the environment.

Key community benefits associated with the overall project include:

Community Pride:

- The Center for Food, Health and the Environment at the American River Ranch will anchor a combination of amenities that will draw national attention and create improved livability for local residents once fully developed.

Application #83

Civic Engagement:

- This project supports existing and future programmatic activities along the Parkway, at Soil Born Farms, and in Hagan Park that attract, engage and inspire a diversity of adult and youth visitors.

Quality of Life:

- Uses good design and agency collaboration to encourage reinvestment and renewed interest in a heritage neighborhood of Rancho Cordova.
- Provides low-cost access to healthy food and programs that help residents address diet-related health issues.

Public Safety:

- Creates improved and safer multi-modal access for residents to a facility that historically was not open to the public.

Arts and Culture:

- With the presence of Soil Born Farms at the American River Ranch, CRPD's historic Rescue Barn, and Cordova High Schools Agriculture and Culinary Academies, this project invests in a community site that celebrates and accentuates Rancho Cordova's rich agricultural history and commitment to playing a leadership role in the regional Farm to Fork movement.

Children and Youth:

- Food, agriculture, environmental stewardship and recreational services are all important career pathways that can be accented at this site with proper investment of infrastructure and programs. With five schools within walking distance to this location and easy access to bus and light rail, area youth and adults will have the opportunity to engage in dynamic life and career development activities from early childhood through adulthood. Current activities offered by Soil Born Farms include food production, community events, summer camps, field trips, adult classes, summer youth employment, cooking education, gardening education, animal husbandry, health and wellness education and environmental science education.

Application #83

PROJECT UNDERSTANDING

We are providing this scope and fee to document our understanding of the work required to complete landscape improvements along Soil Born Farms Road, based on our phone conversation of March 10, 2022, and follow up emails. This budgetary scope of services is provided to assist in development of a Measure H grant proposal for the completion of landscape improvements along Soil Born Farms Road. This area is completely within the County Parks property which Cordova Recreation and Parks District manages for maintenance and events. An exhibit showing the scope of the landscape improvements area is attached.

The proposed project intends to utilize previously delivered 100% drawings, prepared by Mark Thomas, and extract plans for construction that would include irrigation and planting along the west side of the road and a small portion to the east side of the entry leading to the new Soil Born Farms parking lot, entry sign design and preparation for future signage lighting. Construction budget is expected to not exceed $320,000, which includes additional engineering costs to complete the plans and construction support. The project may require audit of existing irrigation to satisfy parks department maintenance needs.

Soil Born Farms Road was previously constructed under another phase. Through that effort an arborist report was prepared, and the existing road was realigned and widened to a uniform width of 20-feet.

SCOPE OF WORK

TASK 1. PROJECT MANAGEMENT AND DOCUMENTATION

Task 1.1. Project Management

This task includes management of the scope items listed below. The Mark Thomas Project Manager will prepare progress reports outlining the tasks completed, tasks upcoming, and an overview of the project schedule will be prepared and submitted monthly. As part of this task, Mark Thomas will confirm the intent based on Measure H grant agreements. Mark Thomas will begin this work by preparing a draft estimate based on the 100% drawings to extract costs associated with the relevant programming of the site, as identified above.

Task 1.2. Meetings

Mark Thomas will facilitate and attend up to three (3) internal team meetings with City, SB Farms, and subconsultants. Due to the impact of COVID 19, these meetings are assumed to be web-based. Agendas and minutes will be provided for each meeting.

Task 1 Deliverables

- Agendas and Minutes for up to three (3) meetings

TASK 2. PUBLIC AND STAKEHOLDER OUTREACH (OPTIONAL TASK)

Task 2.1. Outreach Materials and Exhibits

Mark Thomas will produce “Plan View” renderings of the project to present to the public, city council, and various stakeholders. This scope assumes two (2) exhibits will be prepared.

Application #83

Task 2.2. City Council Presentations

Mark Thomas will prepare presentations and present at up to two (2) City council meetings.

Task 2.3. Stakeholder Meetings

Participate in up to three (3) meetings with project stakeholders. Mark Thomas will prepare meeting agendas and minutes. The anticipated meetings include:

- County Parks – 1 Meeting
- CRPD – 1 Meeting
- Cordova Community Council – 1 Meeting

Task 2 Deliverables

- Outreach Exhibits (2) (PDF)
- Council Meeting PowerPoint Presentation (1)
- Attendance at two (2) City Council Meetings
- Attendance, Agendas, and Minutes for up to three (3) Stakeholder Meetings

TASK 3. PLANS, SPECIFICATIONS AND ESTIMATE

Task 3.1. 100% PS&E

Based on the scope of work outlined above, Mark Thomas will prepare PS&E for the project area. This will include archiving the previous 100% plans prepared, editing the base plan to illustrate the project area, and revising the plans for the intended programming of the site. Specifications will be provided as a complete draft of all relevant sections. Specifications will be merged with the contract boilerplate provided by the City. Estimate will encompass all items identified on the plans at this level. This task will include an internal and external (to Soil Born Farms Director) QA/QC review prior to submittal.

Y&C will update the lighting plan, specifications, and cost estimate (PS&E) for SB Farms to current City of Rancho Cordova Standards and submit updated 100% PS&E to the City of Rancho Cordova for review.

The plan set will include the following sheets:

- title sheet and general notes (2 sheets)
- project control (1 sheets)
- demolition/tree protection plan (1 sheets)
- layout plan and construction details (2 sheets)
- irrigation plan and details (2 sheets)
- planting plan and details (2 sheets)
- electrical plan and details (to show lighting and conduit locations, lighting specification, and future connections) (2 sheets)

Task 3.2. FINAL PS&E PREPARATION

PS&E will be finalized with comments incorporated, supporting notes and necessary coordination. Mark Thomas and Y&C will prepare final plans, specifications, bid schedule, and estimate (stamped and signed) for permitting to required agencies.

Application #83

Task 3.3. BIDDING PS&Es

PS&E will be finalized with comments incorporated, supporting notes and necessary coordination. Mark Thomas and Y&C will prepare final plans, specifications, bid schedule, and estimate (stamped and signed) for bidding and construction.

Task 3 Deliverables

- 100%, Final, and Bidding Plans (Full Size 34x22 PDF)
- 100%, Final, and Bidding Engineer's Estimate (PDF)
- 100%, Final, and Bidding Specifications (PDF and MS Word)

TASK 4. DESIGN SUPPORT DURING CONSTRUCTION

Task 4.1. Bidding Support

During the bidding phase, Mark Thomas will assist the City and SB Farms by providing the following services:

- Assist with pre-bid questions, clarifications, and necessary addenda
- Attend a single pre-bid meeting

Task 4.2. Design Support During Construction

Mark Thomas will provide design support through the construction period to develop a conform set of plans for construction that reflect constructability review comments, addenda and RFI's from the bidding period, in addition to rectifying questions that cannot be answered by the Client's construction management team.

Task 4.3. As-Built Drawings

Based on red-lines provided by the contractor, Mark Thomas will prepare Record Drawings (As-Builts) for the City and Soil Born Farms Records. Drawings will be provided in PDF format.

Task 4 Deliverables

- Pre-Construction Meeting
- RFI Responses (PDF)
- Submittal Review
- As-Built/Record Drawings (Full Size 34x22 PDF)

ASSUMPTIONS AND EXCLUSIONS

- This scope assumes that Soil Born Farms will coordinate with County Parks to obtain the required permission to construct the project.
- Existing CEQA and IS/MND documentation will not be revised or recirculated.
- Drawings and plans for the Farm Stand will be provided by SB Farms.
- No utility design included with this scope (water, fire service, sewer facilities)
- No drainage design, analysis, or modifications to the sub-surface systems are proposed.
- Front-end or boilerplate specifications will be provided by the Client
- This scope assumes that no SWPPP will be required. The contract will include language directing the contractor to obtain the WDID number from the State Board.
- No roadway lighting is provided.
- No ADA improvements at Chase Drive or within the Soil Born Farms parking lot are needed.

- City will provide a no-cost encroachment permit to the contractor to construct.
- Contractor will be required to prepare a traffic control plan and comply with stormwater requirements.
- Outreach and Support will be completed by the County and/or Soil Born Farms. No additional exhibits are necessary for project approvals.
- Building permit processing will be provided by Soil Born Farms
- Tree Mitigation – Construction plans for mitigating removed trees will be completed by Soil Born Farms.
- Construction Management, inspection, construction staking, contractor pay estimating, coordination with grant administrator, and materials testing will be provided by Soil Born Farms.

Project Information

Project Name

Homeless Student Servicies

Project Synopsis

Education is a key element for the success of every great city. Students experiencing homelessness face unique challenges in accessing and succeeding in school. In partnership with the Department of Homeless Student Services of the Folsom Cordova Unified School District we propose to assign a fund to support the most vulnerable students in the Rancho Cordova area.

Project Description

The Department of Homeless Student Services identifies and supports students experiencing homelessness as described under federal law McKinney Vento Homeless Student Act. This act was enacted in 1987 to ensure that children and youth experiencing homelessness have access to the same free, appropriate public education and services as their non-homeless peers. Homeless Student Services works in collaboration with schools and community partners towards this goal.

Project Team

M. Elena Cabrera. Director, Categorical Programs and Grants Marjorie Diaz. Education Services Liaison M. Elena Cabrera. Director, Categorical Programs and Grants Marjorie Diaz. Education Services Liaison

Project Goals

Goals of this project include: 1. Identification of the students in the most need. This is an ongoing task during the school year. 2. Provisions needed to enable homeless children and youths to participate fully in school activities: a. Backpacks b. School supplies 3. Provision of emergency assistance needed to enable homeless children and youths to attend school: a. Shoes. b. Clothing: underwear, socks, hoodies, winter jackets. c. Commodities: Hygiene products, home-care products.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

Application #84

$15,000

Estimated Breakdown of Project Expenditures

$15000 annually in gift cards. The reason to ask for gift cards is because it is the best known and proven method for Homeless Student Services to monitor and control the usage of these resources per family. Students have the opportunity to wear new clothing and choose according to their style. This experience has proven to be positive for students in the homeless program. The fund will be distributed as follows: $10 000 for clothing, shoes, commodities and other needs for the families: Distributed in equal parts of $2500 per each one of the following stores: Target, Walmart, Amazon and Kohls. $5 000 for food needs: Distributed in equal parts of $500 per each one of the following: Restaurants: McDonalds, Taco Bell, Subway, Wendy's, Burger King, KFC and Domino's. With a much closer monitoring: Winco, Grocery Outlet and AMPM.

Matching Funds

. Free meals provided by schools. . District Transportation and Public Transportation (RT Cards). . Immunizations clinics for students attending Folsom Cordova Unified School District. . Free eye exams and prescription glasses for students without insurance. . Support for after school programs. . Support on individual interventions. . Connection to mental and emotional wellness providers. . Support on costs related to missed documents or enrollment deadlines, fines, or fees; records required for enrollment, including immunization or other required health records, proof of residency, or other documentation; or academic records, including documentation for credit transfer. . Connection to resources from local partners. Some examples are: . Department of Human Assistance . Rancho Cordova Navigator . Folsom Cordova Community Partnership . Rancho Cordova Food Locker

Include Any Other Funding Contributions

Ongoing Operations and Maintenance Costs (if applicable)

N/A

Total Community Enhancement & Investment Funds Requested

$15,000 Annually

Is this a multi-year request?

Yes

Number of Years

3

If you answered yes above, describe your sustainability plan and whether the project is viable as a single year request.

How many years have you received funding for this project?

0

When will your request for funding sunset for ongoing programs?

June 23, 2026

Do you plan to ask annually for funding?

No

What other funding will you seek to support your project?

N/A

Project Schedule, Timeliness and Adaptability

Project Schedule

Once funds are secured, the Homeless Student Services Department will distribute the resources on a per student need basis throughout the school year.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

This is a multi year grant request. All funds earmarked for 2022-2023 will be given to students before the end of the school year.

Application #84

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Yes.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

2460 Cordova Lane
Rancho Cordova, CA 95630

Other Physical Addresses (if project/program is at multiple sites)

Cordova Lane Center 2460 Cordova Lane, Rancho Cordova, CA 95630

Have you received a letter of support for the project/program from the property owner?

No

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

Yes, at a public K-12 school site

Which school district is the public K-12 school site located in?

Folsom Cordova Unified

Application #84

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR SCHOOL SITE USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a public K-12 school site, you must request the endorsement of the school superintendent of that school district.

One supplemental form is required per school district.

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by the corresponding school superintendent for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. Each participating school superintendent reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

To be filled out by grant applicant

Project/Program Name: Homeless Student Services Support

Name of Organization: Homeless Student Services Department.Folsom Cordova Unified School Dis

Name of Applicant and Title: M.Elena Cabrera. Director, Categorical Programs and Grants

Applicant's Phone: (916)294-9000 ext.103410 **Applicant's Email:** ECabrera@fcusd.org

Submit a copy of your application with this page to the school superintendent(s). For your application packet to be considered complete the signed and dated endorsement form must be received by the City of Rancho Cordova by March 18, 2022. The superintendent will submit the form directly to the City's Community Enhancement & Investment Fund team. You must submit this form and a copy of your application to the appropriate superintendent or his or her designee no later than March 4, 2022. For Elk Grove Unified School District use BGrewal@egusd.net. For Folsom Cordova Unified School District use agriffin@fcusd.org. For Sacramento City Unified School District use dianne-brown@scusd.edu.

To be filled out by School Superintendent or designee

Project Information

Project Name

Outdoor Kindergarten Learning Area at Cordova Meadows

Project Synopsis

We want to build an outdoor learning area with a shaded structure and tables in the kindergarten playground area.

Project Description

There is an area of our kindergarten playground that once housed a large redwood tree. As parts of the tree were dying and creating a safety hazard it had to be removed. Unfortunately when the tree was removed, the shade it provided was eliminated. Since it has been removed, we would like to turn the area into an inviting, outdoor learning area. We will cement part of it with tables and a shade structure. In the other part of it we will include bark and tree stump jumping stones for the students to play on. In this area we would put some garden boxes for the children to grow plants.

Project Team

Amber Fontaine -Principal, Amanda Walsh-Assistant Principal, and district facilities team (Matt Washburn and Mike Hammond)

Project Goals

We want to make an area on our kindergarten playground where students can go outside to learn and play. The area would be used by our kindergarten and preschool class during the school day. We would also use it as another space for our after school ASES program. Our long term goal is to use this space to support parent connection events for our School Site Council, English Learner Advisory Committee, and Black Student Union Parent Advisory. It would be a lovely space to host our family events in the evenings or the weekends.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

None

Project Schedule, Timeliness and Adaptability

Project Schedule

We will work with district facilities to get this project done in a year. The timeline will depend on availability of shade structure, tables, and tree stump jumping stones. We will work with facilities to coordinate timelines on laying down the cement as well.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

See above

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Yes, we will be able to adjust our project if any California Public Health or Sacramento County Health Orders change.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Application #85

CITY OF RANCHO CORDOVA
FISCAL YEAR 2022/2023 SUPPLEMENTAL ENDORSEMENT FORM
FOR SCHOOL SITE USAGE

The Fiscal Year 2022/2023 grant application period is open from February 7, 2022 through March 18, 2022. The City is accepting applications from individuals, organizations, businesses, and community partners who are interested in enhancing our community. If your project/program is intended to operate or take place at a public K-12 school site, you must request the endorsement of the school superintendent of that school district.

One supplemental form is required per school district.

By the deadline, the City of Rancho Cordova must also receive the supplemental endorsement form that has been signed and dated by the corresponding school superintendent for the application to be considered complete. It is the applicant's responsibility to ask for the endorsement in the time allotted. Each participating school superintendent reserves the right to withhold their endorsement of a project/program. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

To be filled out by grant applicant

Project/Program Name: Outdoor Learning for Kindergarten

Name of Organization: Cordova Meadows

Name of Applicant and Title: Amber Fontaine-Principal, Amanda Walsh - AP

Applicant's Phone: 916-294-9120 **Applicant's Email:** afontain@fcusd.org

Submit a copy of your application with this page to the school superintendent(s). For your application packet to be considered complete the signed and dated endorsement form must be received by the City of Rancho Cordova by March 18, 2022. The superintendent will submit the form directly to the City's Community Enhancement & Investment Fund team. You must submit this form and a copy of your application to the appropriate superintendent or his or her designee no later than March 4, 2022. For Elk Grove Unified School District use BGrewal@egusd.net. For Folsom Cordova Unified School District use agriffin@fcusd.org. For Sacramento City Unified School District use dianne-brown@scusd.edu.

To be filled out by School Superintendent or designee

Endorsement Given Yes

Endorsement Withheld

Conditional approval of facility rental only

Superintendent's or Designee's Printed Name: Dr. Sarah Koligian Sarah Koligian

Date: 3/17/20

School District: Elk Grove Unified Folsom Cordova Unified ■ Sacramento City Unified Other

Comments (Optional):

The school superintendent or designee will send this form directly to CEIFGrants@cityofranchocordova.org no later than March 18, 2022. Incomplete applications are generally not considered for funding, or the nature of the incompleteness may result in an application being ranked at the bottom or recommended to receive no funding.

Project Information

Project Name

Spark Mobile

Project Synopsis

Through our artistic box truck, Sacramento Valley Spark will bring interactive games, a cooling center and neighborhood cleanup tools to community events around the region.

Project Description

The Spark Mobile will provide a flexible platform for taking Sacramento Valley Spark's unique creative energy to numerous (at least 6) Rancho Cordova events over the course of a year. Through the "Spark" drive-thru and "art stops" events Sacramento Valley Spark has shared the art, music and energy of the local Burning Man community. These socially-distanced events provided a safe artistic outlet for thousands of people. Now as Covid-19 restrictions diminish, the demand for community events and human interaction is expected to soar. Rather than focusing our energy on one event, we want to make our energy available for multiple community events. The artistically wrapped Spark Mobile will bring hula hoop lessons, silent disco and scores of additional interactive games to events in Rancho Cordova and contingent on funding, around the region. In addition to the interactive activities, the spark mobile will include a water tank to provide a cooling zone (misters) and tools to help the community clean up. Global warming will mean more and more event producers will grapple with how to keep guests safe during extreme heat events. Our truck will provide a cooling zone for guests to rest and escape the heat. Sacramento Valley Spark and other groups have taken action to clean up our communities. Our truck can support those efforts by providing grabber sticks, buckets and other supplies to these trash pickups. While we envision seeking funding from additional agencies, contingent on funding, we'll commit to activities at least 6 Racho Cordova events. We project that our project – with four volunteers at the event – will directly impact 2,100 people over those six events.

Project Team

The project is a creation of the 501c3 nonprofit Sacramento Valley Spark. Our project team has successfully managed Community Enhancement Fund grants in 2020 and 2021. Galvanizing more than 300 volunteers, we hosted "Summer Spark drive-thru" in 2020 and in 2021 we hosted a "Spring Spark drive-thru" and the "Art Stops" activations in conjunction with Regional Transit. Ed Fletcher, SVS President Ed Fletcher is a Sacramento-based journalist with two decades spent between Capital Public Radio and The

Sacramento Bee, where he served as the guild leader. Jon Thompson, Vice President Jon Thompson is a metal artist and journeyman union electrician. Thomas Hall, Treasurer Hall is the executive director of CleanStart Inc the regional cleantech Non-Profit. Angela Gentry, Secretary Gentry is a marketing professional with extensive experience in sales and brand management. Krista Gurko, Board Member (Artistic, Leadership) Krista has experience in performance and community art engagement, nonprofit leadership, managing volunteers in civic engagement, higher education instruction, and innovative exchanges with diverse populations. Arthur Zwern, Board Member (Artistic, Leadership) Arthur is a real estate developer, inventor, entrepreneur, investor, and creator of one of the world's most popular crowdsourced art projects. DamenQuincy Hayes, Director (Artistic, Technical) DamenQuincy is a long-time recruiter and manager of artistic and technical talent for SVS events and promotional materials.

Project Goals

The goals of the "Spark Mobile" are to promote interaction with strangers, community safety through the cooling zone, and community pride through the support of trash cleanups. Interaction Human interaction through art, learning, and play creates stronger, happier communities and has been sorely missed during Covid restrictions. An example of similar, stationary publicly available activities can be seen at Sacramento's Downtown Commons activity area including cornhole (toss game) before Kings games. Hosted activities may include Hula hoop making + lessons Tutu making Name tag games Silent disco Community safety Global warming will result in the increasing frequency of extreme heat events that threaten the safety of event attendees and the viability of the overall experience. The Spark Mobile through an onboard water tank and deployable misting towers and shade structures will be able to provide a cooling zone that will allow attendees to lower their body temperatures and avoid the dangers of heatstroke or heat exhaustion. The vehicle and cooling zone can be deployed for humanitarian safety reasons that do not have community event elements. Community Pride Keeping our communities free of trash and rubbish is an increasingly difficult task. While we can't immediately solve all of the factors that lead to littering and blight, we can encourage citizens to care about their community and to actively work to make it cleaner. Rancho Cordova has long been home to river cleanups hosted by the foundations linked to the American River. Since 2019, Sacramento Valley Spark has been hosting now quarterly "Moop Your City" trash collection events. M.o.o.p. is an acronym in the Burning Man community for Matter Out Of Place. With grabber sticks, buckets, bags and sharps disposal boxes, the Spark Mobile will support these efforts and make trash collection a fun, community-bonding experience.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

18500

Estimated Breakdown of Project Expenditures

Expenses (12 months) Vehicle Lease $3000 Vehicle Storage $3000 Insurance $2000 fuel $2400 wrap $2000 Mister build $2000 silent disco $2000 other-equipment $2000

Matching Funds

In addition to in-kind support from a vehicle provider, we are seeking additional funding through foundation support, direct fundraising, and government grants. Project costs may have to be cut to fit available funding. Funding sources In-kind vehicle subsidy $9,000 SVS Fundraising, Support $2,000 Sac County $2,000 City of Sacramento $2,000 Office of Emergency Services $2,000 Corporate, Foundation Funds $3,000

Include Any Other Funding Contributions

(see above)

Ongoing Operations and Maintenance Costs (if applicable)

Projected annual costs Vehicle Lease 3000 Vehicle Storage 3000 Insurance 2000 fuel 2400

Total Community Enhancement & Investment Funds Requested

$10,000

Is this a multi-year request?

No

How many years have you received funding for this project?

0

When will your request for funding sunset for ongoing programs?

Application #86

This project is designed so that it can easily be continued (without startup costs) in future years however, we are not seeking multiyear funding at this time.

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

We will be seeking additional funding through foundation support, direct fundraising, and government grants. Project costs may have to be cut to fit available funding. Funding sources In-kind vehicle subsidy $9,000 SVS Fundraising, Support $2,000 Sac County $2,000 City of Sacramento $2,000 Office of Emergency Services $2,000 Corporate, Foundation Funds $3,000

Project Schedule, Timeliness and Adaptability

Project Schedule

March 2022 RC Grant Submitted April - June 2022 Additional Grants Submitted July 2022 RC Grant Awarded Sept 2022 Vehicle Received Sept. -Dec. 2022 Vehicle Buildout Jan. April Kid's Day May Rancho Cordova International Festival June July 2023 Rancho Cordova July 4 celebration August Sept project closed

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

Based on the project timeline, 'Spark Mobile' will attend Rancho Cordova events as early as September 2022 and into June 2023. Planned events include Kids's Day, International Festival, Sacramento International Marathon and the California Capital Airshow. We'll discuss whether the vehicle will be available for Rancho Cordova's July 4 celebration. Unless ongoing funding is secured project winds down in September 2023.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Sacramento Valley Spark has demonstrated through our drive-thru events, our ability to alter our events to accommodate current public health orders. All Spark mobile activities will be outdoors and will employ social distancing as needed. We're committed to public safety and are adaptable to changing conditions.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

CORDOVA COMMUNITY COUNCIL

March 18, 2022

Ed Fletcher
Sac Valley Spark
Via email

Re: Support for Spark Mobile

Dear Ed,

The Cordova Community Council is delighted to support Sacramento Valley Spark's proposal to create a "Spark Mobile."

The Cordova Community Council – through our Mine Shaft event center – has worked with Sacramento Valley Spark as you hosted the 2020 Summer Spark Drive-Thru and 2021 Spring Spark Drive-Thru events. Both events operated safely and contributed a much-needed boost of artistic energy to the community. The COVID-safe events allowed thousands to enjoy art, music and food without leaving their vehicles.

As we understand, the Spark Mobile will bring art, interactive games, a silent disco, and a cooling center to Rancho Cordova events. We would be excited to incorporate participation at events such as Kids' Day, July 4 celebration, iFest, and our outdoor movie and concert nights. It sounds like fun!

The Spark Mobile activities would add new energy to our longstanding events benefiting the community. I hope the Community Enhancement and Investment Fund process supports this innovative idea and I look forward to busting some moves of my own via Silent Disco!

Sincerely,

Shelly Blanchard

Project Information

Project Name

Rancho Cordova School-Year Service Program

Project Synopsis

Sierra Service Project seeks funding to continue its long-standing home repair and youth service program. This project will focus on engaging groups of local middle and high school students during the school year in hands-on home repair and community-based service projects. Youth will gain skills, and the community will benefit!

Project Description

Since 2015, Sierra Service Project (SSP) has hosted over 1,400 volunteer days and completed 106 exterior home repair projects for 74 low-income City residents. In 2022, we are focusing our projects on equipping local youth volunteers. Objectives of this program are reciprocal and benefit youth volunteers and the home repair or community-based project beneficiaries, including: - To provide high school and middle school youth with meaningful service-learning opportunities, a positive and fun volunteer experience, and inspire a life-long passion for service. - To equip youth with invaluable home repair life skills. - To increase civic engagement through youth volunteers from local groups. - To enhance the quality of life of Rancho Cordova residents by providing safer homes, beautifying neighborhoods, and increasing community pride. In 2022, we plan to reboot our long-standing Rancho Cordova School-Year Service Program with a new approach: 1) In coordination with the City of Rancho Cordova staff and their new volunteer platform, coordinate two regular monthly work days to aid in volunteer recruitment and project scheduling. 2) Work with school, church, and other youth volunteer groups to commit to multiple work days during the school year in advance of the funding cycle. This proactive approach will keep interested groups accountable, and help us plan projects for faster completion and set clear expectations for beneficiaries. 3) Focus on building long-term relationships within the community. Elderly residents need home repairs, and are often lonely. Volunteer home repair not only makes a home safer and increases community pride, but is an opportunity for young people to develop intergenerational relationships with the homeowner and adult volunteers they are working with. 4) While focused on youth, we welcome volunteer groups of all ages! Skilled volunteers can help prepare the project for a youth work day, or tackle any particularly challenging aspects.

Project Team

Application #87

A Program Manager will be responsible for the development and delivery of this project. They will be supervised by our Executive Director, Megan Taylor, who has spent the last seven years involved in our Rancho Cordova program. SSP's Business Manager, Jake Bailey, will provide bookkeeping, insurance, budgeting, and HR support, and SSP's Project Manager will advise the Program Manager with their deep construction and project planning expertise. The Program Manager will work closely with the City, low-income homeowners, community-based organizations, and youth volunteer groups to plan projects and lead work days. They will focus: 1) Externally on outreach, building new relationships with volunteer groups. They will spend at least one day a month at community events in Rancho Cordova, getting the word out about our service-learning opportunities for youth. 2) Internally on maintaining existing relationships, documentation and database records, and proactive communication with constituents via phone, email, and mail. We are in the process of identifying school, church, and other youth-focused partners to commit to work days next school year. Cordova High School's construction teacher Andre Leineke has already committed to two volunteer days in fall 2022. We will partner with at least two different community-based organizations to engage youth in service-learning beyond home repairs. This could be gleaning citrus with Soil Born Farms to donate to local food pantries, volunteering on environmental conservation projects and community gardens, or painting a nonprofit or school building.

Project Goals

1) To complete between 20 and 30 home repair project units between July 2022 and June 2023. These projects will improve the quality of life and safety for the homeowner, and increase community pride by repairing or replacing fences, porches, stairs, ramps, exterior paint, and installing drought tolerant front yards. 2) To spend at least one work day per quarter devoted to a community-based project. This is a new goal for our work in Rancho Cordova, but an extension of the community partnerships we have at our other sites. We will connect our volunteer groups to local nonprofits that need an infusion of volunteer labor or a repair project on their facility. SSP will supervise the work, provide volunteer support, and building supplies as needed. 3) To work with at least three dedicated groups of youth over the course of the school year. These groups will provide regular, repeat volunteers for work days. The frequency will be determined by each group, but we will recommend one day per quarter. 4) To complete high quality home repairs which are a source of pride for the homeowner, volunteers, and staff. Overall homeowner satisfaction survey responses will be over 80%. 5) To provide a positive service-learning experience for youth volunteers to enjoy their work, learn new skills, build intergenerational relationships, all while having fun. Overall volunteer satisfaction survey responses will be over 80%.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$70,700

Estimated Breakdown of Project Expenditures

See attached budget PDF. SSP has been the recipient of six funding cycles since 2015, although this year we are requesting funds for two different projects. This funding request is an increase from previous grant cycles to account for rising wages and increased building material and gas costs due to inflation. To fund a half-time, qualified, Program Manager, it is essential that we raise the wage to $20 per hour.

Matching Funds

At minimum, SSP will host on average two volunteer days each month, 22 work days total across 11 months. With an average of seven volunteers per work day, we estimate 154 volunteers working on average 5 hours per day for a total of 770 volunteer hours. This volunteer time is valued at $33.61 per hour for a total of $25,880 of matching funds.

Include Any Other Funding Contributions

N/A

Ongoing Operations and Maintenance Costs (if applicable)

N/A

Total Community Enhancement & Investment Funds Requested

$70,700

Is this a multi-year request?

No

How many years have you received funding for this project?

6

Application #87

When will your request for funding sunset for ongoing programs?

We anticipate there will always be a need for volunteers within the City, whether for home repairs and maintenance, or community-based projects. Hopefully this ongoing investment in equipping youth volunteers will maintain community pride and investment within the City! Someday these youth will likely be homeowners and will have the skills to repair their homes.

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

Volunteering will be free to participate, so there will be no fees (earned revenue). To keep our costs low, we will seek business support through donations and discounts including restaurants, building supply stores, etc. These efforts will offset only a small portion of costs.

Project Schedule, Timeliness and Adaptability

Project Schedule

In advance of the project timeline, once approved for funding, SSP will begin scheduling groups for work days during the summer and beyond. Our goal is to have work days scheduled a quarter in advance, with the flexibility to host interested volunteer groups on shorter notice. The project timeline for this request is July 1, 2022 to June 30, 2023. July 2022: Begin hosting two work days per month with youth on summer break. We will also begin attending one community outreach event per month to get the word out about youth service-learning opportunities, focusing on signing up repeat groups for the school year. Each quarter we will host a work day for community-based projects for youth volunteers. Also quarterly, we will check in with the City to make sure we are on the same page. Fall 2022: Work with Cordova High School's Advanced Construction class taught by Andre Leineke. During two school days, an estimated 15 students will work at two homes each day. During winter and spring breaks, and long holiday weekends, we will host out of town volunteers for work days in Rancho Cordova. At least once per year, we will host our board of directors and staff for a work day in Rancho Cordova. This is usually in January, but may be in April or October. May 2023: Host a special gathering to honor youth who volunteered two or more times throughout the school year. We would celebrate their commitment to community service and validate any required hours needed for school (at this time or in advance). We will present a small token of appreciation to any seniors. June 2023: Focus on final project completion and reporting.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

Proactive scheduling of youth volunteer groups will be the key to success for this project. Through outreach in advance of the project start, focusing on repeat volunteer groups, adding monthly participation in local events, and utilizing the City's new volunteer platform, we anticipate a stronger connection with volunteer groups during the 2022-2023 school year. The Advanced Construction class at Cordova High School has already committed in March 2022 to join us for two volunteer days in the fall. We are excited to connect students learning about carpentry and construction techniques with real world application repairing homes within their community. This can aid in inspiring young people to pursue a career in construction trades, by connecting their skills and interests with local homeowner and family needs. We also have a small team of retired, weekly volunteers who can move projects toward completion between volunteer groups, and we are actively seeking skilled individuals to join them.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

SSP has taken the safety of our volunteers, staff, and homeowner beneficiaries very seriously throughout the COVID-19 pandemic, pausing volunteer groups for almost a full year. In April 2021 we shifted to begin hosting a group of skilled, retired, weekly volunteers who were vaccinated and eager to get back to work. Since then, they have spent 38 Wednesday mornings completing home repairs in Rancho Cordova! We now have access to better tools and knowledge about limiting the spread of COVID to prevent interruptions in our work projects. Staff and volunteers are required to be fully vaccinated for COVID, including a booster as eligible. Currently, we require KN94, KN95, or N95 masks inside, and COVID testing for any overnight volunteers. Through this funding, our projects have always been outside, focusing on improving community pride and homeowner quality of life. This means all of our projects have a built-in safety measure. While we are not requiring masks outdoors, we are providing masks and hand sanitizer to all volunteers. We are confident these protective measures have set us up for sustained success, and with only minor additional precautions, we will be able to adapt to any state or county restrictions without interruption to our goals.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Project Information

Project Name

Rancho Cordova Summer Service Program

Project Synopsis

Sierra Service Project seeks funding for a new youth summer program in Rancho Cordova. This project focuses on engaging middle and high school students in hands-on home repair and community-based service projects during a week of their summer break. Youth will gain skills, have fun, and the community will benefit!

Project Description

Since 2015, Sierra Service Project (SSP) has hosted over 1,400 volunteer days and completed 106 exterior home repair projects for 74 low-income city residents. We are proposing a summer service-learning program in 2023. Objectives of this program are reciprocal and benefit local youth, youth from outside the community, and home repair and community-based project beneficiaries, including: 1) To provide high school and middle school youth with meaningful service-learning opportunities, a positive and fun volunteer experience, and inspire a life-long passion for service. 2) To equip youth with invaluable home repair life skills. 3) To increase civic engagement through youth volunteers from local and traveling groups. 4) To enhance the quality of life of Rancho Cordova residents by providing safer homes, beautify neighborhoods, and increase community pride. For the first time, SSP is proposing to establish a summer site in Rancho Cordova. Currently our other summer community partners are based throughout California in Del Norte and San Diego Counties, and in the Navajo Nation in Arizona. In 2022, our summer program will host over 800 volunteers who dedicate a week of their summer to service-learning. By adding a site in Rancho Cordova, we will be adding a closer option for our pool of volunteers from the middle of the state, including the Bay Area and the greater Sacramento region. We will invite youth volunteers from Rancho Cordova, and other regions, to join together to spend a week completing home repairs for low-income residents, and projects with community-based organizations. The program will offer day and overnight programs, to accommodate the needs and interests of both local and outside volunteer groups.

Project Team

A team of seven young adult staff will run our summer program. We will seek applicants from Rancho Cordova, and our broader constituent base. Staff don't need any prior experience, and will spend 10 days in training prior to hosting volunteers. The staff will be supervised by our Executive Director, Megan Taylor, who has spent 7 years

involved in our Rancho Cordova program, and 12 years managing SSP's summer program. The headquarters staff in Sacramento that will support the team includes our Business Manager and Director of Engagement and Impact. The staff will consist of: 1) A Site Director who will serve as the team lead and be a liaison between the staff, volunteers, City, homeowners, and community partners. This person will have at least one year of experience on SSP staff. 2) Three Construction Coordinators who will meet with homeowners and community partners to plan projects and lead work days. They will rotate between work projects, providing instruction and support. 3) Two Food Service Coordinators who will prepare meals for volunteers and staff. At least one dinner per week will be open to the public as a community dinner. They will manage food inventory, kitchen volunteers, and provide a meal plan that accommodates all dietary needs. 4) A program coordinator who will plan activities and discussions for volunteers to process their service-learning experience. This includes coordinating with community speakers and weekly full group community-based service activities. We will work with 10 to 25 groups of youth and adult volunteers. Individual youth will be welcome. Local volunteers will be invited to participate either just during the day, or for the full week staying overnight. In addition to community-based project partners, our host facility will be another major partner. SSP will seek a school, church, or other space to house volunteers and staff overnight and a place to prepare meals, provide showers, etc.

Project Goals

1) To complete between 40 and 50 home repair project units between June and August 2023. These projects will improve the quality of life and safety for the homeowner and community pride by repairing or replacing fences, porches, stairs, ramps, exterior paint, and installing drought tolerant front yards. 2) To spend at least one work day per week devoted to a community-based project. This is a new goal for our work in Rancho Cordova, but an extension of the community partnerships we have at our other sites. We will connect our volunteer groups to local nonprofits that need an infusion of volunteer labor or a repair project on their facility. SSP will supervise the work, provide volunteer support, and building supplies as needed. 3) To work with at least one local group of youth per week. Local groups and outside groups who travel to Rancho Cordova will serve side by side, learning about each other and the various backgrounds they come from. Peer relationships will be formed across communities. 4) To complete high quality home repairs which are a source of pride for the homeowner, volunteers, and staff. Overall homeowner satisfaction survey responses will be over 80%. 5) To provide a positive service-learning experience for youth volunteers to enjoy their work, learn new skills, build intergenerational relationships, all while having fun. Overall volunteer satisfaction survey responses will be over 80%.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$104,800

Estimated Breakdown of Project Expenditures

See attached PDF for a simplified breakdown of summer program income and expenses. SSP provides week-long volunteers with overnight housing, meals from Sunday night to Saturday morning, building materials for projects, staffing, t-shirt, and more. Volunteers are required to provide their own transportation during the week, and adult volunteers at a ratio of between 1:4 and 1:5 youth.

Matching Funds

SSP will host six weeks of volunteers during summer 2023. This accounts for 200 volunteers who will spend a week serving in Rancho Cordova. This is equivalent to 800 volunteer days. Working 6 hours per day, we estimate a total of 4,800 volunteer hours. This volunteer time is valued at $33.61 per hour for a total of $161,328 of matching funds!

Include Any Other Funding Contributions

Typically SSP's summer program participants pay a fee to cover the costs of volunteering, and we offer scholarships — provided by donors — to low-income participants. It is important to us that our programs are accessible to anyone who wants to participate. For this program we are proposing a small $60 deposit fee per person, to keep

volunteers accountable to their commitment after signing-up. Deposits for 200 volunteers will cover $12,000 in costs. If the City of Rancho Cordova is not able to fulfill our funding request for this program, we would need to offset the difference with greater participant fees from volunteers. For example, if $70,000 was granted by the City, SSP would need to charge 200 participants a $174 fee (including the $60 deposit) to cover the rest of our costs (the remaining $22,800). Our other summer program sites (which are not funded by significant grant awards) have a participant fee of $455 per person, so this would still be a cost-effective summer program for families. We recognize the economic disparity between families including those who have the time to volunteer versus those who need to work to support their families. Eliminating the need to rely on large participant fees would significantly reduce the barrier to participation that fees and traveling long distances requires of families.

Ongoing Operations and Maintenance Costs (if applicable)

N/A

Total Community Enhancement & Investment Funds Requested

$92,800

Is this a multi-year request?

No

How many years have you received funding for this project?

6

When will your request for funding sunset for ongoing programs?

We anticipate there will always be a need for volunteers within the City, whether for home repairs and maintenance, or community-based projects. Hopefully this ongoing investment in equipping youth volunteers will maintain community pride and investment within the City! Someday these youth will likely be homeowners and will have the skills to repair their homes.

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

To keep our costs low, we will seek business support through donations and discounts including grocery stores, building supply stores, etc. These efforts will offset only a small portion of costs.

Project Schedule, Timeliness and Adaptability

Project Schedule

The project timeline for this request is March 1 to August 31, 2023, spanning two funding cycles. Fall 2022: Volunteer outreach and recruitment begins for Summer 2023. October 2022: Registration opens, $60 deposit to reserve a space. We'll continue to sign-up volunteer groups through winter and spring. December 2022: Staff outreach recruitment begins. March 2023: Hire staff team of seven young adults. April and May 2023: Online training for staff and volunteers. Staff site visit to coordinate with community partners and begin project selection. June 2023: Ten days of in-person staff training on job specifics and conflict resolution, leadership, working with youth and adult volunteers, etc. One week of preparation before volunteers arrive. First session of volunteer groups begins at the end of the month. July 2023: Four week-long sessions of volunteer groups throughout the month. Peak season for project completion. August 2023: Last weeks of volunteer groups, followed by a few days of completing projects (as necessary) and packing up the site by staff. Staff gather from all sites for a few days to debrief their summer, and share highlights and lessons learned with other staff, SSP's board, community partners, etc. A few months after the summer, a survey will be sent to all homeowners and community-based organizations who received work projects to gauge their satisfaction with the work, volunteer, and staff. Weekly schedule: Sunday: Volunteers arrive, in-person orientation. Monday: Tool training and half work day. Tuesday: Full work day, community dinner, and local speaker. Wednesday: Half work day as a full group with a community-based organization, half day at the river and BBQ dinner. Thursday: Full work day, off-site evening program. Friday: Full work day, end of week celebrations. Saturday: Volunteers depart after cleaning up, volunteer survey, group photo,

etc.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

Integrated into SSP's flagship, 47-year-old summer program, registration will be streamlined and advertised 9 months in advance. By providing Rancho Cordova as a site location, a large portion of SSP's existing volunteer base will be funneled into this program. This will allow for local outreach to plug into an already-successful program, instead of starting from scratch. Due to multiple volunteer weeks running simultaneously in various locations, our summer program is much more rigorous and scheduled than our year-round program in Rancho Cordova has been. Six weeks of volunteers requires intense staff preparation, a learning curve for staff during the first few weeks, and a number of weeks where the program is running smoothly. Consistent volunteer groups throughout six weeks will aid in timely project completion. More volunteers means more completed projects! Since this program spans two funding cycles, it will not be completed by June 30, 2023 but instead August 31, 2023.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

SSP has taken the safety of our volunteers, staff, and homeowner beneficiaries very seriously throughout the COVID-19 pandemic, pausing volunteer groups for almost a full year. We now have access to better tools and knowledge about how to limit the spread of COVID to prevent interruptions in our programs. Staff and volunteers are required to be fully vaccinated for COVID, including a booster as eligible. Currently, we require KN94, KN95, or N95 masks inside, and COVID testing for overnight volunteers. We have a Medical Advisory Council of health care professionals which advises our safety policies. We meet monthly to review our safety policies and adjust accordingly. We know the world will change significantly in the next 15 months. Our projects in Rancho Cordova have always been outside, focusing on improving community pride and homeowner quality of life. This means all of our projects have a built-in safety measure. While we are not requiring masks outdoors, we are providing masks and hand sanitizer to all volunteers. We are confident these protective measures have set us up for sustained success, and with only minor additional precautions, we will be able to adapt to any state or county restrictions without interruption to our goals.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

Various
Rancho Cordova, California 95670

Other Physical Addresses (if project/program is at multiple sites)

Various private homes and community-based organization sites.

Have you received a letter of support for the project/program from the property owner?

No

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

No

Project Information

Project Name

Learning Tools For A Successful Community

Project Synopsis

This project is empowering the Rancho Cordova community for economic success through domestic violence awareness and hands-on technical training. By equipping the residents with the new abilities of proven techniques for safety and lifelong learning, this project directly contributes to job placement and retention in Rancho Cordova.

Project Description

The economic damages that family and domestic abuse has on a community may be the single most contributing factor to generational poverty. Victims of intimate partner violence lose a total of 8 million days of paid work each year and the cost of intimate partner violence exceeds $8.3 billion per year. Furthermore, between 21-60% of victims of intimate partner violence lose their jobs due to reasons stemming from the abuse. People try to leave abusive relationships, but they lack the tools to change. [redacted] the residents of Rancho Cordova will benefit with a DV awareness campaign. This project will use technical training and a series of awareness events to equip Rancho Cordova women and the community with the lifelong tools to be economically independent. The participants in the training will learn how to make self-defense tools, DV awareness materials, and artistic displays that reflect their experiences. By using modern manufacturing equipment, the participants will be exposed to viable manufacturing careers. This project will be aligned with the California Mobility Center's Career Pathways model which intends to establish pipelines from underrepresented communities into economically viable manufacturing careers needed to support Clean Mobility. The culmination of job training, self-empowerment, and DV awareness will lead to enhanced community connectedness. In connected communities, members gain a sense of belonging and purpose from the experience of both deriving value from and adding value to their community. Stronger connections increase a person's sense of hope and self-worth, and the ability to cope adaptively in the face of adversity. As a result, community connectedness is a protective factor that enhances well-being, fosters resilience, and promotes prevention. This project will reinforce Rancho Cordova as a model of community connectedness where people build relationships, strong networks, and thrive economically.

Project Team

Application #89

Project Team: Heather Morrow / KitnCut - Project manager and administrator - current owner of laser cutting company, DV survivor, project lead experience; will implement all aspects of the project, including outreach, facilitating resource shares, contract administration, and convening meetings for interest in future Peace Institute, events, and training and support. Kitncut serves to set itself as a vital link for the entrepreneur and industry sector of Rancho Cordova. By providing low cost manufacturing services to small businesses in the area, we are in line to bring manufacturing back to the States, ensuring fair pay and sustainable practices for a more solid future. Our mission is to help small businesses level up to that next step, helping them to fly. In the same way, Heather Morrow, owner of Kitncut, has made it out of abusive situations, while working full-time in professional jobs, and raising two children. She can see a clear vision of how to empower people to get out or help their loved ones out of a bad situation. Heather has project management experience from previous work on her resume, and is a great connector of people to people and people to resources. John Brewer -mentor, local NVC affiliate/Qi-Gong Master, licensed marriage and Family Counselor Soroptomist Club - Community outreach and engagement. Works with women and children with years of experience in all aspects of domestic violence and mutual aid with their care programs in Rancho Cordova. Sheryl Longsworth is taking the lead in their group. ASCRIBE Educational Consulting (Author, Educator) - Direct community link and seminar leader for empowerment California Mobility Center - Employer engagement, job placement, community partner engagement, participant mentoring

Project Goals

Project Goals: The project's long-term goal is to build a comprehensive domestic violence awareness and abolishment campaign to raise public safety, awareness, and economic sustainability. Using this project as the launch, KitnCut intends to lead efforts to establish Rancho Cordova's own Nonviolent Communication Center for Family Health. This is based on the NVC teachings of Dr Martin Luther King Jr and the King Center in Georgia which focuses on attacking the root causes of poverty like unemployment, domestic violence, and lack of resources and education. The project goals for 2022-2023 are to: Host at least 2 community-based domestic violence and anti racism trainings hosted by ASCRIBE Educational Consulting Recruit at least 3 other women-owned businesses as mentors and consulting support Host at least 4 women-led technical training sessions Host at least 1 career fair specifically for Rancho Cordova manufacturing companies Host at least 1 diversity, equity, inclusion (DEI) awareness training for employers Participate and distribute awareness materials at at least 4 community events (e.g. Kids Day in the Park, Hoppin at Hagan, houses of worship, Bliss Marketplace, etc) Align with Women in Manufacturing summit in October 2022 (also sponsor tickets) Metrics: Job Placement in Rancho Cordova Manufacturing Sector Total participant intake to existing programs Number of inquiries to help line Number of external resources leveraged Number of people enrolled in technical training Number of responses to community awareness and education surveys or interviews

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

Year 1 Rancho Cordova Funding Request: $112,000

Estimated Breakdown of Project Expenditures

Equipment/Curriculum: $30,000 Program Implementation Manager: $54,000 Training Materials: $10,000 Professional Consulting/Staff: $15,000 Tools/carepaks: $3,000

Matching Funds

Community Fundraising will be done for the culminating event

Include Any Other Funding Contributions

Family contributions from the Morrows: $2,000

Ongoing Operations and Maintenance Costs (if applicable)

none

Total Community Enhancement & Investment Funds Requested

$204,000

Is this a multi-year request?

Yes

Application #89

Number of Years

3

If you answered yes above, describe your sustainability plan and whether the project is viable as a single year request.

Multiyear Request: Yes. 3 years (through 2024). The ongoing budget will not include additional equipment. Future funding requests from Rancho Cordova will be $92k. Since the project is connected to the larger CMC program, this project will be viable as a feeder to the larger CMC program over multiple years. If only funded for one year, Kitncut will be able to gainfully employ at least 5 more people over 2 years while increasing production capability to 500%. This falls in line with our placement on the state and county contracts vendor lists, and ability to employ DV survivors, while also enabling more small clothing designers access to the cutting services, thus growing the textile and clothing manufacturing in Rancho Cordova.

How many years have you received funding for this project?

0

When will your request for funding sunset for ongoing programs?

June 20, 2026

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

Community Donations via kickstarter, fundraising sales of sewn products, Heather Morrow public art auctions via Natomas Art and Garden Center

Project Schedule, Timeliness and Adaptability

Project Schedule

Ongoing carepack production and info giveaway Ongoing outreaches via community event vendor table Recruit 3 additional woman-owned business owners Faith-based community partner outreach meetings June 2022-june 2023: technical training for interested parties/ continued outreach/ monthly partner meetings to reach the most vulnerable populations/one on one support October 2022: 3 day culminating accessible event of speakers, creation intensives, NVC workshops (ASL, interpreters, ADA access provided) October 2022: Women in Manufacturing Expo Expand real time knowledge of how to prevent violence and encourage thoughtful communication in the community. Will be measured by reduction in domestic violence. Begin talks to create a safe space (long term goal) in Rancho Cordova for survivors to rebuild through entrepreneurship and education.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

The project team lead is Heather Morrow (proprietor of KitnCut) and she will dedicate the majority of her time to this project. The total project team has the ability and resources to support Heather in the execution and administration of this project through June 30,2023 and beyond.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

This project will be able to adapt to any health advisories as the training sessions can be hybrid with virtually delivered sessions combined with hands-on training in an open warehouse space. The public events can be hosted in outdoor venues as well.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

11275 Sunrise Gold Cr Ste V
Rancho COrdova, CA 95742

Other Physical Addresses (if project/program is at multiple sites)

Application #89

Community Events that are already licensed (vendor booths), and churches

Have you received a letter of support for the project/program from the property owner?

No

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

No

Application #89

SUPPLEMENTAL INFORMATION
Learning Tools for A Successful Community

LEVERAGE:
Kitncut currently offers immediate mutual aid on a per-case basis to DV survivors and the unhoused, giving hygiene products, clothes, and resource referrals. Once you've been through DV, it's like an unspoken bond. This is how survivors make it out. By engaging with the public at ground level and meeting people where they are, we can direct more people to the services already in place, like weave, women's empowerment, and women's business center, harm reduction services, 12-step recovery programs, and self defense classes, while equipping them with better skills through our complimentary services. This will directly help stabilize them and prepare them for our job placement features.

COMMUNITY BENEFIT:
Raising awareness about domestic violence is a benefit to everyone. Once the conversation is started, people can learn how to get out of bad situations, and know how to safely help. Reducing violence reduces health issues, improves study habits, reduces truancy and makes for a more wholly functioning and contributing person to the community.

CHILD/YOUTH EDUCATION: Knowing the signs and how to get help for violence in the home leads to more stable families, and breaks generational trauma. Children are often aware even when we don't tell them. The sooner they can own their truth and believe in themselves, the stronger they are as a person, and more able to help others.

COMMUNITY PRIDE: To make a house a home, we must create a feeling of safety, helping people to understand that they are not alone, and there is a way out. We can teach each other to be the most helpful in de-escalating a violent situation and making it safe for all.

QUALITY OF LIFE: Community events that share education, joy, and
Social interactions are core memories for our children. Getting together for positive change encourages healthy habits and friendships. Friendships inspire care and concern for one another, and that is what a good life is made of. When tv and the internet are filled with all kinds of violence and bad decisions, let's show each other that we care. Violence free homes are directly correlated to less disease.

ARTS, CULTURE, HISTORY, ENTERTAINMENT:
Domestic violence awareness helps us all realize our similarities, as it crosses all lines of color, socio-economic background, and ability. And it helps us realize we are all deserving of loving and caring environments. The plaques and motto signs that will be made will be hung in prominent areas, encouraging everyone to take a chance and do better. Also, helping survivors realize art outlets to work through trauma will foster future community arts, and help people celebrate their cultures through artistic expression. We can recognize our history and how knowing it can help us shape a better future. Fostering a safe community allows entertainment to flourish, as people feel safe to express themselves in a safe environment.

BUSINESS/ECONOMIC DEVELOPMENT: see opening of paper: our program will immediately help to alleviate the overreaching community pains and lasting scars that domestic violence has on each of us, and the workforce of our city. Additionally, with more manufacturing equipment for classes, Kitncut will be able to gainfully employ at least 5 more people over 2 years while

increasing production capability to 500%. This falls in line with our placement on the state and county contracts vendor lists, and ability to employ DV survivors.

WORKFORCE/ECONOMIC IMPACT OF DOMESTIC VIOLENCE IN THE COMMUNITY:

- **Victims of intimate partner violence lose a total of 8.0 million days of paid work each year.[6]**
- **The cost of intimate partner violence exceeds $8.3 billion per year.[6]**
- **Between 21-60% of victims of intimate partner violence lose their jobs due to reasons stemming from the abuse.[6]**
- **Between 2003 and 2008, 142 women were murdered in their workplace by their abuser, 78% of women killed in the workplace during this timeframe.[4]**

PHYSICAL/MENTAL IMPACT

- **Women abused by their intimate partners are more vulnerable to contracting HIV or other STI's due to forced intercourse or prolonged exposure to stress.[7]**
- **Studies suggest that there is a relationship between intimate partner violence and depression and suicidal behavior.[7]**
- **Physical, mental, and sexual and reproductive health effects have been linked with intimate partner violence including adolescent pregnancy, unintended pregnancy in general, miscarriage, stillbirth, intrauterine hemorrhage, nutritional deficiency, abdominal pain and other gastrointestinal problems, neurological disorders, chronic pain, disability, anxiety and post-traumatic stress disorder (PTSD), as well as**

noncommunicable diseases such as hypertension, cancer and cardiovascular diseases. Victims of domestic violence are also at higher risk for developing addictions to alcohol, tobacco, or drugs.[7]

You've seen it happen, or maybe you heard it through a wall. Someone got hit, someone is screaming, or you heard a thud that made your heart drop. Why does it matter? How is it your problem? You've heard it before: "Mind your business; what are you looking at? You want next?" Abusers tell us it isn't our problem. But really, it's our only chance.

It's our world. No one will fix it for us. We are all one human race, whether we realize it or not, and we have to start sticking up for each other, or we will be next. Granted, we can't always put ourselves in harm's way for another- I mean, would it make the abuser stop or would they go for you, too? If you called the cops would they show up soon enough, or would they know which person was the aggressor? This is no new fight. It can be confusing when we live in a war fueled world, but it is really only a coward that wants to hit someone out of anger.

Just 5 sick days (the average number of dv callouts by survivors per year, over the allotted sick days) for 10 employees (a conservative number of employees experiencing domestic violence on average in a 100 person company) can cost a company over a million dollars in revenue. This doesn't even touch on the impact it has on bystanders and loved ones that are witness to the violence, and the hopelessness that individuals throughout the community feel when faced with how to make a change or a difference without endangering themselves.

Abusers are lost in their trauma. It is up to them to change. Even leaving abuse, sometimes people do not yet possess the tools to change into what they want to be. A lot of those tools are books and conversations, and when we think we are alone, or that our pain is the worst, as James Baldwin said, we can open a book and see that our suffering is the human condition.

EQUIPPING RANCHO CORDOVA WITH THE TOOLS TO MAKE SAFE AND HEALTHY DECISIONS.

The answer is in the mechanics of our wiring. Just like any job, handyman, or craftsman… any worker needs to be equipped with the proper tools, special tools of building a safe city, where we feel safe to still be the "city of play."

Domestic Violence affects everyone and so it will take a commitment from everyone to help change the narrative. Rancho Cordova is a young city, full of young people, and it's our chance to turn the tide. Women have traditionally been kept from education in many parts of the world, yes, even

here… some even being taken away from their homelands and transferred over here with no knowledge of how to speak the language, and no links to resources, let alone where to begin to find them. These women are the backbone of our society, someone's daughter; someone's mother, someone's sister, someone's wife. Each and every one deserves the chance to support herself at the task she chooses.

We are proposing a support service of immediate and ongoing outreach to supply women and children with self defense access and mindfulness/situational awareness training to lead to employment.
Included is at least 2 community-based domestic violence and anti racism trainings, to empower women to financial independence and security, with translators offered. This will be accomplished with working models of women- owned businesses as mentors, consulting support, and at least 4 woman- led technical training sessions. These will lead to careers in manufacturing at local companies here in Rancho Cordova through the California Mobility Center support of job placement services.
As seen in the statistics above, helping to end domestic violence helps solidify the local economy by reducing turnover and encouraging safety and accountability from all of us. Having people with stable relationships gives the community people that keep their jobs and keep roles filled so that business can keep going. We intend to do mass marketing, show up at every community event to do giveaways of supplies that they will let us attend, especially Kids Day in the Park, Hoppin at Hagan, and Bliss Marketplace, also Fusion Rose First Thursday. We will also complete targeted marketing to all houses of worship in the area, and all women's and local groups. In addition to the education, we will offer a stress buster/ art break at the booths for trauma survivors and anyone who wants to partake. A focus will be on womeninmanufacturing.org and their 3 day summit on October 8th. We would like to sponsor tickets for a certain number of individuals for their virtual offering, and also offer scholarships to the King Center's Online Course offerings to interested parties.

Support letters to be included from:
John Brewer (local NVC affiliate)
Soroptomist Club (already work with women and children)
LGBTQ Center
Antirecidivism Space

Our overreaching, long-term goal is to build a comprehensive domestic violence awareness and abolishment campaign to raise public safety and awareness. This will span the next ten years, and culminate in the housing of Rancho Cordova's own Nonviolent Communication Center for Family Health. This is based on the teachings of NVC of Dr Martin Luther King Jr and the King Center In Georgia that focus on attacking the root causes of poverty like

unemployment, domestic violence, and lack of resources and education.

*** *Community connectedness* refers to the nature and quality of engagement among community members, including individuals, families, neighborhoods, groups, organizations, institutions, and social networks (i.e., schools, cultural-based organizations, faith communities, social media). It involves the relationships people have with each other as well as their level of engagement with the broader community. In connected communities, members gain a sense of belonging, purpose, and mattering from the experience of both deriving value from and adding value to their community. Stronger connections increase a person's sense of hope and self-worth, and the ability to cope adaptively in the face of adversity. As a result, community connectedness is a protective factor that enhances well-being, fosters resilience, and promotes prevention. A connected community is where people build relationships, strong social networks, and thrive.https://preventipv.org**

Project Information

Project Name

Rancho Cordova Elk's Facilitiy Improvements - for Use by Local Fundraising Entities

Project Synopsis

The Elk's Lodge is an ideal place to host local fundraising events. Elk's is requesting funds to improve the kitchen capacity, efficiency and to reduce operating expenses. With a great location just off Sunrise Blvd just 4 miles south of Highway 50, a large main dining/meeting room, parking on site, a full service bar and complete commercial kitchen - the Lodge can be adapted to provide the ideal location for any number of events at a significantly lower cost than commercial providers.

Project Description

It is difficult to find locations in the Rancho Cordova area that provide meeting space, access, parking and a full commercial kitchen to provide a location for non-profit events that support the community – and at an affordable price. Elk's cannot currently fund the improvements to improve capacity and the flexability needed to support a variety of events. But with a small amount of funding, this Lodge can provide a significant asset to the Community. The Rancho Cordova Elk's Lodge has most basic items needed to support a variety of events. Currently the Elk's host 50 to 60 events per year. That leaves over 300 days per year that the Lodge can be available for non-profit organizations to host fundraising, educational seminars, shows, or other events. Costs can be kept to a minimum, with no mark-up on food costs or labor – straight pass through on support costs and a minimal rate to cover Lodge operating expenses (estimating 15 – 20% of revenues). The current Lodge has some shortcomings that should be addressed to maximize it's potential. The Kitchen has a limited capacity to provide enough meals in a timely manner, and to adapt to a variety of uses. The only griddle is small, and needs to be replaced with a larger unit for breakfast and quick meal preparation. The dishwasher is undersized and it's capacity is not adequate for proposed needs. Upgrading and adding several other appliances will also improve the capacity and flexibility of use (coffee maker, cleaning equipment, a food warming steam-table, sneeze-guards, cold salad bar table, etc.) A successful project will provide a great location with the equipment needed to support a variety of events and the lowest cost, with minimal energy use and overhead. The community will benefit for years to come across a wide array of needs. Any small investment can contribute to a number of future events and needs.

Project Team

Chairman of the Board Bob Roe Secretary Gary McCoy Trustee Scott Anderson Trustee Norm Mayer Trustee Jerry Miller

Application #90

Project Goals

To allow for tracking of the events and success, the following metrics can be tracked for each event. 1. Event Sponsor 2. Number of attendees 3. Gross sales revenue for all event related sales 4. Total cost of goods sold and any labor to support the event 5. Net proceeds after a percent sharing agreements with Elk's (fully disclosed) 6. Attendee feedback will be requested and tracked (quality of the food, service and overall facility ranking). A successful year will show increasing use of the Lodge, larger and more efficient fundraising events (actual dollars provided as a result of the event) and community awareness of the capabilities of the facilities and it's Elk's members and supporters. Also, by providing a central location for events, it is hoped that like minded supporters of Rancho Cordova non-profits - may join the Elks and increase the pool of talent and experience available to further support the community going forward.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$45,245.34

No increase to existing costs, energy savings will decrease costs.

Total Community Enhancement & Investment Funds Requested

$45, 245.34

Is this a multi-year request?

No

How many years have you received funding for this project?

0

When will your request for funding sunset for ongoing programs?

TBD

Do you plan to ask annually for funding?

No

What other funding will you seek to support your project?

Rancho Cordova Elk's Lodge will provide additional funds to support Lodge updating and improvements.

Project Schedule, Timeliness and Adaptability

Project Schedule

Upon approval of project, equipment and improvements will be ordered. Currently, suppliers are quoting 2 to 3 month delays. But fully expect to complete the installation of all equipment by August 2022. Lodge is fully useable and availble currently with minor closures to complete the larger installs.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

As long as supplier delays don't change or improve, full project completing should be August 2022.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

We will adapt to any changes in Health Orders as needed. Only complete closure would alter planned timing and project completion.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

Project Information

Project Name

Sacramento Children's Museum Exterior Entryway Enhancements

Project Synopsis

Sacramento Children's Museum requests $194,652 in funding to renovate the Museum's exterior entryway – adding a new colorful canopy and a seating area bench at the main entrance – to make the building more identifiable as the Sacramento Children's Museum and to create a more captivating Museum entry experience for visitors.

Project Description

Sacramento Children's Museum (SCM) requests $194,652 in funding support to renovate the Museum's exterior front entrance. There are two components to this project. The first is the construction of an exterior canopy above the entrance doors. This canopy will be composed of aluminum columns and beams draped with woven wire mesh panels in the Museum's brand colors. The second component is the addition of a concrete seating area bench outside the front doors. This seating area bench will match that at the entrance to Rancho Cordova City Hall, with a gathering area in front. This project supports the City's focus area of Arts, Culture, History, and Entertainment. As the first and only children's museum of its kind in the Greater Sacramento region, Sacramento Children's Museum is a favorite family destination for Rancho Cordova residents and families from afar. Because we are such a regional draw, it is in our best interests for our building to stand out, and these renovations would achieve that goal. This new exterior entryway design will differentiate the building from others nearby and make the building more identifiable as a Children's Museum. This also has the potential to draw in more families who simply pass by the Museum. These transformations also will enhance the Museum experience for the thousands of children and adults who visit each year. The colorful canopy will provide guests with a glimpse of the playful adventures awaiting them inside, leaving a lasting impact for children and their families. The outdoor seating bench area is another great addition for guests. It can serve as a gathering area for school field trips, family picnics, and outdoor Museum-led programs.

Project Team

The project designer is Marthe Aston, RID, NCIDQ, of Aston Design, and the contractor is MarketOne Builders, Inc. Sharon Stone Smith, SCM's Executive Director, will oversee the project.

Project Goals

Application #91

The project's goals are to improve the building's branding – making the building more identifiable as the home of the Sacramento Children's Museum – and to create a captivating Museum entry experience for visitors. We will measure our success in meeting these goals by seeking visitors' feedback through in-person conversations and surveys.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$194,652

Estimated Breakdown of Project Expenditures

$7,500 - Design, development, and management services by Marthe Aston, of Aston Design; and $187,152 - Contractor fees by MarketOne Builders, Inc. The breakdown of the contractor fees are as follows: $1,500 - Demolition; $136,147 - Cost of materials: concrete, metal and steel, and paint and caulking; $18,610 - Contractor insurance & fees; and $30,895 - General supervision, permit, and inspection fees.

Project Schedule, Timeliness and Adaptability

Project Schedule

Construction is expected to start by December 2022 and end by June 2023.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

SCM will work closely with the project designer and contractor to ensure that construction remains on schedule, as outlined in the project timeline.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Application #91

This project would not affect the Museum's operations/guest experience, as this is for construction work to be completed on the exterior of the building.

PROPOSAL

This proposal is between Sacramento Children's Museum and Marthe Aston, Aston Design, for the design, development and management of a new exterior canopy and seating area at the entrance to the museum.

SCOPE OF WORK

The exterior canopy above the entrance doors will be composed of aluminum columns and beams draped with woven wire mesh panels in the museum's brand colors. The seating area bench will match that at the entrance to the City of Rancho Cordova, with a gathering area in front.

Marthe Aston will provide the following:

Design Development

- Finalize design for canopy and seating area

Construction Drawings

- Prepare drawings necessary to obtain Permit. Drawings to include but not limited to:
  - Cover Sheet with General Notes and Project Data, and ADA requirements
  - Outline Site Plan
  - Dimensioned Site Plan
  - Elevations and Details as required by City of Ranch Cordova
- Issue drawings to third party services and coordinate (civil and structural engineers)
- Prepare Building Department permit application forms and coordinate submittal documents.
- Submit the Permit application to City of Rancho Cordova.
- Monitor the permit review process.
- Prepare and coordinate submittal of additional requested information and revisions to obtain approvals.

Construction Administration

- Coordinate and respond to Requests for Information from GC.
- Review submittals and shop drawings.
- Visit the site as requested by Museum to ensure construction is progressing in accordance with the construction documents.
- Assist in final walk-through with GC and Sacramento Children's Museum. Prepare Punch List and distribute to Museum and GC.
- Includes (1) Travel/ trip for one person – expenses per trip not to exceed $750.00

<u>Not in Scope of Services:</u>

- Third Party Services to be contracted directly with Sacramento Children's Museum:

- Civil and Structural Engineering
- Cost of Plan Review and Permit Fees
- Changes to Design after finalized and approved.

FEES:
Fees are based on the Scope of Work listed above.

Design Development	Fixed fee of	$1,000.00
Construction Drawings	Fixed fee of	$4,750.00
Construction Administration	Fixed fee of	$1,750.00
TOTAL		**$7,500.00**

PAYMENT SCHEDULE:
Payments to be made as follows:

- **$2,000.00** will be paid at signing of contract and before commencement of work.
- **$2,750.00** will be paid upon submission of construction drawings to City for Permit.
- **$1,000.00** will be paid upon Permit approval.
- Remaining **$1,750.00** amount will be paid on a monthly basis according to actual percentage of work complete.

Sincerely,

Marthe Aston

Project Information

Project Name

Empowering Our Peace-Keepers to De-escalation

Project Synopsis

Our police operate on outdated training that relies heavily on gun usage. We propose to enforce the training of officers to de escalation techniques. We purport to accomplish this by having Jiu Jitsu trainer and author, Tom Deblass in for a conference to teach against use of excessive force. This, pared with training from the Dr. King Center, in Georgia, will keep our communities safer and our police relevant to our ever growing people of color residents. Dr. King Center is on board and looking forward to the conversations.

Project Description

The project will consist of coordinating a visit and seminar for all the RC police with the King Center for Peace out of Georgia, and Jiu Jitsu instructor and motivational speaker and author, Tom Deblass. Travel and lodging and seminar price will be covered, and we would like to host Q and A for the officers with both parties. LEVERAGE: We will partner with and encourage local jiu jitsu gym owners to attend, so they can further the lessons offered by Tom. We will leverage existing mental health services in the community to bridge the divide of reactive to responsive in our officers. The Non-Violent Communication talks will be continued by John Brewer, certified NVC specialist in town. COMMUNITY BENEFIT: The de-escalation techniques already being taught would help our officers stay safer in dangerous situations, giving them more tools to communicate with people they are in contact with. This will empower police officers and give them pride in their ability to not discharge their weapons unnecessarily. Quality of life: 40% of cops abuse their spouses. This training will not only help them to de escalate on the job, but also at home, creating healthier generations Arts, culture, history: When a community is less violent, arts flourish. People feel safe to create. This directly enhances the beauty of the town and the people that live in it. We can be a huge part of history and lead the way for the country to a more relevant police unit, safer for all. Business\economic development:. Providing police with NVC and deescalation techniques, and holding them accountable to use them, will encourage economic growth. No one likes to live where the cops are known to be aggressive. Businesses will want to open here, knowing the cops won't arrive with guns drawn.

Project Team

Application #92

Project Team: Heather Morrow: Recovered Anger Addict, DV survivor, business owner: responsible for overall management of the project, from police meetings to event organizing, and speaker arrangements John Brewer: NVC Specialist: Ongoing Education Felipe Bragiao- Ongoing Jiu Jitsu Training

Project Goals

To decrease excessive force of officers by 75% over the next year, and to establish a healthier relationship between the cops and people of color and youth in the city by implementing empathy training. Expand Continuing education of nonviolent communication techniques for police officers, metrics measured by surveys and report analysis of incidents.

Project Information

Project Name

Black Child Legacy Campaign Rancho Cordova Service Extension

Project Synopsis

For decades, Black children have died at higher rates than other children in Sacramento County, a tragic, shameful and preventable loss of precious lives. These persistent disparities reflect systemic racism and the barriers it creates to the health and life chances of Black children. To address the disparities and break down the barriers, Sacramento County's Board of Supervisors asked The Center at Sierra Health Foundation, working with community leaders, public officials, and advocates, to create a plan for change. In response, the Black Child Legacy Campaign (BCLC) was launched in 2015 with the goal of saving children's lives by transforming community systems of support. Currently, seven neighborhoods within the City of Sacramento - Arden-Arcade; Del Paso Heights/North Sacramento; Fruitridge/Stockton Boulevard; Meadowview; North Highlands/Foothill Farms; Oak Park; and, Valley Hi – have full-fledged BCLC operations and offer a comprehensive menu of programs and services managed by seven community-based organizations (CBO) in each respective neighborhood. Greater Sacramento Urban League is the CBO leading the BCLC efforts in Oak Park. While our formal, and priority service population is residents of Oak Park, a significant number of Rancho Cordova residents come to our Oak Park office for services and to participate in our programs. However, due to the strictures of our BCLC funding agreement and limited staff capacity, we are not always able to provide the level of support and allow participation in our programs to residents of Rancho Cordova to the extent needed or to meet demand. An award of Ranco Cordova Community Enhancement and Investment Funds will allow us to provide fuller and better services and program participation to Ranco Cordova residents reaching out to us in Oak Park, as well as allow us to actually deliver services and offer programs on occasion physically within the City of Rancho Cordova.

Project Description

BCLC uses five strategies to spark its transformational goals: building community advocacy for anti-racist, pro-community policies; advancing equitable investment and systemic impact; coordinating systems of support for children and their families; establishing a system of accountability and collective impact; and creating communications that spur neighborhood pride and activism.

Project Team

Application #93

The project team is led by Jedida Gomes, GSUL Director of Health & Quality of Life Empowerment, and also includes GSUL Oak Park staff members Christopher Clark (also Folsom-Cordova Unified Board of Education), a crisis intervention worker and a case manager. The Oak Park office houses a County of Sacramento probation officer and asocial service worker who are assigned full-time to support the BCLC effort.

Project Goals

The Black Child Legacy Campaign (BCLC) has the goal of saving children's lives by transforming community systems of support. Fulfillment of the BCLC's goal is not only already saving children from dying but also building community capacity to end the generational cycle of trauma and heartbreak. By starting with community leadership and advocacy and building an infrastructure of care for children and their families, it is possible to change the trajectory of tragedy for Black children and families in Sacramento County and Rancho Cordova, specifically, with funding support from the city's Community Enhancement and Investment Fund. BCLC draws on the power inherent in Black communities to provide a legacy of health, pride, and love to our children.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$110,000 for Rancho Cordova-specific program and service extension. The overall BCLC cost is $442,000 annually.

Estimated Breakdown of Project Expenditures

- Rancho Cordova-designated BCLC team member (.75 FTE) wages and benefits: $45,000; this is a new hire - Rancho Cordova-held Program/Event costs: $17,500 - Rancho Cordova-specific Supplies/Materials/Printing/Marketing costs: $7,500 - GSUL Overhead/Administration: $40,000

Matching Funds

The Center at Sierra Health Foundation provides $400,000 annually for the BCLC efforts in Oak Park. GSUL anticipates leveraging this funding to cover an estimated $40,000 in our overhead/administration costs incurred by the Rancho Cordova service extension.

Include Any Other Funding Contributions

City of Sacramento: $42,000

Ongoing Operations and Maintenance Costs (if applicable)

N/A

Total Community Enhancement & Investment Funds Requested

$70,000

Is this a multi-year request?

No

How many years have you received funding for this project?

0

When will your request for funding sunset for ongoing programs?

June 30, 2023

Do you plan to ask annually for funding?

Yes

What other funding will you seek to support your project?

Other funding is already secured as identified above.

Project Schedule, Timeliness and Adaptability

Project Schedule

July 1, 2022 to June 30, 2023.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

Application #93

GSUL has been operating the Black Child Legacy Campaign in Oak Park for five July to June fiscal years. Given our experience with operating on this timeline we do not anticipate any issues with meeting our projected timeline.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

Yes. BCLC in Oak Park has been adjusted for the past two years to adhere to California Public Health and/or Sacramento County Health Orders.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Physical Address of the Project Location

2331 Alhambra Blvd. Suite 300 Sacramento, CA 95817 (updated at applicant's request)

Other Physical Addresses (if project/program is at multiple sites)

Have you received a letter of support for the project/program from the property owner?

Yes (includes if you are the property owner)

Letter of Support from Property Owner (not K-12 schools or park/park facility)

Is your project/program intended to operate or take place at a public K-12 school site and/or a park/park facility?

No

Project Information

Project Name

Pack 387 Pinewood Derby/ Space Derby Tracks

Project Synopsis

Pack 387 is in need of a pinewood derby and space derby track so our scouts can participate in these annual pack events. We currently have to borrow a track from another pack in the pocket area so we can hold these events.

Project Description

One of the most popular events that people think of when looking back on their Cub Scouting past is the Pinewood Derby. Pack 387 is a new pack in Rancho Cordova located down the street from city hall, making us 1 of 3 Cub Scout packs in the Rancho Cordova area. We are looking to provide a Pinewood Derby and Space Derby track for the Scouts of Pack 387, the tracks will be used for our annual Pinewood Derby and Space Derby races. These events teach our youth about camaraderie and sportsmanship as well as experience the sense of accomplishment and excitement of competition. These tracks would also be a great event to bring out for youth events in Rancho Cordova that Pack 387 participate in.

Project Team

Committee Members of Pack 387

Project Goals

We have already done research on the needs for the tracks and found what is the best fit for our needs. If funding is approved our committee will place the order for the tracks and submit all necessary paper work into the city.

Funding Request

Funds are generally not intended to be used for deferred maintenance and ongoing operational needs. The funds are intended for community enhancement & investment.

Total Project Cost

$2573.00

Estimated Breakdown of Project Expenditures

Best Track 3 Lane 49' Pinewood Derby Track - $966.00 Best Track Space Derby Track - $310.00 Champ Track Timer - $575.00 Grand Prix Race Manager Software - $75.00 Best TrackStart Gate Servo - $230.00 Shipping $387.00

Matching Funds

No

What other funding will you seek to support your project?

None

Project Schedule, Timeliness and Adaptability

Project Schedule

Once funding is approved the tracks and necessary components will be ordered. With a 3-4 week lead time we hope to have everything ready for our first race next March.

In addition to providing the project timeline identified above, describe how you will be able to complete your project by June 30, 2023.

If lead times are extended due to material shortages we will look into an alternative track manufacturer.

Please note, if selected for funding, you will be required to submit a narrative Outcomes Report and a financial Use of Funds Report at least two times during the grant period.

Will you be able to adjust your project if California Public Health and/or Sacramento County Health Orders change? For example, the program could operate virtually or with other modifications made. Please describe.

This project only requires virtual contact with the suppliers.

Project Location

Please note that projects or programs that are proposed on property owned or operated by outside agencies or a private party will require the coordination with and potentially approvals from outside agencies, organizations, and/or the private party.

Application #94

City of Rancho Cordova
2729 Prospect Park Drive
Rancho Cordova, CA 95670

Subject: Measure H Community Enhancement and Investment Fund 2022-23

To: City Enhancement Board

I am in support of Cub Scout Pack 387 requesting funding for (1) pinewood derby track and (2) space derby track. Cub Scout Pack 387 was re-established in Rancho Cordova after the former Pack was re-absorbed into Pack 380 and under the Rosemont and South Sacramento/Elk Grove area during the Golden Empire Council re-districting of area District boundaries.

Robert Young, the current Cub Master of Pack 387, was an original member of Pack 387 and is an accomplished Eagle Scout and trained leader and Camp Committee Chair in the Golden Empire Council. He is an active member of our community and working to rebuild and grow this new pack. Cub scouts are recruited through current members (i.e. school friends) as well as public community events (i.e. Kids Day in the Park).

The equipment request is essential to having quality driven events that the current scouts and future scouts will be able to utilize and enjoy for many years to come. The Pack is very new and they have had very little opportunity to fundraise in these past two years of covid restrictions. It is our hope to reach as many of our local youth as possible and get them involved in scouting at an early age. If you have ever been to one of these events, you can see why they are popular and enjoyed by scouts, siblings, parents, friends and neighbors.

I am a former Cub Scout Leader, parent of an Eagle Scout, a current Committee Member of a local Scout Troop and the Chartered Org Representative of this young Cub Scout Pack. We are committed to ensure that this youth organization continues to receive support through training, volunteers and community support activities.

Thank you for your time and for consideration for funding this well-deserved organization.

Respectfully,

Debbie Rumsey
2909 Hunt Drive
Rancho Cordova, CA 95670

Application #94

MEMORANDUM

ITEM 12.2.

DATE:	April 4, 2022
TO:	Honorable Mayor and Council Members
FROM:	Stacy Delaney, Community Enhancement and Investment Senior Management Analyst Randi Kay Stephens, Management Analyst II
SUBJECT:	**ARTS STRATEGIC PLAN UPDATE AND DISCUSSION ON THE UPCOMING CALL FOR PUBLIC ART PROPOSALS**

RECOMMENDATION

Staff to provide an update on the first two years of accomplishments (near-term actions) related to the Arts Strategic Plan, review the objectives for years three to five (mid-term actions), and receive feedback and discuss the focus of the current fiscal year's funding allocation for public art.

RESULT OF RECOMMENDED ACTION

The Arts Strategic Plan provides visionary concepts, programs, and projects that help further the City's goals to make Rancho Cordova an artful place. This update is to provide the Council and the public with a recap of the Arts Strategic Plan to showcase the art programs and efforts undertaken in years one and two, and review the objectives for years three to five (mid-term actions). Council feedback on the established arts in public places funding is needed to provide staff direction for the current fiscal year's public art project focus. Following the update and direction from City Council, staff will proceed with the next call for public art proposals.

BACKGROUND

The City Council has been a generous supporter of the arts in Rancho Cordova through the award of numerous Community Enhancement & Investment Fund grants. In partnership with stakeholders and the arts community, the City has sponsored events, funded programs, purchased instruments, and established the Mills Station Arts and Culture Center (MACC). In addition, the Cordova Community Council, with the help of City funding, has been an active participant in producing events in the City and generally supporting the arts community. There are many other local organizations and artists that contribute to the cultural offerings in the City and that participated in the drafting of the Rancho Cordova Arts Strategic Plan. Their partnership and ongoing collaboration are key to long-term success in reaching our desired outcomes.

In December 2019, the City Council adopted the City of Rancho Cordova Arts Strategic Plan that was developed based on direction from the City Council and input from stakeholder

organizations and individuals, including students. The plan included near-term, mid-term, and long-term actions to accelerate its impact and demonstrate the city's support and investment of the arts in the community. The desired outcome of the Rancho Cordova Arts Strategic Plan is, "In 20 years, when viewing the community, we will see accomplishments that have changed the community for the better."

The document is an action-oriented strategic plan with a section called "Taking Action" describing programs and projects to assist in achieving the vision. Since the plan's adoption, staff and the arts community have worked to implement the Arts Strategic Plan. This is a two-year update on the actions taken to continue building art programs and public art in the community.

Artists and art organizations identified adequate facilities as a critical need for creating a vibrant art scene/art community within the Arts Strategic Plan. City staff work with our local arts community to support our vibrant performing arts organizations with space to rehearse, perform and showcase theatrical, documentary film, and musical programs. Creating new spaces, sharing facilities, and modifying existing venues are approaches to meeting the needs of our arts community.

The Arts Strategic Plan's success is dependent upon an effective, collaborative partnership for the arts. Many existing organizations contribute to this robust and evolving partnership. The City will continue to provide funding for art projects and programs via the Community Enhancement & Investment Fund. Funding for public art projects is provided through visual arts grants with the next opportunity anticipated later this fiscal year. In addition to City funding, in 2021, the City of Rancho Cordova received a Local Early Action Planning (LEAP) grant from the California Department of Housing and Community Development. The funding is available through June 30, 2024, and $65,000 is designated for an affordable housing (for artists) feasibility study and market study. Artist housing was a long-term action identified in the Arts Strategic Plan.

The following is an update on some of the many projects and work done in the first two years following the adoption of the Arts Strategic Plan.

- Public art selections for FY 2019/2020 and FY 2020/2021 funding cycles
- Established art selection criteria with input from artists and art organizations
- Assisted with planning the Mills Crossing Civic Center (this is an ongoing effort)
- Continue to build and foster relationships with local schools/school districts
- Provided local art display opportunities
- Art, events, and cultural experiences in neighborhood greens
- Creation of murals and decorative signs
- Created artistic community gateways
- Promotion and visibility of the arts
- City Hall improvements include sconce wall lighting and an improved sound system
- Completed the pilot Utility Box Art Wrap program with local artists and vendors
- Supported community art events, festivals, concerts, and activities
- Expanded events at the MACC
- Installed art along the Art Block
- Sponsored pop-up concerts
- Funded mobile art classes for youth

- Provided grants to artists, schools, and nonprofits to expand the arts experiences in Rancho Cordova
- Provided grants to create or enhance black box theatres, additional rehearsal space, more functional gallery space, and other facility improvements to build upon the art venues in Rancho Cordova

In the next three years (encompasing years three to five in the Arts Strategic Plan), staff will continue to work with artists, art organizations, partners and others to further the goals of the Arts Strategic Plan, including, but not limited to, the following activities:

- More fully utilize the MACC as a center of Rancho Cordova arts and the Art Block
- Identify, connect and develop the use of interim facilities for arts purposes (underutilized buildings, etc.)
- Create signature art projects including temporary or permanent art projects such as mosaic and wall pieces, annual exhibits, art installations in public facilities, art festivals, community concerts, art walks

The long-term actions (five years and beyond) include things such as a permanent performing arts center as part of the Mills Crossing Civic Center, monumental art installations, a community maker space, and artist housing. Long-term actions will take additional City investments of time and money and are not part of the two-year update or discussion planned as part of this agenda item.

On June 7, 2021, the City Council passed resolution 75-2021 authorizing Measure H funds for Community Enhancement & Investment projects and programs. The resolution included $50,000 for future arts in public places projects. Staff would like to receive feedback from the City Council before making a call for public art proposals later this fiscal year. Previous public art projects have included things such as utility box art wraps, murals, mosaics, and art installations/events.

FISCAL IMPACT AND FUNDING SOURCE

The funding for arts in public places was established as part of Resolution 75-2021 in June of 2021. The funding approved through the Measure H allocation was $50,000.

Strategic Plan Purpose Statement

The *Rancho Cordova Arts Strategic Plan* provides a road map for continuing to build art programs in the community. After adoption by the City, successful implementation of this Strategic Plan will rely on many agency partners and the artists and art patrons of Rancho Cordova. Key elements of this Strategic Plan are described below.

Vision - This section provides the measure of our success. Achieving the vision will be an accomplishment for the entire community and will bring the creative energy of art to all of Rancho Cordova.

Facilities - Facilities are those places where artists come together, create and interact with the public. This section seeks to maximize the function and availability of existing facilities and providing new facilities.

Cultivating Our Artists - Supporting local artists and bringing talented artists to Rancho Cordova offers many benefits to the local art scene. Creating places for artists to live and work and creating opportunities for artists to sell their artwork will establish Rancho Cordova as a "place for art and artists."

Partnerships - Implementing this Strategic Plan cannot be accomplished by a single person or organization. We will build on the strengths of community members and organizations, partner agencies and the City to implement this Plan.

Leadership - Leadership will come from the City Council, leaders within the arts community and leaders of institutions such as Cordova Recreation and Park District, Folsom Cordova Unified School District, Los Rios Community College District, Regional Transit and, most importantly, the artists of Rancho Cordova and their organizations.

City Funding for Art and Artists - The City Council has and will continue to support the arts in Rancho Cordova, providing opportunities for residents to view and attend art events as well as public exposure for our artists.

Staff - A robust and sustainable art scene also requires organizational and management skills. Managing volunteers, maintaining websites, marketing activities, scheduling events and many other tasks are all required to connect artist to patron and to support community art programs.

Taking Action - This section identifies the specific actions required to achieve the vision. The proposed actions will be reviewed and updated every two years prior to and within the City's budget process.

VISION: RANCHO CORDOVA – A PLACE FOR ART AND ARTISTS

Guiding Principles

The following Guiding Principles will inform decisions on funding, staffing, facilities and programs for the arts in Rancho Cordova.

Inclusion

Art is inclusive and diverse. From children to seniors, from students to artistic individuals to professional artists and patrons — all are important and welcome.

Engaging our Youth

Involvement in the arts at a young age fosters creativity and can promote a life-long love of the arts. Every youth should have the opportunity to participate in performing arts and visual arts.

Art Makes Business Sense

Art is good business. A vibrant art scene attracts new residents and new businesses, supports local businesses, and attracts investment and economic growth to the community.

Quality of Life

The arts are one of the foundational elements that create a great community. Art attracts creative people, adds richness to our local culture, and allows our residents to express their creativity.

Participation

Our community is committed to participation in the arts. The transformative power of art is realized through performances, exhibits, and public art installations that build community through a shared experience available to all members of the community.

Art is Everywhere

Gallery showings, live performances, temporary displays and permanent installations, public buildings and local restaurants are all pieces of the Rancho Cordova art mosaic. Art should be found almost anywhere in the community.

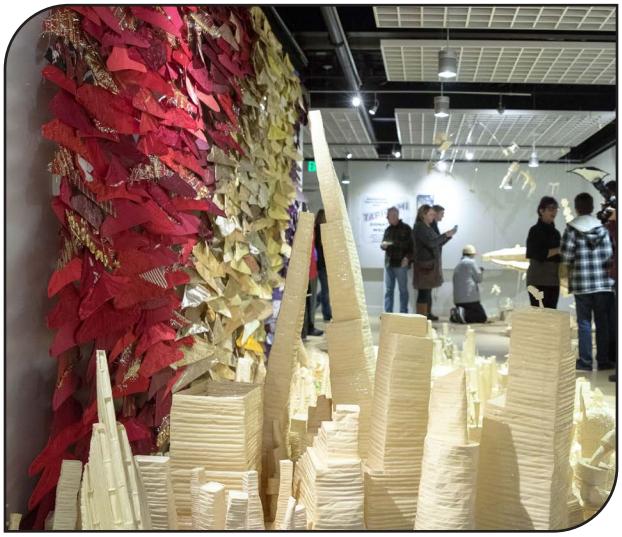
Support the Artist

We will seek ways to support and nurture the artist. We will provide spaces to create, rehearse, perform, and display art. We will help artistic people become artists.

Desired Outcomes

In 20 years, when viewing the community, we will see accomplishments that have changed the community for the better.

Art will be intrinsic to and infused throughout the community, transforming the mundane and nurturing creativity.



Art will reflect the diversity of the community (ethnic, financial, age) and include works that range from abstract to realism and topical to historical.

Art will help build a greater community by improving our quality of life and driving investment and economic activity.

Art will be broad and encompassing in form — temporary and permanent, music and theater, bold installations and small shows, aspiring students and accomplished professionals.

Art will be accessible to every student in our schools and to every member of the community.

Rancho Cordova will ***foster and support*** the arts and artists - in our schools, on our streets, in our parks, in our theaters and galleries.

Rancho Cordova will ***support*** local artists and ***attract*** prominent artists from outside the region.

Partnerships are the foundation of the Rancho Cordova community, relying on shared programs, shared facilities and shared goals.

Our programs will help to transform artistic people into artists by providing resources, education and venues for the arts.

Rancho Cordova supports a ***life-long relationship*** with the arts that begins in our elementary, middle and high schools, extends through community programs and sustains through all ages.

Rancho Cordova will promote ***places and opportunities*** that allow artists to develop their skills, share their art with the community and offer artwork for purchase.

BIG IDEA: THE ART BLOCK

The Art Block is a defined area within Rancho Cordova that places an emphasis and priority on promoting the arts. The Art Block will be the center of activity for arts-oriented programs in Rancho Cordova. It will be a place where artists connect with one another and with the community. While the Art Block will be a center of activity, the relationships and programs nurtured in the Art Block will foster and promote the arts throughout the community.

What's Special About the Art Block

The Art Block includes a collection of public uses - the Mather Field/Mills Station light rail station, the Mills Station Arts and Culture Center (The MACC) and the Rancho Cordova Center of Folsom Lake College – all creating opportunities to support and celebrate the arts. This area can be accessed from within Rancho Cordova and from outlying areas via nearby Highway 50 and public transportation.

The Art Block is easily accessible to Rancho Cordova residents, providing convenient access to activities and cultural opportunities to portions of the community that are somewhat underserved.

The Art Block includes the site of the future Rancho Cordova Civic Center project, a multiuse project that will, among other roles, provide opportunities to celebrate the arts.

What Happens in the Art Block

The arts are not the only use and function of the Art Block. Rather, supporting the arts is an underlying theme and quality of land uses and development in the Art Block.

Features and activities in the Art Block could include:

- Inclusion of artwork and artistic features in future construction

- Spaces and improvements to display art and conduct art shows (informal gallery displays)
- Production and/or rehearsal spaces for performing arts and visual arts
- Performing art venues and permanent art galleries
- Educational programs – classes for residents
- Maker space – support artists and community programs

The MACC is a key piece of the Arts Block, providing spaces for art exhibitions that range from local artists to displays of regional or national significance, bringing art to the residents of Rancho Cordova.

The Civic Center project will be a focal point of the community and could include facilities such as a flexible performance/meeting space, multi-purpose rooms to accommodate artist studios and/or workshops, office space to support the administrative functions of the arts community and spaces for the permanent and short-term display of artworks. The Civic Center project concept is under consideration and specific uses have yet to be finalized.

The Civic Center project site may include housing and, if so, some portion of housing would likely be maintained as affordable. If provided, a portion of the affordable housing could be offered to "artists in residence." Such a program would provide housing opportunities to professional artists to reside in the Art Block, thus bringing artistic energy to the community. Typically, such artists in residence would make commitments to teach classes, provide artwork or make other contributions.

Art studio spaces could be provided on either a monthly rental basis or at a reduced cost to artists that volunteer to teach classes, work in gallery/theater spaces, mentor youth art programs or make similar contributions.

The Rancho Cordova Center of Folsom Lake College draws students to the Art Block, provides education programs and could be a partner in providing facilities and/or conducting arts-related programs. Facilities in the College and the Civic Center project can be programmed to be complimentary and the College might consider offering classes based in the Civic Center project.

Making the Art Block a Reality

The Art Block should be an identifiable place within the community. Over time, the construction of new buildings and associated outdoor spaces will create inviting destinations. Installation of unique banners and signage could further identify the Art Block. Strong pedestrian connectivity and visual connectedness between The MACC, the Folsom Lake College campus and the Civic Center project will be critical to unifying the Art Block.

Ensuring new construction is creative, providing public gathering spaces, coordinating efforts among all involved agencies and programming art performances and displays will all help to create a vibrant Art Block in Rancho Cordova.

FACILITIES

Artists and art organizations have identified adequate facilities as a critical need for creating a vibrant art scene/art community. The MACC is an example of how a facility can serve as a hub for artists and events that links together the art community of Rancho Cordova. While there are opportunities for crossover, there are two primary types of art programs that require facilities: Performing Arts and Visual Arts.

Performing Arts

Performing Arts includes all forms of live performance – music, theater and dance being primary forms. Currently, the Rancho Cordova River City Concert Band, Symphony d'Oro Rancho Cordova RC Swing Band, Cordova Accelerated Performing Arts (CAPA) and Hummingbird Theatre Company all operate in Rancho Cordova. It is hoped and expected that future performance companies will include additional music ensembles, theater companies, dance companies and other live performance programs. Such performance companies share two basic facility needs: a place to prepare and rehearse and a place to perform.

Rehearsal Space. Rehearsal space has certain requirements that include sufficient acoustics, stage setting, audio equipment, set/props/costume production space and storage. With thoughtful planning and coordination, a single rehearsal space can serve the needs of multiple performance companies. Rehearsal space must be secure, but it need not be elegant. An underutilized light industrial building could be improved to provide a vibrant rehearsal space. Alternatively, a well-designed multi-purpose facility could accommodate both community events and some of the needs associated with rehearsals/preparing for performances.

Performance Space. Ultimately, numerous venues of differing types and scales may be required to support music, theater and

dance in the community. The firm AMS Planning and Research was retained by the City to better define the unmet needs of the performing arts community and how those needs can best be served. Major findings of the AMS work include:

- Compared to national averages, Rancho Cordova residents and our nearby communities have a higher than average likelihood to attend arts and cultural events.
- A small-to-medium size flexible performance space with 100-200 seats would support and encourage growth of the performing arts.
- Wider access agreements for existing large performance venues, such as the Performing Arts Center at Cordova High School, should be negotiated.
- There is local interest in a new large fixed-seating theater (500 – 800 seats). However, market/ demand research does not support construction of such a facility at this time.[1]

Use of Existing Theater Venues. The Performing Arts Center of Cordova High School provides a high-quality venue that can accommodate a large audience. Past District policies and practices have limited the ability for community-based programs to use the Performing Arts Center. A key need of the arts community is to reserve space as much as a year in advance to plan and provide performances. Additionally, standard requirements for compensated District staff could be prohibitive for some community programs. The City should explore arrangements with the High School and Folsom Cordova Unified School District to allow early booking of a limited number

[1] Based upon the research completed by AMS Planning and Research, inclusion of a large, fixed-seating theater in the Civic Center project may not be an appropriate investment at this time. Due to somewhat low demand, such a theater would require committed and ongoing effort to book performances and likely an ongoing local subsidy to support operations. If pursued, determining the operational and management structure for the theater would be an important consideration. The full AMS Planning and Research report titled Performing Arts Center Feasibility Study, May 15, 2019 is attached as **Appendix A** of this Strategic Plan.

of community-sponsored programs and options for staffing that assure appropriate use of the facility in a cost-effective manner.

Visual Arts

Visual Arts includes the many varied art forms that create a physical product. Paintings, photography, sculpture, glass-blowing, woodworking, steelwork, fabrics and clothing, and many more artistic forms are referred to as Visual Arts. Similar to Performing Arts, there are two basic facility needs for Visual Arts: a place to produce artworks and a place to display and/or sell artworks.

Production Space. Production space can range from individual artist studios to shared shop spaces and includes spaces that support group activities, workshops and classes. Due to the varied needs of artists, particularly when specialized equipment is required, the approach for production space for Visual Arts may involve smaller, specialized facilities tailored to a particular medium or group of compatible mediums.

One model for production facilities is referred to as Maker Spaces - shared facilities that may be privately owned and operated, public-private partnerships or public facilities. Typically, such facilities operate in a cooperative manner with individuals renting space and provision of shared tools and work spaces for the members of the facility.

Spaces dedicated to working artists need not be located in high profile locations. The desire to keep costs down and the nature of working studios may best be accommodated in a more industrial setting. By comparison, classrooms and workshop spaces that invite community members to participate should be conveniently located near residents and the participant traffic generated by such activities can have positive impacts on surrounding uses.

The firm AMS Planning and Research was retained to help the City better understand the demand for Visual Arts facilities.[2] Key findings of their study include:

[2] AMS Planning and Research analyzed visual arts programs in Rancho Cordova and the region and evaluated specific needs for the Rancho Cordova arts community. The resulting report, Visual Arts Needs & Opportunities Assessment, September 6, 2019, is attached as **Appendix B** of this Arts Strategic Plan.

» The region is generally underserved, lacking adequate spaces for art classes, studios, exhibits and events.

» Access to specialized equipment (photography, printmaking, ceramics, glasswork, etc.) is limited or non-existent. It is anticipated such specialized spaces for teaching and professional use would be in high demand.

» As of 2019, studio rents of $1.00 to $1.50 per square foot would be considered a good deal; studio sizes could range from 100 to 400 sq. ft.

» It is estimated Rancho Cordova could support 6 to 12 individual studios; a building of 3,000 to 6,000 sq. ft. could accommodate studios and shared classroom space.

Display Space. Sharing artwork with members of the community is a primary goal of this Strategic Plan. The potential for places to display artwork in Rancho Cordova are many and varied. Art displays can generally be classified as:

» **Art Shows.** Displays in galleries, restaurants, public office spaces and similar settings. Show may be a single artist or multiple artists and art is often available for purchase.

» **Exhibitions.** Displays in larger venues often featuring a subject or theme. Art at exhibitions is generally not available for purchase.

» **Permanent Installations.** Examples can include sculpture, features incorporated in public projects (sidewalk tile mosaics) and other permanent works.

Relatively inexpensive improvements to Rancho Cordova's City Hall transformed bare walls into rotating shows that display the work of local artists. These shows are made possible through the efforts of Cordova Community Council staff that manage the logistics of the shows. Expanding such shows will require identifying display sites in the city and ongoing efforts to manage shows (recruit artists, select works, install art, etc.).

Strategic Approaches

Appropriate spaces of varied size and character will be required to support performing and visual arts in Rancho Cordova. However, such facilities can

require substantial investment to construct, maintain, and operate. The City will consider how existing facilities can be leveraged to maximum benefit and how shared facilities can serve to meet the needs of the art community.

Improve Existing Facilities

The most immediate facility projects will focus on improving existing facilities in the community, such as The MACC, City Hall facilities, and the stage of Village Green Park. Identifying cost-effective improvements to existing facilities could provide additional functional capacity for performing arts in a relatively short time frame.

Shared Use Facilities

While it might be optimal from an artist's perspective to have facilities dedicated to a single type of use or even a single organization, such a focused approach is costly to construct, operate, and maintain.

The City, Folsom Cordova Unified School District and Cordova Recreation and Park District have the opportunity to coordinate programs to assist each other in meeting facility needs. While balancing competing priorities or arts groups and agencies can be challenging, benefits can include a greater range of facilities for all, reduced duplication of facilities and overall cost savings.

Visual Arts Displays

Displaying artwork in the community has the dual benefits of enriching the lives of our residents and providing public exposure for our artists. A small gallery or cooperative space for the ongoing sale of local artists that is staffed by those artists who have space in the gallery/retail space would highlight local artists and provide a bridge from aspiring artist to professional artist. Similarly, arranging for artwork to be displayed in rotating shows in public settings grants our artists important public exposure.

Civic Center Project

The City is currently exploring plans for the Civic Center Project directly adjacent to the Rancho Cordova Center of Folsom Lake College. This project offers numerous opportunities to support and/or incorporate the arts, including performance spaces, artist work spaces, gallery/display spaces, and artwork integrated into the overall project design.

Workshop/Class Space

There is a general need for spaces in which classes and workshops can be held in the community. A relatively modest room size with a flexible layout could serve the needs of many groups within the community, including both performing arts and visual arts. One key feature of such meeting/workshop space would be low cost or no cost use, as arts groups often operate on modest budgets and such classes/workshops could be important sources of revenue to support the activities of our local arts organizations.

CULTIVATING OUR ARTISTS

A vibrant art scene in Rancho Cordova will be supported by artists living, working and earning a living in the community. Accomplished artists can add much to the community, including regional recognition of our artists and our programs, mentorship through leading classes and workshops and the installation of artwork or performances in the community. Two challenges limit many artists' ability to pursue their love of art – unique needs related to housing/work space and the ability to earn a living from their passion for art.

Artist Housing

Artists have somewhat unique needs with respect to living and working space. Unless well-established and successful, artists typically generate rather low incomes and therefore may not be well served by the traditional housing market. This is particularly true for artists that might be highly talented, but are not yet well established. Many artists have a desire to live and work in a single location, both for cost savings and for personal convenience. An artist may wish to sell directly from the home/studio, something that may not be allowed in all residential settings. Finally, artists can benefit from proximity to other artists – a cluster of homes can create a micro community of people dedicated to the arts.

Artist housing solutions can take various forms based on current opportunities and the goals of the City. Options that could be pursued include:

- *Multi-Family Housing Cluster.* This would likely occur in a proposed multi-family project and would be a component of affordable housing. A cluster of up to five units could be built around a shared courtyard space. Location would ideally have good visibility for public access to studio spaces. Dwellings would likely be designed in vertically-integrated mixed use units with studio space at ground level.
- *Industrial Conversion.* This approach would involve converting an existing building to a combination of residential units and production studios. Such a use would likely be on Light Industrial zoned land, raising issues of zoning consistency and compatibility with neighboring uses.
- *Existing Single-Family Homes.* There are artists already in Rancho Cordova who are working in their homes. The City's Zoning Code is generally accommodating of such uses, with certain limitations. Unfortunately, artist homes are dispersed in the community, offering little synergy among artists and the

community. Also, there is currently no provisions for affordability to attract artists to the community.

There are significant benefits that would result from attracting artists to live and work in Rancho Cordova and there are also operational challenges to implementing such a program. Details that would require attention and resolution include:

- *Duration.* How long would an artist reside in an artist-dedicated dwelling? The City could establish an Artist-in-Residency program that rotates artists on a regular basis, possibly every two years.
- *Funding.* Funding strategies would vary based upon the housing type. A cluster of multi-family or high-density homes in a new development project might be constructed by a developer to meet affordable housing requirements. Conversion of an existing building or establishing artist affordability in existing single-family homes would likely require up-front investment by the City or some type of foundation.
- *Ownership/Management.* Ownership of units must be determined. Similar to funding, ownership approaches vary based on dwelling type. Unless owned and managed by an affordable housing provider, such projects would require an entity to own and manage the artist dwellings.

Providing artist housing in Rancho Cordova will be a complex program that may require initial financial contributions by the City. While the challenges of such a program may be significant, the long-term benefits to a Rancho Cordova art scene could be substantial.

Earning a Living from Art

Developing an income from producing artwork is a key transition from enthusiast to fine artist. The transactional side of art has little to do with the passion of an artist for his or her craft, but the inability to generate a living wage income can greatly hamper the pursuit of art. Rancho Cordova will work to create opportunities for artists to offer their work for sale to their patrons through the following strategies.

- *Small Gallery.* Permanent galleries allow artists to place their work for display and viewing by the public. A small City sponsored gallery could be a good initial step as the commercial art scene in Rancho Cordova develops. Such a facility could be located in the Civic Center project or, possibly, in The MACC.

- *Public Art Displays.* This Strategic Plan assumes outreach to local businesses will occur to identify semi-public locations for the display of art. Such displays can provide artist contact information or offer displayed work for sale.
- *Teaching Classes.* Sharing knowledge gained through personal experience enriches the art community. Providing a space for classes and allowing the instructor to charge an attendance fee can benefit both community and artist.
- *Artwork Grants.* The Community Enhancement Fund is one funding opportunity for artists. There are many other funding announcements that solicit proposals from artists. Increasing awareness of funding opportunities and supporting artists in their applications could bring additional revenue/income to Rancho Cordova artists.
- *Studios with Sales Area.* Artists may wish to invite the public to their studio space to view work and possibly purchase artwork. A review of City codes can determine whether there are restrictions against such activities.
- *Art Fairs and Events.* Art Fairs provide short, high visibility opportunities to offer artwork for sale to the public. Such events could be conducted within a larger community event or sponsored by local entities and organizations.

PARTNERSHIP FOR THE ARTS

The goal of infusing art throughout Rancho Cordova will require the support of many individuals and organizations within the community. Each group noted below brings unique resources and strengths that will contribute to a successful, diverse, and dynamic Rancho Cordova art scene. Over time, the roles and contributions of these organizations are expected to evolve and grow.

City of Rancho Cordova

- » Facilities – The MACC and City Hall
- » Sponsor/guide programs
- » Install art in public facilities and improvements
- » Organization support – funding for staff

The City of Rancho Cordova is uniquely situated to support the arts in Rancho Cordova. The City has made a commitment to create a great community, has a role in providing/operating public facilities and has the ability to fund art projects and programs.

Cordova Community Council

- » The MACC – plan and execute events, day-to-day operations
- » Promote and support the Rancho Cordova Arts Council
- » Organize volunteers to support community events
- » An organization that connects artists with businesses and patrons of the arts

The Cordova Community Council has strong organizational skills and resources, relationships with community volunteers, and a mission to bring great events to Rancho Cordova.

Rancho Cordova Arts Council

- » A coalition of art organizations – Symphony d'Oro Rancho Cordova, Rancho Cordova River City Concert Band, RC Swing Band and Rancho Cordova Arts.
- » A resource to provide guidance and direction to art programs

The Rancho Cordova Arts Council now represents five established community organizations that are dedicated to the arts and artists within the community. This role will grow as new organizations and programs develop within the community.

Cordova Recreation & Park District

- Programs and classes
- Public facilities
- Art installations in parks

The Cordova Recreation and Park District touches residents throughout Rancho Cordova with its parks and programs. The District's parks offer the opportunity to install artwork in highly visible and well-visited parks. The parks provide key gathering locations for residents and can be the stages for wonderful events.

Educational Institutions

- Folsom Cordova Unified School District, Elk Grove Unified School District and Sacramento City Unified School District
- Los Rios Community College District
- Youth programs in the classrooms
- Adult programs – workshops, informal groups, classes
- Performance spaces

Schools provide opportunities to touch young minds, spark a love for the arts, and offer the first steps toward a lifetime of participation in the arts. The City envisions art programs available to every student in Rancho Cordova. Public education partners also have facilities that can provide rehearsal, production, and performance spaces for the art community.

Rancho Cordova Chamber of Commerce

- Connection to business community
- Events

The Rancho Cordova Chamber of Commerce has contacts and relationships with local businesses that can be partners in a vibrant local art scene. Whether supporting through contributions, providing spaces to display art, or opening production space to community members, the local business community can be an important partner in promoting the arts.

Regional Partnerships

Rancho Cordova's local partnerships will be strengthened with partnerships with agencies, programs, organizations and companies from the region. Such opportunities include but are not limited to partnering with Regional Transit and engaging with community theater groups, visual artists and youth-oriented programs within the greater Sacramento region.

LEADERSHIP

Leadership and Implementation

The creation and enjoyment of art are inherently creative activities that can be inspiring and emotional, and that create common shared experiences and build relationships. The implementation of a successful arts program relies on less creative activities of administration, volunteer organization, and event promotion. Leadership and a sustainable organizational structure will promote successful and long-term art programs in Rancho Cordova.

Program Direction

The City of Rancho Cordova, and more specifically the City Council, have placed a high priority on integrating art within the community. The City's support for the arts has resulted in many wonderful programs and outcomes, including: educational programs in our schools; improvement of facilities such as The MACC; support for community organizations that champion the arts in Rancho Cordova; art showings at City Hall and in the community; and amazing community events throughout the year.

It is anticipated that the City Council will continue to provide high-level guidance and direction for art programs in the community. For the foreseeable future, efforts identified in this Strategic Plan will be guided at the administrative and organizational level by staff/consultant of the City of Rancho Cordova, with direction provided by the Rancho Cordova City Council.

Program Implementation

Currently, the Cordova Community Council manages and supports various art programs in the community. Funding of programs and administrative support for the Rancho Cordova River City Concert Band and RC Swing Band are provided through the Cordova Community Council. The Cordova Community Council staff also manage The MACC, support the City Hall art exhibitions and coordinate art programs throughout the community. The roles and responsibilities undertaken by the Cordova Community Council result in a robust program of free concerts, art exhibitions and interface at community events.

Future Leaders

The Summer@City Hall program[3] and the Arts Club of Mitchell Middle School are two examples of Rancho Cordova youth demonstrating their commitment to arts in the community. A concerted effort should be made to engage Rancho Cordova's youth in implementing arts programs. Many opportunities exist, including:

- Creating youth positions on key boards such as the Community Enhancement Fund (CEF) Visual Arts Stakeholder Group
- Creating dedicated funding under the CEF program or the CEF visual arts grants for youth art projects and/or programs
- Coordinating City efforts with local schools/school districts to engage students

[3] The student participants of the 2019 Summer@CityHall program focused on Art in Public Places. The group's presentation, attached as **Attachment C**, includes results of a community survey of students, proposed criteria for City-funded artwork and suggestions for a Rancho Cordova Arts Commission.

CITY FUNDING FOR ART AND ARTISTS

Through its generous support, the City of Rancho Cordova is a patron and sponsor of the arts within the community. Much of the City's ongoing funding for the arts has been directed to the Cordova Community Council to implement programs on behalf of the City.

This Strategic Plan anticipates the City will continue to provide funding for art projects and programs through the Cordova Community Council as well as select projects for funding under the Community Enhancement Fund program.

Funding for the Arts

Substantial City funding for the arts occurs through the annual Community Enhancement Fund (CEF) process. Annual support for performing arts companies, educational programs, capital projects such as The MACC and similar programs and projects has been provided through the CEF. It is anticipated that support for the arts will continue in the future with funding requests to be approved by the City Council.

Some art programs and events in Rancho Cordova generate revenue to support and promote programs. Ultimately, providing access to the arts, offering classes, engaging the community and creating art in Rancho Cordova are the primary goals. Generating revenue from such programs is considered a secondary goal and cost of attendance or participation should not be a barrier to community members.

A long-term and comprehensive plan for funding art programs in Rancho Cordova should be developed. To the extent the City will continue to provide financial support, predictable funding allows for planning events and programs on a longer horizon.

Community Enhancement Fund (CEF) Visual Arts Grants

One source of City funding of artists is the annual CEF visual arts grant process. Historically, the City has allocated a set funding amount and accepted proposals as generated by community artists. While this has resulted in great proposals and projects in the community, this approach does not guide artists in any given direction. It is proposed that CEF funding for visual arts be a more directed process.

Such guidance should not be highly specific or restrictive. Rather, the guidance can assist artists with understanding the City's desires and expectations for City funded art projects and programs.

Arts Stakeholder Group

It is recommended that the City establish an informal Arts Stakeholder Group to assist with CEF arts grants process. The Arts

Stakeholder Group could assist with the CEF visual arts grants process as follows:

- Annual Guidance to Artists. Develop guidance for the upcoming year's CEF visual art grants for City Council approval. Such guidance could stipulate a medium (murals, utility box wraps, tile mosaics, etc.), approved locations for proposed projects and possibly general themes for artwork
- Call for Proposals. The Arts Stakeholder Group could assist with generating a call for proposals. A more robust "call for artist proposals" could reach further into the local arts community and generate proposals that are diverse and inclusive of the local arts community.
- Selection Criteria. The Arts Stakeholder Group should prepare evaluation criteria to assist with its recommendations for funding projects under CEF visual arts grants.
- Recommendations to City Council. The Arts Stakeholder Group would provide recommendations on the awards of CEF visual arts grants to City staff that would then forwarded to City Council. The City Council, supported by these recommendations, would make final CEF awards.

Art/Artist Selection Criteria

The following is a preliminary outline of guidance for selecting artists and artwork to receive City funding. This guidance is preliminary and will be refined by the Arts Stakeholder Group prior to use for evaluating funding requests.

- Local Artist Preference. Any artist is eligible to apply for City sponsorship of art projects. In general, a preference is given first to artists residing in Rancho Cordova, second to artists residing in the region, and third to artists from outside the region.
- Visibility/Impact. A general preference is given to artwork that will be highly visible and have a significant impact on the community due to location, activity levels, placement, scale, character or other factors that may apply.
- Relevant to All Groups. In total, projects selected for funding should include works relevant for various age groups, ethnic groups and socio-economic groups. Collectively, projects selected for CEF visual arts funding should be reflective of the diversity of the Rancho Cordova community and should be relevant to current social issues of the community.

Public versus Private Art

CEF visual arts funding is primarily intended for art that will benefit the community in general and is generally not intended for private projects. Appropriate locations include, but are not limited to, publicly owned facilities and properties (buildings and grounds, landscape areas, roads, utilities, etc.) and private property that is highly visible to the public (walls for murals, landscape areas adjacent to public rights-of-ways, etc.). Projects in such locations must receive authorization from the affected public agency or property owner prior to consideration as a project for CEF visual arts funding.

By comparison, private art projects are any projects located on private property that are generally for the enjoyment of the property owner, employees and visitors to the property. Such projects typically would be funded by the property owner and would not be subject to City review and approval. Examples of private art include any installations inside a private building, sculptures in courtyards or internal open space areas, artist enhancements to building architecture and similar projects.

The distinctions between public and private art projects described above are guidelines and do not prohibit the City Council from funding arts projects on private property if such projects are determined to produce significant benefits to the Rancho Cordova community.

STAFF

The artists of Rancho Cordova are passionate about their work. They are less passionate about the administrative tasks required to plan, promote, and execute events within the community. Support functions and roles that promote a vibrant art scene include organized and up-to-date promotion (primarily through a web presence), organizing and delivering volunteers to support and conduct major events, programming of an events calendared many months in advance, and oversight of facilities during events.

These are tasks that will be best undertaken in part by paid staff. Assigning such duties to volunteers without the support of paid staff is not a long-term sustainable strategy.

To guide current and future efforts, the City will consider funding a Rancho Cordova Arts Coordinator position. There are various options for creating the Arts Coordinator position, including staffing the position through existing partners, consultants or City staff and the level of participation, full time or part time, remains to be determined. This position would be dedicated to the functions below and would draw on professional experience in the unique functions described in the Arts Strategic Plan. As a professional engaged in the greater arts community, the Coordinator would bring benefits of networking and audience building for the Rancho Cordova community and arts patrons, fully maximizing the community vitality benefits associated with the planned civic amenities.

The programs contemplated in this Strategic Plan – development of community resources, production of events, organizational support – may require additional staff members to support the Arts Coordinator. Ultimately, it may be appropriate to establish a stand-alone organization or foundation to promote the arts in Rancho Cordova.

Key duties of Art Coordinator would include:

- Preparing workplans (either annual of two-year plans) for City Council consideration that:
  - *Describe events to be produced and major efforts to be undertaken*
  - *Activities described under Near-Term Efforts comprise the first two-year workplan*
- Programming events
  - *Regular events at The MACC*
  - *Annual calendar of events*
- Support and build internal capacity of the Rancho Cordova Arts Council
- Identify facility needs – performance, rehearsal, production spaces –and champion efforts to make facilities available
- Coordinate with partner agencies/organizations
- Provide guidance and recommendations on City-funded art projects
- Guide and promote installation of art in the community
- Near-term organizational focus:
  - *Build volunteer base*
  - *Align volunteers with community art events*
- Create web-based presence that is supported by engaged partners and community relationships
- Prepare guidelines for the selection of City-funded art programs, exhibitions and installations

TAKING ACTION

Below is the action plan to guide art programs and efforts for the near-term (1 to 2 years), mid-term (3 to 5 years), and long-term (5 years and beyond). Individuals and organizations promoting art in Rancho Cordova have two fundamental needs:

1) Facilities to produce, rehearse, perform, and display art; and

2) Organizational support to promote, facilitate, organize, and execute programs.

The programs noted below, particularly under Near-Term, are ambitious and exceed current staff capacity. Priorities among these efforts will be pursued based on available staff capacity. Additionally, priorities and opportunities may shift over time and designations and near, mid and long term will likely be adjusted through preparation of bi-annual action plans.

A. Near-Term Actions

1. **CEF Visual Arts Selections:** Establish the process for CEF visual arts recommendations and complete reviews in the 2020 funding cycle.
2. **Establish Art Selection Criteria:** Prepare and seek City Council approval of guidelines for the selection of City-funded art projects.
3. **Inventory of Facilities:** Key facilities needs include spaces for production, rehearsal, display, and performance. Conduct an inventory to determine what is available and what is lacking. Consider near-term solutions for additional facilities.

4. **Assist with Planning for a Civic Center project:** Current City plans for a community-oriented project offer opportunities that could include production, rehearsal, and event space, as well as integrating art within the overall design program.
5. **Continue to build relationships with local schools/school districts:**
   - » Expand programs for students in schools and coordinate efforts with community-based theater companies
   - » Streamline process for use of school performance facilities
   - » Explore partnerships for programming and use of space in the Civic Center project
6. **Local Art Display Opportunities:** Identify businesses willing to display works by local artists – restaurants, bars, brew pubs, coffee shops, etc. Facilitate connection of businesses to artists.

7. **Art in Neighborhood Greens:** Develop guidelines for art in City Neighborhood Greens that include level of funding and City expectations for art (general character, durability and other selection criteria).

8. **Promotion and Visibility:** Create and maintain a dedicated media presence — a centralized location for art news of all types to market art programs/events in Rancho Cordova that includes a website and social media.

9. **City Hall Improvements:** Consider enhancements to the City Hall's American River Rooms to better support performances — improvements such as theatrical stage lighting, sconce wall lighting, and improved sound system should be considered.

10. **Utility Box Art:** Consider implementation of a utility box art wrap program for SMUD utility boxes. If determined appropriate define procedures for approval of installations, artist selection process, and provisions to replace art wraps over time.

11. **Art Block.** Begin conceptualizing the Art Block and pursue opportunities for its implementation. Consider whether adjustments to City regulations are required.

12. **Community art events/activities, possibly including:**
    - » Expanded events at The MACC
    - » Pop-up concert venues
    - » Mobile art class on wheels that has a summer schedule visiting neighborhood parks to teach simple art projects
    - » Crocker Art Museum's Art Ark

13. **Art Implementation Handbook:** Prepare a handbook to inform artists of the opportunities and requirements to install artwork in Rancho Cordova.
    - » Guidelines for installing art in the community
    - » Prequalified locations for public art installations
    - » Process for artists to propose and install art in Rancho Cordova
    - » Artist requirements — insurance, documentation of costs, prevailing wage, etc.

14. **A Cadre of Volunteers:** Promote and expand opportunities for volunteers to assist with events. Identify interests and skills of volunteers and provide opportunities for groups of volunteers to work as teams.

15. **Mills Station/Regional Transit Contract:** Enter into a new contract with Regional Transit for the operation and use of the Mills Station transit station site that recognizes and allows events on the Mills Station site that are held in conjunction with The MACC.

B. Mid-Term Actions

1. **The MACC:** The MACC is the premier setting in Rancho Cordova to connect with artists and to conduct shows and small events. A key mid-term action is to more fully realize the potential of this venue as a center of Rancho Cordova arts.
2. **Interim Facilities:** While a new performing arts theater may be a long-term goal of the City, it is unlikely such a facility will be constructed in the mid-term horizon. Interim solutions may rely on increased access to existing major venues, upgrades to improve the performance value of existing facilities, and conversion of existing underutilized buildings to support performing arts.
3. **Signature Art:** Rancho Cordova will develop signature art forms and/or events.
   - » Art display examples:
     - *Mosaics in walkways throughout the city*
     - *A location or locations that is/are recreated annually*
     - *All public facilities incorporate clear and obvious artistic features*
     - *Install artistic "RC" markers (sculpture, paint, tile, etc.) throughout the community*
   - » Event examples:
     - *Annual Art Festival, Art on the River in Hagan Park, or Art Farm at Soil Born Farms*
     - *Community Concert Series at the Performing Arts Center at Cordova High School or other locations in the community*
     - *4th Saturday Art Walk*
     - *Local program of Wide Open Walls/Murals*

4. **Collaborative Programs:** Within the mid-term horizon, work with community partners and organizations to expand local schools' programs for youth performing arts and visual arts.
5. **Artistic Community Gateways:** Entry points to the community should provide a sense of arrival. Artistic gateways can add beauty and community identity to Rancho Cordova.
6. **Art Block:** Formalize designs for public improvements in the Art Block, including but not limited to design of the Civic Center project, enhanced streetscape improvements and other opportunities to inject artistic character in the District.

C. Long-Term Actions

1. **Performing Arts Center/Exhibition Space:** Ultimately, as Rancho Cordova continues to grow, an additional performing arts center will likely be needed to support Rancho Cordova performance companies. Whether music, dance, or theater, venues in Rancho Cordova are limited and our performing companies do not have priority. A performing arts center to showcase local artists and to provide a venue for visiting companies will be a key component of a vibrant Rancho Cordova arts scene.
2. **Monumental Art Installations:** In decades past, large art installations were included in private development projects. The City is not contemplating a developer obligation for such placemaking installations, but the impact of significant art installations remains a priority that will require creative solutions.
3. **Rancho Cordova Theatrical Company:** Theater programs for youth and adults will support life-long engagement in the arts. Local theater companies will be encouraged to build on local school programs. Identifying space for rehearsals and performances is a priority for establishing local theatrical companies.
4. **Community Maker Space:** Maker spaces can take many different forms. For aspiring artists, one of the barriers to developing skills and pursuing a career in the arts is access to production space. This applies equally to music, photography, woodworking, pottery, and many other physical media. A multi-purpose maker space would provide a place for artists of diverse media to come together and pursue their passions.
5. **Artist Housing:** Pursue housing opportunities and studio spaces for artists. Artists often are not seeking the traditional setting of a single-family home. Artist housing might be incorporated in a mixed-use setting such as the Civic Center project or in non-traditional settings such as Light Industrial zoned land. The goal is to create a setting supportive of artists' needs – both housing and production/studio space. While care and a thoughtful approach would be required to establish such housing, elements that might prove supportive to creating such housing include:
    - » Unique development standards – rough industrial might be just fine
    - » Dwellings that combine living and production spaces
    - » Mixed use district – housing, fabrication, performance, and retail all allowed
    - » Alternative housing form – size, design, density – that is affordable and conducive to artists.

Arts Strategic Plan

Two-Year Update

RANCHO CORDOVA
CALIFORNIA

ABOUT THE ARTS STRATEGIC PLAN

Adopted in December 2019, the plan provides a roadmap for continuing to build art programs in the community. The key elements of the strategic plan include:

GUIDING PRINCIPLES AND DESIRED OUTCOME

The strategic plan's **Guiding Principles** are:

- Inclusion
- Engaging Our Youth
- Art Makes Business Sense
- Quality of Life
- Participation
- Art is Everywhere
- Support the Artist

The Desired Outcome: In 20 years, when viewing the community, we will see accomplishments that have changed the community for the better.

ART BLOCK

A defined area within Rancho Cordova that places an emphasis and priority on promoting the arts. It contains the MACC, the Rancho Cordova Center of Folsom Lake College, and the future Mills Crossing Civic Center.

FACILITIES

Artists and art organizations have identified adequate facilities as a critical need for creating a vibrant art scene/art community.

Performing Arts	Rehearsal Space	Performance Space	Use of Existing Theatre Venues
Visual Arts	Production Space	Display Space	Improve Existing Facilities
Shared Use Facilities	Visual Arts Display	Mills Crossing Civic Center	Workshop / Class Space

PARTNERSHIPS FOR THE ARTS

City of Rancho Cordova

Rancho Cordova Arts

Educational Institutions

Local and Regional Partnerships

Cordova Community Council

Cordova Recreation & Park District

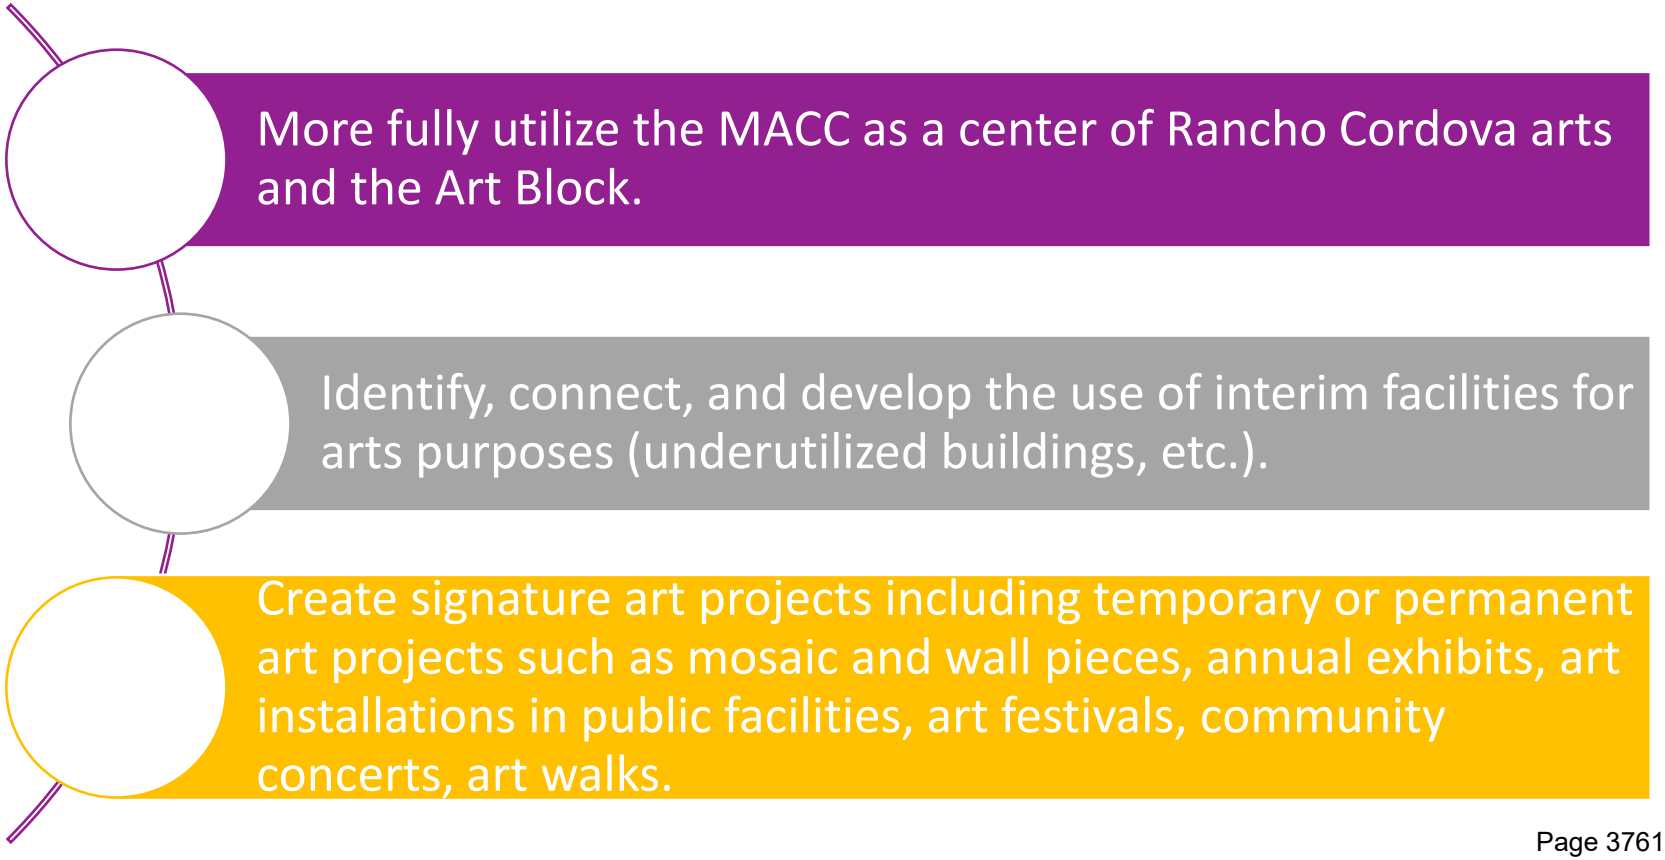
Rancho Cordova Chamber of Commerce

LEADERSHIP

The City's support of the arts has resulted in many programs and outcomes including:

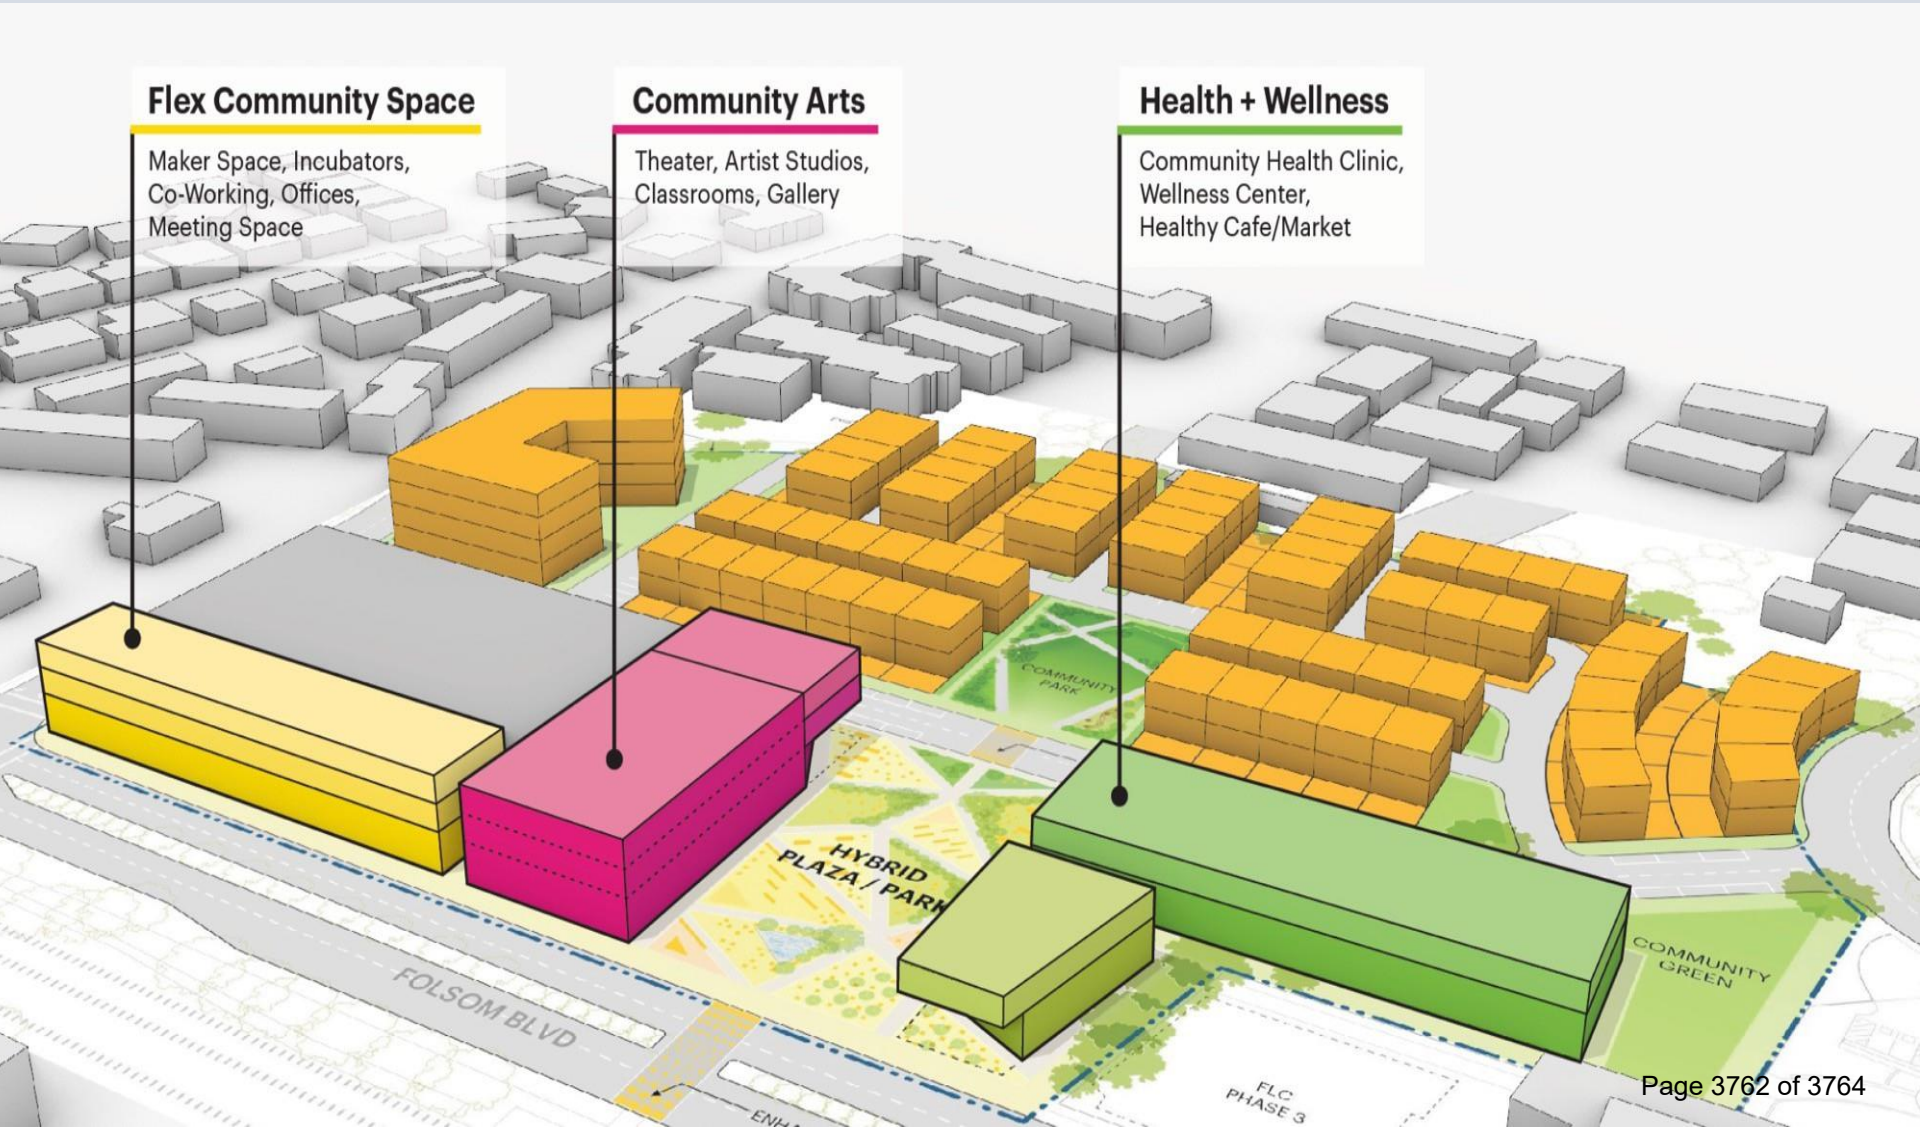
- Educational programs in our schools
- Improvements of facilities such as the MACC
- Support for community groups that champion the arts
- Art showings at City Hall, the MACC, and in the community
- Community events throughout the year
- Permanent and temporary public art installations
- Performances and art-centric events

CITY FUNDING FOR ART AND ARTISTS



The City of Rancho Cordova is a patron and sponsor of the arts. The City will continue to provide funding for art projects and programs via the Community Enhancement & Investment Fund.

VIDEO CELEBRATING OUR PUBLIC ART



MID-TERM ACTIONS

In the next phase of the Arts Strategic Plan, staff will continue to work with artists, art organizations, partners and others to further the goals of the Arts Strategic Plan.

LONG-TERM ACTIONS: MILLS CROSSING CIVIC CENTER

WHERE ARE WE HEADED NEXT?

City Council approved $50,000, in June 2021, for public art projects

City Council will have the opportunity to approve additional funding for next fiscal year's public art projects

RECOMMENDATIONS & ALTERNATIVES

Staff recommends the following for Council consideration:

- Another round of utility box wraps
- Murals or mosaics on targeted properties or areas of the city

Alternatives could include:

- Other types of art, such as:
  - Sculptures
  - Lighting
  - Benches
  - Bike racks
  - Artistic elements
- A hybrid approach
