Webinar ID: 816 3046 6928
- By phone: +1 669 900 6833 or +1 253 215 8782
Webinar ID: 816 3046 6928

Public Comment

Members of the public who wish to address the City Council may do so in person during the meeting by completing and submitting a Speaker Card to the City Clerk.

Members of the public who wish to provide public comment via email will need to submit comments to CityClerk@cityofranchocordova.org no later than 2:00 p.m. on Monday, June 3, 2024. Written comments received no later than 2:00 p.m. will be distributed to the Council, filed in the record, and will not be read aloud. All comments submitted later than 2:00 p.m. will be distributed to the Council.

If you have questions related to the City Council Meeting, please contact the City Clerk's Office at (916) 851-8720 before Monday, June 3, 2024, at 2:00 p.m.

AGENDA

1. SPECIAL MEETING - CALL TO ORDER/ROLL CALL

Council Members Linda Budge, Garrett Gatewood, Siri Pulipati, Donald Terry, and Mayor David Sander

2. PUBLIC COMMENT

At a special meeting, members of the public wishing to address the Council for any matter on the agenda may do so at the time the matter is discussed. Under the provisions of the California Government Code, the City Council is prohibited from discussing or taking action on any item not on the agenda.

3. SPECIAL MEETING

3.1. Subject: Economic Development Strategic Plan Update.

Recommendation: Receive the Economic Development Strategic Plan Update from the Economic Development Department and TIP Strategies, Inc.

4. ADJOURNMENT OF SPECIAL MEETING

Mayor Sander will adjourn the special meeting to the regular meeting in the David B. Roberts Council Chambers.

5. REGULAR MEETING - CALL TO ORDER/ROLL CALL

Council Members Linda Budge, Garrett Gatewood, Siri Pulipati, Donald Terry, and Mayor David Sander

6. METRO CABLE TV TELEVISION ANNOUNCEMENT

The Clerk will announce the meetings video recording and playback schedules.

7. PLEDGE OF ALLEGIANCE

The Mayor will call on someone in attendance to lead the Pledge.

8. INVOCATION

There will be a moment of silence in lieu of an invocation.

9. PRESENTATIONS

9.1. Introduction of New Employee: Liuba Haluha, Events Coordinator I by Alex Pille, Events Coordinator II.

10. PUBLIC COMMENT

Members of the public wishing to address the Council for any matter not on the agenda may do so at this time by completing and submitting a Speaker Card to the City Clerk.

For items on the agenda, speakers will be called by the Mayor at the point on the agenda when the item will be heard. Speakers are encouraged to keep comments to three minutes or less and to state name and community of residence.

Under the provisions of the California Government Code, the City Council is prohibited from discussing or taking immediate action on any item not on the agenda unless it can be demonstrated to be of an emergency nature or the need to take immediate action arose after

the posting of the agenda.

11. COUNCIL REPORTS

12. CITY MANAGER'S REPORT

13. CONSENT CALENDAR ITEMS - ROLL CALL VOTE

13.1. **Subject:** Meeting Minutes from the Regular City Council Meeting of May 20, 2024.

Recommendation: Adopt the minutes.

13.2. **Subject:** Treasurer's Report - March 31, 2024.

Recommendation: This report is informational only. It is recommended that the City Council receive and file the March 31, 2024, Treasurer's Report.

13.3. **Subject:** A Resolution Authorizing the City Manager to Execute Contract No. 2024-61 in an Amount not to Exceed \$1,875,000 with MCE Corporation for Stormwater Facility Maintenance Services through June 30, 2029.

Recommendation: Adopt the Resolution.

13.4. **Subject:** A Resolution Calling the November 5, 2024, General Municipal Election to Elect Council Members By-District for Districts 1, 3, and 4, Requesting the Sacramento County Board of Supervisors Consolidate the General Municipal Election with the Statewide General Election, and Establishing Policies for Candidate Statements.

Recommendation: Adopt the Resolution.

13.5. **Subject:** A Resolution Authorizing the City Manager to Execute Contract No. 2024-77 with Kittelson and Associates, Inc. in an Amount not to Exceed \$324,945 to Provide Professional Services to Prepare the Rancho Cordova Active Transportation Plan to Increase Mobility Options, Safety, and Livability.

Recommendation: Adopt the Resolution.

13.6. **Subject:** Adoption of a Resolution Authorizing the City Manager to Execute a Settlement Agreement with 350 Sacramento and Oscar Balaguer Regarding Sacramento Superior Court Case No. 23WM000101.

Recommendation: Adopt the Resolution.

13.7. **Subject:** A Resolution Rescinding the Rancho Cordova Climate Action and Adaptation Plan and California Environmental Quality Act Initial Study/Negative Declaration, and Readopting the Rancho Cordova Climate Action and Adaptation Plan as an Advisory Plan that does not meet CEQA Guidelines Section 15183.5(b).

Recommendation: Adopt the Resolution.

14. CONSENT PUBLIC HEARING ITEMS - ROLL CALL VOTE

14.1. **Subject:** A Resolution Approving Proceedings for the Annual Levy and Collection of Assessments for Landscaping and Lighting District No. 2005-1 for Fiscal Year 2024-2025.

Recommendation: Adopt the Resolution.

14.2. **Subject:** A Resolution Approving Proceedings for the Annual Levy and Collection of Assessments for the Rancho Cordova Lighting District No. 2012-1 for Fiscal Year 2024-2025.

Recommendation: Adopt the Resolution.

- 14.3. **Subject:** A Resolution Approving Proceedings for the Annual Levy and Collection of Charges for the Rancho Cordova Transit Related Services Benefit District Zone No. 1 for Fiscal Year 2024-2025.

Recommendation: Adopt the Resolution initiating proceedings for the Annual Levy and Collection of Charges, preliminarily approving the Engineer's Report and declaring its intention to levy the annual charges for Fiscal Year 2024-2025 for the Rancho Cordova Transit Related Services Benefit District, Zone No. 1 and adopt the Resolution amending and/or confirming the Engineer's Report and establishing the Fiscal Year 2024-2025 service charge for the Rancho Cordova Transit Related Services Benefit District, Zone No. 1.

- 14.4. **Subject:** Resolutions Approving Proceedings for the Annual Levy and Collection of Charges for the Rancho Cordova Transit Related Services Benefit District, Zone No. 2, for Fiscal Year 2024-2025.

Recommendation: Adopt the Resolution initiating proceedings for the Annual Levy and Collection of Charges, preliminarily approving the Engineer's Report, and Declaring its Intention to Levy the Annual Charges for Fiscal Year 2024-2025 for the Rancho Cordova Transit-Related Services Benefit District, Zone No. 2, and adopt the Resolution Amending and/or Confirming the Engineer's Report and establishing the Fiscal Year 2024-2025 Service Charges for the Rancho Cordova Transit-Related Services Benefit District, Zone No. 2.

- 14.5. **Subject:** Resolutions Approving Proceedings for the Annual Levy and Collection of Assessments for the Rancho Cordova Road Maintenance District for Fiscal Year 2024-2025

Recommendation: Adopt a Resolution initiating proceedings for the annual levy and collection of assessments, declaring its intention to levy the annual assessments and preliminarily approving the Engineer's Report for the Rancho Cordova Road Maintenance Assessment District for Fiscal Year 2024-2025, and adopt a Resolution amending and/or approving the annual Engineer's Report and ordering the levy and collection of assessments within the Rancho Cordova Road Maintenance Assessment District for Fiscal Year 2024-2025.

15. PUBLIC HEARING ITEMS

None.

16. REGULAR CALENDAR ITEMS

- 16.1. **Subject:** Proposed Neighborhood Traffic Management Program 2024 Recommendation.

Recommendation: Receive staff presentation and provide comments on the proposed 2024 Neighborhood Traffic Management Program (NTMP).

- 16.2. **Subject:** A Resolution Authorizing the City Manager to Execute a Conveyance Agreement, and Related Documents, with Sacramento County for Acquisition of Property within the Former Mather Air Force Base located on the Southeast Corner of Bleckely St and Schirra Ave, APN 067-0010-093-0000, and an American Rescue Plan Act Subaward Agreement with Sacramento County for the City-Sponsored Mather Veterans Village Phase 4 Multifamily Housing Project for Homeless Veterans.

Recommendation: Adopt the Resolution.

- 16.3. **Subject:** A Resolution Approving a Written Report Describing the Measures Taken to Alleviate the Condition Which Led to the Adoption of the Urgency Ordinance Establishing a Temporary Moratorium on the Establishment, Expansion, or Modification of Uses in the Villages of Zinfandel Special Planning Area Designated Therein as M-1 (Light Industrial) and

MP (Office Industrial Park) Zones.

Recommendation: Adopt the Resolution and direct staff to issue the written report describing the measures taken to alleviate the condition which led to the Urgency Ordinance establishing a temporary moratorium on the establishment, expansion, or modification of uses in the Villages of Zinfandel Special Planning Area Designated Therein as M-1 (Light Industrial) and MP (Office Industrial Park) zones.

- 16.4. **Subject:** A Resolution Approving and Establishing a City Council Policy to Lead with a Citywide Perspective.

Recommendation: Adopt the Resolution.

17. COUNCIL REQUESTS FOR FUTURE AGENDA ITEMS

18. ADJOURN TO CLOSED SESSION

Mayor Sander will adjourn the meeting to closed session.

19. CLOSED SESSION - CALL TO ORDER/ROLL CALL

Council Members Linda Budge, Garrett Gatewood, Siri Pulipati, Donald Terry, and Mayor David Sander

20. CLOSED SESSION

Council will meet in closed session to discuss the following item:

- 20.1. **Subject:** CONFERENCE WITH LEGAL COUNSEL – EXISTING LITIGATION (pursuant to California Government Code Section 54956.9(d)(1)) Peter A. Demetroulas and Julie Demetroulas, as Trustees of the Demetroulas Family Trust Dated September 6, 1995 vs the City of Rancho Cordova. Sacramento Superior Court Case No. 24CV009544.

21. OPEN SESSION - REPORT FROM CLOSED SESSION

The City Attorney will report on action taken in closed session.

22. ADJOURNMENT

ADDITIONAL INFORMATION

Special Meetings listed below are subject to change/cancellation without further notice.

Unless the Council adopts a motion to extend the meeting, any item that is not initiated before 11:00 p.m. will be continued to the next day at 5:30 p.m. or scheduled on the next regular meeting agenda of the Council.

Public documents related to items on the open session portion of this agenda, which are distributed to the City Council less than 72 hours prior to the meeting, shall be available for public inspection at the time the documents are distributed to the Council. Documents are available for inspection at the City Clerk's office located in Rancho Cordova City Hall.

The agenda items are accessible on the City's website at www.cityofranchocordova.org on Thursdays or Fridays prior to the Regular City Council Meeting.

In compliance with the Americans with Disabilities Act, if you need a disability-related modification or accommodation, including auxiliary aids or services, to participate in this meeting, please contact the City Clerk's Office at (916) 851-8720 at least 48 hours prior to the meeting.

CERTIFICATION OF POSTING OF AGENDA

I, Stacy Leitner, City Clerk for the City of Rancho Cordova, declare that the foregoing agenda for the June 3, 2024, Regular Meeting of the Rancho Cordova City Council was posted and available for review on May 30, 2024, at City Hall of the City of Rancho Cordova, 2729 Prospect Park Drive, Rancho Cordova, California, 95670. The agenda is also available on the city website at www.cityofranhocordova.org.

Signed May 30, 2024, at Rancho Cordova, California.

Stacy Leitner, CMC
City Clerk

MEMORANDUM

ITEM 3.1.

DATE: June 3, 2024
TO: Honorable Mayor and Council Members
FROM: Amanda Norton, Economic Development Manager
SUBJECT: **ECONOMIC DEVELOPMENT STRATEGIC PLAN UPDATE**

RECOMMENDATION

Receive the Economic Development Strategic Plan Update from the Economic Development Department and TIP Strategies, Inc.

RESULT OF RECOMMENDED ACTION

If directed to do so by City Council, City staff would return with additional information or discussion items at a future Council meeting.

BACKGROUND

On February 5, 2024, City Council approved Resolution No. 8-2024, authorizing the City Manager to execute an agreement with TIP Strategies, Inc. to develop a three (3) year Economic Development Strategic Plan (EDSP). The agreement began on March 1, 2024, and will conclude on March 31, 2025.

The EDSP is a year-long process that will guide the City of Rancho Cordova's economic development efforts for the next three (3) years. The EDSP will define a clear vision and set of strategies to enhance the City's economic prosperity, promote job growth, attract businesses, and ensure a vibrant and sustainable local economy.

This presentation will provide an update on the EDSP development, data and insights collected to date, and next steps.

FISCAL IMPACT AND FUNDING SOURCE

No fiscal impact is associated with this update.

PROJECT OVERVIEW

WHAT YOU TELL US

- ▶ Meetings with community leadership & staff
- ▶ Focus group discussions
- ▶ Stakeholder interviews, surveys, & workshops

WHAT THE DATA TELLS US

- ▶ Economic assessment
- ▶ Benchmarking vs. competitors & peer cities
- ▶ Cluster & target industry analysis

WHAT OUR EXPERIENCE TELLS US

- ▶ Strategies & initiatives
- ▶ Best practices
- ▶ Trends in economic development

PROJECT GOAL

To create an actionable Economic Development Strategic Plan that furthers strong and inclusive economic growth in Rancho Cordova

SPECIFIC CONSIDERATIONS

ITEM 3.1.

ATTACHMENT 1

Elements of the Rancho Cordova economic development strategic plan

Citywide Demographic and Economic Analysis

- ▶ Analyze key **demographic, socioeconomic, labor and workforce, educational, and employment** data.
- ▶ When possible, **disaggregate data** by geography, ethnicity, and race.
- ▶ Consider the city's current economic position and **identify opportunities** for the future.

Business Attraction, Retention, & Expansion

- ▶ Examine current **marketing, branding, and incentives** and ensure alignment with goals and objectives.
- ▶ Assess how strategies can be implemented to **support equitable economic development**.

Target Industry Analysis

- ▶ Identify **target sectors** for growth, expansion, and relocation.
- ▶ Targeted and actionable **business recruitment and retention strategy**.

Commercial Property Analysis

- ▶ Analyze real estate **market indicators such as rental rates, vacancies, construction completion**.
- ▶ Identify **development opportunities and the alignment of real estate assets** with goals and strategies in the plan.

SCHEDULE

ITEM 3.1.

ATTACHMENT 1

ENGAGEMENT

Stakeholders

- Roundtables, interviews
- Town halls

City Council

- Briefings in June, August, and November

Steering Committee

- Meetings in April, May, August, and November

WHAT WE'VE LEARNED

WHAT WE'VE HEARD

ATTACHMENT 1

- ▶ There is a **strong sense of community** in Rancho Cordova
 - ▶ Many family-oriented, summer events
 - ▶ Assets include the barrel district, river, and the MACC
- ▶ The **city is viewed as a strong partner** with the business community
 - ▶ Willingness to support businesses and development process
 - ▶ Opportunity to improve BRE and strengthen business attraction
- ▶ **Real estate challenges** include office vacancies, and insufficient retail and amenity options
 - ▶ Remote work has led to increased office space vacancies, and decreased daytime traffic
 - ▶ Desire for a downtown or other community gathering place
- ▶ Businesses are experiencing **hiring challenges**
 - ▶ Childcare, transportation, and language access are barriers
 - ▶ Mismatch between residents' skills and locally available jobs
 - ▶ Opportunity to improve collaboration between businesses and workforce partners

ITEM 3.1.
POPULATION GROWTH

Rancho Cordova has experienced rapid growth since 2010, but the rate may be slowing

Sources: US Census Bureau, Population Estimates Program; Moody’s Analytics; TIP Strategies, Inc.
Notes: Population estimates prior to 2019 are sourced from Moody’s Analytics. Estimates from 2010-2022 are sourced from the Census Bureau’s Population Estimates program vintages 2020 and 2022.

POPULATION GROWTH

ITEM 3.1.

Most population change is from domestic migration

Sources: US Census Bureau, Population Estimates Program; Moody's Analytics; TIP Strategies, Inc.
Notes: Natural Change is the difference between annual births and deaths. Total population change includes a residual (a change in population that cannot be attributed to any specific demographic component). Residual change is not shown in the chart but is included in the net population change shown by the red bars. 2010 and 2020 components are estimated based on a 12-month projection of the 2nd quarter (the period between the Census and the mid-year estimate) that is not seasonally adjusted.

ITEM 3.1.

HOUSING COST-BURDENED OWNERS, 2022

Rancho Cordova has a higher proportion of housing-cost burdened owners, despite its relative affordability

Sources: 2022 American Community Survey (ACS) 5-year sample; TIP Strategies, Inc.
Notes: Housing-cost burdened households are those spending 30 percent or more of income on housing costs. Only includes households where housing cost and household income can both be determined.

ITEM 3.1. **INDUSTRY SECTOR CONCENTRATIONS- LQs (2001-2023)**

Rancho Cordova has a competitive advantage in Finance & Insurance and Regional & Corporate Operations

ITEM 3.1.

JOB COUNT BY INDUSTRY SECTOR, 2023

The city has strong employment in the Finance & Insurance, Construction, and Healthcare sectors

ITEM 3.1. INDUSTRY SECTORS CHANGE (2019-2023)

Employment in the Healthcare and Transportation sectors has grown, but losses in Finance & Insurance and Administrative services have been significant

ITEM 3.1.

OCCUPATIONAL EMPLOYMENT, 2023

More workers commute into Rancho Cordova than commute out, creating a housing opportunity

A **positive** number indicates Rancho Cordova, CA, is effectively a net importer of workers for that occupational group (i.e., there are more jobs available than there are residents in that occupational group), and a **negative** number indicates Rancho Cordova, CA, is effectively a net exporter of workers for that group.

ITEM 3.1. COMMUTING PATTERNS, 2021

ATTACHMENT 1

Where workers employed in Rancho Cordova lived & where residents of Rancho Cordova worked

TOP 10 CITIES WHERE WORKERS LIVED

TOP 10 CITIES WHERE RESIDENTS WORKED

Sources: Longitudinal Employer-Household Dynamics (LEHD), Origin-Destination Employment Statistics (LODES); TIP Strategies, Inc.

Notes: Goods-producing sectors include agriculture, mining, oil and gas extraction, construction, and manufacturing. Trade, transport, and utilities sector includes retail and wholesale trade, transportation, warehousing, and utilities. All other sectors are aggregated. Only includes residents and workers in California.

ITEM 3.1.

COMMUTING PATTERNS BY SOCIOECONOMIC FACTORS, 2021

ATTACHMENT 1

The largest group of commuters are White, mid-career with middle & high earnings

Sources: Longitudinal Employer-Household Dynamics (LEHD), Origin-Destination Employment Statistics (LODES); TIP Strategies, Inc.
Notes: All states are included in determining the net flow values in this chart. Net flow may appear slightly different from the values presented in the commuter trends chart.

ITEM 3.1. KEY ASSETS AND OPPORTUNITIES

ATTACHMENT 1

1 Sense of community and diverse population

2 Regional job center with large business park

3 Location within the region

4 Business friendly, growth-oriented mindset

5 Comparatively affordable housing

- 1 Underutilized and vacant office space
- 2 Disconnect between where people live and work
- 3 Lack of central downtown or community space
- 4 Need for additional housing
- 5 Outdated perceptions from outside the community

PROPOSED FRAMEWORK

GUIDING PRINCIPLES

ECONOMIC RESILIENCY

SUSTAINABLE GROWTH

INNOVATION

DIVERSITY AND INCLUSIVITY

18. ADJOURNMENT

Mayor Sander adjourned the meeting in memory of Clarence "Bud" Anderson and Al Rogel at 8:13 p.m.

Stacy Leitner, CMC
City Clerk

MEMORANDUM

ITEM 13.2.

DATE: June 3, 2024
TO: Honorable Mayor and Council Members
FROM: Kim Juran-Karageorgiou,
Administrative Services Director
SUBJECT: Treasurer's Report – March 31, 2024

RECOMMENDATION

This report is informational only. It is recommended that the City Council receive and file the March 31, 2024, Treasurer's Report.

RESULT OF RECOMMENDED ACTION

The Treasurer's Report is required to be submitted to the City Council at least quarterly in accordance with California Government Code Section 53600 et. seq. The purpose of the Treasurer's Report is to update the City Council and the public on the status of the City's cash balances and investments and highlight material changes from one period to another. The scope of this report covers the first quarter of the 2024 calendar year ending March 31, 2024, and is in compliance with the State's reporting requirements.

BACKGROUND

Attached is the quarterly Treasurer's Report for the period ending March 31, 2024. The Treasurer's Reports are provided to the City Council on a quarterly basis.

At December 31, 2023, the value of the City's total portfolio was \$291.6 million. Since that time, the City's cash balances increased by \$31.3 million with an ending balance of \$322.9 million as of March 31, 2024. The funds are held as follows:

Investment Distribution	Book Value	Market Value
Cash at Banking Institutions	127,066,790	127,066,790
Local Agency Investment Fund (LAIF)	6,483,530	6,483,530
CAMP Pool	58,134,608	58,134,608
CAMP Managed Account	68,092,171	66,920,478
Insight Investment	64,776,864	64,300,077
Total	324,553,963	322,905,483

The overall economy remained strong at the start of 2024, led by strong consumer spending and a robust labor market. The Federal Reserve kept the overnight rate at its current target range of 5.25%-5.50% during the first quarter of 2024, as expected, marking the fifth consecutive pause following the last rate hike in July 2023. While inflation readings for January and February came in higher than expectations, CPI continued to trend lower during the first quarter. The U.S. labor market showed little signs of softening, adding over 800,000 jobs in the first quarter and dropping the unemployment rate to 3.8%, marking two years in which unemployment has remained below 4%.

The City's cash balance as of March 31, 2024, was allocated by fund type/purpose as follows:

- General Fund: \$22.7 million
- Community Enhancement & Investment Fund (Measure H & R): \$21.3 million
- Sunrise Development Impact Fees (restricted for specific improvements needed as a result of development in the area): \$42.7 million
- Transportation Funds: \$92.9 million
- Storm Drain Fund: \$21.0 million
- Capital Projects/Grant/Special Revenue Funds: \$88.5 million
- Agency Funds (funds held for other entities): \$35.4 million

The overall portfolio is well diversified with \$132.9 million invested in marketable securities, \$64.6 million is invested in short-term investments that are considered liquid (LAIF, CAMP, and money markets), and another \$127.0 million is on deposit with our banks, which includes \$5.5 million on deposit with one local bank as part of the City's participation in a local banking initiative. Staff, in conjunction with our financial advisors, periodically reviews the mix of liquid

and long-term investments and adjusts the portfolio according to the market conditions and our short-term cash needs.

Staff thoroughly reviews investment statements and makes appropriate inquiries of its investment advisors to confirm the existence and viability of the City's assets. The City invests conservatively in investment policy options in accordance with the California State Government Code. The long-term assets are in securities that can be held to maturity, thus are less vulnerable to the fluctuations of the market. All securities are in compliance with the City's investment policy. There are sufficient funds to meet the City's expenditure requirements for the next six months.

The distribution of investments are displayed in the following charts:

FROM: Albert Stricker, Public Works Director
Dalia Fadl, Principal Engineer
SUBJECT: **A RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE CONTRACT NO. 2024-61 IN AN AMOUNT NOT TO EXCEED \$1,875,000 WITH MCE CORPORATION FOR STORMWATER FACILITY MAINTENANCE SERVICES THROUGH JUNE 30, 2029**

RECOMMENDATION

Adopt the Resolution.

RESULT OF RECOMMENDED ACTION

Adoption of the Resolution would authorize the City Manager to execute Contract No. 2024-61 with MCE Corporation in an amount not to exceed \$1,875,000 for the provision of stormwater facility maintenance services through June 30, 2029.

BACKGROUND

The work conducted under this contract includes routine vegetation management, tree maintenance and removal, debris and obstruction removal, trash and litter cleanup, and miscellaneous repairs within City-maintained stormwater facilities, including but not limited to channels, outfalls, ditches, basins, levees, and all other facilities. This will be a five-year contract starting June 3, 2024, and expiring on June 30, 2029. Proposals were solicited on OpenGov, the City's website, and CIPList.com on March 21, 2024. Two proposals were received on April 16, 2024. The submitted proposals were reviewed and determined to be complete and competitive. Of the two proposals, the evaluation committee determined MCE Corporation to have the best combination of experience and understanding of the City's desired level of service. MCE currently performs stormwater facility maintenance services under contract to the City and has an excellent performance record.

FISCAL IMPACT AND FUNDING SOURCE

Funding for the contract will be from the City's Stormwater Utility Fee. There is no impact to the City's General Fund.

CITY OF RANCHO CORDOVA

RESOLUTION NO. XX-2024

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA, STATE OF CALIFORNIA, AUTHORIZING THE CITY MANAGER TO EXECUTE CONTRACT NO. 2024-61 IN AN AMOUNT NOT TO EXCEED \$1,875,000 WITH MCE CORPORATION FOR STORMWATER FACILITY MAINTENANCE SERVICES THROUGH JUNE 30, 2029

WHEREAS, the City solicited proposals for stormwater facility maintenance services under the requirements of State law and accepted proposals on April 16, 2024; and

WHEREAS, the City received two proposals, and MCE Corporation was found to be the most qualified contractor; and

WHEREAS, adoption of this Resolution will allow the City Manager to execute a five-year contract through June 30, 2029, with MCE Corporation in an amount not to exceed \$1,875,000; and

WHEREAS, the scope of work includes routine vegetation management, tree maintenance and removal, debris and obstruction removal, trash and litter cleanup, and miscellaneous repairs within City-maintained stormwater facilities, including but not limited to channels, outfalls, ditches, basins, levees, and all other facilities; and

WHEREAS, the contract will be funded through the City's Stormwater Utility Fee; and

WHEREAS, the amount exceeds the maximum the City Manager has authorization to approve.

NOW, THEREFORE, BE IT HEREBY RESOLVED THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA does authorize the City Manager to execute Contract No. 2024-61 in an amount not to exceed \$1,875,000 with MCE Corporation in a form approved by the City Attorney.

PASSED AND ADOPTED by the City Council of the City of Rancho Cordova on the 3rd day of June 2024 by the following vote:

CONTRACT NO.: 2024-61

**GENERAL SERVICES AGREEMENT BETWEEN
THE CITY OF RANCHO CORDOVA AND MCE CORPORATION (Contractor)**

THIS AGREEMENT (hereinafter referred to as "Agreement") is made by and between the City of Rancho Cordova, a California municipal corporation, (herein "City") and MCE Corporation, (herein "Contractor"), as of June 3, 2024.

Section 1. SERVICES. Subject to the terms and conditions set forth in this Agreement, Contractor shall provide to City the services described in the Scope of Work attached as Exhibit A ("Services") at the time and place and in the manner as specified therein. In the event of a conflict or inconsistency between the terms of this Agreement and Exhibit A, the Agreement shall prevail.

Section 2. TERM. The term of this Agreement shall begin on the date first noted above and shall end on June 30, 2029, unless the term of this Agreement is otherwise terminated as provided for in Section 10. The time provided to Contractor to complete the services required by this Agreement shall not affect the City's right to terminate the Agreement, as provided for in Section 10.

Section 3. CONTRACT ADMINISTRATOR. This Agreement shall be administered by Dalia Fadl ("Contract Administrator"). All correspondence shall be directed to or through the Contract Administrator or his or her designee.

Section 4. COMPENSATION OF CONTRACTOR. The Contractor shall be paid ONE MILLION EIGHT HUNDRED SEVENTY-FIVE THOUSAND DOLLARS (\$1,875,000) for performance of the Services pursuant to this Agreement. The Contractor shall submit invoices to the City Finance Director on a monthly basis detailing the Services performed. In the event of a conflict between this Agreement and Contractor's Exhibit A regarding the amount of compensation, the Agreement shall prevail. Upon receipt and approval of the Contractor's invoices, the City shall remit payment to the Contractor for Services provided within thirty (30) days. Payment to Contractor shall be considered as full compensation for performing the Services.

City's failure to discover or object to any unsatisfactory work or billing prior to payment will not constitute a waiver of City's right to request Contractor to correct such work or billings or seek any other legal remedy.

Section 5. PERFORMANCE STANDARDS.

A. Contractor shall comply with all applicable laws now in force or which may hereafter be in force with regard to the provision of Services and this Agreement.

B. Contractor represents that it has the skills, expertise, licenses and permits necessary to perform the Services. Contractor shall perform all such Services in the manner and according to the standards observed by a competent practitioner of the same profession in which Contractor is engaged and in accordance with applicable industry standards. Permits and/or licenses shall be obtained and maintained by Contractor without additional compensation throughout the term of this Agreement.

Section 6. STATUS OF CONTRACTOR

6.1 INDEPENDENT CONTRACTOR. At all times during the term of this Agreement, Contractor shall be an independent contractor as defined in Labor Code Section 3353, and shall not be an employee of City. Nothing contained in this Agreement shall be construed

CONTRACT NO.: 2024-61

to be inconsistent with the foregoing relationship or status. City shall have the right to control Contractor only insofar as the results of Contractor's services rendered pursuant to this Agreement and assignment of personnel; however, otherwise City shall not have the right to control the means and methods by which Contractor accomplishes services rendered pursuant to this Agreement. Contractor shall have no power or authority by this Agreement to bind the City in any respect. All employees and agents hired or retained by Contractor are employees and agents of Contractor and not of the City. The City shall not be obligated in any way to pay any wage claims or other claims made against Contractor by any such employees or agents, or any other person resulting from performance of this Agreement.

Notwithstanding any other City, state, or federal policy, rule, regulation, law, or ordinance to the contrary, Contractor and any of its employees, agents, and subcontractors providing services under this Agreement shall not qualify for or become entitled to, and hereby agree to waive any and all claims to, any compensation, benefit, or any incident of employment by City, including but not limited to eligibility to enroll in PERS as an employee of City and entitlement to any contribution to be paid by City for employer contributions and/or employee contributions for PERS benefits. Contractor shall not allow any employee, agent or subcontractor to become eligible for a claim for PERS benefits.

- 6.2 Contractor Not an Agent.** Except as City may specify in writing, Contractor shall have no authority, express or implied, to act on behalf of City in any capacity whatsoever as an agent. Contractor shall have no authority, express or implied, pursuant to this Agreement to bind City to any obligation whatsoever.

Section 7. INSURANCE REQUIREMENTS. Prior to beginning any Service under this Agreement, Contractor, at its own cost and expense, shall procure insurance coverage at such levels of coverage, scope, limits, and/or forms as set forth in Exhibit B ("Insurance Requirements") hereto. Contractor shall provide proof satisfactory to City of such insurance and maintain the insurance throughout the term of this Agreement.

Section 8. INDEMNIFICATION AND CONTRACTOR'S RESPONSIBILITIES.

- 8.1 General Requirement.** Contractor shall indemnify, defend with counsel selected by the City, and hold harmless City, its officers, agents, employees and representatives from and against any and all claims, losses, liabilities or damages, demands and actions, including payment of reasonable attorney's fees, arising out of or resulting from Services performed pursuant to this Agreement caused in whole or in part by any negligent or willful act or omission of Contractor, its officers, agents, employees, or anyone directly or indirectly acting on behalf of Contractor. The foregoing obligation of Contractor shall not apply when (1) the injury, loss of life, damage to property, or violation of law arises wholly from the negligence or willful misconduct of the City or its officers, employees, agents, or volunteers and (2) the actions of Contractor or its employees, subcontractor, or agents have contributed in no part to the injury, loss of life, damage to property, or violation of law. It is understood that the duty of Contractor to indemnify and hold harmless includes the duty to defend as set forth in Section 2778 of the California Civil Code. Acceptance by City of insurance certificates and endorsements required under this Agreement does not relieve Contractor from liability under this indemnification and hold harmless clause. This

CONTRACT NO.: 2024-61

indemnification and hold harmless clause shall apply to any damages or claims for damages whether or not such insurance policies shall have been determined to apply. By execution of this Agreement, Contractor acknowledges and agrees to the provisions of this Section and that it is a material element of consideration.

- 8.2 PERS Indemnification.** In the event that Contractor or any employee, agent, or subcontractor of Contractor providing Services under this Agreement is determined by a court of competent jurisdiction of the California Public Employees Retirement System ("PERS") to be eligible for enrollment in PERS as an employee of City, Contractor shall indemnify, defend, and hold harmless City for the payment of any and all employee and/or employer contributions for PERS benefits on behalf of Contractor or its employees, agents, or subcontractors, as well as for the payment of any penalties and interest on such contributions, which would otherwise be the responsibility of City, and any attorneys' fees and costs incurred by the City to enforce this Section.

Section 9. NONDISCRIMINATION AND EQUAL OPPORTUNITY. Contractor shall not discriminate, on the basis of a person's race, religion, color, national origin, age, physical or mental handicap or disability, medical condition, marital status, sex, or sexual orientation, against any employee, applicant for employment, subcontractor, bidder for a subcontract, or participant in, recipient of, or applicant for any services or programs provided by Contractor under this Agreement. Contractor shall comply with all applicable federal, state, and local laws, policies, rules, and requirements related to equal opportunity and nondiscrimination in employment, contracting, and the provision of any services that are the subject of this Agreement, including but not limited to the satisfaction of any positive obligations required of Contractor thereby. Contractor shall include the provisions of this section in any subcontract approved by the City.

Section 10. AMENDMENTS. No modification or amendment of this Agreement is effective unless made in writing and signed by both the City and Contractor.

Section 11. ASSIGNMENT AND SUBCONTRACTING. Contractor shall not assign or transfer any interest in this Agreement without the prior written consent of the City.

Section 12. TERMINATION. Either party may terminate this Agreement without cause, upon 30 days written notice to the other party. In the event of termination, Contractor shall be entitled to payment for Services then satisfactorily completed. Contractor shall not be entitled to any claim against City for any additional compensation or damages in the event of such termination.

Section 13. NOTICES. All notices that are regarding this Agreement shall be in writing and shall be deemed to have been given if delivered personally or enclosed in a properly addressed envelope and deposited in a United States Post Office for delivery by registered or certified mail addressed to the parties at the following addresses:

City: City of Rancho Cordova
2729 Prospect Park Drive
Rancho Cordova, CA 95670
ATTN: Finance Director

CONTRACT NO.: 2024-61

Contractor: MCE Corporation
P.O. Box 508
Concord, CA 94522
Attn: Jeff Core

Email Address (for Insurance Update Requests) KHealy@MCE-CORP.COM

Section 14. GOVERNING LAW AND VENUE. The laws of the State of California shall govern this Agreement. Venue for any action regarding this Agreement shall be in the Superior Court of the County of Sacramento or in the United States District Court for the Eastern District of California.

Section 15. ATTORNEYS' FEES. If a Party to this Agreement brings any action, including an action for declaratory relief, to enforce or interpret the provisions of this Agreement, the prevailing Party shall be entitled to reasonable attorneys' fees in addition to any other relief to which that Party may be entitled. The court may set such fees in the same action or in a separate action brought for that purpose.

Section 16. SEVERABILITY. If a court of competent jurisdiction finds or rules that any provision of this Agreement is invalid, void, or unenforceable, the provisions of this Agreement not so adjudged shall remain in full force and effect. The invalidity in whole or in part of any provision of this Agreement shall not void or affect the validity of any other provision of this Agreement.

Section 17. NO IMPLIED WAIVER OF BREACH. The waiver of any breach of a specific provision of this Agreement does not constitute a waiver of any other breach of that term or any other term of this Agreement.

Section 18. SURVIVAL. The obligations of this Agreement, which by their nature would continue beyond the term or expiration of the Agreement, including without limitation obligations regarding indemnification shall survive the term or expiration of this Agreement.

Section 19. IRS Form W-9. Contractor shall complete and submit Internal Revenue Service Form W-9 to the City before execution of this Agreement. The City's Finance Director shall have authority to waive this requirement.

Section 20. ENTIRE AGREEMENT. This Agreement, including the scope of work attached hereto and incorporated herein as Exhibit A, and the insurance requirements attached hereto and incorporated herein as Exhibit B, represents the entire and integrated Agreement between City and Contractor and supersedes all prior negotiations, representations, and Agreements regarding the subject matter of this Agreement, either written or oral.

CONTRACT NO.: 2024-61

IN WITNESS WHEREOF, the parties have executed this Agreement as of the day and year set forth above, which date shall be considered the effective date of this Agreement.

**EXHIBIT A
SCOPE OF WORK**

Contractor will provide Stormwater Facility Maintenance Services to the City as specified in the following Request for Proposals (RFP), which is incorporated in and made part of this contract and shall survive all other terms and conditions under this contract.

Compensation for Chemical Treatment, High Weed Mowing, and Debris & Obstruction Removal services shall be paid based on the Cost Schedule unit costs provided in Contractor's proposal submittal, also attached and made part of this contract. Unit cost pricing provided in the Contractor's proposal submittal shall apply to all unit cost work covered under this contract for the full contract term.

Labor and equipment rates included in the Contractor's proposal shall apply to all other work covered under this contract for the first full year of the contract. Hourly rates and equipment rates shall include all costs to supply the necessary labor costs, insurances, and equipment including, but not limited to, overhead and profit. Labor and vehicle rates may escalate annually based on San Francisco (ENR) Consumer Price Index (CPI), or 3%, whichever is less.

Contractor shall submit an annual Maintenance Schedule to the City at the beginning of each fiscal year of the contract specifying the anticipated maintenance activities planned each month. Contractor shall revise the Maintenance Schedule as needed to better align with City needs or arising priorities and notify City of any such revisions.

Contractor shall recommend a schedule for vegetation management at stormwater facilities to maintain vegetation heights according to the special provisions or at a schedule approved by the City.

All work performed by the Contractor under this contract shall be ordered by the City via a work order originated by City staff, and billing should appropriately reference the relevant work order number.

Contractor shall provide to the City inspection reports in a format approved by the City for all inspections performed at stormwater facilities.

Contractor shall document the completion of all applicable maintenance services by submitting "before" and "after" photographs of maintenance activities as specified by the City.

Contractor shall implement Integrated Pest Management (IPM) practices as much as possible to avoid any adverse impacts from using pesticides. Contractor will provide annual IPM training to all maintenance workers as needed.

CITY OF RANCHO CORDOVA

DEPARTMENT OF PUBLIC WORKS

Request for Proposals for:

Stormwater Facility Maintenance Services

City of Rancho Cordova
Department of Public Works
2729 Prospect Park Drive
Rancho Cordova, CA 95670

Release Date:

March 21, 2024

Proposals Due Online:

April 16, 2024, before 2:00 pm

Section 1 - Request for Proposal Overview

1.1. INTRODUCTION

The City of Rancho Cordova, Department of Public Works, is seeking the submission of proposals from qualified contractors for the provision of Stormwater Facility Maintenance Services ("Project"). Should a contract be executed as a result of this Request for Proposals (RFP), the Contractor will be expected to perform Stormwater Facility Maintenance Services comprised of routine vegetation management, tree maintenance and removal, debris and obstruction removal, trash and litter cleanup, and miscellaneous repairs within City-maintained stormwater facilities, including but not limited to channels, outfalls, ditches, basins, levees, and all other facilities.

This RFP contains all of the information and documents necessary to prepare and submit a responsive proposal. Proposers are cautioned to read all of the documentation provided and will be responsible for complying with all requirements identified herein. Any contract resulting from a selected Proposal shall have a five (5) year contract term starting July 1, 2024. The Contract may be extended by one contract term amendment of two (2) additional years. This Project may be subject to compliance, monitoring, and enforcement by the California Department of Industrial Relations.

1.2. BACKGROUND

The City is home to more than 81,000 residents who have come to expect the highest quality public service after twenty years of Cityhood. The City is comprised of more than 35 square miles of land and is located in Sacramento County along the Highway 50 corridor, approximately 12 miles east of the California State Capitol.

The City's Stormwater Program manages over 250 miles of drainage pipe, over 11,700 drainage structures, over 20 miles of open channels, and 6 pump stations.

1.3. PROPOSAL INFORMATION

Proposals shall be made only on forms provided in this RFP, as provided by the City. All cost figures shall be clearly indicated in the submitted Cost Proposal. The proposal shall include any other submittals and requirements identified in this RFP.

Any questions related to this RFP shall be directed to the Question & Answers section of the project posted on OpenGov. All questions must be submitted in OpenGov. Below is an overview of the key dates and information:

RFP Release Date:	March 21, 2024
Deadline for Written Questions/Clarifications:	April 4, 2024, 5:00pm
City's Responses to Written Questions:	April 9, 2024, 5:00pm
Proposals Due:	April 16, 2024, 2:00pm

1.4. QUALIFICATION REQUIREMENTS

Any Proposer shall demonstrate minimum qualifications have been met. Minimum Qualifications include, but are not limited to:

Possession of a valid State of California **General Engineering Contractor, Class A license, or Landscaping Contractor, C27 license**, and good standing with the California Department of Consumer Affairs Contractors State License Board. A copy of the license shall be submitted with the Proposal.

1.5. PROPOSAL POSTPONEMENT AND AMENDMENT

The City reserves the right to revise or amend the specifications up to the time set for the submittal of proposals. Such revisions and amendments, if any, shall be announced by addendums to this solicitation. Copies of such addenda shall be made available for the project on OpenGov. Prospective Contractors are defined as those Contractors listed on the City's Request for Proposal list for this material/service or who have obtained this RFP document after the advertisement. If revisions and amendments require changes in quantities or prices proposed, or both, the date set for opening of proposals may be postponed as determined by the City and shall enable Contractors to revise their proposals.

1.6. SINGLE PROPOSAL RESPONSE

If only one proposal is received in response to this RFP, a detailed cost proposal may be requested of the single Contractor. A cost/price analysis and evaluation and/or audit may be performed on the cost proposal in order to determine if the price is fair and reasonable.

1.7. PROPOSAL WITHDRAWAL

After the proposals are opened, bids may not be withdrawn for ninety (90) calendar days. Prior to the date/time set for the proposal submittal, however, proposals may be modified or withdrawn by the Contractor's authorized representative that submitted online by un-submitting and modifying before re-submitting.

1.8. CONTRACTOR INVESTIGATION

Before submitting a proposal, each Proposer shall make all investigations and examinations necessary to ascertain all site conditions and requirements affecting the full performance of the contract and to verify any representations made by the City upon which the Proposer will rely. If the Proposer enters into an agreement with the City as a result of its proposal submission, failure to have made such investigations and examinations will in no way relieve the Contractor from its obligation to comply in every detail with all provisions and requirements of the contract, nor will a plea of ignorance of such conditions and requirements be accepted as a basis for any claim whatsoever by the Contractor for additional compensation.

1.9. AWARD

The City reserves the right to accept proposals on individual items listed, on group items, or the proposal as a whole; to reject any and all proposals; to waive any informality in the proposals; and to accept the Proposal that appears to be in the best interest of the City. The City intends to award all RFP items to a single Contractor.

In determining and evaluating the most responsive and responsible proposal, the prices will not necessarily be controlling, but quality, equality, efficiency, utility, general terms, delivery, the suitability of the service offered, and the reputation of the contractor in general use will also be considered with any other relevant factors. The Contract Manager shall have sole discretion in the determination of these matters. Please refer to the evaluation criteria for more information.

Notice of contract award, if a contract is awarded, will be made within ninety (90) days of the opening of proposals to the Contractor with the most qualified proposal, whose proposal complies with all the requirements in this RFP. The Contractor shall agree to sign, within ten (10) days of award, a contract as approved by the Rancho Cordova City Council. Reference the "Sample Contract" in [Attachments](#).

1.10. PROTEST

Upon notification of the City's notice of contract award, a Proposer shall have three (3) business days to protest the City's decision to the Public Works Director. All protests shall clearly state in writing the basis for the protest and provide the evidence on which the protest is based upon. The Public Works Director shall respond to the protest within five (5) business days of receipt of the written protest, with a written determination regarding the matter.

The Proposer shall have three (3) business days to appeal the determination of the Public Works Director to the City's Assistant City Manager, by submitting a written appeal. The Assistant City Manager shall issue written determination on the appeal within five (5) business days of receipt of a timely appeal. The Assistant City Manager's decision on the matter shall be the final determination.

1.11. COMMENCEMENT OF WORK

Proposers acknowledge that the submittal of proposals does not constitute any acceptance of work by the City. Additionally, the receipt of award of contract to any Proposer shall not constitute any authority to enter upon sites for work and begin Stormwater Facility Maintenance Services. Work shall commence only upon formal execution of a contract between the City and Contractor, and a written notice to proceed from Contract Manager to Contractor.

The City seeks to make the selection of a Contractor and award a contract for Stormwater Facility Maintenance Services by June 3, 2024. Proposers acknowledge that they are prepared to execute a contract and begin prosecuting work on July 1, 2024. Any Proposer unable to meet this timeframe shall not be considered for award.

In the event the selected Contractor fails to adequately perform Stormwater Facility Maintenance Services to standards identified in this RFP, and as appended to the executed contract, the City reserves the right to adjust the scope of the contract and/or terminate the agreement. Additionally, the City reserves the right to enter into additional contracts for Stormwater Facility Maintenance Services should the selected Contractor not meet City standards.

1.12. TERM OF AGREEMENT

Any contract resulting from a submitted Proposal shall be a five (5) year contract starting July 1,

2024. The Contract may be extended by a contract term amendment of two (2) additional years.

Failure of the Contractor to diligently execute the work as defined herein will be considered as grounds for termination of the contract.

Failure to provide an adequate workforce to execute the scope of the contract shall be considered as grounds for termination of the contract.

The contract may be terminated by the City upon thirty (30) calendar days prior to written notice addressed to the last known address of the Contractor. In the event of such termination, the Contractor shall be paid for all work successfully completed up to the effective date of such termination.

1.13. PUBLIC RECORDS

All proposals and other materials submitted in response to this RFP shall become the property of the City. Selection or rejection of a proposal does not affect this right. All proposal information, including detailed price and cost information, will be held in confidence during the evaluation process. Upon the completion of the evaluation of proposals, the proposals and associated materials will be open for review by the public to the extent allowed by the California Public Records Act, (California Government Code Section 6250 et. seq.).

By submitting a proposal, the Proposer acknowledges and accepts that the contents of the proposal and associated documents will become open to public inspection. If a vendor submits an entire proposal marked confidential, it will be considered non-responsive. Each Proposer should be aware that, although the California Public Records Act recognizes that certain confidential trade secret information may be protected from disclosure, the City might not be in a position to establish which submitted information constitutes a trade secret. If a request is made for information marked "confidential", the City will provide the Proposer who submitted such information with reasonable notice to allow the Proposer to seek protection from disclosure by a court of competent jurisdiction.

Section 2 - Basis for Evaluation of Proposals

In order to receive consideration of selection, all proposals received must address all aspects of this RFP. Each item identified in **Proposal Submittal** shall be included in the proposal submittal. The proposal submission implies the proposer's acceptance of the evaluation criteria.

Before the award of a contract, the City may require proposers to provide an oral presentation of their proposal to a review panel for evaluation.

The City reserves the right to reject any and all bids, to waive any irregularities in any proposal, to sit and act as the sole judge of the merit and qualifications of services offered, and to accept the proposal which is deemed to be in the best interest of the City of Rancho Cordova. The City will award any agreement based on the most responsive and responsible proposal, which includes the most advantageous pricing, quality, and suitability of services for the City's particular needs. Additionally, the City may, for any reason, determine not to award a contract as a result of this RFP.

The following criteria will be used to evaluate each response:

No.	Evaluation Criteria	Scoring Method	Weight (Points)
1.	Experience, Operations Plan & Equipment Quality/Age	Points Based	40 (40% of Total)
2.	Cost Proposal	Points Based	40 (40% of Total)
3.	Ability to Meet City Requirements	Points Based	10 (10% of Total)
4.	Demonstration of Understanding of City Desired Level of Service	Points Based	5 (5% of Total)
5.	References	Points Based	5 (5% of Total)

Section 3 - General Provisions

3.1. INSURANCE REQUIREMENTS

Proposers acknowledge the City's insurance requirements as detailed in [Attachments](#) to this RFP. Exceptions to City insurance requirements will not be made. Any Proposer unable to meet the insurance requirements at the time of the Proposals Due Date shall not be eligible for selection or award of contract.

The Contractor, upon being notified of being awarded the contract, shall have their Certificate of Insurance delivered to:

Attn: Veronica Seward-Aponte
2729 Prospect Park Drive
Rancho Cordova, CA 95670

Contractor's insurance shall comply with all insurance requirements as detailed in the [Attachments](#). No goods or services shall be rendered by the Contractor until a valid Certificate of Insurance is on file with the City.

3.2. INDEMNITY

The Contractor indemnifies the City as stated in Section 6-2 of the Sacramento County Standard Construction Specifications.

3.3. PAYROLL RECORDS

The Contractor's attention is directed to Section 6-1.03, "Payroll Records," of the Standard Construction Specification. The Contractor shall comply with Labor Code Section 1776. Regulations implementing Section 1776 are located in Section 16000 and Sections 16401 through 16403 of Title 8, California Code of Regulations. The Contractor shall be responsible for compliance by the Contractor's Subcontractors.

3.4. PREVAILING WAGE

Proposers acknowledge the Prevailing Wage Requirements as detailed in the Sample Contract. Pursuant to Labor Code Section 1770, the Contractor and the Contractor's Subcontractors shall pay not less than the prevailing rate of per diem wages, including, but not limited to, overtime, Saturday, Sunday, and holiday work, travel, and subsistence, as determined by the Director of the California Department of Industrial Relations pursuant to Labor Code Section 1773.

3.5. PRESERVATION OF PROPERTY

Attention is directed to Section 6-21 "Preservation of Property" of the Sacramento County Standard Construction Specifications and these Special Provisions.

The Contractor shall take every precaution to protect all public and private property during the performance of this contract. Any damages caused by the Contractor's personnel or equipment will promptly be repaired to the condition existing before the damage. If, in the opinion of the Contract Manager, repair is not possible, the damaged facilities will be replaced in kind and size. All costs for such repairs or replacements shall be the sole responsibility of the Contractor. Damages to City facilities due to the Contractor's lack of performance in accordance with these specifications are the Contractor's responsibility.

3.6. TRAFFIC MAINTENANCE

Provisions for public convenience and safety, construction area traffic control, and hours of work shall be in accordance with the Sacramento County Standard Construction Specifications. Specific requirements are provided in Sections 6-11, 6-12, 6-13, 6-14, 7-8, and 12 of the Sacramento County Standard Construction Specifications. The Contractor shall be responsible for public safety and traffic control within the Project limits and on the approaches to the Project.

Prior to performing any work that requires a lane closure, a Traffic Control Plan, prepared by the Contractor, shall be reviewed and approved by the City of Rancho Cordova. A traffic control plan (or plans) shall be submitted for review for any work requiring modifications of existing traffic patterns. The traffic control plan shall include provisions for vehicular, pedestrian, and bicycle access. Additionally, the traffic control plan shall address traffic signal operation for any work performed within 200 feet of a signalized intersection.

The local Fire Department, Sheriff/Police Department, California Highway Patrol, and Regional Transit (if applicable) shall be notified 24 hours in advance of major maintenance work impacting the public right of way.

Construction area signs shall conform to the requirements of Section 12-3.07 "Construction Signs" of the Sacramento County Standard Construction Specifications. Advisory (S1) signs shall be posted 10 days in advance of major maintenance work impacting the public right of way.

At least one lane of 10-foot minimum pavement width shall be maintained for each direction of travel during standard construction hours. Lane closure shall not be allowed without an approved traffic control plan, proper advance warning devices, signing and flag person control. Unless otherwise approved by the City of Rancho Cordova, work shall not be permitted on weekends and holidays. Work shall be suspended and no activities that interfere with public traffic shall be conducted on Memorial Day, Independence Day, Labor Day or Veterans Day, during the four-day Thanksgiving weekend, and on December 21 through January 1 unless necessary for emergency storm response or approved by the City.

Minor deviations from the requirements of this section concerning hours of work which do not significantly change the cost of the work may be permitted upon the written request of the Contractor if in the opinion of the City, public traffic will be better served and the work will be expedited. These deviations shall not be adopted by the Contractor until the City has approved them in writing. All other modifications will be made by contract change order.

3.7. REGULATIONS AND CONDUCT OF WORK

The Contractor shall plan and conduct the work to comply with local, State, and Federal government agencies' applicable rules, regulations, codes, and ordinances to adequately safeguard persons and property from injury. The Contractor shall direct the performance of the work in compliance with reasonable safety regulations and work practices, and with applicable federal, state, and local laws, rules and regulations including but not limited to "Occupational Safety and Health Standards" promulgated by the U.S. Secretary of Labor, and Safety Orders of the California Division of Industrial Safety.

3.8. PERSONNEL

All work shall be performed by qualified and trained personnel with a minimum of two (2) years

of experience in Stormwater Facility Maintenance Services work. Experience must include use of typical tools and operation of commonly used equipment. All workers shall be neat and orderly in appearance.

At least one staff member shall be certified in Storm Water Pollution Prevention within 12 months of the contract start date. All personnel shall receive annual training on storm water pollution prevention and best management practices for stormwater quality.

Identification

The Contractor's employees shall be required to wear a clean uniform bearing the Contractor's name. Employees who normally and regularly come into direct contact with the public shall bear some means of individual identification, such as a name tag or identification card.

Licenses

The Contractor and staff who are supplying services under this agreement shall at all times possess and carry a valid driver's license issued by the State of California and have all applicable certifications and licenses.

3.9. CONDUCT

The Contractor's employees, officers and representatives shall not identify themselves as being employees of the City of Rancho Cordova. Contractor employees shall conduct themselves in such a manner that reflects positively on the City. Drivers shall be courteous and conscientious when driving to, at and from work sites. The City retains the right to require a particular operator be removed from working on this contract at any time.

Safety Standards and Accident Prevention

The Contractor shall be solely responsible for initiating, maintaining and supervising all safety precautions and programs in connection with the work. The Contractor shall comply with all applicable Laws and Regulations relating to the safety and protection of persons and property. Full compensation for conforming to the requirements of this Section shall be considered as included in the prices listed in the Cost Schedule and no separate payment will be made therefore.

3.10. SUPERVISION

The Contractor shall provide a competent superintendent during all times that work is being performed with the authority to represent and act for the Contractor in any matter pertaining to this contract. The Contractor shall furnish the names of all such superintendents to the Contract Manager prior to the commencement of this contract and advise the Contract Manager of any changes.

3.11. DISMISSAL OF UNSATISFACTORY EMPLOYEES

Attention is directed to Section 7 of the Sacramento County Standard Construction Specifications. The Contractor shall only furnish workers who are competent and skilled for work under this contract. All personnel employed by the Contractor shall be required to provide certificates of an anti-harassment training completed within the last two years. If, in the opinion of the Public Works Director or Contract Manager, an employee of the Contractor is disorderly, refuses to perform in accordance with the contract specifications, threatens or uses abusive language while on City property, does not meet safety requirements or is otherwise

unsatisfactory, that employee shall be removed from all work under this contract. The Contractor shall remove an unsatisfactory employee from contract sites immediately following notification.

Failure by the Contractor to remove an unsatisfactory employee from contract sites will result in withholding of payment. Failure by the Contractor to permanently replace an unsatisfactory employee will result in formal written warning (30-day notice) to the Contractor specifying that the employee must be replaced. Failure by the Contractor to replace an unsatisfactory employee within the 30-day time period will result in termination of this contract.

In the event of termination, the City shall be liable only for payment of those services performed and accepted by the City prior to the date of termination; and the Contractor and his surety shall be liable and assessed for any and all costs for the re-procurement of the contract services.

3.12. PAYMENT

Attention is directed to Section 8 of the Sacramento County Standard Construction Specifications. The following shall be substituted with regard to invoicing procedure.

At the end of each month, the Contractor shall submit invoice(s) to the City for regular monthly maintenance work and emergency maintenance work requested and approved by the City. The City will pay the Contractor within thirty (30) calendar days of receipt of correct invoice. There will be no retention from the payments for normal maintenance work. A five (5) percent retention will be made on replacement/construction of pipe, catch basins, and other appurtenances. There will be no retention from payments for emergency work.

The Contractor's routine maintenance invoice shall include;

- Invoice Number
- Invoice Date
- City's Contract Number
- Period Service Provided (Date from – Date to)
- A breakdown of each work order completed with a description of the work performed, quantity of the work performed, unit cost, and total cost for the work performed.

The Contractor's emergency invoice shall include;

- Invoice Number
- Invoice Date
- City's Contract Number
- Period Service Provided (Date from – Date to)
- A breakdown of each work order completed with a description of the work performed, job itemization giving employee(s)' actual hours worked, equipment and material costs, and total cost for the work performed.

Billing shall be submitted to the following address:

City of Rancho Cordova
Public Works Department
2729 Prospect Park Drive
Rancho Cordova, CA 95670
ATTN: Dalia Fadl

3.13. WITHHOLDING OF PAYMENT

For work deemed by the Contract Manager as not meeting the requirements of the specifications, the City shall withhold monthly payments or percentages thereof for work not completed, or until work is completed as per contract specifications. The City shall withhold monthly payments or percentages thereof for work that is not completed on schedule.

To provide funds to cover the cost of any City of Rancho Cordova facilities or materials damaged by the Contractor, the City shall withhold monthly payments until the damages are repaired. In the event repairs are not made, the City shall withhold monthly maintenance payments to fund the necessary repairs. The Contractor shall be responsible for any expenses associated with repair of damages to City facilities or materials due to the Contractor's failure to perform the services in accordance with these specifications. The repairs shall meet the approval of the Contract Manager.

3.14. FAILURE TO PERFORM

If the Contractor, or his representative, fails to perform in accordance with the terms and conditions of this contract, the Contract Manager will specify the reasons and locations as applicable by written correspondence. Failure by the Contractor to correct any deficiencies within one (1) calendar week of notification by Contract Manager may result in withholding of payment. Failure by the Contractor to correct any deficiencies within two (2) calendar weeks or more may result in formal written warning (30-day notice) to the Contractor specifying that such deficiencies must be corrected. Failure by the Contractor to correct such deficiencies within the 30-day specified time period may result in termination of this contract.

In the event of termination, the City shall be liable only for payment of those services performed and accepted by the City prior to the date of termination. Any damages to property caused by the Contractor's inability to meet specification shall be recovered by withholding payments. The Contractor and his surety shall be liable and assessed for any and all costs for the re-procurement of the contract services and damages to City facilities or plant materials.

3.15. INSPECTION

The Contractor may receive an inspection report from the Contract Manager. This form will indicate any deficiencies in the work performance of the Contractor. The Contract Manager will inform the Contractor of urgent deficiencies for immediate attention or repairs. Inspection by City staff will occur the following day the Contractor has serviced the areas.

Lack of inspections by City staff does not relieve the Contractor of his/her obligations to provide services as required by these specifications. Lack of receipt of inspection reports does not relieve the Contractor of his/her obligations to provide services as required by these specifications. Schedules as required by these specifications shall be submitted and used as a guide for City Staff Inspection schedules. Inspection will be scheduled to occur the following day the Contractor has serviced the area(s).

3.16. TERMINATION

Any contract resulting from this RFP may be canceled by the City upon thirty (30) calendar days advance notice in writing at the City's sole discretion. The Contractor may cancel this agreement upon ninety (90) calendar days advance notice in writing to the City.

3.17. SOUND CONTROL REQUIREMENTS

Sound control shall conform to the provisions in Section 12-1.09 B, "Noise" of the Sacramento County Standard Construction Specifications.

The noise level from the Contractor's operations, between the hours of 8:00 p.m. and 7:00 a.m., shall not exceed 86 dbA at a distance of 15 m (50 feet). Said noise level requirement shall apply to all equipment on the work or related to the work, including but not limited to trucks, transit mixers or transient equipment that may or may not be owned by the Contractor. The use of loud sound signals shall be avoided in favor of light warnings except those required by safety laws for the protection of personnel.

Full compensation for conforming to the requirements of this section shall be considered as included in the contract prices paid for the various contract items of work involved, and no additional compensation will be allowed, therefore.

3.18. COOPERATION

The Contractor's attention is directed to Section 5-5, "Cooperation with Other Entities," of the Sacramento County Standard Construction Specifications. The Contractor shall notify United Service Alert (USA) prior to commencing any excavation: Underground Service Alert (USA) – 811.

3.19. EXISTING UTILITIES

Attention is directed to Section 6-16 "Existing Utilities" of the Sacramento County Standard Construction Specifications and these Special Provisions.

The toll-free number for Underground Service Alert (U.S.A.) is (800) 642-2444. The Contractor is required to call this number two working days (48 hours) in advance of performing excavation work.

The Contractor shall take adequate measures to ensure that their operations do not harm any existing underground facilities not specifically mentioned or shown on the plans.

3.20. PUBLIC CONVENIENCE

Public convenience shall conform to the provisions in Section 7-1.08, "Public Convenience", of the Sacramento County Standard Construction Specifications. The Contractor shall limit operations to weekdays between the hours of 7:00 A.M. to 6:00 P.M., unless otherwise approved by the Contract Manager.

No work will commence before 8:30 A.M. or after 3:30 P.M. on the City's main arterial and collector streets without prior written approval by the Contract Manager.

Temporary closure of driveways may be allowed subject to the advance written approval of the affected property owners and the Contract Manager. Prior to closure of a driveway, the Contractor shall coordinate and notify the property owner at least twice of such closure. The Contractor shall deliver closure notices to residents and operators of commercial properties seventy-two (72) hours prior to each closure, (twenty-four (24) hour notice for emergency repairs if feasible).

It is the Contractor's responsibility to provide and accommodate all residents, operators of commercial properties and property owners' specific needs for driveway and pedestrian access at all times.

Full compensation for conforming to the provisions of this Section shall be considered as included in the prices listed in the Cost Schedule and no additional compensation will be allowed therefore.

3.21. OBSTRUCTIONS

Attention is directed to Section 8-1.10 "Utility and Nonhighway Facilities" and Section 15 "Existing Highway Facilities" of the Sacramento County Standard Construction Specifications. Attention is directed to the presence of overhead and underground utilities located in the construction sites and work areas. The Contractor shall exercise due caution in performing work so as not to damage the utilities. The work specified shall be so conducted by the Contractor as to permit the utility companies to maintain their services without interruption. Utilities which are to remain in place shall be worked around and protected from damage or interruption of service. The Contractor shall coordinate his work with the utility companies where utilities are to be relocated or set to grade.

Construction area signs shall be furnished, installed, maintained, and removed when no longer required by the Contractor following the provisions in Section 12, "Safety, Public Convenience, and Traffic Control," of the Sacramento County Standard Construction Specifications.

Full compensation for conforming to the requirements of this Section shall be considered as included in the contract prices paid for the various contract items of work involved, and no additional compensation will be allowed, therefore.

3.22. MOBILIZATION

Mobilization shall be in accordance with Paragraph 11-1.01 "Description" of Section 11 "Mobilization" of the Sacramento County Standard Construction Specifications.

Full compensation for conforming to the requirements of this Section shall be considered as included in the prices paid for the various Contract items of work and no separate payment will be made therefore.

3.23. WORK ORDER

Requests for maintenance are made via a Work Order (WO). WO's are originated by City staff during regular City business hours in response to observed or reported maintenance deficiencies. Delivery of the written WO's will be via e-mail and be made directly to the Contractor or designated supervisor.

Requests for service after working hours, on weekends, and on holidays will be forwarded from the City's Emergency On-Call representative to the Contractor by phone. A written WO will be generated on the next regular business day and sent via email.

3.24. STANDARD CONSTRUCTION SPECIFICATIONS

The County of Sacramento, Municipal Services Agency, Standard Construction Specifications, adopted January 2016 and all revisions pertaining thereto, and these Special Provisions shall control all work to be done under this contract. All work not mentioned in these Special Provisions shall be performed in accordance with the Standard Construction Specifications. A copy of the Standard Construction Specifications may be obtained at the Cashier's window, County Administration Building, 827 Seventh Street, Room 105, Sacramento, CA 95814.

3.25. STATE SPECIFICATIONS AND STATE STANDARD PLANS

State Specifications and State Standard Plans, when referred to, shall be the 2023 issue.

Copies of the State Specifications and State Standard Plans may be obtained from the State of California, Department of Transportation, Publications Unit, 1900 Royal Oaks Drive, Sacramento, CA 95815; telephone (916) 263-0822.

3.26. PRECEDENCE

In the event of a conflict between the Sacramento County Standard Construction Specifications and the State Specifications/Standard Plans, the Sacramento County Standard Constructions Specifications shall govern. These Special Provisions shall govern over both the Standard Construction Specifications and State Specifications/Standard Plans in the event of a conflict.

3.27. CODES AND LEGAL REQUIREMENTS

- A. All reference to codes, specifications, and standards in the contract documents shall mean, and are intended to be, the latest editions, amendments, and/or revisions of such reference documents in effect, as of the date of this contract.
- B. Authorities shall apply the minimum work requirements available to any work done for this project. Nothing described in these contract documents shall be construed to permit work not conforming to the most stringent of applicable codes and regulations.
- C. When contract documents call for materials or construction of better quality or larger size than required by applicable codes, laws, rules or regulations, the contract documents shall take precedence.

3.28. GUARANTEE

Excepting only items of routine maintenance, ordinary wear and unusual abuse or neglect, the Contractor shall guarantee all work executed by the Contractor and Subcontractors, and all supplies, materials and devices of whatsoever nature incorporated in, or attached to the work, or otherwise delivered to the City as a part of the work pursuant to the Contract, to be free of all defects of workmanship and materials for a period of one year after acceptance of work under each Work Order issued as a part of the Contract by the City. The Contractor shall repair or replace any or all such work or material, together with all or any other work or material which may be displaced or damaged in so doing, that may prove defective in workmanship or material within said one (1) year guarantee period without expense or charge of any nature whatsoever to the City.

In the event that the Contractor shall fail to comply with the conditions of the foregoing guarantee within ten (10) working days after being notified of the defect in writing, the City shall have the right, but shall not be obligated to repair, or obtain the repair of, the defect and the Contractor shall pay to the City on demand all costs and expense of such repair.

Notwithstanding anything herein to the contrary, in the event that any defect in workmanship or material covered by the foregoing guarantee results in a condition which constitutes an immediate hazard to the health or safety, or any property interest, or any person, the City shall have the right to immediately repair, or cause to be repaired, such defect, and the Contractor shall pay to the City on demand all costs and expense of such repair. The foregoing statement relating to hazards to health, safety or property shall be deemed to include either temporary or

permanent repairs, which may be required as determined in the sole discretion and judgment of the City.

3.29. EROSION, SEDIMENT AND WATER POLLUTION CONTROL

The Contractor's attention is directed to Section 10-4, "Erosion, Sediment, and Water Pollution Control," of the Sacramento County Standard Construction Specifications, and these Special Provisions.

The Contractor shall minimize erosion, discharge of pollutants, and transport of sediments during all aspects of work. Erosion and sediment control shall conform to the requirements of Sacramento County's "Erosion and Sediment Control Guidelines". That document is available, for a fee, from the Water Resources Division, County of Sacramento.

3.30. DUST CONTROL

The Contractor's attention is directed to Section 17, "Dust Control," of the Sacramento County Standard Construction Specifications. The Contractor shall be responsible for dust control. The Contractor shall diligently control dust resulting from his operations and from public traffic passing through the work area by the application of water and/or dust palliative. Dust palliative shall conform to Section 17-2, "Dust Palliative," of the Standard Construction Specifications. The Contractor shall provide dust control at all times including Saturdays, Sundays, and holidays. Whenever the Contractor shall appear negligent in controlling dust, the Contract Manager may direct attention to the existence of a dust hazard and instruct the Contractor to immediately alleviate the dust hazard.

Full compensation for conforming to the requirements of this section shall be considered as included in the prices paid for the various contract items of work involved and no additional compensation will be allowed therefore.

3.31. QUANTITIES

The quantities shown in this RFP are given to provide proposers with an indication of potential work and the order of magnitude and scope of work. The actual amount of work done under this contract may differ from the quantities shown. The City does not expressly or by implication agree that the actual amount of work will correspond therewith but reserves the right to increase or decrease the amount of any class or portion of the work or to omit portions of the work as directed by the Contract Manager.

3.32. ORDER OF WORK

Order of work shall conform to the provisions in Section 5 "Control of Work and Materials" of the Sacramento County Standard Construction Specifications and these Special Provisions. The receipt of notice that the Contractor has been awarded a contract shall not constitute authority for the Contractor to enter upon the sites of work and begin maintenance operations.

3.33. LABOR NONDISCRIMINATION

Attention is directed to the following Notice that is required by Chapter 5 of Division 4 of Title 2, California Code of Regulations.

NOTICE OF REQUIREMENT FOR NONDISCRIMINATION PROGRAM (GOV. CODE, SECTION 12990)

Your attention is called to the "Nondiscrimination Clause", set forth in Section 7 1.021(2), "Nondiscrimination," of the State Standard Specifications, which is applicable to all nonexempt state contracts and subcontracts, and to the "Standard California Nondiscrimination Construction Contract Specifications" set forth therein. The Specifications are applicable to all nonexempt state construction contracts and subcontracts of \$5,000 or more.

3.34. CITY OWNED OR MAINTAINED PROPERTY

Except as otherwise instructed, all work done under this contract shall be conducted within the limits of existing public rights of way, drainage easements, and/or City owned or maintained property/ facility.

Section 4 - Special Provisions

4.1. WORK GUIDANCE

All work to be done by any Proposer selected to perform the work outlined in this RFP shall be guided by the County of Sacramento, Municipal Services Agency Standard Construction Specifications, adopted January 2016, and this RFP. Copies of the Standard Construction Specifications may be obtained from the Municipal Services Agency, Land Division, and Site Improvement Review, located in the County Administration Building, 827 Seventh Street, Room 105, Sacramento, California, 95814.

A preliminary copy of the City's contract for Stormwater Facility Maintenance Services is included as "Sample Contract" in the [Attachments](#) section of this RFP. The contract shall bind the selected proposer to perform work in accordance with this RFP.

4.2. DESCRIPTION OF WORK STANDARDS

All Proposers accept and confirm by submission of a signed proposal in response to this RFP, that work to be performed by the selected Contractor is comprised of Stormwater Facility Maintenance Services comprised of routine vegetation management, tree maintenance and removal, debris and obstruction removal, trash and litter cleanup, and miscellaneous repairs within City-maintained stormwater facilities, including but not limited to channels, outfalls, ditches, basins, levees, and all other facilities as further designated in this RFP.

The City requires the selected Proposer to meet the following minimum standards:

Workmanship: All materials and workmanship shall be of a quality that is equal or superior to any similar work considered by contractors to be best practice. All work completed by the selected Contractor shall be subject to inspection prior to payment being authorized. All work shall be conducted in a manner that least interferes with operation and public usage of streets and sidewalks. Repairs to stormwater facilities shall be subject to a one-year warranty period as outlined in the Guarantee section within the [General Provisions](#) of this RFP.

Safety: All services, supplies and equipment must comply with the California Safety Division of Industrial Safety Orders and O.S.H.A. The Contractor shall plan and conduct the work in a manner that will safeguard all persons from injury and shall take all precautions required by applicable regulations of the State Department of Industrial Regulations. **The Contractor's employees shall wear O.S.H.A. approved safety and personal protective equipment at all times during contract work.**

Hazards and Vandalism: Any hazards or acts of vandalism shall be reported immediately to the Contract Manager and then followed up with in writing. Hazards shall be remedied by the Contractor after approval is obtained from the Contract Manager. Hazards which create life-threatening situations or potential for bodily harm shall be remedied immediately by the Contractor.

City Policy: The selected Contractor shall be aware of, and shall comply with, the City ordinances governing stormwater facility vegetation control and traffic control regulations during work, as applicable to all locations being maintained.

Equipment: The selected Contractor must furnish all tools and equipment needed to provide a high level of workmanship, to ensure continuous and safe operation, and to

complete work in accordance with the current County of Sacramento Standard Construction Specifications. The City may require demonstration of equipment during the selection process of this RFP.

4.3. WORK LOCATION/SITE CHANGES

Proposers acknowledge that the City reserves the right to add, delete, or change locations under resulting contract for work, and may do so upon written notification to the Contractor. Any changes in contract scope of work that result in an increase or reduction in cost shall be adjusted based on negotiation between the City and the Contractor. The City expects cost negotiations to be guided by the [Cost Proposal](#) submitted by the Contractor.

4.4. SUBCONTRACTORS

Proposers requiring the provision of additional services from subcontractors acknowledge that all proposed subcontractors shall adhere to the same standards of work as described in this RFP. Proposers further acknowledge that the selected Contractor shall be required to perform, with the Contractor's own organization and employees, not less than fifty percent (50%) of the value of all work conducted under executed contract.

Any Proposer submitting proposals for work that include the use of subcontractors shall additionally submit a filled-out **Designation of Subcontractors** form in the [Proposal Submittal](#) section of this RFP.

4.5. UNSUITABLE MATERIAL EXCAVATION AND BACKFILL

Unsuitable material excavation and backfill shall conform to the provisions in Section 18-5 of the Sacramento County Standard Construction Specifications and as specified herein.

Payment for Unsuitable Material Excavation and Backfill shall be made per cubic yard of material removed and replaced, as measured in the field. No separate payment will be made for acquisition of any required permits or disposal of surplus material.

4.6. PENALTIES FOR NOT MEETING TERMS

Any of the following is considered cause for penalties:

- Missing scheduled working days without providing proper notice to the City (excluding inclement weather). Proper notice is defined as reasonable, advanced, and timely, but in no case shall be less than 24 hours.
- Work found to be unsatisfactory by the City which requires the Contractor to be called back to complete the work or fix the issue.
- Not submitting reports as specified in these specifications or not containing accurate or all required information.
- Not responding to emergency callouts in a timely manner (as specified).

The City will withhold partial payment (50%) for inadequate service until the issue is resolved or corrected.

If the Contractor violates the same specification three or more times, the City shall have the right to withhold payment of up to two times the cost of service which was scheduled for the day that each violation occurred. The penalty amount shall be determined by the Contract Manager or their designee.

4.7. SCOPE OF SERVICES

This scope of services describes the Stormwater Facility Maintenance Services to be performed by the contractor:

1. Stormwater Facility Maintenance
 - a. Cut, mow, remove and/or spray weeds, grasses, shrubs, and woody growth in stormwater facilities, including levees, detention basins, lined and unlined open channels, ditches, outfalls and maintenance access roads.
 - b. Cut, trim, or remove the lower branches of large trees.
 - c. Cut, trim, or remove downed trees, and dead or new trees that are in clear danger of falling in or across a channel that will significantly reduce channel capacity, accelerate erosion, or otherwise cause an emergency at any time.
 - d. Remove non-native vegetation.
 - e. Remove all debris, trash, rubbish, beaver dams, flood-deposited woody and herbaceous vegetation which are in clear danger of falling in or across a channel, branches, and associated debris that substantially obstruct (or could obstruct) water flow, reduce channel capacity, accelerate erosion, damage concrete box culverts, metal culverts, bridge structures, or cause pump damage.
 - f. As needed, exterminate nuisance burrowing rodents on the levees through fumigation.
 - g. Grout burrows in levees, channels and basin banks as necessary.
 - h. Replace ground cover in areas specified by the City.
 - i. All debris, trash, rubbish, and removed vegetation shall be hauled away.
2. General Maintenance
 - a. Repair or install fencing and gates at stormwater facilities.
 - b. Replace or install markers on storm drain inlets.
 - c. Remove or install storm drain inlet filters or bags to prevent stormwater pollution as needed.
 - d. Implement erosion and sediment control measures/best management practices (BMPs) to prevent stormwater pollution from or at stormwater facilities.
 - e. Install or remove signage on fencing or posts at stormwater facilities.
 - f. Paint over graffiti within stormwater facilities.
 - g. Remove trash, debris and illegally dumped material from stormwater facilities.
 - h. Regularly inspect stormwater facilities and report issues to the City.
 - i. Transport equipment and materials to stormwater facilities, including pump stations, as requested by the City.
 - j. Other maintenance as requested by the City.
3. Coordination with City and Other Agencies, Contractors*
 - a. Attend meetings with the City to develop maintenance schedules for stormwater facilities.
 - b. Work with the City to prepare any required documentation and data needed for communication with and reporting to outside agencies, including the California Department of Fish and Wildlife, U.S. Army Corps of Engineers, and State and Regional Water Quality Control Boards.
 - c. Track and document maintenance work performed as directed by the City for asset management and reporting purposes.

- d. Coordinate with other City maintenance contractors and partners as needed.
- e. Coordinate and manage a regular maintenance schedule for City-maintained channels, outfalls, ditches, basins, and levees.
- f. Report to City staff on maintenance operations and expenses on a monthly basis.
- g. Comply with all applicable and existing Federal, State and local laws, regulations, policies, rules and permits.
- h. Follow communication protocols with City staff, contractors, and vendors.

***Contractor to provide this service without direct payment. Payment for this service shall be included in the base bid amount accounted for in the unit prices shown on the bid form.**

4.8. VEGETATION MANAGEMENT

The Contractor shall use hand and mechanical tools to cut, mow, and remove grasses, shrubs, and woody growth to maintain the designed capacity of stormwater facilities and control vegetation growth. The Contractor may mulch cut weeds and grasses and leave onsite at the stormwater facility unless otherwise specified by the City. The Contractor shall cut, trim, or remove the lower branches of large trees to facilitate site inspections and maintain channel capacity. The Contractor shall remove non-native vegetation (e.g., giant reed (a.k.a. "false bamboo"), Chinese tallow, red sesbania, Spanish bloom, Tree-of-heaven, black locust, tree tobacco, castor bean, pampas grass, eucalyptus, tamarisk, water hyacinth, ludwigia, acacia, parrotfeather, giant Asian dodder, water primrose, water lettuce, and ivy) to maintain channel capacity and improve native habitat.

Contractor shall perform the maintenance work at a time and in a manner that minimizes adverse impacts to fish and wildlife resources and provides for the protection and continuance of those resources. Contractor shall conform to all California Department of Fish and Wildlife requirements when working in or near jurisdictional waters.

Contractor shall cease maintenance activities and begin removal of debris, trash, rubbish, beaver dams, flood-deposited woody and herbaceous vegetation as necessary to avoid imminent flooding or damage to structures and facilities before storm events.

Tree Trimming and Removal

The Contractor shall cut, trim, or remove downed trees, and dead or new trees (less than 4-inches dbh) that are in clear danger of falling in or across a channel that will significantly reduce channel capacity, accelerate erosion, or otherwise cause an emergency at any time. The City representative shall determine if a tree needs to be cut, trimmed or removed from a stormwater facility. The Contractor shall provide all materials, equipment and labor necessary to complete the work.

All major tree trimming and tree removal work associated with the Project shall be performed (or directed and supervised) by an arborist certified by the International Society of Arboriculture (I.S.A.). Tree trimming shall be limited to tree limbs required to be removed to allow for Project activities, minimum required vehicular clearance, and tree root cutting required for earthwork and trenching.

A certified arborist shall perform (or direct and supervise onsite) all necessary root and limb pruning of oak trees. All roots 6 inches in diameter or greater shall be cut cleanly and sealed by or under the direction and supervision of the arborist. No limb pruning shall occur unless absolutely necessary to avoid limb damage. Routine maintenance work, such as high weed

mowing, within oak tree driplines should be performed in a manner that avoids negative impacts to tree root zones.

The Contractor shall submit to the City, in writing, the name of the International Society of Arboriculture (ISA) certified arborist, a minimum of four (4) working days prior to the start of tree trimming or removal work.

4.9. CHEMICAL SPRAYING

The Contractor's attention is directed to Section 6-1, "Compliance with Laws and Regulations" of the Sacramento County Standard Construction Specifications, and these Special Provisions. The Contractor must comply with all local, state and federal rules and regulations that govern the use of pesticides required in the performance of the work, including any certifications that are required for purchase, use, storage or application.

Herbicides shall be applied as needed in advance of planting to eliminate weeds and deplete the weed seed bank in the soil. Contractor shall determine the type and timing of herbicide applications so as to prevent herbicide persistence in the soil and any adverse effect on germination of native grass seedlings.

The City will pay for chemicals (i.e. herbicides and pesticides) to be used by the Contractor. The Contractor shall furnish all other materials, labor, equipment, tools to complete the work in conformance with the City's Integrated Pest Management Policy (IPM).

4.10. INTEGRATED PEST MANAGEMENT (IPM)

The Contractor shall conform with the City's Integrated Pest Management (IPM) Policy, including:

1. Participate in educational and training opportunities for the IPM program, practices, and policy.
2. Implement the IPM Policy on all City facilities, City-owned landscaped areas, and right-of-way and maintain records on and report the types and amounts of pesticides used, as well as IPM methods considered and used to prevent and control pests.
3. Identify, evaluate, and minimize or eliminate conditions that encourage pest problems.
4. Efficiently manage the use of pesticides.
5. Consider a range of activities that may assist in reducing reliance on pesticides that adversely impact water quality.
6. Consider taking a "no-action" approach in addressing certain pest control issues.
7. Review and consider available non-chemical options before using a chemical pesticide.
8. Utilize IPM principles to monitor and assess pest issues.
9. Maintain records on IPM methods considered and used to prevent and control pests.
10. Comply with all applicable local, State of California (State), and federal regulations, including pesticide use and reporting.
11. Conduct decision-making based on the best available science and data.
12. Use a combination of biological, cultural, structural, physical/mechanical and chemical management tools.

4.11. DEBRIS AND OBSTRUCTION REMOVAL

The Contractor shall remove all debris, trash, rubbish, beaver dams, flood-deposited woody and herbaceous vegetation which are in clear danger of falling in or across a channel, branches, and associated debris that substantially obstruct (or could obstruct) water flow, reduce channel capacity, accelerate erosion, damage concrete box culverts, metal culverts, bridge structures, or cause pump damage.

4.12. DITCH CLEANING AND REGRADING

The City shall specify either ditch cleaning or re-grading of a ditch. Ditch cleaning consists of removing vegetation, debris and silt build-up. This type of work will not require any design and will most likely involve a backhoe and dump truck.

Prior to regrading a ditch, the contractor shall perform a preliminary survey and produce a rough design to grade the ditch. This design does not require a registered engineer or surveyor. Ditch design shall include establishing an arbitrary control elevation within the street or fixed public infrastructure such as pavement, sidewalk, curb, culvert or inlet. The contractor should mark the reference point.

The design shall include the existing upstream elevation(s), downstream elevation(s), and all fixed elevations such as roadside culverts, inlet and/or outlet structures, and concrete gutter flow lines. The final plan may be hand-drawn or computer drafted showing the final flow-line and typical x-section. The plan will show planned grade breaks and % grade of the flow line. Any major erosion issues should be addressed on the plan with rip-rap, straw-matting or other storm water best management practices.

Regrading ditches will require the contractor to establish a flow line and design a ditch. Prior to establishing the flow line, the contractor's ditch design shall receive approval from the City in advance for ditches over 300 feet or where the contractor requests replacing or re-setting an existing driveway culvert. For ditch re-grading, where possible, the contractor will spread the spoils on-site. Deleterious materials from a ditch must be disposed of properly. Small quantities of non-deleterious material may be dumped at exact areas designated by the City for dumping.

4.13. LEVEE VEGETATION MANAGEMENT AND MAINTENANCE

Sequence of work for Levee Vegetation Management and Maintenance activities shall be as follows:

- Contractor performs Routine Vegetation Control on the levees;
- City performs inspection to identify needed repairs, areas to be re-vegetated and active/inactive burrows;
- City issues work orders to perform work delineated in the reports;
- Contractor exterminates burrowing animals at active burrows; once inactive contractor fills burrows;
- Contractor completes repairs and re-vegetation of areas; and
- Contractor performs Routine Vegetation Control to maintain vegetation heights between 4-10 inches.

4.14. ROUTINE VEGETATION CONTROL ON LEVEES

The Contractor shall cut, mow, and remove grasses, weeds, shrubs, trees, bushes, gardens and

woody along levee slopes to maintain its integrity. The Contractor shall cut, trim, or remove the vegetation growing from residential and commercial developments along the levees. The Contractor shall remove vegetation placed on levee by neighboring landowners.

Vegetation control on levees shall be performed biannually during the spring/early summer and summer/early fall. Vegetation control on levees shall be performed as needed when grass heights exceed 10 inches, as requested by the City and delineated in the inspection report.

Contractor shall schedule the activities in advance with the City. The contractor shall use hand and mechanical tools to control vegetation as described above. All debris, trash, rubbish and removed vegetation shall be hauled away.

Contractor shall perform the maintenance work at a time and in a manner that minimizes adverse impacts to fish and wildlife resources and provides for the protection and continuance of those resources.

4.15. EXTERMINATION OF BURROWING ANIMALS

At a frequency deemed necessary by the City, nuisance burrowing rodents (defined as gophers, voles, mice, and ground squirrels) on the levees must be controlled by Carbon Monoxide fumigation. Fumigation must be conducted during the spring (February 1 –May 31) and must be applied by a certified and experienced applicator with the appropriate pesticide and CDFW permits. Prior to application, Contractor must follow all applicable state fumigation regulations, including but not limited to the posting of appropriate signage and preparation of a fumigation management Plan for burrowing rodents.

No less than 2 days prior to fumigations, tall grasses and weeds must be mowed or weedeaten to a height of four (4) inches to locate obscured burrows. The burrow must not be disturbed the day of application to avoid pre-mature temporary abandonment of the burrow.

No less than 24 hours prior to fumigation, each burrow must be inspected by qualified staff to confirm the burrow is only occupied by the target nuisance rodent species. River otters, badgers, burrowing owls, bank swallow and other non-rodent species must not be killed by fumigation efforts or targeted for lethal control. Burrows identified as being occupied by a species other than the targeted nuisance rodent must be flagged and avoided. Fumigation must not be applied within 40 feet of a flagged burrow.

Contractor must follow all label rates and application methods. At a minimum, at the time of carbon monoxide application all burrow entrances must be completely blocked to prevent the escapement of fumigant or target species. Following fumigation, all fumigated burrows must be grouted as specified.

The City will determine the need to control larger mammals such as beaver, muskrat, coyote, or fox on a periodic basis. Should the city deem control of larger mammals such as control of beaver, muskrat, coyote, or fox, the contractor must acquire and adhere to the requisite permits from the CDFW.

4.16. BURROW GROUTING

The Contractor shall grout fill burrows as directed by the City and the levee inspection report. Contractor shall carefully expose the burrow and pump grout at low pressures to avoid damaging the embankment. Lower burrows shall be grouted first proceeding up the levee slope. The grout mix shall be made up of 9 parts cement, 1 part bentonite, and water added to achieve 8 to 10 inches of slump. Burrow holes required 1.5 to 3 cubic feet of grout to fill.

Burrow grouting shall be performed bi-annually during the spring/early summer and summer/early fall. Burrow grouting shall be performed after the routine vegetation management is completed and the inspection report identifying the burrows has been provided. Burrows must be vacated before repairs can begin. Contractor shall backfill burrow entrance with cohesive soil and trim to slope profile.

4.17. GROUND COVER REPLACEMENT

Ground cover replacement shall consist of seeding. Contractor shall replace ground cover in areas delineated by the City and as specified in the levee inspection reports.

Seeding areas shall be prepared by method of disking or other tillage as necessary to prepare a suitable seedbed. A suitable seedbed is defined as a vegetation- and thatch-free soil surface that has been cultivated/prepared to provide a uniform (i.e., non-undulating) surface that does not have ridges or depressions with greater than 3-inches offset from the overall surface plane. The soil surface shall be disked and tilled to a minimum depth of 6-inches, with dirt clods pulverized to a maximum of 2-inches diameter.

All areas to be seeded, and confirmed with the City, shall receive pre-seeding weed management on an as needed basis, depending on site conditions. The purpose, methods, and timing of weed management treatments shall be to prevent dispersal of weed seed by killing weeds before flowering or viable seed has developed. Weed management treatments shall be limited to mowing, disking, burn down contact herbicides, or systemic herbicides with no residual soil activity. The Contractor shall confirm with the City the most effective treatment to be used to eliminate weeds in a target area. Post-treatment conditions will be evaluated by the Owner. If post-treatment conditions do not demonstrate near total weed kill of targeted species or effectiveness to the satisfaction of the City, the Contractor shall assume full responsibility for corrective actions to resolve deficiencies.

All contractor performed seeding shall be completed between October 15th and November 15th. Seeding after November 15 requires prior approval of the City and may require adjustment to seeding process. The seeding operation shall be halted when, in the opinion of the City, conditions of high winds, excessive moisture, or other factors are not conducive to satisfactory results. After seed has been applied, straw shall be applied evenly to a maximum depth of 2-inches at a rate of 1.0 ton/acre. Straw shall be secured in place with a tackifier. All ties from the straw bales and other debris from the seeding and mulching operations are to be removed from the construction site by the Contractor, in accordance with State and local regulations.

Seeding in selected areas shall be done by using a native grass seed drill or broadcast seeding. Seed applied using broadcast seeding equipment shall be worked into the soil to a depth not to exceed 0.5 inches.

The following seed mix shall be applied to selected areas. There shall be no substitutions of seed species or variety as shown in the mix table unless approved by the City. Seed shall be provided by the Contractor and shall be grown within the Central Valley and surrounding foothills from seed collected from Sacramento, Sutter, Colusa, Yolo, Butte, El Dorado, Placer, Nevada, and Yuba County sources, and shall adhere to PLS lbs/acre for the mix. Seed may be grown outside the Central Valley only with prior approval from the City. Seed shall be pre-mixed by the supplier before shipment to the project site. Seed mix shall not contain noxious weed seed or mold. Seeding rates in the table assumes drill seeding or broadcast seeding. The

City may at any time, request, test, and analyze seed materials including the seed mix and mulch to ensure their conformance to these Specifications.

Native Grass Seed Mix		
Species Name	Common Name	*PLS (Pounds per Acre)
Agrostis exarata	bentgrass	0.1
Elymus glaucus	blue wildrye	3
Elymus trachycaulus	slender wheatgrass	3
Hordeum brachyantherum	meadow barley	4
Leymus triticoides	creeping wildrye	4
Melica californica	California melic	2
Nassella pulchra	purple needlegrass	4
Poa secunda ssp secunda	Pine bluegrass	0.9
TOTAL FOR MIX		21
*1 PLS = "Pure Live Seed" which is the percent of viable seed germination in a bulk pound per seed. Certified PLS ratings are provided by the seed supplier or seed grower.		

Ground cover replacement will be paid for at the contract unit price per acre such price will constitute full compensation for furnishing all materials, labor, equipment, tools, and incidentals. Areas damaged or disturbed by Contractor, which were not required for execution of the Contract work, shall be replaced at the expense of the Contractor. Ground cover replacement will be measured for payment through horizontal area surveys per acre to the nearest 0.1 acre. Areas and dimensions will be as established by the City and the Contractor.

4.18. SUPPLIES, DISPOSAL, AND EQUIPMENT

City will provide or pay for the following supplies: Trash bags, signs, chemical treatments (i.e. herbicides and pesticides) absorbent material, gravel bags, and other pollutant prevention materials. The City will provide debris disposal bins at its Corporation Yard, Bear Hollow Pump Station work area, and pay for other disposal fees (e.g. landfill fees). The Contractor must furnish all tools, and equipment needed to provide a high level of workmanship, to ensure continuous and safe operation, and complete work in accordance with the current County of Sacramento Standard Construction Specifications. Proposers may submit alternative equipment, materials, and supplies as part of their proposal for the City's consideration.

Section 5 - Proposal Submittal

5.1. COVER LETTER*

Please upload a cover letter that provides a brief introduction to your firm. Please reference the [Basis for Evaluation of Proposals](#) as you are submitting your letter and all subsequent documents.

*Response required

5.2. CONTRACTOR'S LICENSE CERTIFICATION*

Any person or entity submitting a proposal on this project to engage in the business or act in the capacity of a contractor shall be licensed as a contractor in accordance with the provisions of Division 3, Chapter 9 of the California Business and Professions Code at the time of proposal submittal. A proposal submitted to the City by a contractor who is not licensed as set forth above shall be considered non-responsive and shall be rejected by the City.

As part of their proposal, the Proposer shall provide to the City their contractor's license number. The minimum license qualifications for this project include possession of a valid **General Engineering Contractor, Class A license, or Landscaping Contractor, C27 license.**

The first payment for work or material under any contract shall not be made unless and until the Registrar of Contractors verifies to the City that the records of the California Contractors' State License Board indicate that the contractor was properly licensed at the time the proposal was submitted and the license has remained valid and good standing after award of the contract. Any proposer or contractor not so licensed shall be subject to all legal penalties imposed by law, including, but not limited to, any appropriate disciplinary action by the Contractors' State License Board. Failure of the proposer to maintain proper and adequate licensing for an award of a contract shall constitute a failure to execute the contract and shall result in the forfeiture of the security of the proposer.

*Response required

5.3. DEPARTMENT OF INDUSTRIAL RELATIONS CONTRACTORS REGISTRATION*

Any person or entity submitting a proposal on this project to engage in the business or act in the capacity of a contractor shall register as a contractor in accordance with the provisions of the Department of Industrial Relations (DIR). A bid submitted to the City by a contractor who is not registered as set forth above shall be considered non-responsive and shall be rejected by the City.

Before awarding the contract for this project, the City must verify that the contractor was properly registered when the contractor submitted his/her bid on this project. In order for the City to verify the registration status of a contractor, the contractor, at the time he/she submits his/her bid for the project, shall provide to the City his/her contractor's registration number.

No proposal submitted to the City shall be invalidated by the failure of the Proposer to be registered in accordance with the laws of this state. However, at the time the contract is awarded, the contractor shall be properly licensed in accordance with the laws of this state. Any Proposer or contractor not so registered shall be subject to all legal penalties imposed by law, including, but not limited to, any appropriate disciplinary action by the DIR. Failure of the Proposer to obtain proper and adequate registration for an award of a contract shall constitute

a failure to execute the contract and shall result in the forfeiture of the security of the Proposer.

*Response required

5.4. FIRM EXPERIENCE AND QUALIFICATIONS*

Please download the below documents, complete, and upload.

Proposer shall detail their firms experience as necessary to demonstrate satisfactory compliance with the minimum qualification requirements as listed in this RFP. Additionally, firm experience and qualifications may be used by the City as a basis for evaluation when determining the most qualified Proposers.

- [Firm Experience and Qualifi...](#)

*Response required

5.5. STAFF EXPERIENCE AND QUALIFICATIONS*

Please download the below documents, complete, and upload.

Proposer shall list the names and experience/qualifications of any employees who would be responsible for undertaking the Items detailed in the Scope of Services of this RFP, should a contract be provided. Employee experience and qualifications may be used by the City as a basis for evaluation when determining the most qualified Proposers.

- [Staff Experience and Qualif...](#)

*Response required

5.6. SUBCONTRACTORS?*

Will you be using subcontractors to perform any of the services within the Scope of Services noted in this RFP?

Each proposer shall set forth below the name and location of the place of business of each subcontractor who will perform work or labor or render service to the Contractor in or about the Services to be performed under these specifications in excess of one-half of one percent (0.5%) of the prime Contractor's total proposal or ten thousand dollars (\$10,000.00), whichever is greater. The prime Contractor shall list the portion of the work which will be done by such Subcontractor.

If the Contractor fails to specify a subcontractor for any portion of the work to be performed under the Contract, the Contractor shall be deemed to have agreed to perform such portion itself, and the Contractor shall not be permitted to subcontract that portion of the work except under the conditions allowed by applicable law. Failure to list subcontractors that will be performing work under the contract shall be grounds to deem a proposal non-responsive. Subcontractors shall provide all required licensing documentation to City.

☐ Yes

☐ No

*Response required

When equals "Yes"

5.6.1. Designation of Subcontractors*

Please download the below documents, complete, and upload.

- [Subcontractors.docx](#)

*Response required

5.7. OPERATIONS PLAN DETAILS*

Please download the below documents, complete, and upload.

Proposer shall detail an inventory of equipment, location of any equipment and materials storage facilities, customer service processes and call center location (if applicable), and a draft/initial schedule of duties to demonstrate how Proposer intends to undertake Task Items detailed in the Scope of Services of this RFP, in a routine manner. The Operations Plan Details submitted may be used by the City as a basis for evaluation when determining the most qualified Proposers.

- [Operations Plan Details.docx](#)

*Response required

5.8. EXCEPTIONS TO AGREEMENT*

Proposers are to prepare all Cost Schedule forms based on the program specifications set forth in the RFP documents.

Will you be taking exceptions to the agreement?

A **YES** answer means you **take exception** to the RFP specifications. A "Form Exceptions to Agreement" document shall be completed and signed by an individual authorized to commit the proposer's firm to the Agreement.

A **NO** answer means you have **complete agreement** with the proposed terms, conditions, and business arrangements described in the RFP, including the attached Agreement. The proposer assumes the risk of all conditions foreseen or unforeseen and agrees to provide the services set forth in the Agreement under whatever circumstances may develop

☐ Yes

☐ No

*Response required

When equals "Yes"

5.8.1. Exceptions to Agreement Form & Signatures*

In the event the proposer takes exception to the RFP specifications, they may set forth those exceptions in the following manner:

- The exceptions are to be presented on a separate paper titled "Form Exceptions to Agreement."
- Each exception must be presented separately by stating: the specific exception, the page and line numbers of the exception, the suggested changes to the program related to the exception, the suggested changes in the Agreement language related to the exception, the manner in which the proposed change would benefit the City, the customers or both, and

the specific dollar change in each of the various service rates, as proposed by the proposer in this RFP, that would take place if the exception was accepted by the City.

NOTE: Exceptions taken without providing the required information as part of your proposal will not be considered.

Please download the below documents, complete, and upload.

- [Exceptions to Agreement.docx](#)

*Response required

5.9. GUARANTEE REQUIREMENTS*

The City of Rancho Cordova will require all proposals be accompanied by a Bid Guarantee in the form of cash, a certified check, a cashier's check, or a bidders bond. The Bid Guarantee shall be executed by an admitted surety insurer in favor of the City of Rancho Cordova, the amount of which shall not be less than ten percent (10%) of the submitted Cost Schedule Grand Total. Additionally, before beginning said work, the Contractor shall file one bond with the City, made payable to the City. The bond shall be issued by a surety company authorized to do business in the State of California and shall have a one-year term. A new bond shall be provided annually during the entire life of the Agreement at the expense of the Contractor. The bond shall be for not less than 100% of the submitted Cost Schedule Grand Total (which serves as an annual cost estimate) and shall guarantee the faithful performance of the Agreement.

Upload a scanned copy of your **fully executed** bid bond here. The original Bid Guarantee must be delivered to City Hall within 72 hours following the RFP deadline.

*Response required

5.10. NON-COLLUSION DECLARATION*

NONCOLLUSION AFFIDAVIT

(Title 23 United States Code Section 112 and
Public Contract Code Section 7106)
To the CITY of RANCHO CORDOVA
DEPARTMENT OF PUBLIC WORKS.

In conformance with Title 23 United States Code Section 112 and Public Contract Code 7106 the proposer declares that the proposal is not made in the interest of, or on behalf of, any undisclosed person, partnership, company, association, organization, or corporation; that the proposal is genuine and not collusive or sham; that the proposer has not directly or indirectly induced or solicited any other proposer to put in a false or sham proposal, and has not directly or indirectly colluded, conspired, connived, or agreed with any proposer or anyone else to put in a sham proposal, or that anyone shall refrain from bidding; that the proposer has not in any manner, directly or indirectly, sought by agreement, communication, or conference with anyone to fix the proposal price of the proposer or any other proposer, or to fix any overhead, profit, or cost element of the proposal price, or of that of any other proposer, or to secure any advantage against the public body awarding the contract of anyone interested in the proposed

contract; that all statements contained in the proposal are true; and, further, that the proposer has not, directly or indirectly, submitted his or her proposal price or any breakdown thereof, or the contents thereof, or divulged information or data relative thereto, or paid, and will not pay, any fee to any corporation, partnership, company association, organization, proposal depository, or to any member or agent thereof to effectuate a collusive or sham proposal.

Note: The above Noncollusion Affidavit is part of the Proposal. Signing this Proposal on the signature portion thereof shall also constitute signature of this Noncollusion Affidavit.

Proposers are cautioned that making a false certification may subject the certifier to criminal prosecution.

I declare under penalty of perjury under the laws of the State of California that the foregoing is true and correct and that this declaration is executed on the date and time of submittal of this Proposal.

☐ Please confirm

*Response required

5.11. ADDITIONAL INFORMATION (IF NEEDED)

For any additional information requested or required by any of your provided answers please upload that additional documentation here.

5.12. SIGNATURE CERTIFICATION PAGE*

Please download the below documents, complete, and upload.

If proposer or other interested person is a corporation, state legal name of corporation, also names of the president, secretary, treasurer, and manager thereof; if a co-partnership, state true name of firm, also names of all individual co-partners composing the firm; if proposer or other interested person is an individual, state first and last names in full.

By my signature on this proposal I certify, under the Penalty of Perjury, that the foregoing Non-Collusion Affidavit and Contractor's License Certification along with all other statements in this proposal are true and correct.

- [Signature Certification Pag...](#)

5.13. PROPOSER CONFIRMATION*

By confirming here and submitting a proposal, Proposer confirms their authority (and has uploaded necessary documentation proving such) to execute this Proposal in its entirety as submitted and enter into a contract on behalf of the Company Name stated in said Proposal.

Such confirmation will be understood as certification by the Proposer that they have completely read and understand this Request For Proposals in its entirety including any and all Addenda released prior to the time of submittal.

☐ Please confirm

*Response required

Section 6 - Cost Proposal

The Cost portion of this Proposal consists of a Cost Schedule with unit bid pricing and submission of Labor & Equipment rates for maintenance services.

COST SCHEDULE

The following quantities are ESTIMATED YEARLY QUANTITIES only and are given for the purpose of comparing proposals. The City does not expressly or by implication agree that the actual amount of work will correspond with quantities given herein but reserves the right to increase and decrease the amount of any class or portion of the work as may be deemed necessary or advisable by the City. Additional lump sum or unit price work items may be negotiated between the City and the Contractor on a case-by-case basis. Payment will be based upon the actual quantities cleaned or repaired, unless otherwise specified. Maintenance rates may escalate annually based on San Francisco Engineering News- Record (ENR) Consumer Price Index (CPI) or 3%, whichever is less.

ITEM	MAINTENANCE TYPE	UNIT	EST. YEARLY QUANTITY	UNIT PRICE	ITEM TOTAL
1	Chemical Treatment	AC	64		
2	High Weed Mowing	AC	72		
3	Debris and Obstruction Removal	TONS	120		
TOTAL					

LABOR & EQUIPMENT RATES

The following hourly rates and equipment rates shall apply to all maintenance or repair work that is not already included under the unit prices listed in the Cost Schedule. Hourly rates and equipment rates shall include all costs to supply the necessary labor costs, insurances, and equipment including, but not limited to, overhead and profit. Payment will be based upon the actual quantities of time and materials, unless otherwise specified. Labor and equipment rates may escalate annually based on San Francisco (ENR) Consumer Price Index (CPI) or 3%, whichever is less.

ITEM	DESCRIPTION	UNIT	REGULAR TIME
Labor			
1	Superintendent	HOURS	
2	Foreman	HOURS	
3	Laborer 1	HOURS	
4	Laborer 2	HOURS	

ITEM	DESCRIPTION	UNIT	REGULAR TIME
5	Laborer 3	HOURS	
Prevailing Wage			
1	Construction Laborer	HOURS	
2	Sign Work	HOURS	
3	Painter Brush	HOURS	
4	Truck Driver	HOURS	
Equipment			
1	Utility Truck	HOURS	
2	Standard Pickup Truck	HOURS	
3	Trailer	HOURS	
4	High Weed Mower	HOURS	
5	Weed Eater	HOURS	
6	Blower	HOURS	
7	Chainsaw	HOURS

1. Cover Letter*

Please upload a cover letter that provides a brief introduction to your firm. Please reference the [Basis for Evaluation of Proposals](#) as you are submitting your letter and all subsequent documents.

Cover_Letter.pdf

2. Contractor's License Certification*

Pass

Any person or entity submitting a proposal on this project to engage in the business or act in the capacity of a contractor shall be licensed as a contractor in accordance with the provisions of Division 3, Chapter 9 of the California Business and Professions Code at the time of proposal submittal. A proposal submitted to the City by a contractor who is not licensed as set forth above shall be considered non-responsive and shall be rejected by the City.

As part of their proposal, the Proposer shall provide to the City their contractor's license number. The minimum license qualifications for this project include possession of a valid **General Engineering Contractor, Class A license, or Landscaping Contractor, C27 license**.

The first payment for work or material under any contract shall not be made unless and until the Registrar of Contractors verifies to the City that the records of the California Contractors' State License Board indicate that the contractor was properly licensed at the time the proposal was submitted and the license has remained valid and good standing after award of the contract. Any proposer or contractor not so licensed shall be subject to all legal penalties imposed by law, including, but not limited to, any appropriate disciplinary action by the Contractors' State License Board. Failure of the proposer to maintain proper and adequate licensing for an award of a contract shall constitute a failure to execute the contract and shall result in the forfeiture of the security of the proposer.

3. Department of Industrial Relations Contractors Registration*

Pass

Any person or entity submitting a proposal on this project to engage in the business or act in the capacity of a contractor shall register as a contractor in accordance with the provisions of the Department of Industrial Relations (DIR). A bid submitted to the City by a contractor who is not registered as set forth above shall be considered non-responsive and shall be rejected by the City.

Before awarding the contract for this project, the City must verify that the contractor was properly registered when the contractor submitted his/her bid on this project. In order for the City to verify the registration status of a contractor, the contractor, at the time he/she submits his/her bid for the project, shall provide to the City his/her contractor's registration number.

No proposal submitted to the City shall be invalidated by the failure of the Proposer to be registered in accordance with the laws of this state. However, at the time the contract is awarded, the contractor shall be properly licensed in accordance with the laws of this state. Any Proposer or contractor not so registered shall be subject to all legal penalties imposed by law, including, but not limited to, any appropriate disciplinary action by the DIR. Failure of the Proposer to obtain proper and adequate registration for an award of a contract shall constitute a failure to execute the contract and shall result in the forfeiture of the security of the Proposer.

PRICE TABLES

COST SCHEDULE

The following quantities are ESTIMATED YEARLY QUANTITIES only and are given for the purpose of comparing proposals. The City does not expressly or by implication agree that the actual amount of work will correspond with quantities given herein but reserves the right to increase and decrease the amount of any class or portion of the work as may be deemed necessary or advisable by the City. Additional lump sum or unit price work items may be negotiated between the City and the Contractor on a case-by-case basis. Payment will be based upon the actual quantities cleaned or repaired, unless otherwise specified. Maintenance rates may escalate annually based on San Francisco Engineering News- Record (ENR) Consumer Price Index (CPI) or 3%, whichever is less.

ITEM	MAINTENANCE TYPE	UNIT	EST. YEARLY QUANTITY	UNIT PRICE	ITEM TOTAL
1	Chemical Treatment	AC	64	\$342.66	\$21,930.24
2	High Weed Mowing	AC	72	\$1,636.45	\$117,824.40
3	Debris and Obstruction Removal	TONS	120	\$839.90	\$100,788.00
TOTAL					\$240,542.64

LABOR & EQUIPMENT RATES

The following hourly rates and equipment rates shall apply to all maintenance or repair work that is not already included under the unit prices listed in the Cost Schedule. Hourly rates and equipment rates shall include all costs to supply the necessary labor costs, insurances, and equipment including, but not limited to, overhead and profit. Payment will be based upon the actual quantities of

RE: RFP for Stormwater Facility Maintenance Services.

Dear Dalia:

We are grateful for the opportunity to submit our proposal, which we believe to be complete and consistent with the services requested in the above referenced RFP.

MCE has a long history of providing contract services to the City of Rancho Cordova. Consequently, we believe we have the experience and understanding to provide stormwater facilities maintenance at a very high level. Over the past several years MCE has worked with the City to maintain and improve the City's creeks, channels, levees, detention basins and other drainage structures. Given the opportunity, we look forward to continue working alongside the City to complete the necessary tasks in the drainage facilities within the City of Rancho Cordova.

Our maintenance division primarily works for public agencies. Over the past 41 years this has given MCE the proper perspective of working in the public sector. MCE provides various maintenance services throughout California, from Southern California to the Bay Area and the Sacramento Valley. We plan to utilize the same crew that is currently in place. Our team is experienced, dedicated and looking forward to the opportunity to continue providing service to the City of Rancho Cordova.

MCE has been providing Public Works maintenance services to the City of Rancho Cordova since 2010, when we started our first streets maintenance contract with a single employee. During that time our partnership with the City has flourished and currently we have 3 active contracts. We are committed to providing quality service and will take the necessary steps to ensure a successful long-term relationship. We are prepared to meet with you to discuss our proposal and any questions you may have.

Sincerely,

A handwritten signature in blue ink, appearing to read "Vince Cudia".

FIRM EXPERIENCE AND QUALIFICATIONS *(Required submittal form)*

The proposer has been engaged in the contracting business, under the present business name for 41 years. Experience in work of a nature similar to that covered in the proposal extends over a period of 41 years.

The proposer, as a Contractor, has never failed to satisfactorily complete a Contract awarded to it, except as follows:

Please provide written explanation on a separate sheet(s).

Please provide a listing of contracts related to similar services as noted in this RFP that are currently active or have been satisfactorily completed in the last five (5) years. Please provide a contact name for each of the contracts listed.

Contract Year(s)	Type of Work Performed	Annual Contract Amount	Client/Agency Name	Contact Name /Title Phone Number
1984 to Present	Landscaping, Streets, Drainage, Building Maint.	\$10,260,000.00	City of Dublin, CA	Andrew Russell, Public Works Director. 925-833-6630
2010 to Present	Streets and Roadside Maint.	\$2,204,000.00	City of Rancho Cordova, CA	Steve Harriman, Public Works O&M Manager. 916-851-8716
2017 to Present	Drainage Maint. Emergency On-call	\$502,800.00	City of Citrus Height, CA	Regina Cave, General Services Director. 916-727-4770
2015 to Present	Drainage Maint. Landscaping	\$410,600.00	City of Orinda, CA	Steve Ehrhardt, Facilities & Parks Supervisor. 925-253-4243
2019 to Present	Streets Maint., Drainage Maint. Emergency On-call	\$4,336,000.00	City of Elk Grove, CA	Sean Gallagher, Deputy Public Works Director. 916-687-3041

EMPLOYEE/STAFF EXPERIENCE AND QUALIFICATIONS *(Required submittal form)*

Employee/Staff Name	Title & Position	Years w/ Firm	Years Experience in Trade	Specialized Certifications
Vince Cudia	Director of Maintenance Operations	21	23	OSHA 10, Traffic Control (MUTCD)
Anthony Strasburg	Drainage Supervisor	8	16	QAC - Spray Lic., In Process. Equipment Operator Cert.
Eric Schuh	Drainage Leadman	5	14	OSHA 10
Brian Acker	Drainage Laborer	1.5	10	OSHA 10
Jose Silva	Maintenance Superintendent	1.5	10	Bachelor's Degree - Urban & Regional Planning. OSHA 30

Use additional sheets of paper as necessary for additional references or employees.

DESIGNATION OF SUBCONTRACTORS *(Required submittal form)*

In compliance with the provisions of Section 4100-4114 of the Public Contracts Code of the State of California, and any amendments thereof, each proposer shall set forth below the name and location of the place of business of each subcontractor who will perform work or labor or render service to the Contractor in or about the Services to be performed under these specifications in excess of one-half of one percent (0.5%) of the prime Contractor's total proposal or ten thousand dollars (\$10,000.00), whichever is greater. The prime Contractor shall list the portion of the work which will be done by such Subcontractor.

If the Contractor fails to specify a subcontractor for any portion of the work to be performed under the Contract, the Contractor shall be deemed to have agreed to perform such portion itself, and the Contractor shall not be permitted to subcontract that portion of the work except under the conditions allowed by applicable law. Subcontractors shall provide all required licensing documentation to City.

SUBCONTRACTOR (Name & Location)	% OF WORK	ESTIMATED ANNUAL DOLLAR AMOUNT	WORK TO BE PERFORMED BY SUBCONTRACTOR
RCD Construction Tracy, CA	10%	\$24,000	Special Projects (Excavation)
Blue Jay Trucking Sacramento, CA	5%	\$12,000	Debris Hauling
Pest Control Center North Highlands, CA	2%	4,800	Pest Services

OPERATIONS PLAN *(Required submittal forms)*

Equipment Inventory: Please provide a list of all equipment that will be utilized in the performance of this contract.

Quantity	Name, Type, and Capacity	Model Year and Condition	Fuel Type
1	Chevy Silverado 2500 4x4 8 ft Bed	2019, Good Condition	Gasoline

HARCO NATIONAL INSURANCE COMPANY**BID BOND**

KNOW ALL MEN BY THESE PRESENTS,

That we,
MCE Corporation - 4000 Industrial Way, Concord, CA 94520

as Principal, and Harco National Insurance Company a corporation organized under the laws of the State of Illinois, and authorized to transact a general surety business in the State of California as Surety, are held and firmly bound unto

City of Rancho Cordova - 2729 Prospect Park Drive, Rancho Cordova, CA 95670

(hereinafter called the Obligee) in the full and just sum of

Ten Percent of the Total Amount Bid

Dollars, (\$ 10%*****) for the payment whereof in lawful money of the United States, we bind ourselves, our heirs, administrators, executors, successors and assigns, jointly and severally, firmly by these presents.

WHEREAS, the said PRINCIPAL has submitted the accompanying bid for
Stormwater Facility Maintenance Services

NOW, THEREFORE, if the Obligee shall accept the bid of the Principal and the Principal shall enter into a Contract with the Obligee in accordance with the terms of such bid, or in the event of the failure of the Principal to enter such Contract, If the Principal shall pay to the Obligee the difference not to exceed the penalty hereof between the amount specified in the said bid and such larger amount for which the Obligee may in good faith contract with another party to perform the Work covered by said bid, then this obligation shall be null and void, otherwise to remain in full force and effect.

Signed and Sealed this 11th day of April, 2024.

**Operations and Maintenance Plan
for
Stormwater Facility Maintenance Services for
The City of Rancho Cordova
4/12/2024**

Prepared by: MCE Corporation

An annual maintenance schedule has been included as part of this operations plan to show generally when activities are conducted. Although - weather, site conditions, governing agency approval and other factors may alter the timeframe for when actual work takes place. Also, included as part of this operations plan are maintenance and inspection task lists which provide additional details for site inspections and maintenance.

Vegetation Management

Weed abatement is generally conducted in late spring through early summer (April – July) to maintain vegetation growth along city facilities. Mowing operations are completed with mechanical equipment, this includes, walk-behind mowers, weed eaters and in some areas riding equipment with mowing implements. Weeds and grasses are generally mowed to a height of 4 inches. The on-site MCE project Foreman coordinates with city staff for work authorization and site surveys prior to weed abatement operations taking place. In some cases, areas may need to be cut a second time to maintain a good appearance and or for fire protection. Safety precautions will be taken to ensure safe and efficient weed abatement operations.

Chemical Spraying

Chemical spraying is done as a means to maintain access roads in good condition and to control growth year-round. Spraying is typically done in the spring to control the emergence of new growth. Spot spraying may need to be done in high priority areas in order to keep and maintain a good appearance. In some cases, chemical spraying may need to be done to control nuisance or invasive species (e.g. berry bushes, thistle, palm tree saplings, etc..). All federal, state and local regulations will be followed and pesticide logs will be submitted to the city on a monthly basis. MCE will follow the city's Integrated Pest Management (IPM) policy. Only properly trained individuals will be responsible for spraying operations.

Debris and Obstruction Removal

Excavation work takes place in the fall, typically from mid-October through early December. In some cases, emergency excavation work will need to be done during the rainy season due to debris flows in creek, channels or detention basins. Annual site inspections of all city facilities are conducted during the summer and a prioritized list is developed for review with the City. Excavation operations typically consist of an equipment operator and a dump truck driver. Excavated materials are hauled off for disposal and receipts with quantities of the materials removed are logged and submitted to the city on a monthly basis.

Extermination of Burrowing Animals

Burrowing animals may need to be removed from city facilities for various reasons. When directed by the city, MCE will follow the scope of services language in (section 4.15.) provided in the city's request for proposals package. MCE only uses licensed pest control companies to conduct this activity. Prior to the commencement of any work, site inspections will be conducted by MCE's project Foreman and a city representative. All federal, state and local regulations will be followed and proper documentation will be provided to the city. MCE will follow the city's Integrated Pest Management (IPM) policy.

Burrow Grouting

Burrow grouting is done in conjunction with the extermination of burrowing animals. It may be necessary to conduct burrow grouting to stabilize city facilities. When necessary, and directed by the city, MCE will follow the scope of services language in (section 4.16.) provided in the city's request for proposals package. When needed, burrow grouting will be conducted by current project staff or MCE's construction division. MCE will follow the specification as outlined in the scope of services section (section 4.16.).

Ground Cover Replacement

At times it may be necessary to replace ground cover at city facilities. At the direction of the city, MCE will replace ground cover following the scope of services language in (section 4.17.) provided in the city's request for proposals package. Seed mixture, site preparations and specified planting timeframe will be followed based on the city's specifications found in the scope of services.

Tree Trimming and Removal

Tree trimming and tree removals are completed as needed. During annual vegetation management, tree trimming is conducted to provide proper clearance along fence lines and access roads. When hazardous trees are identified that are in clear danger of falling and creating damage to city facilities or private property, MCE staff will request approval from the city, prior to removal. MCE typically only trims and removes trees 4 inches in diameter (dbh) or smaller. Larger trees that require trimming or removal are submitted to the city and the city's tree service company completes the work.

General Maintenance Activities

There are numerous additional activities that are completed regularly throughout the city. Some of these activities include, litter removal, illegal dumping removal, sign repair and replacement, graffiti abatement, painting, fence repair and access road maintenance. These additional activities are critical to the overall condition of the city's facilities. Through regular inspections, deficiencies are identified and reported to the city and repairs are made. MCE also works with the city to complete other special projects as requested.

Client: City of Rancho Cordova

[illegible]

Note: Refer to Operations Plan Details for additional information related to these activities.

EXHIBIT B
INSURANCE REQUIREMENTS

Before beginning any work under this Agreement, Contractor, at its own cost and expense, shall procure "occurrence coverage" insurance against claims for injuries to persons or damages to property that may arise from or in connection with the performance of the work hereunder by the Professional and its agents, representatives, employees, and subcontractors. Contractor shall provide proof satisfactory to City of such insurance that meets the requirements of this section and under forms of insurance satisfactory in all respects to the City. Professional shall maintain the insurance policies required by this section throughout the term of this Agreement. The cost of such insurance shall be included in the Contractor's bid. Contractor shall not allow any subcontractor to commence work on any subcontract until Contractor has obtained all insurance required herein for the subcontractor(s) and provided evidence thereof to City. Verification of the required insurance shall be submitted and made part of this Agreement prior to execution. Contractor shall maintain all required insurance listed herein for the duration of this Agreement.

1. **Workers' Compensation.** Contractor shall, at its sole cost and expense, maintain Statutory Workers' Compensation Insurance and Employer's Liability Insurance for any and all persons employed directly or indirectly by Contractor. The Statutory Workers' Compensation Insurance and Employer's Liability Insurance shall be provided with limits of not less than ONE MILLION DOLLARS (\$1,000,000.00) per accident. In the alternative, Contractor may rely on a self-insurance program to meet those requirements, but only if the program of self-insurance complies fully with the provisions of the California Labor Code. Determination of whether a self-insurance program meets the standards of the Labor Code shall be solely in the discretion of the Contract Administrator. The insurer, if insurance is provided, or the Contractor, if a program of self-insurance is provided, shall waive all rights of subrogation against the City and its officers, officials, employees, and volunteers for loss arising from work performed under this Agreement.

An endorsement shall state that coverage shall not be canceled except after thirty (30) days' prior written notice by certified mail, return receipt requested, has been given to the City. Contractor shall notify City within fourteen (14) days of notification from Contractor's insurer if such coverage is suspended, voided or reduced in coverage or in limits.

The requirement to maintain Statutory Worker's Compensation and Employer's Liability Insurance insurance may be waived by the City upon written verification that Contractor does not have any employees.

2. **Commercial General and Automobile Liability Insurance.**

- 2.1 **General requirements.** Contractor, at its own cost and expense, shall maintain commercial general liability insurance for the term of this Agreement in an amount not less than TWO MILLION DOLLARS (\$2,000,000.00) and automobile liability insurance for the term of this Agreement in an amount not less than ONE MILLION DOLLARS (\$1,000,000.00). The commercial general liability and automobile liability insurance shall be per occurrence, combined single limit coverage for risks associated with the work contemplated by this Agreement. If a commercial general liability insurance or an automobile liability form or other form with a general

CONTRACT NO.: 2024-61

aggregate limit is used, either the general aggregate limit shall apply separately to the work to be performed under this Agreement or the general aggregate limit shall be at least twice the required occurrence limit. Such coverage shall include but shall not be limited to, protection against claims arising from bodily and personal injury, including death resulting therefrom, and damage to property resulting from activities contemplated under this Agreement, including the use of owned and non-owned automobiles.

2.2 Minimum scope of coverage. Commercial general liability coverage shall be at least as broad as Insurance Services Office Commercial General Liability occurrence form CG 0001 (most recent edition) covering comprehensive General Liability on an "occurrence" basis. Automobile coverage shall be at least as broad as Insurance Services Office Automobile Liability form CA 0001 (most recent edition), Code 1 (any auto). No endorsement shall be attached limiting the coverage.

2.3 Additional requirements. Each of the following shall be included in the insurance coverage or added as an endorsement to the policy:

- a. City and its officers, employees, agents, and volunteers shall be covered as additional insureds with respect to each of the following: liability arising out of activities performed by or on behalf of Contractor, including the insured's general supervision of Contractor; products and completed operations of Contractor; premises owned, occupied, or used by Contractor; and automobiles owned, leased, or used by the Contractor. The coverage shall contain no special limitations on the scope of protection afforded to City or its officers, employees, agents, or volunteers.
- b. The insurance shall cover on an occurrence or an accident basis, and not on a claims-made basis.
- c. An endorsement must state that coverage is primary insurance with respect to the City and its officers, officials, employees and volunteers, and that no insurance or self-insurance maintained by the City shall be called upon to contribute to a loss under the coverage.
- d. Any failure of Contractor to comply with reporting provisions of the policy shall not affect coverage provided to City and its officers, employees, agents, and volunteers.
- e. An endorsement shall state that coverage shall not be canceled except after thirty (30) days' prior written notice by certified mail, return receipt requested, has been given to the City. Contractor shall notify City within fourteen (14) days of notification from Contractor's insurer if such coverage is suspended, voided or reduced in coverage or in limits.

3. All Policies Requirements.

- 3.1 Acceptability of insurers.** All insurance required by this section is to be placed with insurers with a Bests' rating of no less than A:VII.
- 3.2 Verification of coverage.** Prior to beginning any work under this Agreement, Contractor shall furnish City with certificates of insurance and with original endorsements effecting coverage required herein. The certificates and endorsements for each insurance policy are to be signed by a person authorized by that insurer to bind coverage on its behalf. The City reserves the right to require complete, certified copies of all required insurance policies, at any time.
- 3.3 Subcontractors.** Contractor shall include all subcontractors as insureds under its policies or shall furnish separate certificates and endorsements for each subcontractor. All coverages for subcontractors shall be subject to all of the requirements stated herein.
- 3.4 Deductibles and Self-Insured Retentions.** Contractor shall disclose to and obtain the approval of City for the self-insured retentions and deductibles before beginning any of the services or work called for by any term of this Agreement.
- During the period covered by this Agreement, only upon the prior express written authorization of Contract Administrator, Contractor may increase such deductibles or self-insured retentions with respect to City, its officers, employees, agents, and volunteers. The Contract Administrator may condition approval of an increase in deductible or self-insured retention levels with a requirement that Contractor procure a bond, guaranteeing payment of losses and related investigations, claim administration, and defense expenses that is satisfactory in all respects to each of them.
- 3.5 Waiver of Subrogation.** Contractor hereby agrees to waive subrogation which any insurer or contractor may require from vendor by virtue of the payment of any loss. Consultant agrees to obtain any endorsements that may be necessary to effect this waiver of subrogation. The Workers' Compensation policy shall be endorsed with a waiver of subrogation in favor of the entity for all work performed by the Contractor, its employees, agents, and subcontractors.
- 3.6 Notice of Reduction in Coverage.** In the event that any coverage required by this section is reduced, limited, or materially affected in any other manner, Contractor shall provide written notice to City at Contractor's earliest possible opportunity and in no case later than five (5) days after Contractor is notified of the change in coverage.

CONTRACT NO.: 2024-61

4. **Remedies.** In addition to any other remedies City may have if Contractor fails to provide or maintain any insurance policies or policy endorsements to the extent and within the time herein required, City may, at its sole option exercise any of the following remedies, which are alternatives to other remedies City may have and are not the exclusive remedy for Contractor's breach:

- Obtain such insurance and deduct and retain the amount of the premiums for such insurance from any sums due under the Agreement;
- Order Contractor to stop work under this Agreement or withhold any payment that becomes due to Contractor hereunder, or both stop work and withhold any payment, until Contractor demonstrates compliance with the requirements hereof; and/or
- Terminate this Agreement.

MEMORANDUM

ITEM 13.4.

DATE: June 3, 2024
TO: Honorable Mayor and Council Members
FROM: Stacy Leitner, City Clerk
SUBJECT: **A RESOLUTION CALLING THE NOVEMBER 5, 2024, GENERAL MUNICIPAL ELECTION TO ELECT COUNCIL MEMBERS BY-DISTRICT FOR DISTRICTS 1, 3, AND 4, REQUESTING THE SACRAMENTO COUNTY BOARD OF SUPERVISORS CONSOLIDATE THE GENERAL MUNICIPAL ELECTION WITH THE STATEWIDE GENERAL ELECTION, AND ESTABLISHING POLICIES FOR CANDIDATE STATEMENTS**

RECOMMENDATION

Adopt the Resolution.

RESULT OF RECOMMENDED ACTION

Adoption of the Resolution would allow for the consolidation of the general municipal election with the statewide general election to be held on November 5, 2024, and to obtain election services from the Sacramento County Voter Registration and Elections Department. The Resolution also adopts the Candidate Statement policy described in the County of Sacramento's Candidates Guide. Exhibit A ([Attachment 2](#)) provides the City Council adopted map 516C for the new by-district elections for the 2024 Council election on file with the Sacramento Registrar of Voters (ROV). Three City Council Member seats for full, four-year terms are up for election at the general municipal election. The Council Member seats currently filled by Siri Pulipati, David Sander, and Donald Terry are up for election in November 2024.

BACKGROUND

Rancho Cordova Municipal Code Chapter 2.42 regarding elections states the general municipal election shall be held on the same date as the date of the statewide general election.

At the November 5, 2024, general municipal election, by-district elections will be held for Council Members in Districts 1, 3, and 4 to serve four-year terms. Consistent with state law for general municipal elections consolidated with statewide general elections (Elections Code Section 10220), the filing period for candidate nomination documents and candidate statements will be during the nomination period of July 15, 2024, through August 9, 2024 (any seat where the incumbent does not file will activate a five-day filing period extension to August 14, 2024).

In 2023, the City transitioned from at-large Council elections to a by-district election system, with the creation of five City Council districts. In order to continue the staggered terms, a two-

phase implementation was created for 2024 and 2026. In 2024, voters will elect Council Members in Districts 1, 3, and 4. In 2026, voters will elect Council Members in Districts 2 and 5.

The seats for three City Council Members (Siri Pulipati, David Sander, and Donald Terry) elected at-large in 2020 are up for election in November 2024, while the seats for two City Council Members elected in 2022 (Linda Budge and Garrett Gatewood) will continue through November 2026.

Election Consolidation

In accordance with Elections Code Section 10403, it is necessary for the City Council to adopt a Resolution calling and giving notice of the holding of a general municipal election in the City of Rancho Cordova on November 5, 2024, and requesting the Board of Supervisors of the County of Sacramento consolidate the general municipal election with the statewide general election (Attachment 1).

By adoption of the proposed Resolution, the City will file a copy of the attached Resolution with the Sacramento County Board of Supervisors and the Sacramento County Voter Registration and Elections Department. The Sacramento County Voter Registration and Elections Department will therefore be authorized to canvass the returns of the election and the City agrees to reimburse the Sacramento County Voter Registration and Elections Department for actual costs accrued for the election.

The Sacramento County Voter Registration and Elections Department has requested the consolidation Resolution address procedures in the event of a tie vote for any contest. The options to resolve a tie vote shall be either by lot or to hold a special runoff election. Staff recommends the City Council address tie votes by lot to save the cost of holding a special election, as provided in Elections Code Section 15651. Procedures for resolving a tie vote by lot would be presented for City Council consideration at a meeting prior to the date, time, and place if a drawing by lot is determined to be necessary.

Candidate Statements

Candidate statements serve as a critical tool for voters to make informed decisions about candidates during elections. Candidate statements are included in the sample ballot mailed to voters. The City chooses to adopt the policy for preparation of candidate statements as described in the County of Sacramento's Candidates Guide under the heading of "Candidate's Statement." Each candidate has the option to prepare a candidate statement which may include the name, age, and occupation of the candidate and a brief description of no more than 200 words of the candidate's education and qualifications expressed by the candidate. The statement shall not include the party affiliation of the candidate, nor membership or activity in partisan political organizations. The statement shall be filed with the City Clerk at the same time the candidate's nomination papers are filed. If a candidate chooses to submit a candidate statement, they must pay the corresponding printing fee. The 2024 candidate statement fee is set by Sacramento County.

FISCAL IMPACT AND FUNDING SOURCE

It is estimated that the costs associated with the Election Services will be \$75,000.

CITY OF RANCHO CORDOVA

RESOLUTION NO. XX-2024

**A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA,
STATE OF CALIFORNIA, CALLING THE NOVEMBER 5, 2024, GENERAL MUNICIPAL
ELECTION TO ELECT COUNCIL MEMBERS BY-DISTRICT FOR DISTRICTS 1, 3, AND
4, REQUESTING THE SACRAMENTO COUNTY BOARD OF SUPERVISORS
CONSOLIDATE THE GENERAL MUNICIPAL ELECTION WITH THE STATEWIDE
GENERAL ELECTION, AND ESTABLISHING POLICIES FOR CANDIDATE
STATEMENTS**

WHEREAS, under the provisions of the State of California Elections Code, a general municipal election will be held within the City of Rancho Cordova on November 5, 2024, for the purpose of electing Council Members by-district for Districts 1, 3, and 4 to serve four-year terms; and

WHEREAS, a statewide general election will be held within the County of Sacramento on the same day; and

WHEREAS, Elections Code Section 10403 requires jurisdictions to file with the Sacramento County Board of Supervisors, and a copy with the Sacramento County Registrar of Voters, a Resolution requesting consolidation with a statewide election.

**NOW, THEREFORE, BE IT RESOLVED BY THE CITY COUNCIL OF THE CITY OF
RANCHO CORDOVA:**

1. That under the provisions of the Elections Code, there is called and ordered to be held in the City of Rancho Cordova, California, on Tuesday, November 5, 2024, a general municipal election for the purpose of electing Council Members by-district for Districts 1, 3, and 4, each to serve four-year terms.
2. That pursuant to the requirements of Elections Code Section 10403, the City of Rancho Cordova requests the Board of Supervisors of Sacramento County consolidate the regularly scheduled general municipal election with the statewide general election to be held on November 5, 2024.
3. That the City of Rancho Cordova acknowledges that the consolidated election will be held and conducted in the manner prescribed in Elections Code Section 10418.
4. That each candidate for elective office to be voted for at the general municipal election to be held in the City of Rancho Cordova on November 5, 2024, may prepare a candidate statement on an appropriate form provided by the City Clerk. That the candidates are to adhere to Elections Code Section 13307 and the policies as established by the City of Rancho Cordova, which: 1) requires candidates pay for the publication of the candidate statements, 2) limits the number of words that a candidate may use in their candidate statement to 200 words, and 3) chooses to adopt the policy for candidate statements preparation as described in the County of Sacramento's Candidates Guide under the heading of "Candidate's Statement." The Sacramento County Voter Registration and Elections Department will set the cost of the candidate statement prior to the election; this fee will be paid to the City of Rancho Cordova by the candidate at the time the candidate's nomination papers and statement are filed.
5. That in the event of a tie vote (if any two or more persons receive an equal and the highest number of votes for an office) as certified by the Registrar of Voters of

Sacramento County, the City Council, in accordance with Elections Code Section 15651, shall set a date and time and place if a drawing by lot is determined to be necessary.

6. That the adopted City map is on file with the Sacramento County Voter Registration and Elections Department and is attached as Exhibit A.
7. That the City of Rancho Cordova agrees to reimburse the Sacramento County Voter Registration and Elections Department for actual costs accrued for each election, such costs to be calculated by the proration method set forth in Sacramento County's current Election Cost to Allocation Procedures on the basis of the amount of services provided to the City of Rancho Cordova.
8. That the City Clerk is directed to file a copy of this Resolution with the Sacramento County Board of Supervisors and the Sacramento County Registrar of Voters.

PASSED AND ADOPTED by the City Council of the City of Rancho Cordova on this 3rd day of June by the following vote:

MEMORANDUM

ITEM 13.5.

DATE: June 3, 2024

TO: Honorable Mayor and Council Members

FROM: Albert Stricker, Public Works Director
Drew Hart, Senior Transportation Planner

SUBJECT: **A RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE CONTRACT NO. 2024-77 WITH KITTELSON AND ASSOCIATES, INC. IN AN AMOUNT NOT TO EXCEED \$324,945 TO PROVIDE PROFESSIONAL SERVICES TO PREPARE THE RANCHO CORDOVA ACTIVE TRANSPORTATION PLAN TO INCREASE MOBILITY OPTIONS, SAFETY, AND LIVABILITY**

RECOMMENDATION

Adopt the Resolution.

RESULT OF RECOMMENDED ACTION

Adoption of the Resolution would authorize the City Manager to execute Contract No. 2024-77 with Kittelson and Associates, Inc. in an amount not to exceed \$324,945 to provide professional services to prepare the Rancho Cordova Active Transportation Plan to increase mobility options, safety, and livability.

BACKGROUND

The City of Rancho Cordova applied for and successfully received a Fiscal Year 2023-24 California Department of Transportation (Caltrans) Sustainable Transportation Planning Grant in the amount of \$301,295 for the Rancho Cordova Active Transportation Plan (Plan). The Plan will update the existing Bicycle Master Plan (2016) and Pedestrian Master Plan (2011) and combine them into one vision and one document. The planning effort will include extensive community outreach, data analysis, and identification of infrastructure projects needed to improve active transportation options for all ages and abilities in Rancho Cordova. The final Plan will provide a prioritized list of projects that will encourage sustainable modes of transportation.

On October 2, 2023, the City Council approved Resolution No. 144-2023 authorizing the Public Works Director to execute all agreements associated with the Fiscal Year 2023-24 Caltrans Sustainable Transportation Planning Grant Program. In January 2024, Caltrans issued the City a Notice to Proceed to issue a Request for Proposals to retain a consultant for preparation of the Plan.

A Request for Proposals (RFP) was advertised on the City's website, CIPLIST.com, and

OpenGov on March 14, 2024. The City received proposals from four consulting firms on April 5, 2024. The proposals were evaluated based on an established set of criteria and staff recommends awarding the professional services agreement to the most qualified firm, Kittelson and Associates, Inc. and authorizing the City Manager to execute the agreement.

The project is expected to begin in Summer 2024 and be completed by the grant deadline of April 2026.

FISCAL IMPACT AND FUNDING SOURCE

Funding for this contract consists of Caltrans Sustainable Transportation Planning Grant funds and Measure A - Safety, Streetscaping, Pedestrian and Bicycle Facilities Program. This Project has no impact on the City's General Fund. This Project is included in the City's current approved 2023-28 Capital Improvement Plan.

CITY OF RANCHO CORDOVA

RESOLUTION NO. XX-2024

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA, STATE OF CALIFORNIA, AUTHORIZING THE CITY MANAGER TO EXECUTE CONTRACT NO. 2024-77 WITH KITTELSON & ASSOCIATES, INC. IN AN AMOUNT NOT TO EXCEED \$324,945 TO PREPARE THE RANCHO CORDOVA ACTIVE TRANSPORTATION PLAN TO INCREASE MOBILITY OPTIONS, SAFETY, AND LIVABILITY

WHEREAS, the City of Rancho Cordova was awarded a Fiscal Year 2023-24 California Department of Transportation (Caltrans) Sustainable Transportation Planning Grant for the Rancho Cordova Active Transportation Plan (Plan); and

WHEREAS, a Request for Proposals for a consultant to provide Professional Services to prepare the Plan was advertised on the City's website, CIPList.com, and OpenGov on March 14, 2024, and a total of four proposals were received from consultants; and

WHEREAS, proposals were evaluated based on an established set of criteria and staff recommends awarding the contract to the most qualified firm, Kittelson & Associates, Inc.; and

WHEREAS, the City of Rancho Cordova desires to enter into Contract No. 2024-77 with Kittelson & Associates, Inc. in an amount not to exceed \$324,945 for professional services to prepare the Rancho Cordova Active Transportation Plan; and

WHEREAS, funding for this Project consists of Caltrans Sustainable Transportation Planning Grant Program funding and the remainder from Measure A.

NOW, THEREFORE, BE IT HEREBY RESOLVED THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA does authorize the City Manager to execute Contract No. 2024-77 with Kittelson & Associates, Inc. in an amount not to exceed \$324,945 for professional services to prepare the Rancho Cordova Active Transportation Plan in a form approved by the City Attorney.

**PROFESSIONAL SERVICES AGREEMENT BETWEEN
THE CITY OF RANCHO CORDOVA AND
KITTELSON & ASSOCIATES, INC.**

THIS AGREEMENT for professional services is made by and between the City of Rancho Cordova, a California municipal corporation ("City"), and Kittleson & Associates Inc. ("Professional") as of June 3, 2024.

Section 1. SERVICES. Subject to the terms and conditions set forth in this Agreement, Professional shall provide to City the services described in the Scope of Work attached as Exhibit A at the time and place and in the manner specified therein. In the event of a conflict or inconsistency between the terms of this Agreement and Exhibit A, the Agreement shall prevail.

- 1.1 Term of Services.** The term of this Agreement shall begin on the date first noted above and shall end on June 30, 2026, the date of completion specified in Exhibit A. Professional shall complete the work described in Exhibit A prior to that date, unless the term of the Agreement is otherwise terminated or extended, as provided for in Section 8. The time provided to Professional to complete the services required by this Agreement shall not affect the City's right to terminate the Agreement, as provided for in Section 8.
- 1.2 Standard of Performance.** Professional shall perform all services required pursuant to this Agreement in the manner and according to the standards observed by a competent practitioner of the profession in which Professional is engaged in the geographical area in which Professional practices its profession. Professional shall prepare all work products required by this Agreement in a substantial, first-class manner and shall conform to the standards of quality normally observed by a person practicing in Professional's profession.
- 1.3 Assignment of Personnel.** Professional shall assign only competent personnel to perform services pursuant to this Agreement. In the event that City, in its sole discretion, at any time during the term of this Agreement, desires the reassignment of any such persons, Professional shall, immediately upon receiving notice from City of such desire of City, reassign such person or persons.
- 1.4 Time.** Professional shall devote such time to the performance of services pursuant to this Agreement as may be reasonably necessary to meet the standard of performance provided in Section 1.2 above and to satisfy Professional's obligations hereunder.

Section 2. COMPENSATION. City hereby agrees to pay Professional a sum not to exceed three hundred twenty four thousand, nine hundred and forty five dollars and zero cents (\$324,945.00), notwithstanding any contrary indications that may be contained in Professional's proposal, for services to be performed and reimbursable costs incurred under this Agreement. In the event of a conflict between this Agreement and Professional's Compensation Schedule, attached as Exhibit B, regarding the amount of compensation, the Agreement shall prevail. City shall pay Professional for services rendered pursuant to this Agreement at the time and in the manner set forth herein. The payments specified below shall be the only payments from City to Professional for services rendered pursuant to this Agreement. Professional shall submit all invoices to City in the manner specified herein. Except as specifically authorized by City, Professional shall not bill City for duplicate services performed by more than one person.

Last Revised January 2022

Professional and City acknowledge and agree that compensation paid by City to Professional under this Agreement is based upon Professional's estimated costs of providing the services required hereunder, including salaries and benefits of employees and subcontractors of Professional. Consequently, the parties further agree that compensation hereunder is intended to include the costs of contributions to any pensions and/or annuities to which Professional and its employees, agents, and subcontractors may be eligible. City therefore has no responsibility for such contributions beyond compensation required under this Agreement.

2.1 Invoices. Professional shall submit invoices, not more often than once a month during the term of this Agreement, based on the cost for services performed and reimbursable costs incurred prior to the invoice date. Invoices shall contain the following information:

- Serial identifications of progress bills; i.e., Progress Bill No. 1 for the first invoice, etc.;
- The beginning and ending dates of the billing period;
- A Task Summary containing the original contract amount, the amount of prior billings, the total due this period, the balance available under the Agreement, and the percentage of completion;
- At City's option, for each work item in each task, a copy of the applicable time entries or time sheets shall be submitted showing the name of the person doing the work, the hours spent by each person, a brief description of the work, and each reimbursable expense;
- The total number of hours of work performed under the Agreement by Professional and each employee, agent, and subcontractor of Professional performing services hereunder, as well as a separate notice when the total number of hours of work by Professional and any individual employee, agent, or subcontractor of Professional reaches or exceeds 800 hours, which shall include an estimate of the time necessary to complete the work described in Exhibit A;
- The Professional's signature.

2.2 Monthly Payment. City shall make monthly payments, based on invoices received, for services satisfactorily performed, and for authorized reimbursable costs incurred. City shall have thirty (30) days from the receipt of an invoice that complies with all of the requirements above to pay Professional.

2.3 Final Payment. City shall make the final payment within sixty (60) days after completion of the services and submittal to City of a final invoice, if all services required have been satisfactorily performed.

2.4 Total Payment. City shall pay for the services to be rendered by Professional pursuant to this Agreement. City shall not pay any additional sum for any expense or cost whatsoever incurred by Professional in rendering services pursuant to this Agreement. City shall make no payment for any extra, further, or additional service pursuant to this Agreement.

In no event shall Professional submit any invoice for an amount in excess of the maximum amount of compensation provided above either for a task or for the entire Agreement,

unless the Agreement is modified prior to the submission of such an invoice by a properly executed change order or amendment.

- 2.5 **Hourly Fees.** Fees for work performed by Professional on an hourly basis shall not exceed the amounts shown on the fee schedule set forth in Exhibit B.
- 2.6 **Reimbursable Expenses.** Reimbursable expenses, if any, are set forth in Exhibit B, and shall not exceed the amount specified in the Exhibit B fee schedule. Expenses not listed in Exhibit B are not chargeable to City. Reimbursable expenses are included in the total amount of compensation provided under this Agreement that shall not be exceeded.
- 2.7 **Payment of Taxes.** Professional is solely responsible for the payment of employment taxes incurred under this Agreement and any similar federal or state taxes.
- 2.8 **Payment upon Termination.** In the event that the City or Professional terminates this Agreement pursuant to Section 8, the City shall compensate the Professional for all outstanding costs and reimbursable expenses incurred for work satisfactorily completed as of the date of written notice of termination. Professional shall maintain adequate logs and timesheets in order to verify costs incurred to that date.
- 2.9 **Authorization to Perform Services.** The Professional is not authorized to perform any services or incur any costs whatsoever under the terms of this Agreement until receipt of authorization from the Contract Administrator.

Section 3. FACILITIES AND EQUIPMENT. Except as set forth herein, Professional shall, at its sole cost and expense, provide all facilities and equipment that may be necessary to perform the services required by this Agreement. City shall make available to Professional only the facilities and equipment listed in this section, and only under the terms and conditions set forth herein.

City shall furnish physical facilities such as desks, filing cabinets, and conference space, as may be reasonably necessary for Professional's use while consulting with City employees and reviewing records and the information in possession of the City. The location, quantity, and time of furnishing those facilities shall be in the sole discretion of City. In no event shall City be obligated to furnish any facility that may involve incurring any direct expense, including but not limited to computer, long-distance telephone or other communication charges, vehicles, and reproduction facilities.

Section 4. INSURANCE REQUIREMENTS. Before beginning any work under this Agreement, Professional, at its own cost and expense, shall procure "occurrence coverage" insurance against claims for injuries to persons or damages to property that may arise from or in connection with the performance of the work hereunder by the Professional and its agents, representatives, employees, and subcontractors. Professional shall provide proof satisfactory to City of such insurance that meets the requirements of this section and under forms of insurance satisfactory in all respects to the City. Professional shall maintain the insurance policies required by this section throughout the term of this Agreement. The cost of such insurance shall be included in the Professional's bid. Professional shall not allow any subcontractor to commence work on any subcontract until Professional has obtained all insurance required herein for the

Last Revised January 2022

subcontractor(s) and provided evidence thereof to City. Verification of the required insurance shall be submitted and made part of this Agreement prior to execution. Professional shall maintain all required insurance listed herein for the duration of this Agreement.

- 4.1 Workers' Compensation.** Professional shall, at its sole cost and expense, maintain Statutory Workers' Compensation Insurance and Employer's Liability Insurance for any and all persons employed directly or indirectly by Professional. The Statutory Workers' Compensation Insurance and Employer's Liability Insurance shall be provided with limits of not less than ONE MILLION DOLLARS (\$1,000,000.00) per accident. In the alternative, Professional may rely on a self-insurance program to meet those requirements, but only if the program of self-insurance complies fully with the provisions of the California Labor Code. Determination of whether a self-insurance program meets the standards of the Labor Code shall be solely in the discretion of the Contract Administrator. The insurer, if insurance is provided, or the Professional, if a program of self-insurance is provided, shall waive all rights of subrogation against the City and its officers, officials, employees, and volunteers for loss arising from work performed under this Agreement.

An endorsement shall state that coverage shall not be canceled except after thirty (30) days' prior written notice by certified mail, return receipt requested, has been given to the City. Professional shall notify City within fourteen (14) days of notification from Professional's insurer if such coverage is suspended, voided or reduced in coverage or in limits.

The requirement to maintain Statutory Worker's Compensation and Employer's Liability Insurance may be waived by the City upon written verification that Professional does not have any employees.

4.2 Commercial General and Automobile Liability Insurance.

- 4.2.1 General requirements.** Professional, at its own cost and expense, shall maintain commercial general liability insurance for the term of this Agreement in an amount not less than TWO MILLION DOLLARS (\$2,000,000.00) and automobile liability insurance for the term of this Agreement in an amount not less than ONE MILLION DOLLARS (\$1,000,000.00). The commercial general liability and automobile liability insurance shall be per occurrence, combined single limit coverage for risks associated with the work contemplated by this Agreement. If a commercial general liability insurance or an automobile liability form or other form with a general aggregate limit is used, either the general aggregate limit shall apply separately to the work to be performed under this Agreement or the general aggregate limit shall be at least twice the required occurrence limit. Such coverage shall include but shall not be limited to, protection against claims arising from bodily and personal injury, including death resulting therefrom, and damage to property resulting from activities contemplated under this Agreement, including the use of owned and non-owned automobiles.

4.2.2 Minimum scope of coverage. Commercial general liability coverage shall be at least as broad as Insurance Services Office Commercial General Liability occurrence form CG 0001 (most recent edition) covering comprehensive General Liability on an “occurrence” basis. Automobile coverage shall be at least as broad as Insurance Services Office Automobile Liability form CA 0001 (most recent edition), Code 1 (any auto). No endorsement shall be attached limiting the coverage.

4.2.3 Additional requirements. Each of the following shall be included in the insurance coverage or added as an endorsement to the policy:

- a. City and its officers, employees, agents, and volunteers shall be covered as additional insureds with respect to each of the following: liability arising out of activities performed by or on behalf of Professional, including the insured’s general supervision of Professional; products and completed operations of Professional; premises owned, occupied, or used by Professional; and automobiles owned, leased, or used by the Professional. The coverage shall contain no special limitations on the scope of protection afforded to City or its officers, employees, agents, or volunteers.
- b. The insurance shall cover on an occurrence or an accident basis, and not on a claims-made basis.
- c. An endorsement must state that coverage is primary insurance with respect to the City and its officers, officials, employees and volunteers, and that no insurance or self-insurance maintained by the City shall be called upon to contribute to a loss under the coverage.
- d. Any failure of Professional to comply with reporting provisions of the policy shall not affect coverage provided to City and its officers, employees, agents, and volunteers.
- e. An endorsement shall state that coverage shall not be canceled except after thirty (30) days’ prior written notice by certified mail, return receipt requested, has been given to the City. Professional shall notify City within fourteen (14) days of notification from Professional’s insurer if such coverage is suspended, voided or reduced in coverage or in limits.

4.3 Professional Liability Insurance. Professional, at its own cost and expense, shall maintain for the period covered by this Agreement professional liability insurance for licensed professionals performing work pursuant to this Agreement in an amount not less than TWO MILLION DOLLARS (\$2,000,000) covering the licensed professionals’ errors and omissions.

- 4.3.1 Any deductible or self-insured retention shall not exceed \$150,000 per claim.
- 4.3.2 An endorsement shall state that coverage shall not be suspended, voided, canceled by either party, or reduced in coverage or in limits, except after thirty (30) days' prior written notice by certified mail, return receipt requested, has been given to the City.
- 4.3.3 The following provisions shall apply if the professional liability coverages are written on a claims-made form:
- a. The retroactive date of the policy must be shown and must be before the date of the Agreement.
 - b. Insurance must be maintained and evidence of insurance must be provided for at least five (5) years after completion of the Agreement or the work, so long as commercially available at reasonable rates.
 - c. If coverage is canceled or not renewed and it is not replaced with another claims-made policy form with a retroactive date that precedes the date of this Agreement, Professional must provide extended reporting coverage for a minimum of five (5) years after completion of the Agreement or the work. The City shall have the right to exercise, at the Professional's sole cost and expense, any extended reporting provisions of the policy, if the Professional cancels or does not renew the coverage.
 - d. A copy of the claim reporting requirements must be submitted to the City prior to the commencement of any work under this Agreement.

4.4 All Policies Requirements.

- 4.4.1 Acceptability of insurers. All insurance required by this section is to be placed with insurers with a Bests' rating of no less than A:VII.
- 4.4.2 Verification of coverage. Prior to beginning any work under this Agreement, Professional shall furnish City with certificates of insurance and with original endorsements effecting coverage required herein. The certificates and endorsements for each insurance policy are to be signed by a person authorized by that insurer to bind coverage on its behalf. The City reserves the right to require complete, certified copies of all required insurance policies, at any time.
- 4.4.3 Subcontractors. Professional shall include all subcontractors as insureds under its policies or shall furnish separate certificates and endorsements for each subcontractor. All coverages for subcontractors shall be subject to all of the requirements stated herein.

- 4.4.4 Deductibles and Self-Insured Retentions.** Professional shall disclose to and obtain the approval of City for the self-insured retentions and deductibles before beginning any of the services or work called for by any term of this Agreement.

During the period covered by this Agreement, only upon the prior express written authorization of Contract Administrator, Professional may increase such deductibles or self-insured retentions with respect to City, its officers, employees, agents, and volunteers. The Contract Administrator may condition approval of an increase in deductible or self-insured retention levels with a requirement that Professional procure a bond, guaranteeing payment of losses and related investigations, claim administration, and defense expenses that is satisfactory in all respects to each of them.

- 4.4.5 Waiver of Subrogation.** Professional hereby agrees to waive subrogation which any insurer or contractor may require from vendor by virtue of the payment of any loss. Consultant agrees to obtain any endorsements that may be necessary to effect this waiver of subrogation. The Workers' Compensation policy shall be endorsed with a waiver of subrogation in favor of the entity for all work performed the Professional, its employees, agents and subcontractors.

- 4.4.6 Notice of Reduction in Coverage.** In the event that any coverage required by this section is reduced, limited, or materially affected in any other manner, Professional shall provide written notice to City at Professional's earliest possible opportunity and in no case later than five (5) days after Professional is notified of the change in coverage.

- 4.5 Remedies.** In addition to any other remedies City may have if Professional fails to provide or maintain any insurance policies or policy endorsements to the extent and within the time herein required, City may, at its sole option exercise any of the following remedies, which are alternatives to other remedies City may have and are not the exclusive remedy for Professional's breach:

- Obtain such insurance and deduct and retain the amount of the premiums for such insurance from any sums due under the Agreement;
- Order Professional to stop work under this Agreement or withhold any payment that becomes due to Professional hereunder, or both stop work and withhold any payment, until Professional demonstrates compliance with the requirements hereof; and/or
- Terminate this Agreement.

Section 5. INDEMNIFICATION AND PROFESSIONAL'S RESPONSIBILITIES.

- 5.1 General Requirement.** Professional shall indemnify, defend with counsel selected by the City, and hold harmless the City and its officials, officers, employees, agents, and

volunteers from and against any and all losses, liability, claims, suits, actions, damages, and causes of action arising out of any personal injury, bodily injury, loss of life, or damage to property, or any violation of any federal, state, or municipal law or ordinance, to the extent caused, in whole or in part, by the willful misconduct or negligent acts or omissions of Professional or its employees, subcontractors, or agents, by acts for which they could be held strictly liable, or by the quality or character of their work. The foregoing obligation of Professional shall not apply when (1) the injury, loss of life, damage to property, or violation of law arises wholly from the negligence or willful misconduct of the City or its officers, employees, agents, or volunteers and (2) the actions of Professional or its employees, subcontractor, or agents have contributed in no part to the injury, loss of life, damage to property, or violation of law. It is understood that the duty of Professional to indemnify and hold harmless includes the duty to defend as set forth in Section 2778 of the California Civil Code. Acceptance by City of insurance certificates and endorsements required under this Agreement does not relieve Professional from liability under this indemnification and hold harmless clause. This indemnification and hold harmless clause shall apply to any damages or claims for damages whether or not such insurance policies shall have been determined to apply. By execution of this Agreement, Professional acknowledges and agrees to the provisions of this Section and that it is a material element of consideration.

5.2 PERS Indemnification. In the event that Professional or any employee, agent, or subcontractor of Professional providing services under this Agreement is determined by a court of competent jurisdiction or the California Public Employees Retirement System ("PERS") to be eligible for enrollment in PERS as an employee of City, Professional shall indemnify, defend, and hold harmless City for the payment of any and all employee and/or employer contributions for PERS benefits on behalf of Professional or its employees, agents, or subcontractors, as well as for the payment of any penalties and interest on such contributions, which would otherwise be the responsibility of City, and any attorneys' fees and costs incurred by the City to enforce this Section.

5.3 Design Professionals. To the extent that the services under this Agreement include design professional services subject to California Civil Code Section 2782.8, as may be amended from time to time, Professional's duty to indemnify under Sections 5.1 and 5.2 shall only be to the maximum extent permitted by California Civil Code Section 2782.8.

Section 6. STATUS OF PROFESSIONAL.

6.1 Independent Contractor. At all times during the term of this Agreement, Professional shall be an independent contractor as defined in Labor Code Section 3353, and shall not be an employee of City. Nothing contained in this Agreement shall be construed to be inconsistent with the foregoing relationship or status. City shall have the right to control Professional only insofar as the results of Professional's services rendered pursuant to this Agreement and assignment of personnel pursuant to Subparagraph 1.3; however, otherwise City shall not have the right to control the means and methods by which

Professional accomplishes services rendered pursuant to this Agreement. Professional shall have no power or authority by this Agreement to bind the City in any respect. All employees and agents hired or retained by Professional are employees and agents of Professional and not of the City. The City shall not be obligated in any way to pay any wage claims or other claims made against Professional by any such employees or agents, or any other person resulting from performance of this Agreement.

Notwithstanding any other City, state, or federal policy, rule, regulation, law, or ordinance to the contrary, Professional and any of its employees, agents, and subcontractors providing services under this Agreement shall not qualify for or become entitled to, and hereby agree to waive any and all claims to, any compensation, benefit, or any incident of employment by City, including but not limited to eligibility to enroll in PERS as an employee of City and entitlement to any contribution to be paid by City for employer contributions and/or employee contributions for PERS benefits. Professional shall not allow any employee, agent or subcontractor to become eligible for a claim for PERS benefits.

- 6.2 Professional Not an Agent.** Except as City may specify in writing, Professional shall have no authority, express or implied, to act on behalf of City in any capacity whatsoever as an agent. Professional shall have no authority, express or implied, pursuant to this Agreement to bind City to any obligation whatsoever.

Section 7. LEGAL REQUIREMENTS.

- 7.1 Governing Law.** The laws of the State of California shall govern this Agreement.
- 7.2 Compliance with Applicable Laws.** Professional and any subcontractors shall comply with all laws and regulations applicable to the performance of the work hereunder, including but not limited to, the California Building Code, the Americans with Disabilities Act, and any copyright, patent or trademark law. Professional's failure to comply with any law(s) or regulation(s) applicable to the performance of the work hereunder shall constitute a breach of contract.
- 7.3 Other Governmental Regulations.** To the extent that this Agreement may be funded by fiscal assistance from another governmental entity, Professional and any subcontractors shall comply with all applicable rules and regulations to which City is bound by the terms of such fiscal assistance program.
- 7.4 Licenses and Permits.** Professional represents and warrants to City that Professional and its employees, agents, and any subcontractors have all licenses, permits, qualifications, and approvals of whatsoever nature that are legally required to practice their respective professions. Professional represents and warrants to City that Professional and its employees, agents, any subcontractors shall, at their sole cost and expense, keep in effect at all times during the term of this Agreement any licenses, permits, and approvals that are legally required to practice their respective professions. In addition to the

foregoing, Professional and any subcontractors shall obtain and maintain valid Business Licenses from City during the term of this Agreement.

- 7.5 Nondiscrimination and Equal Opportunity.** Professional shall not discriminate, on the basis of a person's race, religion, color, national origin, age, physical or mental handicap or disability, medical condition, marital status, sex, or sexual orientation, against any employee, applicant for employment, subcontractor, bidder for a subcontract, or participant in, recipient of, or applicant for any services or programs provided by Professional under this Agreement. Professional shall comply with all applicable federal, state, and local laws, policies, rules, and requirements related to equal opportunity and nondiscrimination in employment, contracting, and the provision of any services that are the subject of this Agreement, including but not limited to the satisfaction of any positive obligations required of Professional thereby.

Professional shall include the provisions of this Subsection in any subcontract approved by the Contract Administrator or this Agreement.

Section 8. TERMINATION AND MODIFICATION.

- 8.1 Termination.** City may cancel this Agreement at any time and without cause upon written notification to Professional.

Professional may cancel this Agreement upon thirty (30) days' written notice to City and shall include in such notice the reasons for cancellation.

In the event of termination, Professional shall be entitled to compensation for services performed to the effective date of termination; City, however, may condition payment of such compensation upon Professional delivering to City any or all documents, photographs, computer software, video and audio tapes, and other materials provided to Professional or prepared by or for Professional or the City in connection with this Agreement.

- 8.2 Extension.** City may, in its sole and exclusive discretion, extend the end date of this Agreement beyond that provided for in Subsection 1.1. Any such extension shall require a written amendment to this Agreement, as provided for herein. Professional understands and agrees that, if City grants such an extension, City shall have no obligation to provide Professional with compensation beyond the maximum amount provided for in this Agreement. Similarly, unless authorized by the Contract Administrator, City shall have no obligation to reimburse Professional for any otherwise reimbursable expenses incurred during the extension period.

- 8.3 Amendments.** The Parties may amend this Agreement only by a writing signed by all the Parties.

- 8.4 Assignment and Subcontracting.** City and Professional recognize and agree that this Agreement contemplates personal performance by Professional and is based upon a determination of Professional's unique personal competence, experience, and specialized personal knowledge. Moreover, a substantial inducement to City for entering into this Agreement was and is the professional reputation and competence of Professional. Professional may not assign this Agreement or any interest therein without the prior written approval of the Contract Administrator. Professional shall not subcontract any portion of the performance contemplated and provided for herein, other than to the subcontractors noted in the proposal, without prior written approval of the Contract Administrator.
- 8.5 Survival.** All obligations arising prior to the termination of this Agreement and all provisions of this Agreement allocating liability between City and Professional shall survive the termination of this Agreement.
- 8.6 Options upon Breach by Professional.** If Professional materially breaches any of the terms of this Agreement, City's remedies shall include, but not be limited to, the following:
- 8.6.1** Immediately terminate the Agreement;
 - 8.6.2** Retain the plans, specifications, drawings, reports, design documents, and any other work product prepared by Professional pursuant to this Agreement;
 - 8.6.3** Retain a different Professional to complete the work described in Exhibit A not finished by Professional; or
 - 8.6.4** Charge Professional the difference between the cost to complete the work described in Exhibit A that is unfinished at the time of breach and the amount that City would have paid Professional pursuant to Section 2 if Professional had completed the work.

Section 9. KEEPING AND STATUS OF RECORDS.

- 9.1 Records Created as Part of Professional's Performance.** All reports, data, maps, models, charts, studies, surveys, photographs, memoranda, plans, studies, specifications, records, files, or any other documents or materials, in electronic or any other form, that Professional prepares or obtains pursuant to this Agreement and that relate to the matters covered hereunder shall be the property of the City. Professional hereby agrees to deliver those documents to the City upon termination of the Agreement. It is understood and agreed that the documents and other materials, including but not limited to those described above, prepared pursuant to this Agreement are prepared specifically for the City and are not necessarily suitable for any future or other use. City and Professional agree that, until final approval by City, all data, plans, specifications, reports and other documents are confidential and will not be released to third parties without prior written consent of both parties.

- 9.2 **Professional's Books and Records.** Professional shall maintain any and all ledgers, books of account, invoices, vouchers, canceled checks, and other records or documents evidencing or relating to charges for services or expenditures and disbursements charged to the City under this Agreement for a minimum of three (3) years, or for any longer period required by law, from the date of final payment to the Professional pursuant to this Agreement.
- 9.3 **Inspection and Audit of Records.** Any records or documents that Section 9.2 of this Agreement requires Professional to maintain shall be made available for inspection, audit, and/or copying at any time during regular business hours, upon oral or written request of the City. Under California Government Code Section 8546.7, if the amount of public funds expended under this Agreement exceeds TEN THOUSAND DOLLARS (\$10,000.00), the Agreement shall be subject to the examination and audit of the State Auditor, at the request of City or as part of any audit of the City, for a period of three (3) years after final payment under the Agreement.

Section 10 MISCELLANEOUS PROVISIONS.

- 10.1 **Attorneys' Fees.** If a Party to this Agreement brings any action, including an action for declaratory relief, to enforce or interpret the provision of this Agreement, the prevailing Party shall be entitled to reasonable attorneys' fees in addition to any other relief to which that Party may be entitled. The court may set such fees in the same action or in a separate action brought for that purpose.
- 10.2 **Venue.** In the event that either Party brings any action against the other under this Agreement, the Parties agree that trial of such action shall be vested exclusively in the state courts of California in the County of Sacramento or in the United States District Court for the Eastern District of California.
- 10.3 **Severability.** If a court of competent jurisdiction finds or rules that any provision of this Agreement is invalid, void, or unenforceable, the provisions of this Agreement not so adjudged shall remain in full force and effect. The invalidity in whole or in part of any provision of this Agreement shall not void or affect the validity of any other provision of this Agreement.
- 10.4 **No Implied Waiver of Breach.** The waiver of any breach of a specific provision of this Agreement does not constitute a waiver of any other breach of that term or any other term of this Agreement.
- 10.5 **Successors and Assigns.** The provisions of this Agreement shall inure to the benefit of and shall apply to and bind the successors and assigns of the Parties.
- 10.6 **Use of Recycled Products.** Professional shall prepare and submit all reports, written studies and other printed material on recycled paper to the extent it is available at equal or less cost than virgin paper.

Last Revised January 2022

- 10.7 Conflict of Interest.** Professional may serve other clients, but none whose activities within the corporate limits of City or whose business, regardless of location, would place Professional in a "conflict of interest," as that term is defined in the Political Reform Act, codified at California Government Code Section 81000 *et seq.*

Professional shall not employ any City official in the work performed pursuant to this Agreement. No officer or employee of City shall have any financial interest in this Agreement that would violate California Government Code Sections 1090 *et seq.*

Professional hereby warrants that it is not now, nor has it been in the previous twelve (12) months, an employee, agent, appointee, or official of the City. If Professional was an employee, agent, appointee, or official of the City in the previous twelve months, Professional warrants that it did not participate in any manner in the forming of this Agreement. Professional understands that, if this Agreement is made in violation of Government Code §1090 *et seq.*, the entire Agreement is void and Professional will not be entitled to any compensation for services performed pursuant to this Agreement, including reimbursement of expenses, and Professional will be required to reimburse the City for any sums paid to the Professional. Professional understands that, in addition to the foregoing, it may be subject to criminal prosecution for a violation of Government Code § 1090 and, if applicable, will be disqualified from holding public office in the State of California.

- 10.8 Solicitation.** Professional agrees not to solicit business at any meeting, focus group, or interview related to this Agreement, either orally or through any written materials.
- 10.9 Contract Administration.** This Agreement shall be administered by Kristine Courdy ("Contract Administrator"). All correspondence shall be directed to or through the Contract Administrator or his or her designee.
- 10.10 Notices.** Any written notice to Professional shall be sent to:
Amanda Leahy
c/o Kittelson & Associates
155 Grand Ave, Ste 505
Oakland, CA 94612
Email Address (for Insurance Update Requests)
aleahy@kittelson.com
Phone: 510-433-8058

Any written notice to City shall be sent to:

2729 Prospect Park Drive
Rancho Cordova, CA 95670
Email: dhart@cityofranhocordova.org
Phone: 916-851-8958

Last Revised January 2022

- 10.11 Professional Seal.** Where applicable in the determination of the Contract Administrator or when required by law, the first page of a technical report, first page of design specifications, and each page of construction drawings shall be stamped/sealed and signed by the licensed professional responsible for the report/design preparation. The stamp/seal shall be in a block entitled "Seal and Signature of Registered Professional with report/design responsibility," as in the following example.

- 10.12 Integration.** This Agreement, including the scope of work attached hereto and incorporated herein as Exhibit A, and the compensation schedule attached hereto and incorporated herein as Exhibit B, represents the entire and integrated agreement between City and Professional and supersedes all prior negotiations, representations, or agreements, either written or oral.
- 10.13 IRS Form W-9.** Professional shall complete and submit Internal Revenue Service Form W-9 to the City before execution of this Agreement. The City's Finance Director shall have authority to waive this requirement.

Section 11 FUNDING PROVISIONS.

11.1 Prohibition of Expending City, State, or Federal Funds for Lobbying.

11.1.1 Professional certifies to the best of his or her knowledge and belief that:

- (a)** No state, federal or local agency appropriated funds have been paid, or will be paid by-or-on behalf of Professional to any person for influencing or attempting to influence an officer or employee of any state or federal agency; a Member of the State Legislature or United States Congress; an officer or employee of the Legislature or Congress; or any employee of a Member of the Legislature or Congress, in connection with the awarding of any state or federal contract; the making of any state or federal grant; the making of any state or federal loan; the entering into of any cooperative agreement, and the extension, continuation, renewal, amendment, or modification of any state or federal contract, grant, loan, or cooperative agreement.
- (b)** If any funds other than federal appropriated funds have been paid, or will be paid to any person for influencing or attempting to influence an officer or employee of any federal agency; a Member of Congress; an

officer or employee of Congress, or an employee of a Member of Congress; in connection with this federal contract, grant, loan, or cooperative agreement; Professional shall complete and submit Standard Form-LLL, "Disclosure Form to Report Lobbying", in accordance with its instructions.

11.1.2 This certification is a material representation of fact upon which reliance was placed when this transaction was made or entered into. Submission of this certification is a prerequisite for making or entering into this transaction imposed by Section 1352, Title 31, U.S. Code. Any person who fails to file the required certification shall be subject to a civil penalty of not less than \$10,000 and not more than \$100,000 for each such failure.

11.1.3 Professional also agrees by signing this document that he or she shall require that the language of this certification be included in all lower-tier subcontracts, which exceed \$100,000 and that all such sub recipients shall certify and disclose accordingly.

11.2 Statement of Compliance

11.2.1 Professional's signature affixed herein, and dated, shall constitute a certification under penalty of perjury under the laws of the State of California that Professional has, unless exempt, complied with, the nondiscrimination program requirements of Government Code Section 12990 and Title 2, California Administrative Code, Section 8103.

11.2.2 During the performance of this Agreement, Professional and its subconsultants shall not unlawfully discriminate, harass, or allow harassment against any employee or applicant for employment because of sex, race, color, ancestry, religious creed, national origin, physical disability (including HIV and AIDS), mental disability, medical condition (e.g., cancer), age (over 40), marital status, and denial of family care leave. Professional and subconsultants shall insure that the evaluation and treatment of their employees and applicants for employment are free from such discrimination and harassment. Professional and subconsultants shall comply with the provisions of the Fair Employment and Housing Act (Gov. Code §12990 (a-f) et seq.) and the applicable regulations promulgated there under (California Code of Regulations, Title 2, Section 7285 et seq.). The applicable regulations of the Fair Employment and Housing Commission implementing Government Code Section 12990 (a-f), set forth in Chapter 5 of Division 4 of Title 2 of the California Code of Regulations, are incorporated into this Agreement by reference and made a part hereof as if set forth in full. Professional and its subconsultants shall give written notice of their obligations under this clause to labor organizations with which they have a collective bargaining or other Agreement.

11.2.3 If any federal funding is used for this project:

Last Revised January 2022

- (a) The Professional shall comply with regulations relative to Title VI (nondiscrimination in federally-assisted programs of the Department of Transportation – Title 49 Code of Federal Regulations, Part 21 - Effectuation of Title VI of the 1964 Civil Rights Act). Title VI provides that the recipients of federal assistance will implement and maintain a policy of nondiscrimination in which no person in the state of California shall, on the basis of race, color, national origin, religion, sex, age, disability, be excluded from participation in, denied the benefits of or subject to discrimination under any program or activity by the recipients of federal assistance or their assignees and successors in interest.
- (b) The Professional, with regard to the work performed by it during the Agreement shall act in accordance with Title VI. Specifically, the Professional shall not discriminate on the basis of race, color, national origin, religion, sex, age, or disability in the selection and retention of Subconsultants, including procurement of materials and leases of equipment. The Professional shall not participate either directly or indirectly in the discrimination prohibited by Section 21.5 of the U.S. DOT's Regulations, including employment practices when the Agreement covers a program whose goal is employment.

11.3 Rebates, Kickbacks or other Unlawful Consideration. Professional warrants that this Agreement was not obtained or secured through rebates, kickbacks or other unlawful consideration, either promised or paid to any City employee. For breach or violation of this warranty, City shall have the right in its discretion; to terminate the Agreement without liability; to pay only for the value of the work actually performed; or to deduct from the contract price; or otherwise recover the full amount of such rebate, kickback or other unlawful consideration.

11.4 Debarment and Suspension Certification.

11.4.1 Professional's signature affixed herein, shall constitute a certification under penalty of perjury under the laws of the State of California, that Professional has complied with Title 2 CFR, Part 180, "OMB Guidelines to Agencies on Government wide Debarment and Suspension (nonprocurement)", which certifies that he/she or any person associated therewith in the capacity of owner, partner, director, officer, or manager, is not currently under suspension, debarment, voluntary exclusion, or determination of ineligibility by any federal agency; has not been suspended, debarred, voluntarily excluded, or determined ineligible by any federal agency within the past three (3) years; does not have a proposed debarment pending; and has not been indicted, convicted, or had a civil judgment rendered against it by a court of competent jurisdiction in any matter involving fraud or official misconduct within the past three (3) years. Any exceptions to this certification must be disclosed to City.

11.4.2 Exceptions will not necessarily result in denial of recommendation for award, but will be considered in determining Professional responsibility. Disclosures must indicate to whom exceptions apply, initiating agency, and dates of action.

11.4.3 Exceptions to the Federal Government Excluded Parties List System maintained by the General Services Administration are to be determined by the Federal Highway Administration.

11.5 Evaluation of Professional. Professional's performance will be evaluated by City. A copy of the evaluation will be sent to Professional for comments. The evaluation together with the comments shall be retained as part of the contract record.

11.6 National Labor Relations Board Certification. In accordance with Public Contract Code Section 10296, Professional hereby states under penalty of perjury that no more than one final unappealable finding of contempt of court by a federal court has been issued against Professional within the immediately preceding two-year period, because of Professional's failure to comply with an order of a federal court that orders Professional to comply with an order of the National Labor Relations Board.

11.7 Equipment Purchase.

11.7.1 Prior authorization in writing, by Contract Administrator shall be required before Professional enters into any unbudgeted purchase order, or subcontract exceeding \$5,000 for supplies, equipment, or Professional's services. Professional shall provide an evaluation of the necessity or desirability of incurring such costs.

11.7.2 For purchase of any item, service or consulting work not covered in Professional's Cost Proposal and exceeding \$5,000 prior authorization by Contract Administrator; three competitive quotations must be submitted with the request, or the absence of bidding must be adequately justified.

11.7.3 Any equipment purchased as a result of this contract is subject to the following: "Professional shall maintain an inventory of all nonexpendable property. Nonexpendable property is defined as having a useful life of at least two years and an acquisition cost of \$5,000 or more. If the purchased equipment needs replacement and is sold or traded in, City shall receive a proper refund or credit at the conclusion of the Agreement, or if the Agreement is terminated, Professional may either keep the equipment and credit City in an amount equal to its fair market value, or sell such equipment at the best price obtainable at a public or private sale, in accordance with established City procedures; and credit City in an amount equal to the sales price. If Professional elects to keep the equipment, fair market value shall be determined at Professional's expense, on the basis of a competent independent appraisal of such equipment. Appraisals shall be obtained from an appraiser mutually agreeable to by City and Professional, if it is determined to sell the equipment, the terms and conditions of such sale must be approved in advance by City." 2 CFR, Part 200

requires a credit to Federal funds when participating equipment with a fair market value greater than \$5,000 is credited to the project.

11.8 Disputes.

11.8.1 Any dispute, other than audit, concerning a question of fact arising under this contract that is not disposed of by agreement shall be decided by a committee consisting of City's Contract Administrator, Mr. Edgar Medina, P.E., who may consider written or verbal information submitted by Professional.

11.8.2 Not later than 30 days after completion of all work under the contract, Professional may request review by City Council of unresolved claims or disputes, other than audit. The request for review will be submitted in writing.

11.8.3 Neither the pendency of a dispute, nor its consideration by the committee will excuse Professional from full and timely performance in accordance with the terms of this contract.

11.9 Cost Principles.

11.9.1 Professional agrees that the Contract Cost Principles and Procedures, 48 CFR, Federal Acquisition Regulations System, Chapter 1, Part 31.000 et seq., shall be used to determine the cost allowability of individual items.

11.9.2 Professional also agrees to comply with federal procedures in accordance with 2 CFR, Part 200, Uniform Administrative Requirements, Cost Principles, and Audit Requirements for Federal Awards.

11.9.3 Any costs for which payment has been made to Professional that are determined by subsequent audit to be unallowable under 2 CFR, Part 200 and 48 CFR, Federal Acquisition Regulations System, Chapter 1, Part 31.000 et seq., are subject to repayment by Professional to LOCAL AGENCY.

11.9.4 All subcontracts in excess of \$25,000 shall contain the above provisions.

11.10 Disadvantaged Business Enterprise Participation. - RESERVED

11.11 Covenant Against Contingent Fees. The Professional warrants that he/she has not employed or retained any company or person, other than a bona fide employee working for the Professional; to solicit or secure this Agreement; and that he/she has not paid or agreed to pay any company or person other than a bona fide employee, any fee, commission, percentage, brokerage fee, gift, or any other consideration, contingent upon or resulting from the award, or formation of this Agreement. For breach or violation of this warranty, the City shall have the right to annul this Agreement without liability, or at its discretion; to deduct from the contract price or consideration, or otherwise recover the full amount of such fee, commission, percentage, brokerage fee, gift, or contingent

Last Revised January 2022

fee.

11.12 Funding Requirements.

11.12.1 It is mutually understood between the parties that this Agreement may have been written before ascertaining the availability of funds or appropriation of funds, for the mutual benefit of both parties, in order to avoid program and fiscal delays that would occur if the Agreement were executed after that determination was made.

11.12.2 This Agreement is valid and enforceable only, if sufficient funds are made available to City for the purpose of this Agreement. In addition, this Agreement is subject to any additional restrictions, limitations, conditions, or any statute enacted by the Congress, State Legislature, or City Council that may affect the provisions, terms, or funding of this contract in any manner.

11.12.3 It is mutually agreed that if sufficient funds are not appropriated, this Agreement may be amended to reflect any reduction in funds.

11.12.4 City has the option to void the contract under the 30-day termination clause pursuant to Article VI, or by mutual agreement to amend the contract to reflect any reduction of funds.

11.13 Claims Filed by City's Construction Contractor.

11.13.1 If claims are filed by City's construction contractor relating to work performed by Professional's personnel, and additional information or assistance from Professional's personnel is required in order to evaluate or defend against such claims; Professional agrees to make its personnel available for consultation with City's construction contract administration and legal staff and for testimony, if necessary, at depositions and at trial or arbitration proceedings.

11.13.2 Professional's personnel that City considers essential to assist in defending against construction contractor claims will be made available on reasonable notice from City. Consultation or testimony will be reimbursed at the same rates, including travel costs that are being paid for Professional's personnel services under this Agreement.

11.13.3 Services of Professional's personnel in connection with City's construction contractor claims will be performed pursuant to a written Agreement amendment, if necessary, extending the termination date of this Agreement in order to resolve the construction claims.

IN WITNESS WHEREOF, the Parties have executed this Agreement as of the day and year first set forth above, which date shall be considered by the Parties to be the effective date of this Agreement.

SCOPE OF SERVICES

Refer to Attached Proposal

Scope of Work

TASK 1: EXISTING CONDITIONS

Purpose: To understand where we are going, we need to first take a look at where we are now. The Kittelson team will conduct a comprehensive data collection, inventory, and system assessment to understand destinations, trip patterns, and related equity, social, economic, or health issues that may be addressed through multimodal investments.

1.1 Project Development Team

We will work with the City to form a Project Development Team (PDT) and hold up to eight (8) PDT meetings. The PDT will include planning and engineering staff from the City, as well as representatives from key partner agencies (e.g., SacRT, Caltrans, SACOG) and any other agencies/organizations found relevant in the initial phases of the project (e.g., Bicycling Advocates for Rancho Cordova). The PDT will be tasked with helping guide the Plan's development and reviewing interim deliverables. Meetings will be scheduled to milestone deliverables or phases of the project (e.g., community engagement plan, draft existing conditions report, draft walking and biking networks, etc.). PDT meetings are assumed to be virtual and last up to 90 minutes each.

1.2 Literature Review and State of the Practice

Literature Review

Building on the understanding we built from the recent Roundabout Feasibility Study, Kittelson will review relevant city, regional, and state plans and studies with a focus on identifying relevant goals, policies, projects, and needs to inform the ATP. We will develop an initial list of plans to review, with the final list to be approved by City staff. A review of existing programs in the city, countywide efforts, and regional efforts by SACOG, such as Safe Routes to School, will also be conducted. The review will highlight synergies and any discrepancies between plans to be addressed in the project process. In addition to the aforementioned efforts, design standards will be reviewed to identify constraints and opportunities which may affect project development.

Kittelson recently completed the Rancho Cordova Roundabout Feasibility Study Report. We are familiar with the City of Rancho Cordova's data structure and available roadway data. We'll leverage this familiarity and coordinate with the General Plan Update team to streamline our existing conditions documentation to focus more effort on capturing changes and developing analyses to inform the ATP.

State of the Practice

We will develop a case study review of up to five Active Transportation Plans from regions in California. The Kittelson team may draw from our work developing and implementing similar ATPs in a variety of contexts, including the Cities of Dublin and Hayward, where we developed their local active transportation networks in a similar land use context, or the City of Redding, where we helped the City move forward with implementation including successful ATP Cycle 6 applications.

At City staff's discretion, we will also include a review of up to five (5) of similar locations outside of California via our national and international networks to ensure the City not only has the key lessons learned in California, but also nationwide or internationally.

We propose to conclude this effort with an educational workshop for City staff and partners to discuss best practices and lessons learned that may be integrated into the Plan.

1.3 Establish Existing Conditions

The Kittelson team will undertake an extensive data collection effort to understand current uses and trends for bicyclists and pedestrians in the city. Data collection will include, but not be limited to, pedestrian and bicyclist counts, travel routes, bike parking statistics, and collision data involving pedestrians and bicyclists.

Data Compilation. The team will work with City staff to compile, review, map, and analyze all available existing conditions data (see Table 1) to understand current and planned multimodal transportation conditions in Rancho Cordova.

City Staff Input/Feedback. A critical step in understanding where we are is hearing directly from you – what is working, what isn't, what challenges you are facing, changes in where growth is expected to occur, what projects are in the pipeline, etc.

Public Web Map. In conjunction with the first digital survey, Kittelson will develop a public-facing web map, or coordinate with the City to establish a similar tool using MetroQuest, where community members can identify issues, opportunities, and constraints. This could include mapping destinations, routes they take or want to take, near miss crashes, and other needs.

Verification & Field Reviews. The Kittelson team will conduct targeted field reviews and bike rides to verify data and observe conditions as needed. Client staff will be invited to join us for these reviews. The on-the-ground discussions help inform potential network routes and facility types and align the project team on goals and outcomes for the ATP.

Table 1. Data Compilation

Data Source
Traffic counts - City's open data for traffic counts - City's recently updated travel model for link volumes
Mode share American Community Survey
Existing and planned multimodal facilities City's existing ATP and recent update shared with Kittelson during Roundabout plan
Transit data Publicly available from SacRT
Roadway characteristic data Integrated into Roundabout Plan database
Injury/fatal crash data Publicly available from TIMS
Land use data and environmental data Integrated into Roundabout Plan database
Demographic data and equity indicators

• Integrated into Roundabout Plan database
Travel patterns using Replica data to see where short trips (<2 miles) are and where people are going. • Available for use with existing Kittelson Replica license

1.4 Data Collection

Our team has budgeted for up to 120 hours of staff time to collect additional bicycle and pedestrian facility data as needed. This may include aerial review of walking and biking facilities, traffic calming features, crosswalks, bicycle parking, intersection treatments, or other desired data as determined in coordination with City staff. This includes 40 hours to inventory bicycle parking (first through aerial imagery with in-person supplement). Additionally, we have included up to 20 bicycle/pedestrian counts in the budget estimate to supplement existing data from the City.

1.5 Goals and Objectives

Working with City staff and the PDT, goals and objectives for the project will be developed. These goals, objectives, and policies will reflect those identified in the various plans assessed, best practices, and integration with the General Plan Update. They will guide solution development and prioritization. These could include, but are not limited to: accessibility, comfort, access to opportunity and essential needs, all ages and abilities, and safety, among others.

To begin the process, Kittelson proposes to lead a collaborative brainstorming workshop with City staff and the PDT to begin idea generation and develop a shared vision and understanding. Elements which could be discussed include the desired direction or future vision for biking in Rancho Cordova, example goals and policies from other places, and aspirational cities or counties to research.

1.6 Document Existing Conditions

The data and information generated through these subtasks will be compiled into a graphic and easy-to-understand Draft Existing Conditions Report. Based on a consolidated set of comments, Kittelson will prepare the Final Existing Conditions Report. We will also develop presentation materials, infographics, and other elements, as needed, for presentation of the materials to the community, elected officials, and other stakeholders.

Task 1 Deliverables

- Draft and Final Existing Conditions Report
- GIS Inventory of Existing Active Transportation Facilities and Supportive Infrastructure
- PDT Meetings, Agendas, and Notes (8)

TASK 2: COMMUNITY ENGAGEMENT

Purpose: We understand community and stakeholder engagement is critical in developing a successful Plan, and that engagement comes in different forms. For this ATP to efficiently guide future implementation actions and funding decisions, we must build relationships with partners and develop trust and understanding with the many communities of Rancho Cordova.

We envision a community engagement process organized into the following phases:

- **Listen First and Understand** will focus on obtaining perspectives and opinions from the public and stakeholders regarding current transportation systems, where and how people travel in each community area of Rancho Cordova today, the places they want to go, and their vision for travel in the future.
- **What Can Be Done?** will facilitate discussion on the range of options and ways the Plan can complete the Active Transportation Network. This phase will also include discussion regarding potential facility types and/or traffic calming tools to understand what people are interested in or want to know more about in each neighborhood.
- **Presenting the Plan** will focus on presenting the Plan, educating community members on its features, and drawing connections between the comments received and the final network and solutions.

2.1 Outreach Management and Listening and Engagement Plan

The Kittelson team will develop a listening and engagement plan to reach all residents, especially the hard-to-reach and underserved members of the community in all areas of the city.

2.2 Community Awareness and Education Program

Early community education and awareness are essential for developing a successful citywide ATP because community members may not understand and/or appreciate the value of creating safer environments for active transportation. They also need to learn and understand how planners develop an active transportation network to build stronger connections for key destinations and improve the traveling experience for those who choose to walk, bike, or take transit, or have limited mobility options. At the start of the project, the Kittelson team will develop and implement a community awareness and education program to create a shared understanding of the Plan, the elements, and the potential community benefits.

Community education and awareness should be based on the “why and how.” Why is the City’s Active Transportation Plan important? Why is it important to proactively engage with vulnerable communities who may have been historically left out of this conversation? How will planners evaluate and develop a citywide Active Transportation Plan and what benefits will the community get from the Plan?

The community education and awareness program will leverage the City’s existing communication links as well as those of community-based organizations (CBOs) and local media to help explain and promote the plan and the planning process.

2.3 Community Education and Awareness Materials

The Kittelson team, in coordination with the City communications department and project team, will develop communication materials which may include hand-outs (e.g., informational brochures, comment cards, and fact sheets). All printed materials will have an electronic version that can be distributed through social media and placed on the project webpage.

Communication Collateral and Translations

AIM will develop outreach materials to assist with notification, including flyers, poster boards, maps, social media graphics, and/or promotional project introduction videos (one (1) video up to 60 seconds with the script provided by City staff). All promotional materials will be translated into Spanish (with Russian and Tagalog) where requested.

Project Webpage

AIM will develop content for the project website for the City's website. Content will include updated project information and timeline/schedule, community outreach summaries photos, and/or project maps.

Social Media Content

AIM will develop social media content for the City's social media platforms to build community awareness about the Plan and share key milestones throughout the process. Social media updates include photos or animated short clips to maintain an interesting and informative social media presence.

Direct Mailer Notification

AIM will prepare and mail project information flyers to properties and tenants at least two times during the ATP development, to update the constituents of the project. (The City will be responsible for identifying mailers as well as covering ODC at the rate for identified areas.)

Stakeholder Identification and Database Development

AIM will develop and maintain a stakeholder database throughout the Plan. This database will include stakeholder name, contact information as well as the preferred method of contact and potential key concerns and/or areas of study interest. Key stakeholders may include but are not limited to, the following: CBOs, cultural and faith-based groups, housing organizations, business improvement districts, advocacy groups, and schools.

2.4 Key Stakeholder/CBO Outreach Interviews

AIM will coordinate and facilitate up to six key stakeholder/CBO focus group/1x1 meetings. Our team of professional facilitators will work with the project team and City staff to develop on-point and easy-to-understand meeting agendas and presentation content.

The meetings will be facilitated to discuss project goals, constraints and opportunities, evaluation criteria, project prioritization, and other important elements. The purpose of key stakeholder meetings and/or 1x1 conversations is to provide opportunities to engage stakeholders in project planning and identify needs.

2.5 Online Survey

AIM will develop and promote up to two online surveys to better understand the active transportation needs of Rancho Cordova residents. The first survey will consist of a map-based questionnaire that allows participants to identify locations where they would like to bike/walk or have biking/walking concerns. The second survey will ask participants to weigh in on specific projects.

AIM will run the surveys for up to three weeks at a time and will promote the survey through Rancho Cordova communication channels, such as newsletters or social media, and stakeholder and CBO communication channels.

2.6 Community Touchpoints/Events

AIM will partner with the City or trusted CBOs to hold two community touchpoints. Touchpoints may take the form of traditional meetings/workshops, community walking audits, community listening sessions, or community organization meetings, as recommended by people participating in community engagement conversations during the PDT meeting on the community engagement plan.

Regardless of the form, AIM will coordinate with trusted interpreters to provide live interpretation and translated materials in culturally relevant languages. The Phase 1 touchpoint will center on providing input into the Plan's goals and vision and inform the Existing Conditions Report. The Phase 2 touchpoint will center on ground-truthing themes that emerged from Phase 1 engagement activities and gathering feedback on Draft Plan elements.

AIM, in coordination with the City, will determine the meeting venues, schedule them, and make all meeting arrangements, including drafting meeting notices for distribution to known stakeholders. AIM will prepare agendas, sign-in sheets, comment sheets, signage, and other print materials; facilitate meeting proceedings; assist with exhibits and a PowerPoint presentation (as applicable); provide refreshments, record public comments and assist with appropriate responses; and prepare detailed meeting reports.

2.7 Pop-Up Workshops

Pop-up workshops are effective to meet the community where they are. Each pop-up workshop will take place at a community destination, local event, or high pedestrian key shopping center.

AIM recommends three rounds of two pop-up events, one in the phase of development of the ATP. The events ideally will be held in different neighborhood communities with the guidance of local CBOs to ensure the events are attended and representative. AIM will plan, provide all supplies, and coordinate all logistics for the three sets of pop-up workshops. AIM will develop engagement activities, board displays, interactive community engagement activities, informational fact sheets and brochures, and comment cards.

2.8 Leadership and City Council Updates

The team will work with City staff to provide regular updates and communication to City leadership, City Council liaisons, and City committee meetings. We will hold up to three (3) study sessions with City leadership to update them on the project and gather input on the Plan's progress at key stages. We will also provide up to two (2) updates to City Council via study sessions or a presentation on the ATP and progress in addition to the adoption meetings associated with the Final ATP in Task 4.

Task 2 Deliverables

- Listening and Engagement Plan
- Community Education and Awareness Activities and Materials
- Project Webpage Content

- Key Stakeholder/CBO Outreach Interviews (up to 6)
- Online Surveys (2)
- Community Touchpoints/Events (2)
- Pop-Up Workshops (up to 6)
- Leadership Update Meetings (3)
- City Council Update Meetings (2)
- Community Engagement Summaries

TASK 3: PLAN DEVELOPMENT AND ANALYSIS

Purpose: This task will form the backbone of the ATP, providing the technical analysis to support the community engagement in determine appropriate walking and biking networks citywide. The task will also help lay the groundwork for implementation with a toolbox of solutions tailored to the city, appropriate cost estimates, and policy and programmatic recommendations.

3.1 Demand and Level of Traffic Stress Analyses

In order to develop a complete network that meets the needs of the Rancho Cordova community, it is critical to understand where people want to go and how comfortable they are getting there. We will conduct a demand analysis to identify desire lines, networks, and gaps and a Level of Traffic Stress (LTS) analysis to assess the availability of appropriate routes.

Active Transportation Demand: We will employ various metrics to understand where people are currently traveling by foot or bike, where short trips are being taken that may easily be converted to active modes, or where demographic and transportation characteristics suggest a propensity for more active transportation use. Potential data sources include American Community Survey demographic and travel mode data, Replica origin/destination and modal data (Figure 3 on the previous page), Strava, and data collected as part of Task 2.

Walking and Biking Level of Traffic Stress: We will calculate LTS, a measurement of the comfort felt by an individual when walking or biking on any street, for all streets to determine low-stress connections and where improving existing facilities could connect existing low-stress “islands.” We know the City recently updated its travel demand model and has a wealth of traffic volume data available on its online GIS Data Hub. We will work with that volume data and City-provided posted speed limit and existing bikeway data. .

Collision Analysis: We will develop a collision analysis of bicycle- and pedestrian-related crashes collected in Task 1. The analysis will allow comparison with the locations and trends identified in the City’s Local Roadway Safety Plan. We will use the analysis to highlight key focus areas for improving pedestrian and bicyclist safety based on systemic crash risk factors using roadway characteristic and land use data.

Matt Braughton and Mike Alston have been working with regional and local jurisdiction partners to develop walking and biking HINs and priority projects as part of the C/CAG Countywide LRSP for San Mateo County. A key component of this effort has been the identification of facility types and characteristics associated with increased crash risk for people walking and biking.

Equity (& Health) Analysis: We will overlay socioeconomic, equity, and health information with data evaluated in above tasks to identify locations currently underserved or only served with low-quality multimodal connections. We can leverage the same data sources we used in the City’s Roundabout Plan—USDOT Areas of Persistent Poverty and Historically Disadvantaged Communities, CalEnviroScreen 4.0, Healthy Places Index 3.0, and SACOG Disadvantaged Communities.

Community Comments Analysis: All comments received from the web map, surveys, community meetings, and touchpoints up to this point will be analyzed and mapped to identify where gaps and community interest overlap. As noted in the Collision Analysis task, comments will also be considered for actual and perceived safety issues.

Key Destinations Analysis: We will map the destinations identified through engagement as well as those uncovered in the data inventory and then work to understand access. We will identify destination and land use information and verify with the City. We will develop “walksheds” defining where people can walk within defined amounts of time from transit stations/centers, schools, employment centers, shopping and dining, educational facilities, and other destinations and compared to available infrastructure.

Functional Street Analysis: We will look at transit routes, freight routes, and functional classification data to understand where there may be conflicting priorities on streets which impact active transportation. If available, this analysis may also utilize the City’s Travel Demand Model or Replica data to identify streets with excess capacity which may be most eligible for repurposing for active travel.

3.2 Identification of Major Gaps

At this point, the project team will have a full understanding of potential desire lines for active travel. The Kittelson team will conduct the following tasks to identify gaps:

Network Identification

Based on efforts conducted in previous tasks, our team will recommend a complete and connected active transportation network that enables people of all ages and abilities to safely and conveniently get where they want to go. The network will be made up of a layering system that includes local routes, off-street integration, and regional connections.

We will leverage the analyses described in Task 3.1 as well as community feedback to identify the ATP network.

Gap Identification

The results from the data collection efforts and analyses for connectivity, LTS, safety, equity, comments, and others will be overlaid to identify gaps to be addressed. We will use the gaps to identify projects in later phases to help link people to the places that matter most to them. Gaps may include:

- Safety
- Small Gaps in the system
- Existing Facility Improvements

- Intersection Improvements
- Trail Connections

We will also consider programming and access opportunities in recognition that often the communities that need access to active transportation facilities most are also the ones who face the largest barriers. Programmatic opportunities to address these issues can help to uplift communities and build support.

3.3 Recommended Walking and Biking Network

Building off of previous tasks, we will identify walking and biking projects to bridge network gaps and better connect people who live, work, and travel in Rancho Cordova to the places they want to go and people they want to see. Together, they will expand accessibility and improve access for all. This effort will include the following tasks:

Recommend Bicycle Projects

Projects will be developed to close the gaps identified the gap analysis. The projects will identify the appropriate facility type considering the potential users. Additionally, existing routes will be evaluated for facility upgrades to ensure continuity of user experience within the network. All projects will be identified with an eye towards seamless connectivity for users. Projects with potential to be implemented via quick build or low cost strategies will be noted.

Where appropriate, additional design considerations will be identified and incorporated into project descriptions for electric bikes or other new mobility technologies, such as wider facilities or further separation between users.

Recommended Pedestrian Projects

We will identify pedestrian projects, giving special attention to first- and last-mile connections to destinations and transit to facilitate the highest level of multimodal usage. Additionally, special care will be taken to consider accessibility for people with disabilities where the appropriate data is available, and all projects identified will include guidance to ensure they meet the needs of all users.

3.4 Typology and Toolbox

We will develop a toolbox with recommended facility typologies. Those typologies will align to the existing and proposed conditions across the city, so that the recommended typologies can be deployed to cover the full range of scenarios that exist citywide. We will leverage our nationwide experience with developing design guidance and applying performance-based principles to include recommended dimensions and a range of material options. This typology toolbox will include bicycle and pedestrian facilities of the type that will be included as recommendations for the city's walking and biking network.

The typology toolbox will note where certain facilities present maintenance challenges (e.g., sweeping challenges for separated bike lanes) or confer advantages (e.g., quick-build material options that avoid ongoing maintenance costs and challenges).

3.5 Cost Estimates

Using the typologies, available cost estimating databases, input from the City, and recent design experience across California, we will prepare cost estimates for the identified and recommended typologies. We will provide variable cost ranges for the deployment of different materials across each typology (e.g., a concrete curb extension versus one constructed from quick-build materials).

3.6 Policy and Program Recommendations

In addition to the network and infrastructure recommendations we will identify in the Plan, we also will use the data and information gleaned in Task 1 to recommend policy and program recommendations to help build an active transportation culture among City departments and the traveling public. These recommendations may include, for example, incorporating an active transportation checklist into development review. Example recommendations also include partnering with, for example, the Folsom Cordova Unified School District, Civic Thread, and Sacramento Area Bicycle Advocates to provide educational opportunities or distribute bike helmets and lights.

3.7 Prioritization and Implementation Plan

Kittelton will work with the City to identify a prioritization methodology for ranking projects. The primary goal of the prioritization process is to identify those projects that have the greatest benefit for improving bicycle and pedestrian mobility, safety, and operations. The secondary goal will be consideration of feasibility factors like cost and right of way. The prioritization methodology may include both quantitative and qualitative criteria, such as:

- Crash History
- Community Feedback
- Environment / VMT Reduction
- Demand
- Connectivity
- Social Equity
- Project Cost
- Grant Funding Eligibility

Other factors which should be considered are those projects which can be completed based on the repaving project schedule as well as those which might be developer-funded via proposed or likely developments.

Our approach in developing a prioritization methodology will be to keep it simple, transparent, and flexible to allow stakeholders and members of the public to understand and participate in the process.

Task 3 Deliverables

- Analysis Results and Maps (LTS, collision, equity and health, community comments, key destinations, functional street resiliency)
- Walking and Bicycling Networks with Facility Types
- Preferred Typologies/Guidelines Toolbox

- High-level Cost Estimates for Walking and Bicycling Improvements
- Ongoing Maintenance Cost Plan
- Policy and Program Recommendations
- Implementation Strategy

TASK 4: DRAFT AND FINAL PLAN

Purpose: Each of the previous three tasks will lead to the development of the ATP. The Rancho Cordova ATP will be an easy-to-read and graphical documentation of the vision for active transportation in the city and will pave the path to implementation.

The Administrative Draft Plan will include the Existing Conditions Report, Listening & Engagement Plan, Engagement Summaries, preferred pedestrian infrastructure types, bikeway selection guidelines, Pedestrian and Bicycle Networks, planning-level cost estimates, and an Implementation Strategy. The Administrative Draft Plan will be reviewed by City staff and the PDT. The project team will incorporate comments. A Public Draft Plan will be shared on the project website for a month-long public review period. A list and summary of comments received on the Public Draft Plan will be created. The Final Plan will include further edits based on staff, stakeholder, and community input. The final set of documents will be presented to City Council for final approval. This should be done no later than March 2026.

4.1 Draft and Final ATP

The Kittelson team will prepare a visually engaging Draft ATP using the results of previous tasks and best practices. Our team includes extremely talented in-house graphic designers who are experienced in producing highly graphical, technically accurate, and easy-to-understand plan documents and guidance. We will incorporate needed changes from each round of review by City staff and the PDT (Administrative Draft, Public Draft, and Presentations) into the final document for approval. The Public Draft Plan will be shared to the City to post for a month-long review period. Kittelson will provide a comment summary and integrate final feedback into the Final ATP for City Council adoption.

4.2 Present Draft ATP to City Council

After the submittal of the Draft ATP, Kittelson will prepare materials for and, as desired, present on the project recommendations and Draft ATP to the City Council for review and comment. We will summarize comments and incorporate into the preparation of the Final ATP.

4.3 Final Adoption

The Kittelson team will be with you the entire way to approval. We will work with you to develop visually engaging presentation materials for the Final Rancho Cordova ATP and, as desired, present or support the presentation on the final report to the City Council for adoption.

Task 4 Deliverables

- Administrative Draft Rancho Cordova ATP
- Public Draft ATP
- Staff reports and presentation materials
- Final ATP approved by City Council

- City Council Resolution

EXHIBIT B

MEMORANDUM

ITEM 13.6.

DATE: June 3, 2024
TO: Honorable Mayor and Council Members
FROM: Stefan Heisler, Housing Manager
SUBJECT: **ADOPTION OF A RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE A SETTLEMENT AGREEMENT WITH 350 SACRAMENTO AND OSCAR BALAGUER REGARDING SACRAMENTO SUPERIOR COURT CASE NO. 23WM000101**

RECOMMENDATION

Adopt the Resolution.

RESULT OF RECOMMENDED ACTION

Adoption of the Resolution would authorize the City Manager to execute a Settlement Agreement with Petitioners 350 Sacramento and Oscar Balaguer to fully resolve the pending matter: *350 Sacramento, et al. v. City of Rancho Cordova, et al.*, Sacramento County Superior Court Case No. 23WM000101, filed October 19, 2023 (the Lawsuit).

BACKGROUND

The City Council adopted a California Environmental Quality Act (CEQA) Initial Study/Negative Declaration (IS/ND) and Climate Action and Adaptation Plan (CAAP) on September 18, 2023, by Resolutions No. 137-2023 and No. 138-2023, respectively. The CAAP was adopted as a “qualified climate action plan,” meeting the requirements of CEQA Guidelines Section 15183.5(b) Plans for the Reduction of Greenhouse Gas Emissions. The City filed a CEQA Notice of Determination with the County Recorder on September 20, 2023.

On October 19, 2023, the nonprofit 350 Sacramento and Oscar Balaguer (Petitioners) filed the Lawsuit challenging the approvals under CEQA, that the City’s CAAP and IS/ND violate or otherwise do not fully comply with CEQA. The City and Petitioners have agreed to a Settlement Agreement to resolve the Lawsuit. Pursuant to the Settlement Agreement ([Attachment 2](#)), the City will rescind the CAAP as a CEQA “qualified climate action plan” and the associated IS/ND, and pay the Petitioners \$75,000 as fees and costs incurred in the Lawsuit.

The City may in the future reconsider the CAAP for re-adoption as a CEQA “qualified climate action plan” but will subject the future CAAP to additional environmental review in accordance with CEQA requirements. Following rescission of the CAAP, the City may also consider readopting the CAAP as a merely advisory plan that does not meet the requirements of CEQA Guidelines Section 15183.5(b) and would not provide CEQA streamlining benefits to future development projects.

NEXT STEPS

Adoption of the Resolution would allow the City Manager to execute the Settlement Agreement (Attachment 2). Immediately after, and consistent with the Settlement Agreement, the City Council would consider a Resolution to rescind the CAAP and associated CEQA IS/ND that were adopted on September 18, 2023.

Following execution of the Settlement Agreement, and within five (5) business days of receiving notice of the City's rescission action, Petitioners would dismiss the Lawsuit with prejudice.

FISCAL IMPACT AND FUNDING SOURCE

Adoption of the Resolution will incur a one-time impact to the City's General Fund of \$75,000.

CITY OF RANCHO CORDOVA

RESOLUTION NO. XX-2024

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA, STATE OF CALIFORNIA, AUTHORIZING THE CITY MANAGER TO EXECUTE A SETTLEMENT AGREEMENT WITH 350 SACRAMENTO AND OSCAR BALAGUER REGARDING SACRAMENTO SUPERIOR COURT CASE NO. 23WM000101

WHEREAS, the City of Rancho Cordova (City) launched the Climate Action and Adaptation Plan (CAAP) to establish a greenhouse gas reduction goal, create a set of strategies to meet the goal, and adapt to the impacts of climate change; and

WHEREAS, the CAAP establishes a framework of implementable, measurable prioritized actions and identifies a trajectory to align with statewide GHG reduction targets for 2030 and 2045, bring the City into compliance with California legislation to reduce GHG emissions, and address climate risk; and

WHEREAS, an Initial Study/Negative Declaration (IS/ND) (SCH#2023060063) was prepared for the CAAP and circulated for public review in accordance with CEQA requirements and on September 18, 2023, the IS/ND was adopted by the City Council by Resolution No.137-2023; and

WHEREAS, the City Council adopted the CAAP on September 18, 2023, as a “qualified climate action plan,” meeting the requirements of CEQA Guidelines Section 15183.5(b) Plans for the Reduction of Greenhouse Gas Emissions by Resolution No. 138-2023; and

WHEREAS, the City filed a CEQA Notice of Determination with the County Recorder on September 20, 2023; and

WHEREAS, on October 19, 2023, the nonprofit 350 Sacramento and Oscar Balaguer (Petitioners) filed a lawsuit, *350 Sacramento, et al. v. City of Rancho Cordova, et al.*, Sacramento County Superior Court Case No. 23WM000101 (the Lawsuit), challenging the approvals under CEQA, that the City’s CAAP and IS/ND violate or otherwise do not fully comply with CEQA; and

WHEREAS, the City and Petitioners have agreed to a Settlement Agreement to resolve the Lawsuit, whereby the City will rescind the CAAP as a CEQA “qualified climate action plan” and the associated IS/ND, and pay the Petitioners a sum of \$75,000 as fees and costs incurred in the Lawsuit; and

WHEREAS, the City Council desires to execute the Settlement Agreement and fully resolve the Lawsuit.

NOW, THEREFORE, BE IT HEREBY RESOLVED THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA does hereby authorize the City Manager, or his designee, to execute the Settlement Agreement, in a form approved by the City Attorney, and take other such actions as necessary to implement the Settlement Agreement and resolve the Lawsuit.

PASSED AND ADOPTED by the City Council of the City of Rancho Cordova on the 3rd

Confidential Settlement Communication

SETTLEMENT AGREEMENT

This Settlement Agreement (“Agreement”) is made and entered into as of the last date of execution of the Agreement (“Effective Date”) by and between Petitioners 350 Sacramento and Oscar Balaguer (“Petitioners”) and Respondents City of Rancho Cordova and City Council for the City of Rancho Cordova (“Respondent” or “City”). Petitioners and the City are hereinafter referred to collectively as “the Parties” and sometimes referred to individually as a “Party.”

This Agreement memorializes the understanding of the Parties and is entered into by the Parties to fully resolve the following pending matter: *350 Sacramento, et al. v. City of Rancho Cordova, et al.* (Sacramento County Superior Court Case No. 23WM000101) (filed October 19, 2023) (the “Lawsuit”).

RECITALS

A. Certain disputes and controversies have arisen between Petitioners and Respondent concerning the City’s 2023 Climate Action and Adaptation Plan (“CAAP”) and the Initial Study / Negative Declaration (“IS/ND”) for the CAAP. These disputes have resulted in the Lawsuit. The Parties’ disputes are also anticipated to result in additional litigation with respect to future development projects resulting in significant delay in development unless a global settlement is reached. The Parties enter into this Agreement to avoid the delay and risks of costly litigation without conceding any liability or wrongdoing.

B. The City prepared its Climate Action and Adaptation Plan (“CAAP”) and an Initial Study / Negative Declaration (“IS/ND”) for the CAAP, pursuant to the California Environmental Quality Act (Public Resources Code § 21000 *et seq.*) (“CEQA”). On September 18, 2023, the City Council approved the CAAP and IS/ND by adopting Resolutions 137-2023 and 138-2023, respectively (the “Approvals”).

C. Petitioners participated in the administrative process leading to the Approvals. On September 20, 2023, the City filed a CEQA Notice of Determination with the County Recorder and with the State Clearinghouse in the Governor’s Office of Planning and Research.

D. On October 19, 2023, Petitioners filed the Lawsuit, which consists of a Petition for Writ of Mandate and Complaint for Declaratory and Injunctive Relief (“Petition”) challenging the Approvals under CEQA.

Confidential Settlement Communication

E. The Parties have engaged in productive, good faith settlement discussions and now wish to finally resolve the Lawsuit, without further proceedings, through entry of a stipulated judgment according to the terms described herein.

F. It is the intention of the Parties to fully and completely settle and resolve all the claims, demands, prayers, and causes of action at issue in the Lawsuit. These expressly include all claims, current and future, that the City's 2023 CAAP and IS/ND violate or otherwise do not fully comply with CEQA, as well as all of Petitioners' causes of actions in the Lawsuit and any claims for costs and attorneys' fees and all claims, demands, prayers, or causes of action arising out of the CAAP and IS/ND.

NOW THEREFORE, for good cause and valuable consideration, the receipt and sufficiency of which is hereby acknowledged, the Parties agree to the recitals above and to the following terms:

AGREEMENT

1 Recitals and Definitions Incorporated. Each recital and definition set forth above is incorporated herein by reference and is made part of this Agreement.

2. ACTIONS BY THE CITY:

a. Within forty (40) business days of the Effective Date, the City Council will consider rescinding (1) approval of the CAAP as a "qualified CAP" under CEQA sufficient for streamlined environmental review and (2) adoption of the associated IS/ND. If the City Council votes to rescind approval of the CAAP and adoption of the IS/ND, the City shall promptly provide Petitioners with notice of its rescission action.

b. If a "qualified CAP" is reconsidered for adoption, it will be subjected to environmental review in accordance with CEQA requirements.

c. Within fourteen (14) business days of receiving notice of the Request for Dismissal described below, the City shall promptly pay Petitioners a total and final sum of Seventy Five Thousand Dollars (\$75,000) ("Payment") as reimbursement for fees and costs incurred in the Lawsuit. Payment shall be made to "Coast Law Group Client Trust Account" and sent to Coast Law Group LLP, 1140 South Coast Highway 101, Encinitas, CA 92024, attention Livia B. Beaudin.

3. ACTIONS BY PETITIONERS: Petitioners agree to the following:

a. Dismissal of Lawsuit. Within five (5) business days of receiving notice of the City's rescission action described in Section 2.a., above, Petitioners shall dismiss the Lawsuit with prejudice. Petitioners shall promptly provide Respondents with notice of the Request for Dismissal.

b. Release of Liability. Upon satisfaction of the conditions described in Section 2, above, Petitioners shall immediately release, remise, and forever discharge the City from all claims and liability for any damages, losses, costs or attorneys' fees pertaining to the Lawsuit or which form the basis for the Lawsuit. Petitioners' release of Respondents includes Respondents' agents, employees, representatives, officers, directors, divisions, subsidiaries, affiliates, assigns, successors in interest, shareholders, attorneys, insurers, and adjusters. Petitioners' release of liability includes Petitioners' claims under CEQA, and all claims, demands, or causes of action arising out of the Lawsuit including any and all of Petitioners' costs or attorneys' fees.

c. Reservation of Rights. Petitioners reserve the right to participate in the administrative process for any future CAP the City may propose.

4. NO ADMISSION OF LIABILITY: This Agreement affects the settlement of claims that are denied and contested, and nothing contained in this Agreement should be construed as an admission by any Party to this Agreement of any liability of any kind to any other Party. The City specifically denies any liability connected with the claims alleged in the Lawsuit.

5. REPRESENTATIONS AND WARRANTIES: Each of the Parties to this Agreement represents, warrants to, and agrees with, each other Party to this Agreement as follows:

a. The descriptive headings and titles used in this Agreement are for convenience only and shall not affect the meaning of any provision of this Agreement.

b. Each Party to this Agreement has received independent legal advice from its attorneys with respect to the advisability of making the settlement provided for herein, and with respect to the advisability of executing this Agreement.

c. This Agreement contains all of the representations and the entire understanding and Agreement among the Parties with respect to the matters described in the Agreement. Correspondence, memoranda, and oral and written Agreements that originated before the date of this Agreement are replaced in total by this Agreement unless otherwise expressly stated in this Agreement.

d. This Agreement may be modified or amended only by written agreement executed by all of the Parties.

Confidential Settlement Communication

e. Nothing in this Agreement, express or implied, is intended to confer upon any person, other than the Parties, any rights or benefits under or by reason of this Agreement. There are no third-party beneficiaries of this Agreement.

f. In any litigation between the Parties regarding this Agreement, the prevailing party shall be entitled to recover, in addition to such other relief as may be granted, its reasonable costs and expenses, including reasonable attorneys' fees and court costs.

g. This Agreement may be executed in multiple counterparts, each of which shall be deemed an original and all of which together shall constitute one Agreement. One or more signatures on this Agreement may be executed and delivered by facsimile or by PDF or JPEG attachment to an email, and each such signature shall constitute an original and valid signature.

h. If any term, provision, covenant, or condition of this Agreement is held by a court of competent jurisdiction to be invalid, void, or unenforceable, the Parties shall amend this Agreement and/or take other action necessary to achieve the intent of this Agreement in a manner consistent with the ruling of the court.

i. The individuals signing this Agreement on behalf of each Party represent and warrant that they have full authority and are duly authorized to do so on behalf of the Party they represent.

j. The Parties shall cooperate to ensure that the steps necessary to implement this Agreement are carried out. The Parties to this Agreement agree to execute any further documentation that may be required to carry out the purpose of this Agreement and perform all acts necessary to effectuate the provisions of this Agreement. If any dispute related to the terms of this agreement arises between or among the Parties, the Parties will first meet and discuss the dispute in good faith in an attempt to resolve it prior to sending a Notice of Default.

6. Waivers:

a. The City agrees to waive any affirmative defenses based on Petitioners' Dismissal of the Lawsuit in any future lawsuit(s) filed by the Petitioners challenging the City's possible future approval of a "qualified" CAAP under CEQA.

b. Waiver of Lawsuit Fees, Costs, and Expenses. the City waives any claim against Petitioners for any costs, expenses, or attorneys' fees associated with the Lawsuit, including but not limited to costs related to preparation of the administrative record.

7. Dispute Resolution

- a. Notice of Default. Failure or unreasonable delay in the performance of any material provision herein shall constitute a default under this Agreement. In the event of a default, the Party alleging such default shall give the defaulting Party not less thirty (30) days' written notice of default ("Notice of Default"). The Notice of Default shall specify the nature of the alleged default and a reasonable manner and period of time in which said default may be satisfactorily cured. A Notice of Default shall be given in the manner set forth in Section 9, herein.
- b. Cure Period. Within thirty (30) days of the date a Notice of Default is given, the defaulting party shall provide evidence establishing it was never, in fact, in default or shall cure the default; provided, however, that if the nature of the alleged default is such that it cannot be reasonably cured within such 30-day period, the commencement of the cure within such time period and the diligent prosecution to completion of the cure shall be deemed a cure within such period. During any period of curing, the Party charged shall not be considered in default for purposes of enforcement of this Agreement. If the default is cured, then no default shall exist or be deemed to have existed and the noticing Party shall take no further action. After proper notice and the expiration of such cure period without cure, enforcement may be undertaken as set forth in this Agreement.

8. Enforcement. This Agreement is binding and may be enforced as a contract with all applicable remedies at law or equity. Any Party may avail themselves of the remedies provided herein or otherwise available at law or equity.

9. Notices. All notices, requests, demands, and other communications required or permitted under this Agreement shall be given in writing by regular mail, overnight courier, or facsimile to:

MEMORANDUM

ITEM 13.7.

DATE: June 3, 2024
TO: Honorable Mayor and Council Members
FROM: Stefan Heisler, Housing Manager
SUBJECT: **A RESOLUTION RESCINDING THE RANCHO CORDOVA CLIMATE ACTION AND ADAPTATION PLAN AND CALIFORNIA ENVIRONMENTAL QUALITY ACT INITIAL STUDY/NEGATIVE DECLARATION, AND READOPTING THE RANCHO CORDOVA CLIMATE ACTION AND ADAPTATION PLAN AS AN ADVISORY PLAN THAT DOES NOT MEET CEQA GUIDELINES SECTION 15183.5(B)**

RECOMMENDATION

Adopt the Resolution.

RESULT OF RECOMMENDED ACTION

Consistent with the approved Settlement Agreement with 350 Sacramento and Oscar Balaguer regarding Sacramento Superior Court Case No. 23WM000101, adoption of the Resolution would rescind the Rancho Cordova Climate Action and Adaptation Plan (CAAP) and California Environmental Quality Act (CEQA) Initial Study/Negative Declaration (IS/ND) adopted on September 18, 2023. Adoption of the Resolution would also readopt the CAAP as an advisory plan that does not meet the requirements of CEQA Guidelines Section 15183.5(b) Plans for the Reduction of Greenhouse Gas Emissions.

BACKGROUND

The City Council adopted the CAAP and CEQA IS/ND on September 18, 2023, as a “qualified climate action plan,” meeting the requirements of CEQA Guidelines Section 15183.5(b) Plans for the Reduction of Greenhouse Gas Emissions by Resolutions No. 137-2023 and No. 138-2023. The City filed a CEQA Notice of Determination with the County Recorder on September 20, 2023.

On October 19, 2023, the nonprofit 350 Sacramento and Oscar Balaguer (Petitioners) filed a lawsuit challenging the approvals under CEQA, that the City’s CAAP and IS/ND violate or otherwise do not fully comply with CEQA. The City and Petitioners have agreed to a Settlement Agreement to resolve the lawsuit. Pursuant to the Settlement Agreement, the City will rescind the CAAP as a CEQA “qualified climate action plan” and the associated IS/ND.

Adoption of the Resolution would readopt the CAAP as a non-CEQA “qualified climate action plan” that would not provide the CEQA streamlining benefits for future development projects of

a plan meeting the requirements of CEQA Guidelines Section 15183.5(b). Minor edits and updates have been made to the CAAP document to make it explicitly clear that this readopted plan does not meet the requirements of CEQA Guidelines Section 15183.5(b). Specifically, edits were made to Table of Contents page v, and pages ES-10, 5-1, 5-4, 5-5, and 5-6.

The City may in the future reconsider the CAAP for re-adoption as a CEQA “qualified climate action plan” but will subject the future CAAP to additional environmental review in accordance with CEQA requirements.

CAAP IMPLEMENTATION

Following re-adoption of the CAAP, staff will begin implementation of CAAP measures. However, as a non-CEQA “qualified climate action plan” there is no requirement to implement the CAAP. Staff will return to the City Council on an annual or biannual basis to determine implementation priorities along with any General Fund impacts. It is suggested that the City prepare a monitoring report every two years and update the Greenhouse Gas (GHG) Emissions Inventory and the CAAP every five years.

ENVIRONMENTAL REVIEW

As a non-CEQA “qualified climate action plan” that does not meet the requirements of CEQA Guidelines Section 15183.5(b), the readopted CAAP is exempt from California Environmental Quality Act (CEQA) pursuant to CEQA Guidelines Section 15262 (Feasibility and Planning Studies). The planning activities under this project identify strategies and measures the City can take to reduce greenhouse gas emissions to levels that align with the State of California’s goals and identify strategies to adapt and promote resilience to the impacts of climate change. Actions to be taken under these strategies and measures have not yet been approved, adopted, or funded. The readopted CAAP is a planning document that involves no ground or resource disturbance itself. This project is Statutorily Exempt under CEQA Guidelines, Section 15262 Feasibility and Planning Studies as the project only involves identifying strategies and measures for possible future actions which the City of Rancho Cordova has not approved, adopted, or funded. The readopted CAAP creates no legally binding effect on later activities. These strategies and measures, if implemented, would have a positive impact on air quality and reduce greenhouse gas emissions. Individual implementation actions will be subject to the appropriate level of additional environmental analysis.

FISCAL IMPACT AND FUNDING SOURCE

There is no additional fiscal impact with the requested action. The readopted CAAP is a planning document identifying prioritized actions for further development and implementation. Prioritized CAAP actions that require approval by the City Council will be brought back to the City Council for review and approval, including allocating funds, approving ordinances, or other actions.

CITY OF RANCHO CORDOVA

RESOLUTION NO. XX-2024

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA, STATE OF CALIFORNIA, RESCINDING THE RANCHO CORDOVA CLIMATE ACTION AND ADAPTATION PLAN AND CALIFORNIA ENVIRONMENTAL QUALITY ACT (CEQA) INITIAL STUDY/NEGATIVE DECLARATION, AND READOPTING THE RANCHO CORDOVA CLIMATE ACTION AND ADAPTATION PLAN AS AN ADVISORY PLAN THAT DOES NOT MEET CEQA GUIDELINES SECTION 15183.5(B)

WHEREAS, the City of Rancho Cordova (City) launched the Climate Action and Adaptation Plan (CAAP) to establish a greenhouse gas reduction goal, create a set of strategies to meet the goal, and adapt to the impacts of climate change; and

WHEREAS, the CAAP establishes a framework of implementable, measurable prioritized actions and identifies a trajectory to align with statewide greenhouse gas (GHG) reduction targets for 2030 and 2045, bring the City into compliance with California legislation to reduce GHG emissions, and address climate risk; and

WHEREAS, an Initial Study/Negative Declaration (IS/ND) (SCH#2023060063) was prepared for the CAAP and circulated for public review in accordance with CEQA requirements and on September 18, 2023, and the IS/ND was adopted by the City Council by Resolution No. 137-2023; and

WHEREAS, the City Council adopted the CAAP on September 18, 2023, as a “qualified climate action plan,” meeting the requirements of CEQA Guidelines Section 15183.5(b) Plans for the Reduction of Greenhouse Gas Emissions by Resolution No. 138-2023; and

WHEREAS, the City filed a CEQA Notice of Determination with the County Recorder on September 20, 2023; and

WHEREAS, on October 19, 2023, the nonprofit 350 Sacramento and Oscar Balaguer (Petitioners) filed a lawsuit challenging the approvals under CEQA, that the City’s CAAP and IS/ND violate or otherwise do not fully comply with CEQA; and

WHEREAS, the City and Petitioners have agreed to a Settlement Agreement to resolve the lawsuit, whereby the City will rescind the CAAP as a CEQA “qualified climate action plan” and the associated IS/ND; and

WHEREAS, the City Council authorized the execution of the Settlement Agreement on June 3, 2024; and

WHEREAS, the City Council desires to rescind the CAAP and associated IS/ND, and readopt the CAAP as an advisory plan that does not meet the requirements of CEQA Guidelines Section 15183.5(b) Plans for the Reduction of Greenhouse Gas Emissions; and

WHEREAS, the CAAP to be readopted has been edited and updated to be clear that it does not meet the requirements of CEQA Guidelines Section 15183.5(b) for a “qualified climate action plan;” and

WHEREAS, re-adoption of the CAAP, as a plan that does not meet the requirements of CEQA Guidelines Section 15183.5(b), is exempt from CEQA pursuant to Title 14 of the California Code of Regulations, Chapter 3, Division 6 (State CEQA Guidelines) Section 15262 (Feasibility and Planning Studies).

NOW, THEREFORE, BE IT HEREBY RESOLVED BY THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA AS FOLLOWS:

1. The City Council of the City of Rancho Cordova does hereby rescind Resolutions No. 137-2023 and No. 138-2023, rescinding the CAAP IS/ND and the adopted CAAP which was a CEQA “qualified climate action plan,” respectively.
2. The City Council of the City of Rancho Cordova hereby readopts the CAAP, as updated, as a plan that does not meet CEQA Guidelines 15183.5(b) for a “qualified climate action plan” and finds this project to be exempt from further CEQA analysis pursuant to CEQA Guidelines Section 15262, Feasibility and Planning Studies.

PASSED AND ADOPTED by the City Council of the City of Rancho Cordova on the 3rd day of June 2024 by the following vote:

AYES:

NOTICE OF EXEMPTION

To: ☐ Office of Planning and Research
1400 Tenth Street
Sacramento, CA 95814

From: City of Rancho Cordova
Community Development Department
2729 Prospect Park Drive
Rancho Cordova, CA 95670

☒ County Clerk-Recorder
Sacramento County
600 8th Street
Sacramento, CA 95814

Project Title: **CITY OF RANCHO CORDOVA CLIMATE ACTION AND ADAPTATION PLAN, READOPTED JUNE 2024**

Project Location: Applies citywide to the City of Rancho Cordova (Sacramento County)

Assessor's Parcel Number(s): Applies citywide to the City of Rancho Cordova (Sacramento County)

Project Description: The Rancho Cordova Climate Action and Adaptation Plan (CAAP) is a comprehensive roadmap to community sustainability and resilience. The purposes of the CAAP are to identify strategies and measures the City of Rancho Cordova can take to reduce greenhouse gas emissions to levels that align with the State of California's goals and set forth strategies to adapt and promote resilience to the impacts of climate change.

Lead Agency: City of Rancho Cordova

Applicant: City of Rancho Cordova
2729 Prospect Park Drive
Rancho Cordova, CA 95670

Exemption Status: ☐ Ministerial [Section 21080(b); 15268];
☐ Declared Emergency [Section 21080(b)(3); 15269(a)];
☐ Emergency Project [Section 21080(b)(4); 15269(b)(c)];
☐ General Rule [Section 15061(b)(3)];
☐ Categorical Exemption [Section 15301(a), Existing Facilities];
☐ Approval of Rates, Tolls, Fares, and Charges [Section 21080(b)(8)(D)];
☒ Statutory Exemption [Section 15262, Feasibility and Planning Studies].

REASONS WHY THIS PROJECT IS EXEMPT OR DOES NOT REQUIRE FURTHER ENVIRONMENTAL DOCUMENTATION:

The project is exempt under State CEQA Guidelines Section 15262, Feasibility and Planning Studies, which states:

A project involving only feasibility or planning studies for possible future actions which the agency, board, or commission has not approved, adopted, or funded does not require the preparation of an EIR or Negative Declaration but does require consideration of environmental factors. This section does not apply to the adoption of a plan that will have a legally binding effect on later activities.

The planning activities under this project identify strategies and measures the city can take to reduce greenhouse gas emissions to levels that align with the State of California's goals and identify strategies to

ITEM 13.7.**ATTACHMENT 2**

adapt and promote resilience to the impacts of climate change. Actions to be taken under these strategies and measures have not yet been approved, adopted, or funded.

The CAAP is a planning document that involves no ground or resource disturbance itself. This project is Statutorily Exempt under CEQA Guidelines, Section 15262 Feasibility and Planning Studies as the project only involves identifying strategies and measures for possible future actions, which the City of Rancho Cordova has not approved, adopted, or funded.

The CEQA “Qualified” CAAP under CEQA Guidelines Section 15183.5(b), adopted on September 18, 2023, and Notice of Determination filed on September 20, 2023 under SCH2023060063, which may have created a legally binding effect on later activities for CEQA streamlining, has been rescinded. In its place, this readopted CAAP does not meet CEQA Guidelines Section 15183.5(b) for “Qualified” climate action plans, and does not create any legally binding effect on later activities. These strategies and measures, if implemented, would have a positive impact on air quality and reduce greenhouse gas emissions. Individual implementation actions will be subject to the appropriate level of additional environmental analysis at the time of future implementation.

Climate Action & Adaptation Plan

July 2023
Updated as of June 2024

Table of Contents

EXECUTIVE SUMMARY

Overview	ES.1
Plan Development.....	ES.1
Community Engagement.....	ES.1
Emissions Inventory and Reduction Targets.....	ES.2
Plan At A Glance.....	ES.4
Emission Reduction Measures.....	ES.4
Adaptation Strategies.....	ES.7
2022 Rancho Cordova Climate Action Plan Public Opinion Survey.....	ES.8
Implementation Strategy.....	ES.8
Monitoring Strategy	ES.9
California Environmental Quality Act and Plan.....	ES.10
Plan Organization.....	ES.10

CHAPTER 1: INTRODUCTION

1.1 Introduction to the Climate Action and Adaptation Plan.....	1.1
1.1.1 Why is the Plan Important?	1.1
1.1.2 Plan Goals	1.2
1.2 Summary of the Plan Development Process	1.2
1.2.1 Plan Development.....	1.3
1.2.2 Community Engagement	1.3
1.3 2022 Rancho Cordova Climate Action Plan Public Opinion Survey	1.5
1.4 Project Website	1.5
1.5 Regional Climate Planning Efforts.....	1.6
1.6 How to Read This Plan.....	1.7
1.6.1 Organization.....	1.7
1.6.2 Reduction and Adaptation Framework.....	1.7

CHAPTER 2: GREENHOUSE GAS EMISSIONS INVENTORY

2.1 Overview.....	2.1
2.2 Baseline Inventory.....	2.1
2.2.1 Rancho Cordova's Emissions Inventory	2.2
2.3 Emissions Forecasts.....	2.3
2.3.1 Future Emissions without Legislative Reductions (Business-As-Usual Forecast).....	2.4
2.3.2 Future Emissions with Legislative Reductions (Legislative-Adjusted BAU Forecast).....	2.4
2.4 Emissions Reduction Targets	2.6
2.5 Local Emissions Gap.....	2.7

CHAPTER 3: EMISSIONS REDUCTION STRATEGIES AND MEASURES

3.1 Overview.....	3.1
3.2 Emissions Reduction Strategies and Measures	3.1
3.3 Greenhouse Gas Reduction Strategy Development.....	3.2
3.3.1 Greenhouse Gas Emissions Reduction Summary.....	3.2
3.3.2 Emissions Reduction Strategies and Measures.....	3.4
Getting To, From, and Around the City (On-road Transportation Sector).....	3.6
Using Energy in Homes and Businesses (Building Energy Sector).....	3.14
Using Equipment for Landscaping and Construction (Off-Road Vehicle and Equipment Sector).....	3.18
Using Water and Disposing of Waste at Homes and Businesses (Water and Solid Waste Sectors).....	3.21
Planting and Managing Trees (Carbon Sequestration Sector).....	3.24

CHAPTER 4: CLIMATE ADAPTATION AND RESILIENCE

4.1 Overview.....	4.1
4.2 Climate Adaptation and Vulnerability	4.1
4.3 Adaptation Planning Process.....	4.2
4.4 Vulnerability Assessment Overview.....	4.3
4.5 Vulnerability Assessment Summary.....	4.4
4.5.1 Climate Hazards Facing the City	4.4
4.5.2 City's Adaptive Capacity	4.10
4.5.3 Vulnerability Scoring.....	4.10
4.6 Adaptation Strategies.....	4.11

CHAPTER 5: IMPLEMENTATION AND MONITORING

5.1 Overview.....	5.1
5.2 Implementation Strategy	5.2
5.3 Monitoring and Updates	5.2
5.4 California Environmental Quality Act and the Plan	5.4
5.5 Funding Sources	5.6

EXECUTIVE SUMMARY

A large stone sign for the City of Rancho Cordova. It features a stylized tree on the left and the text "CITY OF RANCHO CORDOVA" in bold, black, sans-serif capital letters on the right.

CITY OF
RANCHO CORDOVA

EXECUTIVE SUMMARY

OVERVIEW

The City of Rancho Cordova (hereafter referred to as “City”) has prepared this Climate Action and Adaptation Plan (CAAP) (hereafter referred to as “Plan”) to serve as a comprehensive roadmap to community sustainability and resilience in the city. The purposes of the Plan are to identify strategies and measures the City can take to reduce Greenhouse Gas (GHG) emissions to levels that align with the State of California’s goals and set forth strategies to adapt and promote resilience to the impacts of climate change.

In developing the Plan, the City evaluated the volume of emissions generated in a baseline year (2019 for this Plan) and identified City-specific targets and goals that determine the amount of community-wide emissions that need to be reduced in Rancho Cordova to align with statewide GHG reduction targets for 2030 and 2045. The City then developed GHG reduction measures to achieve the City’s 2030 target and make substantial progress towards the City’s 2045 goal. Additionally, in preparation of the Plan, the City conducted a climate change vulnerability assessment to better understand its vulnerability to climate hazards. This was then used to inform and develop a set of adaptation strategies, objectives, and actions to improve community resilience in the context of climate change. The successful implementation and administration of the Plan would reduce emissions and reduce climate related risks in the city, as well as provide other co-benefits like strengthening the city’s economy, improving risk management, cleaning the environment, and improving the health and wellness of residents.

PLAN DEVELOPMENT

The City kicked off the project in 2021 after which the City prepared GHG emissions inventories and forecasts, set GHG reduction targets, and conducted a climate change vulnerability assessment. The City then developed GHG emissions reduction and adaptation strategies, measures, and actions to be included in the Plan. Engagement with members of the public, government officials, and other stakeholders was conducted throughout the entirety of the project. Outreach and engagement efforts are described in the following section.

COMMUNITY ENGAGEMENT

The City hosted four public workshops and performed outreach efforts to engage residents, stakeholders, and other interested organizations and individuals. The purpose was to provide an opportunity for the community to participate in the Plan development process and ensure that the Plan equitably captured the ideas and concerns of residents and businesses.

Source: City of Rancho Cordova

The **first workshop** held on October 21, 2021, provided an overview of the purpose and objectives of the Plan and discussed the Plan process and project timeline. The **second workshop** held on January 13, 2022, summarized the city's primary vulnerabilities to climate change and when these climate change impacts are likely to occur. On April 14, 2022, the City held the **third workshop** and discussed updates in the Plan development process. The topics included the primary emissions sources and activities in Rancho Cordova, the role that legislative reductions¹ play in reducing emissions in the city, and how much lower the

future emissions need to be to align with California's climate goals. On November 16, 2022, the City hosted the **fourth and final workshop** which was the first in-person event. The purpose of the workshop was to gain feedback on actions the City can take to reduce GHG emissions. Due to the COVID-19 pandemic, the first three public workshops were held virtually, while the fourth workshop was an in-person event. An **online survey** was conducted after the fourth workshop to include feedback from residents who could not attend the final workshop.

The multiple sets of public events and additional methods for providing input on the Plan provided residents and stakeholder groups the opportunity to contribute to the Plan development. Additionally, the City conducted a public opinion survey, the results of which are discussed in the sections below.

EMISSIONS INVENTORY AND REDUCTION TARGETS

The 2019 communitywide emissions is 679,700 metric tons of carbon dioxide equivalent ("MTCO₂e"). Figure ES 1 shows how much is 679,700 MTCO₂e in terms of cars driven, smartphones charged, home energy used, and area of forests used. The emissions inventory includes the following emissions sectors:

- On-Road Transportation

- Off-Road Vehicles and Equipment

- Building Energy

- Water Supply

- Solid Waste

- Wastewater Treatment

Out of the seven emissions sectors included in the Plan, **on-road transportation and building energy** are responsible for **94 percent** of emissions in the city.

To reduce communitywide emissions in alignment with statewide targets, the Plan has established the following:

- ▶ 2030 target: 36 percent below 2019 levels (438,300 MTCO₂e annually); and
- ▶ 2045 goal: 81 percent below 2019 levels (129,300 MTCO₂e annually)

¹ Legislative Reductions are reductions in emissions from communitywide activities and sources that result from actions of the State, federal, or regional government agencies. Examples include enacted laws, adopted regulations, standards, and plans.

HOW MUCH IS 679,700 METRIC TONS OF GREENHOUSE GASES ?

146,456 gasoline-powered cars
driven for one year

82,681,236,543 smartphones
charged

132,253 homes'
electricity use for one year

804,388 acres
of U.S. forest used
in one year

Source: US Environmental Protection Agency Greenhouse Gas Equivalencies Calculator, 2023.

Figure ES 1 Rancho Cordova's 2019 communitywide emissions equivalencies

Figure ES 2 depicts the 2019 baseline and City's legislative-adjusted BAU forecast by sector. The black line indicates the City's GHG reduction target for 2030 and 2045 relative to the City's 2019 GHG inventory. The space between the trajectory of the black line and the top of the colored wedges represents the "gap" in emissions that needs to be addressed through local actions for the City to meet its GHG reduction targets. The City needs to reduce annual GHG emissions by 77,100 MTCO₂e in 2030 and 400,600 MTCO₂e in 2045 to achieve the targets.

Source: Ascent Environmental 2022.

Figure ES 2 Rancho Cordova's Legislative-Adjusted BAU Forecast by Sector, 2030 Emission Reduction Target: 36% below 2019 levels, and 2045 Emission Reduction Goal: 81% below 2019 levels

Appendix A presents the inventory technical memorandum, Appendix B details the methodology for preparing the communitywide emissions inventory and projections, Appendix C presents the forecast and target technical memorandum, and Appendix D details the methodology for preparing the emissions reduction targets and goals.

PLAN AT A GLANCE

Emission Reduction Measures

To achieve the 2030 target and to make substantial progress toward the 2045 goal, the Plan proposes a Strategy Framework consisting of 14 GHG reduction strategies, 34 GHG emission reduction measures, and supporting actions briefly summarized in Table ES 1 below. The strategy framework contains additional information like annual emissions reduced, percent of the City's total reductions, performance targets, and supporting actions identified by the City to assist in achieving each strategy's performance target. For measures labeled as "quantified" the CAP provides estimates of the measure's annual GHG reduction potential; measures labeled as "qualitative" would also reduce GHG emissions but their annual GHG reduction potential is not estimated in the CAP. The additional details are presented in Chapter 3, section 1.3.2, and GHG reduction calculation details are included in Appendix E.

Table ES 1 Summary of Emissions Reduction Strategy Framework identified in the Plan

Getting To, From, and Around the City (On-road Transportation Sector)			
Strategy Transportation-1 Support development of walkable, interconnected neighborhoods, villages, and districts	Annual GHG Reduction Potential (MTCO ₂ e)*	2030	2045
		6,700	17,100
Transportation-1.1: Enforce the City's Transportation Impact Guidelines, which require developers to include features in their projects that decrease the amount of driving alone and encourage people to make trips by walking, biking, or using public transit (Quantified)			
Transportation-1.2: Reduce or eliminate requirements to provide a minimum number of off-street parking spaces in new development projects (Qualitative)			
Transportation-1.3: Improve street connectivity, for example by providing walkways at the ends of existing cul-de-sacs, or requiring walkable street systems in new developments (Qualitative)			
Transportation-1.4: Limit the number of drive-through businesses (Qualitative)			
Strategy Transportation-2 Make walking and biking safe and attractive for people of all ages and abilities	Annual GHG Reduction Potential (MTCO ₂ e)*	2030	2045
		11,500	12,800
Transportation-2.1: Update Bike and Pedestrian Master Plans to increase the number of low-stress bikeways and walkways that connect homes to destinations (Quantified)			
Transportation-2.2: Install roundabouts to control traffic at intersections, instead of stop signs or traffic signals (Qualitative)			
Transportation-2.3: Provide temporary or permanent car-free zones or “slow streets” in specified areas, for example, individual blocks or residential streets (Qualitative)			
Transportation-2.4: Install measures to reduce vehicle speeds and calm traffic on city streets (Qualitative)			

Strategy Transportation-3 Provide transit options that are accessible, reliable, and convenient	Annual GHG Reduction Potential (MTCO ₂ e)*	2030	2045
		5,800	10,200
Transportation-3.1: Increase the frequency of SacRT bus, CordoVan service, and/or light rail service, or extend service to cover new areas or times of day (Quantified)			
Transportation-3.2: Implement Transit-Supportive Roadway Treatments (for example, transit signal priority, bus-only signal phases, queue jumps, curb extensions to speed passenger loading, and dedicated bus lanes) (Quantified)			
Transportation-3.3: Provide discounted or fare-free transit service (could be universal or targeted to specific areas and/or populations, for example, youth under 18) (Quantified)			
Transportation-3.4: Expand the SmaRT Ride area and convert the shuttles to electric shuttles (Quantified)			
Strategy Transportation-4 Reduce drive alone vehicle trips	Annual GHG Reduction Potential (MTCO ₂ e)*	2030	2045
		3,800	6,800
Transportation-4.1: Implement a Commuter Trip Reduction Program (CTR) in which companies provide employees with services, infrastructure, and incentives for not driving alone to work and instead ridesharing, taking transit, biking, walking, or teleworking (Quantified)			
Transportation-4.2: Implement an Electric Vehicle Carshare Program in which vehicles are available for users on-demand for short-term rentals (Qualitative)			
Transportation-4.3: Implement a bikeshare/scooter share program in which conventional or electric powered bikes or scooters are available to users on-demand for short-term rentals (Qualitative)			
Transportation-4.4: Provide Community-Based Travel Planning (CBTP) to households in the city in which trained travel advisors visit households to provide them with customized information, incentives, and support to encourage use of transportation options other than driving alone (Qualitative)			
Strategy Transportation-5 Transition to electric and zero emission vehicles	Annual GHG Reduction Potential (MTCO ₂ e)*	2030	2045
		27,000	171,300
Transportation-5.1: Install EV chargers in new residential, commercial, and industrial projects (Quantified)			
Transportation-5.2: Install publicly accessible EV chargers on existing private property (Quantified)			
Transportation-5.3: Install EV chargers on public property (Quantified)			
Transportation-5.4: Electrify loading docks and/or require idling-reduction systems (Qualitative)			
Transportation-5.5: Limit new gasoline/diesel fueling stations (Qualitative)			
Using Energy in Homes and Businesses (Building Energy Sector)			
Strategy Energy-1a Increase energy efficiency and electrification in existing residential buildings	Annual GHG Reduction Potential (MTCO ₂ e)*	2030	2045
		9,700	29,000
Energy-1.1: Retrofit existing residential buildings to improve energy efficiency and reduce natural gas consumption for end uses like space and water heating, clothes drying, cooking (Quantified)			
Strategy Energy-1b Increase energy efficiency and electrification in existing nonresidential buildings	Annual GHG Reduction Potential (MTCO ₂ e)*	2030	2045
		2,100	10,000

Energy-1.2: Retrofit existing nonresidential buildings to improve energy efficiency and reduce natural gas consumption for end uses like space and water heating, clothes drying, cooking (**Quantified**)

Strategy Energy-2a

Increase energy efficiency and electrification in new residential buildings

Annual GHG Reduction
Potential (MTCO₂e)*

2030

2045

1,400

5,100

Energy-2.1: Require new residential development to be all-electric, zero net energy (ZNE) buildings (where the amount of energy used in a year equals the amount of energy generated on the site) (**Quantified**)

Strategy Energy-2b

Increase energy efficiency and electrification in new nonresidential buildings

Annual GHG Reduction
Potential (MTCO₂e)*

2030

2045

430

1500

Energy-2.2: Require new nonresidential development to achieve energy efficiency above minimum State building code requirements (CAL Green Tier 2) (**Quantified**)

**Using Equipment for Landscaping and Construction
(Off-Road Vehicle and Equipment Sector)**

Strategy Offroad-1

Transition to electric and zero emissions technologies for landscaping equipment

Annual GHG Reduction
Potential (MTCO₂e)*

2030

2045

130

260

Offroad-1.1: Replace existing gasoline and diesel-powered landscaping equipment with electric or zero emission alternatives (**Quantified**)

Offroad-1.2: Convert new landscaping equipment to electric or zero-emission alternatives (**Quantified**)

Strategy Offroad-2

Transition to electric and zero emissions technologies for construction equipment

Annual GHG Reduction
Potential (MTCO₂e)*

2030

2045

1,700

9,200

Offroad-2.1: Increase electrification and use of alternative fuels in construction projects (**Quantified**)

Offroad-2.2: Reduce construction vehicle idling (**Quantified**)

**Using Water and Disposing of Waste at Homes and Businesses
(Water and Solid Waste Sectors)**

Strategy Water-1

Conserve water

Annual GHG Reduction
Potential (MTCO₂e)*

2030

2045

0*

0*

Water-1.1: Reduce indoor water use in existing and new buildings (**Qualitative**)^

Water-1.2: Reduce outdoor water use for landscaping and irrigation in existing and new developments (**Qualitative**)^

*Emissions reduced from water measures estimated to be zero in 2030 because water-related energy needs assumed to be met by 100% renewable or zero emission electricity by 2030.

Strategy Solid Waste-1

Avoid disposal of organic waste in landfills

Annual GHG Reduction
Potential (MTCO₂e)*

2030

2045

8,800

32,600

Solid Waste-1.1: Increase recovery of edible food waste (**Quantified**)

Solid Waste-1.2: Eliminate disposal of organic waste in landfills (food waste, yard waste) (**Quantified**)

Planting and Managing Trees (Carbon Sequestration Sector)			
Strategy Carbon Sequestration-1 Increase the number of trees in the city, through new plantings and management of existing trees	Annual GHG Reduction Potential (MTCO ₂ e)*	2030	2045
		440	1,100
Carbon Storage-1.1: Increase the number of trees in the city, through new plantings and management of existing trees (Quantified)			

* The calculations, assumptions, research, and other evidence used to identify measure performance metrics and estimate annual GHG reduction potential are provided in CAAP Appendix E.

^Emissions reduced from water measures estimated to be zero in 2030 because water-related energy needs assumed to be met by 100% renewable or zero emission electricity.

Adaptation Strategies

In addition to strategies and measures to reduce GHG emissions, the Plan also includes a set of five adaptation strategies to help the City prepare for and become more resilient to the impacts of climate change. Each adaptation strategy includes two to three tailored objectives, which are accompanied by an array of actions that can be implemented to help achieve those objectives. The adaptation strategies and objectives are summarized in Table ES 2 below. Further details, such as the associated actions for each strategy and set of objectives, are presented in Chapter 4. The city's Vulnerability Assessment Technical Memo, which was used to inform the adaptation strategies, is included in Appendix F.

Table ES 2 Summary of Adaptation Strategies identified in the Plan

Strategy Adaptation-1. Improve resilience to increased temperatures and extreme heat.	
Objectives:	▶ Reduce the urban heat island effect. ▶ Protect populations from extreme heat.
Strategy Adaptation-2. Improve resilience to extreme precipitation and flooding.	
Objectives:	▶ Promote climate-smart flood management. ▶ Add redundancy to the City's flood management system.
Strategy Adaptation-3. Improve resilience to drought.	
Objectives:	▶ Reduce water consumption. ▶ Ensure long-term sustainability and reliability of the City's water supplies.
Strategy Adaptation-4. Improve resilience to wildfires.	
Objectives:	▶ Protect populations from wildfire smoke and poor air quality. ▶ Mitigate the impacts from potential Public Safety Power Shutoff events during high wildfire risk conditions.

Strategy Adaptation-5.

Promote holistic community resilience in the context of climate change.

Objectives:

- ▶ Coordinate equitable education, outreach, and engagement.
- ▶ Promote robust emergency services and other planning activities.
- ▶ Protect the built environment from climate hazards.

2022 RANCHO CORDOVA CLIMATE ACTION PLAN PUBLIC OPINION SURVEY

In addition to the online survey conducted after the fourth workshop, the City commissioned a public opinion survey to measure residents' attitudes about climate change and their opinions about the City government taking steps to reduce climate change and its impacts. The City conducted a telephone survey with 300 randomly selected participants to provide another form of outreach for resident input. The purpose was to better understand residents' perceptions of climate change and what steps the City should take to address issues associated with climate change. The survey results indicated that climate change is a very important issue for the majority of residents and a majority also responded that climate change will be very harmful or somewhat harmful to them or loved ones. A majority of the residents think it is very important for the City to take steps to reduce the impacts of climate change. A majority of residents also strongly or somewhat support specific City actions related to encouraging people to travel without using their private vehicles such as walking, biking, sharing rides, and using public transportation; increasing the use of electric vehicles, and encouraging energy efficiency and reduced natural gas consumption in existing buildings and new construction. Encouraging the use of electric-powered instead of gas-powered landscape and construction equipment was the only City-specific action that was not strongly or somewhat supported by a majority of residents. A plurality of residents somewhat support this action (41.5 percent), while approximately one-third (31.6 percent) strongly oppose this action, and 9.8 percent indicated they somewhat oppose it. No residents (0 percent) indicated strong support for this action.

Strategy highlights

- i. **Maximum emissions reduction:** Strategy Transportation-5. Transition to electric and zero emission vehicles.
- ii. **Addresses safety and mobility challenges for people with different abilities:** Strategy Transportation-2. Make walking and biking safe and attractive for people of all ages and abilities.
- iii. **Improves aesthetics and provides cleaner air:** Strategy Carbon Sequestration-1. Remove emissions from the atmosphere.

IMPLEMENTATION STRATEGY

After the adoption of this Plan, the City will develop an implementation strategy for the Plan measures. It will be based on several factors such as budget capacity and availability of funding opportunities and will involve collaboration with the Sacramento Municipal Utility District ("SMUD"), other public and private agencies, and neighboring cities. The success of Plan implementation will also depend on the participation of residents, businesses, and other stakeholders in the city and region.

The City will implement the measures of the CAAP through several types of programs and activities that may include changes in municipal operations; new ordinances or code updates; development conditions of approval; advanced planning efforts; provision of incentives or financing; public agency or private partnerships; and education and outreach. The Plan's effective implementation will require a process to prioritize its strategies and measures periodically. Potential funding sources to support Plan implementation are listed in Appendix G.

MONITORING STRATEGY

The Plan will be monitored over time to assess the progress by tracking key indicators for each measure. Changing circumstances, such as State and federal laws and programs, updates to climate science, changes in technology, or evolving local, State, federal, or even global economic and social conditions, may necessitate changes to the Plan. If the Plan is not achieving the desired outcomes, the measures or actions will need to be altered or amended.

City staff will evaluate the performance of each GHG reduction action that has been implemented. Evaluating the performance requires monitoring the level of community participation, costs, and potential barriers to implementation, as well as activities that result in GHG emissions reductions like actual reductions in fuel consumption, vehicle miles traveled, energy usage, water usage, landfilled waste, and so on. In addition to considering these factors, assessing the performance of Plan adaptation actions will be informed by resilience-related improvements in the community. The City staff will regularly monitor and report on adaptation and climate hazards and will update the strategies and actions when needed. By evaluating whether the implementation of an action is on track to achieve its objective, the City can identify successful actions and reevaluate or replace underperforming measures.

To provide updates on Plan implementation progress, City staff will prepare a monitoring report every two years. Finally, the City will prepare a GHG emissions inventory and an update to the plan every five years, with the first update due in 2028. Updates would reflect the findings of the monitoring reports and inventory updates. Table ES 3 shows the City's implementation and monitoring timeframe.

Table ES 3 City's Implementation and Monitoring Timeframe

Year	Milestone	Description
2023	Plan adopted	City Council adopts the Plan.
2023	Develop Implementation Strategy	City staff begins to develop the implementation strategy.
2023	Plan Implementation	City staff begins to implement Plan measures.
2025	Monitoring Report	City staff will prepare a monitoring report every two years and present the report to City Council and Planning Commission. The first monitoring report will be completed two years from Plan adoption. Each monitoring report will evaluate implementation status of the Plan's GHG reduction measures. The monitoring report will identify whether any of the measures require amendment to maintain progress toward achieving the emissions reductions identified in the Plan.
2028	GHG Emissions Inventory Update	An updated GHG inventory will be prepared to track the Plan implementation progress by assessing the City's progress towards achieving the emissions reductions identified in the Plan.
2028	Plan Update	Based on the results of the monitoring report and updated GHG emissions inventory, the City will update the Plan to include new or amended measures, remove, or update any ineffective measures, and incorporate new technologies and methodologies as necessary to ensure the Plan is on track to achieve the City's target and goal.

CALIFORNIA ENVIRONMENTAL QUALITY ACT AND THE PLAN

The California Environmental Quality Act (CEQA) is a statute that requires local agencies to identify significant environmental impacts of their actions and avoid or mitigate those impacts, if feasible. The 2022 Scoping Plan emphasizes the use of CEQA as a tool by local jurisdictions for supporting the State's climate priorities. When a local Plan complies with CEQA requirements, individual projects that comply with the Plan are allowed to streamline the project-specific GHG analysis. The City plans to utilize this tool for ensuring that new development is constructed with more sustainable and low-carbon features than existing development, **however this Plan is not intended to be consistent with, nor will be utilized to meet**, the provisions of CEQA Guidelines Section 15183.5 ("Qualified Plan"). **The City may conduct additional CEQA analysis in the future in order to readopt this Plan to be consistent with a CEQA Guidelines Section 15183.5 "Qualified Plan". This section is updated as of June 2024.**

PLAN ORGANIZATION

This Plan is divided into five main chapters. Chapter 1, introduces the City's Plan, outlines the goal of the Plan, and the development process in detail. Chapter 2 describes the community's 2019 baseline GHG emissions inventory, presents 2030 and 2045 emissions forecasts, and identifies community emissions reduction targets. GHG emissions reduction strategies and measures are included in Chapter 3. Chapter 4 presents an overview of the climate adaptation planning process, a summary of the city's climate change vulnerability assessment, and adaptation strategies, objectives, and actions that can be implemented to strengthen community resilience to climate change. Lastly, Chapter 5 provides a framework for implementing and monitoring the Plan and includes a timeline for future updates.

CHAPTER 1: Introduction

CHAPTER 1: Introduction

1.1 INTRODUCTION TO THE CLIMATE ACTION AND ADAPTATION PLAN

The City of Rancho Cordova (hereafter referred to as “City”) has prepared its first Climate Action and Adaptation Plan (CAAP) (hereafter referred to as “Plan”) to serve as a comprehensive roadmap to community sustainability and resilience in the city. It lays out a set of strategies to reduce Greenhouse Gas (“GHG”) emissions and the potential impacts of climate change in Rancho Cordova. At a local level, annual temperatures and intensity of precipitation events are projected to increase over time. These changes could result in increased heat waves, wildfire risk, and flooding, resulting in adverse effects on residents’ health and safety, economic prosperity, infrastructure, and the provision of public services. The Plan identifies strategies and measures the City can take to address climate change by reducing GHG emissions to levels that align with Statewide GHG reduction targets and strategies and actions for the City to adapt and promote resilience to the impacts of climate change in Rancho Cordova.

In developing the Plan, the City evaluated the volume of emissions generated in a baseline year (2019 for this Plan) and identified City-specific targets and goals that determine the amount of community-wide emissions that need to be reduced in Rancho Cordova to align with statewide GHG reduction targets for 2030 and 2045. The City then developed GHG reduction measures to achieve the City’s 2030 target and make substantial progress towards the City’s 2045 goal. Additionally, in preparation of the Plan, the City conducted a climate change vulnerability assessment to better understand its vulnerability to climate hazards. This was then used to inform and develop a set of adaptation strategies, objectives, and actions to improve community resilience in context of climate change. The successful implementation and administration of the Plan would reduce emissions and reduce climate related risks in the city, as well as provide other co-benefits like strengthening the City’s economy, improving risk management, cleaning the environment, and improving the health and wellness of residents. At a local scale, communities can work towards reducing their carbon footprint by changing habits to consume less energy, generate less waste, conserve water, use sustainable transportation modes, and promote carbon sequestration.

1.1.1 Why is the Plan Important?

Through the Plan, community members can take climate action specific to the city’s requirements. By beginning to plan now and engaging in more sustainable practices, communities will be better suited to adapt to climate change and increase resiliency for the future. The Plan lays out prospects to shape the future development of the city in the way that the homes, businesses, and communities become more sustainable and less vulnerable to

climate risks. While saving money and promoting a healthier environment, the implementation of the Plan will improve livability and quality of life for the residents of Rancho Cordova.

1.1.2 Plan Goals

The 2019 communitywide emissions is 679,700 metric tons of carbon dioxide equivalent (“MTCO₂e”). In order to reduce emissions and meet statewide targets, the Plan has established local reduction targets consistent with statewide emissions reduction targets for 2030 and 2045. To support the achievement of statewide GHG reduction targets and reduce emissions locally, the Plan sets the following emission reductions targets using 2019 levels as a reference point:

- ▶ 2030 target: 36 percent below 2019 levels (438,300 MTCO₂e annually); and
- ▶ 2045 goal: 81 percent reduction from 2019 levels (129,300 MTCO₂e annually).

This Plan provides a summary of baseline GHG emissions and the potential growth in these emissions over time. A summary of the City’s emissions inventory, emissions projections, and methodology for setting GHG reduction targets is discussed further in Chapter 2. The strategies and measures that the City will implement to achieve the 2030 emissions reduction target and make substantial progress toward the 2045 goal are discussed in Chapter 3. The Plan also illustrates strategies and measures that the City will implement to adapt to climate change risks and vulnerabilities in Chapter 4. As part of Plan implementation, each strategy and measure should be continually assessed and monitored. More information on administering, implementing, and monitoring the Plan is included in Chapter 5.

Why

did the City prepare a Plan?

- to align with State climate goals
- establish city specific climate action and guide future development
- to maintain consistency in GHG reduction
- to support infill housing production
- to leverage other regional sustainability programs

1.2 SUMMARY OF THE PLAN DEVELOPMENT PROCESS

This section gives an overview of the internal and external processes in developing this Plan. It briefly describes the City’s process for Plan development and external engagement with residents and other stakeholders. Figure 1.1 presents the components of the CAAP development process.

Source: Ascent Environmental 2023.

Figure 1.1 Components of the CAAP development process

1.2.1 Plan Development

The City kicked off the project in 2021 after which the City prepared GHG emissions inventories and forecasts, set GHG reduction targets, and conducted a climate change vulnerability assessment. These tasks were completed by the first quarter of 2022 and then the City developed GHG emissions reduction strategies, measures, and actions, along with adaptation strategies, objectives, and actions to be included in the Plan. These efforts created the foundation for developing this Plan, which occurred in the first quarter of 2023.

Engagement with City staff, members of the public, government officials, and other stakeholders was conducted throughout the entirety of the project. Outreach and engagement efforts are described in the following section.

1.2.2 Community Engagement

The Plan serves as a resource and starting point to support the City's long-term sustainability efforts. Effective and long-term climate action and resiliency in the City can only be achieved through active and ongoing partnerships between residents, businesses, the City, and other agencies and organizations in the city.

Residents can support climate action by:

- consuming less energy
- producing less waste
- conserving water
- composting
- avoiding drive alone trips

The City hosted four public workshops and performed outreach efforts to engage residents, stakeholders, and other interested organizations and individuals. The purpose was to provide an opportunity for the community to participate in the Plan development process and ensure that the Plan equitably captured the ideas and concerns of residents and businesses. Due to the COVID-19 pandemic, the first three public workshops were held virtually, while the fourth workshop was an in-person event. The

attendees included a diverse mix of participants including Rancho Cordova residents, business owners, members of local climate groups, neighborhood associations, community council members, people who had property in the city, and so on. The workshops served to inform attendees about the project scope and goals and solicited input to gain a better understanding of the community's climate change concerns and priorities.

The **first workshop** held on October 21, 2021 was attended by 26 people. It provided an overview of the purpose and objectives of the Plan, and discussed the Plan process and project timeline. It also provided information on how the community can get involved in the development process.

The **second workshop** held on January 13, 2022, summarized the city's primary vulnerabilities to climate change and when these climate change impacts are likely to occur. 31 people including residents and business owners attended the workshop that briefed on activities that are contributing to the city's greenhouse gas emissions and emission categories contributing to these emissions.

On April 14, 2022, the City held the **third workshop** which was attended by 17 people. It discussed updates in the Plan development process. The topics included the primary emissions sources and activities in Rancho Cordova, the role that federal, State, regional, and local actions play in reducing emissions in the city, and how much lower the future emissions need to be to meet California's climate goals. Attendees had the opportunity to share thoughts on potential mitigation measures the City could take to reduce emissions to levels that meet the climate targets.

On November 16, 2022, the City hosted the **fourth and final workshop** and first in-person event. It was attended by 12 people. The purpose of the workshop was to gain feedback on actions the City can take to reduce greenhouse gas emissions. The workshop included a short presentation, followed by an interactive activity and discussion about ideas and priorities. A handout illustrating the City's measures to reduce greenhouse gas emissions was distributed among participants to serve as a reference for sharing the feedback. It offered an opportunity for participants to comment on proposed GHG reduction strategies and measures and to identify barriers to personal climate action choices. To increase opportunities for all residents to provide feedback, an **online survey** was also conducted after the fourth workshop to include feedback from residents and stakeholders who could not attend the workshop. 48 people responded to this survey.

Why

is the community engagement process important?

- to provide the community an opportunity to participate in the City's climate action
- to advance equality and reduce disparities
- to ensure that the benefits are shared among all city residents

Public input gathered from the workshops and the survey played a key role in determining the City's approach to climate change mitigation and adaptation through ground-truthing the technical analyses conducted for the Plan development. The multiple sets of public events and additional methods for providing input on the Plan provided residents and stakeholder groups the opportunity to contribute to Plan development.

1.3 2022 RANCHO CORDOVA CLIMATE ACTION PLAN PUBLIC OPINION SURVEY

The City asked residents for their comments and suggestions concerning the Plan, emissions reduction measures, and adaptation strategies through community workshops and an online survey. In addition to this, the City commissioned a public opinion survey to measure residents' attitudes about climate change and their opinions about the City government taking steps to reduce climate change and its impacts. The City conducted a telephone survey with 300 randomly selected participants concerning issues related to its Plan. The purpose of the survey was to better understand resident perceptions of climate change and the City taking steps to address climate change. Specific issues examined in this survey included the community's views on:

Why

did the City conduct a Public Opinion Survey?

- to ask residents for their comments and suggestions concerning the Plan.
- to provide another form of outreach for resident input.
- to collect inputs on a randomly selected basis

- ▶ How important climate change is to them personally.
- ▶ How harmful climate change will be to them and to future generations.
- ▶ How important it is for the City to take steps to reduce climate change and its impacts.
- ▶ How supportive the community is of specific steps the City could take to reduce the impact of climate change.

The survey results indicated that climate change is a very important issue for the majority of residents and a majority also responded that climate change will be very harmful or somewhat harmful to them or loved ones. A majority of the residents think it is very important for the City to take steps to reduce the impacts of climate change. A majority of residents also strongly or somewhat support specific City actions related to encouraging people to travel without using their private vehicles such as walking, biking, sharing rides, and using public transportation; increasing the use of electric vehicles, and encouraging energy efficiency and reduced natural gas consumption in existing buildings and new construction. Encouraging the use of electric-powered instead of gas-powered landscape and construction equipment was the only City-specific action that was not strongly or somewhat supported by a majority of residents. A plurality of residents somewhat support this action (41.5 percent), while approximately one-third (31.6 percent) strongly oppose this action, and 9.8 percent indicated they somewhat oppose it. No residents (0 percent) indicated strong support for this actions.

1.4 PROJECT WEBSITE

To provide project information and resources to the community and stakeholders, the City developed a webpage dedicated to the City's Plan (located at <https://www.cityofranhocordova.org/residents/community-topics/climate-action-plan>). It includes an overview of the project, updates on the workshops and the online survey held, GHG emissions and adaptation related information and technical documents, and other supporting documents and materials. This webpage supported public participation from the initiation of the project to the development of this Plan. After adoption of the Plan, the webpage will be updated to include updates on Plan implementation and monitoring.

1.5 REGIONAL CLIMATE PLANNING EFFORTS

The Plan is developed in the context of existing plans and policies occurring within the region that support the reduction of GHG emissions and prepare the community for the anticipated effects of climate change. These include, but are not limited to:

- ▶ Sacramento County led an update to the countywide 2016 Local Hazard Mitigation Plan (Sacramento County, 2021) in 2021, in coordination with incorporated cities, reclamation districts, and other special districts. This will complement the Plan's adaptation framework and further assist in alleviating vulnerability to climate change impacts in the city.
- ▶ The Sacramento Area Council of Governments (SACOG) adopted its most recent Sustainable Communities Strategy (SCS) in 2020 (SACOG, 2023), which provides policies and implementation actions for GHG reductions in the on-road transportation sector, consistent with statewide targets set by the California Air Resources Board (CARB). The Plan's transportation sector measures can be aligned with the SCS for more effective emission reduction in the city.
- ▶ The Capitol Region Urban Heat Island Mitigation Project, led by Sacramento Metropolitan Air Quality Management District (SMAQMD) and the Local Government Commission, built detailed models of the Urban Heat Island effect in the Sacramento region and used them to evaluate the effectiveness of a range of heat mitigation measures (SMAQMD, 2020). This will complement the Plan's adaptation framework and further assist in alleviating vulnerability to climate change impacts in the city.
- ▶ The Sacramento Municipal Utility Department (SMUD)'s Home Performance Program (HPP) is a whole-house approach that bundles energy-efficiency upgrades to deliver more savings, comfort, and rebate options. This program can be effective in supporting strategies identified in this Plan for reducing emissions from the building energy sector.
- ▶ SMUD collaborated with Five Star Bank and LoanGlide to offer Sustainable Home Improvement Loans to help residential customers finance energy efficiency upgrades. This includes converting from gas-to-electric appliances and equipment and improvements like windows and weatherization. These initiatives align with the supporting actions identified in this Plan for reducing emissions from the building energy sector.
- ▶ SacRT initiatives which include providing County residents access to micro-transit, electric busses, and expanded light rail service, for example, the Fare-Free Transit for Students and Youth Initiative and the SacRT SmART Ride where customers can request a ride that will pick up and drop off passengers within the service boundaries. These initiatives align with the supporting actions identified in this Plan for reducing emissions from the transportation sector.

3.6 HOW TO READ THIS PLAN

3.6.1 Organization

This Plan is divided into five main chapters. This chapter, Chapter 1, introduces the City's Plan, outlines the goal of the Plan, and the development process in detail. Chapter 2 describes the community's 2019 baseline GHG emissions inventory, presents 2030 and 2045 emissions forecasts of the city, and identifies community emissions reduction targets. GHG emissions reduction strategies and measures are included in Chapter 3. Chapter 4 presents an overview of the climate adaptation planning process, a summary of the city's climate change vulnerability assessment, and adaptation strategies, objectives, and actions that can be implemented to strengthen community resilience to climate change. Lastly, Chapter 5 provides a framework for implementing and monitoring the Plan and includes a timeline for future updates. It also includes a list of potential funding sources the City can consider for the administration, implementation, and monitoring of measures included in this Plan.

3.6.2 Emissions Reduction and Adaptation Framework

The GHG emissions reduction strategies and measures in Chapter 3 and the adaptation strategies and objectives in Chapter 4 are presented under a similar framework. Each chapter presents strategies that serve as the foundation for addressing the ways in which GHG emissions can be reduced and resilience can be improved in the community. Within each GHG emissions reduction strategy are one or more measures that represent activities that the City would consider in order to achieve the target. Similarly, each of the adaptation strategies includes two to three tailored objectives. Both the GHG emissions reduction measures and adaptation objectives include a set of detailed actions that define the specific actions, projects, programs, or policies the City can implement or support to reduce GHG emissions and strengthen community resilience.

This page intentionally left blank.

CHAPTER 2: Greenhouse Gas Emissions Inventory

CHAPTER 2: Greenhouse Gas Emissions Inventory

2.1 OVERVIEW

This chapter summarizes the first three components of the Plan development process - identifying and estimating primary sources and annual levels of GHG emissions for a baseline year (also called a baseline inventory); estimating emissions trends and projections in the absence of local reduction measures (also called forecasts); and setting local emissions reduction goals over time to reduce contributions to climate change effects (also called targets) (refer to section 1.2 for components of the Plan).

2.2 BASELINE INVENTORY

Why

a baseline inventory?

- identifies emissions sources and their relative contribution
- provides a baseline for emissions forecasts
- supports the establishment of reduction targets and goals
- informs the development of reduction measures
- provides a framework to track the changes in emissions in the city

Conducting a baseline inventory for a jurisdiction is the process of quantifying emissions from the potential sources during a single calendar year. It informs about the emissions sources and activities and reports about the relative contribution of each. This process supports the forecasting of future emissions, the setting of targets and goals to reduce emissions, and the development of reduction measures. This section describes sources and levels of communitywide emissions in Rancho Cordova.

The City's emissions inventory is based on the 2019 baseline year – the most recent year for which reliable data were available at the time this plan was developed. Rancho Cordova's inventory is based on the most recent guidance for community-scale emissions inventories developed by ICLEI's Community Protocol, Version 1.2, published in July 2019 (ICLEI 2019). Appendix A and B present

detailed methods and assumptions used for developing the communitywide emissions inventory. Consistent with the protocol's requirements, the inventory is prepared for a baseline year that reflects the current communitywide emissions conditions and establishes a foundation to compare how emissions are estimated to grow in the future. Emissions generating activities are divided into categories called emissions sectors.

The inventory includes the following emissions sectors:

- **On-Road Transportation**

- this sector includes emissions from passenger and commercial vehicles that operate within the city, and to and from the city.

- **Building Energy**

- Residential Building Energy – this sector includes emissions generated from the use of electricity and natural gas in residential buildings in the city.
- Non-residential Building Energy – this sector includes emissions generated from the use of electricity and natural gas in non-residential buildings in the city.

- **Solid Waste**

- this sector includes emissions associated with waste generated by residents and businesses in the city.

- **Off-Road Vehicles and Equipment**

- this sector includes emissions from off-road vehicles and equipment that operate in the city.

- **Water Supply**

- this sector includes emissions associated with residential and commercial water consumption

- **Wastewater Treatment**

- this sector includes emissions associated with residential and commercial wastewater treatment

2.2.1 Rancho Cordova's Emissions Inventory

The 2019 communitywide emissions is 679,700 MTCO₂e. Out of the seven emissions sectors included in the Plan, on-road transportation and building energy are responsible for 94 percent of emissions in the city. Table 2.1 shows the results of the inventory and Figure 2.1 shows the share of emissions generated by each sector. Appendix A presents the inventory technical memorandum and Appendix B details the methodology for preparing the communitywide emissions inventory.

Table 2.1 2019 City of Rancho Cordova Community Greenhouse Gas Emissions Inventory

Sectors	MTCO ₂ e/year	Percent of Total
On-Road Transportation	417,100	61%
Nonresidential Building Energy	118,800	17%
Residential Building Energy	95,600	14%
Solid Waste	22,400	3%
Off-Road Vehicles and Equipment	11,000	2%
Water Supply	9,100	1%
Wastewater Treatment	5,700	1%
Total	679,700	100%

Notes: MTCO₂e/year = metric tons of carbon dioxide equivalent per year

Figure 2.1 2019 City of Rancho Cordova Communitywide Greenhouse Gas Emissions Inventory

2.3 EMISSIONS FORECASTS

The next phase in the Plan process is to estimate communitywide emissions over time. Comparing the forecasts with targets will provide an emissions gap that the city needs to address to achieve the target. This information is critical to evaluating the City's performance in mitigating emissions and understanding where the City should focus its efforts in the future. The 2019 baseline inventory is used to scale emissions to 2030 and 2045. Emissions forecasts are based on the following two factors:

Why

an emissions forecast?

- identifies emissions gap
- provides a framework for comparing changes in emissions in the future

- (i) Community Activities: change in community activities like population, number of employees, and vehicle miles traveled (VMT) results in a change in communitywide emissions.
- (ii) Legislative Reductions Federal, State, and regional actions that reduce GHG emissions from communitywide activities and sources. Examples of these initiatives include a law, regulation, standard, or program.

2.3.1 Future Emissions without Legislative Reductions (Business-As-Usual Forecast)

The emissions forecast without legislative reductions (also known as Business-As-Usual or BAU Forecast) is an assessment of the City's emissions solely based on how the community activities will change over time without further local, regional, State, or federal action. It assumes that no further government action is taken to reduce GHG emissions and reflects only the change emissions that results from change in community activities. Table 2.2 shows activity projections in the city from 2019 to 2045 that are used to inform the BAU Forecast of GHG emissions, and also inform the Legislative-Adjusted BAU Forecast, which is described in the next section.

Table 2.2 Rancho Cordova Demographic and Vehicle Miles Traveled Projections

Forecast Factor	2019	2030	2045
Population	77,579	102,122	125,427
Employment	61,991	73,604	84,213
Annual VMT	919,218,798	1,071,357,646	1,307,495,381

Notes: VMT = vehicle miles traveled.

Source: SACOG Growth Forecast for the 2020 MTP/SCS; Fehr & Peers; adapted by Ascent Environmental in 2022.

2.3.2 Future Emissions with Legislative Reductions (Legislative-Adjusted BAU Forecast)

Emissions forecast with legislative reductions (also known as Legislative-Adjusted Business-As-Usual or Legislative-Adjusted BAU forecast) is an assessment of the City's emissions based on the changes in community activities including adopted legislative and regulatory actions at the regional, State, or federal levels. The legislative reductions applied to estimate emissions under this forecast are listed in Table 2.3.

Table 2.3 Summary of Legislative Reductions Applied in the Legislative-Adjusted BAU Forecast

Source	Legislative Reduction	Description	Sectors Applied
Regional	2030 Zero Carbon Plan	Establishes a target for SMUD to supply 100 percent renewable electricity by 2030.	Residential and Nonresidential Building Energy, Water Supply
State	California's Building Energy Efficiency Standards (2019 Title 24, Part 6)	Requires all new buildings in California to comply with energy efficiency standards established by CEC. Accounts for the energy efficiency gains associated with lighting, heating, cooling, ventilation, and water heating	Residential and Nonresidential Building Energy

Source	Legislative Reduction	Description	Sectors Applied
		improvements, as well as onsite solar photovoltaic requirements for low-rise residential.	
State	Advanced Clean Cars I Standards	Establishes GHG emission reduction standards for model years 2017 through 2025 that are more stringent than federal CAFE standards.	On-Road Transportation
State	Truck and Bus Regulation	Requires diesel trucks and buses that operate in California to be upgraded to reduce GHG emissions.	On-Road Transportation
Federal	Fuel Efficiency Standards for Medium- and Heavy-Duty Vehicles	Establishes fuel efficiency standards for medium- and heavy-duty engines and vehicles.	On-Road Transportation
Federal	EPA Off-Road Compression-Ignition Engine Standards	Establishes standards for phasing of EPA diesel engine tiers for off-road compression-ignition equipment.	Off-Road Vehicles and Equipment

Notes: CAFE = Corporate Average Fuel Economy; CEC = California Energy Commission; EPA = U.S. Environmental Protection Agency; GHG = greenhouse gas, SMUD = The Sacramento Municipal Utility District.

Figure 2.2 and Table 2.4 present the City's 2019 inventory with BAU forecast and Legislative-Adjusted BAU forecast for 2030 and 2045. With the legislative actions, the City's emissions would decrease by approximately 22 percent between 2019 and 2045 and by approximately 24 percent between 2019 and 2030. In 2030, the legislative-adjusted BAU Forecast is 37 percent lower than the BAU forecast, while in 2045, legislative-adjusted BAU Forecast is 46 percent lower than the BAU forecast.

Table 2.4 Rancho Cordova 2019 Greenhouse Gas Emissions Inventory, BAU Forecast, and Legislative-Adjusted BAU Forecast for 2030 and 2045 (MTCO₂e/year)

Sector	2019	2030		2045	
	Baseline Emissions	BAU Forecast	Legislative-Adjusted BAU Forecast	BAU Forecast	Legislative-Adjusted BAU Forecast
On-Road Transportation	417,100	486,200	387,800	593,300	384,700
Nonresidential Building Energy	118,800	141,100	23,600	161,400	25,300
Residential Building Energy	95,600	125,800	52,200	154,500	55,900
Solid Waste	22,400	29,500	29,500	36,200	36,200
Off-Road Vehicles and Equipment	11,000	14,800	14,800	18,500	18,500
Water Supply	9,100	12,000	0	14,700	0
Wastewater Treatment	5,700	7,500	7,500	9,200	9,200
Total	679,700	816,700	515,400	987,800	529,800

Notes: Total may not sum exactly due to independent rounding. MTCO₂e/year = metric tons of carbon dioxide equivalent per year.

Source: Ascent Environmental 2023.

Source: Ascent Environmental 2023.

Figure 2.2 Rancho Cordova 2019 Greenhouse Gas Emissions Inventory, BAU Forecast, and Legislative-Adjusted BAU Forecast for 2030 and 2045

2.4 EMISSIONS REDUCTION TARGETS

Rancho Cordova's 2030 emissions reduction target and 2045 goal have been developed to align with the statewide emissions reduction targets for 2030 and 2045. As directed in Senate Bill (SB) 32 and Assembly Bill (AB) 1279, the State aims to reduce Statewide annual GHG emissions to:

- ▶ 40 percent below 1990 levels by 2030; and
- ▶ net zero emissions as soon as possible and no later than 2045, with at least an 85 percent reduction from 1990 levels for anthropogenic sources.¹

Consistent with State targets and considering relevant emissions sectors, this Plan establishes the following communitywide GHG reduction target for 2030 and GHG reduction goal for 2045:

- ▶ 2030 target: 36 percent below 2019 levels (438,300 MTCO₂e annually); and
- ▶ 2045 goal: 81 percent below 2019 levels (129,300 MTCO₂e annually).

¹ Anthropogenic sources are human activities that generate emissions.

2.5 LOCAL EMISSIONS GAP

Figure 2.3 below depicts the 2019 baseline and legislative-adjusted BAU forecast by sector. The black line indicates the City's GHG reduction target for 2030 and the 2045 goal relative to the City's 2019 baseline emissions level. The space between the trajectory of the black line and the top of the colored wedges represents the "gap" in emissions that will need to be addressed through local actions for the City to meet its GHG reduction target and goal. To address the gap, the City has identified a strategy framework including emissions reduction strategies, measures, and supporting actions. The strategy framework is presented in Chapter 3. Appendix A presents the inventory technical memorandum, Appendix B details the methodology for preparing the communitywide emissions inventory and projections, Appendix C presents the forecast and target technical memorandum, and Appendix D details the methodology for preparing the emissions reduction targets and goals.

Chapter 3 of the Plan identifies emissions reduction measures to that seek to close the following emissions gaps:

77,100 MTCO₂e/year by 2030
400,500 MTCO₂e/year by 2045

Source: Ascent Environmental 2022.

Figure 2.3 Rancho Cordova's Legislative-Adjusted BAU Forecast by Sector, 2030 Emission Reduction Target: 36% below 2019 levels, and 2045 Emission Reduction Goal: 81% below 2019 levels

This page intentionally left blank.

CHAPTER 3:

Emissions Reduction Strategies & Measures

CHAPTER 3: Emissions Reduction Strategies and Measures

3.1 OVERVIEW

This chapter summarizes the fourth component of the Plan development process – the development of emissions reduction strategies and measures (refer to section 1.2 for components of a Plan). It outlines strategies and measures the City can take to achieve the emissions reduction target for 2030 (reducing emissions to 36 percent below 2019 levels) and make substantial progress toward the 2045 goal (reducing emissions to 81 percent below 2019 levels).

3.2 EMISSIONS REDUCTION STRATEGIES AND MEASURES

This Plan includes strategies, measures, and supporting actions that address the following major climate change-related activities that can be influenced by the City's actions:

- ▶ Getting To, From, and Around the City (On-road Transportation Sector)
- ▶ Using Energy in Homes and Businesses (Building Energy Sector)
- ▶ Using Equipment for Landscaping and Construction (Off-Road Vehicle and Equipment Sector)
- ▶ Using Water and Disposing of Waste at Homes and Businesses (Water Supply, Wastewater, and Solid Waste Sectors)
- ▶ Planting and Managing Trees (Carbon Sequestration Sector)

The strategies and measures focus on reducing GHG emissions that are generated from activities occurring in Rancho Cordova. The City will implement these measures in the coming years through planned programs, policies, and projects. Additional to reducing emissions, which is the primary purpose of these strategies and measures, these will also result in added co-benefits that would occur through implementation, such as improved environmental quality, improved health outcomes, enhanced community character, address historic underinvestment, create job opportunities, and improve resilience to climate change impacts.

Implementation of the strategies and measures in this chapter would be adequate to meet the City's 2030 emissions reduction target (36 percent below 2019 levels) and make sufficient progress towards the 2045 goal (81 percent below 2019 levels). However, because the city is already experiencing the effects of climate change, this Plan includes multiple measures to adapt to climate change impacts, discussed in Chapter 4.

Source: Ascent Environmental 2023.

3.3 GREENHOUSE GAS REDUCTION STRATEGY DEVELOPMENT

The implementation of GHG reduction strategies and measures over the years will affect the entire community and these effects will persist for a long time. Hence, it is necessary that the strategies take into consideration the present and future circumstances of the community. This includes taking into consideration the requirements and aspirations of the people as well as the pressure that will be placed on the community resources. To develop strategies that best support community activities and make the best use of community resources, it is important that the whole community works as a unit and contributes to the strategy development process. Hence, the process of developing GHG reduction strategies is critical.

In developing the strategies and measures in this Plan, City staff identified the potential for future projects in the City and gathered input from residents, business owners, and community organizations, through a series of workshops and surveys. The City hosted these public events for residents, business owners, and community leaders where they were able to provide input and feedback on proposed measures. Input from these workshops was used to further define measures and identify measure goals. These outreach efforts are described in Chapter 1, section 1.2.2.

3.3.1 Greenhouse Gas Emissions Reduction Summary

If communitywide emissions in the city were to continue to grow unimpeded, the city is anticipated to generate 816,800 MTCO_{2e} in 2030 and 987,800 MTCO_{2e} in 2045. While legislative reductions would further reduce 301,400 MTCO_{2e} per year, the City would still need to reduce annual emissions by 77,100 MTCO_{2e} by 2030 and 400,500 MTCO_{2e} by 2045 to achieve the proposed emissions reduction targets. Table 3.1 presents the summary of communitywide emissions growth with and without emissions reduction strategies and measures identified in this Plan and Figure 3.1 shows the share of emissions reductions from strategies identified in the Plan for 2030.

Table 3.1 Greenhouse Gas Emissions Reductions Summary

Emissions Sectors	2030 Emissions (MTCO ₂ e)	2045 Emissions (MTCO ₂ e)
BAU Forecast	816,700	987,800
Legislative Reductions	301,400	458,000
Legislative-Adjusted BAU forecast	515,400	529,800
Target Emissions	438,300	129,300
Total Reductions from Strategies and Measures	79,700	307,800
Reductions from On-Road Transportation Measures	54,800	218,200
Reductions from Building Energy Measures	13,600	45,600
Reductions from Off-Road Vehicle and Equipment Measures	1,800	9,500
Reductions from Solid Waste Measures	8,800	32,600
Reductions from Carbon Sequestration Sector Measures	440	1,000
Communitywide Emissions with Strategies and Measures	435,700	222,200

Notes: Numbers are rounded to the nearest thousand; values and totals may not equal the values summed in other tables or figures;

MTCO₂e = metric tons of carbon dioxide equivalent

Figure 3.1 GHG Emissions Reductions from Emissions Reduction Strategies and Measures in 2030

3.3.2 Emissions Reduction Strategies and Measures

To close the gap between the legislative-adjusted BAU forecast and the 2030 emission reduction target, the Plan proposes a Strategy Framework consisting of 14 GHG reduction strategies and 34 GHG emission reduction measures, developed based on a combination of factors, including:

- ▶ the feasibility of the measure to be implemented by the City;
- ▶ existing policies, actions, or programs that can be expanded;
- ▶ proposed policies and plans yet to be adopted;
- ▶ feedback from the community workshops

The Strategy Framework is developed to achieve the 2030 reduction target and make substantial progress toward the 2045 goal. The City has also identified supporting actions that will assist in achieving each strategy's performance target but were not directly quantified toward meeting the City's reduction targets. For each strategy, the reduction strategy framework is shown in the form of tables in the sections below. The tables consist of strategies, measures, annual emissions reduced, percent of the City's total reductions, performance targets, and supporting actions. Each term used in the tables is defined here and emissions reduction strategies and measures details are included in Appendix E.

- ▶ **Strategy:** City's overall approach for reducing GHG emissions from an activity or in a sector.
- ▶ **Measure:** Activities the City could perform to implement a strategy; one or more measures are identified for each strategy.
- ▶ **Supporting Actions:** Specific actions that the City could take to successfully implement the strategy and the measures under that strategy.
- ▶ **Estimated Outcomes:** City-prepared estimates of how the implementation of the proposed measures is anticipated to affect GHG emissions levels and the performance of certain activities. The following outcomes are reported for each measure:
 - **Performance Metric:** Change in the activity that proposed measures have the potential to achieve.
 - **GHG Reduction Potential:** Estimated decrease per year from the associated measures in the target year. Emissions are measured in units of metric tons of carbon dioxide equivalent (MTCO₂e) per year.
 - **Percent of the City's Total Reductions:** Share of the City's total annual emissions reduction in the target year.

Figure 3.2 summarizes the outcomes of emissions reduction strategies and measures identified in this Plan. It shows the contribution of each emissions reduction sector in the City's future emissions in 2030 and 2045 and denotes how much reduction each sector represents in terms of fewer gasoline-powered passenger vehicles driven for one year. Figure 3.3 shows the table template used for presenting the strategy framework under each sector.

Note: Emissions reduction numbers are rounded to the nearest thousand.

Figure 3.3 How to Read Strategies and Measures

GETTING TO, FROM, AND AROUND THE CITY (ON-ROAD TRANSPORTATION SECTOR)

Source: City of Rancho Cordova

The majority of communitywide emissions are from the on-road transportation sector. These emissions are generated by the combustion of fossil fuels (gasoline and diesel) in motor vehicles, and in 2019, this sector accounted for 61 percent of total community GHG emissions. The amount of vehicle miles traveled (VMT) in the city, or the distance of travel by residents and visitors, is the primary factor that determines on-road transportation emissions. VMT in the city is impacted by factors such as accessibility of alternative transportation options (for example, transit) and land use planning. Vehicle fuel efficiency and fuel carbon intensity standards also affect GHG emissions generated by on-road transportation. Legislative reductions from improvements in federal and State vehicle fuel efficiency standards will contribute to reducing transportation emissions by requiring the development of cleaner vehicle fleets. However, the City will have to rely on local actions to reduce the frequency or distance of vehicle travel or reduce the use of internal combustion vehicles by shifting to alternative modes of transportation (for example, bicycling, transit) or alternative fuel types (for example, electric vehicles).

Strategies and Measures

Because the transportation sector represents the largest source of community GHG emissions, it presents the most significant opportunities to achieve emissions reductions. This section outlines transportation and land use-related strategies and measures the City will implement to help meet its emissions reduction targets. Transportation and land use measures are organized under five strategies that will be implemented at the local level in the city with the goal of increasing zero-emission or alternative fuel vehicle use, increasing transportation system efficiency for existing and future travel patterns, and increasing the use of alternative travel modes.

Strategy Transportation-1. Support development of walkable, interconnected neighborhoods, villages, and districts

Emissions reductions can be achieved by reducing the number of trips by car and encouraging active transportation. Under this strategy, the City plans to increase pedestrian connectivity between neighborhoods, villages, and districts in the city and develop infrastructure that encourages walking, riding an electric-powered bike, scooter, or skateboard, or any other way of getting to daily destinations like work, school, recreation, or appointments without using a fossil-fuel motorized vehicle. The four measures provided under this strategy require the community's support for the successful implementation of this strategy. It would reduce emissions by 6,700 MTCO₂e in 2030 and 17,100 MTCO₂e in 2045. This is equivalent to removing 1,441 gasoline-powered passenger vehicles in 2030 and 3,677 gasoline-powered passenger vehicles in 2045 (calculated using USEPA GHG Equivalencies Calculator, 2022). Table 3.2 provides the details of the measures, performance metrics, and supporting actions under this strategy to encourage the use of active modes of transportation.

Table 3.2 Strategy Transportation-1

Strategy Transportation-1 Support development of walkable, interconnected neighborhoods, villages, and districts	
Transportation-1.1: Enforce the City's Transportation Impact Guidelines, which require developers to include features in their projects that decrease the amount of driving alone and encourage people to make trips by walking, biking, or using public transit (Quantified)	
Transportation-1.2: Reduce or eliminate requirements to provide a minimum number of off-street parking spaces in new development projects (Qualitative)	
Transportation-1.3: Improve street connectivity, for example, by providing walkways at the ends of existing cul-de-sacs, or requiring walkable street systems in new developments (Qualitative)	
Transportation-1.4: Limit the number of drive-through businesses (Qualitative)	

Support for City Action Regarding Encouraging people to go to work, school, and other activities without using their private vehicles

Source: 2022 Rancho Cordova Climate Action Plan Public Opinion Survey

Target Year	Performance Metric*	Annual GHG Reduction Potential (MTCO ₂ e)*	Percent of the City's Total Reductions
2030	Total miles driven in a year from new development would decrease by 10% in 2030 (relative to 2030 scenario without the proposed measures)	6,700	8%
2045	Total miles driven in a year from new development would decrease by 15% in 2045 (relative to 2045 scenario without the proposed measures)	17,100	6%

Supporting Actions:

- Increase the density and intensity of residential, commercial, and mixed-use development near public transit.
- To prevent parking spillover, implement permit parking in nearby residential areas and market-rate pricing of public on-street parking.
- Review City codes/regulations and update as needed to ensure businesses/groups have flexibility to use off-street parking spaces for outdoor activities like outdoor dining and retail.
- Update policies on roadway spacing/street networks in new development.
- Convert existing cul-de-sacs or dead ends to grid streets.
- Develop and implement the recommendations of the City's upcoming Roundabout Feasibility Study.
- Unbundle residential parking costs.
- Use improved materials and engineering designs to make walking and transit easier.
- Provide educational programs and campaigns to encourage people to walk, bike, and take transit.

* The calculations, assumptions, research, and other evidence used to identify measure performance metrics and estimate annual GHG reduction potential are provided in CAAP Appendix E.

Strategy Transportation-2. Make walking and biking safe and attractive for people of all ages and abilities

Making active transportation safe and attractive would increase motivation to choose ways of getting around that do not include using a fossil-fuel motorized vehicle. Emissions reductions can be achieved by refining existing laws, enhancing traffic safety laws, set up car-free zones and time slots in the city. The four measures provided under this strategy require collaboration from local and regional agencies and support from residents. The implementation of this strategy would reduce emissions by 11,500 MTCO₂e in 2030 and 12,800 MTCO₂e in 2045. This is equivalent to removing 2,437 gasoline-powered passenger vehicles in 2030 and 2,752 gasoline-powered passenger vehicles in 2045 (calculated using USEPA GHG Equivalencies Calculator, 2022). Table 3.3 provides the details of the measures, performance metrics, and supporting actions under this strategy to encourage the use of active modes of transportation.

Table 3.3 Strategy Transportation-2

Strategy Transportation-2 Make walking and biking safe and attractive for people of all ages and abilities			
Transportation-2.1: Update Bike and Pedestrian Master Plans to increase the number of low-stress bikeways and walkways that connect homes to destinations (Quantified)			
Transportation-2.2: Install roundabouts to control traffic at intersections, instead of stop signs or traffic signals (Qualitative)			
Transportation-2.3: Provide temporary or permanent car-free zones or “slow streets” in specified areas, for example, individual blocks or residential streets (Qualitative)			
Transportation-2.4: Install measures to reduce vehicle speeds and calm traffic on city streets (Qualitative)			
Target Year	Performance Metric*	Annual GHG Reduction Potential (MTCO ₂ e)*	Percent of the City's Total Reductions
2030	Total miles driven in a year from existing (2019) development would decrease by 6% in 2030	11,500	14%
2045	Total miles driven in a year from existing (2019) development would decrease by 7.5% in 2045	12,800	4%
Supporting Actions: - Increase density and intensity of residential, commercial, and mixed-use development in areas (for example, business park / downtown) with infrastructure for walking and biking and getting to daily destinations without a private vehicle. - Combine sidewalk coverage and biking infrastructure with best practices such as high-visibility crosswalks, pedestrian signals, mid-block crossings, refuge islands, speed tables, bulb-outs (curb extensions), curb ramps, signage, pavement markings, landscaping, and other improvements to pedestrian safety. - Require new development to provide and/or pay fair-share contributions toward new and/or improved sidewalks. - Continue to fund and/or construct sidewalk improvements through the Capital Improvement Program - Implement new sidewalk Program in older parts of the city without sidewalks and bikeways currently. - Develop Green Streets design criteria that incorporate Green infrastructure. - Update the Bicycle and Pedestrian Master Plans to create an all ages and abilities network including more separated bikeways and shared-use paths. - Prepare a city-wide plan identifying locations/streets suitable for conversion to temporary or permanent car-free zones. - Update City codes/regulations to provide businesses/groups with flexibility to use streets for events. - Review/update roadway standards and complete streets policy to incorporate traffic calming measures. - Encourage the use of cool pavement materials, colors, and/or treatments on roads, sidewalks, and parking lots to encourage the use of alternative modes of transportation - Implement transit-supportive roadway treatments (for example, signal communication, roadway shelters, curb extensions, rotaries) to optimize traffic flow for transit and personal vehicles - Improve incident management to quickly detect, respond to, and remove traffic incidents and crashes.			

* The calculations, assumptions, research, and other evidence used to identify measure performance metrics and estimate annual GHG reduction potential are provided in CAAP Appendix E.

Strategy Transportation-3. Provide transit options that are accessible, reliable, and convenient

Increasing the use of transit options will further reduce GHG emissions and will provide significant benefits to quality of life and public health. This strategy would achieve emissions reductions by increasing the use of transit. Under this strategy, the City plans to increase transit options and frequency, enhance transit infrastructure, and provide cost-efficient and more convenient options for people of all ages. This strategy consists of four measures and would reduce emissions by 5,800 MTCO₂e in 2030 and 10,200 MTCO₂e in 2045. This is equivalent to removing 1,247 gasoline-powered passenger vehicles in 2030 and 2,193 gasoline-powered passenger vehicles in 2045 (calculated using USEPA GHG Equivalencies Calculator, 2022). Table 3.4 provides the details of the measures, performance metrics, and supporting actions under this strategy to encourage the use of transit options.

Table 3.4 Strategy Transportation-3

Strategy Transportation-3 Provide transit options that are accessible, reliable, and convenient			
Transportation-3.1: Increase the frequency of SacRT bus, CordoVan service, and/or light rail service, or extend service to cover new areas or times of day (Quantified)			
Transportation-3.2: Implement Transit-Supportive Roadway Treatments (for example, transit signal priority, bus-only signal phases, queue jumps, curb extensions to speed passenger loading, and dedicated bus lanes) (Quantified)			
Transportation-3.3: Provide discounted or fare-free transit service (could be universal or targeted to specific areas and/or populations, for example, youth under 18) (Quantified)			
Transportation-3.4: Expand the SmaRT Ride area and convert the shuttles to electric shuttles (Quantified)			
Target Year	Performance Metric*	Annual GHG Reduction Potential (MTCO ₂ e)*	Percent of the City's Total Reductions
2030	Total miles driven in a year from existing (2019) development would decrease by 3% in 2030	5,800	7%
2045	Total miles driven in a year from existing (2019) development would decrease by 6% in 2045	10,200	3%

Supporting Actions:

- Collaborate with Sacramento Regional Transit District (SacRT) to provide new or improved transit amenities like seating, sun/rain shelter, route information, and lighting.
- Require new residential development in proximity to transit to provide owners/tenants with free or discounted transit passes.
- Expand the offerings of SmarT Ride, Sacramento Regional Transit's microtransit program, and collaborate with SacRT to convert fossil-fuel powered shuttles to electric shuttles.
- Evaluate locations of transit stops to improve linkages with the pedestrian and bicycle network.
- Identify barriers and dissuasions to transit use and work with the community and transit district to find solutions.
- Develop and implement a ridesharing subsidy program for trips to/from transit centers.

* The calculations, assumptions, research, and other evidence used to identify measure performance metrics and estimate annual GHG reduction potential are provided in CAAP Appendix E.

Strategy Transportation-4. Reduce drive alone vehicle trips

Reducing the number of single-occupancy vehicle trips and VMT is the most significant way to reduce on-road emissions. This strategy would achieve GHG emission reductions by reducing the number of vehicle trips and VMT. Under this strategy, the City aims to reduce VMT by implementing various programs and plans to provide services, infrastructure, and incentives for not driving alone and instead sharing the ride, taking transit, opting for active modes of transportation, or teleworking. For achieving the target under this strategy, the City would also provide relevant information and incentives to the community. The four measures provided under this strategy require collaboration from local and regional agencies, employers, businesses, and residents. The implementation of this strategy would reduce emissions by 3,800 MTCO₂e in 2030 and 6,800 MTCO₂e in 2045. This is equivalent to removing 817 gasoline-powered passenger vehicles in 2030 and 1,462 gasoline-powered passenger vehicles in 2045 (calculated using USEPA GHG Equivalencies Calculator, 2022). Table 3.5 provides the details of the measures, performance metrics, and supporting actions under this strategy to reduce drive-alone vehicle trips.

Table 3.5 Strategy Transportation-4

Strategy Transportation-4 Reduce drive alone vehicle trips			
Transportation-4.1: Implement a Commuter Trip Reduction Program (CTR) in which companies provide employees with services, infrastructure, and incentives for not driving alone to work and instead ridesharing, taking transit, biking, walking, or teleworking (Quantified)			
Transportation-4.2: Implement an Electric Vehicle Carshare Program in which vehicles are available for users on-demand for short-term rentals (Qualitative)			
Transportation-4.3: Implement a bikeshare/scooter share program in which conventional or electric powered bikes or scooters are available to users on-demand for short-term rentals (Qualitative)			
Transportation-4.4: Provide Community-Based Travel Planning (CBTP) to households in the city in which trained travel advisors visit households to provide them with customized information, incentives, and support to encourage use of transportation options other than driving alone (Qualitative)			
Target Year	Performance Metric*	Annual GHG Reduction Potential (MTCO _{2e})*	Percent of the City's Total Reductions
2030	Total miles driven in a year from existing (2019) development would decrease by 2% in 2030	3,800	5%
2045	Total miles driven in a year from existing (2019) development would decrease by 4% in 2045	6,800	2%
Supporting Actions: - Collaborate and coordinate with the 50 Corridor Transportation Management Association (TMA) for the implementation of CTR program and CBTP. - Implement, or partner with private company to implement CBTP program. - Prepare or enhance CTR program for City employees and require (or encourage voluntary) implementation by other employers. - Implement, or partner with private sector to implement, a car sharing program. - Provide facilities like on-street chargers and priority parking for carshare and bikeshare vehicles. Provide discounted membership to employees. - Provide EV carsharing and bike/scooter sharing at all new affordable housing developments. - Conduct outreach to increase participation in vanpool, carpool, transit programs. - Encourage the construction of roadway treatments to support electric vehicle car-sharing, for example, dedicated parking - Develop infrastructure to expand teleworking options, for example, ensuring sufficient private network bandwidth to accommodate the increase in users' needing remote access, updated security system in computers, advanced password security, and a virtual help desk to support Information Technology issues) - Develop a school pool program to match parents for carpooling - Operate bike kitchens for free bike repairs, bikes, and helmets - Price workplace parking for City employees - Provide tax-free transportation benefits to City employees for using ridesharing, carpool, vanpool, and taking transit - Expand part-time or full-time teleworking options for "telework eligible" City employees			

* The calculations, assumptions, research, and other evidence used to identify measure performance metrics and estimate annual GHG reduction potential are provided in CAAP Appendix E.

Strategy Transportation-5. Transition to electric and zero emission vehicles

The consumption of gasoline and diesel in internal combustion engine vehicles produces nearly half of all GHG emissions in the city. This strategy would achieve GHG emissions reductions by reducing the use of gasoline or diesel-powered vehicles and equipment and transitioning to electric or zero-emissions vehicles for residents, and workers. Increasing EV charging infrastructure to facilitate EV adoption and supporting other low-emission alternative fuels will significantly reduce GHG emissions and improve local air quality and public health. Reductions from this strategy would occur through City projects and development requirements, and partnerships with local businesses, developers, and homeowners. This strategy includes four measures that would reduce the communitywide emissions by 27,000 MTCO₂e in 2030 and 171,300 MTCO₂e in 2045. This is equivalent to removing 5,805 gasoline-powered passenger vehicles in 2030 and 36,830 gasoline-powered passenger vehicles in 2045 (calculated using USEPA GHG Equivalencies Calculator, 2022). Table 3.6 outlines the framework for this strategy. Additional activities that would support this strategy would occur through partnerships with local and regional agencies.

Table 3.6 Strategy Transportation-5

Strategy Transportation-5 Transition to electric and zero emission vehicles			
Transportation-5.1: Install EV chargers in new residential, commercial, and industrial projects (Quantified)			
Transportation-5.2: Install publicly accessible EV chargers on existing private property (Quantified)			
Transportation-5.3: Install EV chargers on public property (Quantified)			
Transportation-5.4: Electrify loading docks and/or require idling-reduction systems (Qualitative)			
Transportation-5.5: Limit new gasoline/diesel fueling stations (Qualitative)			
Target Year	Performance Metric*	Annual GHG Reduction Potential (MTCO ₂ e)*	Percent of the City's Total Reductions
2030	18% of all vehicle miles traveled would be from electric or other zero emissions vehicles in 2030; 1,500 new public and private EV chargers installed by 2030	27,000	34%
2045	85% of all vehicle miles traveled would be from electric or other zero emissions vehicles in 2045	171,300	56%

Supporting Actions:

- a. Amend City code to require installation of chargers and EV charging ready parking spaces beyond minimum CALGreen requirements.
- b. Provide grants to property owners/businesses to install EV chargers.
- c. Require new or updated Specific Plans, Master Plans, and other City plans to incorporate publicly-accessible EV chargers.
- d. Coordinate with the Sacramento Area Plug-in Electric Vehicle Collaborative's Electric Vehicle Readiness and Infrastructure Plan to increase the number of publicly-accessible EV chargers throughout the city.
- e. Pursue available funding opportunities for EV charger installation.
- f. Install publicly-available EV chargers at City facilities, for example, recreation centers and offices, rights-of-way, and SacRT park-and-rides.
- g. Amend City code to require electrification of loading docks and idling-reduction (including monitoring) in new development.
- h. Adopt an ordinance that bans, avoids, or limits the development of new fast-food drive-throughs and gasoline and diesel fuel stations in certain areas of the city.
- i. Ensure EV charging stations are encouraged and allowed through land use designations that currently permit gas fueling stations.
- j. Develop an incentive program for the purchase of electric bicycles and scooters.
- k. Encourage school bus electrification.
- l. Encourage use of public and multimodal transportation for City employees.
- m. Encourage City employees to use alternatively fueled vehicles.
- n. Develop a program to replace the City's gasoline- and diesel-powered fleet vehicles with zero-emission vehicles.

* The calculations, assumptions, research, and other evidence used to identify measure performance metrics and estimate annual GHG reduction potential are provided in CAAP Appendix E.

USING ENERGY IN HOMES AND BUSINESSES (BUILDING ENERGY SECTOR)

Source: City of Rancho Cordova

Emissions in the energy category are generated through residential and non-residential electricity and natural gas use. These sectors accounted for 14 percent and 17 percent of the 2019 communitywide emissions, respectively. With a combined emissions contribution of 31 percent, building energy is the second largest contributor to overall communitywide emissions. Transitioning away from natural gas-powered heating and appliances and electrifying the building stock will reduce emissions in the city. Legislative reductions from State energy efficiency and renewable energy programs will contribute to reducing emissions by increasing the amount of utility supplied renewable energy and improving the energy efficiency of new buildings.

At the local level, GHG emissions reductions would be achieved by decarbonizing buildings and increasing energy efficiency. GHG reductions would also occur by increasing the amount of renewable energy generated locally while reducing the amount of non-renewable energy consumed. Initiatives directed under the energy category rely on efforts by local utilities, organizations, and agencies, with participation from the community.

Strategies and Measures

Being the second largest source of GHG emissions, the building energy sector has significant potential to achieve emissions reductions in the city. This section outlines measures the City will implement in this sector to help meet its 2030 emissions reduction targets. The measures are organized under four strategies that will be implemented at the local level in the City with the goal of increasing energy efficiency and electrification of residential and non-residential buildings.

Strategy Energy-1a. Increase energy efficiency and electrification in existing residential buildings

While State legislative actions provide reductions related to building energy efficiency, additional reductions are achievable by adopting local measures. This strategy aims to reduce emissions by reducing energy consumed by residential consumers through increased energy efficiency and electrification of existing residential buildings. The measure under this strategy would reduce the communitywide emissions by approximately 9,700 MTCO₂e in 2030. Table 3.7 outlines the framework to increase building energy efficiency and electrification under this strategy and the supporting actions that provide additional potential reductions.

Table 3.7 Strategy Energy-1a

Strategy Energy-1a Increase energy efficiency and electrification in existing residential buildings			
Energy-1.1: Retrofit existing residential buildings to improve energy efficiency and reduce natural gas consumption for end uses like space and water heating, clothes drying, cooking (Quantified)			
Target Year	Performance Metric*	Annual GHG Reduction Potential (MTCO ₂ e)*	Percent of the City's Total Reductions
2030	Existing residential natural gas use is 20% lower in 2030; approximately 4,000 existing homes retrofitted by 2030	9,700	12%
2045	Existing residential natural gas use is 60% lower in 2045; approximately 12,000 existing homes retrofitted by 2045	29,000	9%

Supporting Actions:

- Adopt single-family and multifamily residential retrofit requirements to replace fossil fuel-powered space and water heating systems and appliances with electric alternatives, and upgrade other outdated appliances with ENERGY STAR-certified appliances. Upgrade requirements could apply at the point-of-replacement (end of lifecycle or otherwise) or during additions and alterations.
- Implement a Utility User Tax increase of 3% on natural gas to incentivize electrification and generate funding for retrofit projects.
- Provide subsidies for renter-occupied housing owners to limit impacts to renters.
- Collaborate with Sacramento County, PG&E, and SMUD to develop and implement a comprehensive building energy audit and retrofit program to facilitate voluntary residential energy efficiency improvements and electrification. The program should include outreach and education, incentives, and technical assistance.
- Partner with energy agencies to support contractor training and resident education on electric appliances and their installation and maintenance. Create protections for renters and vulnerable community members.

* The calculations, assumptions, research, and other evidence used to identify measure performance metrics and estimate annual GHG reduction potential are provided in CAAP Appendix E.

Strategy Energy-1b. Increase energy efficiency and electrification in existing nonresidential buildings

This strategy aims to reduce emissions by reducing energy consumed by nonresidential consumers through increased energy efficiency and electrification of existing nonresidential buildings. The measure under this strategy would reduce communitywide emissions by approximately 2,100 MTCO₂e in 2030. Table 3.8 outlines the framework to increase building energy efficiency and electrification under this strategy and the supporting actions that provide additional potential reductions.

Table 3.8 Strategy Energy-1b

Strategy Energy-1b Increase energy efficiency and electrification in existing nonresidential buildings			
Energy-1.2: Retrofit existing nonresidential buildings to improve energy efficiency and reduce natural gas consumption for end uses like space and water heating, clothes drying, cooking (Quantified)			
Target Year	Performance Metric*	Annual GHG Reduction Potential (MTCO ₂ e)*	Percent of the City's Total Reductions
2030	Existing nonresidential natural gas use is 10% lower in 2030; 10% of existing nonresidential building area retrofitted by 2030	2,100	3%
2045	Existing nonresidential natural gas use is 48% lower in 2045; 48% of existing nonresidential building area retrofitted by 2045	10,000	3%
Supporting Actions:			
Adopt nonresidential retrofit requirements to require California Green Building Standards Code (CALGreen) Tier 1 energy efficiency compliance and electric space and water heating appliances for large retrofits. Work with SMUD and other regional energy partners to develop rebates or other incentives for electrification retrofits, for example, panel upgrades, heat pumps.			

- b. Implement a Utility User Tax increase of 3% on natural gas to incentivize electrification and generate funding for retrofit projects.
- c. Collaborate with Sacramento County, PG&E, and SMUD to develop and implement a comprehensive building energy audit and retrofit program to enable energy conservation and gas-to-electric conversions in nonresidential buildings for space and water heating.
- d. Provide education and technical and financial assistance.
- e. Enforce California's Building Energy Benchmarking Program, which requires commercial and multi-family buildings over 50,000 sq ft gross floor area to benchmark and disclose energy usage data to the California Energy Commission each year.
- f. Partner with regional energy organizations to support the use of clean hydrogen, renewable natural gas, and other clean alternative fuels for existing industrial uses where electrification is infeasible.
- g. Provide training on the EPA's free online tool, ENERGY STAR Portfolio Manager.
- h. Transition to cleaner energy choice for government owned buildings
- i. Ensure the purchase of energy efficient electric appliances

* The calculations, assumptions, research, and other evidence used to identify measure performance metrics and estimate annual GHG reduction potential are provided in CAAP Appendix E.

Strategy Energy-2a. Increase energy efficiency and electrification in new residential buildings

While most of the city's building energy-related GHG emissions in the future will be generated by existing buildings (buildings that are already built today), the new development will contribute to GHG emissions. Improving the energy efficiency of new buildings, increasing renewable energy installations, and maximizing all-electric development will reduce emissions associated with new development. This strategy aims to reduce emissions by reducing energy consumed by new residential buildings. The measure under this strategy would reduce the communitywide emissions by approximately 1,400 MTCO₂e in 2030. Table 3.9 outlines the framework to increase building energy efficiency and electrification under this strategy and the supporting actions that provide additional potential reductions.

Table 3.9 Strategy Energy-2a

Strategy Energy-2a			
Increase energy efficiency and electrification in new residential buildings			
Energy-2.1: Require new residential development to be all-electric, zero net energy (ZNE) buildings (where the amount of energy used in a year equals the amount of energy generated on the site) (Quantified)			
Target Year	Performance Metric*	Annual GHG Reduction Potential (MTCO ₂ e)*	Percent of the City's Total Reductions
2030	Beginning in 2026, all new housing is all-electric	1,400	2%
2045		5,100	2%
Supporting Actions:			
a. Adopt a reach code requiring all new single-family and low-rise and mid-rise multi-family development to be all-electric, Zero Net Energy buildings (buildings where grid electricity consumption is less than or equal to on-site renewable energy generation).			

- b. Partner with regional green building associations and contractors to strengthen education and awareness to assist developers in building all-electric development.
- c. Work with partners to develop a regional program that encourages the use of building materials that store carbon, such as wood or lower carbon alternatives such as use of wood siding instead of vinyl.

* The calculations, assumptions, research, and other evidence used to identify measure performance metrics and estimate annual GHG reduction potential are provided in CAAP Appendix E.

Strategy Energy-2b. Increase energy efficiency and electrification in new nonresidential buildings

This strategy aims to reduce emissions by reducing energy consumed through increased energy efficiency and electrification of new nonresidential buildings. The measure under this strategy would reduce the communitywide emissions by approximately 430 MTCO₂e in 2030. Table 3.10 outlines the framework to increase building energy efficiency and electrification under this strategy and the supporting actions that provide additional potential reductions.

Table 3.10 Strategy Energy-2b

Energy-2b Increase energy efficiency and electrification in new nonresidential buildings			
Energy-2.2: Require new nonresidential development to achieve energy efficiency above minimum State building code requirements (CAL Green Tier 2) (Quantified)			
Target Year	Performance Metric*	Annual GHG Reduction Potential (MTCO ₂ e)*	Percent of the City's Total Reductions
2030	Beginning in 2026, all new nonresidential development is 30% more energy efficient than the minimum efficiency required by the State building code	430	<1%
2045		1500	1%
Supporting Actions:			
a. Adopt a reach code requiring all new residential and nonresidential buildings to be more energy efficient than minimum requirements under the State's Title 24 Standards. b. Facilitate guidance and training for developers to promote all-electric construction. c. Work with partners to develop a regional program that encourages the use of building materials that store carbon, such as wood and carbon-intensive concrete. d. Ensure that new government owned buildings are all electric.			

* The calculations, assumptions, research, and other evidence used to identify measure performance metrics and estimate annual GHG reduction potential are provided in CAAP Appendix E.

USING EQUIPMENT FOR LANDSCAPING AND CONSTRUCTION (OFF-ROAD VEHICLE AND EQUIPMENT SECTOR)

Source: City of Rancho Cordova

The operation of off-road vehicles and equipment, such as construction vehicles and landscaping equipment, generates GHG emissions through the combustion of fossil fuels, primarily diesel. These sources accounted for approximately 2 percent of emissions in the city in 2019. Without local efforts to reduce GHG emissions from this sector, emissions are expected to rise nearly 34 percent by 2030. Historically, reducing GHG emissions from the off-road vehicles and equipment sector

has been challenging. However, with technological improvements and new State objectives in recent years, emissions reductions from this sector have become more feasible. The City can implement actions that will effectively reduce emissions from off-road vehicles and equipment to help meet its GHG reduction targets.

Strategies and Measures

As other sectors in the city are decarbonized in the future, the off-road vehicles and equipment sector will become an increasingly important focus for local emissions reductions. Off-road vehicles and equipment measures are organized under two strategies that focus on transitioning fossil fuel-powered construction and landscaping equipment to electric and other low-carbon alternatives for reducing GHG emissions.

Strategy Offroad-1. Transition to electric and zero emissions technologies for landscaping equipment

Reducing GHG emissions from landscaping equipment is challenging. To meet the 2030 target, the City would need to go beyond State laws. Under this strategy, the City would target the electrification of existing and new landscaping equipment or the use of other zero-emission alternatives. The measure under this strategy would reduce communitywide emissions by approximately 130 MTCO₂e in 2030. Table 3.11 outlines the framework to decrease GHG emissions under this strategy.

Support for City Action Regarding Encouraging the use of electric- powered instead of gas-powered landscape and construction equipment

Source: 2022 Rancho Cordova Climate Action Plan Public Opinion Survey

Table 3.11 Strategy Offroad-1

Strategy Offroad-1			
Transition to electric and zero emissions technologies for landscaping equipment			
Offroad-1.1: Replace existing gasoline and diesel-powered landscaping equipment with electric or zero emission alternatives (Quantified)			
Offroad-1.2: Convert new landscaping equipment to electric or zero-emission alternatives (Quantified)			
Target Year	Performance Metric*	Annual GHG Reduction Potential (MTCO ₂ e)*	Percent of the City's Total Reductions
2030	30% of existing landscaping equipment is converted to electric, renewable diesel, or other zero-emission alternatives by 2030; 100% of new landscaping equipment sales are electric, renewable diesel, or other zero-emission alternatives starting in 2024 (consistent with Statewide regulation)	130	<1%
2045	100% of new landscaping equipment sales are electric, renewable diesel, or other zero-emission alternatives starting in 2024 (consistent with Statewide regulation)	260	<1%
Supporting Actions: - Collaborate with Sacramento County and SMUD in the creation and promotion of an incentive-based trade in program to encourage residents and business owners to convert or replace their fossil fuel-powered gardening equipment, such as lawn mowers, leaf blowers, and edge trimmers, with electric alternatives. - Consistent with CARB regulations for small off-road engines, adopt an ordinance that reduces the sale of fossil fuel-powered landscaping equipment by 2024 to transition to zero-emission landscaping equipment. - Require all new development to install sufficient exterior electrical outlets for electric-powered landscaping equipment. - Work with SMAQMD to develop an outreach program for residents and local landscaping businesses to increase awareness of currently available zero-emission landscaping equipment. - Develop a program to use alternative fuel and/or zero-emission landscaping equipment in government owned buildings.			

* The calculations, assumptions, research, and other evidence used to identify measure performance metrics and estimate annual GHG reduction potential are provided in CAAP Appendix E.

Strategy Offroad-2. Transition to electric and zero emissions technologies for construction equipment

Diesel burned to operate off-road vehicles and equipment generates GHG emissions and degrades local air quality. Reducing the use of and electrifying vehicles and equipment will result in significant emissions reductions in this sector while improving public health and natural resources. The measure under this strategy would reduce communitywide emissions by approximately 1,700 MTCO₂e in 2030. Table 3.12 outlines the framework to decrease GHG emissions under this strategy.

Table 3.12 Strategy Offroad-2

Strategy Offroad-2			
Transition to electric and zero emissions technologies for construction equipment			
Offroad-2.1: Increase electrification and use of alternative fuels in construction projects (Quantified)			
Offroad-2.2: Reduce construction vehicle idling (Quantified)			
Target Year	Performance Metric*	Annual GHG Reduction Potential (MTCO ₂ e)*	Percent of the City's Total Reductions
2030	10% of construction equipment is electric, renewable diesel, or other zero-emission alternatives by 2030; 10% of generators are electric, renewable diesel, or other zero emission alternatives by 2030	1,700	2%
2045	50% of construction equipment is electric, and 40% of construction equipment uses renewable diesel, or other zero-emission alternatives by 2045; 60% of generators are electric, renewable diesel, or other zero emission alternatives by 2045	9,200	3%
Supporting Actions: - Require all construction projects to use zero- or low-emission equipment options, including electric, renewable diesel, or other alternative fuels, where equipment is commercially available in the region. - Where zero- or low-emission equipment are infeasible or unavailable, require EPA-rated Tier 4 Final diesel engines or cleaner in new construction projects. - Limit the use of diesel-powered generators at construction sites in all new discretionary projects by transitioning to renewable diesel and other zero-emission alternatives, as feasible. - Promote incentives and outreach materials on City websites for battery storage or other clean back-up power technologies. - Enforce the Airborne Toxic Control Measure to Limit Diesel-Fueled Commercial Motor Vehicle Idling, which prohibits diesel-fueled construction vehicles from idling for more than 5 minutes. - Adopt an ordinance that limits vehicle idling to less than 5 minutes. - Discourage idling of construction vehicles and equipment through education and outreach campaigns and enforcement of existing regulations. - Promote partnership with fleet operating companies that monitor their emission generation. - Encourage fleet operators to reduce construction emissions.			

* The calculations, assumptions, research, and other evidence used to identify measure performance metrics and estimate annual GHG reduction potential are provided in CAAP Appendix E.

USING WATER AND DISPOSING OF WASTE AT HOMES AND BUSINESSES (WATER AND SOLID WASTE SECTORS)

Source: City of Rancho Cordova

GHG emissions in the water category are generated by the energy consumed to pump, transport, and treat water and wastewater. It is the city's smallest emissions-generating sector. Emissions from this category accounted for only one percent of the total communitywide emissions in 2019, but reduction measures that reduce water consumption also play an important role in the City to adapt to climate change impacts and develop sustainable practices to conserve water communitywide. State legislative actions will eliminate water supply-related emissions in 2030, but wastewater treatment emissions will continue to grow over time.

Emissions in the solid waste sector are associated with the decomposition of community-generated organic waste in landfills. In 2019, this sector contributed a total of 3 percent of communitywide emissions. The State has adopted a variety of legislative actions aimed at reducing GHG emissions from organic waste, but the City will need to take steps at the local level to effectively reduce waste emissions and achieve its emissions reduction targets. Significant reductions could be made by changing individual behavior through partnerships with local waste haulers and outreach to residents and businesses. Implementing local actions focused on these sectors will increase the pace of GHG emissions reductions while improving community resilience and energy reliability.

Strategies and Measures

Strategy Water-1. Conserve water

Implementing water conservation measures will contribute to improving the resilience of the city to climate change while providing additional benefits to residents, businesses, and the natural environment. The Plan does not assign any reductions to this strategy, because water-related energy needs are assumed to be met by 100% renewable or zero-emission electricity by 2030. It is still helpful to have these measures as reduced consumption of water will result in reduced energy usage for purposes like conveying and treating water. Table 3.13 outlines the framework to decrease GHG emissions under this strategy.

Table 3.13 Strategy Water-1

Strategy Water-1 Conserve water			
Water-1.1: Reduce indoor water use in existing and new buildings (Qualitative)^			
Water-1.2: Reduce outdoor water use for landscaping and irrigation in existing and new developments (Qualitative)^			
Target Year	Performance Metric*	Annual GHG Reduction Potential (MTCO ₂ e)*	Percent of the City's Total Reductions
2030	Existing building water use: indoor 25% lower, outdoor 40% lower; new building water use: indoor 40% lower; outdoor 50% lower	0^	0%
2045	Existing building water use: indoor 40% lower, outdoor 50% lower; new building water use: indoor 60% lower; outdoor 80% lower	0^	0%
Supporting Actions: - Establish requirements for existing buildings to upgrade to high-efficiency water fixtures and appliances and install smart water meters at the time of point-of-sale or during major additions/alterations. - Partner with water suppliers to provide incentives and education for voluntary water fixture and appliance upgrades and smart water meter installations in existing buildings. Promote the use of water-efficient fixture and appliance rebates from water suppliers as funding is available. - Require high-efficiency water fixtures and appliances and smart water meters in new development. - Review the City's Model Water Efficient Landscape Ordinance (MWELO) ordinance and update as needed to require drought-tolerant, water-conserving, and native landscaping in redevelopment and new development projects. - When updating water conservation measures, incorporate measures recommended by the California Department of Water Resources, the California Urban Water Conservation Council, and the Sacramento County Water Agency. - Partner with water suppliers to increase the use of existing incentives (for example, "cash for grass") and develop new incentives for conversion to low-use landscaping. - Require low-use outdoor water systems for irrigation and landscaping in new development, consistent with the City's MWELO guidelines. - Reduce indoor and outdoor water consumption in government owned buildings.			

* The calculations, assumptions, research, and other evidence used to identify measure performance metrics and estimate annual GHG reduction potential are provided in CAAP Appendix E.

^ Emissions reduced from water measures estimated to be zero in 2030 because water-related energy needs assumed to be met by 100% renewable or zero emission electricity

Strategy Solid Waste-1. Avoid disposal of organic waste in landfills

Communitywide emissions would be reduced by diverting waste away from landfills and into other waste streams such as recycling or composting. Implementing strategies and measures to improve waste diversion programs will serve to protect natural resources while minimizing contributions to climate change.

This section outlines the strategies and measures the City will implement to support this objective. The measure under this strategy would reduce communitywide emissions by approximately 8,800 MTCO₂e in 2030. Table 3.14 outlines the framework to decrease GHG emissions under this strategy.

Table 3.14 Solid Waste-1

Strategy Solid Waste-1 Avoid disposal of organic waste in landfills			
Solid Waste-1.1: Increase recovery of edible food waste (Quantified)			
Solid Waste-1.2: Eliminate disposal of organic waste in landfills (food waste, yard waste) (Quantified)			
Target Year	Performance Metric*	Annual GHG Reduction Potential (MTCO ₂ e)*	Percent of the City's Total Reductions
2030	Amount of landfilled waste is 30% lower in 2030 (relative to 2019)	8,800	11%
2045	Amount of landfilled waste is 90% lower in 2045 (relative to 2019)	32,600	11%
Supporting Actions: - Require edible food recovery program partnerships with food generators. Develop a program to connect grocery stores and restaurants with food banks and shelters. - Require local restaurants to compost organic food waste, consistent with SB 1383. - Continue to fund and operate the green waste and food waste pick-up services. - Continue to operate the City's "pay-as-you-throw" and recycling services for residential and commercial waste. - Adopt an ordinance to limit landfill-disposal of organic waste generated by large organizations and events. Require organizations over 50 employees to implement organization-wide waste reduction initiatives, and mandate composting, the use of only compostable or recyclable materials by vendors, and adequate staff to ensure proper disposal at events that require a City-issued permit. - Partner with other local jurisdictions and waste management companies (haulers and landfills) to create a divertible material (for example, recyclables) ban at landfills. - Develop a reuse facility that makes building materials available to customers, and acts as an outlet for reusable items otherwise destined for landfill. - Expand organic waste outreach and education initiatives to improve awareness of benefits and importance of diversion. - Increase waste diversion at government owned buildings. - Increase construction and demolition diversion rates at City construction sites.			

* The calculations, assumptions, research, and other evidence used to identify measure performance metrics and estimate annual GHG reduction potential are provided in CAAP Appendix E.

PLANTING AND MANAGING TREES (CARBON SEQUESTRATION SECTOR)

Source: City of Rancho Cordova

The process of removing atmospheric CO₂ through natural processes is referred to as carbon sequestration. Carbon sequestration is expected to play an important role in addressing the challenge of climate change. California legislation has explicitly mentioned the use of carbon sequestration to achieve the State GHG reduction targets and goals. Trees and other vegetation are a key part of the natural carbon cycle. Through photosynthesis, plants convert carbon dioxide (CO₂) from the atmosphere into oxygen and carbon-based matter. Communities can increase the amount of carbon sequestered locally to reduce community-wide GHG emissions by expanding the urban forest canopy and protecting natural systems.

Strategies and Measures

Strategy Carbon Sequestration-1. Remove emissions from the atmosphere

The presence of trees is a significant source of carbon sequestration and storage in urban areas. This strategy focuses on increasing the number of new trees planted in the city to increase the amount of carbon sequestered. In addition to offsetting CO₂ emissions, increased tree plantings result in co-benefits including improved air quality through the capture of air pollutants and community and public health benefits through the provision of shade and positive impacts on mental health. Implementation of the measure through this strategy would reduce communitywide emissions by approximately 440 MTCO₂e by 2030. Table 3.15 outlines the framework for this strategy. Additional activities that would support the implementation of this strategy would occur through partnerships with other local or regional agencies, updated City ordinances and policies, and community education and outreach activities.

Table 3.15 Strategy Carbon Sequestration-1

Strategy Carbon Sequestration-1 Remove emissions from the atmosphere			
Carbon Storage-1.1: Increase the number of trees in the city, through new plantings and management of existing trees (Quantified)			
Target Year	Performance Metric*	Annual GHG Reduction Potential (MTCO ₂ e)*	Percent of the City's Total Reductions
2030	750 new residential and 750 new City-managed trees planted per year for a total of 16,500 new trees by 2030	440	1%
2045	750 new residential and 750 new City-managed trees planted per year for a total of 39,000 new trees by 2045	1,100	<1%

**Supporting Actions:**

- a. Implement the City's 2022 Urban Forest Master Plan (UFMP).
- b. Achieve a minimum of 20% canopy cover in the developed footprint of the City by 2050. Consistent with the City's Urban Forest Master Plan, plant 750 trees per year on residential properties through the Sacramento Shade Program, and plant 750 City-managed trees per year on public property.
- c. Amend the City's Zoning Code to require new development to plant trees above and beyond existing requirements.
- d. Continue hosting community tree-planting events, and collaborating with other government agencies, such as the Cordova Recreation and Park District, to co-sponsor such events on properties owned by those other agencies, and offering free trees for residents, businesses, and community-based organizations through the City's Urban Forest program. Develop a tree planting program for increasing tree planting at City-owned sites.
- e. Evaluate City regulations and policies, such as building setbacks and roadway cross-sections and design standards, for adequacy to accommodate large shade trees.

* The calculations, assumptions, research, and other evidence used to identify measure performance metrics and estimate annual GHG reduction potential are provided in CAAP Appendix E.

CHAPTER 4:

Climate Adaptation and Resilience

CHAPTER 4:

Climate Adaptation and Resilience

OVERVIEW

This chapter describes the context of climate change adaptation and resilience for the city. It outlines the climate change adaptation planning process; summarizes the city's exposure to existing hazards, sensitivity to these hazards, potential climate-related impacts, and existing adaptive capacity to address these impacts; and introduces adaptation strategies to strengthen local resilience to climate change. Much of the content in this chapter serves as a summary of the City's Vulnerability Assessment (VA), which was developed in preparation of the Plan. The VA, which includes additional information, data, and methodologies, is provided in Appendix F.

CLIMATE ADAPTATION AND VULNERABILITY

The effects of climate change are already occurring at global, regional, and local scales and will continue to worsen existing hazards in and around the city, including extreme heat, extreme precipitation and flooding, drought, and wildfires. While these hazards have existed historically in the city and surrounding regions, the frequency, intensity, and duration of these hazards are projected to increase or change as a result of climate change. The level of impact from these climate hazards will vary across the city and the region due to variations in physical, social, and economic characteristics. Of the four climate hazards assessed for the city, the city, inclusive of its populations and assets, is most vulnerable to the potential impacts of increased temperatures and extreme heat. However, the city is still vulnerable to the other three climate hazards that were assessed – extreme precipitation and flooding, drought, and wildfires – though to a lesser degree.

In addition to reducing its emissions that contribute to climate change, the City is also improving community resilience to climate change impacts, known as climate change adaptation. Community resilience refers to the capacity of a community to prepare for disruptions, to recover from shocks and stresses, and to adapt and grow from disruptive experiences, especially in the context of climate change. Though climate change is a global issue, its impacts are felt locally. Because of this, local adaptation planning efforts are critical in building community resilience and can lead to a greater understanding of climate risks and strategies to minimize their impacts.

ADAPTATION PLANNING PROCESS

The goal of the adaptation planning process is to improve community resilience in the context of climate change. A resilient community is one that is prepared for current and future hazards and experiences minimal harm when they occur. Resilient communities can recover from hazards more quickly and rebuild in a manner that accounts for continued capacity for adapting to climate change.

To assist local governments, the California Governor's Office of Emergency Services (CalOES) prepared the California Adaptation Planning Guide (APG), which provides communities with vulnerability assessment and adaptation planning guidance (CalOES 2020). Most recently updated in June 2020, the APG includes a step-by-step process that communities may use to help plan for the impacts of climate change. The APG provides a framework for communities to identify potential climate change effects and important physical, social, and natural assets; create adaptation strategies to address climate change impacts; and develop a monitoring and implementation framework for climate change adaptation. The APG was followed to prepare the adaptation components of this Plan.

This guide includes a four-phase process, illustrated in Figure 4.1, which allows communities to assess their specific climate vulnerabilities and provides a menu of strategies for communities to reduce climate-related risks and prepare for current and future impacts of climate change.

Source: CalOES 2020.

- ▶ Phase 1, “Explore, Define, and Initiate,” includes scoping and defining the adaptation planning effort. This involves identifying key stakeholders, potential climate change effects, and important populations and assets in the community.
- ▶ Phase 2, “Assess Vulnerability,” includes an analysis of the potential impacts and adaptive capacity associated with climate change hazards to determine the vulnerability of populations and community assets. The vulnerability assessment is composed of four steps: exposure, sensitivity and potential impacts, adaptive capacity, and vulnerability scoring.
- ▶ Phase 3, “Define Adaptation Framework and Strategies,” focuses on developing adaptation strategies to address the risks posed by climate change hazards based on the results of the vulnerability assessment.
- ▶ In Phase 4, “Implement, Monitor, Evaluate, and Adjust,” the adaptation framework is implemented, consistently monitored and evaluated, and adjusted based on continual learning, feedback, or triggers.

Source: CalOES 2020; adapted by Ascent Environmental in 2022.

Figure 4.1 Adaptation Planning Process

VULNERABILITY ASSESSMENT OVERVIEW

The City's VA provides a comprehensive analysis of community vulnerabilities to climate change. It identifies and characterizes climate hazards that are anticipated to impact the community. The VA follows the steps in Phase 2 of the APG and aims to answer the following questions:

- ▶ **Exposure:** what climate hazards does the city currently face? How are these climate hazards projected to change in the future?
- ▶ **Sensitivity and Potential Impacts:** what aspects of the community (for example, population, built environment, community functions) will be affected by climate hazards, and to what degree?
- ▶ **Adaptive Capacity:** what is currently being done to address climate hazards and their associated impacts? What ability does the City have to address impacts in the future?
- ▶ **Vulnerability Scoring:** how vulnerable is the city to climate hazards?

Why

a Vulnerability Assessment?

To effectively adapt to climate change and improve community resilience, the City first needs to understand its vulnerability to climate hazards. This is determined through the Vulnerability Assessment.

The VA was conducted consistent with APG guidance using the steps described above. To summarize historic data and determine future projections for climate hazards in and around the city, Cal-Adapt – a tool developed by the California Energy Commission and the University of California, Berkeley that uses downscaled global climate model data – was used. The severity of future potential impacts from climate hazards on the city's populations, built environment, and community functions will largely depend on the level of current and future global GHG emissions. Two future GHG emissions scenarios, known as Representative Concentration Pathways (RCPs), were used in the VA: the RCP 8.5 scenario, which represents a higher GHG emissions scenario, and the RCP 4.5 scenario, which represents a medium GHG emissions scenario. Climate hazards were evaluated for changes to occur by near-term (2021-2050), midterm (2040-2070), and long-term (2070-2099) timescales.

In addition to Cal-Adapt, several existing resources were reviewed to obtain information about climate-related hazard risks that may threaten the city. Information from California's Fourth Climate Change Assessment: Sacramento Valley Region Report (OPR, CEC, and CNRA 2018), along with a variety of additional resources (see Appendix F), were reviewed to further assess climate hazards in the city.

VULNERABILITY ASSESSMENT SUMMARY

The VA was prepared to help the City understand its vulnerability to climate hazards, which includes increased temperatures and extreme heat, extreme precipitation and flooding, drought, and wildfires. Additionally, the results of the VA were used to inform adaptation strategies intended to improve the City's resilience to each identified climate hazard. The full VA, including detailed data, additional information, and references, is provided in Appendix F to this Plan.

Climate Hazards Facing the City

Source: City of Rancho Cordova

The following sections provide a snapshot of the city's projected exposure to climate hazards and potential impacts to the city's populations, built environment, and community functions. Populations include residents, visitors, and segments of the population that are particularly vulnerable to climate change impacts, such as children, pregnant people, the elderly, communities of color, low-income individuals, individuals with access or functional needs, individuals with preexisting health issues, individuals experiencing homelessness, and outdoor workers, among others. The built environment consists of a set of assets that are essential to the health and welfare of residents and visitors and are especially important during and proceeding climate

hazard events. This includes residential and commercial buildings; critical facilities; transportation infrastructure; and utility infrastructure. Community functions are the resources, assets, operations, economic sectors, and services that are created or influenced by the interaction between populations and the built environment, are essential to public health and welfare, and allow day-to-day activities to continue in the city and the region.

INCREASED TEMPERATURES AND EXTREME HEAT

The city has experienced, and is projected to continue experiencing, increases in average annual temperature and extreme heat, which could lead to an array of potential impacts, including negative public health outcomes, worsened air quality, increased demand for air conditioning, and deterioration of critical infrastructure. According to Cal-Adapt, the average annual maximum and minimum temperature in the city are both projected to rise between 5 and 9 °F by the end of the century as a result of climate change (CEC 2021a). Increased temperatures in the city will also lead to a significant increase in extreme heat events. For the city, an extreme heat day is defined as a day when the maximum temperature is above the extreme heat threshold of 103.6 °F, which is notably high compared to other regions of the State. Heat waves refer to a period of four or more consecutive extreme heat days (CEC 2021b). The average annual number of extreme heat days, heat waves, and the number of days in the longest stretch of consecutive extreme heat days are all projected to rise through the end of the century.

Extreme heat thresholds are unique to every location. Rancho Cordova's threshold is 103.6 °F, which means that 98% of daily maximum temperatures in the city between the months of April and October from 1961 to 1990 were below this temperature.

Tables 4.1 and 4.2 display historic data and future projections for increased temperatures and extreme heat in the city across each timescale through 2099.

Table 4.1 Changes in Average Annual Temperature in the City of Rancho Cordova

Average Annual Temperature	Historic (1961-1990)	Near-Term (2021-2050)	Midterm (2040-2070)	Long-Term (2070-2099)	
				Medium Emissions	High Emissions
Maximum Temperature (°F)	74.2	78.3	79.8	80.2	83.1
Minimum Temperature (°F)	49.3	52.9	54.1	54.3	57.7

Note: °F = degrees Fahrenheit.

Source: CEC 2021a.

Table 4.2 Changes in Extreme Heat in the City of Rancho Cordova

Annual Averages	Historic (1961-1990)	Near-Term (2021-2050)	Midterm (2040-2070)	Long-Term (2070-2099)	
				Medium Emissions	High Emissions
Number of Extreme Heat Days	4	19	32	29	48
Number of Heat Waves	0.2	1.4	4.8	4.0	7.8
Number of Days in Longest Stretch of Consecutive Extreme Heat Days	2.5	6.3	7.2	8.5	14.2

Source: CEC 2021b.

Regarding potential impacts, the city's populations are at significant risk of being harmed by increased temperatures and extreme heat. Extreme heat can be harmful to public health, especially for vulnerable populations, such as persons over the age of 65, infants and children, individuals with chronic health conditions, low-income individuals, people experiencing homelessness, and outdoor workers, among others. Notably, extreme heat can worsen local air quality and may cause heat-related illnesses, such as heat cramps or heat stroke. Additionally, increased temperatures and extreme heat may lead to a large increase in air conditioning demand across the city, placing more stress on the electricity grid, leading to higher-cost electricity bills for residents who have air conditioning access, and causing disproportionate impacts on individuals or families residing in units that do not have air conditioning. Further, the city's transportation systems are at risk of being adversely affected by increased temperatures and extreme heat. During prolonged periods of increased temperatures or extreme heat, pavement may deteriorate, rail lines may buckle, the structural integrity of bridges may be compromised, air conditioning in buses could fail, and overall transportation maintenance costs may increase. Further details on the potential impacts of increased temperatures and extreme heat can be found in the VA, located in Appendix F.

EXTREME PRECIPITATION AND FLOODING

Sacramento County, inclusive of the city, is projected to experience an increase in average annual precipitation through the end of the century, and much of the precipitation is likely to occur during extreme precipitation events, which can lead to flood impacts throughout the city. According to Cal-Adapt, the historic average annual precipitation in Sacramento County is 18.3 inches. As shown in Table 4.3, the average annual precipitation in the county is projected to increase between roughly 2 and 4 inches by the end of the century (CEC 2021a).

Source: City of Rancho Cordova

In general, California's climate oscillates between extremely dry and extremely wet periods with annual precipitation varying widely from year to year. Like other California regions, the high year-to-year variability of precipitation in the city is severely affected by the meteorological phenomenon known as an atmospheric river, which accumulates moisture from tropical regions in the Pacific and moves water vapor towards California. In California, atmospheric rivers vary in intensity; some are beneficial for water supply and replenish snowpack that naturally melts during the summer, serving as water supply for people and agriculture, while others are responsible for widespread adverse impacts (NOAA 2021). Extreme precipitation from these atmospheric rivers in the future may prove to be more variable, volatile, and potentially more severe. Noting this, the city may experience changes in the frequency and/or intensity of flood events, though the exact frequency, intensity, and duration of these events will vary annually.

Table 4.3 Changes in Average Annual Precipitation in Sacramento County

Annual Averages	Historic (1961-1990)	Near Term (2021–2050)	Midterm (2040–2070)	Long-Term (2070-2099)	
				Medium Emissions	High Emissions
Average Annual Precipitation	18.3	20.1	20.2	20.3	22.1
Percent Change from Historic Period	NA	+10%	+10%	+11%	+21%

Source: CEC 2021a.

Regarding potential impacts of extreme precipitation and flooding, there is an array of facilities and properties in the city that are at direct risk from flooding, as they lie within the city's 100- and 500-year floodplains. Most notably, this includes over 1,000 residential properties, but also multiple other facility types in or near the city's floodplains, including retail and utilities. Figure 4.2 displays critical facilities within the city and their proximity to the 100- and 500-year floodplains. Additionally, there are currently two levees in the city which protect residential neighborhoods: Cordova Meadows Levee and Sunriver Levee. These levee systems will be at increased risk of failure due to the potential for more intense and frequent extreme precipitation events in the future. A more comprehensive analysis of precipitation and flooding can be found in the VA, located in Appendix F.

DROUGHT AND WATER SUPPLY

Source: City of Rancho Cordova

The city and State have a highly variable climate that is susceptible to prolonged periods of drought, and recent research suggests that extended drought occurrences (or “mega-droughts”) could become more pervasive in future decades, which may result in major impacts on the city’s water supplies and other secondary impacts (CEC 2021c). While this may seem contradictory to the projections that the city is expected to see more average annual precipitation in future years as a result of climate change, overall precipitation patterns are projected to change, with precipitation variability expected to increase substantially. In other words, some years, compared to average, may be

abnormally wet, while other years may be extremely dry. With the oscillation between wet and dry years and the potential for precipitation to occur over shorter, more intense time periods, there will be reduced opportunities for groundwater recharge, as these are not favorable conditions for soil infiltration and deep percolation. The City’s water supplies are currently dependent upon a combination of ground- and surface-water resources and are provided by three primary water purveyors providing services within the City’s planning area: Sacramento County Water Agency; Golden State Water Company; and California-American Water Company (City of Rancho Cordova 2006). It should be noted that actual occurrence and duration of droughts are difficult to predict, but the city and surrounding regions are expected to experience extended drought periods as a result of climate change, and without effective adaptation actions or initiatives, future droughts may challenge the management of the region’s water supplies, inclusive of the city.

Regarding potential impacts of drought, in the event of a severe and sustained drought lasting multiple years, water supplies provided to the city could be severely affected and result in the need for increased water conservation efforts to be implemented by the city and other surrounding jurisdictions. In addition to adverse impacts on water supplies, droughts may create cascading effects on community functions. For example, extended drought periods in the future may result in decreases in tourism and recreation opportunities in nearby water bodies, such as the American River and Folsom Lake. Decreased tourism and recreation opportunities could result in less pass-through visitors, leading to impacts on local businesses and the economy. Additionally, potential drought-induced water shortages can endanger ecological systems, as well as residents through related mental health issues, increased dust particle concentration, and favorable conditions for valley fever. Further details related to the potential impacts of drought on the city can be found in the VA (see Appendix F).

WILDFIRE

The Sacramento Valley Region, inclusive of the city, is projected to continue experiencing increases in average annual area burned by wildfire, which can result in an array of cascading impacts on the city. Climate change is exacerbating many of the factors that contribute to wildfire risk. Increased variability in precipitation may lead to wetter winters and increased vegetative growth in the spring, and potentially longer and hotter summer periods will lead to the drying of vegetative growth, which may ultimately result in a greater amount of fuel for wildfire ignition and spread. This has already been seen across the State in recent years, with the area burned by wildfires increasing in parallel with rising air temperatures (OEHHA 2018).

Source: Sacramento County 2021; critical facilities data provided by City of Rancho Cordova staff.

Figure 4.2 Floodplains and Critical Facilities in the City of Rancho Cordova

These factors, combined with intense wind conditions, cause wildfires to spread rapidly and irregularly, making it difficult to predict wildfires' paths and effectively deploy fire suppression forces. Relative humidity is also an important wildfire-related weather factor; as humidity levels drop, dry air causes vegetation moisture levels to decrease, which consequently increases the likelihood that plant material will ignite and burn. With an increase in hotter and drier landscapes, humidity levels may continue to drop and result in higher fuel levels, increasing the risk of wildfire (Schwartz et al., 2015).

Source: City of Rancho Cordova

Though there does exist “Moderate” Fire Hazard Severity Zones (FHSZs) in the city, the likelihood of wildfires burning within city limits is relatively low. However, it has been shown in the past that the city can be impacted by regional wildfire impacts, such as wildfire smoke, and this trend is projected to continue into the future. According to Cal-Adapt, and as shown in Table 4.4, the total area burned annually by wildfire within the Sacramento Valley region is expected increase from the historic (1961-1990) annual average of 20,956 hectares to 23,942 hectares in the near-term and 28,759 hectares in the midterm. In the long-term, average annual area burned in the region is projected to increase to 31,670 hectares under the medium emissions scenario, and to 41,784 hectares under the high emissions scenarios (CEC 2021d).

Table 4.4 Changes in Annual Average Area Burned in the Sacramento Valley Region

Annual Averages	Historic (1961-1990)	Near-Term (2021-2050)	Midterm (2035-2064)	Long-Term (2070-2099)	
				Medium Emissions	High Emissions
Average Annual Area Burned (hectares)	20,956	23,942	28,759	31,670	41,784

Note: Observed historical average annual area burned data was not available from Cal-Adapt; the modeled historical average annual area burned data under the medium emissions scenario (RCP 4.5) was available and used as proxy data.

Source: CEC 2021d.

The potential impacts on the city related to wildfire in the context of climate change are primarily indirect impacts but can still have severe outcomes. These potential impacts can range from wildfire smoke-related human health impacts to disruptions to transportation behavior and the increased prevalence of Public Safety Power Shutoff (PSPS) events. Exposure to wildfire smoke, particularly by vulnerable populations, can result in worsening respiratory symptoms, increased rates of emergency room visits, hospitalizations, and even death (Rappold et al. 2017). If wildfire evacuations were to ever occur in the city or surrounding regions, vulnerable populations, such as linguistically isolated households, senior citizens, and individuals experiencing homelessness, would be adversely affected due to: inability to access, receive, or understand warning messages and evacuation notices; limited ability to evacuate due to lack of mobility; limited situational understanding from cognitive conditions; and reliance on medication or treatment devices. Additionally, there may be increases in traffic congestion due to wildfire-related road closures. PSPS events, which are enacted during high wildfire risk conditions, can result in communities experiencing no electricity for several days at a time, which can adversely affect certain populations within the city, especially when coupled with extreme heat. Further details on potential wildfire impacts to the city can be found in the VA (see Appendix F).

City's Adaptive Capacity

The third step in the vulnerability assessment process is to evaluate the city's adaptive capacity, which refers to a community's current and future ability to cope with potential impacts from climate hazards. Within the VA, a review of existing local policies, plans, programs, and resources, as well as those from relevant regional and State agencies and organizations, was conducted to evaluate the city's adaptive capacity to each climate hazard. Table 4.5 below displays a snapshot of existing plans and reports that contribute to the City's adaptive capacity to address the anticipated impacts of climate hazards.

Table 4.5 Summary of Existing Plans that Contribute to the City's Adaptive Capacity

Plan or Report	Climate Hazard			
	Increased Temperatures and Extreme Heat	Extreme Precipitation and Flooding	Drought and Water Supply	Wildfire
Sacramento County LHMP Annex	✓	✓	✓	✓
City's General Plan		✓	✓	✓
California's Fourth Climate Change Assessment Sacramento Valley Regional Report	✓	✓	✓	✓
Caltrans Climate Change Vulnerability Assessment District 3	✓	✓		✓
City Water Purveyor's Urban Water Management Plans		✓		
City's Emergency Operations Plan		✓	✓	✓

Vulnerability Scoring

The final step in the vulnerability assessment process is to characterize the city's vulnerability to each climate hazard, which is assessed based on the magnitude of risk to and potential impacts on populations, the built environment, and community functions while considering the current adaptive capacity in place to mitigate these impacts. An overall vulnerability score was assigned for each climate hazard based on their associated scores for potential impacts and adaptive capacity. The scoring rubrics for potential impacts and adaptive capacity, along with justifications for the scores, can be found in the VA (see Appendix F). Vulnerability scoring can help the City understand which climate hazards should be prioritized in future planning efforts. Table 4.6 presents the rubric used to determine overall vulnerability scores based on the ratings for potential impacts and adaptive capacity.

Table 4.6 Vulnerability Scoring Rubric

Vulnerability Score				
Adaptive Capacity	Low	3	4	5
	Medium	2	3	4
	High	1	2	3
		Low	Medium	High
Potential Impacts				

Source: CalOES 2020; adapted by Ascent Environmental in 2023.

Vulnerability scoring for each identified climate hazard – increased temperatures and extreme heat, extreme precipitation and flooding, drought and water supply, and wildfire – is included in Table 4.7 below. The table shows that increased temperatures and extreme heat is assigned a vulnerability score of 5 and therefore should be a high priority for the City. Extreme precipitation and flooding was assigned a vulnerability score of 4, and drought and water supply was assigned a vulnerability score of 3. These climate hazards are likely to have significant impacts on the City’s populations, built environment, and community functions in the near-term, and although a variety of adaptive efforts related to both climate hazards are in place and underway, the magnitude of the risks posed by these hazards contributes to increased vulnerability for the City. Increased wildfire risk is characterized as having a vulnerability score of 2. This climate hazard will likely have lower priority impacts on the City and is currently being addressed adequately based on existing conditions, but additional adaptation and resilience planning will be required in the future to mitigate impacts and protect the city.

Table 4.7 Vulnerability Scoring Summary for the City of Rancho Cordova

Climate Hazard	Vulnerability Score		
	Adaptive Capacity	Potential Impacts	Vulnerability
Increased Temperatures and Extreme Heat	Low	High	5
Extreme Precipitation and Flooding	Medium	High	4
Drought and Water Supply	Medium	Medium	3
Wildfire	High	Medium	2

Source: Ascent Environmental 2023.

ADAPTATION STRATEGIES

This section includes a set of adaptation strategies that are intended to help the City prepare for and become more resilient to the impacts of climate change. The strategies have been developed based on the findings of the vulnerability assessment, discussed above, and are designed to complement the existing set of local and regional plans that address natural hazards in the city. There are five separate overarching adaptation strategies:

- ▶ **Strategy Adaptation-1:** Improve resilience to increased temperatures and extreme heat.
- ▶ **Strategy Adaptation-2:** Improve resilience to extreme precipitation and flooding.
- ▶ **Strategy Adaptation-3:** Improve resilience to drought.
- ▶ **Strategy Adaptation-4:** Improve resilience to wildfires.
- ▶ **Strategy Adaptation-5:** Promote holistic community resilience in the context of climate change.

Similar to the GHG reduction strategies presented in Chapter 3, the adaptation strategies are further broken down by objectives, and then actions. In some instances, specific actions mirror some of the actions already underscored in other local plans, such as the City’s Annex to the Sacramento County Multi-Jurisdictional Local Hazard Mitigation Plan (LHMP). These actions are also included in this Plan to emphasize the climate resilience benefit of implementing the action. Each of the strategies, measures, and actions are presented in Table 4.8 below.

Table 4.8 Adaptation Strategies

Strategy Adaptation-1. Improve resilience to increased temperatures and extreme heat.	
Objectives:	
▶ Reduce the urban heat island effect. ▶ Protect populations from extreme heat.	
Actions:	
1a. Promote the use of “cool” roofs on both new and existing residential and nonresidential buildings. 1b. Pilot and monitor benefits of “cool” pavement in residential neighborhoods. 1c. Conduct a mapping exercise to determine locations around the city that experience the greatest impact from the urban heat island effect and utilize this information to prioritize locations for increased tree planting and sustained tree management. 1d. Continue hosting community tree-planting events, and collaborating with other government agencies, such as the Cordova Recreation and Park District, to co-sponsor such events on properties owned by those other agencies, and offering free trees for residents, businesses, and community-based organizations through the City’s Urban Forest program. Develop a tree planting program for increasing tree planting at City-owned sites. 1e. Explore opportunities to further increase shading of buildings and parking lots using trees and/or solar canopies. 1f. Preserve, enhance, increase, and establish community green areas, such as parks, recreational facilities, and open space. 1g. Expand cooling center access during extreme heat events through extended hours, more locations, and less stringent criteria for opening. 1h. Partner with community-based organizations, faith-based organizations, businesses, and other public agencies to develop a “Community Cool Zone Network” comprised of air-conditioned spaces that are made available to vulnerable populations during extreme heat events to prevent heat-related illnesses. 1i. Support employers to protect worker health from extreme heat, especially those working in vulnerable occupations, through targeted outreach and information-sharing about extreme heat risks, applicable regulations, and strategies to reduce risk. 1j. Develop a “Cool Buddy” program where local volunteers are trained to build neighborhood networks, identify heat-vulnerable neighbors, and set up systems to check in on each other during extreme heat events. 1k. Develop public awareness campaigns that bolster extreme heat event preparedness actions and adaptation strategies. 1l. Support a comprehensive outreach campaign to prevent heat-related illnesses among vulnerable populations, including, but not limited to, children, seniors, people experiencing homelessness, people with disabilities in the care of licensed facilities, and workers in vulnerable occupations.	

Strategy Adaptation-2. Improve resilience to extreme precipitation and flooding.

Objectives:

- ▶ Promote climate-smart flood management.
- ▶ Add redundancy to the City's flood management system.

Actions:

- 2a. Prioritize the implementation and use of green infrastructure to manage future flood risk.
- 2b. Coordinate with landowners to manage stormwater runoff through sustainable land conservation practices.
- 2c. Utilize vacant lots to build flood control detention basins and replace undersized culverts to better address flooding from future extreme precipitation events.
- 2d. Encourage the use of porous pavement and vegetative buffers in large parking areas.
- 2e. Seek funding to purchase and install battery-powered generators for each of the City's six pump stations, which serve to convey stormwater during precipitation events.
- 2f. Implement flood control projects identified in the Stormwater Capital Improvement Program Master Plan to help resolve existing flooding issues and prevent future impacts from extreme precipitation events.
- 2g. Encourage residents located within the 100- and 500-year floodplain to obtain flood insurance through the National Flood Insurance Program.
- 2h. Continue to enforce the requirements of the Parkway Corridor overlay zoning district (Municipal Code Section 23.325.070) to regulate property along the American River in the city.

Strategy Adaptation-3. Improve resilience to drought.

Objectives:

- ▶ Reduce water consumption.
- ▶ Ensure long-term sustainability and reliability of the City's water supplies.

Actions:

- 3a. Continue promoting water conservation tips and measures across the City's websites and social media platforms.
- 3b. Continue offering assistance to residents for drought-tolerant landscapes through the City's beautification program, and seek to expand assistance through other actions, such as developing a "Cash for Grass" lawn replacement program.
- 3c. Update MWEL0 to go beyond State requirement to plan drought-tolerant and water-conserving landscaping in new development projects.
- 3d. Coordinate with local water suppliers to establish and monitor progress on a citywide per capita water use reduction target.
- 3e. Educate the public about the benefits and water conservation potential of rainwater catchment and greywater systems.
- 3f. Promote the installation of water-efficient fixtures, appliances, and equipment in new development and as part of retrofits for existing development.
- 3g. Support the development of extended drought scenario analyses as part of future updates to Urban Water Management Plans and Water Shortage Contingency Plans of local water suppliers.
- 3h. Coordinate with local water suppliers to support the development of recycled water systems.

Strategy Adaptation-4. Improve resilience to wildfires.

Objectives:

- ▶ Protect populations from wildfire smoke and poor air quality.
- ▶ Mitigate the impacts from potential Public Safety Power Shutoff events during high wildfire risk conditions.

Actions:

- 4a. Develop and implement a wildfire smoke protection outreach strategy.
- 4b. Monitor employers to ensure compliance with California Code of Regulations, Title 8, Section 5141.1, which requires employers to protect workers who may be exposed to wildfire smoke.
- 4c. Take steps to ensure that the City's building stock is outfitted with indoor air purification systems capable of enhancing and protecting public health from wildfire smoke and poor air quality.
- 4d. Support the installation of battery storage systems in existing residential and nonresidential development.
- 4e. Coordinate with and promote SMUD's battery storage incentives for residents and businesses.

Strategy Adaptation-5. Promote holistic community resilience in the context of climate change.

Objectives:

- ▶ Coordinate equitable education, outreach, and engagement.
- ▶ Promote robust emergency services and other planning activities.
- ▶ Protect the built environment from climate hazards.

Actions:

- 5a. Through a multi-pronged approach, enhance public education and awareness of climate hazards and public understanding of disaster preparedness, prioritizing engagement with vulnerable populations (for example, workshops, displays, websites, public-private partnerships).
- 5b. Provide tailored, preparedness-oriented outreach to vulnerable populations across the city regarding climate hazards that are most applicable and specific to them (for example, flood preparedness outreach for residents residing within the city's 100- and 500-year floodplains).
- 5c. Embed climate resiliency and adaptation across City plans, programs, and activities to account for changing hazard profiles and their associated impacts.
- 5d. Prioritize making emergency services more accessible, especially for vulnerable populations.
- 5e. Encourage residents to enroll in the Sacramento Region Emergency Notification System.
- 5f. Maintain up-to-date emergency preparedness and evacuation plans and procedures in coordination with appropriate State, regional, county, and local agencies and departments.
- 5g. Encourage roundabouts in place of traffic signals where appropriate for increased ability to evacuate and traffic flow.
- 5h. Ensure interconnectivity and road standards are maintained for evacuation routes and disaster preparedness purposes.
- 5i. Develop a clean energy microgrid for essential City facilities to support resilient emergency operations.
- 5j. Integrate climate-smart natural resource management into City operations, incorporating climate projection data, risk modeling, and adaptive management, as appropriate, to account for future changes in climate hazards in natural resource projects.

- 5k. Evaluate and update the City's building and engineering standards to account for climate hazards that are likely to affect critical infrastructure, such as extreme heat and extreme precipitation and flooding.
- 5l. Identify and upgrade vulnerable critical infrastructure (for example, utility, transportation, and so on) through the City's Capital Improvement Projects planning process.
- 5m. Promote building retrofits to include climate resilience features (for example, home hardening improvements, weatherization improvements, adequate climate control equipment with air filtration systems).

CHAPTER 5: Implementation and Monitoring

CHAPTER 5: Implementation and Monitoring

5.1 OVERVIEW

This chapter summarizes the last component of the Plan development process – implementation and monitoring. To achieve the GHG emissions reductions described in Chapter 3, measures should be regularly assessed and monitored to determine if:

- (1) they are effective;
- (2) the Plan is on track to achieve the GHG reduction targets; and
- (3) desired outcomes are achieved.

This chapter describes how the City will implement the strategies and measures identified in this Plan, and how the City will assess and monitor the progress. Along with sharing the City's implementation and monitoring strategy, this chapter also states the California Environmental Quality Act (CEQA) **future** streamlining **opportunities** of this Plan. Figure 5.1 highlights the key components of implementing and monitoring the plan. **Updated as of June 2024.**

ADOPT A CLIMATE ACTION AND ADAPTATION PLAN

Source: Ascent Environmental 2023.

Figure 5.1 Key Components of Implementing and Monitoring the Plan

5.2 IMPLEMENTATION STRATEGY

After the adoption of this Plan, the City will develop an implementation strategy for the Plan measures. The implementation plan will be based on several factors such as budget capacity and availability of funding opportunities. Potential funding opportunities to support Plan implementation are summarized below.

Implementing this Plan will involve the City Council, Planning Commission, and coordination with other boards, commissions, and City departments. Implementation will involve collaboration with the Sacramento Municipal Utility District (“SMUD”), the County of Sacramento, other public and private agencies, and neighboring cities to implement strategies and measures requiring regional collaboration. The success of Plan implementation will also depend on the participation of residents, businesses, and other stakeholders in the city and region.

The City will implement the measures of the Plan through several types of programs and activities that may include changes in municipal operations; new ordinances or code updates; development conditions of approval; advanced planning efforts; provision of incentives or financing; public agency or private partnerships; and education and outreach. While each measure identified in the Plan would fall into these categories, some measures overlap and belong to more than one category. Descriptions of each implementation category are provided below.

- ▶ **Municipal Operations:** City specific actions to update and make municipal operations more efficient. These measures would be implemented by the City and would reduce emissions specifically related to municipal operations.
- ▶ **New Ordinances and Code Updates:** Implementation of several measures in the Plan would occur through new ordinances adopted by the City or through amendments to the Municipal Code.
- ▶ **Planning:** The Plan identifies measures that are more programmatic in nature and require visioning and long-term planning efforts to allow for GHG reductions.
- ▶ **Financing and Incentives:** Successful implementation of Plan measures requires identifying mechanisms for funding and allocating resources. Further, several measures identified in the Plan would be implemented by community residents, business owners, other local agencies, and developers.
- ▶ **Partnerships:** Interagency coordination and collaboration with other organizations are critical to ensuring the implementation of certain measures.
- ▶ **Education and Outreach:** Education and outreach efforts about the goals of the Plan will help create support for the Plan and involve the community in its implementation. These efforts would be intended to increase participation and awareness and could include informing residents about potential GHG reductions and co-benefits of various measures.

The Plan’s effective implementation will require a process to prioritize its strategies and measures periodically. Implementation priority is determined by a variety of factors, including the timeframe of implementation, the effectiveness of measures in reducing GHG emissions, the impact on neighborhoods, staff resources needed, and the required level of department/agency collaboration.

5.3 MONITORING AND UPDATES

The City will begin implementing Plan measures and actions after Plan adoption. The Plan will be monitored over time to assess the progress by tracking performance metrics for each strategy. Changing circumstances, such as State and federal laws and programs, updates to climate science, changes in technology, or evolving local, State, federal, or even global economic and social conditions, may necessitate changes to the Plan.

If the Plan is not achieving the desired outcomes, the measures or actions will need to be altered or amended. This will require periodic updates to the GHG emissions inventories and vulnerability assessment, as well as analyzing individual action performance.

City staff will evaluate the performance of the GHG reduction strategies and measures over time. Evaluating the performance requires monitoring the level of community participation, costs, and potential barriers to implementation, as well as activities that result in GHG emissions reductions like actual reductions in fuel consumption, vehicle miles traveled, energy usage, water usage, landfilled waste, and so on. In addition to considering these factors, assessing the performance of Plan adaptation actions will be informed by resilience-related improvements in the community. The City staff will regularly monitor and report on adaptation and climate hazards and will update the strategies and actions when needed. By evaluating whether the implementation of an action is on track to achieve its objective, the City can identify successful actions and reevaluate or replace underperforming measures. Continued implementation of the City's GHG reduction efforts would support overall GHG reductions and Plan implementation. Periodically, City staff will present a summary of Plan implementation progress to date to the Planning Commission and City Council.

Why

a monitoring strategy?

- to evaluate the performance of CAP
- to understand which measures or actions need to be amended
- to understand and mitigate any barriers to implementation

To provide updates on Plan implementation progress, City staff will prepare a monitoring report every two years. This process will provide updates on the Plan implementation progress, including the status of actions implemented to achieve GHG reductions and improve resilience as well as other important milestones in the implementation process. As technologies and markets change and the City implements the actions identified in the Plan, the monitoring report will be used to track progress and identify actions that need to be improved, adjusted, or removed. The report will also be used for periodic presentations to the City Council about implementation progress on actions and overall progress towards Plan objectives. It would also serve to provide transparency and promote engagement with the public for Plan implementation. At a minimum, the report prepared every two years will include:

- ▶ Metrics illustrating Plan measure performance, individually and in aggregate (for example, GHG emissions reductions, participation rates, activity data, percent work completed);
- ▶ Implementation costs and funding needs;
- ▶ Community benefits realized;
- ▶ Any barriers to implementation;
- ▶ Recommendations, if any, for removal or changes to individual measures or identification of new measures; and
- ▶ Recommendations, if any, for changes to this Plan and/or preparation of a new Plan.

Finally, the City will prepare a GHG emissions inventory and an update to the plan every five years, with the first update due in 2028. The Plan Update would reflect the findings and recommendations of the monitoring reports and inventory updates. Table 5.1 shows the City's implementation and monitoring timeframe.

Table 5.1 City's Implementation and Monitoring Timeframe

Year	Milestone	Description
2023	Plan adopted	City Council adopts the Plan.
2023	Develop Implementation Strategy	City staff begins to develop the implementation strategy.
2023	Plan Implementation	City staff begins to implement Plan measures.
2025	Monitoring Report	City staff will prepare a monitoring report every two years and present the report to City Council and Planning Commission. The first monitoring report will be completed two years from Plan adoption. Each monitoring report will evaluate implementation status of the Plan's GHG reduction measures. The monitoring report will identify whether any of the measures require amendment to maintain progress toward achieving the emissions reductions identified in the Plan.
2028	GHG Emissions Inventory Update	An updated GHG inventory will be prepared to track the Plan implementation progress by assessing the City's progress towards achieving the emissions reductions identified in the Plan.
2028	Plan Update	Based on the results of the monitoring report and updated GHG emissions inventory, the City will update the Plan to include new or amended measures, remove, or update any ineffective measures, and incorporate new technologies and methodologies as necessary to ensure the Plan is on track to achieve the City's target and goal.

5.4 CALIFORNIA ENVIRONMENTAL QUALITY ACT AND THE PLAN

The California Environmental Quality Act (CEQA) is a statute that requires local agencies to identify significant environmental impacts of their actions and avoid or mitigate those impacts, if feasible. The 2022 Scoping Plan emphasizes the use of CEQA as a tool by local jurisdictions for supporting the State's climate priorities. When a local Plan complies with CEQA requirements, individual projects that comply with the Plan are allowed to streamline the project-specific GHG analysis. With a CEQA Qualified Plan, local governments enable project developers to use this streamlined approach and save time and resources, while ensuring more consistency in applying GHG reduction measures across projects. The City plans to utilize this tool for ensuring that new development is constructed with more sustainable and low-carbon features than existing development, **however this plan is not intended to be** consistent with, **nor will be utilized to meet**, the provisions of CEQA Guidelines Section 15183.5 ("Qualified Plan"). **The City may conduct additional CEQA analysis in the future in order to readopt this Plan to be consistent with a CEQA Guidelines Section 15183.5 "Qualified Plan". This section is updated as of June 2024.**

This page intentionally left blank.

Table 5.2 intentionally removed. Updated as of June 2024.

5.5 FUNDING SOURCES

The increased energy efficiency and reduced use of non-renewable resources resulting from Plan implementation will result in substantial cost-savings for the City and its residents in the long term. However, the initial set-up, administration work, staffing, and enforcement will require funding and investments. After the Plan is adopted, the City will be proactive in seeking cost-effective implementation and strategic funding opportunities and developing partnerships to share costs. This section presents the spectrum of financial mechanisms that are available for the City to explore for implementing the Plan. This list is ordered by the increasing amount of debt load that would be incurred by the City: starting with free capital from grants and partnerships, continuing to the capital borrowed from loans and bonds, and concluding with City funding from budget, taxes, and fees. Additionally, a detailed list of potential funding and financing options to help implement the Plan is provided in Appendix G. As the Plan is updated and monitored, the City will need to reevaluate its overall costs and funding sources available. Leveraging funding opportunities would facilitate the successful implementation of the GHG reduction measures.

- ▶ **Grants** can provide a substantial source of repayment-free capital. To take advantage of a grant, the City staff will need to track grant opportunities, craft meaningful proposals that link to the goals and mission of the funding agency or entity, submit applications, and track results required for ongoing reporting.
- ▶ **Partnerships** tap resources, and secure capital, from non-governmental and private sector actors. Partnerships will allow the City to share ownership of the Plan implementation, while also sharing possible cost savings and revenue generation with a third party. Partnerships also spread financial risk across multiple public, private, and/or nonprofit entities.
- ▶ **Loans** can give the City access to upfront capital, whose principal and interest must be repaid over the duration of the loan. While the City will first consider grants and private partners when possible, to access repayment-free capital, when those pathways are unavailable loans can be a dependable alternative.
- ▶ **Bonds** can provide dependable, predictable financing for capitalizing large infrastructure projects. The City can issue a bond directly or apply for funds from a state bonding program. These bonds can be backed either by general City funds, or specific revenue sources. There are multiple types of bond structures including general obligation, revenue, and conduit bonds, as well as certifications like “green” bonds for climate and sustainability that communicate what types of projects bond proceeds are being used for.
- ▶ **Budget** refers to using money in the City’s general fund to capitalize projects. Every year the City collects tax revenue and other fees to populate its general fund, portions of which are appropriated to new capital projects and infrastructure investments. Plan implementation can be incorporated into the City’s budgeting processes and City budgets can be used to fund Plan implementation expenditures.
- ▶ **New taxes and fees**, as well as cost savings and other revenues, can create new flows of capital to fund Plan implementation.

Greenhouse Gas Inventory (Technical Memorandum)

Memo

455 Capitol Mall, Unit 300
Sacramento, CA 95814
916.444.7301

Date: March 29, 2022

To: Stefan Heisler and Darcy Goulart (City of Rancho Cordova)

From: Alyssa Way, Andrew Martin, and Honey Walters (Ascent Environmental)

Subject: City of Rancho Cordova Climate Action Plan, Greenhouse Gas Emissions Inventory
Technical Memorandum

INTRODUCTION

In 2009, the County of Sacramento prepared a baseline inventory for the unincorporated county and the incorporated cities, including specifically a 2005 baseline year inventory for the City of Rancho Cordova (City). The Sacramento Area Council of Governments (SACOG) 2020 Metropolitan Transportation Plan / Sustainable Communities Strategy (MTP/SCS) Draft Environmental Impact Report included a greenhouse gas (GHG) emissions inventory and forecast for 2016, 2030, 2040, and 2050 that included the City. Though the City was considered in both efforts, an updated communitywide GHG emissions inventory using the latest methodologies with a more recent 2019 baseline year has been prepared for the City's Climate Action Plan (CAP).

The CAP is intended to reduce GHG emissions for the 2030 target year and 2045 goal. This initial preparation of a GHG emissions inventory provides a foundation for the forthcoming phases of the CAP process, which includes forecasting future emissions, developing GHG emissions reduction targets, defining GHG emissions reduction measures, and preparing a CAP to reduce GHG emissions from activities occurring in the city. This technical memorandum provides the results of the 2019 GHG emissions inventory, as well as associated methods, assumptions, emissions factors, and data sources.

ORGANIZATION OF THIS MEMORANDUM

This memorandum consists of two main parts:

- ▶ Section 1: Summary of Inventory Results presents an overview of the 2019 community inventories for each sector.
- ▶ Section 2: Data, Methods, and Assumptions summarizes data, methods, and assumptions used in the 2019 inventory and provides activity data and GHG emissions estimates by sector.

1 SUMMARY OF INVENTORY RESULTS

1.1 COMMUNITY INVENTORY

The city's GHG emissions inventory for 2019 was estimated based on methodologies and guidance provided by ICLEI – Local Governments for Sustainability (ICLEI) (discussed further in Section 2.2.1). Based on the modeling conducted, community activities in 2019 generated approximately 679,706 metric tons of carbon dioxide equivalent (MTCO₂e). Major emissions sectors included on-road transportation, residential and nonresidential building energy use, solid waste, water use, and wastewater generation. The 2019 inventory will serve as the City's GHG emissions baseline, which will be used to set future emissions reductions targets. A description of each emissions sector, including key sources, is provided in further detail in Section 2, "Data, Methods, and Assumptions". Table 1 and Figure 1 present the overall 2019 community inventory and the contributions from each key sector.

Table 1 2019 City of Rancho Cordova Community Greenhouse Gas Emissions Inventory

Sectors	MTCO ₂ e/year	Percent of Total
On-Road Transportation	417,145	61%
Nonresidential Building Energy	118,801	17%
Residential Building Energy	95,575	14%
Solid Waste	22,397	3%
Off-Road Vehicles and Equipment	11,027	2%
Water Supply	9,071	1%
Wastewater Treatment	5,690	1%
Total	679,706	100%

Notes: MTCO₂e/year = metric tons of carbon dioxide equivalent per year

2 DATA, METHODS, AND ASSUMPTIONS

2.1 OVERALL ASSUMPTIONS AND DATA

2.1.1 Utility Emissions Factors

Emissions of carbon dioxide (CO₂), methane (CH₄), and nitrous oxide (N₂O) per unit of electricity and natural gas can vary by location and from year to year depending on numerous factors. Utility-specific factors for GHG emissions were obtained and used in the 2019 inventory to estimate GHG emissions from electricity and natural gas consumption. Sources for electricity and natural gas emissions factors are shown below.

- Electricity: Utility electricity emissions factors for CO₂, CH₄, and N₂O were obtained from the Sacramento Municipal Utility District (SMUD) and the U.S. Environmental Protection Agency's (EPA's) Emissions & Generation Resource Integrated Database (eGRID). For 2019, SMUD's CO₂ emissions factor was interpolated using the 2018 emissions factor provided by SMUD and the requirements of the Renewables Portfolio Standard included in Senate Bill (SB) 100. The same approach was taken for CH₄ and N₂O emissions factors from eGRID's 2018 Annual Output Emissions Rates (EPA 2020).
- Natural Gas: Utility natural gas emissions factors for CO₂, CH₄, and N₂O were obtained from The Climate Registry's (TCR's) 2020 Default Emission Factors (TCR 2020).

Specific utility emissions factors used in the inventory calculations are shown below in Table 3.

Table 3 2019 City of Rancho Cordova Utility Emissions Factors

Source and Unit	2019 Emissions Factor
SMUD – Electricity	
g CO ₂ /kWh	232.10
g CH ₄ /kWh	0.015
g N ₂ O/kWh	0.002
g CO ₂ e/MWh	233.01
PG&E – Natural Gas	
g CO ₂ /therm	5306
g CH ₄ /therm	0.47
g N ₂ O/therm	0.01
g CO ₂ e/therm	5322

Notes: CH₄ = methane; CO₂ = carbon dioxide; g= grams, MWh = megawatt-hours; N₂O = nitrous oxide; SMUD = Sacramento Municipal Utility District; PG&E = Pacific Gas and Electric Company.

Source: Utility emissions factors provided by SMUD, EPA, The Climate Registry (TCR). Ascent Environmental 2021

2.1.2 Global Warming Potentials

GHG emissions other than CO₂ generally have a stronger insulating effect and thus, a greater ability to warm the earth's atmosphere through the greenhouse effect. This effect is measured in terms of a pollutant's Global Warming

Potential (GWP). CO₂ has a GWP factor of one while all other GHGs have GWP factors measured in multiples of one relative to the GWP of CO₂. This conversion of non-CO₂ gases to one unit enables the reporting of all emissions in terms of carbon dioxide equivalent (CO₂e), which allows consideration of all GHGs in comparable terms and makes it easier to communicate how various sources and types of emissions contribute to climate change. MTCO₂e is the standard unit for reporting emissions.

Consistent with the best available science, these inventories use GWP factors published in the Sixth Assessment Report (AR6) from the Intergovernmental Panel on Climate Change (IPCC), where CH₄ and N₂O have GWP factors of 27.9 and 273, respectively (IPCC 2021). This means that CH₄ and N₂O are approximately 28 and 273 times stronger than CO₂ in their potential to warm Earth's atmosphere, respectively. It should be noted that the California Air Resources Board's (CARB) Statewide GHG Inventory which is associated with the 2017 Scoping Plan uses the Fourth Assessment Report (AR4). Under AR4 CH₄ is approximately 24 times stronger than CO₂ and N₂O is 298 times stronger than CO₂. The GWP can be toggled in the GHG Inventory and Forecast Workbook to compare the change in emissions between the Assessment Reports.

2.1.3 Population and Employment

Population and employment data were used to scale activity levels for certain emissions sources and sectors.

Population and employment data were obtained from the California Department of Finance and the Employment Development Department 2019.

2.2 COMMUNITY INVENTORIES DATA AND ASSUMPTIONS

2.2.1 Sector-Specific Assumptions and Methods for Community Inventories

Several inventory protocols have been developed to provide guidance for communities and local governments to account for emissions accurately and consistently. In coordination with other partners, ICLEI has developed guidance for local-scale accounting of emissions that many local governments use to develop their GHG inventories. The most recent guidance for community-scale emissions inventories is ICLEI's Community Protocol, Version 1.2, published in July 2019 (ICLEI 2019). GHG emissions from livestock were not included in the inventory due to a lack of available information about the number of cattle grazing within City limits.

The following summarizes data sources and methods used in estimating community GHG emissions in 2019:

- ▶ **Building Energy:** Annual electricity and natural gas usage data for the city were provided by SMUD and Pacific Gas and Electric (PG&E) (see Table 3 above). Emissions factors were obtained from SMUD, eGRID, and TCR. Annual nonresidential backup generator usage was provided by Sacramento Metropolitan Air Quality Management District (SMAQMD). Emissions factors for backup generator fuels was obtained from TCR.
- ▶ **Transportation:** For the on-road transportation sector, daily vehicle miles traveled (VMT) were obtained from Fehr & Peers for the city, using the SB 375 Regional Technical Advisory Committee's (RTAC's) origin-destination method. Vehicle emissions factors were derived from CARB's 2021 Emissions FACTor (EMFAC2021) model. Off-road vehicle emissions were estimated from CARB's OFFROAD2007 and OFFROAD2021 models and scaled by population, employment, or share of road miles.
- ▶ **Solid Waste:** Emissions associated with waste generated by residents and businesses in the city were estimated using disposal data available from the California Department of Resources Recycling and Recovery (CalRecycle) for landfills receiving waste from the city. Landfill gas (LFG) collection information was available from EPA.

- ▶ **Water Supply:** Using guidance provided by ICLEI, water supply emissions were estimated using approximate water consumption volumes obtained from the Sacramento County Water Agency, Golden State Water Company, and California American Water in combination with region-specific energy intensity factors obtained from the California Public Utilities Commissions (CPUC).
- ▶ **Wastewater:** Emissions from wastewater treatment depend on the types of treatment processes and equipment that centralized wastewater treatment plants (WWTPs) use. Emissions in this sector are also generated from onsite wastewater treatment systems. Data regarding treatment processes, population served, digester gas combustion, and daily nitrogen load were obtained from Sacramento Area Sewer District and Regional San to estimate emissions from centralized WWTPs.

2.2.2 Building Energy

Residential and nonresidential building energy use in 2019 resulted in approximately 214,376 MTCO₂e. This sector generated approximately 32 percent of the City's emissions in 2019 and represents the second largest emissions sector in the inventory. Most of these emissions were a result of electricity and natural gas use in homes and businesses, primarily for lighting and heating, ventilation, air condition, and cooling (HVAC), as well as to power appliances. A small proportion of nonresidential building energy emissions are associated with diesel consumption in backup generators. In 2019, electricity from both residential and nonresidential buildings accounted for approximately 67 percent of emissions from the building energy sector. Natural gas use accounted for approximately 32 percent, and backup generators accounted for less than 1 percent, of emissions from the building sector in 2019. Annual electricity, natural gas, and backup generator usage and GHG emissions are shown in Table 4.

Table 4 2019 City of Rancho Cordova Community Building Energy Use Greenhouse Gas Emissions

Source	Quantity	GHG Emissions	Percentage
Electricity	MWh/year	MTCO ₂ e/year	% of Energy Total
Residential	202,727	47,238	22
Nonresidential	416,664	97,089	45
<i>Electricity Total</i>	<i>619,391</i>	<i>144,327</i>	<i>67</i>
Natural Gas	therms/year	MTCO ₂ e/year	% of Energy Total
Residential	9,082,624	48,336	23
Nonresidential	3,902,601	20,769	10
<i>Natural Gas Total</i>	<i>12,985,225</i>	<i>69,105</i>	<i>32</i>
Backup Generators	gallons	MTCO ₂ e/year	% of Energy Total
Nonresidential	92,209	943	<1
Energy Combined		MTCO ₂ e/year	% of Energy Total
Residential	NA	95,575	45
Nonresidential	NA	118,801	55
Grand Total	NA	214,376	100

Notes: Totals in columns may not sum exactly due to independent rounding. GHG = greenhouse gas; MTCO₂e/year = metric tons of carbon dioxide equivalent per year; MWh = megawatt-hours; NA = not applicable.

Source: Ascent Environmental 2021

RESIDENTIAL ENERGY

Residential energy emissions result indirectly from electricity consumption and directly from onsite combustion of natural gas. SMUD and PG&E are the providers of residential energy in the city. Annual residential electricity usage data for 2019 in the city were obtained from SMUD, expressed as MWh per year (MWh/year). To calculate the MTCO₂e of residential electricity consumption, emissions factors (shown in Table 3) for CO₂, CH₄, and N₂O were applied to electricity consumption data.

Annual residential natural gas consumption for 2019 in the city was obtained from PG&E, expressed as therms per year (therms/year). CO₂, CH₄, and N₂O emissions factors for natural gas were applied to consumption data to estimate MTCO₂e from residential natural gas usage.

NONRESIDENTIAL ENERGY

Nonresidential energy emissions, which are generated by commercial and industrial uses, result indirectly from electricity consumption and directly from onsite combustion of natural gas. SMUD provided nonresidential electricity in the city. Nonresidential natural gas in the city was provided by PG&E in 2019.

Annual nonresidential electricity usage data for 2019 were obtained from SMUD, expressed as MWh/year, and annual nonresidential natural gas consumption in the city was obtained from PG&E, expressed as therms/year. PG&E natural gas usage data for industrial customers could not be provided to the City because of the 15/15 Rule, which is statewide requirement protecting the privacy of utility customer data¹. Emissions associated with nonresidential energy consumption were quantified using the same methods as described above for residential energy calculations.

Data for annual nonresidential backup generators were obtained from SMAQMD, expressed as gallons per year (gallons/year) for diesel fuel. Emissions factors obtained from TCR were applied to fuel consumption data to estimate GHG emissions associated with nonresidential backup generator usage.

2.2.3 On-Road Transportation

The on-road transportation sector represents the largest emissions-generator sector in the city. Based on modeling conducted, on-road transportation in the city resulted in approximately 417,145 MTCO₂e, or 61 percent of the City's 2019 inventory. The on-road transportation sector represents the largest emissions sector in the city. Annual VMT and GHG emissions from on-road transportation are shown in Table 5 broken down by EMFAC vehicle category.

Table 5 2019 City of Rancho Cordova Community On-Road Transportation Greenhouse Gas Emissions

EMFAC Vehicle Category	EMFAC Vehicle Category Description	VMT/year ^a	GHG Emissions (MTCO ₂ e/year)
LDA	Passenger Cars	465,261,020	148,453
LDT2	Light-Duty Trucks (GVWR <6000 lb)	191,143,033	78,535
MDV	Medium-Duty Trucks (GVWR 5751-8500 lb)	130,832,664	65,206
LDT1	Light-Duty Trucks (GVWR <6000 lb)	45,762,151	17,554
LHD1	Light-Heavy-Duty Trucks (GVWR 8501- 10000 lbs)	33,974,541	29,056

¹ The 15/15 Rule originates from a California Public Utilities Commission (CPUC) ruling in 1997 that enacted privacy standards for utilities to help ensure customer anonymity when energy data is released to third parties without customer consent. The 15/15 Rule requires that aggregated data include a minimum of 15 customers with no one customer's load exceeding 15 percent of the group's energy consumption.

EMFAC Vehicle Category	EMFAC Vehicle Category Description	VMT/year ^a	GHG Emissions (MTCO ₂ e/year)
T7 Trucks	Heavy-Heavy Duty Trucks	19,391,641	38,318
T6 Trucks	Medium-Heavy Duty Trucks	16,550,426	23,818
LHD2	Light-Heavy-Duty Trucks (GVWR 10001- 14000 lb)	7,751,499	7,083
MCY	Motorcycles	3,695,927	891
MH	Motor Homes	1,034,081	1,826
UBUS	Urban Buses	960,288	1,597
OBUS	Other Buses	803,554	1,515
SBUS	School Buses	728,388	897
All Other Buses	All Other Buses	563,571	749
PTO	Power Take Off	500,107	1,138
Motor Coach	Motor Coach	265,909	511
Total	N/A	919,218,798	417,145

Notes: GHG = greenhouse gas; GVWR = gross vehicle weight rating; lb= pounds; MTCO₂e/year = metric tons of carbon dioxide equivalent per year; N/A = not applicable; VMT/year = vehicle miles traveled per year.

^a VMT by vehicle category based on the modeled vehicle fleet mix in EMFAC2021 for Sacramento County in 2019 using EMFAC2011 vehicle categories applied to the city's total annual VMT.

Source: Ascent Environmental 2021

On-road transportation emissions are primarily the result of the combustion of gasoline and diesel fuels in passenger vehicles (i.e., cars, light-duty trucks, and motorcycles), medium- and heavy-duty trucks, and other types of vehicles permitted to operate "on-road." To a smaller degree, emissions from on-road electric vehicles also result from upstream electricity generation; these emissions are represented in annual electricity emissions in the city. Due to lack of available data, emissions from the combustion of natural gas and other non-electric alternative fuels in on-road vehicles were not included in the community inventory and are assumed to have minimal contribution to total emissions.

Fehr & Peers conducted a study that provides daily VMT by city for the years 2016, 2027, 2035, and 2040. These VMT estimates are associated with trips that begin or end in the city. VMT estimates included 100 percent of vehicle trips that both originate from and end in the city (i.e., fully internal trips), 50 percent of trips that either end in or depart from the city (i.e., internal-external or external-internal trips), and zero percent of vehicle trips that are simply passing through the city boundaries (i.e., external-external, or "pass-through," trips). This vehicle trip accounting method is consistent with the RTAC origin-destination method established through SB 375 and CARB recommendations.

An overall emissions rate for countywide VMT was derived from EMFAC2021, CARB's statewide mobile source emissions inventory model. EMFAC2021 was used to generate emission rates for the county for the calendar year 2019 with all vehicle classes, model years, speeds, and fuel types. The countywide MTCO₂e per mile emissions factor was calculated based on the distribution of VMT for each vehicle class and its emissions factor.

OFF-ROAD VEHICLES AND EQUIPMENT

Based on modeling conducted, off-road vehicles and equipment operating in the city emitted approximately 11,027 MTCO₂e, or 2 percent of the 2019 inventory. The largest emissions-generating off-road transportation categories include construction and mining equipment, portable equipment, and industrial equipment. The estimated annual emissions and scaling factors used are presented in Table 6 below by equipment type.

Table 6 2019 City of Rancho Cordova Community Off-Road Vehicles-Equipment Greenhouse Gas Emissions

Off-Road Vehicles and Equipment Type	GHG Emissions (MTCO ₂ e)	Scaling Method
Construction and Mining Equipment	5,350	service population
Entertainment Equipment	54	employment
Industrial Equipment	1,426	employment
Lawn and Garden Equipment	138	population
Light Commercial Equipment	839	employment
Portable Equipment	2,478	employment
Recreational Equipment	81	population
Transportation Refrigeration Units	661	service population
Total	11,027	N/A

Notes: GHG = greenhouse gas; MTCO₂e/year = metric tons of carbon dioxide equivalent per year; N/A = not applicable.

Source: Ascent Environmental 2021; based on modeling from OFFROAD2007 and OFFROAD2021.

Emissions from the off-road vehicles and equipment sector result from fuel combustion in off-road vehicles and equipment. Data associated with this sector were available from CARB's OFFROAD2007 and OFFROAD2021 models. These models provide emissions details at the State, air basin, or county level. Sacramento County emissions data from OFFROAD2007 and OFFROAD2021 were apportioned to the city using custom scaling factors depending on the off-road fleet type. For example, due to the likely correlation between commercial activity and employment, the city's portion of emissions from light commercial equipment in the county is assumed to be proportional to the number of jobs in the city as compared to the county as a whole.

OFFROAD2007 provides emissions details for all off-road vehicle and equipment types, but OFFROAD2017 only provides details for certain types of off-road vehicles and equipment that are relevant to the city (i.e., construction and mining equipment, industrial equipment, and transport refrigeration units). CARB recommends using OFFROAD2007 where desired information is unavailable from the OFFROAD2021 model, so data from both models were used (CARB 2020). Additionally, while OFFROAD2021 provides estimates of CO₂ emissions, it does not provide estimates for CH₄ and N₂O emissions. To estimate CH₄ and N₂O emissions from the vehicle and equipment types included in OFFROAD2017, ratios of CH₄ to CO₂ and N₂O to CO₂ were obtained from OFFROAD2007 and applied to CO₂ data from OFFROAD2021 to calculate CH₄ and N₂O emissions.

2.2.4 Solid Waste

Based on modeling conducted, the solid waste sector was responsible for approximately 22,397 MTCO₂e in 2019, or 3 percent of the 2019 community GHG inventory. Community-generated solid waste emissions are result primarily from decomposition of solid waste generated by the city in landfills, while a smaller proportion of emissions are produced by the decomposition of alternative daily cover (ADC) generated by the county. Table 7 summarizes emissions from the solid waste sector. Additional details regarding calculation methods and assumptions are discussed below.

Table 7 2019 City of Rancho Cordova Community Solid Waste Greenhouse Gas Emissions

Source	Quantity (tons/year)	GHG Emissions (MTCO ₂ e/year)
Community-Generated Solid Waste	59,464	22,397

Notes: Totals may not sum exactly due to independent rounding. GHG = greenhouse gas; MTCO₂e = metric tons of carbon dioxide equivalent.

Source: Ascent Environmental 2021

COMMUNITY-GENERATED SOLID WASTE

CH₄ emissions generated by community-generated solid waste occur from decay of landfill disposed waste generated annually by residences and businesses in the city. A total of 56,877 tons of landfilled waste was reported for the city in 2019. In addition to landfilled waste, communities send ADC to landfills. ADC is non-earthen material used to cover an active landfill surface at the end of each operating day to control for vectors, fires, odors, blowing litter, and scavenging. This material can include compost, construction and demolition waste, sludge, green material, shredded tires, spray-on cement, and fabric. Given that ADC can also include organic material, CH₄ emissions from landfills result from organic decomposition in both waste disposal and ADC. ADC from the city was 2,587 tons in 2019. Data for landfilled waste and ADC were obtained from CalRecycle (CalRecycle 2021).

The amount of CH₄ released from community-generated waste depends on the LFG management systems of the landfills at which the waste is disposed. Information regarding the use of an LFG capture system was available from EPA's Landfill Methane Outreach Program. All facilities included an LFG capture system; therefore, the default LFG collection efficiency of 0.75 was applied to adjust emissions estimates, as recommended by the Community Protocol. Default waste characterization emissions factors obtained from EPA were used in calculations.

2.2.5 Water Supply

Based on modeling conducted, water supply emissions accounted for approximately 9,071 MTCO₂e in 2019. GHG emissions associated with water supply occur from the indirect use of energy associated with water extraction, conveyance, treatment, and distribution to the point of use (e.g., residences, businesses). Energy consumption for supplying water was estimated by applying energy intensity factors (i.e., the total amount of energy required to produce a unit of water for a particular use) to water supply consumption values. Water supply emissions are estimated by applying electricity emissions factors to water consumption values. Table 8 presents water supply volume and energy consumption, as well as associated GHG emissions for the county in 2019. The methods used are explained in more detail below.

Table 8 2019 City of Rancho Cordova Community Water Supply Greenhouse Gas Emissions

	Quantity (AF)	GHG Emissions (MTCO ₂ e/year)
Water Supply	65,645	9,071

Notes: AF = acre feet; GHG = greenhouse gas; MTCO₂e/year = metric tons of carbon dioxide equivalent per year..

Source: Ascent Environmental 2021

ENERGY INTENSITY FACTOR

An energy intensity factor, regarding water supply emissions, is defined by the amount of energy (e.g., electricity, natural gas) required to produce a unit of water for a particular use. Electricity is the primary source of energy used for water extraction, conveyance, treatment, and distribution in the Sacramento River hydrologic region. Other energy sources may include fossil fuel-powered pumps and backup generators at treatment plants, but these sources that may be used were considered negligible. Thus, for purposes of this analysis, energy intensity is based on electricity use only and is expressed as kilowatt-hours per acre-foot (kWh/AF).

In 2015, the CPUC commissioned a study of hydrologic zones in California and their relative energy intensities for water extraction, conveyance, treatment, and distribution. The city is within the Sacramento River hydrologic zone, which has specific energy intensities by supply type (e.g., local surface water, imported deliveries). According to the City's Water Supply Evaluation water in the city is either sourced from surface water, groundwater, recycled water, or wholesale purchases.

ENERGY CONSUMPTION

To estimate water supply emissions, the energy intensity factors discussed above were applied to total water consumption volumes reported by each water supplier. GHG emissions were estimated using electricity emissions factors in 2019 as described in the building energy sector.

2.2.6 Wastewater Treatment

Based on modeling conducted, wastewater generation in 2019 resulted in emissions of approximately 5,690 MTCO₂e, one percent of total emissions, primarily from fugitive CH₄. Wastewater emissions were estimated in two components: (1) pumping-related energy for wastewater conveyance from the source to the treatment facility, and (2) wastewater treatment process emissions. Each is discussed separately below. GHG emissions associated with the treatment of wastewater from the city is shown in Table 9.

Table 9 2019 City of Rancho Cordova Wastewater Treatment Greenhouse Gas Emissions

Wastewater Emission Type	GHG Emissions (MTCO ₂ e/year)
Treatment Plants	5,690

Notes: Totals may not sum exactly due to independent rounding. GHG = greenhouse gas; MTCO₂e/year = metric tons of carbon dioxide equivalent per year.

Source: Ascent Environmental 2021

Wastewater Conveyance

SASD and Regional San are the primary agencies responsible for sewer conveyance and wastewater treatment for the city. Emissions associated with wastewater conveyance are directly related to the energy required to convey the wastewater and the volume of water conveyed/pumped. To estimate GHG emissions, a regional wastewater conveyance energy intensity factor was calculated from total pumping energy data within SASD and Regional service area from 2015 and total wastewater treated in 2019. SASD pumping data were provided directly by SASD. Regional San pumping energy and treatment effluent volumes were provided directly by Regional San (pers. Comm. Steve Nebozuk, Regional San. 2016). Effluent volume was apportioned to the City of Rancho Cordova's population and the calculated energy intensity factor was applied to obtain total wastewater conveyance-related energy. GHG emissions were estimated using the same emissions factors described for the building sector.

According to the ICLEI Community Protocol, wastewater discharge and treatment energy intensities associated with septic tanks and other on-site systems are assumed negligible. Hauling emissions associated with maintenance of septic tanks are captured in the on-road vehicle sector and not included in this sector.

Wastewater Treatment Process Emissions

Wastewater generated by the city is treated at the Regional San WWTP. Treatment process emissions at the WWTP include electricity consumption for treatment, process N₂O, wastewater effluent containing N₂O, and emissions from biogas combustion. The analysis assumes the entire city population is served by the Regional San WWTP. As such, process wastewater emissions may be slightly overestimated as some portion of the city use onsite septic tanks for wastewater treatment.

Building Energy

Enter inventory data into the yellow table. Enter Forecast Data into the green table:

- Insert rows within the table as needed.
- Only input data in the colored cells.
- See comments in headers for specific input instructions.
- For the forecast data, copy the entries from the inventory and paste one set for each forecast year and BAU/Leg-Adjusted combination. (E.g., if you have 2 entries in the inventory and 3 forecast years, you should have 2*3*2=12 row entries in the forecast table.)

Model Output: OFFROAD2021 (v1.0.1) Emissions Inventory

Region Type: County
Region: Sacramento

Calendar Year: 2019, 2030

Scenario: All Adopted Rules - Exhaust

Vehicle Classification: OFFROAD2021 Equipment Types

Units: tons/day for Emissions, gallons/year for Fuel, hours/year for Activity, Horsepower-hours/year for Horsepower-hours

Source: EMFAC2011 (v1.0.1) Emissions Inventory
Region Type: County
Region: Sacramento
Calendar Year: 2019, 2030, 2045, 2050
Season: Annual
Vehicle Classification: EMFAC2011 Categories
Units: miles/year for CVMT and EVMT, trips/year for Trips, kWh/year for Energy Consumption, tons/year for Emissions, 1000 gallons/year for Fuel Consumption

Region	Calendar Year	Vehicle Category	Model Year	Speed	Fuel	Population	Total VMT	CVMT	EVMT	Trips	CO2_RUNEX	CO2_IDLEX	CO2_STREX	CO2_TOTEX	CH4_RUNEX	CH4_IDLEX	CH4_STREX	CH4_TOTEX	N2O_RUNEX	N2O_IDLEX	N2O_STREX	N2O_TOTEX

City of Rancho Cordova General Plan Planning Area	Supply Available from Purveyors					77,620 ⁶
	Projected Demands					
	Corporate City Limits (2030)a					57,299
	Non-City Area ⁶					71,410
	Total Demands					128,709
	Surplus/(Deficit)					(51,089)

Notes:
1. Data from SCWA Zone 41 UWMP, Table 5-1 and 5-2. Because SCWA would implement a conjunctive use water supply program, water supplies would never exceed projected demands because groundwater would be pumped and surface water would be used to meet, not exceed water demands. Supply and demand based on normal year type. (SWCA 2005b)
2. This supply is part of Zone 40's 2030 water supplies of 113,064 afy (SCWA 2005a).
3. Data from GSWC UWMP Table 3-1 and 4-9. Supply exceeds demand because GSWC does not plan to use 5,000 afy of its SMUD Water Transfer entitlement due to limited surface water treatment capacity and its desire to maintain its groundwater rights through the Aerojet Replacement Water operations. (GSWC 2005)
4. Data from Cal-Am UWMP. (Cal-Am 2006)
5. Sum of SCWA (37,314 afy), GSWC (25,829 afy), and Cal-Am's (14,477 afy) water supplies identified for the City's planning area.
6. Buildout for non-city area of Rancho Cordova projected to occur after 2030.

Wastewater Conveyance Intensity Factor Calculation

Energy Data (pumping/conveyance)

		Unit	Data Year	Source
SASD	3,388,861	KWH	FY 2014/2015	Christoph Dobson and Wayne Zhuang, SASD on 9/14/2016
SRCSD	11,500,000	KWH	2013	Steve Nebozuk, SRCSD on 9/14/2016
TOTAL	14,888,861	KWH	2015	Used to represent 2015, best available data was used.

Effluent Data (represents all water treated within SRCSD service population)

		Unit	Data Year	Source
SRCSD	41,975	Million Gallons/Yr	2019	State of the District 2019 Report
Adjusted	31,481	Million Gallons/Yr	2019	Salam Khan, SASD on 9/16/2016 indicated that City of Folsom, Sacramento, and W. Sac use energ to pump their WW to SRCSD. As such the KWH obtained from SRCSD service population was being underestimated when used in conjunction with the total effluent from the entire serice population. To adjust for this, the total effluent associated with Sacramento, W. Sac, and Folsom, was adjusted by 25%

WW Conveyance Intensity Factor

Subject: City of Rancho Cordova Climate Action Plan, Greenhouse Gas Emissions Forecasts and Reduction Targets – Technical Memorandum

INTRODUCTION

In 2009, the County of Sacramento prepared a baseline inventory for the unincorporated county and the incorporated cities, including specifically a 2005 baseline year inventory for the City of Rancho Cordova (City). The Sacramento Area Council of Governments (SACOG) 2020 Metropolitan Transportation Plan / Sustainable Communities Strategy (MTP/SCS) Draft Environmental Impact Report included a greenhouse gas (GHG) emissions inventory and forecast for 2016, 2030, 2040, and 2050 that included the City. Though the City was considered in both efforts, an updated communitywide GHG emissions inventory using the latest methodologies with a more recent 2019 baseline year has been prepared for the City's Climate Action Plan (CAP). The next step in this update process is to forecast these GHG emissions for the 2030 target year and 2045 goal. This technical memorandum provides the results of these forecasts as well as associated methods, assumptions, emissions factors, and data sources.

The GHG emissions forecasts will provide a foundation for the forthcoming steps of the CAP development process, including the development of GHG emissions reduction targets and identification of measures the City can take to reduce GHG emissions from activities and sources located in Rancho Cordova.

ORGANIZATION OF THIS MEMORANDUM

This memorandum consists of two main parts:

- ▶ Section 1: Summary of Inventory Results presents an overview of the updated GHG emissions inventory (baseline 2019).
- ▶ Section 2: Emissions Forecasts summarizes the forecasted GHG emissions under "business-as-usual" (BAU) and legislative-adjusted BAU scenarios for years 2030 and 2045. A BAU scenario is one in which no GHG reductions from actions taken by local, regional, State, or federal agencies are included. A legislative-adjusted BAU scenario reflects GHG reductions from legislative or regulatory actions enacted by regional, State, and federal agencies, without considering any local (City) actions to reduce GHG emissions.

1 SUMMARY OF INVENTORY RESULTS

1.1 2019 COMMUNITY INVENTORY RESULTS

Based on the modeling conducted, community activities in 2019 generated approximately 679,706 metric tons of carbon dioxide equivalent (MTCO₂e). Major emissions sectors included on-road transportation, residential and nonresidential building energy use, solid waste, water use, and wastewater generation. Table 1 and Figure 1 present the city's 2019 GHG emissions inventory by sector. A description of each emissions sector, including key sources of emissions, is provided in the Inventory Technical Memorandum, dated March 29, 2022.

Table 1 2019 City of Rancho Cordova Community Greenhouse Gas Emissions Inventory

Sectors	MTCO ₂ e/year	Percent of Total
On-Road Transportation	417,145	61%
Nonresidential Building Energy	118,801	17%
Residential Building Energy	95,575	14%
Solid Waste	22,397	3%
Off-Road Vehicles and Equipment	11,027	2%
Water Supply	9,071	1%
Wastewater Treatment	5,690	1%
Total	679,706	100%

Notes: MTCO₂e/year = metric tons of carbon dioxide equivalent per year

Figure 1 2019 City of Rancho Cordova Community Greenhouse Gas Emissions Inventory

2 GREENHOUSE GAS EMISSIONS FORECASTS TO 2030

2.1 COMMUNITY FORECAST RESULTS

The BAU GHG emissions forecasts provide an assessment of how emissions generated by community activities will change over time without further local, State, or federal action. In addition to accounting for the city's growth under a BAU scenario, an adjusted BAU forecast was prepared, which includes adopted legislative and regulatory actions at the State and federal levels that would affect emissions without any local action, such as regulatory requirements to increase vehicle fuel efficiency and increase renewable energy sources in grid electricity portfolios. It is important to note that the legislative-adjusted BAU emissions forecasts only include emissions reductions associated with implementation of adopted federal and State legislation and regulations and do not include goals established by executive orders or targets established by federal or State agencies outside of adopted legislation and regulations. These forecasts provide the City with the information needed to focus efforts on emissions sectors and sources that have the greatest opportunities for GHG emissions reductions.

The BAU forecasts described in this section for 2030 and 2045 are aligned with statewide GHG reduction targets established in State law Senate Bill (SB) 32 and Assembly Bill (AB) 1279. The State GHG reduction targets are to reduce statewide emissions levels to:

- ▶ 40 percent below 1990 levels by 2030 (SB 32); and
- ▶ net zero with at least an 85 percent reduction from 1990 levels for anthropogenic sources (AB 1279).

Estimated BAU emissions forecasts were based on population and employment from the SACOG Growth Forecast for the 2020 Metropolitan Transportation Plan/Sustainable Communities Strategy (MTP/SCS). The SACOG Growth Forecast provides population and employment for 2016 and 2040. These values were interpolated and extrapolated to identify values for 2019, 2030, and 2045. Population and employment are expected to increase by 62 and 36 percent from 2019 to 2045, respectively. These growth factors were used to forecast BAU emissions for most sectors. Additional information regarding the growth factors used for each sector is included in the following sections. Fehr & Peers provided annual vehicle miles traveled (VMT) projections for the years 2027, 2035, and 2040 based on origin-destination data provided by SACOG. Based on these data, annual VMT was interpolated for year 2030 and projected out for 2045. Annual VMT by 2045 is projected to increase by 42 percent from 2019. VMT projections were used to scale emissions from the on-road transportation sector. Table 2 shows projections growth in the city from 2019 to 2045.

Table 2 Rancho Cordova Demographic and Vehicle Miles Traveled Projections

Forecast Factor	2019	2030	2045
Population	77,579	102,122	125,427
Employment	61,991	73,604	84,213
Annual VMT	919,218,798	1,071,357,646	1,307,495,381

Notes: VMT = vehicle miles traveled.

Source: SACOG Growth Forecast for the 2020 MTP/SCS; Fehr & Peers; adapted by Ascent Environmental in 2022.

Table 3 shows baseline emissions in 2019 and a BAU emissions forecast for 2030, and 2045.

Table 3 2019 Rancho Cordova Greenhouse Gas Emissions Inventory and BAU Forecast (MTCO₂e/year)

Sector	2019	2030	2045
--------	------	------	------

On-Road Transportation	417,145	486,187	593,347
Nonresidential Building Energy	118,801	141,055	161,388
Residential Building Energy	95,575	125,811	154,521
Solid Waste	22,397	29,483	36,211
Off-Road Vehicles and Equipment	11,027	14,772	18,488
Water Supply	9,071	11,940	14,665
Wastewater Treatment	5,690	7,490	9,200
Total	679,706	816,738	987,820

Notes: Total may not sum exactly due to independent rounding. BAU = business-as-usual; MTCO₂e/year = metric tons of carbon dioxide equivalent per year.

Source: Forecast prepared by Ascent Environmental in 2022.

Legislative-adjusted BAU emissions forecasts were prepared using the same demographic and VMT data that were used for the BAU forecasts, while accounting for regional, State, and federal legislative actions that would affect local emissions. These forecasts provide the City with a more robust understanding to assist with the prioritization of emissions reduction measures developed to meet the GHG targets. A summary of the legislative reductions applied is provided in Table 4.

Table 4 Legislative Reductions Summary

Source	Legislative Reduction	Description	Sectors Applied
Regional	2030 Zero Carbon Plan	Establishes a target for SMUD to supply 100 percent renewable electricity by 2030.	Residential and Nonresidential Building Energy, Water Supply
State	California's Building Energy Efficiency Standards (2019 Title 24, Part 6)	Requires all new buildings in California to comply with energy efficiency standards established by CEC. Accounts for the energy efficiency gains associated with lighting, heating, cooling, ventilation, and water heating improvements, as well as onsite solar photovoltaic requirements for low-rise residential.	Residential and Nonresidential Building Energy
State	Advanced Clean Car I Standards	Establishes GHG emission reduction standards for model years 2017 through 2025 that are more stringent than federal CAFE standards.	On-Road Transportation
State	Truck and Bus Regulation	Requires diesel trucks and buses that operate in California to be upgraded to reduce GHG emissions.	On-Road Transportation
Federal	Fuel Efficiency Standards for Medium- and Heavy-Duty Vehicles	Establishes fuel efficiency standards for medium- and heavy-duty engines and vehicles.	On-Road Transportation
Federal	EPA Off-Road Compression-Ignition Engine Standards	Establishes standards for phasing of EPA diesel engine tiers for off-road compression-ignition equipment.	Off-Road Vehicles and Equipment

Notes: CAFE = Corporate Average Fuel Economy; CEC = California Energy Commission; EPA = U.S. Environmental Protection Agency; GHG = greenhouse gas; SMUD = Sacramento Municipal Utility District

Source: Forecasts prepared by Ascent Environmental in 2022.

The city's legislative-adjusted BAU emissions would decrease by approximately 22 percent between 2019 and 2045, as shown below in Table 5 and Figure 2. Figure 2 also shows the emissions trend that would occur without

anticipated legislative reductions, accounting only for population, employment, and annual VMT increases. Without the legislative reductions (the BAU forecast), emissions would be 86 percent higher in 2045 compared to the legislative-adjusted BAU forecast. Emissions forecasts are detailed for each sector and discussed below beginning with Section 2.1.1.

Table 5 2019 Rancho Cordova Greenhouse Gas Emissions Inventory and Legislative-Adjusted BAU Forecasts (MTCO₂e/year)

Sector	2019	2030	2045
On-Road Transportation	417,145	387,784	384,651
Nonresidential Building Energy	118,801	23,605	25,335
Residential Building Energy	95,575	52,217	55,903
Solid Waste	22,397	29,483	36,211
Off-Road Vehicles and Equipment	11,027	14,772	18,488
Water Supply	9,071	0	0
Wastewater Treatment	5,690	7,490	9,200
Total	679,706	515,352	529,788

Notes: Total may not sum exactly due to independent rounding. BAU = business-as-usual; MTCO₂e/year = metric tons of carbon dioxide equivalent per year.

Figure 2 2019 Rancho Cordova Greenhouse Gas Emissions Inventory with BAU and Legislative-Adjusted BAU Forecasts

2.1.1 Building Energy

Emissions from future electricity, natural gas, and backup generator use for buildings were estimated by multiplying anticipated energy use with forecasted emissions factors. Future energy use was forecasted in three parts. First, energy use was scaled by population and employment growth factors detailed in Table 2. Second, electricity emissions factors were adjusted to reflect the Sacramento Metropolitan Utility District's (SMUD) 2030 Zero Carbon Plan of 100 percent of electricity from zero carbon sources by 2030. Electricity emissions factors are anticipated to decline based on current regulations, while natural gas and diesel emissions factors are anticipated to be constant. Third, energy intensity factors were adjusted to reflect increased stringency under California's Building Energy Efficiency Standards (California Code of Regulations Title 24 Part 6, hereafter referred to as "Title 24"). The 2019 Title 24 standards, which became effective in 2020, are expected to achieve decreases in electricity consumption in new construction. The assumptions for energy efficiency and future electricity emissions factors are described below. Table 6 summarizes the scaling factors and legislative reductions used to forecast building use by energy type.

Table 6 Building Energy Emissions Forecast Methods and Legislative Reductions by Source

Energy Type	Forecast Methods	
	Scale Factor	Applied Legislative Reductions
Electricity	Scaled by population growth for residential building energy; scaled by employment growth for nonresidential building energy.	Scheduled targets (i.e., 100 percent renewable by 2030) applied to SMUD's emissions factors. Accounts for Title 24 energy efficiency gains in new construction based on the best available data for average building energy efficiency.
Natural Gas		
Backup Generators	Scaled by employment growth for nonresidential building energy.	Accounts for Title 24 energy efficiency gains in new nonresidential construction.

Notes: SMUD = Sacramento Metropolitan Utility District.

Source: Forecasts prepared by Ascent Environmental in 2022.

RESIDENTIAL BUILDING ENERGY

Between 2019 and 2045, electricity and natural gas emissions from residential buildings would decrease by approximately 42 percent from 95,575 to 55,903 MTCO₂e per year with legislative adjustments and overall population growth of 62 percent over the same time. While GHG emissions associated with residential electricity usage are anticipated to decline through 2045 and reflect SMUD's goal for zero carbon electricity by 2030, emissions from residential natural gas consumption are expected to rise gradually. This increase is due to population growth in the city and reflects adopted legislation. Table 7 shows the 2019 inventory and legislative-adjusted BAU forecasted emissions from the residential building energy sector by energy type for 2030 and 2045.

Table 7 2019 Residential Building Energy Greenhouse Gas Emissions Inventory and Legislative-Adjusted BAU Emissions Forecasts (MTCO₂e/year)

Energy Type	2019	2030	2045
Electricity	47,238	0	0
Natural Gas	48,336	52,217	55,903
Total	95,575	52,217	55,903

Notes: Totals may not sum exactly due to independent rounding. BAU = business-as-usual; MTCO₂e/year = metric tons of carbon dioxide equivalent per year.

Source: Forecasts prepared by Ascent Environmental in 2022.

NONRESIDENTIAL BUILDING ENERGY

Between 2019 and 2045, electricity, natural gas, and back-up generator emissions from nonresidential buildings would decrease by 79 percent from 118,801 to 25,335 MTCO₂e per year with legislative adjustments and overall employment growth of 36 percent over the same time. GHG emissions associated with nonresidential electricity usage are anticipated to decline through 2045 and reflect SMUD's carbon neutrality goals and emissions from nonresidential natural gas consumption and backup generators are expected to rise gradually. Table 8 shows the 2019 inventory and legislative-adjusted BAU forecasted emissions for the nonresidential building energy sector by energy type for 2030 and 2045.

Table 8 2019 Nonresidential Building Energy Greenhouse Gas Emissions Inventory and Legislative-Adjusted BAU Forecasts (MTCO₂e/year)

Energy Type	2019	2030	2045
Electricity	97,089	0	0
Natural Gas	20,769	22,580	24,235
Backup Generators	943	1,025	1,101
Total	118,801	23,605	25,335

Notes: Totals may not sum exactly due to independent rounding. BAU = business-as-usual; MTCO₂e/year = metric tons of carbon dioxide equivalent per year.

Source: Forecasts prepared by Ascent Environmental in 2022.

Electricity Emissions Factors

Electricity emissions from the building sector are anticipated to decrease to zero by 2030 and beyond without additional City action, despite growth, due to State and regional measures already in place that affect the carbon intensity of grid electricity. SMUD's emissions factor for CO₂ in 2019 was provided by SMUD. Electricity emissions factors for methane (CH₄) and nitrous oxide (N₂O) were obtained from the U.S. Environmental Protection Agency's (EPA's) Emissions & Generation Resource Integrated Database (eGRID) 2018 Annual Output Emissions Rates (EPA 2020).

California utility providers, including SMUD, were scheduled to reach a 33 percent renewable electricity generation mix in 2020 and, pursuant to SB 100, are scheduled to achieve 60 percent renewable electricity by 2030 and 100 percent carbon-free electricity by 2045. However, SMUD's is scheduled to achieve 100 percent renewable by 2030 under the utility's carbon neutrality goal. SMUD's 2019 emissions factor is 232.1 grams of CO₂ per kilowatt hour (g CO₂/kWh). The carbon-free electricity requirement results in a 2030 and 2045 emissions factor of zero g CO₂/kWh. CH₄ and N₂O electricity emissions factors in future years are assumed to follow the same trends as the CO₂ emissions factors.

Natural Gas Emissions Factors

Natural gas emissions are based on emissions factors obtained from The Climate Registry's (TCR's) 2020 Default Emission Factors, which are estimated to be 5,306 pounds of carbon dioxide equivalent per therm (g CO₂e/therm) for stationary combustion in buildings. Emissions factors associated with natural gas combustion are not anticipated to change over time, as there are no legislative actions that would reduce the energy intensity of natural gas.

Diesel Emissions Factors

Emissions from diesel fuel used to power backup generators are based on emissions factors from TCR, which are estimated to be 10,210 grams of carbon dioxide equivalent per gallon (g CO₂e/gal). Emissions factors associated with diesel combustion are not anticipated to change over time, as there are no legislative actions that would reduce the energy intensity of diesel.

Energy Efficiency

Title 24 standards apply to both new construction and existing buildings. The 2019 Title 24 standards went into effect January 2020. The California Energy Commission (CEC) estimates that new residential buildings built to the 2019 standards are 53 percent more efficient than residential buildings built to the previous standards (CEC 2018). CEC estimates that new nonresidential buildings built to the 2019 standards are 30 percent more efficient than nonresidential buildings built to the previous standards (CEC 2018).

In addition to the current iteration of Title 24, previous versions of the standards have also achieved energy efficiencies for residential and nonresidential buildings. Energy efficiency savings have been quantified by CEC and the collective effect of Title 24 was accounted for in the forecasted emissions. Based on these data, the analysis assumes that all new residential construction occurring between 2020 and 2045 would be 75 percent more energy efficient than buildings constructed under previous Title 24 standards, and nonresidential construction would be 53 percent more energy efficient compared to buildings constructed under previous Title 24 standards. This includes the energy efficiencies gained through the 2008, 2013, 2016, and 2019 versions of Title 24. Additional efficiencies to be achieved in future code cycles are yet unknown and therefore not factored into the forecast.

2.1.2 Transportation

ON-ROAD TRANSPORTATION

Between 2019 and 2045, annual legislative-adjusted BAU GHG emissions from on-road vehicles would decrease by approximately 8 percent from 417,147 to 384,651 MTCO₂e per year based on future vehicle emission factors modeled in the California Air Resources Board's (CARB's) Emission Factor (EMFAC) 2017 model, despite an increase in VMT of 42 percent. VMT projections were provided by Fehr & Peers based on origin-destination data from SACOG. With respect to the legislative adjustments included in this forecast, State and federal regulations incorporated in the on-road vehicle sector include the Advanced Clean Car I (ACC) Standards, and fuel efficiency standards for medium- and heavy-duty vehicles. These standards are included in EMFAC2021's emissions factor estimates and forecasts. It should be noted that the Low Carbon Fuel Standard was excluded in EMFAC2021 forecasts because the emissions benefits originate from upstream fuel production and do not directly reduce vehicle tailpipe emissions that affect the city's GHG emissions forecasts. Table 9 summarizes the scaling factor and legislative reductions used to forecast on-road transportation emissions.

Table 9 On-Road Transportation Forecast Methods and Legislative Reductions

Source	Forecast Methods	
	Scale Factor	Applied Legislative Reductions
On-Road Vehicles	Scaled by VMT estimates provided by Fehr & Peers.	EMFAC2021 forecasts vehicle fleet distributions by vehicle type and the emissions factors anticipated for each vehicle category based on both vehicle emissions testing and approved legislative reductions. EMFAC2021's forecasts incorporate the effects of the ACC I Standards, and fuel efficiency standards for medium- and heavy-duty vehicles, as well as truck and bus regulations.

Notes: ACC I = Advanced Clean Cars I; CAFE = Corporate Average Fuel Economy; EMFAC2021 = California Air Resources Board's Emission Factor 2021 model.

Source: Forecasts prepared by Ascent Environmental in 2022.

Table 10 shows the 2019 inventory and legislative-adjusted BAU forecasted emissions from on-road transportation for 2030 and 2045.

Table 10 2019 On-Road Transportation Greenhouse Gas Emissions Inventory and Legislative-Adjusted BAU Forecasts (MTCO₂e/year)

EMFAC Vehicle Category	EMFAC Vehicle Category Description	2019	2030	2045
LDA	Passenger Cars	148,453	132,269	142,439

LDT2	Light-Duty Trucks (GVWR <6000 lb)	78,535	73,483	80,220
MDV	Medium-Duty Trucks (GVWR 5751-8500 lb)	65,206	60,725	65,244
LDT1	Light-Duty Trucks (GVWR <6000 lb)	17,554	17,356	18,083
LHD1	Light-Heavy-Duty Trucks (GVWR 8501- 10000 lbs)	29,056	28,522	19,887
T7 Trucks	Heavy-Heavy Duty Trucks	38,318	36,057	31,532
T6 Trucks	Medium-Heavy Duty Trucks	23,818	23,123	14,868

Total	-	417,145	387,784	384,651

Notes: Totals may not sum exactly due to independent rounding. BAU = business-as-usual; MTCO₂e/year = metric tons of carbon dioxide equivalent per year.

Source: Forecasts prepared by Ascent Environmental in 2022.

OFF-ROAD VEHICLES AND EQUIPMENT

Between 2019 and 2045, emissions associated with off-road vehicles and equipment used in the city would increase by 69 percent from 12,470 to 21,074 MTCO₂e per year, with legislative adjustments applied and overall growth in various demographics. Emissions were obtained from CARB's OFFROAD2007 and OFFROAD2021 models. With respect to the legislative adjustments in the off-road vehicle sector, CARB's latest off-road emissions model, OFFROAD2021, was used, which incorporates regulatory actions such as reformulated fuels and more stringent emission standards. However, some off-road vehicle and equipment sources that are included in the OFFROAD2007 model are excluded from OFFROAD2021. For these sectors, emissions were obtained from OFFROAD2007. In addition, OFFROAD2021 provides CO₂ emissions but does not provide emissions from CH₄ and N₂O. Ratios of CH₄ and N₂O to CO₂ reported in OFFROAD2007 were calculated and applied to CO₂ data from OFFROAD2021 to calculate CH₄ and N₂O emissions, as recommended by CARB.

Sacramento County-level emissions from off-road vehicles and equipment were scaled using changes in city-specific demographic factors. Table 11 summarizes the scaling factors and legislative reductions used to forecast off-road vehicle and equipment emissions.

Table 11 Off-Road Vehicles and Equipment Forecast Methods and Legislative Reductions by Source

Total	11,027	14,772	18,488

Notes: Totals may not sum exactly due to independent rounding. BAU = business-as-usual; MTCO₂e/year = metric tons of carbon dioxide equivalent per year.

Source: Forecasts prepared by Ascent Environmental in 2022.

2.1.3 Solid Waste

Between 2019 and 2045, solid waste emissions generated from community activities in the city would increase by approximately 62 percent from 22,397 to 36,211 MTCO₂e, due to overall population growth of approximately 62 percent over the same period. Solid waste sector emissions include CH₄ emissions from the decay of waste generated annually, which were scaled by population growth within the city between 2019 and 2045. There are no applicable legislative reductions to apply to this sector and future disposal rates, so legislative-adjusted BAU emissions are equivalent to BAU emissions. Table 13 shows the 2019 inventory and legislative-adjusted BAU forecasted emissions from the solid waste sector for 2030 and 2045.

Table 13 2019 Solid Waste Greenhouse Gas Emissions Inventory and Legislative-Adjusted BAU Forecasts (MTCO₂e/year)

Source	2019	2030	2045

Notes: Totals may not sum exactly due to independent rounding. BAU = business-as-usual; MTCO₂e/year = metric tons of carbon dioxide equivalent per year.

Source: Forecasts prepared by Ascent Environmental in 2022.

2.1.4 Water Supply

Between 2019 and 2045, water supply emissions from community activities in the city would be reduced to zero by 2030 onward due to SMUD's 2030 Zero Carbon Plan. Table 14 summarizes the scaling factor and legislative reduction used to forecast water supply emissions.

Table 14 Water Supply Forecast Methods and Legislative Reductions by Source

Water Supply	9,070	0	0

Notes: BAU = business-as-usual; MTCO₂e/year = metric tons of carbon dioxide equivalent per year.

Source: Forecasts prepared by Ascent Environmental in 2022.

2.1.5 Wastewater Treatment

Between 2019 and 2045, wastewater treatment emissions from the community would increase by 62 percent from 5,690 to 9,200 MTCO₂e per year, accounting for overall population growth of 62 percent over the same time. Wastewater treatment-related emissions are generated from centralized wastewater treatment plants (WWTPs). Table 16 shows the 2019 inventory and legislative-adjusted BAU forecasted emissions from wastewater treatment sources for 2030 and 2045.

Table 16 2019 Wastewater Treatment Greenhouse Gas Emissions Inventory and Legislative-Adjusted BAU Forecasts (MTCO₂e/year)

Centralized WWTPs	5,690	7,490	9,200

Notes: BAU = business-as-usual; MTCO₂e/year = metric tons of carbon dioxide equivalent per year.

Source: Forecasts prepared by Ascent Environmental in 2022.

2.1.6 Discussion

As discussed above, the community legislative-adjusted BAU emissions would decrease by 22 percent between 2019 and 2045. This is a result of reductions that would be achieved from several regional, State, and federal legislative actions including:

- ▶ 100 percent of electricity from zero carbon sources by 2030;
- ▶ improved building energy efficiency through compliance with Title 24 standards (75 percent energy reduction for residential, 53 percent for nonresidential); and
- ▶ reductions in on-road vehicle emissions factors forecasted in EMFAC2021 and off-road vehicle and equipment emissions factors forecasted in OFFROAD2021.

From 2030 to 2045, new legislative actions that would affect emissions are anticipated to be adopted by the State and federal government; however, because information regarding these regulatory changes is currently unavailable or not final, emissions reductions from future potential legislative actions are not quantified in this memorandum. Without future legislative actions and despite growth in the city, emissions would decline from 2019 through 2045. Additional reductions could occur in the future due to State and/or federal actions requiring improvements in vehicle and equipment fuel economy and increased share of electric vehicle and equipment options, which would be reflected in future updates to the EMFAC2021 and OFFROAD2021 models. Other previous legislative actions would also continue to apply in the future and ultimately outpace growth in population and employment. Where new State regulations or programs are imminent and reasonably foreseeable, they can be incorporated as complementary actions to locally based GHG reduction measures.

3 REDUCTION TARGETS

3.1 STATEWIDE GREENHOUSE GAS REDUCTION TARGETS AND GOALS

As directed in AB 32, SB 32, and AB 1279, the State aims to reduce annual GHG emissions to:

- ▶ 1990 levels by 2020;
- ▶ 40 percent below 1990 levels by 2030; and
- ▶ Net zero emissions with at least an 85 percent reduction from 1990 levels for anthropogenic sources

Signed on September 16, 2022, AB 1279, the California Climate Crisis Act, established a statewide goal to achieve net zero emissions as soon as possible, and no later than 2045, and achieve net negative emissions thereafter, and to ensure that by 2045, statewide anthropogenic greenhouse gas emissions are reduced to at least 85 percent below 1990 levels..

The City aims to reduce its fair-share of communitywide emissions in proportion to the State's targets and goals. Community emissions levels from 1990 are not available, which is the case for most local jurisdictions in California. Thus, community GHG reduction targets for the City's CAP were developed relative to the 2019 community emissions inventory, consistent with guidance provided by CARB. The methodology used to calculate the City's emissions reduction targets is described below.

3.2 COMMUNITY GREENHOUSE GAS EMISSIONS REDUCTION TARGETS

Based on a review of the 2017 Scoping Plan and the 2022 Scoping Plan and an understanding of activities occurring within the city, the City has direct or indirect jurisdiction over activities that generate emissions and contribute to reductions in four of the eight emissions sectors included in the 2017 Scoping Plan and the 2022 Scoping Plan: residential and commercial, electric power, recycling and waste, and transportation. The City has limited influence over high GWP gases, and industrial activities in the city are limited. Lastly, while facilities regulated under Cap-and-Trade do exist within city boundaries, the State is responsible for achieving emissions reductions from these sources, and the City has limited ability to influence Cap-and-Trade facilities' GHG emissions. Therefore, by excluding these sectors under this approach, community GHG reduction targets have been established in proportion with statewide reductions for all sectors relevant to City jurisdiction to the extent feasible using available data. This target setting approach is consistent with the California Supreme Court decision in *Center for Biological Diversity v. California Department of Fish and Wildlife and Newhall Land and Farming* (2015) 62 Cal.4th 204, which determined that the approach of assessing a project's consistency with statewide emissions reduction goals must include a "reasoned explanation based on substantial evidence" that links the project's emission to the statewide GHG reduction goals.

The City kicked off the project in 2021 after which the City prepared GHG emissions inventories and forecasts and set GHG reduction targets. CARB's 2017 Scoping Plan was the adopted statewide Plan at the time the targets were developed and hence was used for setting the City's 2030 target and developing emissions reduction strategies and measures that meet the 2030 target. The City's 2045 goal has been developed using the 2022 Scoping Plan (adopted in December 2022) in response to the statewide 2045 GHG reduction goal established in AB 1279. The following sections detail the methodology for setting the City's 2030 target and 2045 goal:

2030 Emissions Reduction Target

The first step in determining community targets is to compare the State's GHG inventories for 1990 and 2019 (i.e., the City's baseline inventory year) for the four relevant sectors. According to the inventories available from CARB using the 2017 Scoping Plan, statewide emissions from the relevant sectors were approximately 431 million MTCO_{2e} (MMTCO_{2e}) in 1990 and 418 MMTCO_{2e} in 2019 (CARB 2021) (note: sector-specific emissions totals and reductions reflect rounding). Thus, 2019 statewide emissions were approximately 13 MMTCO_{2e} (3 percent) lower than the 1990 level and the State's 2020 GHG target (i.e., reduce emissions to 1990 levels by 2020).

According to the 2017 Scoping Plan, statewide emissions from sectors relevant to the City's inventory must be reduced to 311 MMTCO_{2e} by 2020 for the State to achieve its 2020 target. CARB's statewide inventory reports 2019 emissions levels of 278 MMTCO_{2e} for these sectors, which demonstrates the achievement of the 2020 target.

According to the 2017 Scoping Plan, statewide emissions from the sectors relevant to the City's inventory must be reduced to 179 MMTCO_{2e} by 2030 for the State to achieve its 2030 target. This represents an emissions reduction of approximately 99 MMTCO_{2e}, or 36 percent, by 2030, relative to 2019 levels of 278 MMTCO_{2e}.

2045 Emissions Reduction Goal

The first step in determining community targets is to compare the State's GHG inventories for 1990 and 2019 (i.e., the City's baseline inventory year) for the four relevant sectors. According to the inventories available from CARB using the 2022 Scoping Plan, statewide emissions from the relevant sectors were approximately 438 million MTCO_{2e} (MMTCO_{2e}) in 1990 and 418 MMTCO_{2e} in 2019 (CARB 2021) (note: sector-specific emissions totals and reductions reflect rounding). Thus, 2019 statewide emissions were approximately 20 MMTCO_{2e} (5 percent) lower than the 1990 level and the State's 2020 GHG target (i.e., reduce emissions to 1990 levels by 2020).

According to the 2022 Scoping Plan, statewide emissions from sectors relevant to the City's inventory must be reduced to 311 MMTCO₂e by 2020 for the State to achieve its 2020 target. CARB's statewide inventory reports 2019 emissions levels of 278 MMTCO₂e for these sectors, which demonstrates the achievement of the 2020 target.

According to the 2022 Scoping Plan, statewide emissions from the sectors relevant to the City's inventory must be reduced to 53 MMTCO₂e by 2045 for the State to achieve its 2045 goal. This represents an emissions reduction of approximately 330 MMTCO₂e, or 81 percent, by 2030, relative to 2019 levels of 278 MMTCO₂e.

Consistent with State targets and goals and considering relevant emissions sectors, the City's community GHG reduction targets are as follows:

- ▶ 2030 target: 36 percent below 2019 levels (438,283 MTCO₂e); and
- ▶ 2045 target: 81 percent below 2019 levels (129,252 MTCO₂e)

Table 17 shows how the City's targets were derived based on adjusted statewide GHG emissions data and projections and summarizes the City's legislative-adjusted BAU forecasts and targets for 2030 and 2045.

Table 17 Rancho Cordova GHG Emissions Reduction Targets and Legislative-Adjusted BAU Summary

Source	2019	2030	2045
2017 Scoping Plan Emissions Limit (MMTCO ₂ e)	NA	259	NA
Adjusted 2017 Scoping Plan Emissions Limit ¹ (MMTCO ₂ e)	NA	179	NA
2022 Scoping Plan Emissions Limit (MMTCO ₂ e)	NA	NA	66
Adjusted 2022 Scoping Plan Emissions Limit ¹ (MMTCO ₂ e)	NA	NA	53
Statewide Target Percent Reduction from 2019 Levels	NA	36%	85%
Baseline Emissions and Legislative-Adjusted BAU Forecast (MTCO ₂ e)	679,706	515,352	529,788
Target Percent Reduction Below Baseline (%)	NA	36%	81%
Target Annual Emissions (MTCO ₂ e)	NA	438,283	129,252
Reduction Needed to Meet Target (MTCO ₂ e)	NA	77,070	400,536

Notes: BAU = business-as-usual; GHG = greenhouse gases; MTCO₂e = metric tons of carbon dioxide equivalent; MMTCO₂e = million metric tons of carbon dioxide equivalent; NA = not available; 2017 Scoping Plan = California's 2017 Climate Change Scoping Plan.

¹ Excludes agriculture, high GWP, industrial, and cap-and-trade sectors because they are not relevant to the City's inventory.

Source: CARB 2017; Ascent Environmental 2022.

Figure 3 below depicts the 2019 baseline and legislative-adjusted BAU GHG emissions forecasts by sector, as distinguished by the colored wedges. The sum of the wedges represents the anticipated annual GHG emissions each year. Each wedge shows how an emissions sector is expected to contribute to the community-wide GHG inventory over time. The black line indicates the City's GHG reduction target for 2030 and 2045 relative to the City's 2019 GHG inventory, consistent with guidance provided by CARB.

The City's 2030 GHG reduction target would be 36 percent below 2019 levels (438,283 MTCO₂e), and 81 percent below 2019 levels (129,252 MTCO₂e) by 2045. The space between the trajectory of the black line and the top of the colored wedges represents the "gap" in emissions that will need to be addressed through local actions for the City to meet its future GHG reduction targets. These emissions reductions are in addition to anticipated reductions provided

by legislative actions at the State and federal levels. Supporting information and detailed calculation results are included in Attachment A.

City of Rancho Cordova						
Communitywide Greenhouse Gas Emissions Reduction Measures Quantification Sheet						
Summary Sheet						
Strategy Code and Title	Measure Code	Measure Title	GHG Reduction Potential in 2030 (MTCO2e)	GHG Reduction Potential in 2045 (MTCO2e)	Percent of Total Reductions in 2030	Percent of Total Reductions in 2045
Getting To, From, and Around the City (On-road Transportation Sector)						
Strategy Transportation-1. Support development of walkable, interconnected neighborhoods, villages, and districts	Transportation-1.1	Enforce the City's Transportation Impact Guidelines , which require developers to include features in their projects that decrease the amount of driving alone and encourage people to make trips by walking, biking , or using public transit	6,669	17,134	8%	6%
	Transportation-1.2	Reduce or eliminate requirements to provide a minimum number of off-street parking spaces in new development projects	NA	NA	NA	NA
	Transportation-1.3	Improve street connectivity , for example by providing walkways at the ends of existing cul-de-sacs, or requiring walkable street systems in new developments	NA	NA	NA	NA
	Transportation-1.4	Limit the number of drive-through businesses	NA	NA	NA	NA
Strategy Transportation-2. Make walking and biking safe and attractive for people of all ages and abilities	Transportation-2.1	Update Bike and Pedestrian Master Plans to increase the number of low-stress bikeways and walkways that connect homes to destinations	11,536	12,755	14%	4%
	Transportation-2.2	Install roundabouts to control traffic at intersections, instead of stop signs or traffic signals	NA	NA	NA	NA
	Transportation-2.3	Provide temporary or permanent car-free zones or "slow streets" in specified areas, for example, individual blocks or residential streets	NA	NA	NA	NA
	Transportation-2.4	Install measures to reduce vehicle speeds and calm traffic on city streets	NA	NA	NA	NA
Strategy Transportation-3. Provide transit options that are accessible, reliable, and convenient	Transportation-3.1	Increase the frequency of SacRT bus, CordoVan service, and/or light rail service, or extend service to cover new areas or times of day	5,768	10,204	7%	3%
	Transportation-3.2	Implement Transit-Supportive Roadway Treatments (for example, transit signal priority, bus-only signal phases, queue jumps, curb extensions to speed passenger loading, and dedicated bus lanes)				
	Transportation-3.3	Provide discounted or fare-free transit service (could be universal or targeted to specific areas and/or populations, for example, youth under 18)				
	Transportation-3.4	Expand the SmaRT Ride area and convert the shuttles to electric shuttles				
Strategy Transportation-4. Reduce drive alone vehicle trips	Transportation-4.1	Implement a Commuter Trip Reduction Program (CTR) in which companies provide employees with services, infrastructure, and incentives for not driving alone to work and instead ridesharing, taking transit, biking, walking, or teleworking	3,845	6,803	5%	2%
	Transportation-4.2	Implement an Electric Vehicle Carshare Program in which vehicles are available for users on-demand for short-term rentals	NA	NA	NA	NA
	Transportation-4.3	Implement a bikeshare/scooter share program in which conventional or electric powered bikes or scooters are available to users on-demand for short-term rentals	NA	NA	NA	NA
	Transportation-4.4	Provide Community-Based Travel Planning (CBTP) to households in the city in which trained travel advisors visit households to provide them with customized information, incentives , and support to encourage use of transportation options other than driving alone	NA	NA	NA	NA
Strategy Transportation-5. Transition to electric and zero emission vehicles	Transportation-5.1	Install EV chargers in new residential, commercial, and industrial projects	26,997	171,334	34%	56%
	Transportation-5.2	Install publicly accessible EV chargers on existing private property				
	Transportation-5.3	Install EV chargers on public property				
	Transportation-5.4	Electrify loading docks and/or require idling-reduction systems	NA	NA	NA	NA
	Transportation-5.5	Limit new gasoline/diesel fueling stations	NA	NA	NA	NA
Using Energy in Homes and Businesses (Building Energy Sector)						
Strategy Energy-1a. Increase energy efficiency and electrification in existing residential buildings	Energy-1.1	Retrofit existing residential buildings to improve energy efficiency and reduce natural gas consumption for end uses like space and water heating, clothes drying, cooking	9,667	29,002	12%	9%
Strategy Energy-1b. Increase energy efficiency and electrification in existing nonresidential buildings	Energy-1.2	Retrofit existing nonresidential buildings to improve energy efficiency and reduce natural gas consumption for end uses like space and water heating, clothes drying, cooking.	2,077	9,969	3%	3%
Strategy Energy-2a. Increase energy efficiency and electrification in new residential buildings	Energy-2.1	Require new residential development to be all-electric, zero net energy (ZNE) buildings (where the amount of energy used in a year equals the amount of energy generated on the site)	1,411	5,097	2%	2%
Energy-2b. Increase energy efficiency and electrification in new nonresidential buildings	Energy-2.2	Require new nonresidential development to achieve energy efficiency above minimum State building code requirements (CAL Green Tier 2)	428	1,545	0%	1%
Using Equipment for Landscaping and Construction (Off-Road Vehicle and Equipment Sector)						
Strategy Offroad-1. Transition to electric and zero emissions technologies for landscaping equipment	Offroad-1.1	Replace existing gasoline and diesel-powered landscaping equipment with electric or zero emission alternatives	83	138	0%	0%
	Offroad-1.2	Convert new landscaping equipment to electric or zero-emission alternatives	46	123	0%	0%
Strategy Offroad-2. Transition to electric and zero emissions technologies for construction equipment	Offroad-2.1	Increase electrification and use of alternative fuels in construction projects	1,681	9,248	2%	3%
	Offroad-2.2	Reduce construction vehicle idling	NA	NA	NA	NA
Using Water and Disposing of Waste at Homes and Businesses (Water and Solid Waste Sectors)						
Strategy Water-1. Conserve water	Water-1.1	Reduce indoor water use in existing and new buildings	0	0	NA	NA
	Water-1.2	Reduce outdoor water use for landscaping and irrigation in existing and new developments	0	0	NA	NA
Strategy Solid Waste-1. Avoid disposal of organic waste in landfills	Solid Waste-1.1	Increase recovery of edible food waste	8,845	32,590	11%	11%
	Solid Waste-1.2	Eliminate disposal of organic waste in landfills (food waste, yard waste)				
Planting and Managing Trees (Carbon Sequestration Sector)						
Strategy Carbon Sequestration-1. Remove emissions from the atmosphere	Carbon Storage-1.1	Increase the number of trees in the city, through new plantings and management of existing trees	441	1,042	1%	0%
Total Reductions from City Measures			79,628	307,625		
Legislative-Adjusted BAU Forecast Emissions (without CAP measures)			515,352	529,788		
Target Percent Reduction below 2019 Levels			36%	81%		
Target Annual Emissions			438,283	129,252		
Reductions Needed to Achieve Target			77,070	400,536		
Legislative-Adjusted BAU Forecast Emissions with CAP Measures			435,724	222,163		
Gap Needed to Achieve Target*			-2559	92,911		
Percent of Target Achieved			103%	77%		

Notes: NA = not applicable (non-quantified measure; supportive of quantified measures).
* Negative numbers indicate target has been achieved with a surplus of emissions reductions; positive values indicate an emissions reduction gap still exists.

Strategy Code and Title	Measure Code	Measure Title	GHG Reduction Potential in 2030 (MTCO2e)	GHG Reduction Potential in 2045 (MTCO2e)	Percent of Total Reductions in 2030	Percent of Total Reductions in 2045	Quantification Approach
Getting To, From, and Around the City (On-road Transportation Sector)							
Strategy Transportation-1. Support development of walkable, interconnected neighborhoods, villages, and districts	Transportation-1.1	Enforce the City's Transportation Impact Guidelines , which require developers to include features in their projects that decrease the amount of driving alone and encourage people to make trips by walking, biking , or using public transit	6,669	17,134	8%	6%	Assumes a 10% reduction in new passenger VMT and 15% reduction in commercial VMT by 2030, and a 15% reduction in both passenger and commercial VMT by 2045. All reductions from new VMT that would be achieved from other measures are assumed to be captured under this measure. "New VMT" refers to forecasted VMT growth between 2019 and the target years.
	Transportation-1.2	Reduce or eliminate requirements to provide a minimum number of off-street parking spaces in new development projects	NA	NA	NA	NA	Non-quantified measure.
	Transportation-1.3	Improve street connectivity , for example by providing walkways at the ends of existing cul-de-sacs, or requiring walkable street systems in new developments	NA	NA	NA	NA	Non-quantified measure.
	Transportation-1.4	Limit the number of drive-through businesses	NA	NA	NA	NA	Non-quantified measure.
Strategy Transportation-2. Make walking and biking safe and attractive for people of all ages and abilities	Transportation-2.1	Update Bike and Pedestrian Master Plans to increase the number of low-stress bikeways and walkways that connect homes to destinations	11,536	12,755	14%	4%	Assumes a 6% reduction in existing (2019) passenger VMT by 2030 and 7.5% by 2045.
	Transportation-2.2	Install roundabouts to control traffic at intersections, instead of stop signs or traffic signals	NA	NA	NA	NA	Non-quantified measure.
	Transportation-2.3	Provide temporary or permanent car-free zones or "slow streets" in specified areas, for example, individual blocks or residential streets	NA	NA	NA	NA	Non-quantified measure.
	Transportation-2.4	Install measures to reduce vehicle speeds and calm traffic on city streets	NA	NA	NA	NA	Non-quantified measure.
Strategy Transportation-3. Provide transit options that are accessible, reliable, and convenient	Transportation-3.1	Increase the frequency of SacRT bus, CordoVan service, and/or light rail service, or extend service to cover new areas or times of day	5,768	10,204	7%	3%	Assumes a 3% reduction in existing (2019) passenger VMT by 2030 and 6% by 2045. Grouped all measures together based on CAPCOA transit-related measures (maximum transit-related emissions reductions from increased frequency, expanded coverage, reduced fare, rapid transit -- 15% reduction).
	Transportation-3.2	Implement Transit-Supportive Roadway Treatments (for example, transit signal priority, bus-only signal phases, queue jumps, curb extensions to speed passenger loading, and dedicated bus lanes)					
	Transportation-3.3	Provide discounted or fare-free transit service (could be universal or targeted to specific areas and/or populations, for example, youth under 18)					
	Transportation-3.4	Expand the Smart Ride area and convert the shuttles to electric shuttles					
Strategy Transportation-4. Reduce drive alone vehicle trips	Transportation-4.1	Implement a Commuter Trip Reduction Program (CTR) in which companies provide employees with services, infrastructure, and incentives for not driving alone to work and instead ridesharing, taking transit, biking, walking, or teleworking	3,845	6,803	5%	2%	Assumes a 2% reduction in existing (2019) passenger VMT by 2030 and 4% by 2045.
	Transportation-4.2	Implement an Electric Vehicle Carshare Program in which vehicles are available for users on-demand for short-term rentals	NA	NA	NA	NA	Reductions captured in EV measures (Transportation-5.1 - 5.3).
	Transportation-4.3	Implement a bikeshare/scooter share program in which conventional or electric powered bikes or scooters are available to users on-demand for short-term rentals	NA	NA	NA	NA	Non-quantified measure (negligible reductions).
	Transportation-4.4	Provide Community-Based Travel Planning (CBTP) to households in the city in which trained travel advisors visit households to provide them with customized information, incentives , and support to encourage use of transportation options other than driving alone	NA	NA	NA	NA	Reductions from this measure are reflected in Transportation-4.1
Strategy Transportation-5. Transition to electric and zero emission vehicles	Transportation-5.1	Install EV chargers in new residential, commercial, and industrial projects	26,997	171,334	34%	56%	Quantified using EMFAC projections and statewide EV targets under the 2020 Mobile Source Strategy and AB 2172.
	Transportation-5.2	Install publicly accessible EV chargers on existing private property					
	Transportation-5.3	Install EV chargers on public property					
	Transportation-5.4	Electrify loading docks and/or require idling-reduction systems	NA	NA	NA	NA	Non-quantified measure.
	Transportation-5.5	Limit new gasoline/diesel fueling stations	NA	NA	NA	NA	Non-quantified measure.

Transportation-1.1			
Enforce the City's Transportation Impact Guidelines, which require developers to include features in their projects that decrease the amount of driving alone and encourage people to make trips by walking, biking, or using public transit	2019	2030	2045
10% reduction in new project-generated VMT from implementation of the City's VMT			
Thresholds of Significance for Development Projects			
Annual passenger vehicle miles traveled (VMT)	705,862,131	822,688,562	1,004,017,191
New passenger VMT		116,826,431	298,155,061
Percent VMT reduction from SB 743		10%	15%
Reduced passenger VMT from SB 743		11,682,643	44,723,259
Passenger vehicle emissions factor (MTCO ₂ e/mile)		0.000272	0.000241
GHG reductions from new passenger vehicles (MTCO₂e)		3,182	10,775
Annual commercial vehicle miles traveled (VMT)	213,356,667	248,669,088	303,478,188
New commercial VMT		35,312,421	90,121,520
Percent VMT reduction from SB 743		15%	15%
Reduced commercial VMT from SB 743		5,296,863	13,518,228
Commercial vehicle emissions factor (MTCO ₂ e/mile)		0.000658	0.000470

T-18 Pedestrian Network Improvement, T-19 Bike Facility/Boulevard, and T-20 Expand Bikeway Network (maximum neighborhood design-related emissions reduction = 7.5% reduction)

Bicycle Master Plan (2016)

Develop continuous, convenient, and family friendly bikeway network.

Ensure new development extends the bike network to all neighborhoods and attractors.

Ensure adequate support facilities throughout Rancho Cordova's bicycle network.

Increase awareness of bicyclist safety and responsibility through education and enforcement of bicyclists and drivers.

Eliminate all traffic fatalities and reduce the number of bicycle related injuries by 50 percent by 2027.

Pursue innovative funding sources and partnership opportunities to enhance bicycle facilities, and provide education and encouragement opportunities.

Increase the percentage of all trips made by bicyclists from 1.1 percent to 2.2 percent in Rancho Cordova by 2021.

Establish Rancho Cordova as a destination for recreational bicycling through creation of a signature trail network and encouragement of bicycling and bicycling events.

Table 4-1: Proposed Bikeway Network Mileage by Class

Path Type	Existing	Proposed	Total
Class I Paths	13.9	77	90.9
Class II Bike Lanes	14.7	12.5	27.2
Class III Bike Routes	2.4	3.2	5.6
Class III Bike Boulevards	0	14.5	14.5
Class IV Protected Bikeways	0	3.6	3.6
Total	31	110.8	141.8

Transportation-3.1, Transportation-3.2, Transportation-3.3, Transportation-3.4			
Increase the frequency of SacRT bus, CordoVan service, and/or light rail service, or extend service to cover new areas or times of day. Implement Transit-Supportive Roadway Treatments (e.g., transit signal priority, bus-only signal phases, queue jumps, curb extensions to speed passenger loading, and dedicated bus lane). Provide discounted or fare-free bus service (could be citywide or targeted to specific areas and/or populations, e.g., youth under 18). Expand the SmarT Ride area and convert the shuttles to electric shuttles	2019	2030	2045
Comprehensive transit system improvements			
Annual existing passenger vehicle miles traveled (VMT)	705,862,131	705,862,131	705,862,131
Percent reduction in existing citywide passenger VMT from comprehensive transit improvements [1] [2] [3]		3.0%	6.0%
Passenger VMT reduction		21,175,864	42,351,728
Passenger vehicle emissions factor (MTCO2e/mile)		0.000272	0.000241

Subject: City of Rancho Cordova Climate Action Plan - Vulnerability Assessment

1 INTRODUCTION

Global climate change is projected to exacerbate the impacts of certain hazards that the City of Rancho Cordova (City) is already exposed to under current conditions. These hazards include indirect impacts from wildfires and effects on air quality, extreme heat, heat wave events, long-term drought, and flooding. While many of these hazards have existed historically for the City, the frequency and intensity of these hazards will increase as a result of global climate change. This Vulnerability Assessment (VA) serves to identify and analyze impacts of climate change that will most directly affect the City. The VA includes a climate change vulnerability assessment and serves to inform development of adaptation strategies by analyzing the City's exposure to existing hazards, sensitivity to these hazards, potential climate-related impacts from these hazards, and the City's existing capacity to prepare and adapt for these impacts, known as adaptive capacity.

1.1 CLIMATE CHANGE MITIGATION AND ADAPTATION

The effects of climate change are already being experienced today. The combustion of fossil fuels, among other human activities, since the Industrial Revolution in the 19th century has introduced greenhouse gases (GHGs) into the atmosphere at an accelerated pace, intensifying the greenhouse effect and leading to a trend of warming of the Earth's climate, known as global climate change or global warming. Climate change has more recently become a priority on an international, national, and local scale as recent climate data reveal more extreme weather patterns, increased average global temperatures, and the rapid melting of the Earth's Arctic and Antarctic poles and glaciers.

The Intergovernmental Panel on Climate Change (IPCC), the international body charged with compiling and interpreting the data surrounding climate change, estimates that global average temperatures will increase by 3.7 degrees Celsius (°C) (6.7 to 8.6 degrees Fahrenheit [°F]) by the end of the century unless additional efforts to reduce GHG emissions are made (IPCC 2014). A more recent IPCC report indicates that average global temperatures will likely increase by 1.5 °C (2.7 °F) between 2030 and 2052 if global GHG emissions continue their current rate (IPCC 2018). There is consensus among the scientific community that a 1.5 °C (2.7 °F) rise in global temperatures will likely cause catastrophic environmental disasters in certain locations including extreme heat, sea-level rise, and more severe and damaging precipitation events. These changes to Earth's climate would contribute to more frequent storms and flooding, the displacement of coastal and tropical populations, food and water insecurity, catastrophic wildfire events, economic hardships, loss of biological resources, increased spread of vector-borne diseases, and degraded ambient air quality (IPCC 2018).

In August 2021, IPCC released the Six Assessment report which assess scientific, technical, and socio-economic information concerning climate change. In this report, the IPCC states that observed increases in GHG concentrations in the atmosphere since around the year 1750 are unequivocally caused by human activities. As a result, Each of the last four decades has been successively warmer than any decade that preceded it since 1850 (IPCC 2021). The findings of highlight key new insights into the importance of global climate tipping points, thresholds in the global climate (e.g., global temperatures) that, when exceeded, can lead to large changes in the state of the climate system with one impact rapidly leading to a series of cascading events.

The Six Assessment report contain the body's strongest warnings yet on the causes and impacts of climate change. Importantly, the report notes that, in terms of solutions, "We need transformational change operating on processes and behaviors at all levels: individual, communities, business, institutions and governments. We must redefine our way of life and consumption (IPCC 2021)."

Efforts that focus on reducing the sources of climate change are termed climate change mitigation, GHG mitigation, or climate action. Efforts to reduce harm from the effects of a changing climate, are referred to as climate adaptation and resilience. Figure 1 illustrates the relationship between these two approaches. State law requires communities to address climate change mitigation in local planning and environmental review processes and climate adaptation in local long-range planning processes, such as general plans (CalOES 2020). Included below is a summary of the State requirements to address climate adaptation as part of the local planning process.

- ▶ **Senate Bill 379** – This bill requires all cities and counties to include climate adaptation and resiliency strategies in the next update of their General Plans beginning January 1, 2017. The update must include:
 - A vulnerability assessment that identifies the risks that climate change poses to the local jurisdiction and the geographic areas at risk from climate change impacts;
 - A set of adaptation and resilience goals, policies, and objectives based on the information specified in the climate vulnerability assessment for the protection of the community; and
 - A set of feasible implementation measures designed to carry out the goals, policies, and objectives identified pursuant to the adaptation objectives
- ▶ **Assembly Bill 747** – Requires the safety elements for cities and counties to be reviewed and updated as necessary to identify evacuation routes and their capacity, safety, and viability under a range of emergency scenarios upon the next revision of a local hazard mitigation plan on or after January 1, 2022, or beginning on or before January 1, 2022 if a local jurisdiction has not adopted a local hazard mitigation plan.
- ▶ **Senate Bill 99** - This bill requires cities and counties, upon the next revision of the housing element on or after January 1, 2020, to review and update the safety element to include information identifying residential developments in hazard areas that do not have at least 2 emergency evacuation routes.
- ▶ **Senate Bill 1035** – This bill requires cities and counties to revise the safety element upon each revision of the housing element or local hazard mitigation plan, but not less than once every 8 years, to identify new information relating to flood and fire hazards and climate adaptation and resiliency strategies applicable to the city or county that was not available during the previous revision of the safety element.

Figure 1 Relationship Between Climate Mitigation and Adaptation

1.2 GUIDANCE DOCUMENTS

This section provides a summary of the guidance documents and resources that were used to help develop the VA.

California Adaptation Planning Guide

The most recent version of the California Adaptation Planning Guide (APG) was released in March 2020. This guidance builds upon the first iteration of the APG released in 2012. The APG was developed by the California Office of Emergency Services (CalOES) and California Natural Resources Agency (CNRA). The APG provides guidance to local governments for adaptation and climate change resiliency planning. The APG includes a step-by-step process that communities may use to help plan for the impacts of climate change. The APG is designed to be flexible and guide communities through an adaptation planning process that is best suited for their needs (CalOES 2020).

California's Fourth Climate Assessment

CNRA, the Governor's Office of Planning and Research (OPR), and the California Energy Commission (CEC) prepared California's Fourth Climate Change Assessment (Climate Assessment) in 2018. The Climate Assessment was designed to address critical information gaps that decisionmakers at the State, regional, and local levels need to close to protect and build the resilience of people, infrastructure, natural systems, working lands, and waterways from climate-related impacts. The Climate Assessment also includes regional reports which analyze and discuss the impacts to

specific regions in the state. The regional report for the City and County is the California's Fourth Climate Change Assessment Sacramento Valley Region Report (Regional Report). The Climate Assessment and Regional Report are referenced throughout this VA to provide information regarding regional climate change impacts.

Safeguarding California Plan

Alongside the update to the Climate Assessment, CNRA released the Safeguarding California Plan in 2018 which provides a roadmap for State government action to build climate resilience. The Safeguarding California Plan identifies actions the State government will take to protect communities, infrastructure, services, and the natural environment from climate change impacts and includes strategies for use as local examples for climate adaptation.

1.3 ADAPTATION PLANNING PROCESS

The APG provides guidance for communities throughout the state in planning for and adapting to the impacts of climate change. The APG includes a four-phase process, illustrated in Figure 2 which allows communities to assess their specific climate vulnerabilities and provides guidance on developing strategies to reduce climate change-related risks and prepare for current and future impacts of climate change.

Source: CalOES 2020, adapted by Ascent Environmental in 2021.

Figure 2 Adaptation Planning Process

- ▶ **Phase 1, "Explore, Define, and Initiate,"** includes scoping and defining the adaptation planning effort. Phase 1 also involves identifying key roles and stakeholders in the local government and throughout the community to contribute to the planning process. Potential climate change effects and important physical, social, and natural assets in the community are identified for further analysis.
- ▶ **Phase 2, "Assess Vulnerability,"** includes an analysis of potential climate change impacts and adaptive capacity to determine the vulnerability of populations, natural resources, and community assets. The vulnerability assessment is composed of four steps: exposure, sensitivity and potential impacts, adaptive capacity, and vulnerability scoring. Phase 2 also integrates stakeholder and public input to provide a comprehensive assessment of the community's sensitivity to climate change and its ability to adapt.

- **Phase 3, “Define Adaptation Framework and Strategies,”** focuses on creating an adaptation framework and developing adaptation strategies based on the results of the vulnerability assessment. Adaptation strategies identify how the community will address the potential for harm based on the community’s resources, goals, values, needs, and regional context. Community input is needed to prioritize adaptation strategies, identify co-benefits of strategies, and determine implementation steps.
- **Phase 4, “Implement, Monitor, Evaluate, and Adjust,”** the adaptation framework is implemented, consistently monitored, evaluated, and adjusted based on continual learning, feedback, or triggers. The adaptation planning process is intended to be cyclical in nature. Adaptation goals and strategies will be included in the City’s CAP which will contain a chapter that enumerates implementation planning policies. This section of the CAP will guide the implementation, monitoring, and evaluation of the adaptation policies.

The ultimate goal of the adaptation planning process is to improve community resilience in the face of a changing climate. A resilient community is one that is prepared for current and future hazardous conditions and experiences less harm when a disaster happens. Resilient communities can prepare for and recover from hazards with an understanding that the climate is going to continue to change in predictable and unforeseen ways. Ongoing learning and monitoring of strategy implementation allow for adjustments to be made in response to new information and opportunities.

2 VULNERABILITY ASSESSMENT

This section provides a comprehensive assessment of the City’s vulnerabilities to climate change. It identifies and characterizes the climate-related hazards and other climate effects that are anticipated to affect the City. The vulnerability assessment follows the process outlined in Phase 2 of the APG and is composed of the following four steps:

Exposure: The purpose of this step is to understand existing hazards within the City and how changes in climate variables (e.g., average temperature, precipitation) are projected to affect these hazards. Existing hazards that can be worsened by the effects of climate change are identified and described, based on historical data from sources such as the City’s Local Hazard Mitigation Plan.

Sensitivity and Potential Impacts: This step identifies a list of population groups and community assets that are sensitive to localized climate impacts. Climate-related hazards (e.g., flooding, wildfire) are generally projected to increase in severity, with the potential for climate change to generate new impacts that communities have not experienced historically. Using historical data, research from regional and State reports on climate impacts, and input from stakeholders, this step seeks to understand how sensitive populations and assets may be affected by climate impacts. Each hazard included in the VA is analyzed and given a qualitative score based on the criteria listed below in Table 1.

Table 1 Potential Impact Scoring

Score	Potential Impact
Low	Impact is unlikely based on projected exposure; would result in minor consequences to public health, safety, and/or other metrics of concern.
Medium	Impact is somewhat likely based on projected exposure; would result in some consequences to public health, safety, and/or other metrics of concern.
High	Impact is highly likely based on projected exposure; would result in substantial consequences to public health, safety, and/or other metrics of concern.

Source: CalOES 2020.

Adaptive Capacity: The City, partner agencies, and regional organizations (e.g., Sacramento County, Sacramento Area Council of Governments) have already taken steps to build resilience and protect sensitive populations and assets from existing hazards. A full summary of partner agencies and regional organizations and their climate adaptation-

related work is included in Section 2.6 “Adaptive Capacity”. Thus, the purpose of this step is to identify the City’s and partner agencies’ current capacity to address future climate impacts, referred to as adaptive capacity. The ability of the City to adapt to each of the identified climate impacts is determined through a review of existing plans, policies, and programs, and through stakeholder engagement. Adaptive capacity ratings are described in Table 2.

Table 1 Potential Impact and Adaptive Capacity Scoring

Score	Adaptive Capacity
Low	The population or asset lacks capability to manage climate impact; major changes would be required.
Medium	The population or asset has some capacity to manage climate impact; some changes would be required.
High	The population or asset has high capacity to manage climate impact; minimal to no changes are required.

Source: CalOES 2020.

Vulnerability Scoring: This step determines the City’s priority climate vulnerabilities through a scoring process. Vulnerability scores are based on several factors including the severity of projected climate impacts, how sensitive certain populations and assets are to anticipated climate impacts, and whether sufficient adaptive capacity exists to manage future climate impacts. Table 3 presents the rubric used to determine the overall vulnerability scores based on the ratings for potential impacts and adaptive capacity.

Table 3 Vulnerability Scoring

		Vulnerability Score		
Potential Impacts	High	3	4	5
	Medium	2	3	4
	Low	1	2	3
		High	Medium	Low
		Adaptive Capacity		

Source: CalOES 2020.

The vulnerability assessment helps the City understand which climate vulnerabilities are most urgent and should be prioritized during the adaptation strategy development phase as well as during strategy implementation.

Climate Change Impact Modeling and Projections

According to the work of IPCC and research conducted by the State alongside partner agencies and organizations, climate change is already affecting and will continue to affect the physical environment throughout California, including the City. To identify the local impacts of climate change in California, the CEC, and the University of California, Berkeley Geospatial Innovation Facility developed the scenario planning tool Cal-Adapt. The Cal-Adapt tool uses global climate simulation model data downscaled to a local and regional resolution to identify localized impacts from various climate metrics. Developers of the Cal-Adapt tool selected four priority global climate models to include in projections provided in the tool. This analysis uses the average of these four models to identify changes in temperature and extreme heat events.

The projected effects of climate change over the next century will vary depending on global GHG emissions trends. The Cal-Adapt tool includes global climate simulation model data from two emissions scenarios, known as Representative Concentration Pathways (RCPs), that were used in the IPCC’s Fifth Assessment Report. The RCPs represent scenarios that estimate the level of global GHG emissions through 2099. The RCP scenarios used in the Cal-Adapt tool are the RCP 8.5 (High Emissions) scenario, which represents a business-as-usual future emissions scenario that would result in atmospheric CO₂ concentrations exceeding 900 parts per million (ppm) by 2100, and the RCP 4.5 (Medium Emissions) scenario, which represents a lower GHG emissions future and likely the best-case scenario for

climate impacts, under which GHG emissions would peak in 2040 and then decline through the rest of the century, resulting in a CO₂ concentration of about 550 ppm by 2100. The RCP trends assumed in the analysis are illustrated in Figure 3. The emissions scenarios depend on global GHG emissions trends in the future and the efficacy of global GHG reduction strategies proposed by the international community. Because the efficacy of the GHG reduction strategies and the likelihood that a certain RCP scenario will occur are uncertain, a discussion of both emissions scenarios and their subsequent impacts are included in this analysis.

Notes: CO₂= carbon dioxide; ppm = parts per million; PgC = one billion metric tons of carbon;
RCP = Representative Concentration Pathway.

Source: Goosse et al. 2010.

Figure 3 Representative Concentration Pathway Used in Global Climate Modeling

The State's *Adaptation Planning Guide 2.0* (CalOES 2020) provides guidance on choosing appropriate RCP scenarios to be included in the analysis. For analysis of impacts through 2050, the draft *Adaptation Planning Guide 2.0* suggests using a conservative approach based on the High Emissions scenario, but notes that impacts by 2050 under the Medium and High Emissions scenarios will vary based on local context.

The Cal-Adapt tool provides data on projected changes in annual average temperature and changes in the frequency and severity of extreme heat events. This analysis uses Cal-Adapt data to evaluate increases in annual average maximum temperatures, as well as shifts in the duration and frequency of extreme heat events in the future. The analysis also identifies at what point over the next approximately 80 years (2021–2099) changes in temperature and extreme heat events will begin to occur and at what magnitude. This exposure analysis uses the following time periods to analyze changes in climate variables under the Medium Emissions scenario for the near-term and midterm periods and Medium and High Emissions scenarios for the long-term period. The time periods are established as 30-year time intervals to gather accurate data on average changes in the climate, which is typically measured over 30-

year time periods or longer. This results in overlap among some time periods. Due to annual fluctuations in climate variables, climate data on shorter time periods may be less accurate and not reflect long-term averages (NOAA 2018). The three time periods are:

- ▶ near-term (2021–2050),
- ▶ midterm (2040–2070), and
- ▶ long-term (2070–2099).

2.1 COMMUNITY OVERVIEW

The City covers approximately 34.8 square miles of land, the majority of which historically consisted of flat grassland and oak woodlands. The City is generally bordered by the American River to the north, Hazel Ave and the boundary of the 100-year floodplain for the Consumnes River on the east, Jackson Highway on the south, and Bradshaw Road on the west.

Population Overview

The U.S. Census bureau estimates the City's population to be 75,086 persons as of July 2019 (U.S. Census Bureau 2021). Table 4 illustrates the City's demographics by sex, race, and age according to the U.S. Census. As shown, the majority of residents identify as white with those identifying as Hispanic being the second largest demographic group. In terms of youth and elderly populations, 42 percent of City residents are either under 18 years or over 65 years old, populations at increased risk from climate-related hazards. The City is highly educated: 88 percent of the population over 25 years old has at least a high school degree, and 29 percent of the population over 25 years old has a bachelor's degree or higher (U.S. Census Bureau 2021).

Table 4 City Demographics by Sex, Race, and Age

Demographic Characteristics	City of Rancho Cordova	Sacramento County
Population	47,459	1,552,058
Male	48%	49%
Female	52%	51%
White alone	42%	44%
Hispanic or Latino	23%	39%
Asian alone	14%	16%
Two or more races	9%	6%
Black or African American alone	10%	9%
American Indian and Alaska Native alone	0.4%	0.4%
Persons under 18 years	28%	23%
Between 18 and 64 years	59%	62%
Persons 65 years and older	13%	14%

2.2 TEMPERATURE AND EXTREME HEAT ANALYSIS

Existing and Future Temperatures and Extreme Heat

The City has a mediterranean climate characterized by mild winters and hot, dry summers. The wet season runs from October through April, though there is occasional light rainfall in the summer months. The annual temperature mean is 61.1 °F, with monthly means ranging from 45.8°F in December to 75.4 °F in July. Summer high temperatures are often moderated by the “delta breeze”: which comes through the Sacramento-San Joaquin River Delta from the San Francisco Bay. The City experiences temperatures in excess of 100°F during the summer and fall months, reaching daily maximum temperatures of 105-115°F (Sacramento County 2021).

As discussed in *California’s Fourth Climate Change Assessment Sacramento Valley Region Report*, changes in temperature and extreme heat events in northern California are anticipated to affect the Sacramento Valley Region (boundary defined in the Regional Report) (OPR et al. 2018). Changes for the Sacramento Valley region include more warming in the summer than the winter (with July–September increases of 2.7°F–10.8°F) and greater warming inland than in coastal regions (by as much as 7.2°F) (Pierce et al. 2018). Table 5 provides a summary of the projected temperature increases over the century for the City.

Future Changes in Temperature and Extreme Heat

As shown in Table 5, both annual maximum and minimum are projected to increase throughout the 21st century. The average annual maximum temperature in the City is projected to increase approximately six percent from 74.2°F historically (1961-1990) to 78.3°F in the near-term and increase approximately eight percent to 79.8°F in the midterm. The average annual maximum temperature is projected to increase eight to 12 percent to 80.2°F and 83.1°F in the late-century period under the medium and high emissions scenarios, respectively. The average annual minimum temperature in the City is projected to increase approximately five percent from 49.3°F historically (1961-1990) to 52.9°F in the near-term and increase approximately six percent to 54.1°F in the midterm. In the late-century period, average annual minimum temperature is projected to increase between seven and 11 percent to 54.3°F and 57.7°F under the medium and high emissions scenarios, respectively (CEC 2021a). Increased temperatures in the City will influence secondary climate effects, including extreme heat events, wildfire, and drought. Figure 4 below illustrate the changes in annual average maximum temperature in the City and the County, highlighting the variability in temperature increases across the County throughout the 21st century.

Table 5 Changes in Average Annual Temperature in the City of Rancho Cordova

Geography	Average Annual Temperature	Historic Average Annual Temperature (1961-1990)	Near-Term (2021-2050)	Midterm (2040-2070)	Late-Century (2070-2099)	
					Medium Emissions	High Emissions
City of Rancho Cordova	Maximum Temperature (°F)	74.2	78.3	79.8	80.2	83.1
	Minimum Temperature (°F)	49.3	52.9	54.1	54.3	57.7

Figure 4 Sacramento County Annual Average Maximum Temperature through 2099

Along with increases in annual average temperature, the City is anticipated to experience increases in the average number of extreme heat days per year, as well as increases in the frequency and duration of heat wave events. Based on the parameters set in Cal-Adapt and for the purposes of this analysis, an extreme heat day is defined as a day between April and October with a maximum temperature of 103.6°F or above. This threshold was chosen because it is the 98th percentile of historic maximum temperature for days in the historic period (1961–1990), meaning 98 percent of all recorded temperatures in this period were below 103.6°F. This is also the recommended threshold by the Extreme Heat tool in Cal-Adapt. For the purposes of this analysis, a heat wave event is defined as a series of 4 or more days above 103.6°F. Table 6 illustrates the projected changes in extreme heat events. In the historic period, the maximum duration of days above 103.6°F is 2.5 days, which does not qualify as a heat wave based on the heat wave threshold used. By the midterm period, the City will experience heat wave events that qualify based on the established threshold.

Table 6 Changes in Extreme Heat in the City of Rancho Cordova

Extreme Heat Event	Extreme Heat Event Metric	Historic (1961-1990)	Near-Term (2021-2050)	Midterm (2040-2070)	Late-Century (2070-2099)	
					Medium Emissions	High Emissions
Extreme heat days	Days above 103.6°F	4	19	32	29	48
Heat wave events	4-day period above 103.6°F	0.2	1.4	4.8	4.0	7.8
Heat wave duration	Consecutive days above 103.6°F	2.5	6.3	7.2	8.5	14.2

Notes: °F = degrees Fahrenheit.

Source: CEC 2021a.

As shown in Table 6, while heat waves have historically been infrequent in the City, with a historical average of less than one heat wave annually, climate change is expected to increase the frequency of heat waves. Under the high emissions scenario, the City is projected to still experience 19 extreme heat days in the near-term and 32 extreme heat days annually in the mid-term. By the late-century, the City will experience 29 extreme heat days per year under the medium emissions scenario and 48 extreme heat days per year under the high emissions scenarios.

In terms of heat wave events, the City is projected to experience approximately 1.4 heat waves per year in the near-term and 4.8 heat wave events in the midterm. By the late-century, the City is projected to experience 4 heat waves per year under the medium emissions scenario and 7.8 heat waves per year under the high emissions scenarios. The average number of days in the longest stretch of consecutive extreme heat days per year is also projected to increase.

Historically, the longest stretch of consecutive extreme heat days lasted for an average duration of approximately two-and-a-half days. The longest stretch of consecutive extreme heat days is projected to increase significantly to 6.3 days in the near-term period and 7.2 days by the midterm period. By late-century, the duration is projected to increase to a maximum length of 8.5 days under the medium emissions scenario and 14.2 days under the high emissions scenario (CEC 2021b). The timing of extreme heat days is also projected to change over the 21st century with more extreme heat days and heat wave events occurring earlier in the year (April through May) and more severe events occurring in the historically hot months of September and October (CEC 2021b).

Extreme Heat Sensitivity and Impacts

This section provides an overview of the anticipated impacts on the City from the increases in temperature and extreme heat, discussed above, and subsequent secondary impacts. The impact discussion is organized around the three analysis time periods.

Based on the information included in the exposure analysis, the impact analysis is intended to identify and describe impacts on the City's built environment, vulnerable populations, and community functions anticipated to result from temperature increases and increases in the frequency and severity of extreme heat events. To help better understand

how and when these impacts will occur, a series of threshold indicators are used to assess how various aspects of the City's normal functions are affected when temperature-related thresholds are exceeded.

Existing Heat Sensitivities and Urban Heat Island Effect

Although the City's mediterranean climate includes high temperatures during summer and fall months, the City's urban land use patterns can intensify periods of extreme heat through the "urban heat island" (UHI) effect. The UHI effect is generally understood as the phenomenon of urban areas being significantly warmer than surrounding rural areas because of human activity and land use patterns in the built environment. Several factors contribute to the effect, with the primary cause being changes in land surfaces (EPA 2008). The albedo of a surface is the measure of the surface's ability to reflect or absorb solar radiation, with darker surfaces having a lower albedo and absorbing more solar radiation. As urban areas develop over time, resulting in the development of more land surfaces with low albedos (e.g., asphalt pavement, dark building surfaces), more solar radiation is absorbed in these materials causing increased ambient temperatures and warmer nighttime temperatures. Another factor contributing to the UHI effect is the loss of evapotranspiration in urban areas. Evapotranspiration, the movement of water to the air from sources such as the soil, plants, and bodies of water, reduces ambient air temperatures (EPA 2008). As cities grow and often reduce the extent of available vegetation that contributes to evapotranspiration, UHI effects are exacerbated. Additionally, waste heat from human activities involving machinery (e.g., vehicle traffic, using air conditioning, industrial activity) can also contribute to the UHI effect, with excess heat absorbed by surrounding surfaces (Sailor 2011; Zhu et al. 2017).

Sensitive Land Uses

Land use patterns and the design of the built environment in urban areas play a large role in an area's exposure to the UHI effect (Stone and Rodgers 2001; Solecki et al. 2005). Urban land uses with large, paved areas, low albedo, and less vegetation (e.g., commercial, industrial uses) tend to be subject to the UHI effect and have higher nearby ambient temperatures. Conversely, land uses with smaller percentages of paved surfaces and abundant vegetation (e.g., parks) tend to have lower average temperatures compared to other portions of urban areas. A study looking at the relationship between land use patterns and the UHI effect in Toronto, Canada found a statistically significant difference between average maximum temperatures for commercial and resource/industrial land uses and other surrounding land uses. The study also found the average low temperatures for parks, recreational land, and water bodies to be lower than those for surrounding land uses, likely because of increased evapotranspiration (Rinner and Hussain 2011). Additionally, areas that have higher concentrations of commercial and industrial land uses clustered together can have increased ambient and surface temperatures, with temperatures increasing relative to the size of these areas (Rinner and Hussain 2011). Increased temperatures in areas with concentrations of commercial and industrial land uses can also result in secondary impacts, including increased cooling demand for buildings, pavement deterioration, decreased air quality, and reduced stormwater quality from above-average-temperature runoff entering natural waterways and nearby ecosystems (Rinner and Hussain 2011).

The California Environmental Protection Agency has developed a UHI index (UHII) to assess the severity of the UHI effect in various urban areas throughout the state. The scores are based on the temperature difference over time between urban census tracts and nearby upwind rural reference points to demonstrate the relative difference in temperature caused by the urban environment (CalEPA 2019). Figure 5 shows the UHII effect for the County by census tract.

Source: CalEPA 2019.

Figure 5 Urban Heat Island Index for Sacramento County

As shown in Figure 5, compared to other urban areas in County, census tracts in the City being affected by the UHI effect but not as severely as other areas in the County. As discussed above, a number of factors contribute to the UHI effect. Factors that could be contributing to the City's relatively low UHII score include the presence of rural land uses surrounding the City, particularly to the south and east of the City's more urban areas. As the City continues to grow, developing medium and high-density transit-oriented land use patterns will be an important part of helping the City achieve its greenhouse gas emissions reduction targets included in the City's CAP. However, as this growth occurs, it is also important to consider how new development may contribute to the UHI effect and include strategies to mitigate the UHI effect from new development in the City.

Transportation System Heat Sensitivities

Transportation systems are designed and constructed to withstand certain variabilities in weather and temperature based on observations of historical weather trends for specific climate regions (Li et al. 2011). The performance of transportation assets may begin to decline when the severity of extreme heat periods exceeds historical ranges, for example, rail buckling at temperatures above 111°F. The characteristics of extreme heat events will affect different transportation assets differently. Provided below is a summary of the quantitative and qualitative thresholds used to assess the impacts of climate change on the City's transportation system. These thresholds were applied to the specific geography of the City using Cal-Adapt data and are presented in Table 7.

Pavement Deterioration

The effect of temperature on the performance and integrity of pavement depends on a variety of factors, including material type (asphalt versus concrete), the albedo of the material, details specific to the material mixing and placement, and soils and materials in the subbase of the roadway (Harvey et al. 2000). The performance of pavement also is dependent on the traffic volumes and types of vehicles using the roadway (Harvey et al. 2000). Based on the City's Standard Construction Specifications, based on Sacramento County Standards (Sacramento County 2016), roadways in the City use a binder within the asphalt mix with a Performance Grade of 64-16 means that roadways using this binder can withstand 7 consecutive days of pavement temperatures up to 64°C (147°F), after which point the heat can result in rutting along high-volume roadways and cause considerable safety issues. Based on guidance in the FHWA's *Vulnerability Assessment and Adaptation Framework* (FHWA 2017), this pavement temperature threshold can be translated into an ambient air temperature of 111°F. The UHI effect can increase ambient temperatures between 1.8°F and 5.4°F in urban areas compared to surrounding rural areas. Because the Cal-Adapt tool does not account for the added effects of the UHI effect in its projections, this analysis is conservative in setting a threshold for pavement impacts. As a result, the threshold used for widespread impacts on pavement in the City is a 7-day consecutive heat wave with a maximum daily temperature of 108°F. The analysis in roadways using this threshold is included below in Section 2.4.2.

Rail Buckling

During periods of extreme heat, rail lines can expand and result in "buckling" in which tracks come out of alignment, resulting in serious safety issue. However, the risk of buckling is managed by designing the rail neutral temperature at 95-110°F (35-45°C), with tracks designed and fit into infrastructure that assumes operations at those temperatures could occur (OFCM 2002, Transportation Research Board and National Research Council 2008). For this analysis, the threshold for increased risk from rail buckling is days in which the maximum daily temperature is 111°F or above.

Public Transportation Operations and Bridges

Research has found that when daily maximum temperatures reach 100°F, air conditioning units in buses are placed under increased stress and risk of failure (Cambridge Systematics 2015). For this analysis, the threshold for public transportation is days per year with maximum temperatures above 100°F.

Additionally, research indicates that bridges are at increased risk from thermal expansion during periods above 100°F. While bridges are designed to expand during periods of extreme heat, projected increases in extreme heat events could go beyond design criteria, resulting in cracking and crushing of the roadway deck, as well as increased maintenance costs (Transportation Research Board and National Research Council 2008). The number of days above 100°F is also used as a threshold to determine impacts on bridges (Zimmerman 1996).

Heat Sensitive Populations

Certain vulnerable populations in urban areas are particularly vulnerable to extreme heat and related hazards. Vulnerable populations include persons over the age of 65, infants and children, individuals with chronic health conditions (e.g., cardiovascular disease, asthma), low-income populations, athletes, and outdoor workers (CDC 2019). Increased temperatures have been reported to cause heat stroke, heat exhaustion, heat syncope, and heat cramps, with certain vulnerable populations at increased probability of experiencing these effects (Kovats and Hajat 2008). Extreme heat can also worsen air quality, quickening the production of ozone in areas with increased concentrations of ozone precursors (i.e., oxides of nitrogen [NO_x] and reactive organic gases [ROG]) (Knowlton et al. 2004). This is of particular concern to the City because the Sacramento Valley Air Basin has high concentrations of ROG and NO_x emissions and is currently in nonattainment status for California ambient air quality standards for ozone (SMAQMD 2017).

Alongside populations with health sensitivities, residents with specific sociodemographic characteristics are at increased sensitivity to extreme heat events (CDC 2019). Research has found that low-income residents spend a larger proportion of their income on utilities, including electricity use for cooling, with these residents being disproportionately affected during extreme heat events (Voelkel et al. 2018). Additionally, research has found that low-income neighborhoods can often have less tree coverage and park space, further contributing to the disproportionate impact on low-income residents (Zhu and Zhang 2008). Unhoused individuals are also at increased risk from extreme heat events with, generally, less access to places to cool off and healthcare resources during these

events. Additionally, decreased access to transportation services can further increase exposure and health risks from extreme heat events for the unhoused community (Ramin and Svoboda 2009).

Unlike thresholds for transportation assets, heat-related thresholds for populations in an urban area vary widely and depend on a number of factors, including the sensitivity of specific populations to heat (e.g., elderly, children). For this analysis, the California Heat Assessment Tool (CHAT) was used to identify how Heat Health Events (HHE) would increase in the future. An HHE, for the purposes of the tool, is defined as any event that results in negative public health impacts, regardless of the absolute temperature. The tool includes unique HHE threshold for locations throughout the state, specific to the climate and the historical sensitivity of people in that area to past extreme heat events. For this analysis, the CHAT tool and the projected increase in HHEs in the City is used as the threshold for this sensitivity. The heat wave event threshold, defined as a 4-day consecutive period with daily maximum temperatures above 103.1°F, is also used to identify various impacts from heat wave events.

Buildings and Energy Use

Changes in annual average temperature and extreme heat events are likely to effect buildings primarily through changes in energy use as well as disproportionate impacts on individuals residing in units that do not have air conditioning. Cal-Adapt provides data on the shifts in Cooling Degree Days and Heating Degree Days, which are measurements used to assess the energy demand needed for cooling and heating buildings in different climate zones throughout California. A degree day does not equate to a single day of the year but rather compares the mean (the average of the high and low) outdoor temperatures recorded for a location to a standard temperature (i.e., 65°F). For example, if the average temperature for a day is 80°F, the day has 15 Cooling Degree Days ($80 - 65 = 15$). Degree days are used in the State's Title 24 Building Energy Efficiency Standards to help design the energy demand needed for heating and cooling in the various climate zones throughout the state. To illustrate how climate change is likely to affect energy demand for heating and cooling in the future, Table 7 includes the relative shift in Cooling Degree Days and Heating Degree Days in the City through 2099.

Table 7 Summary of Potential Heat Impacts by Impact Area through 2099

Impact Area	Impact Type	Threshold Criterion	Historic (1961–1990)	Near Term (2021–2050)	Midterm (2040–2070)	Medium Emissions Long Term (2070–2099)	High Emissions Long Term (2070–2099)	Threshold Source
Built Environment impacts	Roadways and pavement	7 consecutive days above 108°F	0	0	0.1	0.1	0.5	DOT 2014
	Rail buckling	Days per year with maximum temperature of 111°F	0	2	3	3	9	OFCM 2002
	Bridges and bus operations	Days above 100°F	15	35	44	24	67	Zimmerman 1996, Cambridge Systematics 2015
	Building Energy Use	Percent increase in Cooling Degree Days	n/a	49%	48%	46%	74%	CEC 2021b
		Percent increase in Heating Degree Days	n/a	-25%	-44%	-50%	-81%	CEC 2021b
Vulnerable Population impacts	Heat wave events	4-day period above 103.6°F	0.2	1.4	2.5	2.6	5.4	CEC 2021b
	Heat wave duration	Consecutive days above 103.6°F	2.5	6.3	6.9	8.5	14.2	CEC 2021b
	Heat Health Events (HHE)	Range of potential HHEs per year	n/a	2.9	3.9	4.2	4.8	CEC 2018a

Note: NA = not available.

Source: See sources in "Threshold Source" column of table.

Near Term (2021-2050)

As shown in Table 7, during the near-term period, extended periods (7 consecutive days) of temperatures reaching above 108° would be unlikely; therefore, there would not be widespread impacts from pavement deterioration in the City. The City has experienced buckling of sidewalks due to extreme heat conditions, prompting repairs to avoid tripping hazards. As extreme heat continues to increase in severity and frequency in the future, this impact is likely to increase as well. Increased risk to rail from extreme heat days will increase slightly, with only 3 days over 111°F. However, there will be continued increases in risk from thermal expansion of bridges, with increases in days above 100°F from 15 historically to 44 during this period. An increase in the number of days above 100°F will also place increased stress on buses and their air conditioning systems, as well as result in potential declines in bus ridership because of the discomfort. During this period, the number of Cooling Degree Days will increase approximately 49 percent increase over historic levels, placing more demand on the electricity grid during heat wave events and increase electricity bills for residents. Conversely, the number of Heating Degree Days will decrease by approximately 25 percent and reduce energy demand for heating, resulting in cost savings for residents and businesses cooler months during those months. City staff have noted that extreme heat events have already begun to affect the homeless population in the City, prompting the need for cooling center to house the City's homeless population and other vulnerable populations. As extreme heat events continue to increase in frequency and severity, these impacts are likely to become more pronounced and demand for cooling centers as well as emergency services will increase.

During the near-term period, the City will also experience approximately 2.9 HHEs per year, with increased risk to populations particularly vulnerable to extreme heat, as discussed above. The frequency of extreme heat events will increase to 1.4 on average per year with the maximum duration of events increasing to 6.3 days during this period. These events will increase the risk of public health impacts on vulnerable populations and could result in increased burden on low-income residents because of the increased energy demand for cooling (Calkins et al. 2016).

Midterm (2040-2070)

During the midterm period, there would likely not be any extended periods (7 consecutive days) above 108°F during this period; therefore, there would not be widespread impacts from pavement deterioration in the City. Increased risk to rail from extreme heat days will be relatively minor, with only 2 days over 111°F. However, there will be noticeable increases in risk from thermal expansion of bridges, with increases in days above 100°F from 15 historically to 35 during this period. An increase in the number of days above 100°F will also place increased stress on buses and their air conditioning systems, as well as result in potential declines in bus ridership because of the discomfort. During this period, the number of Cooling Degree Days will increase approximately 49 percent increase over historic levels, placing more demand on the electricity grid during heat wave events and increase electricity bills for residents. Conversely, the number of Heating Degree Days will decrease by approximately 44 percent over historic levels and reduce energy demand for heating, resulting in cost savings for residents and businesses cooler months during those months.

During the near-term period, the City will also experience approximately 3.9 HHEs per year, with increased risk to populations particularly vulnerable to extreme heat. The frequency of extreme heat events will continue to increase to 2.5 on average per year with the maximum duration of events increasing to 6.9 days. These events will increase the risk of public health impacts on vulnerable populations and continue to disproportionately burden low-income residents because of the increased energy demand for cooling (Calkins et al. 2016).

Long Term (2070-2099)

During the long-term period, increases in the duration and frequency of heat wave events will place increased stress on transportation assets and could result in subsequent impacts on community functions. By this period, under the High Emissions scenario, there would be an average of 0.5 events per year with extended periods (7 consecutive days) above 108°F. There would be only 0.1 events per year under the Low Emissions scenario for this period. As discussed in Section 2.4.1, these events will result in much larger impacts on the performance of pavements in the City. Extensive rutting could occur, particularly on high-volume roadways, including Folsom Boulevard, Sunrise Boulevard, and International Drive, as well as on Caltrans facilities (i.e., SR-50).

During this period, there would be significant risk to rail infrastructure from extreme heat days, with approximately 9 days over 111°F per year under the High Emissions scenario, likely affecting Regional Transit light rail service when these events do occur. Risk of impacts on bridges from thermal expansion will also increase considerably, with the number of days above 100°F per year increasing from 12 historically to 24 under the Low Emissions scenario and 67 days under the High Emissions scenario. During the long-term period, the City will experience between 4.2 and 4.8 HHEs depending on future emissions, with increased risk to vulnerable populations. The increased frequency of HHEs will likely place increased demand on emergency services and emergency care facilities and could result in economic consequences from impacts on public health and work productivity (Paterson et al. 2014). The frequency and duration of heat wave events will increase considerably during this period, with the maximum duration of events increasing to 14.2 days under the high emissions scenario. These events will increase public health impacts on vulnerable populations, with increased levels of risk for elderly and youth populations, as well as individuals with chronic health conditions (Voelkel et al. 2018). By the end of the century, the number of Cooling Degree days will increase approximately 74 percent, under the high emissions scenario, resulting in more than 3 months of the year requiring increased energy demand for cooling. By this period, the number of Heating Degree Days will decrease by approximately 81 percent under the High Emissions scenario by 2099. Increases in energy demand for cooling during this period will also have larger impacts on the electricity grid, with increased stress on and risks to electricity generation facilities and transmission lines (DOE 2016).

Potential Impact Score

Based on this analysis, the potential impact score for Temperature and Extreme Heat is **High**.

2.3 PRECIPITATION AND FLOODING ANALYSIS

Existing and Future Flooding Conditions

Scientists, engineers, and planners all use a specific system to measure and plan for certain sizes of storm events and flood impacts associated with these events. These events are measured by the probability that they are likely to occur in a given year. The phrase “100-year storm,” for example, refers to a storm event with a 1-in-100 or one percent chance of occurring in any given year. The size and other aspects of these storms are identified to characterize the nature of the events based on historic data. The metrics are then used to plan and design stormwater management systems that can cope with storm events of these sizes. The Federal Emergency Management Agency (FEMA) uses certain larger storm events (i.e., 100-, 500-year storms) to identify flood hazard areas in the United States. FEMA administers flood insurance based on location and extent of impacts from these storm events, which influences land use patterns and development in cities. The following metrics are used in this analysis to discuss storm events and are included in projections from the Cal-Adapt tool:

- ▶ **Intensity**—The amount of rainfall that occurs over a certain period (e.g., 1 hour, 24 hours, 5 days) during storm events of different sizes (e.g., 100-year storm event, 2-year storm event)
- ▶ **Duration**—The longest stretch of consecutive days during a water year (October through September) with rainfall above a certain threshold
- ▶ **Count**—The number of days during a water year (October through September) with rainfall over a certain period (e.g., 1 hour, 24 hours, 5 days) above a certain threshold
- ▶ **Timing**—The timing during the year in which rainfall events exceeding a certain threshold occur

The City’s *Local Hazard Mitigation Plan* (LHMP), which was developed as an annex to the *Sacramento County Local Hazard Mitigation Plan* which is currently being updated with the public draft of the document available, includes summary of the existing natural and manmade hazards affecting the City have been analyzed to assess current risks levels for each hazard (Sacramento County 2021). The LHMP provides details on the planning process, risk assessment, and mitigation strategies for the City to address specific hazards including large flooding events and flood related hazards.

Historically, flooding from large storm events is a significant problem in the County and the City. Historically, the City has been at risk to flooding primarily during the winter and spring months when river systems in the County swell with heavy rainfall and snowmelt runoff. The City also experiences flooding challenges in the Morrison Creek watershed as well as obstructions to peak storm flow management with the Folsom South Canal which runs north-south through the City.

Storm floodwaters are typically managed by the City's stormwater management system, which is able to collect and divert stormwater runoff from smaller storm events. However, extended heavy rains result in floodwaters that exceed normal high-water boundaries and cause damage. Major surface waters in the vicinity of the City include the American River, Folsom Reservoir, and Lake Natomas to the north. Other surface waters within the City include the Folsom South Canal, Cordova Creek, Deer Creek, and the Morrison Creek Stream Group (Morrison, Laguna, Elder, Gerber, Unionhouse, Florin, Buffalo, and Frye Creek, as well as Rebel Hill Ditch) which generally flow in a southwesterly direction southeast of the City. The topography within the City includes gently rolling terrain, such as that found in the eastern Great Central Valley interrupted by numerous seasonal creeks and streams. These creeks and streams are largely ephemeral and intermittent, which is typical of areas that experience dry summers and cool, wet winters, as in this part of the Central Valley.

The County and City have a large number of large-scale flooding events resulting in Federal and State disaster declarations. Table 8 includes a list of state and federal disaster declarations for the County since 1950.

Table 8 Changes in Average Annual Precipitation and 5-Year Storm Event in Sacramento County

Type of Hazard Event	Federal Declarations		State Declarations	
	Count	Years	Count	Years
Flood (including heavy rains and storms)	19	1950, 1955, 1958 (twice), 1963, 1969, 1982 (twice), 1983, 1986, 1995 (twice), 1996, 1997, 1998, 2008, 2017 (three times)	14	1955, 1958, 1964, 1969, 1983, 1986, 1995 (twice), 1997, 1998, 2006, 2017 (three times)

Source: Sacramento County 2021.

As shown in Figure 6, small portions of the City are located within the FEMA floodplains for the 100- and 500-year storm events. Figure 6 also includes areas within the 200-year flood zone which were mapped as part of the City's GP updated process and used to comply with the requirements of Senate Bill (SB) 5, which requires cities in the Sacramento-San Joaquin Valley area to assess risk-levels and provide increased flood protection for properties in the 200-year floodplain. As shown in Figure 6, the northern boundary of the City is located along the American River, with this area of the City at the highest risk from flooding.

Based on information in the City's LHMP, there are 58 properties located in the 100-year flood zone valued at a total of \$21.6 million. As part SB 5, jurisdictions in the Sacramento-San Joaquin Valley are required to identify properties located in the the 100- and 200-year floodplains and implement development standards that prohibit new development in the 200-year floodplain unless the property achieves an Urban Level of Flood Protection (ULOP), defined in SB 5. To satisfy the requirements of ULOP, the City has developed a 200-yr floodplain map based on the proposed Folsom Dam improvements by the US Army Corps of Engineers. These improvements include the Joint Federal Project to improve the dam spillway and the future dam raise to increase flood storage. In conjunction with the new 200-yr map, the City has made changes to its General Plan and zoning code that will guide development within the 200-yr ULOP.

As illustrated in Figure 6, the 500-year floodplain also impacts the northern portions of the City along the American River with 118 residential parcels located within this zone. The City has one critical facility located in the 100-year flood zone, six critical facilities in the 200-year flood zone, and 5 critical facilities in the 500-year flood zone. While portions of the City are within the 100- and 500-year flood zones, there have been no historical insurance claims for flood losses in the City (Sacramento County 2021).

Source: Sacramento County 2021 and data provided by City of Rancho Cordova staff.

Figure 6 Flood Zones and Critical Facilities in the City of Rancho Cordova

As shown in Table 9, there are several areas in the City with various land uses in the 100- and 500-year flood zone. As discussed above, the presence of the Laguna West Levee System near the Laguna West neighborhood is protecting 2,073 parcels from the 100-year flood event. Parcels located in the 100-year flood zone are located in flood zone areas surrounding Laguna Creek and Deer Creek. Alongside an analysis of land uses at risk of flooding, the City's LHMP also analyzed the number of essential service facilities, and at-risk populations that are located within the 100- and 500-year flood zones. Table 9 summarizes the number and type of critical facilities located within the 100- and 500-year flood zones.

Table 9 City of Rancho Cordova Properties by Land Use in FEMA Flood Zones

Land Use	100-Year Flood Zone	500-Year Flood Zone
Residential	19	1,118
Retail/Commercial	0	3
Office	0	2
Industrial	0	0

Future Changes in Precipitation Patterns and Flooding

As discussed in the *Fourth Climate Change Assessment Sacramento Valley Report*, changes in precipitation patterns in northern California are anticipated to affect the Sacramento Valley region as well as adjacent regional watersheds which affect the Sacramento Valley (OPR et al. 2018). Projected shifts include increases in the intensity of large storms events, which could compromise the performance of the Sacramento Valley and Central Valley flood management systems (Pierce et al. 2018). Based on California's location next to the Pacific Ocean, the state is exposed to the atmospheric river phenomenon, a narrow corridor of concentrated moisture in the atmosphere. California is subject to precipitation from an atmospheric river that transports water vapor from as far south as Hawaii to the state. The presence of the atmospheric river contributes to the frequency of "wet years" in the state, when there is an above-average number of atmospheric river storms and above-average annual precipitation. While research indicates that the frequency of large storms events does increase in these wet years, the most severe flooding from atmospheric rivers may not be in wet years (Swain et al. 2018). The largest flooding impacts are caused by persistent storm sequences on sub-seasonal timescales (i.e., short time periods, typically 2 weeks to 3 months), which bring a significant fraction of annual average precipitation over a brief period. These are storms events similar to the Great Flood events of 1861–1862 which caused widespread damage throughout northern California (Swain et al. 2016). Based on current climate modeling, the frequency of these large storm sequences over short timeframes is projected to increase noticeably under the High Emissions scenario. It is estimated that a storm similar in magnitude to the Great Flood events is more likely than not to occur at least once between 2018 and 2060 (Swain et al. 2018). A storm of this size would likely compromise large portions of the flood control systems in the Sacramento and the Central Valleys (Swain et al. 2018).

Regional changes in precipitation over the century will subsequently result in local changes in both annual precipitation and changes in the characteristics of storm events in the City and the County more broadly. Table 10 includes the projected precipitation changes in the County through 2099. The precipitation changes included in Table 10 are illustrated in Figure 7.

Table 10 Sacramento County Precipitation Change (Historic to 2099)

Geographic Area	Historic (1961–1990)	Change in Annual Mean Precipitation (Inches)			
		Near Term (2021–2050)	Midterm (2040–2070)	Late-Century	
				Medium Emissions (2070–2099)	High Emissions (2070–2099)
Sacramento County	18.3	20.1	20.2	20.3	22.1
Percent Change from Historic Period	NA	10%	10%	11%	21%

Note: NA = not available.

Source: CEC 2021a.

As shown in Table 10, annual precipitation in the County is estimated to increase between 11 and 21 percent by 2099 under the medium and high emissions scenarios, respectively. As noted in the *Fourth Climate Change Assessment Sacramento Valley Report*, although annual precipitation is anticipated to increase in the region, California’s climate oscillates between extremely dry and extremely wet periods with annual precipitation varying widely from year to year. Climate change is anticipated to exacerbate these seasonal extremes with dry periods becoming dryer and wet periods becoming wetter (OPR et al. 2018). As a result, the frequency and severity of large storm events are anticipated to increase as well. These oscillations between extremely dry and extremely wet periods, which have occurred historically in the state, are anticipated to become more severe with rapid shifts from dry to wet periods known as “whiplash events” (Swain et al. 2016). As Swain et al. note in their research, the recent 2012–2016 drought followed by the 2016–2017 flood events throughout the state serve as a good example of the type of whiplash events that will occur more frequently over the next century. These types of events are estimated to increase by approximately 25 percent in northern California, with increases in frequency occurring largely after 2050 (Swain et al. 2016).

Although annual precipitation is anticipated to increase in the City over the coming decades, the majority of the increase in precipitation is likely to occur during extreme precipitation events (Swain et al. 2018). As a result, it is important to understand how these shifts in extreme precipitation events will affect the City and regional watersheds which affect the stormwater management system and larger waterways within the City, though they begin outside the City boundaries. The Cal-Adapt Extreme Precipitation Event tool provides information on how the characteristics of extreme precipitation events will change over the century, including the ability to analyze changes at the watershed level.

Near-Term (2021 – 2050)

Midterm (2040 – 2070)

Medium Emissions - Long Term (2070 – 2099)

High Emissions - Long Term (2070 – 2099)

Source: Data downloaded from CEC and DWR in 2021.

Figure 7 Sacramento County Annual Average Precipitation through 2099

The characteristics of extreme precipitation events are what are most commonly used to model and design urban stormwater management systems to ensure the system can withstand the rainfall and stormwater runoff that occurs during these events. For the purpose of this analysis, the specific storm events chosen are consistent with three size storm events used to design the City's stormwater management system and are included in the *Sacramento County Drainage Manual*. These include the 2-, 10-, and 100-year storm events for rainfall over a 24-hour period. Table 11 summarize the changes in amount of rainfall projected to occur in American River watershed, the main watershed affecting the City for the 2-, 10-, and 100-year storm events through 2099 under the high emissions scenario.

Table 11 Changes in Rainfall During Extreme Precipitation Events

Watershed	Storm Event Size	Historic (1961–1990)	Change in 24-Hour Rainfall Period (Inches) for 100-Year Storm Event			
			Midterm (2035–2064)	Percent Change (Historic to 2064)	Long-term (2070–2099)	Percent Change (Historic to 2099)
American River Watershed	100	7.1	4.8	-32%	6.3	-11%
	10	3.5	2.9	-17%	3.5	0%
	2	2.1	2.0	4%	2.3	9%

Notes: This table shows estimated intensity (Return Level) of Extreme Precipitation events, which are exceeded on average once every 2, 10, and 100 years (Return Period). Extreme Precipitation events, defined here, are days during a water year (October through September) with 1-day rainfall totals above an extreme threshold set for each of the watersheds, which is based on the lowest annual maximum storm intensity in historic records.

Source: CEC 2021a.

As shown in Table 11, by midcentury, the American River watershed is projected to experience decreases in rainfall during the 100- and 10-year storm event and a slight increase in the 2-year storm event. By late century, the watershed will experience an 11 percent decrease in the intensity of the 100-year storm event, no change in the 10-year storm event, and a more nine percent increase in the 2-year storm events. Climate change is also projected to increase frequency and maximum duration of larger precipitation events. For the American River watershed, there is projected to be slight increase in number of larger precipitation events from five events historically by the late-century period. The maximum durations of these events will also increase from two days historically to 2.3 days by the late-century period.

Future Flood Impacts

Stormwater Drainage System

In current practice, the stormwater management systems in urban areas are modeled to manage large storm events based on characteristics of rainfall specific to the region from observed historical data. These characteristics in the intensity, duration, and frequency (IDF) of extreme precipitation events. These characteristics are described using IDF curves which are used to design various components of urban drainage systems including pipes, culverts, waterway channels, and detention ponds. Because climate change is anticipated to shift precipitation patterns during storm events, these changes could impact the performance of urban stormwater management systems (CEC 2018b). Increases or changes in the IDF curve can impact the integrity of stormwater infrastructure, particularly natural and engineered slopes such as levees (CEC 2018b). Based on current design standards, the City's drainage system has been designed based on the 2-, 10-, and 100-year storm events. Consistent with these standards, the primary sensitivity threshold for this precipitation and flooding impacts is the exceedance of the historic intensities of the 2-, 10-, and 100-year storm event for the 24-hour period. This threshold is developed from the understanding that the City's current stormwater management and flood protection system is designed based on historic observations for the size of flood events. If these historic storm intensities are exceeded, this would likely begin to disrupt, deteriorate, damage, or generally affect the performance of the City's stormwater management and flood protection systems (CEC 2018b). The analysis also considers the magnitude of the increase above the historic storm levels in the severity of the impacts that may occur.

Based on projections included in the Table 11 above, the City is not projected to experience larger increase in the size of these storm events and, therefore, not likely experience widespread flooding impacts from frequent but smaller storm events in the future. The small increases in the frequency and maximum duration of storm events are also not likely to have an impact on the City's stormwater management system.

Large Storm Events and Flood Protection

For this analysis the FEMA floodplain for the 100-year storm event is used as the sensitivity threshold for large storm events. Specifically, for future scenarios in which the intensity of the 100-year storm events is exceeded, parcels and roadways within these floodplains are seen to be at increased risk from large storm events. Based on information in Table 11, the City is not projected to experience increases in the intensity of the 100-year storm event and, therefore would likely not experience widespread flooding impacts from less frequent but larger storm events based on the Cal-Adapt data. However, as discussed above, California does experiment Atmospheric River events The presence of that contribute to the frequency of "wet years" in the state. While research indicates that the frequency of large storms events does increase in these wet years, the largest flooding impacts are caused by persistent storm sequences on sub-seasonal timescales (i.e., short time periods, typically 2 weeks to 3 months), which bring a significant fraction of annual average precipitation over a brief period (Swain et al. 2018). As noted in the *Fourth Climate Change Assessment Sacramento Valley Report*, climate change is projected to increase the intensity of "wet years" when they do occur and would likely have significant impacts on the County as well as the City.

Levee System Impacts

Increases in precipitation and particularly in the intensity and frequency of extreme precipitations due to climate change will have impacts on the integrity of levee systems (Jasim et al. 2017). Shifts in the IDF curve, particularly during multi-day events, can increase the risk of levee failure. A study which modeled the impacts of projected changes in IDF curves on the Elkhorn Levee in the County found that the probability of levee failure could increase between 3 and 12 percent during projected extreme precipitation events under the high emissions scenario when compared to the baseline scenario. Levee systems, particularly systems not maintained through the Federally protected levee system, are subject to other factors which can comprise their structural integrity including land subsidence and climatic conditions, which will be exacerbated by climate change (Jasim et al. 2017). The combination of land subsidence and specific climatic conditions including drought and severe flooding can further threaten the structural integrity of these aging levees (Robinson and Vahedifard 2016). There are currently two levees in the City which protect residential neighborhoods: Cordova Meadows Levee and Sunriver Levee. Based on the research referenced above, these levee systems will be at increased risk of failure due to increasingly intense storm events as well as increases in the frequency of these events.

Potential Impact Score

Based on this analysis, the potential impact score for Precipitation and Flooding is **High**.

2.4 DROUGHT AND WATER SUPPLY ANALYSIS

Existing and Future Drought Conditions

Long-term drought can have environmental, agricultural, health, economic, and social consequences. The County, along with larger areas of California, experiences periods of long-term drought that stress the ecosystem and water supplies; and subsequently, impact agriculture, public health, and the economy. The City relies on regional water supplies with the three primary water purveyors providing services within the City's planning area: Sacramento County Water Agency; Golden State Water Company; and California-American Water Company. The City's water supply is currently provided by a combination of ground and surface water resources. As discussed in the Natural Resources Chapter of the City's General Plan, future water supplies will be provided from a variety of sources, including: water from the Central Valley Project; appropriate water supplies; water transfer supplies; groundwater;

recycled water; surface water from the American River; SMUD transfer water; and Aerojet replacement water due to contamination of the portion of the City's groundwater resources (City of Rancho Cordova 2006).

As noted in Appendix C – Water Supply Evaluation of the City's General Plan (City of Rancho Cordova 2006), it is likely that adequate water supplies would be available to meet the City's water demands associated with buildout of its current corporate limits. However, based on total known future supplies there would be a supply shortfall of approximately 51,089 acre feet per year to meet the City's total planning area demands. This shortfall would occur if development exceeded the total amount associated with buildout of the City's corporate boundaries. If water supplies are not available to meet buildout water demands, the City would either need to stop approving new growth within its jurisdiction, or collaborate with regional water purveyors to investigate potential future water supply options within the context of the regional water supply planning environment (City of Rancho Cordova 2006). Additionally, the Water Supply Evaluation conducted as part of the City's General Plan does not consider future changes in water supply due to climate change. This analysis does not include a comprehensive assessment of the City's water demand and available supply but rather focuses on how future changes in precipitation, temperature, and drought conditions in the County are likely to affect the City overall.

Future Changes in Precipitation Patterns and Flooding

The City and larger Sacramento region are expected to experience slight overall increases in average annual precipitation in the long-term. However, projections show the Sacramento region will experience increased variability and volatility in precipitation events, such as droughts. California has a highly variable climate that is susceptible to prolonged periods of drought, and recent research suggests that extended drought occurrence (a "mega-drought") could become more pervasive in future decades (CEC 2021c). As discussed above in Section 2.3, precipitation patterns in California oscillate between extremely dry and wet periods. Climate change is anticipated to exacerbate these seasonal extremes with dry periods becoming dryer and wet periods becoming wetter (OPR et al. 2018). With the increased severity of oscillation between wet and dry periods and precipitation occurring over more intense but shorter periods in the year, this will reduce opportunities for groundwater recharge which ideally occurs during prolonged wet periods allowing for soil infiltration, deeper percolation, and the resulting groundwater recharge. While a unique long-term drought scenario would likely affect the City's overall water supply management practices, there is the potential for there still to be above average wet years within a long-term drought, as shown in Figure 8. These above average wet years have the potential to replenish water supplies in the City's reservoirs and help mitigate the impacts of long-term drought.

A substantial portion of the water resources supplied to the Sacramento region originates as rainfall and runoff from snowpack in the northern Sierra Nevada mountains and the surrounding foothills. Cal-Adapt uses data to model an extended drought scenario for all of California from 2051 to 2070. For this analysis, the extended drought scenario for El Dorado County rather than just the boundaries of the City, with tributaries in El Dorado County (i.e., the north fork and south fork of the American River) providing key water resources (e.g., Folsom Lake) to the Sacramento region. Due to increases in climate variability and rising temperatures, the state has already seen signs of decreased snowmelt in Northern California. Annual snowpack in the Sierra Nevada is expected to decline by as much as 33 percent by mid-century and 66 percent by the end of the century, relative to historic baseline snowpack (OPR et al. 2018). Further, rising temperatures have caused snowpack to melt faster and earlier in the year. These changes in snowmelt timing and streamflow availability will challenge local and regional water supply availability (OPR et al. 2018). Inadequate rainfall and reduced snowpack will result in decreased runoff to the reservoirs that supply water to the City, which will lead to less available water and more frequent water shortages.

As shown in Figure 8, El Dorado County's observed historical (1961-1990) average annual precipitation accumulation (i.e., rainfall and snowpack runoff) is 43.6 inches. Under the anticipated drought scenario between 2051 and 2070, the County's average annual rainfall accumulation would decrease to 37 inches (CEC 2021c), resulting in an approximately 15 percent decrease in annual average rainfall over a 20-year period.

Figure 8 El Dorado County Long-Term Drought Scenario (2051-2070)
Source: CEC 2021c.

Drought Impacts

In the event of a severe and sustained drought lasting multiple years, water supplies provided to the City could be severely affected and result in the need for increased water conservation efforts to be implemented by jurisdictions in the Sacramento region. City residents may be encouraged to reduce household water demand, which may limit certain activities such as landscape irrigation. Each water purveyor that provides water resources to the City has an Urban Water Management Plan (UWMP), which includes a Drought Contingency Plan with specific actions to reduce overall water use by customers. The California Public Utilities Commission sets the rates and service terms for water utilities every three years after an exhaustive review, as required by state law. As a result, a long-term drought scenario would likely not result in rapid or unforeseen increases water costs for residents and businesses.

Droughts create cascading effects on community functions that may worsen in the future. The associated risks include adverse impacts on timber harvesting, reduction in native habitat and overall ecological function, increased forest fuels for wildfire, and economic consequences associated with decreases in tourism and recreation. More intense future droughts affecting the region could result in decreasing recreation opportunities on and surrounding Folsom Lake. Decreased recreation could have a direct impact on City business revenue from pass through visitors. Increased episodes of drought and increased water demand could result in water shortages for the region, endangering residents and ecological systems (e.g., flood control or sensitive habitat, recreational areas). Drought, as slow-moving disaster, can affect mental health if occurring over many years (Vins et al. 2015). While increasingly frequent and prolonged droughts directly affect residents, the built environment will not experience substantial direct impacts associated with this climate-related hazard.

A lack of soil moisture during long-term droughts can increase dust particle concentration, which can include harmful fungal spores and viruses, including Valley Fever (coccidioidomycosis) (OPR et al. 2018). The California Department of Public Health has highlighted the Sacramento Valley as a high-risk area for valley fever (OPR et al. 2018). Valley fever is found in disturbed, dry soil particles that must be inhaled. Symptoms of Valley Fever include chest pain, exhaustion, fever, coughing, joint and muscle pain, and difficulty breathing. Certain populations including pregnant women, the elderly, African, and Filipino Americans are particularly vulnerable to the severe cases of the disease (Brown et al. 2013).

Potential Impact Score

Based on this analysis, the potential impact score for Drought and Water Supply is **Medium**.

2.5 WILDFIRE ANALYSIS

Existing and Future Wildfire Conditions

Wildfire behavior is dependent on several factors that, when identified and assessed, can help determine future wildfire characteristics. The three factors listed below contribute significantly to wildfire behavior and can be used to identify wildfire hazard areas:

- ▶ **Topography:** An area's terrain and land slopes affect its susceptibility to wildfire spread. Both fire intensity and rate of spread increase as slope increases because heat from a fire tends to rise through convection. The arrangement of vegetation throughout a hillside can also contribute to increased fire activity on slopes.
- ▶ **Fuel:** Fuel is the material that feeds a fire and is a key factor in wildfire behavior. Fuel is generally classified by type and by volume. Fuel sources are diverse and can include dead tree leaves, twigs, and branches of dead, standing trees; live trees; brush; and cured grasses. Buildings and other structures, such as homes and other associated combustibles, are also considered a fuel source.
- ▶ **Weather:** Components such as temperature, relative humidity, wind, and occurrence of lightning affect the potential for wildfire. High temperatures and low relative humidity dry out fuels that feed wildfires, creating a situation where fuel will ignite more readily and burn more intensely. Thus, during periods of drought, the threat of wildfire increases. Wind is one of the most significant weather factors in the spread of wildfires. The greater a wind, the faster a fire will spread and the more intense it will be.

The California Department of Forestry and Fire Protection (CAL FIRE) maps areas of significant fire hazards based on fuels, terrain, weather, and other relevant factors. These zones, referred to as Fire Hazard Severity Zones (FHSZ), are represented as Very High, High, or Moderate. The classification of a zone as a Moderate, High, or Very High FHSZ is based on a combination of how a fire would behave and the probability that flames and embers would threaten buildings. Wildfire risk is also determined by several factors, such as wind speeds, drought conditions, available wildfire fuel (i.e., dry vegetation), past wildfire suppression activity, and expanding wildland-urban interface (WUI) (i.e., places in and around forests, grasslands, shrub lands, and other natural areas) (Westerling 2018). Impacts from grass and brushfires in the City could result in evacuations of portions of the City as well as loss of property and impacts to critical facilities.

Based on data included in the City's LHMP Annex shown in Figure 9, large portions of the eastern and southern portions of the City are located in areas designated as Moderate FHSZ. Given the City's location and urban setting, there is relatively low risk of impacts from wildfires relative to areas northeast of the City in El Dorado and Amador County; however, the City is at increased threat of grass and brushfires. Although the majority of the City's developed areas are at lower fire risk, the City does include a few key areas with increased fire risk in undeveloped recreation areas along the American River. As a recreation area, there are limited roadways within these areas, making fire equipment access difficult. While threatened by fire risk along the American River, residents are also at risk from health impacts from poor air quality associated with wildfire smoke. Poor air quality can be generated in the City from wildfires occurring throughout northern California as has been experienced in recent years.

Source: Sacramento County 2021 and data provided by City staff.

Figure 9 Fire Hazard Severity Zones and Critical Facilities in the City of Rancho Cordova

Future Wildfire Risk

Increased Wildfire Risk in the Sacramento Valley

Climate change effects, including increased temperatures and changes to precipitation patterns, will exacerbate many of the factors that contribute to wildfire risk. Increased variability in precipitation may lead to wetter winters and increased vegetative growth in the spring, and longer and hotter summer periods will lead to the drying of vegetative growth and ultimately result in a greater amount of fuel for fires. This has already been seen across the state in recent years, with the area burned by wildfires increasing in parallel with rising air temperatures (OEHHA 2018). These factors, combined with intense wind conditions, cause fires to spread rapidly and irregularly, making it difficult to predict fires' paths and effectively deploy fire suppression forces.

Relative humidity is also an important fire-related weather factor; as humidity levels drop, the dry air causes vegetation moisture levels to decrease, which consequently increases the likelihood that plant material will ignite and burn. With an increase in hotter and drier landscapes, humidity levels may continue to drop and result in higher fuel levels, increasing the risk of wildfire (Schwartz et al., 2015).

Cal-Adapt provides projections for future annual mean hectares burned within the Sacramento Valley region, as defined in the California Fourth Assessment Report, when wildfires do occur. Because the City is not directly threatened by large-scale wildfires but is likely to be impacted by regional effects such as wildfire smoke, this analysis focuses on the Sacramento Valley region. As shown in Table 12, the total area burned annually by wildfire within the Sacramento Valley region is expected increase from the historic (1961-1990) annual average of 20,956 hectares to 23,942 hectares in the near-term and increase further in the midterm to 28,759 hectares. In the long-term, average annual area burned in the region is projected to increase to 31,670 hectares and to 41,784 hectares under the low and high emissions scenarios, respectively (CEC 2021e).

Table 12 Changes in Annual Average Area Burned in the Sacramento Valley Region

Average Annual Area Burned	Historic Modeled (1961-1990)	Near-Term (2021-2050)	Midterm (2035-2064)	Long-Term (2070-2099)	
				Low Emissions	High Emissions
Average Annual Area Burned (hectares)	20,956	23,942	28,759	31,670	41,784

Notes: Observed historical average annual area burned data was not available from Cal-Adapt; the modeled historical average annual area burned data under the low emissions scenario was available and used as proxy data.

Source: CEC 2021e.

Wildfire Impact Analysis

Increased temperatures and changes in precipitation patterns associated with climate change will lead to reduced moisture content in vegetation and soils during dry years. These conditions are expected to increase the amount of area burned by wildfires that will occur predominantly outside of the City boundaries but may have secondary impacts on the City from wildfire smoke, disruptions to transportation behavior, or the increased prevalence of Public Safety Power Shutoffs (PSPS).

Regional wildfires threaten energy generation and transmission infrastructure and have the capacity to damage facilities, create maintenance costs, and reduce transmission line efficiency (CAL FIRE 2020). Grid-supplied as well as locally generated electricity, which is the primary source of power for residences in the City, is provided by the Sacramento Municipal Utilities District (SMUD). Regional communications infrastructure can also be affected by wildfires, which is often located in remote locations, such as mountaintops, resulting in significant threat from wildfire. Regional wildfires may also generate impacts on transportation behavior in the City during emergency evacuation events. This could include potential route diversion and increases in traffic congestion due to road closures from wildfire impacts or post-wildfire runoff or landslide affected roadways. While fire causes relatively insignificant direct impact on roads and highways, cracking and degradation of pavement is not uncommon.

Although the City is not at a high risk from the direct impacts of wildfires, the City's location within the Sacramento Valley makes it susceptible to impacts of smoke from wildfires in the Sierra Nevada mountains and the coastal mountain ranges of northern California. Community public health factors that can increase the impacts of wildfire smoke include the prevalence of asthma in children and adults; chronic obstructive pulmonary disease; hypertension; diabetes; obesity; and percent of population 65 years of age and older. Additionally, socioeconomic characteristics such as poverty rates, educational achievement, and unemployment rates have all been linked to the increased prevalence of underlying health conditions including depression, obesity, hypertension, and diabetes, making populations in the City with these characteristics more vulnerable to wildfire smoke impacts (Kivimäki et al. 2020). Exposure to wildfire smoke, particularly exposure by vulnerable populations, can result in worsening of respiratory symptoms, increased rates of cardiorespiratory emergency visits, hospitalizations, and even death (Rappold et al. 2017). Increased annual average temperatures and the subsequent increase in the frequency and severity of wildfires in northern California are anticipated to result in impacts from wildfire smoke on the City's population and vulnerable populations in particular (OPR et al. 2018).

Specific populations including linguistically isolated households, senior citizens, and individuals with disabilities or those experiencing homelessness are particularly vulnerable during evacuation events, if wildfire evacuations were to occur in the City. Impacts affecting these populations include inability to access or receive and/or understand warning messages and evacuation notices, limited ability to evacuate due to lack of mobility, limited situational understanding from cognitive conditions, and reliance on medication or treatment devices. Wildfires in the larger Sacramento region can also result in secondary impacts affecting populations. A major consequence of wildfires is post-fire flooding and debris flow. The risk of floods and debris flows after fires increases due to vegetation loss and soil exposure. These flows are a risk to life because they can occur with little warning and can exert great force on objects in their path.

Public Safety Power Shutoffs

Due to a number of recent large-scale wildfires in Northern California caused by electricity infrastructure exposed to extreme heat and high-winds, utilities have begun to implement PSPS to avoid wildfire risk. PSPS events can result in communities experiencing no electricity for multiple days and prevent individuals from using prescribed medications and treatments that rely on electricity or refrigeration. PSPS events can also result in impacts to commerce and economic losses, particularly for businesses that rely on refrigeration such as grocery stores. Hazards such as landslides, wildfires, and flooding can also affect underground natural gas pipelines, exposing and/or damaging these pipelines. The damage resulting from climate change-related hazards on electricity and natural gas infrastructure can have a greater impact on disadvantaged populations, particularly communities that are low-income or individuals who have limited mobility or lack the financial means to make repairs to their property.

Major wildfires often result in the damage to transportation infrastructure and/or closure of roadways. Combined with reduced visibility from wildfire smoke, this leads to a disruption in normal transportation networks and accessibility. Congestion that starts during a mass evacuation can lead to additional traffic management problems, which can result in delays to emergency response, evacuation, and logistical support.

Potential Impact Score

Based on this analysis, the potential impact score for Wildfire is **Medium**.

2.6 ADAPTIVE CAPACITY

This section analyzes the City's current capacity to address and adapt projected increase in severity and frequency of climate-related hazards. The City and regional agencies have established plans, policies, and programs that address climate change impacts. These efforts, however, do not comprehensively identify strategies that will be taken by local and regional governments to address the full scope and magnitude of potential climate impacts. Climate change will increase the frequency and severity of climate-related hazards in the future, requiring updates to emergency response, land use planning, and strategic partnerships. A summary of the regional and local planning efforts to adapt to climate change and climate-related hazards are presented below.

Existing State and Regional Planning Efforts

California Department of Transportation

The Climate Change Branch in the California Department of Transportation (Caltrans) Division of Transportation Planning is responsible for overseeing the development, coordination, and implementation of climate change policies in all aspects of the Department's decision making. In 2013, Caltrans completed its first report intended to help reduce GHG emissions and adapt the State's transportation system to prepare for the impacts of climate change (Caltrans 2013), which includes a series of strategies to reduce the risk from various climate change impacts, including increasingly intense precipitation events.

Strategies outlined in the report include using vegetation to prevent erosion along roadways, assessing and resizing culverts to accommodate increased precipitation, coordinating with local jurisdictions regarding route closures as well as pursuing individual projects included in the Caltrans District Vulnerability Assessments. In 2019, Caltrans completed the District 3 Vulnerability Assessment which provides an overview of potential climate impacts to the district's portion of the State Highway System. The District 3 Vulnerability Assessment is part of a larger adaptation process undertaken by Caltrans to assess risk to Caltrans assets in the district and prioritize adaptation strategies from various climate impacts. The District 3 Vulnerability Assessment includes projected climate change exposure from precipitation change, flooding, temperature change, wildfire, storm surge, and sea level rise.

Sacramento Area Council of Governments

The Sacramento Area Council of Governments (SACOG) is the Metropolitan Planning Organization for the six-county Sacramento region including the 22 cities within El Dorado, Placer, Sacramento, Sutter, Yolo, and Yuba Counties. SACOG develops the region's long-range transportation plan which guides transportation and land use planning in the region. In 2015, SACOG adopted the Sacramento Region Transportation Climate Adaptation Plan to address how potential climate change impacts affect the region's transportation infrastructure. The plan highlights key impacts from climate change that could occur on the Sacramento region's transportation system in the future as well as a guiding action plan for future adaptation planning and implementation.

Sacramento County

The County completed a vulnerability assessment in 2015 that assessed the projected changes associated with climate change in the County (including the City of Rancho Cordova), including impacts from changes in precipitation patterns and increased flooding. The assessment highlighted the unique vulnerabilities of the County to climate change including projected increases in the frequency, intensity, and duration of extreme storm events as well as projected regional temperature increases leading to earlier and more rapid melting of the Sierra Nevada snowpack and subsequent increases in flow rate of surface waters in the County (Sacramento County 2021).

The County is currently working to conduct a study looking at current and future precipitation trends in the County under the influence of climate change. This work will inform an update to the County's Drainage Manual better prepare for future changes in precipitation. The County Drainage Manual is used by incorporated cities in the County to design and build drainage and stormwater infrastructure and inform development standards.

Sacramento Public Department of Health Services

As a division of the Sacramento County Department of Health Services, Sacramento County Public Health works to promote, protect, and ensure conditions for optimal health and public safety for residents and communities in the County. As part of its work in helping prevent health impacts from extreme heat, Sacramento County Public Health conducts community education related to public health and emergency preparedness. It also has developed plans with the Sacramento Office of Emergency Services on wildfire smoke and response plans. Sacramento County Public Health has also begun to research the impacts of climate change using available tools specific to extreme heat and public health.

Sacramento Office of Emergency Services

The Sacramento County Office of Emergency Services (Sacramento OES) provides support and resources for emergency preparedness through its Sacramento Ready Program and operates the county's Emergency Alerts Notification System. Sacramento, Yolo, and Placer County residents can use the Citizen Opt-In portal to receive critical and time-sensitive alerts regarding flooding, levee failures, severe weather, disaster events, unexpected road closures, missing persons, and evacuations of buildings or neighborhoods in specific geographic locations. Sacramento OES coordinates with police and fire departments in the incorporated cities in the county for emergency planning and responses purposes. In regard to heat-related events, Sacramento OES focuses on the immediate effects of events; near-term risks from these events, particularly fires, droughts, and air pollution. Sacramento OES also maintains the County's Emergency Operation Plan, which includes protocols for emergency operations during extreme heat events. Sacramento OES also develops and updates planning documents, including the County's *Evacuation Plan*, *Emergency Operations Plan*, *Mass Care and Shelter Plan*, and the County's LHMP and Annexes including the City. The City's Annex in the LHMP includes climate change as a hazard and discusses how climate change will impact other hazards in the City, rating the likelihood of occurrence high and vulnerability to climate change as high.

Sacramento Metropolitan Fire District

The Sacramento Metropolitan Fire District (SMFD) provides fire protection services, fire suppression, inspection, plan checking, emergency transportation and medical services, public education, advanced life support, and rescue services to the City as well as the unincorporated portions of the Planning Area and southern the County. SMFD encompasses approximately 417 square miles in the southern portion of the County and includes both urban and rural areas. SMFD is the largest district in the County and the seventh largest local fire agency in the State of California. SMFD has 42 fire stations with approximately 673 paid personnel on its staff. The District includes 39 engine companies, 5 truck companies, 12 medic transportation units, 8 historical fire apparatus, 5 crash/rescue units, and various watercraft response units. In the City's General Plan Planning Area, SMFD currently has seven fire stations.

Sacramento Metropolitan Air Quality Management District

The Sacramento Metropolitan Air Quality Management District (SMAQMD) is the agency responsible for monitoring air pollution in the Sacramento Valley Air Basin and for developing and administering programs to reduce air pollution levels below the health-based standards established by the State and Federal governments. SMAQMD is working to develop a UHI model to help identify sensitivities in the district to extreme heat and climate change, as well as develop and model the effects of mitigation strategies (e.g., green roofs, cool pavements). SMAQMD is also working to develop an update to the California Emissions Estimator Model and hopes to include an element to the tool that provides quantification of the benefits of climate adaptation strategies. The agency also works to provide funding from Assembly Bill 617 for the Clean Cars for All program, which provides increased access to electric vehicles for low-income residents. As part of the Plan development process, representatives from SMAQMD participated in the Heat Working Group and provided input on the development of this white paper.

Sacramento Municipal Utility District

SMUD is a publicly owned utility that provides electricity to the County and small portions of Placer County. In regard to climate change, SMUD has developed a sustainable communities program focusing on disadvantaged communities, as well as its Climate Readiness Assessment and Action Plan (SMUD 2016), which is intended to help the utility to adapt to and address climate change through community engagement, enterprise programs, capital projects, and operational initiatives. SMUD also works with the Sacramento Tree Foundation to operate the Sacramento Shade Program, which provides landscape assessments and free shade trees to SMUD customers. SMUD also operates Living Future Project Accelerator, which emphasizes sustainable commercial and residential building practices, and is beginning to work toward a land-based carbon storage program.

Sacramento Tree Foundation

The Sacramento Tree Foundation is a nonprofit organization that empowers people to plant, protect, and learn about trees in the Sacramento region. The organization has several programs that support its mission and provide services to cities and residents in the Sacramento region:

- ▶ **Sacramento Shade Program** – This program, in partnership with SMUD, provides free landscape assessments and up to 10 free shade trees that provide a host of benefits to the residents and the surrounding neighborhoods. The organization's work with SMUD emphasizes planting locations and tree varieties that reflect SMUD's goals for carbon sequestration.
- ▶ **NeighborWoods Program** – This program provides support to communities throughout the Sacramento region by offering expertise, training, tools, and advice to plant and protect trees in their neighborhoods.
- ▶ **Urban Wood Rescue Program** – This program works to preserve useful life of the trees by providing logging and milling services for trees which have reached the end of their life. This lumber is then sold, providing a second life for the trees while capturing carbon sequestered during their lifetime.

The organization also conducts community outreach campaigns, utilizing door to door canvassing and community meetings to promote the benefits of the urban forest.

Existing Local Planning Efforts

City of Rancho Cordova

In 2006, the City adopted its first General Plan. The General Plan includes a Safety Element which includes goals, policies, and actions to address a set of safety issues in the City including traffic hazards, airport safety, neighborhood policing, and flooding. The following list of Goals and corresponding policies in the Safety Element help address and mitigate impacts from climate-related hazards.

GOAL S.2: Reduce the possibility of a flooding or drainage issue causing loss of life or damage to property.

- ▶ **Policy S.2.1:** Support and encourage efforts to limit and reduce the potential for community flooding from the Cosumnes or American Rivers.
- ▶ **Policy S.2.2:** Manage the risk of flooding by discouraging new development located in an area that is likely to flood.
- ▶ **Policy S.2.3:** Discourage the creation of new parcels when the presence of easements, floodplain, marsh, or riparian habitat, and/or other features would leave insufficient land to build and operate structures. This policy shall not apply to open space lots specifically created for dedication to the City or another appropriate party for habitat protection, flood control, drainage, or wetland maintenance.
- ▶ **Policy S.2.4:** Ensure that adequate drainage exists for both existing and new development.

GOAL S.9: Reduce the probability of fire damage to all the City's structures.

- ▶ **Policy S.9.1:** Cooperate with the Sacramento Metropolitan Fire District (SMFD) to reduce fire hazards, assist in fire suppression, and ensure efficient emergency medical response.
- ▶ **Policy S.9.2:** Provide infill development with adequate off-site improvements to meet onsite fire flow requirements.
- ▶ **Policy S.9.3:** Consider establishing mitigation fees to fund adequate fire protection and emergency medical response facilities, if such fees are critical and necessary to meet the facility funding needs of SMFD and existing methods of financing are inadequate.

The City also has regulations within the Municipal Code, specifically, Chapter 23.716 "Landscaping," that provides guidance for landscaping and tree planting requirements for new development in the City. Title 19, "Trees," of the Municipal Code provides regulations regarding the preservation of public trees of local importance and mitigation of tree loss.

The City adopted their Emergency Operations Plan (EOP) in 2018. The EOP describes how the jurisdiction will manage and coordinate resources and personnel responding to emergency situations. It detailed information covering Emergency Operations Center procedures, documentation and reference and support information and includes response protocols for a comprehensive set of emergency situations including climate-related hazard events including flooding, wildland fire, and extreme heat. The document is continually evolving as the City grows with recommendations for improvement solicited and carefully considered for future revisions.

City of Rancho Cordova Public Works Department

The City's Public Works Department supports important activities and functions within the City, which have an impact on UHI, including designing, constructing, operating, and maintaining the City's road network and drainage systems. The Public Works Department is also responsible for the maintenance of roadways in the City as well as the the City's Capital Improvements Program, which includes developing, upgrading and implementing the City's *Capital Improvements Program 5-Year Plan* – a list of improvement projects for various components of City operations.

City of Rancho Cordova Police Department

The Rancho Cordova Police Department is contracted through the Sacramento County Sheriff's Department to provide patrol, traffic enforcement, investigations, and administrative services to the City. Portions of the General Plan Planning Area outside the current City limits are within the Sacramento County Sheriff Department's jurisdictional boundaries.

Summary of Adaptive Capacity

Table 13 evaluates the specific climate change effects covered under each of the plans and reports discussed above. As shown in Table 13, multiple planning efforts have been made to address the climate change-related impacts that are expected to impact the City. Mitigation and adaptation measures for hazards including flooding, storms and extreme weather events, and wildfires and severe wind have been relatively well documented in assessments prepared previously. Other climate change hazards including impacts on human health, drought and available water supply, extreme heat and heat waves, landslides, and sea-level rise are noted in various regional planning efforts. However, these efforts do not analyze regional climate change effects consistently while developing adaptation strategies. Most of the policies provided in existing plans are broad-based strategies to reduce risk from climate change. Thus, it is important to note that specific and targeted policies should be developed to address the resilience of the most vulnerable populations and assets in the City.

Table 13 Adaptive Capacity in Existing Plans and Reports

Plan or Report	Climate Change Hazard			
	Extreme Heat Events	Extreme Precipitation and Flooding	Drought and Water Supply	Wildfires
Sacramento County LHMP Annex	✓	✓	✓	✓
City's General Plan		✓	✓	✓
California's Fourth Climate Change Assessment Sacramento Valley Regional Report	✓	✓	✓	✓

Adaptive Capacity Scoring by Hazard

Based on a combination of the adaptation initiatives outlined in these documents and additional adaptive efforts that have been pursued, the City's adaptive capacity for each climate change effect can be rated Low, Medium, or High. High adaptive capacity indicates that sufficient measures are already in place to address the points of sensitivity and impacts associated with climate change, while a low rating indicates a community is unprepared and requires major changes to address hazards (CalOES 2020).

Increased Temperatures and Extreme Heat

Adaptive Capacity Rating: Low

The City does not generate its own electricity and may not be in a position to protect vulnerable populations from the impacts that will be caused by rising temperatures and a drastic increase in the number of extreme heat events. As rising temperatures and extreme heat lead to more frequent electricity outages, the lack of backup power sources for residents and business will expose more residents to risk of health impacts associated with extreme heat. While the LHMP does include extreme heat as a hazard, relevant information is limited. Impacts associated with increases in temperatures and extreme heat events are the largest potential impact for the City. This means that although the City may be adequately prepared to address extreme heat events currently, the vulnerabilities faced by the City including impacts to youth, seniors, and homeless populations as well as impacts on energy demand and services are likely to exceed to City's current capacity.

For these reasons, the adaptive capacity ranking for increased temperatures and extreme heat is Low.

Increased Wildfire Risk

Adaptive Capacity Rating: High

The County, State and regional agencies, and other partners are implementing a diverse array of policies and programs that address the design of structures, fire safety, community preparedness, and emergency response, decreasing the City's overall vulnerability to the threat of wildfire. However, as the threat of wildfire increases both locally and regionally, the City, in coordination with federal, state, and local agencies, will need to continue to adapt to projected impacts from wildfire. While the City is at relatively low risk from direct wildfire impacts, the affects from regional wildfires on the City through secondary impacts such as wildfire smoke and regional transportation route disruptions will continue to affect the City. Because these impacts have been increasing in intensity and severity in recent years and are somewhat novel, the City will need to make moderate changes to expand its capacity to address these types of impacts.

For these reasons, the adaptive capacity associated with wildfire is high.

Increased Extreme Precipitation and Flooding

Adaptive Capacity Rating: Medium

The City has adequately assessed its flood risk through the LHMP and other planning documents. The City and stakeholders have developed, adopted, and enforced several policies and programs that will serve to mitigate impacts from increasingly frequent floods in the future. While the City's populations and assets are not severely threatened by floods as identified in the LHMP, the City, the County and other regional and local agencies can continue to implement policies and programs that reduce the risks associated with significant flooding events. As noted in Section 2.3, the risk of a large-scale storm event similar to the Great Flood events of 1861–1862 is more likely than not occur at least once by 2060. This means that although the City is adequately prepared to address flooding events currently, an event such as this would result in widescale impacts on the City and potentially affect Folsom Dam.

Therefore, the adaptive capacity associated with increased extreme precipitation and flooding is medium.

Drought and Water Supply

Adaptive Capacity Rating: Medium

The City understands that a reliable water supply is essential. Each water purveyors that provide water resource so the City have UWMPs and Drought Contingency Plans, which will assist in building resilience to future drought conditions. The City is still somewhat vulnerable to these climate-related hazards, particularly in terms of the economic and related impacts (irrigation of recreation fields, constraints on future housing development) of generally dryer conditions, interannual precipitation variability, and reduced snowpack. These climate change effects will pose risks to tourism-related businesses that rely on pass-by visitors to Folsom Lake and the surrounding recreation areas when long-term droughts do occur.

Based on the reasons stated above, the adaptive capacity ranking for drought, water supply, and reduced snowpack is medium.

2.7 VULNERABILITY SCORING

The City's vulnerability to each identified climate change impact is assessed based on the magnitude of risk posed to populations and assets, and any existing measures in place to mitigate these impacts. Potential impacts and adaptive capacity are rated on a qualitative scale from Low to High based on guidance from the APG. A description of each qualitative rating for both factors is provided in Table 14.

Table 14 Potential Impact and Adaptive Capacity Scoring

Score	Potential Impact	Adaptive Capacity
Low	Impact is unlikely based on projected exposure; would result in minor consequences to public health, safety, and/or other metrics of concern.	The population or asset lacks capability to manage climate impact; major changes would be required.
Medium	Impact is somewhat likely based on projected exposure; would result in some consequences to public health, safety, and/or other metrics of concern.	The population or asset has some capacity to manage climate impact; some changes would be required.
High	Impact is highly likely based on projected exposure; would result in substantial consequences to public health, safety, and/or other metrics of concern.	The population or asset has high capacity to manage climate impact; minimal to no changes are required.

Source: CalOES 2020

After rating potential impacts and adaptive capacity, an overall vulnerability score is determined for each climate change impact. This scoring can help the City understand which effects pose the greatest threats and should be prioritized in future planning efforts. Table 15 presents the rubric used to determine the overall vulnerability scores based on the ratings for potential impacts and adaptive capacity.

Table 15 Vulnerability Scoring

		Vulnerability Score		
Potential Impacts	High	3	4	5
	Medium	2	3	4
	Low	1	2	3
		High	Medium	Low
		Adaptive Capacity		

Source: CalOES 2020.

Vulnerability scoring for each climate change effect identified and evaluated in Sections 2.2 through 2.6 is included in Table 16 below. The table shows that increased temperatures and extreme heat is assigned a vulnerability rating of 5 and therefore should be a high priority for the City. Impacts from increased precipitation and flooding was scored as a 4 while drought and water supply risks was assigned a vulnerability score of 3. These climate change effects are likely to have significant impacts on the City's populations, built environment, and community functions in the near-term, and although a variety of adaptive efforts related to both climate change effects are in place and underway, the magnitude of the risks posed by these hazards contributes to high vulnerability in the City. Increased wildfire risk is characterized as having a vulnerability rating of 2. This climate change effect will likely have lower priority impacts on the City and is currently being addressed adequately based on existing conditions, but additional adaptation and resilience planning will be required in the future to mitigate impacts and protect the City.

Table 16 Vulnerability Scoring Summary

Climate Change Effect	Vulnerability Score		
	Vulnerability Score		
	Adaptive Capacity	Potential Impact	Vulnerability
Temperature and Extreme Heat	Low	High	5
Precipitation and Flooding	Medium	High	4
Drought and Water Supply	Medium	Medium	3
Wildfire	High	Medium	2

Appendix G

List of Potential Funding Options

List of Potential Funding Options for CAAP Implementation		
Funding Option	Description	Potential CAAP Implementation
Sacramento Municipal Utility District (SMUD) Residential Rebates	SMUD provides residential rebates and special promotions for energy efficient appliances and products including induction cooktops/ranges, heat pump water heater upgrades, ENERGY STAR® clothes washers and refrigerators, smart thermostats, heating, ventilation, and air conditioning (HVAC) replacement with a heat pump, smart lighting starter kits, energy savings kits, power strips, LED bulbs, faucet aerators, showerheads, water conservation kits, smart sprinkler controllers, and drip irrigation retrofit kits. SMUD also offers residents a discounted electric rate to support EV charging, funding for home EV charging equipment and installation, and a managed EV charging program to support vehicle charging when demand is low.	Building Energy Sector; Water Sector; On-Road Transportation Sector
Sacramento Municipal Utility District (SMUD) Business Rebates	SMUD provides business rebates for lighting, refrigeration, and heating or cooling (HVAC) systems through several different rebate programs, including a program specific to multifamily residential properties. It also provides electric vehicle (EV) programs for commercial vehicles and EV charging, an electric forklift incentive pilot program, and SMUD eFuel SM Services to assess, design, construct and maintain electric vehicle chargers for commercial customers interested in business/fleet electric vehicles and charging, workplace employee charging or multi-family tenant charging.	Building Energy Sector; On-Road Transportation Sector; Off Road Vehicles and Equipment Sector
DOE Energy Efficiency and Conservation Block Grant (EECBG) Program	Part of the DOE's State and Community Energy Program (SCEP), the EECBG program provides formula grants to local governments to implement strategies to reduce fossil fuel emissions, decrease total energy use, and improve energy efficiency. The funds will consist a two-year budget period for local governments. Rancho Cordova's allocation is \$138,900.	Building Energy Sector
California Energy Commission 1 Percent Interest Rate Loans	The California Energy Commission offers 1 percent loans for local jurisdictions to conduct projects with proven energy savings at municipal facilities.	Building Energy Sector
California Lending for Energy and Environmental Needs (CLEEN)	This funding source, as a program of California Infrastructure and Economic Development Bank, provides direct public financing to municipalities, universities, schools, and hospitals to help meet the state's goals for GHG reductions, water conservation, and environmental preservation.	Building Energy Sector
California Energy Commission Electric Program Investment Charge Program (EPIC)	The EPIC program provides more than \$130 million annually in grants to both public agencies and private entities for the development and deployment of renewable energy, clean electric building and transportation, energy resilience, and advanced grid technologies in to accelerate the transformation of the electricity sector.	Building Energy Sector
GRID Alternatives	GRID Alternatives is a nonprofit organization that provides no-cost solar installations to low-income residents and provides assistance for communities in developing multifamily and community-scale solar installations. The organization also provides hands-on job training for volunteers interested in employment in the solar industry.	Building Energy Sector

List of Potential Funding Options for CAAP Implementation		
Funding Option	Description	Potential CAAP Implementation
California Department of Community Services and Development, Low-Income Weatherization Program	Administered by the California Department of Community Services and Development, the Low-Income Weatherization Program provides low-income households with solar photovoltaic (PV) systems and energy efficiency upgrades at no cost to residents. The program is designed with the primary goal of reducing GHG emissions by saving energy and generating clean renewable energy while reducing energy costs for low-income single-family households and multi-family affordable housing.	Building Energy Sector
Building Initiative for Low-Emissions Development (BUILD) Program	The CA Energy Commission's Building Initiative for Low-Emissions Development (BUILD) Program is designed to provide technical assistance and incentives for new all-electric low-income residential buildings that reduce GHG emissions.	Building Energy Sector
Federal Inflation Reduction Act (IRA) of 2022	The IRA invests nearly \$400 billion in Energy Security and Climate Change programs over the next ten years. This includes rebates and tax credits for energy efficiency, renewable energy, and clean vehicle purchases, as well as funding for clean power infrastructure and climate resiliency.	Building Energy Sector
HUD Community Development Block Grant (CDBG) Program	The HUD CDBG Program supports community development activities to build stronger and more resilient communities. Activities may address needs such as infrastructure, economic development projects, public facilities installation, community centers, housing rehabilitation, public services, clearance/acquisition, microenterprise assistance, code enforcement, and homeowner assistance.	Building Energy Sector
Federal Infrastructure Investment and Jobs Act, aka Bipartisan Infrastructure Law (BIL) or "Building a Better America"	The U.S. Department of Transportation announced the availability of nearly \$3 billion in competitive grant funding for surface transportation projects that were included in the infrastructure law. The grants can fund projects too large or complex for traditional funding programs like multijurisdictional and multimodal projects. The BIL also invests in clean energy by modernizing the power grid, weatherize and upgrade homes, schools, and businesses to make them cleaner and more affordable, and in the creation of new programs to support the development of clean energy technology. It will also invest in broadband infrastructure development to provide access to reliable high-speed internet.	On-road Transportation Sector; Building Energy Sector
Rebuilding American Infrastructure with Sustainability and Equity (RAISE) Grants	The U.S. Department of Transportation is offering \$1.5 billion in grant funding through the RAISE discretionary grant program. The program uses a merit-based process to select projects that will build and repair critical pieces of freight and passenger transportation networks.	On-road Transportation Sector
Caltrans Active Transportation Planning Program	This program provides competitive planning grants for jurisdictions working on planning projects to increase the proportion of trips accomplished by biking and walking and reduce community-wide vehicle miles traveled.	On-road Transportation Sector

List of Potential Funding Options for CAAP Implementation		
Funding Option	Description	Potential CAAP Implementation
Caltrans Transportation Planning Grant Program	The Transportation Planning Grant Program provides competitive planning grants to help local jurisdictions in a variety of transportation planning efforts including development and implementation of regional transportation plans. The program also helps address multimodal transportation deficiencies with a focus on transit and support planning actions that advance climate adaptation efforts for local transportation systems.	On-road Transportation Sector
Caltrans Clean California Local Grant Program	The Clean California Local Grant Program provides competitive grants to projects that beautify and improve local roads, parks, pathways, and transit centers. Cycle 2 of grants includes up to \$100 million in funding.	On-road Transportation Sector; Natural and Urban landscapes
California Clean Vehicle Rebate Project (CVRP)	This California Air Resources Board program provides rebates for the purchase or lease of a new, eligible zero-emission or plug-in hybrid vehicle. As of February 28, 2023, increased rebate amounts have been updated to \$7,500 for battery electric and fuel cell electric vehicles and \$6,500 for plug-in hybrid vehicles.	On-road Transportation Sector
Strategic Growth Council Affordable Housing and Sustainable Communities Program	This program, administered by the California Department of Housing and Community Development, funds land use, housing, transportation, and land preservation projects that support infill and compact development and reduce GHG emissions. Funds are available in the form of loans and/or grants in two kinds of project areas: Transit-Oriented Development Project Areas and Integrated Connectivity Project Areas.	On-road Transportation Sector
SB 2 Planning Grant Program	This planning grant program provides financial and technical assistance to local governments to update planning documents and zoning ordinances, including general plans, community plans, specific plans, sustainable communities strategies, and local coastal programs, to streamline housing production. The program does not use a competitive process to award funds. All localities that meet the eligibility requirements outlined in the grant application receive funding.	On-road Transportation Sector
Volkswagen (VW) Environmental Mitigation Trust	The VW Environmental Mitigation Trust provides about \$423 million for California to mitigate the excess nitrogen oxide emissions by funding specified eligible actions focused mostly on “scrap and replace” projects for the heavy-duty sector, including on-road freight trucks, transit and shuttle buses, school buses, forklifts and port cargo handling equipment, commercial marine vessels, and freight switcher locomotives.	On-road Transportation Sector; Off-Road Vehicles and Equipment Sector
California Air Resources Board Carl Moyer Memorial Air Quality Standards Attainment Program	The Carl Moyer Program provides grant funds towards the replacement of old, high-polluting vehicles, engines, and equipment, with new technologies that are cleaner than required or earlier than required by rules and regulations. The Sacramento Metropolitan Air Quality Management District implements this program in the Sacramento region.	On-road Transportation Sector; Off-Road Vehicles and Equipment Sector

List of Potential Funding Options for CAAP Implementation		
Funding Option	Description	Potential CAAP Implementation
CalRecycle Food Waste Prevention and Rescue Grant Program	The purpose of this competitive grant program is to reduce overall GHG emissions by establishing new or expanding existing food waste prevention projects (source reduction or food rescue for people) in California to reduce the amount of food being disposed of in landfills.	Solid Waste Sector
CalRecycle Local Enforcement Agency Grant Program	CalRecycle administers a non-competitive grant program to assist local enforcement agencies with their solid waste facilities permit and inspection program.	Solid Waste Sector
California Department of Water Resources Water Grant and Loans	The California Department of Water Resources provides a number of grant and loan programs that support integrated watershed management. These funds can be used to address issues such as groundwater sustainability, drought, and water supply reliability. Programs include the Small Communities Drought Relief Program, the Riverine Stewardship Program, Delta Levees Special Flood Control Projects Program, and the LandFlex Program.	Water Sector
CivicSpark Program	The CivicSpark Program supports sustainability-focused research, planning, and implementation projects throughout California by providing public agencies and other organizations with high-quality capacity-building support. This 11-month AmeriCorps program employs highly motivated emerging sustainability professionals.	Green Economy; Public Participation & Engagement
Regional Early Action Planning (REAP)	REAP allows councils of governments and other regional entities to collaborate on projects that have a broader regional impact on housing. The grant funding helps regional entities and governments facilitate local housing production that will assist local governments in meeting their Regional Housing Need Allocation.	On-road Transportation Sector
Sustainable Transportation Equity Project (STEP)	STEP is a new transportation equity pilot that aims to address community residents' transportation needs, increase access to key destinations, and reduce greenhouse gas emissions by funding planning, clean transportation, and supporting projects. STEP's overarching purpose is to increase transportation equity in disadvantaged and low-income communities throughout California via two types of grants: Planning and Capacity Building Grants and Implementation Grants. Within these two grant types, CARB currently has up to \$22 million available.	On-road Transportation Sector
Infrastructure State Revolving Fund (ISRF)	The California Infrastructure and Economic Development Bank provides loans to local governments for infrastructure and economic development. ISRF has financed projects that are vital to communities throughout the state such as city and county street highway improvements, wastewater treatment plant construction and upgrades, and educational and cultural facilities.	On-road Transportation Sector; Buildings and Energy sector; Water and Wastewater Sector; Solid Waste Sector

List of Potential Funding Options for CAAP Implementation		
Funding Option	Description	Potential CAAP Implementation
CAL FIRE's Grant Programs	CAL FIRE provides a number of grant programs such as the wildfire prevention grant program, the business and workforce development through wood products and bioenergy program, the California forest improvement program, the forest health program, the forest health research program, forest legacy program, and the urban and community forestry program. Funding and application dates can be found on their website https://www.fire.ca.gov/grants/ .	Adaptation
OPR Regional Resilience Planning and Implementation Grant Program (RRGP)	The ICARP Regional Resilience Planning and Implementation Grant Program (Regional Resilience Grant Program, or RRGP) will fund local public entities, California Native American Tribes, and Community-Based Organizations that are planning and implementing projects that advance climate resilience and respond to the greatest climate risks in their regions. Over multiple funding rounds, the RRGP will invest \$125 million into regions advancing resilience and responding to their regions' greatest climate risks through three major activities: capacity building, planning (including identifying climate resilience priorities), and project implementation. The first grant cycle will invest \$21.3 million. At least \$12.5 million of that total will be for regions planning for climate adaptation and developing action plans that prioritize projects or actions addressing the greatest climate risks facing a region, particularly in the most vulnerable communities. Grants will be made available both competitively and on a formula basis. Application period begins in Spring 2023.	Adaptation
SGC Transformative Climate Communities (TCC)	The Transformative Climate Communities (TCC) Program funds development and infrastructure projects that achieve major environmental, health, and economic benefits in California's most disadvantaged communities. More info here: Transformative Climate Communities: Community-led transformation for a sustainable California	All sectors
SGC Community Assistance for Climate Equity (CACE)	The SGC's CACE Program provides technical assistance and capacity building services to help under-resourced communities foster successful climate projects. Within CACE, the Boost Program supports under-resourced local governments in building capacity, optimizing existing resources, strengthening community partnerships, and transforming their approach to address and fund climate activities.	All sectors
SGC Community Resilience Centers (CRC) Grants Program	SGC's CRC program will fund new construction and upgrades of neighborhood-level resilience centers to provide shelter and resources during climate and other emergencies. The program will also fund year-round services and ongoing programming that build overall community resilience. More info here: Community Resilience Centers Program: Strengthening community resilience in neighborhoods across California	Adaptation

List of Potential Funding Options for CAAP Implementation		
Funding Option	Description	Potential CAAP Implementation
Climate Resilience Districts Act (Senate Bill 852)	Senate Bill 852 (Dodd, 2022) established the “Climate Resilience District”. This is a new public financing tool available to cities, counties, and special districts to undertake projects and programs to address climate change including wildfire, sea level rise, extreme heat and cold, drought, flooding, and related issues. The districts can be formed by one or public agencies and, once created, can raise revenue through tax increment funding, voter-approved supplemental property taxes, property benefit assessments, or fees.	Adaptation
CA Climate & Energy Collaborative (CCEC) Funding Resources	The CCEC provides several helpful resources to support funding for implementation of local climate and energy initiatives. These include a “How to Guide: Ways to Get Funded” resource that outlines both internal and external funding best practices (see Ways to get Funded – California Climate and Energy Collaborative (eecoordinator.info), as well as a regularly-updated list of current and upcoming funding opportunities with links (see Funding Resources – California Climate and Energy Collaborative (eecoordinator.info).	
California Grants Portal	The California Grants Portal (a project by the California State Library) is a one-stop destination to find all grants and loans offered on a competitive or first-come basis by California state agencies. See: Home - California Grants Portal	

MEMORANDUM

ITEM 14.1.

DATE: June 3, 2024
TO: Honorable Mayor and Council Members
FROM: Elizabeth Sparkman, Community Development Director
Dalia Fadl, Principal Engineer
SUBJECT: **A RESOLUTION APPROVING PROCEEDINGS FOR THE ANNUAL LEVY AND COLLECTION OF ASSESSMENTS FOR LANDSCAPING AND LIGHTING DISTRICT NO. 2005-1 FOR FISCAL YEAR 2024-2025**

RECOMMENDATION

Adopt the Resolution.

RESULT OF RECOMMENDED ACTION

Adoption of the Resolution would authorize the continuance of the annual levy and collection of assessments in Landscaping and Lighting District No. 2005-1 (the District). There are no new impacts on existing or new residents. No assessments would increase as a result of this action.

BACKGROUND

On May 20, 2024, the City Council approved Resolutions ordering the preparation of the Engineer's Annual Levy Report and set the public hearing to be held prior to approving and ordering the levy of assessments for Fiscal Year 2024-2025. The assessments fund the ongoing landscape maintenance services in the District. There are no new impacts to existing or new residents. No assessments shall increase as a result of this action.

State law requires the City Council to direct an Engineer's Report to be prepared each year and to hold a public hearing on the Report and the levy of the annual assessments. On May 20, 2024, the City initiated the proceedings for the annual levy and collection of assessments by adopting a Resolution ordering the preparation of the Engineer's Report and a Resolution preliminarily approving the Engineer's Report, declaring its intention to levy and collect annual assessments for Fiscal Year 2024-2025, and set today as the time and place to conduct a public hearing on the matter.

The Engineer's Report includes a diagram of the assessment area, a description of the maintenance services to be provided, a description of the property to be benefited, and the amount of the assessment to each individual property. The services performed within and funded by Landscaping and Lighting District No. 2005-1 include ongoing maintenance, operation and servicing of landscaping and streetscape improvements within the right-of-ways and other public areas within the District at the locations described in the Engineer's Report.

The proposed Fiscal Year 2024-2025 assessment rates do not exceed the rates previously levied by the County since 1994 and are equal to the rates levied by the City in Fiscal Year 2023-2024. The boundaries of each Zone shown in the district diagram in Part IV of the Engineer's Report and the details for each Zone are described in Section II, Part A of the Engineer's Report.

The Fiscal Year 2024-2025 total assessment is estimated at \$89,038. The District has an established Operating Reserve which provides funding for the operations and maintenance of the District, as well as providing financing for emergency expenditures. A second reserve fund finances special projects such as a central irrigation system, revegetation projects, and other rehabilitation projects or replacements of District improvements.

In July 2006, the County transferred funds previously collected in the County's Zone 4 and 5 to the City, which was deposited to the Landscaping and Lighting District No. 2005-1. The City had previously deemed that these transferred funds are to be used exclusively by the District and shall be considered as undesignated reserves within the Zones of the District. Funds from the undesignated reserve can be used to fund costs of any zone(s) that are unable to be funded by the annual assessments.

In order to proceed with the levy of assessments, it is appropriate for the Council to conduct the public hearing and adopt a Resolution which approves the Engineer's Report and authorizes the levy and collection of assessments for Fiscal Year 2024-2025.

FISCAL IMPACT AND FUNDING SOURCE

There is no fiscal impact to the City's General Fund.

ATTACHMENT(S)

2. Exhibit A to the Resolution - Engineer's Report

CITY OF RANCHO CORDOVA

RESOLUTION NO. XX-2024

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA, STATE OF CALIFORNIA, APPROVING PROCEEDINGS FOR THE ANNUAL LEVY AND COLLECTION OF ASSESSMENTS FOR LANDSCAPING AND LIGHTING DISTRICT NO. 2005-1 FOR FISCAL YEAR 2024-2025

WHEREAS, the City Council has, by previous Resolutions, ordered the preparation of the Engineer's Report for Fiscal Year 2024-2025 for Landscaping and Lighting District 2005-1, pursuant to the provisions of the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500 (hereafter referred to as the "Act"); and

WHEREAS, the Engineer's Annual Report, Exhibit A, has been presented to City Council as required by Chapter 3, Section 22623 of said Act, and as previously directed by Resolution; and

WHEREAS, this City Council has carefully examined and reviewed the Report as presented, and is satisfied with each and all of the items and documents as set forth therein, and is satisfied that the levy has been spread in accordance with the benefits received from the improvements, operation, maintenance and services to be performed, as set forth in said Report; and

WHEREAS, the City and its legal counsel have reviewed Proposition 218 and found that these assessments comply with applicable provisions of Article XIII D of the California State Constitution; and

WHEREAS, upon reasonable written notice by Sacramento County of any claim or challenge, the City of Rancho Cordova agrees to defend with counsel of its choice, indemnify and hold harmless Sacramento County, its Board of Supervisors, officers, officials, agents and employees (collectively "the County"), against the payment of any liabilities, losses, costs and expenses, including attorney fees and court costs, not due to the County's own active negligence or willful misconduct, which the County may incur in the exercise and performance of its powers and duties in placing these assessments onto the County roll and tax bills for the City of Rancho Cordova.

NOW, THEREFORE, BE IT HEREBY RESOLVED BY THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA AS FOLLOWS:

1. Following notice duly given, the City Council has held a full and fair public hearing regarding the District, the levy and collection of assessments, the Report prepared in connection therewith, and considered all oral and written statements, protests and communications made or filed by interested persons regarding these matters.
2. Based upon its review (and amendments, as applicable) of the Report, a copy of which has been presented to the City Council, is hereby approved (as amended), and is ordered to be filed in the Office of the City Clerk as a permanent record and to remain open to public inspection, the City Council hereby finds and determines that:

- a. The land within the District will be benefited by the operation, maintenance and servicing of improvements, located within the boundaries of the District, and
- b. District includes all of the lands so benefited, and
- c. The net amount to be assessed upon the lands within the District in accordance with the assessment for the Fiscal Year commencing July 1, 2024, and ending June 30, 2025, is apportioned by a formula and method which fairly distributes the net amount among all eligible parcels in proportion to the estimated special benefits to be received by each parcel from the improvements and services.

3. The maintenance, operation and servicing of the improvements and appurtenant facilities shall be performed pursuant to the Act. The City Council hereby orders the proposed improvements to be made, which improvements are briefly described as follows: the maintenance and operation of and the furnishing of services and materials for turf, ground cover, shrubs and plants, trees, irrigation and drainage systems, street lighting improvements, equipment, utilities, ornamental lighting, masonry walls or other fencing, hardscape improvements, monuments, and associated appurtenant facilities located within the landscape easements or public right-of-ways.

4. The County Auditor of the County of Sacramento shall enter on the County Assessment Roll opposite each eligible parcel of land the amount of levy so apportioned by the formula and method outlined in the Report, and such levies shall be collected at the same time and in the same manner as the County taxes are collected, pursuant to Chapter 4, Article 2, Section 22646 of the Act. After collection by the County, the net amount of the levy shall be paid to the City Treasurer.

5. The City Treasurer shall deposit all money representing assessments collected by the County for the District to the credit of a fund for the City of Rancho Cordova Landscaping and Lighting District 2005-1 and such money shall be expended only for the maintenance, operation and servicing of the improvements together with all other costs of the District as described in Section 3.

6. The adoption of this Resolution constitutes the District levy for the Fiscal Year commencing July 1, 2024, and ending June 30, 2025.

7. The City Clerk, or their designate, is hereby authorized and directed to file the levy with the County Auditor upon adoption of this Resolution, pursuant to Chapter 4, Article 1, Section 22641 of the Act.

8. Francisco and Associates, Inc. is hereby designated to file the levy with the County Auditor/Controller on behalf of the City. The City Clerk is directed to deliver a certified copy of this adopted Resolution to Francisco and Associates, Inc. within two weeks of adoption via either e-mail ede@franciscandassociates.com or US Mail to: Francisco and Associates, Inc., 231 Market Place, Suite 543, San Ramon, CA 94583 Attn: Ed Espinoza.

9. That the above recitals are all true and correct. The City Clerk shall certify to the passage and adoption of this Resolution, and the minutes of this meeting shall so reflect the presentation of and final approval of the Report.

CITY OF RANCHO CORDOVA
LANDSCAPE AND LIGHTING ASSESSMENT DISTRICT NO. 2005-1
FISCAL YEAR 2024-25**

The undersigned, acting on behalf of Francisco & Associates respectfully submits the enclosed Engineer's Report as directed by the Rancho Cordova City Council pursuant to the provisions of Article XIID, Section 4 of the California Constitution, provisions of the Landscaping and Lighting Act of 1972 and Section 22500 et al of the California Streets and Highways Code. The undersigned certifies that he is a Professional Engineer, registered in the State of California.

Dated: May 3, 2024

By: 

Eduardo R. Espinoza, P.E.
R.C.E No. 83709

SECTION I

INTRODUCTION

Pursuant to the provisions of the Landscaping and Lighting Act of 1972, being Part 2 of Division 15 of the California Streets and Highways Code, commencing with Section 22500 (hereafter referred to as the “1972 Act”), and in compliance with the substantive and procedural requirements of the California State Constitution Article XIID (hereafter referred to as the “California Constitution”), the City Council of the City of Rancho Cordova, County of Sacramento, State of California (hereafter referred to as “City”), has by resolution initiated proceedings in connection with the ongoing maintenance of the special assessment district designated as:

Landscape and Lighting District No. 2005-1

(hereafter referred to as “District”), for the purpose of continuing and providing for the ongoing maintenance and operation of landscaping and lighting improvements within the District.

In Fiscal Year 2005-06, as part of the District formation to continue the assessments previously levied by the County as part of the Sacramento Landscape Maintenance District (“SLMD”) Zone 4 and Zone 5 for properties within the boundary of the City, the City conducted a Property Owner Protest Ballot proceeding for the District assessments pursuant to the provisions of the *California Constitution, Article XIID Section 4*. In conjunction with this ballot proceeding, the City Council also conducted a noticed public hearing to consider public testimonies, comments, and written protests regarding the formation of the District and levy of maximum assessments. Upon conclusion of the public hearing, property owner protest ballots received were opened and tabulated to determine whether a majority protest existed (ballots were weighted based upon the assessment amounts), and by resolution the City Council confirmed the results of the ballot tabulation. Tabulation of the ballots indicated that a majority protest did not exist for the continuation and transfer of assessments as presented and described in the Fiscal Year 2005-06 Engineer’s Report. The City Council approved the report, ordered the formation of the District, and approved the levy and collection of Fiscal Year 2005-06 assessments. The Fiscal Year 2005-06 assessments were then submitted to the Sacramento County Auditor/Controller for inclusion on the property tax roll for each parcel.

The improvements and assessments described in this Report are based on the improvements and assessments previously established by the County for SLMD Zone 4 and Zone 5, and represent an estimate of the direct expenditures, incidental expenses, and fund balances associated with the maintenance and servicing of those improvements. The structure of the District (organization), the improvements, the method of apportionment, and assessments described herein have been established to continue the maintenance of the existing improvements and assessments previously established by the County as outlined in the District’s Fiscal Year 2005-06 Engineer’s Report.

ITEM 14.1.**CITY OF RANCHO CORDOVA
LANDSCAPE AND LIGHTING DISTRICT No. 2005-1****ATTACHMENT 2
Exhibit A to the Resolution
FISCAL YEAR 2024-25
INTRODUCTION**

For Fiscal Year 2024-25, this Report has been prepared and presented to the City Council describing the District, any changes to the District or improvements, and the proposed cost estimate and assessments for this fiscal year, and the City Council shall hold a noticed public hearing regarding these matters prior to approving and ordering the proposed levy of assessments. Should the proposed annual assessments for the District or portion thereof, exceed the maximum assessments described herein (as approved by the property owners), the new or increased assessment must be confirmed through another property owner protest ballot proceeding before the new or increased assessment may be imposed. It should be noted that an increased assessment of an individual property resulting from changes in development or land use does not constitute an increased assessment.

The word “parcel,” for the purposes of this Report, refers to an individual property assigned its own Assessor’s Parcel Number (APN) by the County Assessor’s Office. The County Auditor/Controller uses Assessor’s Parcel Numbers and specific Fund Numbers to identify properties to be assessed on the tax roll for special benefit assessments.

SECTION II**ENGINEER'S REPORT PREPARED PURSUANT TO THE PROVISIONS OF
LANDSCAPING AND LIGHTING ACT OF 1972 SECTION 22500 THROUGH 22679
OF THE CALIFORNIA STREETS AND HIGHWAYS CODE****CITY OF RANCHO CORDOVA****LANDSCAPE AND LIGHTING ASSESSMENT DISTRICT NO. 2005-1
FISCAL YEAR 2024-25**

Pursuant to the 1972 Act, and in accordance with the Resolution of Intention, adopted by the City Council of the City of Rancho Cordova on May 20, 2024, I, Eduardo R. Espinoza, the duly appointed Engineer of Work, Assessment Engineer for the City of Rancho Cordova Landscape and Lighting Assessment District No. 2005-1 (the "District") submit the following Report, consisting of Section I (Introduction), and this Section II, which consists of five (5) parts as follows:

Part A – PLANS AND SPECIFICATIONS

This part describes the improvements maintained by the District. The District was formed with four (4) benefit zones encompassing all lots and parcels of land within the boundaries of the City. The territory within the District had previously been assessed through Zone 4 and Zone 5 of the SLMD in Fiscal Year 2004-05. The District was first assessed in Fiscal Year 2005-06. Plans and specifications for the improvements are on file at the City of Rancho Cordova, and are incorporated herein by reference.

Part B – ESTIMATE OF COST

This part contains an estimate of the annual costs to operate, maintain, and service the District's landscaping and lighting improvements and facilities. The estimate included herein is also on file at the City of Rancho Cordova.

Part C – ASSESSMENT DISTRICT DIAGRAM

This part incorporates a diagram of the District showing the exterior boundaries of the District, the boundaries of any zones within the District and the lines and dimensions of each lot or parcel of land within the District. Reference is hereby made to the County Assessor's maps for a detailed description of the lines and dimensions of each lot and parcel of land within the District. This diagram has been prepared by the Engineer of Work and is on file at the City of Rancho Cordova.

Part D – METHOD OF APPORTIONMENT OF ASSESSMENTS

This part includes a discussion of benefits the improvements and services provide to properties within the District and the method of apportionment of assessments used to calculate each property's proportional special benefit and annual assessment.

Part E – ASSESSMENT ROLL

This part contains a listing of the proposed assessment amount for each parcel within the District. The proposed assessment amount for each parcel is based on the parcel's proportional special benefit as outlined in the method of apportionment of assessments. The Assessment Roll is also filed in the Office of the City Clerk of the City of Rancho Cordova and is incorporated in this report.

Part A
PLANS AND SPECIFICATIONS

Description of the District

The territory within the District consists of the lots and parcels of land that in Fiscal Year 2004-05 were both within the City and within a portion of Zone 4 and all of Zone 5 of the Sacramento Landscape Maintenance District ("SLMD"). Said territory encompasses an area of land totaling approximately five hundred twelve acres (512 acres) that is centrally located within the City, generally south of Highway 50 and north of the southern City limits.

Zone 1: That portion of the previous SLMD Zone 4, which at the time of the formation of the District included a total of ninety-seven (97) assessable parcels within the residential subdivision known as Ellenwood Court located south of Ellenwood Avenue. Upon formation of the District, this area was designated as Zone 1 to reflect the special benefit these parcels receive from the District improvements associated with the development located on the south side of Ellenwood Avenue.

Zones 2, 3 and 4: The parcels within previous SLMD Zone 5, which at the time of the formation of the District included a total of six hundred eighty-six (686) assessable parcels generally located south of the American River, east of Mather Field Road, and near Zinfandel Drive and International Drive. Upon formation of the District, this area was designated as Zones 2, 3, 4, and 4A and are further described as follows:

Zone 2 included the one hundred fifty-four (154) assessable parcels within the residential subdivision known as California Jazz Units 1 & 2, generally located east of Data Drive, north of Reserve Drive, south of Capital Center Drive and west of International Drive.

Zone 3 included the eight (8) assessable parcels located on either side of Zinfandel Drive from Data Drive to the southern boundary of the District (approximately 700 feet south of International Drive).

Zone 4 included the remaining parcels that were previously included in SLMD Zone 5 that were not designated as either Zone 2 or Zone 3 of the District. This Zone includes parcels along Data Drive, International Drive, Capital Center Drive, White Rock Road, Quality Drive, Disk Drive, Prospect Park Drive and Kilgore Road.

Zone 4A is the portion of Zone 4 that also lies within the City's Community Facilities District No. 2005-2 ("CFD 2005-2"). Tax Zone 1 of CFD 2005-2 was established to fund, to the extent that funds from CFD 2005-2 are available, maintenance of landscape improvements of the residential subdivision development known as Capital Village. These landscape improvements were installed along the subdivision's rights-of-way and within the median(s) adjacent to

the development. The funds from Tax Zone 1 of CFD 2005-2, to the extent available, shall offset all or a portion of the costs within Zone 4A.

Description of Improvements and Services

The purpose of this District is to ensure the ongoing maintenance, operation and servicing of local landscaping and street lighting improvements within the District (improvements that had been previously funded through annual assessments from the SLMD). The improvements may consist of all or a portion of the public landscaped areas, street lighting and appurtenant facilities within and adjacent to the District. These improvements may include, but are not limited to the materials, equipment, utilities, labor, appurtenant facilities and expenses necessary for the ongoing maintenance and operation of public street lighting and landscape improvements, including, but not limited to parkways, medians and other designated easements, rights-of-way or public areas within the District. The improvements to be maintained and funded entirely or partially through the District assessments are generally described as:

Improvements and Services Permitted Pursuant to the 1972 Act

As generally defined by the 1972 Act, the improvements and associated assessments for this District may include now or in the future one or more of the following:

- 1) The installation or planting of landscaping;
- 2) The installation or construction of statuary, fountains, and other ornamental structures and facilities;
- 3) The installation or construction of public lighting facilities including, but not limited to streetlights and traffic signals;
- 4) The installation or construction of any facilities which are appurtenant to any of the foregoing or which are necessary or convenient for the maintenance or servicing thereof;
- 5) The installation of park or recreational improvements, including, but not limited to, all the following:
 - a) Land preparation, such as grading, leveling, cutting and filling, sod, landscaping, irrigation systems, sidewalks, and drainage.
 - b) Lights, playground equipment, play courts, and public restrooms.
- 6) The acquisition of land for park, recreational, or open-space purposes or any existing improvement otherwise authorized pursuant to this section.

ITEM 14.1.**CITY OF RANCHO CORDOVA
LANDSCAPE AND LIGHTING DISTRICT No. 2005-1****ATTACHMENT 2
Exhibit A to the Resolution
FISCAL YEAR 2024-25
PART A**

- 7) The maintenance or servicing, of any of the foregoing including the furnishing of services and materials for the ordinary and usual maintenance, operation, and servicing of any improvement including but not limited to:
 - a) Repair, removal, or replacement of all or any part of any improvements;
 - b) Grading, clearing, removal of debris, the installation or construction of curbs, gutters, walls, sidewalks, or paving, or water, irrigation, drainage, or electrical facilities;
 - c) Providing for the life, growth, health, and beauty of landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, or treating for disease or injury;
 - d) The removal of trimmings, rubbish, debris, and other solid waste;
 - e) The cleaning, sandblasting, and painting of walls and other improvements to remove or cover graffiti;
 - f) Electric current or energy, gas, or other illuminating agent for any public lighting facilities or for the lighting or operation of any other improvements;
 - g) Water for the irrigation of any landscaping, the operation of any fountains, or the maintenance of any other improvements.
- 8) Incidental expenses associated with the improvements including, but not limited to:
 - a) The cost of preparation of the report, including plans, specifications, estimates, diagram, and assessment;
 - b) The costs of printing, advertising, and the publishing, posting and mailing of notices;
 - c) Compensation payable to the County for collection of assessments;
 - d) Compensation of any engineer or attorney employed to render services;
 - e) Any other expenses incidental to the construction, installation, or maintenance and servicing of the improvements;
 - f) Costs associated with any elections held for the approval of a new or increased assessment.

Landscape Improvements

The landscape improvements for the District may include, but are not limited to turf, ground cover, shrubs and plants, trees, irrigation and drainage systems, ornamental lighting, masonry walls or other fencing, hardscape improvements, monuments, and associated appurtenant facilities located within the landscape easements or public rights-of-way. Zone specific landscape improvements are described generally as follows:

Zone 1: Streetscape (parkway) landscaping along the South side of Ellenwood Avenue east of Routier Road that is within the public rights-of-way or easements dedicated to the City for maintenance. The costs and special benefits of these improvements are shared equally by only the assessable properties within Zone 1 of the District.

Zone 2: Streetscape (parkway) landscaping surrounding and adjacent to the California Jazz subdivision on the north side of Reserve Drive from Data Drive to International Drive; the east side of Data Drive from Reserve Drive north to the end of the subdivision; the west side of Capital Center Drive from International Drive north to the end of the subdivision; and the north side of International Drive from Reserve Drive to Capital Center Drive. The costs and special benefits of these improvements are proportionately shared by only the properties within Zone 2 of the District.

Zone 3: Streetscape (parkway) landscaping on both sides of Zinfandel Drive between International Drive and Data Drive. The costs and special benefits of these improvements are proportionately shared by only the properties within Zone 3 of the District.

Zones 2, 3, 4 and 4A: All median landscape improvements within the District located on International Drive from approximately 570 feet westerly of Data Drive to Kilgore Road and on Zinfandel Drive from Data Drive to International Drive. The costs and special benefits of these improvements are proportionately shared by all the properties within Zone 2, 3, 4 and 4A of the District.

Specifically, the landscape improvement areas for this District generally consist of the following:

- Approximately 9,600 square feet of streetscape (parkway) landscaping and 34 trees within the public rights-of-way located on the south side of Ellenwood Avenue.
- Approximately 11,000 square feet of turf, 28,455 square feet of streetscape (parkway) landscaping including 110 trees, located on the north side of Reserve Drive from Data Drive to International Drive; east side of Data Drive, from Reserve Drive north to end of California Jazz tract Unit No. 1; west side of Capital Center Drive, from International Drive north to the end of California Jazz Tract Unit No. 2; and north side of International Drive, from Reserve Drive to Capital Center Drive.

ITEM 14.1.**CITY OF RANCHO CORDOVA
LANDSCAPE AND LIGHTING DISTRICT No. 2005-1****ATTACHMENT 2
Exhibit A to the Resolution
FISCAL YEAR 2024-25
PART A**

- Approximately 19,400 square feet of turf, 11,500 square feet of streetscape (parkway) landscaping including 57 trees, located on the west side of Zinfandel Drive, south of International Drive.
- Approximately 152,340 square feet of turf, 55,600 square feet of streetscape and median landscaping including 392 trees along International Drive; and medians on International Drive, west of Data Drive to Kilgore Road.

Specifically, not included as District improvements, are those improvements located on private property, improvements and facilities that may be provided or maintained by an agency other than the City; improvements and facilities that may be provided by another assessment or tax levied by the City or County and any improvement provided and maintained by a Homeowner's Association or similar entity.

Detailed descriptions of the location and extent of the specific improvements to be maintained by the District are on file with the City and by reference are made part of this Report. The net annual cost to provide and maintain the improvements determined to be of special benefit shall be allocated to each property in proportion to the special benefits received.

Public Lighting Improvements

Lighting facilities that may be located within the landscaped areas including safety lights, security lights or ornamental lights installed as part of the landscape improvements are included as part of the landscape maintenance costs.

The lighting improvements may include but shall not be limited to the cost of providing electrical energy and servicing of lighting fixtures, poles, meters, conduits, electrical cable and associated appurtenant facilities associated with the street lighting, safety lighting and/or traffic signals within the District including public lighting facilities on designated arterial and collector streets as well as lighting facilities within residential subdivisions or public areas such as parks. The cost of such improvements shall be allocated based on the proportional special benefits properties receive from these improvements.

**Part B
ESTIMATE OF COSTS**

The maximum assessment per parcel or acre shown herein is based on the cost of providing for the District improvements and does not include any other assessments or charges imposed on the properties. The cost estimate within this report identifies the cost to maintain the improvements within each specified zone of the District.

Each zone within the District maintains two separate reserves, one is utilized for working capital purposes (the "Operating Reserve") and the other for longer-term projects (the "Special Projects Reserve"). The Operating Reserve provides cash for the ongoing operations and maintenance of the District, as well as providing funding for unanticipated expenditures. The size of the Operating Reserve for each zone is limited by Streets and Highways Code 22569, which states that an Operating Reserve shall not exceed the estimated costs of maintenance and services from the first day of the fiscal year (July 1) to the date that the agency expects to receive the first apportionment of collections from the County. The City has determined that all cost estimates as presented in this report shall be considered as costs to maintain and service the District, or incidental expenses thereof, as to the application of the Streets and Highways Code 22569.

The Special Projects Reserve can be used to finance the Central Irrigation System (CIS) project and re-vegetation projects, as well as other rehabilitation projects, repairs or replacements of District improvements.

The Cost Estimate for the District prepared by the City for Fiscal Year 2024-25 follows on the next page.

(1) Contribution from CFD No. 2005-2; Only affects Zone 4A.

(2) The annual levy may differ slightly from the maximum revenue shown due to rounding, because of rounding limitations imposed by the County of Sacramento.

(3) Negative fund balances represent funds that will need to be contributed or loaned from an appropriate funding source outside of the assessment district.

A description of the terms used in the preceding Cost Estimate table are listed on the following pages.

ITEM 14.1.

**CITY OF RANCHO CORDOVA
LANDSCAPE AND LIGHTING DISTRICT No. 2005-1**

Direct Costs (Maintenance and Operation)

Contract Maintenance – Landscaping – Includes all regularly scheduled contract labor, materials, supplies, and equipment required to properly maintain and ensure the satisfactory condition or maintenance of all landscaping improvements, irrigation, and related drainage systems, as well as maintenance of appurtenant facilities (the “improvements”).

Utilities (Water/Electricity) – Landscaping - The furnishing of water and electricity required for the operation and maintenance of the landscaping related improvements.

Utilities (Electricity) – Lighting - The furnishing of electricity required for the operation of the lighting improvements.

Periodic Repair/Rehabilitation – Landscaping – Expected costs for repair, replacement, installation, or planned upgrades of District landscaping improvements.

Periodic Repair/Rehabilitation – Lighting – Expected costs for repair, replacement, installation or planned upgrades of District lighting improvements. If zero, this line item may not be shown in the cost estimate.

Special Project Expenditures – Expected costs for installation, replacement or planned upgrades of District landscaping or lighting improvements for the current year that were previously funded or accumulated in the Special Projects Reserve. The Special Projects Reserve is used to accumulate funds for costs associated with the future rehabilitation, repair or replacement of these District improvements that cannot be conveniently raised from a single year’s assessment. If zero, this line item may not be shown in the cost estimate.

Administration Costs

District Administration – Estimated costs incurred by the City in preparation of the annual cost estimate and the preparation, review, posting and/or publishing of documents and notices required for City Council action to approve the annual assessments. These costs also include contracting with various professionals to provide legal, engineering and district administration services directly related to the District, including the calculation of the annual assessment amounts and the preparation of the Engineer’s Report.

Contract Administration – Estimated costs to coordinate and oversee the maintenance contracts and overall repair, maintenance and replacements of the District Improvements.

County Collection Fees – The fee charged to the District by the County for placing assessments on property tax bills.

ITEM 14.1.

**CITY OF RANCHO CORDOVA
LANDSCAPE AND LIGHTING DISTRICT No. 2005-1**

**ATTACHMENT 2
Exhibit A to the Resolution
FISCAL YEAR 2024-25
PART B**

Other Administration Expenses – Administration expenses not included above, including the cost to publish public notices required for City Council action relating to the District. If zero, this line item may not be shown in the cost estimate.

Total Direct and Administration Costs – The total expected costs of the District.

Miscellaneous Costs and Collections/(Credits) Applied to Levy

Replenishment/(Use) of Operating Reserve – A “Replenishment” increases the levy in order to replenish the Operating Reserve. On the other hand, a “Use” of the Operating Reserve decreases the levy by drawing funds from the Operating Reserve for current year expenditures. If zero, this line item may not be shown in the cost estimate. Further information regarding the function of the Operating Reserve is provided in the following pages of this section.

Contribution to/(use of) Special Projects Reserve — A “Contribution” increases the levy in order to generate funding for the Special Projects Reserve. This reserve allows for the accumulation of funds for the possible rehabilitation of projects or replacement in future years. On the other hand, a “Use of” the Special Projects Reserve provides current year funding of rehabilitation projects or replacement from available funds within the Special Projects Reserve. If the expenditure of a current year special project is funded entirely by a collection from the current fiscal year levy and/or a transfer from the Undesignated Reserve, this line item may show as zero, which is the net of the two amounts. If zero, this line item may not be shown in the cost estimate. Further information regarding the function of the Special Projects Reserve is provided in the following pages of this section.

Revenues from Other Sources – These amounts represent contributions from CFD No. 2005-2; which only affects Zone 4A. This relationship is more fully described in the previous sections of this report.

Balance to Levy - This is the total amount to be levied and collected through assessments for the current fiscal year for each Zone. The Balance to Levy represents the sum of the Total District Direct and Administration Costs together with any applicable adjustments associated with Miscellaneous Costs and Collections/(Credits) as described above.

District Statistics and Assessment Rates

Number of Assessable Parcels - The total number of parcels within each zone that are expected to be assessed. Non-assessable lots or parcels include government-owned land, public utility-owned property, land principally encumbered by public right-of-way or easements, common areas, and/or parcels within the boundaries of the District that currently do not benefit from the improvements, due possibly to development restrictions.

ITEM 14.1.

**CITY OF RANCHO CORDOVA
LANDSCAPE AND LIGHTING DISTRICT No. 2005-1**

**ATTACHMENT 2
Exhibit A to the Resolution
FISCAL YEAR 2024-25
PART B**

Assessable Acreage - The total assessable acreage within each zone that are expected to be assessed on an acreage basis for the current fiscal year.

Maximum Rate per Parcel - The maximum assessment rate that can be assessed to each non-exempt parcel within the respective zone for the current fiscal year.

Maximum Rate per Acre - The maximum assessment rate per acre that can be assessed to each non-exempt parcel within the respective zone for the current fiscal year.

Estimated Maximum Assessment Revenue – The total amount that can be assessed to all parcels within each zone for the current fiscal year based upon the expected number of assessable units and acres using the maximum assessment rates.

Operating Reserve Fund Balances

Beginning Reserve Fund Balance 7-1-2024 (est.) - The anticipated beginning balance of cash and receivables, net of any unpaid prior year obligations for each zone. These beginning balances shall be used to fund each zone's expenditures from July 1, 2024 to December 31, 2024, as the Operating Reserve is required to compensate for the approximate six-month delay between the start of the District's fiscal year and the receipt of the collections from the County. The Special Projects Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the report.

Add: Collect from Fiscal Year 2024-25 Levy – This amount is added to the levy in order to replenish the Operating Reserve. Due to the six-month delay from the District's receipt of assessment collections, the Operating Reserve balance shall be sufficiently funded to provide for expenditures from the period of July 1, 2024 (the beginning of the fiscal year) through December 31, 2024. If zero, this line item may not be shown in the cost estimate.

Less: Use for Fiscal Year 2024-25 Expenses – The amount of the Operating Reserve to be used to fund Fiscal Year 2024-25 expenses. Portions of the Operating Reserve may be slated for current year expenditures in order to reduce the Ending Operating Reserve Fund Balance to an amount no greater than the expected District costs for the period of July 1, 2024 (the beginning of the fiscal year) through December 31, 2024. If zero, this line item may not be shown in the cost estimate.

Transfer from/(to) the Special Projects Reserve - The amount of Operating Reserve monies to be transferred to or from the Special Projects Reserve. Periodically, funds held in a Special Projects Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Special Projects Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Public Works Department, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the cost estimate.

ITEM 14.1.

**CITY OF RANCHO CORDOVA
LANDSCAPE AND LIGHTING DISTRICT No. 2005-1**

**ATTACHMENT 2
Exhibit A to the Resolution
FISCAL YEAR 2024-25
PART B**

Ending Operating Reserve Fund Balance 6-30-2025 (est.) - This amount represents the anticipated Operating Reserve balance/(deficit) for each zone as of June 30, 2025. The size of each zone's Operating Reserve is limited by Streets and Highways Code 22569 which states that an Operating Reserve shall not exceed the estimated costs of maintenance and service from the first day of the fiscal year (July 1) to the date that the City expects to receive the first apportionment of collections from the County, which is estimated to be December 31. Therefore, each zone may retain an Operating Reserve amounting to the District's first six-months of expenses in order to meet ongoing obligations until the first collections are received from the County. Any deficit fund balances will be contributed or loaned to the District from a source outside of the District. All Special Projects Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the report.

Special Projects Reserve Fund Balance

Beginning Special Projects Reserve Fund Balance 7-1-2024 (est.) — The projected balance of funds in the Special Projects Reserve as of July 1, 2024. Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

Add: Collect from Fiscal Year 2024-25 Levy — This amount is added to the levy to accumulate funding for future year rehabilitation projects, replacements, repairs, restorations, or upgrades of District improvements. If zero, this line item may not be shown in the cost estimate.

Less: Use for Fiscal Year 2024-25 Special Projects – The amount of Special Project Reserve monies expected to be expended for special projects to fund the costs of installation, replacement, or planned upgrades of District improvements for the current year. If zero, this line item may not be shown in the cost estimate.

Transfer from/(to) the Operating Reserve — The amount of Special Projects Reserve monies to be transferred to or from the Operating Reserve. Periodically, funds held in a Special Project Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Special Project Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Public Works Department, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the cost estimate.

Ending Special Projects Reserve Fund Balance 6-30-2025 (est.) – The projected balance of funds in the Special Projects Reserve as of June 30, 2025. These funds shall be used to provide for future year rehabilitation projects, replacements, restorations or upgrades of District improvements which cannot be conveniently raised from a single year's assessment. Should the District have no Special Project Reserve or related activity, the Special Project Reserve information may not be presented in the report.

Streets and Highways Code Section 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

Part C**ASSESSMENT DISTRICT DIAGRAM**

The parcels to be assessed consist of all lots, parcels and subdivisions of land located within the boundaries of the map designated as "Assessment Diagram of Landscape and Lighting District No. 2005-1." The lines and dimensions of each parcel within the District are those lines and dimensions shown on the maps of the Sacramento County Assessor for the year in which this Report was prepared and are incorporated herein and made part of this Report.

A reduced copy of the Assessment Diagram is attached on the following page.

City of Rancho Cordova
Landscape and Lighting District No. 2005-1
Assessment District Diagram

Part D

METHOD OF APPORTIONMENT OF ASSESSMENTS

The 1972 Act permits the establishment of assessment districts by agencies for the purpose of providing certain public improvements, which include the construction, maintenance, and servicing of public lights, landscaping, and appurtenant facilities.

The 1972 Act further requires that the cost of these improvements be levied according to benefit rather than assessed value:

“The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels in proportion to the estimated benefits to be received by each such lot or parcel from the improvements.”

In conjunction with the provisions of the 1972 Act, the California Constitution Article XIID addresses several key criteria for the levy of assessments, notably:

Article XIID Section 2d defines District as:

“District means an area determined by an agency to contain all parcels which will receive a special benefit from a proposed public improvement or property-related service”;

Article XIID Section 2i defines Special Benefit as:

“Special benefit” means a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute “special benefit.”

Article XIID Section 4a defines proportional special benefit assessments as:

“An agency which proposes to levy an assessment shall identify all parcels which will have a special benefit conferred upon them and upon which an assessment will be imposed. The proportionate special benefit derived by each identified parcel shall be determined in relationship to the entirety of the capital cost of a public improvement, the maintenance and operation expenses of a public improvement, or the cost of the property related service being provided. No assessment shall be imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel.”

The method of apportionment described in this Report for allocation of special benefit assessments utilizes commonly accepted engineering practices and has been established pursuant to the 1972 Act and the provisions of the California Constitution. The formulas used for calculating assessments reflects the composition of parcels within the District and the improvements and services provided, to fairly apportion the costs based on the special benefits to each parcel.

Benefit Analysis

Each of the proposed improvements and the associated costs and assessments have been carefully reviewed, identified, and allocated based on special benefit pursuant to the provisions of the California Constitution and 1972 Act.

The improvements provided by the District and for which properties will be assessed have been identified as necessary, required and/or desired for the development of properties within the District and as such, the ongoing operation, servicing and maintenance of these improvements would be the financial obligation of the parcels within the District. Therefore, the improvements and the annual costs of ensuring the maintenance and operation of the improvements are a distinct and special benefit to the properties within the District. Any improvement or portion thereof that is considered to be of general benefit shall be funded by other revenue sources and not included as part of the special benefit assessments allocated to properties within the District.

Special Benefit

The method of apportionment (method of assessment) established herein is based on the premise that each assessed parcel within the District receives special benefits from specific improvements and the desirability and security of those properties is enhanced by the presence of well-maintained improvements in close proximity to those properties. The special benefits associated with landscape improvements are specifically:

- Enhanced desirability of properties through association with the improvements.
- Improved aesthetic appeal of properties providing a positive representation of the area and properties.
- Enhanced adaptation of the urban environment within the natural environment from adequate green space and landscaping.
- Environmental enhancement through improved erosion resistance, dust and debris control, and fire prevention.
- Increased sense of pride in ownership of property within the District resulting from well-maintained improvements associated with the properties.
- Enhanced quality of life through well-maintained green space and landscaped areas.
- Reduced criminal activity and property-related crimes (especially vandalism) against properties in the District through well-maintained surroundings and amenities including abatement of graffiti.
- Enhanced environmental quality of the parcels by moderating temperatures, providing oxygenation, and attenuating noise.

The special benefits of street lighting and other public lighting facilities are the convenience, safety, and security of property, improvements, and goods. Specifically:

- Enhanced deterrence of crime and the aid to police protection.
- Increased nighttime safety on roads, streets, and public areas.
- Improved ability of pedestrians and motorists to see.
- Improved ingress and egress to property.

- Reduced vandalism and other criminal acts and damage to improvements or property.
- Improved traffic circulation and reduced nighttime accidents and personal property loss.

All the preceding factors contribute to a specific enhancement and desirability of each of the assessed parcels within the District and thereby provide special benefits to the properties. Furthermore, it has been determined that the lack of funding to properly service and maintain the District improvements could have a negative impact on the properties within the District.

General Benefit

In reviewing each of the District improvements, the proximity of those improvements to both properties within the District and those outside the District as well as the reasons for installing and constructing such improvements, it is evident that the improvements are solely for the benefit of properties within the District and the ongoing maintenance and operation of the improvements will directly affect the properties within the District. Although the improvements include public areas, easements, rights-of-way and other amenities available or visible to the public at large, the construction and installation of these improvements were only a direct benefit to the properties within the District and were not required nor necessarily desired by any properties or developments outside the District boundary and any public access or use of the improvements by others is incidental. Therefore, it has been determined that the improvements and the ongoing maintenance, servicing and operation of those improvements provide no measurable general benefit to properties outside the District or to the public at large, but clearly provide distinct and special benefits to properties within the District.

Assessment Methodology

The method of apportionment for the District calculates the receipt of special benefit from the respective improvements based on the actual or proposed land use of the parcels within the District. The special benefit received by each lot or parcel is equated to the overall land use of parcels within the District based on the parcel's actual land use or proposed development.

All costs associated with the improvements shall be fairly distributed among the parcels based upon the special benefit received by each parcel. Additionally, in compliance with the California Constitution, each parcel's assessment may not exceed the reasonable cost of the proportional special benefit conferred to that parcel. The benefit formula used to determine the assessment obligation is therefore based upon both the improvements that benefit the parcels within the District as well as the proposed land use of each property as compared to other parcels that benefit from those specific improvements.

At the time that the District was being formed and to identify and determine the special benefit to be received by each parcel and their proportionate share of the improvement costs, it was necessary to consider the entire scope of improvements to be maintained by the District, as well as individual property development within the District. Upon review of

ITEM 14.1.**CITY OF RANCHO CORDOVA
LANDSCAPE AND LIGHTING DISTRICT No. 2005-1****ATTACHMENT 2
Exhibit A to the Resolution
FISCAL YEAR 2024-25
PART D**

the improvements to be maintained, it was determined that four (4) distinct areas benefit differently from the improvements within the District and therefore the landscape maintenance and assessments were established as four (4) benefit zones for the allocation of the assessments and proportional special benefit, as described below. Although a portion of Zone 4 was designated as Zone 4A in Fiscal Year 2007-08, as discussed below, Zones 4 and 4A remain as one benefit zone and are assessed at the same maximum rate.

Zones and Assessments:

Zone 1 is comprised of ninety-six (96) assessable residential properties, each of which were assessed on a per parcel basis at the pre-existing rate of \$42.50 per parcel.

Zone 2 is comprised of one hundred fifty-four (154) assessable residential properties within the developments known as California Jazz Unit No.1 and Unit No. 2. Each of the one hundred fifty-four (154) assessable parcels were assessed as residential properties on an acreage basis at the pre-existing rate of \$30.48 per acre for the median landscape improvements and parkway landscape improvements associated with these parcels.

Zone 3 is comprised of eighteen (18) assessable properties, each of which were assessed on an acreage basis at the pre-existing rate of \$30.48 per acre for the median landscaping and \$1,382.76 per acre for the landscaping along the parkways of Zinfandel Drive, totaling \$1,413.24 per acre.

Zone 4 is comprised of fifty-two (52) assessable properties, each of which were assessed on an acreage basis at the pre-existing rate of \$30.48 per acre for the median landscape improvements within the District.

Zone 4A is comprised of a portion of Zone 4. Properties within Zone 4A were re-designated as Zone 4A commencing with the Fiscal Year 2007-08 to account for the Zone 4A parcels lying within a portion of CFD 2005-2, while the remaining Zone 4 parcels are outside of the CFD 2005-2 boundaries. Since the CFD 2005-2 Zone 1, special taxes are to be levied upon Zone 4A parcels, these special taxes are contributed in part to the District for the benefit of Zone 4A. Zone 1 of the CFD provides funding for landscape improvements within and adjacent to the development, including the median landscaping identified herein. Although the CFD may fund median landscaping, the special taxes levied within Capital Village may not provide sufficient funds to maintain both the landscape improvements within the Capital Village development and the median landscape improvements within the District that specially benefit the parcels within Zone 4A. Therefore, Zone 4A is comprised of seven hundred eighty-three (783) assessable properties, each of which were assessed \$30.48 per gross acre until such time that the CFD generates sufficient revenue to fund the median landscape improvements. Any funds generated by the CFD that will be used to finance the median landscape improvements that benefit Zone 4A shall be transferred by the CFD to the District as a contribution to Zone 4A.

Exempt Parcels — Properties within the District that are not assessed for special benefit include but are not limited to:

- Lots or parcels identified as public streets and other roadways (typically not assigned an APN by the County);
- Dedicated public easements including open space areas, utility rights-of-way, greenbelts, parkways, parks, or other publicly owned properties that are part of the District improvements or may provide other benefits to private properties within the District;
- Private properties that cannot be developed independently from an adjacent property, such as common areas, sliver parcels or bifurcated lots or properties with very restrictive development use.

These types of parcels are considered to receive little or no benefit from the improvements and are therefore exempt from assessment, but shall be reviewed annually by the assessment engineer to confirm the parcels current development status. Government owned properties or public properties are not necessarily exempt properties and shall be subject to special benefit assessment unless it qualifies for an exempt classification.

Special Cases – In many districts where multiple land uses, and zones exist, the typical property classification and assessment methodology does not accurately identify the special benefits received from the improvements for each and every parcel. For example, in some cases, only a small percentage of the parcel's total acreage can actually be developed. In this case, an appropriate calculation would be based on the net acreage that can be utilized rather than the gross acreage of the parcel. These special circumstances will be reviewed annually by the assessment engineer.

**Part E
ASSESSMENT ROLL**

Parcel identification for each lot or parcel within the District is based on the Assessment Diagram presented herein and is based on available parcel maps and property data from the County Assessor's Office at the time the Engineer's Report was prepared. A listing of the proposed lots and parcels to be assessed within this District along with the assessment amounts is provided herein.

Non-assessable lots or parcels may include, but are not limited to public streets and other roadways (typically not assigned an APN by the County); dedicated public easements, open space areas, rights-of-way, common areas; landlocked parcels, small parcels vacated by the County, bifurcated lots, and any other property that cannot be developed or has little or no value. These types of parcels are considered to receive little or no benefit from the improvements and are therefore exempt from assessment.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate described in this Report as approved by the City Council. Therefore, if a single parcel is subdivided to multiple parcels, the assessment amount applied to each of the new parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment.

The following is a list of the parcels and proposed assessment amounts for each of the parcels within the District as determined by the assessment rates and method of apportionment described herein.

MEMORANDUM

ITEM 14.2.

DATE: June 3, 2024
TO: Honorable Mayor and Council Members
FROM: Elizabeth Sparkman, Community Development Director
Dalia Fadl, Principal Engineer
SUBJECT: **A RESOLUTION APPROVING PROCEEDINGS FOR THE ANNUAL LEVY AND COLLECTION OF ASSESSMENTS FOR THE RANCHO CORDOVA LIGHTING DISTRICT NO. 2012-1 FOR FISCAL YEAR 2024-2025**

RECOMMENDATION

Adopt the Resolution.

RESULT OF RECOMMENDED ACTION

Adoption of the Resolution would authorize the continuance of the annual levy and collection of assessments in Lighting District No. 2012-1 (the District). There are no new impacts to existing or new residents. No assessment rates shall increase as a result of this action.

BACKGROUND

State law requires that the City Council direct an Engineer's Report to be prepared each year and to hold a public hearing on the Report and the levy of the annual assessments. On May 20, 2024, the City initiated the proceedings for the annual levy and collection of assessments through adoption of a Resolution ordering the preparation of the Engineer's Report and a Resolution preliminarily approving the Engineer's Report, declaring its intention to levy and collect annual assessments for Fiscal Year 2024-2025, and set today as the time and place to conduct a public hearing on the matter.

The Engineer's Report includes a diagram of the assessment area, a description of the improvements and maintenance services to be provided, a description of the property to be benefited, and the amount of the assessment to each individual property. The services performed within and funded by the District include ongoing maintenance, operation and servicing of streetlights and safety lights within the right-of-ways and other public areas within the District as described in the Engineer's Report.

The Fiscal Year 2024-2025 total assessment is estimated at \$361,137. These assessment rates are the same rates applied to the district under CSA-1 and have not increased since the passage of Proposition 218 in 1996. The District has established an Operating Reserve which provides funding for the operations and maintenance of the District Improvements, as well as providing financing for emergency expenditures. A Capital Projects Reserve has been

established to fund replacements and upgrades of the District Improvements.

In September 2014, the City of Rancho Cordova completed the retrofit of all existing streetlights located within the District with new LED streetlights. The project was funded from a 1% interest loan from the California Energy Commission (CEC). This project significantly reduced electricity usage and maintenance costs. The electrical and maintenance savings will be used to pay back the loan from the energy commission. The District has historically been underfunded and has been supplemented by Measure A Maintenance funds. Once the CEC loan is paid off in Fiscal Year 2028, the District is projected to generate sufficient revenue to build a reserve to cover the costs of the replacement of the LED streetlight heads when they need to be replaced in 20 years.

In order to proceed with the levy of assessments, it is appropriate for the Council to conduct a public hearing and adopt the Resolution which approves the Engineer's Report and authorizes the levy and collection of assessments for Fiscal Year 2024-2025.

FISCAL IMPACT AND FUNDING SOURCE

There is no fiscal impact to the City's General Fund.

CITY OF RANCHO CORDOVA

RESOLUTION NO. XX-2024

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA, STATE OF CALIFORNIA, APPROVING PROCEEDINGS FOR THE ANNUAL LEVY AND COLLECTION OF ASSESSMENTS FOR THE RANCHO CORDOVA LIGHTING DISTRICT NO. 2012-1 FOR FISCAL YEAR 2024-2025

WHEREAS, the City Council has, by previous Resolution, ordered the preparation of the Engineer's Report for Fiscal Year 2024-2025 (hereafter referred to as the "Report" or "Engineer's Report") for said district known and designated as: The Rancho Cordova Lighting District 2012-1 (hereafter referred to as the "District"), pursuant to the provisions of the Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500 (hereafter referred to as the "Act"); and

WHEREAS, there has been presented to this City Council the Engineer's Annual Report, Exhibit A, as required by Chapter 3, Section 22623 of said Act, and as previously directed by Resolution; and

WHEREAS, this City Council has carefully examined and reviewed the Report as presented, and is satisfied with each and all of the items and documents as set forth therein, and is satisfied that the levy has been spread in accordance with the benefits received from the improvements, operation, maintenance and services to be performed, as set forth in said Report; and

WHEREAS, this City and its legal counsel have reviewed Proposition 218 and found that these assessments comply with applicable provisions of Article XIII D of the California State Constitution; and

WHEREAS, upon reasonable written notice by Sacramento County of any claim or challenge, the City of Rancho Cordova agrees to defend with counsel of its choice, indemnify and hold harmless Sacramento County, its Board of Supervisors, officers, officials, agents and employees (collectively "the County"), against the payment of any liabilities, losses, costs and expenses, including attorney fees and court costs, not due to the County's own active negligence or willful misconduct, which the County may incur in the exercise and performance of its powers and duties in placing these assessments onto the County roll and tax bills for the City of Rancho Cordova.

NOW, THEREFORE, BE IT HEREBY RESOLVED BY THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA AS FOLLOWS:

1. Following notice duly given, the City Council has held a full and fair public hearing regarding the District, the levy and collection of assessments, the Report prepared in connection therewith, and considered all oral and written statements, protests and communications made or filed by interested persons regarding these matters.
2. Based upon its review (and amendments, as applicable) of the Report, a copy of which has been presented to the City Council, is hereby approved (as amended), and is ordered to be filed in the Office of the City Clerk as a permanent record and to remain open to public inspection, the City Council hereby finds and determines that:

- a. The land within the District will be benefited by the operation, maintenance and servicing of improvements, located within the boundaries of the District, and
 - b. District includes all of the lands so benefited, and
 - c. The net amount to be assessed upon the lands within the District in accordance with the assessment for the Fiscal Year commencing July 1, 2024 and ending June 30, 2025, is apportioned by a formula and method which fairly distributes the net amount among all eligible parcels in proportion to the estimated special benefits to be received by each parcel from the improvements and services.
3. The maintenance, operation and servicing of the lighting improvements and appurtenant facilities shall be performed pursuant to the Act. The City Council hereby orders the proposed improvements to be made, which improvements are briefly described as follows: the maintenance, operation and servicing of highway safety lights and local street lights located within the public right-of-ways that were previously serviced through CSA-1, Zone 2. Of the District improvements, highway safety lights are those lights located at intersections, on major streets, and along the rear of properties that abut major streets; and street lights are all lights not designated as highway safety lights, primarily consisting of local street lighting.
4. The County Auditor of the County of Sacramento shall enter on the County Assessment Roll opposite each eligible parcel of land the amount of levy so apportioned by the formula and method outlined in the Report, and such levies shall be collected at the same time and in the same manner as the County taxes are collected, pursuant to Chapter 4, Article 2, Section 22646 of the Act. After collection by the County, the net amount of the levy shall be paid to the City Treasurer.
5. The City Treasurer shall deposit all money representing assessments collected by the County for the District to the credit of a fund for the City of Rancho Cordova Lighting District 2012-1 and such money shall be expended only for the maintenance, operation and servicing of the improvements together with all other costs of the District as described in Section 3.
6. The adoption of this Resolution constitutes the District levy for the Fiscal Year commencing July 1, 2024, and ending June 30, 2025.
7. The City Clerk, or their designee, is hereby authorized and directed to file the levy with the County Auditor upon adoption of this Resolution, pursuant to Chapter 4, Article 1, Section 22641 of the Act.
8. Francisco & Associates, Inc. is hereby designated to file the levy with the County Auditor/Controller on behalf of the City. The City Clerk is directed to deliver a certified copy of this adopted Resolution to Francisco & Associates, Inc within two weeks of adoption via either e-mail to ede@franciscoandassociates.com or US Mail to: Francisco & Associates, Inc., 231 Market Place, Suite 543, San Ramon, CA, 94583, Attn: Ed Espinoza.
9. That the above recitals are true and correct. The City Clerk shall certify to the passage and adoption of this Resolution, and the minutes of this meeting shall so reflect the presentation of and final approval of the Report.

Eduardo R. Espinoza, P.E.
R.C.E. No. 83709

SECTION I

INTRODUCTION

Pursuant to the provisions of the Landscape and Lighting Act of 1972, being Part 2 of Division 15 of the California Streets and Highways Code, commencing with Section 22500 (hereafter referred to as the “1972 Act”), the City Council of the City of Rancho Cordova, County of Sacramento, State of California (hereafter referred to as “City”), has by resolution initiated proceedings in connection with the ongoing maintenance and operation of a special benefit assessment district designated as:

Rancho Cordova Lighting District No. 2012-1

(hereafter referred to as “District”), for the purpose of continuing and providing for the ongoing maintenance, servicing, and operation of public lighting improvements (safety lights and streetlights) within the City that had been administered by the County of Sacramento as Zone 2 of County Service Area 1 (CSA 1) until the Fiscal Year 2012-13 levy.

Prior to the formation of the District, the detachment of those portions of CSA 1 lying within the City limits was approved, resulting in the transfer of the responsibility of the servicing of CSA 1 improvements and related administration to the City. Commencing with the Fiscal Year 2012-13 levy, the City Council formed the District in order to provide ongoing funding for the costs and expenses required to service and maintain the safety light and streetlight improvements for the benefiting lots and parcels of land within the boundaries of the District. County Service Area 1 was created in 1986 by the Sacramento County Board of Supervisors by reorganizing five existing streetlight maintenance districts. CSA 1 was established to provide streetlight services to those unincorporated portions of Sacramento County. Since the establishment of CSA 1, the cities of Citrus Heights, Elk Grove and Rancho Cordova have been incorporated and in July 2005, the Board of Supervisors approved the creation of zones within CSA 1. The creation of these zones allowed the incorporated cities and the County to supplement CSA 1 revenues specific to those areas. This action also facilitated the eventual Local Agency Formation Commission (LAFCO) approved detachment of Elk Grove (August 2005), Citrus Heights (June 2006), and Rancho Cordova (June 2012) from CSA 1.

This Engineer’s Report (hereafter referred to as “Report”) has been prepared in connection with the levy and collection of annual assessments related thereto for Fiscal Year 2024-25, as required pursuant to Chapter 1, Article 4 of the 1972 Act. This Report describes the District, the improvements, and the assessments to be levied on properties within the District in connection with the special benefits the properties receive from the maintenance and servicing of the District improvements. The formation of this District and the annual assessments provide a continued funding source for the City to fund, in part, the ongoing maintenance, servicing and operation, of the safety lights and streetlights that provide special benefits to the properties within the District.

The improvements and assessments described in the Fiscal Year 2012-13 Engineer's Report (hereafter referred to as the "Formation Report") were based on the improvements and assessments previously established by the County of Sacramento for CSA 1 Zone 2. Such assessment revenues will be used to fund, in part, the annual direct expenditures and incidental expenses associated with the maintenance and servicing of the District's improvements. The formation of the District, the structure of the District (organization), the improvements, the method of apportionment, and assessments described in the Formation Report have been established to continue the maintenance of the existing improvements and assessments previously established by the County of Sacramento for CSA 1 and as such are not considered to be new or increased assessments under the provisions of the California Constitution Article XIID.

As part of the District formation to continue the assessments previously levied by the County of Sacramento as part of CSA 1, in addition to the proceedings conducted by LAFCO for the detachment of the City of Rancho Cordova from CSA 1, the Rancho Cordova City Council conducted a noticed public hearing pursuant to the provisions of the 1972 Act to consider public testimonies, comments and written protests regarding the formation of the District and levy of assessments. At the close of the public hearing, the City Council adopted a Resolution approving the Formation Report and confirming and levying the assessments for Fiscal Year 2012-13.

Each subsequent fiscal year, an Engineer's Report shall be prepared and presented to the City Council describing the District, any changes to the District or improvements, and the proposed cost estimate and assessments for that fiscal year, and the City Council shall hold a noticed public hearing regarding these matters prior to approving and ordering the proposed levy of assessments for that fiscal year. If in any year, the proposed annual assessments for the District exceed the assessments described herein, such an assessment would be considered a new or increased assessment and must be confirmed through property owner protest ballot proceeding before that new or increased assessment may be imposed. It should be noted that an increased assessment to an individual property resulting from changes in development or land use does not constitute an increased assessment.

The word "parcel," for the purposes of this Report, refers to an individual property assigned its own Assessor's Parcel Number (APN) by the Sacramento County Assessor's Office. The Sacramento County Auditor/Controller uses Assessor's Parcel Numbers and specific Fund Numbers to identify properties to be assessed on the tax roll for special benefit assessments.

SECTION II

ENGINEER'S REPORT PREPARED PURSUANT TO THE PROVISIONS OF LANDSCAPING AND LIGHTING ACT OF 1972 SECTION 22500 THROUGH 22679 OF THE CALIFORNIA STREETS AND HIGHWAYS CODE

CITY OF RANCHO CORDOVA

LIGHTING DISTRICT NO. 2012-1 FISCAL YEAR 2024-25

Pursuant to the 1972 Act, and in accordance with the Resolution of Intention, adopted by the City Council of the City of Rancho Cordova on May 20, 2024, I, Eduardo R. Espinoza, the duly appointed Engineer of Work, Assessment Engineer for the City of Rancho Cordova Lighting District No. 2012-1 (the "District") submit the following Report, consisting of Section I (Introduction), and this Section II, which consists of five (5) parts as follows:

Part A – PLANS AND SPECIFICATIONS

This part describes the improvements maintained by the District. The District has two (2) designated benefit zones that collectively encompass all lots and parcels of land within the boundaries of the District. The two benefit zones are designated as "Safety Light Only" Zone, which includes those lots and parcels of land within the District that are associated and benefit from only safety light improvements; and the "Safety Light and Street Light" Zone, which includes those lots and parcels of land within the District that are associated and benefit from both safety light improvements and local streetlight improvements.

Part B – ESTIMATE OF COST

This part contains an estimate of the annual costs to operate, maintain, and service the District's lighting improvements and facilities. The estimate included herein is also on file at the City of Rancho Cordova.

Part C – ASSESSMENT DISTRICT DIAGRAM

This part incorporates a diagram of the District showing the exterior boundaries of the District, the boundaries of any zones within the District and the lines and dimensions of each lot or parcel of land within the District. Reference is hereby made to the County Assessor's maps for a detailed description of the lines and dimensions of each lot and parcel of land within the District. This diagram has been prepared by the Engineer of Work and is on file at the City of Rancho Cordova.

Part D – METHOD OF APPORTIONMENT OF ASSESSMENTS

This part includes a discussion of benefits the improvements and services provide to properties within the District and the method of apportionment of assessments used to calculate each property's proportional special benefit and annual assessment.

Part E –ASSESSMENT ROLL

This part contains a listing of the proposed assessment amount for each parcel within the District. The proposed assessment amount for each parcel is based on the parcel's proportional special benefit as outlined in the method of apportionment of assessments. The Assessment Roll is also filed in the Office of the City Clerk of the City of Rancho Cordova and is incorporated in this report.

Part A
PLANS AND SPECIFICATIONS

Description of the District

The territory within the District consists of all lots and parcels of land within the boundaries of the City of Rancho Cordova that in Fiscal Year 2011-12, were considered to lie within CSA 1 Zone 2. Within these boundaries, parcels are identified and grouped into one of two designated benefit zones based on the special benefits properties receive from the District improvements, namely "Safety Lights Only" or "Safety Lights and Street Lights". The two zones within the District and the benefits associated with the properties therein are described in more detail in Part D (Method of Apportionment of Assessments) of this Report. In addition, the Assessment District Diagram in Part C of the report provides a visual representation of the District showing the exterior boundaries of the District.

Description of Improvements and Services

The purpose of this District is to ensure the ongoing maintenance, operation, and servicing of street lighting improvements within the District (improvements that had been previously funded through annual assessments from the CSA 1). The improvements may consist of all or a portion of the public street lighting and appurtenant facilities within and adjacent to the District. These improvements may include, but are not limited to the materials, equipment, utilities, labor, appurtenant facilities, and expenses necessary for the ongoing maintenance and operation of public street lighting improvements. The improvements to be maintained and funded entirely or partially through the District assessments are generally described as:

Improvements and Services Authorized by the 1972 Act

As generally defined by the 1972 Act, the improvements and associated assessments for this District may include now or in the future one or more of the following:

- The installation or construction of public lighting facilities including, but not limited to streetlights, safety lights and traffic signals;
- The installation or construction of any facilities which are appurtenant to any of the foregoing, or which are necessary or convenient for the maintenance or servicing thereof;
- The maintenance or servicing, of any of the foregoing including the furnishing of services and materials for the ordinary and usual maintenance, operation, and servicing of any improvement including but not limited to:
 - Repair, removal, or replacement of all or any part of any improvements;
 - Grading, clearing, removal of debris, the installation or construction of curbs, gutters, walls, sidewalks, or paving, or water, irrigation, drainage, or electrical facilities;
 - Electric current or energy, gas, or other illuminating agent for any public lighting facilities or for the lighting or operation of any other improvements;

Incidental expenses associated with the improvements including, but not limited to:

- The costs of the report preparation, including plans, specifications, cost estimates, diagrams, and assessment;
- The costs of printing and advertising, and publishing, posting, and mailing of notices;
- Compensation payable to the County for collection of assessments;
- Compensation of any engineer or attorney employed to render services;
- Any other expenses incidental to the construction, installation, or maintenance and servicing of the improvements;
- Costs associated with any elections held for the approval of new or increased assessments.

Public Lighting Improvements

The District's annual assessments will finance in part the maintenance, operation and servicing of the District's lighting improvements (safety lights and streetlights) which generally includes the furnishing of labor, materials, equipment and electricity for the ordinary and usual maintenance, operation, and servicing of streetlights within the public rights-of-way and easements dedicated to the City, incidental expenses including administrative costs as well as the performance of periodic repairs, replacement and expanded maintenance resulting from damage or vandalism. These services and activities more specifically may include, but are not limited to:

- Payment of the electrical bill for the safety lights and streetlights.
- Maintenance, repair and replacement of light poles and fixtures, including changing light bulbs, painting, photoelectric cell repair or replacement, and repairing damage caused by automobile accidents, vandalism, time, and weather, including principal and interest related to funding of the replacement of the improvements.
- Electrical conduit and pull box repair and replacement due to damage by construction and weather.
- Monitoring of the Underground Service Alert (USA) network, identification of proposed excavation in the vicinity of lighting electrical conduits and marking the location of those underground conduits in the field to prevent damage by excavation.
- Services and maintenance repair and replacement including painting, replacing worn out electrical components and repairing damage due to accidents, vandalism, and weather.
- Remedial projects for major repairs or upgrading of facilities. Construction for such projects is usually performed by contract, however City maintenance workers may execute small projects.

- Streetlight inventory database, pole numbering and mapping to establish the number of streetlights that must be maintained, as well as the condition and location of these streetlights as part of an effective maintenance program.
- Acquisition of land, easements, and rights-of-way necessary to maintain the street and safety lighting system.
- Responding to citizens and Council member inquiries and complaints regarding street lighting. Resolving complaints may require an engineering study and possible project.

For the purpose of determining benefit and the proportional assessment of special benefit, the light fixtures to be maintained by the District are defined as either “Street Lights” or “Safety Lights”. Safety Lights are lights located at intersections on major streets and along the rear of properties that abut major streets. All other lights are designated as Street Lights. The following table provides a summary of the safety light and streetlight inventory within the City upon formation of the District. Detailed maps identifying the location and extent of the District’s Safety Lights and Street Lights at that time are on file in the Public Works Department of the City.

Type of Light	Number of Lights
Safety Lights	428
Street Lights	4,240
Total District Lights	4,668
Decorative Lights ⁽¹⁾	92
Total City Lights	4,760

(1) The 92 decorative lights shown above were contained within a single residential development and these lights are funded by a separate revenue source levied on those parcels. Therefore, these lights are not included as part of the District’s improvements, budget or assessments. Parcels within this residential development are included in the “Safety Light Only” zone.

Part B

ESTIMATE OF COSTS

The maximum assessment revenue shown herein is based on the cost of providing for the District improvements and does not include any other assessments or charges imposed on the properties. The cost estimate within this report identifies the cost to maintain the improvements within each specified zone of the District.

The District maintains two separate reserves, one is utilized for working capital purposes (the "Operating Reserve") and the other for longer-term projects (the "Capital Projects Reserve"). The Operating Reserve provides cash for the ongoing operations and maintenance of the District, as well as providing funding for unanticipated expenditures. The size of the Operating Reserve is limited by Streets and Highways Code Section 22569, which states that an Operating Reserve shall not exceed the estimated costs of maintenance and services from the first day of the fiscal year (July 1) to the date that the City expects to receive the first apportionment of collections from the County. The City has determined that all cost estimates as presented in this report shall be considered as costs to maintain and service the District, or incidental expenses thereof, as to the application of the Streets and Highways Code Section 22569. In addition, the Capital Projects Reserve can be used to finance rehabilitation projects, repairs, or replacement of District improvements.

The cost estimate for the District prepared by the City for Fiscal Year 2024-25 follows on the next page.

City of Rancho Cordova Lighting District No. 2012-1 Fiscal Year 2024-25 Cost Estimate Summary			
	Safety Lights	Street Lights	Total Cost Estimate
DIRECT COSTS			
Electrical Costs	\$ 28,500	\$ 161,500	\$ 190,000
Maintenance Costs	\$ 2,400	\$ 13,600	\$ 16,000
Repairs/Replacements & Capital Expenditures	\$ 20,400	\$ 115,600	\$ 136,000
USA Markings	\$ 5,250	\$ 29,750	\$ 35,000

Ending Operating Reserve Fund Balance 6-30-2025 (est.)³	\$ (26,699)	\$ (263,729)	\$ (555,010)
Capital Project Reserve Fund Balance			
Beginning Capital Project Reserve Fund Balance 7-1-2024 (est.)	\$ -	\$ -	\$ -
Replenishment/Use of Capital Project Reserve	\$ -	\$ -	\$ -
Transfer from/(to) Operating Reserve	\$ -	\$ -	\$ -
Ending Capital Project Reserve Fund Balance 6-30-2025 (est.)	\$ -	\$ -	\$ -

- (1) The General Benefit Contribution was calculated at 25% of the annual Electrical and Maintenance costs associated with Safety Lighting.
- (2) The annual levy may differ slightly from the maximum revenue shown due to rounding because of rounding limitations imposed by the County of Sacramento.
- (3) Negative fund balances represent funds that will need to be contributed or loaned from an appropriate funding source outside the assessment district.

A description of the terms used in the preceding Cost Estimate table are listed on the following pages.

Direct Costs (Maintenance and Operation)

Direct Costs include the regular annual costs of maintaining and servicing lighting improvements. This may include, but is not limited to, the costs for labor, utilities, equipment, and supplies that are required to properly maintain the items that provide a direct benefit to the properties within the District. Specific Direct Costs may include, but are not limited to:

Electrical Costs — Includes the cost of providing electricity to the lights. Additionally, some lights may be maintained by the Sacramento Municipal Utility District (“SMUD”) and the cost for maintenance of these lights is included as part of the utility bill for those lights.

Maintenance Costs — Includes the contract labor associated with the maintenance of the lights and the cost of the preparing and maintaining the light inventory.

Repairs/Replacements & Capital Expenditures — Includes but is not limited to activities needed to support the improvements that are not included or considered to be costs associated with the regular annual maintenance, servicing, and operation of the District improvements. Additionally, this item may include repairs that are only required periodically, repairs and replacements resulting from damage or vandalism, capital improvement expenditures to rehabilitate or upgrade the improvements, and collection of funding (installments) for future capital improvement projects. The amount collected each fiscal year is based on an estimate of current and future needs but may be limited by available funding (assessment revenues and City contributions).

USA Markings – includes costs associated with marking the location of underground utilities related to the above.

RCLD Loan Principal - Amounts of principal due to repay a low interest California Energy Commission (CEC) loan to fund the retrofitting of existing streetlights located within the District with new LED streetlights which will reduce energy costs.

RCLD Loan Interest - Amounts of interest due to repay a low interest California Energy Commission (CEC) loan to fund the retrofitting of existing streetlights located within the District with new LED streetlights which will reduce energy costs.

Special Projects - Includes costs for minor special project(s) related to annual maintenance and or operation of the improvements not described in the above categories.

Special Capital Projects - Includes costs expected to be incurred in any specific fiscal year for special capital projects shown in the District’s Capital Improvement Plan. Costs in this category do not increase the annual levy as the Capital Improvement Reserve is used to fund these costs. For this reason, these costs may not be shown in the annual cost estimate.

Administration Costs

Annual Administration Costs include incidental District costs not included above that are required on an annual basis. Specific Administration Costs may include, but are not limited to:

District Administration - Includes the estimated cost to coordinate District services including responding to property owner inquiries relating to the assessments and services and contracting with professionals to provide administration, legal, and engineering services to the District that are required on an annual basis. This also includes the costs for the City to account for the funds, the calculation of the assessments, preparation of the annual report, and placing the assessment on the property tax bills.

Contract Administration - Estimated costs to coordinate and oversee the applicable maintenance and operation contracts and overall repair, maintenance, operation, and replacements of the District Improvements.

County Collection Fees - Includes the cost that the County charges to place the assessments onto the Sacramento County Secured Tax Roll.

Miscellaneous Administration Expenses - Includes other minor administrative costs such as telephone, copying, noticing, mailing, office supplies and fees related to District Administration.

Total Direct and Administration Costs - This is the total of the Direct and Administration Costs, which are the direct and incidental costs for the regular annual maintenance, servicing, and operation of the District improvements.

Miscellaneous Costs and Collections/(Credits) Applied to Levy

Miscellaneous Cost and Collections/(Credits) Applied to the Levy represent the expected contributions and funding from sources other than the current year assessments to support the annual costs included for the maintenance, servicing, and operation of the District improvements.

Replenishment/(Use) of Operating Reserve - A "Replenishment" increases the levy in order to replenish the Operating Reserve. On the other hand, a "Use" of the Operating Reserve decreases the levy by drawing funds from the Operating Reserve for current year expenditures. If zero, this line item may not be shown in the cost estimate. Further information regarding the function of the Operating Reserve is provided in the following pages of this section.

Contribution/(Use) of Capital Projects Reserve - A "Contribution" increases the levy in order to generate funding for the Capital Projects Reserve. This reserve allows for the accumulation of funds for the possible rehabilitation of projects or replacement in future years. On the other hand, a "Use of" the Capital Projects Reserve provides current year funding of rehabilitation projects or replacement from available funds within the Capital Projects Reserve. If the expenditure of a current year capital project is funded entirely by a collection from the current fiscal year levy and/or a transfer from the Operating Reserve, this line item may show as zero, which is the net of the two amounts. If zero, this line item may not be shown in the cost

estimate. Further information regarding the function of the Capital Projects Reserve is provided in the following pages of this section.

General Benefit Contribution – This amount represents funding from the City or other, utilizing revenue sources other than assessment revenues to pay the proportional costs for the regular annual maintenance, servicing and operation of the District improvements that have been determined to be of General Benefit and which cannot be assessed to property owners. This funding may be from the City's General Fund or any other funding source available.

Other Revenue Contributions - Additional funds designated for use by the District that are not District assessments. Often referred to as a City Contribution, these funds may be from any source available to the City to support the District and reduce the amount to be collected by the District assessments. If the Total Direct and Administration Costs minus any Reserve Fund Transfer and General Benefit Contribution results in an amount greater than the amount that can be collected through the assessments, the City either must reduce expenses or contribute funds to balance the cost estimate.

Balance to Levy - This is the total amount to be levied and collected through assessments for the current fiscal year for each zone. The Balance to Levy represents the sum of the Total District Direct and Administration Costs together with any applicable adjustments associated with Miscellaneous Costs and Collections/(Credits) as described above.

District Statistics and Assessment Rates

Parcels Levied - The total number of parcels within each zone that are expected to be assessed. Non-assessable lots or parcels include government-owned land, public utility-owned property, land principally encumbered by public right-of-way or easements, common areas, and/or parcels within the boundaries of the District that currently do not benefit from the improvements.

Front Footage - The total assessable front footage for non-residential property that are expected to be assessed on a front footage basis for the current fiscal year.

Residential Parcels – The total number of assessable residential parcels subject to the street lighting assessment.

Per Parcel Rate – Safety Lights - The maximum assessment rate that can be assessed to each assessable parcel within the respective zone for the current fiscal year.

Per Parcel Rate – Streetlights (Residential) - The maximum assessment rate that can be assessed to each assessable residential parcel for streetlights for the current fiscal year.

Per Front Foot Rate – Streetlights (Non-Residential) - The maximum assessment rate that can be assessed to each front foot of non-residential property for streetlights for the current fiscal year.

Estimated Maximum Assessment Revenue – The total amount that can be assessed to all parcels within each zone for the current fiscal year based upon the expected number of assessable parcels and front footage using the maximum assessment rates.

Operating Reserve Fund Balance

Beginning Reserve Fund Balance 7-1-2024 (est.) - The anticipated beginning balance of cash and receivables, net of any unpaid prior year obligations. These beginning balances shall be used to fund expenditures from July 1, 2024 to December 31, 2024, as the Operating Reserve is required to compensate for the approximate six-month delay between the start of the District's fiscal year and the receipt of the collections from the County. The Capital Projects Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the report.

Replenishment/(Use) of Operating Reserve – Due to the six-month delay from the District's receipt of assessment collections, the Operating Reserve is intended to fund expenditures from the period of July 1, 2024 (the beginning of the fiscal year) through December 31, 2024. If positive, this amount is added to the levy in order to replenish the Operating Reserve. On the other hand, if negative, this portion of the Operating Reserve is used to fund Fiscal Year 2024-25 expenses and therefore reduces the levy amount. If zero, this line item may not be shown in the cost estimate.

Transfer from/(to) the Capital Project Reserve — The amount of Operating Reserve monies to be transferred to or from the Capital Projects Reserve. Periodically, funds held in a Capital Project Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Capital Project Reserve are subject to transfer to the Operating Reserve, at the discretion of the Public Works Department, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the cost estimate.

Ending Operating Reserve Fund Balance 6-30-2025 (est.) - This amount represents the anticipated Operating Reserve balance/(deficit) as of June 30, 2025. The size of the Operating Reserve is limited by Streets and Highways Code Section 22569 which states that an Operating Reserve shall not exceed the estimated costs of maintenance and service from the first day of the fiscal year (July 1) to the date that the agency expects to receive the first apportionment of collections from the County, which is estimated to be December 31. Therefore, the District may retain an Operating Reserve amounting to the District's first six-months of expenses in order to meet ongoing obligations until the first collections are received from the County. All Capital Project Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the report.

Capital Project Reserve Fund Balance

Beginning Capital Project Reserve Fund Balance 7-1-2024 (est.) — The projected balance of funds in the Capital Project Reserve as of July 1, 2024. Streets and Highways Code Section 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

Use for Fiscal Year 2024-25 Capital Projects – The amount expected to be incurred for Capital Projects in Fiscal Year 2024-25 and funded from the Capital Projects Reserve rather than the Fiscal Year 2024-25 levy. If zero, this line item may not be shown in the cost estimate.

Transfer from/(to) the Operating Reserve — The amount of Capital Project Reserve monies to be transferred to or from the Operating Reserve. Periodically, funds held in a Capital Project Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Capital Project Reserve are subject to transfer into the Operating Reserve, at the discretion of the Public Works Department, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the cost estimate.

Ending Operating Reserve Fund Balance 6-30-2025 (est.) - The projected balance of funds in the Capital Projects Reserve as of June 30, 2025. These funds shall be used to fund the costs of installation, replacement, repair or upgrading of District improvements which cannot be conveniently raised from a single year's assessment.

Should the District have no Capital Projects Reserve or related activity for the current fiscal year, the Capital Projects Reserve information will not be presented in the report.

Capital Projects Reserve - Capital Improvement Plan

Streets and Highways Code Section 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment. The projected fiscal year ending Capital Project Reserve Fund balance will fund the multi-year Capital Improvement Plan, as shown below, in order to fund the installation, replacement, repair or upgrading of District improvements and other allowable costs:

The District expects expenditures for street light numbering replacement: \$5,000 in Fiscal Year 2024-25.

Periodically, funds held in a Capital Projects Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Capital Projects Reserve are subject to transfer into the Operating Reserve, at the discretion of the Public Works Department, in order to provide for the maintenance and operation of the improvements.

Part C

ASSESSMENT DISTRICT DIAGRAM

The parcels to be assessed consist of all lots, parcels and subdivisions of land located within the boundaries of the map designated as "Assessment Diagram of Rancho Cordova Lighting District No. 2012-1." The lines and dimensions of each parcel within the District are those lines and dimensions shown on the maps of the Sacramento County Assessor for the year in which this report was prepared and are incorporated herein and made part of this report.

A reduced copy of the Assessment Diagram is attached on the following page.

City of Rancho Cordova
Lighting District No. 2012-1
Assessment District Diagram

Part D
METHOD OF APPORTIONMENT OF ASSESSMENTS

The 1972 Act permits the establishment of assessment districts by agencies for the purpose of providing certain public improvements, which include but are not limited to the construction, maintenance, operation, and servicing of public street lighting improvements and appurtenant facilities. The 1972 Act further requires that the cost of these improvements be levied according to benefit rather than assessed value:

“The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels in proportion to the estimated benefits to be received by each such lot or parcel from the improvements.”

In conjunction with the provisions of the 1972 Act, the California Constitution Article XIID addresses several key criteria for the levy of assessments, notably:

Article XIID Section 2d defines District as:

“District means an area determined by an agency to contain all parcels which will receive a special benefit from a proposed public improvement or property-related service”.

Article XIID Section 2i defines Special Benefit as:

“Special benefit” means a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute “special benefit.”

Article XIID Section 4a defines proportional special benefit assessments as:

“An agency which proposes to levy an assessment shall identify all parcels which will have a special benefit conferred upon them and upon which an assessment will be imposed. The proportionate special benefit derived by each identified parcel shall be determined in relationship to the entirety of the capital cost of a public improvement, the maintenance and operation expenses of a public improvement, or the cost of the property related service being provided. No assessment shall be imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel.”

The method of apportionment established herein is based on the premise that each assessed property receives special benefits from the maintenance, servicing and operation of either safety lights located throughout the District or both safety lights and local streetlights, and these improvements will be funded in part by such assessments, and the assessment obligation for each parcel reflects that parcel’s proportional special benefits as compared to other properties that receive such special benefits as outlined in the preceding definitions established in the 1972 Act and the California Constitution.

Benefit Analysis

To identify and determine the proportional special benefit to each parcel within the District, as well as any general benefit associated with the improvements, it is necessary to consider the entire scope of the improvements provided as well as the properties that benefit from those improvements. The District's improvements and the associated costs described in this report, have been carefully reviewed and have been identified and allocated based on a benefit rationale and calculations that proportionally allocate the net cost of only those improvements determined to be of special benefit to properties within the District, and is consistent with the method of apportionment previously established for the assessments as part of CSA 1.

While the California Constitution requires that *"The proportionate special benefit derived by each identified parcel shall be determined in relationship to the entirety of the capital cost of a public improvement or the maintenance and operation expenses of a public improvement..."*; it is reasonable to conclude that the reasons for installing local streetlights are often similar, but somewhat different than the reasons for installing safety lights. Therefore, the overall benefits associated with streetlights and safety lights are different, which also suggests that the apportionment of the cost to provide those improvements would be different.

In reviewing the location and extent of the City's Street Light improvements to be funded by District assessments and the relationship these improvements have to properties within the District, it was determined that these lights are entirely local lighting improvements that were installed specifically in connection with the development of nearby properties or were necessary as a precursor to property development and would otherwise not have been necessary or required without the development of the properties near those improvements. As such, these Street Light improvements have a direct and particular relationship to, and provide special benefit to, the properties located in close proximity to those lighting improvements and serve as extension of those properties and developments into the public areas (streets) that serve those properties. These lights clearly provide special benefits that affect these properties in a way that is particular and distinct from its effect on other parcels, and that of real property in general and the public at large do not share. This is most evident in the fact that the District's Street Light improvements are concentrated within the City's various residential developments and developed non-residential areas and the absence of such lights within many portions of the undeveloped areas of the District. The fact that these lights are a direct result of property development and many areas of the City forgo the need of local street lighting, the maintenance and operation costs associated with the Street Light improvements are considered to be solely a special benefit to those properties and developments in close proximity to those lights and have no measurable general benefit to the public at large or to the District as a whole. However, it is also recognized that these lights are not exclusive or typically isolated to a particular parcel but are rather shared and directly affect entire neighborhoods or groups of parcels. In this District, it has been determined that each parcel that is assessed for Street Lights is at least within approximately two-hundred feet (200 feet) of a streetlight although that light may be located across the street from the parcel.

As previously noted, Safety Lights are lights located at intersections on major streets and along the rear of properties that abut major streets. Although the location and extent of these lights are most certainly driven by development of properties in the area (concentrated largely in developed areas of the City), unlike the Street Light improvements which are directly correlated to specific developments and parcels, the District's Safety Lights are not entirely the result of specific property development, but more the result of overall development throughout the City and in addition to directly benefiting the properties in the District, these Safety Lights provide nighttime traffic illumination to enhance traffic circulation and safety.

Therefore, while the need for such lights is most often facilitated by development in the area and certainly a special benefit to properties within the District because safety lights promote nighttime traffic illumination and circulation for the general public as well as for properties in the District, these lights obviously provide some measure of benefit to the community as a whole and to the public at large (general benefit). In order to separate general benefits from special benefits, an evaluation of the overall extent and location of the Safety Light in the City, revealed that less than half (approximately 47%) of the Safety Lights within the District are located on major streets that are considered through-traffic corridors, namely Bradshaw Road, Folsom Boulevard and Sunrise Boulevard. The remaining Safety Lights within the City were located on streets and intersections considered internal City traffic routes that provide direct access to the parcels in the District. Therefore, it would be reasonable to conclude that like the local Street Light improvements, the Safety Light improvements located on these internal City traffic routes (approximately 53% of the Safety Lights at the time of formation of the District) are entirely for the special benefit of the properties they serve, while the Safety Lights on the through-traffic corridors provide comparable (proportionately equal) special benefit to properties in the District and general benefit to real property in general and the public at large. Therefore, collectively, it has been determined that no more than 25% of the total direct costs (maintenance and operation costs) of providing Safety Lights would be considered general benefit.

Zones of Benefit

In order to calculate and identify the proportional special benefit received by each parcel and their proportionate share of the improvement costs it is necessary to consider not only the improvements and services to be provided, but the relationship each parcel has to those improvements as compared to other parcels in the District.

Article XIIID Section 4a reads in part:

"...The proportionate special benefit derived by each identified parcel shall be determined in relationship to the entirety of the capital cost of a public improvement or the maintenance and operation expenses of a public improvement or for the cost of the property related service being provided. No assessment shall be imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel."

In an effort to ensure an appropriate allocation of the estimated annual cost to provide the District improvements based on proportional special benefits, this District has established benefit zones ("Zones") as authorized pursuant to Chapter 1 Article 4, Section 22574 of the 1972 Act:

"The diagram and assessment may classify various areas within an assessment district into different zones where, by reason of variations in the nature, location, and extent of the improvements, the various areas will receive differing degrees of benefit from the improvements. A zone shall consist of all territory which will receive substantially the same degree of benefit from the improvements."

Therefore, in order to separate general benefits from special benefits and to ensure each parcel is assessed for only the special benefits received from the improvements, two benefit zones have been established and every parcel in the City is grouped into one of these two Zones:

- "Safety Lights Only" Zone: Includes all parcels that receive special benefits from the maintenance of Safety Lights only, which includes lights located at intersections on major streets and along the rear of properties that abut major streets.
- "Streetlights and Safety Lights" Zone: Includes all remaining parcels within the City that specially benefit from maintenance of Street Lighting (local lights) as well as Safety Lights.

The District cost estimate incorporated herein under Part B of this report provides a summary of the total estimated cost of providing the streetlight improvements and the allocation of those costs that are considered general benefit. Details regarding the location and extent of the street lighting improvements within the District and the Zones therein upon formation of the District are on file in the Public Works Department of the City. A diagram showing the exterior boundaries of the District and the location of the two zones therein at the time of formation is attached and incorporated herein under Part C of this report.

Assessment Methodology

In order to calculate and identify the proportional special benefit received by each parcel and their proportionate share of the improvement costs, it is necessary to consider not only the improvements and services to be provided, but the relationship each parcel has to those improvements as compared to other parcels in the District.

Safety Lights and Street Lights, like most public improvements, provides varying degrees of benefit (whether they be general or special) based largely on the extent of such improvements, the location of the improvements in relationship to the properties, the specific use of each property, and the reason or need for such improvements as it relates to individual properties. In this District, these issues were each considered in determining the proportional special benefit to each parcel by the use of benefit zones, the separation of general benefit and special benefit, and County land use designations.

Safety Lights

Safety Lights are located throughout the District and properties throughout the City are considered to benefit proportionally from Safety Lights and are therefore levied a flat rate calculated by the following formula.

$$\text{Net Safety Light Cost} / \text{Total Assessable Parcels} = \text{Levy per Parcel}$$

Streetlights

Only properties that benefit from Street Lights are charged for Street Lights. Parcels are classified based on land use into two categories: Residential and Non-Residential. Residential parcels that have streetlights are levied equally. Non-Residential are levied on a front footage basis. Formulas for both Non-Residential and Residential parcels are illustrated below.

Residential Parcels

$$\text{Net Residential Street Light Cost} / \text{Residential Parcels} = \text{Levy per Residential Parcel}$$

Non-Residential Parcels

$$\text{Net Non-Residential Street Light Cost} / \text{Non-Residential Front Footage} = \text{Levy per Non-Residential Front Foot}$$

$$\text{Levy per Non-Residential Front Foot} \times \text{Non-Residential Parcel Front Footage} = \text{Levy per Parcel}$$

In addition, each Fiscal Year, the City provides annexation documents showing the list of parcels that were annexed into the City of Rancho Cordova Community Facilities District No. 2008-1 (the "CFD No. 2008-1") and the City of Rancho Cordova Community Facilities District No. 2014-1 (the "CFD No. 2014-1"). Both CFD No. 2008-1 and CFD No. 2014-1 provide services for street lighting in the City. Parcels that are annexed into CFD No. 2008-1 and CFD No. 2014-1 are not subject to the Street Light Assessment portion for the City of Rancho Cordova Lighting District No. 2012-1 and are only assessed for safety lights.

Exempt

Exempted from the assessment would be the areas of public streets and other roadways (typically not assigned an APN by the County), dedicated public easements, open space areas and rights-of- ways including public greenbelts and parkways. Also exempted from assessment would be utility rights-of-ways, common areas (such as in condominium complexes), landlocked parcels, small parcels vacated by the County, bifurcated lots, and any other property that cannot be developed. These types of parcels do not benefit from the improvements.

The land use classification for each parcel has been determined and based on the Sacramento County Assessor's most recent secured roll.

Rates

The following Tables show the assessment rates proposed to be levied in Fiscal Year 2024-25 and an estimate of the revenue to be assessed. It is important to note that these rates are the same rates applied to the District parcels under CSA 1 and that these rates have not increased since the passage of Proposition 218 in 1996.

Proposed Fiscal Year 2024-25 Assessment Rates	
Improvement Type	Proposed Rates
Safety Lights	\$2.56 per parcel
Street Lights	\$15.32 per parcel
Street Lights (Non-Residential) *	\$0.2519 per front foot

* Non-Residential parcels include commercial and multi-family properties.

Estimated Fiscal Year 2024-25 Assessment Revenues				
Benefit Classifications	Applied Rates	Parcels	Applied Front Footage	Total Estimated Revenue
Safety Light Only	\$2.56 per Parcel	11,544	N/A	\$ 29,552.64
Street and Safety Light (Residential)	\$2.56 + \$15.32 per Parcel	10,352	N/A	\$ 185,093.76
Street and Safety Light (Non-Residential)	\$2.56 per Parcel + 0.2519 per front foot	3,106	550,042	\$ 146,490.66
Totals		25,002	550,042	\$ 361,137.06

(1) The annual levy may differ slightly due to rounding because of rounding limitations imposed by the County of Sacramento.

Part E
ASSESSMENT ROLL

Parcel identification for each lot or parcel within the District is based on the Assessment Diagram presented herein and is based on available parcel maps and property data from the County Assessor's Office at the time the Engineer's Report was prepared. A listing of the proposed lots and parcels to be assessed within this District along with the assessment amounts is provided herein.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate described in this report as approved by the City Council. Therefore, if a single parcel is subdivided to multiple parcels, the assessment amount applied to each of the new parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment.

The following is a list of the parcels and proposed assessment amounts for each of the parcels within the District as determined by the assessment rates and method of apportionment described herein.
