III. INTRODUCTION OF GUESTS

Board President Reid welcomed the City of Rancho Cordova and City of Folsom Councils.

Board President Reid shared a brief historical summary for the purpose of the special joint meeting tonight.

Board President Reid welcomed opening remarks by Mayor Linda Budge, City of Rancho Cordova Council, and Vice Mayor YK Chalamcherla, City of Folsom Council. Mayor Budge and Vice Mayor Chalamcherla, shared opening remarks.

IV. DISCUSSION

a. Process of District Re-Organization and Feasibility Study Report

Dr. Koligian welcomed Brianna García, Vice President and Consultant of School Services of California (SSCAL), to provide information on the process of a district reorganization and feasibility study. She also recognized Sean Martin, Assistant Superintendent of Business Services, for his assistance on this item.

Ms. García shared information on how the reorganization process typically works and provided an opportunity to answer questions. She shared that the feasibility study would take approximately six to eight weeks to complete, after the requested information is received from the District.

Public Comments:
The following parents and community members shared their thoughts on the process of a district re-organization and feasibility study report:
Heidi Moore
Jennifer Lane
Madelaine Sanderson
Ed Short

The City of Rancho Cordova Council Members shared their thoughts and are in general support for a feasibility study.

The City of Folsom Council Members shared their thoughts and are in general support for a feasibility study.

Folsom Cordova USD Board of Education shared their thoughts and are in general support for a feasibility study. Trustees gave direction to staff to bring back as a discussion/action item at the June 15, regular Board meeting.

Any comments submitted in writing using the Google form, are attached to the minutes.

6/8/2023 14:24:01	Amber	Lindsey	Parent	IV. DISCUSSION: a. Process of District Re-Organization and Feasibility Study Report	How would this effect the area of the city of Rancho Cordova in the 95742 Zip code of Anatolia/Sunridge? We are currently being served (but more honestly under served) by the EGUSD that have delayed building secondary schools and busing kids to Ek Grove. Would the city be looking for incorporate this area into the new district or would we continue to stay with EGUSD?

III. INTRODUCTION OF GUESTS

Board President Hooey welcomed the City of Rancho Cordova and City of Folsom Councils.

Board President Hooey shared a brief historical summary for the purpose of the special joint meeting tonight that is a follow-up from the June 8, 2023, Special Joint Meeting, to review and discuss information provided on the Feasibility Study Report and District Re-Organization, no action will be taken at this meeting.

Board President Hooey welcomed opening remarks by Mayor Sander, City of Rancho Cordova Council, and Vice Mayor Aquino, City of Folsom Council. Mayor Sander and Vice Mayor Aquino, shared opening remarks.

IV. DISCUSSION

a. Review of District Re-Organization and Feasibility Study Report

Superintendent Koligian introduced this item and shared it represented a request by the two city councils, City of Folsom, City of Rancho Cordova; and Folsom Cordova USD Board of Trustees, at the June 8, 2023, Special Joint Board Meeting, to move forward with a reorganization feasibility study report. The District hired School Services of California (SSCAL) to complete this study. She introduced Sean Martin, Assistant Superintendent of Business Services, to introduce consultants from SSCAL.

Mr. Martin introduced Brianna García, Vice President; and Matt Phillips, CPA, Director, Management Consulting Services from SSCAL, to present this item. He shared the intent for tonight's meeting was to review the analysis report based on current data of the nine statutory criteria governing reorganizations, required by the California Department of Education (CDE).

Ms. García shared the report is only a feasibility study, hired by the District to do a feasibility study of the potential of splitting the District into two unified school districts. She shared a summary of the steps to begin a formal process of reorganization if chosen. The report presented tonight is information as to the nine criteria that would be reviewed by both the Sacramento County Office of Education (SCOE) and the State Board of Education (SBE) with regard to a potential reorganization.

Ms. García and Mr. Phillips provided a summary of the purpose of the review, the nine statutory criteria and study conclusions of criteria being substantially met or not substantially met; and results of previous studies over the past 23 years.

Nine Statutory Criteria Study's Conclusions that were substantially met or not substantially met:

Substantially Met
1. Adequate Number of Pupils
2. Community Identity
3. Equitable Division of Property and Facilities
5. No Substantial Increase in State Costs
7. No Substantial Increase in School Facilities Costs
8. Increased Property Values

Not Substantially Met
4. Discrimination/Segregation
6. Sound Educational Program
9. Effect on Fiscal Status and Management

Results from Previous Studies:

- March 2000 Study - Study found that criterion 9 was not met
- June 2001 Study - No conclusion reached regarding criterion 9
- November 2002 Findings - SCC found that criteria 4, 5, 6, and 9 were not met
- July 2004 Study - Study found that criteria 4, 6, and 9 were not met

Ms. García, Mr. Phillips, and Mr. Martin, answered Trustee questions.

FCUSD Trustees, City Council Members from the City of Folsom and Rancho Cordova, shared their thoughts on the Reorganization Feasibility Study presented by SSCAL.

Public Comments:
The following parents, employees, and community members shared their thoughts on the reorganization feasibility study presentation:

James Garcia
Joanna Slaughter
David Hatch
Anil Reddy

Any comments submitted in writing using the Google form, are attached to the minutes.

Moving forward with the following suggestions:

- The City of Rancho Cordova to share at an upcoming council meeting to gain community input if there is interest in splitting the district.
- FCUSD staff to meet with neighboring districts who have schools within the City of Rancho Cordova boundaries.

The presentation and report were revised and will be attached to the minutes to include an update on secondary school offerings. The following revisions were made:

- Presentation - page 22 updated to reflect the corrected Teacher Assignment Monitoring rate for Rancho Cordova USD
- Report - list of schools for Rancho Cordova USD was re-sorted in Figures 28 and 29 (pages 40/41) so that the counts matched the appropriate corresponding schools; and the Teacher Assignment Monitoring rates for both Rancho Cordova USD and the Alternative Programs were corrected in Figure 30 (page 43) and the corresponding text just above the figure.

V. ADJOURNMENT

City of Folsom, Vice Mayor Aquino, adjourned the meeting at 10:08 p.m.
City of Rancho Cordova, Mayor Sander, adjourned the meeting at 10:08 p.m.
Folsom Cordova USD, Board President Hooey, adjourned the meeting at 10:08 p.m.

Folsom Cordova
Unified School District

Special Joint Meeting Between FCUSD, City of Rancho Cordova, and City of Folsom (In-Person Only)
04/29/2026 - 05:30 PM
Open Session: 5:30 p.m.
Education Services Center, Boardroom / 1965 Birkmont Dr., Rancho Cordova, CA 95742

Attendance

Attendance taken at 5:41 PM.
Present:
Jennifer Laret, Board President
YK Chalamcherla, Board Vice President
David Reid, Board Clerk
Chris Clark, Board Member
Kara Lofthouse, Board Member

Addie Luong - Advisory Vote, Student Board Member
Absent:
Eveleen Lopez Patraca - Advisory Vote, Student Board Member

City of Rancho Cordova Council, Present:
Garrett Gatewood, Mayor
Linda Budge, Vice Mayor
David M. Sander, PH.D., Council Member
Joe Little, Council Member
Other:
David Kwong, Assistant City Manager
Persephonie Riley, Assistant City Clerk
Adam Lindgren, City Attorney
Absent:
Joe Little, Council Member
Siri Pulipati, Council Member
Attendance Updated:
Joe Little, Council Member, was present at 6:04 PM.

City of Folsom Council, Present:
Justin Raithel, Mayor
Anna Rohrbough, Vice Mayor
Sarah Aquino, Council Member
Barbara Leary, Council Member
Other:
Bryan Whitemyer, City Manager
Absent: Mike Kozlowski, Council Member
Attendance Updated:
Justin Raithel, Mayor, was absent at 6:54 PM.

I. 5:30 PM OPEN SESSION

a. Call to Order

Meeting convened at 5:41 PM. Board President Laret called the meeting to order.

Change of Order:
Item c. Roll Call was facilitated during this time.

Ms. Dagnall took roll for Folsom Cordova Unified USD Board of Education. Student Board Member Eveleen Lopez Patraca, was absent.

Persephonie Riley, Assistant City Clerk, took roll for the City of Rancho Cordova Council. The following council members were absent: Siri Pulipati and Joe Little.

Bryan Whitemyer, City Manager, took roll for the City of Folsom Council. The following council member was absent: Mike Kozlowski.

b. Land Acknowledgement and Pledge of Allegiance

Board Members read the Land Acknowledgement Statement. Board President Laret led the flag salute.

c. Roll Call

Roll Call was taken during the call to order.

II. ADOPTION OF AGENDA

Motion Passed: Approve agenda.

Motion made by: Chris Clark
Motion seconded by: YK Chalamcherla

> ***Voting results:*** Unanimously approved
> Yes: Chris Clark
> Yes: David Reid
> Yes: Jennifer Laret
> Yes: Kara Lofthouse
> Yes: YK Chalamcherla
> Yes: Addie Luong - Advisory Vote

City of Rancho Cordova, Motion Passed: Approve agenda.
Motion by Council Member Sander, second by Mayor Gatewood.
Council Members Siri Pulipati and Joe Little, were absent.
AYES: 3/0

City of Folsom, Motion Passed: Approve agenda.
Motion by Mayor Raithel, second by Vice Mayor Rohrbough.
Council Member Kozlowski, was absent.
AYES: 4/0

III. RECESS/RECEPTION

Open session recessed at 5:45 PM.

Superintendent Swanson acknowledged the Vista del Lago High School Orchestra students, under the direction of Elicia Masztal, for their outstanding performance during the reception. He further recognized Cordova High School's Culinary students and their instructor, Grace Stockert-Saechao, for preparing and catering for this evening's reception, noting their professionalism and hospitality.

IV. 6:00 PM RESUME OPEN SESSION

a. Call Back to Order

Open session reconvened at 6:02 PM. Board President Laret called the meeting to order.

V. DISCUSSION

a. Career Technical Education (CTE) in FCUSD

Superintendent Swanson introduced Shanan Spears, Coordinator of Career Technical Education, to present this item.

Ms. Spears presented *From Classroom to Career, Designing Industry Aligned Pathways for Student Success* covering the following topics:

- Evolution of Vocational Education to CTE

- California's Career Technical Education—Preparing students for the 21st Century and Beyond: Industry Sectors and Key Components of CTE Pathways.
- CTE in FCUSD-Enrollment: 3,765 CTE Students 6th-12th grade; 37% HS and 20% MS students enrolled; 19 CTE Pathways in 11 Industry Sectors.
- CTE Pathway Completers data for 2024-2025: 388 students completed a pathway; 20 students completed two pathways by graduation.
- Expanded and New Potential CTE Pathways: Industrial Arts, Construction/Electrical/HVAC/Welding/Manufacturing, Emergency Medical Response, and AI/Data Science/Computer Sciences.

A request was made to provide all members with a chart outlining FCUSD's CTE programs at each high school. This information will be distributed electronically.

b. Artificial Intelligence (AI) in our Region

Superintendent Swanson introduced JP Morgan, Chief Innovation Officer for Human Machine Collaboration Institute (HMCI), to present this item.

Mr. Morgan presented *Leading Together, FCUSD's AI Exploration and the Regional Pathway It's Building* covering the following topics:

- What FCUSD is Exploring in AI
- From AI Exploration to a K-Career Vision
- Preparing Students for Diverse Career Paths
- What Regional Partnership Makes Possible

c. Early Literacy

Superintendent Swanson introduced Dr. Channa Pitt, Assistant Superintendent of Student Services, to present this item.

Dr. Pitt presented *Folsom Cordova READS, Literacy for All. Literacy for Life* covering the following topics:

- Our Why
- ELA CAASPP: FCUSD x County x State
- ELA CAASPP by Student Group
- ELA CAASPP by Race
- Strong Foundation in Our Schools
- This is Bigger than Schools Alone — Your Role in Folsom Cordova READS
- Current Non-Profit Partners
- Community Readers program — Volunteer Today (short video was shared)

VI. INFORMATION

a. Community Service Days

Superintendent Swanson shared that there was interest from the City of Folsom and City of Rancho Cordova knowing each others Community Service Days to partner the efforts within both cities.

- City of Rancho Cordova: Saturday, May 16, 2026 - Spring Service Day
- City of Folsom: Saturday, September 19, 2026 - Folsom Community Service Day

VII. 7:00 PM ADJOURNMENT

Board President Laret conveyed appreciation to those in attendance at the special joint meeting and acknowledged the thoughtful and robust discussion that took place.

Meeting was adjourned at 7:33 PM.

Jennifer Laret, Board President

David Reid, Board Clerk

MEMORANDUM

ITEM 9.3.

DATE: May 18, 2026

TO: Honorable Mayor and Council Members

FROM: Lindsay Morrow, Senior Environmental Planner

SUBJECT: **SECOND READING OF AN ORDINANCE AMENDING THE SUNCREEK SPECIFIC PLAN FOR THE STEELRIDGE PROJECT**

RECOMMENDATION

Waive the second reading and adopt the Ordinance.

RESULT OF RECOMMENDED ACTION

Adoption of the Ordinance would amend the Suncreek Specific Plan to reflect the revised land use designations (LDR and CMDR to MDR) in the Steelridge project area. This includes updated maps throughout to reflect the revised land use designations, revisions to Tables 3-3 and 3-4 to update the acreage, density per acre, and other statistics for each land use category, and modifications to Section 7.2.1 and 7.2.3, and Tables 7-1 and 7-2 to update revised population density estimates and park dedication requirements.

BACKGROUND

On May 4, 2026, the City Council waived the first reading and introduced the Ordinance.

FISCAL IMPACT AND FUNDING SOURCE

There is no fiscal impact.

ATTACHMENT(S)

1. Ordinance
2. Exhibit A to the Ordinance

CITY OF RANCHO CORDOVA

ORDINANCE NO. XX-2026

AN ORDINANCE OF THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA, STATE OF CALIFORNIA, AMENDING THE SUNCREEK SPECIFIC PLAN PROJECT NO. PLND-0625-0132

WHEREAS, the Steelridge property located within the Suncreek Specific Plan is owned by Michael Gregory Trevor 2003 Irrevocable Trust; Amy Irene Trevor 2003 Irrevocable Trust; James Henry Trevor 2003 Irrevocable Trust; William Randolph Trevor 2003 Irrevocable Trust; Shannon K. Gilmartin 2003 Irrevocable Trust; Heather C. Gilmartin 2003 Irrevocable Trust; Robert A. Gilmartin shall be known as ("Applicant"); and

WHEREAS, the Applicant has requested amendments to the Steelridge area (previously Trevor Gilmartin) within the Suncreek Specific Plan; and

WHEREAS, the proposed amendments within the Steelridge area include: re-arranging land uses within the project area and revising the lot sizes and density which therefore resulted in updated maps and tables throughout the Specific Plan; and

WHEREAS, the amendments to the Steelridge area within the Suncreek Specific Plan adopted by this Ordinance (attached hereto as Exhibit A), comply with the requirements of California Government Code sections 65451 and 65454 and its adoption complies with Government Code section 65453; and

WHEREAS, the City Council held a properly noticed public hearing at which it received a report from city staff regarding the amendments to the Suncreek Specific Plan Amendment and oral and written testimony from the public, and deliberated on the item; and

WHEREAS, the public hearing was noticed in accordance with the requirements set forth in Government Code section 65090 and 65091.

NOW, THEREFORE, BE IT HEREBY RESOLVED THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA DOES ORDAIN AS FOLLOWS:

1. CEQA Analysis

    A. CEQA Finding & Evidence

    Finding: The project has been analyzed and is exempt per California Environmental Quality Act Guidelines Section 15183 "Projects Consistent with a Community Plan, General Plan, or Zoning"

    Evidence: The Suncreek Specific Plan Environmental Impact Report/Environmental Impact Statement (EIR/EIS) SCH# 2006072067 was approved on November 18, 2013. The EIR identified project impacts and mitigation measures for impacts found to be significant, and includes project alternatives, identification of significant irreversible environmental changes, growth-inducing impacts, and cumulative

impacts. A Mitigation Monitoring and Reporting Program (MMRP) was adopted as part of the EIR. The Steelridge project area was analyzed in the EIR as part of the overall Suncreek Specific Plan. The project area is the same as that analyzed in the EIR and the proposed tentative subdivision map does not exceed the development intensities analyzed in the EIR. Therefore, impacts related to footprint and development intensity would be the same as those disclosed in the EIR. The proposed project would be subject to applicable mitigation measures in the adopted MMRP. There is no new information of substantial importance that was not known at the time of the previous EIR that would require changes to the previous EIR. There are no changes to the project or circumstances under which the project would be undertaken that would require major revisions to the previous EIR. For these reasons, no further environmental analysis is required.

2. Entitlement Analysis

A. Specific Plan Amendment Findings & Evidence

Finding: The proposed Specific Plan Amendment is consistent with the goals, policies, and objectives of the General Plan, development agreement, or other implementation instrument.

Evidence: The proposed amendment to the Suncreek Specific Plan would rearrange land uses in the Steelridge portion of the plan area, by replacing Compact Mixed Density Residential (CMDR) and some Low Density Residential (LDR) land use designations with the Medium Density Residential (MDR) land use designation to reflect current housing market conditions. In addition, a correction is being made to reduce the community park by 0.4 acre and adding 0.4 acre to the Elementary School site, to accurately reflect the Quimby Parkland in-lieu fees for the community park. The amendment would result in updated maps throughout the plan to reflect the re-arrangement of land use designations in the Steelridge portion of the plan area, modifications to Tables 3-3 and 3-4 of the Specific Plan to update the acreage and density per acre for each land use category, and modifications to Sections 7.2.1, 7.2.3, and Tables 7-1 and 7-2 to update revised population estimates and required Quimby Park requirements. The Specific Plan Amendment does not result in any substantial changes to previously approved roadways, trails, open space, or signage concepts. The rearrangement of residential land uses in the southern portion of the Steelridge area is consistent with the General Plan’s housing goals, ensuring a range of housing options that contribute to housing supply and affordability. The total number of proposed dwelling units is consistent with the previously approved (2022) map, and would remain the same (810 single family units, and 950 total dwelling units) within the Steelridge property.

Finding: The proposed Specific Plan Amendment will not adversely affect surrounding properties.

Evidence: The Specific Plan Amendment will not adversely affect surrounding properties. The land uses being revised are within the Steelridge portion of the Suncreek Specific Plan area, and would not affect the other Suncreek properties. The land uses being revised would still be residential, and the total number of units would remain the same (950). The lots would be designated and zoned for MDR

instead of CMDR and LDR. The overall land use pattern, circulation and access, and other land use categories in the Steelridge portion of the plan area would remain the same.

3. Amendments to the Suncreek Specific Plan

   Amendments to the Steelridge area within the Suncreek Specific Plan are hereby adopted as shown in Exhibit A, attached hereto and incorporated herein.

4. Severability

   If any provision of this Ordinance, or the application thereof to any person or circumstance, is held invalid, the remainder of the Ordinance, including the application of such part or provision to other persons or circumstances, shall not be affected thereby and shall continue in full force and effect. To this end, provisions of this Ordinance are severable. The City Council hereby declares that it would have passed each section, subsection, subdivision, paragraph, sentence, clause or phrase hereof irrespective of the fact that any one or more sections, subsections, subdivisions, paragraphs, sentences, clauses, or phrases be held unconstitutional, invalid or unenforceable.

5. Effective Date

   Within fifteen (15) days after adoption, a Summary of this Ordinance shall be published once in the Grapevine Independent, or the Sacramento Bee, a newspaper of general circulation printed and published in Sacramento County and circulated in the City of Rancho Cordova, in accordance with Government Code section 36933. This Ordinance shall take effect and be enforced thirty (30) days after its adoption.

PASSED AND ADOPTED by the City Council of the City of Rancho Cordova on the 18th day of May 2026 by the following vote:

AYES:

NOES:

ABSENT:

ABSTAIN:

_____
Garrett Gatewood, Mayor

Figure 5-1 SunCreek Core Open Space

Figure 5-2, Community Design Features

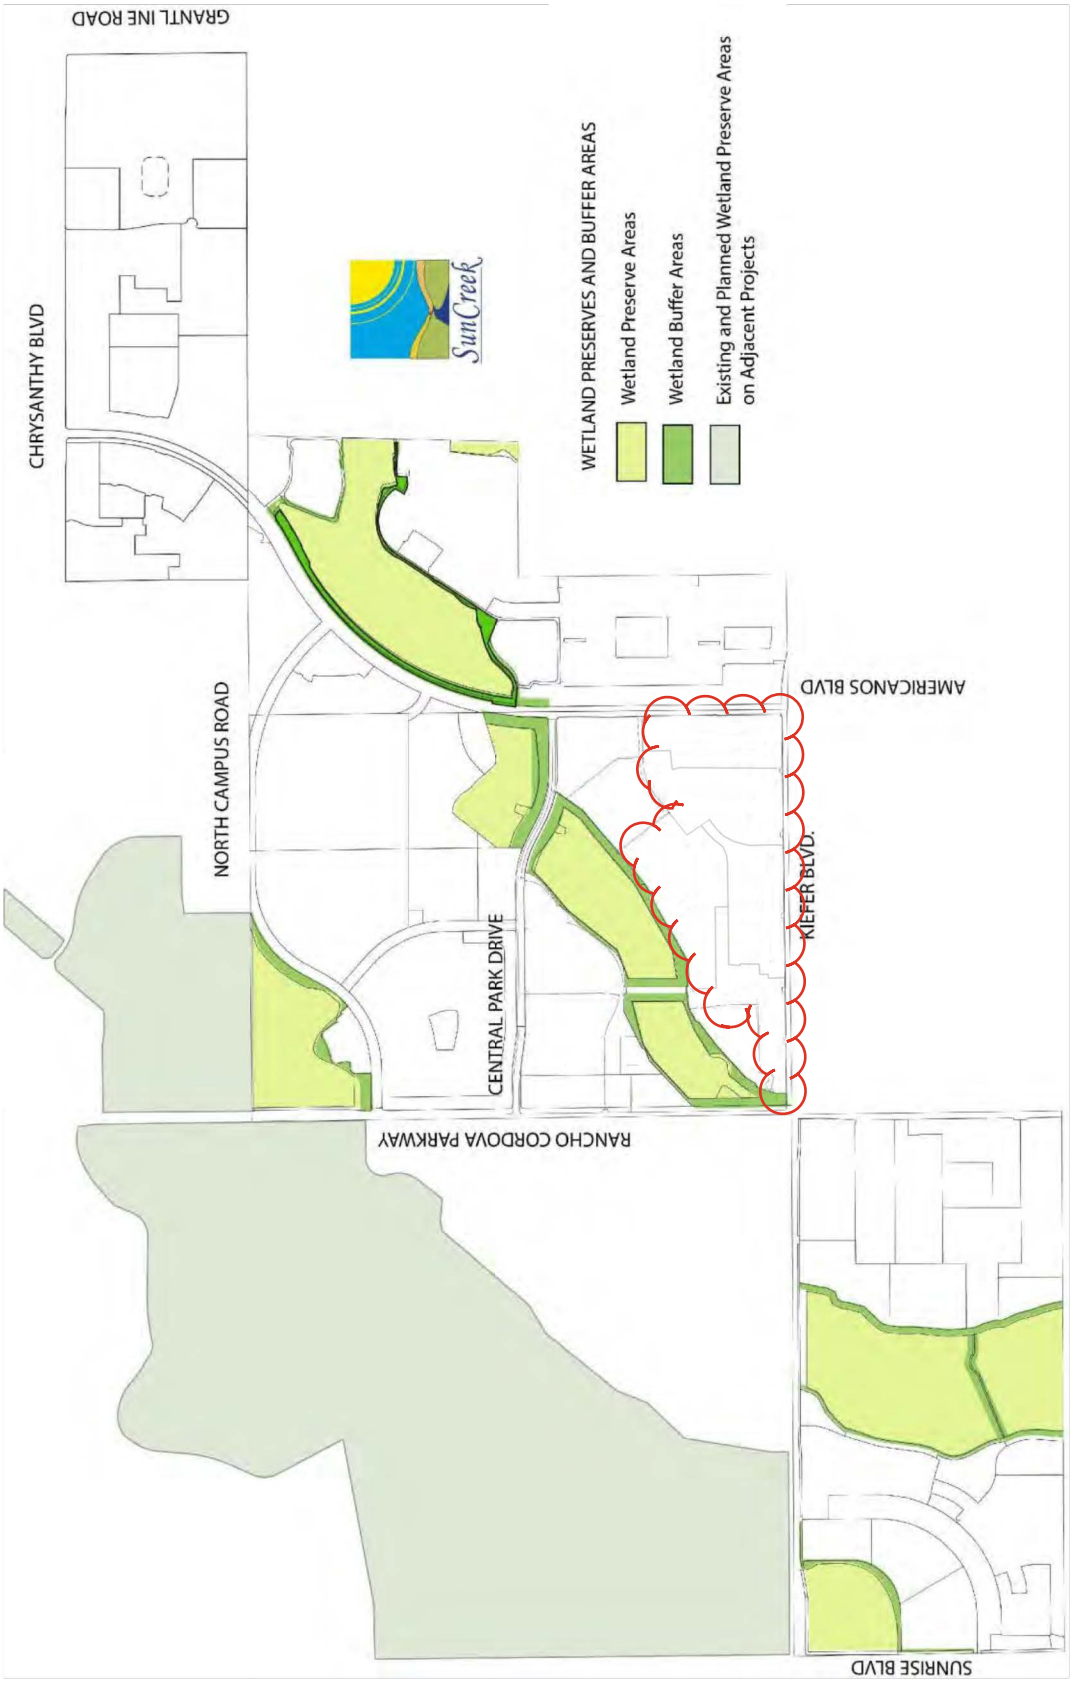

Figure 6-1 Location of Proposed Natural Resource Preservation Areas

Figure 7-1 Park Facilities within the Plan Area

7.2.1. Park Area Requirement

The City of Rancho Cordova requires five acres of parks per 1,000 residents comprised of Community Parks and Neighborhood Parks (the "Quimby" park area requirement), and one acre of Community Places per 1,000 residents. Historically, CRPD has been the recipient of dedicated Quimby parkland. The Green Infrastructure add significantly to the open space experience but are not included in the calculation of the land contributing the park area required to serve the residents of the Plan Area.

In this SCSP, the City, CRPD and the developers have implemented the standards in a manner that meets the requirements, goals, and objectives of the General Plan policies, the CRPD requirements, and City ordinances.

Table 7-1 details the park dedication requirements that shall govern the SCSP based on the estimated population in each designated residential type. Table 7-1 indicates that the total population in the SunCreek plan will be approximately ~~11,874~~ ~~11,665~~ ~~11,606~~ 11,716 residents.

This population would require a total of ~~71.2~~ ~~70.1~~ 70.3 ~~69.7~~ acres of park and Neighborhood Greens, of which ~~59.4~~ ~~58.4~~ ~~58.1~~ 58.6 acres would be in Community and Neighborhood Park and ~~11.8~~ ~~11.7~~ 11.7 ~~11.6~~ acres would be in Community Places/Neighborhood Greens.

As shown in Table 7-2 the SunCreek Plan provides ~~65.3~~ ~~60.0~~ 60.8 acres of Quimby parkland, and ~~9.5~~~~13.5~~ 10.5 acres of Community Places/Neighborhood Greens that together provide ~~74.8~~ ~~73.5~~ 71.3 acres.

Developers may provide additional Community Places/ Neighborhood Greens in the preparation of Tentative Subdivision Maps. Should the park or community area acreages provided prove to be less than the area required by Quimby standards and open space guidelines the shortfall shall be paid through in-lieu fees.

In addition, the SCSP includes 6.1 acres of Park Corridors, as well as ~~52.0~~ ~~51.6~~ 53.5 53.7 acres of preserve buffer lands, ~~49.6~~ acres of detention basin areas that will be naturalized to appear as open space amenities, and 199.6 acres of wetland preserve areas that will provide visual open space. The preserve buffer lands provide opportunities for trails and small play areas. Parks counted toward

Table 7-1 Population Estimate and Quimby Park and Neighborhood Green Area Dedication Requirement

the "Quimby" park area requirement are each a minimum of 2.2 acres in size.

permanent water quality control basins. These basins are not counted in the required park area.

Table 7-2 Summary of All SunCreek Quimby Park and Neighborhood Greens Provided

Type	Required Ratio Acres		Required Acres	Acres Provided
Quimby Park Area (Community and Neighborhood Parks)	5.0	per 1000	~~59.4~~ ~~58.4~~ 58.6 ~~58.1~~	~~65.3~~~~60.0~~ 60.8
Community Places/Neighborhood Greens	1.0	per 1000	~~11.8~~ ~~11.7~~ 11.7 ~~11.6~~	~~9.2~~ ~~13.5~~ 10.5
Mandatory Parks and Neighborhood Green Total			~~71.2~~ ~~70.1~~ 70.3 ~~69.7~~	~~74.5~~ ~~73.5~~ 71.3
Green Infrastructure /Non-Mandatory Park Corridors				**6.1**

The total area identified as Community Park or Neighborhood Park in Figure 7-1 is ~~65.3~~ ~~60.0~~ 60.8 acres. All of this area will be improved park with turf, tree canopy, and other park amenities to be determined.

The CRPD may consider crediting private recreation facilities less than full portion of the Park Area credit.

An updated Park Land Equalization Table will be included with the Finance Implementation Plan.

Quimby park land should be unencumbered and programmable. Landscape/trail corridors along public roadways should be located in separate parcels that are not included with the park land.

When roadways or utility easements need to bisect Quimby Parkland, the location shall be coordinated with Cordova Recreation and Park District.

7.2.2. Storm Water Management Adjacent to Parks

Parks in the SunCreek Plan Area do not include storm-water detention basins. However, two areas adjacent to the Community Park will include

The areas required for storm water management will include permanently wet basins and are therefore included in the Detention Basin calculation. However, the design of the Community Park may integrate these basins as naturalized amenities that augment the recreation and aesthetic features of the park.

7.2.3. Community Park, Open Space and Public Facilities Complex

The centerpiece of the SunCreek Plan is the Community Park located in the center of the Plan area contiguous to the high school and middle school. The Community Park consists of two large parcels separated by Central Park Drive, wetland preservation, drainage basins, and water system improvements, The complex of parks, the adjacent schools, the wetland preserve areas, and directly accessible contiguous open space provide a magnificent open space and recreation feature encompassing over 320 acres in the heart of the SunCreek Plan Area.

Section 5.7 describes this complex as the "Great Park" concept, the signature element of the SCSP. This area is a visual landmark that distinguishes this community, but also provides the hub of an extensive trail network linked to all parts of the Plan Area. Figure 7-2 provides a view of the entire

complex of Community Park and open space included in the "Great Park" concept.

The Community Park encompasses 27.8 acres of active area on the north side of Central Park Drive adjacent to the High School/Middle School campus, and ~~15.7~~ 10.0 ~~11.1~~ acres of active area adjacent to the elementary school to the south of Central Park Drive.

The community park will provide space for ball fields, restrooms, and parking areas. These will be suitable for recreation leagues for soccer, softball, and similar active recreation facilities. Lighted ball fields may be suitable in these parks depending on the design of the facility. Community parks also include such amenities as playgrounds, large community picnic areas, skate parks, splash/spray parks, amphitheaters, etc. The adjacent high school/middle school facility provides an excellent opportunity for joint facilities such as parking, sports fields, and other recreation facilities.

If the 27.8-acre North Community Park cannot accommodate the required park facilities, Sun Creek Specific Plan shall be amended to reconfigure the community park to accommodate the required park facilities.

Access roads to the two public/quasi-public parcels south of the 27.8-acre Community Park shall be located outside the park property.

The Village Commercial Center at the intersection of Central Park Drive and Rancho Cordova Parkway is a gateway to this Great Park. The center provides gathering places, food services, and other community-oriented businesses that enhance the experience of the Great Park.

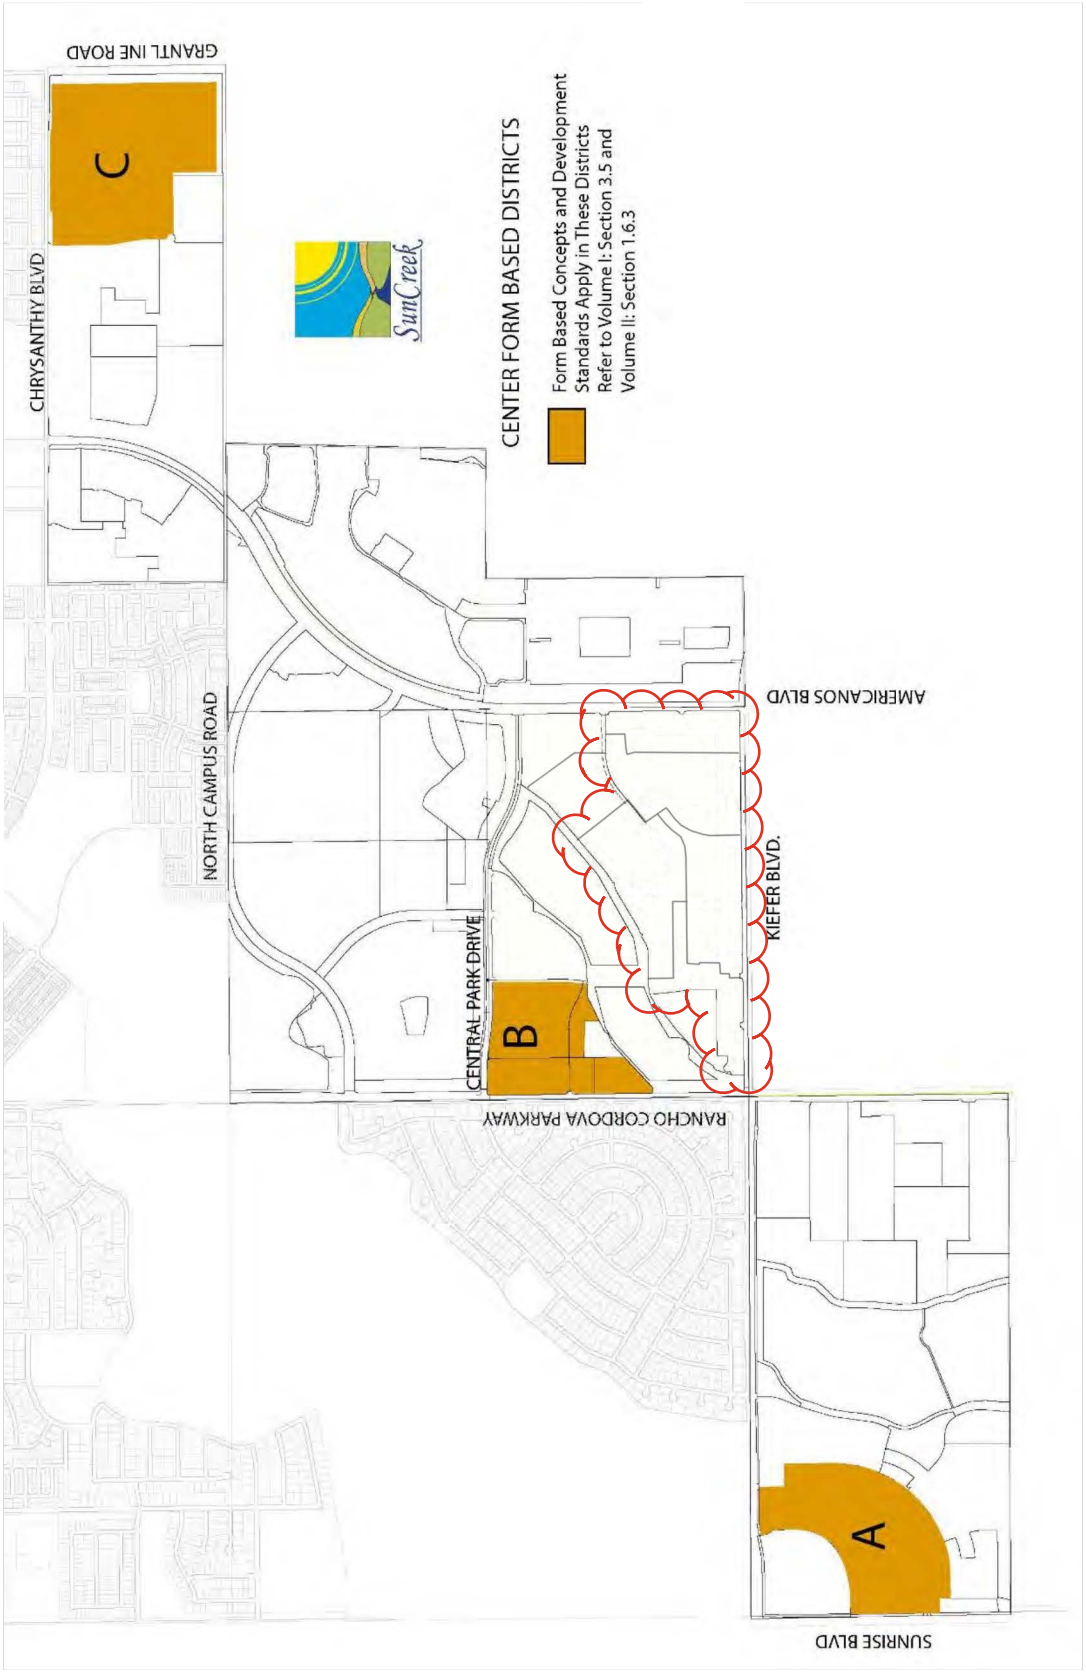

Figure II.1-4 Center Form Based Districts

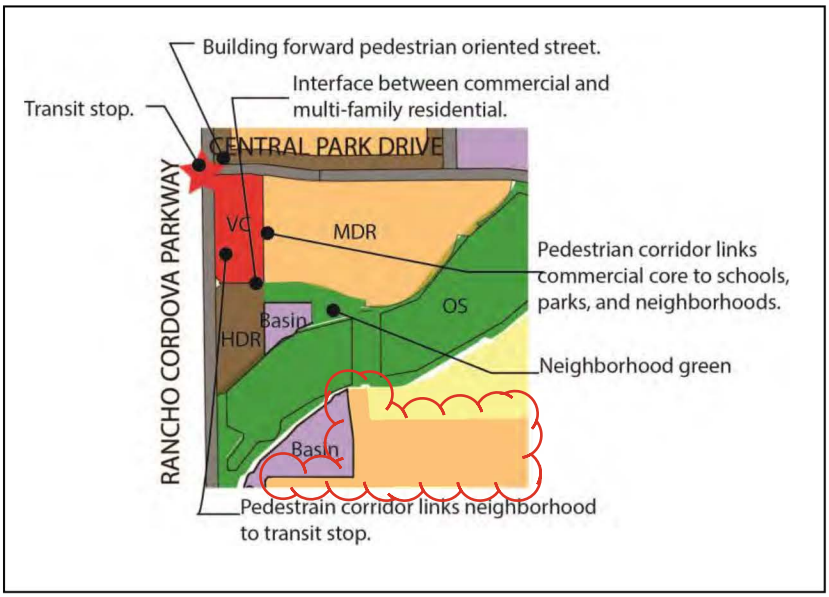

Center District B

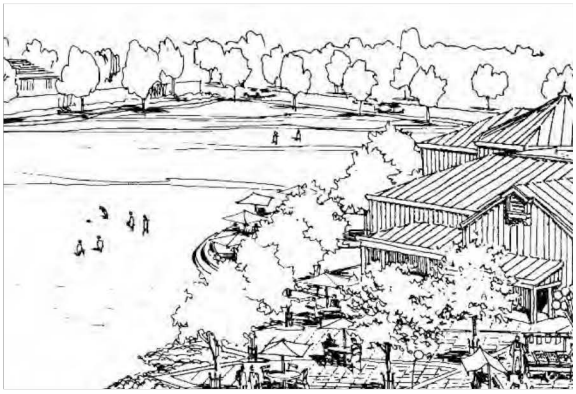

Center District B is located along Rancho Cordova Parkway and Central Park Drive. The location provides access to future public transit and a pedestrian link to the Community Park and high school/middle school complex that comprise the core of the SunCreek community.

District B includes a mix of Village Center (VC), High Density Residential (HDR), Compact Medium Density Residential (CMDR), and Public/Quasi-public (P/QP) uses. Appropriate uses would include a small grocery, shops and offices, entertainment and dining.

These uses are integrated in a uniquely pedestrian friendly mix focused on a small neighborhood park. The commercial use overlooks the park and is an extension of the food, entertainment, and retail activity. Refer to Section 1.6.7 "Standards for Public Pedestrian-Oriented Spaces" in this chapter for a description and standard addressing this condition. A passage through this park will connect the commercial area to the surrounding neighborhoods and provides a direct link to the primary SunCreek bike trail along the open space corridor.

Figure II.1-7 Center District B Notation

Example of Commercial Space Overlooking Park or Open Space

Central Park Drive provides a special pedestrian-oriented link along a tree-lined corridor fronted by high-density residential and commercial uses. Central Park Drive is a primary pedestrian spine that transects the Core Open Space illustrated in Volume I, Figure 5-1. It links the community park, high school/middle school campus and the neighborhoods to the east to the transit hub at Rancho Cordova Parkway.

The commercial uses of this District will present attractive architecture toward Rancho Cordova Parkway and pedestrian pathways will extend from the sidewalk/frontage of Rancho Cordova Parkway into the adjoining commercial uses. View corridors between buildings will provide further visual connections between passing vehicles and businesses within this commercial center.

MEMORANDUM

ITEM 9.4.

DATE: May 18, 2026

TO: Honorable Mayor and Council Members

FROM: Albert Stricker, Public Works Director
Edgar Medina, Assistant Public Works Director

SUBJECT: **RESOLUTIONS INITIATING PROCEEDINGS FOR THE ANNUAL LEVY AND COLLECTION OF ASSESSMENTS FOR THE LANDSCAPE AND LIGHTING DISTRICT NO. 2005-1 FOR FISCAL YEAR 2026-2027**

RECOMMENDATION

Adopt the Resolution initiating proceedings for the Annual Levy and Collection of Assessments for the Landscaping and Lighting District 2005-1 for Fiscal Year 2026-2027; and adopt the Resolution preliminarily approving the Engineer's Annual Levy Report and declaring its intention to levy and collect annual assessments for the Landscaping and Lighting District No. 2005-1 for Fiscal Year 2026-2027.

RESULT OF RECOMMENDED ACTION

The recommended actions are required as part of the process to continue the annual levy and collection of assessments in the District. The assessments fund landscape maintenance in the District. No assessments shall increase as a result of this action.

BACKGROUND

The Landscaping and Lighting District No. 2005-1 (LLD 2005-1) was formed in June 2005 by the City Council to continue a financial mechanism to provide landscape maintenance services previously funded since 1994 in Zone 4 and Zone 5 of the Sacramento County Landscape Maintenance District (SLMD). The maximum assessment rates authorized under LLD 2005-1 are equal to the maximum rates previously authorized in Zones 4 and 5 of the county's District.

State law requires the City Council direct an Engineer's Report to be prepared each year and to hold a public hearing on the report and the levy of the annual assessment. The Resolution initiating proceedings, Attachment 1, directs Francisco & Associates, Inc. to prepare and file the Engineer's Report.

In anticipation of this Resolution, the Engineer's Report has been prepared and is on file with the City Clerk. The Engineer's Report, Exhibit A to the Resolution preliminarily approving the report and declaring the intention to levy and collect assessments, Attachment 3, includes a diagram of the assessment area, a description of the maintenance services to be provided, a description of the property to be benefited, and the amount of the assessment to each individual

property. The services performed within and funded by LLD 2005-1 include ongoing maintenance, operation, and servicing of landscaping within the right-of-ways and other public areas within the District at the locations described in the Engineer's Report.

The proposed Fiscal Year 2026-2027 assessment rates do not exceed the rates previously levied by the county since 1994 and are equal to the rates levied by the city in Fiscal Year 2025-2026. The boundaries of each Zone are shown in the district diagram in Part IV of the Engineer's Report and the details for each Zone are listed below:

- **Zone 1** of the District is comprised of ninety-six (96) residential parcels in the Ellenwood subdivision. These parcels are assessed on per Parcel basis at the maximum rate of $42.50 per parcel.

- **Zone 2** of the District is comprised of one hundred fifty-four (154) residential parcels known as California Jazz Unit No. 1 and Unit No. 2. These parcels are assessed on an acreage basis at the maximum rate of $30.48 per acre for the median landscape and parkway landscape improvements associated with these parcels.

- **Zone 3** of the District is comprised of eighteen (18) parcels along Zinfandel Drive between Data Drive and south of International Drive. These parcels were assessed on an acreage basis at the pre-existing rate of $30.48 per acre for the median landscaping and $1,382.76 per acre for the landscaping along the parkways of Zinfandel Drive, totaling $1,413.24 per acre.

- **Zone 4** is comprised of fifty-one (51) parcels, including a portion of Capital Village, generally bounded by White Rock Road to the west, White Rock Road and Disk Drive to the north, fronting Kilgore Drive to the East, and fronting International Drive to the south. These parcels are assessed at the maximum rate of $30.48 per gross acre.

- **Zone 4A** is comprised of a portion of Zone 4. Properties within Zone 4A were redesignated as Zone 4A commencing with the Fiscal Year 2007/08 to account for the Zone 4A parcels lying within a portion of CFD 2005-2, while the remaining Zone 4 parcels are outside of the CFD 2005-2 boundaries. Since the CFD 2005-2 Zone 1, special taxes are to be levied upon Zone 4A parcels, these special taxes are contributed in part to the District for the benefit of Zone 4A. Zone 1 of the CFD provides funding for landscape improvements within and adjacent to the development, including the median landscaping identified herein. Although the CFD may fund median landscaping, the special taxes levied within Capital Village may not provide sufficient funds to maintain both the landscape improvements within the Capital Village development and the median landscape improvements within the District that specially benefit the parcels within Zone 4A. Therefore, Zone 4A is comprised of seven hundred eighty-three (783) assessable properties, each of which were assessed $30.48 per gross acre until such time that the CFD generates sufficient revenue to fund the median landscape improvements. Any funds generated by the CFD that will be used to finance the median landscape improvements that benefit Zone 4A shall be transferred by the CFD to the District as a contribution to Zone 4A.

The Fiscal Year 2026-2027 total assessment is estimated at $89,062. The District has an established Operating Reserve which provides funding for the operations and maintenance of the District, as well as providing financing for emergency expenditures. A second reserve fund finances special projects such as a central irrigation system, revegetation projects, and other rehabilitation projects or replacements of District improvements.

In July 2006, the county transferred funds previously collected in the county's Zone 4 and 5 to the city, which was deposited to the LLD 2005-1. The city had previously deemed that these transferred funds are to be used exclusively by the District and shall be considered as undesignated reserves within the Zones of the District. Funds from the undesignated reserve can be used to fund costs of any zone(s) that are unable to be funded by the annual assessments.

In order to proceed with the levy of assessments after consideration and approval of the Engineer's Report, it is appropriate for the Council to adopt the Resolution, Attachment 2, which declares the Council's intention to levy assessments for Fiscal Year 2026-2027. It also sets Monday, June 1, 2026 at 5:30 p.m. or as soon thereafter as possible, as the date and time for a public hearing on the issue of the levy of Fiscal Year 2026-2027 assessments. Notice of the public hearing will be given by publication.

FISCAL IMPACT AND FUNDING SOURCE

Approval of this item does not impact the General Fund. Funds collected by this District pay for the maintenance and services of landscaping, lighting and all appurtenant facilities.

CITY OF RANCHO CORDOVA

RESOLUTION NO. XX-2026

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA, STATE OF CALIFORNIA, INITIATING PROCEEDINGS FOR THE ANNUAL LEVY AND COLLECTION OF ASSESSMENTS FOR THE LANDSCAPING AND LIGHTING DISTRICT NO. 2005-1 FOR FISCAL YEAR 2026-2027

WHEREAS, the City Council has, by previous Resolutions, formed the Landscaping and Lighting District No. 2005-1 (hereafter referred to as the "District"), pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereinafter referred to as the "Act"), that provides for levy and collection of assessments through the County of Sacramento for the City of Rancho Cordova to pay the maintenance and services of landscaping, lighting and all appurtenant facilities and operations related thereto; and

WHEREAS, the City Council has retained Francisco & Associates, Inc. as the Engineer of Work, for the purpose of assisting with the annual levy of the District, and to prepare and file an Engineer's Report with the City Clerk in accordance with *Chapter 3, Section 22623* of the Act.

NOW, THEREFORE, BE IT HEREBY RESOLVED BY THE CITY COUNCIL OF RANCHO CORDOVA as follows:

1. The above recitals are true and correct.

2. The City Council hereby orders Francisco & Associates, Inc. to prepare the Engineer's Report (hereinafter referred to as the "Report" or "Engineer's Report") concerning the levy of assessments for the District in accordance with *Chapter 1, Article 4 (commencing with Section 22565), pursuant to Chapter 3, Section 22622* of the Act.

3. The improvements within the District include: turf, ground cover, shrubs and plants, trees, irrigation and drainage systems, ornamental lighting, masonry walls or other fencing, hardscape improvements, monuments, and associated appurtenant facilities located within the landscape easements or public right-of-ways. The Report so ordered, shall describe the existing improvements and any new improvements or substantial changes in the existing improvements.

PASSED AND ADOPTED by the City Council of the City of Rancho Cordova on the 18th day of May 2026 by the following vote:

CITY OF RANCHO CORDOVA

RESOLUTION NO. XX-2026

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA, STATE OF CALIFORNIA, PRELIMINARILY APPROVING THE ENGINEER'S REPORT, AND DECLARING ITS INTENTION TO LEVY AND COLLECT ANNUAL ASSESSMENTS FOR THE LANDSCAPING AND LIGHTING DISTRICT NO. 2005-1 FOR FISCAL YEAR 2026-2027

WHEREAS, the City Council pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereafter referred to as the "Act") and by previous Resolution, initiated proceedings for the "Landscaping and Lighting District No. 2005-1" (hereafter referred to as the "District") for the annual levy and collection of assessments to pay for the operation, maintenance and servicing of landscaping, lighting and all appurtenant facilities related thereto; and

WHEREAS, the City Council has, by previous Resolution ordered the preparation of an Engineer's Report (hereafter referred to as the "Report" or "Engineer's Report") regarding the District and assessment for Fiscal Year 2026-2027, pursuant to *Chapter 3, Section 22622* of the Act; and

WHEREAS, the Engineer selected by the City Council has prepared and filed with the City Clerk said Report (Exhibit A) in connection with the District and the levy of assessments for Fiscal Year 2026-2027 (Beginning July 1, 2026 and ending June 30, 2027) in accordance with *Chapter 1, Article 4* of the Act; and

WHEREAS, this City Council has carefully examined and reviewed the Report as presented and pursuant to the provisions of *Chapter 2, Article 1, Section 22586* of said Act, the City Council may approve the report, as filed, or it may modify the report in any particular and approve it as modified.

NOW, THEREFORE, BE IT HEREBY RESOLVED BY THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA as follows:

1. The above recitals are true and correct.

2. The Report as presented, consists of the following:
    a. A Description of Improvements.
    b. A Description of the District.
    c. The proposed Annual Budget for the fiscal year (costs and expenses).
    d. The Method of Apportionment that details the method of calculating each parcel's proportional special benefits and annual assessment.
    e. The District's boundaries.
    f. The Assessment Roll containing the Levy for each Assessor Parcel Number within the District proposed for Fiscal Year 2026-2027.

3. The District, the proposed improvements, each and all of the budget items and documents, and the proposed assessments as outlined in the Report have been spread in accordance with the benefits received from the improvements, operation, maintenance and services to be performed within the District, and are in compliance with the Act and the provisions of California Constitution Article XIIID.

4. The Report is hereby approved on a preliminary basis, as presented or modified, and ordered to be filed in the Office of the City Clerk as a permanent record and to remain open to public inspection.

5. The City Clerk is hereby directed to enter on the minutes of the City Council any and all modifications to the Report determined and approved by the City Council, and all such changes and/or modifications by reference are incorporated into the Engineer's Report (Exhibit A).

6. The City Council hereby declares its intention to seek the Annual Levy of the District pursuant to the Act, over and including the land within the District boundary, and to levy and collect assessments on all such land to pay the costs associated with the operation, maintenance and servicing of the landscaping and lighting improvements related thereto, for Fiscal Year 2026-2027.

7. The improvements within the District include: the maintenance and operation of and the furnishing of services and materials for: turf, ground cover, shrubs and plants, trees, irrigation and drainage systems, ornamental lighting, masonry walls or other fencing, hardscape improvements, monuments, and associated appurtenant facilities located within the landscape easements or public right-of-ways. The Report as previously approved and on file with the City Clerk, provides a full and complete description of all improvements and any or all substantial changes to the improvements within the District.

8. The boundaries of the District are described in the Engineer's Report on file with the City Clerk.

9. The proposed assessments for Fiscal Year 2026-2027 do not exceed the maximum assessment approved through the property owner protest proceedings at the time of formation.

10. The City Council hereby declares its intention to conduct a public hearing concerning the levy of assessments for the District. The City Clerk shall give notice of the time and place of the Public Hearing by causing the publishing of this Resolution once in the Local Newspaper for two consecutive weeks not less than ten (10) days before the date of the hearing, and by posting a copy of this Resolution on the official bulletin board customarily used by the City Council for the posting of notices in accordance with *Chapter 3, Section 22626* of the Act.

11. Notice is hereby given that a Public Hearing on these matters will be held by the City Council on Monday, June 1, 2026 at 5:30 p.m., or as soon thereafter as feasible.

ENGINEER'S REPORT
CITY OF RANCHO CORDOVA
LANDSCAPE AND LIGHTING ASSESSMENT DISTRICT NO. 2005-1
FISCAL YEAR 2026-27

The undersigned, acting on behalf of Francisco & Associates respectfully submits the enclosed Engineer's Report as directed by the Rancho Cordova City Council pursuant to the provisions of Article XIIID, Section 4 of the California Constitution, provisions of the Landscaping and Lighting Act of 1972 and Section 22500 et al of the California Streets and Highways Code. The undersigned certifies that he is a Professional Engineer, registered in the State of California.

Dated: April 20, 2026

By: _____
Eduardo R. Espinoza, P.E.
R.C.E No. 83709

SECTION I

INTRODUCTION

Pursuant to the provisions of the Landscaping and Lighting Act of 1972, being Part 2 of Division 15 of the California Streets and Highways Code, commencing with Section 22500 (hereafter referred to as the "1972 Act"), and in compliance with the substantive and procedural requirements of the California State Constitution Article XIIID (hereafter referred to as the "California Constitution"), the City Council of the City of Rancho Cordova, County of Sacramento, State of California (hereafter referred to as "City"), has by resolution initiated proceedings in connection with the ongoing maintenance of the special assessment district designated as:

Landscape and Lighting District No. 2005-1

(hereafter referred to as "District"), for the purpose of continuing and providing for the ongoing maintenance and operation of landscaping and lighting improvements within the District.

In Fiscal Year 2005-06, as part of the District formation to continue the assessments previously levied by the County as part of the Sacramento Landscape Maintenance District ("SLMD") Zone 4 and Zone 5 for properties within the boundary of the City, the City conducted a Property Owner Protest Ballot proceeding for the District assessments pursuant to the provisions of the *California Constitution, Article XIIID Section 4.* In conjunction with this ballot proceeding, the City Council also conducted a noticed public hearing to consider public testimonies, comments, and written protests regarding the formation of the District and levy of maximum assessments. Upon conclusion of the public hearing, property owner protest ballots received were opened and tabulated to determine whether a majority protest existed (ballots were weighted based upon the assessment amounts), and by resolution the City Council confirmed the results of the ballot tabulation. Tabulation of the ballots indicated that a majority protest did not exist for the continuation and transfer of assessments as presented and described in the Fiscal Year 2005-06 Engineer's Report. The City Council approved the report, ordered the formation of the District, and approved the levy and collection of Fiscal Year 2005-06 assessments. The Fiscal Year 2005-06 assessments were then submitted to the Sacramento County Auditor/Controller for inclusion on the property tax roll for each parcel.

The improvements and assessments described in this Report are based on the improvements and assessments previously established by the County for SLMD Zone 4 and Zone 5, and represent an estimate of the direct expenditures, incidental expenses, and fund balances associated with the maintenance and servicing of those improvements. The structure of the District (organization), the improvements, the method of apportionment, and assessments described herein have been established to continue the maintenance of the existing improvements and assessments previously established by the County as outlined in the District's Fiscal Year 2005-06 Engineer's Report.

For Fiscal Year 2026-27, this Report has been prepared and presented to the City Council describing the District, any changes to the District or improvements, and the proposed cost estimate and assessments for this fiscal year, and the City Council shall hold a noticed public hearing regarding these matters prior to approving and ordering the proposed levy of assessments. Should the proposed annual assessments for the District or portion thereof, exceed the maximum assessments described herein (as approved by the property owners), the new or increased assessment must be confirmed through another property owner protest ballot proceeding before the new or increased assessment may be imposed. It should be noted that an increased assessment of an individual property resulting from changes in development or land use does not constitute an increased assessment.

The word “parcel,” for the purposes of this Report, refers to an individual property assigned its own Assessor’s Parcel Number (APN) by the County Assessor’s Office. The County Auditor/Controller uses Assessor’s Parcel Numbers and specific Fund Numbers to identify properties to be assessed on the tax roll for special benefit assessments.

SECTION II

ENGINEER'S REPORT PREPARED PURSUANT TO THE PROVISIONS OF LANDSCAPING AND LIGHTING ACT OF 1972 SECTION 22500 THROUGH 22679 OF THE CALIFORNIA STREETS AND HIGHWAYS CODE

CITY OF RANCHO CORDOVA

LANDSCAPE AND LIGHTING ASSESSMENT DISTRICT NO. 2005-1 FISCAL YEAR 2026-27

Pursuant to the 1972 Act, and in accordance with the Resolution of Intention, adopted by the City Council of the City of Rancho Cordova on May 18, 2026, I, Eduardo R. Espinoza, the duly appointed Engineer of Work, Assessment Engineer for the City of Rancho Cordova Landscape and Lighting Assessment District No. 2005-1 (the "District") submit the following Report, consisting of Section I (Introduction), and this Section II, which consists of five (5) parts as follows:

Part A – PLANS AND SPECIFICATIONS

This part describes the improvements maintained by the District. The District was formed with four (4) benefit zones encompassing all lots and parcels of land within the boundaries of the City. The territory within the District had previously been assessed through Zone 4 and Zone 5 of the SLMD in Fiscal Year 2004-05. The District was first assessed in Fiscal Year 2005-06. Plans and specifications for the improvements are on file at the City of Rancho Cordova, and are incorporated herein by reference.

Part B – ESTIMATE OF COST

This part contains an estimate of the annual costs to operate, maintain, and service the District's landscaping and lighting improvements and facilities. The estimate included herein is also on file at the City of Rancho Cordova.

Part C – ASSESSMENT DISTRICT DIAGRAM

This part incorporates a diagram of the District showing the exterior boundaries of the District, the boundaries of any zones within the District and the lines and dimensions of each lot or parcel of land within the District. Reference is hereby made to the County Assessor's maps for a detailed description of the lines and dimensions of each lot and parcel of land within the District. This diagram has been prepared by the Engineer of Work and is on file at the City of Rancho Cordova.

Part D – METHOD OF APPORTIONMENT OF ASSESSMENTS

This part includes a discussion of benefits the improvements and services provide to properties within the District and the method of apportionment of assessments used to calculate each property's proportional special benefit and annual assessment.

Part E – ASSESSMENT ROLL

This part contains a listing of the proposed assessment amount for each parcel within the District. The proposed assessment amount for each parcel is based on the parcel's proportional special benefit as outlined in the method of apportionment of assessments. The Assessment Roll is also filed in the Office of the City Clerk of the City of Rancho Cordova and is incorporated in this report.

Part A
PLANS AND SPECIFICATIONS

Description of the District

The territory within the District consists of the lots and parcels of land that in Fiscal Year 2004-05 were both within the City and within a portion of Zone 4 and all of Zone 5 of the Sacramento Landscape Maintenance District ("SLMD"). Said territory encompasses an area of land totaling approximately five hundred twelve acres (512 acres) that is centrally located within the City, generally south of Highway 50 and north of the southern City limits.

Zone 1: That portion of the previous SLMD Zone 4, which at the time of the formation of the District included a total of ninety-seven (97) assessable parcels within the residential subdivision known as Ellenwood Court located south of Ellenwood Avenue. Upon formation of the District, this area was designated as Zone 1 to reflect the special benefit these parcels receive from the District improvements associated with the development located on the south side of Ellenwood Avenue.

Zones 2, 3 and 4: The parcels within previous SLMD Zone 5, which at the time of the formation of the District included a total of six hundred eighty-six (686) assessable parcels generally located south of the American River, east of Mather Field Road, and near Zinfandel Drive and International Drive. Upon formation of the District, this area was designated as Zones 2, 3, 4, and 4A and are further described as follows:

> **Zone 2** included the one hundred fifty-four (154) assessable parcels within the residential subdivision known as California Jazz Units 1 & 2, generally located east of Data Drive, north of Reserve Drive, south of Capital Center Drive and west of International Drive.
>
> **Zone 3** included the eight (8) assessable parcels located on either side of Zinfandel Drive from Data Drive to the southern boundary of the District (approximately 700 feet south of International Drive).
>
> **Zone 4** included the remaining parcels that were previously included in SLMD Zone 5 that were not designated as either Zone 2 or Zone 3 of the District. This Zone includes parcels along Data Drive, International Drive, Capital Center Drive, White Rock Road, Quality Drive, Disk Drive, Prospect Park Drive and Kilgore Road.
>
> **Zone 4A** is the portion of Zone 4 that also lies within the City's Community Facilities District No. 2005-2 ("CFD 2005-2"). Tax Zone 1 of CFD 2005-2 was established to fund, to the extent that funds from CFD 2005-2 are available, maintenance of landscape improvements of the residential subdivision development known as Capital Village. These landscape improvements were installed along the subdivision's rights-of-way and within the median(s) adjacent to

the development. The funds from Tax Zone 1 of CFD 2005-2, to the extent available, shall offset all or a portion of the costs within Zone 4A.

Description of Improvements and Services

The purpose of this District is to ensure the ongoing maintenance, operation and servicing of local landscaping and street lighting improvements within the District (improvements that had been previously funded through annual assessments from the SLMD). The improvements may consist of all or a portion of the public landscaped areas, street lighting and appurtenant facilities within and adjacent to the District. These improvements may include, but are not limited to the materials, equipment, utilities, labor, appurtenant facilities and expenses necessary for the ongoing maintenance and operation of public street lighting and landscape improvements, including, but not limited to parkways, medians and other designated easements, rights-of-way or public areas within the District. The improvements to be maintained and funded entirely or partially through the District assessments are generally described as:

Improvements and Services Permitted Pursuant to the 1972 Act

As generally defined by the 1972 Act, the improvements and associated assessments for this District may include now or in the future one or more of the following:

1) The installation or planting of landscaping;

2) The installation or construction of statuary, fountains, and other ornamental structures and facilities;

3) The installation or construction of public lighting facilities including, but not limited to streetlights and traffic signals;

4) The installation or construction of any facilities which are appurtenant to any of the foregoing or which are necessary or convenient for the maintenance or servicing thereof;

5) The installation of park or recreational improvements, including, but not limited to, all the following:

    a) Land preparation, such as grading, leveling, cutting and filling, sod, landscaping, irrigation systems, sidewalks, and drainage.

    b) Lights, playground equipment, play courts, and public restrooms.

6) The acquisition of land for park, recreational, or open-space purposes or any existing improvement otherwise authorized pursuant to this section.

7) The maintenance or servicing, of any of the foregoing including the furnishing of services and materials for the ordinary and usual maintenance, operation, and servicing of any improvement including but not limited to:

   a) Repair, removal, or replacement of all or any part of any improvements;

   b) Grading, clearing, removal of debris, the installation or construction of curbs, gutters, walls, sidewalks, or paving, or water, irrigation, drainage, or electrical facilities;

   c) Providing for the life, growth, health, and beauty of landscaping, including cultivation, irrigation, trimming, spraying, fertilizing, or treating for disease or injury;

   d) The removal of trimmings, rubbish, debris, and other solid waste;

   e) The cleaning, sandblasting, and painting of walls and other improvements to remove or cover graffiti;

   f) Electric current or energy, gas, or other illuminating agent for any public lighting facilities or for the lighting or operation of any other improvements;

   g) Water for the irrigation of any landscaping, the operation of any fountains, or the maintenance of any other improvements.

8) Incidental expenses associated with the improvements including, but not limited to:

   a) The cost of preparation of the report, including plans, specifications, estimates, diagram, and assessment;

   b) The costs of printing, advertising, and the publishing, posting and mailing of notices;

   c) Compensation payable to the County for collection of assessments;

   d) Compensation of any engineer or attorney employed to render services;

   e) Any other expenses incidental to the construction, installation, or maintenance and servicing of the improvements;

   f) Costs associated with any elections held for the approval of a new or increased assessment.

Landscape Improvements

The landscape improvements for the District may include, but are not limited to turf, ground cover, shrubs and plants, trees, irrigation and drainage systems, ornamental lighting, masonry walls or other fencing, hardscape improvements, monuments, and associated appurtenant facilities located within the landscape easements or public rights-of-way. Zone specific landscape improvements are described generally as follows:

Zone 1: Streetscape (parkway) landscaping along the South side of Ellenwood Avenue east of Routier Road that is within the public rights-of-way or easements dedicated to the City for maintenance. The costs and special benefits of these improvements are shared equally by only the assessable properties within Zone 1 of the District.

Zone 2: Streetscape (parkway) landscaping surrounding and adjacent to the California Jazz subdivision on the north side of Reserve Drive from Data Drive to International Drive; the east side of Data Drive from Reserve Drive north to the end of the subdivision; the west side of Capital Center Drive from International Drive north to the end of the subdivision; and the north side of International Drive from Reserve Drive to Capital Center Drive. The costs and special benefits of these improvements are proportionately shared by only the properties within Zone 2 of the District.

Zone 3: Streetscape (parkway) landscaping on both sides of Zinfandel Drive between International Drive and Data Drive. The costs and special benefits of these improvements are proportionately shared by only the properties within Zone 3 of the District.

Zones 2, 3, 4 and 4A: All median landscape improvements within the District located on International Drive from approximately 570 feet westerly of Data Drive to Kilgore Road and on Zinfandel Drive from Data Drive to International Drive. The costs and special benefits of these improvements are proportionately shared by all the properties within Zone 2, 3, 4 and 4A of the District.

Specifically, the landscape improvement areas for this District generally consist of the following:

- Approximately 9,600 square feet of streetscape (parkway) landscaping and 34 trees within the public rights-of-way located on the south side of Ellenwood Avenue.

- Approximately 11,000 square feet of turf, 28,455 square feet of streetscape (parkway) landscaping including 110 trees, located on the north side of Reserve Drive from Data Drive to International Drive; east side of Data Drive, from Reserve Drive north to end of California Jazz tract Unit No. 1; west side of Capital Center Drive, from International Drive north to the end of California Jazz Tract Unit No. 2; and north side of International Drive, from Reserve Drive to Capital Center Drive.

- Approximately 19,400 square feet of turf, 11,500 square feet of streetscape (parkway) landscaping including 57 trees, located on the west side of Zinfandel Drive, south of International Drive.

- Approximately 152,340 square feet of turf, 55,600 square feet of streetscape and median landscaping including 392 trees along International Drive; and medians on International Drive, west of Data Drive to Kilgore Road.

Specifically, not included as District improvements, are those improvements located on private property, improvements and facilities that may be provided or maintained by an agency other than the City; improvements and facilities that may be provided by another assessment or tax levied by the City or County and any improvement provided and maintained by a Homeowner's Association or similar entity.

Detailed descriptions of the location and extent of the specific improvements to be maintained by the District are on file with the City and by reference are made part of this Report. The net annual cost to provide and maintain the improvements determined to be of special benefit shall be allocated to each property in proportion to the special benefits received.

Public Lighting Improvements

Lighting facilities that may be located within the landscaped areas including safety lights, security lights or ornamental lights installed as part of the landscape improvements are included as part of the landscape maintenance costs.

The lighting improvements may include but shall not be limited to the cost of providing electrical energy and servicing of lighting fixtures, poles, meters, conduits, electrical cable and associated appurtenant facilities associated with the street lighting, safety lighting and/or traffic signals within the District including public lighting facilities on designated arterial and collector streets as well as lighting facilities within residential subdivisions or public areas such as parks. The cost of such improvements shall be allocated based on the proportional special benefits properties receive from these improvements.

Part B
ESTIMATE OF COSTS

The maximum assessment per parcel or acre shown herein is based on the cost of providing for the District improvements and does not include any other assessments or charges imposed on the properties. The cost estimate within this report identifies the cost to maintain the improvements within each specified zone of the District.

Each zone within the District maintains two separate reserves, one is utilized for working capital purposes (the “Operating Reserve”) and the other for longer-term projects (the “Special Projects Reserve”). The Operating Reserve provides cash for the ongoing operations and maintenance of the District, as well as providing funding for unanticipated expenditures. The size of the Operating Reserve for each zone is limited by Streets and Highways Code 22569, which states that an Operating Reserve shall not exceed the estimated costs of maintenance and services from the first day of the fiscal year (July 1) to the date that the agency expects to receive the first apportionment of collections from the County. The City has determined that all cost estimates as presented in this report shall be considered as costs to maintain and service the District, or incidental expenses thereof, as to the application of the Streets and Highways Code 22569.

The Special Projects Reserve can be used to finance the Central Irrigation System (CIS) project and re-vegetation projects, as well as other rehabilitation projects, repairs or replacements of District improvements.

The Cost Estimate for the District prepared by the City for Fiscal Year 2026-27 follows on the next page.

City of Rancho Cordova
Landscaping and Lighting Maintenance District No. 2005-1
Fiscal Year 2026-27 Estimate of Cost Summary

	Zone 1 Cost Estimate	Zone 2 Cost Estimate	Zone 3 Cost Estimate	Zone 4 Cost Estimate	Zone 4A Cost Estimate	Totals
DIRECT COSTS						
Contract Maintenance - Landscaping	$ 19,000	$ 21,000	$ 59,000	$ 24,000	$ 5,000	**$ 128,000**
Utilities (Water/Electricity) - Landscaping	$ 12,000	$ 18,000	$ 19,000	$ 29,000	$ 5,000	**$ 83,000**
Utilities (Electricity) - Lighting	$ 700	$ 500	$ 1,800	$ 400	$ 100	**$ 3,500**
Periodic Repair/Rehabilitation - Landscaping	$ 1,000	$ 1,000	$ 1,000	$ 800	$ 200	**$ 4,000**
Periodic Repair/Rehabilitation - Lighting	$ -	$ -	$ -	$ -	$ -	**$ -**
Total Direct Costs	**$ 32,700**	**$ 40,500**	**$ 80,800**	**$ 54,200**	**$ 10,300**	**$ 218,500**
Special Project Expenditures	**$ -**	**$ -**	**$ -**	**$ -**	**$ -**	**$ -**

(1) Contribution from CFD No. 2005-2; Only affects Zone 4A.

(2) The annual levy may differ slightly from the maximum revenue shown due to rounding, because of rounding limitations imposed by the County of Sacramento.

(3) Negative fund balances represent funds that will need to be contributed or loaned from an appropriate funding source outside of the assessment district.

A description of the terms used in the preceding Cost Estimate table are listed on the following pages.

Direct Costs (Maintenance and Operation)

Contract Maintenance – Landscaping – Includes all regularly scheduled contract labor, materials, supplies, and equipment required to properly maintain and ensure the satisfactory condition or maintenance of all landscaping improvements, irrigation, and related drainage systems, as well as maintenance of appurtenant facilities (the "improvements").

Utilities (Water/Electricity) – Landscaping - The furnishing of water and electricity required for the operation and maintenance of the landscaping related improvements.

Utilities (Electricity) – Lighting - The furnishing of electricity required for the operation of the lighting improvements.

Periodic Repair/Rehabilitation – Landscaping – Expected costs for repair, replacement, installation, or planned upgrades of District landscaping improvements.

Periodic Repair/Rehabilitation – Lighting – Expected costs for repair, replacement, installation or planned upgrades of District lighting improvements. If zero, this line item may not be shown in the cost estimate.

Special Project Expenditures – Expected costs for installation, replacement or planned upgrades of District landscaping or lighting improvements for the current year that were previously funded or accumulated in the Special Projects Reserve. The Special Projects Reserve is used to accumulate funds for costs associated with the future rehabilitation, repair or replacement of these District improvements that cannot be conveniently raised from a single year's assessment. If zero, this line item may not be shown in the cost estimate.

Administration Costs

District Administration – Estimated costs incurred by the City in preparation of the annual cost estimate and the preparation, review, posting and/or publishing of documents and notices required for City Council action to approve the annual assessments. These costs also include contracting with various professionals to provide legal, engineering and district administration services directly related to the District, including the calculation of the annual assessment amounts and the preparation of the Engineer's' Report.

Contract Administration – Estimated costs to coordinate and oversee the maintenance contracts and overall repair, maintenance and replacements of the District Improvements.

County Collection Fees – The fee charged to the District by the County for placing assessments on property tax bills.

Other Administration Expenses – Administration expenses not included above, including the cost to publish public notices required for City Council action relating to the District. If zero, this line item may not be shown in the cost estimate.

Total Direct and Administration Costs – The total expected costs of the District.

Miscellaneous Costs and Collections/(Credits) Applied to Levy

Replenishment/(Use) of Operating Reserve – A "Replenishment" increases the levy in order to replenish the Operating Reserve. On the other hand, a "Use" of the Operating Reserve decreases the levy by drawing funds from the Operating Reserve for current year expenditures. If zero, this line item may not be shown in the cost estimate. Further information regarding the function of the Operating Reserve is provided in the following pages of this section.

Contribution to/(use of) Special Projects Reserve — A "Contribution" increases the levy in order to generate funding for the Special Projects Reserve. This reserve allows for the accumulation of funds for the possible rehabilitation of projects or replacement in future years. On the other hand, a "Use of" the Special Projects Reserve provides current year funding of rehabilitation projects or replacement from available funds within the Special Projects Reserve. If the expenditure of a current year special project is funded entirely by a collection from the current fiscal year levy and/or a transfer from the Undesignated Reserve, this line item may show as zero, which is the net of the two amounts. If zero, this line item may not be shown in the cost estimate. Further information regarding the function of the Special Projects Reserve is provided in the following pages of this section.

Revenues from Other Sources – These amounts represent contributions from CFD No. 2005-2; which only affects Zone 4A. This relationship is more fully described in the previous sections of this report.

Balance to Levy - This is the total amount to be levied and collected through assessments for the current fiscal year for each Zone. The Balance to Levy represents the sum of the Total District Direct and Administration Costs together with any applicable adjustments associated with Miscellaneous Costs and Collections/(Credits) as described above.

District Statistics and Assessment Rates

Number of Assessable Parcels - The total number of parcels within each zone that are expected to be assessed. Non-assessable lots or parcels include government-owned land, public utility-owned property, land principally encumbered by public right-of-way or easements, common areas, and/or parcels within the boundaries of the District that currently do not benefit from the improvements, due possibly to development restrictions.

Assessable Acreage - The total assessable acreage within each zone that are expected to be assessed on an acreage basis for the current fiscal year.

Maximum Rate per Parcel - The maximum assessment rate that can be assessed to each non-exempt parcel within the respective zone for the current fiscal year.

Maximum Rate per Acre - The maximum assessment rate per acre that can be assessed to each non-exempt parcel within the respective zone for the current fiscal year.

Estimated Maximum Assessment Revenue – The total amount that can be assessed to all parcels within each zone for the current fiscal year based upon the expected number of assessable units and acres using the maximum assessment rates.

Operating Reserve Fund Balances

Beginning Reserve Fund Balance 7-1-2026 (est.) - The anticipated beginning balance of cash and receivables, net of any unpaid prior year obligations for each zone. These beginning balances shall be used to fund each zone's expenditures from July 1, 2026 to December 31, 2026, as the Operating Reserve is required to compensate for the approximate six-month delay between the start of the District's fiscal year and the receipt of the collections from the County. The Special Projects Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the report.

Add: Collect from Fiscal Year 2026-27 Levy – This amount is added to the levy in order to replenish the Operating Reserve. Due to the six-month delay from the District's receipt of assessment collections, the Operating Reserve balance shall be sufficiently funded to provide for expenditures from the period of July 1, 2026 (the beginning of the fiscal year) through December 31, 2026. If zero, this line item may not be shown in the cost estimate.

Less: Use for Fiscal Year 2026-27 Expenses – The amount of the Operating Reserve to be used to fund Fiscal Year 2026-27 expenses. Portions of the Operating Reserve may be slated for current year expenditures in order to reduce the Ending Operating Reserve Fund Balance to an amount no greater than the expected District costs for the period of July 1, 2026 (the beginning of the fiscal year) through December 31, 2026. If zero, this line item may not be shown in the cost estimate.

Transfer from/(to) the Special Projects Reserve - The amount of Operating Reserve monies to be transferred to or from the Special Projects Reserve. Periodically, funds held in a Special Projects Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Special Projects Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Public Works Department, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the cost estimate.

Ending Operating Reserve Fund Balance 6-30-2027 (est.) - This amount represents the anticipated Operating Reserve balance/(deficit) for each zone as of June 30, 2027. The size of each zone's Operating Reserve is limited by Streets and Highways Code 22569 which states that an Operating Reserve shall not exceed the estimated costs of maintenance and service from the first day of the fiscal year (July 1) to the date that the City expects to receive the first apportionment of collections from the County, which is estimated to be December 31. Therefore, each zone may retain an Operating Reserve amounting to the District's first six-months of expenses in order to meet ongoing obligations until the first collections are received from the County. Any deficit fund balances will be contributed or loaned to the District from a source outside of the District. All Special Projects Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the report.

Special Projects Reserve Fund Balance

Beginning Special Projects Reserve Fund Balance 7-1-2026 (est.) — The projected balance of funds in the Special Projects Reserve as of July 1, 2026. Streets and Highways Code 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

Add: Collect from Fiscal Year 2026-27 Levy — This amount is added to the levy to accumulate funding for future year rehabilitation projects, replacements, repairs, restorations, or upgrades of District improvements. If zero, this line item may not be shown in the cost estimate.

Less: Use for Fiscal Year 2026-27 Special Projects – The amount of Special Project Reserve monies expected to be expended for special projects to fund the costs of installation, replacement, or planned upgrades of District improvements for the current year. If zero, this line item may not be shown in the cost estimate.

Transfer from/(to) the Operating Reserve — The amount of Special Projects Reserve monies to be transferred to or from the Operating Reserve. Periodically, funds held in a Special Project Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Special Project Reserve are subject to transfer into the same zone's Operating Reserve, at the discretion of the Public Works Department, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the cost estimate.

Ending Special Projects Reserve Fund Balance 6-30-2027 (est.) – The projected balance of funds in the Special Projects Reserve as of June 30, 2027. These funds shall be used to provide for future year rehabilitation projects, replacements, restorations or upgrades of District improvements which cannot be conveniently raised from a single year's assessment. Should the District have no Special Project Reserve or related activity, the Special Project Reserve information may not be presented in the report.

Special Projects Reserve – Capital Improvement Plan

Streets and Highways Code Section 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

Part C

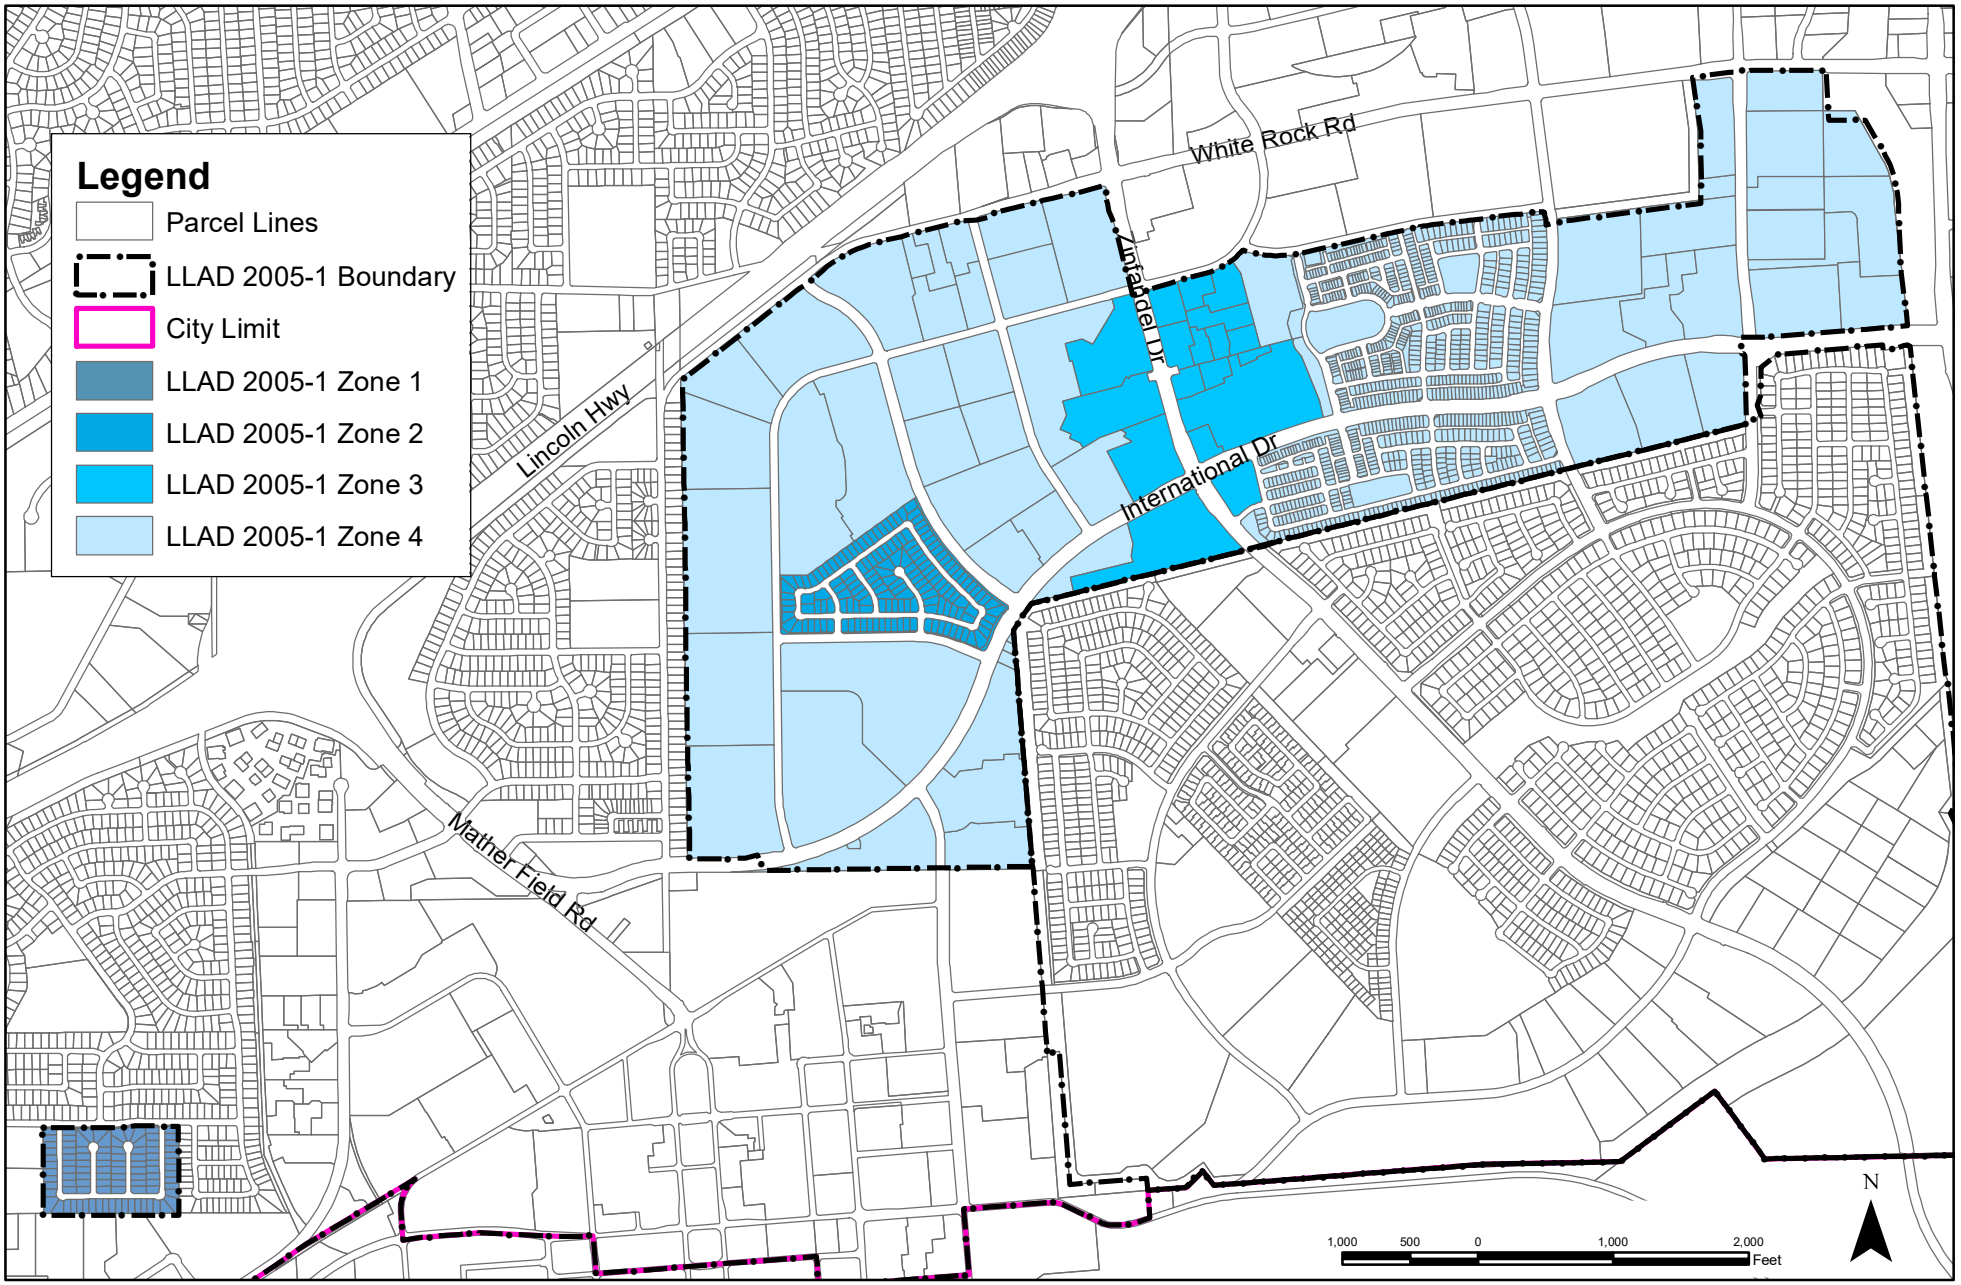

ASSESSMENT DISTRICT DIAGRAM

The parcels to be assessed consist of all lots, parcels and subdivisions of land located within the boundaries of the map designated as “Assessment Diagram of Landscape and Lighting District No. 2005-1.” The lines and dimensions of each parcel within the District are those lines and dimensions shown on the maps of the Sacramento County Assessor for the year in which this Report was prepared and are incorporated herein and made part of this Report.

A reduced copy of the Assessment Diagram is attached on the following page.

ATTACHMENT 3
Exhibit A to the Resolution

City of Rancho Cordova
Landscape and Lighting District No. 2005-1
Assessment District Diagram

Part D
METHOD OF APPORTIONMENT OF ASSESSMENTS

The 1972 Act permits the establishment of assessment districts by agencies for the purpose of providing certain public improvements, which include the construction, maintenance, and servicing of public lights, landscaping, and appurtenant facilities.

The 1972 Act further requires that the cost of these improvements be levied according to benefit rather than assessed value:

> *"The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels in proportion to the estimated benefits to be received by each such lot or parcel from the improvements."*

In conjunction with the provisions of the 1972 Act, the California Constitution Article XIIID addresses several key criteria for the levy of assessments, notably:

Article XIIID Section 2d defines District as:

> *"District means an area determined by an agency to contain all parcels which will receive a special benefit from a proposed public improvement or property-related service";*

Article XIIID Section 2i defines Special Benefit as:

> *"Special benefit" means a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute "special benefit."*

Article XIIID Section 4a defines proportional special benefit assessments as:

> *"An agency which proposes to levy an assessment shall identify all parcels which will have a special benefit conferred upon them and upon which an assessment will be imposed. The proportionate special benefit derived by each identified parcel shall be determined in relationship to the entirety of the capital cost of a public improvement, the maintenance and operation expenses of a public improvement, or the cost of the property related service being provided. No assessment shall be imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel."*

The method of apportionment described in this Report for allocation of special benefit assessments utilizes commonly accepted engineering practices and has been established pursuant to the 1972 Act and the provisions of the California Constitution. The formulas used for calculating assessments reflects the composition of parcels within the District and the improvements and services provided, to fairly apportion the costs based on the special benefits to each parcel.

Benefit Analysis

Each of the proposed improvements and the associated costs and assessments have been carefully reviewed, identified, and allocated based on special benefit pursuant to the provisions of the California Constitution and 1972 Act.

The improvements provided by the District and for which properties will be assessed have been identified as necessary, required and/or desired for the development of properties within the District and as such, the ongoing operation, servicing and maintenance of these improvements would be the financial obligation of the parcels within the District. Therefore, the improvements and the annual costs of ensuring the maintenance and operation of the improvements are a distinct and special benefit to the properties within the District. Any improvement or portion thereof that is considered to be of general benefit shall be funded by other revenue sources and not included as part of the special benefit assessments allocated to properties within the District.

Special Benefit

The method of apportionment (method of assessment) established herein is based on the premise that each assessed parcel within the District receives special benefits from specific improvements and the desirability and security of those properties is enhanced by the presence of well-maintained improvements in close proximity to those properties. The special benefits associated with landscape improvements are specifically:

- Enhanced desirability of properties through association with the improvements.
- Improved aesthetic appeal of properties providing a positive representation of the area and properties.
- Enhanced adaptation of the urban environment within the natural environment from adequate green space and landscaping.
- Environmental enhancement through improved erosion resistance, dust and debris control, and fire prevention.
- Increased sense of pride in ownership of property within the District resulting from well-maintained improvements associated with the properties.
- Enhanced quality of life through well-maintained green space and landscaped areas.
- Reduced criminal activity and property-related crimes (especially vandalism) against properties in the District through well-maintained surroundings and amenities including abatement of graffiti.
- Enhanced environmental quality of the parcels by moderating temperatures, providing oxygenation, and attenuating noise.

The special benefits of street lighting and other public lighting facilities are the convenience, safety, and security of property, improvements, and goods. Specifically:

- Enhanced deterrence of crime and the aid to police protection.
- Increased nighttime safety on roads, streets, and public areas.
- Improved ability of pedestrians and motorists to see.
- Improved ingress and egress to property.

- Reduced vandalism and other criminal acts and damage to improvements or property.
- Improved traffic circulation and reduced nighttime accidents and personal property loss.

All the preceding factors contribute to a specific enhancement and desirability of each of the assessed parcels within the District and thereby provide special benefits to the properties. Furthermore, it has been determined that the lack of funding to properly service and maintain the District improvements could have a negative impact on the properties within the District.

General Benefit

In reviewing each of the District improvements, the proximity of those improvements to both properties within the District and those outside the District as well as the reasons for installing and constructing such improvements, it is evident that the improvements are solely for the benefit of properties within the District and the ongoing maintenance and operation of the improvements will directly affect the properties within the District. Although the improvements include public areas, easements, rights-of-way and other amenities available or visible to the public at large, the construction and installation of these improvements were only a direct benefit to the properties within the District and were not required nor necessarily desired by any properties or developments outside the District boundary and any public access or use of the improvements by others is incidental. Therefore, it has been determined that the improvements and the ongoing maintenance, servicing and operation of those improvements provide no measurable general benefit to properties outside the District or to the public at large, but clearly provide distinct and special benefits to properties within the District.

Assessment Methodology

The method of apportionment for the District calculates the receipt of special benefit from the respective improvements based on the actual or proposed land use of the parcels within the District. The special benefit received by each lot or parcel is equated to the overall land use of parcels within the District based on the parcel's actual land use or proposed development.

All costs associated with the improvements shall be fairly distributed among the parcels based upon the special benefit received by each parcel. Additionally, in compliance with the California Constitution, each parcel's assessment may not exceed the reasonable cost of the proportional special benefit conferred to that parcel. The benefit formula used to determine the assessment obligation is therefore based upon both the improvements that benefit the parcels within the District as well as the proposed land use of each property as compared to other parcels that benefit from those specific improvements.

At the time that the District was being formed and to identify and determine the special benefit to be received by each parcel and their proportionate share of the improvement costs, it was necessary to consider the entire scope of improvements to be maintained by the District, as well as individual property development within the District. Upon review of

the improvements to be maintained, it was determined that four (4) distinct areas benefit differently from the improvements within the District and therefore the landscape maintenance and assessments were established as four (4) benefit zones for the allocation of the assessments and proportional special benefit, as described below. Although a portion of Zone 4 was designated as Zone 4A in Fiscal Year 2007-08, as discussed below, Zones 4 and 4A remain as one benefit zone and are assessed at the same maximum rate.

Zones and Assessments:

Zone 1 is comprised of ninety-six (96) assessable residential properties, each of which were assessed on a per parcel basis at the pre-existing rate of $42.50 per parcel.

Zone 2 is comprised of one hundred fifty-four (154) assessable residential properties within the developments known as California Jazz Unit No.1 and Unit No. 2. Each of the one hundred fifty-four (154) assessable parcels were assessed as residential properties on an acreage basis at the pre-existing rate of $30.48 per acre for the median landscape improvements and parkway landscape improvements associated with these parcels.

Zone 3 is comprised of eighteen (18) assessable properties, each of which were assessed on an acreage basis at the pre-existing rate of $30.48 per acre for the median landscaping and $1,382.76 per acre for the landscaping along the parkways of Zinfandel Drive, totaling $1,413.24 per acre.

Zone 4 is comprised of fifty-one (51) assessable properties, each of which were assessed on an acreage basis at the pre-existing rate of $30.48 per acre for the median landscape improvements within the District.

Zone 4A is comprised of a portion of Zone 4. Properties within Zone 4A were re-designated as Zone 4A commencing with the Fiscal Year 2007-08 to account for the Zone 4A parcels lying within a portion of CFD 2005-2, while the remaining Zone 4 parcels are outside of the CFD 2005-2 boundaries. Since the CFD 2005-2 Zone 1, special taxes are to be levied upon Zone 4A parcels, these special taxes are contributed in part to the District for the benefit of Zone 4A. Zone 1 of the CFD provides funding for landscape improvements within and adjacent to the development, including the median landscaping identified herein. Although the CFD may fund median landscaping, the special taxes levied within Capital Village may not provide sufficient funds to maintain both the landscape improvements within the Capital Village development and the median landscape improvements within the District that specially benefit the parcels within Zone 4A. Therefore, Zone 4A is comprised of seven hundred eighty-three (783) assessable properties, each of which were assessed $30.48 per gross acre until such time that the CFD generates sufficient revenue to fund the median landscape improvements. Any funds generated by the CFD that will be used to finance the median landscape improvements that benefit Zone 4A shall be transferred by the CFD to the District as a contribution to Zone 4A.

Exempt Parcels — Properties within the District that are not assessed for special benefit include but are not limited to:

- Lots or parcels identified as public streets and other roadways (typically not assigned an APN by the County);
- Dedicated public easements including open space areas, utility rights-of-way, greenbelts, parkways, parks, or other publicly owned properties that are part of the District improvements or may provide other benefits to private properties within the District;
- Private properties that cannot be developed independently from an adjacent property, such as common areas, sliver parcels or bifurcated lots or properties with very restrictive development use.

These types of parcels are considered to receive little or no benefit from the improvements and are therefore exempt from assessment, but shall be reviewed annually by the assessment engineer to confirm the parcels current development status. Government owned properties or public properties are not necessarily exempt properties and shall be subject to special benefit assessment unless it qualifies for an exempt classification.

Special Cases – In many districts where multiple land uses, and zones exist, the typical property classification and assessment methodology does not accurately identify the special benefits received from the improvements for each and every parcel. For example, in some cases, only a small percentage of the parcel's total acreage can actually be developed. In this case, an appropriate calculation would be based on the net acreage that can be utilized rather than the gross acreage of the parcel. These special circumstances will be reviewed annually by the assessment engineer.

Part E

ASSESSMENT ROLL

Parcel identification for each lot or parcel within the District is based on the Assessment Diagram presented herein and is based on available parcel maps and property data from the County Assessor's Office at the time the Engineer's Report was prepared. A listing of the proposed lots and parcels to be assessed within this District along with the assessment amounts is provided herein.

Non-assessable lots or parcels may include, but are not limited to public streets and other roadways (typically not assigned an APN by the County); dedicated public easements, open space areas, rights-of-way, common areas; landlocked parcels, small parcels vacated by the County, bifurcated lots, and any other property that cannot be developed or has little or no value. These types of parcels are considered to receive little or no benefit from the improvements and are therefore exempt from assessment.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate described in this Report as approved by the City Council. Therefore, if a single parcel is subdivided to multiple parcels, the assessment amount applied to each of the new parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment.

The following is a list of the parcels and proposed assessment amounts for each of the parcels within the District as determined by the assessment rates and method of apportionment described herein.

MEMORANDUM

ITEM 9.5.

DATE: May 18, 2026

TO: Honorable Mayor and Council Members

FROM: Albert Stricker, Public Works Director
Edgar Medina, Assistant Public Works Director

SUBJECT: **RESOLUTIONS INITIATING PROCEEDINGS FOR THE ANNUAL LEVY AND COLLECTION OF ASSESSMENTS FOR THE RANCHO CORDOVA LIGHTING DISTRICT NO. 2012-1 FOR FISCAL YEAR 2026-2027**

RECOMMENDATION

Adopt the Resolution initiating proceedings for the Annual Levy and Collection of Assessments for the Rancho Cordova Lighting District No. 2012-1 for Fiscal Year 2026-2027; and adopt the Resolution preliminarily approving the Engineer's Annual Levy Report and declaring its intention to levy and collect annual assessments for the Rancho Cordova Lighting District No. 2012-1 for Fiscal Year 2026-2027.

RESULT OF RECOMMENDED ACTION

The recommended actions are required as part of the process to continue the annual levy and collection of assessments in the District. The assessments fund the maintenance of street lights and safety lights in the District. There are no new impacts to existing or new residents. No assessments shall increase as a result of this action.

BACKGROUND

State law requires the City Council direct an Engineer's Report to be prepared each year and to hold a public hearing on the Report and the levy of the annual assessment. The Resolution initiating proceedings, Attachment 1, directs Francisco and Associates, Inc. to prepare and file the Engineer's Report.

In anticipation of this Resolution, the Engineer's Report has been prepared and is on file with the City Clerk. The Engineer's Report, Exhibit A to the Resolution preliminarily approving the report and declaring the intention to levy and collect assessments, Attachment 3, includes a diagram of the assessment area, a description of the improvements and the operation and maintenance to be provided, a description of the property to be benefited, and the amount of the assessment to each individual property. The services performed within and funded by the District include on-going maintenance, operation and servicing of street lights and safety lights within the right-of-ways and other public areas within the District as described in the Engineer's Report.

The proposed Fiscal Year 2026-2027 assessment rates are equal to the rates previously levied by the city in Fiscal Year 2025-2026.

The Fiscal Year 2026-2027 total assessment is estimated at $368,131. The District has established an Operating Reserve which provides funding for the operations and maintenance of the District Improvements, as well as providing financing for emergency expenditures. A Capital Projects Reserve has been established to fund replacements and upgrades of the District Improvements.

In September 2014, the City of Rancho Cordova completed the retrofit of all existing street lights located within the Rancho Cordova Lighting District (RCLD) with new LED street lights. The project was funded through a 1% interest loan from the California Energy Commission (CEC). This project has significantly reduced electricity and maintenance needs. The electrical and maintenance savings will be used to pay back the loan from the energy commission. Once the CEC loan is paid off in Fiscal Year 2028, the District is projected to generate sufficient revenues to build a reserve balance to cover the costs of the replacement of the LED street light heads when they need to be replaced in 20 years.

In order to proceed with the levy of assessments after consideration and approval of the Engineer's Report, it is appropriate for the Council to adopt the Resolution, Attachment 2, which declares the Council's intention to levy assessments for Fiscal Year 2026-2027. It also sets Monday, June 1, 2026, at 5:30 p.m., or as soon thereafter as possible, as the date and time for a public hearing on the issue of the levy of Fiscal Year 2026-2027 assessments. Notice of the public hearing will be given by publication.

FISCAL IMPACT AND FUNDING SOURCE

Approval of this item has no impact on the General Fund.

3. Exhibit A to the Resolution - Engineer's Report

CITY OF RANCHO CORDOVA

RESOLUTION NO. XX-2026

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA, STATE OF CALIFORNIA, INITIATING PROCEEDINGS FOR THE ANNUAL LEVY AND COLLECTION OF ASSESSMENTS FOR THE RANCHO CORDOVA LIGHTING DISTRICT NO. 2012-1 FOR FISCAL YEAR 2026-2027

WHEREAS, the City Council has, by previous Resolutions, formed the Rancho Cordova Lighting District No. 2012-1 (hereafter referred to as the "District"), pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereinafter referred to as the "Act"), that provides for levy and collection of assessments through the County of Sacramento for the City of Rancho Cordova to fund the ongoing operation, maintenance and servicing of public lighting improvements and appurtenant facilities, previously provided and maintained by the County of Sacramento as part of County Service Area No. 1, Zone 2; and

WHEREAS, the City Council has retained Francisco and Associates, Inc. as the Engineer of Work for the purpose of assisting with the annual levy of the District, and to prepare and file an Engineer's Report with the City Clerk in accordance with *Chapter 3, Section 22623* of the Act.

NOW, THEREFORE, BE IT HEREBY RESOLVED BY THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA as follows:

1. The above recitals are true and correct.

2. The City Council hereby orders Francisco and Associates, Inc. to prepare the Engineer's Report (hereinafter referred to as the "Report" or "Engineer's Report") concerning the levy of assessments for the District in accordance with *Chapter 1, Article 4 (commencing with Section 22565), pursuant to Chapter 3, Section 22622* of the Act.

3. The District improvements include lighting improvements and associated appurtenant facilities, located within the public right of ways of the City of Rancho Cordova which were previously serviced through CSA-1, Zone 2. Of the District improvements, highway safety lights are those lights located at intersections, on major streets, and along the rear of properties that abut major streets; and, street lights are all lights not designated as highway safety lights, primarily consisting of local street lighting. District assessments are to fund the operation, maintenance and incidental costs of the District improvements. The Report so ordered, shall describe the existing improvements and any new improvements or substantial changes in the existing improvements.

CITY OF RANCHO CORDOVA

RESOLUTION NO. XX-2026

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA, STATE OF CALIFORNIA, PRELIMINARILY APPROVING THE ENGINEER'S REPORT, AND DECLARING ITS INTENTION TO LEVY AND COLLECT ANNUAL ASSESSMENTS FOR THE RANCHO CORDOVA LIGHTING DISTRICT NO. 2012-1 FOR FISCAL YEAR 2026-2027

WHEREAS, the City Council pursuant to the provisions of the *Landscaping and Lighting Act of 1972, Part 2 of Division 15 of the Streets and Highways Code of California, beginning with Section 22500* (hereafter referred to as the "Act") and by previous Resolution, initiated proceedings for the "Rancho Cordova Lighting District No. 2012-1" (hereafter referred to as the "District") for the annual levy and collection of assessments to fund the ongoing operation, maintenance and servicing of public lighting facilities and appurtenants, previously provided and maintained by the County of Sacramento as part of County Service Area No. 1, Zone 2; and

WHEREAS, the City Council has, by previous Resolution ordered the preparation of an Engineer's Report (hereafter referred to as the "Report" or "Engineer's Report") regarding the District and assessment for Fiscal Year 2026-2027, pursuant to *Chapter 3, Section 22622* of the Act; and

WHEREAS, the Engineer selected by the City Council has prepared and filed with the City Clerk said Report (see Exhibit A) in connection with the District and the levy of assessments for Fiscal Year 2026-2027 (Beginning July 1, 2026 and ending June 30, 2027) in accordance with *Chapter 1, Article 4* of the Act; and

WHEREAS, this City Council has carefully examined and reviewed the Report as presented and pursuant to the provisions of *Chapter 2, Article 1, Section 22586* of said Act, the City Council may approve the report, as filed, or it may modify the report in any particular and approve it as modified.

NOW, THEREFORE, BE IT HEREBY RESOLVED BY THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA as follows:

1. The above recitals are true and correct.

2. The Report as presented, consists of the following:
    a. A Description of Improvements.
    b. A Description of the District.
    c. The proposed Annual Budget for the fiscal year (costs and expenses).
    d. The Method of Apportionment that details the method of calculating each parcel's proportional special benefits and annual assessment.
    e. The District's boundaries.
    f. The Assessment Roll containing the Levy for each Assessor Parcel Number within the District proposed for Fiscal Year 2026-2027.

3. The District, the proposed improvements, each and all of the budget items and documents, and the proposed assessments as outlined in the Report have been spread in accordance with the benefits received from the improvements, operation, maintenance and services to be performed within the District, and are in compliance with the Act and the provisions of California Constitution Article XIIID.

4. The Report is hereby approved on a preliminary basis, as presented or modified, and ordered to be filed in the Office of the City Clerk as a permanent record and to remain open to public inspection.

5. The City Clerk is hereby directed to enter on the minutes of the City Council any and all modifications to the Report determined and approved by the City Council, and all such changes and/or modifications by reference are incorporated into the Engineer's Report (Exhibit A).

6. The City Council hereby declares its intention to seek the Annual Levy of the District pursuant to the Act, over and including the land within the District boundary, and to levy and collect assessments on all such land to pay the costs associated with the operation, maintenance and servicing of the public lighting facilities and appurtenants related thereto, for Fiscal Year 2026-2027.

7. The District improvements include lighting improvements and associated appurtenant facilities, located within the public right of ways of the City of Rancho Cordova which were previously serviced through County Service Area 1 (CSA-1), Zone 2. Of the District improvements, highway safety lights are those lights located at intersections, on major streets, and along the rear of properties that abut major streets; and, street lights are all lights not designated as highway safety lights, primarily consisting of local street lighting. The Report as previously approved and on file with the City Clerk, provides a full and complete description of all services, facilities and appurtenants and any or all substantial changes to the services, facilities and appurtenants within the District.

8. The boundaries of the District are described in the Engineer's Report on file with the City Clerk.

9. The proposed assessment rates for Fiscal Year 2026-2027 do not exceed the maximum assessment rates approved through the property owner protest proceedings at the time of formation.

10. The City Council hereby declares its intention to conduct a public hearing concerning the levy of assessments for the District. The City Clerk shall give notice of the time and place of the Public Hearing by causing the publishing of this Resolution once in the Local Newspaper for two consecutive weeks not less than ten (10) days before the date of the hearing, and by posting a copy of this Resolution on the official bulletin board customarily used by the City Council for the posting of notices in accordance with *Chapter 3, Section 22626* of the Act.

11. Notice is hereby given that a Public Hearing on these matters will be held by the City Council on Monday, June 1, 2026 at 5:30 p.m., or as soon thereafter as feasible.

ENGINEER'S REPORT
CITY OF RANCHO CORDOVA
LIGHTING DISTRICT NO. 2012-1
FISCAL YEAR 2026-27

The undersigned, acting on behalf of Francisco & Associates respectfully submits the enclosed Engineer's Report as directed by the Rancho Cordova City Council pursuant to the provisions of Article XIIID, Section 4 of the California Constitution, provisions of the Landscaping and Lighting Act of 1972 and Section 22500 et al of the California Streets and Highways Code. The undersigned certifies that he is a Professional Engineer, registered in the State of California.

Dated: April 20, 2026

Eduardo R. Espinoza, P.E.
R.C.E. No. 83709

SECTION I

INTRODUCTION

Pursuant to the provisions of the Landscape and Lighting Act of 1972, being Part 2 of Division 15 of the California Streets and Highways Code, commencing with Section 22500 (hereafter referred to as the "1972 Act"), the City Council of the City of Rancho Cordova, County of Sacramento, State of California (hereafter referred to as "City"), has by resolution initiated proceedings in connection with the ongoing maintenance and operation of a special benefit assessment district designated as:

Rancho Cordova Lighting District No. 2012-1

(hereafter referred to as "District"), for the purpose of continuing and providing for the ongoing maintenance, servicing, and operation of public lighting improvements (safety lights and streetlights) within the City that had been administered by the County of Sacramento as Zone 2 of County Service Area 1 (CSA 1) until the Fiscal Year 2012-13 levy.

Prior to the formation of the District, the detachment of those portions of CSA 1 lying within the City limits was approved, resulting in the transfer of the responsibility of the servicing of CSA 1 improvements and related administration to the City. Commencing with the Fiscal Year 2012-13 levy, the City Council formed the District in order to provide ongoing funding for the costs and expenses required to service and maintain the safety light and streetlight improvements for the benefiting lots and parcels of land within the boundaries of the District. County Service Area 1 was created in 1986 by the Sacramento County Board of Supervisors by reorganizing five existing streetlight maintenance districts. CSA 1 was established to provide streetlight services to those unincorporated portions of Sacramento County. Since the establishment of CSA 1, the cities of Citrus Heights, Elk Grove and Rancho Cordova have been incorporated and in July 2005, the Board of Supervisors approved the creation of zones within CSA 1. The creation of these zones allowed the incorporated cities and the County to supplement CSA 1 revenues specific to those areas. This action also facilitated the eventual Local Agency Formation Commission (LAFCO) approved detachment of Elk Grove (August 2005), Citrus Heights (June 2006), and Rancho Cordova (June 2012) from CSA 1.

This Engineer's Report (hereafter referred to as "Report") has been prepared in connection with the levy and collection of annual assessments related thereto for Fiscal Year 2026-27, as required pursuant to Chapter 1, Article 4 of the 1972 Act. This Report describes the District, the improvements, and the assessments to be levied on properties within the District in connection with the special benefits the properties receive from the maintenance and servicing of the District improvements. The formation of this District and the annual assessments provide a continued funding source for the City to fund, in part, the ongoing maintenance, servicing and operation, of the safety lights and streetlights that provide special benefits to the properties within the District.

The improvements and assessments described in the Fiscal Year 2012-13 Engineer's Report (hereafter referred to as the "Formation Report") were based on the improvements and assessments previously established by the County of Sacramento for CSA 1 Zone 2. Such assessment revenues will be used to fund, in part, the annual direct expenditures and incidental expenses associated with the maintenance and servicing of the District's improvements. The formation of the District, the structure of the District (organization), the improvements, the method of apportionment, and assessments described in the Formation Report have been established to continue the maintenance of the existing improvements and assessments previously established by the County of Sacramento for CSA 1 and as such are not considered to be new or increased assessments under the provisions of the California Constitution Article XIIID.

As part of the District formation to continue the assessments previously levied by the County of Sacramento as part of CSA 1, in addition to the proceedings conducted by LAFCO for the detachment of the City of Rancho Cordova from CSA 1, the Rancho Cordova City Council conducted a noticed public hearing pursuant to the provisions of the 1972 Act to consider public testimonies, comments and written protests regarding the formation of the District and levy of assessments. At the close of the public hearing, the City Council adopted a Resolution approving the Formation Report and confirming and levying the assessments for Fiscal Year 2012-13.

Each subsequent fiscal year, an Engineer's Report shall be prepared and presented to the City Council describing the District, any changes to the District or improvements, and the proposed cost estimate and assessments for that fiscal year, and the City Council shall hold a noticed public hearing regarding these matters prior to approving and ordering the proposed levy of assessments for that fiscal year. If in any year, the proposed annual assessments for the District exceed the assessments described herein, such an assessment would be considered a new or increased assessment and must be confirmed through property owner protest ballot proceeding before that new or increased assessment may be imposed. It should be noted that an increased assessment to an individual property resulting from changes in development or land use does not constitute an increased assessment.

The word "parcel," for the purposes of this Report, refers to an individual property assigned its own Assessor's Parcel Number (APN) by the Sacramento County Assessor's Office. The Sacramento County Auditor/Controller uses Assessor's Parcel Numbers and specific Fund Numbers to identify properties to be assessed on the tax roll for special benefit assessments.

SECTION II

ENGINEER'S REPORT PREPARED PURSUANT TO THE PROVISIONS OF LANDSCAPING AND LIGHTING ACT OF 1972 SECTION 22500 THROUGH 22679 OF THE CALIFORNIA STREETS AND HIGHWAYS CODE

CITY OF RANCHO CORDOVA

LIGHTING DISTRICT NO. 2012-1
FISCAL YEAR 2026-27

Pursuant to the 1972 Act, and in accordance with the Resolution of Intention, adopted by the City Council of the City of Rancho Cordova on May 18, 2026, I, Eduardo R. Espinoza, the duly appointed Engineer of Work, Assessment Engineer for the City of Rancho Cordova Lighting District No. 2012-1 (the "District") submit the following Report, consisting of Section I (Introduction), and this Section II, which consists of five (5) parts as follows:

Part A – PLANS AND SPECIFICATIONS

This part describes the improvements maintained by the District. The District has two (2) designated benefit zones that collectively encompass all lots and parcels of land within the boundaries of the District. The two benefit zones are designated as "Safety Light Only" Zone, which includes those lots and parcels of land within the District that are associated and benefit from only safety light improvements; and the "Safety Light and Street Light" Zone, which includes those lots and parcels of land within the District that are associated and benefit from both safety light improvements and local streetlight improvements.

Part B – ESTIMATE OF COST

This part contains an estimate of the annual costs to operate, maintain, and service the District's lighting improvements and facilities. The estimate included herein is also on file at the City of Rancho Cordova.

Part C – ASSESSMENT DISTRICT DIAGRAM

This part incorporates a diagram of the District showing the exterior boundaries of the District, the boundaries of any zones within the District and the lines and dimensions of each lot or parcel of land within the District. Reference is hereby made to the County Assessor's maps for a detailed description of the lines and dimensions of each lot and parcel of land within the District. This diagram has been prepared by the Engineer of Work and is on file at the City of Rancho Cordova.

Part D – METHOD OF APPORTIONMENT OF ASSESSMENTS

This part includes a discussion of benefits the improvements and services provide to properties within the District and the method of apportionment of assessments used to calculate each property's proportional special benefit and annual assessment.

Part E –ASSESSMENT ROLL

This part contains a listing of the proposed assessment amount for each parcel within the District. The proposed assessment amount for each parcel is based on the parcel's proportional special benefit as outlined in the method of apportionment of assessments. The Assessment Roll is also filed in the Office of the City Clerk of the City of Rancho Cordova and is incorporated in this report.

Part A
PLANS AND SPECIFICATIONS

Description of the District

The territory within the District consists of all lots and parcels of land within the boundaries of the City of Rancho Cordova that in Fiscal Year 2011-12, were considered to lie within CSA 1 Zone 2. Within these boundaries, parcels are identified and grouped into one of two designated benefit zones based on the special benefits properties receive from the District improvements, namely “Safety Lights Only” or “Safety Lights and Street Lights”. The two zones within the District and the benefits associated with the properties therein are described in more detail in Part D (Method of Apportionment of Assessments) of this Report. In addition, the Assessment District Diagram in Part C of the report provides a visual representation of the District showing the exterior boundaries of the District.

Description of Improvements and Services

The purpose of this District is to ensure the ongoing maintenance, operation, and servicing of street lighting improvements within the District (improvements that had been previously funded through annual assessments from the CSA 1). The improvements may consist of all or a portion of the public street lighting and appurtenant facilities within and adjacent to the District. These improvements may include, but are not limited to the materials, equipment, utilities, labor, appurtenant facilities, and expenses necessary for the ongoing maintenance and operation of public street lighting improvements. The improvements to be maintained and funded entirely or partially through the District assessments are generally described as:

Improvements and Services Authorized by the 1972 Act

As generally defined by the 1972 Act, the improvements and associated assessments for this District may include now or in the future one or more of the following:

- The installation or construction of public lighting facilities including, but not limited to streetlights, safety lights and traffic signals;
- The installation or construction of any facilities which are appurtenant to any of the foregoing, or which are necessary or convenient for the maintenance or servicing thereof;
- The maintenance or servicing, of any of the foregoing including the furnishing of services and materials for the ordinary and usual maintenance, operation, and servicing of any improvement including but not limited to:
    - Repair, removal, or replacement of all or any part of any improvements;
    - Grading, clearing, removal of debris, the installation or construction of curbs, gutters, walls, sidewalks, or paving, or water, irrigation, drainage, or electrical facilities;
    - Electric current or energy, gas, or other illuminating agent for any public lighting facilities or for the lighting or operation of any other improvements;

Incidental expenses associated with the improvements including, but not limited to:

- The costs of the report preparation, including plans, specifications, cost estimates, diagrams, and assessment;
- The costs of printing and advertising, and publishing, posting, and mailing of notices;
- Compensation payable to the County for collection of assessments;
- Compensation of any engineer or attorney employed to render services;
- Any other expenses incidental to the construction, installation, or maintenance and servicing of the improvements;
- Costs associated with any elections held for the approval of new or increased assessments.

Public Lighting Improvements

The District's annual assessments will finance in part the maintenance, operation and servicing of the District's lighting improvements (safety lights and streetlights) which generally includes the furnishing of labor, materials, equipment and electricity for the ordinary and usual maintenance, operation, and servicing of streetlights within the public rights-of-way and easements dedicated to the City, incidental expenses including administrative costs as well as the performance of periodic repairs, replacement and expanded maintenance resulting from damage or vandalism. These services and activities more specifically may include, but are not limited to:

- Payment of the electrical bill for the safety lights and streetlights.

- Maintenance, repair and replacement of light poles and fixtures, including changing light bulbs, painting, photoelectric cell repair or replacement, and repairing damage caused by automobile accidents, vandalism, time, and weather, including principal and interest related to funding of the replacement of the improvements.

- Electrical conduit and pull box repair and replacement due to damage by construction and weather.

- Monitoring of the Underground Service Alert (USA) network, identification of proposed excavation in the vicinity of lighting electrical conduits and marking the location of those underground conduits in the field to prevent damage by excavation.

- Services and maintenance repair and replacement including painting, replacing worn out electrical components and repairing damage due to accidents, vandalism, and weather.

- Remedial projects for major repairs or upgrading of facilities. Construction for such projects is usually performed by contract, however City maintenance workers may execute small projects.

- Streetlight inventory database, pole numbering and mapping to establish the number of streetlights that must be maintained, as well as the condition and location of these streetlights as part of an effective maintenance program.

- Acquisition of land, easements, and rights-of-way necessary to maintain the street and safety lighting system.

- Responding to citizens and Council member inquiries and complaints regarding street lighting. Resolving complaints may require an engineering study and possible project.

For the purpose of determining benefit and the proportional assessment of special benefit, the light fixtures to be maintained by the District are defined as either “Street Lights” or “Safety Lights”. Safety Lights are lights located at intersections on major streets and along the rear of properties that abut major streets. All other lights are designated as Street Lights. The following table provides a summary of the safety light and streetlight inventory within the City upon formation of the District. Detailed maps identifying the location and extent of the District’s Safety Lights and Street Lights at that time are on file in the Public Works Department of the City.

Type of Light	Number of Lights
Safety Lights	428
Street Lights	4,240
Total District Lights	4,668
Decorative Lights (1)	92
Total City Lights	4,760

(1) The 92 decorative lights shown above were contained within a single residential development and these lights are funded by a separate revenue source levied on those parcels. Therefore, these lights are not included as part of the District’s improvements, budget or assessments. Parcels within this residential development are included in the “Safety Light Only” zone.

Part B

ESTIMATE OF COSTS

The maximum assessment revenue shown herein is based on the cost of providing for the District improvements and does not include any other assessments or charges imposed on the properties. The cost estimate within this report identifies the cost to maintain the improvements within each specified zone of the District.

The District maintains two separate reserves, one is utilized for working capital purposes (the “Operating Reserve”) and the other for longer-term projects (the “Capital Projects Reserve”). The Operating Reserve provides cash for the ongoing operations and maintenance of the District, as well as providing funding for unanticipated expenditures. The size of the Operating Reserve is limited by Streets and Highways Code Section 22569, which states that an Operating Reserve shall not exceed the estimated costs of maintenance and services from the first day of the fiscal year (July 1) to the date that the City expects to receive the first apportionment of collections from the County. The City has determined that all cost estimates as presented in this report shall be considered as costs to maintain and service the District, or incidental expenses thereof, as to the application of the Streets and Highways Code Section 22569. In addition, the Capital Projects Reserve can be used to finance rehabilitation projects, repairs, or replacement of District improvements.

The cost estimate for the District prepared by the City for Fiscal Year 2026-27 follows on the next page.

City of Rancho Cordova Lighting District No. 2012-1 Fiscal Year 2026-27 Cost Estimate Summary	Safety Lights	Street Lights	Total Cost Estimate
DIRECT COSTS			
Electrical Costs	$ 30,750	$ 174,250	**$ 205,000**
Maintenance Costs	$ 5,250	$ 34,750	**$ 40,000**
Repairs/Replacements & Capital Expenditures	$ 12,000	$ 68,000	**$ 80,000**
USA Markings	$ 12,000	$ 68,000	**$ 80,000**
RCLD Loan Principal	$ 20,479	$ 116,050	**$ 136,530**
RCLD Loan Interest	$ 361	$ 2,044	**$ 2,405**
Special Projects		$ -	**$ -**
Total Direct Costs	**$ 80,840**	**$ 463,094**	**$ 543,935**
ADMINISTRATION COSTS			
District Administration	$ 8,850	$ 50,150	**$ 59,000**
Contract Administration	$ 10,500	$ 59,500	**$ 70,000**
County Collection Fees	$ 2,290	$ 12,978	**$ 15,268**
Miscellaneous Administrative Expenses	$ 95	$ 536	**$ 630**
Total Administration Costs	**$ 21,735**	**$ 123,163**	**$ 144,898**
Total Direct and Administration Costs	**$ 102,575**	**$ 586,258**	**$ 688,833**
MISCELLANEOUS COSTS AND COLLECTIONS/(CREDITS) APPLIED TO LEVY			
Replenishment/(Use) of Operating Reserve	$ (24,173)	$ (287,528)	**$ (311,701)**
Contribution/(Use) of Capital Project Reserve	$ -	$ -	**$ -**
General Benefit Contribution[1]	$ (9,000)	$ -	**$ (9,000)**
Other Revenue Contributions	$ -	$ -	**$ -**
Miscellaneous Costs and Collections/(Credits) Applied to Levy	**$ (33,173)**	**$ (287,528)**	**$ (320,701)**
Balance to Levy[2]	**$ 69,402**	**$ 298,730**	**$ 368,132**
DISTRICT STATISTICS & ASSESSMENT RATES			
Parcels Levied	27,110	13,576	**27,110**
Front Footage (Non-Residential)	N/A	549,391	**549,391**
Residential Parcels	N/A	10,467	**10,467**
Per Parcel Rate - Safety Lights	$ 2.56	N/A	
Per Parcel Rate - Street Lights (Residential)	N/A	$ 15.32	
Per Front Foot Rate - Street Lights (Non-Residential)	N/A	$ 0.2519	
Estimated Maximum Assessment Revenue[2]	**$ 69,402**	**$ 298,730**	**$ 368,131**
Variance above/(below) Maximum Revenue	**$ -**	**$ -**	**$ -**

Ending Operating Reserve Fund Balance 6-30-2027 (est.)[3]	**$ (24,173)**	**$ (287,528)**	**$ (530,187)**
Capital Project Reserve Fund Balance			
Beginning Capital Project Reserve Fund Balance 7-1-2026 (est.)	$ -	$ -	**$ -**
Replenishment/Use of Capital Project Reserve	$ -	$ -	**$ -**
Transfer from/(to) Operating Reserve	$ -	$ -	**$ -**
Ending Capital Project Reserve Fund Balance 6-30-2027 (est.)	**$ -**	**$ -**	**$ -**

(1) The General Benefit Contribution was calculated at 25% of the annual Electrical and Maintenance costs associated with Safety Lighting.

(2) The annual levy may differ slightly from the maximum revenue shown due to rounding because of rounding limitations imposed by the County of Sacramento.

(3) Negative fund balances represent funds that will need to be contributed or loaned from an appropriate funding source outside the assessment district.

A description of the terms used in the preceding Cost Estimate table are listed on the following pages.

Direct Costs (Maintenance and Operation)

Direct Costs include the regular annual costs of maintaining and servicing lighting improvements. This may include, but is not limited to, the costs for labor, utilities, equipment, and supplies that are required to properly maintain the items that provide a direct benefit to the properties within the District. Specific Direct Costs may include, but are not limited to:

Electrical Costs — Includes the cost of providing electricity to the lights. Additionally, some lights may be maintained by the Sacramento Municipal Utility District ("SMUD") and the cost for maintenance of these lights is included as part of the utility bill for those lights.

Maintenance Costs — Includes the contract labor associated with the maintenance of the lights and the cost of the preparing and maintaining the light inventory.

Repairs/Replacements & Capital Expenditures — Includes but is not limited to activities needed to support the improvements that are not included or considered to be costs associated with the regular annual maintenance, servicing, and operation of the District improvements. Additionally, this item may include repairs that are only required periodically, repairs and replacements resulting from damage or vandalism, capital improvement expenditures to rehabilitate or upgrade the improvements, and collection of funding (installments) for future capital improvement projects. The amount collected each fiscal year is based on an estimate of current and future needs but may be limited by available funding (assessment revenues and City contributions).

USA Markings – includes costs associated with marking the location of underground utilities related to the above.

RCLD Loan Principal - Amounts of principal due to repay a low interest California Energy Commission (CEC) loan to fund the retrofitting of existing streetlights located within the District with new LED streetlights which will reduce energy costs.

RCLD Loan Interest - Amounts of interest due to repay a low interest California Energy Commission (CEC) loan to fund the retrofitting of existing streetlights located within the District with new LED streetlights which will reduce energy costs.

Special Projects - Includes costs for minor special project(s) related to annual maintenance and or operation of the improvements not described in the above categories.

Special Capital Projects - Includes costs expected to be incurred in any specific fiscal year for special capital projects shown in the District's Capital Improvement Plan. Costs in this category do not increase the annual levy as the Capital Improvement Reserve is used to fund these costs. For this reason, these costs may not be shown in the annual cost estimate.

Administration Costs

Annual Administration Costs include incidental District costs not included above that are required on an annual basis. Specific Administration Costs may include, but are not limited to:

District Administration - Includes the estimated cost to coordinate District services including responding to property owner inquiries relating to the assessments and services and contracting with professionals to provide administration, legal, and engineering services to the District that are required on an annual basis. This also includes the costs for the City to account for the funds, the calculation of the assessments, preparation of the annual report, and placing the assessment on the property tax bills.

Contract Administration - Estimated costs to coordinate and oversee the applicable maintenance and operation contracts and overall repair, maintenance, operation, and replacements of the District Improvements.

County Collection Fees - Includes the cost that the County charges to place the assessments onto the Sacramento County Secured Tax Roll.

Miscellaneous Administration Expenses - Includes other minor administrative costs such as telephone, copying, noticing, mailing, office supplies and fees related to District Administration.

Total Direct and Administration Costs - This is the total of the Direct and Administration Costs, which are the direct and incidental costs for the regular annual maintenance, servicing, and operation of the District improvements.

Miscellaneous Costs and Collections/(Credits) Applied to Levy

Miscellaneous Cost and Collections/(Credits) Applied to the Levy represent the expected contributions and funding from sources other than the current year assessments to support the annual costs included for the maintenance, servicing, and operation of the District improvements.

Replenishment/(Use) of Operating Reserve - A “Replenishment” increases the levy in order to replenish the Operating Reserve. On the other hand, a “Use” of the Operating Reserve decreases the levy by drawing funds from the Operating Reserve for current year expenditures. If zero, this line item may not be shown in the cost estimate. Further information regarding the function of the Operating Reserve is provided in the following pages of this section.

Contribution/(Use) of Capital Projects Reserve - A “Contribution” increases the levy in order to generate funding for the Capital Projects Reserve. This reserve allows for the accumulation of funds for the possible rehabilitation of projects or replacement in future years. On the other hand, a “Use of” the Capital Projects Reserve provides current year funding of rehabilitation projects or replacement from available funds within the Capital Projects Reserve. If the expenditure of a current year capital project is funded entirely by a collection from the current fiscal year levy and/or a transfer from the Operating Reserve, this line item may show as zero, which is the net of the two amounts. If zero, this line item may not be shown in the cost

estimate. Further information regarding the function of the Capital Projects Reserve is provided in the following pages of this section.

General Benefit Contribution – This amount represents funding from the City or other, utilizing revenue sources other than assessment revenues to pay the proportional costs for the regular annual maintenance, servicing and operation of the District improvements that have been determined to be of General Benefit and which cannot be assessed to property owners. This funding may be from the City's General Fund or any other funding source available.

Other Revenue Contributions - Additional funds designated for use by the District that are not District assessments. Often referred to as a City Contribution, these funds may be from any source available to the City to support the District and reduce the amount to be collected by the District assessments. If the Total Direct and Administration Costs minus any Reserve Fund Transfer and General Benefit Contribution results in an amount greater than the amount that can be collected through the assessments, the City either must reduce expenses or contribute funds to balance the cost estimate.

Balance to Levy - This is the total amount to be levied and collected through assessments for the current fiscal year for each zone. The Balance to Levy represents the sum of the Total District Direct and Administration Costs together with any applicable adjustments associated with Miscellaneous Costs and Collections/(Credits) as described above.

District Statistics and Assessment Rates

Parcels Levied - The total number of parcels within each zone that are expected to be assessed. Non-assessable lots or parcels include government-owned land, public utility-owned property, land principally encumbered by public right-of-way or easements, common areas, and/or parcels within the boundaries of the District that currently do not benefit from the improvements.

Front Footage - The total assessable front footage for non-residential property that are expected to be assessed on a front footage basis for the current fiscal year.

Residential Parcels – The total number of assessable residential parcels subject to the street lighting assessment.

Per Parcel Rate – Safety Lights - The maximum assessment rate that can be assessed to each assessable parcel within the respective zone for the current fiscal year.

Per Parcel Rate – Streetlights (Residential) - The maximum assessment rate that can be assessed to each assessable residential parcel for streetlights for the current fiscal year.

Per Front Foot Rate – Streetlights (Non-Residential) - The maximum assessment rate that can be assessed to each front foot of non-residential property for streetlights for the current fiscal year.

Estimated Maximum Assessment Revenue – The total amount that can be assessed to all parcels within each zone for the current fiscal year based upon the expected number of assessable parcels and front footage using the maximum assessment rates.

Operating Reserve Fund Balance

Beginning Reserve Fund Balance 7-1-2026 (est.) - The anticipated beginning balance of cash and receivables, net of any unpaid prior year obligations. These beginning balances shall be used to fund expenditures from July 1, 2026 to December 31, 2026, as the Operating Reserve is required to compensate for the approximate six-month delay between the start of the District's fiscal year and the receipt of the collections from the County. The Capital Projects Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the report.

Replenishment/(Use) of Operating Reserve – Due to the six-month delay from the District's receipt of assessment collections, the Operating Reserve is intended to fund expenditures from the period of July 1, 2026 (the beginning of the fiscal year) through December 31, 2026. If positive, this amount is added to the levy in order to replenish the Operating Reserve. On the other hand, if negative, this portion of the Operating Reserve is used to fund Fiscal Year 2026-27 expenses and therefore reduces the levy amount. If zero, this line item may not be shown in the cost estimate.

Transfer from/(to) the Capital Project Reserve — The amount of Operating Reserve monies to be transferred to or from the Capital Projects Reserve. Periodically, funds held in a Capital Project Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Capital Project Reserve are subject to transfer to the Operating Reserve, at the discretion of the Public Works Department, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the cost estimate.

Ending Operating Reserve Fund Balance 6-30-2027 (est.) - This amount represents the anticipated Operating Reserve balance/(deficit) as of June 30, 2027. The size of the Operating Reserve is limited by Streets and Highways Code Section 22569 which states that an Operating Reserve shall not exceed the estimated costs of maintenance and service from the first day of the fiscal year (July 1) to the date that the agency expects to receive the first apportionment of collections from the County, which is estimated to be December 31. Therefore, the District may retain an Operating Reserve amounting to the District's first six-months of expenses in order to meet ongoing obligations until the first collections are received from the County. All Capital Project Reserve balances, if any, are excluded from the Operating Reserve balances and shall be shown separately in the report.

Capital Project Reserve Fund Balance

Beginning Capital Project Reserve Fund Balance 7-1-2026 (est.) — The projected balance of funds in the Capital Project Reserve as of July 1, 2026. Streets and Highways Code Section 22660 allows the District to generate and accumulate funds over several years to fund District improvements that cannot be conveniently raised from a single year's assessment.

Use for Fiscal Year 2026-27 Capital Projects – The amount expected to be incurred for Capital Projects in Fiscal Year 2026-27 and funded from the Capital Projects Reserve rather than the Fiscal Year 2026-27 levy. If zero, this line item may not be shown in the cost estimate.

Transfer from/(to) the Operating Reserve — The amount of Capital Project Reserve monies to be transferred to or from the Operating Reserve. Periodically, funds held in a Capital Project Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in a Capital Project Reserve are subject to transfer into the Operating Reserve, at the discretion of the Public Works Department, in order to provide for the maintenance and operation of the improvements. If zero, this line item may not be shown in the cost estimate.

Ending Operating Reserve Fund Balance 6-30-2027 (est.) - The projected balance of funds in the Capital Projects Reserve as of June 30, 2027. These funds shall be used to fund the costs of installation, replacement, repair or upgrading of District improvements which cannot be conveniently raised from a single year's assessment.

Should the District have no Capital Projects Reserve or related activity for the current fiscal year, the Capital Projects Reserve information will not be presented in the report.

Capital Projects Reserve - Capital Improvement Plan

Streets and Highways Code Section 22660 allows the District to generate and accumulate funds over several years to finance District improvements that cannot conveniently be funded through a single year's assessment. The projected fiscal year-end balance of the Capital Project Reserve Fund will be maintained to support future capital improvements, including the installation, replacement, repair, or upgrading of District improvements, and other allowable costs.

Periodically, funds held in the Capital Projects Reserve may be needed to respond to changing maintenance needs of the improvements or other factors. Accordingly, any or all funds held in the Capital Projects Reserve may be transferred to the Operating Reserve, at the discretion of the Public Works Department, to provide for the maintenance and operation of the improvements.

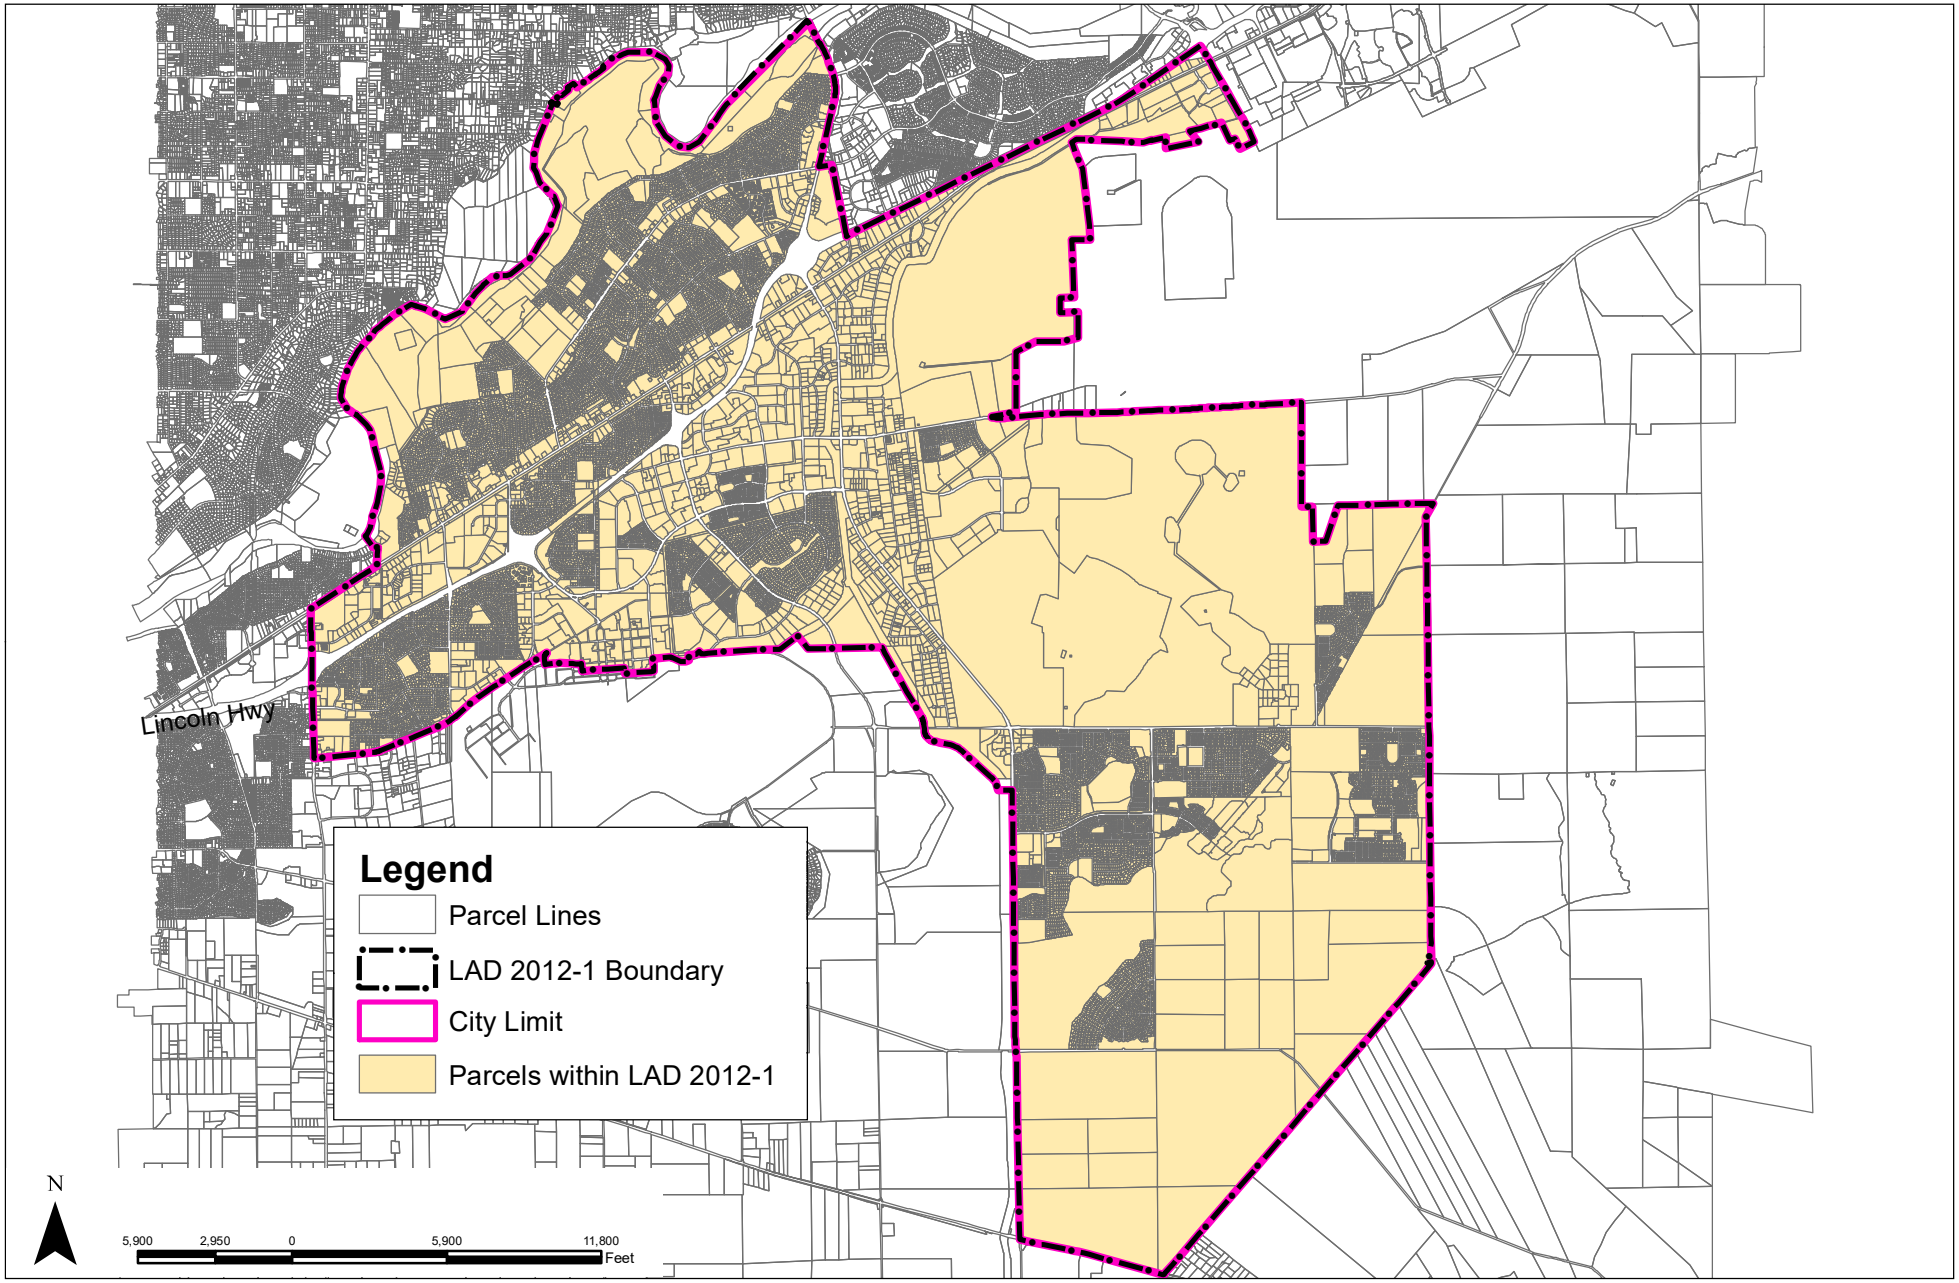

Part C

ASSESSMENT DISTRICT DIAGRAM

The parcels to be assessed consist of all lots, parcels and subdivisions of land located within the boundaries of the map designated as “Assessment Diagram of Rancho Cordova Lighting District No. 2012-1.” The lines and dimensions of each parcel within the District are those lines and dimensions shown on the maps of the Sacramento County Assessor for the year in which this report was prepared and are incorporated herein and made part of this report.

A reduced copy of the Assessment Diagram is attached on the following page.

City of Rancho Cordova
Lighting District No. 2012-1
Assessment District Diagram

Part D
METHOD OF APPORTIONMENT OF ASSESSMENTS

The 1972 Act permits the establishment of assessment districts by agencies for the purpose of providing certain public improvements, which include but are not limited to the construction, maintenance, operation, and servicing of public street lighting improvements and appurtenant facilities. The 1972 Act further requires that the cost of these improvements be levied according to benefit rather than assessed value:

> *"The net amount to be assessed upon lands within an assessment district may be apportioned by any formula or method which fairly distributes the net amount among all assessable lots or parcels in proportion to the estimated benefits to be received by each such lot or parcel from the improvements."*

In conjunction with the provisions of the 1972 Act, the California Constitution Article XIIID addresses several key criteria for the levy of assessments, notably:

Article XIIID Section 2d defines District as:

> *"District means an area determined by an agency to contain all parcels which will receive a special benefit from a proposed public improvement or property-related service".*

Article XIIID Section 2i defines Special Benefit as:

> *"Special benefit" means a particular and distinct benefit over and above general benefits conferred on real property located in the district or to the public at large. General enhancement of property value does not constitute "special benefit."*

Article XIIID Section 4a defines proportional special benefit assessments as:

> *"An agency which proposes to levy an assessment shall identify all parcels which will have a special benefit conferred upon them and upon which an assessment will be imposed. The proportionate special benefit derived by each identified parcel shall be determined in relationship to the entirety of the capital cost of a public improvement, the maintenance and operation expenses of a public improvement, or the cost of the property related service being provided. No assessment shall be imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel."*

The method of apportionment established herein is based on the premise that each assessed property receives special benefits from the maintenance, servicing and operation of either safety lights located throughout the District or both safety lights and local streetlights, and these improvements will be funded in part by such assessments, and the assessment obligation for each parcel reflects that parcel's proportional special benefits as compared to other properties that receive such special benefits as outlined in the preceding definitions established in the 1972 Act and the California Constitution.

Benefit Analysis

To identify and determine the proportional special benefit to each parcel within the District, as well as any general benefit associated with the improvements, it is necessary to consider the entire scope of the improvements provided as well as the properties that benefit from those improvements. The District's improvements and the associated costs described in this report, have been carefully reviewed and have been identified and allocated based on a benefit rationale and calculations that proportionally allocate the net cost of only those improvements determined to be of special benefit to properties within the District, and is consistent with the method of apportionment previously established for the assessments as part of CSA 1.

While the California Constitution requires that *"The proportionate special benefit derived by each identified parcel shall be determined in relationship to the entirety of the capital cost of a public improvement or the maintenance and operation expenses of a public improvement…";* it is reasonable to conclude that the reasons for installing local streetlights are often similar, but somewhat different than the reasons for installing safety lights. Therefore, the overall benefits associated with streetlights and safety lights are different, which also suggests that the apportionment of the cost to provide those improvements would be different.

In reviewing the location and extent of the City's Street Light improvements to be funded by District assessments and the relationship these improvements have to properties within the District, it was determined that these lights are entirely local lighting improvements that were installed specifically in connection with the development of nearby properties or were necessary as a precursor to property development and would otherwise not have been necessary or required without the development of the properties near those improvements. As such, these Street Light improvements have a direct and particular relationship to, and provide special benefit to, the properties located in close proximity to those lighting improvements and serve as extension of those properties and developments into the public areas (streets) that serve those properties. These lights clearly provide special benefits that affect these properties in a way that is particular and distinct from its effect on other parcels, and that of real property in general and the public at large do not share. This is most evident in the fact that the District's Street Light improvements are concentrated within the City's various residential developments and developed non-residential areas and the absence of such lights within many portions of the undeveloped areas of the District. The fact that these lights are a direct result of property development and many areas of the City forgo the need of local street lighting, the maintenance and operation costs associated with the Street Light improvements are considered to be solely a special benefit to those properties and developments in close proximity to those lights and have no measurable general benefit to the public at large or to the District as a whole. However, it is also recognized that these lights are not exclusive or typically isolated to a particular parcel but are rather shared and directly affect entire neighborhoods or groups of parcels. In this District, it has been determined that each parcel that is assessed for Street Lights is at least within approximately two-hundred feet (200 feet) of a streetlight although that light may be located across the street from the parcel.

As previously noted, Safety Lights are lights located at intersections on major streets and along the rear of properties that abut major streets. Although the location and extent of these lights are most certainly driven by development of properties in the area (concentrated largely in developed areas of the City), unlike the Street Light improvements which are directly correlated to specific developments and parcels, the District's Safety Lights are not entirely the result of specific property development, but more the result of overall development throughout the City and in addition to directly benefiting the properties in the District, these Safety Lights provide nighttime traffic illumination to enhance traffic circulation and safety.

Therefore, while the need for such lights is most often facilitated by development in the area and certainly a special benefit to properties within the District because safety lights promote nighttime traffic illumination and circulation for the general public as well as for properties in the District, these lights obviously provide some measure of benefit to the community as a whole and to the public at large (general benefit). In order to separate general benefits from special benefits, an evaluation of the overall extent and location of the Safety Light in the City, revealed that less than half (approximately 47%) of the Safety Lights within the District are located on major streets that are considered through-traffic corridors, namely Bradshaw Road, Folsom Boulevard and Sunrise Boulevard. The remaining Safety Lights within the City were located on streets and intersections considered internal City traffic routes that provide direct access to the parcels in the District. Therefore, it would be reasonable to conclude that like the local Street Light improvements, the Safety Light improvements located on these internal City traffic routes (approximately 53% of the Safety Lights at the time of formation of the District) are entirely for the special benefit of the properties they serve, while the Safety Lights on the through-traffic corridors provide comparable (proportionately equal) special benefit to properties in the District and general benefit to real property in general and the public at large. Therefore, collectively, it has been determined that no more than 25% of the total direct costs (maintenance and operation costs) of providing Safety Lights would be considered general benefit.

Zones of Benefit

In order to calculate and identify the proportional special benefit received by each parcel and their proportionate share of the improvement costs it is necessary to consider not only the improvements and services to be provided, but the relationship each parcel has to those improvements as compared to other parcels in the District.

Article XIIID Section 4a reads in part:

> *"…The proportionate special benefit derived by each identified parcel shall be determined in relationship to the entirety of the capital cost of a public improvement or the maintenance and operation expenses of a public improvement or for the cost of the property related service being provided. No assessment shall be imposed on any parcel which exceeds the reasonable cost of the proportional special benefit conferred on that parcel."*

In an effort to ensure an appropriate allocation of the estimated annual cost to provide the District improvements based on proportional special benefits, this District has established benefit zones ("Zones") as authorized pursuant to Chapter 1 Article 4, Section 22574 of the 1972 Act:

> *"The diagram and assessment may classify various areas within an assessment district into different zones where, by reason of variations in the nature, location, and extent of the improvements, the various areas will receive differing degrees of benefit from the improvements. A zone shall consist of all territory which will receive substantially the same degree of benefit from the improvements."*

Therefore, in order to separate general benefits from special benefits and to ensure each parcel is assessed for only the special benefits received from the improvements, two benefit zones have been established and every parcel in the City is grouped into one of these two Zones:

- "Safety Lights Only" Zone: Includes all parcels that receive special benefits from the maintenance of Safety Lights only, which includes lights located at intersections on major streets and along the rear of properties that abut major streets.

- "Streetlights and Safety Lights" Zone: Includes all remaining parcels within the City that specially benefit from maintenance of Street Lighting (local lights) as well as Safety Lights.

The District cost estimate incorporated herein under Part B of this report provides a summary of the total estimated cost of providing the streetlight improvements and the allocation of those costs that are considered general benefit. Details regarding the location and extent of the street lighting improvements within the District and the Zones therein upon formation of the District are on file in the Public Works Department of the City. A diagram showing the exterior boundaries of the District and the location of the two zones therein at the time of formation is attached and incorporated herein under Part C of this report.

Assessment Methodology

In order to calculate and identify the proportional special benefit received by each parcel and their proportionate share of the improvement costs, it is necessary to consider not only the improvements and services to be provided, but the relationship each parcel has to those improvements as compared to other parcels in the District.

Safety Lights and Street Lights, like most public improvements, provides varying degrees of benefit (whether they be general or special) based largely on the extent of such improvements, the location of the improvements in relationship to the properties, the specific use of each property, and the reason or need for such improvements as it relates to individual properties. In this District, these issues were each considered in determining the proportional special benefit to each parcel by the use of benefit zones, the separation of general benefit and special benefit, and County land use designations.

Safety Lights

Safety Lights are located throughout the District and properties throughout the City are considered to benefit proportionally from Safety Lights and are therefore levied a flat rate calculated by the following formula.

Net Safety Light Cost / Total Assessable Parcels = Levy per Parcel

Streetlights

Only properties that benefit from Street Lights are charged for Street Lights. Parcels are classified based on land use into two categories: Residential and Non-Residential. Residential parcels that have streetlights are levied equally. Non-Residential are levied on a front footage basis. Formulas for both Non-Residential and Residential parcels are illustrated below.

Residential Parcels

Net Residential Street Light Cost / Residential Parcels=Levy per Residential Parcel

Non-Residential Parcels

Net Non-Residential Street Light Cost / Non-Residential Front Footage = Levy per Non-Residential Front Foot

Levy per Non-Residential Front Foot x Non-Residential Parcel Front Footage= Levy per Parcel

In addition, each Fiscal Year, the City provides annexation documents showing the list of parcels that were annexed into the City of Rancho Cordova Community Facilities District No. 2008-1 (the “CFD No. 2008-1”) and the City of Rancho Cordova Community Facilities District No. 2014-1 (the “CFD No. 2014-1”). Both CFD No. 2008-1 and CFD No. 2014-1 provide services for street lighting in the City. Parcels that are annexed into CFD No. 2008-1 and CFD No. 2014-1 are not subject to the Street Light Assessment portion for the City of Rancho Cordova Lighting District No. 2012-1 and are only assessed for safety lights.

Exempt

Exempted from the assessment would be the areas of public streets and other roadways (typically not assigned an APN by the County), dedicated public easements, open space areas and rights-of- ways including public greenbelts and parkways. Also exempted from assessment would be utility rights-of-ways, common areas (such as in condominium complexes), landlocked parcels, small parcels vacated by the County, bifurcated lots, and any other property that cannot be developed. These types of parcels do not benefit from the improvements.

The land use classification for each parcel has been determined and based on the Sacramento County Assessor’s most recent secured roll.

Rates

The following Tables show the assessment rates proposed to be levied in Fiscal Year 2026-27 and an estimate of the revenue to be assessed. It is important to note that these rates are the same rates applied to the District parcels under CSA 1 and that these rates have not increased since the passage of Proposition 218 in 1996.

Proposed Fiscal Year 2026-27 Assessment Rates	
Improvement Type	**Proposed Rates**
Safety Lights	$2.56 per parcel
Street Lights	$15.32 per parcel
Street Lights (Non-Residential) *	$0.2519 per front foot

* Non-Residential parcels include commercial and multi-family properties.

Estimated Fiscal Year 2026-27 Assessment Revenues				
Benefit Classifications	**Applied Rates**	**Parcels**	**Applied Front Footage**	**Total Estimated Revenue**
Safety Light Only	$2.56 per Parcel	13,534	N/A	$ 34,647.04
Street and Safety Light (Residential)	$2.56 + $15.32 per Parcel	10,467	N/A	$ 187,149.96
Street and Safety Light (Non-Residential)	$2.56 per Parcel + 0.2519 per front foot	3,109	549,391	$ 146,334.28
Totals		**27,110**	**549,391**	**$ 368,131.28**

(1) The annual levy may differ slightly due to rounding because of rounding limitations imposed by the County of Sacramento.

Part E

ASSESSMENT ROLL

Parcel identification for each lot or parcel within the District is based on the Assessment Diagram presented herein and is based on available parcel maps and property data from the County Assessor's Office at the time the Engineer's Report was prepared. A listing of the proposed lots and parcels to be assessed within this District along with the assessment amounts is provided herein.

If any parcel submitted for collection is identified by the County Auditor/Controller to be an invalid parcel number for the fiscal year, a corrected parcel number and/or new parcel numbers will be identified and resubmitted to the County Auditor/Controller. The assessment amount to be levied and collected for the resubmitted parcel or parcels shall be based on the method of apportionment and assessment rate described in this report as approved by the City Council. Therefore, if a single parcel is subdivided to multiple parcels, the assessment amount applied to each of the new parcels shall be recalculated and applied according to the approved method of apportionment and assessment rate rather than a proportionate share of the original assessment.

The following is a list of the parcels and proposed assessment amounts for each of the parcels within the District as determined by the assessment rates and method of apportionment described herein.

MEMORANDUM

ITEM 9.6.

DATE: May 18, 2026

TO: Honorable Mayor and Council Members

FROM: Albert Stricker, Public Works Director
Marc Hill, Solid Waste Manager

SUBJECT: **A RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE CONTRACT NO. 2026-58 WITH THE RANCHO CORDOVA COMMUNITY FOOD HUB IN AN AMOUNT NOT TO EXCEED $750,000 FOR THE PROVISION OF EDIBLE FOOD RECOVERY OUTREACH, INSPECTIONS AND FOOD RECOVERY SERVICES TO COVERED GENERATORS IN THE CITY AS REQUIRED BY STATE LAW**

RECOMMENDATION

Adopt the Resolution.

RESULT OF RECOMMENDED ACTION

Adoption of the Resolution would authorize the City Manager to execute Contract No. 2026-58 with the Rancho Cordova Community Food Hub in an amount not to exceed $750,000 for edible food recovery outreach, inspections and food recovery services through June 30, 2031.

BACKGROUND

California's Short Lived Climate Pollutant strategy (SB 1383) requires that by 2025, California will recover 20 percent of edible food that would otherwise be sent to landfills to feed people in need. The law directs the following:

- Jurisdictions must establish food recovery programs and strengthen their existing food recovery networks, including the following.
    - Identify commercial edible food generators within their jurisdiction.
    - Provide annual education and outreach.
    - Assess their community's food recovery capacity and plan for additional capacity, if needed.
    - Verify that commercial edible food generators have established a contract or written agreement for food recovery and are maintaining records of their food donation activities.
- Food donors must arrange to recover the maximum amount of their edible food that would otherwise go to landfills.
- Food recovery organizations and services that participate in SB 1383 must maintain records.

Food Recovery Organizations (FROs) are uniquely positioned to fulfill the edible food recovery mandates in SB 1383 and the city is allowed to delegate these responsibilities to an entity via contract. FROs have existing relationships with edible food generators; are familiar with the proper handling of edible food to maximize recovery; and have experience managing programs like this from the point of collection to distribution to those in need. In addition, the city recognizes that providing food recovery to local food generators costs Food Recovery Organizations money, so directly funding this activity in concert with other responsibilities accomplishes two goals with one agreement. To that end, the city released a Request for Proposals solicitation on August 29, 2025, and proposals from two recovery organizations operating in the city were received by the closing date of September 30, 2025. Both organizations were interviewed, and an evaluation committee selected the Rancho Cordova Community Food Hub as the preferred contractor based on experience, capacity, and knowledge and association with the existing edible food recovery network.

FISCAL IMPACT AND FUNDING SOURCE

This contract is funded through solid waste franchise fees via the Public Works operating budget and has no impact on the General Fund.

CITY OF RANCHO CORDOVA

RESOLUTION NO. XX-2026

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA, STATE OF CALIFORNIA, AUTHORIZING THE CITY MANAGER TO EXECUTE CONTRACT NO. 2026-58 WITH THE RANCHO CORDOVA COMMUNITY FOOD HUB IN AN AMOUNT NOT TO EXCEED $750,000 FOR THE PROVISION OF EDIBLE FOOD RECOVERY OUTREACH, INSPECTIONS AND FOOD RECOVERY SERVICES TO COVERED GENERATORS

WHEREAS, State law requires local governments to arrange for the maximum recovery of edible food from regulated generators; and

WHEREAS, State law requires local governments perform inspections and provide education and outreach to regulated edible food generators; and

WHEREAS, the City of Rancho Cordova desires to execute Contract No. 2026-58 with the Rancho Cordova Community Food Hub in an amount not to exceed $750,000 for the provision of Edible Food Recovery Outreach, Inspections and Food Recovery Services to Covered Generators through June 30, 2031; and

WHEREAS, the city solicited proposals for this work on August 29, 2025, with two proposals being submitted by the closing date of September 30, 2025. After conducting interviews with both organizations that submitted a proposal, evaluators unanimously selected the Rancho Cordova Community Food Hub as best positioned to fulfill the edible food recovery requirements; and

WHEREAS, the scope of services for this 60-month engagement will allow the Rancho Cordova Community Food Hub to recover the maximum amount of edible food generated in the City as well as perform education, outreach and inspections of edible food generators as required by SB 1383; and

WHEREAS, this contract is funded through solid waste franchise fees via the Public Works Operating Budget; and

WHEREAS, the annual value of services in this contract will exceed the maximum amount the City Manager has authorization to approve.

NOW, THEREFORE, BE IT HEREBY RESOLVED THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA does authorize the City Manager to execute Contract No. 2026-58 with the Rancho Cordova Community Food Hub in an amount not to exceed $750,000 in a form approved by the City Attorney.

PASSED AND ADOPTED by the City Council of the City of Rancho Cordova on the 18th day of May 2026 by the following vote:

AYES:

NOES:

ABSENT:

ABSTAIN:

ATTEST:

Garrett Gatewood, Mayor

Stacy Leitner, CMC
City Clerk

**GENERAL SERVICES AGREEMENT BETWEEN
THE CITY OF RANCHO CORDOVA AND RANCHO CORDOVA COMMUNITY FOOD HUB**

THIS AGREEMENT (hereinafter referred to as "Agreement") is made by and between the City of Rancho Cordova, a California municipal corporation, (herein "City") and Rancho Cordova Community Food Hub (herein "Contractor"), as of July 1, 2026.

SECTION 1. SERVICES. Subject to the terms and conditions set forth in this Agreement, Contractor shall provide to City the services described in the Scope of Services attached as Exhibit A ("Services") at the time and place and in the manner as specified therein. In the event of a conflict or inconsistency between the terms of this Agreement and Exhibit A, the Agreement shall prevail.

SECTION 2. TERM. The term of this Agreement shall begin on the date first noted above and shall end on June 30, 2031, unless the term of this Agreement is otherwise terminated as provided for in Section 10. The time provided to Contractor to complete the services required by this Agreement shall not affect the City's right to terminate the Agreement, as provided for in Section 10.

SECTION 3. CONTRACT ADMINISTRATOR. This Agreement shall be administered by Marc Hill ("Contract Administrator"). All correspondence shall be directed to or through the Contract Administrator or his or her designee.

SECTION 4. COMPENSATION OF CONTRACTOR. The Contractor shall be paid SEVEN HUNDRED FIFTY THOUSAND DOLLARS ($750,000) for performance of the Services pursuant to this Agreement. The Contractor shall submit invoices to the City Finance Director on a monthly basis detailing the Services performed. In the event of a conflict between this Agreement and Exhibit A regarding the amount of compensation, the Agreement shall prevail. Upon receipt and approval of the Contractor's invoices, the City shall remit payment to the Contractor for Services provided within thirty (30) days. Payment to Contractor shall be considered as full compensation for performing the Services.

City's failure to discover or object to any unsatisfactory work or billing prior to payment will not constitute a waiver of City's right to request Contractor to correct such work or billings or seek any other legal remedy.

SECTION 5. PERFORMANCE STANDARDS. Contractor shall comply with all applicable laws now in force or which may hereafter be in force with regard to the provision of Services and this Agreement. Contractor represents that it has the skills, expertise, licenses and permits necessary to perform the Services. Contractor shall perform all such Services in the manner and according to the standards observed by a competent practitioner of the same profession in which Contractor is engaged and in accordance with applicable industry standards. Permits and/or licenses shall be obtained and maintained by Contractor without additional compensation throughout the term of this Agreement.

SECTION 6. STATUS OF CONTRACTOR.

6.1 Independent Contractor. At all times during the term of this Agreement, Contractor shall be an independent contractor as defined in Labor Code Section 3353, and shall not be an employee of City. Nothing contained in this Agreement shall be construed to be inconsistent with the foregoing relationship or status. City shall have the right to control Contractor only insofar as the results of Contractor's services rendered pursuant to this Agreement and

assignment of personnel; however, otherwise City shall not have the right to control the means and methods by which Contractor accomplishes services rendered pursuant to this Agreement. Contractor shall have no power or authority by this Agreement to bind the City in any respect. All employees and agents hired or retained by Contractor are employees and agents of Contractor and not of the City. The City shall not be obligated in any way to pay any wage claims or other claims made against Contractor by any such employees or agents, or any other person resulting from performance of this Agreement.

Notwithstanding any other City, state, or federal policy, rule, regulation, law, or ordinance to the contrary, Contractor and any of its employees, agents, and subcontractors providing services under this Agreement shall not qualify for or become entitled to, and hereby agree to waive any and all claims to, any compensation, benefit, or any incident of employment by City, including but not limited to eligibility to enroll in PERS as an employee of City and entitlement to any contribution to be paid by City for employer contributions and/or employee contributions for PERS benefits. Contractor shall not allow any employee, agent or subcontractor to become eligible for a claim for PERS benefits.

6.2 Contractor Not an Agent. Except as City may specify in writing, Contractor shall have no authority, express or implied, to act on behalf of City in any capacity whatsoever as an agent. Contractor shall have no authority, express or implied, pursuant to this Agreement to bind City to any obligation whatsoever.

SECTION 7. INSURANCE REQUIREMENTS. Prior to beginning any Services under this Agreement, Contractor, at its own cost and expense, shall procure insurance coverage at such levels of coverage, scope, limits, and/or forms as set forth in Exhibit B ("Insurance Requirements") hereto. Contractor shall provide proof satisfactory to City of such insurance and maintain the insurance throughout the term of this Agreement.

SECTION 8. INDEMNIFICATION AND CONTRACTOR'S RESPONSIBILITIES.

8.1 General Requirement. Contractor shall indemnify, defend with counsel selected by the City, and hold harmless City, its officers, agents, employees and representatives from and against any and all claims, losses, liabilities or damages, demands and actions, including payment of reasonable attorney's fees, arising out of or resulting from Services performed pursuant to this Agreement caused in whole or in part by any negligent or willful act or omission of Contractor, its officers, agents, employees, or anyone directly or indirectly acting on behalf of Contractor. The foregoing obligation of Contractor shall not apply when (1) the injury, loss of life, damage to property, or violation of law arises wholly from the negligence or willful misconduct of the City or its officers, employees, agents, or volunteers and (2) the actions of Contractor or its employees, subcontractor, or agents have contributed in no part to the injury, loss of life, damage to property, or violation of law. It is understood that the duty of Contractor to indemnify and hold harmless includes the duty to defend as set forth in Section 2778 of the California Civil Code. Acceptance by City of insurance certificates and endorsements required under this Agreement does not relieve Contractor from liability under this indemnification and hold harmless clause. This indemnification and hold harmless clause shall apply to any damages or claims for damages whether or not such insurance policies shall have been determined to apply. By execution of this Agreement, Contractor

acknowledges and agrees to the provisions of this Section and that it is a material element of consideration.

8.2 **PERS Indemnification.** In the event that Contractor or any employee, agent, or subcontractor of Contractor providing Services under this Agreement is determined by a court of competent jurisdiction of the California Public Employees Retirement System ("PERS") to be eligible for enrollment in PERS as an employee of City, Contractor shall indemnify, defend, and hold harmless City for the payment of any and all employee and/or employer contributions for PERS benefits on behalf of Contractor or its employees, agents, or subcontractors, as well as for the payment of any penalties and interest on such contributions, which would otherwise be the responsibility of City, and any attorneys' fees and costs incurred by the City to enforce this Section.

8.3 **Prevailing Wages.** To the extent required by law, Contractor and all of the Contractor's subcontractors shall comply with California Health and Safety Code Section 33422.1 and shall comply with California Labor Code Section 1770 et seq. and all regulations adopted pursuant thereto (referred to herein as, "Prevailing Wage Laws"), and be responsible for carrying out the requirements of such provisions. The Contractor shall, and hereby agrees to, unconditionally indemnify, reimburse, defend, protect and hold harmless the City its officers, agents, employees and representatives, from and against any and all claims, demands, suits and actions at law or in equity, and losses, liabilities, expenses, penalties, fines, orders, judgments, injunctive or other relief, and costs and damages of every kind, nature and description (including but not limited to attorneys' fees and court costs; with counsel selected by the City), and administrative, enforcement or judicial proceedings, whether known or unknown, and which directly or indirectly, in whole or in part, are caused by, arise from, or relate to, or are alleged to be caused by, arise from, or relate to, the payment or requirement of payment of prevailing wages or the requirement of competitive bidding in the construction or performance of the Services, the failure to comply with any state or federal labor laws, regulations or standards in connection with this Agreement, including but not limited to California Labor Code Section 1770 et seq. and the Prevailing Wage Laws, or any act or omission of the City or the Contractor related to this Agreement with respect to the payment or requirement of payment of prevailing wages or the requirement of competitive bidding, whether or not any insurance policies shall have been determined to be applicable to any such claims, demands, suits, actions, losses, liabilities, expenses, penalties, fines, orders, judgments, injunctive or other relief, costs, damages, or administrative, enforcement or judicial proceedings. It is further agreed that the City does not, and shall not, waive any rights against the Contractor which they may have by reason of this indemnity and hold harmless agreement because of the acceptance by the City, or the deposit with the City by the Contractor, of any of the insurance policies described in this Agreement.

SECTION 9. NONDISCRIMINATION AND EQUAL OPPORTUNITY. Contractor shall not discriminate, on the basis of a person's race, religion, color, national origin, age, physical or mental handicap or disability, medical condition, marital status, sex, or sexual orientation, against any employee, applicant for employment, subcontractor, bidder for a subcontract, or participant in, recipient of, or applicant for any services or programs provided by Contractor under this Agreement. Contractor shall comply with all applicable federal, state, and

local laws, policies, rules, and requirements related to equal opportunity and nondiscrimination in employment, contracting, and the provision of any services that are the subject of this Agreement, including but not limited to the satisfaction of any positive obligations required of Contractor thereby. Contractor shall include the provisions of this section in any subcontract approved by the City.

SECTION 10. TERMINATION AND MODIFICATION. No modification or amendment of this Agreement is effective unless made in writing and signed by both the City and Contractor.

10.1 Termination. City may cancel this Agreement at any time and without cause upon written notification to Contractor.

Contractor may cancel this Agreement upon 30 days' written notice to City and shall include in such notice the reasons for cancellation.

In the event of termination, Contractor shall be entitled to compensation for services performed to the effective date of termination; City, however, may condition payment of such compensation upon Contractor delivering to City any or all documents, photographs, computer software, video and audio tapes, and other material provided to Contractor or prepared by or for Contractor or the City in connection with this Agreement.

10.2 Extension. City may, in its sole and exclusive discretion, extend the end date of this Agreement beyond that provided for in Section 2. Any such extension shall require a written amendment to this Agreement, as provided for herein. Contractor understands and agrees that, if City grants such an extension, City shall have no obligation to provide Contractor with compensation beyond the maximum amount provided for in this Agreement. Similarly, unless authorized by the Contract Administrator, City shall have no obligation to reimburse Contractor for any otherwise reimbursable expenses incurred during the extension period.

10.3 Amendments. The Parties may amend this Agreement only by a writing signed by all the Parties.

10.4 Assignment and Subcontracting. Contractor shall not assign or transfer any interest in this Agreement without the prior written consent of the City.

10.5 Options upon Breach by Contractor. If Contractor materially breaches any of the terms of this Agreement, City's remedies shall include, but not be limited to, the following:

10.5.1 Immediately terminate the Agreement;

10.5.2 Retain the plans, specifications, drawings, reports, design documents, and any other work product prepared by Contractor pursuant to this Agreement;

10.5.3 Retain a different Contractor to complete the services described in Exhibit A not finished by Contractor; and

10.5.4 Charge Contractor the difference between the cost to complete the services described in Exhibit A that is unfinished at the time of breach and the amount that

City would have paid Contractor pursuant to Section 2 if Contractor had completed the work.

SECTION 11. ASSIGNMENT AND SUBCONTRACTING. Contractor shall not assign or transfer any interest in this Agreement without the prior written consent of the City.

SECTION 12. NOTICES. All notices that are regarding this Agreement shall be in writing and shall be deemed to have been given if delivered personally or enclosed in a properly addressed envelope and deposited in a United States Post Office for delivery by registered or certified mail addressed to the parties at the following addresses:

Any written notice to City shall be sent to:

ATTN: Marc Hill
City of Rancho Cordova
3303 Luyung Drive
Rancho Cordova, CA 95742

Any written notice to Contractor shall be sent to:

ATTN: Carrie Johnson
Rancho Cordova Community Food Hub
2771 Don Juan Dr
Rancho Cordova, CA 95670
carrie@ranchocordovafoodlocker.org

SECTION 13. CONFLICT OF INTEREST. Contractor may serve other clients, but none whose activities within the corporate limits of City or whose business, regardless of location, would place Contractor in a "conflict of interest," as that term is defined in the Political Reform Act, codified at California Government Code Section 81000 et seq.

Contractor shall not employ any City official in the work performed pursuant to this Agreement. No officer or employee of City shall have any financial interest in this Agreement that would violate California Government Code Sections 1090 et seq.

Contractor hereby warrants that it is not now, nor has it been in the previous twelve (12) months, an employee, agent, appointee, or official of the City. If Contractor was an employee, agent, appointee, or official of the City in the previous twelve months, Contractor warrants that it did not participate in any manner in the forming of this Agreement. Contractor understands that, if this Agreement is made in violation of Government Code §1090 et seq., the entire Agreement is void and Contractor will not be entitled to any compensation for services performed pursuant to this Agreement, including reimbursement of expenses, and Contractor will be required to reimburse the City for any sums paid to the Contractor. Contractor understands that, in addition to the foregoing, it may be subject to criminal prosecution for a violation of Government Code § 1090 and, if applicable, will be disqualified from holding public office in the State of California.

SECTION 14. GOVERNING LAW AND VENUE. The laws of the State of California shall govern this Agreement. Venue for any action regarding this Agreement shall be in the Superior Court of the County of Sacramento or in the United States District Court for the Eastern District of California.

SECTION 15. ATTORNEYS' FEES. If a Party to this Agreement brings any action, including an action for declaratory relief, to enforce or interpret the provisions of this Agreement, the prevailing Party shall be entitled to reasonable attorneys' fees in addition to any other relief to which that Party may be entitled. The court may set such fees in the same action or in a separate action brought for that purpose.

SECTION 16. SEVERABILITY. If a court of competent jurisdiction finds or rules that any provision of this Agreement is invalid, void, or unenforceable, the provisions of this Agreement not so adjudged shall remain in full force and effect. The invalidity in whole or in part of any provision of this Agreement shall not void or affect the validity of any other provision of this Agreement.

SECTION 17. NO IMPLIED WAIVER OR BREACH. The waiver of any breach of a specific provision of this Agreement does not constitute a waiver of any breach of that term or any other term of this Agreement.

SECTION 18. SURVIVAL. The obligation of this Agreement, which by their nature would continue beyond the term or expiration of the Agreement, including without limitation obligations regarding indemnification shall survive the term or expiration of this Agreement.

SECTION 19. IRS FORM W-9. Contractor shall complete and submit Internal Revenue Service Form W-9 to the City before execution of this Agreement. This City's Finance Director shall have authority to waive this requirement.

SECTION 20. SUCCESSORS AND ASSIGNS. The provisions of this Agreement shall inure to the benefit of and shall apply to and bind the successors and assigns of the Parties.

SECTION 21. ENTIRE AGREEMENT. This Agreement, including the scope of work attached hereto and incorporated herein as Exhibit A, and the insurance requirements attached hereto and incorporated herein as Exhibit B, represents the entire and integrated Agreement between City and Contractor and supersedes all prior negotiations, representations, and Agreements regarding the subject matter of this Agreement, either written or oral.

IN WITNESS WHEREOF, the parties have executed this Agreement as of the day and year set forth above, which date shall be considered the effective date of this Agreement.

EXHIBIT A
SCOPE OF SERVICES

Edible Food Recovery, Outreach and Inspection Agreement Scope of Services

Definitions

To ensure agreement and understanding of terms specific to this agreement, the following definitions are offered.

- **Edible Food** means food intended for human consumption, or as otherwise defined in 14 CCR Section 18982(a)(18). For the purposes of this chapter or as otherwise defined in 14 CCR Section 18982(a)(18), "edible food" is not solid waste if it is recovered and not discarded. Nothing in this chapter or in 14 CCR, Division 7, Chapter 12, requires or authorizes the recovery of edible food that does not meet the food safety requirements of the California Retail Food Code.

- **SB 1383** means the Short-Lived Climate Pollutants: Methane Emissions: Dairy and Livestock: Organic Waste: Landfills Act of 2016. Article 4 Title 14, Division 4, Chapter 12 of the California Code of Regulations.

- **Tier 1 Edible Food Generator** means a commercial edible food generator that is one of the following:

    a. Supermarket.
    b. Grocery store with a total facility size equal to or greater than 10,000 square feet.
    c. Food service provider.
    d. Food distributor.
    e. Wholesale food vendor.

- **Tier 2 Edible Food Generator** means a commercial edible food generator that is one of the following:

    a. Restaurant with 250 or more seats, or a total facility size equal to or greater than 5,000 square feet. "Restaurant" means an establishment primarily engaged in the retail sale of food and drinks for on-premises or immediate consumption.

b. Hotel with an on-site food facility and 200 or more rooms. "Hotel" has the same meaning as in Section 17210(a) of the Business and Professions Code.
c. Health facility with an on-site food facility and 100 or more beds. "Health facility" has the same meaning as in Section 1250 of the Health and Safety Code.
d. Large venue. "Large venue" means a permanent venue facility that annually seats or serves an average of more than 2,000 individuals within the grounds of the facility per day of operation of the venue facility. For the purposes of this chapter, a venue facility includes, but is not limited to, a public, nonprofit, or privately owned or operated stadium, amphitheater, arena, hall, amusement park, conference or civic center, zoo, aquarium, airport, racetrack, horse track, performing arts center, fairground, museum, theater, or other public attraction facility. For the purposes of this chapter, a site under common ownership or control that includes more than one large venue that is contiguous with other large venues in the site is a single large venue.
e. Large event. "Large event" means an event, including, but not limited to, a sporting event or a flea market, that charges an admission price, or is operated by a local agency, and serves an average of more than 2,000 individuals per day of operation of the event, at a location that includes, but is not limited to, a public, nonprofit, or privately owned park, parking lot, golf course, street system, or other open space when being used for an event.
f. A state agency with a cafeteria with 250 or more seats or a total cafeteria facility size equal to or greater than 5,000 square feet.
g. A local education agency with an on-site food facility. "Local education agency" means a school district, charter school, or county office of education that is not subject to the control of city or county regulations related to solid waste.

- **Tier 3 Edible Food Generator** means an edible food generator in the City of Rancho Cordova that is not currently regulated as a Tier 1 or Tier 2 generator by the Short-Lived Climate Pollutant Regulations (SB 1383). This can include bakeries, fast-food restaurants, small restaurants and other like entities.

Task 1: Identify Covered Edible Food Generators

The Contractor will identify Tier 1 and Tier 2 generators, as defined in SB 1383, in the City, including new generators that are established with the assistance of the City as necessary.

Currently, there are 15 Tier 1 generators identified in the City. Contractor shall confirm accuracy of this current list and update as needed.

- Bakemark USA (11350 Sunrise Park Dr)

- Costco (11260 White Rock Rd)
- Dana's California Cafe & Coffee (10601 Bear Hollow Dr)
- Food 4 Less (3457 Bradshaw Rd)
- Grocery Outlet (2801 Zinfandel Dr)
- Koreana Plaza Market (10971 Olson Dr)
- Mahoney's Seafood (3199 Luyung Dr)
- Mi Rancho (RC) Supermercado (10669 Coloma Rd)
- Raley's (4030 Sunrise Blvd)
- Safeway (10635 Folsom Blvd)
- SF Supermarket (2738 Sunrise Blvd)
- Sprouts Farmers Market (10846 Bear Hollow Dr)
- Target (10881 Olson Dr)
- Viva Supermarket (10385 Folsom Blvd)
- Walmart Supercenter (10655 Folsom Blvd)

Currently, there are 7 Tier 2 edible food generators identified in the City. Contractor shall confirm the accuracy of current list and update as needed.

- Brookfields Restaurant (11135 Folsom Blvd)
- Casa Ramos Mexican Restaurant (10717 White Rock Rd)
- Chili's Grill & Bar (3199 Zinfandel Dr)
- Rudy's Hideaway Lobster House (12303 Folsom Blvd)
- Sacramento Marriott Rancho (11211 Point East Dr)
- Sacramento VA Medical Center (10535 Hospital Way)
- Narumi Sushi (12251 Folsom Blvd)

Task 2: Provide Outreach to Generators

Provide outreach to covered edible food generators:

- Work with the City to create outreach materials that explain compliance with SB 1383 edible food recovery and related programs.
- Include Tier 1 and Tier 2 edible food recovery information on website, including downloadable materials such as: sample written agreements, food recovery best practices, food waste management, etc.
- Conduct site visits, as necessary, to onboard new generators in the City.

Where appropriate, provide outreach to Tier 3 generators to maximize edible food recovery:

- Work with the City to create outreach materials for entities that are not regulated by SB 1383.
- Include general edible food recovery information on website, including downloadable materials such as: sample written agreements, food recovery best practices, food waste management, etc.
- Conduct site visits, as necessary, to onboard new generators in the City.

Task 3: Provide Training to Generators

Provide training to covered edible food generators:

- Work with the City to establish a training program for edible food recovery including:
    - Best management practices for edible food handling/storage to maximize recovery, including applicable food safety requirements.
    - Proper recordkeeping techniques to comply with SB 1383 (Section 18991.4).
- Provide training to generators at Contractor's location or generator premises, as necessary.
- Conduct site visits, as necessary, to onboard new generators in the City.
- Document relevant information related to trainings, including site visits, provided.

The same training shall be available for Tier 3 generators not covered by SB 1383, as necessary.

Task 4: Perform Inspections

Perform annual inspections of all covered edible food generators as directed by City to ensure that they are in compliance with SB 1383 regulations (Section 18995.1(a)(2)).

- Verify generators have up-to-date edible food recovery agreement(s) in place.
- Verify generators are maintaining records as required by SB 1383 (Section 18991.4).
- Provide outreach materials, as appropriate, to generators to ensure the maximum amount of edible food is being rescued.
- Maintain inspection documentation in a manner agreed with the City.
- Refer non-compliant generators to the City for follow up.

The City will establish an inspection process and/or application to facilitate this activity.

Task 5: Recover Edible Food from Tier 1 Generators

For those Tier 1 generators that have an existing agreement with the Contractor or do not have an existing agreement with a Food Recovery Organization, Contractor will:

- As necessary, establish a written agreement with each Tier 1 generator that meets the requirements of SB 1383 Regulations (Section 18991.3(a)).
- Arrange and/or facilitate the safe transportation, processing, and/or storage of surplus edible food from Tier 1 generators in the City.
- Arrange for the distribution of food, that meets prescribed donation standards, to feed those in need.
- Ensure that any food that is not distributed is properly diverted from landfill disposal.
- Document instances where a Tier 1 generator is unable or unwilling to participate in edible food recovery and provide that information to the City.

Task 6: Arrange for the Recovery of Edible Food from Tier 2 Generators

For those Tier 2 generators identified through inspection that do not have a written agreement with a Food Recovery Organization, Contractor will:

- Establish a written agreement with each Tier 2 generator that meets the requirements of SB 1383 regulations (Section 18991.3(a)).
    - Work with the Tier 2 generator to recover food directly, or;
    - Work with the City's Tier 2 edible food recovery partner, or other certified Tier 2 edible food recovery entity, to ensure an agreement is in place and edible food recovery is occurring.
- Arrange and/or facilitate the safe transportation, processing, and/or storage of surplus edible food from Tier 2 generators in the City.
- Arrange for the distribution of food, that meets prescribed donation standards, to feed those in need.
- Ensure that any food that is not distributed is properly diverted from landfill disposal.
- Document instances where a Tier 2 generator is unable or unwilling to participate in edible food recovery and provide that information to the City.

The above edible food recovery effort may be accomplished via the methods below:

- Work with the Tier 2 generator to directly to establish an agreement and provide edible food recovery service, or;

- Work with the City's Tier 2 edible food recovery partner, or other certified Tier 2 edible food recovery entity, to ensure an agreement is in place and edible food recovery is occurring.

Task 6: Participate in Capacity Planning

As necessary, participate in regional edible food recovery capacity planning in Sacramento County as follows:

- Act as the lead for the City to gather necessary information and attend regional meetings.
- Collect/Provide data on current collection capacity available in the City.
- Collect/Provide data on current distribution capacity available in the City.
- Identifying areas to improve collection/distribution in the City.

Invoicing/Reporting

Contractor may invoice monthly for expenses incurred in for all edible food recovery effort expended as outlined above. Eligible expenses are as follows:

- Staff time directly related to edible food recovery (staff time may consist of activity related to inspections, outreach, engagement efforts and actual food recovery).
- Vehicle Use (inclusive of fuel, maintenance & repair, etc.). It is recommended that a vehicle use rate be established for this purpose.
- Supplies (e.g. food packaging/containers*, to-go bags/items*, and other expendables).
    - A per unit price ceiling of $250 is established for supply purchases. This means that no single item supply purchase may cost more than $250 for reimbursement under this contract.
    - *To the extent practicable, the use of compostable items for bags, cutlery, etc. is preferred.

Monthly reports shall consist of:

- Current list of edible food generators operating in the City, including the known recovery organizations to which they are donating edible food.
- Monthly pounds of edible food recovered.
- Line-item expenditures related to edible food recovery in the City.
- Results of edible food recovery inspections, as necessary.
- Outreach materials distributed to edible food generators, as necessary.

The City will establish a reporting process and/or application to accommodate submittals.

EXHIBIT B
INSURANCE REQUIREMENTS

Before beginning any work under this Agreement, Contractor, at its own cost and expense, shall procure "occurrence coverage" insurance against claims for injuries to persons or damages to property that may arise from or in connection with the performance of the work hereunder by the Contractor and its agents, representatives, employees, and subcontractors. Contractor shall provide proof satisfactory to City of such insurance that meets the requirements of this section and under forms of insurance satisfactory in all respects to the City. Contractor shall maintain the insurance policies required by this section throughout the term of this Agreement. The cost of such insurance shall be included in the Contractor's bid. Contractor shall not allow any subcontractor to commence work on any subcontract until Contractor has obtained all insurance required herein for the subcontractor(s) and provided evidence thereof to City. Verification of the required insurance shall be submitted and made part of this Agreement prior to execution. Contractor shall maintain all required insurance listed herein for the duration of this Agreement.

Initial _____

1. Workers' Compensation. Contractor shall, at its sole cost and expense, maintain Statutory Workers' Compensation Insurance and Employer's Liability Insurance for any and all persons employed directly or indirectly by Contractor. The Statutory Workers' Compensation Insurance and Employer's Liability Insurance shall be provided with limits of not less than ONE MILLION DOLLARS ($1,000,000.00) per accident. In the alternative, Contractor may rely on a self-insurance program to meet those requirements, but only if the program of self-insurance complies fully with the provisions of the California Labor Code. Determination of whether a self-insurance program meets the standards of the Labor Code shall be solely in the discretion of the Contract Administrator. The insurer, if insurance is provided, or the Contractor, if a program of self-insurance is provided, shall waive all rights of subrogation against the City and its officers, officials, employees, and volunteers for loss arising from work performed under this Agreement.

An endorsement shall state that coverage shall not be canceled except after thirty (30) days' prior written notice by certified mail, return receipt requested, has been given to the City. Contractor shall notify City within fourteen (14) days of notification from Contractor's insurer if such coverage is suspended, voided or reduced in coverage or in limits.

The requirement to maintain Statutory Worker's Compensation and Employer's Liability Insurance may be waived by the City upon written verification that Contractor does not have any employees.

2. Commercial General and Automobile Liability Insurance.

General requirements. Contractor, at its own cost and expense, shall maintain commercial general liability insurance for the term of this Agreement in an amount not less than TWO MILLION DOLLARS ($2,000,000.00) and automobile liability insurance for the term of this Agreement in an amount not less than ONE MILLION DOLLARS ($1,000,000.00). The commercial general liability and automobile liability insurance shall be per occurrence, combined single limit coverage for risks associated with the work contemplated by this Agreement. If a commercial general liability insurance or an automobile liability form or other form with a general aggregate limit is used, either the general aggregate limit shall apply separately

to the work to be performed under this Agreement or the general aggregate limit shall be at least twice the required occurrence limit. Such coverage shall include but shall not be limited to, protection against claims arising from bodily and personal injury, including death resulting therefrom, and damage to property resulting from activities contemplated under this Agreement, including the use of owned and non-owned automobiles.

2.1 **Minimum scope of coverage.** Commercial general liability coverage shall be at least as broad as Insurance Services Office Commercial General Liability occurrence form CG 0001 (most recent edition) covering comprehensive General Liability on an "occurrence" basis. Automobile coverage shall be at least as broad as Insurance Services Office Automobile Liability form CA 0001 (most recent edition), Code 1 (any auto). No endorsement shall be attached limiting the coverage.

2.2 **Additional requirements.** Each of the following shall be included in the insurance coverage or added as an endorsement to the policy:

a. City and its officers, employees, agents, and volunteers shall be covered as additional insureds with respect to each of the following: liability arising out of activities performed by or on behalf of Contractor, including the insured's general supervision of Contractor; products and completed operations of Contractor; premises owned, occupied, or used by Contractor; and automobiles owned, leased, or used by the Contractor. The coverage shall contain no special limitations on the scope of protection afforded to City or its officers, employees, agents, or volunteers.

b. The insurance shall cover on an occurrence or an accident basis, and not on a claims-made basis.

c. An endorsement must state that coverage is primary insurance with respect to the City and its officers, officials, employees and volunteers, and that no insurance or self-insurance maintained by the City shall be called upon to contribute to a loss under the coverage.

d. Any failure of Contractor to comply with reporting provisions of the policy shall not affect coverage provided to City and its officers, employees, agents, and volunteers.

e. An endorsement shall state that coverage shall not be canceled except after thirty (30) days' prior written notice by certified mail, return receipt requested, has been given to the City. Contractor shall notify City within fourteen (14) days of notification from Contractor's insurer if such coverage is suspended, voided or reduced in coverage or in limits.

3. **All Policies Requirements.**

3.1 **Acceptability of insurers.** All insurance required by this section is to be placed with insurers with a Bests' rating of no less than A:VII.

3.2 Verification of coverage. Prior to beginning any work under this Agreement, Contractor shall furnish City with certificates of insurance and with original endorsements effecting coverage required herein. The certificates and endorsements for each insurance policy are to be signed by a person authorized by that insurer to bind coverage on its behalf. The City reserves the right to require complete, certified copies of all required insurance policies, at any time.

3.3 Subcontractors. Contractor shall include all subcontractors as insureds under its policies or shall furnish separate certificates and endorsements for each subcontractor. All coverages for subcontractors shall be subject to all of the requirements stated herein.

3.4 Deductibles and Self-Insured Retentions. Contractor shall disclose to and obtain the approval of City for the self-insured retentions and deductibles before beginning any of the services or work called for by any term of this Agreement.

During the period covered by this Agreement, only upon the prior express written authorization of Contract Administrator, Contractor may increase such deductibles or self-insured retentions with respect to City, its officers, employees, agents, and volunteers. The Contract Administrator may condition approval of an increase in deductible or self-insured retention levels with a requirement that Contractor procure a bond, guaranteeing payment of losses and related investigations, claim administration, and defense expenses that is satisfactory in all respects to each of them.

3.5 Waiver of Subrogation. Contractor hereby agrees to waive subrogation which any insurer or contractor may require from vendor by virtue of the payment of any loss. Consultant agrees to obtain any endorsements that may be necessary to effect this waiver of subrogation. The Workers' Compensation policy shall be endorsed with a waiver of subrogation in favor of the entity for all work performed by the Contractor, its employees, agents, and subcontractors.

3.6 Notice of Reduction in Coverage. In the event that any coverage required by this section is reduced, limited, or materially affected in any other manner, Contractor shall provide written notice to City at Contractor's earliest possible opportunity and in no case later than five (5) days after Contractor is notified of the change in coverage.

4. Remedies. In addition to any other remedies City may have if Contractor fails to provide or maintain any insurance policies or policy endorsements to the extent and within the time herein required, City may, at its sole option exercise any of the following remedies, which are alternatives to other remedies City may have and are not the exclusive remedy for Contractor's breach:

- Obtain such insurance and deduct and retain the amount of the premiums for such insurance from any sums due under the Agreement;
- Order Contractor to stop work under this Agreement or withhold any payment that becomes due to Contractor hereunder, or both stop work and withhold any payment, until Contractor demonstrates compliance with the requirements hereof; and/or
- Terminate this Agreement.

MEMORANDUM

ITEM 9.7.

DATE: May 18, 2026

TO: Honorable Mayor and Council Members

FROM: Albert Stricker, Public Works Director
Marc Hill, Solid Waste Manager

SUBJECT: **A RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE CONTRACT NO. 2026-65 WITH R3 CONSULTING GROUP INC. IN AN AMOUNT NOT TO EXCEED $750,550 FOR ON-CALL SOLID WASTE CONSULTING SERVICES**

RECOMMENDATION

Adopt the Resolution.

RESULT OF RECOMMENDED ACTION

Adoption of the Resolution would authorize the City Manager to execute Contract No. 2026-65 with R3 Consulting Group, Inc. in an amount not to exceed $750,550 for on-call solid waste consulting services through June 30, 2029.

BACKGROUND

The Public Works Department uses consultant services to assist with the management and administration of the city's solid waste and recycling program. The current contract with R3 Consulting Group expires on June 30, 2026. The city released a Request for Proposals solicitation on February 2, 2026, and proposals from two firms were received by the closing date of March 6, 2026. An evaluation committee selected R3 Consulting Group as the top ranked firm based on the scope of work understanding, relevant experience and value.

The scope of work for this 36-month engagement includes assistance with management and administration of the city's residential and commercial franchise agreements, development and implementation of new programs to comply with state law, implementation of public education and outreach programs, grant administration and compliance reporting services.

FISCAL IMPACT AND FUNDING SOURCE

This contract is funded through solid waste franchise fees via the Public Works operating budget and has no impact on the general fund.

ATTACHMENT(S)

1. Resolution
2. Contract No. 2026-65

CITY OF RANCHO CORDOVA

RESOLUTION NO. XX-2026

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA, STATE OF CALIFORNIA, AUTHORIZING THE CITY MANAGER TO EXECUTE CONTRACT NO. 2026-65 WITH R3 CONSULTING GROUP INC. IN AN AMOUNT NOT TO EXCEED $750,550 FOR ON-CALL SOLID WASTE CONSULTING SERVICES

WHEREAS, the City of Rancho Cordova desires to execute Contract No. 2026-65 with R3 Consulting Group, Inc. in an amount not to exceed $750,550 for on-call solid waste consulting services through June 30, 2029; and

WHEREAS, the city solicited proposals for this work on February 2, 2026, with two proposals being submitted on March 6, 2026. Evaluators unanimously selected R3 Consulting Group, Inc. as the top ranked firm; and

WHEREAS, the scope of services for this 36-month engagement will allow R3 Consluting Group, Inc. to perform on-call solid waste technical consulting services and assist the city with implementation of new programs, administration of multiple solid waste franchise agreements, grant administration, preparation of monthly and annual reports to regulatory agencies, enforcement efforts, and public educational and outreach; and

WHEREAS, this contract is funded through solid waste franchise fees via the Public Works Operating Budget; and

WHEREAS, the annual value of services in this contract will exceed the maximum amount the City Manager has authorization to approve.

NOW, THEREFORE, BE IT HEREBY RESOLVED THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA does authorize the City Manager to execute Contract No. 2026-65 with R3 Consulting Group, Inc. in an amount not to exceed $750,550 in a form approved by the City Attorney.

PASSED AND ADOPTED by the City Council of the City of Rancho Cordova on the 18th day of May 2026 by the following vote:

AYES:

**PROFESSIONAL SERVICES AGREEMENT BETWEEN
THE CITY OF RANCHO CORDOVA AND R3 CONSULTING GROUP, INC.**

THIS AGREEMENT (hereinafter referred to as "Agreement") for professional services is made by and between the City of Rancho Cordova, a California municipal corporation, (herein "City") and R3 Consulting Group, Inc a California Corporation ("Professional") as of July 1, 2026.

SECTION 1. SERVICES. Subject to the terms and conditions set forth in this Agreement, Professional shall provide to City the services described in the Scope of Services attached as Exhibit A ("Services") at the time and place and in the manner as specified therein. In the event of a conflict or inconsistency between the terms of this Agreement and Exhibit A, the Agreement shall prevail.

1.1 Term of Services. The term of this Agreement shall begin on the date first noted above and shall end on June 30, 2029, the date of completion specified in Exhibit A. Professional shall complete the services described in Exhibit A prior to that date, unless the term of the Agreement is otherwise terminated or extended, as provided for in Section 8. The time provided to Professional to complete the services required by this Agreement shall not affect the City's right to terminate the Agreement, as provided for in Section 8.

1.2 Standard of Performance. Professional shall perform all services required pursuant to this Agreement in the manner and according to the standards observed by a competent practitioner of the profession in which Professional is engaged in the geographical area in which Professional practices its profession. Professional shall prepare all work products required by this Agreement in a substantial, first-class manner and shall conform to the standards of quality normally observed by a person practicing in Professional's profession.

1.3 Assignment of Personnel. Professional shall assign only competent personnel to perform services pursuant to this Agreement. In the event that City, in its sole discretion, at any time during the term of this Agreement, desires the reassignment of any such persons, Professional shall, immediately upon receiving notice from City of such desire of City, reassign such person or persons.

1.4 Time. Professional shall devote such time to the performance of services pursuant to this Agreement as may be reasonably necessary to meet the standard of performance provided in Section 1.2 above and to satisfy Professional's obligations hereunder.

SECTION 2. COMPENSATION. City hereby agrees to pay Professional a sum not to exceed SEVEN HUNDRED FIFTY THOUSAND FIVE HUNDRED FIFTY DOLLARS: ($750,550), notwithstanding any contrary indications that may be contained in Professional's proposal, for services to be performed and reimbursable costs incurred under this Agreement. In the event of a conflict between this Agreement and Professional's proposal, attached as Exhibit B, regarding the amount of compensation, the Agreement shall prevail. City shall pay Professional for services rendered pursuant to this Agreement at the time and in the manner set forth herein. The payments specified below shall be the only payments from City to Professional for services rendered pursuant to this Agreement. Professional shall submit all invoices to City in the manner specified herein. Except as specifically authorized by City, Professional shall not bill City for duplicate services performed by more than one person.

Professional shall submit all invoices to City in the manner specified herein. Except as specifically authorized by City, Professional shall not bill City for duplicate services performed by more than one person.

Professional and City acknowledge and agree that compensation paid by City to Professional under this Agreement is based upon Professional's estimated costs of providing the services required hereunder, including salaries and benefits of employees and subcontractors of Professional. Consequently, the parties further agree that compensation hereunder is intended to include the costs of contributions to any pensions and/or annuities to which Professional and its employees, agents, and subcontractors may be eligible. City therefore has no responsibility for such contributions beyond compensation required under this Agreement.

2.1 **Invoice.** Professional shall submit invoices, not more often than once a month during the term of this Agreement, based on the cost for services performed and reimbursable costs incurred prior to the invoice date. Invoices shall contain the following information:

2.1.1 Serial identifications of progress bills; i.e., Progress Bill No. 1 for the first invoice, etc.;

2.1.2 The beginning and ending dates of the billing period;

2.1.3 A Task Summary containing the original contract amount, the amount of prior billings, the total due this period, the balance available under the Agreement, and the percentage of completion;

2.1.4 At City's option, for each work item in each task, a copy of the applicable time entries or time sheets shall be submitted showing the name of the person doing the work, the hours spent by each person, a brief description of the work, and each reimbursable expense;

2.1.5 The total number of hours of work performed under the Agreement by Professional and each employee, agent, and subcontractor of Professional performing services hereunder, as well as a separate notice when the total number of hours of work by Professional and any individual employee, agent, or subcontractor of Professional reaches or exceeds 800 hours, which shall include an estimate of the time necessary to complete the work described in Exhibit A;

2.1.6 The Professional's signature.

2.2 **Monthly Payment.** City shall make monthly payments, based on invoices received, for services satisfactorily performed, and for authorized reimbursable costs incurred. City shall have thirty (30) days from the receipt of an invoice that complies with all of the requirements above to pay Professional.

2.3 **Final Payment.** City shall make the final payment within sixty (60) days after completion of the services and submittal to City of a final invoice, if all services required have been satisfactorily performed.

2.4 **Total Payment.** City shall pay for the services to be rendered by Professional pursuant to

this Agreement. City shall not pay any additional sum for any expense or cost whatsoever incurred by Professional in rendering services pursuant to this Agreement. City shall make no payment for any extra, further, or additional service pursuant to this Agreement.

In no event shall Professional submit any invoice for an amount in excess of the maximum amount of compensation provided above either for a task or for the entire Agreement, unless the Agreement is modified prior to the submission of such an invoice by a properly executed change order or amendment.

2.5 Hourly Fees. Fees for work performed by Professional on an hourly basis shall not exceed the amounts shown on the fee schedule set forth in Exhibit B.

2.6 Reimbursable Expenses. Reimbursable expenses, if any, are set forth in Exhibit B, and shall not exceed SIX THOUSAND DOLLARS: ($6,000.00). Expenses not listed in Exhibit B are not chargeable to City. Reimbursable expenses are included in the total amount of compensation provided under this Agreement that shall not be exceeded.

2.7 Payment of Taxes. Professional is solely responsible for the payment of employment taxes incurred under this Agreement and any similar federal or state taxes.

2.8 Payment upon Termination. In the event that the City or Professional terminates this Agreement pursuant to Section 10, the City shall compensate the Professional for all outstanding costs and reimbursable expenses incurred for work satisfactorily completed as of the date of written notice of termination. Professional shall maintain adequate logs and timesheets in order to verify costs incurred to that date.

2.9 Authorization to Perform Services. The Professional is not authorized to perform any services or incur any costs whatsoever under the terms of this Agreement until receipt of authorization from the Contract Administrator.

SECTION 3. FACILITIES AND EQUIPMENT. Except as set forth herein, Professional shall, at its sole cost and expense, provide all facilities and equipment that may be necessary to perform the services required by this Agreement. City shall make available to Professional only the facilities and equipment listed in this section, and only under the terms and conditions set forth herein.

City shall furnish physical facilities such as desks, filing cabinets, and conference space, as may be reasonably necessary for Professional's use while consulting with City employees and reviewing records and the information in possession of the City. The location, quantity, and time of furnishing those facilities shall be in the sole discretion of City. In no event shall City be obligated to furnish any facility that may involve incurring any direct expense, including but not limited to computer, long-distance telephone or other communication charges, vehicles, and reproduction facilities.

SECTION 4. INSURANCE REQUIREMENTS. Before beginning any work under this Agreement, Professional, at its own cost and expense, shall procure "occurrence coverage" insurance against claims for injuries to persons or damages to property that may arise from or in connection with the performance of the work hereunder by the Professional and its agents, representatives, employees, and subcontractors. Professional shall provide proof satisfactory to City of such insurance that meets the requirements of this section and under forms of insurance satisfactory in all respects to the City. Professional shall maintain the

insurance policies required by this section throughout the term of this Agreement. The cost of such insurance shall be included in the Professional's bid. Professional shall not allow any subcontractor to commence work on any subcontract until Professional has obtained all insurance required herein for the subcontractor(s) and provided evidence thereof to City. Verification of the required insurance shall be submitted and made part of this Agreement prior to execution. Professional shall maintain all required insurance listed herein for the duration of this Agreement.

4.1 Workers' Compensation. Professional shall, at its sole cost and expense, maintain Statutory Workers' Compensation Insurance and Employer's Liability Insurance for any and all persons employed directly or indirectly by Professional. The Statutory Workers' Compensation Insurance and Employer's Liability Insurance shall be provided with limits of not less than ONE MILLION DOLLARS ($1,000,000.00) per accident. In the alternative, Professional may rely on a self-insurance program to meet those requirements, but only if the program of self-insurance complies fully with the provisions of the California Labor Code. Determination of whether a self-insurance program meets the standards of the Labor Code shall be solely in the discretion of the Contract Administrator. The insurer, if insurance is provided, or the Professional, if a program of self-insurance is provided, shall waive all rights of subrogation against the City and its officers, officials, employees, and volunteers for loss arising from work performed under this Agreement.

An endorsement shall state that coverage shall not be canceled except after thirty (30) days' prior written notice by certified mail, return receipt requested, has been given to the City. Professional shall notify City within fourteen (14) days of notification from Professional's insurer if such coverage is suspended, voided or reduced in coverage or in limits.

The requirement to maintain Statutory Worker's Compensation and Employer's Liability Insurance may be waived by the City upon written verification that Professional does not have any employees.

Professional hereby acknowledges and agrees to the insurance requirements set forth in this section which shall be monitored for compliance by Ebix, RCS, Inc.

_____
Initial

4.2 Commercial General and Automobile Liability Insurance.

4.2.1 General requirements. Professional, at its own cost and expense, shall maintain commercial general liability insurance for the term of this Agreement in an amount not less than TWO MILLION DOLLARS ($2,000,000.00) and automobile liability insurance for the term of this Agreement in an amount not less than ONE MILLION DOLLARS ($1,000,000.00). The commercial general liability and automobile liability insurance shall be per occurrence, combined single limit coverage for risks associated with the work contemplated by this Agreement. If a commercial general liability insurance or an automobile liability form or other form with a general aggregate limit is used, either the general aggregate limit shall apply separately to the work to be performed under this Agreement or the general aggregate limit shall be at least twice the required occurrence limit. Such coverage shall include but shall not be limited to, protection against claims arising from bodily and personal injury,

including death resulting therefrom, and damage to property resulting from activities contemplated under this Agreement, including the use of owned and non-owned automobiles.

4.2.2 Minimum scope of coverage. Commercial general liability coverage shall be at least as broad as Insurance Services Office Commercial General Liability occurrence form CG 0001 (most recent edition) covering comprehensive General Liability on an "occurrence" basis. Automobile coverage shall be at least as broad as Insurance Services Office Automobile Liability form CA 0001 (most recent edition), Code 1 (any auto). No endorsement shall be attached limiting the coverage.

4.2.3 Additional requirements. Each of the following shall be included in the insurance coverage or added as an endorsement to the policy.

a. City and its officers, employees, agents, and volunteers shall be covered as additional insureds with respect to each of the following: liability arising out of activities performed by or on behalf of Professional, including the insured's general supervision of Professional; products and completed operations of Professional; premises owned, occupied, or used by Professional; and automobiles owned, leased, or used by the Professional. The coverage shall contain no special limitations on the scope of protection afforded to City or its officers, employees, agents, or volunteers.

b. The insurance shall cover on an occurrence or an accident basis, and not on a claims-made basis.

c. An endorsement must state that coverage is primary insurance with respect to the City and its officers, officials, employees, and volunteers, and that no insurance or self-insurance maintained by the City shall be called upon to contribute to a loss under the coverage.

d. Any failure of Professional to comply with reporting provisions of the policy shall not affect coverage provided to City and its officers, employees, agents, and volunteers.

e. An endorsement shall state that coverage shall not be canceled except after thirty (30) days' prior written notice by certified mail, return receipt requested, has been given to the City. Professional shall notify City within fourteen (14) days of notification from Professional's insurer if such coverage is suspended, voided or reduced in coverage or in limits.

Professional hereby acknowledges and agrees to the insurance requirements set forth in this section which shall be monitored for compliance by Ebix, RCS, Inc.

Initial _____

4.3 Professional Liability Insurance. Professional, at its own cost and expense, shall maintain for the period covered by this Agreement professional liability insurance for licensed professionals performing work pursuant to this Agreement in an amount not less than TWO MILLION DOLLARS ($2,000,000) covering the licensed professionals' errors and omissions.

4.3.1 Any deductible or self-insured retention shall not exceed $150,000 per claim.

4.3.2 An endorsement shall state that coverage shall not be suspended, voided, canceled by either party, or reduced in coverage or in limits, except after thirty (30) days' prior written notice by certified mail, return receipt requested, has been given to the City.

4.3.3 The following provisions shall apply if the professional liability coverages are written on a claims-made form:

a. The retroactive date of the policy must be shown and must be before the date of the Agreement.

b. Insurance must be maintained and evidence of insurance must be provided for at least five (5) years after completion of the Agreement or the work, so long as commercially available at reasonable rates.

c. If coverage is canceled or not renewed and it is not replaced with another claims-made policy form with a retroactive date that precedes the date of this Agreement, Professional must provide extended reporting coverage for a minimum of five (5) years after completion of the Agreement or the work. The City shall have the right to exercise, at the Professional's sole cost and expense, any extended reporting provisions of the policy, if the Professional cancels or does not renew the coverage.

d. A copy of the claim reporting requirements must be submitted to the City prior to the commencement of any work under this Agreement.

Professional hereby acknowledges and agrees to the insurance requirements set forth in this section which shall be monitored for compliance by Ebix, RCS, Inc.

_____
Initial

4.4 All Polices Requirements.

4.4.1 Acceptability of insurers. All insurance required by this section is to be placed with insurers with a Bests' rating of no less than A:VII.

4.4.2 Verification of coverage. Prior to beginning any work under this Agreement, Professional shall furnish City with certificates of insurance and with original endorsements effecting coverage required herein. The certificates and endorsements for each insurance policy are to be signed by a person authorized by that insurer to bind coverage on its behalf. The City reserves the right to require complete, certified copies of all required insurance policies, at any time.

4.4.3 Subcontractors. Professional shall include all subcontractors as insureds under its policies or shall furnish separate certificates and endorsements for each subcontractor. All coverages for subcontractors shall be subject to all of the requirements stated herein.

4.4.4 Deductibles and Self-Insured Retentions. Professional shall disclose to and obtain the approval of City for the self-insured retentions and deductibles before beginning any of the services or work called for by any term of this Agreement.

During the period covered by this Agreement, only upon the prior express written authorization of Contract Administrator, Professional may increase such deductibles or self-insured retentions with respect to City, its officers, employees, agents, and volunteers. The Contract Administrator may condition approval of an increase in deductible or self-insured retention levels with a requirement that Professional procure a bond, guaranteeing payment of losses and related investigations, claim administration, and defense expenses that is satisfactory in all respects to each of them.

4.4.5 Waiver of Subrogation. Professional hereby agrees to waive subrogation which any insurer or contractor may require from vendor by virtue of the payment of any loss. Consultant agrees to obtain any endorsements that may be necessary to effect this waiver of subrogation. The Workers' Compensation policy shall be endorsed with a waiver of subrogation in favor of the entity for all work performed by the Professional, its employees, agents, and subcontractors.

4.4.6 Notice of Reduction in Coverage. In the event that any coverage required by this section is reduced, limited, or materially affected in any other manner, Professional shall provide written notice to City at Professional's earliest possible opportunity and in no case later than five (5) days after Professional is notified of the change in coverage.

4.5 Remedies. In addition to any other remedies City may have if Professional fails to provide or maintain any insurance policies or policy endorsements to the extent and within the time herein required, City may, at its sole option exercise any of the following remedies, which are alternatives to other remedies City may have and are not the exclusive remedy for Professional's breach:

4.5.1 Obtain such insurance and deduct and retain the amount of the premiums for such insurance from any sums due under the Agreement;

4.5.2 Order Professional to stop work under this Agreement or withhold any payment that becomes due to Professional hereunder, or both stop work and withhold any payment, until Professional demonstrates compliance with the requirements hereof; and/or

4.5.3 Terminate this Agreement.

SECTION 5. INDEMNIFICATION AND PROFESSIONAL'S RESPONSIBILITIES.

5.1 General Requirements. Professional shall indemnify, defend with counsel selected by the City, and hold harmless the City and its officials, officers, employees, agents, and volunteers from and against any and all losses, liability, claims, suits, actions, damages, and causes of action arising out of any personal injury, bodily injury, loss of life, or damage to property, or any violation of any federal, state, or municipal law or ordinance, to the extent caused, in whole or in part, by the willful misconduct or negligent acts or omissions of Professional or its employees, subcontractors, or agents, by acts for which they could be held strictly liable, or by the quality or character of their work. The foregoing obligation of Professional shall not apply when (1) the injury, loss of life, damage to property, or violation of law arises wholly from the negligence or willful misconduct of the City or its officers, employees, agents, or volunteers and (2) the actions of Professional or its employees, subcontractor, or agents have contributed in no part to the injury, loss of life, damage to property, or violation of law. It is understood that the duty of Professional to indemnify and hold harmless includes the duty to defend as set forth in Section 2778 of the California Civil Code. Acceptance by City of insurance certificates and endorsements required under this Agreement does not relieve Professional from liability under this indemnification and hold harmless clause. This indemnification and hold harmless clause shall apply to any damages or claims for damages whether or not such insurance policies shall have been determined to apply. By execution of this Agreement, Professional acknowledges and agrees to the provisions of this Section and that it is a material element of consideration.

5.2 PERS Indemnification. In the event that Professional or any employee, agent, or subcontractor of Professional providing services under this Agreement is determined by a court of competent jurisdiction or the California Public Employees Retirement System ("PERS") to be eligible for enrollment in PERS as an employee of City, Professional shall indemnify, defend, and hold harmless City for the payment of any and all employee and/or employer contributions for PERS benefits on behalf of Professional or its employees, agents, or subcontractors, as well as for the payment of any penalties and interest on such contributions, which would otherwise be the responsibility of City, and any attorneys' fees and costs incurred by the City to enforce this Section.

5.3 Design Professionals. To the extent that the services under this Agreement include design professional services subject to California Civil Code Section 2782.8, as may be amended from time to time, Professional's duty to indemnify under Sections 5.1 and 5.2 shall only be to the maximum extent permitted by California Civil Code Section 2782.8.

SECTION 6. STATUS OF PROFESSIONAL.

6.1 Independent Contractor. At all times during the term of this Agreement, Professional shall be an independent contractor as defined in Labor Code Section 3353, and shall not be an employee of City. Nothing contained in this Agreement shall be construed to be inconsistent with the foregoing relationship or status. City shall have the right to control Professional only insofar as the results of Professional's services rendered pursuant to this Agreement and

assignment of personnel pursuant to Subparagraph 1.3; however, otherwise City shall not have the right to control the means and methods by which Professional accomplishes services rendered pursuant to this Agreement. Professional shall have no power or authority by this Agreement to bind the City in any respect. All employees and agents hired or retained by Professional are employees and agents of Professional and not of the City. The City shall not be obligated in any way to pay any wage claims or other claims made against Professional by any such employees or agents, or any other person resulting from performance of this Agreement.

Notwithstanding any other City, state, or federal policy, rule, regulation, law, or ordinance to the contrary, Professional and any of its employees, agents, and subcontractors providing services under this Agreement shall not qualify for or become entitled to, and hereby agree to waive any and all claims to, any compensation, benefit, or any incident of employment by City, including but not limited to eligibility to enroll in PERS as an employee of City and entitlement to any contribution to be paid by City for employer contributions and/or employee contributions for PERS benefits. Professional shall not allow any employee, agent or subcontractor to become eligible for a claim for PERS benefits.

6.2 Professional Not an Agent. Except as City may specify in writing, Professional shall have no authority, express or implied, to act on behalf of City in any capacity whatsoever as an agent. Professional shall have no authority, express or implied, pursuant to this Agreement to bind City to any obligation whatsoever.

SECTION 7. LEGAL REQUIREMENTS.

7.1 Governing Law. The laws of the State of California shall govern this Agreement.

7.2 Compliance with Applicable Laws. Professional and any subcontractors shall comply with all laws and regulations applicable to the performance of the work hereunder, including but not limited to, the California Building Code, the Americans with Disabilities Act, and any copyright, patent or trademark law. Professional's failure to comply with any law(s) or regulation(s) applicable to the performance of the work hereunder shall constitute a breach of contract.

7.3 Other Governmental Regulations. To the extent that this Agreement may be funded by fiscal assistance from another governmental entity, Professional and any subcontractors shall comply with all applicable rules and regulations to which City is bound by the terms of such fiscal assistance program.

7.4 Licenses and Permits. Professional represents and warrants to City that Professional and its employees, agents, and any subcontractors have all licenses, permits, qualifications, and approvals of whatsoever nature that are legally required to practice their respective professions. Professional represents and warrants to City that Professional and its employees, agents, any subcontractors shall, at their sole cost and expense, keep in effect at all times during the term of this Agreement any licenses, permits, and approvals that are legally required to practice their respective professions. In addition to the foregoing,

Professional and any subcontractors shall obtain and maintain valid Business Licenses from City during the term of this Agreement.

7.5 Nondiscrimination and Equal Opportunity. Professional shall not discriminate, on the basis of a person's race, religion, color, national origin, age, physical or mental handicap or disability, medical condition, marital status, sex, or sexual orientation, against any employee, applicant for employment, subcontractor, bidder for a subcontract, or participant in, recipient of, or applicant for any services or programs provided by Professional under this Agreement. Professional shall comply with all applicable federal, state, and local laws, policies, rules, and requirements related to equal opportunity and nondiscrimination in employment, contracting, and the provision of any services that are the subject of this Agreement, including but not limited to the satisfaction of any positive obligations required of Professional thereby.

Professional shall include the provisions of this Subsection in any subcontract approved by the Contract Administrator or this Agreement.

SECTION 8. TERMINATION AND MODIFICATION.

8.1 Termination. City may cancel this Agreement at any time and without cause upon written notification to Professional.

Professional may cancel this Agreement upon 30 days' written notice to City and shall include in such notice the reasons for cancellation.

In the event of termination, Professional shall be entitled to compensation for services performed to the effective date of termination; City, however, may condition payment of such compensation upon Professional delivering to City any or all documents, photographs, computer software, video and audio tapes, and other materials provided to Professional or prepared by or for Professional or the City in connection with this Agreement.

8.2 Extension. City may, in its sole and exclusive discretion, extend the end date of this Agreement beyond that provided for in Subsection 1.1. Any such extension shall require a written amendment to this Agreement, as provided for herein. Professional understands and agrees that, if City grants such an extension, City shall have no obligation to provide Professional with compensation beyond the maximum amount provided for in this Agreement. Similarly, unless authorized by the Contract Administrator, City shall have no obligation to reimburse Professional for any otherwise reimbursable expenses incurred during the extension period.

8.3 Amendments. The Parties may amend this Agreement only by a writing signed by all the Parties.

8.4 Assignment and Subcontracting. City and Professional recognize and agree that this Agreement contemplates personal performance by Professional and is based upon a determination of Professional's unique personal competence, experience, and specialized personal knowledge. Moreover, a substantial inducement to City for entering into this

Agreement was and is the professional reputation and competence of Professional. Professional may not assign this Agreement or any interest therein without the prior written approval of the Contract Administrator. Professional shall not subcontract any portion of the performance contemplated and provided for herein, other than to the subcontractors noted in the proposal, without prior written approval of the Contract Administrator.

8.5 **Survival.** All obligations arising prior to the termination of this Agreement and all provisions of this Agreement allocating liability between City and Professional shall survive the termination of this Agreement.

8.6 **Options upon Breach by Professional.** If Professional materially breaches any of the terms of this Agreement, City's remedies shall include, but not be limited to, the following:

8.6.1 Immediately terminate the Agreement;

8.6.2 Retain the plans, specifications, drawings, reports, design documents, and any other work product prepared by Professional pursuant to this Agreement;

8.6.3 Retain a different Professional to complete the services described in Exhibit A not finished by Professional; and

8.6.4 Charge Professional the difference between the cost to complete the services described in Exhibit A that is unfinished at the time of breach and the amount that City would have paid Professional pursuant to Section 2 if Professional had completed the work.

SECTION 9. KEEPING AND STATUS OF RECORDS.

9.1 **Records Created as Part of Professional's Performance.** All reports, data, maps, models, charts, studies, surveys, photographs, memoranda, plans, studies, specifications, records, files, or any other documents or materials, in electronic or any other form, that Professional prepares or obtains pursuant to this Agreement and that relate to the matters covered hereunder shall be the property of the City. Professional hereby agrees to deliver those documents to the City upon termination of the Agreement. It is understood and agreed that the documents and other materials, including but not limited to those described above, prepared pursuant to this Agreement are prepared specifically for the City and are not necessarily suitable for any future or other use. City and Professional agree that, until final approval by City, all data, plans, specifications, reports and other documents are confidential and will not be released to third parties without prior written consent of both parties.

9.2 **Professional's Books and Records.** Professional shall maintain any and all ledgers, books of account, invoices, vouchers, canceled checks, and other records or documents evidencing or relating to charges for services or expenditures and disbursements charged to the City under this Agreement for a minimum of three (3) years, or for any longer period required by law, from the date of final payment to the Professional pursuant to this Agreement.

9.3 **Inspection and Audit of Records.** Any records or documents that Section 9.2 of this Agreement requires Professional to maintain shall be made available for inspection, audit, and/or copying at any time during regular business hours, upon oral or written request of the City. Under California Government Code Section 8546.7, if the amount of public funds expended under this Agreement exceeds TEN THOUSAND DOLLARS ($10,000.00), the Agreement shall be subject to the examination and audit of the State Auditor, at the request of City or as part of any audit of the City, for a period of three (3) years after final payment under the Agreement.

SECTION 10. MISCELLANEOUS PROVISIONS.

10.1 **Attorneys' Fees.** If a Party to this Agreement brings any action, including an action for declaratory relief, to enforce or interpret the provision of this Agreement, the prevailing Party shall be entitled to reasonable attorneys' fees in addition to any other relief to which that Party may be entitled. The court may set such fees in the same action or in a separate action brought for that purpose.

10.2 **Venue.** In the event that either Party brings any action against the other under this Agreement, the Parties agree that trial of such action shall be vested exclusively in the state courts of California in the County of Sacramento or in the United States District Court for the Eastern District of California.

10.3 **Severability.** If a court of competent jurisdiction finds or rules that any provision of this Agreement is invalid, void, or unenforceable, the provisions of this Agreement not so adjudged shall remain in full force and effect. The invalidity in whole or in part of any provision of this Agreement shall not void or affect the validity of any other provision of this Agreement.

10.4 **No Implied Waiver of Breach.** The waiver of any breach of a specific provision of this Agreement does not constitute a waiver of any other breach of that term or any other term of this Agreement.

10.5 **Successors and Assigns.** The provisions of this Agreement shall inure to the benefit of and shall apply to and bind the successors and assigns of the Parties.

10.6 **Use of Recycled Products.** Professional shall prepare and submit all reports, written studies and other printed material on recycled paper to the extent it is available at equal or less cost than virgin paper.

10.7 **Conflict of Interest.** Professional may serve other clients, but none whose activities within the corporate limits of City or whose business, regardless of location, would place Professional in a "conflict of interest," as that term is defined in the Political Reform Act, codified at California Government Code Section 81000 *et seq.*

Professional shall not employ any City official in the work performed pursuant to this Agreement. No officer or employee of City shall have any financial interest in this Agreement that would violate California Government Code Sections 1090 *et seq.*

Professional hereby warrants that it is not now, nor has it been in the previous twelve (12) months, an employee, agent, appointee, or official of the City. If Professional was an employee, agent, appointee, or official of the City in the previous twelve months, Professional warrants that it did not participate in any manner in the forming of this Agreement. Professional understands that, if this Agreement is made in violation of Government Code §1090 *et seq.*, the entire Agreement is void and Professional will not be entitled to any compensation for services performed pursuant to this Agreement, including reimbursement of expenses, and Professional will be required to reimburse the City for any sums paid to the Professional. Professional understands that, in addition to the foregoing, it may be subject to criminal prosecution for a violation of Government Code § 1090 and, if applicable, will be disqualified from holding public office in the State of California.

10.8 Solicitation. Professional agrees not to solicit business at any meeting, focus group, or interview related to this Agreement, either orally or through any written materials.

10.9 Contract Administration. This Agreement shall be administered by Marc Hill ("Contract Administrator"). All correspondence shall be directed to or through the Contract Administrator or his or her designee.

10.10 Notices.

Any written notice to City shall be sent to:

ATTN: Marc Hill
City of Rancho Cordova
3303 Luyung Drive
Rancho Cordova, CA 95742
mhill@cityofranchocordova.org

Any written notice to Professional shall be sent to:

ATTN: Katelyn Scholz
1504 Eureka Road, Suite 220
Roseville, CA 95661
kscholz@r3cgi.com

10.11 Professional Seal. Where applicable in the determination of the Contract Administrator or when required by law, the first page of a technical report, first page of design specifications, and each page of construction drawings shall be stamped/sealed and signed by the licensed professional responsible for the report/design preparation. The stamp/seal shall be in a block entitled "Seal and Signature of Registered Professional with report/design responsibility," as in the following example.

_____ Seal and Signature of Registered Professional with report/design responsibility.

10.12 Integration. This Agreement, including the scope of services attached hereto and incorporated herein as Exhibit A, and the compensation schedule attached hereto and incorporated herein as Exhibit B, represents the entire and integrated agreement between City and Professional and supersedes all prior negotiations, representations, or agreements, either written or oral.

10.13 IRS Form W-9. Professional shall complete and submit Internal Revenue Service Form W-9 to the City before execution of this Agreement. The City's Finance Director shall have authority to waive this requirement.

IN WITNESS WHEREOF, the parties have executed this Agreement as of the day and year set forth above, which date shall be considered the effective date of this Agreement.

EXHIBIT A
SCOPE OF SERVICES

2. Scope of Work

The following Scope of Work is an attempt to demonstrate the variety and depth of work that will be performed as part of this contract. The topics are listed alphabetically, not in order of importance.

2.1. Construction & Demolition Debris Program Assistance

- Assist with CalGreen compliance by finalizing Waste Management Plans and Reports as submitted by contractors.
- Assist with customer service issues, questions, etc. from internal and external stakeholders.
- Assist with revision of solid waste management guidelines, including waste screening/enclosure standards, for use by contractors, developers, etc.

2.2. Edible Food Recovery Program Assistance

- Assist with identifying and maintaining an accurate list of Tier 1 and Tier 2 edible food generators per Section 18991.2(a)(1).
- Assist with providing Food Recovery Organization inspections per Section 18995.1(a)(2) of SLCP Regulations.
- Attend Capital Food Access Alliance meetings and act as backup voting member when required.
- Assist in strategizing methods to expand food recovery capacity, increase generator access to food recovery organizations, and streamline processes, where applicable.
- 2.3. Franchise Agreement Administration (Residential, Commercial & Temporary Service) Assistance
- Assist with administration of the Proposition 218 process, as necessary, for proposed rate adjustments.
- Assist with coordination of waste hauler meetings, as requested.
- Assist with analysis of required reports and other submittals; make recommendations for program changes based on findings.
- Assist with ensuring hauler compliance with franchise agreement provisions.
- Assist with the evaluation and preparation of amendments to franchise agreements as needed to achieve continued compliance with new and existing State and local laws and regulations and City goals.
- Assist with various customer service issues, as necessary/directed.
- Assist with the performance of franchise waste hauler audits for compliance with franchise agreement provisions including: franchise fee remittance, tonnage reporting, regulatory compliance, etc., as requested. It is anticipated that a maximum of one audit will be performed per year of this contract.

2.4. Grant Assistance

- Assist in the preparation, administration and reporting activities for various grants and funding programs offered by CalRecycle including:
- City/County Payment Program
- Used Oil Payment Program
- HHW Grant Program

- Other opportunities as made available by CalRecycle
- Assist in researching other public and/or private funding sources available for solid waste programming that can be leveraged to the benefit of City residents, businesses and multi-family properties.

2.5. Policy and Procedure Assistance

- Assist in reviewing existing solid waste ordinances for compliance with regulations and recommending language additions/edits, as necessary.
- Assist in drafting solid waste program policy and procedure documents for internal and external stakeholders, including the development of application documentation.
- Provide subject matter expertise related to interpretation of State solid waste laws and regulations, make recommendations related to solid waste program delivery to maintain compliance, and assist in drafting position statements, as needed.

2.6. Program Promotion, Education and Outreach Assistance

- Assist in researching and recommending best practices for promotion, outreach and educational activities that will enhance program delivery and participation.
- Assist in the creation of signage, program data sheets, flyers, web content and other materials, as directed. Depending on the situation, this work may be performed in-house by Contractor or sub-contracted to a third party.
- Assist with education and outreach activities including site visits, educational presentations in the community, tabling events, etc. as directed.

2.7. Public Meeting Assistance

- Assist in preparing documents and presentations for City Council, City staff meetings, and/or other professional organizations.
- Participate as a subject matter expert, or act as the lead presenter, for the aforementioned meetings as directed.

2.8. Reporting Assistance

- Assist with preparation of AB 939 Electronic Annual Report.
- Assist with Form 303 Household Hazardous Waste Report, as necessary.
- Participate in meetings with CalRecycle representatives as necessary to review various programs and assist with any necessary reports or information in advance or at the conclusion of each meeting.
- Assist with creation of any other reports necessary to comply with regulations or provide information to stakeholders.

2.9. Solid Waste Rate Study

Perform a rate study to accomplish the following goals:

- Gathering costs related to implementing State mandates including AB 939, AB 341, AB 1826 and SB 1383.

- Reviewing all fees and complimentary service identified in franchise agreements and providing opinions on potential exposure to litigation.
- Associating costs with current franchise fee revenues to ensure that current structure can be justified.
- Preparing a report that summarizes findings and recommendations.

2.10. Special Projects/Task(s)

Assist with special projects, tasks, program ideas and other solid waste administrative activities as requested by the City. Examples include, but are not limited to:

- Surveying local processing and recovery facilities for diversion and/or residual rates.
- Developing case studies to document program outcomes.
- Assisting with performing waste evaluations, including arranging for sub-contractors as needed.

EXHIBIT B
PROPOSAL RESPONSE / COMPENSATION SCHEDULE

R3 CONSULTING GROUP, INC
RESOURCES · RESPECT · RESPONSIBILITY

March 6, 2026

Mr. Marc Hill, Solid Waste Manager
Public Works Department
City of Rancho Cordova
3303 Luyung Drive, Rancho Cordova, CA 95670
submitted via the City's online portal: https://procurement.opengov.com

SUBJECT: On-Call Solid Waste Consulting Services - R3 Proposal

Dear Mr. Hill,

R3 Consulting Group Inc., (R3) is pleased to submit this proposal to continue our over 20-year relationship with the City of Rancho Cordova (City) for On-Call Solid Waste Consulting Services.

Introduction

The City's solid waste consulting needs covers a range of tasks that support contract administration and compliance for both the exclusive residential collection franchise and non-exclusive commercial franchise agreements, as well as more broadly advancing the City solid waste goals. As such, R3 will provide expert knowledge and technical assistance to aid in program development and success in all areas of the City's solid waste management program.

Our team is uniquely qualified to provide these services to the City. Over the past two years, R3 has been a key collaborator with City staff during a competitive procurement, staffing and hauler transition, and the launch of new franchise agreements. We have served as a trusted member of the City's external team for decades, and have been a key partner in developing and implementing solid waste programs and practices. Additionally, we also have the ability to leverage our work efforts with neighboring communities; R3 has been guiding the nearby jurisdictions of Citrus Heights, Elk Grove, Woodland, and Folsom with SB 1383 compliance planning and implementation.

R3 has a staff of 21 members who balance out each other's workloads. R3 already has Rancho Cordova as a client built into the staff's workload planning, and the team has averaged ~16 hours per week over the last 12 months. Recently, R3 introduced new staff members to this engagement, and we are confident that we are building a strong team to support the City's needs. R3 can meet the City's proposed project schedule, and commits to dedicating the time and staff necessary to properly support, implement and measure the City's programs.

R3 works collectively toward its mission of serving communities by providing unbiased, expert analysis that sustainably advances environmental policy, finance and operations. R3 leaders, and the group as a collective, set the long-term goals; the team remains aligned with the overall mission, while relying on trust and autonomy. The Project Lead for the City will have the flexibility to work with City staff in the manner that works best for this project. The Project Lead will pull in

support staff and consult with R3 leadership as advisors to deliver the best advice to City staff. R3 views success as a continuous process, not an ultimate destination. The team is enthused when driving change and adapting to new challenges. Success with Rancho Cordova will mean continuing the teams' long-term relationship, while steadily and progressively driving meaningful change, all while ensuring the City is satisfied with the consulting services being provided.

Contact Information

Business Name: R3 Consulting Group, Inc.
Contact Person: Katelyn Scholz, Project Lead
Phone Number: **m** 650.799.3213 | **o** 916.782.7821
Mailing Address: 1504 Eureka Road, Suite 220, Roseville CA 95661

Required Statements

R3 Statements

R3 will perform the services as described in the Scope of Work of the RFP. Our team understands this proposal may become public information, and nothing contained within this proposal is proprietary.

Addendum Statement

As of March 6, 2026, no addendum have been released from the City. R3 confirms receipt of the City's answers to questions, posted on February 13, 2026.

Project Team

Prime Consultant - R3

Katelyn Scholz, Sr. Managing Consultant, will serve as Project Lead and primary point of contact. **Carrie Baxter**, Principal and Sr. Vice President, will support Katelyn and provide project oversight. Carrie has the authority to contractually obligate R3 and negotiate contacts on behalf of the organization. **Scott Hanin**, Principal, **Maryann Hulsman**, Sr. Consultant, **Gauvri Nathwani**, Consultant, and **Angela Micheletti**, Associate Consultant, will provide support throughout this engagement.

Subconsultant - John T Hanscom Consulting

John Hanscom, Principal, will be available to serve as a bilingual, on-site coordinator for potential field-based outreach and education activities.

* * * * *

We appreciate the opportunity in continuing to be of service and support City staff in it's creative, thoughtful, and detailed approaches to executing it solid waste programs.

Sincerely,

Carrie Baxter | *Sr. Vice President, Principal*

2. CONTRACTOR EXPERIENCE

Prime Consultant

About R3

Over the past 23 years, we have specialized in providing a diverse range of solid waste management consulting services to public agencies, including competitive procurement and/or extension negotiations of collection, processing and disposal services, development, implementation and monitoring of service contracts and franchise agreements, rate and financial reviews, nexus fee studies, zero waste planning, and legislative compliance. Our team, comprised of 21 staff members, has dedicated their careers to the field of solid waste management, public service, and sustainability and skillfully deliver expert industry analysis and recommendations to our clients.

Legislative Compliance Planning and Implementation

R3 provides a full range of planning, design, implementation, monitoring, and administrative services in support of regulatory compliance with state legislation. We regularly attend in-person workshops and engage in stakeholder discussions related to Propositions 26 and 218, AB 1826 and SB 1383 and 54, both regionally and statewide. Our knowledgeable, experienced staff advise and guide our clients to ensure that jurisdictions meet and remain compliant with all current regulatory requirements and proactively plan for the demands of impending legislation. We provide a coordinated approach that is logical, cost-effective, and draws upon our operational, public policy, and public education and outreach capabilities.

Solid Waste Costs and Property Use Charge Studies

All R3 team members are currently assisting or have recently assisted various California jurisdictions with reviewing their solid waste fees and determining the nexus between the actual supported expenses and the fees being charged. These fees include street maintenance and repair costs associated with refuse collection vehicles, government property rights associated with the value of using the public right of way, solid waste management, street sweeping and catch basin cleaning, illegal dumping, program administration, oversight, compliance, and other expenditures that may be eligible for recovery from solid waste rates. The studies involve researching, analyzing, and summarizing current fee revenues paid and comparing those values to the cost-recovery, government property value fee estimates, and other impacts identified in the analysis.

Edible Food Recovery

R3 strives to be at the forefront of food rescue and recovery research and planning efforts throughout California and nationally. We are currently conducting several SB 1383 food-recovery related projects and remain ahead of other current and upcoming legislation pertaining to food rescue and recovery operations, such as AB 954, AB 1219, and SB 557.

In 2019, our team conducted a review of California's food recovery infrastructure for CalRecycle. The goal of this project was to recommend opportunities for improving and expanding California's food recovery infrastructure in response to SB 1383. As part of this engagement, we had the opportunity to review and assess a wide range of food-recovery operations, approaches, and technologies, including logistical support technologies and public education efforts. Over the past three years, we have worked to expand municipal food recovery operations, including increasing

food bank capacity and infrastructure, most recently for the Counties of Butte, Sacramento, Sutter, San Benito, and Yuba, Yolo Food Bank, Sacramento Food Bank and Family Services, and Alameda County Community Food Bank.

Public Education and Outreach Assistance

Successful recycling and composting programs depend on strong, integrated education, outreach, and technical assistance. R3's team of experts is fully up to date on the latest behavior change methodologies, regularly attending state conferences and webinars, and participating in professional development and research related to community engagement and climate change communications. We have conducted staff trainings and in-person workshops, created training resource guides, and developed print and online material to specifically address AB 341, AB 1826, AB 901, SB 1383, and other waste-related topics such as HHW, used oil/oil filters, single-use plastics policy, diversion requirements, Construction and Demolition (C&D) debris programs, edible food recovery, waste reduction and contamination.

Subconsultant

John T. Hanscom Consulting

John T. Hanscom Consulting has been serving communities through specialized environmental education since 2013. John Hanscom, Principal, is thoroughly experienced in providing waste-related technical assistance for businesses. His experience as a consultant and public sector recycling staff person includes managing recycling education programs, field assessments, and public outreach and education. He is bilingual in English and Spanish, and is skilled in working with diverse communities.

1. City of Citrus Heights

Ms. Mary Poole, Operations Manager **Budget:** $304,820
916.727.4730 | mpoole@citrusheights.net

Contract Dates: February 2025 - Current, Ongoing Project **Contract Lead:** Carrie Baxter
Support Staff: Scott Hanin, Katelyn Scholz, Gauvri Nathwani, Angela Micheletti, Jordan Lane

Various On-Call Consulting Services

Our team has served the City since 2003 with various solid waste consulting services, and our team is continuing to assist the City with strategic planning for implementation of upcoming state laws, including preparation and aid in addressing challenges and providing guidance during the development and implementation of SB 1383. As part of our on-call services, we are currently supporting the City by conducting on-going oversight of the SB 1383 implementation record including the waiver process and providing technical assistance to Sunrise Christian Food Ministry and edible food generators throughout the City. R3 is also conducting a performance review of the current residential contract held by Republic Services which includes a detailed billing and City fees audit. This work is being conducted at the same time as we assist the City negotiating a new franchise agreement with its current residential hauler and presenting the results to City leadership.

2. City of Woodland

Ms. Rosie Ledesma, Environmental Resources Program Manager **Budget:** $95,000

Contract Dates: February 2025 - Current, Ongoing Project **Contract Lead:** Katelyn Scholz
Support Staff: Angela Micheletti, Maryann Hulsman

Various On-Call Consulting Services

The City engaged R3 in September 2024 to support the negotiation of an updated Franchise Agreement after our team completed a performance review of the hauler. Our team wrote a new Agreement that prioritized measurable performance standards for WM, covering customer service,

operations, and public education. The process involved WM providing transparency around performance benchmarks, and improving internal processes to match City expectations. Negotiations were successful, and the Franchise Agreement was approved by City Council on April 15, 2025. After negotiations were complete, the City brought R3 on to support City staff through transition in agreements, and to review the health and compliance of current SB 1383 programs, including the mandatory delivery of organics service, and the approval process for waivers and alternative compliance.

3. City of Elk Grove

Ms. Kimberly Taylor, Manager/Recycling & Waste Division
916.627.3440 | ktaylor@elkgrove.gov

Budget: $245,000

Contract Dates: January 2022 - June 2025

Contract Lead: Alex Soulard

Support Staff: Carrie Baxter, Katelyn Scholz, Angela Micheletti

Various On-Call Consulting Services

In 2022, R3 was engaged by the City to provide SB 1383 implementation support and on-call services. Since that time, our team has provided comprehensive assistance in implementing SB 1383 programs, including edible food recovery program support, outreach and education collateral, recommendations for implementation record management and capacity planning assistance, for both edible food and organic waste capacity planning.

R3 has also taken the lead on the City's EAR to CalRecycle for the past three years, created a grant tracking and reporting process for City staff, and completed a commercial franchise fee assessment.

3. QUALIFICATIONS OF PROPOSED STAFF

Prime Consultant - R3

Katelyn Scholz, Sr. Managing Consultant, has experience in the private, public and non-profit sectors, forging meaningful partnerships to advance sustainability goals. She provides important support on a variety of solid waste management projects, including grants management, SB 1383 implementation, outreach program development, negotiations and competitive procurement of new collection agreements. **Carrie Baxter**, Principal, specializes in providing legislative compliance assistance to local jurisdictions for implementing or expanding programs related to organic material collection, tracking, and infrastructure development, as well as assisting in negotiating improvements and incorporating best practices into municipal codes and solid waste collection contracts.

Scott Hanin, has assisted dozens of jurisdictions in the procurement, development, and/or negotiations of their solid waste agreements. He understands the financial and cost issues at hand and is particularly adept at negotiating solutions that work for both parties. **Maryann Hulsman**, Sr. Consultant, provides effective, thoughtful communication, and is able to solve problems and lead teams through complex situations. She has a long-held and ardent relationship with waste diversion and environmental consulting.

Gauvri Nathwani, Consultant, is an experienced sustainability professional with a strong background in environmental education, policy compliance, and community outreach. She has worked across local government, nonprofit, and private sectors to support zero-waste initiatives and promote environmentally responsible practices. **Angela Micheletti**, Associate Consultant, provides important support on a variety of projects, including policy planning and implementation, negotiations and procurement, financial and rate reviews, as well as assisting jurisdictions with incorporating state regulations into their solid waste contracts.

Subconsultant - John T. Hanscom Consulting

John Hanscom, Principal, is an environmental education specialist with over 25 years of experience in business technical assistance, specializing in waste reduction, recycling and organics diversion. His experience as a consultant and public sector recycling staff person includes managing recycling education programs, field assessments, public outreach and education.

Organizational Chart

More information on the City's core project team's experience and backgrounds can be found in the Appendix, at the end of this proposal.

4. CONTRACT UNDERSTANDING AND APPROACH

Project Understanding

The City's on-call solid waste consulting needs range from contract administration, to grant support, to building and implementing new robust programs. The City prioritizes using data to drive real change relative to both contractor performance and diversion of waste throughout the community. R3 will draw on its larger team's decades of experience and provide technical, programmatic, and data driven support for the City. R3 has appreciated working with the City through the years, and has been enthused by the recent work, developing new programs and approaches with City staff and external partners. R3 will continue to serve as a partner to the City as we demand performance from the haulers, provide more resources for generators, and continue to not only comply with regulations but see what we can accomplish together as we implement new solid waste programs.

The tasks below are listed alphabetically, not in order of importance, as outlined in the RFP. R3 understands that tasks can be intertwined, and priorities can shift. We look forward to continuing to collaborate on the following tasks, as directed by City staff, and as may evolve as needs shift.

Scope of Work

Task 1 Construction & Demolition Debris Program Assistance

R3 understands that the City is in the process of reimagining and implementing its CALGreen covered project program. R3 will assist with program compliance by finalizing Waste Management Plans and Reports as submitted by contractors. R3 will assume responsibilities as directed by City staff to track projects through GreenHalo, importantly, accepting the final provision of weight ticket data, aligning that with expectations, and determining level of compliance.

R3 understands the City may receive a new influx of customer service inquiries related to the new CALGreen program and implementation of Green Halo. R3 will assist with customer service issues as directed, and will offer information and solutions as applicable. To the extent additional tools, collateral, or other resources will need to be developed to support stakeholder understanding and compliance, R3 will develop those resources under the City's direction.

R3 is enthused at the concept of getting more involved with the management of solid waste at the planning, designing and building phases of development. R3 will assist with the revision of solid waste management guidelines, including waste enclosure requirements, with the goal of sufficiently equipping project applicants with proper requirements, streamlining compliance throughout the development process. Rancho Cordova continues to experience exponential growth, and it is critical that the built environment reflects both diversion goals and operational service needs.

Task 2 Edible Food Recovery Program Assistance

The City historically contracted with R3 to provide edible food recovery inspections. Over the course of the last year, R3 has supported the City in its refinement of its edible food program, which includes designating food recovery organizations in the community as the parties responsible for conducting inspections of Tier 1 and Tier 2 generators. R3 will continue to work with staff to support edible food recovery programs in the City.

Support may include, but is not limited to:

- Identifying Tier 1 and Tier 2 generators and maintaining an accurate list, in accordance with regulations.
- Attending Capital Food Access Alliance meetings, acting as backup voting member as applicable.
- Strategizing with City staff on methods to expand food recovery capacity and increase generator access to food recovery organizations.
- Developing education, monitoring and inspection resources for food recovery organizations to utilize in their outreach and inspections of generators.
- Supporting the City in identifying methods to streamline all components of the program, including data gathering, resource distribution, regional collaboration, and ultimately getting edible food to those in need.

Task 3 Franchise Agreement Administration Assistance *(Residential, Commercial and Temporary Service)*

The City's new residential franchise agreement commenced on January 1, 2025, and R3 supported City staff through this transition. Through the course of calendar year 2025, R3 and City staff worked extremely collaboratively on the development of new non-exclusive franchise agreements for commercial haulers, which included bifurcating temporary service providers from providers that offer ongoing, weekly service. The new agreements commenced on January 1, 2026, and R3 has been supporting the City through that transition. A critical part of this changeover has been the development of the City's new hauler portal. R3 has gratefully been invited into the hauler portal development process; testing the portal, providing reporting templates, coordinating with haulers, and identifying needs. R3 looks forward to continuing to collaborate with City staff on their advanced approach to monitoring and tracking hauler performance.

Support may include, but is not limited to:

- Assist with administration of the Proposition 218 process for rate adjustments related to the residential agreement.
- Assist with coordination of waste hauler meetings to discuss reporting and program effectiveness, and direct efforts toward needed programmatic changes. R3 will develop agendas as directed, as well as coordinate with haulers on tasks resulting from meetings.
- Assist with analysis of required reports and other submittals, largely through the newly launched hauler portal.
  - Based on this analysis, make recommendations for program changes or improved implementation pathways.
- Assist with ensuring hauler compliance with franchise agreement provisions and monitoring overall performance, continuing to leverage the hauler portal to the extent feasible to consolidate all data related to franchise agreement management in one accessible tracking system.
- Assist with the evaluation and preparation of amendments to franchise agreements as needed to achieve continued compliance with new and existing State and local laws and regulations, as well as further drive implementation of City objectives, which may strive beyond strict compliance.
- Assist with various customer service issues, as directed, including concerns related to service provision by the hauler. This may involve emails, phone calls, or meeting with the customer in person, as applicable and as directed by the City.
- Assist with the performance of franchise waste hauler audits for compliance with franchise agreement provisions including: franchise fee remittance, tonnage reporting, regulatory compliance, etc., as requested. R3 understands that the City anticipates requesting that one audit will be performed per year of this contract. The audit will entail determining the proper payment of fees, the accuracy of reported tonnages, and regulatory compliance. R3's understanding is that this will be limited to a desktop audit and will not extend to performance of services in the field.

Task 4 Grant Assistance

R3 will provide assistance with various grants and funding programs offered by CalRecycle and other funding sources. R3 will stay up-to-date on all current and upcoming grant cycles and provide necessary recommendations.

R3 will assist the City in managing and administering current grant programs and submitting reports to the applicable grant agencies. R3 will prepare the applications and reports for the SB 1383 Local Assistance Grant Program, Used Oil Payment Program, City/County Payment Program, and Household Hazardous Waste Program, as requested, or needed by the City. R3 will stay up to date on all current and upcoming grant cycles, maintain knowledge of all new and existing grants, and provide necessary recommendations.

R3 will also diligently monitor availability of both new CalRecycle grant programs as well other public and/or private funding sources available for solid waste programming, with a particular goal of leveraging funding that could be used to benefit of City residents, businesses and multi-family properties.

Our work will involve:

- Conducting research and analysis on behalf of the City to design programs for grant applications and funding opportunities.
- Monitoring grant programs to ensure that programs follow the applicable terms and conditions of their awards.
- Maintaining knowledge of new and future grant opportunities for funding and creation of new recycling programs.

Task 5 Policy and Procedure Assistance

R3 has been an engaged partner with the City in reviewing and understanding the current status of compliance with regulations, and the parties have worked together to tighten up programs and policies to better and more clearly reach compliance. R3 will continue assisting the City in reviewing existing solid waste ordinances and programs and will recommend alterations to existing language as applicable.

Over the course of R3's engagement with the City, the parties have put various enforceable mechanisms in place, and we are now at an exciting juncture where we are redesigning some of the City's solid waste program policies and procedures to drive impact beyond its current status. R3 will collaborate with the City in crafting documents, resources, collateral and guides for both internal and external stakeholders. As the City's new application for its solid waste program is further implemented, R3 understands the opportunity to craft data-driven policy, procedures and campaigns will grow exponentially, and the team is very excited to craft such analytics-based implementation programs.

Through the development of the City's policies and procedures, R3 will provide subject matter expertise related to interpretation of State solid waste laws and regulations. Accordingly, the team will make recommendations related to solid waste program delivery to maintain compliance. Should the need arise, R3 also has experience in drafting position statements, and can support this City accordingly.

Task 6 Program Promotion, Education and Outreach Assistance

R3 will assist with the ongoing development of an education and outreach program. R3 will work with City staff and its haulers to communicate this information in several different ways. Outreach collateral can be developed for delivery to customers through bill inserts, flyers, newsletters, postcards, brochures, door/cart hangers and social media posts. We can also review the City's website for up-to-date content related to solid waste and recycling. Materials will be included in languages as required by SB 1383 and directed by the City.

R3 will prepare content, review as needed, and/or prepare other materials to educate residents on:

- Mandatory organic waste collection services.
- Customer rate adjustments.
- Information on organic waste.
- How to separate material into the correct containers.
- Edible Food Recovery.
- Other subjects required by SB 1383 and City strategic goals and objectives.

Note: Printing and postage costs for outreach materials are not included in this budget.

The project team, including subcontractor John Hanscom, is well-versed in engaging with businesses to meaningfully improve waste sorting and other zero waste practices. Activities may include on-site trainings, staff meetings, custodial trainings, educational presentations, or other engagement to boost waste diversion. R3 sees potential in supplementing newly developed hauler and code enforcement programs with a third party focused purely on driving diversion and implementing zero waste programs for the betterment of the community.

Task 7 Public Meeting Assistance

R3 will draft, review and refine presentation and education material for City Council, community groups and residents. R3 will collaborate with City staff to plan for proactive presentations to relevant stakeholders and professional organizations. As directed, R3 will participate as a subject matter expert, or act as the lead presenter, for applicable meetings and presentations.

Task 8 Reporting Assistance

R3 will assist with the preparation of all reports required by CalRecycle to support the City's compliance with the state's 50% AB 939 diversion goals. R3 will pull the applicable data from the City's records for inclusion in the Electronic Annual Report (EAR) and will prepare the EAR to describe the activities undertaken through the programs adopted in the City's Source Reduction and Recycling Element and Household Hazardous Waste Element. We will also prepare any additional required reports to comply with regulations or provide information to stakeholders.

Additionally, R3 will support the preparation of the following reports as requested by the City: Form 303 Household Hazardous Waste; Used Oil Payment Program Expenditure Report; and the City/City Payment Program Expenditure Report. R3 will track legislation and anticipated State of California regulations that impact the City's recycling and waste reduction program successes. R3 will participate in meetings with CalRecycle to review applicable programs, assist with any necessary reports or information to provide during CalRecycle meetings, and support ongoing communication with the City's local assistance and market development representatives.

R3 will continue to support City staff in its recordkeeping, particularly in relation to the required implementation record, which is currently in the process of being transferred from a folder-based system into one unified application being developed by City staff. As part of this task, R3 will provide a recommendation of models, examples and related checklists to help the City achieve and maintain compliance. R3 has already provided the City with sample tracking forms and methodologies for data tracking. SB 1383 regulations require that Implementation Records must be made available to CalRecycle within ten days of a request. R3 will work with the City to uphold the established process for ongoing maintenance of the implementation record.

Task 9 Solid Waste Study of Costs

Task 9.1 City Costs Analysis

R3 will research, analyze, calculate and estimate the amount of the City's solid waste management, administration, oversight, compliance, and other costs. The analysis will rely on financial information

provided by the City, including but not limited to internal cost-allocation information, salary and benefit information for positions having responsibility for solid waste management and compliance matters, street sweeping, storm-drain and/or catch basin waste removal, compliance activities, and other associated information that may identified by the City or R3. The outcome of the analysis will be a set of total calculated annual costs for solid waste management, administration, oversight, compliance, and other activities.

Task 9.2 Property Use Charge Analysis

R3 will research, analyze, and estimate the value of the City-government property rights conveyed to the City's contracted solid waste provider(s). The analysis will be based on the estimated amounts of time that solid waste containers are placed in the public right-of-way for collection as well reasonable estimates of the market value for that unique use of the public right-of-way. This analysis may also include other significant uses of government property that may be identified.

The outcome of this analysis will be an estimated annual figure for the property use charge value associated with the use of City's property.

Task 9.3 Pavement Impact Analysis

R3 will research, analyze, and estimate the value of the impact that solid waste collection vehicles operated by the City's contracted solid waste service provider(s) have on the City's street pavement.

The analysis will be based on the value of the City's streets pavement, wear and tear to them, and the calculated proportionate impact from solid waste collection vehicles. Information used in this analysis may include but is not limited to the number of street miles by type, vehicle trips on streets by vehicle type, pavement management plans, and other associated information provided by the City. The outcome of this analysis will be a calculated annual proportionate allocation of maintenance needs attributable to solid waste collection vehicles. This information will be used to support pavement impact costs if allowed with the passage of SB 922.

Task 9.4 Revenue Analysis

R3 will research, analyze, and summarize current fee revenues paid to City by contracted solid waste providers, and will compare those values to the sum of the City costs and property use charge calculations and estimates per the above. Differences between current fee revenues, fees collected through other mechanisms (e.g., AB 939, SB 1383 fees, etc.) and those resulting from our analysis will be identified and quantified. R3 makes no guarantee that the analytical results will support existing City fee revenue generation.

Task 9.5 Findings

R3 will provide the City with a written description of findings regarding the results of our analysis.

Task 9.6 Meetings

R3 will periodically meet with City staff throughout the engagement. This will include an initial kick-off meeting, status check-in meetings, and meetings to review draft and final results.

Task 10 Special Projects

R3 has a long-standing relationship with the City and has supported ad hoc needs to the City for the past several years. Occasionally, solid waste related issues can be unanticipated, and our team is prepared to support the City if/when those matters arise. For any special projects, R3 will confer with City to clarify scope and align on the expected staff time required. As always, R3 will remain in communication with the City regarding progress and deliverables to make sure our team is tracking toward the expected progress. R3 will assign a principal and project lead to every project, which provides high level oversight, and a deep understanding of each client's needs.

R3 understands that the following tasks are under consideration for further development under this contract:

- Surveying local processing and recovery facilities for diversion and/or residual rates.
- Developing case studies to document program outcomes.
- Assisting with performing waste evaluations, including arranging for sub-contractors as needed.

Successful Collaboration

The scope of an on-call solid waste consulting service is wide-ranging, and needs can evolve during a multi-year engagement. The most critical element of this engagement is understanding the needs and direction of the City. R3 will bring its decades of experience and knowledge of best practices, all of which is only helpful if the groundwork for strong collaboration between City staff and the consultant has been established.

R3 places immense value on its relationships with its municipal clients. We understand that priorities can shift based on local government leadership, CalRecycle regulations, residential concerns, etc.. It is vital that R3 and City staff maintain clear, transparent communication regarding priorities, workload and concerns. R3 has a track record with the City of staying on schedule with projects, reshuffling tasks to manage the most pressing issues, and incorporating relevant consultants that have not been on the primary team but may be most helpful for the task at hand. This type of communication, robust staffing and flexibility is critical in managing comprehensive solid waste programs.

R3's Project Lead, Kate Scholz, will serve as the initial point of contact for all matters related to this contract. Currently, Kate and the City's Solid Waste Manager have a scheduled check-in once per week, in which details of all issues top of mind are discussed, and priorities are clarified. In addition to the established weekly checkpoint, Kate has been and will continue to be available via email and phone to address issues as they arise.

The City can expect that all requests will be responded to within one business day, and if the Project Lead is ever out of office, she will ensure the City is aware of her limited availability, and designate a backup contact person as necessary.

Beyond communication structure, a key component of communication is genuinely listening and asking questions to make sure all parties are on the same page, to challenge ideas in an effort to mutually push for better solutions, and to be professional, courteous and collaborative at all times. R3 commits to continuing to bring these qualities to the City, and through this successful partnership, the parties will thrive as challenges and opportunities arise.

5. REQUIRED STATEMENTS

Conflict of Interest

R3 warrants that no official or employee of the City has an interest, has been employed or retained to solicit or aid in the procuring of the resulting contract, nor that any such person will be employed in the performance of such contract without immediate divulgence of such fact to the City.

Non-Collusion

R3 has partnered with John T. Hanscom Consulting to submit a cooperative proposal that clearly identifies R3 as the primary consultant and John T. Hanscom Consulting as the subconsultant.

6. COST PROPOSAL

R3 proposes to complete the project for a total not-to-exceed cost of **$715,550**, based on expected hours per week, as shared by the City and the currently anticipated staffing per task. For cost-effective service delivery, R3's pricing is fixed for Task 9, for a total cost of **$35,000**. **Table 1**, below, shows the estimated level of participation and **Table 2**, on the following page, shows the payment schedule for Task 9.

Additional consulting services beyond those proposed will be charged at the standard rates shown in **Table 3**, on the following page. Fees for work completed will be billed monthly at the first of each month, for the preceding month, and are due within 30 days of the invoice date.

Years in Industry: *13+ Years*

Katelyn Scholz

Sr. Managing Consultant, Project Lead

About

Katelyn Scholz has worked in the solid waste industry for 13+ years, with a background in deploying innovative recycling, composting and waste reduction programs. She has experience in the private, public and non-profit sectors, forging meaningful partnerships to advance sustainability goals. In her previous role at Mill Industries, she led municipal partnerships, where she assessed opportunities for the new technology in community settings, project managed pilot programs, and served as the company's subject matter expert. Prior to Mill Industries, Katelyn worked for the GreenWaste Recovery family of companies. She began working with GreenWaste of Palo Alto in an outreach capacity. Katelyn oversaw and coordinated the implementation of public education and outreach programs, conversion to fully-automated collection routes, and extension of collection agreements. As she moved to the corporate office, she became responsible for companywide sustainability practices and impactful community engagement. Katelyn also led business development and municipal procurement efforts, which provided a breadth of experience in public procurement processes.

As Sr. Managing Consultant for R3, Katelyn provides important support on a variety of solid waste management projects, including grants management, SB 1383 implementation, outreach program development, and negotiations/ procurements of new collection agreements.

Education & Certifications

» Bachelor of Science in City and Regional Planning
Cal Poly, San Luis Obispo

Relevant Experience

» **Various On-Call Consulting Services |** City of Rancho Cordova
Currently leading the R3 team with wide ranging solid waste consulting services for the City. She supported the City in modifying the existing non-exclusive franchise agreements to achieve greater diversion, tracking, and compliance from the various service providers within the community. With the residential hauler having newly taken on the franchise agreement last year, she is supporting City staff in tracking and requiring hauler compliance with the franchise agreement, and collaborating on establishing process for improved communication and reporting. The City is also taking on multiple creative and thoughtful processes to drive impact, including HHW and edible food projects, and Kate has been thrilled to be a member of the team working on this important work in this City.

» **On-Call Consulting Services |** City of Elk Grove
R3 recently provided comprehensive assistance in implementing SB 1383 programs, including edible food recovery program support, outreach and education collateral, recommendations for implementation record management, and capacity planning assistance – for both edible food and organic waste capacity planning. Kate assisted with the population and organics projections, in support of Sacramento County's Organics Capacity Planning efforts. Kate supported Solid Waste and Code Enforcement staff in the development of a process to inspect generators for compliance with SB 1383. The process is starting with Edible Food Generators, but the inspections include a holistic review of overall facility compliance with SB 1383. Kate is training City staff during in-person inspections, and will be available to support follow-up, recordkeeping and enforcement. She is also developing a detailed scope of work to help the City establish SOPs, develop updated Municipal Code language, and refined Commercial Franchise Agreements.

Relevant Experience, continued

- **Negotiation and On-Call Support |** City of Woodland
  Recently completed contract negotiations, which included developing a new agreement that prioritized measurable performance standards for the contractor covering customer service, operations, and public education. Notable deal points included the rollout of new technology to enforce overages and contamination, incorporating street sweeping services as a contractor-provided service, a new curbside HHW service, and rate adjustments to account for these new programs. Established on-call services once negotiations were complete to support City staff through transition in agreements, including ensuring reports and transition timelines meet updated expectations, and supporting the City's Proposition 218 noticing process.
- **SB 1383 Implementation and On-Call Assistance |** City of Citrus Heights
  Since 2003, our team has worked with the City to build upon the existing structure of the solid waste initiatives to establish new mechanisms for a more resilient program. We are continuing to assist with strategic planning for the implementation of current/ upcoming state laws. Katelyn recently performed edible food recovery site visits to Tier 2 Generators and calculated the population and organics projections as an element of Sacramento County's Organics Capacity Planning efforts.
- **Solid Waste Coordination Services |** City of Nevada City
  Led negotiations for a new franchise agreement, including designating a clear collection and processing pathway for clean green waste and incorporating a localized food waste management program to support community-based solutions. She is currently clarifying current commercial compliance with AB 1826 and establishing a process for ongoing monitoring for businesses with recycling or organics waivers and alternative compliance. She leads contract management of hauler programs, including guiding the transition in services with the new agreement, and manages all coordination with CalRecycle.
- **Negotiation Support |** City of Rocklin
  R3 has been engaged to negotiate a contract extension to modernize the agreement, memorialize services provided in the field, and incorporating SB 1383-compliant reporting and route review requirements. For this project, Katelyn maintains the schedule for negotiations, drives data collection and sharing, and proposes service solutions and contract language to meet mutually agreeable terms between the parties.
- **Solid Waste Coordination Services |** Town of Loomis
  Katelyn is currently supporting the negotiations for a contract extension in order to provide ongoing SB 1383 compliance, memorialize services provided in the field, and improve efficiency and diversion of services provided. She drafted the agreement amendment, and is spearheading a data-collection process to gain information on services currently in the field to inform service needs from a longer term agreement.
- **Outreach Coordinator / Outreach Manager |** GreenWaste of Palo Alto*
  Kate served as the primary liaison with City of Palo Alto staff and vital community organizations. She planned and oversaw outreach efforts and tracking plans for Recycling and Composting Ordinance implementation in the commercial and multi-family sector. She created and administered outreach programs for major residential service transitions, including food scrap collection and fully automated collection, identified waste reduction and recycling opportunities for residents, businesses, schools, and special events via hands-on waste audits, site walks, training sessions and community events.

**denotes completion with prior organization*

Carrie Baxter

Principal, Project Executive

About

Carrie Baxter has over 15 years of experience in solid waste consulting, leading operational, planning, and financial projects for jurisdictions throughout California, with a primary focus on Northern California communities. She specializes in providing legislative compliance and assists agencies in implementing state regulatory requirements, negotiating and updating collection agreements, and incorporating best practices and evolving state legislation in their municipal codes and collection agreements. Carrie has significant experience managing competitive procurements for collection and processing services, including development of procurement documents, proposal evaluations, and negotiation support, along with providing financial analyses, diversion incentive development, and community and stakeholder engagement.

She also routinely supports jurisdictions with ongoing program administration and contract performance oversight, including operations and performance reviews, billing and reporting systems evaluation, on-site route audits, benchmarking, and rate surveys. More recently, her work has expanded to include SB 1383 implementation support, edible food recovery coordination, organics procurement compliance grant and reporting oversight, and interim optional management support for local agencies.

Education & Certifications

- Bachelor of Science in Organization, Leadership & Management
  University of San Francisco
- Published Author - March/April 2019 BioCycle magazine
- Presenter - 2019 BioCycle West Coast Conference and the 2019 CRRA Conference

Relevant Experience

- **Various On-Call Consulting Services |** City of Rancho Cordova
  Led the team in developing a RFP package, evaluating proposals, and interviewing contractors for a new, residential franchised hauler. She has also managed programs for compliance with state legislation; supported outreach and education efforts to all covered generators; reviewed and revised the City's municipal code; negotiated contracts with franchised commercial waste haulers; worked with businesses and local jurisdictions for regional collaboration on plans such as procurement of organic products, edible food recovery, and education; and supported efforts to expand food waste recovery.
- **SB 1383 Implementation and On-Call Assistance |** City of Citrus Heights
  Carrie is supporting City staff with negotiations with Republic for a new franchise agreement that will support legislative compliance and maintaining the lowest customer rates in the region. If negotiations are unsuccessful, she will assist with developing a request for proposals package. She will assist in evaluating proposals and interviewing contractors for a new, residential franchised hauler and aid the evaluation team in their review. She also oversaw the implementation of a strategic plan to address SB 1383 requirements; assisted with updating the public and elected officials on current/upcoming state laws; and helped the City to not only meet and maintain current legislative requirements, but also to comply with future requirements. She drafted revisions to the City's Ordinance and non-exclusive commercial waste collection contract; reviewed the current residential contract and hauler proposal, developed a list of negotiation deal points, and provided draft contract language; participated in negotiations and presented recommendations to City Council.

Relevant Experience, continued

- **On-Call Consulting Services |** City of Elk Grove
  Provides on-call assistance on a range of solid waste and recycling matters. In 2022, she served in an interim management capacity during the Solid Waste & Recycling Division's Manager transition, leading development of the City's strategic plan for implementation of SB 1383 requirements. She also reviewed and provided updates to the commercial non-exclusive franchise agreements to address changes brought on by SB 1383 including route reviews, additional reporting requirements, and container and labeling requirements. She continues to support the City by reviewing annual reports to CalRecycle, monitoring SB 1383 implementation records, and verifying franchise fee payments from the residential hauler.
- **Program Administration and On-Call Consulting Services |** Cities of Beaumont, Citrus Heights, Dixon, Elk Grove, Rancho Cordova, Rohnert Park, Vallejo, and Westlake Village; Towns of Loomis and Windsor; and Yuba Sutter RWMA
  Provided ongoing solid waste coordination and advisory services, including solid waste collection contractor performance oversight, SB 1383 implementation support, municipal code and agreement updates, rate and reporting reviews, and compliance monitoring. Work includes CalRecycle reporting, grant administration, edible food recovery coordination, organics procurement compliance, contractor negotiations, and operational and program implementation support. She has also provided interim management and strategic planning support during staff transitions.
- **Procurement Assistance |** Cities of Eastvale, El Cajon, Half Moon Bay, Norco, San Juan Capistrano, Santa Clarita, Rosemead, Rancho Cordova, and West Sacramento; Town of Windsor; Santa Clara County; Zero Waste Sonoma, and Cal Poly Pomona
  Leads and supports competitive procurements for collection and processing services, including development of RFP packages and draft franchise agreements reflecting current legislation and industry best management practices. Supports proposal evaluations, interview processes, financial and service comparisons, and preparation of unbiased summary with a side-by-side comparison of the proposals to aid the evaluation committee in their review. Preparation of recommendations and staff reports for City Council.
- **Contract Negotiation Assistance |** Cities of Beaumont, Banning, Citrus Heights, Dixon, Fairfield, Rocklin, Rohnert Park, and Vallejo; Town of Loomis; and Yuba Sutter RWMA
  Provides negotiation and agreement amendment support to incorporate legislative requirements, service changes, and operational improvements to current or new collection or processing agreements. Work includes development of compliance plans, contract revisions, deal point development, rate adjustment support, preparation of staff reports and presentations to City Council.
- **Legislative Compliance and SB 1383 Implementation Planning |** Cities of Banning, Beaumont, Citrus Heights, Dixon, Elk Grove, Folsom, Grass Valley, Rancho Cordova, Rocklin, and Westlake Village; Town of Loomis; Nevada County; and Yuba Sutter RWMA
  Led the development of a strategic plan for implementing the requirements of SB 1383. Assisted City staff update elected officials and the public of current and upcoming state recycling laws, with a large focus on SB 1383, and helped the City in meeting and maintaining current legislative requirements and achieving compliance with future legislative requirements when SB 1383 mandates become effective.

Scott Hanin

Principal, Project Support

About

Scott Hanin has more than 35 years of solid waste experience, including serving as the Executive Director of the West Contra Costa Integrated Waste Management Authority (RecycleMore). Scott was also City Manager for the City of El Cerrito for 17 years, a member agency of RecycleMore. Scott oversaw all aspects of city government including budget development, strategic planning, community engagement, organizational development and restructuring, capital projects, legislative compliance, and oversight of all department heads.

Throughout his career Scott has worked in many related capacities including a recycling outreach coordinator, project manager of buy-back and drop of centers and environmental analyst for the City of New York. In his work as a consultant, Scott has assisted agencies throughout California with all aspects of their solid waste and diversion programs including contract development and management, program design, financial analysis and rate setting. He is currently assisting a number of jurisdictions in developing and evaluating SB 1383 programs and administering the related contract documents.

Education & Certifications

- Master of Public Administration
  New York University
- Bachelor of Arts in Political Science
  University of Delaware

Relevant Experience

- **Competitive Procurement Assistance |** City of Rancho Cordova
  Scott recently guided the City through its comprehensive competitive procurement process, including development of an RFP and a modernized SB 1383-compliant agreement. He oversaw the R3 team with establishing the hauler outreach list, responding to proposer questions, preparing addenda, conducting technical proposal evaluations, and supporting negotiation with the selected hauler. Along with City staff, Scott finalized the resultant franchise agreement and prepared staff reports and presentations for City Council consideration, which supported a successful transition to a new residential franchise agreement.
- **Solid Waste Costs and Property Use Charge Studies |** Various Jurisdictions
  Scott is providing overall direction and quality assurance for our team's efforts related to providing fee studies for 20+ public sector clients. He is responsible for conducting cost-recovery, vehicle impact, and property value analyses. His primary focus is reviewing the current local fees included in solid waste franchises to determine their relationship to actual expenses of related activities, vehicle impacts, sanitation fees, or value associated with the franchise to ensure Proposition 218 compliance.
- **Operational Review and Fee Study |** City of Glendale
  Managed an engagement in which the R3 team provided an operational review of the City's municipal solid waste collection operations, including productivity and safety practices. Our team also performed a financial analysis related to the costs of implementing electric vehicle service, includes fleet costs, infrastructure costs and potential operational impacts. We also evaluated the cost of their municipal operation with that of nearby collection operations.

Relevant Experience, continued

- **Nexus Study and NEF Fee Update |** City of Roseville
  Previously assisted the City with an update of its development impact fees related to new development and capturing the cost of new capital that will need to be acquired to provide services when built.
- **Procurement Services |** City of Norco, Rosemead and Sebastopol
  Assisted with the development of an RFP process and a new, SB 1383 compliant agreement. This includes the evaluation process, developing schedules, deal points, drafts and presentations for stakeholders as well as City fee development and Proposition 218 compliance.
- **Solid Waste Consulting Services |** City of Santa Clara
  Assisted with the development of Request for Proposal documents as well as operating agreements for composting to handle the City's organic waste stream.
- **Cost-Based Rate Study |** Cities of San Bruno and Union City
  Performed a detailed review of costs to provide garbage, recycling, and organics collection, disposal, and processing services. This engagement required financial reviews and future projections on rates.
- **Solid Waste Rate Study |** City of Morro Bay
  Oversaw a review and analysis of the Franchised Hauler's solid waste rate application. We reviewed the rate application from the City's Franchised Hauler to ensure logical consistency, mathematical accuracy, and conformance with the franchise agreement and industry standards. Our team provided recommendations to the rate adjustment and for future rate application methods to ensure fair reasonable process for the City and Franchised Hauler.
- **Analysis of SB 1383 Cost Impacts |** City of San Bernardino
  Assisted the City with a review of the proposed rate impacts related to the implementation of an expanded organics recycling program consist with SB 1383. The review resulted in an amended franchise agreement to ensure SB 1383 compliance.
- **Agreement Assignment and Negotiations Assistance |** City of Cerritos
  Led the R3 team through a review of the City's extraordinary cost adjustment and extension request and development of franchise agreement extension language. Worked with the City to conduct a review of the financial and operational strength of Athens Disposal, including the impact of the assignment on company finances, and to review operations and organizational structure, in order to determine its ability to take over all the responsibilities described in the Franchise Agreements.
- **Program Oversight, Development, Negotiation, and Compliance |** RecycleMore*
  In his former role as Executive Director, Scott was primarily responsible for developing programs and public education, negotiating agreements, setting rates, and ensuring regulatory compliance for six jurisdictions. Scott was also responsible for rate setting and negotiating with franchised haulers for new organics program and area wide public information program.

**denotes completion with prior organization*

Years with R3: *3 Years*

Years in Industry: *5 Years*

Maryann Hulsman

Sr. Consultant, Project Support

About

Maryann Hulsman brings two decades of project management experience in a wide range of mission-driven projects, including environmental planning, non-profit fundraising, and event production, and she has worked in the solid waste industry for three years. She provides effective, thoughtful communication, and is able to solve problems and lead teams through complex situations. She has a long-held and ardent relationship with waste diversion and environmental consulting. Maryann first began engaging with California waste management policy and operations while in college, then worked for eight years compiling CEQA, NEPA, and water permitting documentation for a broad assortment of clients in the Central Valley and Bay Area.

As a Sr. Consultant for R3, Maryann provides important support on a variety of solid waste management projects, including negotiations/procurements of new collection agreements, hauler performance reviews and audits, SB 1383 implementation/compliance, and solid waste cost studies.

Education & Certifications

- Master of City Planning, Emphasis in Community Development
  Massachusetts Institute of Technology
- Bachelor of Science, Environmental Policy Analysis and Planning
  University of California Davis

Relevant Experience

- **On-Call Consulting Services |** City of Rancho Cordova
  Provided support for R3's ongoing on-call services by helping with SB 1383 compliance inspections for local businesses.
- **On-Call Consulting and Hauler Transition Assistance |** City of Sebastopol
  Assisted with all steps of procurement, from the start of the RFP process through award of contract. In particular, she wrote the RFP and the accompanying model Franchise Agreement, then shepherded the Franchise Agreement document through negotiations, edits, and finalization. In the process, she worked closely with the City Council's ad-hoc committee and City staff, assisting with the interview, evaluation, and selection process. Subsequent to adoption of the resulting agreement, she then assisted the City with a controversial transition from the incumbent hauler to the new hauler, providing advice regarding communication strategy and helping to keep relationships positive.
- **On-Call Negotiations Support and Performance Review |** City of West Sacramento
  R3 provided comprehensive SB 1383 implementation planning culminating in an implementation plan and municipal code update. This included outreach and education, route audits for contamination, enforcement schedules and activities, edible food recovery planning in coordination with the County, assistance in adjusting the City's purchasing policy, and assistance in negotiations with the City's hauler. Maryann also prepared and analyzed data for the City's diversion performance analysis. Additionally, R3 recently undertook a performance review of the City's hauler, WM, on behalf of the City. Maryann performed the in-depth customer service review and assisted with the education and outreach review and operational review. She then acted as primary author of the resulting report.

Relevant Experience, continued

- **Competitive Procurement Support |** City of West Sacramento
  R3 is providing assistance with a competitive RFP process to secure a new solid waste collection agreement. Maryann helped with the writing and review of the RFP and Draft Franchise Agreement, and will be helping with the proposal review and evaluation process.
- **On-Call Consulting Services |** Zero Waste Marin (ZWM)
  R3 is assisting ZWM in evaluating C&D programs within the County, and providing support and recommendations to ZWM and its member agencies. Maryann is providing guidance on C&D program best practices.
- **On-Call Consulting Services |** County of San Benito
  Revamped the County's Edible Food Generator tracking system and led a round of research into potential new generators. She also led outreach, including in-person visits, to the City's Tier 2 Edible Food Generators, and in the process designed new and improved tracking checklists and forms. Additionally, she prepared a memo that explained the regulatory landscape for commercial recycling and organics waivers in the County.
- **Procurement Assistance |** Town of Windsor
  R3 is providing assistance with a competitive RFP to secure a new solid waste collection agreement. Maryann is managing the day-to-day responsibilities of the project, including project schedule, the community and stakeholder engagement process, and the RFP process. She is preparing the RFP and the accompanying model Franchise Agreement, and will be taking the Franchise Agreement document through negotiations, edits, and finalization. In the process, she is working closely with Town Council members, staff, and community representatives, and is managing workflows within the R3 project team.
- **RFP for Solid Waste Collection Agreements |** Cities of Richmond and San Pablo
  R3 provided assistance with a competitive RFP to secure new solid waste collection agreements. She prepared a model franchise agreement template for the RFP, drafting extensive new language to accommodate numerous requirements from both cities, and then took that document through two parallel negotiation processes for both cities. She also acted as primary documentarian and communications point person during both negotiations processes, tracking deal points and updating agreement language as needed.
- **SB 1383 Grant-Related Services |** Tamalpais Community Services District (TCSD)
  Currently assisting with TCSD's SB 1383 Gap Analysis and Program Development. As part of this effort, and under a regional CalRecycle Local Assistance Grant Program, she is also working with six other Marin Special Districts and their various franchised haulers, completing each District's SB 1383 Gap Analysis. She will also coordinate with Districts and the County of Marin to connect them with regional recycling and organics diversion programs operated by Zero Waste Marin. Currently, she is helping compile and review each district's SB 1383 Implementation Record.
- **Solid Waste Costs and Property Use Charge Study |** Various Jurisdictions
  Maryann helps with cost-recovery analysis, pavement impact analysis, and property value analysis. To do this, she conducts research, analyzes data, and estimates the value of each jurisdiction's solid waste management, administration, oversight, compliance, and other expenditures that may be eligible for recovery from solid waste rates via franchise fees. Maryann also looks at the value of the impact that solid waste collection vehicles have on municipal streets and estimates the value of the City-government property rights conveyed to the City's contracted solid waste provider(s). In particular, she specializes in creating clear, easy-to-understand data requests and data analysis templates, and then translating data and analysis into well-organized reports.

Gauvri Nathwani

Consultant, Project Support

About

Gauvri Nathwani is an experienced sustainability professional with a strong background in environmental education, policy compliance, and community outreach. With a degree in Environmental Studies from UC Santa Barbara and a focus on sustainability and renewable energy, she has worked across local government, nonprofit, and private sectors to support zero-waste initiatives and promote environmentally responsible practices. At Alameda County Industries, she played a key role in helping the City of Alameda meet California's waste diversion and climate goals by leading outreach programs, conducting waste audits, and developing tailored plans for businesses, multi-family properties, and public agencies.

Gauvri's work is grounded in a strong understanding of state legislation and driven by a passion for making sustainability practical and impactful at the community level. Whether presenting to stakeholders, writing grants, or managing on-the-ground education campaigns, she brings a thoughtful, solutions-oriented approach to every project.

Education & Certifications

- Bachelor of Arts in Environmental Studies
  University of California, Santa Barbara
- LEED Green Associate

Relevant Experience

- **On-Call Consulting Services |** City of Elk Grove
  Assisted with billing analysis for Republic and the City. Worked on comparing rates across a 4 year span to identify potential mischarges and differences in rates. She also performed a storm drain analysis where she identified customers that may have been charged differently than the understood methodology. Gauvri assisted the City to complete their implementation record, and reviewed documents including but not limited to: program descriptions, paper procurement, ROWP, route reviews and other SB 1383 compliance areas for the City's JACE review.

- **On-Call Consulting Services |** Town of Loomis
  R3 provides on call consulting services to manage the City's C&D program for residents looking to modify their homes and businesses. Gauvri assists in the approval of pre- and post-construction permits, ensuring the applicant is complying with CalGreen diversion requirements and identifying non-compliant sites to the Town. She works in partnership with the Town to ensure that all permits are tracked, approved or corrected, and that each applicant meets diversion requirements.

- **On-Call Consulting Services |** City of Anderson
  R3 is providing comprehensive legislative compliance and program implementation support for the City's January 2026 organics collection launch, including outreach, procurement, recordkeeping, reporting, and enforcement under AB 341, AB 1826, and SB 1383. Most recently, Gauvri visited 100+ businesses to speak with and educate owners and/or managers about the City's organics program and state legislation.

Relevant Experience, continued

- **On-Call Consulting Services |** County of San Benito
  R3 is providing comprehensive support to the County, including legislative compliance, hazardous waste management, report analysis, franchise agreement oversight, and other various solid waste planning. Gauvri is currently assisting with edible food recovery verification for tier 1 and tier 2 generators. Recently, she assisted in conducting site visits for 15 generators, confirming their status with the San Benito Food Bank and ensuring necessary documentation was complete to rescue as much edible food as possible.

- **Solid Waste Consulting Services |** City of Santa Clara
  R3 is assisting the City with two RFPs for Disposal and Yard Waste processing services, developing the solicitations in coordination with City staff and drafting agreements for dedicated disposal and yard trimmings processing services. Gauvri is currently conducting audits for the City's NEF Haulers. She is identifying discrepancies in billing, ensuring ratepayers are being charged correctly, and conducting audits to learn more about the Haulers' methods in order to facilitate a transparent process.

- **Competitive Procurement Support |** City of West Sacramento
  The R3 team is guiding the City through the complete franchise agreement process, from initial stakeholder engagement and RFP development to final agreement execution and providing full staff support. Gauvri is currently ensuring franchise fees are being fairly reflected for the rate payers. She has assisted in determining land value for the City (and neighboring cities), reading through finance plans and identifying information that will assist in building out the City's total finances for the year.

- **Procurement Assistance |** Town of Windsor
  Gauvri assisted with creating a rate matrix that compares solid waste rates within Sonoma County, in order to ensure the Town is being charged fair pricing. She navigated city websites, reached out to haulers to confirm current rates, and created a cost comparison analysis across the county.

- **Solid Waste Franchise Evaluation and Procurement Services |** City of Rohnert Park
  R3 was engaged to assist with Recology negotiations and a potential RFP process for exclusive waste collection, with the City immediately requesting a RRI rate review. Gauvri assisted with creating an administrative checklist for duties that must be performed by the Hauler and City, per the franchise agreements, to ensure transparency.

- **SB 1383 Implementation Services |** City of Albany
  Assisting the City though working on billing audit for WM, drafting memo for billing audit findings, and checking RRI for WM for new rates for next year. The billing audit involved looking at the rates that WM are charging customers for commercial, residential, multi family, and roll off services against the approved rate sheet. Based on the findings, Gauvri drafted a memo for the client to describe the scope of work, the total accounts that were audited, gross billings, and next steps for WM. Lastly, she reviewed WM's RRI to ensure that the data was calculated correctly per the franchise agreement, making sure that rates aligned with relevant CPI to ensure that the annual rate adjustment is within the frame of the franchise agreement and fair for the rate payers.

Angela Micheletti

Associate Consultant, Project Support

About

Angela Micheletti combines her background in geology with her passion for research and data analysis to work with local governments in reducing and better managing their waste streams. She has a strong background in assessing environmental impacts, engaging others in action - without hindering performance - to obtain measurable results. She is research-oriented and focused on providing client-centered service, accurate collection of data, and high-quality report writing.

As an Associate Consultant for R3, Angela provides important support on a variety of solid waste management projects, including policy planning and implementation, grant reporting, negotiations and procurement, financial and rate reviews, as well as assisting jurisdictions with incorporating state regulations into their solid waste contracts. Additionally, she has conducted surveys, performed online and in-the-field data research, and has compiled and critically analyzed the resulting data and findings for our clients and their communities.

Education & Certifications

» Bachelor of Science in Geology
University of California, Davis

Relevant Experience

» **On-Call Solid Waste Consulting Services|** City of Rancho Cordova
Angela provides technical and administrative support to the City for CalRecycle grant and payment program reporting, including the SB 1383 Local Assistance Grant, the City/County Payment Program, and the Used Oil Payment Program. Her responsibilities include consolidating and validating data for the Electronic Annual Report (EAR), maintaining SB 1383 implementation recordkeeping, and administering and auditing recycling and organics waivers for businesses. She also monitors commercial compliance agreement reporting to ensure that diversion requirements are achieved.

» **Solid Waste Coordination Services |** Town of Loomis
Over the past two years, our team has supported the Town with solid waste coordination services, including review of compliance, reporting, and administration of their solid waste programs. As a part of this engagement, Angela assisted with CalRecycle grant reporting and administration of grant funding. She has completed the electronic annual report for the Town and attends regular solid waste group meetings representing Loomis. As part of the meetings, she collaborates with other Placer County jurisdictions' to develop outreach methods and materials to the County.

» **On-Call Consulting Services |** City of Citrus Heights
Angela supported edible food recovery efforts by contacting edible food recovery organizations and Tier 1 edible food generators, as well as conducting site visits to confirm compliance with SB 1383 requirements. She led the efforts to contact multi-family complexes to confirm alternative compliance with the municipal code, which included ensuring landscaping companies were disposing their yard waste correctly. In collaboration with Sacramento Food Bank & Family Services, she organized a County-wide survey to provide up-to-date information for all food recovery organizations within the area. She also verified the City's franchise agreement is current with SB 1383 regulations.

Relevant Experience, continued

- **Master Services Agreement** | City of Woodland
  Angela manages ongoing CalRecycle OWR4 reporting by coordinating the collection of required financial documentation, tracking grant expenditures, reviewing reports for accuracy, and drafting detailed narratives describing how grant funds were used to support the City's solid waste and organics compliance efforts. In addition, she supports SB 1383 implementation recordkeeping by maintaining documentation, tracking program activities, and ensuring records are prepared in a manner consistent with CalRecycle enforcement requirements.

- **Negotiation Support and Options** | County of Santa Clara
  Assisted the County with an extensive review of the proposals submitted for the County's facilities and was involved with the interview process. As a part of the RFP process, she read through proposals to help provide key-determining factors of each hauler and if they would cover all the aspects the County required in the RFP. She also conducted a rate survey by researching surrounding jurisdictions garbage collection rates and helped determine recommendations for the next steps While negotiations for the new hauler were underway, she begun work on an Outreach project that educated the facilities' staff on the three-container system and the importance of recycling.

- **Negotiation Support and Options** | City of Rocklin
  Assisted the City with an extensive review of the new franchise agreement proposed by the City's current hauler. She has drafted staff reports for City Council and attended meetings and took notes for the City. She also conducted a rate survey by researching surrounding jurisdictions garbage collection rates and helped determine recommendations for the next steps.

- **On-Call Consulting Services** | City of Colfax
  Angela is currently assisting the City with managing CalRecycle grants and payment programs. This includes applying for grants on behalf of the City, tracking where the grant funding is being spent, and providing reports to CalRecycle when needed. She has completed the electronic annual report for the City and attends regular solid waste group meetings. As part of the meetings, she collaborates with other Placer County jurisdictions' to develop outreach methods and materials to the County.

- **Procurement Assistance** | City of Rosemead
  Recently assisted with the RFP process and creation of a new franchise agreement. She created a list of services provided by the City after reviewing the current franchise agreement to ensure those services were being transferred over to the new agreement. In addition, she helped draft a staff report for City Council meetings that included a rate comparison of the surrounding jurisdictions. She also supported the interview process with the proposed haulers and attended City Council meetings.

- **Solid Waste Costs and Property Use Charge Study** | Various Jurisdictions
  Angela's primary focus is on the development of the property value analyses. She has assisted with the cost-recovery analyses, pavement impact analyses, and research of the jurisdiction's solid waste program management. In her analysis, she has focused on the solid waste rate and fee values in comparison to administration costs. Based on her analysis, she was able to provide a detailed assessment to the client for defensible justification as well as recommendations for how the client should proceed.

Relevant Experience

John T Hanscom Consulting, Principal 2013-Present

SB1383 Compliance and Business Technical Assistance

Client: Alameda County Waste Management Authority *2022-present*

Provides technical assistance and SB1383 compliance reviews at businesses and provides bilingual training to businesses and institutions to assist them in waste reduction, recycling, and organics separation.

- Has worked with over 200 businesses, institutions and multi-family buildings in Alameda County to assist them with SB 1383 compliance since contract inception in 2022.

Commercial Organics and Recycling Program Implementation

Client: City of San Francisco *2024-present*

- Provides technical assistance and bilingual training in English and Spanish to businesses and institutions to assist them in waste reduction, recycling, and organics separation.
- Assisted over 100 businesses and institutions with SB 1383 compliance.
- Conducted visits and surveyed 50 Tier 1 and Tier 2 edible food generators.

SB 1383 Business Organics Waiver Review Technical Assistance

Client: Central Contra Costa Solid Waste Authority *2023*

- Provided SB1383 organics waiver reviews at businesses in Central Contra Costa County and provided bilingual training to businesses and institutions to assist them in waste reduction, recycling, and organics separation.
- Worked with over 250 businesses and institutions to confirm waiver renewal eligibility in 2023.

Environmental Science Associates, Senior Associate 2006-2013

Commercial Recycling Outreach and Implementation

Client: City of Hayward

- Evaluated and engaged restaurants, corporate campuses and other organics-generating institutions for organics and recycling collection opportunities by franchised hauler.
- Performed facility assessments, developed cost proposals and engaged management to initiate waste diversion services.
- Provided bilingual training in Spanish and English to management and staff to correctly separate and dispose of separated discards.

Commercial Organics and Recycling Technical Assistance to Food-Generating Businesses

Client: Allied Waste of San Mateo

- Coordinated with Allied San Mateo sales representatives to train, set-up and monitor organics-generating business such as supermarkets, restaurants, office parks, and institutions as part of the ongoing implementation of the commercial food scraps collection program.
- Trained and monitored over 800 businesses for recycling and organics diversion.

MEMORANDUM

ITEM 9.8.

DATE: May 18, 2026

TO: Honorable Mayor and Council Members

FROM: Albert Stricker, Public Works Director
Kristine Courdy, Senior Civil Engineer
Edgar Medina, Assistant Public Works Director

SUBJECT: **A RESOLUTION ADOPTING A LIST OF PROJECTS FOR THE FISCAL YEAR 2026-27 FUNDING BY SENATE BILL NO. 1: THE ROAD REPAIR AND ACCOUNTABILITY ACT OF 2017**

RECOMMENDATION

Adopt the Resolution.

RESULT OF RECOMMENDED ACTION

Adoption of the Resolution would allow the city to receive Senate Bill No. 1 Road Maintenance and Rehabilitation Account funding to fund the Citywide Street Rehabilitation Program that addresses deferred maintenance, increases safety and beautifies the corridors.

BACKGROUND

On April 28, 2017, the Governor signed Senate Bill No. 1 (SB 1), also known as the Road Repair and Accountability Act of 2017. SB 1 was enacted to address road maintenance, rehabilitation, and critical safety needs on both the state highway and local street and roads systems. The source of revenue is generally state taxes and fees on fuel and vehicle licensing.

Beginning November 1, 2017, the State Controller started collecting the new funds generated from the increased fuel taxes and vehicle registration fees into the newly created Road Maintenance and Rehabilitation Account (RMRA). A portion of the RMRA funds will be distributed annually to eligible cities and counties for basic road maintenance, rehabilitation, and critical safety projects on the local streets and roads systems. The city's allocation for Fiscal Year 2026-27 is estimated to be $2,397,629.

In order to be considered for funding, agencies must provide a proposed list of projects to the California Transportation Commission by July 1, 2026. The projects that are proposed for the RMRA funds in Fiscal Year 2026-27 are the following:

- Sunrise Boulevard White Rock Road to Jackson Highway Improvement Project
- Citywide Street Rehabilitation Project – RC10: Countryside Neighborhood that lies within the boundaries of Mather Field Road, Rockingham Drive, Old Placerville Road, Routier Road and Mills Station Road

- Citywide Street Rehabilitation Project – RC11/14: Lincoln Village Neighborhood that lies within the boundaries of US 50, Bradshaw Road, Old Placerville Road, and Routier Road
- Citywide Pavement Surface Treatment Project – RC15: The Stone Creek Neighborhood that lies within the boundaries of Femoyer Street, Mather Boulevard, International Drive, and the Folsom South Canal

All of these projects address deferred maintenance, increased safety and beautifying the corridors.

RMRA guidelines require that listed projects shall be adopted by resolution of the City Council and include the infrastructure service life, project description, project location, and proposed schedule.

FISCAL IMPACT AND FUNDING SOURCE

There is no fiscal impact of approving the SB 1 Project List, as the funds were anticipated in the adopted budget. The adoption of the SB 1 Project List would ensure the city is eligible for the SB 1 RMRA funding.

As a stipulation for accepting the RMRA funding, SB 1 requires that the city maintain a level of effort annually from the city's General Fund equivalent to the average expenditures from its General Fund in 2009-10, 2010-11, and 2011-12 fiscal years that were spent on roads. The city's annual maintenance of effort from the General Fund has been established as $776,604.

CITY OF RANCHO CORDOVA

RESOLUTION NO. XX-2026

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA, STATE OF CALIFORNIA, ADOPTING A LIST OF PROJECTS FOR FISCAL YEAR 2026-27 FUNDED BY SB 1: THE ROAD REPAIR AND ACCOUNTABILITY ACT OF 2017

WHEREAS, Senate Bill 1 (SB 1), the Road Repair and Accountability Act of 2017 (Chapter 5, Statutes of 2017) was passed by the Legislature and Signed into law by the Governor in April 2017 to address the significant multi-modal transportation funding shortfalls statewide; and

WHEREAS, SB 1 includes accountability and transparency provisions that will ensure the residents of our city are aware of the projects proposed for funding in our community and which projects have been completed each fiscal year; and

WHEREAS, the City of Rancho Cordova must adopt by resolution a list of projects proposed to receive fiscal year funding from the Road Maintenance and Rehabilitation Account (RMRA), created by SB 1, which must include a description and the location of each proposed project, a proposed schedule for the project's completion, and the estimated useful life of the improvement; and

WHEREAS, the City of Rancho Cordova will receive an estimated $2,397,629 in RMRA funding in Fiscal Year 2026-27 from SB 1; and

WHEREAS, this is the tenth year in which the City of Rancho Cordova is receiving SB 1 funding and will enable the City of Rancho Cordova to continue essential road maintenance and rehabilitation projects, safety improvements, repairing and replacing aging bridges, and increasing access and mobility options for the traveling public that would not have otherwise been possible without SB 1; and

WHEREAS, the City of Rancho Cordova has undergone a robust public process to ensure public input into our community's transportation priorities/the project list; and

WHEREAS, the City of Rancho Cordova used a Pavement Management System to develop the SB 1 project list to ensure revenues are being used on the most high-priority and cost-effective projects that also meet the community's priorities for transportation investment; and

WHEREAS, the funding from SB 1 will help the City of Rancho Cordova maintain and rehabilitate main arterials and local roads throughout the city of Rancho Cordova this year and similar projects into the future; and

WHEREAS, the 2023 California Statewide Local Streets and Roads Needs Assessment found that the City of Rancho Cordova streets and roads are in good condition and this revenue will help us increase the overall quality of our road system and over the next decade will bring our streets and roads into excellent condition; and

WHEREAS, the SB 1 project list and overall investment in our local streets and roads

infrastructure with a focus on basic maintenance and safety, investing in complete streets infrastructure, and using cutting-edge technology, materials and practices, will have significant positive benefits for the City of Rancho Cordova.

NOW, THEREFORE, BE IT HEREBY RESOLVED BY THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA as follows:

1. The foregoing recitals are true and correct.

2. The following previously proposed and adopted projects [A7.1] may also utilize Fiscal Year 2026-27 Road Maintenance and Rehabilitation Account revenues in their delivery. With the relisting of these projects in the adopted fiscal year resolution, the City of Rancho Cordova is reaffirming to the public and the state our intent to fund these projects with Road Maintenance and Rehabilitation Account revenues:

   Project Title: Sunrise Boulevard White Rock Road to Jackson Highway
   Project Description: Street rehabilitation and improvement of Sunrise Boulevard from White Rock Road to Jackson Highway. This project also includes sidewalk upgrades/repairs, median and landscaping improvements and storm drain upgrades as necessary. The scope includes design, environmental and construction of the project.
   Project Location: Sunrise Boulevard White Rock Road to Jackson Highway
   Estimated Project Schedule:
   • Construction: Summer 2024 to Fall 2026
   Estimated Project Useful Life: 15-20 Years

   And;

   Project Title: Citywide Street Rehabilitation Project – Countryside (RC10)
   Project Description: Streets identified are located within the Countryside Neighborhood. This project also includes sidewalk upgrades/repairs and storm drain upgrades as necessary. The scope includes design, environmental and construction of the project.
   Project Location: Countryside Neighborhood that lies within the boundaries of Mather Field Road, Rockingham Drive, Old Placerville Road, Routier Road and Mills Station Road.
   Estimated Project Schedule:
   • Construction: Summer 2024 to Fall 2026
   Estimated Project Useful Life: 15-20 Years

   And;

   Project Title: Citywide Street Rehabilitation Project – Lincon Village (RC11/14)
   Project Description: Streets identified for pavement rehabilitation in FY2025-26 funds are located within the Lincoln Village Neighborhood. This project also includes sidewalk upgrades/repairs, striping and storm drain upgrades as necessary. The scope includes design, environmental and construction of the project.
   Project Location: Lincoln Village Neighborhood that lies within the boundaries of US 50, Bradshaw Road, Old Placerville Road, and Routier Road.
   Estimated Project Schedule:
   • Design/Environmental: Summer 2025 to Spring 2027
   • Construction: Summer 2027 to Fall 2028
   Estimated Project Useful Life: 15-20 years

And;

Project Title: Citywide Pavement Surface Treatment Project – Stone Creek (RC15)
Project Description: Streets identified for surface treatment in FY2025-26 funds are located within the Stone Creek Neighborhood. This project also includes crack sealing and striping improvements as necessary.
Project Location: The Stone Creek Neighborhood that lies within the boundaries of Femoyer Street, Mather Boulevard, International Drive, and the Folsom South Canal.
Estimated Project Schedule:
• Construction: Spring 2026 to Summer 2027
Estimated Project Useful Life: 15-20 years

MEMORANDUM

ITEM 9.9.

DATE: May 18, 2026

TO: Honorable Mayor and Council Members

FROM: Albert Stricker, Public Works Director

SUBJECT: **A RESOLUTION AUTHORIZING AN INCREASE TO CONTRACT NO. 2024-259 WITH THE COUNTY OF SACRAMENTO FOR LANDSCAPE SERVICES FROM $326,000 TO $354,346.04 AND AUTHORIZING FINAL PAYMENT**

RECOMMENDATION

Adopt the Resolution.

RESULT OF RECOMMENDED ACTION

Adoption of the Resolution would authorize an increase to Contract No. 2024-259 from $326,000 to $354,346.04 and allow the City Manager to process final payment to the County of Sacramento, completing reconciliation and closeout of the agreement.

BACKGROUND

The City Council adopted Resolution No. 153-2024 on December 2, 2024, authorizing the City Manager to execute Contract No. 2024-259 with the County of Sacramento for landscape services of public frontages within the Mather Commerce Area, in an amount not to exceed $326,000. The agreement established a one-year transition period during which the county would continue to provide landscape maintenance services through December 31, 2025, while the city prepared to assume full responsibility for these services beginning January 1, 2026.

The agreement provided that the city would reimburse the county for services performed during the transition period. Following execution, the city and county identified the need to clarify the service area and cost structure. Amendment No. 1 was executed to reflect that the agreement applied solely to facilities within the city's jurisdiction and that the city would be responsible for 100 percent of the associated costs. The amendment also established an updated estimated total expenditure of $235,000 for landscape maintenance contract services, excluding utility and administrative costs, and confirmed that the city would reimburse the county for actual costs incurred.

During the term of the agreement, additional work and associated costs were incurred that were not included in the original contract amount. These costs were associated with transition-related efforts, unanticipated maintenance needs, and ongoing coordination required to maintain service levels and prepare the system for transfer to city operations.

The agreement concluded on December 31, 2025, and the city has since transitioned landscape maintenance services within the Mather Commerce Area to a city-managed contract. The city and county staff have worked collaboratively to review and reconcile final costs associated with the agreement.

Although the agreement provides for reimbursement of actual costs incurred, the final amount exceeds the City Manager's original authorization of $326,000. As a result, City Council approval is required to increase the contract amount from $326,000 to $354,346.04 and authorize final payment.

This action will allow the city to fulfill its contractual obligations, ensure all services provided during the transition period are compensated, and formally close out the agreement with the county.

FISCAL IMPACT AND FUNDING SOURCE

The contract is funded by Measure A. Sufficient funding is available within the approved budget to cover the increased contract amount. There is no impact on the city's General Fund.

MEMORANDUM

ITEM 9.10.

DATE: May 18, 2026

TO: Honorable Mayor and Council Members

FROM: Albert Stricker, Public Works Director
Quoc Nham, Principal Civil Engineer

SUBJECT: **A RESOLUTION DECLARING THE RESULTS OF THE MAIL BALLOT ELECTION RELATING TO THE IMPOSITION OF THE ANNUAL STORMWATER UTILITY FEE (SWUII) ON THE ASTERIA FLATS APARTMENTS PROJECT IN THE CITY OF RANCHO CORDOVA**

RECOMMENDATION

Adopt the Resolution.

RESULT OF RECOMMENDED ACTION

Adoption of the Resolution would declare the results of the ballot tabulation for the proposed imposition of the annual Stormwater Utility Fee (SWUII) on the Asteria Flats Apartments project. If majority approval exists, the City Council may impose the annual Stormwater Utility Fee (SWUII) on the Asteria Flats Apartments project pursuant to the Fee Ordinance.

BACKGROUND

The City Council adopted a Resolution on March 2, 2026, declaring its intention to impose the annual Stormwater Utility Fee- SWUII ("Fee") on the Asteria Flats Apartments project. A protest hearing was conducted on March 16, 2026, at which time no written protest was received from the property owners representing a majority of the parcels subject to the Fee. Council then adopted a Resolution authorizing the mailing of property owner ballots for the purpose of submitting the Fee to a vote of the owners, subject to the Fee.

The City Clerk has tabulated the ballots returned by the property owners for the Asteria Flats Apartments project. The majority vote of the owners of the parcels approved imposing the annual Fee on the Asteria Flats Apartments project pursuant to the Ordinance. The proposed Council action tonight is to adopt the Resolution declaring the results of the mail ballot election.

FISCAL IMPACT AND FUNDING SOURCE

There is no impact to the city's General Fund.

CITY OF RANCHO CORDOVA

RESOLUTION NO. XX-2026

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA, STATE OF CALIFORNIA, DECLARING THE RESULTS OF A MAIL BALLOT ELECTION RELATING TO THE IMPOSITION OF THE ANNUAL STORMWATER UTILITY FEE (SWUII) FOR THE ASTERIA FLATS APARTMENTS PROJECT IN THE CITY OF RANCHO CORDOVA

WHEREAS, on March 2, 2026, the City Council adopted a Resolution declaring its intention to impose the Annual Stormwater Utility Fee- SWUII (“Fee”) for the Asteria Flats Apartments project; and

WHEREAS, Article XIII D of the California Constitution (Proposition 218) requires the city to follow certain procedural and substantive requirements relating to the imposition of property-related fees and charges (as defined in Proposition 218); and

WHEREAS, the city has determined that the Fee is a property related fee, subject to the provisions of Proposition 218; and

WHEREAS, before imposing the Fee, the City Council is required to hold a noticed public hearing on a written report (the "Written Report") containing a description of each parcel of real property within the City to which the Fee is applicable and the amount of the Fee for each such parcel for Fiscal Year 2026-2027 and to consider protests to the Fee and, if a majority protest is not received at the public hearing, the Council must submit the question of the imposition of the Fee to a vote of the owners of the property subject to the proposed Fee for approval before the proposed Fee may be levied; and

WHEREAS, in accordance with Proposition 218 the City Council held a duly noticed public hearing on the matter of the Written Report and the proposed Fee on March 16, 2026, and took testimony, both written and oral; and

WHEREAS, having determined a written protest was not received from property owners representing a majority of the parcels subject to the Fee, the City Council adopted a Resolution authorizing the mailing of the property owner ballots (the “Ballot Measure”) for the purpose of submitting the Fee to a vote of the owners of parcels subject to the Fee, and subject to approval by a majority vote of the owners of parcel subject to the Fee; and

WHEREAS, pursuant to the terms of Ordinance No. 7-2014 and the unanimous consent of the property owner, the Property Owner Balloting was conducted and completed, and the City Clerk has on file a Certificate of the City Clerk as to the Results of the Canvass of the Ballot Return in Connection with the Proposed Stormwater Utility Fee (the "Certificate"), a copy of which is attached hereto as Exhibit B and by this reference incorporated herein.

NOW, THEREFORE, BE IT HEREBY RESOLVED BY THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA:

1. The above recitals are true and correct.
2. The Certificate is hereby accepted into the records of the city.
3. The Ballot Measure is authorized as set forth in Exhibit A attached hereto and by this

reference incorporated herein.
4. The results of the Ballot Measure are as set forth in the Certificate on file with the City Clerk and attached to this Resolution as Exhibit B ("Certificate").
5. The City Clerk is authorized to declare the results of the mail ballot election relating to the imposition of the Stormwater Utility fee on the Asteria Flats Apartments project.
6. Pursuant to said Certificate, the Ballot Measure submitted was approved by a majority vote of the owner of parcels subject to the Fee, the Fee is hereby imposed pursuant to Ordinance No. 7-2014 on the Asteria Flats Apartments project.

Rancho Cordova Stormwater Utility Fee – Official Property Owner Ballot

The person completing and submitting this Property Owner Ballot must be the owner of the property identified above or the representative of the owner of such property who is legally authorized to complete and submit this ballot for and on behalf of the owner. The enclosed "Summary of Property Owner Ballot Procedures" has been provided to assist you in filling out the ballot. If there are two or more property owners, only one needs to sign and return the ballot. One ballot will be counted per property.

Assessor's Parcel Numbers: 067-0430-018-0000

Property Address: At the south east corner of Sunrise Blvd & Chrysanthy Blvd.

Designation: Vacant Land

Total Parcel(s) Area (acres): 11.76

Assessor's Parcel Numbers: **067-0430-018-0000**

Owner Name: Astoria Flats Acquisition Owner LLC

Proposed Maximum FY 2026-2027 Annual Fee Amount: $17,945.39 per DMU

In order to provide the City of Rancho Cordova with a dedicated funding source to repair, reconstruct and maintain the storm drain system and to protect water quality, shall the City impose an annual Stormwater Utility Fee as shown in the Rate Analysis Report, dated 8/7/2014?

Vote Here

☑ **YES** I support the proposed annual Stormwater Utility Fee

☐ **NO** I oppose the proposed annual Stormwater Utility Fee

I hereby declare, under penalty of perjury under the laws of the State of California, that I am the owner, or the authorized representative of the owner, of the parcel identified above. Your ballot will not be counted if you do not sign below.

4/7/26	Russell Condas	RC
Date	Printed Name	Signature

If approved by a majority of the returned ballots, the proposed maximum annual Storm Drain User Fee rate for FY 2026-2027 will be $17,945.39 per DMU. The maximum rate per DMU will increase annually by the amount of the increase of the CPI. However, each year the City Council will hold a public hearing and determine the actual rate per DMU that will be charged. At the annual public hearing, the City Council will set the actual rate for the next year, which would be equal to or less than the annual maximum rate. The Council may decide to reduce the rate or set the rate to $0 per DMU in any fiscal year.

Please mark your ballot in ink and return the entire page.

Upon completion, fold the ballot, place it in the addressed, return envelope and seal the envelope. Pursuant to the enclosed instructions, mail the ballot to the address shown on the return envelope, or deliver to the City Clerk at City Hall located at 1:30 PM on April 14th, 2026.

SUMMARY OF PROPERTY OWNER BALLOT PROCEDURES

If you are the owner, or the authorized representative of the owner, of the property described on the enclosed Property Owner Ballot, you may submit the enclosed Property Owner Ballot to the City to support or oppose the proposed annual Stormwater Utility Fee. Complete Property Owner Balloting Procedures are on file at the City Clerk's office. Please follow the instructions below to complete and return your Property Owner Ballot.

1. Mark your vote on the enclosed Property Owner Ballot by placing an "X" in the appropriate box.
2. Mark, sign and date your Property Owner Ballot in ink. Property Owner Ballots received without a signature will not be counted. Do not use pencil.
3. Place your ballot in an envelope and seal the envelope.
4. Property Owner Ballots may be mailed or hand delivered to the City Clerk's office at 2729 Prospect Park Drive, Rancho Cordova, CA 95670.
5. The City **MUST** receive all Property Owner Ballots before 1:30 PM on Tuesday April 14, 2026. Any Property Owner Ballot received after this time cannot legally be counted. **Postmarks will not be accepted, and ballots received after the deadline will not be counted.** (Property Owner Ballots may be delivered to the City Clerk prior to this date and time during normal business hours.)
6. The tabulation of Property Owner Ballots will be performed by the City Clerk after 1:30 PM on Tuesday April 14, 2026.
7. The City Clerk shall not disclose the contents of any ballot in such a way as to identify how a property owner voted until the ballots become public record.
8. The City Council may establish the annual Stormwater Utility Fee only if a majority of the Property Owner Ballots returned are in favor of the Fee.
9. If more than a majority of the Property Owner Ballots returned are opposed to the Fee, then the annual Stormwater Utility Fee will not be imposed.

The City of Rancho Cordova complies with the Americans with Disabilities Act. If you are a qualified individual with a disability and need assistance with completing or returning the enclosed ballot, please contact the City Clerk's office at (916) 851-8720.

The information in this notice and the accompanying materials were compiled and are distributed at public expense by the City of Rancho Cordova in compliance with Article XIIID of the California Constitution. This information is presented in the public interest. It is not intended to influence or attempt to influence the actions of the voters to vote "yes" or "no" on the enclosed Property Owner Ballot.

EXHIBIT B

CERTIFICATE OF THE CITY CLERK AS TO

THE RESULTS OF THE CANVASS OF THE ELECTION RETURNS

IN CONNECTION WITH THE PROPOSED STORMWATER UTILITY FEE (SWUII)

FOR THE ASTERIA FLATS APARTMENTS PROJECT

IN THE CITY OF RANCHO CORDOVA

I, Stacy Leitner, City Clerk of the City of Rancho Cordova, hereby certify that I canvassed the returns of the election in connection with the imposition of an annual stormwater utility fee (SWUII) that the day for the return of mailed ballot, April 14, 2026. The election was concluded on that date and that the total number of ballots cast in said election and the total number of votes cast for and against the ballot measure, as specified below, are full, true and correct.

Total of Ballots Received: 1

Total "Yes" Ballots: 1

Total "No" Ballots: 0

Stacy Leitner, CMC
City Clerk

MEMORANDUM

ITEM 9.11.

DATE: May 18, 2026

TO: Honorable Mayor and Council Members

FROM: Albert Stricker, Public Works Director

SUBJECT: **A RESOLUTION APPROVING THE WATER FORUM 2050 AGREEMENT AND AUTHORIZING THE CITY MANAGER TO EXECUTE THE WATER FORUM 2050 AGREEMENT**

RECOMMENDATION

Adopt the Resolution.

RESULT OF RECOMMENDED ACTION

Adoption of the Resolution would allow the city the opportunity to participate in regional collaborations that could affect availability of water resources for existing and future communities, and important environmental resources including the Lower American River.

BACKGROUND

The Water Forum was created in the mid-1990's to seek a collaborative plan for providing reliable water supplies for the Sacramento region while also protecting our vital environmental resources. Since the original Water Forum Agreement (WFA) was signed in 2000, this region has been recognized as a proactive leader in water management and environmental stewardship. Implementing the plan continues with the work by the region's water providers on water conservation, by the Sacramento Groundwater Authority and Sacramento Central Groundwater Authority on groundwater management, and the work of the Water Forum Successor Effort to protect and enhance the lower American River. The members of the Water Forum represent a diverse group of business and agricultural leaders, citizens' groups, environmentalists, water managers, and local governments in the Sacramento region that have joined to fulfill the two coequal objectives.

In 2020, Water Forum signatories agreed that conditions affecting water management have changed substantially since 2000 and decided to embark on an update of the WFA to address these changed conditions. Challenges include changes in snowpack and runoff that affect surface water reliability, hotter temperatures and increased stress on fish and water quality, more frequent and severe droughts and floods, and increased competition and regulatory pressure on American River water supplies. Water Forum 2050 (WF2050), Attachment 2, is the outcome of this process.

WF2050 reaffirms the two coequal objectives that have guided the Water Forum for over 25 years:

1. Provide a reliable and safe water supply for the region's economic health and planned development.

2. Preserve the fishery, wildlife, recreational, and aesthetic values of the lower American River.

The agreement is voluntary and implemented through mutual commitments rather than regulation.

The most significant changes in WF2050 include the following:

• American River Climate Adaptation Program is a new feature of Water Forum 2050 – it represents a commitment by all parties to begin exploring solutions to address the challenges the region is expecting to face due to climate change and identify the most effective opportunities to continue to support the coequal objectives.

• Funding Formula Updates – Costs are distributed equitably across all water agencies instead of concentrated with the City of Sacramento and County of Sacramento.

• Interagency Agreement Update – The WFA City-County agreement is expanded to include water agencies that will be sharing in the costs of the Water Forum. Note the City of Rancho Cordova is not a water agency and therefore does not have direct fiscal responsibilities.

• PSA Updates – Each water agency negotiated an update to their PSA that articulates opportunities to support the coequal objectives and defines key commitments unique to each agency.

• Land Use Planning – Reflects recognition that requirements for land use decisions have evolved since the original agreement was signed and commits the Water Forum as a venue for ongoing dialogue and information sharing.

• Water Management – Similar to land use, the new agreement recognizes the evolved regulatory landscape related to groundwater, water use efficiency, and overall water management. The Water Forum will be a venue for sharing information and fostering a shared understanding of both challenges and opportunities to support the coequal objectives.

FISCAL IMPACT AND FUNDING SOURCE

There is no cost to the city to be a signatory to the Water Forum Agreement.

ATTACHMENT(S)

1. Resolution
2. Exhibit A to the Resolution - WF2050 Agreement

CITY OF RANCHO CORDOVA

RESOLUTION NO. XX-2026

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA, STATE OF CALIFORNIA, APPROVING THE WATER FORUM 2050 AGREEMENT AND AUTHORIZING THE CITY MANAGER TO EXECUTE THE WATER FORUM 2050 AGREEMENT

WHEREAS, the Water Forum Agreement was signed by multiple stakeholder groups and interested parties in 2000 with two co-equal objectives:

1. Provide a reliable and safe water supply for the region's economic health and planned development to the year 2030

2. Preserve the fishery, wildlife, recreational, and aesthetic values of the Lower American River; and

WHEREAS, since 2020, the four caucuses that make up the Water Forum (Business, Environmental, Public, and Water) have been negotiating to update the Water Forum Agreement; and

WHEREAS, on February 19, 2026, the four Water Forum caucuses approved the Water Forum 2050 Agreement, which continues the spirit of the co-equal objectives through 2050, at a Water Forum Plenary meeting; and

WHEREAS, benefits to the City of Rancho Cordova for participating in Water Forum 2050 include the opportunity to participate in regional collaborations that could affect availability of water resources for existing and future communities, and important environmental resources including the Lower American River.

NOW, THEREFORE, BE IT HEREBY RESOLVED BY THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA as follows:

- The City Council of the City of Rancho Cordova, California, hereby approves the Water Forum 2050 Agreement, in substantially the form attached hereto as Exhibit A.

- The City Manager is hereby authorized and directed to execute the Water Forum 2050 Agreement in a form substantively similar to Exhibit A, attached hereto and to do and perform everything necessary to carry out the purpose of this Resolution.

PASSED AND ADOPTED by the City Council of the City of Rancho Cordova on the 18th day of May 2026 by the following vote:

AYES:

NOES:

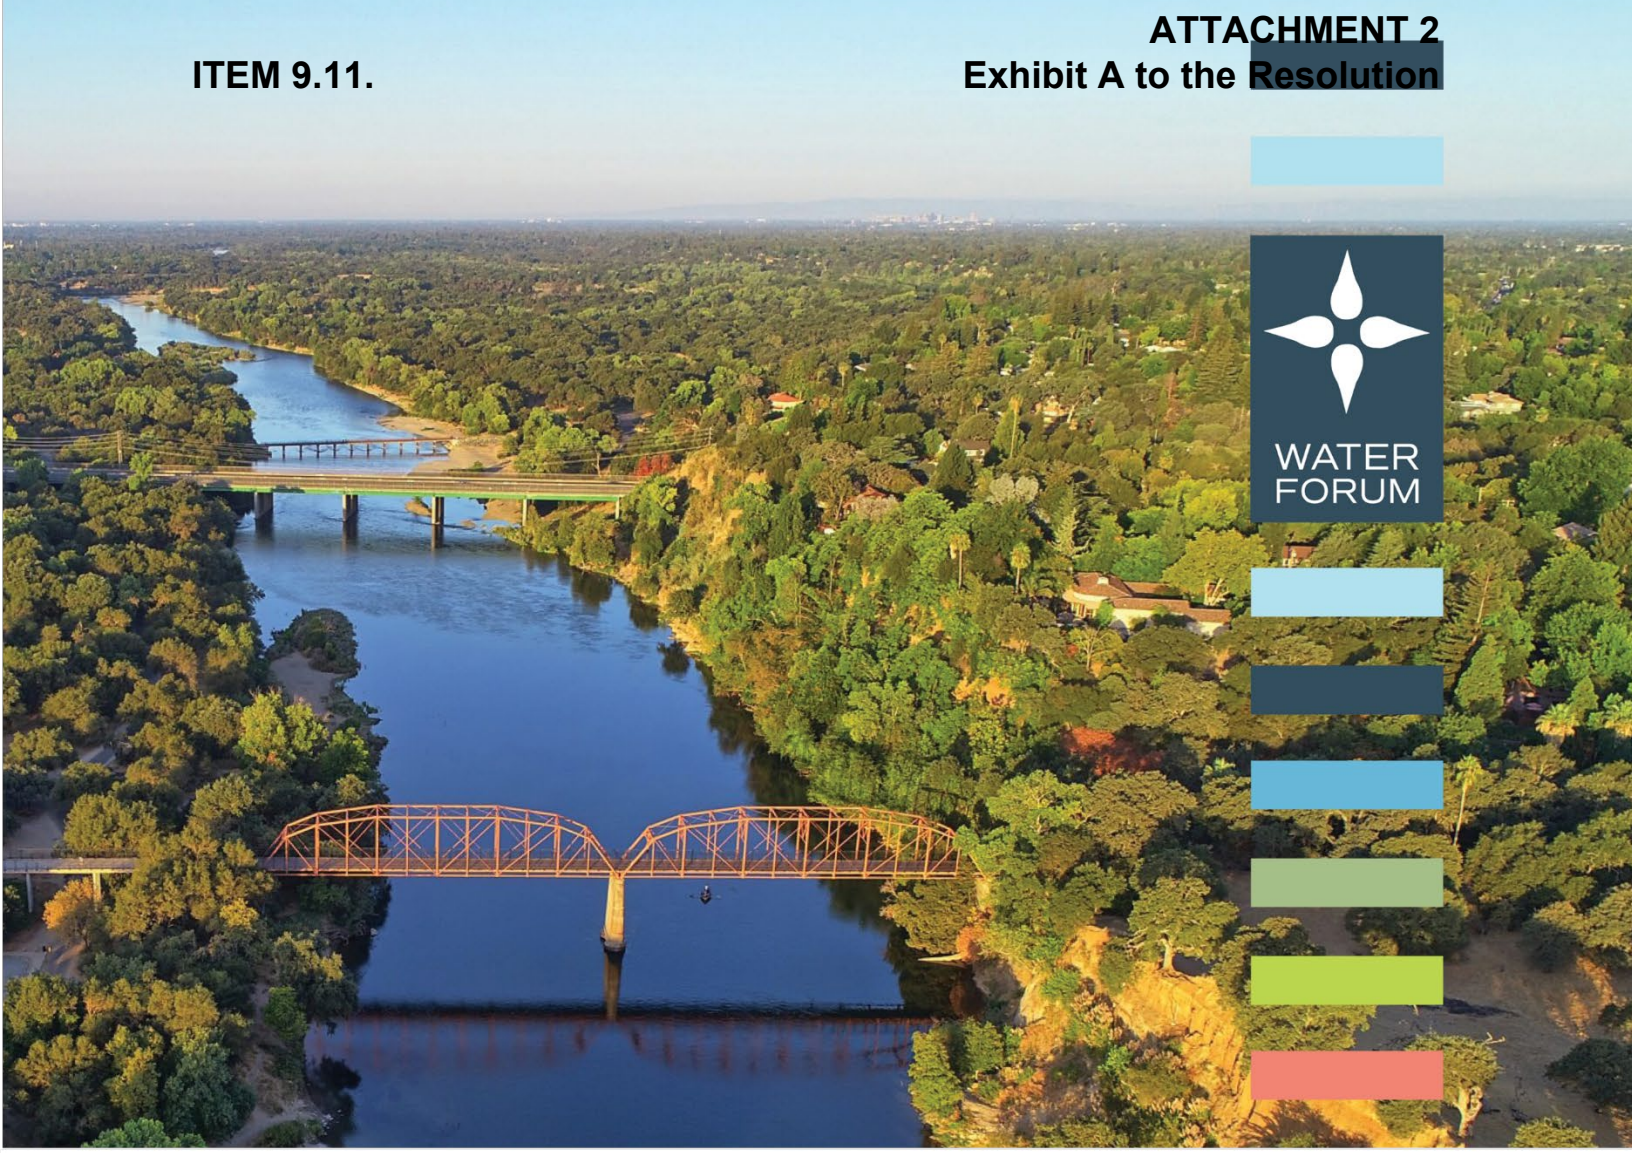

ABSENT:

ABSTAIN:

ATTEST:

Introduction

The Water Forum: Protecting the River and Regional Water Supply

The lower American River (LAR) is one of the Sacramento region's greatest treasures. Generations of Sacramento-area residents have grown up on the river and along the parkway, enjoying its rich ecosystem of plants and wildlife, as well as numerous recreational activities. Throughout history, the river has sustained the lives and livelihoods of local residents by providing them with drinking water. But the river doesn't just *provide* for the region; it also needs active stewardship.

In 2000, 40 different agencies, organizations, citizen groups, and businesses came together to sign the landmark Water Forum Agreement, a visionary long-term plan created to balance two coequal objectives:

Provide a reliable and safe water supply for the region's economic health and planned development through to the year 2030; and

Preserve the fishery, wildlife, recreational, and aesthetic values of the lower American River.

The Water Forum Agreement (WFA) was a bold experiment. People with vastly different views on the best uses of water agreed to work together toward mutual goals. Water agencies, environmental

The lower American River is an essential part of life in the Sacramento region. It provides drinking water to nearly 2 million people and is home to 43 species of fish, including the endangered Central Valley steelhead and fall-run Chinook salmon. The river also and offers invaluable recreational and aesthetic values for the region and attracts nearly eight million visitors per year.

The river corridor also helps protect Sacramento-area communities from floods and plays an important role in supplying water to the Sacramento-San Joaquin Delta, which ultimately serves drinking water for many Californians and provides water for the state's agriculture.

organizations, business groups, and other interested parties negotiated a 30-year plan for how the American River basin's water would be managed and protected. The aim was to reduce the persistent conflicts over water resources that had historically plagued the region.

The Water Forum brings together a diverse group of businesses, citizen groups, environmentalists, water managers, and local governments in Sacramento, Placer, and El Dorado counties.

Before the Water Forum, the Sacramento area had seen its share of lawsuits, demonstrations, and political battles over planned water projects. Water providers and business interests were concerned that opposition to water development would hinder their ability to serve customers with a reliable water supply. At the same time, environmental advocates were alarmed by the ongoing decline of water-based ecosystems.

The agreement, reached after seven years of intense negotiations, included financial and operational commitments from water providers, as well as a promise from environmental organizations to support water providers based on the terms of the agreement. The first WFA included seven key elements that represented the strategies members[1] used to meet the coequal objectives of water supply reliability and environmental stewardship. Over the past 25 years, these strategies have shaped water management in the Sacramento region, addressing both immediate needs and long-term sustainability.

The original Water Forum elements were:

1. Detailed plans for increased surface water supplies from rivers during average to wet years to support Sacramento's anticipated population and economic growth through 2030.
2. Water providers' commitment to actions during dry years to reduce surface water diversions to protect fish, wildlife, aesthetic, and recreational value of the river.
3. Plans to establish a new flow standard for the LAR that would improve water releases to better support fish.
4. A Habitat Management Element (HME) dedicating purveyor and federal resources toward preserving the fishery, wildlife, recreational, and aesthetic values of the LAR.
5. Comprehensive water conservation plans to meet regional water needs while reducing reliance on both groundwater and surface water.
6. Establishment of local agencies for groundwater management, to monitor groundwater use and implement a conjunctive use program.
7. Ongoing implementation and adaptation of the WFA through 2030 via the Water Forum Successor Effort (WFSE).

[1] The term member in this document is intended to refer to an organization that is a signatory to the Water Forum. Member and signatory can be used interchangeably.

These original Water Forum elements and the members' progress in each are detailed in Appendix 1: Advancing the Seven Elements of the First Water Forum Agreement.

Now, after more than two decades, the Water Forum is widely regarded as a success and is often recognized as a model for similar initiatives. It has not only led to tangible accomplishments in water management and river health enhancement but has also built strong, collaborative relationships that have helped the region navigate severe droughts. These collaborations have enabled the region to invest in river restoration projects and major infrastructure projects without opposition or lawsuits, a testament to the trust and transparency that have been cultivated over the years.

The success of this partnership has earned the Sacramento area a statewide reputation as an innovative steward of regional water resources, providing a solid foundation for negotiating a new agreement necessary to tackle the challenges ahead. The challenges ahead are significant for maintaining a reliable water supply, and especially for a healthy ecosystem that relies on cold water.

HONORS AND AWARDS

1999 – Achievement Award from California Water Policy Conference

2000 – Association of California Water Agencies Clair A. Hill Water Agency Award

2000 – U.S. Environmental Protection Agency Region 9 Outstanding Environmental Achievement Award

2001 – League of California Cities Helen Putnam Award for Excellence

2001 – Governor's Environmental and Economic Leadership Award for outstanding contributions in Environmental-Economic Partnerships

2004 – Harvard University Kennedy School of Government "Top 50" Programs in the Innovations in American Government competition

2015 – American Water Resources Association, Csallany Institutional Award for Exemplary contributions to Water Resources Management

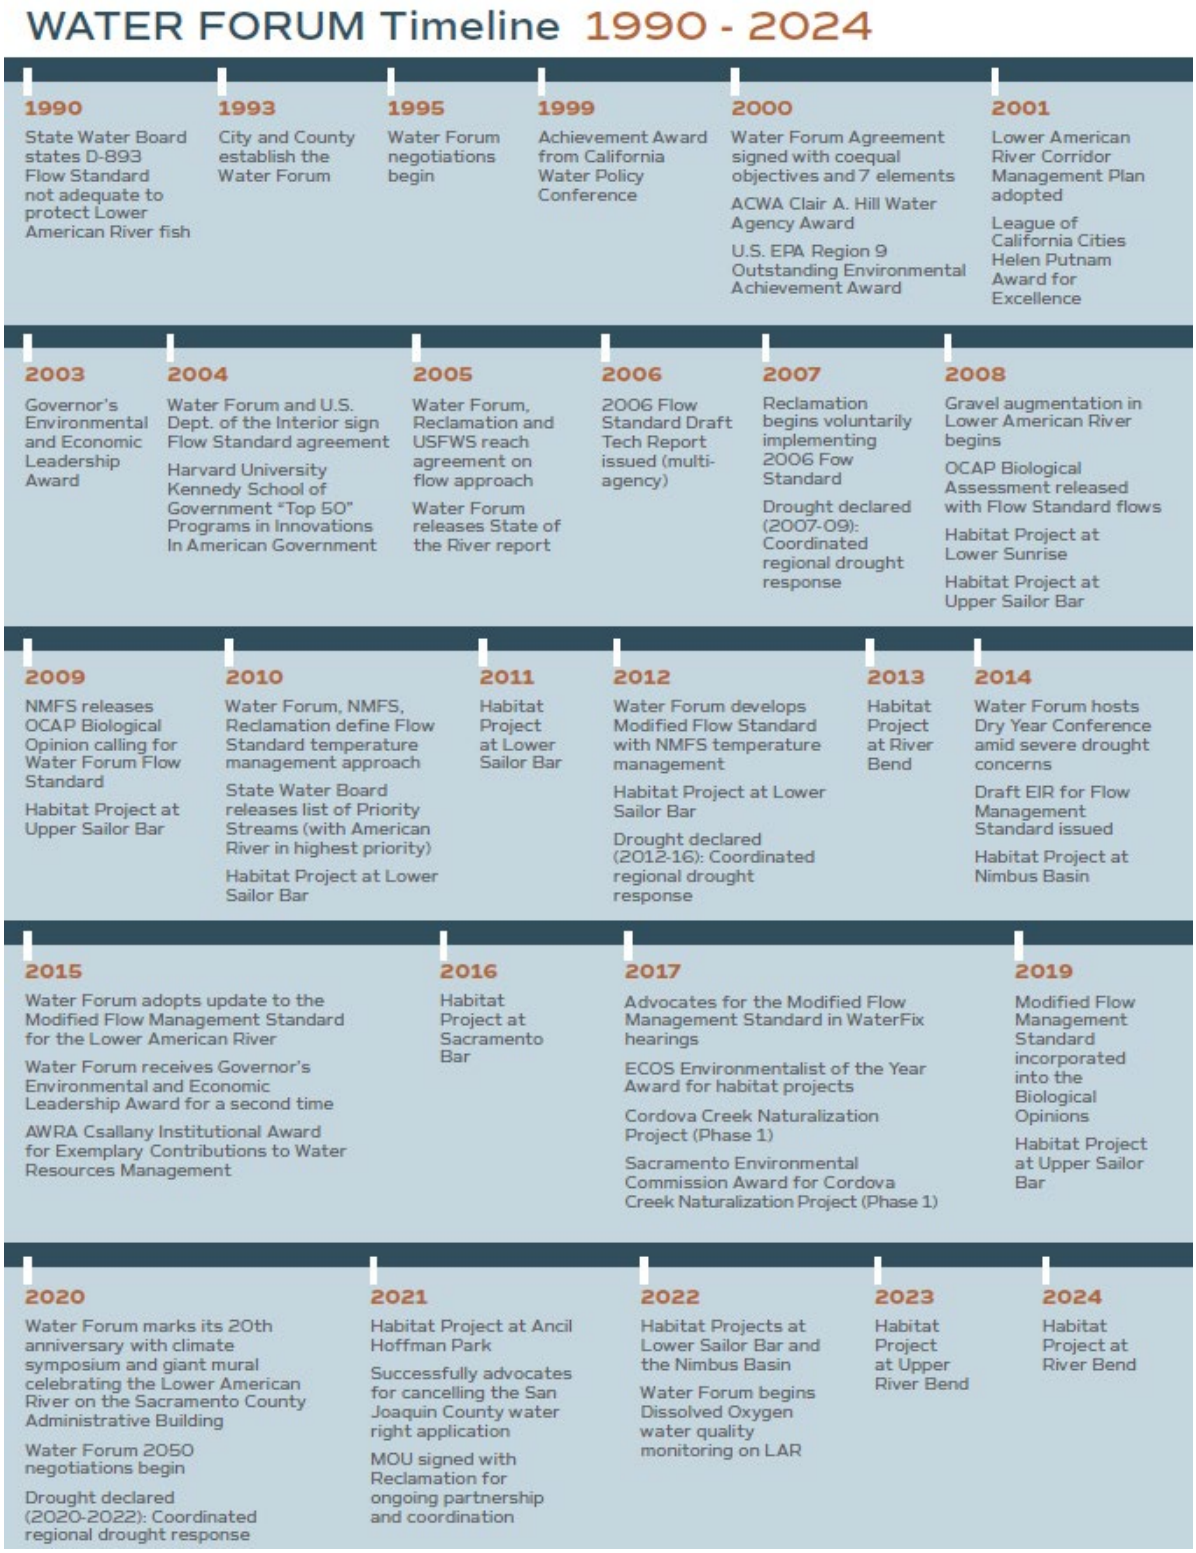

2015 – Governor's Environmental and Economic Leadership Award

2017 – Environmental Council of Sacramento Environmentalist of the Year Award

The Water Forum was honored in both 2001 and 2015 with the **Governor's Environmental and Economic Leadership Award** — the state's top award for environmental stewardship — in recognition of its work to improve the lower American River riparian habitat and parkway, and to protect the Sacramento region's water supply.

KEY MILESTONES IN THE WATER FORUM'S HISTORY

Figure 1. Water Forum Timeline, 1990–2024

COMMITMENT TO THE WATER FORUM WAY

The Water Forum Way is an explicit set of mutual obligations that has guided Water Forum members' engagement with one another since its inception. Members demonstrate adherence to the Water Forum Way through the following practices:

- Mutual gains approach and collaborative effort to seek consensus and build trust
- Participating with an open-minded, respectful, and interest-based approach to all discussions
- Working through challenges, search for and find balance across the Water Forum's coequal objectives
- Understanding Water Forum processes and interested parties
- Emphasize transparency through a group disclosure process
- Surfacing and seeking to understand and accommodate differences and interests among Water Forum members
- Working with diverse groups to enable voices to be heard and to have an opportunity to have a seat at the table

All members of the Water Forum, including staff and consultants, commit to adhering to the Water Forum Way and hold one another accountable for reinforcing this practice.

WATER FORUM AGREEMENT 2050

Water Forum 2050: The Next Generation

As the Water Forum looks to the next twenty-five years, it faces a different set of challenges and a new regulatory landscape, including the impacts of climate change, increasingly challenged environmental conditions, increased regulations, and economic pressures. Given the magnitude and timing of the expected challenges, the negotiations for the new Wate Forum Agreement were initiated in 2020 to prepare the region to better respond to changes as they materialize.

- Shifting hydrology: Climate change presents the single most significant threat to achieving the Water Forum's coequal objectives of water supply reliability and environmental stewardship of the LAR. While the first WFA focused primarily on mitigating the effects of dry years, the region is now experiencing a complex mix of hotter and drier periods, coupled with more intense bursts of rainfall and a diminishing snowpack. This pattern will challenge water storage infrastructure, particularly Folsom Reservoir, which must balance flood control needs with storing water for drought periods—challenges that were not anticipated in the first WFA.
- Environmental Challenges and Fisheries: Salmon and steelhead populations in the LAR face significant threats due to suboptimal flow and temperature conditions. Additionally, climate change impacts and other factors, including ocean and Delta conditions, have contributed to reduced fish populations. Continuing habitat enhancements and fostering continued collaboration with agencies, including the U.S. Bureau of Reclamation (Reclamation), for suitable flows and temperatures will be crucial for mitigating these challenges.
- Operational Challenges: Folsom Reservoir is owned and operated by the Bureau of Reclamation (Reclamation) as part of the broader Central Valley Project (CVP), a statewide water delivery system. As such, Reclamation must consider and balance the needs for water beyond the American River watershed within its operations. There are times when out-of-basin demands of the CVP may seem at odds with the needs of the LAR and the American River region. As the impacts of climate change further constrain water supplies, those times of competing demands are likely to increase and intensify. Ongoing coordination and engagement with Reclamation will be crucial for the continued success of the coequal objectives and ensuring that American River interests are fully considered within the broader context of CVP operations.
- Water Supply Reliability: The threat of a reduced snowpack and critically low storage conditions at Folsom Reservoir (i.e., "dead pool"), when water levels are too low to meet supply needs, represents a severe risk to both water supply and river health. Multi-year droughts have previously brought the reservoir to critical levels, impacting water reliability for over a million residents.

The Water Forum's Flow Management Standard, which includes minimum flows, temperature management protocols, and storage target provisions, offers one strategy for mitigating this risk. However, further actions will be needed to adapt to climate-driven extremes in hydrology, including support for more diversified supply portfolios, such as enhanced conjunctive use, alternative or expanded diversion points, and the capture and underground storage of unstorable surface water, to enable regional water providers to reduce their reliance on American River supplies during drought conditions.

- Groundwater Management: The Sustainable Groundwater Management Act (SGMA) of 2014 expanded groundwater regulatory requirements, requiring local agencies to form Groundwater Sustainability Agencies (GSAs) and create long-term Groundwater Sustainability Plans (GSPs). SGMA and the GSAs now guide groundwater management across California, superseding many features of the first WFA's groundwater element.
- Rising Regulatory Pressures: Since 2000, state regulations related to water have undergone significant expansion, introducing mandates that have raised compliance costs and created new challenges for water purveyors. Increased regulation now affects every aspect of water management, from groundwater sustainability and surface water flows to conservation requirements and long-term planning. For example, the State's role in water conservation has expanded, gradually surpassing the framework set by the first WFA. The most recent example is the Making Conservation a California Way of Life regulation, adopted by the State Water Board in August 2024, which solidified conservation as a permanent state mandate.
- Water Affordability: The costs of providing water are increasing, driven by rising expenses for regulatory compliance, infrastructure maintenance, and essential supplies, including energy and chemicals. At the same time, revenues are impacted as conservation measures reduce demand and customers resist rate increases. This financial strain on local water providers highlights the need for cost-effective, transparent management strategies that align with public expectations.

CHALLENGE OF CLIMATE CHANGE

Water Forum members have identified climate change as *the most significant challenge* to the Water Forum's coequal objectives of balancing reliable water supplies while protecting the health of the LAR environment. To assess the impacts of climate change and population growth on water supply reliability and river health through 2050, the Water Forum conducted a technical analysis that compared projected conditions to historical data.

This analysis, Water Forum 2.0 – Ad Hoc Technical Team (AHTT) Study Plan Analysis Report, was led by a team of experts from the water, business, public agency, and environmental sectors. It built upon Reclamation's 2022 American River Basin Study, applying its data to a focused examination of the LAR.

Key findings included:

- Hydrology: Runoff is projected to peak earlier due to declining snowpack conditions, while the frequency and severity of multi-year droughts are expected to increase. Multi-year droughts similar to the 2014-16 event are likely to shift from occurring once every 100 years to once every 10 years under moderate climate change assumptions. As a result, the region is expected to find itself in drought-response mode more frequently, with extreme drought events becoming increasingly common. Current regional operations may also prove less effective due to shifts in the timing and volume of runoff.
- Water Supply Reliability: Future conditions indicate a decline in surface water reliability, which will result in an increased reliance on groundwater. This reduced availability of surface water will necessitate greater flexibility in water management strategies. Additionally, the frequency of critically low storage levels at Folsom Reservoir is expected to rise, presenting challenges for existing operations. As a result, proactive groundwater management in wet years will become essential for the region's water supply reliability.
- River Health and Fisheries: Temperatures will continue to be a limiting factor for resident salmonids on the LAR. Climate change is likely to significantly increase the number of days when river temperatures reach levels that are unsuitable for the survival of salmonids. This rise in unsuitable conditions will pose challenges for fish survival[2], highlighting the need for actions that effectively balance the beneficial uses of available surface water to support both fisheries and water supply needs.

Overall, the study provided a technical foundation for collaborative solutions and informed the Water Forum by identifying gaps in water supply and river corridor health under future conditions. It also set the foundation for a regional dialogue on potential adaptation tools, projects, and measures to address these critical issues.

A POSITIVE VISION FOR THE FUTURE

The challenges facing water management today present an opportunity to strengthen and modernize the WFA for its continued relevance in the evolving landscape.

As with the first WFA, the Water Forum 2050 Agreement (WF2050) is a commitment to working together towards coequal objectives, this time to overcome a different set of challenges. The intent is that cooperation leads to increased support and drives investments in resiliency programs, enhancing the region's reputation and improving competitiveness for water management and ecosystem enhancement grants. Growing support from interested parties will

[2] Studies have shown that summer river temperatures above species-specific tolerances can cause direct adult mortality and reduce egg and juvenile survival. In addition, barrier-limited or low-elevation populations can't access cold-water refugia, increasing their climate vulnerability.

stretch local investments further, leading to more efficient and effective water management programs.

While the challenges are significant, interested parties at the Water Forum share a positive vision for the future. This vision is built on the principles of mutual benefit, with a renewed WFA serving as the foundation. In this future, regional ecosystems and the economy remain resilient and sustainable, and citizens enjoy reliable, sufficient, and safe water supplies. Communities can weather multi-year droughts without compromising the health of their landscapes or water-based ecosystems.

As conditions continue to evolve, WF2050 provides a framework to address current and emerging water management challenges while safeguarding the environmental health of the region for future generations.

Structure of the Water Forum 2050 Agreement

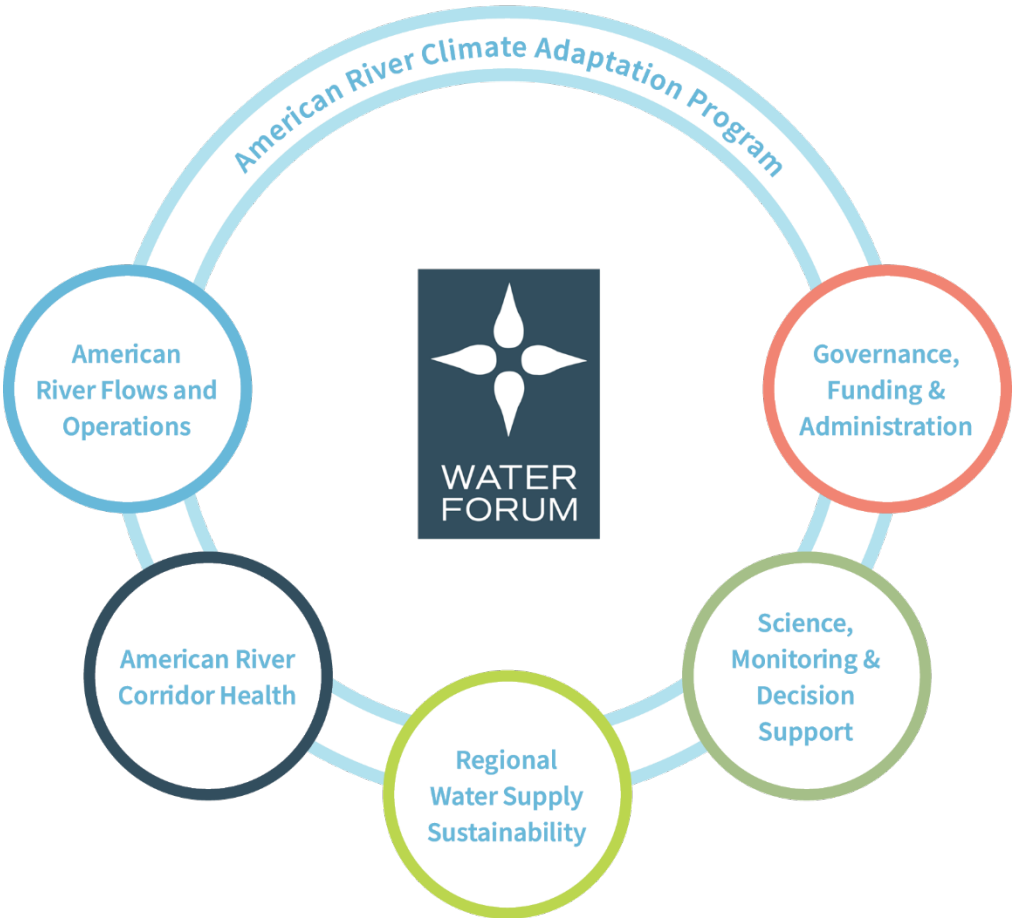

The WF2050 restructures the seven elements from the first WFA into five Program Areas:

1. American River Flows and Operations
2. American River Corridor Health
3. Regional Water Supply Sustainability
4. Science, Monitoring, and Decision Support
5. Governance, Funding, and Administration

Each Program Area is designed to support the coequal objectives by outlining specific principles, actions, and activities directed to the relevant area of focus. Recognizing that climate change presents the most significant threat to achieving the coequal objectives, the American River Climate Adaptation Program (ARCAP) is a cross-cutting program designed to accelerate progress in all five Program Areas by developing and targeting additional volumes of water to directly support the coequal objectives. ARCAP aims to better manage water in the face of climate change by voluntarily linking agencies, infrastructure, and policies—creating a truly regional water system where water is managed by agencies to be available when and where it's needed, and cold water is preserved in the American River for fish and future supply is protected.

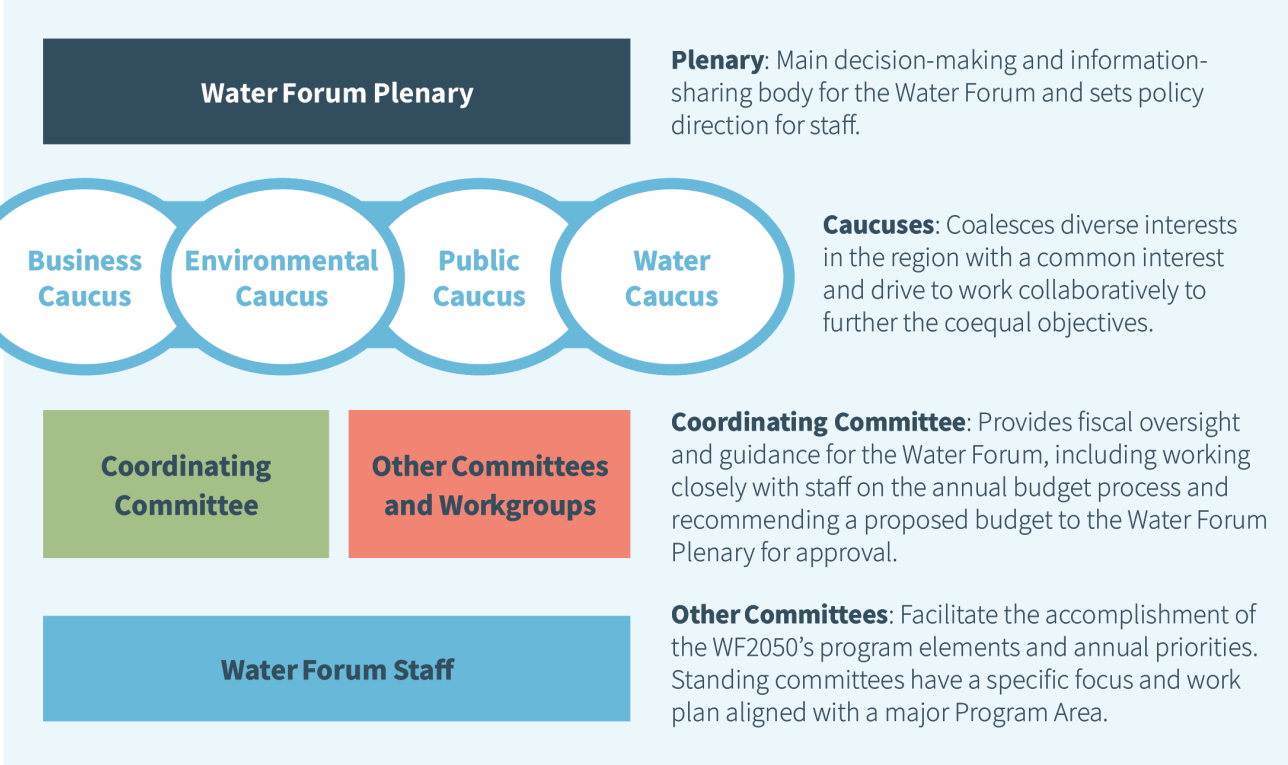

The WF2050 agreement is a voluntary agreement between signatories that functions through mutual commitments made to support the coequal objectives, implement the guiding principles, and uphold specific commitments relevant thereto.

Figure 2. Structure of WF2050

The WF2050 Program Areas (Figure 2) incorporate many of the elements from the first WFA, adapted to meet the region's evolving needs over the next 25 years. For example, the American River Corridor Health Program Area includes the Habitat Management element, and American River Flows and Operations integrates the Water Forum's Flow Management Standard. Additionally, Governance, Funding, and Administration introduces a new pathway for the Water Forum while maintaining the major components of the Water Forum governance structure (Figure 3).

Figure 3. Water Forum Governance Structure

The WF2050 includes:

Coequal Objectives: Reaffirmation of the long-standing mission and vision of the Water Forum, emphasizing a dual commitment to water supply reliability and environmental stewardship.

Guiding Principles: Foundational guidelines to drive the actions of the Water Forum and its members, helping to ensure that Water Forum efforts remain aligned with the core values and objectives.

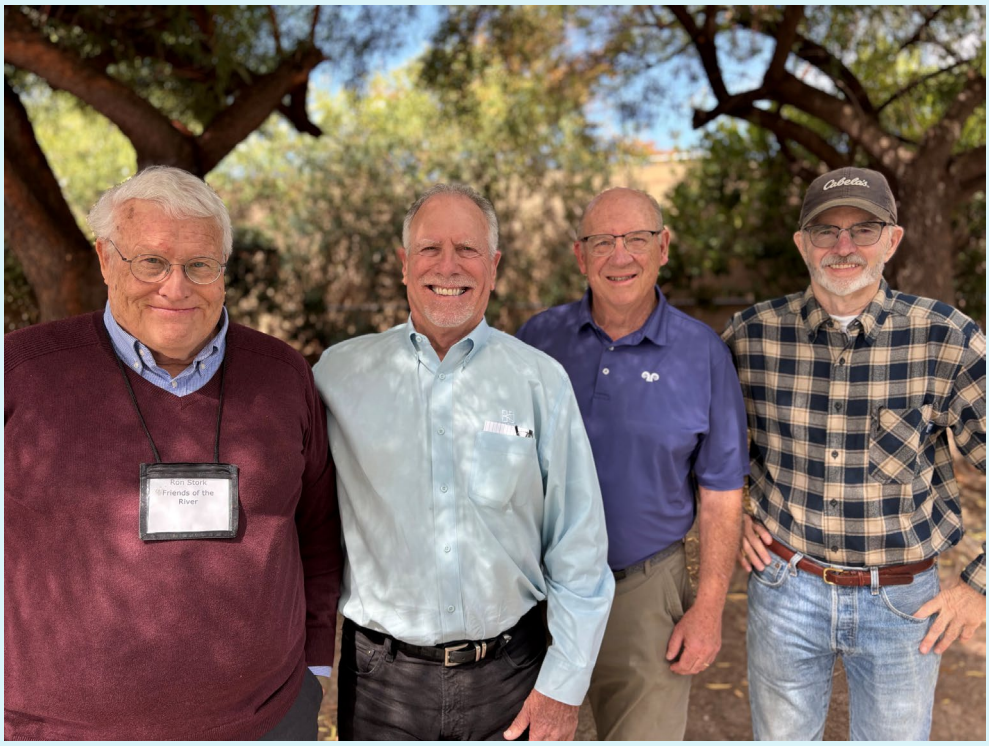

Program Elements: Core elements of the Water Forum's work, defining roles and responsibilities in the areas of American River Corridor Health; American River Flows and Operations; Regional Water Supply Sustainability; Science, Monitoring, and Decision Support; and Governance, Funding, and Administration – supported and accelerated by the American River Climate Adaptation Program.

Metrics: Data and information for monitoring and assessment to provide a framework for evaluation, helping to ensure that initiatives are effective and impactful.

Supported Projects: A list of regional initiatives and projects broadly supported by the Water Forum, highlighting collective efforts to enhance water supply and environmental health.

Acknowledgments

The success of WF2050 builds on the foundation established by those who brought the first WFA to life. Many individuals and organizations have contributed their time, expertise, and resources throughout the negotiation and development process. Their commitment to addressing the region's water supply and environmental challenges has been essential in shaping a comprehensive framework for the next 25 years.

The foundation of the WF2050 reflects the vision and commitment of those who shaped the Water Forum. Special recognition goes to original Water Forum members who have continued to participate: Ron Stork of Friends of the River, Clyde Macdonald of Save the American River Association, Jim Ray of the North State Building Industry Association/MacKay & Somps, and Brian Holloway of Sacramento Association of Realtors, whose leadership was essential to the success of both negotiations.

WF2050 PARTICIPATING ORGANIZATIONS

Thank you to the organizations and their representatives who devoted countless hours to participating in "Water Forum 2.0" (WF2050) negotiations. The Water Forum would not be possible without the dedication of its members.

Memorandum of Understanding for Water Forum 2050

The stakeholder representatives have concluded that the best mechanism to implement Water Forum 2050 is a Memorandum of Understanding (MOU) among all signatories to the WF2050 Agreement. By memorializing the substance of the WF2050 Agreement, this MOU creates the overall commitment to Water Forum 2050.

All signatories agree that by signing the MOU, they agree to carry out all the actions specified for them in the WF2050 Agreement.

Preamble

A diverse group of business leaders, environmentalists, citizen groups, water managers, and local government representatives has carefully reviewed the region's water future and the anticipated impacts of climate change. They found that unless we act now, our region risks a future marked by water shortages, environmental degradation, contamination, threats to groundwater reliability, and limitations to economic prosperity.

Joining together as the Water Forum, these community leaders from El Dorado, Sacramento, and Placer counties have spent thousands of hours analyzing the environmental and water supply needs of the region, focusing on the Lower American River, agreeing on principles to guide development of regional solutions, and negotiating the Water Forum 2050 Agreement.

This diverse group agrees that the optimal approach is a comprehensive package of interconnected actions that will achieve two coequal objectives:

> **Provide a reliable and safe water supply for the region's economic health and planned development through to the year 2050;**
>
> and
>
> **Preserve the fishery, wildlife, recreational, and aesthetic values of the lower American River.**

Recitals

1. *Whereas*, a reliable water supply is needed by current and future residents, businesses, and agriculture; and
2. *Whereas*, the lower American River is recognized as an important natural resource which should be protected and preserved for future generations by all Water Forum interested parties; and

3. *Whereas*, the Sacramento region's groundwater resources are being successfully managed through Groundwater Sustainability Plans that have been approved by the State Department of Water Resources, and the Water Forum serves as a place to exchange information, concerns, and ideas regarding the management of this resource; and

4. *Whereas*, water purveyors and others have for years sought to develop additional safe, reliable water supplies; and

5. *Whereas*, the environmental community and others in the region have for years sought to restore the fishery, wildlife, recreational, and aesthetic values of the lower American River, protect and preserve the American River Watershed, and the region's groundwater supplies, including the environmental resources they support; and

6. *Whereas*, all signatories continue to recognize the potential benefits of mutually supporting each other's goals and working together, as well as the collective risk of pursuing independent objectives in isolation; and

7. *Whereas*, the framework of an interest-based negotiation process cannot provide exactly equivalent benefits for all, but in most cases does make it possible for stakeholders to obtain what they need in a *Water Forum 2050 Agreement*.

Now, Therefore Be It Resolved That:

1. All signatories to this Memorandum of Understanding (MOU) agree that participation in *Water Forum 2050* is in the best interest of water consumers and the region as a whole.

   All signatories will endorse and, where indicated, participate in implementing the attached *Water Forum 2050 Agreement*, in accordance with the five Program Areas, and subject to relevant caveats and assurances:

   - American River Flows and Operations
   - American River Corridor Health
   - Regional Water Supply Sustainability
   - Governance, Funding, and Administration
   - Science, Monitoring, and Decision Support

2. Individual Purveyor Specific Agreements (PSAs) were negotiated as part of the Water Forum 2050 Agreement and are incorporated therein.

3. All signatories will have equal standing in the Water Forum, regardless of whether they belong to the Public, Water, Business, or Environmental caucus.

Term of the Memorandum of Understanding

This MOU shall remain in force and effect until December 31, 2050.

Legal Authority

Nothing in this MOU or the attached *Water Forum 2050 Agreement* is intended to give any signatory, agency, entity, or organization expansion of any existing authority.

Non-Contractual Agreement

This MOU and the attached *Water Forum 2050 Agreement* are intended to embody general principles agreed upon between and among the signatories. Still, they are not intended to, and do not, create contractual relationships, rights, obligations, duties, or remedies enforceable in a court of law by, between, or among the signatories or any third parties.

In witness thereof, the undersigned parties have executed this MOU this XX day of April, 2026.

Water Forum 2050 Program Areas

Water Forum 2050 (WF2050) comprises five key Program Areas (Figure 4), crafted to support the coequal objectives and shape and focus the work of the Water Forum over the next 25 years. The five Program Areas are supplemented by the American River Climate Adaptation Program (ARCAP), a cross-cutting program designed to focus and accelerate progress in all areas by seeking to develop and target additional volumes of water to support the coequal objectives.

Figure 4. WF2050 Program Areas

Common Themes Among Water Forum 2050 Program Areas

Spanning all WF2050 Program Areas are common themes that are foundational to the Water Forum 2050 Agreement. Collaboration and partnership, adaptive management, and advocacy will be central to the work of the Water Forum over the next 25 years, supporting the coequal objectives in the unique context of the challenges the region will face due to climate change.

COLLABORATION AND PARTNERSHIP

At its core, the Water Forum is a venue for effective collaboration and partnership. In addition to the Water Forum's diverse group of member organizations, external partners also inform and influence the work of the Water Forum and/or support the coequal objectives through shared goals. The diversity of member organizations and partners offers valuable opportunities for the sharing of information and resources in support of the coequal objectives, in a manner that is focused and includes a regional perspective that can otherwise be lost when operating in isolation. Within all the Water Forum 2050 Program Areas, opportunities for collaboration and partnership are identified as they relate to the activities and principles of the specific program.

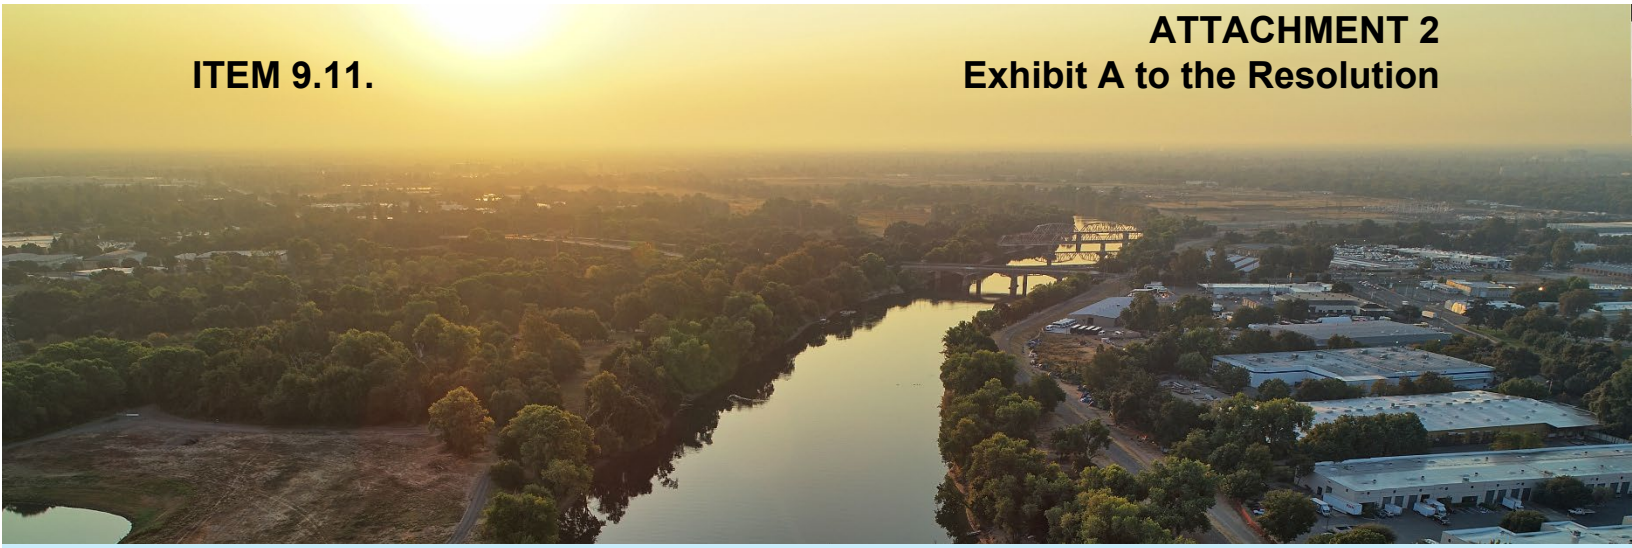

ADAPTIVE MANAGEMENT

Continuously evaluating regional conditions relative to the coequal objectives and the effectiveness of the Water Forum's work is a cornerstone of the 2050 agreement. There is a shared understanding that climate change poses the greatest challenge to the coequal objectives over the next 25 years. However, there is uncertainty regarding the potential severity and timing of realized impacts on the region. Low storage at Folsom Reservoir, increased river temperatures, and more intense wet and dry cycles are expected; however, it is not possible to predict with precision what these will mean for the region or what the most effective responses will be. Each of the Water Forum 2050 Program Areas acknowledges this uncertainty and includes elements to evaluate and adjust priorities and activities as an understanding of regional conditions and needs evolve over the life of the agreement. The Water Forum 2050 agreement also includes a robust *Metrics and Reporting* section that specifies metrics to track the implementation of the agreement and the viability of the coequal objectives, and outlines when and how those metrics will be reviewed and considered.

EXTERNAL ENGAGEMENT

One of the greatest strengths of the Water Forum is the ability to garner and leverage regional support for projects, programs, and activities focused on the coequal objectives. Ultimately, the challenges the region will face over the next 25 years will require action on a scale that exceeds the members' ability to implement. Solutions will require investments from state and federal

partners. Water Forum support and external engagement significantly enhance the likelihood that funding will be allocated to the region. The Water Forum 2050 Program Areas identify where external engagement is expected to be key to the success of the work.

American River Climate Adaptation Program (ARCAP)

Water Forum members recognize that climate change presents the most significant threat to achieving the coequal objectives of water supply reliability and environmental stewardship of the LAR. Climate change has the potential to adversely impact the region in many ways, including those listed below:

- Accelerated decline of salmonids, recreation, and water quality due to decreased flows and increased river temperatures in the LAR.[3]
- Decreased reliability of the region's urban water supply due to changes in hydrology, and increased strain on statewide water project operations.[3]
- Increased threat of external claims for American River water due to water-shortage pressure elsewhere in the state.
- Increased drying of soils and plants due to higher temperatures.
- Increased need for overall regional water resilience due to evolving regulatory requirements.

These extreme threats demand the timely and substantial watershed resilience measures contemplated as part of the American River Climate Adaptation Program (ARCAP), a multi-caucus problem-solving program seeking to develop and target additional volumes of water toward Water Forum coequal objectives. ARCAP offers a better way for the region to manage water as

[3] The Water Forum Ad Hoc Technical Team report of 2022 highlighted significant challenges that will result from climate change, including:

- The region will experience more frequent and more severe droughts and flood events. This pattern will challenge the capability of water storage infrastructure, particularly Folsom Reservoir's ability to provide flood protection and reliable water supplies.
- Salmon and steelhead populations in the lower American River will face significant threats due to suboptimal flows and temperature conditions and poor genetic diversity.
- Folsom storage is projected to be at critically low levels more often due to climate change, creating a substantial risk to regional water supply reliability.

climate conditions become more extreme. It enhances the five Program Areas by voluntarily linking agencies, infrastructure, and policies—creating a truly regional water system where water is managed by agencies to be available when and where it's needed, and cold water is preserved in the American River for fish and future supply is protected.

The ARCAP intends to make measurable quantities of water available to provide demonstrable benefits to both of the Water Forum's coequal objectives. Collectively, these water quantities will be referred to as *ARCAP Water* and can be thought of as an insurance policy against the challenges described above. *ARCAP Water* may include contractual or set-aside supply, or stored water that is managed by one or more entities. *ARCAP Water* could be provided from multiple sources, including:

- Regional conjunctive use operations – water stored in the groundwater basin through in-lieu or other recharge and recovery methods. The Water Forum, in collaboration with key partners, will examine the nexus between these activities and the planned Sacramento Regional Water Bank.
- RiverArc – relocating the source of water supply from an American River diversion to a Sacramento River diversion for some agencies.
- Reservoir reoperation – potential operational changes to provide *ARCAP Water* and enhance coldwater pool conditions in Folsom Reservoir and seek benefits from Forecast Informed Reservoir Operations (FIRO), or potentially through other CVP operational changes.
- Capture, storage, and use of un-storable water – may include recharge of excess water during flood operations when releases are well above optimal riverine ecological levels.
- Vineyard Treatment Plant expansion – potential additional capacity in the Freeport diversion on the Sacramento River if the Vineyard Treatment Plant were expanded.
- Sacramento Water Treatment Plant expansion – The City of Sacramento may increase the capacity of this plant, making additional Sacramento River water available.
- Water conservation actions – actions expected to reduce water demand and diversions, potentially making water available for ARCAP.
- Other sources may be identified.

ARCAP Water could offer the following benefits for the American River region:

- Additional supplies for water agencies serving communities in the Sacramento Region that are facing significant water shortages during droughts or other conditions.
- Augmented storage in Folsom Reservoir to enhance the coldwater pool and reduce river temperatures to benefit fish.

- Augmented flows in the LAR to benefit fish.
- Increased operational flexibility to benefit CVP operations.
- Increased capture, use, and storage of un-storable and excess flood waters.
- Increased groundwater storage regionally to enhance conjunctive use and support Groundwater Dependent Ecosystems.
- Demonstration of our region's commitment to proactively addressing climate issues and maintaining a sustainable American River watershed.
- Demonstration to Reclamation of our region's commitment towards Folsom Reservoir storage during dry and critical times.

The ARCAP is ambitious, and several important issues must be addressed before this program becomes operational. Because many outstanding questions will be unanswered during the WF2050 negotiations, the ARCAP includes elements focused on technical analysis and resolution of important issues. These technical and interested-party processes will rely on the technical coordination and cooperation of the Regional Water Authority (RWA) (see Program Elements) and consultation with Groundwater Sustainability Agencies (GSAs).

There is a precedent for such an ambitious initiative by the Water Forum. The Flow Management Standard (FMS), for example, has become a major focus of the Water Forum's activities and deliberations over the last two decades, ultimately leading to changes in CVP operations on the LAR. Like the ARCAP, the process for developing and implementing the FMS was not fully defined until after the original WFA was signed.

Guiding Principles

The ARCAP activities will support the Water Forum's coequal objectives by aligning with the guiding principles below:

1. ARCAP Water will provide water supply and ecosystem benefits, and will strive to provide multiple benefits whenever possible.
2. ARCAP Water will be created by using existing or planned regional water sources.
3. Program design and implementation will be conducted openly with all caucuses.
4. Developing and implementing the ARCAP will be a long-term endeavor, but it will progress incrementally to build confidence and support with early implementation, resulting in collective successes.
5. The role of the Water Forum staff in ARCAP development and implementation will focus on coordination with Water Forum members, conducting analyses, advocating for programs and funding, and tracking progress.
6. ARCAP analyses and coordination will be covered in partnership with RWA and the Water Forum.

7. ARCAP questions and issues related to conjunctive use (and possibly the Sacramento Regional Water Bank) will be addressed through a partnership between the Water Forum and RWA, involving water purveyor members and regional GSAs.
8. The ARCAP will work in concert with the FMS and other Water Forum elements to support the coequal objectives.
9. ARCAP Water will not be used to meet the minimum regulatory requirements as defined by the FMS or SGMA (as those are expected to be met per existing regulations and legislation).
10. The use of the Water Forum members' facilities and water supplies for the ARCAP should provide a benefit to those organizations.

Program Elements

To implement the ARCAP Guiding Principles listed above, the Water Forum will commit to the programs, actions, and activities below. These actions are designed to support the Water Forum's coequal objectives through the implementation of the ARCAP and are subject to the relevant caveats and assurances.

1. Technical, Operational, Regulatory, and Legal Issues

Several issues must be resolved before the ARCAP can come to fruition. These issues include:

1. What will be the target volume (if any) of ARCAP Water?
2. What are the sources of water for the ARCAP?
3. Who will own and manage ARCAP Water?
4. How, where, and when will ARCAP Water be stored?
5. Where and when will ARCAP Water be used?
6. How will the Water Forum and members track the sources and destinations of ARCAP water?
7. How will the ARCAP perform under various climate scenarios, including multi-year droughts, critically low storage (aka deadpool), and water supply curtailments?
8. What additional infrastructure will be needed to implement the ARCAP?
9. What will be the technical and physical limitations of the ARCAP?
10. What is the potential maximum volume of water that could be developed through the ARCAP?
11. How much groundwater recharge and recovery is possible in the region?
12. How much groundwater recharge and recovery is needed in the region?
13. Could the modified timing of released ARCAP Water enhance LAR temperature conditions?
14. How can changes in the point of diversion (e.g., from Folsom Reservoir or the LAR to Freeport) provide additional water storage or flow for the LAR?
15. What is the expected increase in un-storable water in the American River system, and what would be necessary to capture and store that water under the ARCAP?

16. Could FIRO increase ARCAP Water supplies, and if so, how much?
17. What opportunities exist to create and track *ARCAP Water* within regional demand management and conservation actions (including climate-ready landscapes and other emerging areas of research)?
18. How will inter-agency commitments to ARCAP be recognized, and how will their operations be counted?

ARCAP will consider the integrated interactions of demand (including demand management actions), supply, source waters, and conjunctive use that may impact the potential benefits of *ARCAP Water*, among other considerations. Appendix 2 outlines the first two years of technical, operational, regulatory, and legal analyses necessary to begin answering these questions and indicates the roles and responsibilities of the Water Forum and key partners (RWA, GSAs, etc.) in completing the various analyses.

2. External Engagement Strategy

The ARCAP will require partners beyond the signatories to WF2050 to be successful. Sustained efforts to communicate with potential partners will maximize the probability of success. Some of the entities identified for outreach include:

Reclamation – Changes in CVP operations may be sought to help establish or store ARCAP Water. This will require a strategy for ongoing engagement with Reclamation that is consistent among members and flexible in approach. The Water Forum will strive to communicate to Reclamation that ARCAP actions help support their goals of delivering water with minimal shortages and maintaining operational flexibility.

Regional GSAs – Active coordination with the GSAs will be implemented as part of ARCAP and will include the sharing of relevant analyses and data, as well as general information sharing to raise awareness and explore opportunities for collaboration.

California Department of Water Resources (DWR) – The DWR has a regional watershed planning initiative (which RWA is piloting for this region) and is likely to continue serving as a source of funding for water infrastructure and climate resiliency actions. As such, DWR should be kept informed of the ARCAP effort and successes.

State Water Resources Control Board (SWRCB) – The SWRCB would be involved in any transfers of water supplies that utilize water rights established after 1914 or modifications of existing water rights to add new points of diversion.

Fisheries agencies, including the National Marine Fisheries Service, California Department of Fish and Wildlife, and the Federal Fish and Wildlife Service, are likely to have valuable information on employing ARCAP Water to benefit the aquatic ecosystem.

Other entities, such as the California Legislature and Congress, will likely have a keen interest in the ARCAP efforts, and the Water Forum should strive to provide them with regular progress updates.

3. Coordination, Management, and Implementation of *ARCAP Water*

The implementation and management of *ARCAP Water* will be coordinated with regional and external partners. It is expected that the Water Forum will partner with RWA and others on technical analyses to inform the development and deployment of *ARCAP Water,* will coordinate among members as ARCAP is implemented, and will track development. Additionally, the Water Forum will advocate for programs and funding as needed.

4. Program Review and Refinement

It will be necessary to periodically evaluate and refine the ARCAP, given its scope and complexity. A work group composed of Water Forum and RWA members/staff will be established to oversee and guide the ongoing work for ARCAP. A work plan for the ARCAP, including a budget and scope of work, is included in Appendix 2. The ARCAP workplan will be reviewed and updated annually.

The annual ARCAP review will analyze the program's successes, challenges, and barriers. A summary of the ARCAP review will be included in the Water Forum's Five-year Status Report (or other periodic Water Forum publication) and will include specific, agreed-upon reporting metrics.

The ARCAP review will, as appropriate, guide changes to the program to ensure long-term success.

Caveats and Assurances

The following list of assurances is intended to ensure that the Water Forum develops and implements the ARCAP through a concerted and good-faith effort that supports the coequal objectives and embodies the Water Forum's Values.

1. *The ARCAP will be developed and implemented, with opportunities for open cross-caucus discussions and guidance, utilizing the Water Forum's decision-making processes. This applies to both technical processes and member deliberations.*
2. *The Water Forum will work jointly with RWA and the GSAs to resolve technical issues during ARCAP development and implementation. Staff from RWA and the Water Forum will work together in a collaborative relationship to support this program and will engage with the regional GSAs.*
3. *The ARCAP approach will strive to add value and avoid creating added costs, duplicative processes, and bureaucracy.*
4. *The ability of Water Forum members to identify and employ ARCAP Water does not imply that the American River is in excess conditions.*
5. *ARCAP implementation will complement and support other Water Forum programs (e.g., FMS).*

6. *The Water Forum will review the successes and challenges of the ARCAP and refine the program as needed, with adjustments agreed upon by all caucuses.*
7. *ARCAP assets (e.g., water rights and contracts, wells, diversion works) will remain under the control of the owning agencies.*
8. *The role of the Water Forum (including its staff and members) will be to coordinate ARCAP actions, complete agreed-upon technical analyses and studies, advocate for programs and funding, and track and review the status of these programs.*
9. *The Water Forum and RWA will respect the operational authority and third-party agreements of their members, which are necessary for their contributions to ARCAP Water.*
10. *No part of the ARCAP will abridge the authorities, entitlements, or agreements of Water Forum members without the express consent of the relevant parties.*

American River Flows and Operations

Program Area 1: American River Flows and Operations

The American River Flows and Operations (ARFO) Program Area includes three areas of focus for Water Forum activities and commitments:

- Flow Management Standard
- Flood Operations
- Temperature Management and other Water Management Infrastructure

FLOW MANAGEMENT STANDARD

The Flow Management Standard (FMS) for the LAR was envisioned and prescribed under the original WFA, and the first iteration was completed in 2006. As new data, tools, and technology have become available, the FMS has been updated and refined to support the Water Forum's coequal objectives[4]. The features of the FMS (i.e., minimum reservoir releases, storage targets, and temperature management protocols) provide guidelines for the operation of Folsom Dam and the LAR to help protect river health and preserve water supply reliability, particularly during droughts when water supplies are reduced and competing demands arise.

The degree to which the FMS features are included in the operations and planning of Folsom Reservoir depends greatly on engagement with Reclamation and advocacy for regional interests within CVP operations. The flows and river temperatures on the LAR are directly related to the operations of Folsom Dam, which Reclamation owns and operates as part of the broader CVP. The CVP is an extensive, multi-purpose network of dams, reservoirs, canals, hydroelectric power plants, and other facilities that span 400 miles of inland California, providing water supplies to municipal (including Sacramento area purveyors), industrial, refuge, and agricultural water users. Additional authorized purposes of the CVP include flood protection, recreation, navigation, flow

[4] In late 2024 the most recent iteration of the FMS was referred to as the Modified Flow Management Standard (MFMS) and was referenced as such in the 2019 Biological Opinion.

augmentation, fish and wildlife enhancement, fish and wildlife mitigation, power generation, and water quality enhancement (particularly in the Delta). Proportionally, both the demand on CVP water within the American River region and the storage capacity of Folsom Reservoir are relatively small parts of the broader CVP demands and storage capacities, respectively. However, the proximity of Folsom Reservoir to the Sacramento-San Joaquin Delta (Delta) in comparison to other CVP storage facilities makes it one of the first facilities called upon when Delta water quality improvements are needed. This action is further fueled by Folsom Reservoir's small storage capacity relative to historical runoff volumes[5] and an underlying perspective by Reclamation and other CVP contractors that Folsom Reservoir is more likely to refill each year as compared to other CVP reservoirs.

Historically, Water Forum members have engaged with Reclamation and other federal and state agencies to advocate for changes in operations and infrastructure that could support the coequal objectives[6]. In seeking implementation of the FMS and to reduce potential resistance, the Water Forum strived to balance the features of the FMS such that the impacts to out-of-basin uses were minimized. However, LAR conditions, particularly river temperatures, have been severely challenged over the last several decades, and CVP operations for broader system-wide objectives, including the magnitude of deliveries and the contractual priority of out-of-basin water users, can be at odds with the needs of the LAR. For example, Folsom Reservoir releases are frequently at their peak during the summer months to support CVP deliveries outside of the basin and to maintain water quality in the Delta. However, these increased releases in the summer months can challenge temperature management on the river, particularly for the fall spawning season.

River temperatures on the LAR have long been understood to be the primary limiting factor for salmonid species in the river. Current temperature targets for salmonid species, as stated in various regulatory requirements, are frequently exceeded, and detrimental temperature conditions are particularly prevalent and extreme in drought years due to lower storage (and therefore less cold water) within Folsom Reservoir and lower flows below Nimbus Dam. Additionally, the releases from Folsom Reservoir into Lake Natoma create further challenges for temperature management due to the warming that can occur before the water is released into the LAR. Over the last 15 years, the temperatures known to be optimal for the resident salmonids' key life stages have rarely been met on LAR and have trended towards upper tolerable in the best of years. Droughts have become increasingly frequent over the last 20 years and are projected to become more severe and frequent in the future. Temperature models indicate that under climate change, river temperatures are expected to routinely be markedly above the suitable ranges for

[5] Folsom Reservoir storage capacity is just under 1 million-acre-feet (MAF) and the historical annual Folsom Reservoir inflow between 1976 and 2024 was just over 2.7 MAF. In approximately two-thirds of the years between 1988 and 2024, a portion of inflow could not be stored due to Folsom Reservoir's flood management responsibilities .
[6] Water Forum and Reclamation signed a Memorandum of Understanding (MOU) in 2021 to formalize information sharing and communication on LAR conditions, operations, and forecasts.

resident salmonids for nearly half of the year, creating unhealthy or even lethal conditions for the fish. Extreme climate change scenarios indicate that the survival of the salmonids in the LAR could be severely threatened.

Temperature management improvements, including both operational and physical enhancements, will be crucial under future conditions to enhance the health of the river and support the Water Forum's coequal objectives. Therefore, FMS Program Elements include opportunities for strategic partnerships and engagement related to the Water Forum's operational temperature management activities through the maintenance and updating of the FMS. Improvements to temperature management *infrastructure* are discussed in other sections of this program area, along with specific challenges and opportunities related to managing the cold-water resources on the LAR system.

As the region enters a new era of water management and shifting hydrology due to climate change, the Water Forum aims to maintain the integrity of the FMS through appropriate adjustments, ensuring it remains effective and relevant.

Guiding Principles

The FMS will:

1. Be designed to help protect the health and productivity of the LAR resident salmonids (steelhead and chinook) while balancing regional water supply needs and the recreational and esthetic values of the LAR.
2. Provide the following *functions* for the LAR[7]:

Primary Functions

   a. Support physical habitat availability and favorable water temperatures for the spawning life-cycle stage of chinook and steelhead.
   b. Support favorable water temperatures for the rearing life cycle stage of chinook and steelhead.
   c. Provide storage protections to minimize the frequency of low storage at Folsom Reservoir, for both water supply and cold-water resources.

Secondary Functions

   d. Support physical habitat availability for the rearing life cycle stage of chinook and steelhead.

3. Avoid causing unreasonable impacts to water uses outside of the American River Basin.

[7] Updates to the stated FMS functions can be made with confirmation from the Plenary.

4. Will not be inconsistent with the applicable flood control objectives and operational guidelines for protecting the Sacramento region downstream of the Folsom and Nimbus dams.
5. Include mechanisms to update and refine FMS features and functions based on changing conditions and the availability of new data and tools.
6. Align with other Water Forum commitments in the driest conditions to ensure that both in-stream and consumptive users share the burden of reduced supplies.

Program Elements

1. Ongoing Monitoring, Tracking, and Reporting

Metrics and indicators for the effectiveness of the FMS will be monitored and tracked for the duration of the agreement (as described in the *Science, Monitoring, Decision Support, and Reporting Program Area*). Thresholds, or triggers, for actions related to the FMS will be established based on the metrics identified in the Metrics and Reporting section. Performance towards the identified metrics will be reported consistently.

2. Cross-Caucus and Internal Coordination

The Water Forum will schedule regular internal meetings with an inter-caucus group of representatives with knowledge and interest in the real-time flows and operations on the LAR (Cross-Caucus). The frequency of the Cross-Caucus meetings will depend on the needs of the given water year and could range from monthly to weekly (drought years will likely require heightened levels of coordination as compared to wetter years). The purpose of the Cross-Caucus meetings will be for caucus members to coordinate with Water Forum staff to develop a recommended approach to current and forecasted reservoir operations and strategize for regional advocacy. The approach will be informed by the best available and current data, including forecasts, reservoir operations, and flows on the LAR. In their meetings with Reclamation and other regulatory agencies, Water Forum staff will advocate for the position developed by the caucus representatives. An emphasis of the Cross-Caucus will be on guiding implementation of the FMS within the relevant regulatory framework. Regular updates from the Cross-Caucus meetings will be provided at the caucuses, highlighting key issues and strategies identified as relevant to the success of the FMS.

3. External Engagement for Implementation

Reclamation is the principal implementing agency for key features of the FMS (reservoir releases, Folsom storage, temperature management); state and federal resource agencies also have critical roles in the oversight and regulation of Folsom operations. Active relationships with external partners will be necessary for the FMS to be implemented over time. Key partnerships and relationships are outlined below.

Reclamation. The Water Forum will continue to work with managers and operators on seasonal and real-time implementation of the FMS, including participation in regular

meetings regarding current conditions and forecasts, and engagement in the American River Group (ARG) monthly meetings (see below for more information). Water Forum discussions with Reclamation related to seasonal and real-time planning and operations may consider implications of broader CVP operations on LAR targets and conditions. In addition, when regulatory processes regarding operations on the LAR relevant to the FMS are initiated, the Water Forum will engage to support the inclusion of FMS features and to ensure that American River interests are fully considered by Reclamation within the broader context of regulatory processes governing CVP operations. For example, the current FMS is referenced (in part) in the 2019 Biological Opinion on Long-term Operation of the CVP and the State Water Project (BiOp) issued by National Oceanic and Atmospheric Administration Fisheries (NOAA Fisheries) and governs Reclamation's operations, affecting implementation of FMS flows, storage, and temperature management protocols. Future efforts will be made to ensure that references to the FMS are continued in regulatory frameworks and that the information referenced reflects current understanding. In other words, as relevant regulatory processes and documents are updated, the Water Forum will work to facilitate the inclusion of references to the most recent FMS documentation and ensure shared understanding.

In 2021, the Water Forum and Reclamation signed an MOU to identify and implement communication and information sharing activities related to Reclamation's operations on the LAR. Specifically, the MOU focuses on the implementation of key elements of the FMS (end-of-December storage, minimum reservoir releases, temperature management, etc.). Since the signing of the MOU, Water Forum staff and members have been meeting with Reclamation at regular intervals to share and discuss information related to the latest forecasts, conditions, and operations decisions.[8]

Additional details related to the Water Forum's expected engagement with Reclamation are provided in Appendix 3.

NOAA Fisheries: NOAA Fisheries is the primary federal regulatory agency responsible for protecting federally listed threatened and endangered anadromous species on the LAR. The Water Forum will actively maintain working relationships with NOAA Fisheries representatives working on the American River operations to facilitate their understanding of FMS features and functions.

U.S. Fish and Wildlife Service (USFWS): The USFWS's work on the LAR focuses on protecting federally listed species, including guiding research, developing conservation

[8] As of January 2024, aspects of that MOU have expired, and updates will need to be explored and pursued. Specifically, the 300 TAF end-of-December planning minimum for Folsom Reservoir storage was established for a pilot period for calendar years 2020-2022. Current efforts are underway to include a similar planning minimum in a forthcoming updated BiOp, but pending the outcome of those efforts, continued engagement with Reclamation will focus on the implementation of FMS features as needed.

actions, and partnering to restore habitats and recover species. The Water Forum will actively maintain working relationships with USFWS representatives working on the American River operations to facilitate their understanding of FMS features and functions.

California Department of Fish and Wildlife (CDFW): CDFW operates the Nimbus Fish Hatchery on the LAR and leads many of the surveys and data collection efforts focused on the health and status of fish in the LAR. The Water Forum will continue to coordinate and partner with CDFW on activities related to implementing the FMS.

State Water Resources Control Board (SWRCB): The SWRCB is responsible for administering water rights in California and thus oversees the water rights permits and licenses held by Reclamation and other diverters on the American River. In addition, the SWRCB regulates water quality in the Delta. Some SWRCB actions impacting conditions on the LAR can include (but are not limited to) issuing temporary urgent change petitions (TUCPs) for Delta water quality (impacting CVP operations) and water right curtailment during drought emergencies, adopting flow standards for river systems, updates to the Bay Delta Water Quality Control Plan[9], and otherwise regulating flows on the LAR.

It is the intent of the signatories to the WF2050 that the FMS will be permanently implemented, recognizing that over time the FMS will be refined to reflect updated understanding of the needs of the river. One way this can be implemented will be an updated SWRCB flow standard for the LAR. It is also the intent that there be flexibility (adaptive management) in the implementation of the FMS to reflect real-time ecological considerations.

The Water Forum will continue to be an active member of the American River Group (ARG), which offers a monthly opportunity for LAR interested parties to convene and share the latest information related to reservoir inflows, reservoir and hatchery operations, river conditions, and fisheries status. Reclamation established the ARG as a working group to coordinate fishery and operational requirements for the LAR in 1996. Reclamation is the lead coordinator, bringing together those who have either a legislated or resources-specific interest in the operation of Folsom Dam and Reservoir and the LAR. The formal members include Reclamation, the Water Forum, and agencies with public trust responsibilities for fisheries resources in the LAR, which include USFWS, NOAA Fisheries, and CDFW. Members of the public and other agencies are welcome to attend ARG meetings and provide comments on matters under consideration by the ARG. Reclamation considers the information provided at ARG when making operational and management decisions regarding temperatures and flows necessary to sustain fish resources in the LAR.

4. Periodic Updates and Refinements to the FMS

The status of the FMS (effectiveness and level of implementation) will be reviewed on a regular basis within the broader Metrics and Reporting efforts of the Water Forum and the FMS will be

[9] Also known as the Health Rivers and Landscapes Program.

updated and refined when new data or tools, or new approaches that may have merit, indicate that revisions would improve contributions of the FMS to supporting the coequal objectives, and/or when processes to update relevant regulatory requirements are pursued.

Caveats and Assurances

1. *Signatories acknowledge that, while minimum reservoir releases are a key feature of the FMS, flows above the specified minimum releases can provide important benefits for wildlife, recreational, and aesthetic values of the LAR.*
2. *Signatories acknowledge that low Dissolved Oxygen (DO) levels have a significant impact on the health of salmonids, thereby negatively affecting the benefits of the FMS. Consequently, Folsom Reservoir complex management actions must take this factor into account to avoid unhealthy DO levels.*
3. *Signatories acknowledge that Folsom Reservoir storage levels in the spring are critical to the volume of cold-water pool available for the effective implementation of the FMS during the rest of the year, and that management actions should be taken to preserve as much reservoir storage as feasible during this timeframe.*
4. *All signatories agree to recommend to the SWRCB an updated American River Flow Management Standard, developed by the Water Forum, that protects the fishery, wildlife, recreational, and aesthetic values of the lower American River. The recommendation will include requirements for Reclamation releases to the LAR.*
5. *The Water Forum will develop recommendations to inform transfer activity in the region, subject to agencies' determinations of operational, regulatory, and contractual feasibility, to be as consistent with the FMS as possible and maximize the value of the transfer water for the health of the LAR.*
    a. *Note: Current regulations include a commitment to implement certain aspects of the FMS, and water moved through a transfer agreement has the potential to offer additional flows and/or temperature benefits to the LAR, pending operational constraints such as, but not limited to, timing of deliveries, infrastructure capacity, regulatory or discretionary actions by Reclamation.*
    b. *Note: When transfers are arranged with Reclamation, purveyors can make requests or suggestions regarding how and when water is moved through the system; however, operational decisions are ultimately at the discretion of Reclamation and are subject to regulatory requirements.*

FLOOD OPERATIONS

As the American River watershed experiences climate change, the characteristics of flood events are expected to change from those historically observed. In response to the changing hydrology, modifications to flood operations may be necessary not only to continue to provide the Sacramento region with needed flood protection but also to avoid compromising the Water

Forum's coequal objectives. Specifically, changes in precipitation patterns, shifting increasingly from snow to rain under climate change, are expected to result in a reduced snowpack and shifts in the timing and magnitude of flows into Folsom Reservoir. Consequently, if Folsom flood operations are not changed accordingly, lower reservoir storage at key times in the year could lead to reduced regional water supply reliability and increased river temperatures.

Current climate models consistently indicate that global temperatures are increasing and will continue to increase for years and decades to come (the summer months of 2023 and 2024 were both record-breaking years for heat). Regionally, warmer temperatures in the upper watershed will result in more precipitation occurring as rain instead of snow, leading to more intense and extreme conditions for both storms and droughts. These changes in precipitation patterns and temperatures are likely to result in inflows to Folsom Reservoir arriving earlier in the season than observed historically, and potentially at higher flow rates—particularly during severe storm events—stressing the existing flood operations and infrastructure at Folsom Dam and on the LAR. High volumes of water arriving quickly at Folsom Reservoir with the rainstorm events, rather than slowly over the spring and summer as snowmelt, will make it harder to capture and store the runoff for use in the drier months due to the relatively small size of Folsom Reservoir.

Enhanced operational flexibility for flood operations at Folsom Reservoir could help to mitigate the impacts of climate change on regional water supply and river temperatures by creating opportunities to store and capture increased amounts of reservoir inflows during flood seasons. Operational flexibility refers to the ability to adapt and adjust the management of a reservoir to changing conditions and forecasts. It often involves real-time monitoring, forecasting, and communication with relevant authorities to make timely and informed decisions to protect downstream communities and infrastructure from flooding.

The goal of operational flexibility is to retain water in the reservoir for various purposes, such as water supply, hydropower generation, and ecosystem benefits, while maintaining the ability to manage the reservoir to regulate the anticipated inflow in a controlled and safe manner, thereby reducing the risk of flood-related damage. Operational flexibility involves making decisions about when to release water from the reservoir, how much water to release, and at what rate to make the releases, while considering factors such as weather forecasts, upstream inflows, downstream conditions, and the potential for flood-related damage. Future considerations for operational flexibility may need to include innovative approaches to reservoir management in order to address the challenges posed by climate change[10].

[10] For example, a study at the time of signing the WF2050 agreement indicated benefits to reservoir storage by managing reservoirs based on hydrologic cycles rather than years (i.e., a new cycle starts when all the reservoirs in a system are full, not when a new water year begins).

Guiding Principle

1. Support and advocate for enhanced operational flexibility within the American River watershed through improvements in infrastructure and procedures to increase flood protection for the Sacramento region and contribute to the coequal objectives.

Program Elements

Reclamation operations of Folsom Reservoir for flood control are subject to the conditions of the Water Control Manual issued by the U.S. Army Corps of Engineers (USACE), which is the primary regulatory agency for flood operations at Folsom Dam[11]. These two agencies are the primary implementation agencies, as the flood operation at Folsom Dam is the dominant element for flood management in the Sacramento region. In addition, current Water Forum members, specifically the Sacramento Area Flood Control Agency (SAFCA) and the American River Flood Control District (ARFCD), both have active roles in flood management for corresponding facilities (infrastructure downstream of Folsom Dam) and their associated operation and thus are also implementing agencies related to flood operations.

The Water Forum will support implementing agencies' programs, projects, and activities that are aligned with the WF2050 flood operations guiding principle of increased operational flexibility in the American River watershed, as described below.

1. Support for Projects, Programs, and Activities

The Water Forum will engage and support implementing agencies' projects, programs, and activities as appropriate and feasible in pursuit of the flood operations guiding principle. Support can include (but is not limited to):

- Funding for technical analysis
- Staff and/or consultant participation in project planning
- Providing regional education and awareness

Staff will monitor and track regional efforts that align with the flood operations guiding principle, and, when there is an opportunity to add value through support, staff will develop recommendation(s) for Water Forum contributions for consideration by the Coordinating Committee, the caucuses, and the Plenary. Relevant projects and programs may include enhanced hydrologic forecasting capabilities, new monitoring stations in the upper watershed, flood-managed aquifer recharge projects, enhanced FIRO at Folsom Dam, changes to structures and operations at selected upstream reservoirs, and nature-based solutions, among others.

Signatories support pursuing a Preliminary Viability Assessment of American River Watershed Forecast-Informed Reservoir Operations (Watershed FIRO) in partnership with Reclamation, USACE, National Oceanic and Atmospheric Administration (NOAA), and others, where

[11] Water Control Manual will be updated as project to raise the dam to add 3 ft for freeboard is completed.

appropriate and possible. Watershed FIRO offers the potential for improved water supply reliability and temperature management through increased operational flexibility, resulting in increased water storage volumes at Folsom Reservoir by the end of the flood season. In addition, where feasible and with willing partners, Watershed FIRO may include elements of nature-based solutions and upstream reservoir modifications in the upper watershed to enhance the benefits and durability.

Signatories support the identification and implementation of excess flood water recharge when: 1) carried out within the region; 2) designed, constructed, and operated in accordance with appropriate environmental and engineering standards/requirements, and the FMS; and 3) consistent with and supporting the Water Forum's coequal objectives. These concepts and opportunities will be explored and analyzed within the ARCAP.

2. External Advocacy for Improvements

Some opportunities for improving operational flexibility at Folsom Dam will involve addressing layers of jurisdiction and governance at the local, regional, state, and federal levels. The role of advocacy by the Water Forum (as a representative of broad local interests) can play an important part in the success of a given effort. Opportunities for advocacy may include (but are not limited to):

- Communications with federal partners (i.e., Reclamation, USACE)
- Advocacy at the federal level with specific messaging[12]

Staff will maintain awareness of opportunities for improvements to operational flexibility within the American River watershed, and as identified (with support from members and consultants), staff will develop recommendations for Water Forum advocacy for consideration by the Coordinating Committee and the Caucuses, as relevant.

Caveats and Assurances

1. *The Water Forum Signatories support pursuing a Preliminary Viability Assessment of American River Watershed Forecast-Informed Reservoir Operations[13] (Watershed FIRO) in partnership with Reclamation, USACE, NOAA, and others, where appropriate and possible.*
2. *The Water Forum signatories support the identification and implementation of excess flood water recharge when: 1) carried out within the region; 2) designed, constructed, and operated in accordance with appropriate environmental and engineering*

[12] The Coordinating Committee reviews talking points and briefing materials with the Executive Director to ensure proposed messaging adequately supports the coequal objectives and is representative of the caucuses' interests.
[13] Definitions of FIRO can vary, but generally includes expanding meteorological, watershed, channel condition, and environmental monitoring; advancing technology to enhance meteorological, watershed, channel condition, and environmental forecasting; and integrating data collection, management, display, and analysis capabilities into decision support systems related to reservoir operations.

standards/requirements, and the FMS; and 3) consistent with and supporting the Water Forum's coequal objectives.

TEMPERATURE AND OTHER WATER MANAGEMENT INFRASTRUCTURE

Temperature management improvements, including both operational and infrastructure improvements, will be critical under future conditions to help protect the health of the river and to support the coequal objectives. Key opportunities for Water Forum engagement related to operational temperature management activities primarily involve maintaining and updating the FMS, which includes setting storage targets at key times of the year, developing strategies for utilizing available tools for river temperature management, and exploring strategic partnerships and opportunities for engagement. Temperature management infrastructure improvements can be a crucial tool for further optimizing and protecting cold-water resources for the LAR.

Currently, the existing infrastructure for temperature management on the LAR includes temperature shutters on the power intakes at Folsom Dam (note that although the lower-level dam outlets are sometimes used to improve temperature conditions as a last resort, temperature management is not the primary purpose of those facilities). The temperature shutters at Folsom Dam enable water to be drawn from varying levels within the water column, offering some flexibility in managing the cold-water resources. However, the existing shutters are decades old, require manual placement within the water column, and without undertaking the cumbersome task of separating (or "de-ganging") individual panels within the shutters, the flexibility for selective withdrawal is limited. In addition, the shutters are known to leak cold water at lower elevations than intended due to design and structural limitations, which further limits their effectiveness.

Improvements to the existing temperature shutters, as well as other temperature infrastructure projects, were proposed and/or studied in the LAR system over the last couple of decades, including a method to access cold water below Folsom Dam's penstocks. The Water Forum has contributed to studies and discussions of some of these projects in the past and has been integral to advocating for improvements[14]. Current plans for updated temperature shutters on the Folsom Penstocks have been authorized by Congress.

The last 20 years of operations on the LAR have illustrated the challenges of maintaining suitable temperatures for resident salmonids even when Reclamation's operation of Folsom Dam is consistent with applicable regulatory mandates. There are established thresholds for optimal fish health, which are specified as targets in various regulatory documents. Within these regulatory frameworks, optimal temperature targets are often coupled with options for exceeding them by varying degrees, based on their relative feasibility within a given year due to hydrologic

[14] Areas of study have also included examination of opportunities to reduce heat gain across Lake Natoma, which presents additional challenges to temperature management on the LAR.

conditions and CVP operations. In recent decades, temperatures have frequently trended towards or exceeded the upper ends of suitable habitat conditions. These challenges are expected to continue and will be exacerbated by increased ambient air temperatures and shifting hydrology predicted by climate change.

In addition to known challenges related to temperatures on the LAR, over the last several years, there has been a growing awareness and concern regarding low dissolved oxygen (DO) levels in Folsom and Nimbus Dam releases, as well as associated DO levels at the Nimbus Fish Hatchery and on the LAR. In the fall of 2023, at a time when Reclamation was releasing water from lower elevations in the water column to access colder water, DO levels were recorded in both Lake Natoma and the LAR below suitable thresholds for salmonid survival. The fish were essentially at risk of suffocating in the water. Over the course of several days, with access to Water Forum DO data collected at key locations on the LAR, Reclamation was able to implement careful and effective infrastructure management actions to raise the DO levels to more suitable levels; namely, implementing the power bypass at Folsom Dam (i.e., releasing water from the lower outlets) and spilling water over the gates at Nimbus Dam (rather than through the penstocks). At this time, it remains unclear whether DO will continue to be a concern on the LAR and what actions will be most appropriate in response. However, infrastructure improvements to manage DO may need to be considered in the future, and options for aeration without bypassing power generation explored.

Given the current and projected temperature and DO challenges on the LAR, as well as the aging existing infrastructure, Water Forum support and advocacy for the continued enhancement of temperature and other water management infrastructure, along with considerations for future improvements, are imperative for contributing to healthier fisheries in the LAR.

Guiding Principle

1. Support and advocate for operational and infrastructure improvements within the American River watershed that contribute to more effective water temperature management and other important water quality attributes on the LAR for anadromous salmonids.

Program Elements

Reclamation and USACE are the principal parties responsible for infrastructure installation and management on both Folsom and Nimbus Dams. In addition, SAFCA has an active role in current efforts to improve the temperature shutters at Folsom Dam[15]. Known key areas for future improvement include:

[15] There are efforts underway to design and implement updated, remotely controlled temperature control shutters at Folsom Dam.

- Infrastructure at Folsom Dam to improve access to coldwater resources in Folsom Reservoir (i.e., temperature shutters, penstocks, and powerhouse)
- Options to reduce heat gain across Lake Natoma

The Water Forum will support implementing agencies' programs, projects, and activities that align with the WF2050 temperature management infrastructure guiding principle, as described below.

1. Support Projects, Programs, and Activities

The Water Forum will support implementing agencies' projects, programs, and activities (as appropriate and feasible) in pursuit of the temperature and other water management infrastructure guiding principles. Support can include (but is not limited to):

- Funding for technical analysis
- Staff and/or consultant participation in project planning
- Providing regional education and awareness

Staff will monitor and track regional efforts that align with the temperature management infrastructure guiding principle. When there is an opportunity for Water Forum engagement, they will develop a recommendation for Water Forum contributions for consideration by the Coordinating Committee, the caucuses, and the Plenary. A current list of temperature management projects and programs is included in Appendix 4.

Signatories support the current efforts to redesign and improve the temperature control shutters at Folsom Dam and will consider opportunities for Water Forum support and advocacy. Until improvements are made, signatories support the implementation of a power bypass at Folsom Dam in all years as necessary to provide suitable fall spawning temperatures for LAR resident salmonids, unless September temperature modeling indicates that 56°F or lower can be achieved at Watt Avenue on or before November 1st without the bypass.

2. External Advocacy for Improvements

Opportunities for improvements to temperature and other water management infrastructure will involve layers of jurisdiction and governance at the regional, state, and federal levels. The role of advocacy by the Water Forum (as a representative of broad local interests) can play a valuable and important part in the success of a given effort. Opportunities for advocacy may include (but are not limited to):

- Communications with federal partners (i.e., Reclamation, USACE)
- Advocacy at the federal level with specific messaging

Staff will maintain awareness of opportunities for improvements to water management infrastructure at Folsom and Nimbus Dams, and as identified (with support from members and

consultants), staff will develop recommendations for Water Forum advocacy for consideration by the Coordinating Committee[16] and the Caucuses, as relevant.

Caveats and Assurances

1. *Signatories support the current efforts to redesign and improve the temperature control shutters at Folsom Dam and will consider opportunities for Water Forum support and advocacy. Until improvements are made, signatories support the implementation of a power bypass at Folsom Dam in all years as necessary to provide suitable fall spawning temperatures for LAR resident salmonids, unless September temperature modeling indicates that 56°F or lower can be achieved at Watt Avenue on or before November 1st without the bypass.*

[16] The Coordinating Committee reviews talking points and briefing materials with the Executive Director to ensure proposed messaging adequately supports the coequal objectives and is representative of the caucuses' interests (see Program Area 5: Governance, Funding, and Administration).

American River Corridor Health

Program Area 2: American River Corridor Health

The American River Corridor Health (ARCH) Program Area includes one area of focus for Water Forum activities and commitments:

- American River Corridor Health Program

AMERICAN RIVER CORRIDOR HEALTH PROGRAM

The Water Forum commits to sustaining the American River Corridor Health (ARCH) Program to further improve, recover, enhance, and maintain the resources of the LAR corridor in service of the coequal objectives.

The ARCH Program builds on the success of the existing Water Forum Habitat Management Element (HME) program, as described in the first WFA. The ARCH Program is designed to take a multifaceted approach to support the coequal objectives by leading habitat and science efforts for the LAR, as well as collaborating with partners to achieve a thriving river corridor and region. Although many projects directly implemented under the ARCH Program focus on habitat, education, science, and decision-support activities, actions that support a robust and healthy river corridor also contribute to water supply reliability and economic vitality for our region.

Guiding Principles

1. Maintain a focus on the health of the LAR consistent with the coequal objectives.

All activities covered under the ARCH Core Program are in direct support of the Water Forum's coequal objectives.

These Core Program activities comprise most actions and projects under ARCH and meet specific criteria to:

- Continue improvement, recovery, enhancement, and maintenance of LAR corridor natural resources[17] by leveraging Water Forum funding to maximize available local, state, and federal grant funding.
- Lead implementation of native salmonid habitat and multi-benefit[18] natural resource projects within the LAR corridor.
- Support study and implementation of actions that improve flow and temperature conditions, and habitat quantity and quality for native species along the LAR corridor and broader region.
- Support public outreach and education associated with Water Forum efforts on the LAR.
- Advocate at the local, state, and federal level to support Water Forum efforts on the LAR, including efforts of Water Forum signatories and partners to support achieving the coequal objectives.

2. Leverage advocacy and partnerships in pursuit of shared goals.

Advocacy and partnerships contribute to the Water Forum's ability to improve resource conditions in support of its coequal objectives. As opportunities arise and resources permit, the Water Forum participates in regional and potentially broader initiatives and efforts in support of the coequal objectives. Actions and projects supported as part of the non-Core Program would meet specific criteria associated with effectiveness, costs, and benefits, and nexus with the coequal objectives, including:

- Maintaining an awareness of relevant projects and programs (e.g., Regional Parks Natural Resource Management Plan advancement, Central Valley Project Improvement Act Science Integration Team (CVPIA SIT) strategy development, etc.)
- Strengthening collaboration with American River Parkway and watershed partners (e.g., CDFW, Reclamation, NMFS, Regional Parks, Soil Born Farms, etc.)
- Leveraging Water Forum funding where appropriate (e.g., cost-sharing grant-funded activities, such as temperature modeling, for mutual gains and decision support)
- Identifying areas of advocacy and support for mutual gains to benefit the region (e.g., participating in advisory groups for partner projects, data sharing, outreach, etc.)

[17] Consistent with applicable policies, goals, plans, guidance, and laws governing the resources, lands, and funding sources associated with ARCH Program work (including but not limited to the American River Parkway Plan and Natural Resource Management Plan (NRMP), CVPIA Anadromous Fish Restoration Program guidelines, etc.).
[18] Multi-benefit projects are defined as those that do not focus on a single corridor resource, and intentionally include elements to serve multiple needs, including recreation, education, multiple species, etc.

3. Continue a commitment to adaptive management of Program activities.

Consistent with current practice, the ARCH Program will continue to incorporate "adaptive management" actions into its Program and project planning, not only to maintain the status quo but also to continually improve outcomes associated with the work of the ARCH Program.

Adaptive management and assessments of "lessons learned" will continue to occur at different intervals appropriate to the action being evaluated (i.e., salmonid project design assumptions are revisited on an annual basis based on fishery, hydraulic, and geomorphic data collection and analyses, whereas adaptive management associated with hydrologic changes influenced by climate change would be evaluated on a longer timescale).

Current best practices of adaptive management for the ARCH Program include, but are not limited to, the following:

- Monitoring and evaluation of the corridor health project effectiveness
- Review of existing assumptions and new data and analysis of hydrologic conditions in the watershed and region, and hydraulic conditions in the river corridor
- Synthesis of information gleaned from Water Forum-led and collaborative partnerships regarding fishery and other resource conditions
- Continuous coordination with state and federal agencies to ensure programs and planned activities are responsive to changing resource conditions associated with growth and climate change, updated agency guidance, and maximizing funding opportunities, etc.

Adaptive management activities support flexibility in addressing emerging issues and responding nimbly to changing conditions as additional scientific information and funding become available, as well as accommodating climate change and resource needs within the region. A continued robust program of coordination, advocacy, and funding for science, monitoring, and decision support activities is needed to support the coequal objectives through adaptive management.

Adaptive management is currently associated with ongoing WF2050 program areas, specific projects, and responses to emerging needs (i.e., implementation of the DO pilot study or review of the FMS during the ongoing BiOp Reconsultation process). However, the scale of adaptive management is expected to expand or contract over the term of WF2050 and can be easily scaled to accommodate potential new program areas or activities necessary to support improved outcomes, improved understanding associated with changing resource conditions over time, and adaptations needed to align with principles of the broader WF2050.

4. Ensure resource protection in compliance with applicable regulations.

Consistent with the original WFA and standard practice since its signing, individual projects undertaken by Water Forum members or the Water Forum itself will conduct all necessary

project- or program-specific environmental compliance documentation and consultation, as well as any required project-specific mitigation, in compliance with applicable laws and regulations.

5. Work in a manner that acknowledges changes in the nature and magnitude of human and societal effects on the natural resources of the LAR.

The Water Forum does not work in a vacuum. While our work can be highly technical and often focused on implementation, there are practical realities of working on an urban river corridor that is also designated as a federal and state Wild and Scenic River. Acknowledging the tension that exists between the river's ecological importance as a habitat for corridor species and human use of the Parkway as a recreational amenity and for other purposes is important.

The Water Forum is aware of and will continue to work to understand what challenges our members and partners face in addressing broader issues related to illegal camping[19], fire risk, waste management, safety, pollution, and other human dimensions of resource management on the Parkway, within the policy guidance and framework of the County of Sacramento, as landowner and manager of the Parkway.

Program Elements

The ARCH Program has grown in scope and size since the signing of the first WFA, new entities are involved in WF2050, and resource discussions and planning are more complex due to continued growth, changes in the nature and magnitude of human usage of the Parkway, and pressure exerted by the accelerated effects of climate change on resources addressed by our coequal objectives. Thus, additional implementation considerations and processes will be considered for the term of WF2050, as described below.

1. Water Forum ARCH Program Planning Matrix (Appendix 5)

The Water Forum's work in support of a healthy river corridor is ongoing and can be easily scaled to accommodate available funding sources, the capacity for work on the Parkway and within the region, and to meet existing and emerging decision-support needs for river operations. Maintaining a list of ongoing and potential projects and broader potential program areas that may address emerging issues, that are at varying levels of feasibility (ranging from concepts/ideas for the future to shovel-ready designs), allows the organization to seize funding and coordination opportunities as they arise and respond to changing resource conditions and guidance.

Building on past experience and success, a robust program of developing and conveying information to inform river operations decision support and planning, analysis, design, implementation, and monitoring of projects will support continued improvements, maintenance, scientific understanding, and coproduction of data associated with the health of the river

[19]Lack of affordable housing and legal shelter space both contribute to illegal camping on the parkway, along with other factors.

corridor and its resources. Outreach and education associated with habitat, decision support, and science and monitoring activities will also continue to be an important element of the ARCH Program.

See Appendix 5: ARCH Program Planning Matrix for a "living" list of habitat, science/monitoring, decision support, outreach, and ongoing educational activities, or under consideration, in support of the coequal objectives during the WF2050 term. The Matrix is utilized for annual and long-term work planning and is current at the time of WF2050 signing; however, it is expected to be a living document.

2. Engagement, External Communications, and Advocacy

To support continued advocacy and member engagement after WF2050 is signed, a framework or process will be developed to provide members with the necessary information regarding the ARCH Program (i.e., upcoming projects, priority partnerships) for use in external communications and advocacy. This could include program- or project-level talking points or briefings planned on a seasonal or annual basis for Water Forum-led initiatives. There are a range of venues available for Water Forum collaboration with local, state, and federal partners.

Regional Water Supply Sustainability

Program Area 3: Regional Water Supply Sustainability

The Regional Water Supply Sustainability (WSS) Program Area includes five areas of focus for Water Forum activities and commitments:

- Surface Water Management
- Groundwater Management
- Demand Management
- Dry-Time Actions
- Land Use Decisions

Additionally, the WSS Program Area includes a description of regional projects designed to support the coequal objectives and advance the principles of the Program Area.

SURFACE WATER MANAGEMENT

Regional demands for surface water are expected to increase under future conditions due to projected regional growth and the availability of ample regional surface water entitlements. However, the uncertainty in surface water availability due to climate change and the associated changes in hydrology must be carefully weighed when planning to support the Water Forum's coequal objectives under future conditions.

Folsom Reservoir is projected to be at critically low levels more frequently due to the loss of snowpack and earlier inflows to the reservoir, as well as the challenges these conditions will present for current operational practices. These changes will threaten the regional municipal and industrial (M&I) intakes and produce lower flows on the lower American River. Analyses of climate change impacts on river temperatures relative to the needs of fish show that, without action, the survival of salmonid populations will be severely threatened. The region will need to examine new approaches related to surface water management on the American River to protect regional water supply reliability and to maintain a salmonid population under climate change.

Conditions on the LAR are largely governed by the operations of Folsom Reservoir, managed by Reclamation, as it responds to demands within the broader CVP. Over the past 10 years (2014-2023), regional M&I diversions from the American River have accounted for an average of approximately 11% of the annual unimpaired inflow to Folsom Reservoir. This ratio can vary significantly depending on the hydrology of the given year; in wet years, regional demands are relatively less significant compared to the total runoff, and in dry years, they account for a greater proportion.

There is considerable diversity among the regional water purveyors in terms of supply portfolios, locations of diversions, types of entitlements, and amount of growth projected, as summarized in Table 1. This diversity presents a variety of opportunities to support the coequal objectives through surface water management. Additionally, each purveyor has unique constraints that may limit their flexibility regarding surface water diversions.

Table 1. Water Forum Purveyor Water Production (2014-23)

Purveyor	Water Production[1] 2014-23 Average (AFY)		
	SW	GW	Total
El Dorado Irrigation District	31,930	0	31,930
Placer County Water Agency	26,680	80	26,760
City of Folsom	18,200[2]	0	18,200
City of Roseville	28,000	220	28,220
San Juan Water District — Consotrium[3]	32,960	4,240	37,200
San Juan Water District - Retail	*11,460*	*0*	*11,460*
Citrus Heights Water District	*9,720*	*1,720*	*11,440*
Fair Oaks Water District	*6,900*	*2,520*	*9,420*
Folsom (Ashland)	*1,100*	*0*	*1,100*
Orange Vale Water Company	*3,780*	*0*	*3,780*
Golden State Water Company	5,470	5,050	10,520
Carmichael Water District	4,780	3,470	8,250
City of Sacramento	68,460	21,200	89,660
Sacramento Suburban Water District	8,020	22,530	30,550
California-American Water Company	2,610	24,580	27,190
Sacramento County Water Agency	15,080	22,470	37,550
Totals	242,190	103,840	346,030

1. Production data as collected and distributed by the Regional Water Authority includes treated retail water used within each respective service area.
2. Includes non-potable water deliveries to Willow Hill Reservoir.
3. Includes areas served by the San Juan Water District, which provides retail and wholesale supplies. Values shown reflect the sum volumes for San Juan retail, Citrus Heights, Fair Oaks, Ashland (Folsom), and Orange Vale.

WF2050 establishes principles for surface water management implemented through the elements of the agreement, including commitments contained in Purveyor Specific Agreements (PSAs).

Guiding Principles

Water Forum activities related to surface water management will support Water Forum's coequal objectives by aligning with the guiding principles below. Notably, there are other principles specific to certain agreement topics (e.g., demand management) that are relevant to surface water diversions but are stated within their respective areas of focus. In addition, it is acknowledged that there is an inherent tension between the coequal objectives, and when considered in isolation, they can be interpreted as being in conflict. The Water Forum aims to prioritize its objectives equally, recognizing the need to manage our water resources holistically.

1. Prioritize alternative supplies to supplement surface water from the American River system during dry conditions, providing flow and water quality[20] benefits for the LAR.
    a. Pursue opportunities for increased groundwater pumping to allow surface water to remain in the LAR.
    b. Pursue opportunities for increased diversions from the Sacramento River as an alternative to surface water from the American River system.
2. Ensure that surface water commitments are balanced with regional efforts to achieve groundwater sustainability.
    a. Prioritize surface water diversions in wet conditions to allow groundwater recharge.

Program Elements

1. Purveyor Specific Agreements

Within water Purveyor Specific Agreements (PSAs), individual commitments are articulated based on the Unimpaired Inflow to Folsom Reservoir (UIFR) as an annual metric of hydrologic conditions within the American River watershed. A UIFR of 400 thousand acre feet (TAF) or lower will define the driest conditions. A UIFR between 950 and 400 TAF will define the drier conditions. A UIFR between 950 TAF and 1,600 TAF will be considered normal conditions. And, a UIFR of 1,600 TAF or greater will be considered to reflect wet conditions. While 1,600 TAF is not considered a formal definition of what constitutes a "wet year" or "wet conditions" on the American River, it was utilized in the original Water Forum agreement as a basis for surface water commitments. It is expected that additional analysis and discussions will be conducted as part of ARCAP to explore and define other potential criteria that could guide regional operations in wet conditions.

Purveyor commitments were developed based on the surface water guiding principles and the unique opportunities for each purveyor. An important feature of the commitments, particularly for diverters of American River water, includes the establishment of the projected future level of diversions that would be expected to occur in normal conditions. This projected future level of diversion forms the basis for commitments in drier-than-normal hydrologic conditions.

2. Engagement with Reclamation

The influences of Reclamation's operations on the coequal objectives are much greater than the influences of regional surface water diversions, particularly related to the health of the river. The Water Forum will continue to engage with Reclamation to support the coequal objectives. Details related to the Water Forum's strategy for engagement with Reclamation are included in Appendix 3.

3. Regional Projects and Programs

Regional projects and programs described below have been identified as aligning with the coequal objectives and supporting the WF2050 surface water principles and elements. These projects have conceptual endorsement from the Water Forum (see Governance, Funding, and Administration, page 114), and are at varying levels of development and analysis. It is expected that these projects will continue to be discussed and assessed within the Water Forum to better understand the potential benefits and impacts.

RiverArc

The RiverArc project emerged from the 2000 Water Forum Agreement negotiations and was envisioned as a means to protect the river, its flows, and habitat from growing threats while also supporting water supply needs for planned regional development. Planning for the RiverArc Project has continued to evolve over the last 25-years but the concept has remained the same: to strategically shift existing water supply diversions from the American River to the much larger Sacramento River without adversely affecting other water users. RiverArc is seen as an adaptive management strategy that provides a foundational, regional approach to addressing the growing impacts of climate change in the American River watershed and supports the coequal objectives.

RiverArc design includes construction of water treatment and transmission facilities to deliver Sacramento River water supplies to the region upon implementation. The facilities are planned to include the utilization of an existing raw water intake on the Sacramento River that is fitted with state-of-the-art screens to protect fish, a raw water booster pump station, a pipeline to deliver raw water for treatment, a water treatment plant, and two treated water delivery pipelines, one to western Placer County and one to northern Sacramento County.

The RiverArc Partners, which currently include Placer County Water Agency, the City of Sacramento, the City of Roseville, and Sacramento County Water Agency, are currently working through the environmental analysis and technical studies required for the preparation of an Environmental Impact Report and Environmental Impact Statement. The RiverArc Partners anticipate presenting a public draft Environmental Impact Report in 2026. This planning work has been funded by a $5.1 million California Wildlife Conservation Board Streamflow Enhancement grant, demonstrating the importance of RiverArc's anticipated benefits to California.

Sacramento Regional Water Bank:

The Sacramento Regional Water Bank (Water Bank) is a project being developed by approximately 20 local water purveyors through the Regional Water Authority (RWA). The goal of the Water Bank is to expand conjunctive use, thereby increasing water banking operations throughout the region to: (1) Improve long-term regional reliability and provide statewide water supply opportunities when possible; and (2) Support healthy ecosystem function on the lower American River.

The Water Bank objectives are to:

- Increase groundwater recharge during wet conditions using available surface and recycled water supplies.
- Reduce reliance on surface water during dry conditions by using previously banked groundwater.
- Contribute to healthy ecosystem function, including on the lower American River
- Contribute to water reliability of water agencies in the region with no or limited access to groundwater.
- Maintain the quality of surface water and groundwater.
- Contribute to CVP operational flexibility by reducing reliance on Folsom Reservoir during dry conditions.
- Consider and advance mutually beneficial opportunities to partner with entities outside the region on operational collaboration and/or investment in the Water Bank.
- Generate revenue for investment in infrastructure and other projects/programs to improve regional water supply reliability, resiliency, and affordability for participating agencies.
- Generate revenue (through water transfers and exchanges) to reduce financial barriers to conjunctive use for participating agencies.

The Water Bank consists of a system of groundwater wells, pumps and pipelines that allow local water agencies to fill and then pump out water reserves stored underground to primarily serve local water needs. It is anticipated that up to 65,000 acre-feet per year of water can be recharged (or stored) by local water agencies during wet periods of and up to 55,000 acre-feet per year of water can be extracted by the same agencies during dry periods. Environmental documentation for the Water Bank is anticipated to be completed by the end of 2026, and the project will be implemented at that time.

Ongoing conversations within the Water Forum are expected to include details related to groundwater recharge during wet conditions and reduced reliance on surface water during dry conditions. These conversations are likely to occur within the ARCAP working group.

Caveats and Assurances

1. *The ability for any individual purveyor to implement the surface water diversions principles will depend on their respective opportunities and constraints.*
2. *On a five-year cycle, purveyor signatories will coordinate with the Water Forum staff to provide data and assumptions to be reported in their Urban Water Management Plans (UWMPs), including demand projections, current and planned supplies, and drought planning scenarios. Water Forum staff will compile regional data and assumptions for presentation to the Water Forum membership for review and discussion.*
3. *Nothing in the agreement is intended to call for the reduction or forfeiture of existing surface water entitlements. Signatories to the agreement will honor this principle in state and federal entitlement proceedings directly related to WF2050. It is recognized that there may be broader state and federal entitlement proceedings where signatories may have different interests, such as the SWRCB water rights proceeding for the Bay-Delta. Signatories agree to work in good faith through the Water Forum with the objective of developing a consensus recommendation for how state and federal entitlement proceedings should affect those agencies that store and divert American River water. All signatories will make good faith efforts to ensure that recommendations are consistent with both coequal objectives.*
    a. *The LAR is considered to be fully appropriated by way of the existing declarations of full appropriations, the responsibilities of the California Wild & Scenic Rivers Act, and the realities of the National Wild & Scenic Rivers Act. For more detailed information, see* Appendix 6. *The Water Forum will not be pursuing amendments to the existing declaration of full appropriation.*
4. *Recognizing that the majority of LAR surface water supply originates in the Upper American River Watershed, signatories support efforts above Folsom Reservoir to enhance and restore watershed health, creating a resilient headwater for water supply and ecosystem benefits on the American River.*
5. *The Water Forum did not evaluate new reservoirs in the analyses used to inform the WF2050 negotiations. Notwithstanding any provision of this agreement, any proposal for the Water Forum to support or oppose a new reservoir shall be approved by the Plenary, with at least 30-day notice to each Water Forum representative.*
6. *Signatories acknowledge that the parties to the Healthy Rivers and Landscape (HR&L) Proposal will be obligated to meet tributary program requirements for the American River, if approved by State Water Resources Control Board along with associated agreements. In addition, there are Water Forum members who have also made flow commitments*

pursuant the American River Terms for Ecosystem Support and Infrastructure Assistance Needs (ARTESIAN) Agreement[21].

7. *Signatories are encouraged when invited to support (where possible) purveyors' rates and fees necessary to implement projects and programs insofar as they are consistent with the WF2050 guiding principles and in support of the coequal objectives. The Water Forum will provide learning and engagement opportunities on water affordability and related best practices, and signatories will work to better understand associated challenges and opportunities (see Governance Program Element– Community Outreach and Engagement for more information).*

GROUNDWATER MANAGEMENT

The region's water providers are expected to continue expanding their reliance on groundwater due to climate change, the potential for groundwater to serve as a backup supply during increasingly dry conditions, and projected regional growth and economic considerations. Water providers and groundwater management agencies have made significant investments in protecting the quality and quantity of groundwater to protect the viability of this local water supply and to comply with State regulations. Local water providers have expended intense effort to demonstrate that local groundwater subbasins will comply with SGMA. SGMA will continue to require local management actions and reporting.

Historically, most local water systems were either supplied by surface or groundwater, but not both. Over time, some of the previously surface-water-fed systems have added groundwater to their supply mixes to increase resilience. Many of the traditionally groundwater-supplied systems have added surface water supplies to either replace contaminated groundwater or to replenish their groundwater aquifer through in-lieu recharge. The use of direct groundwater recharge (also known as injection) is a relatively recent addition to local management actions and is relatively rare in the region. "Conjunctive use," "groundwater banking," and "aquifer storage and recovery" are terms used to describe efforts to manage both surface and groundwater supplies in a manner that complements each other. Table 1 (presented above in the Surface Water Management Section) lists local water providers and their recent mix of surface and groundwater supplies.

WF2050 intends to establish agreed-upon principles to leverage and enhance the collective resources of its signatories to support the coequal objectives and groundwater sustainability while avoiding duplication of effort.

[21] The ARTESIAN Agreement contains commitments for certain RWA members to obtain funding to complete groundwater infrastructure projects and provide contributions to environmental outflow with or without adoption of the HR&L. The ARTESIAN Agreement governs the rights and obligations with respect to the administration of state funding provided for in the Funding Agreement Between the State of California (Department of Water Resources) and the Regional Water Authority - Voluntary Agreement Early Implementation for the American River, executed on July 21, 2023.

Guiding Principles

Water Forum activities related to groundwater management will support the coequal objectives by aligning with the guiding principles below.

1. Recognizing that the regional GSAs have primary responsibility for managing regional subbasins, the Water Forum will facilitate coordination and collaboration while avoiding duplicative efforts.
    a. Facilitate dialogue and the exchange of information between Water Forum signatories and groundwater managers to increase the understanding of groundwater conditions and trends, support inter-basin coordination, and promote effective regional groundwater management.
    b. Promote and facilitate the application of the latest scientific and data-driven insights in groundwater evaluations and planning.
2. Support conjunctive management of regional groundwater basins with surface water supplies to enhance water supply reliability and provide flow and water quality[22] benefits to the LAR.
    a. Prioritize groundwater use in dry conditions to allow surface water to remain in the LAR.
    b. Facilitate increased surface water diversions during wet periods to support groundwater recharge, in a manner that protects the river system.

Program Elements

1. Regional Coordination and Information Sharing

The Water Forum will work cooperatively with regional groundwater management organizations[23] to inform Water Forum members about groundwater conditions and trends, including GSP implementation and Sacramento Regional Water Bank operations. Activities and products to include:

1. An annual meeting on groundwater conditions and GSP implementation status.
2. Key groundwater indicators and data are synthesized and displayed on the Water Forum webpage for quick access to current conditions and project status. This feature will provide a comprehensive overview of regional groundwater conditions, incorporating information from the regional groundwater subbasins and the Sacramento Regional Water Bank. This information has value not only to Water Forum members but also to the public, including regional decision makers, land-use agencies, and policy analysts. Information to include:

[22] Including temperature, DO, and other characteristics.
[23] GSA, water banking participants, and other organizations who use groundwater.

a. Subbasin groundwater condition mapping with water quality and water level monitoring information.
b. A list of groundwater management actions planned by GSAs and their respective status.
c. Annual volumes of water stored, extracted, and transferred as reported by the Sacramento Regional Water Bank.

The Water Forum will coordinate with regional groundwater organizations to facilitate collaboration on efforts when there is alignment in planning and implementation activities. Water Forum activities will include:

1. Sharing data and information (climate change, water demand, or otherwise) with regional groundwater management organizations when there is alignment in planning and implementation needs.
2. Maintaining open dialogues between Water Forum staff and consultants and groundwater management organizations to seek opportunities to provide ecosystem benefits through groundwater management actions.

2. Support Actions: Technical, Facilitation, and Public Engagement

The Water Forum has a long history of successfully helping local groundwater managers[24]. Upon request from groundwater management organizations and with the approval of the Water Forum Plenary, the Water Forum will assist local groundwater management organizations. Examples of possible Water Forum support actions are listed and described below.

Technical: Gathering or interpreting data or conducting analyses (e.g., performing CALSIM runs to validate GSP modeling).

Facilitation: Structuring and holding conversations within and between GSAs and other interested parties. For example, in 2020, the Water Forum convened negotiations with the Sacramento Central Groundwater Authority and other local entities to determine the structure and funding of the South American Subbasin GSP.

Public Engagement: Sharing the status of our region's groundwater management efforts with key audiences (e.g., tailored communications for Water Forum signatories who desire a region-wide perspective; public support to groundwater managers for grant requests).

3. Purveyor Specific Agreements

Within the PSAs and the conditions outlined within the surface water management program element, each of the purveyors has outlined opportunities to implement the groundwater

[24] One of the most recent examples was Water Forum staff and consultant technical and facilitation support for the Cosumnes Subbasin during the preparation of their GSP in 2018.

management guiding principles. These opportunities include descriptions of in-lieu recharge activities and direct recharge, among other opportunities.

Caveats and Assurance

1. *The Water Forum will work to understand better and communicate the opportunities for, and impacts of, increased surface water diversions in wet conditions.*
2. *Signatories acknowledge the importance of continued data collection and analysis to improve understanding of Groundwater Dependent Ecosystems (GDEs) and surface water–groundwater interactions and commit to ongoing dialogue within the Water Forum as these topics are explored in the context of SGMA requirements and ARCAP analyses (as relevant).*

DEMAND MANAGEMENT

Demand management refers to a range of actions aimed at managing the consumptive use of water, including improvements in water use efficiency and efforts to ensure that demand does not exceed available supplies. These actions can be deployed at the regional, purveyor, and household levels. As the region prepares for continued growth and the impacts of climate change, demand management is a valuable tool in our regional toolbox to reduce surface water diversions from the American River (which has the potential to improve reservoir storage, cold water pool, and river flows) and to reduce demands (which improves regional water supply reliability, including groundwater sustainability and climate resilience).

Climate change in the American River watershed is expected to cause greater volatility in surface water availability between hydrologic year types. To partially address this increasing uncertainty in the availability of surface water supplies, particularly in dry and critical conditions, reduced surface water reliability will be offset (in part) by increased groundwater production and demand management. Demand management can contribute to improved water supply reliability while leaving more water to support the health of the river. Moreover, reuse, grey water, and water recycling can reduce the need for surface water diversions. Such measures have already been implemented at varying scales within the region, with expected expansion in the future.

Continued engagement and coordination with Reclamation (as the owner and operator of Folsom Dam) will be critical to increase the likelihood that regional demand management and other related actions will result in targeted improvements to the health of the LAR.

It is important to note that water providers in California have more stringent state requirements for water conservation than existed 20 years ago, which bring greater operational and financial obligations. The new regulatory framework adopted by the SWRCB in 2024 (Making Conservation a California Way of Life) establishes agency-specific water use objectives for urban water purveyors in California, which will have varying impacts on regional purveyors. WF2050 incorporates these new requirements.

Guiding Principles

Water Forum activities related to demand management will support the Water Forum's coequal objectives by aligning with the guiding principles below:

1. Support appropriate and reasonable demand management actions that help purveyors meet their regulated water use objectives, including actions that can improve water supply reliability and provide ecosystem benefits in the LAR, while also supporting regional groundwater sustainability.
2. Facilitate dialogue and the exchange of information between Water Forum signatories to promote awareness and understanding of regional water use trends and standards.
3. Seek ongoing opportunities for engagement, coordination, and agreements to promote the use of conserved water to support the coequal objectives.
4. Support actions that contribute to tree canopy health and avoid actions that exacerbate urban heat island effects.
5. Promote access to water necessary to support living landscapes across all socio-economic conditions and encourage low-water use and the use of native vegetation.

Program Elements

To implement the Demand Management principles listed above in support of the coequal objectives, the Water Forum will commit to the programs, actions, and activities below.

1. Regional Coordination and Information Sharing

Water Forum members commit to ongoing communication and collaboration on the implementation of demand management. The various mechanisms and venues where this communication and collaboration will occur are provided below.

Water Forum staff will obtain information regarding regional demand management that Water Caucus members have annually reported to the State and will synthesize the data to provide a regional overview of the status of implementation and water use trends. This information will be shared with Water Forum members in various venues and formats, as described below. Water use information shared with the Water Forum members will be built on existing reporting requirements.

- Water Forum will convene an annual meeting for Water Forum members focused on demand management and regional water use trends. Topics include regional water use trends (based on purveyor production data), the status of implementing demand management actions identified in agency PSAs and reported to the SWRCB, and the hydrologic outlook for the current year, with implications for regional water supplies and river needs. Optionally convene an additional meeting, as needed.
- Post progress towards meeting state-mandated water use objectives on the Water Forum webpage for quick access. Provide a "one-stop shop" for regional demand management progress, incorporating information from purveyors, DWR, and SWRCB.

- Provide updates on purveyors' approaches to meeting state-mandated objectives[25], including information on the relative effectiveness of various actions and programs (as available).
    - Purveyors and Water Forum staff will collaborate to consider opportunities for quantifying and tracking water conserved through ARCAP or other mechanisms.
- Purveyors intend to provide Water Forum members with a 30-day review period for their respective Draft UWMPs before the plans are adopted. This 30-day review period is expected to be built into the other required public review cycles and is not intended to be additive.
- Maintain open dialogues between Water Forum staff, members, and RWA to seek opportunities to support LAR health through demand management actions.[26]
- Host a semi-annual meeting with interested Water Forum members, RWA staff, and agency water conservation staff to review and discuss current and planned regional efforts related to demand management. Water Forum members will have the opportunity to provide input on regional strategies and messaging for consideration by the agency's water conservation staff.

2. Implementation of Priority Demand Management Actions

Each Water Forum purveyor has developed and will continue to refine its portfolio of demand management actions to meet regulatory requirements. In choosing the timing and level of effort for potential actions, purveyors consider their opportunities and constraints to weigh potential effectiveness.

The Water Forum has compiled a non-exhaustive list of demand management actions that have the potential to benefit LAR health and support water supply reliability, and these actions are summarized in Appendix 8. Implementation of the actions will help support the coequal objectives.

- Water purveyors will consider implementing the demand management actions listed in Appendix 8.[27]

[25] State mandated objectives (including outdoor water use) broadly become more restrictive over time and relevant updates and information will be presented across the urban water use categories.
[26] RWA implements their Water Efficiency Program (WEP) as a regional program which was created to help water providers in the greater Sacramento region work together to help their customers use water efficiently and meet relevant water use efficiency regulations and requirements. WEP activities have included public outreach campaigns, rebate programs, school education and research studies. In addition, RWA's WEP has been highly effective in attracting grant funding to increase water efficiency in the region and has secured $15 million in funding since the start of the program in 2003.
[27] As noted in Element 1 (Regional Coordination and Information Sharing), Water Forum's annual reporting on demand management information will include a summary of actions and measures implemented within the region, along with progress towards meeting mandated water use objectives.

- The Water Forum, through its decision process, may modify the list of demand management actions as information on their effectiveness becomes available.

3. Purveyor Specific Agreements

All purveyors are committed to adhering to the relevant conservation and water use efficiency regulations. At the time of signing, key requirements are associated with the 2024 "Making Conservation a California Way of Life" regulations, Assembly Bill (AB) 1572 related to irrigation of non-functional turf with potable water, and the Model Water Efficient Landscape Ordinance (MWELO) which encourages low-water use and native landscaping for new development.

Within each PSA, purveyors will outline their anticipated approach to comply with water conservation regulations, including opportunities to improve landscape irrigation, install native and low-water-use vegetation, or take other actions that are identified as meeting agencies' specific needs. The descriptions include current programs as well as the approach to future conservation. These projections will be understood by signatories to be preliminary in nature and subject to change and are included to provide a reference point as water use trends and practices evolve over the life of WF2050.

4. Engagement with Reclamation

Water Forum strategies and mechanisms for coordination with Reclamation are expected to shift over time as circumstances and opportunities evolve and climate change alters our regional hydrology, presenting new and potentially unforeseen challenges.

Demand management actions have the potential to increase the flexibility of the CVP system if they result in reduced diversions, particularly during drier periods. Reclamation has acknowledged this potential connection and the value of demand reduction during these times. As part of its ongoing work with Reclamation[28], the Water Forum will promote the benefits of regional demand management actions to influence operations and agreements that are favorable to the coequal objectives.

Over time, this coordination could seek potential agreements with Reclamation that acknowledge the quantities of conserved water and provide stronger dry-year protections than currently exist with the end-of-year planning minimum. Future agreements should also include provisions to protect purveyor water rights and to emphasize the role the Water Forum has played in decisions concerning Folsom Reservoir storage and releases.

[28] The Water Forum's ongoing work with Reclamation is expected to include implementing and improving the Flow Management Standard; developing various agreements with Reclamation; and providing real-time operational guidance.

Caveats and Assurances

1. *All signatories acknowledge that the requirements related to water purveyors' water use efficiency and demand management have become increasingly stringent since the signing of the original WFA and are continuing to evolve.*
2. *All signatories acknowledge that the purveyors must consider the costs and benefits of demand management actions (monetary, ecosystem, quality of life, etc.).*
3. *All signatories acknowledge that water rates have impacts on affordability and equity.*
4. *All signatories recognize that conserving water provides multiple benefits (if properly targeted, implemented, and managed) and commit to implementing demand management actions in a manner that strives to support both coequal objectives, with considerations for improvements to landscape irrigation efficiency and installation of native and low-water-use vegetation.*

DRY-TIME ACTIONS

Balancing the coequal objectives has proven challenging in all years on the LAR, particularly in relation to river temperatures, for which seasonal targets are exceeded in nearly all years. During dry conditions, these challenges become exacerbated, as providing a reliable regional water supply and protecting the health of the LAR may come into conflict, particularly when water supplies become more constrained. The frequency and severity of dry conditions are expected to increase in the future, multi-year droughts are expected to occur more frequently, and dry years are expected to be drier. Careful planning in anticipation of, and diligent coordination and strategy during, dry conditions will be required to ensure that both coequal objectives are supported. "Dry-Time Actions" are the actions provided below that are designed to be taken during dry conditions. Planning and preparation for dry conditions, as well as opportunities to build resilience in wetter times, are also important and are discussed in other sections of this document.

It is essential to acknowledge that Reclamation, as the owner of Folsom Dam and Reservoir, which it operates as part of the statewide CVP, plays a crucial role in the ability of any regional actions to reliably support the Water Forum's coequal objectives. As such, the Water Forum's ongoing engagement with Reclamation is always important, but crucial in dry times.

Other topics related to dry times discussed by the working groups have included specific principles and elements related to regional commitments in dry conditions (surface water, groundwater, and demand management). The guiding principles and elements below include additional language that is helpful for commitments specific to dry times.

Guiding Principles

1. Prioritize alternative supplies[29] to surface water from the American River system in dry conditions to support LAR health.
2. Work collaboratively to develop consistent messages and strategies for engagement with Reclamation and the State in dry conditions.
3. Strive for consistent regional messaging to the public on water conservation and best practices during dry conditions.
4. Convene interested parties to conference about balancing coequal objectives during defined dry times.

Program Elements

1. Purveyor Commitments for Managing Surface Water Diversions

The PSAs include an important program element for implementing Dry Time Actions, which is shared with the Surface Water Management area of focus. As stated in the Surface Water Management program element, the PSAs include specific commitments based on the UIFR (summarized in Table 2).

[29] Alternative supplies to the American River surface water could include groundwater, Sacramento River water, as well as reservoir reoperation transfers that would release water from storage upstream of Folsom Reservoir, and other supplies that would make additional water available to support conditions on the LAR.

Table 2. WF2050 Description of Operations

Agency	Normal Conditions (UIFR > 950 TAF)	Drier Conditions (950 >UIFR >400 TAF)	Driest Conditions (UIFR < 400 TAF)
El Dorado Irrigation District	• Use American River supplies to meet up to 50% of its forecasted 5-year total potable demand • Potentially provide transfer water for conjunctive use to improve groundwater conditions	• Implement the conservation measures required by its adopted Drought Action Plan • Limit use of American River supplies to meet up to 70% of forecasted 5-year total potable demand • Potentially provide transfer water for conjunctive use to improve groundwater conditions	• Implement the conservation measures required by its adopted Drought Action Plan • Limit use of American River supplies to meet up to 75% of forecasted 5-year total potable demand • Potentially provide transfer water for conjunctive use to improve groundwater conditions
Placer County Water Agency	• 155,000 AFY (total of water rights permits and CVP contract)	• 155,000 AFY from the American River • Replace up to 47,000 AFY (27,000 AFY for PCWA and 20,000 AFY for City of Roseville) of water through reoperation of Middle Fork Project reservoirs	• Conference with stakeholders on how available water should be managed • Likely reduction in deliveries (50% reduction in irrigation water, 20% reduction in treated water)
City of Folsom	• Current 5-year UWMP projections will serve as the basis of diversions	• Reduce surface water diversions up to 10 percent or as required by the City's Water Shortage Contingency Plan, whichever is greatest	• Reduce surface water diversions up to 20 percent, as required by the City's Water Shortage Contingency Plan, or as required by any mandates issued by the State of California, whichever is greatest
City of Roseville	• Diversions would be defined by the most recent UWMP's 5-year projected demand	• Diversions would decrease linearly from normal levels to the driest conditions	• Reduce surface water diversions from normal diversions by 20%

Agency	Normal Conditions (UIFR > 950 TAF)	Drier Conditions (950 >UIFR >400 TAF)	Driest Conditions (UIFR < 400 TAF)
SJWD Consortium	• SJWD will divert and the SJWD Consortium will use 38,603 AF within the current SJWD wholesale service area	• SJWD will divert and the SJWD Consortium will use a decreasing amount of surface water from 38,603 AF to 30,882 AF within the current SJWD wholesale service area • SJWD Consortium will reduce its surface water demand by additional conservation (up to 20% or as required by the Districts' Water Shortage Contingency Plans) and use of groundwater	• SJWD will reduce its diversion to 30,882 AF for use within the current SJWD wholesale service area • SJWD Consortium will reduce its surface water demand by additional conservation (up to 20% or as required by the Districts' Water Shortage Contingency Plans) and use of groundwater
Sacramento Municipal Utility District	• Entitlements total 30,000 AFY, though the maximum diverted in the last 10-years is around 6,100 AFY (2013)	• Cosumnes Power Plant (CPP) will need to operate during drier years to meet critical local and regional electrical demands. • Need to operate the CPP could increase in drier years due to dry year reductions in hydroelectric supply or potentially higher temperatures leading to increased use of air conditioning	• CPP will need to operate during driest years to meet critical local and regional electrical demands • Need to operate the CPP could increase in driest years due to dry year reductions in hydroelectric supply or potentially higher temperatures leading to increased use of air conditioning
Golden State Water Company	• Continue to use its pre-1914 appropriative right from the South Fork of the American River	• Coordinate with City of Folsom and Reclamation for pre-1914 appropriative surface water rights	• Coordinate with City of Folsom and Reclamation for pre-1914 appropriative surface water rights

Agency	Normal Conditions (UIFR > 950 TAF)	Drier Conditions (950 >UIFR >400 TAF)	Driest Conditions (UIFR < 400 TAF)
Carmichael Water District	• Future diversions from the American River may increase during normal and wet years by 1,500 to 3,000 AFY for storage into the groundwater basin	• Implement water conservation measures to reduce demand by 10% or as required by the District's Water Shortage Contingency Plan • Where possible, prioritize groundwater use to ensure sufficient flows in the lower American River	• Implement water conservation measures to reduce demand by 10 – 20% or as required by the District's Water Shortage Contingency Plan • Comply with State Water Resources Control Board's water rights orders for diversion limitations or curtailments • Where possible, prioritize groundwater use to ensure sufficient flows in the lower American River
City of Sacramento	• Diversion up to 200 MGD so long as the flow bypassing the diversion at the Fairbairn Water Treatment Plant (FWTP) is greater than the Hodge Flow Criteria, otherwise diversions will conform with Hodge Flow Criteria and corresponding diversion rates • City water diverted at FWTP in drier conditions in accordance with the foregoing limitations could be used anywhere within the City's authorized POU as it exists now and in the future	• Diversion up to 200 MGD so long as the flow bypassing the diversion at the FWTP is greater than the Hodge Flow Criteria, otherwise diversions will conform with Hodge Flow Criteria and corresponding diversion rates • City water diverted at FWTP in drier conditions in accordance with the foregoing limitations could be used anywhere within the City's authorized POU as it exists now and in the future	• Diversions at FWTP to be no greater than 155 cfs and not greater than 50,000 AFY

Agency	Normal Conditions (UIFR > 950 TAF)	Drier Conditions (950 >UIFR >400 TAF)	Driest Conditions (UIFR < 400 TAF)
Sacramento Suburban Water District	• Utilize contracts with neighboring agencies (currently City of Sacramento, and PCWA) to access surface water and allow groundwater to replenish	• Use groundwater to meet customer demands in a discretionary fashion to support regional conjunctive use goals, operational levels of service, and the Water Forum coequal objectives	• Use groundwater to meet customer demands in a discretionary fashion to support regional conjunctive use goals, operational levels of service, and the Water Forum coequal objectives
California American Water	• Use surface water as it is available through purchase water agreements with the City of Sacramento, PCWA, SCWA, and SSWD	• Use groundwater to meet customer demands in a discretionary fashion to support regional conjunctive use goals, operational levels of service, and the WF coequal objectives	• Use groundwater to meet customer demands in a discretionary fashion to support regional conjunctive use goals, operational levels of service, and the WF coequal objectives
East Bay Municipal Utility District Sacramento County Water Agency	• Diversions are from the Sacramento River • Proposals do not include specific diversions based on defined hydrologic conditions • Proposals articulate contributions to the coequal objectives beyond American River diversions		

2. Cross-Caucus and Internal Coordination

Cross-Caucus and Internal Coordination is a key program element within the American River Flows and Operations (ARFO) Program Area. The description of the topics and activities focuses on the implementation of the FMS. To ensure common understanding and general awareness of the hydrologic outlook, as well as the implications for related WF2050 commitments, updates on the current UIFR projections will be included in the Cross-Caucus meetings.

3. Engagement with Reclamation

Engagement with Reclamation is understood to be critical to the success of the WF2050 agreement and is described in several areas of focus (as it relates to the specific activities). A broader description is provided in Appendix 3.

In dry conditions, Water Forum members will enhance internal coordination to develop specific and consistent messages for engagement with Reclamation to: ensure implementation of the FMS, promote the benefits of the Water Forum dry-time actions, and the value of leveraging Water Forum commitments to support the coequal objectives.

4. Regional Conferences in Dry Times

Water Forum signatories acknowledge that during certain dry times, there may be insufficient water to support Water Forum's coequal objectives, and special provisions will be necessary for water management.

During dry time Regional Conferences, all signatories agree to:

- Meet regularly to confer on managing available water supplies to best serve the coequal objectives.
- Consider actions and strategies (beyond managing water supplies) to address the specific challenges posed by these conditions.
- Develop consistent messaging related to the need for water conservation, encompassing both the coequal objectives (not just individual available supplies). Agreed-upon messaging will be utilized region-wide to promote consistent understanding and awareness of the current situation[30].

Regional Conferences can be triggered under the following conditions and circumstances:

- The March-November UIFR is less than 750 TAF in any given month, based on the most recent Bulletin-120 (released February-May).
- Folsom Reservoir storage is projected to drop below 200 TAF at any time in the future, according to the 50% forecast.
    - The projection could be either:

[30] Agencies will still develop individual messaging for their specific situations and requirements, as necessary.

- Provided by Reclamation
- Made by Water Forum staff or consultants over any future time frame (note: the ability to forecast will dictate the time frame; in other words, with a valid forecast that shows future storage <200 TAF, then Regional Conferences would be triggered)

Other circumstances may also warrant Regional Conferences and are described below. Either of the circumstances described below requires confirmation from the Plenary[31] before a Regional Conference may be called.

- The Water Forum Cross-Caucus identifies that current dry conditions warrant a Regional Conference.
    - Cross-Caucus discussions on the potential for Regional Conferences will consider real-time conditions, including reservoir storage, river flows, river temperatures, forecasted operations, regional water supplies and infrastructure, state or federal declarations, etc.
- The Water Forum Executive Director, in consultation with the Coordinating Committee, identifies that current dry conditions warrant a Regional Conference.

Caveats and Assurances

1. *Water is essential for public health and sanitation, as well as for economic stability and quality of life. Water agencies have a fundamental responsibility to provide all customers with reliable access to safe, clean drinking water. This fundamental responsibility may constrain the breadth of Water Forum related actions purveyors are able to take during extreme drought.*
2. *Water agencies in California manage water shortages in accordance with their individual Water Shortage Contingency Plans (WSCPs), which are developed and updated every five years as part of their UWMPs, in compliance with California Water Code requirements.*
3. *Signatories acknowledge that dry times present exceptional challenges for the health of the LAR, and actions should be pursued to protect the fish that rely on river flows and temperature.*

LAND USE DECISIONS

Water Forum signatories include several entities with land use planning responsibilities and water purveyors with water planning responsibilities. Water Forum signatories recognize the benefit of coordination between water resources planning and land use decision-making.

[31] Plenary confirmation for Conferencing can be conducted via a special session, to be scheduled outside the regularly schedule meetings, as needed.

While coordination between water planning agencies and land use decisions is required by State law and regulation, and land use decisions rest solely within the purview of the local authorities, the Water Forum can organize and disseminate regional data that informs the nexus between water supply and land use. To that end, WF2050 aims to outline the Water Forum's role in promoting awareness of the coequal objectives as they relate to land use.

Guiding Principles

The core principles below shape the Water Forum's approach to fostering a regional understanding of water supply-land use considerations, particularly as it relates to supporting the Water Forum's coequal objectives.

1. The Water Forum has a regional vantage point on water use and supply and a connection to the coequal objectives that is not highlighted through existing mechanisms or requirements.
2. Land use authority rests solely within the purview of the appropriate government jurisdiction, and the Water Forum can play an important role by keeping members and others informed of water supply trends by synthesizing data on regional water use and supply. This data is not intended to suggest Water Forum advocacy (for or against) any land-use decisions.
3. The Water Forum recognizes the challenges in any projections given the uncertain and shifting nature of future land use, water supply, and water use trends, and is committed to clearly articulating such limitations.

Approach

Existing California state laws and local procedures are in place to link land-use decisions and water supply. These include:

- Senate Bills (SB) 221 and 610, adopted in 2001 and in place as of January 1, 2002 (e.g., water supply assessments)
- Water supply information requirements are outlined in Chapter 881 of the California Water Code
- California Environmental Quality Act (CEQA) process
- UWMPs (the source for water supply projections)
- GSPs
- "Can and will serve" letters from water purveyors and related requirements that include analyses of impacts of single-year and multiple-year droughts, intended to foster a rigorous and comprehensive analysis of water supply and reliability
- MWELO

The Water Forum recognizes that collating and synthesizing existing data at a regional scale (drawn from the above sources) can contribute to the understanding of the region's cumulative water supply and demand picture among members and others. The WF will rely on UWMPs, Annual Water Supply and Demand Assessments, and GSPs in the region, as well as dry-time actions included in member PSAs and other relevant water supply planning documents, to shape its synthesis of water supply and demand trends. These data sources will include demand and supply projections for the proceeding 20- to 25-year period, to be updated on a five-year cycle.

Additionally, the Water Forum will track longer-term water supply trends to account for changing climate change projections and trends; significant shifts in water or land use; changes in water supply opportunities, etc. This will be done through the ARCAP Framework and work plan (see Appendix 2).

As noted above, the approach is not intended to suggest that the Water Forum will take positions on, or imply support or opposition to, any land use developments. Instead, it is intended to provide members and others with an ongoing understanding of regional trends in both water supply and demand, consistent with the coequal objectives.

Program Elements

1. Region-Wide Supply and Demand Forecast

- The Water Forum will draw on existing data (UWMPs, GSPs, dry-time actions from PSAs, etc.) to compile an ongoing region-wide synthesis of actual and projected water demands and sources (initially through 2050). This timeframe is intended to be consistent with the UWMP planning horizon and not project so far into the future as to be overly speculative. Opportunities for Water Forum review and discussion of draft UWMPs prior to adoption are described in the Demand Management program elements.
- This region-wide synthesis of projected supplies and demands is to be updated on a five-year basis (with a rolling 25-year time horizon) and will highlight differences between actual versus previously projected water demand forecasts. Annual updates would occur when data is available and relevant.
- This region-wide examination will make explicit the underlying assumptions shaping the different data sources, highlighting both common and divergent assumptions, as well as any noteworthy information gaps.
- This region-wide overview is to be shared in an accessible manner (i.e., on the Water Forum website) and included in the 5-year Status Report to inform Water Forum members and others about regional trends in water demand and supply.
- As needed, the Water Forum will provide analyses regarding longer-term (beyond 25 years) water supply trends to inform its understanding of possible longer-term trends and

consequences for the coequal objectives. This work will be done within ARCAP as the program endeavors to understand and prepare for the impacts of climate change.

- The work will be coordinated with and built on efforts and information from other Water Forum processes as relevant (e.g., ARCAP, demand management, etc.) to avoid duplication of effort.
- Following the adoption of WF2050, the Water Forum will convene a working group[32] comprising members of all four caucuses to develop an agreed-upon approach (e.g., data sources, format) for reflecting and updating actual and projected water demands and sources throughout the life of WF2050.
    - The working group will identify information needs and sources, as well as the timeframe for projections (e.g., a rolling 25-year time horizon). Additionally, it will determine a method for displaying the information (format, dashboard, etc.) and integrate, as appropriate, the data with Water Forum metrics and other Water Forum processes.
    - The working group will meet periodically to review and confirm its process for developing a regional perspective on water demands and supply, and recommend any necessary changes in approach.

Water Forum staff are expected to collate and synthesize data. Any additional research or analytical needs identified by the working group would need to be discussed and confirmed with both the applicable water and planning agency staff, as well as Water Forum members, to ensure that staff burden and overall costs are considered and consistent with the Water Forum's budget development and review process.

2. Education and Information-sharing

The Water Forum plays a valuable role in educating its members and others in the region about the coequal objectives. There are aspects in ARCH, for example, that speak to public outreach and education, and other areas within Section 5 that underscore the importance of learning and community engagement. This information-sharing is expected to be centered at plenaries, in the Water Forum's 5-year Status Report, through an online dashboard, and via other outreach mechanisms described elsewhere in this document.

While the Water Forum as an entity does not have a role (formal or informal) in education related to specific land use projects, it can provide a useful venue for dialogue among its members. To that end, and consistent with the Water Forum Way, signatories are encouraged to use Water Forum processes to apprise other members of major land use projects, lawsuits, and other

[32] This working group could be combined with the ARCAP working group or a separate group could be formed. After the Water Forum 2050 Agreement is adopted, the caucuses will decide if two groups would be more focused or if one will be more efficient.

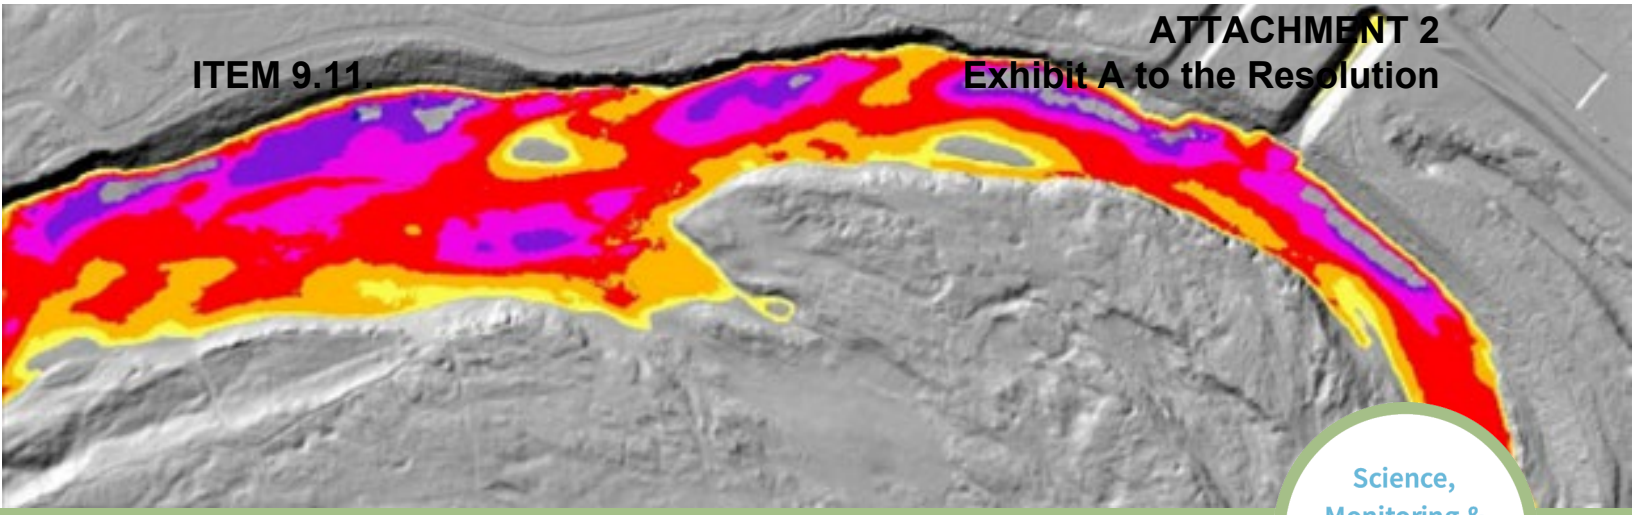

activities relevant to the coequal objectives and the work of the Water Forum. These disclosures create an opportunity for Water Forum members to engage in further discussions.

Additionally, individual Water Forum members are encouraged to keep their respective partners, decision-makers, and the public apprised of Water Forum priorities, coequal objectives, activities, and interests by utilizing fact sheets and other materials developed by Water Forum staff.

3. Water Forum Members' Right to Take Individual Positions on Proposed Land-Use Projects

All parties retain the right to support or oppose proposed land-use projects occurring within Sacramento, Placer, and El Dorado counties, and nothing in this agreement is intended to limit that right.

However, consistent with the Water Forum Way, members are encouraged to use the Water Forum process early on to disclose, discuss, clarify, and, as possible, resolve issues related to land use that may be seen as having the potential to impact the Water Forum’s coequal objectives.

Science, Monitoring & Decision Support

Program Area 4: Science, Monitoring, and Decision Support

The Water Forum commits to continuing to develop and sustain a robust science, monitoring, and decision support program to further study, monitor, adaptively manage, co-produce, report and share relevant data, advocate for scientific rigor, and inform and provide effective decision support for the ARFO, ARCH, WSS, and ARCAP program areas in service of the coequal objectives.

Guiding Principles

1. **Continue the production and coproduction of scientific information to support effective river corridor and watershed adaptive management.**

The Water Forum has a reputation for producing reliable, credible, and rigorous technical information. The Water Forum will continue to co-produce and contribute information regarding corridor health and watershed conditions (through project-related data collection and analysis, as well as other ad hoc or emerging needs) to inform flow and operational discussions with ARG and Reclamation, and support decision-making on the LAR (through the analysis and implementation of the FMS).

The Water Forum will continue to review and advocate for the most appropriate data collection, metric tracking, analyses, and tools to inform adaptive management, thereby improving conditions in the river and supporting the coequal objectives. Building relationships and acquiring data that meets Best Available Science criteria from other entities to assist with science, monitoring, and decision support activities (such as Folsom temperature profiles or CDFW carcass surveys) allows the Water Forum to leverage operating and grant funding to produce actionable information, act as a liaison between interested party and state and federal managing agencies, and support decision-making and understanding of corridor resources and conditions at public venues such as the ARG and Lower American River Task Force (LARTF), and inform regional planning efforts and regulatory processes such as the Reconsultation on the Long Term Operations of the CVP, and the Healthy Rivers and Landscapes Program (HR&LP).

2. Monitor program and project activities according to appropriate scientific standards and intervals to continue informing adaptive management.

The Water Forum's various programs and associated project work will continue to meet the highest standards for scientific data collection, tracking, analysis, and reporting. Standardized, peer-reviewed information and protocols will be utilized and incorporated where applicable. ARFO and ARCH work on the river and within the watershed will continue to be monitored and documented, with the aim of collecting actionable data to inform adaptive management, metrics reporting, and decision support. The Water Forum frequently develops specific information for ongoing work on the LAR, particularly when other information is not available or supplied by other entities, and this will continue for project-specific actions. A description of the Water Forum's current integration into broader regional and statewide adaptive management strategies, which include peer review, is provided below.

3. Communicate effectively regarding project outcomes, public data, and information access associated with Water Forum programs.

The Water Forum conducts a substantial amount of project monitoring and special studies, developing information that supports planning and decision-making in the region, from technical memoranda to peer-reviewed publications. Sharing well-organized information through open data initiatives and clearinghouses, as well as the Water Forum website, conferences, and special events, will support the Water Forum's reputation for producing reliable, credible, and rigorous technical information that can be shared publicly.

Providing easily accessible and interactive information related to the Water Forum's work for its members, the public, and educational programs is a key focus of this guiding principle. A detailed description of the role of website updates, data visualization, and a timeline for information sharing and updates associated with this principle can be found in the Metrics and Reporting section.

Program Elements

1. External Processes and Constraints That Directly Inform WF2050 Program Areas

External entities and processes influence the work of the Water Forum, particularly for the activities of the ARCH and ARFO Program Areas. The Water Forum's nexus with the oversight, reporting, guidance, and restrictions associated with various ARFO and ARCH-related regulatory processes and groups is detailed below.

Additionally, grant-funded efforts for any Water Forum Program would include actions and schedules that are informed and constrained by funding agency priorities and cost-benefit criteria, approved grant scopes, and outside science and review processes that prohibit flexibility for changes in scope or priorities prior to or during the grant term.

EXTERNAL SCIENTIFIC AND PLANNING OVERSIGHT FOR ARFO and ARCH PROGRAMS

ARCH - Central Valley Program Improvement Act, Science Integration Team (CVPIA SIT): **Structured Decision-making and Near-Term Restoration Strategy Guidance and Requirements:** Reclamation and USFWS established the Science Integration Team (SIT) to use the Structured Decision Making (SDM) process as a science-based framework to identify priorities for Chinook salmon, steelhead, and green and white sturgeon. Water Forum staff and technical consultants participate in the SIT and provide information that supports an understanding of LAR habitat and science efforts and operations, to inform decision-support through continued evolution of the SIT SDM based on best available science and lessons learned. Water Forum staff oversees planning and monitoring of habitat measures and special studies associated with CVPIA grant funds.

ARFO and ARCH - HR&LP: Planning, Design Review, Monitoring, Science Plan Oversight, and Habitat and Flow Accounting Processes: The HR&LP process includes several required venues and processes that are being put in place to ensure best available science is used to plan, implement, evaluate function, and monitor effectiveness of habitat constructed to fulfill Voluntary Agreement (VA) commitments, and test VA Science plan hypotheses. Flow and habitat measures must meet strict criteria regarding timing, suitability, and effectiveness for entities to receive "credit" for the actions. All habitat actions must also go through a third-party design review process prior to implementation and a review of As-Built Conditions. These processes represent a "feedback loop" to strive for best outcomes where best available scientific information is vetted and informed by the HR&LP process, and information developed by tributaries in the process of this work feeds back into the process. Water Forum staff sit on the HR&LP Science Committee and are heavily involved in Science Committee efforts associated with multi-tributary coordination, design review, habitat accounting, tributary monitoring, and reporting/tracking, as well as overseeing planning, implementation, and monitoring of habitat measures associated with HR&LP commitments, and ARFO activities associated with HR&LP flow commitments and accounting are occurring in close coordination with RWA staff as the American River regional representative organization under the HR&LP process.

2. Support, Evaluate, and Integrate with Appropriate Scientific Partnerships and Efforts

The need to build and maintain data-sharing channels and supportive relationships on the American River Parkway and within the watershed requires the Water Forum to carefully consider data collection and analysis activities in relation to the mandated roles and needs of other agencies. The extent to which the Water Forum relies on other entities to conduct science activities effectively supports or constrains progress towards its coequal objectives.

The Water Forum will assess the level of commitment to and investment in science-related activities that support decision-making, including an evaluation of how the Water Forum's efforts and roles compare to those of other entities conducting data collection or science activities on the LAR (e.g., Regional Parks NRMP, ARPF, CDFW, etc.). Additionally, it will be important to consider how current Water Forum efforts compare to other regional and partner efforts, the

usability and value of existing monitoring and data analyses, including its application to State and Federal agency decision-making, future use of peer-review or science advisory panels, level of certainty of future funding, nexus with upcoming programs and efforts, and consider the need for a long-term, robust monitoring framework/program, decision support, and data management within the context of climate change on the LAR.

Due to various agency mandates such as those related to operations, river and fishery management, water supply, and groundwater planning, etc., for certain information, the Water Forum is often dependent on the actions of other agencies to collect the scientifically defensible data needed for decision-making. Data collected and used to monitor progress toward coequal objectives and guiding principles are described in the next section.

3. Metrics and Reporting

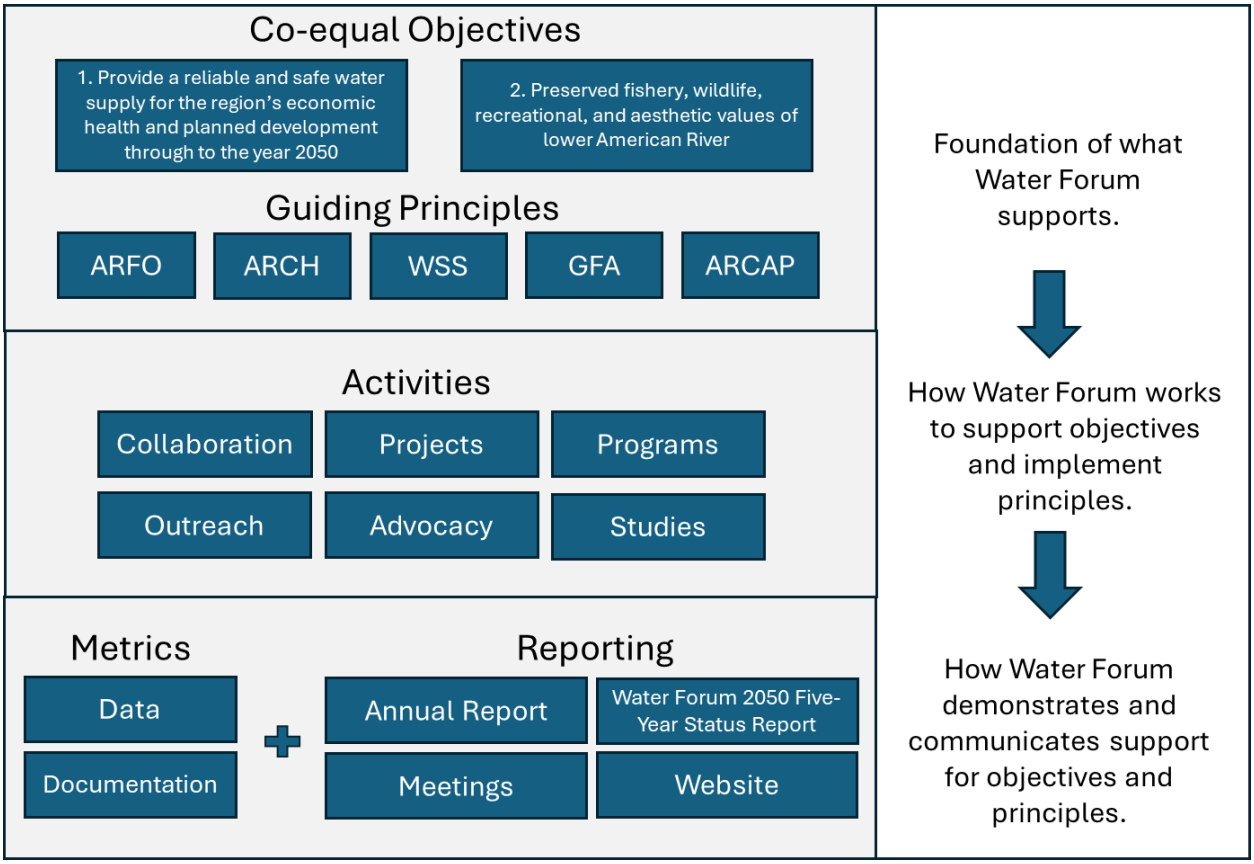

The metrics and reporting program element identifies appropriate information, data and metrics related to the work of the Water Forum, and details how the Water Forum will track and communicate progress on efforts that support the coequal objectives and encompasses a range of activities covered under the ARCH, ARFO, WSS, GFA, and ARCAP guiding principles. This section provides the foundation and framework for ongoing analysis and synthesis to support monitoring and reporting for Water Forum's activities and the success of WF2050.

Metrics will be utilized to track and provide transparency in reporting progress toward both coequal objectives and the agreement's guiding principles. Metrics will leverage existing publicly available data, as well as information collected from programs, projects, studies, and outreach initiatives led and supported by the Water Forum.

Regular tracking and reporting by the Water Forum will provide an opportunity to share information about the value of the Water Forum's presence and the organization's role in the region. Monitoring informs adaptive management and decision-making, while reporting enhances the general understanding of water supply sustainability and river health, and helps build trust with interested parties.

Figure 5 provides an overview of the relationship between the coequal objectives, guiding principles, metrics, and reporting. The coequal objectives and the guiding principles of the agreement establish the foundation of what the Water Forum supports and pursues. Activities that span from collaboration to specific projects, as well as outreach and engagement, support how the Water Forum works to achieve its objectives and implement these principles.

Figure 5. Coequal Objectives and Guiding Principles Relationships with Activities, Metrics, and Reporting

Types of Metrics

There are two types of metrics that are intended to be used in tracking the implementation of the agreement's guiding principles: data-driven metrics and documentation metrics. In addition to these types of metrics, there is contextual data that is informative regarding the status of the coequal objectives but is not necessarily indicative of the success of the Water Forum. A description of the metrics is provided below, and a summary table of the metrics used in the Water Forum metrics and reporting program element, along with their respective categories and relevant program areas, is included in Appendix 9.

Data-Driven Metrics: Data-driven metrics encompass quantitative information derived from analyses of habitat availability (e.g., percentage of exceedance flows), river temperatures, changes in groundwater sustainable yield, and trends in hydrologic conditions. Data-driven metrics can also include quantifiable values related to funding, the number of individuals reached or engaged, and the number of participating organizations. Several categories help differentiate the focus of data-driven metrics. These categories include:

- Water Quality (temperature, dissolved oxygen, etc.)

- Habitat
- Storage
- Funding
- Water Supply
- Other

The Other category is used to capture data-driven metrics that do not cleanly fit into a defined category, supporting flexibility in updates made to metrics over time as new information becomes available. A summary of these data-driven metrics is provided in Appendix 9.

Documentation Metrics: Documentation metrics are typically more qualitative and descriptive in nature. Several categories help differentiate the focus of documentation-driven metrics. These categories include:

- Accountability
- Benefits
- Partnership
- Process & Structure

Metrics that provide documentation of accountability are typically related to commitments to specific actions, documenting outcomes from meetings and briefings, and efforts to provide clear communication and consistent messaging. Efforts to enhance transparency and clearly communicate roles and responsibilities are also grouped under the category of accountability. The benefits category is related to metrics that document opportunities, improvements, and evaluations of impacts or beneficial results. Partnership metrics document and describe collaborative meetings and engagement sessions as well as partnership opportunities. Process and structure metrics document specific processes and organizational or procedural structures. A summary of these documentation metrics is provided in Appendix 9.

Contextual Data and Information: It is important to note that there are other data and information that represent contextual information related to the status or viability of the coequal objectives that are important for tracking and monitoring changes in conditions, understanding long-term trends, or normalizing Water Forum-collected data and analyses, such as: ambient air temperature, snow accumulation, salmon carcass surveys, Delta conditions, salmonid population and growth studies, upstream reservoir storage, and others. However, while these metrics are informative as to the viability of the coequal objectives, they are not necessarily indicative of the effectiveness of the Water Forum's efforts. Relevant contextual data and information will be tracked within the Metrics and Reporting program element as is viable and informative for guiding Water Forum priorities. Data synthesized and communicated in this category will evolve over time based on the direction of the Plenary with the goal of providing a consistent basis of understanding on the conditions and trends related to the coequal objectives.

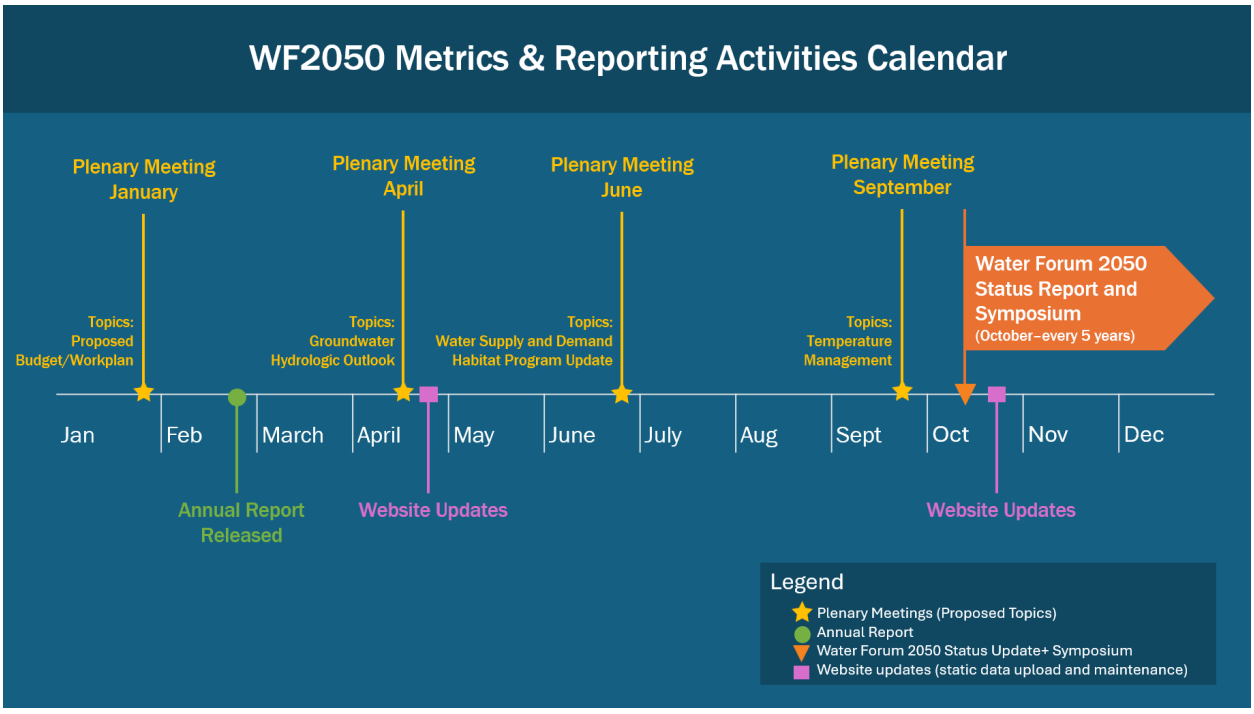

Metrics Reporting and Timeline

Several reporting mechanisms will be used to document and communicate progress on supporting the coequal objectives and WF2050 guiding principles. The reporting mechanisms are listed and described below. Additionally, the metrics identified for inclusion in each respective reporting mechanism are detailed in Appendix 9.

- Annual Report
- Water Forum 2050 Five-Year Status Report and Quinquennial Symposium
- Plenary and Caucus meetings (regularly recurring meetings)
- Water Forum website and Conditions/Data Dashboard
- Project-specific reporting (as needed)

The reporting mechanisms listed above will be relied upon throughout the year and follow a general timeline (Figure 6). To enhance member engagement and more effectively communicate relevant information, an annual sequence is proposed that is closely tied to the availability of pertinent data and/or information, as well as relevant partner processes, key decision points, and actions throughout the year. Please note that project reporting will occur according to the individual project schedule.

Figure 6. Metrics and Reporting Timeline

Annual Report

Each year, the Water Forum will update and provide an Annual Report that describes the Water Forum's priorities, updates, and progress on Water Forum internal operations and

implementation of the WF2050's guiding principles. Content will include updates and a reflection on the past year based on data-driven metrics, including funding, habitat, river temperature, storage, water supply, etc., as well as documentation metrics for communicating accountability efforts and realized benefits. This report will be released annually in the first quarter and will reflect the activities and progress made by the Water Forum during the previous year. This report may include specific, agreed-upon reporting metrics to document a summary of progress made on ARCAP.

Five-Year Status Report

The Water Forum commits to developing a Water Forum 2050 Five-Year Status Report that will synthesize information related to the status of efforts supporting the coequal objectives and implementation of the guiding principles. The report will describe the progress made regarding the impact of program activities on a sustainable and reliable water supply, as well as their contribution to corridor health. The report will also describe the progress made through metrics that support accountability and document updates to processes and structures. Reporting may also consider and include information solicited from other agencies and entities, where applicable, appropriate, and where best available science considerations can be met[33]. This report will provide a valuable opportunity to reflect on trends that are more easily interpreted at a time step greater than one year. This report may include specific, agreed-upon reporting metrics to document a summary of progress made on the ARCAP Guiding Principles.

The Water Forum 2050 Five-Year Status Report will be utilized internally to evaluate progress of the Water Forum's work, but will also be compiled in a format that is easily shareable with and relevant to other interested parties and a wider public audience. The Five-Year Status Report will: (1) comprehensively review progress towards meeting the coequal objectives and guiding principles; (2) highlight climate change impacts or other factors that may be impacting the work of the Water Forum, and (3) suggest any needed revisions or changes to WF2050 priorities and activities, or the annual work plan to address changing conditions. The Five-Year Status Report will be developed in coordination with the members and reviewed and confirmed by the Coordinating Committee. Upon completion, this report will be presented at a Plenary meeting for final approval before being shared publicly.

When developing the report, Water Forum staff will strive to use language, graphics, and learning and engagement sessions that make both the data and any associated ramifications accessible

[33] Although leveraging information from other agencies is advantageous, consideration should be given to using best available science and understanding the limitations associated with reliance on data collected by entities outside the Water Forum, that may have funding/staff limitations and differing management mandates that can affect data quality, format, useability, timeliness, availability, and scientific defensibility.

to an intended audience (Water Forum members and others) with varying degrees of expertise in the different topic areas.

Quinquennial Symposium

Every five years, and following shortly after the release of the Water Forum 2050 Five-Year Status Report, a Water Forum 2050 Quinquennial Symposium will be held to highlight how the work of the Water Forum supports improved water supply reliability, habitat and science, and operational decision-support needs for the LAR, and tracks metrics and adaptively manages activities in service of the coequal objectives. This symposium is meant to foster resource understanding among members and the public and offers an opportunity for strengthening partnerships within the region.

Having the symposium occur on an interval that matches the Water Forum 2050 Five-Year Status Report provides an opportunity to offer an interactive and collaborative opportunity to discuss broader trends identified in the Five-Year Status Report and participate in visioning and development of ideas for adaptive management and next steps to address issues that are directly actionable by the Water Forum (programs/projects/funding) or indirectly actionable through advocacy and new or continued partnerships. Water Forum members will be actively engaged in the development and implementation of the Symposium.

Plenary Meetings

Plenary meetings are conducted on a quarterly basis and are focused on key areas of the Water Forum's activities. Under the proposed schedule, during the first quarter, Plenary meetings will focus on the proposed Annual Budget and Work Plan, as well as the previous year's Annual Report. In the second quarter, these meetings will focus on groundwater and the hydrologic outlook. In the third quarter, the focus shifts to water supply and demand, along with an update on the ARCH Program. The fourth quarter will discuss annual temperature management on the LAR. It is intended that the Plenary meetings will also provide an opportunity to highlight the efforts of Water Forum member organizations and/or invite partners to share relevant information on projects or programs that provide mutual benefits toward the coequal objectives and guiding principles, as well as other topic areas as needed.

Caucus Meetings

Caucus meetings are held monthly, or as beneficial for the respective caucus. These meetings provide a venue to discuss areas of interest related to the Water Forum's work for the respective caucuses: Business, Environmental, Public, and Water. The metrics topics discussed in these meetings will align with and be prepared for in advance of the quarterly Plenary meetings.

Water Forum Website

The Water Forum website will be updated biannually and as needed to provide information synthesized by the Water Forum and illustrating its relevance to the coequal objectives (e.g., regional demand data, information from regional GSPs, REDD and snorkel surveys, peer-reviewed publications, and project-specific reports). Website information will be presented in a manner that is useful, timely, and accessible to those with and without in-depth knowledge of the system and the Water Forum's coequal objectives.

Real-Time Conditions and Data Visualization Dashboard

As funding becomes available, a robust data and information visualization dashboard will be developed and maintained, focused on Water Forum program areas, results, and synthesis of information, in line with Principle 3 of the Science, Monitoring, and Decision-support Program Area.

Leveraging new technologies and emerging platforms for sharing data (such as an interactive conditions and data visualization dashboard, Shiny apps, etc.) where the Water Forum's work may be showcased and where members, the public, and partner agencies may access data, visualize status and trends, and interactively synthesize and interpret information is a focus area for future reporting efforts. As part of this reporting mechanism, there is a commitment to improve, expand, and maintain an online dashboard that provides real-time updates on key indicators and benchmarks of water supply and river health to help inform flow and operation decisions and share the results of the work of the Water Forum in an easily accessible, interactive way for all users.

The dashboard will, as much as practicable, draw on existing data and ongoing data collection mechanisms associated with Water Forum programs, and will include linkages that are updated continuously to reflect real-time conditions from partner entities (such as CDEC), as possible, and other indicators like river flows, Folsom Reservoir storage, and water temperature; as well as habitat conditions or likelihood of presence/absence of salmonids based on lifecycle. Additionally, the data dashboard will also synthesize physical, biological, hydrologic, and spatial data gleaned from past Water Forum project and program efforts and will allow the user to interact with and visualize river science information, hydrologic data, regional water supplies and demands, and other program data and trends, and will act as an online repository for Water Forum's relevant technical studies, monitoring reports, peer-reviewed publications, and data that has undergone quality assurance/quality control. The dashboard would also link to existing and emerging open data platforms where LAR fisheries and physical data are housed and available for the broader scientific community to utilize. The data dashboard will incorporate information for metrics as described earlier in this section and summarized in Appendix 9.

Project-specific Reporting

Reporting of project progress and outcomes will be conducted according to the project-specific schedule. Metrics included in this reporting are anticipated to include funding data-driven metrics, as well as documentation of accountability efforts, project benefits, and processes and structures.

Revisiting Metrics and Adaptive Management Needs

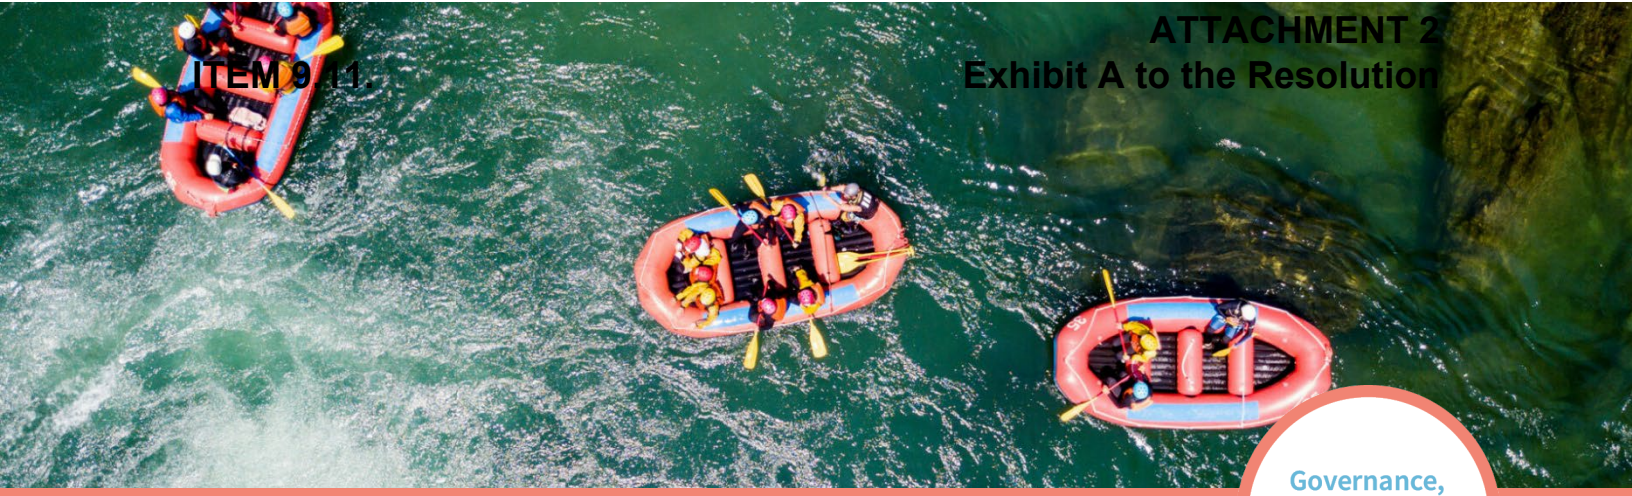

Metrics inform our understanding of the status of the coequal objectives and where future resources may be best directed as conditions change over time. Reporting focuses on the status and trends associated with metrics specific to the coequal objectives and Guiding Principles. This information can be used to identify changed conditions and decision points at which the Water Forum may need to shift its focus or adaptively manage its activities to anticipate and respond more effectively to these changes. Updates to Water Forum activities will be documented in the form of Adaptive Management Actions that will be recommended in the Water Forum 2050 Five-Year Status Report and discussed at the Water Forum 2050 Quinquennial Symposium.

Anticipated changes can also be influenced by concurrent planning efforts and partner projects and programs, which support the need for continued collaboration as Water Forum metrics are revisited and updated over time. Current (at the time of signing) planning processes relevant to the Water Forum's work that should be considered in tandem with updates to the Water Forum metrics and reporting process include (but are not limited to):

- GSP updates
- UWMP updates
- Reconsultation/LTO
- HR&LP implementation
- CVPIA SIT Near-Term Restoration Strategy updates
- Regional Parks Natural Resource Management Plan and Monitoring Plan efforts

Caveats and Assurances

1. *The level of effort and the scope of Science, Monitoring and Decision Support Program activities will be informed by emerging data needs, and science activities mandated by regional and/or statewide programs that may arise during the WF2050 term (i.e., the Statewide HR&LP Science Plan habitat accounting process, changing hydrology, new water supply regulations, etc.), and other emerging funding sources and requirements, as applicable.*

Governance, Funding & Administration

Program Area 5: Governance, Funding, and Administration

The Water Forum commits to sustaining robust Governance, Funding, and Administration (GFA) for the organization, in service of its coequal objectives.

The structure of the organization builds on the success of the existing Water Forum and is designed to support the programs throughout the 25-year term of WF2050.

Guiding Principles

Guiding Principles are grouped into the following categories:

- General
- Governance
- Funding
- Administration

These guiding principles are crucial to maintaining the long-term integrity and efficacy of the Water Forum as an interest-based organization. These principles serve as both a touchstone to guide our work and a scorecard to measure the extent to which an evolving governance approach is consistent with and likely to further these principles. Collectively, these principles work to instill confidence, both internally and externally, in Water Forum direction, decisions, and actions. Water Forum members (also referred to as signatories or member organizations) support and actively practice the principles outlined below.

General Guiding Principles

1. Commitment to The Water Forum Way

The Water Forum Way is an explicit set of mutual obligations that has guided Water Forum members' engagement with one another since its inception. Members demonstrate adherence to the Water Forum Way through the following practices:

- Mutual gains approach and collaborative effort to seek consensus and build trust;

- Participating with an open-minded, respectful, and interest-based approach to all discussions;
- Working through challenges, search for and find balance across the Water Forum's coequal objectives;
- Understanding Water Forum processes and interested parties;
- Surfacing and seeking to understand and accommodate differences and interests among Water Forum members; and
- Working with diverse groups to enable voices to be heard and to have an opportunity to have a seat at the table.
- Demonstrating a commitment to becoming informed on the topics fundamental to engaging in effective Water Forum discussions.

All members of the Water Forum, as well as staff and consultants, commit to adhering to the Water Forum Way and hold one another accountable for reinforcing this practice.

2. Commitment to Bridging Differences in Perspectives, Experiences, and Resources

Natural resource management and policy can be a place of conflicting and competing interests and resources, both within and across regions. An effective Water Forum governance creates a platform for diverse Sacramento-region participants to have the hard conversations necessary to build consensus for the needed actions within the region and to advocate for its interests with others elsewhere. Water Forum members recognize that effective governance is grounded in a process that holds at its core the following:

- Inclusive and active participation
- Governing processes that address potential inequities to achieve a more level playing field and hear all members' perspectives
- Encourage novel thinking to address the coequal objectives
- Mechanisms that foster timely decision-making (e.g., avoid gridlock or handing any one-party veto power, etc.)
- A "no surprises" policy that puts a premium on member candor and full disclosure on Water Forum-related issues
- Builds and tests for broad buy-in for any agreed-upon actions and decisions

3. Commitment to Open, Transparent Public Processes

The Water Forum is committed to acting in a manner that improves and strengthens public trust. Water Forum members believe that as public agencies and representatives of diverse interests, it is imperative that our actions are open and transparent, and that we work diligently to maintain accountability and build trust in our work.

4. Commitment to Understanding How the Work of the Water Forum Impacts Our Region's Diverse Communities

Consistent with these principles, Water Forum members are committed to a governance approach that incorporates effective and credible mechanisms to understand and consider how the diversity of perspectives and communities in our region intersects with the Water Forum's work and priorities. We recognize that we "don't know what we don't know," and strive to create a structure that fosters shared learning. To that end, the Water Forum embraces a governance structure and culture that fosters the following:

- Each caucus strives to bring diverse and traditionally underrepresented voices into its caucus and discussions.
- Discussions and learning sessions that help Water Forum members understand how their pursuit of the coequal objectives may have the potential to impact positively or negatively, the full range of individuals and communities within our region, and especially those who may have a nexus with historic and current inequities
- Identify and, as practicable, address barriers to full participation by communities and parties that Water Forum activities may impact. Consider forming partnerships with community groups to increase engagement among underrepresented groups and ensure their interests are represented in Water Forum deliberations.
- Learn from one another and share effective techniques to strengthen outreach and inclusion of communities and people traditionally on the periphery of Water Forum-related discussions. Look to state resources to support these efforts and consult with diverse constituencies to advise on best practices.

The final Governance Program Element, Community Outreach and Engagement, addresses more specific strategies for considering how aspects of the Water Forum may intersect and impact diverse communities and constituencies.

5. Principles Require Practice

The Water Forum regularly applies the principles of our work through tools such as establishing meeting ground rules, addressing gaps in representation, and promoting transparency through disclosures. Consistent with these principles, Water Forum members are committed to a governance approach that builds on effective and credible mechanisms to understand and consider how our region's diversity of perspectives and communities intersect with the Water Forum's work and priorities.

GOVERNANCE

Governance Guiding Principles

1. Governance Scaled to Meet the Mission

The Water Forum's governance structures (including budget, staffing, programs and representation) are appropriately scaled to the Water Forum's mission and related tasks (as defined by the coequal objectives); while balancing the need for robust and inclusive learning, discussion, and decision-making with the reality of member resource and capacity constraints.

2. Governance Avoids Duplication of Efforts

Water Forum governance is structured to complement, not replicate, efforts undertaken elsewhere (within and outside the region) that have the potential to further (or impact) its coequal objectives.

3. Governance Supports Learning and Community Engagement

Given its commitment to building a broad coalition for advancing its coequal objectives, the Water Forum will ensure that its governance structure includes ongoing and effective mechanisms and opportunities to learn from one another and to educate and learn from external community groups that may be potentially impacted by Water Forum actions.

4. Clear Roles and Responsibilities for All Facets of the Water Forum

An effective governance structure clearly articulates roles and responsibilities for all facets of the Water Forum, including members, staff, and consultants, as well as written charters for any established committees that describe their purpose, scope, participation, leadership roles, and decision-making protocols. It also incorporates a clear process to identify and learn about recruitment, which improves representation and onboarding and mentoring of new members, as well as ensures that current members understand the updated governance structure.

5. Effective Leadership Fosters Productive Dialogue and Consensus Building

The Water Forum is an organization that relies on the participation of individual member organizations in the Plenary and in interest-based caucuses. This governance structure relies on the active participation of its members and leadership to foster trust within and across caucuses, as well as between and among Water Forum members, staff, and consultants. Any leadership for caucuses or committees is intended to facilitate representative, effective, and efficient communication, not replace the Water Forum's consensus-based decision-making structure.

Governance Program Elements

Governance Program Elements are grouped into the following categories:

- Governance Structure
- Roles and Responsibilities

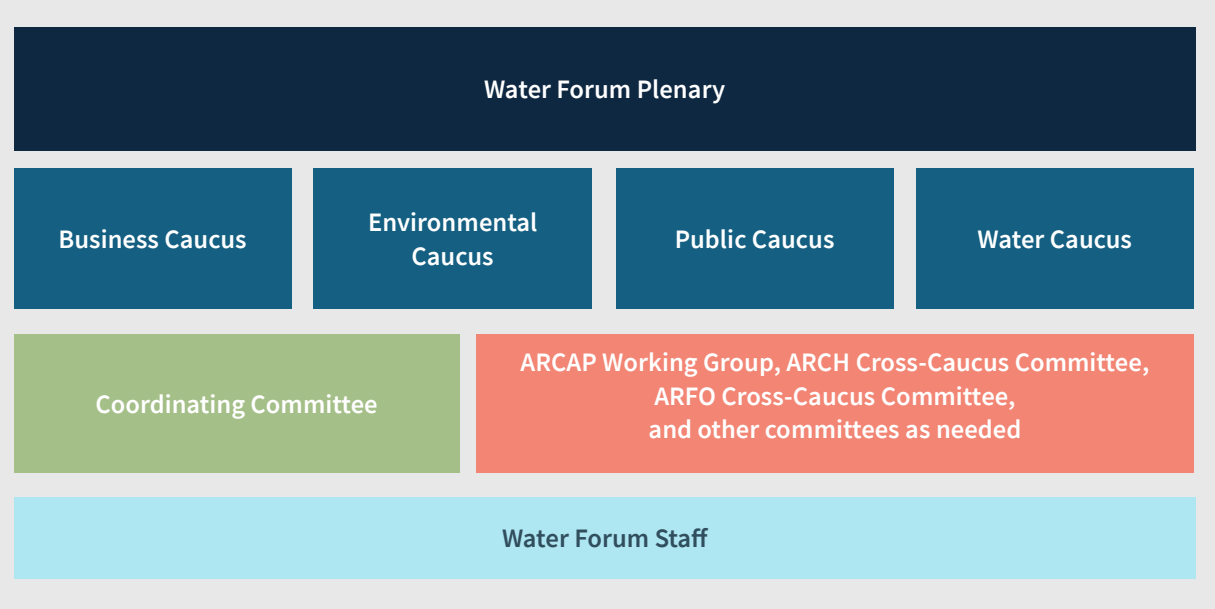

- Water Forum Standing Committees and Working Groups
- Decision-Making
- Representing the Water Forum Externally
- Implementation Partners
- Community Outreach and Engagement

Program Elements–Governance Structure

1. Governance Structure

The Water Forum is a collaborative organization that strives to bring together diverse interests in the Sacramento region and American River watershed to create innovative solutions and, when needed, resolve conflicts to help achieve the coequal objectives. Figure 7 is an illustration of the Water Forum's governance structure, outlining the organization's members, various bodies, and the roles and responsibilities of participants.

Figure 7. Water Forum Governance Structure

2. Water Forum Signatories

WF2050 is a voluntary agreement that organizations signed to carry out actions in support of the coequal objectives. The signatories to WF2050 acknowledge that by signing, they commit to support, advocate for, and carry out all actions specified for them in WF2050, and any related Purveyor Specific Agreements (PSAs), the Interagency Agreement for the Administration and Management of the Water Forum, or any other implementing agreements, subject to the relevant caveats and assurances. All signatories to WF2050 have equal standing in the Water Forum.

3. Membership

All signatory organizations are considered members of the Water Forum. Participation as a member is expected of entities that sign WF2050, including business, agricultural, and environmental organizations, community groups, water purveyors, and local governments. The Water Forum will continue the interest-based Water Forum Way process used successfully in developing and implementing the previous WFA.

Therefore, all Water Forum participants, acting as representatives of their signatory organizations, have the following general responsibilities:

- Commitment to the discipline of interest-based problem solving
- Willingness to invest time and resources to carry out WF2050 responsibilities
- Willingness to work collaboratively with others
- Commitment to an inclusive, fair, and transparent decision-making process
- Commitment to integrating diversity, equity, inclusion, justice, and accessibility considerations as part of Water Forum activities and deliberations

Because the effectiveness of the Water Forum will depend upon cooperation and collaboration among all participants, members will observe the following ground rules:

- Listen carefully and openly discuss issues with others who hold different opinions
- View a disagreement as a problem to be solved, not a battle to be won
- Avoid stereotyping and personal attacks on any other representative
- Avoid questioning or impugning the motivations or intentions of any other representative
- Respect the integrity and values of other representatives
- Honor commitments once made

Each Water Forum signatory organization may have multiple representatives participating in the Water Forum, but may designate only one signatory representative (and an alternate) to participate in formal decision-making actions (see Program Element – Decision Making, below). Signatory organizations are also encouraged to name an alternate to fill in when the designated signatory representative is unavailable. Each signatory will inform the Executive Director in writing of their signatory representative and alternate.

4. Process for Adding New Members

The Water Forum will utilize the steps below to consider requests from organizations seeking to become new members of the Water Forum once WF2050 is adopted and being implemented. New members can be considered at any time.

- Any potential new member contacts the Water Forum Executive Director, an existing member organization, or caucus to express their interest in becoming a signatory.
- Based on this interest, the Water Forum member or caucus can nominate the new potential member for consideration. This sponsoring member or caucus is responsible for describing the new member organization. The description outlines how and why the proposed member is aligned with and supports the Water Forum's coequal objectives, member participation commitments, and responsibilities. The description is distributed to other signatories for their review and consideration.
- If any existing member(s) raises concerns about the proposed new member, the Executive Director – consistent with the Water Forum Way – will bring those members together with the new proposed member to discuss and attempt to resolve any existing conflict prior to their becoming a new member or identify a pathway to address the concerns constructively through future discussions.
- The new-member sponsor collaborates with the Executive Director to add the item to the agenda of a subsequent Plenary meeting, where the prospective member is present. After a discussion, the Plenary votes to accept the new member organization. If the decision to accept the new member organization is not unanimous, the decision-making process (outlined in Program Area 5: Governance, Funding, and Administration) is used to arrive at a final determination.
- Once approved, the new member organization signs WF2050, and their designee joins the appropriate caucus.

If the Water Forum is updating WF2050, prospective member organizations can join the appropriate caucus to participate in discussions related to the update. The prospective member organization would only formally join the Water Forum once the new WF2050 is put forward for adoption, and they opt to sign on as a signatory.

5. Process for Onboarding New Members

When a new organization joins the Water Forum or a new representative of an existing member organization joins the Plenary, the Executive Director shall implement the Water Forum Mentoring Program. This Program immediately pairs up the new representative(s) with one or more caucus representatives (Caucus Mentors). When possible, Caucus Mentors will have at least four years of experience with the Water Forum. The Executive Director will provide briefings regarding WF2050 and the full range of Water Forum programs, expected time commitments for members, and related issues to ensure new members are prepared to engage effectively. The Caucus Mentors will provide additional information and insight regarding caucus operations and interests. Caucus Mentors will also assist the Executive Director in introducing the new member to other Water Forum members outside of their caucus and join the new members at Plenary

sessions. Caucus Mentors will actively mentor new members for the first year of their involvement as a Water Forum member.

6. Process for Handling Consolidations Among Existing Members

In the event that two or more distinct signatory organizations already in the Water Forum merge into a single entity, the new entity will inform the Water Forum Executive Director of this change, and it will be considered a single signatory entity within the Water Forum. The new entity will identify its designated representative and alternate.

7. Process for Exiting Current Members

When a signatory organization voluntarily leaves the Water Forum, the Executive Director will request an exit interview with the exiting member to understand their reasons for leaving and share those insights, as appropriate, with the Coordinating Committee, caucuses, and the Plenary.

If a member organization is not meeting its stated commitments or its representative(s) are consistently failing to abide by Water Forum participation principles, the issue will first be discussed within the respective caucus. If the issue is not successfully resolved through caucus discussions, a caucus may refer the issue to the Executive Director, who will work with the member and the Coordinating Committee to successfully resolve any concerns to the satisfaction of each caucus. If necessary, the issue will be referred to the Plenary for further action, up to and including removal, in accordance with the decision-making process outlined in the Process for Renegotiation or Amendment Requests (see Administration Program Elements).

Program Elements–Roles and Responsibilities

8. Water Forum Plenary

Purpose: The Water Forum Plenary (Plenary) is the main decision-making and information-sharing body for the Water Forum and sets policy direction for staff. The Plenary approves the annual Water Forum budget, business plan, and Water Forum program directions consistent with the Water Forum Agreement. The Plenary approves the charters of all formed Standing Committees and Technical Advisory Groups. Changes to WF2050 are within the purview of the Plenary unless the Plenary decides they need to be referred to signatory members' boards for formal confirmation (see section on Changed Conditions and Amendments in Administration Program Elements).

Composition: The Plenary consists of representatives from the signatory organizations, and each signatory has equal standing in the decision-making process.

The Water Forum recognizes the benefits of the Plenary as a venue for facilitating information-sharing, coordination, and collaboration across a wide range of audiences. To that end, Plenary meetings are considered open forums for both members and non-members. There may be times, based on issues under discussion or particular situations (e.g., litigation or ongoing

negotiations), where it is appropriate to limit Plenary meeting participation to signatories only. Such a decision will be made by the Executive Director, in consultation with the Coordinating Committee.

Roles and Responsibilities: Roles and Responsibilities of signatory representatives include engaging in Plenary meetings consistent with the principles stated above.

Disclosures: The Water Forum has a long-standing practice of setting aside time in each meeting (e.g., Plenary, caucus, other) for disclosures. Representatives are encouraged to disclose information about their organization's activities related to the coequal objectives that may be of interest to other participating organizations. These disclosures, typically made verbally at the start of Water Forum Plenary or committee meetings, are intended to keep one another apprised of upcoming communications, actions, testimony at hearings, etc. that may be related to or impact Water Forum activities and/or coequal objectives. For time-sensitive issues, members are encouraged to share disclosures in a timely fashion (e.g., by email or phone to the Executive Director and/or members, as appropriate) rather than waiting for the next available Water Forum meeting. The intent of disclosures is to support a "no surprises" policy among signatories, thereby enhancing collaboration, coordination, and trust among Water Forum members.

Schedule: Plenary meetings are expected to be held quarterly throughout the year; exact meeting times will be scheduled sufficiently in advance to facilitate participation by Water Forum members. The Executive Director, the Coordinating Committee, or a Plenary member may propose changes to the Plenary meeting schedule. The decision to change the meeting schedule shall be made by the Executive Director in consultation with the Coordinating Committee. Plenary meetings are open and inclusive, with updates provided by Water Forum staff on projects and programs being implemented to meet the coequal objectives.

Plenary decision-making processes are discussed in the Decision-Making Program Elements. The process for Renegotiation or Amendment Requests can be found in the Administration Program Elements.

9. Water Forum Caucuses

Purpose: The Water Forum has four caucuses – Business, Environmental, Public, and Water – each of which coalesces diverse interests in the region with a common interest and drive to work collaboratively to further the coequal objectives. The purpose of each caucus is to provide a venue that primarily facilitates information sharing and discussion of issues of interest to the caucus, in an open and collegial framework that seeks to find alignment among the participating entities and enhance consensus opinion.

The Public, Business, Environmental, and Water Caucus members have each documented a specific Caucus Interest Statement that serves as a foundation for each caucus's discussions and work in the WF2050 negotiation, in service of the co-equal objectives. The Caucus Interest Statement is used to explain the Caucus's values and goals for recruiting or orienting new

members, as well as working with the other caucuses. The four Caucus Interest Statements are posted on the Water Forum website and are available for review by Water Forum members and the public. The Caucus Interest Statements can be updated or amended with agreement from caucus members. While caucuses make decisions related to their internal functions (e.g., naming representatives to committees, designating any internal caucus leadership, etc.), caucuses are not decision-making bodies related to Water Forum decisions unless the Plenary is unable to reach consensus (as described in the Decision-Making Section).

Composition: The Water Forum is structured into four caucuses, each centered around one of four main interest groups with a stake in the coequal objectives. These caucuses, described below, are tasked with representing the breadth of interests within their caucus, either through direct participation of entities within the caucus or through effective outreach to affected parties affiliated with their caucus. Each caucus is committed to the Water Forum's coequal objectives, while also contributing a distinct and broader focus through their participation.

- Business Caucus – The Business Caucus includes representatives from organizations that have a strong interest in maintaining the Sacramento region's economic health, growth, and urban competitiveness through the constant supply of reliable and cost-effective water resources. Participants are motivated to support viable solutions for water conservation, a healthy American River Parkway, and conjunctive use of groundwater to / augment supplies and prevent unnecessary constraints on growth.
- Environmental Caucus – The Environmental Caucus comprises organizations with a strong interest in protecting regional surface and groundwater Public Trust resources for all beneficial uses and users. The Environmental Caucus advocates for public access to pristine park and recreation spaces, programs that lead to the efficient use of water resources, water-related climate adaptation actions, SMART growth within the Urban Services Boundary, and thriving conditions in and along the LAR and its tributaries for all aquatic and terrestrial species that utilize and live near the river, including water temperature, flows, and dissolved Oxygen levels necessary for the healthy lifecycle of Chinook Salmon, Steelhead Trout, and other sensitive aquatic species in the LAR.
- Public Caucus – The Public Caucus comprises organizations that represent current and long-term public interests in water availability and affordability, as well as public access to the LAR and Parkway, and communities that are underserved or underrepresented in current civic engagement. The Public Caucus comprises nonprofits, community organizations, land-use authorities, and general government entities. Within the context of the coequal objectives, the Public Caucus promotes the following:
    - Redress inequities that result in uneven representation and participation in civic processes; the Public Caucus endeavors to fully represent the communities of the Sacramento region and therefore makes special efforts to ensure robust public participation processes in Water Forum work efforts.

  - Balance land planning efforts with the sustained availability of water, given the impact of climate change on water supply.
  - Implementation of water conservation, demand management, and nature-based solutions to ensure affordable water rates, preservation of the environment, and adequate water supply.

- Water Caucus – The Water Caucus comprises water purveyors serving communities in the American River watershed and region, as well as non-purveyors, including RWA, El Dorado County Water Agency, and others. The Water Caucus members' mission is to provide a reliable, safe, and long-term water supply for its customers and support for the Water Forum's coequal objectives.

New Water Forum members will work with the Executive Director and caucus leaders/points of contact to identify the relevant caucus to join based on their entity's focus and interests. (See Elements 4 and 5 under Governance above for language regarding the process for approving and onboarding new members.)

Roles and Responsibilities: Caucus meetings are designed to facilitate communication within the caucus regarding issues pertinent to the Water Forum.

Each caucus may choose to elect leaders or points of contact to assist with communication and information-gathering within and between caucuses and/or Water Forum staff. Additionally, having an individual (or individuals) selected to help the caucus clarify and sharpen its shared interests is extremely helpful and encouraged. Conversations in the caucus meetings are intended to foster brainstorming among members and generate ideas that can be shared in discussions across caucuses. Each caucus will decide how to handle confidentiality regarding caucus discussions.

Water Forum staff and consultants typically participate in caucuses to stay abreast of and contribute to caucus deliberations. Staff and consultants draw on these insights to help guide Water Forum discussions and activities, building collaboration across caucuses. In doing so, staff and consultants are asked to use their discretion in sharing information across caucuses (e.g., not assigning comments to individual members nor with enough specificity to identify the commenter), and caucuses are encouraged to indicate to staff and consultants sensitive issues that should be treated confidentially (i.e., not appropriate for sharing outside of the caucus).

Conversations among signatory representatives are encouraged, and nothing in this description is intended to limit individual Water Forum members from engaging in dialogue directly with other members.

Schedule: Caucus meetings are held monthly, or as needed (may be more or less frequent). Caucuses may request Water Forum staff/consultant support related to facilitation, technical presentations, etc.

10. Water Forum Staff

Purpose: Water Forum staff are the "glue" that hold the Water Forum together and facilitate implementation of the five Program Areas and ARCAP. To that end, they act as key points of contact with members and non-members. The Water Forum is staffed by a range of professionals with expertise in water, biology, environmental, engineering, construction, communications, and other related disciplines. More details on Water Forum staff roles in external communications can be found in the Representing the Water Forum Externally Program Element.

Composition: Water Forum Staff includes the Executive Director, and technical leads/program manager(s) for the Water Forum Program Areas, and fiscal and administrative support staff. At the time of signing, the Executive Director reports directly to the Director of the City of Sacramento Department of Utilities, while other staff report directly to the Water Forum Executive Director. These positions and roles are subject to change based on the Water Forum's focus, available funding, and ongoing discussions with the Plenary and the City of Sacramento.

- The Executive Director plays a vital role in working with member organizations, caucuses, and the Plenary to identify opportunities for collaboration and agreement-building across the various entities, as well as surfacing and resolving disagreements that may impede the pursuit of the coequal objectives. The Executive Director (in conjunction with other Water Forum staff and consultants) carries out this role through a mix of one-on-one conversations with members, arranging for small within and across-caucus discussions, and conducting ongoing outreach to other implementation partners. The Executive Director provides regular updates on issues of interest to all facets of the Water Forum (Plenary, caucuses, relevant members, Coordinating Committee, etc.).
- The River Corridor Health Program Manager is the lead in implementing a comprehensive habitat enhancement and science program for the Water Forum. These responsibilities include a range of activities, including technical oversight of design, permitting, construction/implementation, and monitoring of habitat projects; oversight of science and monitoring programs; development and execution of grant applications and funding; engagement with local, state, and federal agencies on external activities; and implementation of public outreach related to habitat projects. Additionally, the position serves as the lead on special internal and external projects to ensure consistency with the Water Forum's efforts.
- The Water Resources Senior Engineer is the lead for several core areas of the Water Forum's programs including Flows and Operations, the FMS, engagement with state and federal agencies on regulatory processes (e.g., re-consultation of the Long-Term BiOp and the SWRCB Water Quality Control Plan update/Voluntary Agreement process), Surface Water, Groundwater, and ARCAP, other elements of WF2050. The role requires a high level of technical fluency to direct analysis (e.g., temperature modeling, climate change

modeling) as well as excellent communication skills to translate findings and facilitate discussions with a diverse group of interested parties.

Program Elements—Water Forum Standing Committees and Working Groups

The Water Forum utilizes standing committees and working groups to facilitate the achievement of WF2050's program elements and annual priorities. Standing committees have a specific focus and work plan aligned with a major program area. For example, the Flows and Operations Cross-Caucus Committee, described below, focuses on critical technical and operational issues that affect the American River during the water year. Water Forum signatory member representatives who serve on committees and working groups serve as effective conduits to their respective caucuses. They provide perspectives from their respective caucuses and serve to gather input and share information back to their caucuses. Committee and working group members serve as either representatives of their respective caucuses and/or their organizations, as specified.

11. Coordinating Committee

Purpose: The Coordinating Committee provides fiscal oversight and guidance for the Water Forum staff. This includes working closely with the Executive Director on the annual budget process and recommending a proposed budget to the Water Forum Plenary for approval. In doing so, the Coordinating Committee provides input on annual priorities and work plans, consistent with the priorities of the Plenary. The Coordinating Committee also considers recommendations and suggestions from the caucuses, standing committees, and working groups for inclusion in the proposed budget and when developing recommendations for Plenary consideration. Coordinating Committee members are expected to provide guidance informed by and consistent with their respective Caucus's input.

The Coordinating Committee provides oversight and input into Water Forum strategic communications, on behalf of the Plenary. At the request of the Executive Director and any affected signatory (if relevant), the Coordinating Committee will review public information releases, Water Forum comment letters, and endorsements prior to their release. The Coordinating Committee will include in its deliberations any affected Water Forum members to get their input on any relevant communication. The Coordinating Committee, at the request of the Executive Director, will review Plenary meeting agendas, draft standing committee and working group charters, and other staff-generated documents to be provided to Plenary members or directly to the general public.

The Coordinating Committee is responsible for discussing (e.g., identifying additional information needs, etc.) and forwarding to the Plenary for its consideration any formal requests to amend WF2050. This process is further described in the Administration Program Elements.

The Coordinating Committee, in conjunction with the City of Sacramento and with input from their respective caucuses, will contribute to the hiring and evaluation of the Executive Director, similar to the role of an executive committee or board. For example, the Coordinating

Committee will contribute to an annual review. The exact format for providing input is to be determined in discussion with the City of Sacramento to ensure consistency with Human Resources policies and procedures. The Executive Director reports to the Director of the City of Sacramento Department of Utilities or their designee.

The Coordinating Committee is responsible for accepting feedback from signatories of the Water Forum. This input will help inform priorities in the Water Forum's annual work plan.

Composition: The Coordinating Committee comprises two representatives from each of the four caucuses and the Executive Director. These representatives are chosen by their respective caucuses. The format for Coordinating Committee meetings – whether open or closed to observers - will be determined by the committee members, with a preference for openness. This discretion allows representatives to discuss and consider sensitive topics as needed (e.g., legal or personnel matters), and to seek input from funders or other stakeholders on topics when appropriate.

Roles and Responsibilities: Coordinating Committee members will be responsible for sharing items that are ready for discussion beyond the Coordinating Committee with their respective caucus and for bringing the perspective of their caucus to the Coordinating Committee. Coordinating Committee agendas will be shared with all caucuses in advance to identify relevant caucus interests and if others should participate in pending/upcoming discussions, and a standing agenda item will be added to each caucus's monthly agenda to debrief the most recent Coordinating Committee meeting.

Meeting Schedule: The Coordinating Committee will meet monthly or as needed.

The Plenary will assess the effectiveness of measures to address the Coordinating Committee's transparency and accountability following the first year of implementation of this agreement.

12. Flows and Operations Cross-Caucus Committee

Purpose: The Flows and Operations Cross-Caucus Committee (Flows & Ops) enables Water Forum members to coordinate with Water Forum staff on issues related to the operations of Folsom Reservoir and implementation of the Modified FMS. Activities include dialogue to develop a recommended approach to current and forecasted reservoir operations and strategize for regional watershed and dam management advocacy. The approach will be informed by the best available and current data, including forecasts, reservoir operations, and flows on the LAR. In their meetings with Reclamation and other regulatory agencies, Water Forum staff will advocate for the position developed by the Flows & Ops Cross-Caucus representatives. Representatives are often attending primarily on behalf of their organizations, but will indicate when they are taking a caucus-based interest in a topic.

Flows and Ops meetings will also include reporting on the UIFR, as well as pertinent Water Forum and/or member actions.

Composition: Flows & Ops is open to any interested Water Forum member who has knowledge and interest in the real-time flows and operations of the LAR. Each caucus will inform the Executive Director of members who wish to be kept informed about Flows & Ops meetings and work.

Roles and Responsibilities: The focus of Flows & Ops will be on implementing the FMS within the relevant regulatory framework.

Meeting Schedule: The frequency of the Flows & Ops meetings will depend on the needs of the given water year and could range from monthly to weekly (drought years will likely require heightened levels of coordination as compared to wetter years).

13. American River Corridor Health Cross-Caucus Committee

Purpose: A standing group to inform the Water Forum members regarding prioritization of proposed projects, performance of implemented projects, and overall River Corridor Health programs. Water Forum members will have an opportunity to seek clarity on the approach and to provide input and guidance on program direction. Key information shared and discussed with the ARCH Cross-Caucus will also be reported out to the Plenary on an annual basis.

Composition: Representatives from each Water Forum caucus, Water Forum staff, and technical consultants who are subject matter experts, temporarily, depending upon the subject and need. The ARCH Cross-Caucus will be chaired by the Executive Director, in coordination with the Water Forum's technical staff and consultants.

Roles and Responsibilities: The ARCH Cross-Caucus will provide input and guidance for the ARCH program area.

Meeting Schedule: The ARCH Cross Caucus will meet at least semi-annually, including to inform ARCH-related elements to be included in the annual work plan. The ARCH Cross-Caucus may schedule meetings as needed. All meetings will be open to observation by Water Forum members and will be hybrid meetings, allowing participants to observe remotely.

14. American River Climate Adaptation Program Working Group

Purpose: This working group will inform and guide the activities of the ARCAP.

Composition: The working group will be co-convened with the Water Forum and RWA, will include two members from each caucus as primary representatives, and will be open to all Water Forum members

Roles and Responsibilities: Working group primaries will commit to making reasonable efforts to attend all working group meetings and to review related materials prior to the meetings. The primaries will also be expected to act as representatives of their caucuses by reporting ARCAP progress to the caucus and providing feedback to the Working Group on matters affecting the caucus. The ARCAP working group will be tasked with:

- Reviewing and commenting on work products
- Providing input on program direction, scope, and pace
- Deliberating, refining, and providing answers to ARCAP Questions

The Working Group decisions and recommendations will be developed by consensus and will be presented to the Plenary for approval.

Meeting Schedule: Meetings will be held monthly and supported by facilitation staff, with the option of additional meetings as necessary.

15. Process for Establishing New Standing or Ad-Hoc Committees

The action to initiate the formation of a new standing committee, ad-hoc committee, or working group can be initiated by the Executive Director, a caucus or caucuses, a member representative or organization, or the Plenary. The need for a new committee or working group can stem from a significant change in circumstances, resource or programmatic constraints, a need for the application of adaptive management, or other significant changes that are not being addressed by the Water Forum's current structure.

The first step in establishing a new committee or working group is to develop a Charter. The Charter identifies the problem or issue to be addressed, why the problem or issue cannot be effectively addressed within the Water Forum's current structure, and how the needed resources and expertise will be applied from within the Water Forum's existing resources. The individual or Caucus initiating the Charter will work with the Executive Director to prepare the draft document.

The draft Charter is circulated among the caucuses and the Coordinating Committee for review and discussion. Comments are reviewed and consolidated into a final draft, which the Coordinating Committee then reviews for any budgetary or programmatic considerations before being sent to the Plenary for discussion and action.

Program Elements–Decision-Making

Members of the Water Forum will continue to use the same collaborative form of decision–making used in the Water Forum since its inception. This collaborative process respects both the diversity and the legitimacy of the interests of all participants and is grounded in the Guiding Principles outlined above. The steps below will guide the Water Forum's ongoing decision-making process, any disputes that arise among members, and any efforts to change or amend WF2050.

16. Decision-Making Process

- The Water Forum is a consensus-based organization.
- The caucuses are encouraged to seek consensus to facilitate effective decision-making at the Plenary.

- The Plenary is the main decision-making body of the Water Forum and always strives for consensus, meaning all signatories are able to support a particular policy or decision under discussion. (Since its inception, the Plenary has reached a consensus on all decisions.) However, if, after full exploration and discussion of an issue or set of issues, the Plenary cannot come to a consensus agreement, the following process will be used:
    - If one or more Signatory Representative(s) disagree with the majority of Signatory Representatives in the Plenary, this member may choose to "stand aside" and let the Plenary reach consensus without them. Within the Water Forum, this is still considered a consensus.
    - If the Signatory Representative(s) who disagree with the rest of the Plenary cannot "stand aside," then the "75% rule" will prevail. The 75% rule requires that 75% of the signatory organizations from each Caucus support a proposal for it to be considered a formal action of the Water Forum. The 75% consists of those signatory organizations present and voting within each caucus (primary or alternate Representative) or, in the event that neither the primary nor alternate is present, represented by a proxy (another member organization within the same caucus is granted permission by the absent organization to vote on its behalf).

  Consideration of suggested revisions to WF2050 is subject to the above decision-making process, but WF2050 itself cannot be changed or modified without the expressed approval and consent of the signatories whose interests would be affected by the change (see section below on Changed Conditions and Amendments to the Agreement for more detail).
- Designated Signatory Representatives may identify alternates to participate on their behalf in Water Forum meetings or Plenary sessions in instances of unavoidable absences. However, it remains the responsibility of each Designated Signatory Representative to make the necessary time available to attend all Water Forum meetings and Plenary sessions as well as the various group and committee meetings, as appropriate.
- Plenary Meetings of all Signatory Representatives will be held periodically throughout the year and are open to all Water Forum participants. Specifics on meeting frequency are included in the Water Forum Plenary Program Element.
- The Plenary shall, as necessary, appoint teams of Signatory Representatives to meet on a routine and/or ad hoc basis to: foster implementation of WF2050; finalize procedural agreements (if drafted); develop "trial balloons" regarding changed conditions; and propose options–for subsequent Plenary consideration–to resolve disagreements related to differing interpretations of WF2050. These teams shall use the interest-based collaborative decision-making process described above.

17. Dispute Resolution

A major function of a collaborative process, and a tenet of the Water Forum Way, is to prevent disagreements from escalating into full-fledged disputes. With proper facilitation and communication, most potential disputes can be resolved. However, no matter how sophisticated a collaborative process may be, disputes will inevitably arise. Some may arise out of the interpretation of specific provisions of WF2050. Others may result from concerns about non-compliance or differing interpretations of the terms of WF2050.

It is essential that interested parties refrain from resorting to litigation as a first response to every perceived problem or transgression that falls within the purview of WF2050. Lawsuits can quickly destabilize the collaborative process, potentially returning all Water Forum participants to gridlock. Therefore, while not waiving any of their legal rights, all organizations represented in WF2050 agree to initiate alternative dispute resolution procedures, including mediation, before pursuing litigation.

Program Elements–Representing the Water Forum Externally

While the heart of the Water Forum's work is centered on communication and collaboration among its members and four caucuses, the nature of the Water Forum's work requires frequent interaction with a range of external parties, including state and federal agencies, the media, and others.

The Water Forum, in the course of its regular work, implements a robust communications strategy that calls for a range of methods to reach a diverse audience. Typical Water Forum communication products include publications such as the annual plan and the Five-Year Status Report, which communicate the Water Forum's progress, priorities, and upcoming actions to external audiences. In addition, the Water Forum maintains a presence on social media platforms. The annual communication strategy as well as periodic reports will be developed in close collaboration with the Coordinating Committee and approved by the Plenary before public release.

Additionally, the Water Forum undertakes a robust outreach and engagement effort to support the habitat enhancement work, as outlined in the American River Corridor Health program area. This work, which provides critical habitat for salmonids, must also consider the other uses and values of the American River Parkway. For example, the Water Forum habitat team is conscientious as to how its work impacts neighborhoods, river access, and perceptions of enhancement projects. The Water Forum accomplishes this through project-specific outreach, as well as general outreach at venues such as the Lower American River Task Force (LARTF) meetings and engagement with organizations working along the river. (See River Corridor Health for additional information)

The Program Elements below are intended to set expectations and procedures for ensuring the Water Forum is represented externally in a transparent way, informed by its membership, and

consistent with key aspects of the Water Forum Way, most notably the importance of clear communication and "no surprises." They also address the mechanisms the Water Forum will use to ensure its deliberations are informed by external parties affected by the Water Forum.

18. Role of Water Forum Members

Water Forum members have the responsibility of coordinating with the Executive Director on external communications that mention or attribute work to the Water Forum, including educational material, media releases, or public presentations, to ensure consistent and accurate representation. This responsibility is carried out by members during interactions with one another and the Water Forum staff, and is practiced through Water Forum meetings (see Member Responsibilities on Page 74).

19. Role of Executive Director

The Executive Director serves as the primary external representative of the Water Forum. The Executive Director uses their discretion in representing Water Forum activities, policies, and perspectives with external groups and in public settings, as well as building and strengthening relationships with external partners to the benefit of the organization.

Working with Water Forum members and caucuses, the Executive Director will also seek to identify and foster outreach to and connections with a diverse set of potentially affected parties to ensure (1) they are aware of Water Forum activities, and (2) that their perspectives inform relevant Water Forum discussions. These efforts could range from conversations within established venues, such as conferences, to one-on-one engagements and focus groups.

Note: The role of the Executive Director relative to internal communications within and across staff and Water Forum members is discussed on Page 80.

20. Role of the Coordinating Committee

The Coordinating Committee serves an important role in reviewing external communication materials (e.g., media statements, press releases, letters, etc.) to ensure consistent messaging that balances the interests of all four caucuses. The level of review and involvement depends on the product, topic, and level of controversy, but as a part of the regular work of the Water Forum, the Executive Director will engage with the Coordinating Committee and any potentially affected members on the following:

- Consult in the development of proposed external messages that represent the Water Forum to the public, including news and print media, social media, video, signage, brochures, educational materials, and website content prior to release.
- Confirm proposed external messages that represent the Water Forum in special settings, such as conferences, meetings with elected officials, or state or local agencies, prior to representing the organization's interest or position on sensitive issues.

- Review and refine comment letters on behalf of the organization, or to form cross-caucus working groups as needed to engage in complex or sensitive topics (e.g., re-consultation of the BiOp) that require a public statement (see additional detail in the section below).
- Coordinate with individual Water Forum members and caucuses regarding external discussions on issues that may be relevant or important to those entities.

Recognizing the unique relationship the Water Forum has with the City of Sacramento, the Executive Director (in collaboration with the Coordinating Committee) will maintain close contact with the City of Sacramento on sensitive legal and administrative issues.

21. Requests for Engagement or Support

There may be times when the Water Forum is asked to engage in formal or informal discussions directly with various external partners or asked to endorse or provide input on a specific issue. These requests may come with different timeframes (e.g., a request requiring immediate response versus those that come with weeks or months of lead time) or in different formats (e.g., a written statement, letter, or oral testimony). Requests may be generated by a member or non-member, as well as from Water Forum staff.

The sensitivity of the requests will also likely vary, generally falling under one of two categories:

1. Requests with strong member concurrence

This type of request includes subjects that fall under the purview of the Water Forum or are consistent with WF2050 and are non-controversial. For example, a request by a Water Forum member to send a letter to the editor of a newspaper extending support for an action or project that is consistent with WF2050 (e.g., Folsom storage levels), and the statement can be issued with support from all interests.

The Executive Director, in discussion with the Coordinating Committee and affected Water Forum members, determines a path for addressing the request based on timing/urgency and level of concurrence or divergence, as follows:

- The requestor meets with the Executive Director to provide details on the requested action, including the timeframe, format, and duration of engagement. The Executive Director meets with Water Forum member(s) most affected or involved in the issue to discuss the Water Forum's response in light of WF2050.
- The Executive Director responds and proposes an approach to the Coordinating Committee and any affected members, and then implements the action.
- The Coordinating Committee members inform the caucuses at the next regularly scheduled meeting, and action is then reported on at the next regularly scheduled Plenary meeting.

2. Requests with low member concurrence or that are controversial

This type of request includes subjects that may or may not be consistent with WF2050 or have the potential to be highly controversial due to the level of interest outside of the Water Forum. For example, being asked to submit testimony to, or negotiate with, state or federal regulatory agencies on issues that may affect the coequal objectives but are not in WF2050 (e.g., litigation). These requests often have a longer time frame for response and engagement.

The Executive Director, in discussion with the Coordinating Committee and affected Water Forum members, determines a path for addressing the request based on timing/urgency and level of concurrence or divergence, as follows:

- The Executive Director meets with the Coordinating Committee and the member(s) most affected or involved in the issue to coordinate and discuss the Water Forum's concerns and position in light of WF2050 and the coequal objectives.
- The Executive Director develops an issue memo that lays out:
    - purpose of the request and the interested parties
    - recommended engagement to respond to the request
    - ground rules and guideposts for the response
    - outcome being sought
    - areas that are not to be engaged in/negotiated
- The Executive Director will consult with the Coordinating Committee (and any affected members) on the issue memo, who will then coordinate its review by and feedback from the caucuses. All feedback will be shared with the Executive Director, who will coordinate the completion of the issue memo with the author(s).
- Once completed, the Coordinating Committee will redistribute the memo to the caucuses and schedule the issue memo for discussion at a Plenary meeting, where the appropriate individuals will present the issue to the Plenary for discussion and resolution.
- Once the engagement begins, the Executive Director and/or the individual(s) leading the Water Forum engagement will provide updates as warranted to the Coordinating Committee, affected members, and the Plenary.
- As engagement progresses, changes in circumstances may arise that warrant adjustments to the Water Forum response. Changes will be brought back to the Coordinating Committee, caucuses, and, when appropriate and consistent with the commitment to disclosures as described elsewhere in this document, to the Plenary for agreement and authorization to adopt them into the Water Forum’s response.
- The Water Forum may also ultimately not respond to or decline the request for engagement.

22. Cross-Learning Among Water Forum Members

Water Forum members routinely engage in outreach activities with their various constituencies. As a result, they have each developed practices and approaches that can inform engagement strategies aimed at furthering the Water Forum's coequal objectives. These can include mechanisms for effectively sharing technically dense information, communicating complex or controversial funding and budgetary needs, and reaching out to traditionally underrepresented or hard-to-reach communities and interested parties, among others.

Given this expertise, Water Forum members are encouraged to share these approaches with one another and create spaces for mutual learning. Water Forum members are also encouraged to partner with one another and Water Forum staff to deepen the effectiveness of outreach and engagement strategies.

Program Elements–Implementation Partners

The Water Forum's work towards achieving the coequal objectives demands consistent cooperation and collaboration among its members. While much of this work is accomplished through the informal or ongoing efforts of staff and members, it is anticipated that, due to the integrated nature of many governmental and non-governmental organizations, there are opportunities for more formal partnerships or agreements.

To that end, the Water Forum's governance structure acknowledges the need for "implementing agreements" with other entities that work on and have influence over LAR conditions and activities related to, and/or furthering, the coequal objectives. Implementing agreements are intended to be consistent with WF2050 and provide more detail regarding the roles and responsibilities of the Water Forum in relation to our partners. Implementing agreements can be crafted between the Water Forum and its members, or between the Water Forum and non-members, such as state and federal partners like DWR, Reclamation, and USACE.

Implementing agreements can be developed, reviewed, and updated on a case-by-case basis. Due to the wide range of activities covered by Water Forum members or partners, the structure of any implementing agreement is unique to the issues or topic and can change over time. For example, the Water Forum has an implementing agreement with Reclamation (2021) to inform operations at Folsom Dam. At the time of execution of this Agreement, the Water Forum also has an MOU with the City of Sacramento Department of Utilities that outlines roles and responsibilities for fiscal and administrative services.

The Water Forum will use the process below to introduce, consider, and enter into any formal agreements with other entities:

- Any Water Forum member, Water Forum staff, or third-party entity may suggest the need for an implementing agreement with another Water Forum member or external entity. This expression of need should include a brief description of the need for and structure of the

intended partnership, highlighting the benefit to the Water Forum's coequal objectives and any resource obligations (staffing, funding, etc.). This description should be submitted to the Water Forum Executive Director.

- Once received, the Executive Director first refers the proposal to the caucuses and any relevant committees for discussion. Caucuses and committees are encouraged to consider both benefits and concerns, identify any additional information needs, and indicate, as warranted, whether the proposed partner agreement is necessary.
- Once the caucuses and committees have had an opportunity to consider the proposal, the request is forwarded to the Coordinating Committee for its discussion. The Coordinating Committee will draw on input from the caucuses and committees to develop a recommendation for consideration by the Plenary.
- The Coordinating Committee is to forward all requests on to the Plenary for its consideration. The Coordinating Committee may, at its discretion, offer an accompanying recommendation to adopt, modify, or reject the agreement. It may also forward it on to the Plenary without any recommendation.
- The Plenary will consider the request and make a final determination in accordance with its decision-making protocols, as described elsewhere in this agreement.

Any agreements developed will be included in the administrative record of the Water Forum (or appended to WF2050) and will be available upon request. The City of Sacramento is the legal entity that enters into agreements on behalf of the Water Forum.

Program Elements–Community Outreach and Engagement

The Guiding Principles in this section emphasize the importance of implementing WF2050 in a manner that encompasses the breadth of perspectives in the region, engages with communities and individuals not typically involved, and fully considers how WF2050 and its work to further the coequal objectives may impact all communities and constituencies. The best way to accomplish this is to have representation from underserved and historically underrepresented community members on the Water Forum. This emphasis on outreach, engagement, and transparency is important not just in the context of the governance and administration of the Water Forum but should be viewed as an integral part of the Water Forum Way.

Water Forum will work to better understand and will provide learning and engagement opportunities related to:

- Human dimensions of resource management on the American River
- Water affordability and related best practices
- Underrepresented communities' ability to engage with and relate to the work of the Water Forum

To that end, the Water Forum will apply methodologies to help inform its full range of implementation activities, guiding our work to meaningfully reflect the Water Forum's commitment to the Sacramento region. While specific approaches will vary from program to program, implementation activities should consider the following issues:

- How outreach is being carried out to ensure people from historically underrepresented groups are made aware of Water Forum activities (e.g., tribes and economically disadvantaged communities, among others)
- How and when input is being gathered to help overcome barriers to meaningful participation (e.g., time of day, location, unseen costs, etc.)
- How the Water Forum can evaluate, (1) how its actions are perceived and/or impact groups across the region, and (2) how the legacy of non-participation by historically underrepresented groups may be improved through Water Forum implementation when appropriate

In addition to these important yet more general practices, the Water Forum and its members participate in various initiatives that can help foster broad participation within all communities affected by the coequal objectives. These efforts can include access to our region's natural resources, education about the LAR, and support for the affordability of our drinking water. These efforts can be continued and strengthened under the WF2050 framework.

- American River Corridor Health and Access – The Water Forum recognizes that its habitat enhancement work along the American River corridor, in furtherance of the coequal objectives, has the potential to affect historically underrepresented communities. The Water Forum is aware of and will continue to work to understand these conditions, from fire risk and waste management, to safety, pollution, river access and use, and other human dimensions of resource management. Recognizing these complexities and with the leadership of the Public Caucus, the Water Forum will work to draw in speakers and members able to bring this vantage point to Water Forum discussions.
- Water Affordability – The Water Forum recognizes there is a potential nexus between its members' commitments and water affordability. Considering this, Water Forum members commit to fostering an ongoing series of dialogues and joint learning sessions as part of the implementation of WF2050 to better understand this connection, and, as appropriate, identify relevant best practices that have the potential to contribute to achieving the Water Forum's coequal objectives while accounting for affordability concerns. Signatories are committed to exploring this topic while acknowledging that rate-setting rests within the purview of each water purveyor's governing body and applicable laws.
- Education – Under the leadership of the Public Caucus, the Water Forum will engage with underrepresented communities to, (1) understand how the coequal objectives resonate with, address and/or impact these communities' needs and priorities, (2) improve public

participation processes, and (3) identify opportunities to implement WF2050 in a way that accounts for people having different access to resources due to systemic inequities. This will focus primarily on Water Forum-led activities, but can also include members sharing guidance with one another on strategies they can undertake to deepen their public participation processes.

The Water Forum recognizes that its work to meet the interests of the broader community is an ongoing effort and welcomes feedback on how it can engage more effectively with communities across the region as it pursues its coequal objectives.

FUNDING

The Water Forum's governance, finance, and administration will be transparent and collaborative in nature. The operation and funding of the Water Forum require a significant commitment of time and money by interested parties to promote and carry out stewardship of our watershed's resources. The administration of the Water Forum's various initiatives, along with its large group of signatories and interested parties, requires a dedicated and consistent effort to make progress toward achieving the coequal objectives.

Guiding Principles

The principles outlined below shape the Water Forum's approach to budgeting and funding its activities, and are intended to create a foundation for equitable and sustainable funding and budgeting throughout the life of this agreement.

1. Finance Mechanisms

Effective Water Forum governance must provide a clear and reliable financial mechanism to generate the necessary funding, as well as a transparent and inclusive process for identifying and confirming funding sources.

2. Diverse Funding Sources

Water Forum activities are to be funded through a mix of water purveyor contributions, state and/or federal grants, and in-kind contributions of non-monetary support for Water Forum initiatives, including advocacy, public outreach, in-kind contributions of time, etc. The Water Forum will continue to pursue diverse forms of funding and is open to funding contributions from all caucuses.

3. Commitment to Affordability and Cost-Effectiveness of Actions

When considering program areas and priorities, the Water Forum is committed to understanding the cost-effectiveness and affordability of its actions. The Water Forum further acknowledges that while programs and activities are funded through a range of sources, they are primarily funded through local ratepayers, and we have a responsibility to provide clear benefits to those ratepayers and the broader public.

4. Financially Viable and Effective

The Water Forum strives to establish a budget and funding mechanism that balances the meaningful and ongoing pursuit of its coequal objectives with the limited financial capacity of its funding members. To that end, the Plenary sets annual priorities that are consistent with both the Water Forum's objectives and available budget resources.

5. Differential Abilities to Pay

The Water Forum recognizes that its members, both within and across caucuses, have varying abilities to contribute to Water Forum funding. The Water Forum budget and funding allocation approach is structured to account for these differences. All members are expected to contribute,

at a minimum, substantial in-kind effort through participation in a range of committees, Plenary meetings, and activities.

6. Ongoing Budgetary Review

Each year, the Water Forum shall undertake a thorough review of progress to date and update its annual work plan based on funding needs and the expected contributions of funders. Any increase or decrease to the annual budget requires a consensus among all caucuses and agreement by those agencies providing Water Forum funding.

7. Long-term Budgetary Planning

The Water Forum recognizes that pursuing its coequal objectives requires longer-term budgeting and financing commitments. To that end, while Water Forum budgets must be approved annually by both its funders and the Plenary, the Water Forum will undertake longer-term budgetary planning to provide greater clarity and certainty to both funders and the Water Forum's programmatic long-range planning. It will also consider base funding from sources other than ratepayers.

8. Augmenting Water Forum Member Funding

The Water Forum strives to augment annual contributions from its funders with grant funding from federal, state, and other sources that will further contribute toward its mission to advance the coequal objectives. Such grant applications, prepared by the Water Forum, must be approved by resolution of the Sacramento City Council. The City of Sacramento would be the formal grant applicant.

9. Importance of Maintaining a Reserve Fund

The Water Forum recognizes that costs and funding may fluctuate from year to year. To maintain a consistent program across uneven funding years, the Water Forum is committed to building and maintaining a reserve fund equal to 120 days of working capital. The Water Forum reserve fund will be managed in accordance with relevant policies and best practices per the City of Sacramento.

10. Program Fund Accounts

The Water Forum's program funds include the WFSE, HME, and grants, keeping outside funding separate from Water Forum member contributions. The WFSE and HME fund expenses are tracked separately to maintain budgetary transparency for these two distinct functions. Similarly, outside grant funds or potential Healthy Rivers and Landscape Program funds will also be separately accounted for and budgeted. Additional funds accounting approaches may be applied as funding sources / other requirements dictate. The HME fund shall have a cap; if and when that cap is reached, funders will not be assessed additional HME funds until the balance drops below the cap level.

Program Elements

1. Water Forum Budget

As an entity within the City of Sacramento's administration with a July through June fiscal year, the Water Forum budget also operates on a July through June fiscal year. The Water Forum budget will be approved by the Plenary as described below, and the associated funding contributions are expected to be approved by the funding agency governing boards and councils no later than May.

Below is a description of the process for developing and approving annual budgets as part of the WF2050 Agreement.

Budget Description

The annual budget, prepared by the Executive Director, will include, but not be limited to, the following elements:

- Clear linkages to annual and multi-year work plans
- Delineation of costs associated with staff, consultants, direct expenses, contingencies, etc.
- Status of the Water Forum reserve fund
- A report on prior year expenditures (actuals)
- A report on the status of local, state, and federal grants
- Highlight budget items tied to Interagency agreements or contracts between the Water Forum and signatories

The budget is to be developed with the assistance of the City of Sacramento Department of Utilities' finance staff, consistent with the Water Forum-Department of Utilities MOU (refer to Appendix 10: Water Forum and Department of Utilities MOU).

Water Forum Budget Process and Schedule

The Executive Director will annually develop a proposed budget, which the Coordinating Committee will review and approve. As part of its review, the Coordinating Committee will engage with Water Forum funders (water purveyors with PSAs, implementing agencies, and flat fee agencies) to ensure the proposed budget and work plan are consistent with funders' anticipated contributions. A final proposed budget will be shared with and must ultimately be approved by the Plenary.

The Water Forum annual budget will be developed each year using the following fiscal year (July 1 to June 30) schedule:

- September – November: Internal budget development for future fiscal year by Water Forum staff based on review of operating budget and actual expenditures, Water Forum

priorities (set by the Plenary), annual work plan including upcoming project costs and staffing needs, reserve fund status, and anticipated revenue (funder contributions and grants). Executive Director reviews first and subsequent drafts of the future fiscal year budget with the Coordinating Committee.

- November – December: Executive Director meets with the Water Caucus (with expanded participation, as needed, to bring in any non-Water Caucus funders) to review and confirm consistency with funders' funding abilities and commitments. The Executive Director collaborates with the Coordinating Committee (in consultation with interested funders) to resolve any outstanding funding and budgetary issues before submitting the budget to the Plenary for consideration and approval.
- January – February: Executive Director presents proposed draft for future fiscal year budget to the Plenary for its review and approval. This budget is accompanied by a memo that details the proposed budget, expenses, and the status of the reserve fund. Member agency contributions are calculated in January to allow for inclusion in annual member agency budgeting processes. Plenary identifies if there is any opposition to proceeding with the budget. As needed, the Executive Director, in consultation with the Coordinating Committee and interested funding members, revises the budget based on Plenary discussions and direction.
- February – May: Interagency funding agreements are signed, with final approval from the City of Sacramento Council for the upcoming fiscal year.

Budget Oversight Process

The Water Forum will establish a transparent budget oversight process, including the following reports, to foster effective use and tracking of Water Forum spending:

- August: Publish an annual implementation report card. Review the prior year's accomplishments and identify any uncompleted priorities with the Plenary.
- August -September: Provide a standard budget report (spreadsheet) to the Coordinating Committee detailing prior fiscal year actual expenditures and remaining balance in reserve funds.
- October: Provide a standard budget report (spreadsheet) to the Coordinating Committee on the first quarter (July-September) actuals.
- January: Provide a standard budget report (spreadsheet) to the Coordinating Committee on second quarter (October-December) actuals.
- April: Provide a standard budget report (spreadsheet) to the Coordinating Committee on the third quarter (January-March) actuals.

Prior to completion of the first year following the signing of WF2050, the Water Forum shall undertake a careful review of progress to date and shall revise the work plan considering existing circumstances. The annual budget and contributions may be revised at that time. Any increase or decrease to the first-year budget would require a consensus among all interest groups and agreement by funding agencies.

Use of Consultants

Consultants shall be used only as needed. Identification and approval of actual expenditures for specific consultant contracts shall be part of the Water Forum budget process. If consultant contract funds or funds allocated for consultant contracts in a given fiscal year are not spent prior to the end of that year or encumbered for future expenditure, the Water Forum shall modify the following year's budget appropriately. To the extent that there is a need for consultant services not anticipated in the annual budget, such services can be allowed, provided there is an adequate budget (e.g., savings from another line item) and with the concurrence of the Coordinating Committee.

Reserve Fund

To ensure the Water Forum's ongoing fiscally sound financial management and to adequately provide for unforeseen circumstances such as economic uncertainties, loss of significant revenue sources, grant match requirements, and grant monitoring as required, a Reserve Fund will be established with a target level equivalent to 120 days of working capital.

Budgets: Year 1 Budget and 5-year Look Ahead

To estimate the actual cost of the Water Forum's work and foster long-term planning by its staff, members, and funders, the Water Forum is committed to producing a five-year look-ahead as part of its Five-Year Status Report. While the look-ahead is non-binding, members and funders will use these projections to identify and secure the necessary resources and shape the work of the Water Forum. The initial five-year look-ahead (2025-2030) is provided in Appendix 11. Fiscal Year 2025-2026 budget components include proposed expenditures, a summary of projected funding sources, the HME Cost Share Projection, and the WFSE Cost Share. The Fiscal Year 2025-2026 budget totaled $1,973,140 and is included in Appendix 11. All signatories have reviewed and agreed to this five-year look-ahead and associated budget.

2. Water Forum Funding

As part of their commitment to investing in a reliable water supply and a healthy LAR ecosystem, Water Forum member water purveyors and other funders voluntarily enter into an annual funding agreement that stipulates funding levels for the Water Forum, based on the negotiated Cost Allocation Method. This Cost Allocation Method is included as Appendix 12 and describes the funding allocation methodology in detail.

Description of Funding Methodology and Other Sources

The Water Forum will draw on a range of sources to fund its annual budget. These sources include both member funding and resources provided by outside entities. It also includes both direct funding and in-kind support.

The funding allocation methodology intends to equitably share the costs of the Water Forum programs in furtherance of the coequal objectives. The current (2025) version of the cost allocation model is included as Appendix 12. This model will be updated at five-year intervals and will be subject to approval solely by the funding agencies listed in the model. It should be noted that this cost allocation assumes that all the purveyors identified in Table 2 in Appendix 12 will sign WF2050. If fewer funders sign WF2050, the percentages of the costs allocated to the other funders that do sign will increase.

Below is an overview of the agreed-upon funding sources and cost-allocation methodologies.

- Purveyor Specific Agreements: Purveyors with PSAs provide funding based on the formula described in the cost allocation model (see Appendix 12), which was developed and unanimously agreed to by the purveyors, and as reflected in the annual funding agreement.
- Implementing agencies: Implementing agencies provide funding based on a set-fee model. These fees are set by mutual agreement between the implementing agency and the Water Forum and will be included in the Water Forum's budgets as agreements are made. Sacramento County, SMUD, EDWA, and SAFCA have contributed in this manner historically and are expected to continue doing so.
- Grants: The Water Forum receives extensive grant funding from federal, state, and other sources to support its work on the ARCH Program Area and may include other Program Areas in the future. The total grant funding varies from year to year and is outlined in the annual budget.
- In-Kind Donations: Significant resources are donated on behalf of Water Forum member organizations through the participation of their staff and members in various Water Forum activities and committees. In-kind donations are not reflected in the budget or funding allocation.

Except for grant funding that is earmarked for specific projects and purposes, all other funding provided to the Water Forum is collected as a general contribution. Funding is pooled across all these sources and then allocated to either the WFSE or the HME program based on the annual budget need, or to the Reserve Fund.

The process to amend the funding structure described above will follow the “Changed Conditions and Amendments to the Agreement” section outlined elsewhere in this document.

3. Five-Year Review

As described elsewhere in this agreement, the Water Forum will comprehensively review progress made toward achieving the coequal objectives every five years. The results of this review will assist in the development of the next five-year plan, revising the annual work plan, and adjusting the current budget and activities to reflect successes and failures revealed by the review.

ADMINISTRATION

Guiding Principles

1. Authority and Accountability

Water Forum governance should clearly articulate lines of authority and accountability among all parties to the Agreement. This accountability is intended to cover all aspects of the Water Forum work, including but not limited to: members to members; members and staff to one another; members and staff to the Water Forum mission and agreed-upon actions and priorities; and the Water Forum to the affected public.

2. Tracking Progress

Understanding, tracking, and reporting on the Water Forum's progress are essential to supporting the coequal objectives, as well as fostering thoughtful consideration of any necessary changes in its work and approach throughout the life of the Agreement. To that end, Water Forum governance should include clear metrics, benchmarks, and an agreed-upon process to ensure that Water Forum members and staff can track and, as needed, adapt its work related to the following:

- Water Forum-led projects and actions are intended to support Water Forum's coequal objectives.
- Water Forum member-led projects are intended to support the Water Forum's coequal objectives.
- A comprehensive understanding of both river health and water supply reliability

Program Elements

1. Administrative Structure

The Water Forum will continue to be administered under the auspices of the City of Sacramento. Staff will be either employees or contractors of the City of Sacramento, and all administrative responsibilities related to such employees or contractors will continue to be handled by the City. This arrangement will:

- Ensure continuity between WF2050 and the priorities of the Water Forum
- Preserve existing technical expertise
- Avoid creating another redundant government entity

WF2050 is made binding and enforceable through the execution of three agreements: the MOU for the Water Forum 2050 Agreement (this document, signed by all entities choosing to be Water Forum members); the annual Funding Agreements (which, consistent with the funding principles set forth above, are executed by the entities making payments to support the work of the Water Forum); and the Interagency Agreement for the Administration and Management of the Water

Forum (also signed by funding members, see Appendix 13). Together, these agreements will contain provisions to continue the Water Forum organization. All parties that sign the MOU will become full participants in the Water Forum. It is important to note that:

- All signatories to WF2050 will have equal standing in the Water Forum, regardless of whether they are a public agency, an investor-owned utility, or a community interest or advocacy organization.
- Although Water Forum staff will be employees or contractors of the City of Sacramento, the WF2050 signatories will provide overall policy direction for the work of staff.

2. Changed Conditions and Amendments to the Agreement

No individual Water Forum member or staff has independent authority to alter WF2050. At the same time, the Water Forum must be able to respond to the changing conditions or other unforeseen circumstances that will arise over the next several decades. WF2050 may be amended only by all signatories employing the same interest-based collaborative process used to negotiate the original WF2050. The Water Forum staff will facilitate and coordinate such negotiations should they prove necessary. Changes to WF2050 are the purview of the Plenary unless the Plenary decides they need to be referred to signatory members' boards for formal confirmation.

Term of the Agreement

The original WFA, adopted in 2000, was set to expire after a 30-year term. In 2020, then Water Forum Executive Director Tom Gohring initiated a renegotiation of the WFA well in advance of the expiration date, recognizing that the original agreement had taken seven years to negotiate and that regulatory, policy, and physical conditions had substantially changed over the past 20 years. While the renegotiation of the WFA is expected to be completed prior to the original expiration date and in less time than the original negotiations, it is recognized that, due to the nature of the agreement and the complexity of the issues, members should anticipate and plan for future renegotiations.

Therefore, given the complexity of issues and anticipated climate change, WF2050 is to be reviewed through an assessment of key indicators in the Five-Year Status Report, including data from UWMPs and GSPs, on a 5-year basis, with a renegotiation term of 25 years.

The anticipated timeline of review and renegotiation is as follows for the period of 2025-2050:

- 2025: Signing of the New Agreement, WF2050. Publish updated Annual Work Plan that lays out programmatic and budgetary priorities for the coming year, as well as a look-ahead for the FY 25/26-30/31 period.
- 2030: Publish Five-Year Status Report. Review progress on implementation of program elements; develop updated Annual Work Plan that lays out programmatic and budgetary

priorities for the coming year, as well as a look-ahead to cover the next 5-year period (FY 30/31-35/36) for Plenary approval.

- 2035: Publish Five-Year Status Report. Review progress on implementation of program elements; develop revised Annual Work Plan that lays out programmatic and budgetary priorities for the coming year, as well as a look-ahead for the next 5-year period (FY 35/36-40/41) for Plenary approval.
- 2040: Publish Five-Year Status Report. Review progress on implementation of program elements; develop revised Annual Work Plan that lays out programmatic and budgetary priorities for the coming year, as well as a look-ahead for the next 5-year period (FY 40/41-45/46) for Plenary approval.
- 2045-2050: Publish Five-Year Status Report. Initiate review and renegotiation of WF2050 to coincide with a 25-year renewal period. Provide a 5-year window to complete, with the anticipated new agreement to be approved no later than 2050. This 5-year window can be automatically extended with the concurrence of the Plenary, provided that negotiations are deemed productive and are on a path towards a successful conclusion.

Request for Renegotiation

Renegotiation can be requested outside of the scheduled timeframe. Any proposal to renegotiate WF2050 would be considered in the context of the Water Forum's coequal objectives. Specific engagement processes for renegotiating WF2050 should be developed through a transparent and collaborative process.

Request for Amendment

Amendments to WF2050 can be requested outside of the scheduled timeframe. Any proposal to amend WF2050 would be considered in the context of the Water Forum's coequal objectives. Specific engagement processes for amending WF2050 should be consistent with the collaborative decision-making process that was used in the development of WF2050.

Process for Renegotiation or Amendment Requests

The mechanism to request consideration of amendments is as follows:

- Any signatory, caucus, or Executive Director can make a formal request for renegotiation of some terms. The request must include a rationale stating the changed conditions warranting consideration and should include proposed amendment concepts or language.
- The request for renegotiation by a signatory or caucus must be submitted to the Water Forum Executive Director, who will bring it (or any request they may have) first to the Coordinating Committee for discussion. Coordinating Committee discussions will be

informed by input from their respective caucuses and, as appropriate, any guidance from relevant committees.

- The Coordinating Committee is to forward all requests on to the Plenary for its consideration. The Coordinating Committee may, at its discretion, offer an accompanying recommendation to adopt, modify, or reject. It may also forward it on to the Plenary without any recommendation.

A request for an amendment or renegotiation does not necessarily mean WF2050 will be revised. WF2050, including specific agreements (e.g., PSAs), can be changed or modified only with the express approval and consent of the Plenary. Changes to WF2050 are the purview of the Plenary, with the caveat that changes that require additional funding will be subject to agreement by the funders. The Plenary may recommend that the proposed changes be referred to the signatory members' boards/decision-making bodies for formal confirmation.

Specific implementing agreements (e.g., PSAs) cannot be changed or modified without the express approval and consent of the entity whose interests would be affected by the change. These changes also must be approved by the Plenary.

3. Process for Project Endorsement from the Water Forum

This program element is designed to provide a framework for projects proposed by Water Forum members to receive endorsement from the Water Forum, consistent with the decision-making processes described above.

Water Forum signatories may receive support (i.e., endorsement) for a proposed project from fellow signatories when agreed-upon conditions are met, including good faith sharing of project information and the project proponent's commitment to WF2050 implementation. A "project" could refer to infrastructure, water entitlement, an application for funding, a policy, or a procedure. Endorsement can range from conceptual to full endorsement (as described below) and is dependent on the level of project development and information shared with the Water Forum.

Conceptual Endorsement

Definition: The project idea is acknowledged by signatories as relevant and aligned with the coequal objectives.

Purpose: Signals openness to explore the concept further.

Full Endorsement (Ready to Implement)

Definition: Water Forum signatories have confirmed support for the project's final implementation.

Purpose: Signals that the project is supported by all caucuses and implementation will not be opposed by Water Forum signatories.

When a project receives Water Forum endorsement, signatories (when called upon) will make reasonable efforts to provide endorsement in any (or all) of the following ways:

- Speak before stakeholder boards and regulatory bodies
- Provide letters of endorsement
- Provide supportive comments to the media
- Advocate the WF2050 Agreement to other organizations, including environmental organizations that are not signatories to the Water Forum Agreement.
- Otherwise, respond to requests from other signatories to make public their endorsement of WF2050 and associated projects (as relevant).

At a minimum, Water Forum endorsement of a project will mean refraining from making negative statements or opposing the project. However, *conceptual endorsement* does not preclude Water Forum signatories from asking questions and seeking clarity within various environmental review processes as projects are advanced.

If requested, an endorsement could come from individual signatories, the Plenary, or the Executive Director on behalf of the Plenary.

Framework for Information Exchange to Build Trust

Projects that receive Water Forum endorsement are those that have been shared and discussed widely with other Water Forum signatories. This could occur in caucus meetings, Plenary, Water Forum committees, or other Water Forum meetings that have been made available to all signatories. Discussions with signatories may be completed sequentially if access to information is made to all signatories in a timely manner. For instance, a project proponent could share their project details with all caucuses separately.

Inherent in this approach is the intent to build trust among signatories through full and early disclosure of project details. Sharing project information early in its development process will allow Water Forum signatories to evaluate, provide feedback, and engage in dialogue about the project. Project proponents should share project details in good faith before final decisions are made. The history of the Water Forum has shown that this type of information tends to garner support from other signatories.

In addition to the information sharing and disclosure process, projects may also receive Water Forum endorsement through the ARCAP, which will include analysis and assessment of regional actions to support the coequal objectives including through the potential development of

additional volumes of water. Projects considered within ARCAP are expected to undergo review and discussion through all levels of the Water Forum governance structure.

Project Endorsement Caveats and Assurances

1) *The nature of a project endorsement will be commensurate with the level of detail shared with the WF and the level of development of the specific project. For example, if conceptual project information is available and shared with the WF, then WF signatories can only provide endorsement of the project's concept. If project proponents seek full endorsement of a ready-to-build project, then it is expected that they will have shared and discussed details, including concept, design, funding, permitting, and construction, as relevant.*
2) *WF endorsement will be contingent on:*
    a. *Proponent is adhering to all applicable planning, environmental, and regulatory requirements.*
    b. *The proponent has conducted a public participation process, such as engaging with established citizen advisory committees or employing other appropriate mechanisms, to inform project design and implementation as needed.*
    c. *Project aligns with the coequal objectives and the WF 2050 guiding principles.*
    d. *The project proponent has demonstrated a clear commitment to WF2050 implementation.*
3) *If a consensus cannot be reached within the Water Forum for endorsing a project, no action will be taken by the Water Forum.*
4) *If a project is determined by consensus within the Water Forum to be in direct and clear conflict with the Water Forum's coequal objectives, it is possible that the Water Forum would take a position of opposition to the project.*
5) *All signatories retain their existing ability to comment or provide input on specific details of facility design, financing, and construction of projects.*

4. Legal Considerations

Administrative Structure

The Water Forum is not a legal entity, but rather a forum for a group of business and agricultural leaders, community groups, environmentalists, public and private water agencies, and local governments. Staffing and administrative support for the Water Forum are funded by water purveyors and other willing donors, with personnel management provided by the City of Sacramento. The Water Forum is not a separate legal entity. The current authority for the Water Forum is outlined in the 2025 Interagency Agreement for the Administration and Management of the Water Forum.

The key points of the 2025 Interagency Agreement for the Administration and Management of the Water Forum (attached as Appendix 13) are as follows:

- The objective of the Water Forum office and staff is to promote the implementation and continued vitality of the Water Forum Agreement.
- The Executive Director of the Water Forum reports directly to the Director of the City of Sacramento Department of Utilities.
- The City is responsible for providing facilities, budget, and administrative support to the Water Forum.
- All employees of the Water Forum, including the Executive Director, are City employees.
- The Water Forum contracting follows City procedures.
- The Water Forum will carry its own insurance policy to cover claims up to an agreed-upon threshold.
- If a signatory decides to terminate membership in the Water Forum, that signatory is responsible for covering their funding share for the current and subsequent fiscal year.
- The City's signature delegation policy identifies the Executive Director's position as equivalent to a Department Director and authorizes contract authority of up to $100,000.

The City Attorney's office represents the Water Forum on matters related to City procedures and general governmental issues. The Water Forum currently shares the City's outside water counsel for advice on substantive water-related issues but has agreed to terminate the representation if a potential conflict with the City's interests arises.

Water Forum Meetings – Relationship to Brown Act

The Water Forum is neither a local governing body nor was it created by federal or state law. Accordingly, it is not subject to the Brown Act.

Nevertheless, the Water Forum strives to be as transparent and inclusive as possible, both with its members and with cooperating entities, affected parties, and the broader public. To that end, Plenary meetings are open unless a specific topic warrants member-only discussions. The Water Forum also strives to hold informational sessions that deepen understanding among its members and others. In the case of open Plenary meetings, the Water Forum will provide advance notice of meeting times and materials to inform the public. The general intent for Plenary meetings is to be open to the public so that the formulated plans and positions are made known.

The Water Forum strives to provide meeting materials to its members in a manner consistent with good public participation practices (e.g., meetings are noticed in advance, discussion topics are described in the agenda, meetings take place locally and are open to the public, etc.).

Water Forum members are responsible for ensuring their engagements with the Water Forum are consistent with their agency's Brown Act obligations.

California Environmental Quality Act

The City of Sacramento is considered the lead for any Water Forum actions requiring CEQA (California Environmental Quality Act) review.

Development and adoption of WF2050 is not a “Project” subject to CEQA.

Caveats and Assurances

AMERICAN RIVER CLIMATE ADAPTATION PROGRAM (ARCAP)

ARCAP Caveats and Assurances include the following:

1. *The ARCAP will be developed and implemented, with opportunities for open cross-caucus discussions and guidance, utilizing the Water Forum's decision-making processes. This applies to both technical processes and member deliberations.*
2. *The Water Forum will work jointly with RWA and the GSAs to resolve technical issues during ARCAP development and implementation. Staff from RWA and the Water Forum will work together in a collaborative relationship to support this program and will engage with the regional GSAs.*
3. *The ARCAP approach will strive to add value and avoid creating added costs, duplicative processes, and bureaucracy.*
4. *The ability of Water Forum members to identify and employ ARCAP Water does not imply that the American River is in excess conditions.*
5. *ARCAP implementation will complement and support other Water Forum programs (e.g., FMS).*
6. *The Water Forum will review the successes and challenges of the ARCAP and refine the program as needed, with adjustments agreed upon by all caucuses.*
7. *ARCAP assets (e.g., water rights and contracts, wells, diversion works) will remain under the control of the owning agencies.*
8. *The role of the Water Forum (including its staff and members) will be to coordinate ARCAP actions, complete agreed-upon technical analyses and studies, advocate for programs and funding, and track and review the status of these programs.*
9. *The Water Forum and RWA will respect the operational authority and third-party agreements of their members, which are necessary for their contributions to ARCAP Water.*
10. *No part of the ARCAP will abridge the authorities, entitlements, or agreements of Water Forum members without the express consent of the relevant parties.*

AMERICAN RIVER FLOWS AND OPERATIONS (ARFO)

ARFO Caveats and Assurances are grouped in the following categories:

- Flow Management Standard (FMS)
- Flood Operations
- Temperature and Other Water Management Infrastructure

Flow Management Standard

1. *Signatories acknowledge that, while minimum reservoir releases are a key feature of the FMS, flows above the specified minimum releases can provide important benefits for wildlife, recreational, and aesthetic values of the LAR.*
2. *Signatories acknowledge that low Dissolved Oxygen (DO) levels have a significant impact on the health of salmonids, thereby negatively affecting the benefits of the FMS. Consequently, Folsom Reservoir complex management actions must take this factor into account to avoid unhealthy DO levels.*
3. *Signatories acknowledge that Folsom Reservoir storage levels in the spring are critical to the volume of cold-water pool available for the effective implementation of the FMS during the rest of the year, and that management actions should be taken to preserve as much reservoir storage as feasible during this timeframe.*
4. *All signatories agree to recommend to the SWRCB an updated American River Flow Management Standard that protects the fishery, wildlife, recreational, and aesthetic values of the lower American River. The recommendation will include requirements for Reclamation releases to the LAR.*
5. *The Water Forum will develop recommendations to inform transfer activity in the region, subject to agencies' determinations of operational, regulatory, and contractual feasibility, to be as consistent with the FMS as possible and maximize the value of the transfer water for the health of the LAR.*
    a. *Note: Current regulations include a commitment to implement certain aspects of the FMS, and water moved through a transfer agreement has the potential to offer additional flows and/or temperature benefits to the LAR, pending operational constraints such as, but not limited to, timing of deliveries, infrastructure capacity, regulatory or discretionary actions by Reclamation.*
    b. *Note: When transfers are arranged with Reclamation, purveyors can make requests or suggestions regarding how and when water is moved through the system; however, operational decisions are ultimately at the discretion of Reclamation and are subject to regulatory requirements.*

Flood Operations

6. *The Water Forum Signatories support pursuing a Preliminary Viability Assessment of American River Watershed Forecast-Informed Reservoir Operations[34] (Watershed FIRO) in partnership with Reclamation, USACE, NOAA, and others, where appropriate and possible.*
7. *The Water Forum signatories support the identification and implementation of excess flood water recharge when: 1) carried out within the region; 2) designed, constructed, and operated in accordance with appropriate environmental and engineering standards/requirements, and the FMS; and 3) consistent with and supporting the Water Forum's coequal objectives.*

Temperature and Other Water Management Infrastructure

8. *Signatories support the current efforts to redesign and improve the temperature control shutters at Folsom Dam and will consider opportunities for Water Forum support and advocacy. Until improvements are made, signatories support the implementation of a power bypass at Folsom Dam in all years as necessary to provide suitable fall spawning temperatures for LAR resident salmonids, unless September temperature modeling indicates that 56°F or lower can be achieved at Watt Avenue on or before November 1st without the bypass.*

REGIONAL WATER SUPPLY SUSTAINABILITY (WSS)

WSS Caveats and Assurances are grouped in the following categories:

- Surface Water Management
- Groundwater Management
- Demand Management
- Dry-Time Actions

Surface Water Management

1. *The ability for any individual purveyor to implement the surface water diversions principles will depend on their respective opportunities and constraints.*
2. *On a five-year cycle, purveyor signatories will coordinate with the Water Forum staff to provide data and assumptions to be reported in their Urban Water Management Plans (UWMPs), including demand projections, current and planned supplies, status of demand management and water use efficiency programs, and drought planning scenarios. Water*

[34] Definitions of FIRO can vary, but generally includes expanding meteorological, watershed, channel condition, and environmental monitoring; advancing technology to enhance meteorological, watershed, channel condition, and environmental forecasting; and integrating data collection, management, display, and analysis capabilities into decision support systems related to reservoir operations.

Forum staff will compile regional data and assumptions for presentation to the Water Forum membership for review and discussion.

3. *Nothing in the agreement is intended to call for the reduction or forfeiture of existing surface water entitlements. Signatories to the agreement will honor this principle in state and federal entitlement proceedings directly related to WF2050. It is recognized that there may be broader state and federal entitlement proceedings where signatories may have different interests, such as the SWRCB water rights proceeding for the Bay-Delta. Signatories agree to work in good faith through the Water Forum with the objective of developing a consensus recommendation for how state and federal entitlement proceedings should affect those agencies that store and divert American River water. All signatories will make good faith efforts to ensure that recommendations are consistent with both coequal objectives.*
    a. *The LAR is considered to be fully appropriated by way of the existing declarations of full appropriations, the responsibilities of the California Wild & Scenic Rivers Act, and the realities of the National Wild & Scenic Rivers Act. For more detailed information, see* Appendix 6*. The Water Forum will not be pursuing amendments to the existing declaration of full appropriation.*
4. *Recognizing that the majority of LAR surface water supply originates in the Upper American River Watershed, signatories support efforts above Folsom Reservoir to enhance and restore watershed health, creating a resilient headwater for water supply and ecosystem benefits on the American River.*
5. *The Water Forum did not evaluate new reservoirs in the analyses used to inform the WF2050 negotiations. Notwithstanding any provision of this agreement, any proposal for the Water Forum to support or oppose a new reservoir shall be approved by the Plenary, with at least 30-day notice to each Water Forum representative.*
6. *Signatories acknowledge that the parties to the Healthy Rivers and Landscape (HR&L) Proposal will be obligated to meet tributary program requirements for the American River, if approved by State Water Resources Control Board along with associated agreements. In addition, there are Water Forum members who have also made flow commitments pursuant the American River Terms for Ecosystem Support and Infrastructure Assistance Needs (ARTESIAN) Agreement*[35]*.*
7. *Signatories are encouraged when invited to support (where possible) purveyors' rates and fees necessary to implement projects and programs insofar as they are consistent with the WF2050 guiding principles and in support of the coequal objectives. The Water Forum will provide learning and engagement opportunities on water affordability and related best*

[35] The ARTESIAN Agreement contains commitments for certain RWA members to obtain funding to complete groundwater infrastructure projects and provide contributions to environmental outflow with or without adoption of the HR&L. The ARTESIAN Agreement governs the rights and obligations with respect to the administration of state funding provided for in the Funding Agreement Between the State of California (Department of Water Resources) and the Regional Water Authority - Voluntary Agreement Early Implementation for the American River, executed on July 21, 2023.

practices, and signatories will work to better understand associated challenges and opportunities (see Governance Program Element– Community Outreach and Engagement for more information).

Groundwater Management

8. *The Water Forum will work to understand better and communicate the opportunities for, and impacts of, increased surface water diversions in wet conditions.*
9. *Signatories acknowledge the importance of continued data collection and analysis to improve understanding of Groundwater Dependent Ecosystems (GDEs) and surface water–groundwater interactions and commit to ongoing dialogue within the Water Forum as these topics are explored in the context of SGMA requirements and ARCAP analyses (as relevant).*

Demand Management

10. *All signatories acknowledge that the requirements related to water purveyors' water use efficiency and demand management have become increasingly stringent since the signing of the original WFA and are continuing to evolve.*
11. *All signatories acknowledge that the purveyors must consider the costs and benefits of demand management actions (monetary, ecosystem, quality of life, etc.).*
12. *All signatories acknowledge that water rates have impacts on affordability and equity.*
13. *All signatories recognize that conserving water provides multiple benefits (if properly targeted, implemented, and managed) and commit to implementing demand management actions in a manner that strives to support both coequal objectives, with considerations for improvements to landscape irrigation efficiency and installation of native and low-water-use vegetation.*

Dry-Time Actions

14. *Water is essential for public health and sanitation, as well as for economic stability and quality of life. Water agencies have a fundamental responsibility to provide all customers with reliable access to safe, clean drinking water. This fundamental responsibility may constrain the breadth of Water Forum related actions purveyors are able to take during extreme drought.*
15. *Water agencies in California manage water shortages in accordance with their individual Water Shortage Contingency Plans (WSCPs), which are developed and updated every five years as part of their UWMPs, in compliance with California Water Code requirements.*
16. *Signatories acknowledge that dry times present exceptional challenges for the health of the LAR, and actions should be pursued to protect the fish that rely on river flows and temperature.*

SCIENCE, MONITORING, AND DECISION SUPPORT

Science, Monitoring, and Decision Support Caveats and Assurances include the following:

1. *The level of effort and the scope of Science, Monitoring and Decision Support Program activities will be informed by emerging data needs, and science activities mandated by regional and/or statewide programs that may arise during the WF2050 term (i.e., the Statewide HR&LP Science Plan habitat accounting process, changing hydrology, new water supply regulations, etc.), and other emerging funding sources and requirements, as applicable.*

GOVERNANCE, FUNDING, AND ADMINISTRATION

Governance, Funding, and Administration Caveats and Assurances include the following:

1. *The nature of a project endorsement will be commensurate with the level of detail shared with the WF and the level of development of the specific project. For example, if conceptual project information is available and shared with the WF, then WF signatories can only provide endorsement of the project's concept. If project proponents seek full endorsement of a ready-to-build project, then it is expected that they will have shared and discussed details, including concept, design, funding, permitting, and construction, as relevant.*
2. *WF endorsement will be contingent on:*
    a. *Proponent is adhering to all applicable planning, environmental, and regulatory requirements.*
    b. *The proponent has conducted a public participation process, such as engaging with established citizen advisory committees or employing other appropriate mechanisms, to inform project design and implementation as needed.*
    c. *Project aligns with the coequal objectives and the WF 2050 guiding principles.*
    d. *The project proponent has demonstrated a clear commitment to WF2050 implementation.*
3. *If a consensus cannot be reached within the Water Forum for endorsing a project, no action will be taken by the Water Forum.*
4. *If a project is determined by consensus within the Water Forum to be in direct and clear conflict with the Water Forum's coequal objectives, it is possible that the Water Forum would take a position of opposition to the project.*
5. *All signatories retain their existing ability to comment or provide input on specific details of facility design, financing, and construction of projects.*

WATER FORUM AGREEMENT 2050

California American Water Purveyor Specific Agreement

Updated: January 8, 2026

California American Water is submitting this document as a commitment to the Water Forum for surface water management of the American River. This agreement follows the Purveyor Specific Agreement (PSA) Template and Guidelines and addresses surface water management, current and future diversions from the American River, dry conditions management, critically low storage conditions in the Folsom Reservoir, and a project list to support coequal objectives. We recognize that climate variability is impacting water resources in the region. The continuing implementation of the historic Sustainable Groundwater Management Act (SGMA) in the Sacramento region provides opportunities to ensure alignment for the sustainable management of our shared water resources.

Purveyor Background

California American Water is an investor-owned utility operating under the rules and regulations of the California Public Utilities Commission (CPUC). California American Water has seven service areas within the metropolitan area of Sacramento County; (1) Antelope, which serves the communities of Antelope and Elverta; (2) Lincoln Oaks, which serves portions of Citrus Heights and North Highlands; (3) Parkway located in the Florin area, (4) Fruitridge Vista located in the Lemon Hill area, (5) Suburban/Rosemont, which serves Rosemont and the western portion of Rancho Cordova; (6) Arden in the Arden Arcade area, and (7) Security Park in the Sunrise Douglas area. Additionally, California American Water provides water to the West Placer service area, located just north of the Antelope service area in Placer County. As of January 2024, California American Water had 65,467 active connections within these eight service areas. California American Water serves water to two additional areas within Sacramento County, the City of Isleton and the community of Walnut Grove; both areas rely solely on groundwater. California American Water's service areas may be extended from time to time as approved by the CPUC.

Groundwater

Groundwater is the primary source of supply for California American Water's systems in Sacramento County. All the Sacramento County water systems are within the boundaries of the Sacramento Valley Groundwater Basin of the Sacramento River Hydrologic Region as identified by California Department of Water Resources (DWR) in its Bulletin 118 updated in 2018.

- Antelope, Arden, and Lincoln Oaks are located within the North American Subbasin.

- Fruitridge, Parkway, Security Park, and Suburban-Rosemont are located within the South American Subbasin.

There are currently 101 active groundwater wells in these seven service areas. The total production capacity is approximately 70,720 gallons per minute (gpm). **Table 1** summarizes the wells by service area.

California American Water does not use groundwater to supply its West Placer service area. Under a franchise agreement with Placer County, the provision of domestic water service by California American Water shall be consistent with the water source requirements and conditions adopted by the county as applicable to the specific county general plan policy, community plan, or zoning for, or directly affecting, the property to be so served.

Table 1. Groundwater Wells by Service Area

Service Area	Number of Wells	Total Well Capacity (gpm)
Antelope	17	13,580
Arden	5	2,350
Fruitridge Vista	13	7,410
Lincoln Oaks	22	14,750
Parkway	19	14,450
Security Park	1	200
Suburban-Rosemont	24	17,980
Total	**101**	**70,720**

Purchased Water

California American Water's Arden, Parkway, and Suburban-Rosemont service areas lie within the Place of Use (POU) for the City of Sacramento's American River Water Rights. In 2010, California American Water revised an existing wholesale supply agreement with the City to receive a maximum of 3.46 million gallons per day (MGD) of non-firm supply (defined as surplus capacity in the City of Sacramento's treatment and transmission facilities that is available to divert, treat and deliver potable water to California American Water after all the demands of the City's prior wholesale and wheeling service customers and present and future retail water service customers are met) during off-peak periods (October 15th through May 14th), plus an additional 2.3 MGD of firm capacity, for a total of 5.76 MGD, that can be delivered to the Arden, Parkway, or Suburban-Rosemont service areas. The agreement stipulates that the City would supply surface water unless the Lower American River is below the Hodge Flow Criteria, in which case the City would produce groundwater instead of surface water when demands exceed 1.13 MGD. This mixed supply is available to California American Water up to 2.3 MGD.

California American Water also has an agreement with the City of Sacramento for the Fruitridge service area, which was carried over from the agreement between the Fruitridge Vista Water Company and the City. Through this agreement, California American Water can purchase up to 3.24 MGD of water from the City to serve its Fruitridge service area.

Sacramento County Water Agency (SCWA) supplies water to the Security Park service area. The current agreement between California American Water and SCWA allows California American Water to take up to 50 gpm of potable water.

Sacramento Suburban Water District (SSWD) and California American Water have an agreement from 2005 that allows California American Water to purchase up to 2,000 AFY of water from SSWD to serve its Antelope and Lincoln Oaks service areas.

California American Water has an agreement with Placer County Water Agency (PCWA) to purchase water for its West Placer service area. The agreement allows for purchase of 3 MGD and a maximum delivery rate of 2,362 gpm. Additional capacity can be purchased if needed.

Table 2 summarizes the wholesale supply interties in each service area. Note that it does not include approximately 30 emergency interties.

Table 2. Wholesale Interties

Service Area	Wholesale Provider	Number of Interties*
Antelope	SSWD	2
Arden	City of Sacramento	1
Fruitridge	City of Sacramento	2
Lincoln Oaks	SSWD	1
Parkway	City of Sacramento	1
Security Park	SCWA	1
Suburban-Rosemont	City of Sacramento	1
West Placer	PCWA	3

* does not include emergency interties

Current and Projected Water Demand

Table 3 summarizes the current and projected water demand by service area in million gallons (MG). The projected water demand is from the 2020 Urban Water Management Plan (UWMP).

Table 3. Current and Projected Demand (MG)

Service Area	2023	2040
Antelope	1,190	1,536
Arden	442	461
Fruitridge	928	932
Lincoln Oaks	1,591	1,960
Parkway	2,277	2,812
Security Park	6	1,020
Suburban-Rosemont	2,543	3,162
West Placer	358	1,095

Surface Water Management

The coequal objectives of the Water Forum are (1) to provide a reliable and safe water supply for the region's economic health and planned development and (2) to preserve the fishery, wildlife, recreational, and aesthetic values of the lower American River. With the exception of the West Placer service area, California American Water relies primarily on groundwater to serve its customers. However, as a member of three groundwater sustainability agencies (West Placer Groundwater Sustainability Agency, Sacramento Groundwater Authority, and Sacramento Central Groundwater Authority), California American Water must use groundwater responsibly and therefore prioritizes the use of purchased water within the limits of the purchase water agreements when it's available, plentiful, and economically feasible.

Current Diversions

California American Water's current diversions from the American River are through the four agencies from which California American Water purchases water. The supply sources from these agencies are described briefly below:

- **City of Sacramento's** wholesale supply sources include American River and groundwater, the majority of this being from the American River.
- **PCWA** supplies water from Pacific Gas and Electric and the Middle Fork American River project and plans to deliver water from the Central Valley Project, supplied by the American River.
- **SCWA's** supply sources include surface water, groundwater, and non-potable (recycled) water. Surface water is mainly supplied from the Sacramento River, with some diversions from the American River.
- **SSWD** relies primarily on groundwater, but imports water from Folsom Reservoir and the Lower American River through water purchases from PCWA and the City of Sacramento.

Table 4 summarizes the amount of water California American Water purchased from these four agencies for the past five years.

Table 4. Purchased Water (MG)

Wholesale Water Agency	2023	2022	2021	2020	2019
City of Sacramento	680.5	339.7	863.0	1481.7	460.9
PCWA	357.8	365.3	392.6	359.6	298.6
SCWA	0.3	0.4	0.3	0.4	0.1
SSWD	290.4	0.0	2.0	48.8	482.9

Future Projected Diversions

Projected diversions consider conditions when the Unimpaired Inflow to Folsom Reservoir (UIFR) is above 950 thousand acre-feet (TAF). Under normal conditions, California American Water intends to use surface water as it is available through purchase water agreements with the City of Sacramento, PCWA, SCWA, and SSWD.

Drier Conditions Management

"Drier conditions" is defined as the condition where the UIFR is between 950 TAF and 400 TAF. Supply management includes the following expectations:

- No change is anticipated in the availability of the City of Sacramento's supply, as indicated in their 2020 UWMP. Regardless, California American Water commits to reducing the amount of purchased water from the City in drier years.
- SSWD has agreed not to use any water from the Lower American River in years other than wet years (when UIFR is greater than or equal to 1,600 TAF), although SSWD still would have groundwater available. Regardless, California American Water's agreement with SSWD does not guarantee that supply will be available and it is assumed that in drier years, California American Water will plan for this supply source to be unavailable.
- While the demand in Security Park can currently be met using groundwater, the service area is expected to grow significantly in the near future due to the Rio Del Oro development. California American Water intends to serve this area primarily with purchased water from SCWA, with groundwater as a back-up source for use during dry conditions.
- PCWA does not expect to see a reduction in Middle Fork Project (MFP) supply in a dry year, although Pacific Gas and Electric Company (PG&E) and Central Valley Project (CVP) supplies would be reduced to 50%. Shortfalls in supply would be addressed by PCWA thorough groundwater production.

Driest Conditions Management

"Driest conditions" refers to the condition in which the UIFR is less than 400 TAF. In these conditions, supply will be managed under the following expectations:

- California American Water's wholesale supply agreement with the City of Sacramento is subject to Hodge Flow Criteria on the Lower American River and inflow to the Folsom Reservoir (i.e., UIFR less than 400 TAF). The firm capacity component specifies a minimum of 2.3 MGD available throughout the year and the non-firm capacity of 3.46 MGD is available during non-peak periods. Although the City's 2020 UWMP indicates that the City has adequate water supply to meet demands during multiple dry years through the year 2040, it is assumed that only the firm capacity will be available.
- As with the "drier" condition scenario, SSWD water is assumed to be unavailable for purchase during driest conditions.
- Similar to the "drier" year conditions, any reductions in supply from SCWA to serve Security Park will be met using groundwater, to the extent it is available.
- PCWA does not expect to see a reduction in MFP supply during the driest conditions, but PG&E water will be assumed unavailable and CVP supplies would be reduced to 25%. Shortfalls in supply would be addressed by PCWA thorough groundwater production.

Critically Low Storage Conditions

In the event of catastrophically low storage at Folsom Reservoir, two conditions must be addressed:

1. Potential operations in spring and summer when Folsom Reservoir storage is forecasted to reach 110 TAF at some point in the next 12 months.
2. Potential operations in summer and fall when Folsom Reservoir storage is below 110 TAF.

In both cases, California American Water will prioritize the use of groundwater wells and greatly reduce or eliminate the use of purchased water to the extent reasonably possible. In the case that purchased water includes groundwater, California American Water will prioritize use of its own groundwater wells to the extent reasonably possible, to allow other users access to wholesale agency groundwater water supplies.

While there are currently restrictions on California American Water's use of groundwater to supply its service area in West Placer, California American Water's agreement with PCWA does allow for California American Water to construct and use groundwater facilities, with the requirement that the use of PCWA water be prioritized, when available. The agreement further states that PCWA may instruct California American Water to reduce demand for surface water by up to 25 percent during periods of drought in areas where groundwater is available to ensure supply is available to other areas that do not have access to groundwater. Therefore, it may be feasible to negotiate with Placer County to obtain the ability to develop emergency groundwater sources.

Demand Management

California American Water has been offering conservation and water efficiency programs to its customers since the early 2000s. Conservation and efficiency programs help secure long-term water supply reliability, help with effective water demand management and peak water demand reduction, provide customer education on conservation and efficiency practices, and provide affordability by lowering customers' water bills.

California American Water's conservation and efficiency programs are also playing a critical role in the Company's response to California state regulations and policies pertaining to water efficiency, water loss management, and groundwater management including California's Senate Bill 555 and the Sustainable Groundwater Management Act. Senate Bill No. 606 (2017-2018 Reg. Sess.) ("SB 606") and Assembly Bill No. 1668 (2017-2018 Reg. Sess.) ("AB 1668") created a new framework for long-term improvements in water conservation and drought planning commonly referred to as "Making Conservation a California Way of Life" regulation. The two bills strengthen the state's water resiliency in the face of future droughts with provisions that include establishing water use objectives ("WUO") and long-term standards for efficient water use that apply to urban retail water suppliers.

Two additional pieces of legislation, Senate Bill No. 555 (2015-2016 Reg Sess.) ("SB 555") and Senate Bill No. 1157 (2022) together establish the comprehensive legislative framework for the WUO that water purveyors must comply with starting in 2027. The WUO is the sum of a water system's use of indoor and outdoor residential water uses, commercial landscape irrigation, and distribution system water loss. The regulations also require water agencies to implement extensive non-residential water use performance measures and add substantial reporting requirements for water utilities to the state.

The challenge for utilities will be to make customers adapt to these new WUOs through an increase in conservation and efficiency measures primarily on outdoor water usage.

Meeting the WUOs will require landscape transformation shifting from turf grass to more climate-adapted plant palettes according to the Model Water Efficient Landscape Ordinance (MWELO) Principles, a shift that will be very costly for homeowners and for utilities to incentivize this change.

Many water utility customers still seem mostly unaware of the Making Conservation a California Way of Life regulation and its implications for both residential and non-residential customers.

California American Water has invested greatly in educating its customers on conservation and efficiency matters and will continue to do so and its parent corporation, American Water, received the U.S. Environmental Protection Agency's WaterSense Excellence award in 2022 and 2023 for its various water efficiency customer education programs, foremost its webinar series launched for California American Water customers and for its collaboration with other organizations to continuously innovate its conservation programs.

California American Water is committed to its ongoing strong investments in conservation and efficiency programs and initiatives to meet and exceed water conservation regulations, to meet and exceed WUO and Water Loss targets and to assure reliable and safe future water supplies to our customers in the region.

As such, California American Water proposed conservation programs that will put the Company's various service areas in the best position to comply with state regulations and policies pertaining to water conservation and water loss management as prescribed in the Making Conservation a California Way of Life framework. Additionally, California American Water has sought approval to maintain the Company's ability to implement successful conservation programs through flexibility and innovation allowing cost-effective and efficient program execution and participation in partnerships, such as the Water Forum, with other agencies' conservation programs.

As directed by Water Code Section 10632 (a)(3)(A), California American Water maintains a water shortage contingency plan (Rule 14.1) and associated enforcement tariffs (Schedule 14.1 SAC , FRT) that can be implemented upon approval by the CPUC based on operational service conditions and water supply availability.

Project List and Future Water Supply Reliability Efforts

It is understood that to support the coequal objectives and mitigate challenges facing the region under future conditions, structural and non-structural projects will be needed. The following projects are anticipated to aid in California American Water's efforts to implement the proposed commitments outlined in the PSA.

Structural

1. **Well Rehabilitation and Replacement Program** – California American Water implemented this program to ensure adequate water supply and to maintain or increase the performance of groundwater wells. Because California American Water's service areas rely heavily on groundwater, this program helps to ensure that customer demands can be met through groundwater, and the purchase of surface water is minimized.

2. **Pipeline Replacement Program** – This program was implemented to replace aging water mains, thereby reducing the risk of pipe leaks and breaks. Leaks and breaks contribute to water loss, increasing overall system demand. By decreasing water loss, California American Water decreases overall demand, including the need to purchase surface water.

3. **Advanced Metering Infrastructure (AMI)** – California American Water is upgrading meters to AMI. Information collected through this metering system can assist in identifying and reducing system losses.

Non-Structural

1. **Water Conservation Program** – California American Water encourages water conservation through efforts such as customer education and information, contributions to research on innovative conservation programs and products, and participation in committees that promote conservation measures. These actions help reduce overall demands and especially peak demands, which reduces reliance on surface water.

2. California American Water helped sponsor the River Arc project in the past, and although no longer a project partner, California American Water continues to support the project and believes it is an important project for the future of reliable water supply in the Sacramento area.

Caveats and Assurances

1. The ability for any individual purveyor to implement the surface water diversions principles will depend on their respective opportunities and constraints.

2. In circumstances where excess water is made available by the U.S. Bureau of Reclamation (Reclamation) by Article 3(f) of a purveyor's Water Repayment Contract or by a Section 215 Contract between the purveyor and Reclamation due to flood control operations at Folsom Reservoir, for the purposes of groundwater recharge, that water would not be counted as diversion water within their PSA, regardless of year type.

3. California American Water is governed by the CPUC. California American Water's agreed endorsements in, or continued implementation of, this PSA are subject to review by the CPUC. California American Water may modify or terminate its endorsements agreed to in, or implementation of, this PSA upon receiving an adverse decision relating to said endorsements or implementation by the CPUC.

4. California American Water's operations, facilities, and contracts as described in this PSA may be modified, revised or amended from time to time, and this PSA is not intended to restrict California American Water's ability to execute and implement such modifications, revisions, and amendments. California American Water shall not be required to update or otherwise amend this PSA in the event of any such modifications, revisions, and amendments to its operations, facilities, and contracts.

5. As part of the development of their quinquennial UWMPs, purveyor signatories will provide information to Water Forum staff and signatories related to the data and assumptions to be reported in their UWMPs, including; demand projections, current and planned supplies, and

drought planning scenarios. Water Forum staff will compile regional data and assumptions for presentation to Water Forum membership for review and discussion.

a. This assurance is intended to facilitate improved transparency and understanding related to the data and assumptions within the UWMPs, and to better elucidate any differences in assumptions by purveyors.

WATER FORUM AGREEMENT 2050

Carmichael Water District
Purveyor Specific Agreement

Updated: November 26, 2025

Purveyor Background

Carmichael Water District (CWD or District), formerly Carmichael Irrigation District, was formed in 1916 to serve water for irrigation and a small but growing township called "Carmichael Colonies". The District was formed under the California Irrigation District laws but changed its name to Carmichael Water District in the 1980s to reflect its transformation from a primarily irrigation water supplier to an urban water supplier. Today, CWD serves about 11,900 connections with a population of about 40,000 people. With a history of over 100 years, the District is built out with 90% residential service and a steady decrease in water demand from effective water efficiency campaigns and education.

The District's water supply portfolio has provided over 100 years of water supply reliability to its customers. The District's transition from exclusive use of surface water diverted from the American River to groundwater use and then to a sophisticated conjunctive use program, including a state-of-the-art water treatment facility, epitomizes the flexibility and adaptability that the District has displayed throughout its history. Renewed flexibility and adaptability will allow the District to handle climate change, regulatory change, and legislated conservation and water quality protection.

CWD has three main water supplies in its portfolio: surface water rights to divert the natural flows of the American River, groundwater supplies derived from its well system including banked water supplies from its long-term conjunctive use activities, and remediated groundwater supplies from its contract with Aerojet-Rocketdyne Corporation. All these water supplies are collectively managed to meet the District's demands.

Surface Water Supplies

CWD's surface water supplies consist of three appropriative water rights derived from the natural flow of the American River where water is normally available under natural conditions, subject to more senior appropriators. The supply is based upon water availability that is tied to the priority dates of these water rights. The State Water Resources Control Board (State Board) determines when there is insufficient water supply in the American River watershed to satisfy CWD's diversion rate under each water right.

The three appropriate water rights consist of two licensed and one permitted water right providing up to 32,600 acre-feet per year (AFY) with a maximum diversion rate of 50 cubic feet per second, depending

on the season of use. CWD's water rights have priority dates after 1914 and are subject to curtailment by the State Board.

Water Right	Priority Date	Diversion Rate	Volume (AFY)	Diversion Period
License 1387	1915	15 cfs	10,859	Jan – Dec
License 8731	1925	10 cfs	3,669	May – Oct
Permit 7356	1948	25 cfs	18,099	Jan – Dec

The District diverts surface water through three Ranney collector wells in the American River and treats water at the Bajamont Water Treatment Plant (BWTP). The Ranney collectors use a series of laterals extending to the riverbed to gather water and utilize the natural sands and gravel for riverbank filtration. Water flows from the collectors by gravity to a central collector and then the District conveys it to BWTP through a 48-inch pipeline.

Groundwater Supplies

Groundwater supplies constitute a major component of the District's water supply portfolio. The District conjunctively manages its surface water and groundwater supplies to optimize the uses of these water assets.

The District currently operates 4 groundwater wells and is in the process of replacing 2 old wells and constructing a new well. These projects are in various stages of construction and are projected to be completed in 2026. The projected capacity for the wells will be about 8,000 to 10,000 gallons per minute (11.5 million gallons per day (MGD) to 14.4 MGD).

The District plans to further its conjunctive use program by utilizing Aquifer Storage and Recovery (ASR) technology to inject treated water from the BWTP when surface water is plentiful to maintain groundwater levels in the basin. The estimated annual capacity for storage is about 1,500 AFY to 3,000 AFY during normal and wet years. The District plans to invest additional resources in conjunctive use and water banking and will continue to implement additional ASR wells when replacing old wells that have reached the end of their useful life.

Alternative Supplies

The District may access remediated groundwater supplies from the Aerojet Groundwater Extraction and Treatment (GET) LA and LB facilities located within the District's service area. Aerojet makes these water supplies available through the extraction, treatment, and discharge of groundwater into the American River. The District has exercised its option to divert this remediated groundwater when its surface water rights have been curtailed.

Distribution System of Note

The District's water delivery system consists of both a distributed supply from groundwater wells and a centralized supply from the BWTP. The supply capacity is aided by two ground level water storage tanks, the La Vista Tank and the Dewey Tank, with a combined available storage capacity of 4 million gallons. The network of distribution pipelines consists of water supply mains ranging in size from 4-inch to 18-inch pipes to larger water mains of 24-inch and 30-inch pipes.

The District also maintains an intertie with Fair Oaks Water District and Citrus Heights Water District and four interties with Sacramento Suburban Water District.

Surface Water and Groundwater Management

The table below summarizes District water demand (by source) from 2006 through 2024. The Purchased Water column indicates additional water acquired and used during surface water right curtailment periods via short-term temporary contracts with Aerojet for additional remediated groundwater, when available, and with San Juan Water District. These contracts were single-year contracts, and the supplies are no longer available. The District's total demand has decreased significantly since 2006.

Year	Surface Water (AFY)	Groundwater (AFY)	Purchased Water (AFY)	Total
2006	8,971	3,519	0	12,490
2007	9,509	2,867	0	12,376
2008	10,422	1,581	0	12,003
2009	8,965	1,609	0	10,574
2010	8,217	1,518	0	9,735
2011	7,849	1,469	0	9,318
2012	8,315	1,570	0	9,894
2013	8,369	2,030	0	10,399
2014	2,441	3,417	2,501	8,359
2015	2,429	2,543	2,169	7,142
2016	6,254	1,189	0	7,443
2017	5,897	2,384	0	8,280
2018	5,633	2,718	0	8,352
2019	6,051	2,165	0	8,216
2020	4,342	4,172	0	8,514
2021	4,023	3,779	865	8,667
2022	3,264	5,176	159	8,599
2023	5,656	2,481	0	8,138
2024	6,479	2,151	0	8,630

Current Diversions

CWD's recent diversions from the American River are listed in the table below.

Year	Total (AFY)	Note
2014	2,441	Curtailment year
2015	2,430	Curtailment year
2016	6,254	
2017	5,897	
2018	5,633	
2019	6,051	
2020	4,342	Groundwater substitution transfer year
2021	4,023	Curtailment year

Year	Total (AFY)	Note
2022	3,264	Curtailment year and groundwater substitution transfer year
2023	5,656	
2024	6,479	

Future Projected Diversions

As the District is built out, the future projected diversions are expected to be similar to current conditions. Future in-fill projects will most likely reduce current irrigated areas and comply with regulatory water conservation standards. Future water efficiency measures will also limit additional diversions from the American River.

Future diversions from the American River may increase during normal and wet years by 1,500 to 3,000 AFY for storage of surface water in the groundwater basin via ASR operations.

Wet Conditions Management

Wet conditions occur when the Unimpaired Inflow Folsom Reservoir (UIFR) is ***greater than 1.6 Million Acre Feet***. This threshold is not considered a formal definition of what constitutes a "wet year" or "wet conditions" on the American River but was utilized in the original Water Forum agreement as a basis for surface water commitments. It is expected that additional analysis and discussions will be conducted as part of the American River Climate Adaptation Program (ARCAP) to explore and define what other potential criteria could be used to guide regional operations in wet times. Where possible, the District will expand its conjunctive use operations and increase its diversions to groundwater storage by 1,500 to 3,000 AFY through its ASR wells.

Drier Conditions Management

In drier conditions, when the UIFR is ***between 950 Thousand Acre Feet (TAF) and 400 TAF***, the District will implement water conservation measures to reduce demand by 10% from normal, or as required by the District's Water Shortage Contingency Plan. Where possible, the District will prioritize groundwater use to leave water in the LAR.

Driest Conditions Management

In the driest conditions, when the UIFR is ***less than 400 TAF***, the District will implement water conservation measures to reduce demand by 10 – 20% from normal or as required by the District's Water Shortage Contingency Plan. Where possible, the District will prioritize groundwater use to leave water in the LAR.

Critically Low Storage Conditions

In critically low Folsom Reservoir storage conditions, the District would most likely be required to cease water diversions from the LAR per curtailment orders issued by the State Board or terms and conditions in the Healthy Rivers and Landscapes Agreements. If curtailed, the District would use its groundwater resources to meet demands and, if necessary, acquire additional water to supply demands as available. The District would also implement its Water Shortage Contingency Plan that aligns with a potential water supply shortage and comply with any applicable mandates issued by the State Board.

Demand Management

CWD is committed to abide by relevant water conservation and water use efficiency regulations. At the time of signing, key requirements are associated with the 2024 "Making Conservation a California Way of Life" regulations, Assembly Bill (AB) 1572 related to irrigation of non-functional turf with potable water, and the Model Water Efficient Landscape Ordinance (MWELO), which encourages low water use and native landscaping for new development.

CWD has participated and will continue to participate in the Regional Water Authority's Water Efficiency Program, especially for regional compliance with the Commercial, Industrial, and Institutional (CII) best management practices and regional non-functional turf outreach, along with regional messaging. CWD also offers water efficiency surveys and rebates for turf replacement, smart sprinkler controllers, and Flume Water's Smart Home Water Monitor and Leak Detector. Continuation of the rebate program is subject to CWD Board of Directors approval.

Potential demand management actions include:

- Developing programs to assist in the conversion of publicly owned, commercial, and institutional landscaping to low-water-use native landscaping.
- Expand and strengthen regional conservation messaging about plant watering needs.
- Provide additional water use efficiency rebates to customers.
- Track customer water use and develop targeted outreach opportunities for high-water-use customers.
- Maintain and implement water waste prevention programs.
- Maintain customer outreach and communication programs to educate and inform customers of state water use efficiency requirements.
- Maintain customer programs to support the implementation of Best Management Practices for the CII sectors.

Project List

Structural

Rehabilitation, modernization, or replacement of existing infrastructure as outlined below:

- Rehabilitation and replacement of Ranney collector laterals to maintain capacity and infrastructure integrity.
- Replacement of existing wells at the end of their useful life and modernize with ASR capabilities.
- Replacement of existing pipelines in poor condition to improve water transmission reliability.
- Distribution pressure zone modifications for efficient water use and energy management.
- New groundwater facilities consistent with the adopted Groundwater Sustainability Plan.
- Projects and programs to ensure success of the Healthy Rivers and Landscapes Program or a similar tributary-specific program that improves the ecosystem, protects local water entitlements, and maintains better cold water pool conditions in Folsom Reservoir and the LAR.

Non-Structural

- Water transfers when available consistent with the Groundwater Sustainability Plan and the Water Code.
- Additional groundwater storage opportunities in the Sacramento Regional Water Bank.
- Support and participate in regional partnership opportunities with other water purveyors that provide reliability to regional water supply systems and benefits to the LAR.
- Agreements with neighboring purveyors for conjunctive use opportunities.
- Extension and/or license of water entitlements.
- Regional water efficiency and conservation campaigns.

Caveats and Assurances

1. CWD was established over 100 years ago and is mostly built out. Structural projects listed above for rehabilitation, modernization, or replacement of existing infrastructure are key for water supply reliability to its customers. CWD seeks support in implementation of rehabilitation, modernization, and replacement of old infrastructure for supply reliability, operational efficiency, and water conservation objectives.
2. The District uses surface water supplies, when possible, to protect its groundwater supplies and prevent migration of contaminant plumes associated with the Aerojet facilities in Sacramento County. The District will continue to practice conjunctive use to meet existing and future needs and manage dry and critically dry conditions as they arise in the future.
3. Acknowledge that the duty of a water purveyor is to simultaneously provide an affordable, reliable, and high-quality water supply to its customers. Proposals that favor one of these goals over another could threaten a water purveyor's ability to achieve all goals simultaneously.

WATER FORUM AGREEMENT 2050

City of Folsom
Purveyor Specific Agreement

Updated: January 8, 2026

Purveyor Background

The City of Folsom (City) is a public agency that provides potable water directly to its residential and business customers. The City's boundaries are not coterminous with the City's water service area. The City's water system is divided into five (5) distinct water service areas. The water service areas are listed below and shown in **Figure 1**.

- Folsom West Service Area
- Folsom East Service Area
- Nimbus Service Area
- Folsom Plan Area Service Area
- Ashland Service Area

The City obtains its surface water supply directly from a diversion point in Folsom Reservoir. The City's water service contracts allow it to develop an intake facility at the Folsom South Canal, but the City has not yet done so. For areas south of the American River, the City takes deliveries from the Natoma Pipeline, a 42-inch steel pressure pipe that originates at Folsom Dam. The Natoma Pipeline splits into two separate lines: one line to the Folsom Prison water treatment plant (WTP), and one line to the Folsom WTP. At the inlet to the Folsom WTP, the raw water line splits. A portion of the raw water is delivered to the Willow Hill Reservoir. This portion of the water has served non-potable industrial uses on the Aerojet Industrial Property (Aerojet). The balance of the water is delivered to the Folsom WTP. After treatment at the Folsom WTP, water is stored and pumped through a system of reservoirs and pumping stations to seven pressure zones. Groundwater Extraction and Treatment (GET) A and B facilities are now being used to serve most of Aerojet's non-potable water needs, which has allowed the City to reduce surface water diversions from Folsom Reservoir since 2015.

For the Ashland Service Area, water is diverted from the Folsom Reservoir and piped to the Sydney N. Peterson WTP, which is owned and operated by San Juan Water District (SJWD). After treatment, water is stored in Hinkle Reservoir until SJWD releases and pumps it to the Ashland Service Area. While SJWD provides wholesale water supplies to the Ashland Service Area, it is conveyed to customers through City infrastructure, including service connections with meters. The water delivered to Ashland Service Area derives from SJWD's water entitlements and contracts.

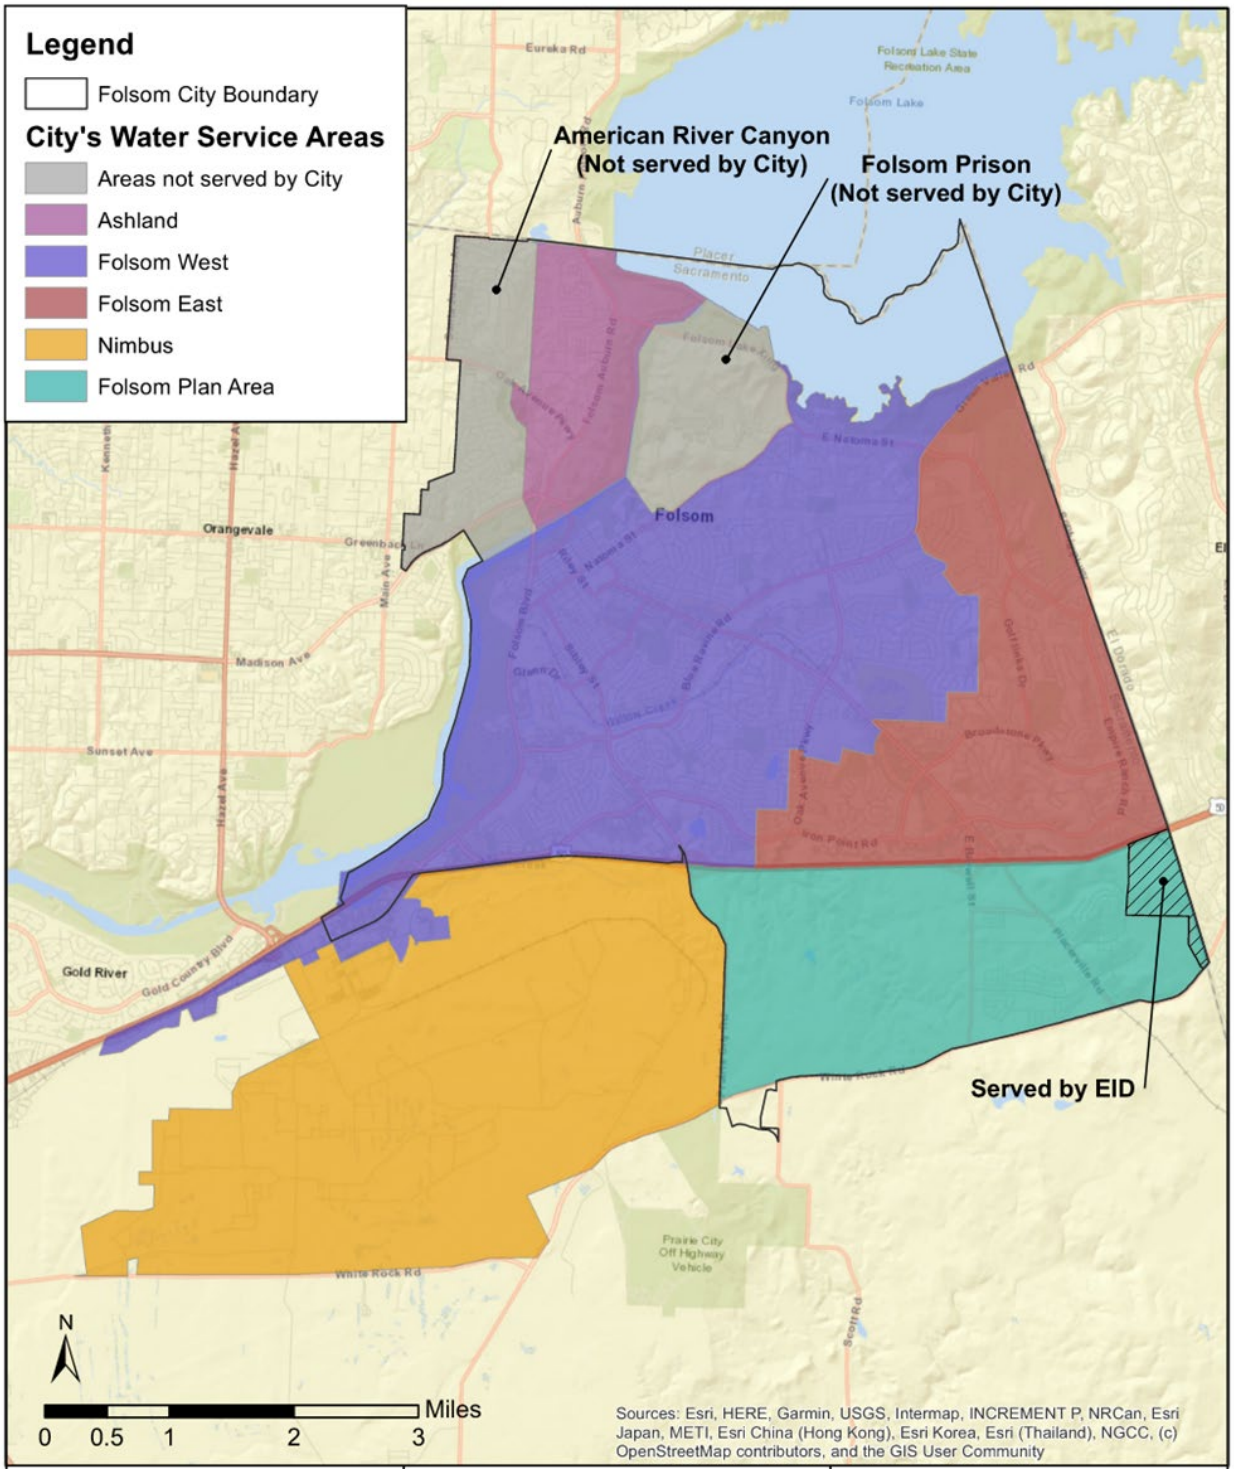

Figure 1. City of Folsom Water Service Areas

The City previously delivered raw water supplies to Aerojet at its industrial facilities; however, remediated water derived from GET A and GET B is now directly plumbed into Aerojet facilities for non-potable purposes. Even though the City does not deliver remediated water to Aerojet, the City does have rights to the remediated water, which they can utilize for non-potable use within the City's water service areas. This remediated supply could offset raw or potable water demands on the City's water system that are derived from its water entitlements and contracts and delivered from Folsom Reservoir.

The City's 2023 demands from its own surface water entitlements and contracts are approximately 17,700 acre-feet. At the peak of the City's surface water diversions from its own entitlements and contracts in 2008, total surface water diverted was 29,560 acre-feet serving a population of approximately 53,375. The 2023 population served using the City's entitlements and contracts was approximately 71,550. The overall water use reduction from 2008 to 2023 is approximately 40% while the population increased by approximately 34% during that same period.

The City's projected build-out demands derived from the City's water entitlements and contracts are approximately 25,500 acre-feet per year in 2045 to serve a population of approximately 108,530. For the Ashland Water Service Area, from San Juan Water District's water entitlements and contracts, 2023 demands were approximately 1,100 acre-feet and build-out demands are approximately 1,120 acre-feet per year. **Table 1** summarizes the City's water entitlements and contracts. The Ashland Water Service Area is mostly built-out with a 2023 population of approximately 3,400 with an expected population of 3,600 at build-out.

Table 1. Water Entitlements and Contracts

Water Rights	Supply (AFY)	Diversion Point	Place of Use	Transferable
Pre-1914 Appropriative Right	22,000	Folsom Reservoir, Folsom South Canal	Folsom Service Area	Yes
Pre-1914 Appropriative Rights	5,000	Folsom Reservoir, Folsom South Canal	Folsom Service Area	Yes
CVP Repayment Contract	7,000	Folsom Reservoir	Folsom Service Area	Yes
SJWD Agreement[1]	1,100	Folsom Reservoir	Ashland Service Area	No
GET A and GET B Supply	3,250	Direct Application	Folsom Service Area	Yes
Total Supply	38,350	--	--	--

[1.] The SJWD Agreement states that the City will receive the water supply needed for the Ashland Service Area from SJWD unless there are shortage reductions required under the agreement between the City and SJWD. This water supply does not impact City's water supplies available under other Contracts.

CVP= Central Valley Project; GET= Groundwater Extraction and Treatment; SJWD= San Juan Water District

Surface Water and Groundwater Management[36]

Some of the City's water supplies are subject to reduction under certain conditions. These conditions may manifest through (a) hydrological circumstances, like a drought; (b) the City's regional relationships, like the Water Forum; and (c) legal and regulatory constraints, like species protection in the Sacramento-San Joaquin Bay Delta, curtailment orders from the State Water Resources Control Board, or an Executive Order from the Governor. Water supply reductions impact the availability of each water asset in a different way that may impact the City's operations and long-term planning. These aspects of the City's water supplies are outlined below. The City does not currently pump any groundwater and does not have any groundwater pumps or related infrastructure to pump groundwater.

Pre-1914 Rights for 22,000 AFY

The City's 22,000 acre-feet per year (AFY) entitlement is based on a pre-1914 appropriative right from the South Fork of the American River established by the Natoma Water Company in 1851. The Natoma Water Company's original pre-1914 water right established a maximum diversion rate "to fill a Canal Eight feet wide and Four feet deep with a current running ten miles per hour." This correlates to a diversion rate of 60 cubic feet per second (cfs) and a maximum allocation of 32,000 AFY. This right is held jointly with Golden State Water Company (GSWC) pursuant to a co-tenancy agreement. The co-tenancy agreement means that both the City and GSWC have the right to use the water to the fullest extent possible as desired by the respective entities. The City and GSWC have allocated the supplies under the entire 32,000 AFY water right. The City unilaterally controls 22,000 AFY and GSWC controls the remaining 10,000 AFY.

The 1851 filing is the earliest in priority of perfected appropriative rights on the South Fork of the American River and is recorded. The entire 22,000 AFY of this water right is formally recognized in the settlement agreement between the U.S. Bureau of Reclamation (Reclamation) and the City. Under this agreement, Reclamation delivers this entire water supply without reduction on a permanent basis. This water asset may be diverted at its point of diversion in the water right itself, as well as Folsom Reservoir and Folsom South Canal pursuant to the settlement agreement between Reclamation and the City. The settlement agreement also requires Reclamation to deliver the entire supply under this water asset in all year types.

Pre-1914 Rights for 5,000 AFY

The City's 5,000 AFY entitlement is also based on Natoma Water Company's pre-1914 appropriative water right from the South Fork of the American River. In November 1994, the City executed a contract with Southern California Water Company-Folsom Division (SCWC) under which the City acquired the right to lease 5,000 AFY of water per year. As described above, SCWC controlled the remaining 10,000 AFY of the 32,000 AFY total water right under the original co-tenancy of the Natoma Water Company purchase. As such, the basis of this water asset is held with GSWC pursuant to the co-tenancy agreement, but the lease of the water asset to the City is pursuant to a lease agreement. This water right is also formally recognized in the settlement agreement between Reclamation and the City.

[36] The City of Folsom does not currently pump any groundwater. Although the City does not currently pump any groundwater, the City is a member of the Sacramento Groundwater Authority and the Sacramento Central Groundwater Authority.

This water asset for 5,000 AFY has the same diversion provisions as the 22,000 AFY diversion right above since both assets are derived from the same water right. Moreover, this water asset has the same priority as the 22,000 AFY water asset which makes it extremely resilient against drought conditions and regulatory curtailment.

Central Valley Project Repayment Contract for 7,000 AFY

On April 8, 1999, Reclamation entered Contract No. 6-07-20-W1372 with the Sacramento County Water Agency (SCWA) under Section 206 of Public Law 101-514, which was sponsored by Representative Vic Fazio. The contract dedicated 22,000 AFY of water, commonly called "Fazio Water," to SCWA. The City was specifically named in the SCWA-Reclamation contract as a subcontractor to gain benefit of a portion of the Fazio Water supply. On April 25, 2000, SCWA entered a separate contract with the City to provide the City with 7,000 AFY of the 22,000 AFY of Fazio Water.

The Fazio Water supply is a standard Central Valley Project (CVP) "Project Supply" water entitlement – derived entirely from federal CVP water supplies. The sole source of supply for the Fazio Water is the American River water rights held by Reclamation for diversion and storage at Folsom Reservoir. Reclamation's CVP rights to divert water are junior to the water rights that existed prior to the development of the CVP. The Fazio Water contract entitlement for the City is fairly reliable. In normal and wet years, the City may call upon the supply for delivery and should receive 100% allocation. In dry years, the water supply is subject to Reclamation's Municipal and Industrial (M&I) Water Shortage Policy.

In December 2016, the City became a direct CVP Contractor, and no longer a sub-Contractor to SCWA, through a partial assignment of the City's 7,000 AFY under Contract No. 6-07-20-1372B with Reclamation. The purpose of this assignment is to consolidate the City's water assets derived from the City's relationship with Reclamation to better facilitate administration of those water assets. In February 2020, the City and Reclamation executed a contract (Contract No. 6-07-20-W1372B-P) to convert[37] the CVP water service contract into a CVP repayment contract as authorized under the Water Infrastructure Improvements for the Nation Act.

Current Diversions

Table 2 summarizes the annual pre-1914 and CVP diversions made by the City from 2013 to 2023. These diversions all occurred from Folsom Reservoir and include both potable and non-potable uses. These totals do not include water delivered to the Ashland Service Area as that area is supplied from the SJWD water supply portfolio and not from water diverted by the City.

Table 2. Annual Diversions (2013-2023)

Year	Pre-1914 Diversions (AF)	CVP Diversions (AF)	Total Diversions (AF)
2013	23,293	1,391	22,990
2014	18,668	750	19,418
2015	16,456	450	16,906
2016	14,687	3,860	18,547
2017	15,217	4,040	19,257
2018	14,255	3,983	18,238

[37] At the time of signing the WFA, this and similar contract conversions are pending litigation.

Year	Pre-1914 Diversions (AF)	CVP Diversions (AF)	Total Diversions (AF)
2019	13,687	4,017	17,704
2020	15,808	2,910	18,718
2021	16,425	1,500	17,925
2022	16,794	1,000	17,794
2023	11,497	6,200	17,697

Future Projected Diversions

The future projected diversions under "normal" conditions (as shown below) are for when the Unimpaired Inflow to Folsom Reservoir (UIFR) is above 950 TAF. The City's 2020 Urban Water Management Plan (UWMP) identified these diversions in five-year increments to 2045, which is also the planning date for build-out of the City. The current 5-year UWMP projections will serve as the basis of diversions when the UIFR is above 950 TAF. Diversions will derive from a combination of the City's pre-1914 and CVP water supplies. **Table 3** shows the diversions under this condition.

Table 3. Future Projected Diversions

	2025	2030	2035	2040	2045
Demand Totals	20,517	22,746	24,214	25,145	25,519

Wet Conditions Management

Wet conditions will be assumed to be when the UIFR is greater than 1.6 MAF. This threshold is not considered a formal definition of what constitutes a "wet year" or "wet conditions" on the American River but was utilized in the original Water Forum agreement as a basis for surface water commitments. It is expected that additional analysis and discussions will be conducted as part of the American River Climate Adaptation Program (ARCAP) to explore and define what other potential criteria could be used to guide regional operations in wet times. Where possible, the City will support the use of regional surface water supplies to assist in regional groundwater recharge.

Drier Conditions Management

When the UIFR is between 950 TAF and 400 TAF, the City will reduce surface water diversions up to 10 percent or as required by the City's Water Shortage Contingency Plan[38], whichever is greatest. The City will also reduce CVP diversions (included in the overall 10%) as required by the CVP M&I Water Shortage Policy.

Driest Conditions Management

When the UIFR is less than 400 TAF, the City will reduce surface water diversions up to 20 percent, as required by the City's Water Shortage Contingency Plan, or as required by any mandates issued by the State of California, whichever is greatest. The City will also forego scheduling any CVP Repayment water during these conditions (included in the overall 20% or more). The City can offset surface water

[38] The City's Water Shortage Contingency Plan is based on water shortage events that directly impact the availability of the City's water supplies. The Plan is not based on the UIFR.

reductions through conjunctive use opportunities with neighboring purveyors or through water stored in existing or future surface water storage.

As an example, if the City is able to bank water in the groundwater basin and another purveyor with access to surface water and groundwater can extract the banked groundwater and use this banked water to meet their demands while at the same time reducing their surface water diversions, the City will be able to deliver this surface water to meet its customer demands. Under these arrangements, other purveyors will use groundwater in lieu of surface water equivalent to the amount that the City would continue to divert.

However, it is recognized that in years when the projected UIFR to Folsom is less than 750,000 AF there may not be sufficient water to provide the purveyors with driest year quantities specified in their agreements and provide the expected flows to the mouth of the American River. In those years, Folsom will participate in a conference year with other stakeholders on how the available water should be managed. The conferences will be guided by the conference year principles described in the Water Forum Agreement.

Critically Low Storage Conditions

The City's sources of water are all delivered through an M&I intake in Folsom Dam, which is at an elevation that would be subject to air entrainment at approximately 110,000 AF of storage in Folsom Reservoir. Because this entrainment could result in significant damage to the impellers of the pumps that Reclamation uses to pump the supplies brought through the intake to Folsom, Reclamation will install 10 floating pumps with a total capacity of 30 cfs. This arrangement will allow delivery of emergency supplies in extreme conditions even when the storage level is as low as 60,000 AF. The 30 cfs capacity of these emergency pumps is half the flow rate Reclamation is required to deliver to the City under its pre-1914 settlement agreements.

The City completed a Water Vision planning study that is a comprehensive 50-year strategy designed to secure and strengthen the City's long-term water supply. This included an analysis of risks and vulnerabilities associated with infrastructure failure and a changing climate. The primary objective was to evaluate and recommend ways to improve the reliability and redundancy of the City's water supplies, including but not limited to, a scenario of not having access to water supplies from Folsom Reservoir. Ultimately, the Water Vision developed a phasing plan with recommended projects that would diversify the City's water supply portfolio if access to current water supplies from Folsom Reservoir could not be achieved.

The City could also work with neighboring water purveyors to deliver treated groundwater through existing or new interties with the City. The City would also have to implement its Water Shortage Contingency Plan that aligns with a potential water supply shortage and would have to comply with any applicable mandates issued by the State of California.

Contributions to River Corridor Health

- Reduce direct surface water diversions from Folsom Reservoir
- Continued long-term funding for the Water Forum Successor Effort (WFSE)

- Contribute to funding for regional advocacy for the implementation of the Water Forum Agreement
- Contribute to enhanced science and monitoring along the Lower American River

Contributions to Water Supply Reliability

1. Implement conjunctive use opportunities with neighboring purveyors
2. Evaluate surface and groundwater storage options
3. Contribute to funding for regional advocacy for the implementation of the Water Forum Agreement

Demand Management

At the time of signing, key requirements are associated with the 2024 "Making Conservation a California Way of Life" regulations, Assembly Bill (AB) 1572 related to irrigation of non-functional turf with potable water, and the Model Water Efficient Landscape Ordinance (MWELO) which encourages low-water use and native landscaping for new development.

Potential[39] demand management actions could include the following:

- Develop programs to assist in the conversion of publicly owned, commercial, and institutional landscaping to low-water-use native landscaping
- Expand and strengthen regional conservation messaging about plant watering needs
- Provide water use efficiency rebates to residential and non-residential customers
- Track residential and non-residential customer water use and develop targeted outreach opportunities for high water use customers
- Maintain and implement water waste prevention programs
- Maintain customer outreach and communication programs to educate and inform customers of state water use efficiency requirements
- Maintain customer programs to support the implementation of Best Management Practices for the Commercial, Industrial, and Institutional (CII) sector
- Evaluate the feasibility of implementing residential customer programs that may include landscape conversions, irrigation system tune-ups, or water monitoring devices

Including any requirements identified in the California Water Code, the City commits to abiding by the relevant conservation and water use efficiency regulations, including following the water use reduction stages as set forth by the City's most recently adopted Water Shortage Contingency Plan.

[39] While the list of potential demand management actions is included in the City's PSA, future regulatory requirements or actions by the Folsom City Council may necessitate the need to update this list.

Project List and Future Water Supply Reliability Efforts

Structural

The following infrastructure projects will support efforts to implement the City's proposed PSA, and to support the Water Forum coequal objectives.

- New or improved interties with other purveyors that have access to groundwater and surface water
- Groundwater storage opportunities in the Sacramento Regional Water Bank
- Non-potable infrastructure to deliver remediated groundwater for non-potable irrigation purposes within the City's water service area
- Alternative raw water supply projects to improve reliability and redundancy of delivering raw water from Reclamation to the City consistent with existing water rights and contract flow rates and volumes

Non-Structural

The following list of non-structural projects will support efforts to implement the City's proposed PSA, and to support the Water Forum's coequal objectives.

- Agreements with neighboring purveyors for conjunctive use opportunities
- Continued water use efficiency programs for the City
- Funding for water use efficiency rebates for the City
- Conserved water transfers consistent with the California Water Code that do not negatively impact the Lower American River
- Water banking transfers consistent with the Sustainable Groundwater Management Act
- Support and participate in regional partnership opportunities with other water purveyors that provide reliability to regional water supply systems and benefits to the Lower American River
- Support, and participate as needed, SCWA and other regional partners that would consider opportunities to utilize the Freeport Regional Water Authority to benefit the co-equal objectives

Caveats and Assurances

1. The ability for any individual purveyor to implement the surface water diversion principles will depend on their respective opportunities and constraints.
2. In circumstances where excess water is made available by Reclamation by Article 3(f) of a purveyor's Water Repayment Contract or by a Section 215 Contract between the purveyor and Reclamation due to flood control or "uncontrolled season" operations at Folsom Reservoir, for the purposes of groundwater recharge, that water would not be counted as diversion water within their PSA, regardless of year type.

3. Support for the development of redundant water supplies that do not negatively impact the co-equal objectives of the Water Forum Agreement and are consistent with the existing water rights and contract volumes included in the City's 2035 General Plan (amended and adopted on August 27, 2024).
4. Water demands in future UWMPs shall be re-visited and updated in the surface water diversions table.
5. Proposed reductions in surface water diversions shall demonstrate a positive impact to the fisheries or habitat along the Lower American River, i.e., the City is not reducing diversions only for the sake of reducing diversions.

Future regulatory changes may require modifications to dry-year actions because achieving certain reductions may not be feasible or achievable.

WATER FORUM AGREEMENT 2050

City of Roseville
Purveyor Specific Agreement

Updated: January 8, 2026

Purveyor Background

The City of Roseville Environmental Utilities Department (Roseville) is a public utility owned and operated by the City of Roseville, providing drinking water, wastewater, recycled water, and waste services to the Roseville community.

Roseville recognizes that climate change, population growth, and regulatory requirements are creating increasing challenges in balancing water supply and demand. Groundwater and surface water alike are under pressure, and Roseville is committed to advancing sustainable solutions that protect both resources for future generations, while maintaining our commitment to the health of the lower American River (LAR).

To address these challenges, Roseville participated in the American River Basin Study (ARBS) that was completed in 2022. The study was developed by the U.S. Bureau of Reclamation (Reclamation) in partnership with Roseville and other regional water agencies. Building on earlier statewide studies, the ARBS focused specifically on the American River Basin; developing tools, analyses, and climate adaptation strategies to strengthen water supply reliability, protect endangered species, and support sustainable reservoir operations. Roseville's participation reflects our awareness of climate change challenges and our commitment to working collaboratively with local, state, and federal partners to bring forward long-term, regional water solutions for our community, the region, and the LAR.

In addition, Roseville has embraced the requirements of the Sustainable Groundwater Management Act (SGMA) and is an active member of the West Placer Groundwater Sustainability Agency (WPGSA), which manages a portion of the North American Subbasin alongside Placer County, the City of Lincoln, Placer County Water Agency (PCWA), and California American Water. Through this partnership, Roseville and our Groundwater Sustainability Agency Partners are implementing a Groundwater Sustainability Plan (GSP) that protects against groundwater overdraft, supports reliable supplies for residents, agriculture, and businesses, and contributes to land and habitat conservation.

Roseville also continues to expand our Aquifer Storage and Recovery (ASR) program as part of a conjunctive use strategy, which is further discussed in this Purveyor Specific Agreement (PSA). This innovative approach safeguards our groundwater basin, improves regional resilience, secures reliable

water supplies and can be used in a conjunctive way to benefit the LAR, particularly during the driest years.

Together, these efforts underscore Roseville's commitment to climate change adaptation, groundwater sustainability, and regional collaboration, helping to ensure a resilient water future for our community, the region, and the LAR.

With these challenges, Roseville has developed diversity in its water supply and its water infrastructure over the past three decades to become more resilient and positioned to meet the Water Forum's coequal objectives of water supply reliability and river corridor health.

The primary water supply for Roseville is surface water diversions from Folsom Reservoir. Roseville has contracts with Reclamation for up to 32 thousand acre-feet (TAF) of water per year, and PCWA for up to 34 TAF per year. Raw water from Folsom Reservoir is conveyed to Roseville's water treatment plant in the Granite Bay area and is then distributed through Roseville's 600 miles of water mains to customers. Current surface water entitlements total around 66 TAF per year. Roseville maintains options for an additional 10 TAF of water supplies from PCWA, and although those options are contractually available, they have not yet been exercised.

Roseville also currently has 7 Aquifer Storage and Recovery (ASR) wells providing a maximum extraction capacity of 23.5 TAF/year. Roseville is planning to expand their groundwater program to have a more robust water supply available in the event of a water shortage. Roseville's ASR program also has the capacity to inject approximately 11 TAF of treated water back into the groundwater basin.

Roseville has a Recycled Water Program with source water from two regional wastewater treatment plants that operate with an annual production rate of approximately 3.8 TAF of recycled water annually. This water serves the landscape watering needs of parks, golf courses, and medians in the newer western section of Roseville.

Roseville has 17 interties with the surrounding purveyors including PCWA, San Juan Water District (SJWD), California-American Water Company, Citrus Heights Water District, and Sacramento Suburban Water District (SSWD).

Roseville has invested heavily in long-term water efficiency efforts over the last couple of decades, and, as per capita water use has declined, water demands have remained relatively stable despite population growth in the area.

Surface Water and Groundwater Management

The following sections outline the opportunities for Roseville to contribute to both of the Water Forum coequal objectives, while adhering to the guiding principles for surface water diversions.

1. Roseville intends to prioritize alternative water supplies to surface water supplies from the American River system in dry conditions to provide flow and water quality[40] benefits for the LAR, such as:
    - Pursuing opportunities for increased groundwater pumping to allow surface water to remain in the LAR.

[40] Including temperature, dissolved oxygen, and potentially other characteristics.

    - Pursuing opportunities for increased diversions from the Sacramento River as an alternative to surface water from the American River system.
2. Ensure surface water commitments are in balance with regional efforts for groundwater sustainability.
    - Prioritize surface water diversions in wet conditions to allow groundwater recharge.
3. Protect regional surface water entitlements to ensure local control of water to benefit the coequal objectives, with the following benefits:
    - Enabling contributions to river corridor health.
    - Reducing surface water diversions from Folsom Reservoir in the driest conditions.
    - Contributing to water supply reliability.
    - Enabling the expansion of groundwater infrastructure to allow for conjunctive use.

Current and Projected Surface Water Diversions

Current Roseville demands are approximately 32 TAF per year, including ASR, and are expected to grow to just under 63 TAF per year in 2040.

Wet Conditions Management

Roseville's intent for managing surface and groundwater under wet conditions is to follow the groundwater management guiding principles in the Water Forum Agreement 2050 (WF2050), as follows:

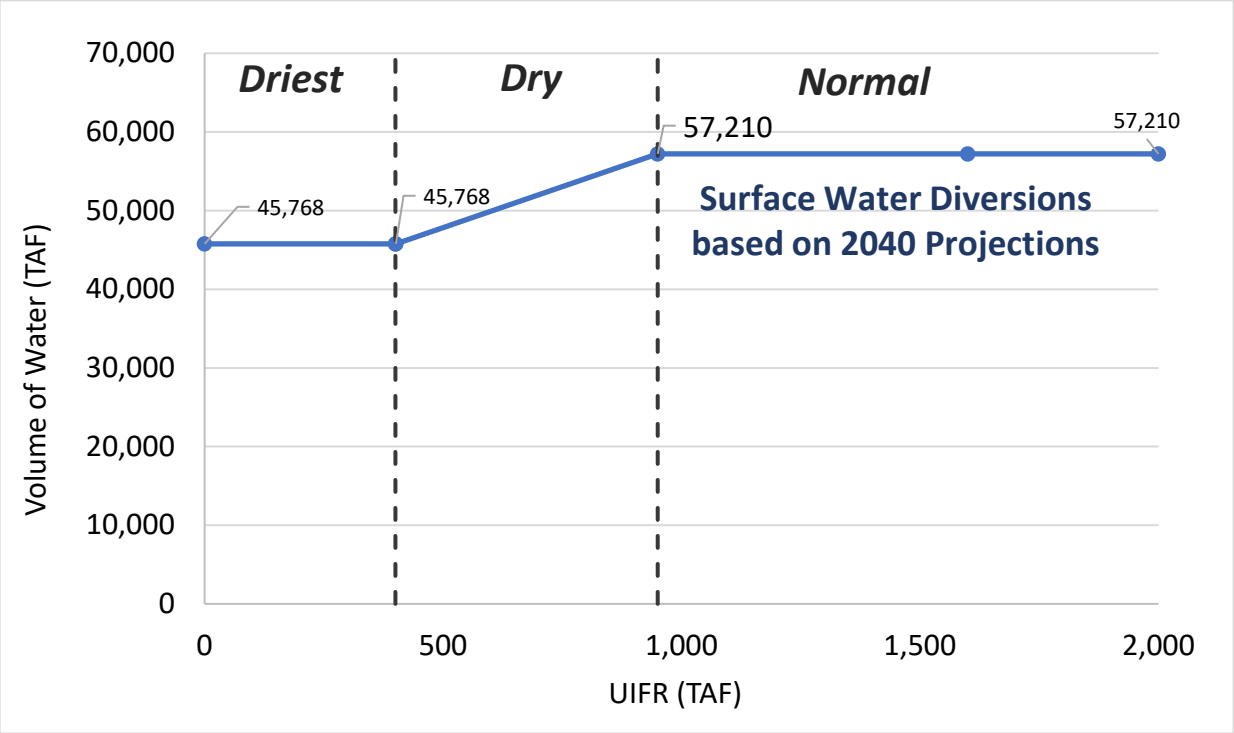

- Support conjunctive management of regional groundwater basins with surface water supplies to enhance water supply reliability and provide flow and water quality benefits to the LAR.
- Prioritize use of groundwater in dry conditions to help mitigate the impacts to surface water shortages in the LAR by supplementing Central Valley Project (CVP) water allocations from the American River with groundwater using our existing and planned aquifer storage and recovery wells.
- Work with Reclamation to maximize groundwater recharge with Repayment Contract Article 3(f) water[41] during wet years[42] with the goal of minimizing impacts to the LAR.
- Participation with our regional partners in the Sacramento Regional Water Bank Project.
- Continued investments in Aquifer Storage and Recovery (ASR) facilities.
- Commitments related to reduced surface water diversions that are based on hydrologic conditions.

[41] Article 3(f) water is what Reclamation provides currently, when available, based on Reclamation's preference. Section 215 water has been available to Roseville by Reclamation in the past. As such, the source of the water made available for recharge purposes has varied and may vary in the future.

[42] Wet conditions will be assumed to be when the Unimpaired Inflow Folsom Reservoir (UIFR) is greater than 1.6 MAF. This threshold is not considered a formal definition of what constitutes a "wet year" or "wet conditions" on the American River but was utilized in the original Water Forum agreement as a basis for surface water commitments. It is expected that additional analysis and discussions will be conducted as part of the American River Climate Adaptation Program (ARCAP) to explore and define what other potential criteria could be used to guide regional operations in wet times.

Drier Conditions Management

The sections below describe the proposed commitments in Baseline (Normal), Dry, and Driest conditions. The proposal follows the existing Water Forum Agreement structure with Unimpaired Inflow to Folsom Reservoir (UIFR) as the index. The levels of surface water diversions are proposed to be updated based on 5-year projections for demand estimates as reported in Roseville's Urban Water Management Plan (UWMP). These diversions would be updated based on each 5-year update to the Roseville UWMP.

Normal Conditions

Normal conditions would be defined as when the UIFR is projected to be ***greater than 950 TAF***. In normal conditions, Roseville's surface water diversions would be defined by the most recent UWMP's 5-year projected demand. Roseville's strategy in normal years is to not pump groundwater from groundwater wells in excess of what was injected, thus creating a bank of water for future use.

Dry Conditions

Dry Conditions could be defined as when the ***UIFR is between 950 TAF and 400 TAF***. In the first Water Forum Agreement, surface water commitments during these conditions generally follow a "wedge" shape (decreasing linearly from normal levels to the driest conditions). Per Roseville's 2020 Water Shortage Contingency Plan (WSCP), if a significant drought stage is reached, Roseville can pump additional groundwater to augment its surface water supply and make up for deficits of the surface water supply. Roseville continues to invest in development of groundwater infrastructure to increase supply reliability in times of drought, however in any given year type, Roseville must make determinations of drought stage without consideration of groundwater supplies, per the terms of the Roseville Municipal Code.

In both Dry and Driest hydrological year types, Roseville committed to forego 4,460 AF of surface water in 3 out of 8 years to support the health of the LAR. The American River Terms for Ecosystem Support and Infrastructure Assistance Needs (ARTESIAN) project agreement with the Regional Water Agency (RWA) was created to govern the administration of California Department of Water Resources (DWR) funds provided to RWA on behalf of the participants for early implementation of the American River region's 2019 Voluntary Agreement proposal.

In consideration of the funding provided by DWR under this Funding Agreement, the American River water suppliers who receive that funding agreed to jointly provide 30,000 acre-feet of groundwater-substitution water to augment, through Reclamation's operation of Folsom Dam and Reservoir as part of coordinated CVP and State Water Project (SWP) operations, stream flows in the LAR in each of three out of eight 8 years beginning in 2025. Each of those three years will be either a critical or dry year on the Sacramento Valley Index under the State Water Resources Control Board's Revised Decision 1641. This commitment is referred to as the "Flow Contribution" and each annual contribution is referred to as an "Annual Flow Contribution." Roseville, as a Participant in the RWA joint powers agreement and a recipient of grant funding, has committed to 4,460 AF.

Driest Conditions

The driest conditions are proposed to be defined as when the UIFR is 400 TAF or lower. In the driest conditions, Roseville proposes to reduce surface water diversions from Normal Diversions by 20%. This proposal is specific to surface water diversions and is not to be confused with demands. Roseville's WSCP guides operations and demands based on expected supply availability. Per Roseville's 2020 WSCP, if a significant drought stage is reached, Roseville can pump additional groundwater to augment its surface water supply and make up for deficits. Roseville continues to invest in development of groundwater infrastructure to increase supply reliability in times of drought, however in any given year type, Roseville must make determinations of drought stage without consideration of groundwater supplies, per the terms of the Roseville Municipal Code.

Critically Low Storage Conditions

Roseville's sources of surface water are all delivered through a municipal and industrial (M&I) intake in Folsom Dam, which is at an elevation that would be subject to air entrainment at approximately 110,000 AF of storage in Folsom Reservoir. Because this entrainment could result in significant damage to the impellers of the pumps that Reclamation uses to pump the supplies brought through the intake to Roseville, SJWD, and the city of Folsom, this level of storage is likely to cause "dead pool" conditions, which to date, has never occurred.

If the water level drops below the M&I intake, Reclamation would use an emergency pump on one of the three power penstocks in the dam to deliver water to Roseville and SJWD and floating barges to deliver water to Folsom. The emergency pump has a capacity of 60 cfs (43,500 AF/yr), and the barges have a capacity of 30 cfs. These facilities would allow Reclamation to access water in Folsom Reservoir between the 110,000 AF at which the M&I intake goes dry and the approximately 53,000 AF storage level at which the power penstocks go dry.

To further prepare for and mitigate this possible "dead pool" scenario, below are the current and future emergency plans on how Roseville would navigate a "dead pool" scenario at Folsom Reservoir. Additional information is provided in the Project List and Future Water Supply Reliability Efforts.

Current conditions
Max Day Demand = 55 million gallons per day (MGD)

Emergency pump at Folsom Reservoir = 19.4 MGD

- Demand Reduction at 20% realized water conservation = 11 MGD. Implement immediate water conservation to reduce customer demand during this emergency, using the powers prescribed in the Roseville Municipal Code and the City's Water Shortage Contingency Plan.[43]
- ASR Well Production = 16.7 MGD. Immediately activate Roseville's Aquifer Storage and Recovery (ASR) Wells.[44]
- Activate emergency interties = 17.3 MGD. Through mutual aid and other agreements request emergency water from PCWA and SSWD.

Buildout conditions
Max Day Demand (MDD) at buildout = 100 MGD

Emergency pump at Folsom Reservoir = 19.4 MGD

- Demand Reduction at 20% realized water conservation = 20 MGD. Implement immediate water conservation to reduce customer demand during this emergency, using the powers prescribed in the Roseville Municipal Code and the City's Water Shortage Contingency Plan.
- ASR Well Production = 25.9 MGD. Immediately activate Roseville's Aquifer Storage and Recovery (ASR) Wells.[45]
- Utilize capacity from future water supply reliability projects:
    - Raw Water Pipeline (Middle Fork Project Supply) via PCWA: 10 MGD
    - RiverArc Project: 57 MGD

Summary of Dry Conditions Management

Roseville has strategically positioned itself to meet current and buildout water demands while enhancing supply reliability and supporting environmental stewardship of the LAR. Through a combination of diversified water sources, infrastructure investments, and collaborative regional planning, Roseville demonstrates its commitment to long-term water sustainability.

Current Demand & Supply Capacity:

- MDD: 55 MGD
- For Critically Low Storage Conditions
    - With a planned 20% target demand reduction via water conservation (Revised MDD: 44.0 MGD)
- Available Supply
    - Emergency pump at Folsom Reservoir: 19.4 MGD
    - ASR Extraction Capacity: 16.7 MGD

[43] Roseville's Municipal Code requires water conservation levels for each drought stage; from 10% for a stage one drought and up to 50% for a stage five drought.

[44] Currently, Roseville has 7 active ASR wells with a production capacity of 16.7 MGD.

[45] Four additional ASR wells are planned by 2028 increasing the production capacity to 25.9 MGD of groundwater to serve to our customers' demands under mandatory water conservation.

- Emergency interties: 17.3 MGD
- TOTAL Projected Available Supply = 19.4 + 16.7 + 17.3 = 53.4 MGD

This summary reflects a supply capacity that exceeds projected demand, which Roseville plans to leverage as a key strategy for mitigating critically low storage conditions.

Buildout Demand & Supply Capacity:

- MDD: 100 MGD
- For Critically Low Storage Conditions
  - With a planned 20% target demand reduction via water conservation (Revised MDD: 80 MGD)
- Available Supply
  - ASR Extraction Capacity (11 wells): 25.9 MGD
  - Raw Water Pipeline (MFP Supply) via PCWA: 10 MGD
  - RiverArc Project: 57 MGD
  - TOTAL Projected Available Supply = 25.9 + 10 + 57 = 92.9 MGD

This summary, a conservative approach (without the emergency pump at Folsom, and without supply from emergency interties) reflects a supply capacity that exceeds projected demand, which Roseville plans to leverage as a key strategy for mitigating critically low storage conditions. These enhancements create resilience during critical shortage conditions such as droughts or potential "dead pool" scenarios at the Folsom Reservoir.

Through these efforts, the City of Roseville continues to be a regional leader in integrated water resource management, supporting both water supply reliability and the ecological health of the LAR.

Demand Management

Roseville understands that Water Code Section 10632 (a)(3)(A) requires purveyors to plan for reductions of 10%, 20%, 50%, and beyond. Roseville's current Water Shortage Contingency Plan (WSCP), as approved by the City Council, stipulates a 20% reduction in demand at a Stage 2 shortage level (when annual supplies are expected to meet 80% of the expected demand). The WSCP also includes shortage levels up to Stage 5 when supplies are only projected to meet 50% of the demands. The WSCP would continue to guide Roseville's operations and if supplies were projected to be reduced to a level requiring greater reductions, those reductions would be implemented.

To meet long-term water use targets associated with the 2024 "Making Conservation a California Way of Life" regulations and other state ordinances and ensure a sustainable supply, Roseville implements a comprehensive set of Demand Management Measures (DMMs) as outlined in its UWMP.

Core DMMs per Water Conservation Act of 2009 (Senate Bill X7-7) Requirements

- **Water Waste Prevention Ordinance**: Enforced through patrols and public reporting to curb non-essential use.
- **Metering Program**: Allows for efficient usage tracking and leak detection.
- **Conservation Pricing**: A uniform rate structure reflects true water cost and encourages efficient use.

- **Public Education & Outreach**: Ongoing campaigns, school programs, and exhibits at the Utility Exploration Center, a facility that focuses on educating Roseville customers, promote water-saving behaviors.
- **System Loss Management**: Annual audits, in-house and third-party leak detection, and potable water pipeline rehabilitation projects help reduce water loss.
- **Program Coordination & Staffing**: Certified staff manage and implement conservation programs and customer engagement initiatives.

Current Residential & Commercial Conservation Programs

- **Residential**: Includes Water Wise House Calls, toilet replacement rebates, turf replacement ("Cash for Grass"), irrigation rebates, and landscape water budget tracking.
- **Commercial**: Offers irrigation budgets and surveys, customized rebates for irrigation and appliances, and interior water use audits.
- **Additional Measures**
    - Water waste investigations
    - Advanced Metering Infrastructure (AMI) program monitoring
    - High water use investigations

Other Ongoing Conservation Efforts

- Monthly water use reporting (SB 606 & AB 1668)
- Ban on wasteful practices (SB 606 & AB 1668)
- Leak reduction initiatives (SB 606 & AB 1668)
- Model Water Efficient Landscape Ordinance (MWELO) enforcement and annual reporting to DWR
- Developing policy for non-functional turf (AB 1572) compliance
- Ongoing Roseville Municipal Code revisions to align with state water use regulations (AB 1572)
- Cross-departmental collaboration to ensure compliance with non-functional turf requirements (AB 1572)

Regional Collaboration

- **RWA Partnership**: Continued expansion of education and awareness through the Regional Water Efficiency Program (WEP) - Roseville participates in outreach, rebates, events, and award-winning campaigns such as "Summer Strong" and "Your Weekend, Your Rules," reaching millions across the region.

Future Plans

To continue to ensure that Roseville is meeting the goals and targets of the 2024 "Making Conservation a California Way of Life" regulations, Assembly Bill (AB) 1572 related to irrigation of non-functional turf with potable water, and the Model Water Efficient Landscape Ordinance (MWELO), the following proposed combination of strategies are future considerations.

- Expand customer access to real-time water use data through AMI portal enhancements to continue to create awareness of water use and consistently influence behavior for lower water use.

- Enhance outdoor water education efforts via the Inspiration Garden for both residential customers and commercial businesses.
- Continuously adapt programs based on effectiveness, funding availability, and community needs.

Caveats and Assurances

- If, and when, the City of Roseville exercises all or part of the additional 10 TAF of PCWA water, Roseville's PSA and all information herein will be updated upon written notice to the Water Forum.
- In circumstances where excess water is made available by Reclamation by Article 3(f) of Roseville's Water Repayment Contract or by a Section 215 Contract between Roseville and Reclamation due to flood control operations at Folsom Reservoir, for the purposes of groundwater recharge, that water shall not be counted as diversion water within this PSA, regardless of year type.
- Future projects and investments are described in a point in time and project aspects and details may be subject to change, at Roseville's sole discretion, to meet its water supply reliability objectives.
- Roseville and other signatories to this agreement, via the RiverArc Project, have proposed to divert water from the Sacramento River rather than diverting from the American River under certain hydrologic conditions. This would allow water to continue to flow down the LAR. Signatories conceptually endorse this RiverArc Project, subject to environmental analysis of the impact to the Sacramento River. This RiverArc Project will require certain changes to Roseville's CVP contract, including an additional point of diversion on the Sacramento River. Roseville's CVP place of use is unchanged at this point in time and still remains within the limits of Roseville. Signatories will endorse these changes to Roseville's CVP contract subject to continued endorsement of the RiverArc Project.

Project List and Future Water Supply Reliability Efforts

The following projects are key to Roseville looking out to 2040 and are designed to increase water supply reliability for Roseville and have the potential to support the Water Forum's coequal objectives.

Additional ASR Wells

Additional construction of ASR wells, with four additional ASR wells planned to be completed by the late 2020's or early 2030's, which would add 9.2 MGD to Roseville's groundwater production capacity available for emergency use; with current efforts underway to identify additional infill property that could house more ASR wells in the future. Addition of ASR wells to the service portfolio can be constrained by available land, suitable hydrogeology, and water quality. The number of additional wells, beyond the additional four planned, will be determined based on these constraints, among others.

Raw Water Pipeline

With a joint venture project between PCWA, the U.S. Army Corp of Engineers (USACE), and the City of Roseville, Roseville intends to utilize the Raw Water Pipeline to access the Roseville's existing American River Middle Fork Project (MFP) raw water supply by constructing a direct pipeline from PCWA's Foothill Raw Water Pipeline to Roseville's Barton Road Water Treatment Plant (reducing reliance on the water

intake at Folsom Reservoir). Roseville anticipates earliest completion of this facility will be the late 2030's or beyond. This project is intended as a redundant way to access already contracted MFP water supplies and mitigate the potential future risk of "dead pool" conditions at Folsom Reservoir's intake structure where almost all Roseville's surface water conveyance capacity is for both CVP and PCWA MFP surface water supplies. *This denotes the project in a point in time and project aspects and details may be subject to change to meet this water supply reliability objective.*

Treated Water Capacity Improvements

Preliminary feasibility assessments are being conducted to evaluate future treated water capacity improvements in PCWA's and Roseville's systems, including shared interties to build more capacity to serve water demands to Roseville, in case there is an emergency, or in the event that Roseville experiences a constriction of water supply deliveries due to "dead pool" conditions at Folsom Reservoir. *This denotes the project in a point in time and project aspects and details may be subject to change to meet this water supply reliability objective.*

Projects at Folsom Reservoir

Support water access projects at Folsom Reservoir that increase intake infrastructure redundancy and reduce the risk posed to water supplies by potential future "dead pool" conditions.

The Folsom Reservoir Raw Water Delivery Reliability Project seeks to improve the reliability of delivery of senior water rights by Reclamation pursuant to settlement contracts for CVP water from Folsom Dam to the City of Folsom, Roseville, and SJWD. These three entities (collectively, Partners) share a single municipal and industrial (M&I) water supply intake within Folsom Dam that can become inoperable because of mechanical/structural failure, disaster, or low reservoir water levels. The ARBS, recently prepared by Stantec in collaboration with Reclamation and water purveyors in the region, projected that climate change will likely worsen with associated impacts to the American River watershed, including deterioration of water supply and delivery reliability for the Partners.

The project objectives are to develop engineering alternatives to secure a reliable water delivery system from Folsom Reservoir under a wide range of hydrologic conditions and emergencies to meet the Partners' demand requirements during:

1. Planned outages for maintenance of Reclamation facilities,
2. Unplanned outages, and
3. Low lake levels potentially occurring under drought conditions.

The Partners have been evaluating multiple alternatives for redundant intake structures and pump stations or siphons located at/or in the vicinity of the Folsom Reservoir. Additional future meetings and efforts between the stakeholders and Reclamation are necessary to arrive at the best-fit solution for the stakeholders, which would further clarify project concepts, implementation logistics, potential cost optimization, funding opportunities, and proponent responsibilities.

RiverArc Project

With investment in the RiverArc Project, Roseville intends to secure 20 MGD (22,403 AFY) of Sacramento River surface water in the 2030's; and an additional 37 MGD (41,445 AFY) in the 2040's, as an alternative to diverting water from the American River in dry or drought conditions. Once operational, this project

could significantly reduce diversions from the American River by up to 57 MGD (63,848 AFY). This alternative CVP supply diversion will be delivered via new transmission mains to Roseville's potable water distribution system in the western side of Roseville. The current project partners are in the very early stages of the project, developing the Environmental Impact Report (EIR) and project description. An analysis to determine whether Sacramento River water will be available for diversion at this facility under a wide range of hydrologic conditions will be conducted as part of the CalSim modeling portion of the EIR. CalSim is the model used to simulate SWP and CVP operations. These findings from the EIR should also be incorporated into the ARCAP analysis. The final project size and scope will depend on EIR findings, project costs, and Roseville's water reliability needs at the time of project implementation.

WATER FORUM AGREEMENT 2050

City of Sacramento
Purveyor Specific Agreement

Updated: December 19, 2025

The City of Sacramento (City) is committed to supporting good stewardship of the American River watershed and recommits its membership in the Water Forum as a model for this effort. The City will continue its advocacy for the health of the river through actionable, meaningful efforts supporting cold water carry-over at Folsom reservoir, the Modified Flow Management Standard (MFMS), habitat restoration efforts, a new temperature control device at Folsom, and advocacy at the federal level with our U.S. Bureau of Reclamation (Reclamation) partners to balance the Water Forum coequal objectives. Achieving the co-equal objectives requires action every year. The City will also continue its commitment to water affordability, water efficiency and to "house" the many administrative functions of the Water Forum as a City entity to support the greater good of a healthy watershed. The Water Forum has endeavored to provide "peace on the river" while knowing that a healthy water supply is reliant upon a healthy river.

Purveyor Background

Service Area

The water system began providing service in the City in approximately 1854. Today, the City's retail water service area covers approximately 63,182 acres within a boundary that is largely contiguous with the City limits. The Sacramento Suburban Water District (SSWD) serves a small portion of City residents and businesses on the eastern side of the City, and the water system serves a number of customers in the unincorporated portion of the County of Sacramento (County) adjacent to the service area of California American Water (Cal Am). The population within both areas is roughly equivalent. The City wholesales water to Cal Am, SSWD, Natomas Unified School District (NUSD), and Sacramento County Water Agency (SCWA) for service to Sacramento International Airport and Metro Air Park, a 1,320-acre business park, and wheels water to the SCWA for the South Sacramento Zone 40 service area. The differentiation between the terms "wholesale" and "wheeling" are a function of water rights accounting. In either case, the City is treating and delivering potable water through its distribution system to those customers. In addition to SSWD, Cal Am, and SCWA, additional water agencies such as Tokay Park Water Company, Golden State Water Company, and Florin County Water District share (in whole or in part) the approved place-of-use (POU) to receive surface water from American River entitlements through potential wholesale arrangement.

The City uses the same surface water treatment facilities, groundwater wells, storage tanks, pumping facilities, and distribution/transmission pipelines to deliver water to retail, wholesale, and wheeling customers. The water system operates as a single network, with supplies from one source of water being interconnected within the system to meet demands.

Water System Facilities

The water system includes two surface-water treatment facilities, groundwater wells, storage facilities, pumping facilities, and distribution/transmission pipelines. The City maintains eight metered wholesale/wheeling connections to adjacent agencies and 21 emergency interties.

Water Treatment Plants

The City treats surface water diverted from the Sacramento and American Rivers through the Sacramento River Water Treatment Plant (SRWTP), while the E.A. Fairbairn Water Treatment Plant (FWTP) treats surface water diverted from the American River.

Sacramento River Water Treatment Plant

Water diversion and treatment from what is now known as the SRWTP began in the early 1900's. By 1924, with improvements to filtration and chlorination, the capacity was 32 million gallons per day (MGD), followed by a near-term doubling to 70 MGD. The facility treats water diverted approximately one-half mile downstream of the American River confluence with the Sacramento River. A new intake structure was completed in 2004. The most recent major project in 2016 returned SRWTP peak capacity to 160 MGD. The project included rehabilitation and replacement work on the sedimentation basins, high-service pump station, filters, solid dewatering facilities, and electrical switchgear. Operation of SRWTP at 160 MGD is limited to the period from May 15 to September 30 of each year, which includes the warmer summer months when peak capacity is needed. At other times of the year the treatment is limited to 120 MGD. The actual available capacity of SRWTP may also be adversely affected by drought conditions if low river elevations reduce the operating efficiency of supply pumps. A project to rejuvenate aging infrastructure and potentially add advanced water treatment technology to adapt to climate-induced water quality changes is being planned and environmental documentation is being developed, along with potential expansion to meet future demands.

E.A. Fairbairn Water Treatment Plant

The FWTP is located on the American River approximately seven miles upstream of the confluence of the American and Sacramento Rivers. The FWTP began operation in 1964 and has a current design capacity of 200 MGD following an expansion completed in 2005. Currently, the State Water Resources Control Board (SWRCB) Division of Drinking Water (DDW) permitted the FWTP with a capacity of 160 MGD. The facility is further constrained by "Hodge" and "Conference year" conditions (described in greater detail later in this document) that the City agreed to in the original Water Forum Agreement and subsequently added to its binding water rights documentation with the SWRCB. Currently, pursuant to the City's capital infrastructure planning schedule, facility production is maintained at 100 MGD or below. A project to rejuvenate aging infrastructure and potentially add advanced water treatment technology to adapt to climate-induced water quality changes is currently being planned and environmental documentation is being developed.

Groundwater Wells

The City currently has 22 wells permitted by DDW in the North American Subbasin and the South American Subbasin that are connected to the potable water system, with a current production capacity of approximately 5-20 MGD. The majority of these wells have been in service for 50-80 years and are nearing the end of useful life. The range in capacity is largely a function of recurring maintenance and adaptation to evolving water quality standards. Between 2015 and 2024, the City completed a groundwater infrastructure master plan and Environmental Impact Report for the systematic replacement of nearly all its well inventory. That information is incorporated into approved Groundwater Sustainability Plans in the North and South American Subbasins. Capacity and flexibility of operations is expected to change over time as facilities are replaced. These forecasted changes are also included in the relevant Groundwater Sustainability Plans and developing programs like the Sacramento Regional Water Bank.

The City maintains a policy that irrigation areas of greater than 5 acres consider utilizing non-potable irrigation wells or recycled water for dedicated irrigation purposes. Examples of this can be found at locations such as William Land Park, Sacramento Historic City Cemetery, or Bartley Cavanaugh Golf Course. A small number of City residents and businesses own and operate private wells for onsite use. The City does not manage, test, control, or meter privately owned wells.

Additional Sources of Water

Two of the City's previously described wholesale interties are designed to allow both the delivery of water from the City to the adjacent water agency and the receipt of potable water from those agencies to the City. Both facilities are permitted by the State of California. The first is with SSWD, which can deliver up to 17 MGD of potable groundwater to the City. The second intertie is with SCWA which can deliver up to 10 MGD of groundwater. The City would look to these facilities to support programs that leave water in the river during periods of water scarcity such as groundwater substitution transfers, leaving surface water in the ecosystem without rediversion under an agreement with the State of California, to augment City-operated supply facilities in the event of an emergency, and to support the development of more robust region-wide conjunctive use programs (e.g., Sacramento Regional Water Bank).

Surface Water Supplies

Between the City's various surface water entitlements and agreements with other parties, the following table identifies the volumetric limits of its water supplies per City contract with Reclamation. The City also maintains a history of diverting water from the Sacramento River under "Pre-1914" entitlements, but that is exclusive to the Sacramento River. American River entitlements can be taken at the FWTP or the SRWTP facilities. The Sacramento River permit (Permit 992) and two of the four American River permits (Permits 11358 and 11361) provide for the direct diversion of water. Two of the four American River permits (Permits 11359 and 11360) provide for both direct diversion as well as rediversion of previously stored water in various reservoirs from Nimbus to the upper reaches of the American River Basin.

Table 1. Surface Water Supplies – Projected

Water Source	Projected Water Supply Volume				
	2025	*2030*	*2035*	*2040*	*2045*
Sacramento River	81,800	81,800	81,800	81,800	81,800
American River	228,000	245,000	245,000	245,000	245,000
Total	**309,800**	**326,800**	**326,800**	**326,800**	**326,800**

Notes: Units are in acre-feet (AF). The above values are non-inclusive of City Pre-1914 water supplies

Pre 1914 Rights

Independent of the Sacramento River and American River permits, the City claims and maintains a Pre-1914 entitlement for 75 cubic feet per second (CFS) with a priority date of 1849. The POU for Pre-1914 rights is not limited in the same fashion as other City permits.

Reclamation Operating Contract

The City's ability to use its permits for the Sacramento and American Rivers is subject to the provisions of the "Operating Contract Relating to Folsom and Nimbus Dams and Their Related Works and to Diversions of Water by the City of Sacramento," Contract No. 14-06-200-6497, entered in 1957 by the City and Reclamation. Under the contract, the City agreed to limit its combined diversion under its American River water right permits to a maximum rate of 675 CFS, and a maximum amount that may scale up to 245,000 acre-feet (AF) a year by the year 2030. The City also agreed to limit diversion under its Sacramento River post-1914 water right permit to a maximum rate of 225 CFS and a maximum amount of 81,800 MG per year. This limits the City's total diversions of Sacramento and American River water under the contract to 326,800 AF per year. In return, the Operating Contract requires Reclamation to operate its facilities to make enough water available in the rivers to enable the agreed-upon diversions by the City. The agreement is permanent and not subject to renewal.

Surface Water and Groundwater Management

The production facilities in the water system are interconnected and operated in a dynamic fashion. The City utilizes its various facilities to meet demands and other water resources mandates. Operational limitations to meet minimum levels of service (e.g., water pressure, water quality, fire suppression support) for customers do exist. So, while certain flexibility exists to shift between sources, it is not without limit.

Generally, the City equally balances surface water operations between the SRWTP and FWTP to optimize level of service delivery to customers and reduce the need for any one facility to operate at unusually high energy load. That said, the City has, and intends to continue, a practice of preferentially shifting from either SRWTP or FWTP to maintain the level of service needs, if one river or another is under pressure, or if raw water quality is notably different. The need to deliver clean, safe drinking water with an adequate level of service per all legal, permit, and policy direction of the Sacramento City Council will remain at the forefront of operational decisions of the water system.

The City includes the instantaneous (Hodge) and annual diversion limitations (Unimpaired Inflow to Folsom Reservoir (UIFR) < 400TAF) at FWTP as part of its long-range infrastructure planning.

When conditions allow, the City will reduce overall surface water operations and preferentially shift to groundwater. Drivers for this action may be overall poor surface water hydrologic conditions, opportunities for groundwater substitution transfers that leaves surface water in the ecosystem until delivered to a downstream user, managed actions as part of the Sacramento Regional Water Bank whereby the City will extract groundwater that has previously been recharged and stored in the basin, or a recently approved set of agreements with the State of California to provide the additional surface water for ecosystem benefits without a downstream diverter. To provide a sense of scale, in the drier periods of 2018 and then 2020-2022, City water demand served by groundwater rose from a historic 15-20% to approximately 35%. This shift benefits the achievement of the coequal objectives and all steps to expand on the ability to make this shift are a priority.

In any set of conditions that indicate a preference to shift toward groundwater, the City engages with local Groundwater Sustainability Agencies to ensure the extraction pattern (either from its own wells or through receipt of groundwater from others) is consistent with local Groundwater Sustainability Plans. Groundwater substitution transfers and Sacramento Regional Water Bank actions require additional groundwater monitoring to ensure no other user of groundwater is impacted and to further ensure consistency with local groundwater sustainability plans.

With the Regional Water Authority as the leading voice, the City of Sacramento, along with other local purveyors, is supporting the statewide Healthy Rivers and Landscapes Proposal (HRLP) to provide increased river flows during Dry and Critically Dry periods (Sacramento Valley Index D1641) and expand habitat in the Sacramento and San Joaquin Rivers and Bay-Delta. The proposal, if approved by SWRCB, would serve as an implementation pathway for an updated Bay-Delta Plan and would present itself as a priority for the City of Sacramento. In absence of that approval, the City of Sacramento remains obligated to provide environmental flows after a series of agreements were executed in 2023 and 2024 that guarantee a shift from surface water to groundwater when called upon by the State for ecosystem benefits.

In acknowledging the potential benefits of leveraging groundwater as a resource during periods of surface water scarcity, the City also supports maintaining a sustainable groundwater basin in the North and South American Subbasins. Seeking opportunities to recharge that resource requires equal focus if groundwater is to be present when most needed. Maintaining consistency with local Groundwater Sustainability Plans and meeting the requirements of the Sustainable Groundwater Management Act present legal boundaries that the City remains cognizant of.

The City is also an active supporter and participant of the developing “Sacramento Regional Water Bank”, with the Regional Water Authority as the lead organization. The stated goals of the Water Bank program at the writing of this Purveyor Specific Agreement (PSA) are as follows:

> “*The GOAL of the Water Bank is to expand conjunctive use, thereby increasing water banking operations throughout the region to:*
>
> 1) *Improve long-term regional reliability and provide statewide water supply opportunities when possible; and*

2) *Support healthy ecosystem function on the lower American River*"

Given the totality of anticipated climate change pressures on water resources, the anticipated need to respond more dynamically to hydrologic conditions, participate in opportunities to leave surface water in the ecosystem until diverted elsewhere, and to ensure the success of the recently executed agreements to make environmental water available without a downstream diverter through shifts to groundwater, the City is taking the following steps:

- Expanding the capacity of City groundwater infrastructure through a comprehensive groundwater well replacement program and identifying connections to others that can assist in leveraging groundwater as a strategic resource to enhance water supply reliability and to provide ecosystem benefits.
- Within the Hodge or Conference year constraints, ensure groundwater recharge actions are occurring in the basin to maintain readiness for the turn to groundwater in the poorer surface water conditions.

To the degree that extremes in weather from wet and cold to dry and hot presented by climate change occur, so too do the needs for flexible operations to adapt to such changing conditions.

The City anticipates future additions to surface water infrastructure. As part of the 2000 Water Forum Agreement, and the expansion of FWTP, the City also committed to the construction of other facilities such as expansion/rehabilitation of the Sacramento River Water Treatment Plant and river intake to assure that a reliable alternative supply (groundwater, pump back, and/or diversion from the Sacramento River) is available whenever it is needed. The City completed a rehabilitation project at SRWTP in 2007, which set aside land for future expansion, and has initiated environmental review for the expansion of SRWTP and other projects (see "Water+" below). Extensive evaluations on the viability of a previously contemplated "pump-back" project, which would have entailed a new intake on the Sacramento River and a large raw water pipeline connecting the new intake with FWTP have identified that project as infeasible.

Demand Management

The City's baseline water usage per capita for the purpose of compliance with SBX 7-7 was 282 gallons-per-capita-per-day (gpcd) (years 1996-2005), with a 2020 target of 225 gpcd. At the SBX7-7 compliance date of 2020, the City customer usage was down to 169 gpcd, thereby meeting legislative mandates. For the last several years, the City has hovered around 150 gpcd. This was achieved through a variety of means including an accelerated Advanced Metering Infrastructure (AMI) metering program and expanded water conservation incentive and outreach efforts.

Moving forward, through the Long Term Water Conservation Framework legislation (SB 606 and AB 1668), the State of California has created real-time targets for water suppliers, including the City, that involve a dramatic water use reduction target over the next 15 years tied to a residential indoor water use reduction as well as a landscape water efficiency target that involves reporting on landscape water demand as compared to landscape water need as calculated by the State. This system-wide budget-based approach also includes a reduction in water suppliers' system water loss (gallons per connection per day). To achieve these targets, the City anticipates that it will need to dramatically expand customer participation in its programs and anticipates making refinements to existing programs as well as adding programs that will achieve these requirements. An analysis and prioritization of these potential

programs is underway and engagement with Water Forum membership is ongoing. Draft and final work products will be provided to the Water Forum membership.

Current City conservation programs elements are advertised on the City web page.

https://www.cityofsacramento.gov/utilities/water-conservation

While subject to change as program effectiveness is evaluated, examples of likely program enhancement beyond existing include:

- Monitoring and analysis of meters dedicated solely to irrigation
- High efficiency toilet retrofit programs
- Landscape rebate programs
- Enhanced leak repair incentive programs
- Enhanced water and energy partnership rebates
- Enhanced residential water surveys

Water+

https://www.cityofsacramento.gov/utilities/projects/waterplus

The Department of Utilities in 2021 launched Water+, a program designed to help ensure safe, high-quality drinking water supply for customers. The program will help protect long-term drinking water reliability, resiliency to climate change, and help meet future retail and wholesale water demands of the City of Sacramento POU.

Water+ has several goals, which include:

- Improving water treatment methods to meet changing water quality in the Sacramento and American rivers as well as changing drinking water regulations.
- Improving the safety and reliability of the City's surface water treatment plants -- the E.A. Fairbairn Water Treatment Plant and the Sacramento River Water Treatment Plant.
- Providing consistent drinking water treatment and distribution to City customers.
- Increasing water treatment supply and capacity to meet future water demands.
- The program will replace and expand aging facilities, improve water treatment methods to be safer and more environmentally friendly, and make overall system improvements.

The first phase of Water+ includes the Treatment Plants Resiliency and Improvements Project, which will help improve the long-term safety, reliability and resiliency of the City's water supply, and address several issues defined in the City's 2035 General Plan.

The project will feature several water treatment improvements, including:

- Replacing aging infrastructure and facilities that are reaching the end of their useful lives
- Improvements to the treatment process at both water treatment facilities
- A new Sacramento River water intake structure and new pipelines to SRWTP to allow for increased future diversions and greater reliability of existing diversions
- Improvements to water transmission and distribution systems near SRWTP

River Arc

Concurrent with the planned expansion of SRWTP, a group of local water agencies with the support of select Water Forum environmental members have initiated early planning for a new facility on the Sacramento River. The RiverArc Project is an ecosystem, capacity, and resiliency project that will provide significantly improved backup and flexibility to water sources available for City customers, and to surrounding communities. The project would divert water through an existing water intake structure on the Sacramento River to offset water currently planned to be diverted from Folsom Reservoir or from the American River at the Placer County Water Agency (PCWA) pumping plant near the Auburn Dam site. Reduction of draws from the American River has been identified as a potential adaptation measure for climate change impacts to the lower American River ecosystem and water supply reliability in the American River watershed as described in the 2022 American River Basin Plan. In 2015 and 2021, Folsom Reservoir levels were very close to not being able to meet minimum municipal water supply intake elevations. The flow of the Sacramento River, which is many times the size of the American River, has the capacity to reduce reliance on the American River.

The RiverArc Project presents a more complex governance structure with multiple participating agencies, is located further from the City's core water transmission infrastructure, requires additional staffing, and may present a reduced financial economy of scale that a SRWTP expansion could offer. However, the City recognizes the potential benefits to the region RiverArc could bring to the Water Forum coequal objectives and the potential to support the Water Forum 2050 initiative. At present, the City is focusing on RiverArc as the next diversion and treatment capacity project, ahead of a SRWTP expansion with the understanding and expectation of ongoing Water Forum signatory support.

Current Diversions

Table 2. Current Diversions

Year	FWTP	SRWTP	Total Surface Water	Groundwater	Imported Groundwater	Wholesale/ Wheeling	Total Retail Water	Total Water

**** Units of measure (AF, CCF, MG)*** *must remain consistent throughout the UWMP as reported in Table 2-3.*						
NOTES: Units are in acre-feet (AF). Projected wholesale water use estimates were developed in the on-going Water Master Plan Update. 2030 wholesale projected water use is equal to the probable estimate (average likely water delivery in the on-going Water Master Plan Update) of future wholesale demands. 2040 and 2045 wholesale projected water use is equal to the maximum estimate assuming that all water agencies in the American River Place of Use Boundary receive wholesale water. Interim years (2025 and 2035) were linearly interpolated. The City estimates that it will deliver approximately 69 AF to Natomas Unified School District.						

Drier Conditions Management

In all years when the California Department of Water Resources (DWR) annual projected unimpaired runoff into Folsom Reservoir is greater than 550,000 AF, or the March through November projected unimpaired inflow into Folsom Reservoir is greater than 400,000 AF, the City may divert water at FWTP in accordance with the following criteria.

1. Diversion up to 310 cfs (200 million gallons per day [MGD]) so long as the flow bypassing the diversion at FWTP is greater than the Hodge Flow Criteria[46].

Table 4. Hodge Flow Criteria

Period	American River Hodge Flow Criteria, cfs
October 15 through February	2,000
March through June	3,000
July through October 14	1,750

2. Whenever flow bypassing the diversion at the FWTP is lower than the Hodge Flow Criteria, City diversions may not be greater than the following:

Table 5. Maximum Rate of Diversion to the FWTP During Hodge Flows

	Maximum Diversion	
Period	**cfs**	**MGD**
January through May	120	77.6
June through August	155	100.2
September	120	77.6
October through December	100	64.6

City water diverted at FWTP in drier conditions in accordance with the foregoing limitations could be used anywhere within the City's authorized POU as it exists now and in the future.

Provision for Use of FWTP Design Capacity Over 100MGD

The City added the Hodge restrictions to FWTP to its surface water entitlement in October 2010 following approval of the original Water Forum Agreement. The goal of these restrictions was to ensure adequate flow for the fishery at certain times of the year. This goal is embedded in the Flow Management Standard. The prior Water Forum effort also anticipated a potential pathway for collective support of all caucuses for the removal or amendment of these terms.

If the City and the ongoing Water Forum successor efforts agree that some combination of actions could provide a net benefit to the lower American River and allow for better use of the capacity added to FWTP (over the 100 mgd prior to the first Water Forum Agreement) in 2000, the City will have the

[46] As no stream flow gauge currently exists in a location coterminous with FWTP, the Fair Oaks gauge, as maintained by USGS, is typically used as a surrogate measurement point.

support of all signatories if it chooses to pursue regulatory approvals. The implementation of the MFMS is actively planned into Reclamation's operations and augments D893-flows as being protective measures consistent with Water Forum coequal objectives and provides an example of improved conditions.

Driest Conditions Management

In extremely dry years (i.e., years in which the DWR annual projected unimpaired inflow into Folsom Reservoir would be 550,000 acre-feet annually [AFA] or less, also referenced as the March through November projected unimpaired flow into Folsom Reservoir being less than 400,000 AF) the City would limit its diversions of city water at the FWTP to not greater than 155 cfs and not greater than 50,000 AFA. Any additional water needs would be met by diversions at other locations and/or other sources.

City water diverted at the FWTP in extremely dry years in accordance with the foregoing limitations could be used anywhere within the City's authorized POU as it exists now and in the future.

Critically Low Storage Conditions

In conjunction with aforementioned commitments to reduce diversions at FWTP when Hodge Flows are present (see drier year actions) or the March through November projected unimpaired flow into Folsom Reservoir being less than 400,000 AF (see driest year actions), the City will continue to support infrastructure at the FWTP intake structure that will allow operation near the low minimum flow requirement of the MFMS at 500 cfs. 500 cfs passing the FWTP is understood to correlate with the river elevation necessary to meet the minimum design of the intake pumps to avoid adverse operation. The City is committed to this balanced approach which is intended to support conservation of storage in Folsom and a minimum release pattern for ecosystem needs.

Project List

It is understood that to support the coequal objectives and mitigate challenges facing the region under future conditions, structural and non-structural projects will be needed. The City must prioritize projects that maintain the affordability of water in advancing the coequal objectives. The experience of the last couple of decades has shown that the extremes of climate change are the biggest threat to the coequal objectives and that the ability of the City to advocate for improved operations of the State and Federal projects, both internally and through local partnerships to advance conjunctive use, will be the most effective way from a cost and sustainability standpoint, to enhance the achievement of the coequal objectives. Actions can be taken in all years to improve water reliability from the most environmentally beneficial source.

Structural

The following infrastructure projects will support efforts to implement the City's proposed PSA, and to support the coequal objectives.

- New or improved interties with other purveyors, in particular ones that promote groundwater recharge and conjunctive use and water supply reliability
- Rehabilitation and modernization of existing water facilities

- New or expanded facilities on the Sacramento River (e.g., RiverArc or SRWTP expansion) and treatment, storage, and conveyance systems necessary to provide clean, safe, potable water
- New groundwater facilities consistent with adopted groundwater sustainability plans and the City of Sacramento's completed California Environmental Quality Act (CEQA) process to modernize its groundwater facilities
- Expanded groundwater monitoring infrastructure and data transparency platforms
- Projects as defined in basin groundwater sustainability plans
- Structural and Non-structural projects and programs to ensure success of the Healthy Rivers and Landscape Program (i.e., Voluntary Agreement) for the American River region or a similar tributary-specific program that improves the ecosystem, protects local existing water entitlements for participants in that program, and maintains better cold water pool conditions in Folsom and the lower American River.

Non-Structural

- Agreements with neighboring purveyors for conjunctive use opportunities and water supply reliability
- Continued water use efficiency programs and funding support for the City, including expanded relationships and/or agreements to facilitate the City's Climate Action Plan and successful implementation of water use efficiency targets
- Water transfers consistent with groundwater sustainability plans and the California Water Code
- Points of diversion on Sacramento River for City of Sacramento
- Implementation of longstanding contractual agreement for water exchange between City and the Sacramento Municipal Utility District (SMUD) for SMUD's Rancho Seco water demands
- Extension and/or License of Existing Water Entitlements for the City of Sacramento
- Support for identifying underground storage as a beneficial use of surface water
- Changes in water rates and fees, as compliant with legal requirements to support projects consistent with the coequal objectives (e.g., water efficiency, climate change adaptation projects, and water supply reliability projects)
- Continued staffing support, when requested, for implementation of lower American River ecosystem projects (e.g., Machine Operators)
- Additional funding support from the City for science and ecosystem benefits as part of the 2024 Healthy Rivers proposal to SWRCB or a tributary-specific alternative for the American River region
- Local and Statewide advocacy for the MFMS on the lower American River and improved carryover storage within Folsom Reservoir

- Management actions as defined in basin groundwater sustainability plans
- Periodic 5-year groundwater sustainability plan evaluations and updates, compliant with SGMA
- Consolidation of water districts as approved by the State of California

Caveats and Assurances

1. All signatories to the *Water Forum Agreement* will fully endorse City of Sacramento water entitlements for the benefit of the coequal objectives. This includes the use thereof and extension and/or license under SWRCB procedures. If the SWRCB or the Legislature proposes global changes to water rights, each Water Forum member may decide what position to take on the proposal without rescinding agreed upon support for City of Sacramento water entitlements for the benefit of the coequal objectives.

2. Recognizing the commitments executed by the City of Sacramento in the first Water Forum Agreement, including changes made to its water entitlements, and in recognition in the 2000 Water Forum Agreement of full signatory support for City of Sacramento projects to divert, treat, and serve from the Sacramento River, all signatories continue to endorse this effort with the following detailed delineations:

    a. Fully endorse (as defined in the *Process for Project Endorsement* section of the Water Forum 2050 Agreement) the City's Water+ Project, including the diversion, treatment, storage, and conveyance systems necessary to provide clean, safe, potable water, as well as the funding and processes necessary to implement this project. The Project will partially recover diversion impacts to City stemming from the first Water Forum, and as contemplated by the 2000 Water Forum.

        https://www.cityofsacramento.gov/utilities/projects/waterplus

    b. Fully endorse City of Sacramento efforts to develop environmental documentation of the RiverArc project and conditionally endorse (as defined in the *Process for Project Endorsement* section of the Water Forum 2050 Agreement) the implementation of the RiverArc Project, subject to environmental analysis of the impact to the Sacramento River for the City of Sacramento, including the points of diversion modifications, diversion, treatment, storage, and conveyance systems necessary to provide clean, safe, potable water, as well as the funding and processes necessary to implement this project. Upon completion of CEQA analysis all signatories agree that an official determination on full endorsement will occur and Water Forum documentation and positions of support will be updated to reflect this determination no later than six months from publications of environmental Notice of Determination or equivalent filing. It is the intention of all signatories to fully endorse this project if the environmental analysis and Notice of Determination remain consistent with the Notice of Preparation and the outcomes sought in support of the Water Forum objectives. The City intends to provide outreach engagement to the Water Forum on project development and analyses prior to completion of the CEQA analysis.

        https://www.cityofsacramento.gov/utilities/projects/riverarc

3. All signatories conceptually support (as defined in the *Process for Project Endorsement* section of the Water Forum 2050 agreement) all other structural and non-structural projects contained within this PSA and the funding and processes necessary to implement them with the exception of two non-structural projects identified above: 1) Groundwater Substitution Transfers, and 2) Implementation of contractual agreement for water exchange between City and SMUD.

4. Endorsement of water entitlements in this PSA means that signatories will expend reasonable efforts to:
    a. Speak before stakeholder boards and regulatory bodies,
    b. Provide letters of endorsement,
    c. Provide supportive comments to the media

5. The City of Sacramento acknowledges concern of some signatories that voluminous requests for endorsement for routine operational and maintenance activities could apply pressure to limited resources. The City of Sacramento does not expect to pursue full endorsement for all projects with conceptual endorsement per this PSA. The City will maintain sensitivity to fellow members' capacity and will limit requests for full endorsement to the most impactful matters contained with this PSA and the related work of the Water Forum.

6. All signatories will support the funding of the City's water utility operations and capital investment/reinvestment. Endorsement of funding in the context of this PSA is not intended to limit future Water Forum engagements on how rates and fees are determined within applicable laws.

7. Any solution that provides for future needs will have costs. New diversion, treatment, and distribution facilities, wells, conservation programs, and required environmental mitigation will be needed. This PSA identifies that these solutions must be equitable, fiscally responsible, and make the most efficient use of the public's money. Prioritizing affordability of these programs and alignment with state laws surrounding appropriate use of water rate-payer dollars is supported by all signatories.

8. Water suppliers have both capital costs for facilities and operations and maintenance costs. This PSA recommends that charges imposed to recover capital costs associated with water acquisition, treatment, or delivery be equitable. Any costs for facilities funded through bonds will be recovered as provided by law. In addition, signatories to the Water Forum Agreement agree that operational, maintenance, and replacement costs should be recovered from beneficiaries of the system in accordance with California Government Code Sections 53720 to 53730 (Proposition 62) and California Constitution, Articles XIII, C and XIII, D (Proposition 218) and other laws to the extent they are applicable.

9. All parties acknowledge that language or commitments within this PSA may find themselves in conflict with other documents or regulatory proceedings/direction. Where inconsistencies occur, legally binding documents (e.g., water rights) or direction from regulatory bodies shall govern. Additionally, the Water Forum and versions of the Water Forum 2050 Agreement do not supersede local, state, or federal boards, councils, commissions, or regulatory entities governing water suppliers, or does it present itself as a regulatory body or legally binding agreement.

10. PSA language will have priority over any language in the main Water Forum 2050 Agreement should there be an interpretation that deems the language in the two documents to be in conflict.

11. All Signatories 1) conceptually endorse City of Sacramento alignment of its water operations in support of the Sacramento Regional Water Bank and relevant groundwater sustainability plans, and 2) fully endorse the City's focus to invest in a resilient water system that can be adjusted to advance the Water Forum coequal objectives.

12. Parties shall acknowledge and accept that the Sacramento City Council recently adopted an updated Climate Action & Adaptation Plan and that nothing within this agreement is intended to supersede that action or any successor. Included within that plan is the following: "An environment that feels healthy, with clean air, clean water, and ample access to parks, trees, and other green spaces," is the key to a truly livable city.

WATER FORUM AGREEMENT 2050

East Bay Municipal Utility District
Purveyor Specific Agreement

Updated: January 8, 2026

Purveyor Background

East Bay Municipal Utility District (EBMUD) supplies water and provides wastewater treatment for a large part of Alameda and Contra Costa counties. Based on 2010 census data and Association of Bay Area Government's (ABAG) Projections 2040, approximately 1.4 million people are currently served by EBMUD's water system in a 332-square-mile area extending from Crockett on the north, southward to San Lorenzo and portions of Hayward (encompassing the major cities of Oakland and Berkeley), eastward from San Francisco Bay to Walnut Creek, and south through the San Ramon Valley (including Alamo, Danville, and San Ramon). The wastewater system serves approximately 740,000 people in an 88-square-mile area of Alameda and Contra Costa counties along the Bay's east shore, extending from Richmond in the north, southward to San Leandro. EBMUD water customers include residential, industrial, commercial, institutional, and irrigation water users. A map of EBMUD's service area is included in **Figure 1**, sourced from EBMUD's 2020 Urban Water Management Plan (UWMP).

Surface Water and Groundwater Management

Supply Portfolio

In non-drought years, EBMUD primarily serves its customers using Mokelumne River water, local runoff collected in the East Bay reservoirs (San Pablo, Upper San Leandro, and Briones), and recycled water for non-potable uses. During droughts, EBMUD's water supplies are supplemented by diversions from the Freeport Regional Water Authority (FRWA) Intake on the Sacramento River.

Mokelumne River

The Mokelumne River serves a variety of uses, including agriculture, fisheries, hydropower, recreation, and municipal and industrial use. EBMUD has water rights that allow for delivery of up to a maximum of 325 million gallons per day (MGD) from the Mokelumne River, subject to the availability of Mokelumne River runoff and numerous flow release obligations. EBMUD's Mokelumne River flow commitments are determined by hydrology, water rights priorities, agreements with state and federal regulatory agencies, California State Water Resources Control Board (SWRCB) orders and decisions, federal directives, court decrees, and numerous agreements between EBMUD and other Mokelumne River users, both upstream and downstream of EBMUD's Mokelumne River facilities.

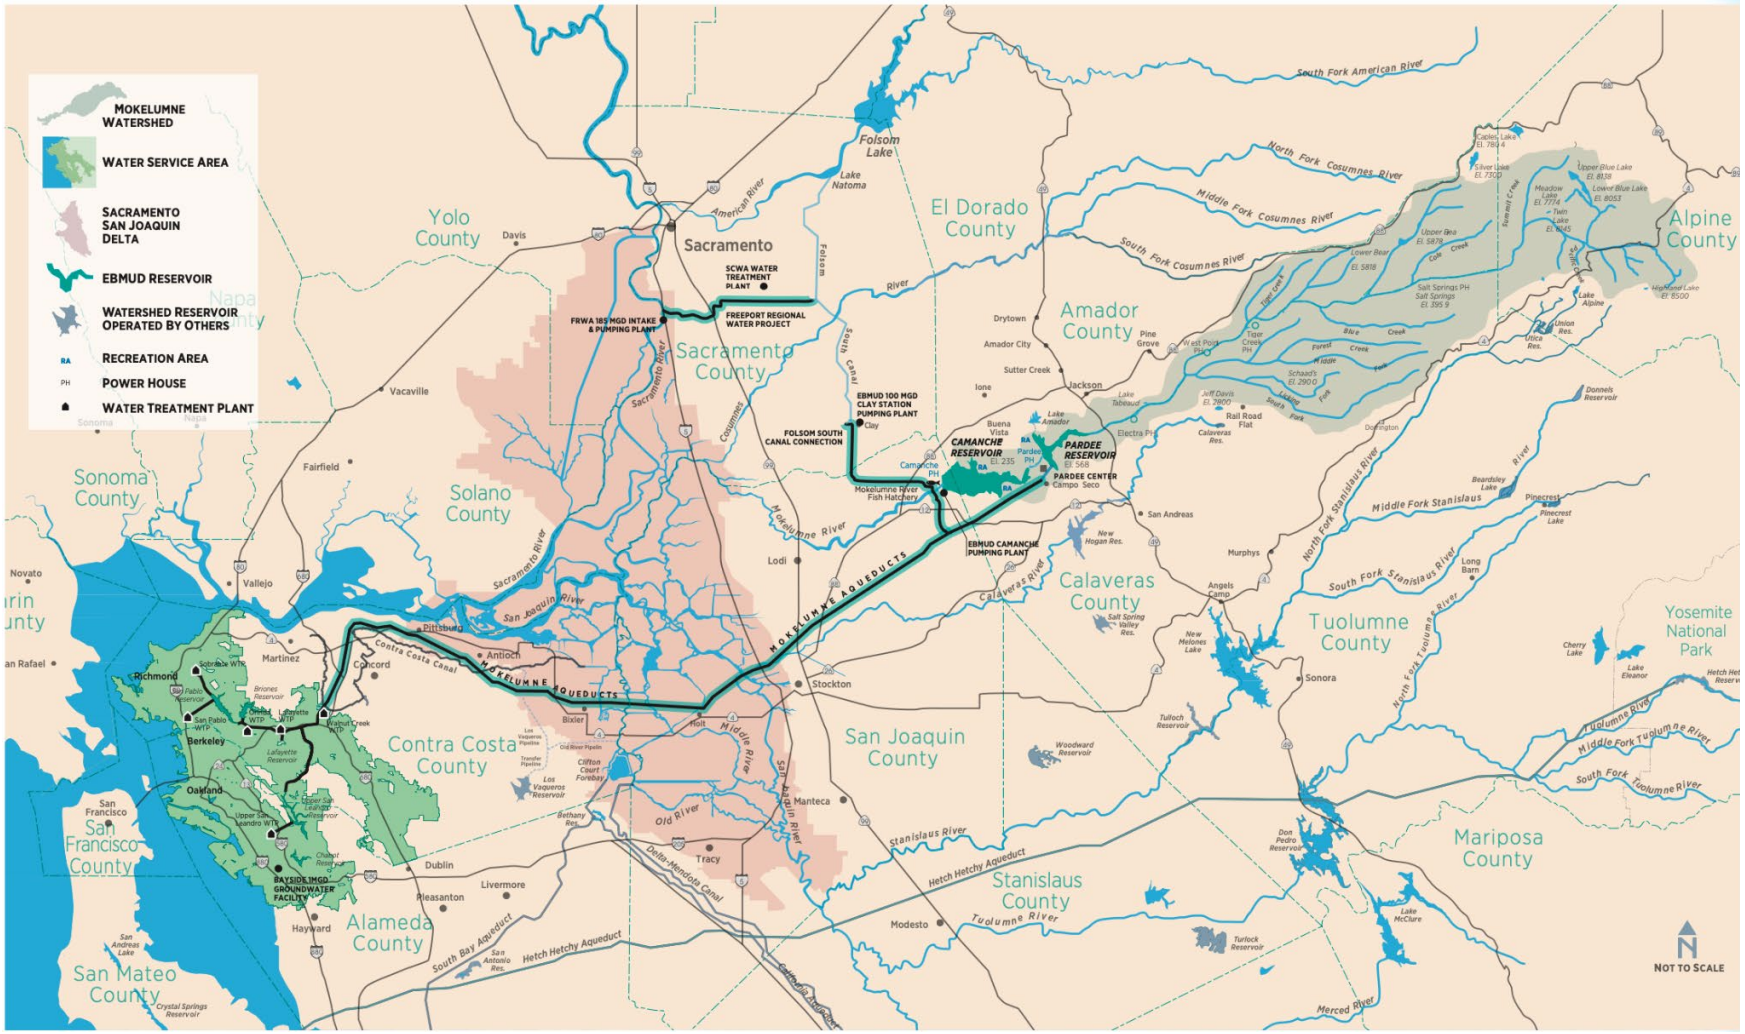

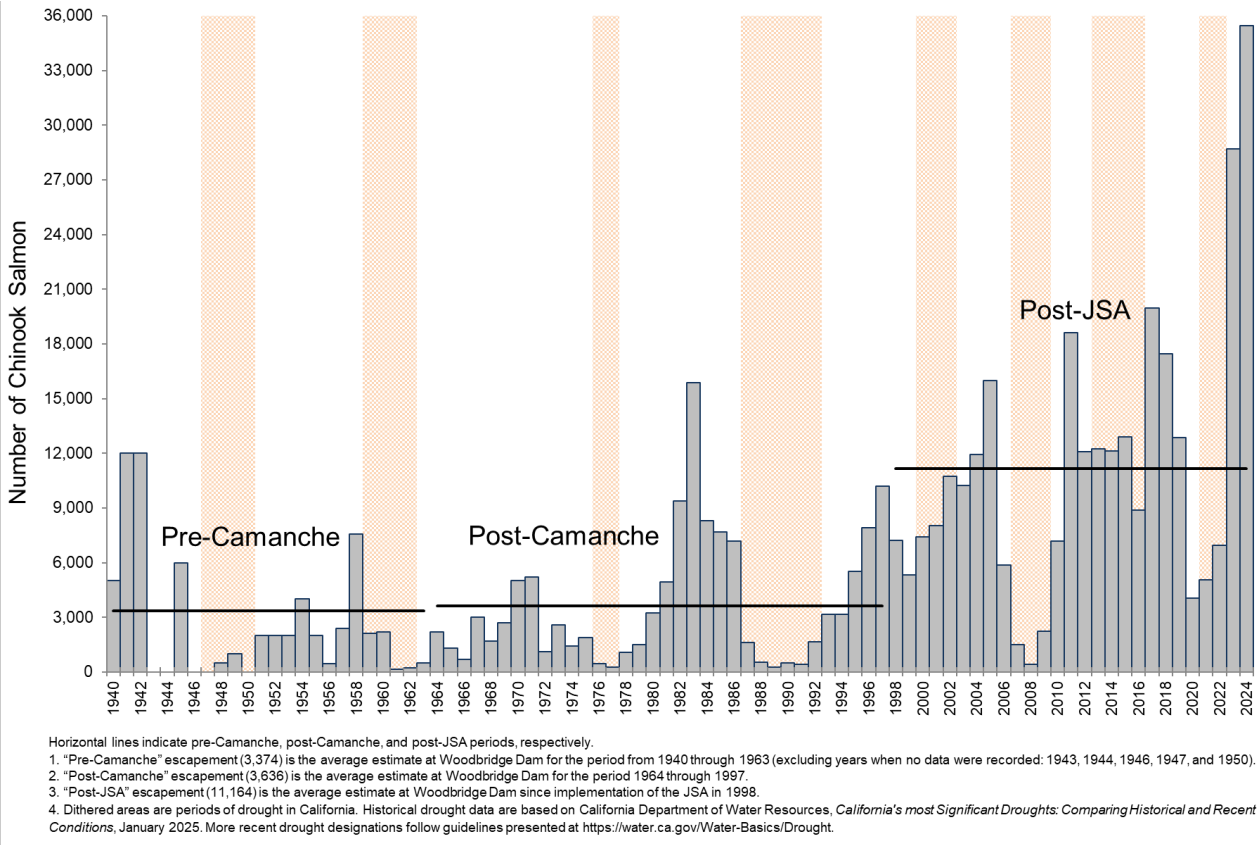

Figure 1. EBMUD Water Supply System (from EBMUD's 2020 Urban Water Management Plan)

To comply with the requirements of the 1998 Joint Settlement Agreement (JSA) among EBMUD, U.S. Fish and Wildlife Service (USFWS), and the California Department of Fish and Wildlife (CDFW), EBMUD continues to meet its flow commitment to protect the lower Mokelumne River by providing in-stream flow releases from EBMUD's Camanche Dam to improve fishery conditions. The Mokelumne River provides important habitat for fall run Chinook salmon, which migrate from the ocean and reach the Mokelumne in late summer and early fall to spawn. In the spring, the juvenile salmon then migrate to the ocean, grow, and ultimately return to the Mokelumne two to three years later to spawn. Salmon spawn in the river below Camanche Dam and many also enter the Mokelumne River Fish Hatchery located at the base of EBMUD's Camanche Dam, where eggs are collected, fertilized, incubated, and raised for release in the spring. The Mokelumne River also supports a population of Federally Threatened Central Valley Steelhead. Both the River and Hatchery support the listed population, and based on a robust science plan in recent years steelhead numbers have been trending upward, signifying successful management of the species through collaboration between EBMUD and the fish agencies.

In collaboration with the CDFW, the USFWS, and the National Marine Fisheries Service, EBMUD uses many strategies to protect and enhance Mokelumne River fisheries resources. These strategies include spawning and rearing habitat restoration, screening riparian diversions, conducting a comprehensive science program, and investing in one of the most modern and productive salmon hatcheries in the Central Valley. Additionally, Mokelumne origin salmon comprise approximately 20% to 50% annually of the recreational and commercial catch off the California Coast.

Since implementation of the JSA flow releases and temperature management practices, the Mokelumne River's average salmon returns to the river have more than doubled from 3,636 (1940 to 1997 average) to 11,164 (1998 to 2024 average). **Figure 2** shows the increase in returns of fall-run Chinook Salmon over time, with a record of over 35,000 fish in the 2024 season.

Horizontal lines indicate pre-Camanche, post-Camanche, and post-JSA periods, respectively.
1. "Pre-Camanche" escapement (3,374) is the average estimate at Woodbridge Dam for the period from 1940 through 1963 (excluding years when no data were recorded: 1943, 1944, 1946, 1947, and 1950).
2. "Post-Camanche" escapement (3,636) is the average estimate at Woodbridge Dam for the period 1964 through 1997.
3. "Post-JSA" escapement (11,164) is the average estimate at Woodbridge Dam since implementation of the JSA in 1998.
4. Dithered areas are periods of drought in California. Historical drought data are based on California Department of Water Resources, *California's most Significant Droughts: Comparing Historical and Recent Conditions*, January 2025. More recent drought designations follow guidelines presented at https://water.ca.gov/Water-Basics/Drought.

Figure 2. Returns of fall-run Chinook Salmon over time

East Bay Area Watershed and Hydrology Runoff Characteristics

EBMUD's secondary water supply source is local runoff from the East Bay area watersheds, which is stored in the terminal reservoirs within EBMUD's service area. The availability of water from local runoff depends on two factors: hydrologic conditions and terminal reservoir storage availability. In dry and critically dry years, evaporation can exceed runoff, resulting in net loss of local supply. Local runoff supplies the East Bay, on average, 23 MGD during normal hydrologic years.

Recycled Water

EBMUD's recycled water program has grown significantly since EBMUD began using recycled water at its Main Wastewater Treatment Plant (MWWTP) in 1971. The program has expanded to provide more recycled water to a diverse array of customers for a variety of non-potable uses. EBMUD has also worked to develop partnerships with other wastewater treatment entities to make recycled water available more broadly in its water service area. Regional partnerships like the Dublin San Ramon Services District–EBMUD Recycled Water Authority have broadened the recycled water customer base, and EBMUD has led or participated in research studies related to recycled water.

In calendar year 2020, EBMUD provided approximately 8.3 MGD of recycled water to customers for a variety of non-potable uses. Based on EBMUD's current assumptions about which projects it is likely to implement, **Table 1** (from EBMUD's 2020 UWMP) shows the projected quantity of recycled water use by specific type for the years 2020-2045.

Table 1. EBMUD Projections of Recycled Water Service Through 2045 (from 2020 EBMUD UWMP)

Project	**Recycled Water Deliveries (MGD)**

Supplemental Water Supplies Potentially Available during Drought

- Dry-year only Central Valley Project (CVP) contract with the American River Division
    - EBMUD is contractually entitled to request CVP water when EBMUD projects end-of-September total system storage (TSS) below 500 thousand acre-feet (TAF). Water is limited to maximum 133 TAF in a year, and 165 TAF over three years, subject to reduction for unavailability under applicable U.S. Bureau of Reclamation (Reclamation) policies.
    - Although EBMUD is an American River Division contractor, EBMUD's diversion point is located on the Sacramento River downstream of the American River confluence, and EBMUD may receive water from any source available to the CVP.
- Water Forum releases from Placer County Water Agency (PCWA)
- Yuba Accord reservoir reoperation transfers
- Short-term crop idling transfers with Sacramento Valley irrigators
- Expanded San Joaquin County groundwater banking project in the Eastern San Joaquin Groundwater Subbasin

    - EBMUD is currently developing a project in collaboration with local partners. The project yield is being evaluated.

- Existing Bayside well to be decommissioned in Fiscal Year 2026 but a new well may be constructed (up to 2 MGD over 6 months) if necessary to meet future water needs.

Distribution System Features of Note

Points of diversions

- Pardee Reservoir
- Freeport Regional Water Authority Intake
- Terminal Reservoirs (See **Table 3** sourced from EBMUD's 2020 UWMP)

Reservoirs

- See **Tables 2 and 3** below from EBMUD's 2020 UWMP.

Raw Water Interties

- Contra Costa Water District (CCWD)-EBMUD Raw Water Intertie
    - EBMUD to CCWD: 90 MGD
    - CCWD to EBMUD: Operationally infeasible without infrastructure improvements

Emergency Potable Water Interties (not currently authorized for drought emergencies)

- 30 MGD San Francisco Public Utilities Commission-City of Hayward-EBMUD Potable Intertie
- Small diameter potable interties with City of Hayward, CCWD, and Dublin San Ramon Services District

Note: EBMUD's potable interties are generally authorized for emergencies such as earthquake, flood, landslide, or other major accident. Currently, there is limited opportunity to use these interties in drought scenarios. Many of the interties are small diameter and neighboring agencies have limited hydraulic capacity to send water to EBMUD. EBMUD's raw water intertie with Contra Costa Water District is the largest of the interties and is not limited to emergencies.

Groundwater infrastructure

- Demonstration Recharge Extraction and Aquifer Management (DREAM) pilot project booster pump station, 700 gpm capacity (was used to support injection of extracted groundwater into the Mokelumne Aqueducts and may be used to support an expanded groundwater banking project in the future).

Table 2. EBMUD Water Supply System Characteristics

Reservoir Data		
Capacities (Dead Storage[1])		
Mokelumne River Facilities		
Pardee (Licensed Capacity)	209,950 AF (12,200 AF)	
Camanche (Permitted Capacity)	431,500 AF (4,000 AF)	
Service Area Facilities		
Local Terminal Reservoirs (East Bay)	151,670 AF (17,500 AF)	
Aqueduct Data		
	Gravity Flow	***Pumped Flow***
Maximum Capacity Total[2]	**202 MGD**	**325 MGD**
Aqueduct 1 (65-inch)	41 MGD	67 MGD
Aqueduct 2 (67-inch)	54 MGD	87 MGD
Aqueduct 3 (87-inch)	107 MGD	172 MGD
Hydropower Plant Capacities (Nameplate)		
Power Generation		
Pardee	23.6 MW	
Camanche	10.7 MW	

NOTES:

1. Dead storage capacity is defined as the volume of a reservoir below the level of the lowest outlet.
2. Aqueduct capacity is dependent on Pardee elevation. Higher flow rates (up to 325 MGD maximum capacity) require pumping at the Walnut Creek Pumping Plant.

AF = acre-feet; MGD = million gallons per day; MW = megawatts

Table 3. Total System Storage (TSS), Total Operational Storage, and Terminal Reservoir Water Sources

Mokelumne River Facilities		**Capacity (AF)**
Pardee		203,795
Camanche		417,120
Subtotal		620,915
Terminal Reservoirs	**Water Sources**	**Capacity (AF)**
Briones	Mokelumne Aqueducts, Bear Creek	58,960
Upper San Leandro	Mokelumne Aqueducts, San Leandro Creek and tributaries	38,905
San Pablo	Mokelumne Aqueducts, San Pablo Creek, Bear Creek, and Briones Reservoir	38,600
Chabot	Mokelumne Aqueducts, San Leandro Creek, Upper San Leandro Reservoir, Miller Creek	10,350
Lafayette	Lafayette Creek[1]	4,250
Subtotal		151,065
Total System Storage		**771,980**
Inaccessible Volume		74,500
Total Operational Storage		**697,480**

NOTES:

1. The raw water line for the Mokelumne Aqueducts was disconnected from the reservoir in 1971.

AF = acre-feet

Current and Projected Demands

Current and projected demands are provided in **Table 4** below from EBMUD's 2020 UWMP. **Table 5** from EBMUD's 2020 UWMP presents the demands in context of EBMUD's need for water during droughts given the water supplies previously described.

Table 4. Average Annual Water Demand Forecast – 2050 Demand Projections (MGD)

	2020	2025	2030	2035	2040	2045	2050
Forecasted Water Demand	238	245	254	264	277	287	297
Water Conservation[1]	-48	-53	-58	-61	-63	-65	-66
Recycled Water[1]	-5	-6	-6	-9	-13	-13	-13
Raw Water	-0.2	-0.2	-0.2	-0.2	-0.2	-0.2	-0.2
Planning Level of Demand (Rounded)	**181**	**186**	**190**	**194**	**201**	**209**	**218**

1. See 2020 EBMUD UWMP Chapters 6 and 5 for program details on conservation and water recycling, respectively. The goals reflected in this table consider the uncertainty described in Section 5.2.3 and Section 6.1.3 of the 2020 EBMUD UWMP.

Table 5. Supply & Demand Assessment, 2020 – 2050

EBMUD Planning Level of Demand (PLOD)		**2020**	**2025**	**2030**	**2035**	**2040**	**2045**	**2050**

Sustainable Groundwater Management Act (SGMA)

EBMUD has interests in two groundwater subbasins: the East Bay Plain Subbasin and the Eastern San Joaquin Groundwater Subbasin. Details are provided below.

East Bay Plain Subbasin

As a result of three legislative bills (Assembly Bill 1739, Senate Bill 1168, and Senate Bill 1319) signed into law in September 2014 and collectively known as SGMA, EBMUD initiated stakeholder outreach efforts in 2015 to identify eligible local agency interests in the formation of a Groundwater Sustainability Agency (GSA) for the East Bay Plain Subbasin. Stakeholders requested EBMUD to take the lead in SGMA compliance efforts and form a GSA as EBMUD was deemed suited to undertake the SGMA compliance responsibilities. On November 29, 2016, EBMUD became an exclusive GSA for the portion of the East Bay Plain Subbasin which underlies its service area pursuant to Water Code §10723.8(c) and (d). The City of Hayward is the GSA for the portion of the East Bay Plain Subbasin that underlies its service area.

In January 2022, EBMUD and City of Hayward collectively adopted and submitted the East Bay Plain Subbasin Groundwater Sustainability Plan (GSP), fulfilling the requirements established under SGMA. The GSP establishes management actions that ensure the East Bay Plain Subbasin is sustainable within 20 years of implementation. EBMUD and the City of Hayward are responsible for implementing the GSP management actions.

Eastern San Joaquin (ESJ) Groundwater Subbasin

EBMUD and partners in Eastern San Joaquin County completed the DREAM Pilot Project, a pilot groundwater banking project, to determine whether a larger groundwater banking project is feasible in the ESJ Subbasin. A larger groundwater banking project has been identified in the ESJ Groundwater Sustainability Plan as a Potential Project to achieve groundwater sustainability.

Groundwater Banking

Groundwater banking efforts are currently focused in Eastern San Joaquin County where the DREAM Pilot Project was located.

The DREAM Pilot Project provided North San Joaquin Water Conservation District (NSJWCD) with up to 1,000 AF of EBMUD surface water from the Mokelumne River that participating landowners used for irrigation in lieu of pumping groundwater from the ESJ Subbasin; thereby, storing groundwater for future use. During dry years, EBMUD could recover up to half of the banked groundwater for use within its service area. The DREAM Pilot Project provided multiple benefits, including replenishment of the critically-over drafted ESJ Subbasin and dry year supplemental water supply for EBMUD. See **Figure 3** for a visual depiction of the DREAM Pilot Project.

Pending further evaluation of the results of the DREAM Pilot Project and planning level evaluation for an expanded groundwater banking project, EBMUD, NSJCWCD, San Joaquin County, and the Eastern Water Alliance may pursue a larger, longer-term groundwater banking project. The expanded project capacity is currently planned for EBMUD to deliver up to 3 to 8 TAF Mokelumne River water to project partners for recharge depending on EBMUD water supply conditions. Due to the project location, the American River watershed is not anticipated to be impacted by the expanded project.

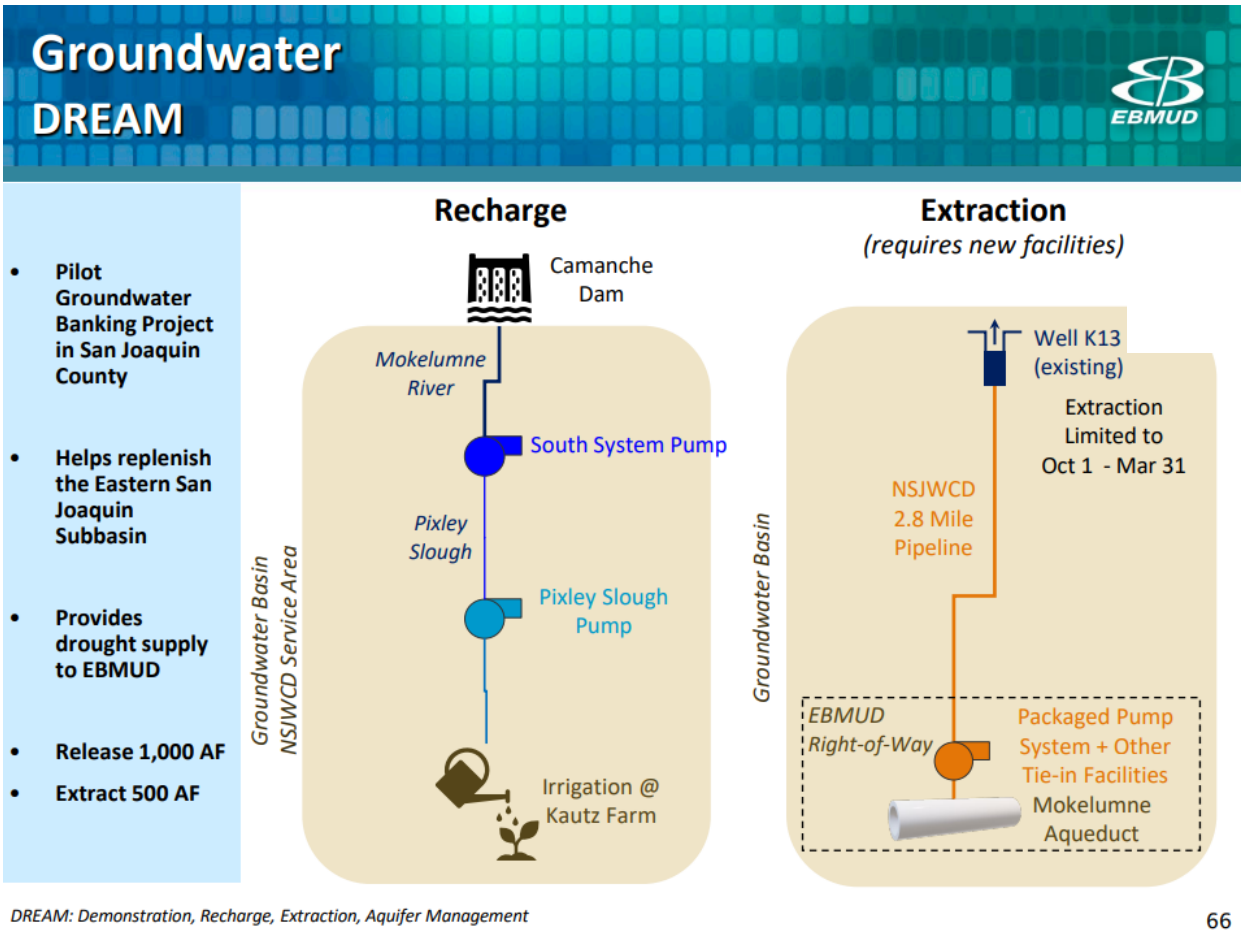

Figure 3. DREAM Pilot Project

Demand Management

EBMUD commits to meeting the current conservation and water use efficiency regulations, which include the 2024 "Making Conservation a California Way of Life" regulations, Assembly Bill (AB) 1572 related to irrigation of non-functional turf with potable water, and the Model Water Efficient Landscape Ordinance (MWELO) which encourages low-water use and native landscaping for new development. EBMUD will meet the aforementioned requirements by continuing to implement a combination of customer education, incentive programs, and efficiency improvements.

The Water Conservation Strategic Plan will guide EBMUD over the next few decades to encourage water conservation and invest in solutions which boost water conservation. The key components of its demand management portfolio are:

- **Supply Side Conservation** (leak detection, water loss reduction, pressure management, replace leaky pipes)
- **Water Management Services** (Online water consumption portal for customers, water budget reports, single family and multi-family housing consultations, WaterSmart certifications, and more)

- **Research and Development** (partnership with UC Davis and California Water Efficiency Partnership)
- **Rebates and Incentives** (low-flow plumbing hardware, landscape conversion, irrigation equipment, flowmeters, grey-water, landscape design assistance grant, mulch coupons, custom rebates for large projects)
- **Education and Outreach** (EBMUD website education materials, marketing, community events, WaterSmart Gardener program and demonstration garden grants, K-12 classroom materials)

The estimated water conservation through 2050 by implementing the Water Conservation Strategic Plan is shown below in **Figure 4**.

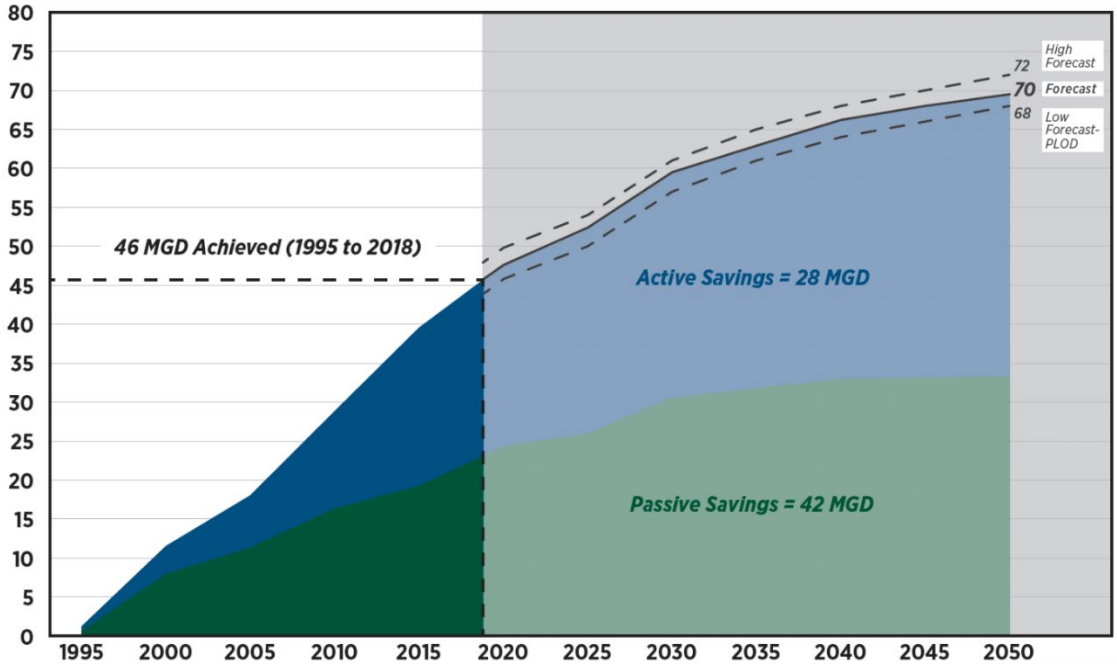

Figure 4. Forecasted EBMUD Water Conservation (Million Gallons per Day)

Climate Change

EBMUD recognizes climate change is a growing threat to the reliability of water resources. In preparation for the future uncertainties associated with climate change, EBMUD has undertaken a rigorous evaluation of potential impacts.

EBMUD continually considers climate change impacts and takes actions to understand, mitigate, and adapt to those impacts. EBMUD maintains a Climate Change Monitoring and Response Plan (CCMRP) to inform planning efforts for future water supply, water quality, and infrastructure, and to support water and wastewater infrastructure investment decisions. Assessments were made to identify potential impacts to EBMUD in the areas of water supply and demand, water quality and the environment, flood control management, infrastructures, and energy:

- In water supply, decreased runoff and timing of runoff poses impacts to carryover storage.

- Water demand and usage could increase as a result of warmer climate, as well as result in increased frequency of rationing due to water supply shortages.
- Water quality could decrease as a result of warmer air temperatures shifting in spring runoff, and increasing peak runoff. Managing cold water pool levels in Camanche and Pardee Reservoirs becomes more challenging with more frequent dry water year types and warming rivers and reservoirs. Any modifications to temperatures in the river could lead to impacts to fisheries.
- Rising sea levels could lead to increase in storm surge flood events, thereby posing challenges for flood control management due to the timing of the runoff and increased peak runoff. Sea level rise could damage infrastructure in the Delta and near the shore; primary concerns for EBMUD include the potential inundation of the Mokelumne Aqueducts from levee failure/overtopping in the Delta.
- Lastly, climate change could negatively affect hydropower generation as a result of changes in runoff timing and patterns, and management of cold water pool. The electricity transmission lines could lose transmitting capacity in high air temperatures, and there is an increase in the probability of wildfire exposure for some major transmission lines.

Managing Severe Droughts

EBMUD's Drought Management Program (DMP) provides a framework to manage customer demand and pursue a diversified portfolio to reach a goal of providing 85-percent reliability for customers in EBMUD's service area while continuing to meet all stream flow obligations on the lower Mokelumne River. The DMP guided EBMUD in managing demand and supply during the 2014-2016 and 2020-2022 droughts when mandatory and voluntary rationing was imposed, and water supplies were limited. During both the 2014-2016 and 2020-2022 droughts, EBMUD faced unanticipated constraints and updated and implemented measures to assist with demand and supply management. The DMP was revised to reflect lessons learned and actions that were taken.

The triggers to implement water shortage response action are defined by the Total System Storage (TSS) as illustrated in **Figure 5**. **Table 6** shows the types of programs and actions that EBMUD might undertake at each stage of drought.

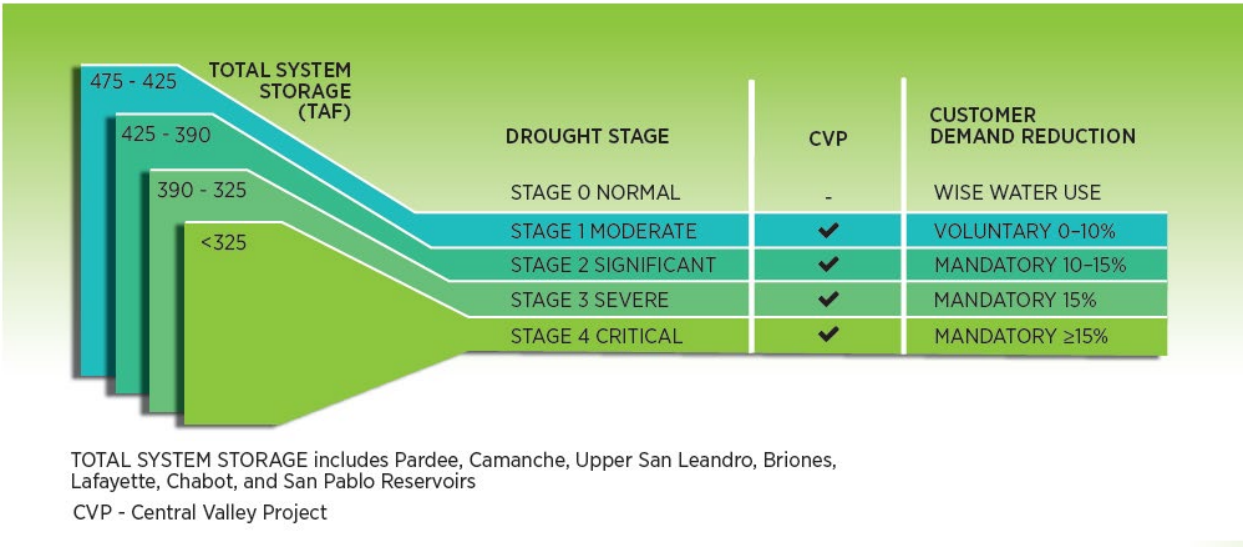

Figure 5. EBMUD Drought Management Program Guidelines

Table 6. Drought Management Program Elements by Stage for TSS Scenario

EBMUD Drought Stage	Drought Program Elements Considered
Stage 1 Moderate *Voluntary 0-10% Rationing*	• Apply Stage 1 Drought Surcharge • Establish voluntary water use reduction goals and determine use restrictions • Initiate a public information campaign to explain the water supply situation and customer responsibilities • Outreach and education may include EBMUD's website, social media, media outreach, advertising, workshops and events, bill inserts and bill messaging • Initiate community water waste hotline and online water waste reporting • Issue up to 50,000 single family residential (SFR) home water reports • Provide commercial and residential landscape water budgets to up to 5,000 accounts • Provide conservation audits and WaterSmart home survey kits • Issue up to 5,000 indoor plumbing fixture and appliance rebates • Conduct water audits • Provide up to 5,000 free water saving devices • Expand water loss control program (e.g. acoustic loggers, leak detection crew)
Stage 2 Significant *Mandatory 10-15% Rationing*	In addition to elements of Stage 1: • Apply Stage 2 Drought Surcharge • Continued outreach and education • Provide online EBMUD store ordering (restaurant and hotel tent cards, stickers) • Increase SFR home reports to 75,000 households

EBMUD Drought Stage	Drought Program Elements Considered
	• Increase commercial and residential landscape water budgets to 25,000 accounts • Issue up to 10,000 free water savings devices
Stage 3 **Severe** *Mandatory* *15% Rationing*	In addition to elements in Stage 2: • Apply Stage 3 Drought surcharge • Advanced media outreach/response • Advance customer outreach & education • Consider water saving campaigns, challenges • Consider supplementing education and outreach with website tools and information; outdoor, radio, publications, and online advertising; drought theaters or other education for children; contests and pledges; promotional items, signs, drought newsletters, customer outdial messages, postcard mailings, etc. • Institute Excessive Use Penalty for SFR customers with use > 60 ccf/month • Initiate supersaver recognition program • Increase SFR home reports to 100,000 households • Increase commercial and residential landscape water budgets to 50,000 accounts • Issue up to 7,000 indoor plumbing fixture and appliance rebates • Issue up to 8,000 outdoor landscape & irrigation rebates • Issue up to 15,000 free water savings devices • Provide field enforcement of regulations and water use restrictions
Stage 4 **Critical** *Mandatory* *≥15% Rationing*	In addition to elements in Stage 3: • Apply Stage 4 drought surcharge • Institute Excessive Use Penalty for SFR customers with use >40 ccf/month • Increase SFR home reports to 325,000 households • Increase commercial and residential landscape water budgets to 150,000 accounts • Issue up to 2,000 free water savings devices

Note:
This table is based on the Drought Management Program adopted by EBMUD's Board of Directors on 06/22/2021 and revised on 07/01/2025. EBMUD may revise the DMP elements from time to time.

The availability of water to EBMUD may be impacted depending on the nature of an emergency. In such cases, EBMUD would determine the applicable shortage response actions with reference to its Water Shortage Contingency Plan.

For example, the shortfall in Year 3 of a drought at 2050 demands as presented earlier in the Supply & Demand Assessment results on Table 5 would be mitigated by a combination of water transfers, San Joaquin County groundwater banking (potential expanded DREAM project), and future non-potable/potable reuse. This is in addition to demand rationing and EBMUD's CVP contract. EBMUD is

currently updating the Need for Water as part of the 2025 Urban Water Management Plan. Updates to this PSA document will be made as needed during the Water Forum 2050 comprehensive 5-year reviews.

Water Code Section 10632 requires water shortage contingency plans to provide water supply shortage levels at 10, 20, 30, 40, 50, and >50 percent thresholds. Urban water suppliers with existing water shortage contingency plans may meet this requirement by cross-referencing the water utility's existing water shortage stages to the State of California's six standard water shortage levels. In general, EBMUD brings in supplemental supply water and requests customers to reduce demand when the total operational storage is reduced by almost one-third. **Table 7** presents EBMUD's water shortage levels cross-referenced with the State's new standardized water shortage levels. EBMUD's water shortage levels for this cross-referencing are determined by the total operational storage available.

Table 7. Shortage Levels Cross-Referenced With State's Shortage Stages

Shortage Level	Percent Shortage Range	Shortage Response Actions *(Narrative description)*
1	Up to 10%	EBMUD WSCP Stage 1 - Moderate; Regulations and restrictions on water use is in effect. Refer to UWMP Attachment 1 (WSCP) Table W-6 for shortage response actions.
2	Up to 20%	EBMUD WSCP Stage 2 - Significant; Regulations and restrictions on water use and drought surcharge are in effect. Refer to UWMP Attachment 1 (WSCP) Table W-6 for shortage response actions.
3	Up to 30%	EBMUD WSCP Stage 3 - Severe; Emergency regulations and restrictions on water use during water shortage emergency condition, Regulations and restrictions on water use, Drought Surcharge, and Excessive Use Ordinance are in effect. Refer to UWMP Attachment 1 (WSCP) Table W-6 for shortage response actions.
4	Up to 40%	EBMUD WSCP Stage 4 - Critical; Emergency regulations and restrictions on water use during water shortage emergency condition, Regulations and restrictions on water use, Drought Surcharge, and Excessive Use Ordinance are in effect. Refer to UWMP Attachment 1 (WSCP) Table W-6 for shortage response actions.
5	Up to 50%	EBMUD WSCP Stage 4 - Critical; Emergency regulations and restrictions on water use during water shortage emergency condition, Regulations and restrictions on water use, Drought Surcharge, and Excessive Use Ordinance are in effect. Refer to UWMP Attachment 1 (WSCP) Table W-6 for shortage response actions.
6	>50%	EBMUD WSCP Stage 4 - Critical; Emergency regulations and restrictions on water use during water shortage emergency condition, Regulations and restrictions on water use, Drought Surcharge, and Excessive Use Ordinance are in effect. Refer to UWMP Attachment 1 (WSCP) Table W-6 for shortage response actions.

It is difficult to quantify the reduction in gap between supplies and demand due to the implementation of the response actions as outlined in Table 6. The response actions would be adjusted based on the level of rationing that is achieved and to meet EBMUD's policy of providing 85% reliability to its customers. At each stage, EBMUD will consider augmenting its supplies as outlined in Figure 5 with the quantities determined based on antecedent conditions and projected demand. The response actions to close the gap between supply and demand as well as the augmented supplies needed that year are outlined in the annual water supply availability assessments.

EBMUD CVP Contract

In years when EBMUD is authorized to take water under the terms of its CVP contract, which is limited only to specified water storage conditions, Reclamation allocates the water in the same manner as it does for other north-of-Delta American River Division municipal and industrial contractors. Like other CVP contractors, EBMUD's service area is included within the consolidated place of use for all the CVP

water rights. EBMUD is willing to discuss this matter further during the American River Climate Adaptation Program process if requested by the Environmental Caucus.

Management and Protection of the Mokelumne River

As part of its Strategic Plan, EBMUD has committed to manage the Mokelumne and East Bay watersheds to ensure a high-quality water supply and protect natural resources while providing appropriate public access. EBMUD has several ongoing and planned actions to meet this goal, including Mokelumne River water temperature management, EBMUD's pending Healthy Rivers and Landscapes (HRL) proposal, and forestry health work with the Upper Mokelumne River Watershed Authority (UMRWA).

Existing Water Temperature Management

The JSA includes a provision for cold water management to support downstream temperatures. It requires EBMUD to use its best efforts to maintain Pardee and Camanche Reservoir stratification with a minimum of 28,000 acre-feet of hypolimnetic volume (the volume of water colder than 16.4℃) in Camanche Reservoir through October, whenever Pardee Reservoir volume exceeds 100,000 acre-feet. This provision for temperature management necessitates adaptive, flexible operations of both Pardee and Camanche reservoirs.

This water temperature requirement and other water quality requirements were established to support fall run Chinook salmon and Steelhead in the Mokelumne River during the critical fall spawning and incubation period. To manage the system to achieve that volume, or a comparable adaptive approach to ensure cold water for salmon in the fall, there are multiple actions that EBMUD can take. These include the following:

- Joint operation of Pardee and Camanche reservoir releases to maximize cold water transfer efficiency from Pardee to Camanche and minimize cold water losses within the system
- Releasing warmer surface water from the Camanche Reservoir high level outlet in place of cold water releases from the bottom of the reservoir when acceptable downstream (typically April through September) to conserve cold water for fall
- Minimizing cold water diversions into the Pardee Reservoir Tower (which serves the aqueducts to the service area) to preserve cold water in Pardee for supporting the downstream cold-water pool in Camanche Reservoir

Mokelumne River HRL Flow Proposal

The goal of the Mokelumne River HRL Flow Proposal is to build on the JSA successes in the Lower Mokelumne River through a mix of flow and non-flow measures that benefit anadromous fish. If the EBMUD HRL Flow Proposal is accepted by the SWRCB, spring flow contributions will be increased without any significant effect on Camanche Reservoir release temperatures.

The Mokelumne HRL Flow Proposal was developed to provide biologically beneficial flow regimes below Camanche Dam based on ambient conditions and when those flows are most beneficial to Mokelumne River fisheries. The proposal provides that the entirety of the obligated block flow (except in offramp years) will be released during the designated year. The Mokelumne River Proposal anticipates 70 to 90 percent of full annual volume to be released in the March through May period for fry and juvenile

rearing and outmigration, and 10 to 30 percent to be released in October for adult migration, spawning, and incubation.

In summary, the Mokelumne River HRL flow proposal has been designed to build on the substantial fishery benefits achieved with the JSA over the past 26 years, providing enhanced ecosystem conditions through a combination of flow and non-flow measures while maintaining the ability to manage temperatures in the Lower Mokelumne River.

Mokelumne River HRL Non-Flow Proposal

If EBMUD's HRL proposal is accepted by the SWRCB, 25 acres of new floodplain rearing habitat enhancement measures will be created. In addition, EBMUD has committed to the annual maintenance of a restored 1-mile (15 acres) spawning reach. No designated spawning habitat is required under minimum required habitat goals, but EBMUD has implemented 1.27 acres of new spawning habitat and 2.67 acres of maintenance of existing habitat as early implementation actions and will continue to implement habitat improvements above the minimum required as landowner and funding opportunities allow. One acre of suitable instream rearing habitat will be implemented through screening diversions and providing habitat complexity during spawning habitat restoration work. Habitat enhancement measures will be implemented in accordance with the design criteria established for habitat restoration projects under the HRL Non-Flow initiatives, as outlined in Table 15 in the Water Quality Control Plan for the San Francisco Bay/Sacramento–San Joaquin Delta Watershed (CSWRCB, 2025).

Watershed Forestry Health

EBMUD and its partners in UMRWA are implementing forest health projects that improve wildfire resiliency and protect water quality, particularly in areas along roadways where wildfires are most likely to ignite. Catastrophic wildfires in the Mokelumne Watershed would significantly impact the quality and reliability of EBMUD's supply. Forest thinning, meadow restoration, and related projects reduce that threat.

UMRWA is a Joint Powers Authority comprised of six water agencies and three counties working collaboratively to address natural resource issues in the Upper Mokelumne watershed in Alpine, Amador, and Calaveras counties. UMRWA was formed in 2000. Over its 25-year existence, UMRWA has facilitated solutions to a variety of water, forest, and associated watershed issues. Since 2011, UMRWA has secured and administered nearly $40M in state and federal grants for water and forest projects in the watershed.

UMRWA is currently seeking a contractor for the El Dorado National Forest Projects Plan–Phase 1. The Forest Projects Plan–Phase 1 is a 25,671-acre timber stand and wildlife habitat improvement and protection project located on lands administered by the Eldorado National Forest (ENF) Amador Ranger District, within the upper Mokelumne and South Fork American River watersheds. The Phase 1 project is designed to help prevent high-intensity, large-scale wildfires, improve forest conditions, and protect important wildlife habitat and other resources. Non-commercial actions to reduce forest fuels are presently underway on 7,900 acres within the Phase 1 project area. The 11,695 +/- Phase 1 acres remaining to be treated are shown in Pending Projects Map, Forest Projects Plan–Phase 1. UMRWA has an annual fuel treatment goal of 4,000 acres per year.

Historical EBMUD Contributions to the Co-Equal Objectives

Although EBMUD would be a new signatory to the Water Forum Agreement, EBMUD has financially contributed to the success of the co-equal objectives. The investment and continued partnership with Sacramento County Water Agency in the FRWA intake on the Sacramento River and accompanying Folsom South Canal Connection (FSCC) system was a significant investment to convey EBMUD's supplemental supplies. In total, EBMUD spent approximately $500 million to construct the FRWA/FSCC systems. The FRWA intake is located downstream of the American River confluence and, when opportunities arise, allows for American River water to be diverted after it has traveled the full distance of the Lower American River (LAR), thus providing potential benefits for LAR corridor health.

EBMUD has also been an integral partner to PCWA's PSA by purchasing the Water Forum releases during dry years. PCWA's releases to the LAR provide both flow and temperature benefits to anadromous fish during the late summer/fall months of the driest years when the flows are most important to fish survival. Since EBMUD and PCWA began their partnership in 2013, EBMUD has purchased approximately 37 TAF for $20.4 million from PCWA.

In addition to EBMUD's specific investments, EBMUD has indirectly supported LAR habitat enhancement through contributions to the Central Valley Project Improvement Act (CVPIA) Restoration Fund. Since 2013, EBMUD has contributed approximately $1.8 million to the CVPIA Restoration Fund.

EBMUD Surface Water Framework

This section summarizes the EBMUD proposal for Water Forum 2050 commitments related to surface water diversions in terms of their contributions to the coequal objectives and proposed investments (Projects).

Contributions to River Corridor Health

- Minimize direct surface water diversions on the LAR by taking water at Freeport.
    - EBMUD's intake facility at the Freeport project offers a unique opportunity in dry years. When water resources are scarce, and other purveyors may be letting water flow down the American River for out-of-basin transfers and/or relying more heavily on groundwater resources, EBMUD can continue to take water at Freeport to alleviate drought conditions while also allowing surface water to provide flow and temperature benefits for the LAR.
- Contribute to the CVPIA Restoration Fund pursuant to EBMUD's CVP contract ($1.8 million to date).
- Long-term commitment, pursuant to contract between PCWA and EBMUD, to purchase PCWA Water Forum releases intended for the flow and temperature benefit of the LAR during dry years.

Contributions to Water Supply Reliability

1. Continued evaluation and investment where appropriate in a diverse water supply portfolio that meets water supply needs and limits reliance on the American River watershed. See Figure 6 for EBMUD's water supply portfolio concept approach.

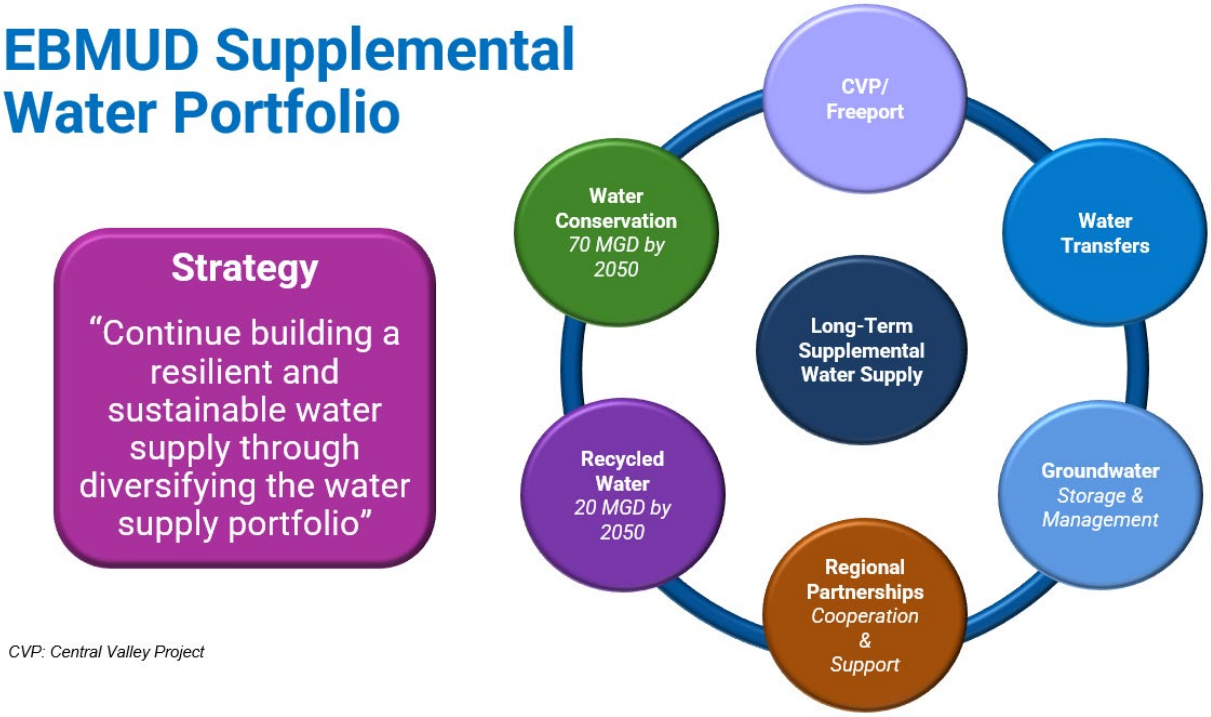

Figure 6. EBMUD's Water Supply Portfolio

Potential Future EBMUD Projects and Investments

(Note: this list is not a commitment by EBMUD to pursue these projects. Pursuit of these projects will be at the discretion of EBMUD's Board of Directors and depend on EBMUD's need for water during dry years, trends in customer demands, and financial capacity to pay for the projects. EBMUD may decide to pursue a subset of the included projects or none at all.)

- Expanded water conservation and water loss reduction programs
- Expanded DREAM project (expanded yield to be determined)
- Expanded recycled water, including evaluation of potable reuse potential and feasibility
    - Updated goal: 20 MGD by 2050 (non-potable reuse and future potable reuse)
- Evaluate potential participation in the Sacramento Regional Groundwater Bank
- 10 TAF CVP Contract Assignment from SMUD to participate in future potential storage projects (surface or groundwater)
    - If EBMUD seeks the SMUD assignment, EBMUD currently intends to divert all supplemental supply into the Folsom South Canal from Freeport, not Nimbus Dam,

unless there is a request from Reclamation and support from stakeholders to do so that supports LAR health.

- Long-Term Water Purchase Agreement with Placer County Water Agency for Water Forum releases
- Long-Term Water Transfer Agreement with Yuba Water Agency for Yuba Accord releases
- Short-term crop idling transfers with Sacramento Valley irrigators
- Mokelumne River Healthy Rivers and Landscapes Agreements
- Mokelumne Aqueducts Resiliency Project (MARP)

WATER FORUM AGREEMENT 2050

El Dorado Irrigation District Purveyor Specific Agreement

Updated: January 8, 2026

Purveyor Background

El Dorado Irrigation District (District) provides water, sewer, recycled water, and water-related recreation services within its service area. The District is the major water supplier located on the western slope of the Sierra Nevada Mountains in El Dorado County. The contiguous service area of the District spans approximately 220 square miles and includes a variety of urban, suburban, and rural communities and land uses. The population of the District's service area is approximately 130,000, accounting for approximately two thirds of the total population of El Dorado County.

The District operates over 1,119 miles of water pipe, 27 miles of ditches, 5 water treatment plants (WTP), 4 sewage treatment facilities, 456 miles of sewer lines, 60 lift stations, 36 water and 5 recycled water storage and regulating reservoirs, and 38 water and 5 recycled water pump stations. The District's WTPs have a total treatment capacity of approximately 102.6 million gallons per day (mgd).

The District also owns and operates a 21-megawatt hydroelectric generation project (Project 184) licensed by the Federal Energy Regulatory Commission (FERC) which consists of 4 reservoirs (Echo Lake, Lake Aloha, Caples Lake, and Silver Lake), dams, a forebay, a penstock, a powerhouse, and approximately 22 miles of flumes, canals, siphons, and tunnels located in the Sierra Nevada Mountains east of Placerville in the counties of El Dorado, Alpine, and Amador. The District acquired this hydroelectric generation project from Pacific Gas and Electric Company (PG&E) in 1999. The District operates the hydroelectric generation facilities, including recreational features, incidental to delivery of water and sells the generated power on the wholesale market. While the District generates revenue from operating Project 184, the project was purchased primarily to preserve the pre-1914 water rights associated with the facilities and to facilitate the acquisition of additional water rights thereafter obtained by Permit 21112 (described in more detail below).

Water Supply

The District's primary supplies come from tributaries to the American and Cosumnes Rivers as described below.

Jenkinson Lake

The District owns, operates, and supplies water from Jenkinson Lake through licensed appropriative water rights on Camp and Sly Park Creeks, both tributaries to the North Fork Cosumnes River. The available consumptive supply from Jenkinson Lake is approximately 23,000 acre-feet annually.

Folsom Reservoir

Pursuant to a permanent repayment contract between the District and the United States Bureau of Reclamation (USBR) (the Folsom Reservoir Repayment Contract), the District can divert up to 7,550 acre-feet per year of Central Valley Project water from Folsom Reservoir to serve the El Dorado Hills and western Cameron Park area. Additionally, in August 2010, the District and USBR executed a long-term Warren Act Contract (the Ditch/Weber Warren Act Contract) to enable the District to utilize up to 4,560 acre-feet of water per year at Folsom Reservoir from four pre-1914 water rights formerly associated with historic District ditches.

The District also has an appropriative water right (Permit 21112) to make consumptive use of 17,000 acre-feet annually of the water previously used only for Project 184's hydroelectric power operations. Pursuant to this right, water may be taken from Folsom Reservoir. On August 3, 2016, the District and USBR finalized and signed a long-term Warren Act Contract for use of the full 17,000 acre-feet until 2030, after which the contract is eligible for renewal.

Finally, pursuant to Public Law 101-514 (enacted in 1992), El Dorado County Water Agency (EDCWA) and USBR signed a long-term water service contract on October 23, 2019, for 15,000 acre-feet per year of water from Folsom Reservoir. Though the District and EDCWA have not yet negotiated a contract that will enable the District to utilize this supply, the District expects that, pursuant to a prior contract with the EDCWA, the District will receive at least one-half, or 7,500 acre-feet, of the water subject to future negotiation of repayment costs. This contract entitlement, if secured, will be in addition to the current Folsom Reservoir Repayment Contract entitlement of 7,550 acre-feet of water, the Ditch/Weber Warren Act Contract entitlement of 4,560 acre-feet of water, and the Permit 21112 Warren Act Contract entitlement of 17,000 acre-feet of water.

Forebay Reservoir

Forebay Reservoir is part of Project 184. Water stored in Silver, Caples, and Echo lakes and Lake Aloha is released and then diverted, along with natural river flows, into the El Dorado Canal near Kyburz and Highway 50. The El Dorado Canal conveys up to 165 cubic feet per second (cfs) approximately 22.5 miles to Forebay Reservoir in Pollock Pines. At the Forebay Reservoir, the District diverts up to 15,080 acre-feet per year for drinking water treatment at Reservoir 1 WTP.[47] The balance of the flows entering Forebay Reservoir is utilized for power generation at Project 184's El Dorado Powerhouse.

Crawford Ditch

The District has pre-1914 water rights to 5,000 acre-feet of water annually from both the North Fork Cosumnes River and Clear Creek points of diversion into the Crawford Ditch, a Gold Rush era ditch.

[47] The District also delivers some water originating in the District's Project 184 facilities into Jenkinson Lake via its Hazel Creek Tunnel.

Water from Crawford Ditch is available only as raw water for irrigation and agricultural customers located along the Crawford Ditch and none of this supplemental supply is included in the District's system firm yield water supply calculations.

In 2021, the calculated system firm yield from the first three of the sources of water supply described above totaled 63,500 acre-feet. Current surface water entitlements from both the American River and Cosumnes River total around 81,500 acre-feet, with 44,200 acre-feet originating in the American River and its tributaries.

The District has no interties with surrounding purveyors although the District's connectivity to Folsom Reservoir provides connection to other purveyors that receive Folsom Reservoir supplies. The District does, however, have multiple interties between the American and Cosumnes basins internal to both the District's raw water intake system and treated water distribution system.

The District currently does not use groundwater as a source of supply, nor does it overlie any groundwater basins identified by DWR Bulletin 118. Given the lack of any groundwater basins on the western slope of El Dorado County, it is extremely unlikely that the District will ever utilize groundwater as a supply in the future. While the District remains open to considering opportunities for conjunctive use projects within or outside of its service area, no such projects have been identified at this time. However, the District is participating in the Regional Water Authority's Sacramento Groundwater Bank.

The District also has a recycled water system with source water from two regional wastewater treatment plants that operate with an annual production rate of approximately 3,500 acre-feet. The District has used recycled water to meet non-potable demands such as industrial processes and irrigation of golf courses, landscaping, outdoor residential irrigation, and road medians within the El Dorado Hills service area. Potable water has been used to supplement the recycled water system since 2002 to meet peak demands. Construction of seasonal storage for recycled water would reduce or eliminate the need to supplement the recycled system with potable water, but the estimated costs to construct seasonal storage make it infeasible at this time.

Surface Water Management

Current and Projected Demands

The District has invested in long-term water efficiency efforts that have kept water demands relatively stable despite population growth in El Dorado County. Current District demands are on average approximately 35 thousand acre-feet (TAF) annually. This is down from approximately 45 TAF in 2008 but demands are expected to return to approximately 40 TAF by 2045. See **Figure 1**, below, for historic District diversions from both the American River and Cosumnes River to meet customer potable demand at WTPs.

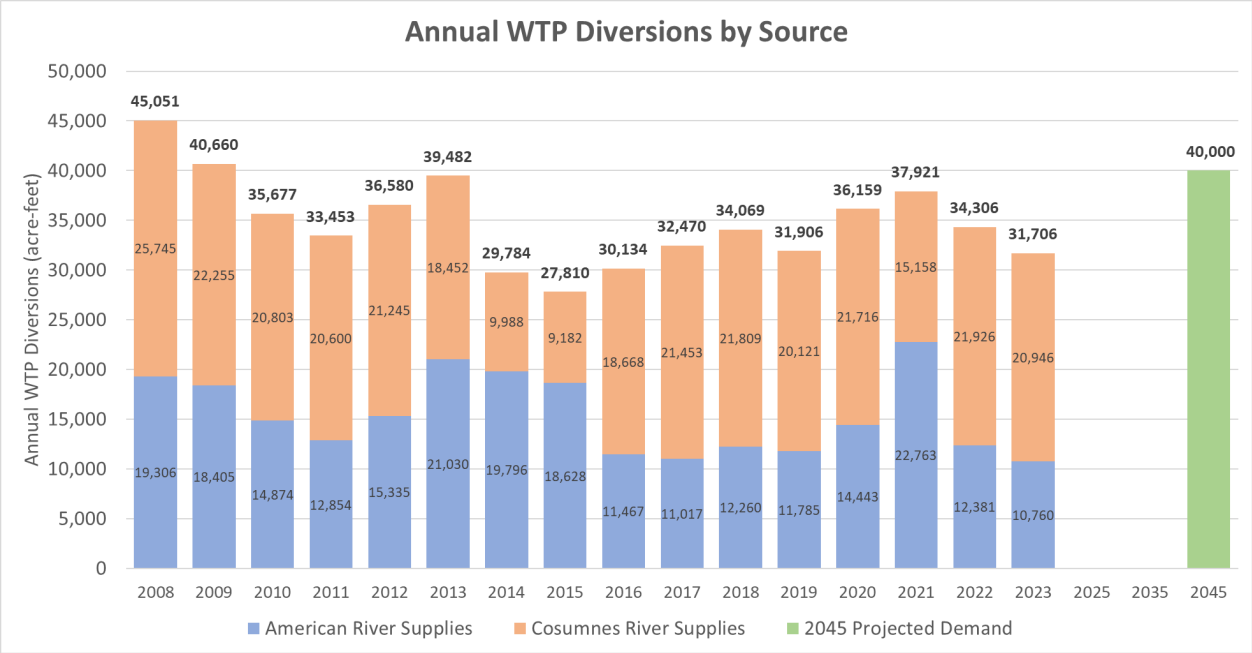

Figure 1. District American River and Cosumnes River Diversions to Meet Customer Potable Demand

The percentage of water demands met by the American River or Cosumnes River supplies described above varies with hydrologic conditions and the operational constraints of the District's water delivery system. Recent hydrologic modeling indicates that hydrologic conditions affecting Cosumnes River supplies during dry and critically dry water years will limit the District's ability to meet increased customer water demands through increased reliance on Cosumnes River supplies. During such dry conditions with future water demands, the District proportional reliance on American River supplies may increase if Cosumnes River supplies are inadequate. As described in more detail below, there may be opportunities for the District to shift from one source of supply (i.e., American River) to another (i.e., Cosumnes River) during certain times to help meet the Water Forum's coequal objectives.

Notably, the District has invested heavily over the last decade in infrastructure improvements that help meet the Water Forum's coequal objectives. Examples include the $50-million construction of a temperature control device at the District's Folsom Lake intake, the $25-million piping of an open and unlined ditch, and the recently awarded $50-million contract to construct the Sly Park Intertie pipeline between the District's two primary supply sources on the American and Cosumnes Rivers.

El Dorado Irrigation District Surface Water Management Proposal

In service to the Water Forum's coequal objectives, and subject to all of the terms and conditions of the Water Forum 2050 agreement, including the caveats and assurances described herein, the District offers the following proposal. Commitments are discussed generally and in four different sections specific to:

- Normal (Most) and wet conditions
- Drier conditions
- Driest conditions
- Critically Low Folsom Reservoir Storage conditions

This proposal was prepared with the following guiding principles in mind:

1. *Reduce surface water diversions from the Lower American River (LAR) in dry conditions to provide for river health.*

2. *Prioritize surface water diversions in wet conditions to allow groundwater recharge.*

As presented in detail above, the District meets customer demand with supplies deriving from both the American River and Cosumnes River watersheds. Consistent with the guiding principles listed above, the District will reduce surface water diversions from the American River in dry conditions by adhering to its then-adopted Drought Action Plan and Water Shortage Contingency Plan. The Drought Action Plan includes specific actions for the management of the District's water supply and demand, addresses the impacts associated with drought, and facilitates the timely implementation of effective drought responses. When and to the greatest extent possible, the District will rely upon Cosumnes River supplies to meet customer demand.

The District does not have access to groundwater and is, therefore, unable to substitute surface water diversions with groundwater extraction in times of surface water scarcity. However, as an operator of reservoirs upstream of Folsom Reservoir, the District is capable of releasing water from storage in Normal (Most) and Wet years for affordable transfer to LAR purveyors, which would allow purveyors that would otherwise need groundwater to forgo groundwater pumping in wet years and thereby promote groundwater recharge. The District is also able to provide additional transfer water in Drier and Driest years – amounts subject to hydrologic conditions and potential curtailments to District entitlements. The District is currently participating in the Regional Water Authority's Sacramento Groundwater Bank and through that venue will seek partnerships with LAR purveyors for the transfers described above.

Normal (Most) and Wet Conditions Management

In normal (most) and wet conditions, the District will use American River supplies to meet up to 50% of its *forecasted 5-year total potable demand* and potentially provide transfer water for conjunctive use to improve groundwater conditions.

- Normal conditions exist when the forecasted unimpaired inflow into Folsom Reservoir (UIFR) is greater than 950 TAF.
- Wet conditions exist when the forecasted UIFR is greater than 1.6 MAF.

In normal and wet conditions, the District's surface water diversions would be defined by the *forecasted 5-year total potable demand* in the most recent Urban Water Management Plan (UWMP). Because the District meets customer demand from both the American and Cosumnes River supplies, the *forecasted total potable demand* must be reduced to account for only the diversions from the American River. The reduction would be informed by recent diversion patterns in the preceding 10-year period with the maximum single-year ratio of demands met with American River supplies being applied to normal conditions (up to 50%). This 10-year maximum ratio of demand met by American River supplies would be applied to the UWMP *forecasted 5-year total potable demand*.

Below is a theoretical example:

- UWMP Forecasted 5-year Total Potable Demand: 40 TAF
- 10-year maximum ratio of American River-derived supplies to meet demand: 50%
- Total American River Surface Water Diversions: 40 TAF * 0.50 = 20 TAF

In addition to the commitments for surface water diversions in normal and wet conditions, the District proposes to provide transfer water to LAR purveyors when the UIFR is above 950 TAF and supplies allow. The transfer of water could improve groundwater conditions in the lower reaches of the watershed through direct groundwater recharge or wheeling of water to users that are traditionally served by groundwater in these year types.

Drier Conditions Management

In drier conditions, the District will implement the conservation measures required by its adopted Drought Action Plan, limit use of American River supplies to meet up to 70% of UWMP forecasted 5-year total potable demand, and potentially provide transfer water for conjunctive use to improve groundwater conditions.

- Drier conditions exist when the forecasted UIFR is between 400 TAF and 950 TAF.

In drier conditions, the proportion of diversions from the American River will increase relative to normal and wet conditions due to limited Cosumnes River supplies. Instead of surface water diversion reductions, the District proposes to provide downstream benefits through the reoperation and transfer of stored supplies and entitlements to LAR purveyors. The quantity of water available in drier conditions will be dependent on watershed conditions and reservoir storage. The commitment of potential volumes available for transfer to LAR purveyors or south of the Sacramento-San Joaquin Delta (south-of-Delta) demand and the source of this water can be defined at a later stage.

Driest Conditions Management

In driest conditions, the District will implement the conservation measures required by its adopted Drought Action Plan, limit use of American River Supplies to meet up to 75% of forecasted 5-year total potable demand, and potentially provide transfer water for conjunctive use to improve groundwater conditions.

- Driest conditions exist when the forecasted UIFR is less than 400 TAF.

In driest conditions, the proportion of diversions from the American River will increase relative to drier, normal, and wet conditions due to increasingly limited Cosumnes River supplies. Instead of surface water diversion reductions, the District proposes to provide downstream benefits through the reoperation and transfer of stored supplies and entitlements to LAR purveyors. The quantity of water available in driest conditions will be dependent on watershed conditions and reservoir storage. The commitment of potential volumes available for transfer to LAR purveyors or south-of-Delta demand and the source of this water can be defined at a later stage.

Critically Low Storage Conditions in Folsom Reservoir

Climate change is expected to greatly increase the frequency of critically low storage in Folsom Reservoir. Below characterizes potential District operations that might help the American River under the following two conditions:

1. Potential operations in spring and summer when Folsom Reservoir storage is forecasted to reach 110 TAF at some point in the calendar year:
    - Rely on Cosumnes River supplies to meet customer demand to the greatest extent possible

- Conserve water as described in the District's Drought Action Plan
- Potentially provide transfer water stored higher in the watershed
- Plan for the potential installation of temporary barge and pumps at Folsom Lake

2. Potential operations in summer and fall when Folsom Storage is below 110 TAF:
    - Rely on Cosumnes River supplies to meet customer demand to the greatest extent possible
    - Conserve water as described in the District's Drought Action Plan
    - Potentially provide transfer water stored higher in the watershed
    - Potentially install temporary barge and pumps at Folsom Lake

Demand Management

As noted above, the District invested in long-term water efficiency efforts that successfully reduced demands notwithstanding population growth within its service area. Current District demands are on average approximately 23% lower than the peak demand of 45,000 acre-feet in 2008.

In 2019, the District converted its Main Ditch into an underground pipeline, at a cost of approximately $20 million, to reduce system water losses. That project resulted in annual savings of approximately 1,500 acre-feet of water from seepage and evaporation. The District successfully defended a lawsuit brought by local opposition under the California Environmental Quality Act—see Save the El Dorado Canal v. El Dorado Irrigation District (2022) 75 Cal.App.5th 239 (upholding El Dorado Irrigation District's Environmental Impact Report and denying the petition for writ of mandate).

The District's Office of Water Efficiency offers several programs and services to commercial and residential customers to help conserve and achieve higher water efficiency. For example, District water efficiency staff perform water audits for homes and businesses to evaluate irrigation systems, plumbing retrofits, and detect system leaks. The District also offers rebates for qualifying purchases of water-efficient appliances.

The District is committed to abiding by current and future relevant conservation and water use efficiency regulations. At the time of signing the Water Forum 2050 agreement, key requirements are associated with the following: 2024 Making Conservation a California Way of Life regulations, Assembly Bill 1572 related to irrigation of non-functional turf with potable water, and the Model Water Efficient Landscape Ordinance (MWELO) which encourages low-water use and native landscaping for new development.

The District's anticipated approach to comply with current water conservation efforts remains under development. On September 22, 2025, the District awarded a contract to Hoch Consulting to assist the District in developing a compliance and reporting plan to implement the Making Conservation a California Way of Life regulation. The approach will be guided by input from District staff, members of the communities we serve, and regional partners through the Water Forum. A similar process will be employed to roll out programs and actions to meet future regulatory calls for conservation. District staff will leverage the Water Forum to engage and update the region as progress is made.

Contributions to River Corridor Health

To contribute to the co-equal goal of river corridor health, the District will take the following actions:

- Release water below District reservoirs (Lake Aloha, Caples Lake, Silver Lake on the South Fork American River and Jenkinson Lake on the Cosumnes River) that provide downstream benefits to aquatic resources year-round. On the South Fork American River and its tributaries, the District's minimum instream releases are set forth in its FERC license for Project 184 and streamflow is measured at USGS reviewed gaging stations. On the Cosumnes River, minimum instream releases are included in the District's licensed water rights for Camp and Sly Park Creeks. Bypass flows are maintained through an 8" pipe at the Camp Creek diversion dam and release requirements to Sly Park Creek below Sly Park Dam (Jenkinson Lake) are maintained and measured by the District. The instream releases described above in both the American River and Cosumnes River are ongoing and will continue to promote and protect watershed health.
- Conserve water as described in the District's Drought Action Plan to increase instream flows both above and below Folsom Reservoir.
- Make payments to the Central Valley Project (CVP) Restoration Fund. As conditions under its CVP contract, and as a requirement to divert water from Jenkinson Lake (previously considered a CVP facility), the District pays a per-acre foot restoration fee, as authorized by the Central Valley Project Improvement Act. Annual payments depend on hydrology and customer demand in any given year. In 2023, the District paid over $500,000 in restoration payments to USBR.
- Release additional water from storage for instream flow as part of the American River Tributary portion of the proposed Intra-Tributary Agreement to Implement Healthy Rivers and Landscapes, an alternative to the unimpaired flow approach recommended by the State Water Resources Control Board in the proceedings to update Bay-Delta Water Quality Control Plan.
- Operate its Folsom Lake intake to maximize the benefit of its temperature control device, diverting water above 60 degrees Fahrenheit while USBR is managing the cold-water pool (which may occur annually April through November, depending on conditions).
- Rely on Cosumnes River supplies to meet customer demand to the greatest extent possible, effectively reducing surface water diversions from Folsom Reservoir and the South Fork American River.
- Pursue a feasible alternate supply for customers served by upper Crawford Ditch. Presently, the District diverts up to 15 cfs (closer to 6 cfs on average) from the North Fork Cosumnes River under Pre-1914 water rights from May through October to supply non-potable uses for a small number of customers. If the District can identify a feasible alternative, it could refrain from diverting the water, leaving the water in the North Fork Cosumnes to contribute to in-stream beneficial uses.
- Potentially provide transfer water in normal/wet years for groundwater recharge through the Sacramento Groundwater Bank and during drier/driest years to meet LAR and south-of-Delta demand to increase instream flows below Folsom Reservoir.

Contributions to Water Supply Reliability

To contribute toward the co-equal goal of water supply reliability, the District will take the following actions:

- Continue investing in water supply reliability by adhering to its annually adopted 5-year capital improvement plan. Notable projects in that plan include:
    - Construction of the Sly Park Intertie (currently under construction in 2025)
    - Replacement of wooden flumes with concrete
    - Replacement of hypalon water storage reservoirs with concrete
    - Replacement of the Silver Lake Dam (scheduled to begin in 2027)
- Expand its water treatment and transmission facilities as described in its then current Water and Recycled Water Master Plan (adopted on June 24, 2024).
- Potentially provide transfer water in normal years (groundwater recharge) and during drier/driest years (meet LAR demand) to increase instream flows below Folsom Reservoir.

The final section of this document includes a list of completed and ongoing District projects.

Caveats and Assurances

1. The signatories hereby acknowledge that the District's existing Urban Water Management Plan forecasts an increase in future customer potable water demand. The signatories further acknowledge that (1) the District will need to ensure that it has sufficient available water supplies to meet forecasted future water demands throughout the District's service area; and (2) ensuring sufficient available water supplies may require the District to undertake infrastructure and non-infrastructure projects that impact District water rights and supplies.
2. Without foregoing any current or future rights or remedies with respect to any project in particular, the Signatories hereby commit to work in good faith toward understanding each party's respective interests and to seek to resolve any concerns regarding present and future water rights projects.
3. In the event of unforeseen circumstances, the District must be relieved of the commitments included herein. Unforeseen circumstances include, but are not limited to, curtailment of senior water rights, unanticipated infrastructure failures, forecasted carryover storage that falls below historical averages, changes in statute or regulation that inhibit the District's ability to meet commitments, etc.

Project List and Future Water Supply Reliability Efforts

The following projects and initiatives are key to the District meeting the commitments contained herein and its water supply reliability in 2030 and beyond:

- Regional water transfers and agreements (partnerships)
- Addition of upstream point of diversion to Permit 21112

Table 1 provides a listing of major completed and ongoing District projects.

Table 1. Major Water Supply Projects that Promote Water Forum Coequal Objectives

Project(s) Identified in Water Forum Agreement		Project Status
Completed	Main Ditch Piping project	*Project completed in 2022*
	Replacement of wooden flumes with concrete	*Many sections completed with others in the planning/design phase*
	Folsom Lake Intake project with temperature control device (TCD)	*The project is complete and TCD operational as of 2023*
Ongoing/Pending	Sly Park Intertie	*Intertie construction active in 2025*
	Replacement of Silver Lake Dam	*Dam construction to begin in 2027*
	Addition of upstream point of diversion for Permit 21112	*Public engagement and environmental document preparation*
	Improved and expanded transmission with the District distribution system	*See Water and Recycled Water Master Plan for details*
	Expanded treatment capacity of El Dorado Hills Water Treatment Plant	*Planning and public engagement phase*
	Recycled water storage project	*Planning phase*
	Negotiation of agreement with El Dorado Water Agency to utilize Fazio water	*TBD*
	Potentially provide transfer water to meet LAR needs	*TBD based on potential agreements with LAR purveyors*
	Pursue a feasible alternate supply for customers served by upper Crawford Ditch (North Fork Cosumnes River)	*Planning phase*

WATER FORUM AGREEMENT 2050

Golden State Water Company
Arden System and Cordova System
Purveyor Specific Agreement

Updated: January 8, 2026

Purveyor Background

Golden State Water Company (GSWC) is a subsidiary of American States Water Company, an investor-owned utility dedicated to increasing value through the expert management of utility assets and services. GSWC, then known as Southern California Water Company, was formed in 1929. In the 1960's, GSWC purchased multiple water systems in Sacramento County to form the GSWC Cordova and the GSWC Arden systems. The two water systems are not hydraulically connected to each other. Today, the GSWC Cordova serves a portion of the City of Rancho Cordova and the unincorporated community of Gold River. In 2023, GSWC Cordova served approximately 15,424 connections. GSWC Arden serves a portion of the unincorporated community of Arden within the political jurisdiction of the County of Sacramento. In 2023, GSWC Arden served approximately 1,770 connections.

Supply Portfolio

GSWC Cordova's water supplies have been augmented over time to adapt to changing conditions and provide a diverse and flexible water supply portfolio.[48] GSWC Cordova's primary water supply consists of groundwater pumped from the Sacramento Valley Groundwater Basin through GSWC-owned wells, and surface water from the American River that is treated at the Coloma Water Treatment Plant. Water assets include a pre-1914 appropriative water right, Aerojet GET (Groundwater Extraction and Treatment) water supplies from a remediation agreement, and native groundwater supplies. GSWC Cordova also maintains emergency connections with neighboring agencies that allows it access to additional sources of water in emergency conditions.

GSWC Arden derives its supply from the Sacramento Valley Groundwater Basin through GSWC-owned wells. GSWC Arden also maintains emergency connections with neighboring agencies that allow it access to additional sources of water in emergency conditions.

[48] GSWC Cordova 2020 UWMP, July 2021, page ES-2.

Surface Water Supplies[49]

For GSWC Cordova, GSWC possesses a pre-1914 appropriative right from the South Fork of the American River established by the Natoma Water Company in 1851. Natoma Water Company's original pre-1914 water right established a maximum diversion rate "to fill a Canal Eight feet wide and Four feet deep with a current running ten miles per hour." This correlates to a diversion rate of 60 cubic feet per section (cfs) and a maximum allocation of 32,000 acre-feet per year. This water right is held jointly with City of Folsom pursuant to a co-tenancy agreement. The co-tenancy agreement means that both the City of Folsom and GSWC have the right to use the water to the fullest extent possible as desired by the respective entities. The City of Folsom and GSWC have allocated the supplies under the entire 32,000 acre-foot water right. The City of Folsom unilaterally controls 22,000 acre-feet and GSWC controls the remaining 10,000 acre-feet of which 5,000 acre-feet is under contract. In November 1994, the City of Folsom and GSWC executed a contract under which the City of Folsom acquired the right to lease 5,000 acre-feet of water per year. As such, the basis of this water asset is held with GSWC pursuant to the co-tenancy agreement but the lease of the water asset to the City of Folsom is pursuant to a lease agreement. The 1851 filing is the earliest in priority of perfected appropriative rights on the South Fork of the American River and is recorded.

GSWC Cordova's surface water supply is diverted from the Folsom South Canal and is treated at the Coloma/Pyrites Water Treatment Plant.

GSWC Arden does not rely on surface water supply.

Groundwater Supplies[50]

Groundwater supplies constitute a major component of the GSWC Cordova's water supply portfolio. The groundwater supplies for GSWC Cordova are derived from the South American Subbasin of the Sacramento Valley Groundwater Basin. The aquifers in the area are recharged from rainfall, applied irrigation water, streambed recharge, and irrigation channel recharge. The American River provides substantial stream channel infiltration.

GSWC Cordova has eight active groundwater wells. These wells are located throughout GSWC Cordova's service area and include both typical wells and those with wellhead treatment to address the Aerojet contamination issues in the service area.

Groundwater supply constitutes the entirety of the GSWC Arden's water supply portfolio. The groundwater supplies for GSWC Arden are derived from the North American Subbasin of the Sacramento Valley Groundwater Basin. GSWC Arden has six active groundwater wells.

Aerojet GET Water Supply[51]

As of 2015, GSWC had nine wells in GSWC Cordova. Prior to 2015, fourteen wells had to be destroyed due to contamination, and another was transferred to Aerojet for use as a remediation well. As part of a settlement agreement, Aerojet is obligated to deliver 5,000 AF of granted water to GSWC each year.

[49] GSWC Cordova 2020 UWMP, July 2021, page 3-1.
[50] GSWC Cordova 2020 UWMP, July 2021, page 3-3.
[51] GSWC Cordova 2020 UWMP, July 2021, page 3-9.

This water is discharged by Aerojet remediation wells into the American River for extraction and treatment at the Carmichael Water District (CWD) water treatment plant. The treated water is then pumped under the American River and into the GSWC Cordova service area. This agreement with CWD allows GSWC to divert and use the Aerojet GET Water replacement supply.

Per GSWC's 2020 Urban Water Management Plant (UWMP), it should be noted that additional groundwater wells may be taken offline in the future due to contamination. GSWC's Settlement Agreement requires Aerojet to supply up to an additional 10,200 acre-feet of water per year.

Distribution System of Note

GSWC Cordova maintains an intertie with CWD, an intertie with Sacramento County Water Agency (SCWA), and emergency interconnections with SCWA, the City of Folsom, and two locations with California American Water. GSWC Arden maintains two emergency connections with Sacramento Suburban Water District (SSWD).

Current and Projected Demands

GSWC Cordova

Table 1 summarizes the GSWC Cordova demand over the last 10 years. The current GSWC Cordova service area is primarily characterized by low- to medium-density residential land use, with some mixed use, commercial, and light industrial land use also present, mostly along Sunrise Boulevard and Coloma Road.[52] There is a corridor of parks and open space along the American River Parkway in the northern portion of the service area. Most development in the service area existed prior to 2015 and is not expected to change significantly through 2045 (2020 UWMP planning period).

Table 1. GSWC Cordova—Historical Annual Demands

Year	Total Demand (AFY)*
2014	13,954
2015	11,594
2016	12,790
2017	13,293
2018	13,456
2019	13,037
2020	14,360
2021	13,592
2022	12,561
2023	12,308

* Includes non-revenue water use

Development and redevelopment in the existing GSWC Cordova service area, where expected, will consist mostly of incremental infill that does not significantly change existing land uses. Transit Oriented Development and mixed-use infill along Folsom Boulevard and the Gold Line light rail route will likely be among the most significant changes from current conditions within the existing service area. The

[52] GSWC Cordova 2020 UWMP, July 2021, page 2-5.

unincorporated community of Gold River is primarily residential and near full build-out; future land use is expected to closely resemble current land use in this portion of the service area.

Projected water demands (**Table 2**) are from GSWC Cordova's 2020 UWMP for the planning period of 2025 through 2045.[53] GSWC may expand its service area boundary in the future to serve the proposed Westborough Development Project (Westborough Project) which is planned to be developed on land southeast of the current service area, east of Sunrise Boulevard and south of Folsom Boulevard. The Westborough Project site is located on lands that were once part of the Aerojet-Rocketdyne facilities and would consist of 1,665 acres of new residential, mixed-use development including 7,072 dwelling units, a town center and commercial area, parks, a school, water delivery facilities, and open spaces. The Westborough Project could potentially begin construction within the next five years and may reach full buildout by 2040.

Table 2. GSWC Cordova—Projected Water Demands, AFY (2025 – 2045)

Year	2025	2030	2035	2040	2045
Current Service Area	13,605	13,949	14,301	14,662	15,032
Westborough Project	2,400	2,796	4,028	4,028	4,028
Total	**16,005**	**16,745**	**18,329**	**18,690**	**19,060**

Note:

a. GSWC Cordova 2020 UWMP Table 4-5.
b. GSWC Cordova 2020 UWMP Table 4-6.
c. Per the 2020 UWMP, demand assumptions for Westborough are based on the Westborough internal planning documents, which are currently in draft form and subject to change but represent the reasonable information available to GSWC at the time of the 2020 UWMP preparation.

GSWC Arden

Table 3 summarizes the GSWC Arden demand over the last 10 years. The current GSWC Arden service area is primarily characterized by low- to medium-density residential land use, with some commercial land use. The GSWC Arden System is considered near build-out. Most new connections are likely to be generated by redevelopment rather than new development. Preparation of a UWMP is not required for GSWC Arden; for the planning period of 2025 through 2045, projected demands are expected to be relatively constant compared to the existing demands.

Table 3. GSWC Arden—Historical Annual Demands

Year	Total Demand (AFY)*
2014	896
2015	778
2016	793
2017	854

[53] GSWC Cordova 2020 UWMP, July 2021, page 4-6.

Year	Total Demand (AFY)*
2018	836
2019	836
2020	932
2021	925
2022	852
2023	828

* Includes non-revenue water use

Surface Water Management

Surface water is integral to GSWC Cordova's water supply portfolio. The following sections describe how surface water is managed for the GSWC Cordova System. GSWC Arden does not rely on surface water.

Current Diversions

Table 4 summarizes the annual diversions from the American River.

Table 4. GSWC Cordova—Historical Diversions from the American River

Year	GSWC Cordova (AFY)	City of Folsom Leased Water* (AFY)	Total Diversion (AFY)
2014	4,768	4,470	9,238
2015	3,569	3,988	7,557
2016	4,068	3,510	7,578
2017	4,596	-	4,596
2018	4,994	-	4,994
2019	4,623	-	4,623
2020	2,500	-	2,500
2021	3,929	-	3,929
2022	4,649	-	4,649
2023	5,053	-	5,053

* From 2014 – 2016, GSWC leased American River water supply from the City of Folsom due to a short-term emergency to mitigate the loss of groundwater due to contamination. In 2017, the American River pipeline became operational and GSWC Cordova started receiving supplies from CWD. See *Aerojet GET Water Supply* Section for more detail.

Future Projected Diversions

GSWC Cordova will continue to use its pre-1914 appropriative right from the South Fork of the American River.

Drier Conditions Management

The fundamental management tenet for GSWC Cordova's water service reliability in dry periods is to coordinate with the City of Folsom and United States Bureau of Reclamation (Reclamation) for its pre-1914 appropriative surface water rights, Sacramento Central Groundwater Authority for groundwater management, and CWD for the treated Aerojet supply.[54] Discretion over the amount of groundwater pumped allows GSWC Cordova to match its total supplies to meet annual demands which increases GSWC Cordova's dry year resilience.

In 2015, the driest year in the last 100 years in California, the State Water Resources Control Board curtailed some pre-1914 appropriative water rights with priority dates as early as 1903. The 1851 water right was protected from curtailment because of its seniority. As such, the entirety of this water right was available to GSWC in all year types which makes it extremely resilient against drought conditions and regulatory curtailment.

In February 2024, the California Public Utilities Commission (CPUC) approved GSWC's request to enter into the American River Terms of Ecosystem Support and Infrastructure Assistance Needs (ARTESIAN) Project Agreement. The ARTESIAN Agreement would require GSWC to forebear the use of up to 763 acre-feet of its surface water rights from the South Fork of the American River during three dry or critical years from 2025 through potentially 2036. In exchange, GSWC would receive grant funding to upgrade its interconnections with SCWA. This Agreement to intermittently encumber water will be similarly followed by eight other entities, working together through a Department of Water Resources (DWR) endeavor to reduce diversions from the Lower American River during dry years and increase instream flows necessary to support ecosystems and fish species, by encumbering a total of 30,000 AF of water each of those years.

GSWC acknowledges and supports the goals and general framework of the Sustainable Groundwater Management Act (SGMA) and intends to operate its surface water and groundwater supplies in a manner broadly consistent with SGMA objectives, to the extent applicable to the company and subject to regulatory and contractual obligations.

Driest Conditions Management

See previous section for Drier Conditions Management.

Critically Low Storage Conditions

See previous section for Drier Conditions Management.

Demand Management

From the perspective of GSWC, demand management is a critical strategy for ensuring long-term water supply reliability, regulatory compliance, and operational efficiency while staying committed to customer service and environmental stewardship. By offering programs such as conservation incentives, employing tiered rate structures, performing reoccurring leak detection efforts, and engaging in public education, GSWC can more effectively manage consumption, especially during drought or peak demand periods

[54] GSWC Cordova 2020 UWMP, July 2021, page ES-4.

Project List and Future Water Supply Reliability Efforts

Structural

- Upgrades to GSWC Cordova interconnections with SCWA due to the ARTESIAN Agreement
- Ongoing water main and service replacements to reduce water loss for both systems (GSWC Cordova and GSWC Arden)
- Ongoing replacement of aged water meters to control and/or reduce non-revenue water for both systems

Non-Structural

- Continued water use efficiency programs for both systems.

Caveats and Assurances

1. The ability for any individual purveyor to implement the surface water diversions principles will depend on their respective opportunities and constraints.
2. In circumstances where excess water is made available by Reclamation by a Section 215 Contract between the purveyor and Reclamation due to flood control or "uncontrolled season" operations at Folsom Reservoir, for the purposes of groundwater recharge, that water would not be counted as diversion water within their Purveyor Specific Agreement (PSA), regardless of year type.
3. Protection of purveyor's water entitlements. This Agreement shall not modify or diminish any vested water rights, including GSWC's pre-1914 appropriative right on the Lower American River. Use of surface water for the purpose of maintaining hydraulic control to prevent groundwater contaminant migration resulting from basin pumping shall remain a fully protected and recognized exercise of GSWC's water entitlements.
4. Support aquifer storage and recovery for the purposes of groundwater recharge and surface banking within purveyors' water entitlements.
5. Water demands in future UWMPs shall be re-visited and updated in the surface water diversions table.
6. GSWC is contractually obligated to use its 5,000 acre-feet of surface water rights as the baseline supply for the GSWC Cordova system. Deviation from this requirement requires consent from the other party. This consent would be sought during severe adverse conditions, but a positive outcome cannot be assured.
7. GSWC is regulated by the California Public Utilities Commission (CPUC). GSWC's implementation of this PSA is subject to review by the CPUC. GSWC may modify or terminate implementation of this PSA upon receiving an adverse decision related to implementation by the CPUC.

WATER FORUM AGREEMENT 2050

Placer County Water Agency Purveyor Specific Agreement

Updated: January 8, 2026

Purveyor Background

Placer County Water Agency (PCWA) was created in 1957 by a special act of the California Legislature known as the Placer County Water Agency Act. The boundaries of PCWA are coterminous with the boundaries of Placer County. PCWA has a five-member board of directors elected in each of the county's supervisorial districts for four-year terms.

PCWA carries out a broad range of responsibilities including water resource planning and management, wholesale and retail supply of water, and hydroelectric energy production. PCWA has access to stored surface water appropriative rights and contract entitlements totaling roughly 500,000 acre-feet per year (AFY), with about half this amount being planned for consumptive use. PCWA also has access to a regionally managed sustainable groundwater supply.

PCWA currently delivers approximately 100,000 AFY of treated and untreated water to retail customers and approximately 30,000 AFY to neighboring water suppliers for resale, serving a total population of over 250,000 people in Placer County directly or indirectly. In addition, PCWA regularly makes surface water available through transfers to assist fishery protection goals in the lower American River while simultaneously providing water supplies to water purveyors across the state with limited access to water in dry years and periods of drought.

In the future, it is anticipated that PCWA will have a buildout water demand of approximately 253,000 AFY. PCWA is actively engaged in regional water planning, such as conservation and conjunctive use, to ensure sufficient water supply is available to meet demands.

Service Area

In accordance with its act, PCWA's district boundary overlays the entire area of Placer County. However, PCWA formed Zone 6 as a boundary to reflect its practical service area under current planning in western Placer County (**Figure 1**). The Zone 6 service area is a financial and operational amalgamation of four separate systems acquired or developed over time. Each of these underlying systems is designated as a PCWA Zone; numbered 1, 2, 3 and 5.[55] PCWA refers to Zone 6 as the "Western Water System."

[55] Previously, PCWA served an area called Zone 4. Zone 4, located in Martis Valley near Truckee, California, is now served by Northstar Community Services District.

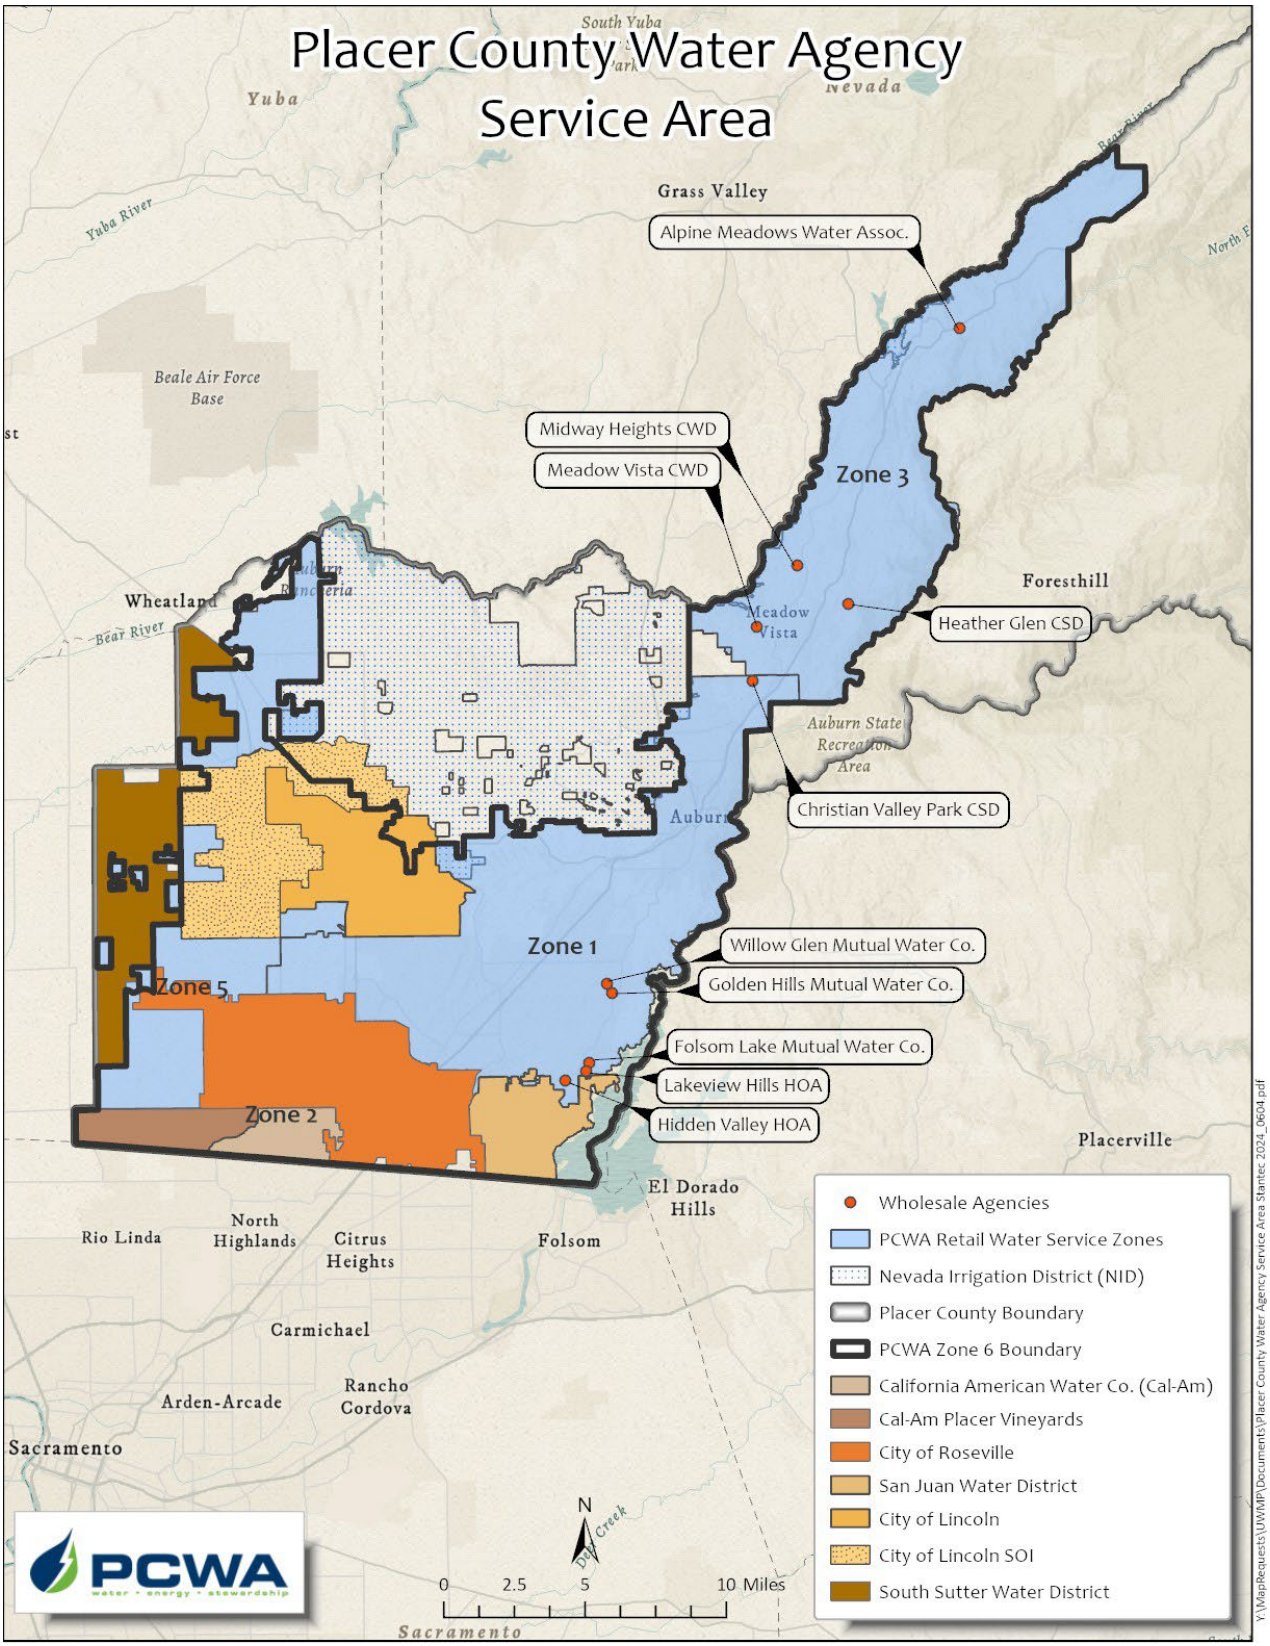

Figure 1. PCWA's Service Area and Zones

The Zone 6 service area extends from the community of Alta on the east, westward down the Interstate 80 corridor, and bounded by the Nevada Irrigation District to the north, the South Sutter Water District to the west, Sacramento County to the south, and El Dorado County to the east. The service area includes retail treated water deliveries to the communities of Alta, Monte Vista, Applegate, Colfax, Auburn, Loomis, Rocklin, and much of the surrounding unincorporated areas within Placer County. PCWA also provides wholesale treated water to the City of Lincoln and California American Water for use in their franchise area west of Roseville and south of Baseline Road, and to other relatively small community water systems throughout PCWA's service area.

In addition to treated water service, PCWA provides untreated water through its extensive canal system to individual customers and water for treatment and resale by other retail water purveyors. Untreated water comprises more than half of PCWA's delivery by volume.

PCWA also provides untreated water under its North Fork American River water rights into Folsom Lake for delivery to the San Juan Water District (SJWD), the City of Roseville, and Sacramento Suburban Water District (SSWD). Thus, PCWA's place of use for its American River water rights extends outside of its district boundary (**Figure 2**).

Supply Portfolio

PCWA uses surface water as its primary water supply for delivery to its wholesale and retail customers. PCWA may also use groundwater in dry hydrologic conditions to meet demands and may use recycled water – produced by the cities of Roseville and Lincoln – to meet demands in the future. Existing and planned supplies are described below and summarized in **Table 1**.

Table 1. PCWA's Existing and Planned Supplies, AFY

Supply Source	2020	2025	2030	2035	2040	Buildout
Middle Fork Project (MFP)	120,000	120,000	120,000	120,000	120,000	120,000
MFP Downstream[1]	47,000	47,000	47,000	47,000	47,000	47,000
Central Valley Project[2] (CVP)	0	0	35,000	35,000	35,000	35,000
Pacific Gas and Electric (PG&E)	125,400	125,400	125,400	125,400	125,400	125,400
Pre-1914 Appropriative Rights	3,400	3,400	3,400	3,400	3,400	3,400
Recycled Water	0	0	2,500	5,000	7,000	9,000
Groundwater	2,000	2,000	4,000	4,000	5,000	5,000
TOTAL SUPPLY	**297,800**	**297,800**	**337,300**	**339,800**	**342,800**	**344,800**

1. MFP supply to be delivered to an expanded place of use downstream in dry years, see Surface Water Management.
2. CVP supply is currently not available due to physical limitations until infrastructure is in place to access this supply, which is assumed to be in 2030.

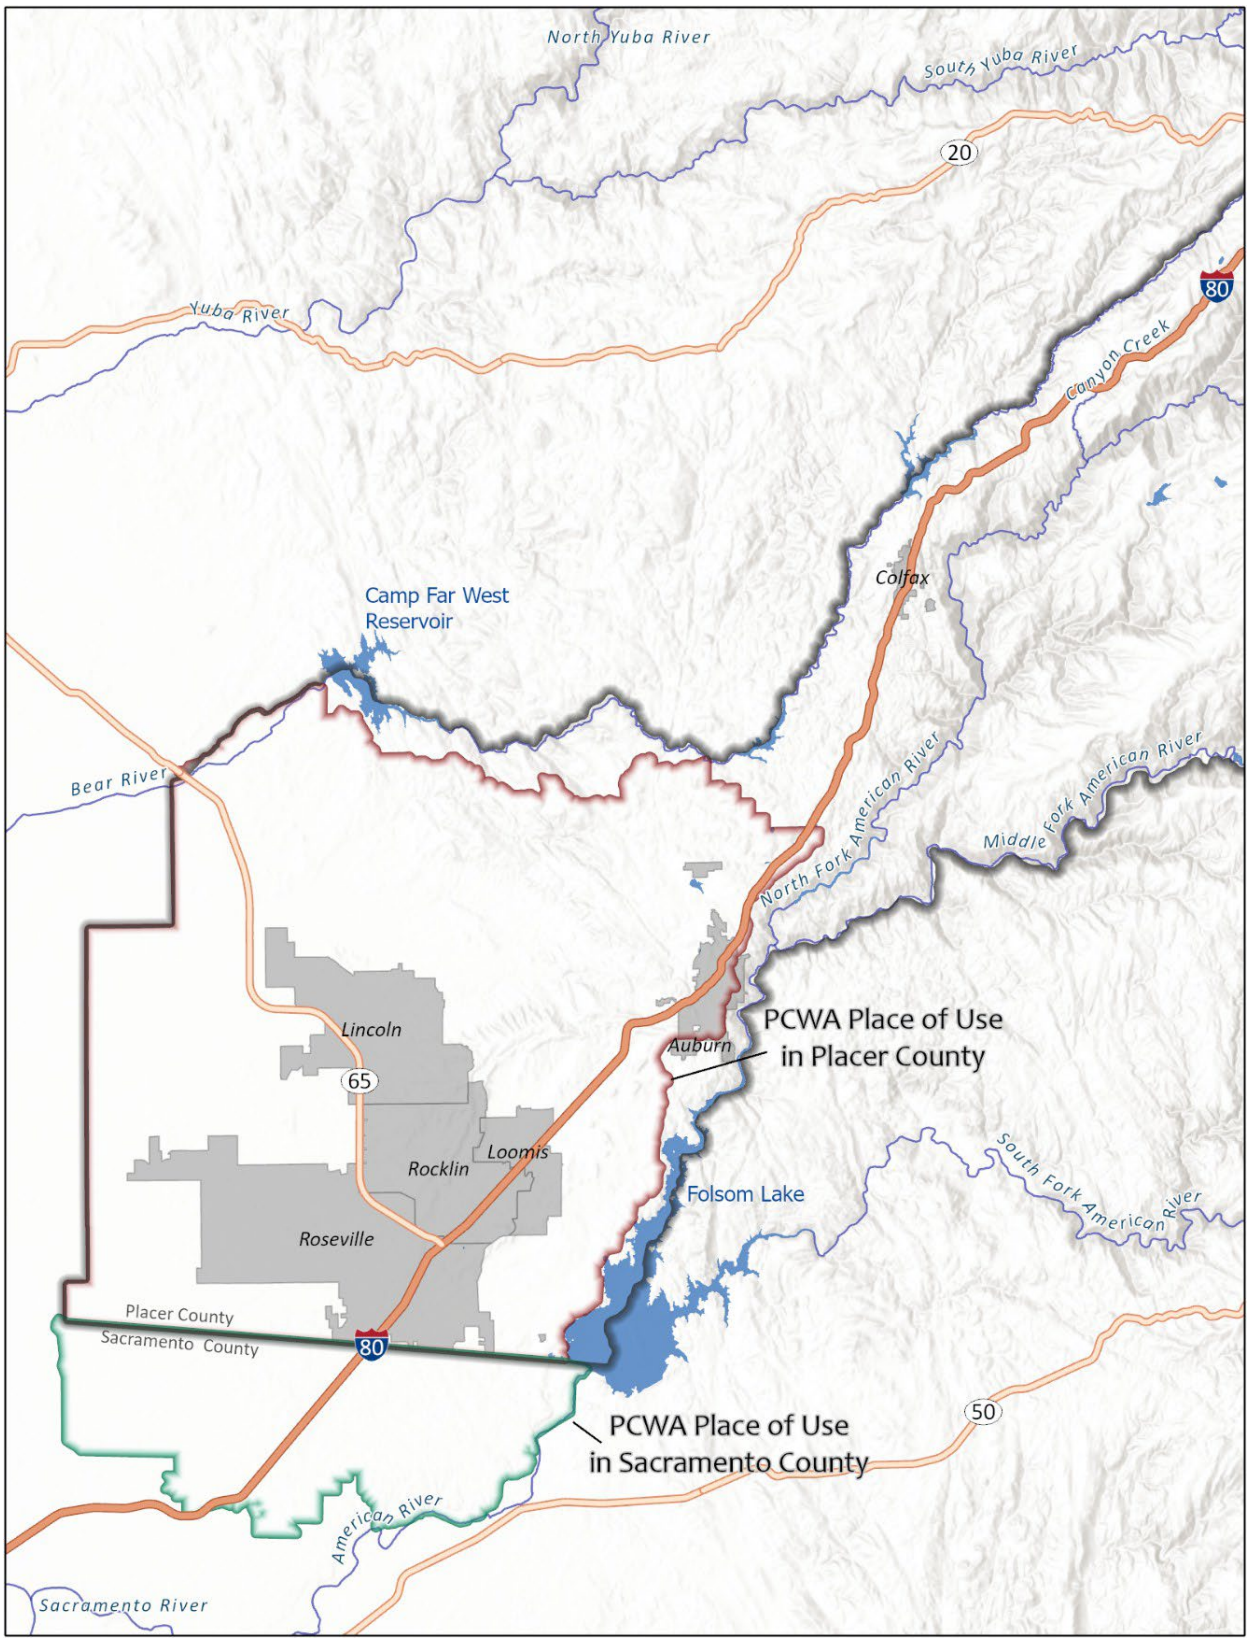

Figure 2. PCWA's American River Water Rights Place of Use

Surface Water

PCWA's surface water supplies consist of water diverted from the Yuba, Bear, and North Fork American Rivers and its tributaries which includes the following:

- Water purchased from Pacific Gas and Electric Company (PG&E) from the Yuba and Bear Rivers (via the Drum-Spauling hydropower system) under the 1982 Zone 3 Contract Purchase Agreement and the 2015 Water Supply Agreement
- Direct diversions from the North and Middle Forks of the American River and water stored in its Middle Fork Project (MFP) under water rights permits 13856 and 13858;
- Central Valley Project (CVP) water under CVP Repayment Contract 14-06-200-5082A-IR1-P from the American River
- Surface water from various small creeks under pre-1914 water rights

A description of PCWA's existing surface water supplies is provided below.

PG&E Contracts

PCWA has two water supply contracts with PG&E for the purchase of up to 125,400 AFY for irrigation and domestic purposes—100,400 AFY under an agreement for the "Western Water System" (formerly Zones 1, 2, and 5) and 25,000 AFY under another agreement for Zone 3. The underlying rights for the PG&E supply are PG&E's pre-1914 appropriative rights to water in the Yuba and Bear Rivers, which were established prior to the time that PG&E developed hydroelectric facilities throughout the Yuba and Bear watersheds and are dedicated to consumptive needs in Nevada and Placer Counties. The water supply that PCWA purchases from PG&E is used to meet both untreated and treated water demands within PCWA's service area.

PG&E Drum-Spaulding water supplies have historically been very reliable. However, during recent droughts the allocation of this supply has been reduced, and climate change projections indicate that this water supply will not be as reliable due to warming temperatures and reductions in precipitation as snowfall. Additionally, the age of the infrastructure in PG&E's Drum Spaulding System has resulted in an increase in infrastructure failures and periods of outage for repairs that affect the reliability of this water supply.

American River Water Rights

PCWA holds appropriative water rights on the North Fork and Middle Fork of the American River and various tributaries thereof pursuant to Permits 13856 and 13858 through the California State Water Resources Control Board (State Water Board), Division of Water Rights, and owns and operates the MFP, a multi-purpose water supply and hydroelectric-generation project. Major components of the MFP include two storage reservoirs, five regulating reservoirs and diversion pools, and five powerhouses. The MFP seasonally stores and releases water to meet consumptive water demands within western Placer County and northern Sacramento County while simultaneously generating clean and renewable power for the California electric grid. Currently, PCWA's use of American River water for consumptive purposes is diverted at two locations: (1) American River Pump Station (ARPS); and (2) Folsom Dam.

The two water rights permits provide water supplies to PCWA's treated and irrigation water customers from the ARPS and to PCWA's wholesale customers from Folsom Dam. PCWA may use water under its

permitted water rights in western Placer County, as well as portions of northern Sacramento County, including SJWD and its wholesale family, SSWD, and Rio Linda/Elverta Community Water District service areas. PCWA's wholesale customers with deliveries out of Folsom Dam currently include the City of Roseville, SJWD, and SSWD.

The year of priority for water right Permits 13856 and 13858 is 1958, one year after PCWA was established by the Placer County Water Agency Act. These water rights were originally part of a State Filed Application filed pursuant to California Water Code section 10500 and were released from priority pursuant to California Water Code section 10504. The release from priority operates as a limited exception to the rule of priority, precluding the eventual assignee of the original State Filed Application from asserting priority against PCWA.

The consumptive volume of water available to PCWA from its American River water rights is currently limited by agreement with the U.S. Bureau of Reclamation (Reclamation). This limitation is related to performance by Reclamation in providing an alternate supply to PCWA pursuant to their CVP contract. The contextual relationship of these supplies is described below.

In November 2007, PCWA timely filed petition for extension of time with the State Water Board requesting an additional 36 years (until the year 2043) in which to put water allocated under these permits to full beneficial use. This petition was supported by members of the Environmental Caucus of the Water Forum. In March 2008, the State Water Board issued a Notice of Petition for Extension of Time (Petition) for Water Right Permits 13856 and 13858. PCWA's Petition for Extension of Time is pending before the State Water Board.

Central Valley Project Contract

PCWA has a CVP water supply contract with Reclamation for delivery of up to 35,000 AFY for municipal and industrial purposes, including groundwater recharge programs that are consistent with applicable State law. The CVP Repayment Contract 14-06-200-5082A-IR1-P (dated February 28, 2020) remains in effect in perpetuity. Reclamation reserves the right to apportion the available CVP water supply among PCWA and other CVP water contractors under its Municipal and Industrial Water Shortage Policy.

PCWA's point of diversion for CVP water under the CVP Contract is Folsom Dam, but the contract also includes potential for other points of diversion, including the Sacramento River, if agreed to by the Contracting Officer. PCWA does not currently own or control facilities that are capable of conveying CVP water from Folsom Dam to the PCWA service area. As such, the availability of the water supply is currently affected by physical limitation. PCWA is engaged in negotiations with Natomas Central Mutual Water Company and other regional entities to utilize existing facilities to divert and deliver PCWA's CVP project water supplies from the Sacramento River.

PCWA is a partner agency on the RiverArc Project, which would diversify water supplies by shifting a portion of regional water demand from the American River and Folsom Reservoir to the Sacramento River. PCWA anticipates the future opportunity to divert all or a portion of its CVP contract water from a diversion on the Sacramento River as part of the RiverArc Project.

Contextual Relationship of American River Water Rights and CVP Contract

PCWA completed construction of its MFP in 1967. This project has a current total storage capacity of 342,583 acre-feet (AF) in two major reservoirs and several smaller reservoirs. As originally planned, the

MFP was to be comprised of three major reservoirs: French Meadows, Hell Hole, and American Bar. American Bar Dam was to be located just south of Foresthill, below the current Oxbow Powerhouse. American Bar Dam and Reservoir would have provided an additional 100,000 AF of water storage for the people of Placer County, as well as another large hydroelectric plant. Reclamation opposed PCWA's water right applications for the MFP and specifically American Bar Dam, because it was planned in the upper reaches of the flooded area of the future Auburn Dam. PCWA had also protested Reclamation's applications for water on the American River, including for the Auburn Dam. PCWA and Reclamation then entered negotiations to resolve the protests in a way that would allow construction of both projects.

The negotiations resulted in a series of agreements which provided, in pertinent part, that PCWA would abandon plans to build American Bar Dam, instead moving the lowest of the MFP dams to Ralston Afterbay. PCWA also agreed to limit consumptive use diversions from the MFP to 120,000 AFY. In exchange, Reclamation was to provide PCWA with an additional 117,000 AFY of CVP water. This agreement insured PCWA that it had sufficient water supplies to meet the demands of Placer County and was memorialized in a 1966 "Agreement and Stipulation" between PCWA and Reclamation. The amount of CVP supply was subsequently agreed to be reduced to 35,000 AFY, which is now provided for in PCWA's 2020 long-term repayment contract.

PCWA's consumptive water rights from the MFP are still under development. PCWA's agreement to limit its diversion of MFP supply to 120,000 AFY subject to Reclamation's agreement to provide 35,000 AFY provides PCWA with a total of 155,00 AFY from the American River watershed. This amount combined with PCWA's water delivered by PG&E from the Drum-Spaulding system is sufficient to meet buildout demands. This amount diverted from the American River is well within PCWA's MFP storage capacity of 342,583 AF. Should Reclamation fail to fulfill its obligations under the various settlement agreements with PCWA, PCWA would be ready, willing, and able to obtain the full amount from its MFP storage. In addition, PCWA is planning to deliver an additional 47,000 AFY of MFP water for consumptive use downstream of the confluence of the American and Sacramento Rivers. This consumptive use would be in dry years as part of a mitigation strategy for the lower American River, as discussed elsewhere in this document.

Pre-1914 Appropriative Rights

PCWA holds four pre-1914 appropriative water rights for diversion of water from various small creeks and their tributaries in western Placer County. These rights are generally for agricultural purposes, including irrigation and livestock watering.

Surface Water Summary

Table 2 identifies the source, purpose of use, maximum available quantity, and place of use for each PCWA surface water supply.

Table 2. PCWA's Surface Water Supply Summary

Supply	Source	Purpose of Use	Volume, AFY	Place of Use
Water Right Permits 13856 and 13858	American River	Irrigation, Domestic, Municipal, and Industrial, Recreation	120,000[1]	Western Placer County and Portions of Sacramento County (see Figure 2)
Water Right Permits 13856 and 13858	American River	Irrigation, Domestic, Municipal, and Industrial, Recreation	47,000[2]	Proposed expanded place of use to include East Bay Municipal Utility District and other potential downstream buyers
Central Valley Project Contract	American River[3]	Municipal and Industrial	35,000	Place of use pursuant to contract (generally PCWA's Zone 1)
PG&E Water Supply Agreement (2015)	Yuba and Bear Rivers	Irrigation and Domestic	100,400	Western Water System (generally PCWA's Zone 6)
PG&E (Zone 3) Purchase Agreement (1982)	Yuba and Bear Rivers	Irrigation and Domestic	25,000	PCWA's Zone 3
Pre-1914 Appropriative Right (S000959)	Canyon Creek	Irrigation and Domestic	40 cfs (Max.)	Alta, Colfax, Monte Vista and rural areas (Not limited to Zone 3)
Pre-1914 Appropriative Right (S000967)	Tributary to Auburn Ravine	Irrigation and Stock Watering	Not Stated	"Boardman Canal" Area
Pre-1914 Appropriative Right (S010397)	South Fork Dry Creek Tributary to Coon Creek	Irrigation	Not Stated	Localized Irrigation Just East of Auburn
Pre-1914 Appropriative Right (S010398)	North Fork Dry Creek Tributary to Coon Creek	Irrigation	Not Stated	Localized Irrigation Just East of Auburn

1. See Contextual Relationship of American River Water Rights and CVP Contract.
2. Environmental flows to be sold downstream, see Surface Water Management.
3. PCWA is pursuing relocation of this point of diversion to the Sacramento River.

Groundwater

PCWA has historically produced a limited quantity of groundwater. PCWA does not anticipate utilizing groundwater to support its normal year water deliveries. PCWA has two wells – the Sunset Well and the Tinker Well – each with a production capacity of about 1,000 AFY. These wells are for backup and dry-year supplies. The proposed Regional University development plans to construct one new well and the current Placer One development plans to construct two new wells, increasing PCWA's groundwater supply from the current 2,000 AFY to 5,000 AFY in 2040 (Table 1).

Recycled Water

The County of Placer has access to recycled water through its wastewater service arrangements with the cities of Roseville and Lincoln and has dictated use of these supplies as a condition of development in the

Placer Vineyards, Placer One, and Regional University projects. Potential retailers of these supplies are the county, PCWA, and California American Water. Regardless of who the retailer is, these supplies would be available as conditions of those development projects. PCWA anticipates the quantities of recycled water presented in Table 1 to be made available. The details of recycled water delivery are being developed as part of on-going regional planning.

Distribution System

Untreated Water

The PCWA untreated water conveyance system consists of 170 miles of earthen and lined canals, with flumes and pipelines where appropriate, beginning in the community of Alta, flowing southwest, generally following Interstate 80, and ending in Roseville. The main canal in the system is the Boardman Canal, which flows contiguously from Alta to Roseville. In Auburn the canal system begins to distribute outward into branch canals. There are also two canals in western Placer County that divert water from the Auburn Ravine. PCWA purchases water at several connections to the PG&E canal system called "Buy Points," positioned at key locations between Alta and the end of PG&E's South Canal. Water can also enter the canal system from accretion flows, pre-1914 water rights, and return flows from PCWA untreated water customers (water that is delivered to customers and flows back into the canal).

PCWA can also pump MFP water out of the North Fork of the American River at the ARPS, into the 3-mile Auburn Tunnel under the City of Auburn to a valved outlet into Auburn Ravine, where the water is delivered to the two canals in western Placer County. MFP water can also be pumped out of the tunnel at the Ophir Road Pump Station into the PG&E South Canal, to PCWA's Dutch Ravine Canal, or to the Foothill and Ophir (future) water treatment plants.

Treated Water

PCWA owns and operates nine water treatment plants between Alta and Rocklin, producing approximately 40,000 AF of potable water each year. Treated water is distributed by 615 miles of pressurized pipe and delivered to various retail and wholesale customers.

PCWA also has several treated water interties with neighboring water agencies: Nevada Irrigation District, SJWD, the City of Lincoln, and the City of Roseville. Some of these connections are one-way due to pressure differences, while other connections can flow water in either direction with the use of pumps or pressure-reducing valves.

Current and Projected Demands

PCWA's water use is broken down into four classifications: retail treated, retail untreated, wholesale treated, and wholesale untreated. PCWA's current (2020) treated and untreated retail demands are 101,613 AFY and are projected to increase to 125,134 AFY at buildout. PCWA's current (2020) treated and untreated wholesale demands are 31,376 AFY and are projected to increase to 128,282 AFY at buildout. **Table 3** provides the total current and projected PCWA customer demands for 5-year increments through 2040 and buildout conditions. The treated water demand estimates account for an appropriate amount of water use reduction resulting from the successful implementation of Senate Bill 7x-7, "20 by 2020," and anticipated reduction from the regulation titled "Making Conservation a California Way of Life."

Table 3. Summary of PCWA's Total Customer Demand Projections, AFY

Classification of Water Use	2020	2025	2030	2035	2040	Buildout
Treated Retail	29,065	33,182	37,773	43,780	52,637	62,036
Untreated Retail	72,548	71,208	69,298	67,681	66,313	63,098
RETAIL SUBTOTAL	**101,613**	**104,390**	**107,071**	**111,461**	**118,950**	**125,134**
Treated Wholesale	11,450	15,413	18,388	22,710	27,032	47,276
Untreated Wholesale	19,926	54,923	58,712	63,289	81,006	81,006
Untreated Downstream[1,2]	19,000	47,000	47,000	47,000	47,000	47,000
WHOLESALE SUBTOTAL	**50,376**	**117,336**	**124,100**	**132,999**	**155,038**	**175,282**
PCWA TOTAL WATER USE	**151,989**	**221,726**	**231,171**	**244,460**	**273,988**	**300,416**

1. MFP supply to be delivered to an expanded place of use downstream in dry years, see Surface Water Management.
2. This demand will only be in dry years to provide environmental flows to the lower American River, 47,000 AFY will be the maximum amount.

Surface Water and Groundwater Management

PCWA was a signatory to the 2000 Water Forum Agreement. The Water Forum Agreement has two coequal objectives: (1) provide a reliable and safe water supply for the region's economic and planned development; and (2) preserve the fish, wildlife, recreational, and aesthetic values of the lower American River.

The Water Forum Agreement's supportive Environmental Impact Report fully analyzed buildout demand in PCWA's place of use and identified purveyor specific agreements for PCWA's wholesale customers (City of Roseville, SJWD and SSWD) which placed restrictions on the use of North Fork American River water depending on unimpaired inflow into Folsom Reservoir. In addition, PCWA voluntarily agreed to release up to 47,000 AF (27,000 AF for PCWA and 20,000 AFY for the City of Roseville) of additional water[56] (Water Forum environmental releases) in drier years through reoperation of MFP reservoirs. When projected March through November Unimpaired Inflow to Folsom Reservoir (M-N UIFR) is between 950,000 and 400,000 AF, the amount of these environmental releases is linearly interpolated between 0 and 47,000 AF. When projected M-N UIFR is less than 400,000 AF, it is considered a "conference year" where Water Forum participants meet to determine how best to manage the available water, recognizing that there may not be sufficient water to meet both deliveries and environmental release requirements specified in the agreement. Under this program of environmental releases, PCWA has released more than 200,000 AF of water to the lower American River in dry years.

When projected M-N UIFR is greater than 1.6 million AF, there is a provision for PCWA to sell surface water to groundwater pumpers in Sacramento County as part of a conjunctive use program to alleviate groundwater overdraft. PCWA's place of use was expanded into Sacramento County as shown on Figure

[56] The Water Forum environmental releases represent additional water (up to 47,000 AF) in drier years that would not otherwise be released from storage for power generation or for consumptive delivery purposes within western Placer County and northern Sacramento County were it not for the Water Forum Agreement requirements.

2 to provide for this program. The primary purchaser has been SSWD, who has recharged more than 200,000 AF of PCWA water in the North American Subbasin. This program could be expanded to other water purveyors within the current place of use.

The Water Forum environmental releases were intended to offset effects of higher diversion of water from the ARPS (PCWA) and Folsom Dam (City of Roseville) above the historical delivery baseline used in the Water Forum Agreement[57]. The Water Forum Agreement evaluated the diversion of 35,500 AFY of water from the ARPS with recognition that PCWA would pursue an additional diversion of 35,000 AFY. Currently it is expected that the ARPS diversions will increase to 70,500 AFY in the future pending additional environmental analysis.[58] This, combined with its PG&E and CVP contract water, is estimated to meet PCWA's buildout demands. The 35,000 AFY of CVP water is currently being pursued at the Sacramento River (RiverArc Project) pursuant to 2000 Water Forum Agreement.

The following sections provide information on PCWA's current and projected American River diversions and how PCWA intends to manage surface waters in support of Water Forum objectives in drier, driest, and critically low conditions.

MFP-Related Surface Water Management

PCWA's Federal Energy Regulatory Commission (FERC) license, which was issued in 2020 and has a 40-year term, has numerous requirements that were collaboratively developed to enhance environmental conditions in the MFP area. These conditions include higher instream flow and reservoir storage requirements, spring pulse flows, and reservoir spill ramp down flows. These additional flows have reduced hydropower generation nominally 5%, which will be partially mitigated by the addition of raising Hell Hole Dam for additional wet year storage. Additional measures include large woody material management, trout spawning habitat improvements, and sediment augmentation, among others. All the FERC requirements were developed in anticipation of continued implementation of the Water Forum Agreement.

Current American River Diversions

Table 4 summarizes PCWA's American River diversions for the previous 10-year period (2014–2023). PCWA's current level of American River diversions (2023) was 26,200 AFY.

[57] In the Water Forum Agreement, PCWA's baseline was 8,500 AFY and the assumption was that at full buildout PCWA would divert 35,500 AFY at the ARPS (difference of 27,000 AFY); the City of Roseville baseline was 19,800 AFY and the assumption was that at full buildout Roseville would divert 39,800 AFY at Folsom Dam in drier years (difference of 20,000 AFY). The total additional water above baseline for PCWA and City of Roseville is up to 47,000 AFY.
[58] In the Water Forum Agreement, PCWA's baseline was 8,500 AFY and the assumption was that at full buildout PCWA would divert 35,500 AFY at the ARPS (difference of 27,000 AFY); the City of Roseville baseline was 19,800 AFY and the assumption was that at full buildout Roseville would divert 39,800 AFY at Folsom Dam in drier years (difference of 20,000 AFY). The total additional water above baseline for PCWA and City of Roseville is up to 47,000 AFY.

Table 4. PCWA's American River Diversions (2014–2023), AFY

Year	American River Pump Station	City of Roseville[1]	San Juan Water District[1]	Sacramento Suburban Water District[1]	Central Valley Project[2]	Total
2014	16,039	12,164	8,727	0	0	36,930
2015	24,028	18,296	253	0	0	42,577
2016	4,394	1,116	8,884	11,274	0	25,668
2017	3,459	0	9,028	12,145	0	24,632
2018	4,466	0	9,258	12,002	0	25,726

1. MFP water that is rediverted through the municipal intake at Folsom Dam, which is authorized under existing Warren Act contracts held by PCWA's current wholesale customers.
2. PCWA's point of diversion for CVP water is Folsom Dam, but its contract also includes potential for other diversions, including the Sacramento River, if the points of diversion are agreed to by the Contracting Officer.
3. Exceeded 35,000 AF of pumping due to PG&E canal outages and reduced water supply allocation.

Future Projected American River Diversions

Table 5 summarizes PCWA's projected American River diversions at buildout when the M-N UIFR is above 950,000 AFY. PCWA's projected American River diversions at buildout are 155,000 AFY; however, this amount would be 120,000 AFY if the RiverArc Project is successful.

See the section above describing the contextual relationship of PCWA's American River water rights and their CVP contract for an explanation of the 120,000 AFY limitation. The total of 155,000 AFY combined with PCWA's water delivered by PG&E from the Drum-Spaulding system is sufficient to meet buildout demands. In addition to these diversions, PCWA plans in dry-years to divert up to 47,000 AFY of its American River water rights downstream of the confluence with the Sacramento River. This water is associated with continued environmental flows described herein. These flows are currently conducted under one-year water transfers through the State Water Board, however, PCWA is pursuing expansion of its place of use to facilitate these downstream diversions. PCWA's intent to expand its American River water rights place of use is further stated under the "Project List" and "Caveats and Assurances" of this Purveyor Specific Agreement.

Table 5. PCWA's Projected American River Diversions (Buildout), AFY

Supply	Diversion Point	Amount
Water Rights Permits 13856 and 13858 (consumptive)	American River Pump Station, Folsom Dam Municipal Intake	120,000
Central Valley Project*	Folsom Dam, or other diversion point agreed to by the Contracting Officer	35,000
TOTAL		**155,000**

*Currently being pursued at the Sacramento River (RiverArc Project) pursuant to 2000 Water Forum Agreement.

Drier Conditions Management

Condition: MN-UIFR is between 950,000 and 400,000 AF.

During drier years, PCWA will divert up to 155,000 AFY from the American River and will replace up to 47,000 AFY (27,000 AFY for PCWA and 20,000 AFY for City of Roseville) of water through reoperation of MFP reservoirs (environmental releases). The environmental releases are intended to offset effects of higher diversion of PCWA's MFP water from the ARPS (PCWA) and Folsom Reservoir (City of Roseville) above the historical delivery baseline used in the current Water Forum Agreement (8,500 AFY for PCWA and 19,800 AFY for City of Roseville).

This 47,000 AFY is the environmental release at full (buildout) diversion of PCWA's American River water rights. The amount of these environmental releases would be interpolated between 0 and 47,000 AFY based upon M-N UIFR and the combined PCWA and Roseville diversion rate above baseline in any given year. Although the environmental releases could be interpolated to be less than 10,000 AFY in a specific year, PCWA will typically release a minimum of 10,000 AFY; this is a change from the 2000 Water Forum Agreement.[59] **Figure 3** presents a chart of the calculation of these releases relative to M-N UIFR at full diversion rates above baseline for both PCWA and Roseville; note the minimum of 10,000 AF commencing at M-N UIFR of 950,000 AF. A more comprehensive look-up table at variable PCWA and Roseville combined diversion rates above baseline is provided in **Attachment 1** to this Purveyor Specific Agreement.

[59] Released as part of a long-term water delivery contract with a downstream buyer.

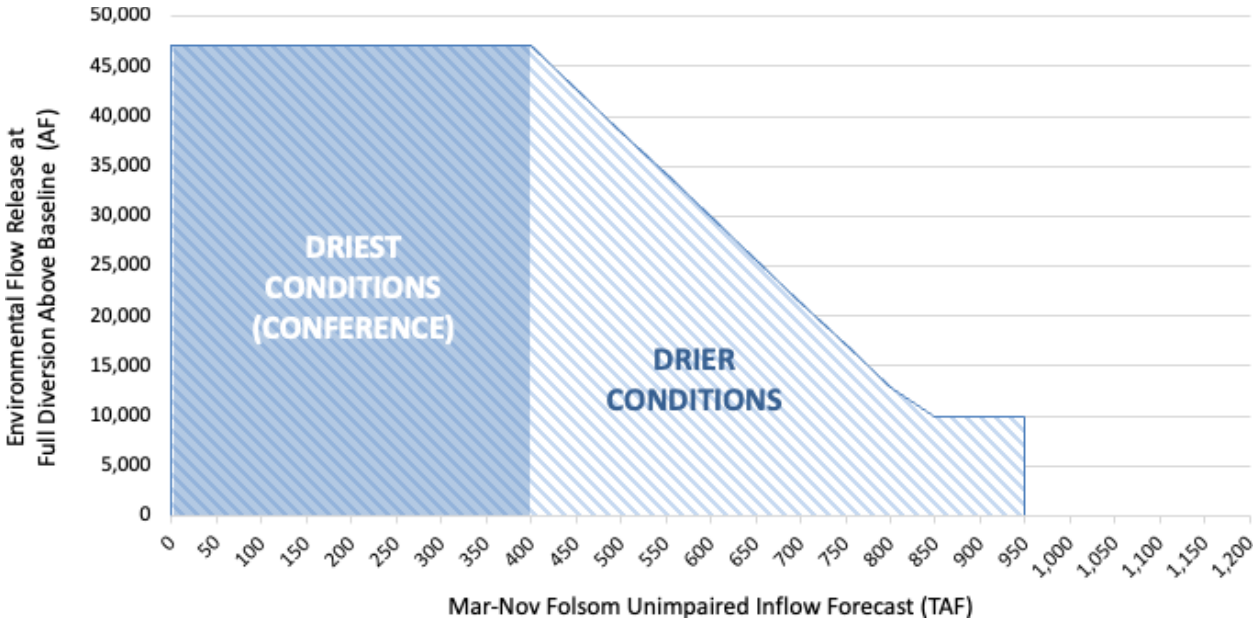

Figure 3. Proposed PCWA Environmental Flow Releases[60]

The environmental releases from PCWA reservoirs represent water (up to 47,000 AFY) that would not otherwise be released in drier years were it not for this commitment. PCWA will make the environmental releases contingent upon the following conditions:

1. Continued cooperation of Reclamation in storage and timing of releases from Folsom Reservoir consistent with PCWA's recently executed Warren Act Contract.
2. PCWA's ability to transfer/sell the released water for use below the lower American River on terms acceptable to PCWA. To facilitate this provision, PCWA is pursuing an expanded place of use of its American River Water Rights to include water purveyors that currently purchase these releases through single year transfers.
3. PCWA's determination that it has sufficient water in its reservoirs to make the additional releases to mitigate conditions in dry years without jeopardizing the supply for PCWA's customers or commitments under PCWA's FERC license.

Details related to PCWA's proposal for these environmental releases which support the Water Forum objectives are provided below.

Long-Term Water Delivery Contract

To provide certainty that the environmental releases into the lower American River occur in the future, PCWA executed a Memorandum of Understanding (MOU) with East Bay Municipal Utility District (EBMUD) in August 2013 regarding the long-term purchase of the environmental releases. Under the MOU, PCWA would release 10,000 to 47,000 AFY of environmental releases from the MFP into Folsom Reservoir for rediversion at the Freeport Regional Water Authority (FRWA) Intake (Freeport Intake) by EBMUD in years when the projected M-N UIFR is less than 950,000 AFY. The releases would provide

[60] Environmental releases in conference years are subject to availability as described.

environmental benefits to the lower American River consistent with the objectives of the Water Forum, as well as increase dry-year water supply reliability for EBMUD.

If EBMUD is unable to use the environmental releases, PCWA would develop a back-up buyer agreement with Reclamation for use of the water downstream of the confluence of the lower American River and Sacramento River. If neither EBMUD nor Reclamation can put to beneficial use the drier year environmental releases, then PCWA would deliver the water to another willing buyer downstream.

Environmental releases may be scheduled and coordinated with the Water Forum and Reclamation. This coordination would be intended to enhance cold-water pool conditions in Folsom Reservoir, thus optimizing the opportunity for maintaining cooler temperatures in the lower American River. This option is subject to terms of PCWA's recently executed Warren Act Contract with Reclamation for storage of water in Folsom Reservoir longer than 30 days.

Operations

Specific operations that PCWA is proposing in support of the Water Forum objectives include:

- Temporary storage (greater than 30 days, but less than a year) of environmental releases and/or timing of deliveries to wholesale customers via Folsom Reservoir to enhance cold-water pool and maintain/enhance temperature conditions in the lower American River; subject to Reclamation and regulatory approval.
- Rediversion of environmental releases downstream of the lower American River and Sacramento River confluence for consumptive use in PCWA's proposed expanded place of use for this water at either the Freeport Intake, or alternatively at other CVP facilities by Reclamation, as appropriate and as authorities allow, or to other downstream buyers.
- Collaboration with the Water Forum and Reclamation to optimize the temperature benefits of environmental releases.
- Forego PCWA's CVP deliveries from Folsom Reservoir on the American River, and instead take delivery from the Sacramento River at RiverArc.

Driest Conditions Management

Condition: MN-UIFR is less than 400,000 AF.

It is recognized that in years when the projected M-N UIFR is less than 400,000 AFY there may not be sufficient water available to provide the purveyors within the Water Forum with the driest years quantities specified in their agreements and provide the expected driest years flows to the mouth of the American River. In those years, PCWA will participate in a conference with other stakeholders on how the available water should be managed.

In the driest of drier years, years when M-N UIFR is less than 400,000 AFY, PCWA would implement actions to preserve MFP storage. PCWA would institute reduced deliveries (water cutbacks), as needed. In those years, PCWA's irrigation water deliveries may be reduced by up to 50 percent and PCWA's

treated water deliveries may be reduced by up to 20 percent.[61] In addition, PCWA may use groundwater to reduce shortages in those years.

During Driest Conditions, delivery of environmental flow releases up to 47,000 AF pursuant to "Drier Conditions Management" will be subject to available supplies, as detailed under that section.

Critically Low Storage Conditions

Condition: **Potential operations in spring and summer when Folsom Reservoir storage is forecasted to reach 110,000 AF at some point in the next 12-months.**

During the spring and summer, if Folsom Reservoir storage is forecasted to reach 110,000 AF at some point in the year, PCWA would conference with stakeholders, including Reclamation, on how available water should be managed.

Condition: **Potential operations in summer and fall when Folsom Reservoir storage is below 110,000 AF.**

If Folsom Reservoir storage is projected to be below 110,000 AF, PCWA would conference with stakeholders, including Reclamation, on how available water should be managed. PCWA would coordinate with both the City of Roseville and SJWD pursuant to their respective water supply contracts. Several projects are being pursued to mitigate the frequency of this occurring and/or to mitigate the impact to the co-equal objectives if this does occur. These projects include: the RiverArc Project, the Sacramento Regional Water Bank, the PCWA-Roseville Cooperative Pipeline, and conservation programs.

Compliance with Making Conservation a California Way of Life

No later than January 1, 2025, and by January 1 every year thereafter, each urban retail water supplier shall calculate its urban water use objective and beginning January 1, 2027, annually demonstrate compliance with its objective.

The calculation shall be based on the supplier's water use conditions for the previous state fiscal year.

The objective is composed of the sum of the following:

1. A budget for indoor residential water use
2. A budget for outdoor residential water use
3. A budget for commercial, industrial, and institutional landscape with dedicated irrigation meters or equivalent technology
4. A budget for real losses
5. Budgets for variances and temporary provisions

[61] PCWA's existing water conservation efforts support local water supply reliability goals and are consistent with California's 20x2020 Program and Making Conservation a California Way of Life.

Based on initial calculations, the State Water Board projects PCWA to have 0% reductions required in 2025, 0% reductions required in 2030, less than 5% reductions required in 2035, and 5-10% reductions required in 2040.

PCWA's Approach to Compliance

PCWA is a leader in water efficiency programs in the region. PCWA has a robust water efficiency program and will expand on this program as described.

PCWA will continue participation in the Regional Water Efficiency Program, especially for regional compliance with the CII best management practices and regional non-functional turf outreach, along with regional messaging. PCWA will also participate in the statewide conservation partnership (CalWEP).

Education and Outreach

PCWA will maintain its Environmental Protection Agency (EPA) WaterSense award-winning education and outreach program as follows:

- Water efficiency messaging in newsletters, e-blasts, WaterWiseWednesday social media posts, paid ads on Facebook and Google
- Partnerships with local Master Gardener Programs and California Native Plant Society
- Local demonstration gardens to showcase low water use plants and local native plants

Enhanced Rebates

Prior to final adoption of the regulation, PCWA enhanced its rebate program by adding a leak rebate to assist customers in finding and fixing indoor and outdoor leaks. In one year, it's become the Agency's most utilized rebate. Commercial rebates were added, and rebate amounts were increased for turf replacement, irrigation upgrades, and smart controllers. The enhanced turf replacement can be marketed to assist with replacement of non-functional turf.

Advanced Metering Infrastructure (AMI) Data

As the Agency replaces meters and meter reading technology is replaced with AMI, customers will have real-time access to their water use and could set up leak alerts through a customer portal.

Water usage data will be evaluated and a program developed to notify customers of potential leaks, breaks or overuse.

Customers Services

Water Wise House Calls and Water Wise Business Calls will be offered to help customers find ways to use less water.

High-use letters and leak-verify work orders are generated every month after the billing department evaluates consumption, prior to sending a bill.

Commercial, Industrial, and Institutional (CII) Accounts

Landscapes of CII mixed use meters will be measured to determine which are ½ acre or greater. New CII requirements will be implemented as follows:

- Classify CII customers into 22 water use categories, defined by Energy STAR and the State Water Board, and maintain the list annually.

- Design and implement best management practices for top CII users.
- Design and implement turf replacement programs.

Caveats and Assurances

1. This agreement is entered into with recognition that PCWA has agreed with Reclamation to limit consumptive use of its American River water rights to 120,000 AFY – see section on "Contextual Relationship of American River Water Rights and Central Valley Project (CVP) Contract." PCWA has a long-term CVP contract with Reclamation for 35,000 AFY. This is a total of 155,000 AFY from the American River. This amount combined with PCWA's water delivered by PG&E from the Drum-Spaulding system (Yuba and Bear Rivers) is sufficient to meet buildout demands. If for any reason these supplies are significantly reduced in amount or duration, it will be considered a changed condition, and signatories will work in good faith to renegotiate relevant portions of this Purveyor Specific Agreement.
2. During dry years, PCWA proposes to release up to 47,000 AFY of water from its upstream reservoirs, pursuant to **Attachment 1**, for the benefit of the lower American River environment. This proposal is discussed in detail under "Drier Conditions Management" and included in PCWA's American River Water Rights Extension currently being processed with the State Water Board. In the 2007 petition for this extension, PCWA's commitment to the Water Forum and stewardship of its water supply was noted by certain members of the Environmental Caucus in the letter included as **Attachment 2**. Signatories recognize the continuation of PCWA's American River Water Rights is integral to achieving the proposed environmental releases. Accordingly, they are willing to support the proposal and highlight the environmental benefits before the State Water Board, including a re-petition for this extension, if necessary, and an expanded place of use to include EBMUD. EBMUD is not a guaranteed buyer, even in dry years, thus it would be advantageous to have a downstream place of use adequate to ensure these environmental releases. For this reason, PCWA is also seeking to add other areas of the CVP, including refuges. PCWA will keep the parties apprised of the development of this expansion with the State Water Board and the parties will communicate in good faith their concerns, support, or objection to this expansion as it is developed.
3. PCWA and other signatories to this agreement have proposed to divert water from the Sacramento River rather than diverting from the American River. This would allow water to continue to flow down the lower American River. Signatories conditionally endorse this proposal, branded as "RiverArc," subject to environmental analysis of the impact to the Sacramento River. This proposal will require certain changes to PCWA's CVP contract, including a change in point of diversion from Folsom Reservoir to the Sacramento River and expanding PCWA's CVP place of use to include all western Placer County. Signatories will endorse these changes to PCWA's CVP subject to continued endorsement of the RiverArc Project. In addition to its CVP contract, PCWA would like to explore an exchange provision to divert its American River water rights at the RiverArc Project.

Project List and Future Water Supply Reliability Efforts

The following is a list of PCWA planned projects related to the co-equal objectives of the Water Forum. These include both structural and non-structural projects.

1. American River Water Rights Extension Project, which includes the following supporting projects:

    a. Expanded American River water rights place of use to include the CVP place of use for dry-year supply to EBMUD and other back-up buyers downstream of the confluence with the Sacramento River.

    b. Warren Act Contract with Reclamation to provide storage of environmental releases longer than 30-days in Folsom Reservoir and conveyance of water delivered to EBMUD through Folsom South Canal via Freeport Intake (acquired at time of writing this agreement).

    c. Enhanced coldwater pool development in Folsom Reservoir by extended storage of environmental releases in Folsom Reservoir, coordinated with the Water Forum and Reclamation.

2. Ecological Forest Health – PCWA is partnering with a diverse group of stakeholders to implement the French Meadows Forest Restoration Project, which is a 28,800-acre collaborative forest health project intended to reduce wildfire risk in the upper Middle Fork American River watershed. In an effort to build upon the momentum of the French Meadows Project, PCWA, and several partners, has recently embarked on the Long Canyon Watershed Restoration Project. The Long Canyon Project will use proven forest health and fuels reduction treatments on 16,500 acres in an area near other public and private forest health projects that together provide landscape-level wildfire resilience in upper American River watershed.

3. RiverArc Project – PCWA is a partner and the administrator of the RiverArc Project. This project is a proposed regional treated water supply that will construct a new treatment plant and pipelines using an existing diversion on the Sacramento River. This project is intended to shift regional reliance on water supply from the American River to the Sacramento River. RiverArc is a project that was originated in the Water Forum, with current partners including Sacramento County Water Agency, the City of Sacramento, the City of Roseville, and PCWA. Other regional water suppliers may join the project in the future.

4. Conservation Programs

    a. Treated Water Conservation – PCWA was the first water purveyor in the Water Forum to comply with the best management practices of the Urban Water Conservation Council and currently has an EPA WaterSense award-winning program. PCWA complied with its Senate Bill 7x-7 target of 20% conservation and is preparing for compliance with the regulation resulting from the Conservation as a California Way of Life program.

    b. Untreated Water Conservation – Nominally 50% of PCWA's water use is used for agriculture in its service area. This agriculture is served by an extensive canal system of 170 miles that includes flow control devices, elevated flumes, and "spills" that return water to the watershed at the end of each canal. Though most of this water supply comes from PCWA's Yuba River source, water conservation is taken very

seriously. PCWA has installed lining to prevent seepage and flow control automation to minimizing spilling, thus reducing water loss in the canal system.

c. Looking at the last decade, PCWA is serving a population of 30% more people with 25% less water supply as a result of these conservation programs. The source of this comparison is PCWA's 2023 year-end report, comparing 2013 to 2023.

5. County-Wide Masterplan – PCWA implemented a County-Wide Masterplan to meet its statutory obligation to support sustainable resource management and water supply needs throughout Placer County. This plan is a process for supporting the development of projects and seeking funding to implement them, organized into eight elements as follows:

    a. Unserved Areas

    b. Water Infrastructure Reliability

    c. Water Supply Reliability

    d. Renewable Energy Development

    e. Watershed Stewardship

    f. Agriculture

    g. Conservation and Water Use Efficiency

    h. Public Education and Outreach

This masterplan is a "living" database of projects that are entered by stakeholders county-wide, thus creating a transparent process for implementation. Funding sources include state and federal grants and PCWA funding from water transfers and net revenues from hydropower sales. Projects include those within PCWA's service area and the service areas of other public water agencies throughout the Placer County.

6. Placer County Conservation Program (PCCP) – The PCCP will set aside natural lands as a mitigation in balance with proposed development and other activities in western Placer County. This program is being implemented by a Joint Powers Authority of member entities. The PCCP includes permitting and mitigation for Endangered Species Act (federal), Natural Community and Conservation Planning Act (state), and Clean Water Act (federal). It is the most comprehensive Habitat Conservation Program in the nation. Permit and mitigation fees go to purchase of set-aside properties within the program area.

    a. Land Development – The demarcation of natural lands and proposed land development has been established in western Placer County under this program.

    b. PCWA Canal System – PCWA's canal operations, including projects such as canal lining, have been permitted under the PCCP.

    c. PCWA Infrastructure – Certain proposed PCWA treated water infrastructure, including the Ophir Water Treatment Plant and west Placer County transmission main have been permitted under the PCCP.

7. Groundwater:
    a. Conjunctive use – In the 2000 Water Forum Agreement, PCWA committed to the sale of American River surface water to SSWD to help recover groundwater levels in the North American Subbasin (NASb). This provision was for "normal" and "wet" years, as defined by Folsom Reservoir Unimpaired Inflow, for the first ten years of the agreement, and only wet years thereafter. PCWA will continue in this commitment for any willing buyer in the Sacramento County portion of PCWA's American River water rights place of use, subject to PCWA having adequate water for its service area, adequate storage in MFP reservoirs, and agreeable terms with the buyer.

    b. PCWA could expand the geographic extent of selling American River surface water in wet years by expansion of its place of use beyond the current extent in north Sacramento County. This expansion could cover the entire NASb, or beyond that boundary if desired for expanded conjunctive use.

    c. Prohibition on use for new development – The County of Placer has a General Plan policy prohibiting groundwater as a sole source of water supply for new development in western Placer County. This policy exists for two reasons: to protect groundwater levels of the NASb and to encourage vesting in the use of MFP supply that was bonded and paid for by the people of Placer County. Groundwater may be used as a backup source in drought years, as described in PCWA's Urban Water Management Plan. This policy has resulted in stable groundwater levels in Placer County, evidenced by levels relative to Sacramento and Sutter counties. PCWA supports this policy by working with developers in the planning and investment towards water supply infrastructure.

8. Wholesale Water Supply Contracts – PCWA provides both Yuba River and American River water to wholesale customers in its Zone 6 service area of western Placer County and within the American River water rights place of use. Wholesale service is provided pursuant to individually negotiated water supply contracts with the following:
    a. City of Roseville, as amended on May 18, 2023, 30,000 to 44,000 AFY via Folsom Reservoir.

    b. SJWD, as amended on April 17, 2025, 10,000 AFY via Folsom Reservoir.

    c. SSWD, as amended on November 16, 2020, 8,000 AFY via Folsom Reservoir.

    d. EBMUD, as amended on July 30, 2018, 47,000 AFY via Sacramento River at Freeport.

    e. City of Lincoln, December 10, 2012, 35,986 AFY via treated water deliveries[8].

    f. California American Water, July 6, 2025, 10,825 AFY via treated water deliveries[8].

    g. Small water systems throughout PCWA's Zone 6 service area, 2,971 AFY via untreated and treated water deliveries.[62]

[62] These wholesale demands are the amounts provided by PCWA's 2020 Urban Water Management Plan.

Attachment 1: Lookup Table of Environmental Flow Releases (AF)

PCWA and Roseville Combined Diversion above 1995 Baseline (AF)	Folsom Mar-Nov Unimpaired Flow Projection (TAF)											
	400	450	500	550	600	650	700	750	800	850	900	950

Attachment 2: Letter of Support for Petition for Extension of Time with State Water Resources Control Board

SIERRA CLUB
FOUNDED 1892

FRIENDS OF THE RIVER

December 21, 2007

Ms. Victoria Whitney
Chief, Division of Water Rights
SWRCB
P.O. Box 2000
Sacramento, CA 95812

Re: Placer County Water Agency Petition for Extension of Time to Complete Use; Water Right Permits 13856 and 13858 for Applications 18085 and 18087

Dear Ms. Whitney,

We understand that Placer County Water Agency (PCWA) has submitted a petition to the SWRCB for an Extension of Time to the year 2043 to complete use for consumptive Water Right Permits 13856 and 13858. In considering the petition from PCWA, we ask that the SWRCB take into account the water agency's demonstrated commitment to urban water conservation.

The Mother Lode Chapter of the Sierra Club and Friends of the River are signatories to the Water Forum Agreement. Convened in 1993, the Water Forum was able to reach consensus among diverse stakeholder interests in providing a reliable water supply for planned growth, while preserving the fishery, wildlife, recreational, and aesthetic values of the Lower American River.

A key component of the Water Forum Agreement was the Water Conservation Element. Water purveyors agreed to implement a series of water conservation programs or BMPs. Purveyors were provided four years in which to ramp up the BMPs so that they would be fully implemented by 2004.

In December 2005 the Water Forum released its Year-Four Water Conservation Report. It revealed that fourteen of the fifteen purveyors failed to fully implement their water conservation programs. The only Sacramento region water purveyor to fully implement all of its agreed upon water conservation BMPs was Placer County Water Agency.

Letter continues on next page.

Attachment 2: Letter of Support for Petition for Extension of Time with State Water Resources Control Board

PCWA's commitment to water conservation has been one contributing factor in the agency not yet fully utilizing its water rights. We believe the SWRCB should recognize and encourage PCWA's superior stewardship of its water supply in the Board's decision regarding the request for Extension of Time.

Sincerely,

Terry Davis

WATER FORUM AGREEMENT 2050

Sacramento County Water Agency
Purveyor Specific Agreement

Updated: January 8, 2026

Purveyor Background

Sacramento County Water Agency (SCWA) encompasses seven service areas and provides retail water service to 70,000 residential and commercial customers in Sacramento County. SCWA also wholesales water to Elk Grove Water District.

SCWA's seven service areas are served with a unique set of water supplies including surface water, groundwater, and non-potable (recycled) water. **Figure 1** presents a map of each of SCWA's service areas.

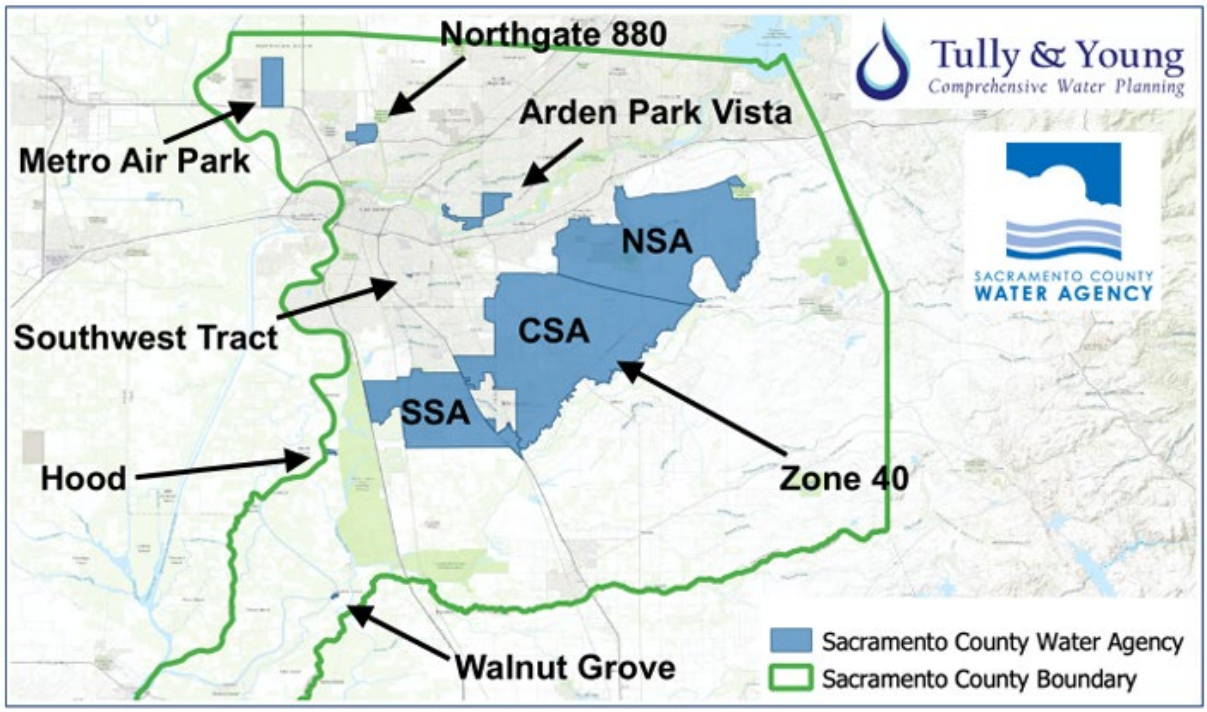

Figure 1. SCWA Service Areas

Surface Water and Groundwater Management

Current demands in the SCWA service are close to 40 thousand acre-feet (TAF) per year and are expected to grow to just below 80 TAF/year by 2045 (though the updated regulations on water use efficiency will need to be considered). The most recent estimates for buildout predict a total demand of 102,400 acre-feet per year (AFY) in the year 2052. **Table 1** summarizes SCWA annual demands.

Table 1. SCWA Demands (Nearest TAF Annually)

	Current	2045	2052
Demand	40	80	102

The highest surface water availability on a yearly basis is calculated in the 2016 Water System Infrastructure Plan (WSIP) at 89,000 AFY with the lowest being 32,100 AFY. The long-term annual average is 71,858 AFY. Any demand not made up by surface water is first made up with recycled water (up to 3,300 AFY at buildout) and finally groundwater. **Table 2** is extracted from Table 4-3, Zone 40 Water Supply Portfolio, in the 2016 WSIP.

Table 2. Surface Water Availability (AFY)

Wet/Average Year	Drier Year	Driest year	Long-term average
89,300	43,350	32,100	71,858

Below is a list of the SCWA service areas outside of Zone 40 and a general description of current supplies. A summary is provided as **Table 3**.

- Metro Air Park: Water supply delivered from the City of Sacramento to meet current demands of approximately 125 acre-feet and 2045 demands of approximately 5,715 acre-feet.
    - City of Sacramento Wholesale/Wheeling Agreement - Metro Air Park (1.1 TAF)
- Northgate 880: Water supply is derived from SCWA's groundwater supplies to meet current demands of approximately 1,345 acre-feet and 2045 demands of approximately 1,365 acre-feet.
- Arden Park Vista: Water supply is derived from SCWA's groundwater supplies to meet current demands of approximately 3,560 acre-feet and 2045 demands of 3,217 acre-feet.
- Southwest Tract: Water supply is derived from a water supply contract with California American Water to meet current demands of approximately 30 acre-feet and 2045 demands of approximately 24 acre-feet.
    - Contract with California American Water is for 30 acre-feet per year
- Hood Water Maintenance District: The Hood Water Maintenance District service area water supply is entirely derived from SCWA's groundwater supplies to meet current demands of approximately 30 acre-feet and 2045 demands projected to be 31 acre-feet.
- East Walnut Grove: The East Walnut Grove service area water supply is entirely derived from SCWA's groundwater supplies to meet current demands of approximately 60 acre-feet and projected 2045 demands of 56 acre-feet.

Table 3. Summary of Service Area Descriptions

Service Area	Demand (af/yr)		Supplies
	Current	2045	
Metro Air Park	125	5,715	City of Sacramento Contract
Northgate 880	1,345	1,365	Groundwater
Arden Park Vista	3,560	3,217	Groundwater
Southwest Tract	30	24	Cal Am Contract
Hood Water Maintenance District	30	31	Groundwater
East Walnut Grove	60	56	Groundwater

Self-supplied groundwater is the sole source of water served in all areas where a contract or entitlement is unavailable. Most of these areas are legacy systems that were taken over by SCWA and are at or near buildout.

Zone 40 Demand and Supply

Below is a general description of Zone 40 and its supplies.

Zone 40 has multiple sources of surface water and remediated groundwater taken through the Freeport Regional Water Authority (FRWA) intake and pipeline and treated at Vineyard Surface Water Treatment Plant (VSWTP), recycled water, and groundwater to meet customer demands (**Table 4**).

- Zone 40 potable water supplies consist of three water rights from the Sacramento River, two Central Valley Project contracts, a contract for remediated groundwater with Aerojet, a contract supply from North Delta Water Agency, and groundwater supplies to meet current demands of approximately 37,620 acre-feet and 2045 demands of 74,388 acre-feet.
- Zone 40 non-potable supplies consist of a contract for recycled water supplies from Sacramento Area Sewer District to meet current non-potable demands of approximately 962 acre-feet and 2045 demands of approximately 3,300 acre-feet.

Table 4. Zone 40 Demand (AFY)

Service Area	Current	2045
Zone 40	37,620	74,388

Surface Water and Groundwater taken as Surface Water Available in Zone 40 includes:

- Appropriative Water Right Permit 21209 (71 TAF)
- Central Valley Project, SMUD Contract (30 TAF)
- Central Valley Project, Fazio Contract (15 TAF)
- Aerojet Groundwater Extraction and Treatment (GET) Water—remediated Groundwater taken as Surface Water (8.9 TAF)
- License 1062 (805 AF) (Airport Water Right)
- License 4060 (101 AF) (Airport Water Right)
- North Delta Water Agency Contract (450 AF)
- Recycled Water (3.9 TAF)

- Southern California Water Company Water - Emergency Supply – (1.6 TAF)
- City of Sacramento American River Place of Use (Small Overlap Area – Volume Determined by Demands in Area)

It is evident that the SCWA service area with the largest demand, by far, is the Zone 40 area. The Zone 40 Water Supply Master Plan details operational policy for the area. Groundwater is the last supply source used with preference to surface and recycled water when feasible. SCWA is beginning the process to update the Zone 40 Water Supply Master Plan as of the writing of this Purvey Specific Agreement (PSA). Any Zone 40 Water Supply Master Plan will be available to the public for review. The Master Plan is available from SCWA.

Historical SCWA Contributions to the Co-Equal Objectives

Since the signing of the original Water Forum Agreement, SCWA has invested heavily in supporting the Water Forum co-equal objectives through investment in its conjunctive use system as described in the 2000 Water Forum Agreement PSA. Conjunctive use is practiced in the largest SCWA service area – Zone 40. The investment and continued partnership in the FRWA intake on the Sacramento River and accompanying VSWTP have been a costly undertaking both for current and future customers in Zone 40. The FRWA intake is located downstream of the American River confluence and, when opportunities arise, allows for American River water to be diverted after it has traveled the full distance of the Lower American River (LAR), thus allowing this water to be used for LAR corridor health.

Introduction of surface water into the Zone 40 area has directly benefited groundwater elevations in the South American Subbasin. **Figure 2** shows the 20 Year Groundwater Level Trends, the green dots indicating increasing groundwater elevations. The map clearly shows that there is a positive trend in groundwater levels in the SCWA service area since the startup of VSWTP and the FRWA intake. This is also in stark contrast to the trends in other parts of the State of California.

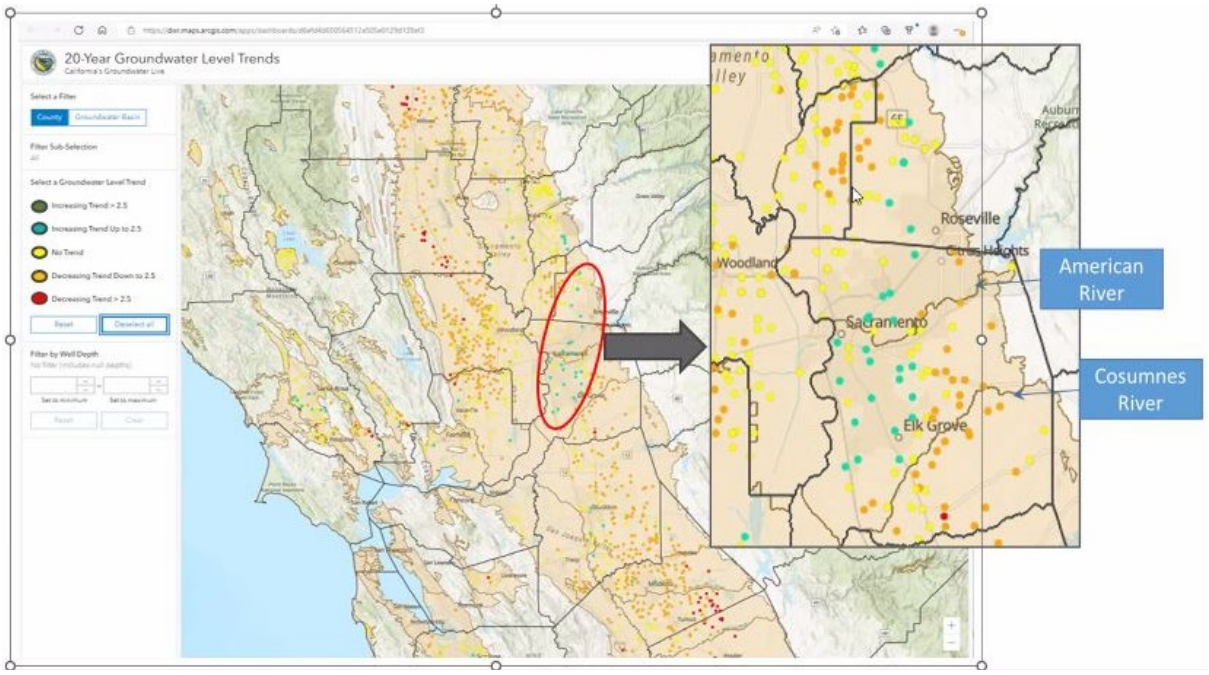

Figure 2. 20-Year Groundwater Level Trends

SCWA is proud to have met the commitments of its 2000 PSA. Along with the partnership of the caucuses in the Water Forum, the will of the SCWA Board, partnership with East Bay Municipal Utility District (EBMUD) through FRWA, investment by current customers, and investment by the development community ensured that there were resulting positive effects.

SCWA has developed a Water Shortage Contingency Plan which addresses the requirements in California Water Code Section 10632 of the Urban Water Management Planning Act. The Water Shortage Contingency Plan may be used by SCWA to address water shortages as they may arise. See the plan, located on SCWA's website, for an up-to-date list of Water Shortage Stages and Suggested Actions.

Along with SCWA specific investments, SCWA has also been a major financial contributor to the Water Forum Successor Effort and Habitat Management Effort since signing the 2000 Water Forum Agreement. There have been many projects in and around the LAR that benefited from this funding.

SCWA Surface Water Framework

SCWA's supply portfolio and location offers unique opportunities to support the Water Forum coequal objectives moving forward. This section reviews those opportunities and describes the proposed framework for commitments related to surface water diversions.

SCWA Opportunities in Water Forum 2050

Opportunities in Zone 40

The FRWA intake facility has a total capacity of 185 MGD while SCWA's capacity in the facility is 85 million-gallons-per-day (MGD) (equivalent to approximately 95 TAF/year). SCWA has a design treatment capacity of 50 MGD (permitted for 60 MGD at the very upper limit of production) at the VSWTP (equivalent to approximately 56 TAF/year and 67 TAF/year, respectively). Plans include expanding the VSWTP to 100 MGD capacity (112 TAF/year) but this investment is at least 10 years in the future. Additionally, SCWA has an agreement with the City of Sacramento for firm capacity of 11 MGD at the Franklin Intertie (12 TAF/year). **Table 5** presents a summary of these capacities.

Table 5. Zone 40 Major Surface Water Facilities Capacity

Facility	Capacity (MGD)	
	Current	Buildout
Freeport Diversion (FRWA) SCWA Share	85	85
Freeport Diversion (FRWA) Total Capacity	185	185
Vineyard WTP Capacity	50/60	100
Franklin Intertie (City of Sacramento)	11	11

In 2023, SCWA's maximum day surface water production was 31 MGD. 2023 was an unconstrained year and SCWA had full access to its surface water entitlements.

In dry times, SCWA faces surface water curtailments. In the summer of 2022, SCWA had no Central Valley Project water available and Term 91 was in effect, so the Permit 21209 water right was curtailed. This curtailment was based on statewide conditions, despite near average precipitation in the American River watershed. During this time, SCWA was only able to operate the VSWTP part time since the only water supplies available were the smaller, more senior water rights and Aerojet GET water. The vast majority of

the SCWA capacity in the FRWA intake and VSWTP plant was unused during this time. SCWA met the majority its demands with groundwater. If SCWA had access to surface water there would have been an opportunity to deliver surface water to customers rather than groundwater, which would have benefitted the groundwater basin. Additionally, since the FRWA intake is located downstream of the confluence of the LAR and the Sacramento River, any American River surface water deliveries would have travelled down the LAR providing benefit to the entirety of the LAR by improving flow conditions. The potential benefits for the LAR could be especially significant in years like 2021 when precipitation across the state (including the American River watershed) was exceptionally low through the summer months. Flows in the LAR in the summer of 2021 were very low, and river temperatures were dangerously warm due to the extended drought conditions. Additional LAR flows, in the form of cold water from upstream or Folsom storage, could have been beneficial if coordinated and timed based on the needs of the river.

Given the junior nature of the majority of SCWA's surface water entitlements there is capacity available at the FRWA intake and through the VSWTP that could be used to meet SCWA demands. There may be partnership opportunities that could take advantage of this situation to move both more and colder surface water through the LAR.

Any decision to take additional surface water in partnership with others in the region would have to include affordability as a parameter.

The opportunities for SCWA, in its Zone 40 service area, to contribute to both Water Forum co-equal objectives of water supply reliability and river corridor health, while adhering to the guiding principles for surface water diversions are stated below:

1. *Increased surface water diversions at the FRWA intake at times when additional flow could help the LAR or benefit the co-equal objectives.*
    - *Utilize partnership opportunities.*
        - *Support the City of Folsom as they explore a partnership which could add reliability to the regional water supply system as well as allow more flow in the LAR. SCWA commits to supporting the effort from a technical perspective as well as working on the affordability of the partnership.*
        - *Support Golden State Water Company with any future planning that could involve partnership and FRWA. SCWA will continue to work on upgraded intertie projects as well as other opportunities as they arise.*
        - *Continue partnership with the City of Sacramento. This partnership has been critical to Bay Delta processes. SCWA and the City of Sacramento have a formal agreement to work together to provide environmental surface water flows as a part of the Regional Water Authority American River Terms for Ecosystem Support and Infrastructure Assistance Needs (ARTESIAN) Project Agreement. SCWA commits to continuing to foster this partnership and working together to continue to have positive effects on the co-equal objectives. SCWA and the City of Sacramento have removed some barriers to partnership by working on affordability of wholesale supplies, trading of water, and encouraging surface*

water use above and beyond what would be required to provide environmental flows through groundwater substitution.

- *SCWA will continue its partnership with EBMUD. Both are a part of the FRWA Board. SCWA will continue to work with EBMUD on projects that support the coequal objectives such as supporting partnerships that EBMUD develops with others to move more water through the LAR at times those additional flows are a benefit.*
- *SCWA will continue its partnership with California American Water, working to expand wholesale water delivery to the water company from SCWA's conjunctive use system.*
- *SCWA will look to expand partnerships with upstream purveyors to establish projects that could benefit Water Forum co-equal objectives and make full use of the FRWA intake and the SCWA system.*

2. *Prioritize surface water diversions in wet conditions to allow groundwater recharge.*
    - *Effectively this means taking surface water to the maximum extent possible when it is available.*
3. *As of 2025, SCWA is piloting an Aquifer Storage and Recovery (ASR) well located on the same parcel as the VSWTP. While SCWA can supply potable water sustainably to its customers today and through buildout, SCWA is looking at ASR opportunities to expand system storage in preparation for climate change impacts into the future.*

Opportunities Outside of Zone 40

Opportunities exist outside of Zone 40 in the groundwater-supplied service areas where a potential partner is close. For example, there could be the possibility of partnerships that would supply the Northgate 880 and Arden Park service areas with surface water. Entitlements that had a place of use to cover these areas would need to exist and interties would need to be built. Affordability would be a major concern.

Demand Management

SCWA currently lists Water Efficiency and Conservation requirements on its website. Some of these include the following:

- SCWA limits the outdoor water schedule of its customers' lawns and landscapes to certain days based upon street address.
- SCWA recommends water efficiency actions such as Stress Your Lawn, Save Your Trees; Check Soil Moisture; Water Plants Early; Transition to a Low-Water Garden; and the overarching Be Water Wise program.
- SCWA currently provides rebates such as Cash for Grass, High Efficiency Clothes Washers, High Efficiency Toilets.
- SCWA also asks customers to report water waste through the website and provides a discount on the customer's bill for low water usage.

Finally, SCWA maintains a Water Shortage Contingency Plan which details conservation actions to be taken when different stages of conservation are required.

Changes in regulations, such as those in the Making Conservation a California Way of Life regulation, have occurred and will continue to change during the life of this agreement. SCWA is legally bound to follow the regulations and SCWA commits to working to meet these requirements. The Making Conservation a California Way of Life regulation will likely require SCWA customers to limit the use of water per the regulation.

SCWA commits to thoroughly exploring the topic of demand management through the Master Plan update process. Part of the scope of work of the update will be to project demands moving forward, compare them to the regulatory requirements, and assess if additional work needs to be done to lower demands. SCWA's goal would be to develop and implement a cost-effective plan to meet its legal requirements while also providing for the livability of the community and keeping potable water as affordable as possible to the end users.

Framework Summary

This section summarizes the SCWA proposal for Water Forum 2050 commitments related to surface water diversions in terms of their contributions to the coequal objectives and proposed investments (projects).

Contributions to River Corridor Health

- Reduce direct surface water diversions on the LAR by taking water at FRWA.
    - The FRWA facilities offer a unique opportunity in dry years. When water resources are scarce, and other purveyors may be reducing diversions to allow flow down the American River for out-of-basin transfers and/or relying more heavily on groundwater resources, SCWA can continue to take water at Freeport to alleviate potential stress on the groundwater basin while also allowing surface water to provide flow and temperature benefits for the LAR. Future opportunities would rely on partnerships with other agencies to ensure there are buyers and sellers of water available for any transfers.
- Continued long-term funding for the Habitat Management Element (HME) and the Water Forum Successor Effort (WFSE) has been a crucial factor for supporting healthy and viable conditions for LAR salmonids through the installation of critical habitat and development of the Flow Management Standard.

Contributions to Water Supply Reliability

- Reduced dependence on groundwater
    - This has been implemented as part of the commitments of the original WFA and the completion of FRWA.
- Delivery of surface water supplies to other service areas.

Future SCWA Projects and Investments

- Regional Water Transfers and Agreements (partnerships)

- Ensure affordability in all hydrologic conditions

- Investments in Water Supply Infrastructure
  - Improved interties
  - Improved groundwater infrastructure including possible ASR
  - Expand treatment capacity at VSWTP
  - Provide surface water supplies to groundwater-only service areas
  - Continue planning level investment in the RiverArc (or similar northern Sacramento County surface water diversion) project.
  - Potential infrastructure to connect existing outlying service areas.

Water Forum Commitments to SCWA

Full Endorsement of the following, including letters of support:

- Support Protection of Existing Surface Water Entitlements Including:
  - Signatories will support the continued use of Permit 21209 as an important means to supporting the coequal objectives, specifically groundwater management and the protection of the LAR. SCWA intends to continue to use Permit 21209 surface water when available to support the coequal objectives and to sustain the groundwater table. Use of these supplies is often more expensive than groundwater but may be essential to managing groundwater objectives, including drought reserves to be available during curtailments. If the State Water Board or the Legislature proposes global changes to water rights, each Water Forum member may decide what position to take on the proposal without rescinding agreed-upon support for the use of Permit 21209 as an important means to supporting the coequal objectives.
  - Signatories will support the use of higher cost surface water supplies when available to build historic use so that groundwater will be available during curtailments. This will require SCWA to continue to use the surface water when it meets the co-equal objectives to build historic use as well as to rest the groundwater table. Use of these supplies is more expensive than groundwater.

- Signatories will support the following Capital Projects which are described in the WSIP and contemplated in the 2005 WSMP or amendments to serve lands within the Urban Services Boundary (as of 12/1/2025) and have completed the CEQA process (before 12/1/2025). No Capital project endorsement is considered Full Endorsement if it wasn't listed as a capital project in the existing 2016 WSIP.
  - Expansion of VSWTP to 100 MGD. The FRWA intake and VSWTP were developed to leave flows in the American River to protect the LAR and the Parkway. Water is diverted downstream of the confluence of the American River and Sacramento River, off the Sacramento River, at the FRWA intake and treated at the VSWTP to meet potable

demands in the Zone 40 area. Expansion of the VSWTP to its ultimate capacity is essential to continue the project to the ultimate extent envisioned in the original Water Forum Agreement.

- Expansion of the Agency's Transmission Main and water production system, including the North Service Area (NSA) Phase B pipeline project and NSA Terminal Tank Facility, as described in the 2005 Zone 40 Water Supply Master Plan (including amendments up to November of 2025) and further refined in the 2016 Zone 40 Water System Infrastructure Plan to allow surface water to efficiently flow to service areas within Zone 40.

- SCWA agrees that the Capital Improvement List in the 2016 Zone 40 Water System Infrastructure Plan that is fully endorsed is the one that existed in 2016. Any updates to the capital improvement list will not have full endorsement.
- Signatories will support investment and funding for projects and programs through equitable and fair rates and fees required to honor commitments in this PSA and support the coequal objectives.

Conceptual Endorsement of the following, meaning a commitment by signatories to explore the ideas:

- River Arc Project
- Support for SCWA's participation in the Water Bank and expansion of conjunctive use
- Support for implementation of the South American and North American Groundwater Sustainability Plans
- Partnerships that expand water availability for use through FRWA including expansion of existing entitlement place of use, changes in point of diversion to include FRWA, etc.
- Additional interties between partner agencies to expand conjunctive use in the region.
- Additional surface water entitlements, either procured or by contract through partnerships.

WATER FORUM AGREEMENT 2050

Sacramento Municipal Utility District
Purveyor Specific Agreement

Updated: January 8, 2026

Purveyor Background

The Sacramento Municipal Utility District (SMUD) serves electricity to most electricity users in Sacramento County and small portions of Yolo and Placer Counties.

SMUD's core value of environmental leadership is a guiding principle that drives efforts to minimize impacts and encompass all aspects of SMUD operations. These principles support collaborations with the Water Forum and their referenced coequal objectives.

In the 1950s and 60s, SMUD developed a system of reservoirs on the tributaries to the south and middle forks of the American River for power generation. SMUD also developed Rancho Seco Nuclear Generating Station in the southeastern part of Sacramento County, which was later decommissioned, with Cosumnes Power Plant (CPP) later being constructed nearby. The CPP uses American River water for thermal power generation. SMUD maintains Rancho Seco Lake onsite, which serves as a backup water supply for the CPP.

In 1970, SMUD entered a Water Service Contract (WSC) with U.S. Bureau of Reclamation (USBR) for delivery of up to 60,000 acre-feet per year (AFY) of CVP water for municipal and industrial use. In 2006, with concurrence by USBR, SMUD assigned Sacramento County Water Agency (SCWA) the right, title, and interest on a portion of SMUD's Central Valley Project (CVP) contract consisting of 30,000 AFY. The assignment allowed SCWA rights to renew the contract. The original SMUD WSC agreement expired in 2012 but was replaced by a repayment CVP contract (which does not expire). SMUD currently has a repayment contract with USBR for 30,000 AFY.

The point of diversion for SMUD's entitlement is the Folsom South Canal. SMUD does not have a current need for this entitlement, though it could require the full amount depending on future energy generation-related needs. Unless or until SMUD determines that it should make a permanent transfer of that entitlement, SMUD may choose to make temporary transfers and any water that would otherwise be diverted under that entitlement will presumably be released by USBR to other entitlement holders or for other beneficial purposes. If SMUD is considering water transfers that are expected to reduce flows in the lower American River, the transfer will be disclosed to the Water Forum.

The Folsom South Canal is located approximately 3.6 miles west of the SMUD Rancho Seco property. The Canal is a 26.98-mile conveyance owned and operated by USBR as part of the CVP. The canal typically operates at less than 1 percent of its hydraulic capacity and traverses generally south from Lake Natoma on the American River in eastern Sacramento County to a pumping plant owned and operated by East Bay Municipal Utility District. In terms of overall volume conveyed, SMUD is the primary user of the Folsom South Canal, which supplies both the Cosumnes Power Plant and Rancho Seco Lake.

Rancho Seco Lake is an off-stream storage reservoir located approximately one mile east and upstream of Cosumnes Power Plant. The lake is kept full year-round with Folsom South Canal water and incidental rainfall runoff. Water is delivered through a turnout located approximately 700 feet upstream from the Laguna Creek siphon, on the Folsom-South Canal. Water from the turnout is pumped east through a 3.2-mile long, 66-inch diameter pipeline to the Rancho Seco site, and other pipelines convey water to Rancho Seco Lake and CPP.

Rancho Seco Lake is a small reservoir near Clay Creek. The surface area of Rancho Seco Reservoir is approximately 165 acres and is contained by an earthen dam constructed in 1972. The reservoir has a capacity of 2,850 acre-feet (AF). The maximum dam height is approximately 60 feet, total length is 1,800 feet, and crest width is 28 feet. The dam was designed and constructed to standards established by the State of California, which include consideration for earthquake and extreme flood events.

Surface Water Management

Current Diversions

During the last 10 years, SMUD's diversions from the American River for consumptive purposes have ranged from 6,131 AF in 2013 to 3,674 AF in 2023. These diversions could increase should SMUD decide to reoperate the CPP to use alternative fuels that have a greater water demand or undertake other power generation related projects with a consumptive demand, including but not limited to hydrogen production or alternative renewable generation. SMUD has also made temporary assignments of its entitlement to the City of Roseville. SMUD will continue to explore and participate in assignments, transfers, and similar arrangements.

Future Projected Diversions

It is difficult to predict how much water SMUD will divert and use over time. SMUD's current diversions could increase should SMUD decide to reoperate the CPP to use alternative fuels that have a greater water demand or undertake other power generation related projects with a consumptive demand, including but not limited to hydrogen production or alternative renewable generation. SMUD has also made temporary assignments of its entitlement to the City of Roseville. SMUD will continue to explore and participate in assignments, transfers, and similar arrangements.

Drier Conditions Management

In drier years, any assignments of SMUD's water service entitlement will be subject to USBR's available supply. The CPP will need to operate during drier years to meet critical local and regional electrical demands. In fact, the need to operate the CPP could increase in drier years due to dry year reductions in hydroelectric supply or potentially higher temperatures leading to increased use of air conditioning.

Driest Conditions Management

During driest conditions, any assignments of SMUD's water service entitlement will be subject to USBR's available supply. The CPP will need to operate during drier years to meet critical local and regional electrical demands. In fact, the need to operate the CPP could increase in drier years due to dry year reductions in hydroelectric supply or potentially higher temperatures leading to increased use of air conditioning.

Critically Low Storage Conditions

In critically low storage years, any assignments of SMUD's water service entitlement will be subject to USBR's available supply. The CPP will need to operate during critically low storage conditions years to meet critical local and regional electrical demands. In fact, the need to operate the CPP could increase in drier years due to dry year reductions in hydroelectric supply or potentially higher temperatures leading to increased use of air conditioning.

However, it is recognized that in years when the projected unimpaired inflow to Folsom Reservoir is less than 750,000 AF there may not be sufficient water available to provide the purveyors with the driest years' quantities specified in their agreements and provide the expected driest years' flows to the mouth of the American River. In those years, SMUD will participate in a conference with other stakeholders on how the available water should be managed. It is also worth noting that the CPP depends on the Folsom South Canal for its water supply. The pumping station needs a canal level of 107 feet at its intake. This requirement, as well as others, would be discussed in stakeholder conferences mentioned above.

Project List

Non-Structural Projects

- Water transfer agreement with Roseville for 2,000 AFY (through February 2026)

WATER FORUM AGREEMENT 2050

Sacramento Suburban Water District Purveyor Specific Agreement

Updated: November 26, 2025

Sacramento Suburban Water District (SSWD) is committed to supporting good stewardship of the American River watershed and recommits to its membership in the Water Forum as a model for this effort. SSWD will continue its advocacy for the health of the river through actionable, meaningful efforts supporting cold water carry-over at Folsom reservoir, supporting the Flow Management Standard, habitat restoration efforts and advocacy at the federal level with our U.S. Bureau of Reclamation (USBR) partners to balance the co-equal goals. Achieving the co-equal goals requires on-going actions, not just in dry years, to keep the river and groundwater basin healthy and ensure a reliable, safe, and sustainable water supply. Ultimately the Water Forum has endeavored to provide "peace on the river" while knowing that a healthy water supply is reliant upon a healthy river.

Purveyor Background

SSWD was formed on February 1, 2002, under the State of California's County Water District Law by the consolidation of the Arcade Water District (AWD), established in 1956, and the Northridge Water District (NWD), established in 1958.

The Local Area Formation Commission approved the reorganization of Del Paso Manor Water District (DPMWD), established in 1954, into SSWD as of June 30, 2025. After June 30, 2025, DPMWD ceased to exist and SSWD officially integrated all aspects of the former district into operations of the SSWD as the Del Paso Manor Service Area (DPMSA). The DPMSA will be operated as a separate water system until the DPMSA system facilities have been sufficiently rehabilitated and replaced to the same standard as the SSWD water system, and the SSWD Board of Directors determines that the two service areas will be merged and operated as a single water system.

SSWD is in Sacramento County, north of the American River and serves a large suburban area, including portions of Citrus Heights, Carmichael, North Highlands, City of Sacramento (City), Antelope, Arden Arcade, and McClellan Park (formerly McClellan Air Force Base). SSWD's service area covers approximately 37 square miles (23,690 acres of land) and serves water to an estimated population of 199,298 (based on the 2020 census) through approximately 48,853 service connections, 47,162 of which are metered. There are 1,691 unmetered service connections in the DPMSA that will be metered by 2035. SSWD's territory is substantially built out. Other than residential and commercial in-fill projects,

and industrial and commercial development at McClellan Park, SSWD does not expect significant additional development within its territory.

Water System Facilities

SSWD's distribution system, including storage, pump stations and interconnections, has approximately 720 miles of pipeline that range in size from 48-inch transmission mains down to 4-inch distribution mains. There are 48 emergency interties with neighboring agencies along SSWD's service boundary. SSWD has 6 storage tanks with a collective capacity to hold approximately 15.8 million gallons of water. SSWD has a total of 7 booster pumping stations, three of which are co-located with major storage tanks. SSWD pumps its groundwater from approximately 80 permitted groundwater wells. All the groundwater wells pump directly into the distribution system and range between 270 and 1,036 feet deep. SSWD also has facilities to receive treated surface water from Folsom Reservoir and the Lower American River.

Groundwater Wells

SSWD currently has 80 permitted wells in the North American Subbasin (NASb) that are connected to the potable water system, with a current production capacity of approximately 125 million gallons per day (MGD).

SSWD is, by regulation, 100% reliant on groundwater to ensure continuous supply to its customers. Therefore, SSWD must maintain groundwater production capacity necessary to meet 100% of its customers' needs. SSWD's groundwater wells and storage facilities are capable of producing 100% of SSWD's annual water demand.

SSWD pumps from the NASb, which is jointly managed on behalf of SSWD and other municipal pumpers by the Sacramento Groundwater Authority under a Groundwater Sustainability Plan adopted consistent with the Sustainable Groundwater Management Act (SGMA). SSWD works with other groundwater pumpers in the basin to sustainably manage groundwater supply consistent with SGMA.

Surface Water

In addition to groundwater, SSWD imports surface water, when available, from two supply sources: Folsom Reservoir and the Lower American River. SSWD has no surface water rights, but has two contractual entitlements to surface water, one from the Placer County Water Agency (PCWA) for up to 29,000 acre-feet and one from the City for up to 26,064 acre-feet.

When available, SSWD purchases surface water from PCWA supplied from the Middle Fork American River and delivered to Folsom Reservoir. The PCWA water is treated by San Juan Water District (SJWD) at the Peterson Water Treatment Plant pursuant to contract and then conveyed through purchased pipeline capacity in the Cooperative Transmission Pipeline and District-owned transmission pipelines into SSWD's water distribution system in the North Service Area. SSWD also purchases surface water when available from the City supplied from the Lower American River, which is diverted and treated by the City at its E.A. Fairbairn Water Treatment Plant and conveyed through purchased and District-owned pipeline capacity for distribution to customers in SSWD's South Service Area.

In addition to the two contractual entitlements, SSWD purchases Central Valley Project Section 215 surface water from USBR under a long-term Warren Act contract when available.

Surface Water and Groundwater Operations

SSWD has no surface water rights.

Contractual Entitlements

As noted, SSWD has two contractual entitlements to surface water, one from the City and one from PCWA. SSWD regularly enters individual annual contracts with USBR to receive surplus Central Valley Project Section 215 water deliveries when available.

One of SSWD's two predecessor agencies, AWD, entered into an agreement with the City to reserve a water supply for AWD's service area within the City's American River Place of Use. That agreement committed a portion of the City's surface water supplies for future use by AWD, subject to annual payments. After SSWD was formed in 2002, it continued AWD's payments to the City for the American River Place of Use water supply and AWD's planning and design of facilities that enabled SSWD to receive treated water from E.A. Fairbairn Water Treatment Plant.

In 2004, SSWD and the City entered into a Wholesale Water Supply Agreement under which the City agreed to supply up to 20 million gallons per day (mgd) of treated surface water to SSWD under the former AWD entitlement. The agreement will continue in full force and effect unless terminated by mutual written agreement of the parties or by operation of law.

In 2000, SSWD's other predecessor agency, NWD, entered into an agreement to purchase water from PCWA. When SSWD was formed in 2002, it assumed this agreement. The agreement provides that SSWD would buy surface water from PCWA at an increasing volume each year until the maximum contract amount of 29,000 acre-feet per year was reached in 2014 and then maintain this level through the expiration of the agreement in 2025. The PCWA agreement was amended in 2018 to extend its term through 2045. This permitted SSWD to secure a Long-Term Warren Act Contract for the same term (i.e., through 2045) from the USBR to wheel PCWA water supplies through Folsom Reservoir to SJWD for treatment by SJWD and then delivery to SSWD through the Cooperative Transmission Pipeline. The PCWA agreement was further amended in 2020 to reduce SSWD's annual "take or pay" obligation from 12,000 acre-feet to 8,000 acre-feet, with the provision that if PCWA can make additional water available to SSWD in any year, SSWD has the right to take up to 21,000 acre-feet of additional water in that year.

The PCWA entitlement has limitations.

- American River Flows
    - PCWA may not deliver water to SSWD in any year when the March through November unimpaired inflow into Folsom Reservoir is less than 1,600,000 acre-feet.
    - Notwithstanding the foregoing, PCWA may deliver water to SSWD in the following December through February provided water is being released from Folsom Reservoir for purposes of flood protection.
- PCWA Needs
    - The agreement is subject to cutback if PCWA needs any portion of the SSWD entitlement to serve PCWA customers in Placer County, or to meet PCWA's Middle Fork Project power generation obligations to PG&E.

- SSWD Use
    - SSWD Customers – SSWD may only use the PCWA water in PCWA's expanded Place of Use which covers SSWD's North Service Area.
    - Sale and Transfer – SSWD may sell or transfer any portion of its available PCWA entitlement within PCWA's expanded Place of Use (e.g., to the California American Water Company).

Use

SSWD uses surface water in-lieu of groundwater pumping during water year types or conditions when such supplies can be diverted and used in portions of the SSWD service area when available under PCWA's and the City's water rights and it provides benefits to SSWD customers or aids in meeting other local or regional objectives such as in-lieu groundwater recharge, which SSWD actively engages in as part of its Water Forum commitments.

Conjunctive Use Program

As one of the original signatories of the Water Forum Agreement (through its predecessor agency, Northridge Water District), SSWD has operated an active Conjunctive Use Program since 1998. Under this program, SSWD provides treated surface water to its customers under its City and PCWA entitlements in lieu of providing pumped groundwater. This reduces SSWD's need to extract groundwater, which in turn allows SSWD's groundwater supplies to be replenished through natural groundwater recharge. This operation is referred to as "in-lieu recharge" or more colloquially as "conjunctive use."

SSWD's groundwater wells are in the NASb, which is part of the Sacramento Valley Groundwater Basin. While groundwater levels normally fluctuate in response to hydrologic conditions, groundwater levels in the NASb declined between 1950 and 2000. There is a regional consensus that this decline was largely the result of excessive groundwater pumping.

Throughout the history of SSWD, investments in its Conjunctive Use Program have had a significant effect on bolstering groundwater supplies in the region. By supplementing its supplies with surface water when it is available, SSWD's groundwater pumping has been reduced, thereby allowing for more groundwater recharge.

SSWD supports maintaining a sustainable groundwater basin in the NASb. Seeking opportunities to recharge groundwater requires focus if the resource is to be present when most needed. SSWD remains cognizant of the need to maintain consistency with local Groundwater Sustainability Plans and meeting the requirements of SGMA.

Water Banking

- SSWD's in-lieu recharge program has contributed to the regional banking of over 400,000 acre-feet of groundwater since 1998.
- SSWD has banked greater than 245,000 acre-feet of groundwater to improve supply reliability since 2003.
- SSWD files annual reports with the State Water Resources Control Board to document its efforts to bank groundwater. These efforts have been recognized and substantiated by the State of California Department of Water Resources' data and reporting.

Aquifer Recovery

- Since 2003, groundwater levels have stabilized in the portion of the NASb from which SSWD pumps water. This was the result, in large part, of an increase in SSWD's in-lieu recharge practice (i.e., increased surface water purchases by SSWD when available) and enhanced conservation practices on the part of SSWD's customers spurred by SSWD's various education and incentive programs.
- Groundwater level recovery, combined with absence of a robust aquifer storage (i.e., direct groundwater recharge) effort in the area, underscore the general effectiveness of conjunctive use programs and in-lieu groundwater banking efforts.
- As demonstrated by historical groundwater level data for the Sacramento Valley, this water supply management strategy reversed the historical trend of groundwater level decline by reducing groundwater pumping to allow the aquifer to naturally stabilize and then begin to recharge.

Demand Management

SSWD's baseline water usage per capita for the purpose of compliance with Senate Bill (SB) X7-7 was 257 gallons per capita per day (gpcd) for the years 1995-2010, with a 2020 target of 206 gpcd. At the SB X7-7 compliance date of 2020, SSWD customer usage was down to 172 gpcd, meeting the legislative mandate. For the last several years, SSWD's gpcd has hovered around 143 gpcd. This was achieved through a variety of means, including an accelerated Advanced Meter Infrastructure program and expanded water conservation incentive and outreach efforts.

Moving forward, through the Long Term Water Conservation Framework legislation (SB 606 and Assembly Bill 1668), the State of California created real-time targets for water suppliers, including SSWD, that involve a dramatic water use reduction target over the next 15 years that is tied to a residential indoor water use reduction as well as a landscape water efficiency target that involves reporting on landscape water demand as compared to landscape water need (as calculated by the State). This system-wide budget-based water use approach also includes a reduction in water suppliers' system water loss (gallons per connection per day). To achieve these targets, SSWD anticipates that it will need to dramatically expand customer participation in its programs and anticipates making refinements to existing programs as well as adding programs to achieve these requirements. An analysis and prioritization of potential programs is underway and engagement on this topic with the Water Forum membership is ongoing. Draft and final work products will be provided to the Water Forum members.

Current SSWD conservation program elements are advertised on SSWD's web page:

https://www.sswd.org/departments/conservation

While subject to change, as program effectiveness is evaluated, examples of likely program enhancements beyond existing elements include:

- Monitoring and analysis of meters dedicated solely to irrigation
- Expanded rebate programs for all customer classes targeting both indoor and outdoor water efficiency efforts
- Enhanced leak repair incentive programs
- Enhanced water and energy partnership rebates

- Enhanced residential water surveys and leak investigations
- Enhanced outreach regarding best practices for water efficiency and water conservation

See "Specific Demand Management Measures by Water Conservation Stage" in Appendix E of SSWD's Urban Water Management Plan:

https://www.sswd.org/departments/engineering/reports/urban-water-management-plan

SSWD understands that Water Code Section 10632 (a)(3)(A) requires purveyors to plan for reductions of 10%, 20%, 50%, and beyond. SSWD will follow the stages set forth in its Water Shortage Contingency Plan as declared by its Board of Directors based on operational service conditions and water supply availability.

All hyperlinks used within this PSA will be maintained and active for the duration of the agreement, or if changes are made to the online content, the changes will be communicated to the Water Forum and updated links provided.

Current Diversions

N/A

Future Projected Diversions

N/A

Drier Conditions Management

In drier years, SSWD will switch to groundwater in a discretionary fashion to meet customer demands as water resource conditions warrant. Decisions will include, but not are limited to, the need to maintain adequate levels of service, consideration of local surface water resource conditions, groundwater sustainability conditions, and successful outcomes of local banking and extraction program such as the Water Bank or agreements to make water available for the environment (e.g. Healthy Rivers and Landscapes). The surface water supplies available to SSWD (e.g., PCWA, City, USBR) may be subject to significant reductions, up to and including curtailment, during dry years (seasonal and climatic shortages).

Based on historical data, SSWD's water supply available from groundwater has not been impacted by annual hydrology. Groundwater reliability is consistent in all water years and is not subject to vulnerabilities from seasonal and climatic factors. After several consecutive dry years, the groundwater levels may decline, but this does not reduce the pumping capacity of SSWD's wells. The reliability of SSWD's groundwater supply is related to its sustainable groundwater pumping yield estimate, water banking efforts, and its reliable well field capacity that can be used to meet demands in all water year types.

Driest and Critically Low Storage Conditions Management

In the driest years, SSWD will switch to groundwater in a discretionary fashion to meet customer demands as water resource conditions warrant. Decisions will include, but not are limited to, the need to maintain adequate levels of service, consideration of local surface water resource conditions, groundwater sustainability conditions, and successful outcomes of local banking and extraction program

such as the Water Bank or agreements to make water available for the environment (e.g., Healthy Rivers and Landscapes). The surface water supplies available to SSWD from its PCWA and City surface water entitlements may be subject to significant reductions, including curtailments, during dry years (seasonal and climatic shortages).

Based on historical data, SSWD's water supply available from groundwater has not been impacted by annual hydrology. Groundwater reliability is consistent in all water years and is not subject to vulnerabilities from seasonal and climatic factors. After several consecutive dry years, groundwater levels may decline, but this does not reduce the pumping capacity of SSWD's wells. On average, the groundwater level declines are reduced and recover faster because SSWD's water banking efforts have protected and increased the reliability of its groundwater supply.

Project List

SSWD understands that to support the coequal objectives and mitigate challenges facing the region under future conditions, structural and non-structural projects will be needed.

Structural

The following infrastructure projects will support efforts to implement SSWD's Purveyor Specific Agreement (PSA), and support the coequal objectives.

- New replacement groundwater facilities consistent with adopted groundwater sustainability plans
    - Select new replacement wells will strategically be equipped with Aquifer Storage and Recovery capability
- New or improved interties with other purveyors, in particular ones that promote groundwater recharge
- Rehabilitation and modernization of existing water facilities
- Structural projects and programs to help ensure the success of the Healthy Rivers and Landscapes Program (previously known as Voluntary Agreements) or similar tributary-specific programs (e.g., the ARTESIAN program) that improve the ecosystem, protect local water entitlements, and maintain better cold water pool conditions and management in Folson Reservoir and the Lower American River

Non-Structural

- Consolidation of water districts as approved by the State of California or the Local Agency Formation Commission
- Agreements with neighboring purveyors for conjunctive use opportunities and water supply reliability
- Continued water use efficiency programs and funding support
- Water transfers consistent with groundwater sustainability plans and the California Water Code
- Support for identifying underground storage as a beneficial use of surface water
- Active participation in management and other actions under the groundwater sustainability plans for the NASb

Caveats and Assurances

1. The ability for any individual purveyor to implement the surface water diversions principles will depend on their respective opportunities and constraints.
2. In circumstances where excess water is made available by USBR Article 3(f) of a purveyor's Water Repayment Contract or by a Section 215 Contract between the purveyor and USBR due to flood control operations at Folsom Reservoir, for the purposes of groundwater recharge, that water would not be counted as diversion water within their PSA, regardless of year type.
3. Acknowledge that the duty of a water purveyor is to provide an affordable, reliable, and high-quality water supply to its customers.
4. Agree that evolving regulatory conditions may trigger changed conditions and Water Forum commitments shall evolve to adapt to those changed conditions.
5. Acknowledge that the achievement of the coequal objectives must consider ramifications on water affordability, reliability, availability, and quality.
6. Continue to utilize SSWD's conjunctive use program in a discretionary manner to ensure a safe and reliable water supply is maintained.

WATER FORUM AGREEMENT 2050

San Juan Water District Consortium
Purveyor Specific Agreement

(Includes Citrus Heights Water District, Fair Oaks Water District, Orange Vale Water Company, San Juan Water District, and a portion of the City of Folsom)

Updated: January 8, 2026

Purveyor Background

San Juan Water District's (SJWD) wholesale service area is composed of the SJWD's retail service area located in both Sacramento and Placer Counties, Citrus Heights Water District (CHWD), Fair Oaks Water District (FOWD), Orange Vale Water Company (OVWC), and a portion of the City of Folsom. These referenced Districts and the relevant portion of the City of Folsom are hereinafter collectively referred to as "the SJWD Consortium".

SJWD's wholesale surface water supplies consist of three sources – 33,000 acre-feet (AF) per year of water rights allocations (vintages 1854 and 1928), up to 25,000 AF/year in a water supply agreement with Placer County Water Agency for water from their Middle Fork Project, and 24,200 AF/year of Central Valley Project water supplies in a repayment contract with the U.S. Bureau of Reclamation (Reclamation). The water-right water must be provided by Reclamation without diminution, pursuant to a 1954 settlement agreement with SJWD. The other two sources are subject to shortage provisions, but only Reclamation has ever implemented shortage allocations.

These sources of water are all delivered through a municipal and industrial (M&I) intake in Folsom Dam, which is at an elevation that would be subject to air entrainment at approximately 110,000 AF of storage in Folsom Reservoir. All of SJWD's surface water is diverted from the Folsom Reservoir and treated at the Sidney N. Peterson Treatment Plant. Treated water is then stored in a 62-million-gallon treated storage reservoir.

CHWD and FOWD supplement their surface water supply with groundwater. OVWC may supplement its supply with groundwater in the future. Additional supplies may be available from other sources, via interconnections.

SJWD's projected 2030 surface water demand in the 2000 Water Forum Agreement was 82,200 AF/year (the full complement of SJWD's water supplies). In a conference year, under the 2000 Agreement, SJWD's projected surface water demands would decrease to 54,200 AF/year, which was also the baseline surface water use reported by SJWD for 1995. This use increased in SJWD's wholesale service area to 57,900

AF/year by 2004 but has since declined to 32,700 AF/year in 2022 (a reduction of 44%). Even if groundwater use in SJWD's wholesale area is included (a total of 7,200 AF, including a total of 4,000 AF of incremental groundwater pumping for the groundwater substitution transfer in 2022), the total use would be 31% lower than in 2004 (even assuming minimal groundwater use that year).

Surface Water and Groundwater Management

Baseline diversions are those described in SJWD's 2020 Urban Water Management Plan (UWMP), for total and surface water use in 2020. The baseline for the SJWD's American River diversion is 40,642 AF total and 36,301 AF of surface water diversions.

Agreement for meeting the SJWD Consortium's water supply needs to the year 2040:

1. Normal years

As it applies to the SJWD Consortium's portion of the agreement, normal years is defined as follows: years when the projected March through November unimpaired inflow to Folsom Reservoir is greater than 950,000 AF.

In normal years, SJWD will divert and the SJWD Consortium will use no more than 38,603 AF of surface water supplies for customer requirements within the current SJWD wholesale service area. Additional surface water supplies may be used for banking purposes.

2. Drier years

As it applies to the SJWD Consortium's portion of the agreement, drier years is defined as follows: years when the projected March through November unimpaired inflow to Folsom Reservoir is less than 950,000 AF and equal to or greater than 400,000 AF.

In drier years, SJWD will divert and the SJWD Consortium will use a decreasing amount of surface water from 38,603 AF to 30,882 AF within the current SJWD wholesale service area. During drier years, the SJWD Consortium will reduce its surface water demand by additional conservation (up to 20% or as required by the Districts' Water Shortage Contingency Plans) and potential increased use of groundwater.

3. Driest years

Defined for purposes of the Water Forum Agreement 2050 as follows: years when the projected March through November unimpaired inflow to Folsom Reservoir is less than 400,000 AF.

In the driest years, SJWD will reduce its diversion to no more than 30,882 AF for use within the current SJWD wholesale service area, which is lower than its baseline amount. During driest years the SJWD Consortium will reduce its surface water demand by additional conservation (up to 20% or as required by the Districts' Water Shortage Contingency Plans) and potential increased use of groundwater.

In addition, it is recognized that in years when the projected unimpaired inflow to Folsom Reservoir falls below 750,000 AF, there may not be sufficient water available to provide the purveyors with the drier or driest years quantities specified in their Purveyor Specific Agreements (PSA) and provide the expected driest years flows to the mouth of the American River. In those years, the SJWD Consortium will participate in a conference with other stakeholders on how the available water should be managed. The

conferees will be guided by the conference year principles described in Chapter 4, Section I of the Water Forum Agreement.

Demand Management

As noted in the Demand Management element of this Agreement, "All purveyors commit to abiding by the relevant conservation and water use efficiency regulations." The SJWD Consortium agencies reiterate that commitment in this PSA. The specific measures that the SJWD Consortium agencies will take to meet these obligations have yet to be defined, and they will evolve over time as the different regulatory requirements come into effect. Those measures will be described in the documents referenced below. However, at the time of the signing of the Water Forum Agreement, the San Juan Consortium agencies do anticipate that a major focus of their programs will be on the use of water on irrigated landscapes, and on assisting their customers in reducing this category of use, to the extent that such reductions are necessary and appropriate to allow SJWD Consortium agencies to meet the requirements of the conservation regulations. The SJWD Consortium agencies will consider the various tools and techniques listed in the Appendix as they develop the suite of actions that they may take to facilitate the required changes in water use on landscapes by their customers.

The SJWD Consortium operates extensive demand management programs throughout the service areas of its members, as well as regionally, partly through the programs operated by the Regional Water Authority (RWA). Information about RWA's demand management programs is available at the following locations:

https://rwah2o.org/programs/wep/

https://bewatersmart.info/

Information about demand management measures for each member of the SJWD Consortium is available in their respective Urban Water Management Plans, at the following locations:

2020 Urban Water Management Plans:

Department of Water Resources statewide library of UWMPs:

https://wuedata.water.ca.gov/

Current information about water efficiency programs and activities, including rebates, site surveys, water conservation ordinances, etc. for each consortium member is available on its respective website. Those water efficiency web pages include:

CHWD: https://chwd.org/water-efficiency/

FOWD: https://www.fowd.com/water-efficiency

Folsom: https://www.folsom.ca.us/government/environmental-water-resources/water/water-conservation

OVWC: https://www.orangevalewater.com/drought-stages

SJWD: https://www.sjwd.org/water-efficiency

Information is also available for each agency concerning the water use objectives and corresponding annual water use, which are tracked and reported pursuant to the 2024 urban conservation regulations. That information is available for SJWD Consortium agencies and all affected urban water agencies at DWR's statewide library website, under the "Urban Water Use Objective Reporting" section, at the following link: https://wuedata.water.ca.gov/.

Demand management and conservation program information is available in the annual water supply and demand assessments that are submitted by water agencies (including SJWD Consortium members). Those reports are available on DWR's statewide library webpage, under the "Water Shortage Assessment Reports" section.

The members of the SJWD Consortium will update their water conservation ordinances to include the requirements of AB 1572 before January 1, 2027, as required by that statute.

Critically Low Storage Conditions

SJWD's sources of water are all delivered through a municipal and industrial (M&I) intake in Folsom Dam, which is at an elevation that would be subject to air entrainment at approximately 110,000 AF of storage in Folsom Reservoir. Because this entrainment could result in significant damage to the impellers of the pumps that Reclamation uses to pump the supplies brought through the intake to SJWD, Roseville, and Folsom, this level of storage is one variation of "dead pool" being discussed in the Water Forum. This version of "dead pool" has never occurred.

If the water level drops below the M&I intake, Reclamation would use an emergency pump on one of the three power penstocks in the dam to deliver water to Roseville and SJWD and floating barges to deliver water to Folsom. The emergency pump has a capacity of 60 cfs (43,500 AF/year), and the barges have a capacity of 30 cfs. These facilities would allow Reclamation to access water in Folsom Reservoir between the 110,000 AF at which the M&I intake goes dry and the approximately 55,000 AF storage level at which the power penstocks go dry – a second version of "dead pool".

Project List and Future Water Supply Reliability Efforts

Projects for which the SJWD Consortium requests conceptual endorsement by all signatories:

1. Infrastructure repair and replacement projects

2. Expansion of water use efficiency programs to reduce demands on American River supplies

Members of the SJWD Consortium may seek support or endorsement by other Members and/or the Water Forum for the following projects. Should any SJWD Consortium Member choose to seek such support or endorsement, they will do so pursuant to the process defined in in the Water Forum 2050 Agreement.

1. Alternative raw water supply projects to improve reliability and redundancy of delivering raw water from Folsom Reservoir
2. Renovation or installation of facilities necessary to conduct robust conjunctive use activities, such as groundwater production and injection facilities, including those necessary to support expansion of the regional water bank
3. Development and implementation of projects to meet all new regulatory requirements
4. Water rates that are necessary to provide funding to meet the financial needs of SJWD Consortium parties

Glossary of Common Terms

Sources of definitions are indicated in italics

Acre-foot (AF)

An acre is about the size of a football field. An acre-foot is the amount of water that would cover one acre of land one foot deep. It equals 325,800 gallons. That is approximately how much water five people use a year for drinking, washing, and landscape watering.

Aquifer

A geologic formation that stores, transmits, and yields significant quantities of water to wells and springs. *Water Education Foundation*

Anadromous Fish

Fish that spend a part of their life cycle in the sea and return to freshwater streams to spawn.

Best Management Practices (Water Conservation)

A policy, program, practice, rule, regulation, or ordinance of the use of devices, equipment, or facilities that is an established and generally accepted practice that results in more efficient use or conservation of water, or a practice that has been proven to indicate that significant conservation benefits can be achieved. *MOU Regarding Water Conservation in California*

Biological Opinion

A Biological Opinion is a document produced by the U.S. Fish and Wildlife Service (USFWS) or the National Marine Fisheries Service (NMFS) as part of a formal consultation under Section 7 of the Endangered Species Act (ESA). It determines whether a proposed action is likely to jeopardize the continued existence of a listed species or result in the destruction or adverse modification of designated critical habitat.

California Environmental Quality Act

An act conceived primarily to require public agency decision makers to document and consider the environmental implications of their actions. *Guide to the California Environmental Quality Act: Remy & Thomas*

Central Valley Project Improvement Act (CVPIA)

Amends the Central Valley Project (CVP) reauthorization act of 1937 and reauthorizes the CVP to add mitigation, protection, and restoration of fish and wildlife as project purposes equal to agricultural and domestic uses, and to make fish and wildlife enhancement a project purpose equal to power. *USBR ARWRI*

Changed Conditions

This refers to significant changes in circumstances such as laws, regulations, and even the health of the river, which may occur after a *Water Forum Agreement 2050* is signed. If changed conditions arise that may interfere with the implementation of the Agreement, the Water Forum will reopen negotiations.

Conjunctive Use

The planned joint use of surface and groundwater to improve overall water supply reliability.

Conservation Pricing

Pricing that provides an incentive to reduce average or peak use, or both.

Contractual Entitlement

A water entitlement based on a contract, such as a contract with the United States Bureau of Reclamation for Central Valley Project water.

Cost-Effective

A case where the financial benefits of a project are greater than the overall cost.

CVPIA Programmatic Environmental Impact Statement

The program-level document, prepared by the United States Bureau of Reclamation, on the Central Valley Project Improvement Act, complies with the requirements of the National Environmental Policy Act.

Groundwater

The water in an aquifer. For human use and consumption, this water is generally pumped to the surface through a well.

Interested Party

In a negotiation, a person, organization, or entity entrusted to represent those with an interest in the outcome. There are 46 stakeholder organizations participating in the Water Forum.

Inter-basin Transfer

Water transfers from entities outside of a watershed to entities within a watershed.

Landscape Efficiencies

What is achieved through skillful planting and irrigation design, appropriate use of plant materials, and intelligent management to assure landscape development that avoids excessive water demands and is less vulnerable to periods of severe drought.

Low Water Use and Native Plants

Plants that thrive with minimal irrigation typically requiring only one watering per week or less. This includes native plants adapted to the region's climate, as well as drought-tolerant species. Native plants often have deep root systems that tap into groundwater, reducing the need for frequent watering.

Memorandum of Understanding (MOU)

A means of gaining formal consensus between two or more parties on a particular complex issue.

Point of Diversion

The place along the stream channel where a diverter takes control of the water. *How to File an Application to Appropriate Water, State Water Resources Control Board*

Public Trust Doctrine

California's legal doctrine requires the balancing of competing public interests while protecting the rights of the public to use water courses for commerce, navigation, fisheries, recreation, open space, preservation of ecological units in their natural state, and similar uses for which those lands are uniquely suited. It is based on the California State Constitution and goes back to English Common Law. The California Supreme Court stated, "*The state has an affirmative duty to take the public trust into account in the planning and allocation of water resources, and to protect public trust uses whenever feasible*." *National Audubon (33Cal.3d 419 1983)*

Purveyor

An agency or district that provides water to customers for a fee.

Reasonable-Feasible

Practicable and in accord with reason.

Riparian Vegetation

Of, adjacent to, or living on, the bank of a river or, sometimes, of a lake, pond, etc. *Webster's Ninth New Collegiate Dictionary*

State Water Project

California's state-owned and operated water project, consisting of 22 dams and reservoirs, delivers water 600 miles from the Sacramento Valley to Los Angeles. *Water Education Foundation*

Subsidence

Sinking of the land surface due to a number of factors, of which groundwater extraction is one.

Surface Water Diversions

Water that is diverted and/or pumped from above-ground sources such as rivers, streams, reservoirs, and lakes, as opposed to groundwater, which is water pumped from the aquifer.

Sustainable Yield

Sustainable yield is a balance between pumping and basin recharge, expressed as the number of acre-feet of water per year that can be pumped from the basin on a long-term, average annual basis.

Water Forum

A community collaboration process involving interested organizations and commitment to the coequal objectives of *providing a reliable and safe water supply for the region's economic health and planned development through the year 2050, and preserving the fishery, wildlife, recreational, and aesthetic values of the lower American River*.

Water Forum 2050

The formal agreement among the Water Forum representatives will be presented to stakeholder organizations in the fall of 2025 for ratification without revision.

Quick Reference for Common Acronyms

AB	Assembly Bill
ACWA	Association of California Water Agencies
AF	Acre feet
AHTT	Ad Hoc Technical Team
ARCH	American River Corridor Health Program Area
ARFCD	American River Flood Control District
ARFO	American River Flows and Operations Program Area
ARG	American River Group
ARPF	American River Parkway Foundation
BC	Business Caucus
BiOp	Biological Opinion
CCOWMP	City County Office of Metropolitan Water Planning (the formal title for the Water Forum under the original Water Forum Agreement)
CDFW	California Department of Fish and Wildlife
CEQA	California Environmental Quality Act
CFS	Cubic feet per second. One cubic foot is about 7.5 gallons.
CII	Commercial, Industrial, and Institutional water users/uses
CVP	Central Valley Project
CVPIA	Central Valley Project Improvement Act
DAC	Disadvantaged Community
DFW	California Department of Fish and Wildlife
DOFA	Declaration of Full Appropriation
DM	Demand Management (water conservation practices)
DPMWD	Del Paso Manor Water District
DTA	Dry Time Actions (element of the Water Forum Agreement)
DWR	California Department of Water Resources
EBMUD	East Bay Municipal Utility District
EDCWA	El Dorado County Water Agency
EID	El Dorado Irrigation District
EC	Environmental Caucus
ECOS	Environmental Council of Sacramento

FOR	Friends of the River
FIRO	Forecast-Informed Reservoir Operations
FMS	Flow Management Standard
FOR	Friends of the American River
GFA	Governance, Funding, and Administration Program Area
HME	Habitat Management Element (of the Water Forum Agreement)
HR&L	Healthy Rivers and Landscapes Program (also known as Voluntary Agreements)
LAFCo	Local Agency Formation Commission
LAR	Lower American River
LOWV	League of Women Voters
M&I	Municipal & Industrial
mFMS	Modified Flow Management Standard
MGD	Millions of Gallons Per Day
MOU	Memorandum of Understanding
NASb	North American Subbasin (groundwater)
NEPA	National Environmental Policy Act
NSC	Negotiating Steering Committee
PC	Public Caucus
PCWA	Placer County Water Agency
PSA	Purveyor Specific Agreement
Reclamation	U.S. Bureau of Reclamation
RWA	Regional Water Authority
SACOG	Sacramento Area Council of Governments
SAFCA	Sacramento Area Flood Control Agency
SARA	Save the American River Association
SASb	South American Subbasin (groundwater)
SB	Senate Bill
SCGA	Sacramento Central Groundwater Authority
SCWA	Sacramento County Water Agency
SDAC	Severely Disadvantaged Community
SGA	Sacramento Groundwater Authority
SJWD	San Juan Water District
SME	Subject Matter Expert

SRBX	Sacramento Regional Builders Exchange
SWRCB	State Water Resources Control Board
TAF	Thousand Acre Feet
TUCP	Temporary Urgent Change Petitions
UIFR	Unimpaired Inflow into Folsom Reservoir
USACE	U.S. Army Corps of Engineers
USBR	U.S. Bureau of Reclamation
USEPA	U.S. Environmental Protection Agency
USFWS	U.S. Fish and Wildlife Service
UWMP	Urban Water Management Plan
VAs	Voluntary Agreements
WC	Water Caucus
WF	Water Forum
WF2050	The current Water Forum Agreement
WFA	Water Forum Agreement
WFSE	Water Forum Successor Effort (relevant terms from original WFA)
WG	Working Group
WSCP	Water Shortage Contingency Plan (component of Urban Water Management Plans)
WSS	Water Supply Sustainability Program Area

Appendix 13: Interagency Agreement for Water Forum Administration

Appendix 1: Advancing the Seven Elements of the First Water Forum Agreement

The first Water Forum Agreement (WFA), signed in the year 2000, included seven key elements that represent the strategies members used to meet the coequal objectives of water supply reliability and environmental stewardship. Over the past 20 years, these strategies shaped water management in the Sacramento region, addressing both immediate needs and long-term sustainability.

1. Increased Surface Water Diversions
2. Dry Year Actions
3. Flow Standard
4. Habitat Management
5. Water Conservation
6. Groundwater Management
7. Water Forum Successor Effort (WFSE)

The WF2050 Agreement restructures the original seven elements into five program areas. The following section outlines the original seven elements from the first WFA and highlights the progress made under each.

1. Increased Surface Water Diversions

The first WFA detailed plans to increase surface water supplies from rivers to support Sacramento's anticipated population and economic growth through 2030. Recognizing that conservation and sustainable groundwater use alone would not meet projected future demand, the agreement specified the amount of surface water each provider would divert during average, wet, dry, and very dry years, as well as the necessary infrastructure and projects to meet customer demand. Additionally, the agreement included emergency flow strategies to protect salmon and steelhead, as well as measures to reduce river water demand by shifting to groundwater and enhancing conservation efforts.

Progress: This element played a crucial role, alongside the WFA's Groundwater Management strategy, in restoring the region's groundwater basin to sustainable levels. By committing to increased surface water use during wet times, water providers allowed groundwater levels to recover. Over the past 20 years, regional groundwater levels have stabilized or risen in many areas.

For example, the Sacramento County Water Agency (SCWA), which was once completely dependent on groundwater, increased its surface water use by 29 percent in 2023 compared to the previous year, thanks to the Freeport Water Intake, a project outlined in the WFA. This shift stored approximately 10,220 acre-feet of groundwater in aquifers, enough to meet the annual needs of over 30,600 households.

2. Dry Year Actions

The "Dry Year Actions" section of the WFA was designed to help ensure sufficient water supplies during dry years for people while also protecting the environment of the American River. The agreement outlined increased water diversions from the American River in wet and average years, but during dry years, water providers agreed to reduce these diversions to protect fish, wildlife, and recreation on the river. To compensate for reduced river water in dry years, water providers planned to use strategies such as increasing groundwater use, re-operating reservoirs, increasing conservation, and utilizing recycled water. Each provider had specific targets for reducing river water use in dry years, which were detailed in the agreement.

Progress: This element was successfully tested over the years and particularly during California's extreme drought in 2014-15. Members worked together to reduce demands on the river by increasing groundwater use, boosting water conservation efforts, and reoperating reservoirs upstream of Folsom Reservoir. Through the Water Forum's Dry Year Conference, members also worked together to advise the U.S. Bureau of Reclamation on emergency flow strategies for Folsom Reservoir, aiming to minimize harm to salmon and steelhead as water levels in the lower American River reached historic lows.

3. Flow Standard

The WFA included plans to establish a new flow standard for the lower American River that would improve water releases to better support fish, especially fall-run Chinook salmon, while also preserving water storage in Folsom Reservoir to safeguard against drought.

Historically, water releases from Folsom Dam did not align with the fish's life cycle, negatively impacting the fishery. To address this, a team of fish biologists and experts from agencies such as the U.S. Fish and Wildlife Service and the California Department of Fish and Wildlife collaborated with the Water Forum to design a release pattern that prioritized the needs of the fish, while still meeting the reservoir's water supply and flood control objectives.

This new approach involved reducing summer flows to conserve water for increased releases in the fall, to provide better water conditions for salmon. The plan also included flexibility for adjustments based on real-time environmental needs.

Progress: In 2006, the Water Forum published the first Flow Management Standard (FMS) for the lower American River. The FMS utilizes the best available science to establish targets for minimum river flows and cold-water storage at Folsom Reservoir, aiming to preserve water storage, mitigate drought impacts, and enhance water temperature in the Lower American River for the benefit of salmon and steelhead. Since then, this science-based methodology has evolved with advancements in modeling and technical analysis, as well as real-world experience. After nearly 20 years of study and refinement, the Modified FMS is now recognized as the best path forward for protecting and restoring steelhead and fall-run Chinook salmon in the lower American River, while enhancing local water supply reliability without adverse impacts elsewhere in the state.

The Modified FMS is integrated into the most recent federal Biological Opinion, guiding the operation of Folsom Reservoir. To further support its understanding and implementation, the Water Forum is working on a consolidated version of the methodology for reference by the U.S. Bureau of Reclamation and other state and federal agencies.

Moreover, the Water Forum's science and habitat work positioned the region to successfully negotiate a voluntary agreement with the State Water Resources Control Board as part of the Healthy Rivers and Landscapes (HR&L) Program. This agreement incorporates the flow management standard in combination with habitat enhancement and increased river flows during dry years.

4. Habitat Management

The Habitat Management Element (HME) of the WFA focused on preserving the fishery, wildlife, recreational, and aesthetic values of the lower American River. The LAR Salmonid Habitat Enhancement Projects are at the core of the program, largely supported by federal funding through the Central Valley Project Improvement Act (CVPIA) and State of California funding. Key HME projects included habitat enhancement for salmon and steelhead, such as constructing spawning and rearing habitats. The element also focused on scientific research to better understand how river operations and enhancement efforts affected fish migration. The HME also specified collaboration with partners, including co-convening the Lower American River Task Force with the Sacramento Area Flood Control Agency and supporting water-related education.

Progress: The Water Forum's contribution to the lower American River environment is unmatched. No other organization invests in the lower American River environment like the Water Forum. With support from local, state, and federal partners, it has invested over $38.8 million in habitat improvement and public education since 2000. These efforts include constructing more than 30 acres of spawning beds and 1.2 miles of side channels to support salmon and steelhead rearing.

The pace of the Water Forum's habitat enhancement work has accelerated significantly over the past five years. In 2020, the Water Forum secured $5 million in Prop 68 funding from the State to support the early implementation of the Healthy Rivers and Landscapes Program (HR&L). This funding complemented existing program resources, enabling faster, larger-scale implementation. The Water Forum focused on refining designs, conducting necessary analyses, and implementing phased construction at each of the 10 approved habitat project sites. Additionally, the Water Forum assessed other potential habitat enhancement sites along the lower American River and advanced multi-benefit projects, such as the naturalization of Cordova Creek.

The Water Forum employs a science-based approach to habitat improvement and monitoring, linking each study to specific goals that support adaptive management. This work supports decisions related to the FMS and evaluates the feasibility of future habitat enhancement projects. With a changing climate, this program has become increasingly vital.

Moreover, the Water Forum has contributed to the scientific understanding of anadromous fish in the lower American River through studies that produce underwater maps and monitor salmon behavior during drought. These studies help identify locations for habitat enhancement that avoid impacts to flood safety. Years of adaptive management have allowed the Water Forum to refine conditions for optimal salmon spawning, such as gravel depth, flow rate, and substrate size, advancing sustainable habitat practices for the river.

The Water Forum's scientific work has earned it a place as a trusted regional voice among state and federal agencies overseeing Folsom Reservoir and the statewide water system. This work has enabled the Water Forum to provide consensus-based recommendations on critical issues, including temperature modeling, fisheries, and hydrology.

5. Water Conservation

Under the first WFA, water providers committed to comprehensive conservation plans to meet regional water needs while reducing reliance on both groundwater and surface water, including diversions from the American River. Initially, providers followed the 2000 Water Conservation Plans specified in the WFA, with a focus on maximizing conservation in a way that was accountable, measurable, and effective. Later, they adopted Best Management Practices (BMPs) under the guidelines of the California Urban Water Conservation Council (CUWCC) as a means of meeting the state's water conservation requirements to reduce per capita water use by 20 percent by 2020. These requirements had been mandated by Senate Bill x7-7 of 2009, which created the 20 x 2020 program.

Progress: The WFA led to the creation of the Regional Water Authority and its Water Efficiency Program. For over two decades, this program has engaged local water providers in a regional strategy to conserve local water resources, share best practices, and pool resources to maximize impact and meet state requirements. Working together, participants have leveraged funds with other regional utilities, increased economies of scale for securing grants, and optimized advertising dollars for extensive customer outreach. The program also runs a regional school education initiative and manages the customer-focused website BeWaterSmart.info, which promotes water-saving practices across the region.

This award-winning program empowers members to optimize their investments in water efficiency and capitalize on available grant opportunities. Since 2003, it has successfully secured nearly $19.9 million in competitive grants to support outreach, advertising, rebate programs, and services that would be challenging for individual agencies to implement independently. Since 2013, local water use has decreased by 23 percent, despite a 15 percent increase in population. This strong regional effort has positioned local water providers to meet the new *Making Conservation a California Way of Life* standards set by the State Water Resources Control Board, pursuant to the water conservation legislation adopted in 2018.

6. Groundwater Management

The Groundwater Management Element focused on protecting the region's groundwater resources, which supply about half of the region's annual water supply. The goal was to help ensure that groundwater remains available for future generations while balancing its use with that of surface water supplies.

As part of the WFA, the region established several local agencies, such as the Sacramento Groundwater Authority (SGA) and Sacramento Central Groundwater Authority (SCGA), to monitor groundwater use and implement a conjunctive use program, a strategic approach to managing groundwater that combines the planned use of both surface water from lakes and rivers and groundwater via wells. The practice optimizes water availability in the region over the long term even as the climate changes.

Progress: The WFA provided a crucial collaborative foundation essential to developing the Sacramento region's successful conjunctive use program. Over the course of two decades, this program enabled the once-overdrafted North American Subbasin to recover and reach sustainable levels, while also providing a path for water providers to reduce their reliance on the river during critical habitat periods for endangered fish.

The SGA was a pioneer in groundwater management and served as a model for the Sustainable Groundwater Management Act (SGMA), California's landmark law passed in 2014 to safeguard California's groundwater resources for the long term.

SCGA has also played a critical role in implementing sustainable groundwater management in the South American Subbasin. One of the most significant efforts underway in this area is the Harvest Water project, California's largest agricultural water recycling initiative, led by the Sacramento Area Sewer District (SacSewer).

SGMA required local agencies to establish Groundwater Sustainability Agencies (GSAs) and develop and implement Groundwater Sustainability Plans (GSPs) for more than 100 high- and medium-priority subbasins statewide. In the greater Sacramento region, local agencies formed multiple GSAs for the North and South American Subbasins. They were well-positioned to develop GSPs for these subbasins, which were subsequently adopted locally in 2022 and approved by the DWR.

7. Water Forum Successor Effort

The Water Forum Successor Effort (WFSE) was established to guide the ongoing implementation and adaptation of the WFA through 2030. It provides a structured approach to addressing emerging issues, adapting to policy changes, and maintaining continued collaboration among interested parties.

The WFSE was designed to emphasize cooperative problem-solving, requiring participants to engage collaboratively, respect diverse viewpoints, and work toward mutually beneficial

solutions. The Agreement also established that all parties involved would participate on equal footing within the WFSE.

Under the structure outlined in the WFA, the City-County Office of Metropolitan Water Planning oversees the WFSE, funded through agreements with member agencies, primarily water providers. Representatives of member agencies set policy direction, while staff, managed by the City of Sacramento, carry out the work of the WFSE.

Progress: The framework for the WFSE is a hallmark of the Water Forum process and WFA. It has allowed immediate focus on new issues, provided members with flexibility to realign when necessary, and helped sustain trust and momentum throughout the decades of implementation. Membership has remained stable, with many signatories of the first WFA still actively involved. New participants continue to join, strengthening the collaborative framework established in the first WFA.

Appendix 2: ARCAP Two-Year Workplan

SCOPE OF WORK

This workplan describes the intended activities related to the Water Forum American River Climate Adaptation Program (ARCAP) for the first two years of implementation. The focus for the first two years will include confirming the priority issues for resolution, establishing data, tools, and methods for evaluation, conducting analyses, and is also expected to include trial operations. The work will be phased to align with the approved Water Forum budget for the 2026 Fiscal Year (FY) and includes a Progress Report and an opportunity for workplan refinement after the first year. The budget presented within this work plan only includes the activities identified for the first year. The second-year activities and budget will be refined based on the progress made in year one.

ARCAP TASKS

The Work of ARCAP will be organized into the following tasks. Some of these tasks will take place simultaneously and are not necessarily sequential.

Task 1: Water Forum Member Coordination (ongoing)

An ARCAP Working Group will be created to inform and guide the activities of the ARCAP. The Working Group will be co-convened with the Water Forum and RWA, will include two members from each caucus as primary representatives, and will be open to all Water Forum members. The primaries will commit to making reasonable efforts to attend all working group meetings and to review related materials prior to the meetings. The primaries will also be expected to act as representatives of their caucuses by reporting ARCAP progress to the caucus and providing feedback to the Working Group on matters affecting the caucus. The ARCAP working group will be tasked with:

- Reviewing and commenting on work products
- Providing input on program direction, scope, and pace
- Deliberating, refining, and providing answers to ARCAP Questions

Meetings will be held monthly and supported by facilitation staff, with the option of additional meetings as necessary.

The Working Group decisions and recommendations (including answers to ARCAP Questions) will be developed by consensus and will be presented to the Plenary for approval. This process is consistent with the decision process as defined in the Water Forum Agreement 2050.

Task 2: Refine and Focus ARCAP Questions

The initial list of questions associated with the ARCAP program was identified in the Water Forum 2.0 negotiations. The list is extensive and reflects the broad interests of the Water Forum Members (see ARCAP agreement language, Program Element 1). The key questions to be addressed within the first two years of ARCAP implementation will be refined and agreed upon by

the ARCAP Working Group within the first three months of this two-year work plan. It is acknowledged that as ARCAP is implemented, the questions to be answered will evolve, be refined, and re-prioritized as necessary.

Task 2 Deliverable: *Refined list of questions to be addressed within the two-year work plan, building from ARCAP Program Element 1.*

Target Schedule for Completion: *Early 2026*

Task 3: Regional Data Collection and Synthesis

This task will be divided into two sub-tasks, with the first centered on collecting and synthesizing information directly from Water Forum purveyors, and the second focused on organizing and preparing data and information for the Technical Analysis (Task 4).

Subtask 3.1 Regional Water Purveyor Data Collection and Synthesis

Water Forum staff and consultants will coordinate with regional purveyors to identify operational scenarios that address various questions defined in Task 2. The information to be collected about these scenarios will include specific types of transactions that could be implemented to provide measurable quantities of water that could meet the program objectives. The information will be synthesized to provide a regional perspective, illustrating the best opportunities for ARCAP *Water* to be generated and tracked.

This activity is expected to be done in an iterative manner. Initially, the information collection will focus on identifying operational opportunities and constraints for potential ARCAP actions. Later information collection activities will involve more quantitative information on facility capacities, water demands, and available supplies. This information will be used to refine and answer ARCAP Questions related to the potential performance, rules, or structure.

Data synthesis will involve summarizing and packaging the information into regional overviews, highlighting and illustrating potential ARCAP opportunities. In many cases, WF staff will prepare draft syntheses for consideration and deliberation by the ARCAP Working Group.

Subtask 3.1 Deliverable: *Regional Supply and Operations Synthesis Report*

Target Schedule for Completion: *Summer 2026*

Subtask 3.2 Other Regional Data Identification, Organization, and Preparation

Water Forum staff, with input and guidance from the ARCAP working group, will work to collect and organize data and tools for technical analyses, which are expected to begin in the second year of the ARCAP program. Activities related to subtask 3.2 are outlined below:

- Review and consideration of existing analyses and information
    - Acknowledging the possibility that some ARCAP questions may be answered by other efforts, consideration will be given to opportunities to align analyses with other regional efforts, including efforts by Groundwater Sustainability Agencies (GSAs) and the Regional Water Authority (RWA).
- Define Baseline
    - A baseline will be established for evaluating program effectiveness.
- Identify operational scenarios for evaluation.
    - To be informed by the outcomes from Subtask 3.1 (*Regional Water Purveyor Data Collection and Synthesis*), which the ARCAP Working Group will review.

Subtask 3.2 Deliverable: *ARCAP Data and Approach Summary Document*
Target Schedule for Completion: *Fall 2026*

Task 4: Technical Analyses

This task may include the following activities and will depend on the outcomes of Tasks 2 and 3, and ultimately, the extent of further analysis that is recommended by the working group and approved by the Plenary. The list below provides a preliminary outline of how the work may be organized, which will be refined by the working group.

- Identify hydrologic scenarios for evaluation.
    - It will be informed by relevant regional and statewide climate modeling and will be reviewed by the ARCAP Working Group.
- Identify and prepare tools.
    - Tools considered for further evaluation will include those capable of analyzing trends and conditions for surface water, groundwater, water temperatures, water distribution analyses, etc.
    - Selection of tools will be reviewed by the ARCAP Working Group.
- Conduct Analyses
    - Operational and hydrologic scenarios will be analyzed, and results will be reviewed and discussed with the ARCAP Working Group at various stages.

Deliverable: *ARCAP Technical Analysis Report(s)*
Schedule for Completion: *TBD*

Task 5: Trial Operations and Tracking

It is expected that opportunities may arise to implement certain ARCAP operation scenarios during the first two years of implementation, potentially while technical analyses are still pending. Within Water Forum 2050, it is acknowledged that sources for ARCAP Water will include existing sources and may include operations that are currently being conducted. The ARCAP will provide a mechanism to account for and track the outcomes of these regional activities. Based on the findings of Task 3 (*Regional Data Collection and Synthesis),* opportunities for early trial runs will be identified and considered by the ARCAP Working Group.
As trial runs are performed, individual reporting will be completed on the outcomes of the specific activities.

Deliverable: *Memo(s) reporting results of early trial runs*
Schedule for Completion: *TBD*

Task 6: Synthesis and Documentation

This task will involve synthesizing and documenting all ARCAP activities and analyses. Key reporting is listed below; other documentation may be identified after the first-year progress report.

Year One Documentation

- Year One Progress Report
    - Summarize all activities completed and outcomes for the first year
    - Identify areas for refinement for the second year

Year Two Documentation (tentative)

- Two-Year Report and Recommendations
  - Summarize all activities completed and outcomes
  - Recommend next steps and activities for the ARCAP program. These recommendations will be developed with the ARCAP Working Group.

Task 7: Engagement with Partners (ongoing)

Engagement with ARCAP partners will be ongoing during the entire two-year work plan. Engagement will include regular meetings, coordination, and strategic messaging based on the status of ARCAP activities and the specific partner. Engagement will be guided by input from the ARCAP Working Group. Expected ARCAP partners are listed in the ARCAP Agreement language.

SCHEDULE

Pending: To be added and will reflect the schedule described in the Tasks above after the WF2050 agreement is finalized.

YEAR ONE BUDGET

The budget below reflects the expected costs for the first-year activities of this work plan, including consultants (hours and estimated costs), and indicates the expected level of effort for Water Forum staff (hours and percentage of time for one full-time employee [FTE]). Note, year two costs will be developed as part of the Year One Progress Report.

ARCAP Workplan - Year One Budget

			Consultants			
	WF Staff (1 FTE)		Technical		Facilitation	
	Hours	***% Time for Year One***	***Hours***	***$***	***Hours***	***$***
Task 1: Water Forum Member Coordination	72	3.5%	90	$27,000	84	$21,000
Task 2: Refine and Focus ARCAP Questions	20	1.0%	5	$1,500	10	$2,500
Task 3: Regional Data Collection and Synthesis	150	7.2%	150	$45,000	0	$0
Task 4: Technical Analyses[a]	--	--	--	--	--	--
Task 5: Trial Operations and Tracking[a]	--	--	--	--	--	--
Task 6: Synthesis and Documentation	40	1.9%	15	$4,500	0	$0
Task 7: Engagement with Partners	50	2.4%	20	$6,000	0	$0
Total	***332***	***16.0%***	***280***	***$84,000***	***94***	***$23,500***

a. Task 4 and 5 are expected to be initiated in year two of ARCAP implementation and costs will be developed as specifics for the associated activities are refined

Appendix 3: Engagement with the US Bureau of Reclamation

The Water Forum's ongoing engagement with the U.S. Bureau of Reclamation (Reclamation) has been and will continue to be key to supporting the coequal objectives. The operations of Reclamation at Folsom Reservoir play a critical role in maintaining the health of the lower American River and ensuring the reliability of regional water supplies. By carefully managing water releases from Folsom Dam, Reclamation helps maintain flow conditions that support aquatic ecosystems, including the habitat needs of species like the Central Valley steelhead and Chinook salmon. These operations are also essential for balancing water supply demands for agricultural, municipal, and industrial use in the Sacramento region, especially during periods of drought or fluctuating hydrological conditions.

DESIRED OUTCOMES

The Water Forum will continue to engage and coordinate with Reclamation through various mechanisms and forums and will pursue the following outcomes in efforts to support both coequal objectives. The signatories' shared commitment to the stated outcomes will enhance the region's ability to adapt to and meet the challenges of climate change.

1. Implementation of the Flow Management Standard (FMS), reflective of the latest data, science, and understanding.
    a. This includes all features of the FMS (storage targets, minimum flows, temperature protocols, etc.).
2. Reduce regional risks associated with critically low storage in Folsom Reservoir.
3. Leverage regional actions to support healthy conditions on the LAR and regional water supply reliability.
4. Representation of LAR interests in the development and sharing of best available data, science, and methods in regional and statewide collaborative planning and monitoring efforts.
5. Secure funding for habitat planning, implementation, and monitoring efforts on the LAR.
6. Improvements to infrastructure at Folsom and Nimbus dams necessary to support conditions on the LAR.
7. Balanced considerations for American River interests within broader CVP operations, and the regulatory processes to develop operational plans.

In pursuing these outcomes, Water Forum members will coordinate internally to ensure that messaging and communication are consistent and aligned with the interests of all four caucuses.

MECHANISMS FOR ENGAGEMENT

The list below provides an overview of current and planned mechanisms for engagement. This list is likely to change over time.

- Water Forum and Reclamation Memorandum of Understanding (MOU)
    - "*Coordination of Communication and Information-Sharing Activities Related to Lower American River Operations*"
    - Water Forum intends to work with Reclamation to maintain the current MOU and to seek opportunities to update the MOU as needed.
- American River Group (ARG)
    - Monthly meetings with stakeholders on the lower American River to discuss current conditions and planned operations.
    - Key participants include Reclamation, CDFW, NMFS, and Water Forum.
- Monthly cross-caucus meetings with Reclamation
    - Conversations scheduled prior to the ARG meetings provide an opportunity for members to have a more informal discussion with Reclamation.
    - Focused on real-time operations, management, constraints, and forecasts.
- Weekly staff meeting with WF and Reclamation
    - Staff hold weekly staff-to-staff meetings to check in on near-term items.
- Convening LAR Salmonid Habitat Agency Technical Advisory Committee (TAC)
- Participating in and supporting the Central Valley Program Improvement Act, Science Integration Team (CVPIA SIT)
    - Structured Decision-Making and Near-Term Restoration Strategy Guidance
- HR&L Program Participation and Collaboration
- Ongoing Data Sharing
    - Two-way sharing of data and information, including:
        - Latest forecasts
        - Conditions
        - Operations decisions
        - Modeling
        - Fisheries and physical conditions data
            - Utilization of accepted public data venues such as the EDI portal

Appendix 4: List of Temperature Management Projects and Programs

This will be a living document.

			Ways to Support Coequal Objectives Through Partnership			
Project/Idea	Type	Location	*Advocacy or Coordination*	*WF Member Resources*	*WF Staff Time*	Notes
Upgrade of Temperature Control Shutters	Project	Folsom Dam	x		x	35% design is complete, and funding is secured for the remaining design and implementation
Access cold water below the power penstocks	Idea	Folsom Dam				Elephant's Trunk, additional powerhouse on lower outlets, power bypass, etc.
Lake Natoma Temperature Curtain	Idea	Lake Natoma				link

Appendix 5: ARCH Program Planning Matrix

See the following page.

				Water Forum Led Efforts Current Funding Mix (%)	
Category	Subcategory	Action/Idea	Other Opportunities "Outer Container"	*Grants **	*HME Operating Fund**
Habitat + Education	LAR Salmon Habitat	LAR Spawning and Rearing Program Build + Maintain**		99	1
Habitat + Education	LAR Salmon Habitat	LAR Rearing Site Planning (RM 0-23)		None	None
Habitat + Education	Parkway Multibenefits	New LAR tributary restoration projects: Carmichael Creek, Buffalo Creek (43)		None	None
Habitat + Education	Parkway Multibenefits	LAR Tributaries (ex. Cordova Creek – Phase 2 Design)		75	25
Habitat + Education	Parkway Multibenefits	LAR Tributaries (ex. Cordova Creek – Ph. 3 Permit + Construct)		None	None
Flows and Ops Decision-Support	Temperature	LAR Temperature Modeling. Conduct temperature Modeling, QA/QC, Temperature Management Plan Review, and support Cross-Caucus and ARG discussions (inform seasonal operational and power bypass)		*85*	*15*
Flows and Ops Decision-Support	Hydrologic Conditions	LAR FMS. Weekly review of river conditions, MRR calculations and forecasting; meetings with Reclamation, and Cross-Caucus to inform operations occur per our FMS.		*0*	*100*
Flows and Ops Decision-Support	Water Quality	Dissolved Oxygen Continuous Monitoring Pilot Study. Documenting/analyzing continuous DO concentrations below Nimbus Dam, and at Watt Avenue, which is the regulatory compliance point for LAR temperatures. This work will inform our understanding of diurnal and seasonal		*0*	*100*
Science & Monitoring	Temperature	Cordova Creek temperature monitoring. Assists with project planning and baseline conditions understanding – a longer term dataset informs site understanding and illustrates commitment of Water Forum to defensible science when applying for next phase grant funds.		*0*	*100*
Science & Monitoring	Adaptive Management	Gravel Monitoring and Maintenance Plan/Tracking. Required by regulators for continued programmatic authorization of salmon habitat program site implementation (gravel projects)		*100*	*0*
Adaptive Management	Habitat	5-Year LiDAR/top/2D Model Update. Necessary to document change in the LAR bed and banks as a result of typical flows, high flows, and habitat projects. Understanding how the river changes over time informs future design.		*100*	*0*
Science & Monitoring	Adaptive Management	Aerial salmonid redd surveys. Measure Habitat Project Effectiveness, Adaptive Management and Project Planning. Understand effectiveness of project via salmon utilization and comparison of site utilization patterns over time. Expensive but more cost-effective than in-river surveys – covers LAR from Nimbus to confluence.		*100*	*0*
Science & Monitoring	Adaptive Management	In-river salmonid redd surveys. Understand effectiveness of project via salmon utilization. Required by granting agency for funded projects. Cost-prohibitive to conduct for whole river.		*100*	*0*
Science & Monitoring	Adaptive Management	Snorkel (juvenile) surveys. Understand effectiveness of project via salmon utilization. Required by granting agency for funded projects. Cost-prohibitive to conduct for whole river.		*100*	*0*
Science & Monitoring	Adaptive Management	Off-Channel rearing and Growth Study. Understand current extent/effectiveness and inform future need and spatial extent of rearing habitat.		*98*	*2*
Science & Monitoring	Adaptive Management	Emigrating Salmonid Habitat Estimation (ESHE) Model Update. Utilize results from Off-Channel rearing and Growth Study to inform future rearing habitat implementation		*98*	*2*
Science & Monitoring	Adaptive Management	Genetic Mark-Recapture Study. Understand and directly measure production of juvenile fish from habitat sites. Measure Habitat Project/Program Effectiveness Adaptive Management and Project Planning		*98*	*2*
Science & Monitoring	Adaptive Management	Otolith Salmonid Life History Study. Understand behavior and life history of naturally spawning Chinook in LAR and how different water year types influence out-migration timing.		*98*	*2*
Habitat + Science		Statewide Voluntary Agreements. Science Committee, Habitat Planning, Funding, Implementation, Tracking, Accounting and Science Plan Development. Ensure VA implementation and accounting leverages Water Forum's existing and planned program activities appropriately.		*0*	*100*
Habitat + Education	Upper Watershed	Forestry/Watershed health projects (13)	X		
Habitat + Education	Parkway Multibenefits	Improve Riparian Corridor (38a): Protect existing resources – flow/misuse of Parkway

Habitat + Education	Partnership	Mitigation Coordination American River Common Features (SAFCA/USACE)		None	None
Habitat + Education	LAR Salmon Habitat	Support local funding for spawning and rearing areas in the LAR (46)			
Hatchery	Advocacy	Nimbus Fish Hatchery Management and Operations	X	None	None
Hatchery	Advocacy	Nimbus Hatchery genetics/measurement. Increased survival of salmonids (40)	X		
Hatchery	Advocacy	Improve survival rate of hatchery releases (timing and location of releases) (56)	X		
Hatchery	Advocacy	Support the creation of a WF team to evaluate the operation of the Nimbus Hatchery to better support the genetics of river-spawning salmonids and to improve the survival skills of hatchery-raised salmonids. (62)	X		
Habitat + Education	Upper Watershed	Introduce Salmon above Folsom (47)	X		
Science & Monitoring	Tracking/Reporting	Coequal objectives with metrics specific to LAR (39)			
Habitat	Vegetation	Management/Removal of hydrophilic vegetation along the LAR (Spanish Broom, Yellow Star Thistle, Giant Reed (Arundo donax)		100	0
Habitat	Vegetation	Plant pollinator habitat vegetation on electrical right of ways within the LAR			
Recreation	Flows	Provide for recreational (rafting flows) during the period of most use.			
Recreation		Provide (through donations or outright purchase) webbed garbage bags for each raft			
Recreation	Trails	Provide support to Sac County for recreational trail management; specifically restoration of social trails along the LAR.			
Habitat	Fishery	Identify locations off, and fill in side channel stranding pools.			
Flows and Ops	Temperature	Identify use, management and efficiency of EID Temperature Control Device			
Flows and Ops	Temperature	Identify use, management and efficiency of San Juan/Roseville Temperature Control Device located at their water supply intake.			

Appendix 6: Declaration of Full Appropriation

The WF2050 negotiations included the formation of a subgroup tasked with the review, assessment, and discussion of commitments made in the original Water Forum Agreement related to the existing declaration of full appropriation on the Lower American River. Based on the review and discussion, the subgroup is not recommending the Water Forum pursue an amendment to the Declaration of Full Appropriation (DOFA) in Water Forum Agreement 2050. The explanation follows:

Fully appropriated stream systems are those where there is insufficient supply for new water right applications, either during certain months or conditions, or all year long. The program is administered by the State Water Resources Control Board (SWRCB). SWRCB, which administers major parts of California's water rights system, does not accept applications for new water rights on fully appropriated streams, except in certain specified circumstances. [63]

The subgroup confirms their understanding that the American River's current status as a fully appropriated stream helps reduce potential new competition for scarce water supplies to the benefit of existing rights holders and water users, as well as public trust watershed resources. The status is therefore a positive one.

The subgroup notes that the SWRCB does not administer the fully appropriated streams program to affect existing water rights and contracts, or applications for assignment of state filings or for rights under the state's Area of Origin protections such as might be made by one or more of the Water Forum 2050 negotiation participants, as provided for by SWRCB orders.[64]

In the SWRCB's administration of its fully appropriated streams system and its responsibilities under the California Wild & Scenic Rivers Act and realities of the National Wild & Scenic Rivers Act designations in California, SWRCB has issued orders that state or federal wild & scenic river designations result in twelve-month declarations of full appropriations on the designated reaches. SWRCB orders also state that any declaration that a stream system is fully appropriated encompasses all upstream sources that contribute to the stream system if such upstream sources are hydraulically continuous to the stream system.

Thus, the existence of insufficient unappropriated supply at times in the American River watershed and the wild & scenic river status of the lower American River is expected to constrain the acceptance and processing of new water right applications outside of the specified exceptions.

Thus, the subgroup sees little utility in recommending that amendments to the existing declarations of full appropriations be sought in Water Forum 2050.

[63] https://www.waterboards.ca.gov/waterrights/water_issues/programs/fully_appropriated_streams.
[64] SWRCB Order WR 98-08 (in response to a petition to reconsider Order WR 89-25, the SWRCB adopted Order WR 90-2 on February 15, 1990. Order WR 90-2 modified and affirmed Order WR 89-25 as modified).

Appendix 7: Bridge to the Regional Groundwater Sustainability Agencies and Water Forum 2050

The purpose of this appendix to the Water Forum Agreement is to address the relationship between groundwater management entities and the Water Forum Agreement. The Water Forum Agreement, initially signed in 2000 and revised in 2015, includes a Groundwater Management Element (GME).

In 2014, the State of California passed the Sustainable Groundwater Management Act (SGMA), which created the foundation for the sustainable management of the state's groundwater basins/subbasins. Under SGMA, to avoid potential state intervention and state control of groundwater, local agencies can signal to the State their intention to form as Groundwater Sustainability Agencies (GSA) to locally manage groundwater within each subbasin. As required in SGMA and newly completed regulations, GSAs prepared, adopted, and began implementing Groundwater Sustainability Plans (GSPs) within subbasins throughout the state.

In the Sacramento County portion of the North American subbasin, the Sacramento Groundwater Authority (SGA) serves as the GSA governed by a joint powers agreement (JPA). SGA works collaboratively with four other GSAs in the subbasin to implement the North American Subbasin GSP.

In the South American subbasin, there are currently seven GSAs working collaboratively to implement the South American Subbasin GSP. The largest GSA in the basin is the Sacramento Central Groundwater Authority or SCGA, which is governed by a JPA, and whose members are largely signatories to the Water Forum Agreement.

The Cosumnes subbasin includes seven GSAs and is governed by the Cosumnes Groundwater Authority (CGA). The CGA serves as the coordinating body for the Cosumnes subbasin GSAs, facilitating communication, data sharing, and the implementation of projects and management actions.

Because SGMA now defines the sustainability metrics of groundwater through the adopted GSPs, the sustainable yield listed in the original Water Forum Agreement is now obsolete. Also, because groundwater management in the three regional subbasins now includes parties that are not signatories to Water Forum 2050, it is important to define the intersection between regional groundwater management and the Water Forum.

The signatories to the Water Forum who are also members of the SGA JPA and the SCGA JPA recognize the shared goal of managing groundwater resources in Sacramento sustainably.

The signatories also recognize the importance of transparent governance and the sharing of information related to groundwater management.

The signatories remain committed to conjunctive use as defined in the original Water Forum Agreement as the balanced use of groundwater and surface water. Conjunctive use prioritizes the use of surface water during wet times and prioritizes groundwater during dry times. The signatories agree that the Sacramento Regional Water Bank will help expand and formalize the practice of conjunctive use.

Appendix 8: WSS Demand Management Actions

Acknowledging that each Water Forum purveyor must consider the timing and level of effort required for each potential demand management action in relation to their opportunities and constraints, the list below is provided as a reference for consideration and is not intended to be any form of a mandate. The ability of each purveyor to identify the most effective demand management actions for their respective service area will be critical as the region endeavors to support the coequal objectives while meeting relevant targets and standards.

1. Create and implement policies and programs that convert publicly owned, commercial, and institutional landscaping to low-water use native landscaping that supports native pollinator, insect, bird, and animal species.
2. Implement staggered outdoor irrigation schedules for twice a week during summer (e.g., based upon a last digit of street address) for residential customers, and one day a week for commercial customers.
    a. Note: An exception would be needed for newly planted vegetation that requires additional water for healthy root development.
3. Expand and strengthen regional conservation messaging to amplify information about plant watering needs; encourage no irrigation during the cooler, wetter winter months and, in dry winters, significantly reduced irrigation due to lower transpiration rates during the non-growing season.
4. Provide rebates to all customers for indoor and outdoor WaterSense labelled products.
5. Implement programs to identify water users that are using excessive amounts of water (well above the mandated objectives) and support those users in reducing excessive use through education and access to resources (i.e., rebates), as available.
6. Implement water rate structures to promote equity and encourage water conservation (tiered, decoupled, others).
7. Implement leak detection, notification and enforcement.
8. Strengthen and expand regional program(s) that retrofit rental and low-income housing with water efficient devices and landscaping.
9. Expand and strengthen landscape conversion education and incentive programs and emphasize low-water use native plants (which require less summer water and support native pollinator, insect, bird and animal species), and improvements to irrigation practices and systems which increase water-use efficiency.
10. Maintain and strengthen active water waste prevention programs, including public messaging and intervention steps when waste is observed physically or through meter data (i.e., leak alert programs, water waste hotlines).
11. Create messaging and other information programs to positively promote and support customer efforts to help suppliers implement state requirements.
12. Encourage the use of demand management measures such as reuse, gray-water, recycling, and rainwater-harvesting.
13. Establish and support programs targeting implementation of the Commercial, Industrial, and Institutional (CII) Best Management Practices (BMPs).

Appendix 9: Metrics and Reporting Development and Tables

See the following page.

Metrics and Reporting Development and Tables

This appendix provides summary tables of the data and documentation metrics used in the Water Forum metrics and reporting program element, and their respective categories and relevant program areas. The summary tables include the ARFO, ARCH, WSS, and GFA program areas. Metrics related to ARCAP will be developed as the program is launched and the members identify specific to metrics for long-term tracking and reporting. Contextual data are not featured in this appendix. That data is informative in terms of the status of the coequal objectives but is not necessarily indicative of the success of the Water Forum's activities. A figure and description of steps taken to develop the Water Forum Metrics and Reporting framework are identified in the figure below.

Figure 9.A. Steps taken for development of Metrics and Reporting framework

Each step is elaborated in detail as follows:

1. Review of Guiding Principles and Available Data: Guiding principles were reviewed along with available data and information, including existing data reporting mechanisms, to identify potential metrics applicable for each principle.
2. Determine Type of Metrics: An explanation was documented of whether these metrics were quantifiable data, or more qualitative and descriptive in nature (see the Types of Metrics explanation below).
3. Identify Overlaps and Efficiencies: Metrics were reviewed to determine potential overlaps, whereby a given metric could be tracked that demonstrates progress in supporting more than one Guiding Principle. These overlaps can also provide opportunities for efficiencies in reporting by reducing the overall total number of metrics that are tracked and reported.
4. Identify Reporting Mechanism: A potential form of reporting (e.g., Annual Report, Water Forum 2050 Five-Year Status Report, reporting during a standing meeting [Caucus, Plenary]) was identified for each metric. This step leveraged existing forms of reporting and existing venues for Water Forum member and staff engagement, rather than creating additional meetings. Similarly, this step supports providing progress updates that inform standing meetings and existing reporting processes and documentation.
5. Map Reporting Schedule: Metrics were reviewed to create an overall reporting and member engagement timeline that could be pursued within a given year to regularly communicate progress made in supporting the coequal objectives and implementing guiding principles.

			WF2050 Principles				Reporting Mechanism			
Category	Documentation Metric Decription	Coequal Objectives	ARFO	ARCH	WSS	GFA	Website	Annual Report	Meeting	5-Year Status Report
Water Quality	Nov-Feb river temperatures relative to upper tolerable thresholds for both species	X	X				✓	✓		✓
Water Quality	Mar-Oct river temperatures relative to upper tolerable thresholds for both species (where applicable)	X	X				✓	✓		✓
Water Quality	Maximum weekly average temperature (MWAT), and temperature on Nov 1. To be presented relative to peak spring/summer storage.	X	X					✓		✓
Water Quality	Dissolved Oxygen	X	X	X			✓		✓

Appendix 10: Water Forum and Department of Utilities MOU

See the following page.

Memorandum of Understanding for
Financial Services Provided to the
City County Office of Metropolitan Water Planning
(also known as the Water Forum)

The following are terms of mutual understanding of responsibilities between the Department of Utilities (DOU) and the City County Office of Metropolitan Water Planning (CCOWMP) as it relates to financial services for the CCOMWP. All parties have collaborated on the contents of this document and have agreed to follow this agreement. The terms of the memorandum will be reviewed on an annual basis to ensure the language is accurate and consistent with current operations. The Executive Director of the CCOMWP reports jointly to the City and County with the primary oversight provide by the Director of Utilities. However, neither DOU nor the CCOMWP is a separate legal entity. Therefore, this MOU does not legally bind the City of Sacramento, the City Council, the City Manager, or the City Manager's designee regarding any future conduct of either DOU or the CCOMWP.

The signatures below indicate the understanding by DOU and the CCOMWP to abide by the following terms and conditions of this document.

Pravani Vandeyar (Mar 6, 2025 20:50 PST)
Pravani Vandeyar, Director
Department of Utilities

Ashlee Casey (Mar 7, 2025 11:38 PST)
Ashlee Casey Interim Executive Director
City County Office of Metropolitan Water Planning

The CCOMWP Financial Goal Statement: Provide accurate financial reporting in accordance with the annual adopted budget that optimizes the use of financial resources and provides fiscal transparency.

Purpose for Services: DOU and the CCOMWP have agreed to enter into this interdepartmental services agreement for financial oversight provided by DOU to the CCOWMP for accurate financial reporting and fiscal transparency. The CCOMWP will dedicate one Administrative Analyst (position number 00042742) to DOU for these purposes. The assigned CCOMWP Administrative Analyst (position number 00042257) and Senior Staff Assistant will be the primary points of contact for the CCOMWP. DOU Fiscal Operations team members will provide support depending on the expertise needed to accomplish the individual tasks, in an effort to reduce funding impacts on the CCOMWP's annual budget. The DOU assigned CCOMWP Administrative Analyst (position number 00042742) will provide support to DOU to help offset costs to the CCOMWP. DOU will pay 90% and CCOMWP will pay 10% of the leave hours associated with this position.

Overview of DOU Services Provided: DOU Fiscal Operations Team will provide financial oversight, including the City annual budget and yearend deliverables, assist with accurate

financial reporting, and day-to-day fiscal oversight including all financial eCAPS approvals. DOU will also provide the following services:

Financial Services

Review, approve and provide assistance as needed with the preparation of the annual City budget deliverables for the CCOMWP, including, but not limited to, augmentations, net-zero adjustments, position moves, budget adjustments (including revenue, operating, and transfer adjustments), non-budgeted position report, fund analysis, five-year forecast, and Hyperion entry.

- Review, approve, and provide assistance as needed with the preparation of yearend deliverables as provided by Central Accounting for the CCOMWP. Including but not limited to coordinating project closures, grant roll forward reporting, grant compliance, reclassifying expenses as needed, review and report uncollected revenues, fixing overspent projects, p-card reconciliation, voucher payments, and preparation and/or approval of accounting journals and budget journals as needed for yearend closeout.

- Review and approve day-to-day, quarterly, and annual financial tasks as required for the adopted budget, including but not limited to quarterly projections, interfund reimbursements, accounting journals, revenue invoicing in eCAPS (grant billings and annual water purveyors), monitor doubtful accounts, etc.

- Review and approve budget journals, project requests, project closures, and status changes prepared by CCOMWP staff.

- Approve requisitions and payment vouchers in eCAPS to ensure accuracy, such as the correct budget lines, program codes/projects, sales tax, use tax, etc.

- Review and approve all grant billing packages, including all granting agency's required backup for invoicing requirements, and invoice processing in eCAPS. Grant billing should be completed on a regular basis and wherever possible in the same fiscal year as the expense occurred.

- Review and approve all training and travel requests in eCAPS and the Supervising Financial Analyst will approve in K2 prior to the DOU Director.

- Review and approve all council reports, including approval in Legistar.

- Other financial activities as needed and mutually agreed upon.

CCOMWP Deliverables: The CCOMWP will be responsible for the following tasks:

- Prepare and provide annual City budget deliverables including, but not limited to, augmentations, net-zero adjustments, position moves, budget adjustments (including revenue, operating, and transfer adjustments), non-budgeted position

report, fund analysis, five-year forecast, and Hyperion entry. The budget should align with the approved budget as presented to the Plenary and approved by the Executive Director.

- Prepare and provide yearend deliverables documents such as project closures, grant billing accuracy and compliance, support for uncollected revenue, preparing p-card reconciliations, and budget journals.

- Prepare and provide day-to-day, quarterly, and annual financial tasks as required for the adopted budget, including but not limited to quarterly projections, interfund reimbursements, accounting journals, revenue invoicing in eCAPS (grant billings and annual water purveyors), monitor doubtful accounts, etc.

- Prepare and input budget journals, new project requests, project closures, and project status changes in eCAPS for DOU approval.

- Obtain, negotiate, review all documentation from outside parties for contracts, change requests, and requisition requests.

- Provide travel and training documentation for processing.

- Executive Director or Designee will approve all requisitions, travel, and invoices in K2 for approval in eCAPS by DOU.

- Program Manager/Senior Engineer will lead the processes for requests for proposals, requests for qualifications, and contracts.

- Other support for financial activities as needed and mutually agreed upon.

Funding: The CCOWMP is responsible for funding the financial oversight provided by DOU and will provide one Administrative Analyst position (position number 00042742) to DOU through this MOU. This position will report to the DOU Supervising Financial Analyst and will be located in DOU (1395 35th Avenue, Sacramento, CA 95822). The costs associated with this position is included in the CCOWMP's annual budget.

The DOU Fiscal Operations Team will provide overall financial oversight with a team that includes one Supervising Financial Analyst, one Senior Accountant Auditor, one Program Specialist, one Accountant Auditor, four Administrative Analysts (including one CCOWMP Analysts), one Administrative Technician, and two Accounting Technicians. This support will be paid at actual cost with no markup through an annual interfund transfer based on actual costs charged to Program Code 14B03. DOU will complete an annual review of time spent supporting the CCOWMP and prepare an interfund transfer that will charge or reimburse the CCOWMP based on position costs minus actual costs charged. Utilizing the Fiscal Operations Team to support the CCOWMP allows DOU to assign tasks to all levels, which will minimize costs.

Insurance: During the term of this agreement the CCOWMP shall maintain a policy of commercial general liability insurance in the amount of not less than $1,000,000 per occurrence. The policy shall include products and completed operations coverage and the City of Sacramento shall be covered by endorsement or policy terms as additional insured.

Appendix 11: Five- and One-Year Water Forum Budget

See the following page.

Total Expenses		**1,393,949**	**1,024,019**
Operating Reserve Needs[3]		**-**	**26,500**
Total Revenue Need		**1,393,949**	**1,050,519**

Notes:

1) There are no assumptions for additional staff; however, if the Water Forum is successful in obtaining substantial grant funding, an augmentation could be needed in the future.

2) The Accounting budgeted transfer will be deleted in FY26 when the Citywide Cost Plan charges are implemented. The City of Sacramento has covered the Citywide Costs in error since WF inception. The Citywide Cost Plan includes all citywide shared services including but not limited to Finance, Human Resources, City Council, City Clerk, Information Technology, etc.

3) The Operating Reserve will be funded over the first five years of the new agreement to minimize funding impacts to purveyors and to maintain at least $100,000 in available fund balance for unplanned needs. The Operating Reserve excludes costs associated with operating programs. In the event of full revenue loss, programs will be suspended until revenues are available.

4) FY26 Final includes the adjustments for the final position budgeting report, updated liability insurance premium, final adjustments to COS cost share, final adjustments to citywide cost plan, and misc. IT adjustments. Savings will be added to professional services that will later be applied to employee services to support possible overages for Executive Director or Senior Engineer when either position is filled at a higher total compensation rate.

Water Forum Habitat Management Element (HMEF) Fund 7104 FY26 Projected Costs

	FY 25 Adopted	FY 26 Proposed
City of Sacramento/WFSE - Shared Resources Costs	**495,286**	**451,215**

Operating Reserve Balance		**201,500**	**228,000**	**254,500**	**281,000**	**304,258**

Notes:

1) FY24 Yearend Actuals have not been audited. The ending fund balance for FY24 and beginning fund balance for FY25 are subject to change until the Annual Comprehensive Financial Report (ACFR) is released in January 2025.

2) FY25 Fund Balance usage is estimated at $10K for the University Enterprises contract that was not fully spent in FY24. Future years will be used to fund the Emergency Operating Reserve for WFSE operating costs only.

3) The Emergency Operating Reserve will be funded over the first five years to minimize funding impacts to purveyors. Initial funding comes from remaining WFSE fund balance (7103). In the event of full revenue loss, programs will be suspended until revenues are available. The Reserve will be available for emergencies and will cover 120-day of operating costs, and excludes costs associated with consulting services for general operations and core programs. In addition, the Water Forum will maintain at least $100,000 in available fund balance for unplanned needs.

Water Forum FY26 - FY30 HME (7104 Fund) Projected Fund Balance and Reserve Needs						
				Projected		
	FY25	FY 26	FY 27	FY 28	FY 29	FY 30
Fund Balance & Reserves

Fund Balance Changes[2]	(491,000)	18,500	18,500	18,500	18,500	-
Transfers to Grant Reserve	-	(18,500)	(18,500)	(18,500)	(18,500)	-
Ending Fund Balance	**50,000**	**50,000**	**50,000**	**50,000**	**50,000**	**50,000**
Grant Fund Reduction for Projects/Matches	**(195,000)**	**(120,000)**	**-**	**-**	**-**	**-**
Grant Reserve Balance	**296,000**	**$ 194,500**	**$ 213,000**	**$ 231,500**	**$ 250,000**	**$ 250,000**

Notes:

1) FY24 Yearend Actuals have not been audited. The ending fund balance for FY24 and beginning fund balance for FY25 are subject to change until the Annual Comprehensive Financial Report (ACFR) is released in January 2026.

2) Water Forum will create a grant reserve at the end of FY25 to ensure funding availability to pursue grants by using all but $50,000 of the remaining HME fund balance (7104). There is a need of $195,000 for a grant match in FY25 and grant related operating expenses of $120,000. If grant reserves are used in any given Fiscal Year, the reserve will be replenished to $250,000 over the next five years to limit the impacts on contributors. HME funding was contributed by the County of Sacramento Zone 13 and the City of Sacramento. Funding from the grant match will be used to fund grant related HME efforts only.

Appendix 12: Cost Allocation Methodology Description

During negotiations, it was determined that a new cost allocation methodology would be necessary to fund the work of the Water Forum, commencing in Fiscal Year 2025-2026 (FY26). Previously, funding for multiple agencies was derived from assessments through the Sacramento County Water Agency (SCWA) Zone 13. However, Zone 13 was established 38 years prior without an inflation adjustment, and its revenue has remained static while the Water Forum's budget grew annually to accommodate inflation. As a result, contributions from Zone 13 towards the Water Forum's work became unsustainable. Zone 13 funds historically comprised nearly 50% of the Water Forum's annual budget.

Over several months, water agencies and other funders explored several new funding models to distribute the Water Forum costs equitably. In November 2024, stakeholders agreed on an approach involving proportional cost allocations based on agency connection counts, five-year average groundwater production, and a five-year average of American River diversions. Each dataset is weighted relative to the benefits derived from Water Forum participation (as summarized in Table 1 below).

Specific adjustments were made for the agencies summarized below to fully capture the unique benefits and opportunities derived from Water Forum membership and participation:

EBMUD: EBMUD's data was adjusted for the cost allocation calculation to reflect unique characteristics of its service area and water usage relative to the Water Forum. The adjustment was made based on the following factors:

1. EBMUD's service area lies entirely outside the Sacramento region.
2. EBMUD uses water from the American River only as a dry-year supply and does not rely on groundwater from the Sacramento regional groundwater basins.
3. The American River water used by EBMUD flows through the lower American River (LAR) before being diverted at the Freeport intake.

To account for these considerations, EBMUD's connection count was adjusted to reflect the proportion of its service area supplied with American River water on an annual basis, using a five-year average.

PCWA: PCWA's water collection and distribution system is complex, relying on multiple sources and diversion points for its surface water supply. PCWA is also both a wholesaler and a retailer of both treated and untreated water from these multiple sources. For the purposes of the Water Forum cost allocation calculations, only the volume of American River water that is diverted and used within PCWA's own retail service area, treated and untreated, is included. PCWA water diverted by or on behalf of its wholesale customers is excluded from PCWA's cost calculations

Golden State: An adjustment was made to GSWC's data within the Water Forum cost allocation model to account for its unique water supplies and operations. GSWC uses treated groundwater that is discharged into the American River and later diverted at the Carmichael Water District's intake on the LAR, then the treated water is delivered to GSWC, putting the groundwater back to beneficial use. To accurately reflect this process, both GSWC's American River diversion and groundwater production volumes were adjusted accordingly in the model.

Table 2 illustrates the application of the agreed-upon funding allocation methodology, which includes the relative percentages for each of the respective datasets, the resulting weighted percentage calculated using the factors listed in Table 1, and the final cost allocations for FY26 for each relevant funder. The weighted percentage shown in Table 2 for each agency will be used for five years, and an updated weighted percentage will be calculated in 2030 to be applied in FY2030-2031 and the subsequent five years (pending approval from the funders).

Table 1. Water Forum Cost Allocation Weighting Factors and Benefits

Agency Data Set	Weighting Factor	Associated Benefits
Connection Counts	0.40	• Environmental Stewardship • Maintaining peace on the river • Assistance in the regulatory settings
Groundwater Production	0.20	• Regional water supply reliability • Support for more conjunctive use activities • Regional collaboration and partnerships for projects, programs, and funding
American River Diversions	0.40	• Regional coordination and strategy with the U.S. Bureau of Reclamation • Protecting the value and function of the Lower American River corridor

Table 2. Water Forum Cost Allocation Results

	Base %				
Agency	***Connections***	***American River Diversions***	***Groundwater Production***	**Weighted %**	**FY 26 Contribution** Based on 5-Year Avg 2019-2023

1. San Juan Water District Wholesale contributions include San Juan Retail, Orange Vale, and Ashland (Folsom) service areas.

2. Total funding amount shown excludes contributions of flat fee contributions from SMUD, SAFCA, and EDWA.

Appendix 13: Interagency Agreement for Water Forum Administration

See the following page.

THIRD INTERAGENCY AGREEMENT FOR THE ADMINISTRATION AND MANAGEMENT OF THE WATER FORUM

THIS THIRD INTERAGENCY AGREEMENT FOR THE ADMINISTRATION AND MANAGEMENT OF THE WATER FORUM ("AGREEMENT") is made and entered into this __ day of _____ 2025, by and among the City of Sacramento, the El Dorado Irrigation District, the Placer County Water Agency, the City of Folsom, the City of Roseville, the San Juan Water District (retail), Citrus Heights Water District, Fair Oaks Water District, Orange Vale Water Company, Carmichael Water District, Sacramento Suburban Water District, Golden State Water Company, California-American Water, Sacramento County Water Agency ("SCWA"), County of Sacramento, and East Bay Municipal Utility District referred to collectively as "the Parties."

RECITALS

A. Each of the Parties to this Agreement is a local governmental entity or public water supplier functioning within or adjacent to the Sacramento Metropolitan Area.

B. On October 30, 1991, the Sacramento City Council, the Sacramento County Board of Supervisors and the Board of Directors of SCWA authorized the execution of the "Interagency Agreement for the City-County Office of Water Planning" to create a City County organization known as the City-County Office of Water Planning.

C. The City-County Office of Water Planning, subsequently renamed the City-County Office of Metropolitan Water Planning (hereafter referred to as the "CCOMWP"), was formed to provide City-County staffing necessary to undertake planning and analysis needed for, and to facilitate the participation of numerous stakeholders in, the development of a comprehensive plan to provide a reliable water supply for the region while protecting the environmental values of the area's water resources.

D. On January 9, 2001, the Sacramento City Council, the Sacramento County Board of Supervisors and the Board of Directors of SCWA entered into the "Second Interagency Agreement for the City-County Office of Metropolitan Water Planning" to provide for the continued existence and operation of the CCOMWP.

E. The Parties are all members of the Water Forum, a coalition of business leaders, citizens, environmentalists, water managers, and local governments (individually "Members"). The Water Forum was governed by the 2000 Water Forum Agreement, updated in October 2015 (the "Water Forum Agreement"). The renegotiation of the Water Forum Agreement through the Water Forum 2050 process resulted in a need to update the Second Interagency Agreement for the City-County Office of Metropolitan Water Planning to reflect participation of all of the Parties. The purpose of this Agreement is to delineate an efficient and effective arrangement for administration and management of Water Forum staff. Funding for the Water Forum staff and operations will be allocated on a cost-share

basis between the Parties in a separate funding agreement for the Water Forum ("Funding Agreement").

F. The City of Sacramento and the County of Sacramento wish to express their long time and continuing support for the Water Forum and its mission of the co-equal objectives.

NOW, THEREFORE, in consideration of the mutual promises contained herein, the Parties hereby agree as follows:

1. **Water Forum Office**. The renegotiated Water Forum Agreement has restructured roles and responsibilities of the participating water agencies. To reflect those changes, the name of the CCOMWP is hereby changed to the Water Forum Office. The Water Forum Office is a division of the City of Sacramento, not an independent legal entity. The Water Forum Office is hereby authorized to continue operating in accordance with the provisions of this Agreement. This Agreement replaces and supersedes the Second Interagency Agreement for the City-County Office of Metropolitan Water Planning.

2. **Objectives and Duties of the Water Forum Office**. The objective of the Water Forum Office is to promote the implementation and continued vitality of the Water Forum Agreement. This objective shall be accomplished by providing administrative support and assistance to the Water Forum Members as the Members oversee, monitor, and report on implementation of the Water Forum Agreement. Specific tasks necessary to accomplish this purpose may be performed by Water Forum Office staff, or by other individuals, firms or entities pursuant to contracts or agreements authorized as set forth in Section 5, below.

3. **Water Forum Office Operations.** The City of Sacramento shall continue to provide the Water Forum Office with suitable office space and administrative, clerical, and technical support resources as an entity of the City of Sacramento. The City of Sacramento will be responsible for overseeing the following arrangements for the Water Forum Office:

    a. Procurement of leased office space including conference facilities and necessary furnishings to house the Water Forum Office.

    b. Preparation of an operating budget, operating reserves of 120 days, and necessary appropriation resolutions.

    c. Establishment of accounting records and procedures for capturing expenditures of the Water Forum Office.

    d. Allocation of operating costs for the Water Forum Office on a cost-share basis among the Parties pursuant to the Funding Agreement. "Operating costs" shall include all office lease, equipment, personnel and other staffing costs, contracting costs, and other costs incurred in the performance of the Water

Forum Office's duties, together with associated direct and indirect overhead and other administrative costs.

e. Implementation of the staffing plan for the Water Forum Office including such things as classification of positions, salary resolution amendments, recruitment, and selection.

4. **Water Forum Office Costs**. The Parties shall fund the Water Forum Office operating costs in accordance with the cost-sharing provisions of the Funding Agreement. Annual Operating costs shall not exceed the funding available for such costs under the Funding Agreement or available from other funding sources approved by the Parties and shall be consistent with the Water Forum Office budget approved by the Parties.

5. **Staff Arrangements**.

   a. The Water Forum Office shall have an Executive Director and adequate staff to support the following functions: River Corridor Health Program, Water Resources engineering, and administrative support staff. These positions, whether new hires or existing staff, shall be considered City of Sacramento employees. These employees shall continue to be paid at the designated salaries and employee benefits for their respective classifications within the City of Sacramento, and shall be entitled to the same promotions, and merit or other salary increases as City of Sacramento fulltime employees. In addition, the services of other City of Sacramento staff may be used from time to time to provide technical assistance for the Water Forum Office.

   b. As an entity of the City of Sacramento, the Water Forum Office has established funds that pay the full cost of the assigned positions and any staff assistance for all salaries, employee benefits and indirect employee costs.

   c. The Executive Director shall be the chief administrative officer of the Water Forum Office, shall supervise the Water Forum Office employees, and shall be responsible for the administration of the Water Forum Office pursuant to this Agreement. The Executive Director shall report to the Director of the City of Sacramento Department of Utilities ("DOU Director"). The DOU Director shall implement a process to solicit the Parties' input on the selection and performance of the Executive Director but shall retain sole authority to take any and all employment actions related to the Executive Director.

   d. Water Forum Office staff, including but not limited to the Executive Director, are not employees of any Party other than the City of Sacramento and shall not be entitled to any wages, retirement benefits, or other benefits enjoyed by employees of any Party other than the City of Sacramento.

   e. When requested by the Water Forum's Coordinating Committee, or at least every five years, the Water Forum may conduct a compensation survey to

ensure that the total compensation of the Executive Director is appropriate. The compensation survey will be paid for by the Water Forum office. Should the survey indicate the compensation should be adjusted, the City of Sacramento shall consider adjusting the compensation accordingly, but is not required to do so. All Water Forum office employee salaries are funded by the water agencies that contribute to the Water Forum office, the funding for their salaries does not come solely from the City of Sacramento. Nothing in this agreement, in action or intent, will preempt City of Sacramento employment practices.

6. **Contracting Procedures**. All Water Forum Office contracting shall follow procedures used by the City of Sacramento. The Executive Director may recommend the approval of contracts for services required by the Water Forum Office and the Sacramento City Manager or the City Manager's designee shall be authorized to approve and execute such contracts in accordance with applicable provisions of the Sacramento City Code relating to authority to enter into contracts. All other contracts shall be submitted to the Sacramento City Council for approval and execution. All contracts shall be approved as to form by the Sacramento City Attorney or use standard formats approved by the Sacramento City Attorney. The City shall require and verify that all contractors and subcontractors maintain insurance coverage that meets the minimum scope and limits of insurance coverage appropriate for the work performed. Costs incurred under contracts that are consistent with the Water Forum Office budget approved by the Parties shall be allocated on a cost-share basis between the Parties as specified in the Funding Agreement.

7. **Insurance; Excess liability**.

    a. The City of Sacramento shall procure and maintain a liability insurance policy sufficient to cover the Water Forum Office's potential liabilities, with a minimum limit of $1 million per occurrence and $4 million aggregate. The Parties recognize that the coverage and terms of insurance may be subject to change based on insurance market conditions, but the City of Sacramento shall immediately disclose changes and obtain approval of the other Parties to an approach that most closely preserves compliance with requirements of this section. The coverage must be at least as broad in scope as Insurance Services Office (ISO) Commercial General Liability Coverage (Occurrence Form CG00 01) including products and completed operations, property damage, bodily injury, personal and advertising injury, and contractual liability coverage for liabilities assumed under this Agreement as an "insured contract." The City of Sacramento will provide proof of this insurance to each Party on an annual basis for the duration of this Agreement and will immediately notify Parties of any changes in coverage. Liability coverage will be in effect for Water Forum work plan activities or activities communicated in writing to the Plenary Water Forum.

b. The City of Sacramento shall use available insurance proceeds to defray the cost of liability arising from the Water Forum Office or its functions or work. If the Water Forum Office's liability insurance, or any other available insurance policy, does not fully cover all liability of the Water Forum Office or of the City of Sacramento arising from a covered employee action, omission, or injuries, then any excess amount of such liability ("Excess Liability"), except Excluded Liability, shall be allocated among the Parties pursuant to the cost allocation formula specified in the Funding Agreement. The term "Excluded Liability" includes each of the following: (i) any liability arising from any employee action, omission, or injury that is intentional, fraudulent, reckless, or outside the course or scope of the employee's position with the Water Forum; (ii) any liability arising from any class actions, representative actions, actions under the Private Attorneys General Act; or (iii) any liability arising from claims for punitive or exemplary damages; or (iv) recovery of attorneys' fees. Excess liability costs for Excluded Liability may be submitted to the Parties for consideration through the annual budget process. The Parties (as defined in Attachment A) are to be covered as additional insureds on the Water Forum Office's CGL policy with respect to liability arising out of this Agreement. For any claims related to this Agreement, the Water Forum Office's insurance coverage shall be primary and non-contributory as respects the Parties. The Water Forum Office will promptly notify each Party of any claim that has arisen or that may arise and keep them informed as to the status of the claim until resolved.

   The City of Sacramento shall procure, maintain, and be solely responsible for the provision of workers' compensation insurance for its employees assigned to the Water Forum Office or performing duties related to the Water Forum Office. The City shall maintain excess workers' compensation insurance and waive subrogation against the Parties.

8. **Disclaimer of Liability; Mutual Indemnification**. No Party nor any officer or employee thereof shall be responsible for any damage or liability occurring by reason of anything done or omitted to be done by another Party under or in connection with any work, authority, or jurisdiction delegated to another Party. Each Party shall fully defend (upon the request of the indemnitee), indemnify, and hold each Party harmless from and against all claims, losses and liabilities occurring by reason of anything done or omitted to be done by the indemnifying Party under or in connection with any work, authority, or jurisdiction delegated to the indemnifying Party under this Agreement. Except as limited by this section 8, Excess Liability, except Excluded Liability, may be allocated among the Parties in the manner and circumstances described in subsection (b) of section 7.

9. **Effective Date.** This Agreement shall become effective when it has been signed by each Party.

10. **Termination**. This Agreement shall remain in effect until December 31, 2050, unless terminated sooner in the manner described herein. This Agreement may be terminated by two-thirds written consent of the Parties. Nothing in this Agreement shall prevent any individual Party from withdrawing as provided in this Agreement. Upon termination of this Agreement, any surplus funds on hand shall be returned to the then Parties in proportion to the contributions made.

    A Party may unilaterally withdraw from this Agreement without requiring termination of this Agreement, effective upon 90 days' written notice to the other Parties, provided that the withdrawing Party shall remain responsible for any indebtedness incurred by the Party under the Funding Agreement, and further provided that the withdrawing Party pays or agrees to pay its share of debts, liabilities and obligations of the Water Forum Office incurred by the Party under this Agreement prior to the effective date of such withdrawal. Terms of the Funding Agreement may include a not-to-exceed amount equaling a two-year funding obligation from each agency.

    If the City of Sacramento wishes to withdraw from this Agreement, the City of Sacramento shall provide 180 days' written notice to the other Parties; provided that the City of Sacramento shall remain responsible for any indebtedness incurred by the City of Sacramento under any funding agreement, and further provided that the City of Sacramento pays or agrees to pay its share of debts, liabilities and obligations of the Water Forum Office incurred by the City of Sacramento under this Agreement prior to the effective date of such withdrawal. In such case, the City of Sacramento shall cooperate in good faith with other Parties if they wish to continue the Water Forum Office under the auspices of another entity.

11. **Notices**. Any notices or other communication to be given Parties pursuant to this Agreement shall be given in writing by U.S. Mail, email, or by personal delivery to the Parties at the addresses set forth in Attachment B, incorporated herein by this reference.

12. **Amendments**. This Agreement may be amended only by a subsequent writing, approved and signed by the authorized representative or agent for each Party, except the representatives and contact information contained in Attachment B may be amended by providing an updated copy of Attachment B to all Parties.

13. **Entire Agreement**. This Agreement and any attachments hereto constitute the entire Agreement and understanding among the Parties regarding the administration and management of the Water Forum Office. If any provision of this Agreement conflicts with any provision of any other agreement related to the Water Forum Office, the conflicting provision of this Agreement shall control.

14. **Successors and Assigns**. This Agreement shall bind, and inure to the benefit of, the successors, assigns, heirs, and legal representatives of the Parties hereto.

15. **Waiver**. The waiver at any time by any Party of its rights with respect to a default or other matter arising in connection with this Agreement shall not be deemed a waiver with respect to any subsequent default or matter.

16. **Construction and Interpretation**. The Parties agree and acknowledge that this Agreement has been arrived at through negotiation, and that each Party has had a full and fair opportunity to revise the terms of this Agreement. Consequently, the normal rule of construction that any ambiguities are to be resolved against the drafting Party shall not apply in construing or interpreting this Agreement.

17. **Counterparts and Digital Signatures**. This Agreement may be executed by the Parties in separate counterparts, each of which when so executed and delivered shall be an original. All such counterparts shall together constitute but one and the same instrument. Signatures scanned and transmitted electronically shall be deemed original signatures for purposes of this Agreement, with such scanned signatures having the same legal effect as original signatures. This Agreement may be executed through the use of an electronic signature and will be binding on each party as if it were physically executed.

18. **Choice of Law**. This Agreement shall be governed by the laws of the State of California.

19. **Severability**. If one or more clauses, sentences, paragraphs or provisions of this Agreement is held to be unlawful, invalid or unenforceable, it is hereby agreed by the Parties that the remainder of the Agreement shall not be affected thereby.

ATTACHMENT A
ADDITIONAL INSURED

The following Parties to this Agreement are named as additional insured pursuant to Section 7.b of this Agreement:

- City of Sacramento
- El Dorado Irrigation District
- Placer County Water Agency
- City of Folsom
- City of Roseville
- San Juan Water District
- Citrus Heights Water District
- Fair Oaks Water District
- Orange Vale Water Company
- Carmichael Water District
- Sacramento Suburban Water District
- Golden State Water Company
- California-American Water Company
- Sacramento County Water Agency
- County of Sacramento
- East Bay Municipal Utility District

MEMORANDUM

ITEM 9.12.

DATE: May 18, 2026

TO: Honorable Mayor and Council Members

FROM: Albert Stricker, Public Works Director
Edgar Medina, Assistant Public Works Director
Drew Hart, Principal Transportation Planner

SUBJECT: **A RESOLUTION AUTHORIZING THE CITY MANAGER TO EXECUTE CONTRACT NO. 2026-78 WITH 50 CORRIDOR TRANSPORTATION MANAGEMENT ASSOCIATION IN AN AMOUNT NOT TO EXCEED $2,282,984 FOR TRANSPORTATION DEMAND MANAGEMENT SERVICES FOR FISCAL YEAR 2026-27 THROUGH 2028-29 FOR THE ENCOURAGEMENT AND EDUCATION OF SUSTAINABLE TRANSPORTATION WITHIN THE CITY**

RECOMMENDATION

Adopt the Resolution.

RESULT OF RECOMMENDED ACTION

Adoption of the Resolution would authorize the City Manager to execute a three-year contract with 50 Corridor Transportation Management Association in an amount not to exceed $2,282,984 for transportation demand management services, which would provide support for the encouragement and education of sustainable transportation within the city.

BACKGROUND

The City of Rancho Cordova has created a partnership with the 50 Corridor Transportation Management Association (50 Corridor TMA) to provide programs and innovative solutions that encourage the use of sustainable modes of transportation such as active modes, carpooling, and transit. 50 Corridor TMA provides services for communities in Rancho Cordova, Folsom, and unincorporated Sacramento County, along with private employers along the U.S. 50 corridor.

Previous agreements with 50 Corridor TMA have covered just one fiscal year. This agreement will cover three years, ending June 2029. The funding for this agreement comes from a levy within Transit Zones 1, 2, and 3. These funds are returned to source. Therefore, the services outlined in the attached agreement, Attachment 2, are limited to these geographic zones shown in the Transit Zones Map, Attachment 3. Transit Zones were established as early as 2003 by the County as Sacramento County Services Areas. After incorporation, the city assumed the service responsibility and funding for the existing Transit Zones. Future developments are added to Transit Zones to likewise offer transportation services. The purpose of the transit levy

is to provide an ongoing financial mechanism to fund a broad range of transportation services intended to benefit properties within the zones by reducing congestion and pollution. Funding these activities maintains compliance with Federal and State Clean Air Acts and California Environmental Quality Act requirements. The services include, but are not limited to, the following: transit shuttles, guaranteed ride home program, transit subsidies, transportation planning for employers and/or residents, education programs, infrastructure support like bike racks and bus stops, and bicycle and alternative fuel incentives. The city contracts with Sacramento Regional Transit for the CordoVan shuttle service, and the 50 Corridor TMA for the majority of the other services listed previously.

The scope of services contained in the agreement include:

Task 1 - School Shuttle. A shuttle program for students attending Albiani Middle School and Pleasant Grove High School in Elk Grove. The trip to and from school each day is approximately 25 miles (1 hour) round trip. This task provides an additional option for school-related transportation, which is one of the highest sources of vehicle miles traveled and carbon-producing trips.

Task 2 - Trip Reduction Services. Rideshare matching, discount transit fares, encouragement and incentives, and guaranteed ride services have proved to reduce private vehicle trips. This task will allocate resources to provide these proven strategies.

Task 3 - Marketing and Engagement. This task will publicize and educate residents about the programs and services available to them to reduce their dependence on drive-alone trips. Work associated with this task includes direct mail, social media ads, email, events, new resident welcome packs, creative services, and other marketing opportunities.

Task 4 - Smart Routes to School. This task takes education and encouragement into elementary schools. The team will continue their successful efforts at McGarvey Elementary School and Sunrise Elementary School while adding Cypress Grove Elementary School which will open in July 2026.

Task 5 - Project Management. Work associated with this task would include staff time to complete invoices and reports to city staff and/or City Council.

FISCAL IMPACT AND FUNDING SOURCE

The three-year contract is not to exceed $2,282,984 funded by the annual levy for the Rancho Cordova transit-related services benefit districts, Transit Zones 1, 2, and 3 (see Transit Zones Map in Attachment 3). There is no impact on the city's General Fund.

CITY OF RANCHO CORDOVA

RESOLUTION NO. XX-2026

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA, STATE OF CALIFORNIA, AUTHORIZING THE CITY MANAGER TO EXECUTE CONTRACT NO. 2026-78 WITH 50 CORRIDOR TRANSPORTATION MANAGEMENT ASSOCIATION FOR TRANSPORTATION DEMAND MANAGEMENT SERVICES FOR FISCAL YEARS 2026-27 THROUGH 2028-29

WHEREAS, the City of Rancho Cordova desires to enter into Contract No. 2026-78 with 50 Corridor Transportation Management Association in an amount not to exceed $2,282,984 for transportation demand management services that encourage and promote sustainable transportation within the city for fiscal years 2026-27 through 2028-29; and

WHEREAS, the services provided will encourage walking and bicycling to school to build healthy habits and reduce traffic congestion; and

WHEREAS, the services will encourage carpooling, taking transit, and bicycling to work through education and incentive programs; and

WHEREAS, the services will promote a positive image of the city and encourage thoughtful, sustainable travel behaviors; and

WHEREAS, there are sufficient funds to cover the costs of the contract.

NOW, THEREFORE, BE IT HEREBY RESOLVED THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA does authorize the City Manager to execute Contract No. 2026-78 with 50 Corridor Transportation Management Association, in an amount not to exceed $2,282,984 in a form approved by the City Attorney to provide transportation demand management services.

PASSED AND ADOPTED by the City Council of the City of Rancho Cordova on the 18th day of May 2026 by the following vote:

PROFESSIONAL SERVICES AGREEMENT BETWEEN THE CITY OF RANCHO CORDOVA AND 50 CORRIDOR TRANSPORTATION MANAGEMENT ASSOCIATION

THIS AGREEMENT (hereinafter referred to as "Agreement") for professional services is made by and between the City of Rancho Cordova, a California municipal corporation, (herein "City") and 50 Corridor Transportation Management Association ("Professional") as of July 1, 2026.

SECTION 1. SERVICES. Subject to the terms and conditions set forth in this Agreement, Professional shall provide to City the services described in the Scope of Services attached as Exhibit A ("Services") at the time and place and in the manner as specified therein. In the event of a conflict or inconsistency between the terms of this Agreement and Exhibit A, the Agreement shall prevail.

1.1 Term of Services. The term of this Agreement shall begin on the date first noted above and shall end on June 30th, 2029, the date of completion specified in Exhibit A. Professional shall complete the services described in Exhibit A prior to that date, unless the term of the Agreement is otherwise terminated or extended, as provided for in Section 8. The time provided to Professional to complete the services required by this Agreement shall not affect the City's right to terminate the Agreement, as provided for in Section 8.

1.2 Standard of Performance. Professional shall perform all services required pursuant to this Agreement in the manner and according to the standards observed by a competent practitioner of the profession in which Professional is engaged in the geographical area in which Professional practices its profession. Professional shall prepare all work products required by this Agreement in a substantial, first-class manner and shall conform to the standards of quality normally observed by a person practicing in Professional's profession.

1.3 Assignment of Personnel. Professional shall assign only competent personnel to perform services pursuant to this Agreement. In the event that City, in its sole discretion, at any time during the term of this Agreement, desires the reassignment of any such persons, Professional shall, immediately upon receiving notice from City of such desire of City, reassign such person or persons.

1.4 Time. Professional shall devote such time to the performance of services pursuant to this Agreement as may be reasonably necessary to meet the standard of performance provided in Section 1.2 above and to satisfy Professional's obligations hereunder.

SECTION 2. COMPENSATION. City hereby agrees to pay Professional a sum not to exceed **TWO MILLION TWO HUNDRED EIGHTY-TWO THOUSAND NINHUNDRED EIGHTY-FOUR DOLLARS: ($2,282,984)**, notwithstanding any contrary indications that may be contained in Professional's proposal, for services to be performed and reimbursable costs incurred under this Agreement. In the event of a conflict between this Agreement and Professional's proposal, attached as Exhibit B, regarding the amount of compensation, the Agreement shall prevail. City shall pay Professional for services rendered pursuant to this Agreement at the time and in the manner set forth herein. The payments specified below shall be the only payments from City to Professional for services rendered pursuant to this Agreement. Professional shall submit all invoices to City in the manner specified herein. Except as specifically authorized by City, Professional shall not bill City for duplicate services performed by more than one person.

Professional shall submit all invoices to City in the manner specified herein. Except as specifically authorized by City, Professional shall not bill City for duplicate services performed by more than one person.

Professional and City acknowledge and agree that compensation paid by City to Professional under this Agreement is based upon Professional's estimated costs of providing the services required hereunder, including salaries and benefits of employees and subcontractors of Professional. Consequently, the parties further agree that compensation hereunder is intended to include the costs of contributions to any pensions and/or annuities to which Professional and its employees, agents, and subcontractors may be eligible. City therefore has no responsibility for such contributions beyond compensation required under this Agreement.

2.1 **Invoice.** Professional shall submit invoices, not more often than once a month during the term of this Agreement, based on the cost for services performed and reimbursable costs incurred prior to the invoice date. Invoices shall contain the following information:

2.1.1 Serial identifications of progress bills; i.e., Progress Bill No. 1 for the first invoice, etc.;

2.1.2 The beginning and ending dates of the billing period;

2.1.3 A Task Summary containing the original contract amount, the amount of prior billings, the total due this period, the balance available under the Agreement, and the percentage of completion;

2.1.4 At City's option, for each work item in each task, a copy of the applicable time entries or time sheets shall be submitted showing the name of the person doing the work, the hours spent by each person, a brief description of the work, and each reimbursable expense;

2.1.5 The total number of hours of work performed under the Agreement by Professional and each employee, agent, and subcontractor of Professional performing services hereunder, as well as a separate notice when the total number of hours of work by Professional and any individual employee, agent, or subcontractor of Professional reaches or exceeds 800 hours, which shall include an estimate of the time necessary to complete the work described in Exhibit A;

2.1.6 The Professional's signature.

2.2 **Monthly Payment.** City shall make monthly payments, based on invoices received, for services satisfactorily performed, and for authorized reimbursable costs incurred. City shall have thirty (30) days from the receipt of an invoice that complies with all of the requirements above to pay Professional.

2.3 **Final Payment.** City shall make the final payment within sixty (60) days after completion of the services and submittal to City of a final invoice, if all services required have been satisfactorily performed.

2.4 **Total Payment.** City shall pay for the services to be rendered by Professional pursuant to

this Agreement. City shall not pay any additional sum for any expense or cost whatsoever incurred by Professional in rendering services pursuant to this Agreement. City shall make no payment for any extra, further, or additional service pursuant to this Agreement.

In no event shall Professional submit any invoice for an amount in excess of the maximum amount of compensation provided above either for a task or for the entire Agreement, unless the Agreement is modified prior to the submission of such an invoice by a properly executed change order or amendment.

2.5 Hourly Fees. Fees for work performed by Professional on an hourly basis shall not exceed the amounts shown on the fee schedule set forth in Exhibit B.

2.6 Reimbursable Expenses. Reimbursable expenses, if any, are set forth in Exhibit B. Expenses not listed in Exhibit B are not chargeable to City. Reimbursable expenses are included in the total amount of compensation provided under this Agreement that shall not be exceeded.

2.7 Payment of Taxes. Professional is solely responsible for the payment of employment taxes incurred under this Agreement and any similar federal or state taxes.

2.8 Payment upon Termination. In the event that the City or Professional terminates this Agreement pursuant to Section 10, the City shall compensate the Professional for all outstanding costs and reimbursable expenses incurred for work satisfactorily completed as of the date of written notice of termination. Professional shall maintain adequate logs and timesheets in order to verify costs incurred to that date.

2.9 Authorization to Perform Services. The Professional is not authorized to perform any services or incur any costs whatsoever under the terms of this Agreement until receipt of authorization from the Contract Administrator.

SECTION 3. FACILITIES AND EQUIPMENT. Except as set forth herein, Professional shall, at its sole cost and expense, provide all facilities and equipment that may be necessary to perform the services required by this Agreement. City shall make available to Professional only the facilities and equipment listed in this section, and only under the terms and conditions set forth herein.

City shall furnish physical facilities such as desks, filing cabinets, and conference space, as may be reasonably necessary for Professional's use while consulting with City employees and reviewing records and the information in possession of the City. The location, quantity, and time of furnishing those facilities shall be in the sole discretion of City. In no event shall City be obligated to furnish any facility that may involve incurring any direct expense, including but not limited to computer, long-distance telephone or other communication charges, vehicles, and reproduction facilities.

SECTION 4. INSURANCE REQUIREMENTS. Before beginning any work under this Agreement, Professional, at its own cost and expense, shall procure "occurrence coverage" insurance against claims for injuries to persons or damages to property that may arise from or in connection with the performance of the work hereunder by the Professional and its agents, representatives, employees, and subcontractors. Professional shall provide proof satisfactory to City of such insurance that meets the requirements of this section and under forms of insurance satisfactory in all respects to the City. Professional shall maintain the

insurance policies required by this section throughout the term of this Agreement. The cost of such insurance

shall be included in the Professional's bid. Professional shall not allow any subcontractor to commence work on any subcontract until Professional has obtained all insurance required herein for the subcontractor(s) and provided evidence thereof to City. Verification of the required insurance shall be submitted and made part of this Agreement prior to execution. Professional shall maintain all required insurance listed herein for the duration of this Agreement.

4.1 **Workers' Compensation.** Professional shall, at its sole cost and expense, maintain Statutory Workers' Compensation Insurance and Employer's Liability Insurance for any and all persons employed directly or indirectly by Professional. The Statutory Workers' Compensation Insurance and Employer's Liability Insurance shall be provided with limits of not less than ONE MILLION DOLLARS ($1,000,000.00) per accident. In the alternative, Professional may rely on a self-insurance program to meet those requirements, but only if the program of self-insurance complies fully with the provisions of the California Labor Code. Determination of whether a self-insurance program meets the standards of the Labor Code shall be solely in the discretion of the Contract Administrator. The insurer, if insurance is provided, or the Professional, if a program of self-insurance is provided, shall waive all rights of subrogation against the City and its officers, officials, employees, and volunteers for loss arising from work performed under this Agreement.

An endorsement shall state that coverage shall not be canceled except after thirty (30) days' prior written notice by certified mail, return receipt requested, has been given to the City. Professional shall notify City within fourteen (14) days of notification from Professional's insurer if such coverage is suspended, voided or reduced in coverage or in limits.

The requirement to maintain Statutory Worker's Compensation and Employer's Liability Insurance may be waived by the City upon written verification that Professional does not have any employees.

_____ Professional hereby acknowledges and agrees to the insurance requirements set forth in this section which shall be monitored for compliance by Ebix, RCS, Inc.
Initial

4.2 **Commercial General and Automobile Liability Insurance.**

4.2.1 **General requirements.** Professional, at its own cost and expense, shall maintain commercial general liability insurance for the term of this Agreement in an amount not less than TWO MILLION DOLLARS ($2,000,000.00) and automobile liability insurance for the term of this Agreement in an amount not less than ONE MILLION DOLLARS ($1,000,000.00). The commercial general liability and automobile liability insurance shall be per occurrence, combined single limit coverage for risks associated with the work contemplated by this Agreement. If a commercial general liability insurance or an automobile liability form or other form with a general aggregate limit is used, either the general aggregate limit shall apply separately to the work to be performed under this Agreement or the general aggregate limit shall be at least twice the required occurrence limit. Such coverage shall include but shall not be limited to, protection against claims arising from bodily and personal injury,

including death resulting therefrom, and damage to property resulting from activities contemplated under this Agreement, including the use of owned and non-owned automobiles.

4.2.2 Minimum scope of coverage. Commercial general liability coverage shall be at least as broad as Insurance Services Office Commercial General Liability occurrence form CG 0001 (most recent edition) covering comprehensive General Liability on an "occurrence" basis. Automobile coverage shall be at least as broad as Insurance Services Office Automobile Liability form CA 0001 (most recent edition), Code 1 (any auto). No endorsement shall be attached limiting the coverage.

4.2.3 Additional requirements. Each of the following shall be included in the insurance coverage or added as an endorsement to the policy.

a. City and its officers, employees, agents, and volunteers shall be covered as additional insureds with respect to each of the following: liability arising out of activities performed by or on behalf of Professional, including the insured's general supervision of Professional; products and completed operations of Professional; premises owned, occupied, or used by Professional; and automobiles owned, leased, or used by the Professional. The coverage shall contain no special limitations on the scope of protection afforded to City or its officers, employees, agents, or volunteers.

b. The insurance shall cover on an occurrence or an accident basis, and not on a claims-made basis.

c. An endorsement must state that coverage is primary insurance with respect to the City and its officers, officials, employees, and volunteers, and that no insurance or self-insurance maintained by the City shall be called upon to contribute to a loss under the coverage.

d. Any failure of Professional to comply with reporting provisions of the policy shall not affect coverage provided to City and its officers, employees, agents, and volunteers.

e. An endorsement shall state that coverage shall not be canceled except after thirty (30) days' prior written notice by certified mail, return receipt requested, has been given to the City. Professional shall notify City within fourteen (14) days of notification from Professional's insurer if such coverage is suspended, voided or reduced in coverage or in limits.

_____ Professional hereby acknowledges and agrees to the insurance requirements set forth in this section which shall be monitored for compliance by Ebix, RCS, Inc.

Initial

4.3 **Professional Liability Insurance.** Professional, at its own cost and expense, shall maintain for the period covered by this Agreement professional liability insurance for licensed professionals performing work pursuant to this Agreement in an amount not less than ONE MILLION DOLLARS ($1,000,000) covering the licensed professionals' errors and omissions.

4.3.1 Any deductible or self-insured retention shall not exceed $150,000 per claim.

4.3.2 An endorsement shall state that coverage shall not be suspended, voided, canceled by either party, or reduced in coverage or in limits, except after thirty (30) days' prior written notice by certified mail, return receipt requested, has been given to the City.

4.3.3 The following provisions shall apply if the professional liability coverages are written on a claims-made form:

a. The retroactive date of the policy must be shown and must be before the date of the Agreement.

b. Insurance must be maintained and evidence of insurance must be provided for at least five (5) years after completion of the Agreement or the work, so long as commercially available at reasonable rates.

c. If coverage is canceled or not renewed and it is not replaced with another claims-made policy form with a retroactive date that precedes the date of this Agreement, Professional must provide extended reporting coverage for a minimum of five (5) years after completion of the Agreement or the work. The City shall have the right to exercise, at the Professional's sole cost and expense, any extended reporting provisions of the policy, if the Professional cancels or does not renew the coverage.

d. A copy of the claim reporting requirements must be submitted to the City prior to the commencement of any work under this Agreement.

Professional hereby acknowledges and agrees to the insurance requirements set forth in this section which shall be monitored for compliance by Ebix, RCS, Inc.

_____
Initial

4.4 **All Polices Requirements.**

4.4.1 **Acceptability of insurers.** All insurance required by this section is to be placed with insurers with a Bests' rating of no less than A:VII.

4.4.2 **Verification of coverage.** Prior to beginning any work under this Agreement, Professional shall furnish City with certificates of insurance and with original endorsements effecting coverage required herein. The certificates and endorsements for each insurance policy are to be signed by a person authorized by that insurer to bind coverage on its behalf. The City reserves the right to require complete, certified copies of all required insurance policies, at any time.

4.4.3 Subcontractors. Professional shall include all subcontractors as insureds under its policies or shall furnish separate certificates and endorsements for each subcontractor. All coverages for subcontractors shall be subject to all of the requirements stated herein.

4.4.4 Deductibles and Self-Insured Retentions. Professional shall disclose to and obtain the approval of City for the self-insured retentions and deductibles before beginning any of the services or work called for by any term of this Agreement.

During the period covered by this Agreement, only upon the prior express written authorization of Contract Administrator, Professional may increase such deductibles or self-insured retentions with respect to City, its officers, employees, agents, and volunteers. The Contract Administrator may condition approval of an increase in deductible or self-insured retention levels with a requirement that Professional procure a bond, guaranteeing payment of losses and related investigations, claim administration, and defense expenses that is satisfactory in all respects to each of them.

4.4.5 Waiver of Subrogation. Professional hereby agrees to waive subrogation which any insurer or contractor may require from vendor by virtue of the payment of any loss. Consultant agrees to obtain any endorsements that may be necessary to effect this waiver of subrogation. The Workers' Compensation policy shall be endorsed with a waiver of subrogation in favor of the entity for all work performed by the Professional, its employees, agents, and subcontractors.

4.4.6 Notice of Reduction in Coverage. In the event that any coverage required by this section is reduced, limited, or materially affected in any other manner, Professional shall provide written notice to City at Professional's earliest possible opportunity and in no case later than five (5) days after Professional is notified of the change in coverage.

4.5 Remedies. In addition to any other remedies City may have if Professional fails to provide or maintain any insurance policies or policy endorsements to the extent and within the time herein required, City may, at its sole option exercise any of the following remedies, which are alternatives to other remedies City may have and are not the exclusive remedy for Professional's breach:

4.5.1 Obtain such insurance and deduct and retain the amount of the premiums for such insurance from any sums due under the Agreement;

4.5.2 Order Professional to stop work under this Agreement or withhold any payment that becomes due to Professional hereunder, or both stop work and withhold any payment, until Professional demonstrates compliance with the requirements hereof; and/or

4.5.3 Terminate this Agreement.

SECTION 5. INDEMNIFICATION AND PROFESSIONAL'S RESPONSIBILITIES.

5.1 General Requirements. Professional shall indemnify, defend with counsel selected by the City, and hold harmless the City and its officials, officers, employees, agents, and volunteers from and against any and all losses, liability, claims, suits, actions, damages, and causes of action arising out of any personal injury, bodily injury, loss of life, or damage to property, or any violation of any federal, state, or municipal law or ordinance, to the extent caused, in whole or in part, by the willful misconduct or negligent acts or omissions of Professional or its employees, subcontractors, or agents, by acts for which they could be held strictly liable, or by the quality or character of their work. The foregoing obligation of Professional shall not apply when (1) the injury, loss of life, damage to property, or violation of law arises wholly from the negligence or willful misconduct of the City or its officers, employees, agents, or volunteers and (2) the actions of Professional or its employees, subcontractor, or agents have contributed in no part to the injury, loss of life, damage to property, or violation of law. It is understood that the duty of Professional to indemnify and hold harmless includes the duty to defend as set forth in Section 2778 of the California Civil Code. Acceptance by City of insurance certificates and endorsements required under this Agreement does not relieve Professional from liability under this indemnification and hold harmless clause. This indemnification and hold harmless clause shall apply to any damages or claims for damages whether or not such insurance policies shall have been determined to apply. By execution of this Agreement, Professional acknowledges and agrees to the provisions of this Section and that it is a material element of consideration.

5.2 PERS Indemnification. In the event that Professional or any employee, agent, or subcontractor of Professional providing services under this Agreement is determined by a court of competent jurisdiction or the California Public Employees Retirement System ("PERS") to be eligible for enrollment in PERS as an employee of City, Professional shall indemnify, defend, and hold harmless City for the payment of any and all employee and/or employer contributions for PERS benefits on behalf of Professional or its employees, agents, or subcontractors, as well as for the payment of any penalties and interest on such contributions, which would otherwise be the responsibility of City, and any attorneys' fees and costs incurred by the City to enforce this Section.

5.3 Design Professionals. To the extent that the services under this Agreement include design professional services subject to California Civil Code Section 2782.8, as may be amended from time to time, Professional's duty to indemnify under Sections 5.1 and 5.2 shall only be to the maximum extent permitted by California Civil Code Section 2782.8.

SECTION 6. STATUS OF PROFESSIONAL.

6.1 Independent Contractor. At all times during the term of this Agreement, Professional shall be an independent contractor as defined in Labor Code Section 3353, and shall not be an employee of City. Nothing contained in this Agreement shall be construed to be inconsistent with the foregoing relationship or status. City shall have the right to control Professional only insofar as the results of Professional's services rendered pursuant to this Agreement and

assignment of personnel pursuant to Subparagraph 1.3; however, otherwise City shall not have the right to control the means and methods by which Professional accomplishes services rendered pursuant to this Agreement. Professional shall have no power or authority by this Agreement to bind the City in any respect. All employees and agents hired or retained by Professional are employees and agents of Professional and not of the City. The City shall not be obligated in any way to pay any wage claims or other claims made against Professional by any such employees or agents, or any other person resulting from performance of this Agreement.

Notwithstanding any other City, state, or federal policy, rule, regulation, law, or ordinance to the contrary, Professional and any of its employees, agents, and subcontractors providing services under this Agreement shall not qualify for or become entitled to, and hereby agree to waive any and all claims to, any compensation, benefit, or any incident of employment by City, including but not limited to eligibility to enroll in PERS as an employee of City and entitlement to any contribution to be paid by City for employer contributions and/or employee contributions for PERS benefits. Professional shall not allow any employee, agent or subcontractor to become eligible for a claim for PERS benefits.

6.2 Professional Not an Agent. Except as City may specify in writing, Professional shall have no authority, express or implied, to act on behalf of City in any capacity whatsoever as an agent. Professional shall have no authority, express or implied, pursuant to this Agreement to bind City to any obligation whatsoever.

SECTION 7. LEGAL REQUIREMENTS.

7.1 Governing Law. The laws of the State of California shall govern this Agreement.

7.2 Compliance with Applicable Laws. Professional and any subcontractors shall comply with all laws and regulations applicable to the performance of the work hereunder, including but not limited to, the California Building Code, the Americans with Disabilities Act, and any copyright, patent or trademark law. Professional's failure to comply with any law(s) or regulation(s) applicable to the performance of the work hereunder shall constitute a breach of contract.

7.3 Other Governmental Regulations. To the extent that this Agreement may be funded by fiscal assistance from another governmental entity, Professional and any subcontractors shall comply with all applicable rules and regulations to which City is bound by the terms of such fiscal assistance program.

7.4 Licenses and Permits. Professional represents and warrants to City that Professional and its employees, agents, and any subcontractors have all licenses, permits, qualifications, and approvals of whatsoever nature that are legally required to practice their respective professions. Professional represents and warrants to City that Professional and its employees, agents, any subcontractors shall, at their sole cost and expense, keep in effect at all times during the term of this Agreement any licenses, permits, and approvals that are legally required to practice their respective professions. In addition to the foregoing,

Professional and any subcontractors shall obtain and maintain valid Business Licenses from City during the term of this Agreement.

7.5 Nondiscrimination and Equal Opportunity. Professional shall not discriminate, on the basis of a person's race, religion, color, national origin, age, physical or mental handicap or disability, medical condition, marital status, sex, or sexual orientation, against any employee, applicant for employment, subcontractor, bidder for a subcontract, or participant in, recipient of, or applicant for any services or programs provided by Professional under this Agreement. Professional shall comply with all applicable federal, state, and local laws, policies, rules, and requirements related to equal opportunity and nondiscrimination in employment, contracting, and the provision of any services that are the subject of this Agreement, including but not limited to the satisfaction of any positive obligations required of Professional thereby.

Professional shall include the provisions of this Subsection in any subcontract approved by the Contract Administrator or this Agreement.

SECTION 8. TERMINATION AND MODIFICATION.

8.1 Termination. City may cancel this Agreement at any time and without cause upon written notification to Professional.

Professional may cancel this Agreement upon _ days' written notice to City and shall include in such notice the reasons for cancellation.

In the event of termination, Professional shall be entitled to compensation for services performed to the effective date of termination; City, however, may condition payment of such compensation upon Professional delivering to City any or all documents, photographs, computer software, video and audio tapes, and other materials provided to Professional or prepared by or for Professional or the City in connection with this Agreement.

8.2 Extension. City may, in its sole and exclusive discretion, extend the end date of this Agreement beyond that provided for in Subsection 1.1. Any such extension shall require a written amendment to this Agreement, as provided for herein. Professional understands and agrees that, if City grants such an extension, City shall have no obligation to provide Professional with compensation beyond the maximum amount provided for in this Agreement. Similarly, unless authorized by the Contract Administrator, City shall have no obligation to reimburse Professional for any otherwise reimbursable expenses incurred during the extension period.

8.3 Amendments. The Parties may amend this Agreement only by a writing signed by all the Parties.

8.4 Assignment and Subcontracting. City and Professional recognize and agree that this Agreement contemplates personal performance by Professional and is based upon a determination of Professional's unique personal competence, experience, and specialized personal knowledge. Moreover, a substantial inducement to City for entering into this

Agreement was and is the professional reputation and competence of Professional. Professional may not assign this Agreement or any interest therein without the prior written approval of the Contract Administrator. Professional shall not subcontract any portion of the performance contemplated and provided for herein, other than to the subcontractors noted in the proposal, without prior written approval of the Contract Administrator.

8.5 **Survival.** All obligations arising prior to the termination of this Agreement and all provisions of this Agreement allocating liability between City and Professional shall survive the termination of this Agreement.

8.6 **Options upon Breach by Professional.** If Professional materially breaches any of the terms of this Agreement, City's remedies shall include, but not be limited to, the following:

8.6.1 Immediately terminate the Agreement;

8.6.2 Retain the plans, specifications, drawings, reports, design documents, and any other work product prepared by Professional pursuant to this Agreement;

8.6.3 Retain a different Professional to complete the services described in Exhibit A not finished by Professional; and

8.6.4 Charge Professional the difference between the cost to complete the services described in Exhibit A that is unfinished at the time of breach and the amount that City would have paid Professional pursuant to Section 2 if Professional had completed the work.

SECTION 9. KEEPING AND STATUS OF RECORDS.

9.1 **Records Created as Part of Professional's Performance.** All reports, data, maps, models, charts, studies, surveys, photographs, memoranda, plans, studies, specifications, records, files, or any other documents or materials, in electronic or any other form, that Professional prepares or obtains pursuant to this Agreement and that relate to the matters covered hereunder shall be the property of the City. Professional hereby agrees to deliver those documents to the City upon termination of the Agreement. It is understood and agreed that the documents and other materials, including but not limited to those described above, prepared pursuant to this Agreement are prepared specifically for the City and are not necessarily suitable for any future or other use. City and Professional agree that, until final approval by City, all data, plans, specifications, reports and other documents are confidential and will not be released to third parties without prior written consent of both parties.

9.2 **Professional's Books and Records.** Professional shall maintain any and all ledgers, books of account, invoices, vouchers, canceled checks, and other records or documents evidencing or relating to charges for services or expenditures and disbursements charged to the City under this Agreement for a minimum of three (3) years, or for any longer period required by law, from the date of final payment to the Professional pursuant to this Agreement.

9.3 Inspection and Audit of Records. Any records or documents that Section 9.2 of this Agreement requires Professional to maintain shall be made available for inspection, audit, and/or copying at any time during regular business hours, upon oral or written request of the City. Under California Government Code Section 8546.7, if the amount of public funds expended under this Agreement exceeds TEN THOUSAND DOLLARS ($10,000.00), the Agreement shall be subject to the examination and audit of the State Auditor, at the request of City or as part of any audit of the City, for a period of three (3) years after final payment under the Agreement.

SECTION 10. MISCELLANEOUS PROVISIONS.

10.1 Attorneys' Fees. If a Party to this Agreement brings any action, including an action for declaratory relief, to enforce or interpret the provision of this Agreement, the prevailing Party shall be entitled to reasonable attorneys' fees in addition to any other relief to which that Party may be entitled. The court may set such fees in the same action or in a separate action brought for that purpose.

10.2 Venue. In the event that either Party brings any action against the other under this Agreement, the Parties agree that trial of such action shall be vested exclusively in the state courts of California in the County of Sacramento or in the United States District Court for the Eastern District of California.

10.3 Severability. If a court of competent jurisdiction finds or rules that any provision of this Agreement is invalid, void, or unenforceable, the provisions of this Agreement not so adjudged shall remain in full force and effect. The invalidity in whole or in part of any provision of this Agreement shall not void or affect the validity of any other provision of this Agreement.

10.4 No Implied Waiver of Breach. The waiver of any breach of a specific provision of this Agreement does not constitute a waiver of any other breach of that term or any other term of this Agreement.

10.5 Successors and Assigns. The provisions of this Agreement shall inure to the benefit of and shall apply to and bind the successors and assigns of the Parties.

10.6 Use of Recycled Products. Professional shall prepare and submit all reports, written studies and other printed material on recycled paper to the extent it is available at equal or less cost than virgin paper.

10.7 Conflict of Interest. Professional may serve other clients, but none whose activities within the corporate limits of City or whose business, regardless of location, would place Professional in a "conflict of interest," as that term is defined in the Political Reform Act, codified at California Government Code Section 81000 *et seq.*

Professional shall not employ any City official in the work performed pursuant to this Agreement. No officer or employee of City shall have any financial interest in this Agreement that would violate California Government Code Sections 1090 *et seq.*

Professional hereby warrants that it is not now, nor has it been in the previous twelve (12) months, an employee, agent, appointee, or official of the City. If Professional was an employee, agent, appointee, or official of the City in the previous twelve months, Professional warrants that it did not participate in any manner in the forming of this Agreement. Professional understands that, if this Agreement is made in violation of Government Code §1090 *et seq.*, the entire Agreement is void and Professional will not be entitled to any compensation for services performed pursuant to this Agreement, including reimbursement of expenses, and Professional will be required to reimburse the City for any sums paid to the Professional. Professional understands that, in addition to the foregoing, it may be subject to criminal prosecution for a violation of Government Code § 1090 and, if applicable, will be disqualified from holding public office in the State of California.

10.8 Solicitation. Professional agrees not to solicit business at any meeting, focus group, or interview related to this Agreement, either orally or through any written materials.

10.9 Contract Administration. This Agreement shall be administered by **Drew Hart** ("Contract Administrator"). All correspondence shall be directed to or through the Contract Administrator or his or her designee.

10.10 Notices.

Any written notice to City shall be sent to:

ATTN: Drew Hart
Principal Transportation Planner, Public Works Department
City of Rancho Cordova
2729 Prospect Park Drive
Rancho Cordova, CA 95670

Any written notice to Professional shall be sent to:
ATTN: Cheryl Croshere, Executive Director
50 Corridor TMA
909 12th Street, Ste 100A, Sacramento, CA 95814
executivedirector@50corridor.com

10.11 Professional Seal. Where applicable in the determination of the Contract Administrator or when required by law, the first page of a technical report, first page of design specifications, and each page of construction drawings shall be stamped/sealed and signed by the licensed professional responsible for the report/design preparation. The stamp/seal shall be in a block entitled "Seal and Signature of Registered Professional with report/design responsibility," as in the following example.

_____ Seal and Signature of Registered Professional with report/design responsibility.

10.12 **Integration.** This Agreement, including the scope of services attached hereto and incorporated herein as Exhibit A, and the compensation schedule attached hereto and incorporated herein as Exhibit B, represents the entire and integrated agreement between City and Professional and supersedes all prior negotiations, representations, or agreements, either written or oral.

10.13 **IRS Form W-9.** Professional shall complete and submit Internal Revenue Service Form W-9 to the City before execution of this Agreement. The City's Finance Director shall have authority to waive this requirement.

IN WITNESS WHEREOF, the parties have executed this Agreement as of the day and year set forth above, which date shall be considered the effective date of this Agreement.

EXHIBIT A
SCOPE OF SERVICES

50 Corridor TMA

Exhibit A - Scope of Services

Background

The purpose of this memo is to outline the Transportation Demand Management (TDM) services that the 50 Corridor Transportation Management Association (TMA) proposes to provide to the City of Rancho Cordova in Transit Zones 1, 2, and 3 over the course of three years, from July 2026 through June 2029. This memo is organized into three sections:

1. Background
2. Scope of Services
3. Cost Estimate

Rancho Cordova Transit Zones

Transit Zone 1

The boundaries of Transit Zone 1 and the former County Service Area 10 Benefit Zone 1 are congruent. Transit Zone 1 covers the Zinfandel Special Planning Area, which is generally located south of International Boulevard, north of Mather Boulevard, east of Femoyer Street, and West of the Folsom South Canal.

Transportation service fees are levied annually from property owners within the Transit Zone, and this funding is earmarked for transit shuttle and other transportation demand management services described in the CSA Formation Report and in conditions of development included in County Ordinance No SCZ 2000-018 and related planning documents, including a Transportation System Management Plan and AQ-15 Plan.

Transit Zone 2

The boundaries of Transit Zone 2 and the former County Service Agreement 10 Benefit Zone 2 are congruent. Transit Zone 2 covers the Sunrise Douglas Community Plan and SunRidge Specific Plan Areas, which are generally located south of Douglas Boulevard (plus a small triangular section adjoining to the north), north of Kiefer Boulevard, east of Sunrise Boulevard, and west of Grant Line Road. Transportation service fees are levied annually from property owners within the Transit Zone, and this funding is earmarked for transit shuttle and other transportation demand management services described in the CSA Formation Report and in conditions of development included in County Ordinance SCZ 2002-014 and related planning documents, including a Transportation System Management Plan and AQ-15 Plan. In particular, Transit Zone 2 has a targeted goal of 30% reduction in daily vehicle trips.

Transit Zone 3

Transit Zone 3 covers the Capital Village Area, as well as other new developments, such as Rio Del Oro, and several smaller communities that are adjacent to Zone 2. Capital Village is generally located south of

Disk Drive, north of International Drive, east of Zinfandel Drive, and west of Prospect Park Drive. Rio Del Oro is generally located south of White Rock Road, north of Douglas Road, east of Luyung Drive, and west of Americanos Boulevard. Zones 8, 31, and 33 are also located south of Douglas Boulevard, while Zone 34 is located north of Douglas Boulevard, north of Hillside Park. Transportation service fees are levied annually from property owners within the Transit Zone, and this funding is earmarked for transit shuttle and other transportation demand management services.

50 TMA History

The 50 Corridor TMA was founded in 1994 as the Folsom-Rancho Cordova-El Dorado Transportation Management Association. In its 30+ year history, it has served as a public private partnership delivering programs and innovative solutions that empower people to choose modes of transportation that enhance economic, environmental and public health. This includes serving as the exclusive TMA to six different residential communities:

1. Capital Village and Rio Del Oro (City of Rancho Cordova)
2. Folsom Plan Area (City of Folsom)
3. North Vineyard Station Specific Plan Area (Unincorporated Sacramento County)
4. Rio del Oro (City of Rancho Cordova)
5. Sunrise Douglas Community Plan/SunRidge Specific Plan Areas (City of Rancho Cordova)
6. Zinfandel Special Planning Area (City of Rancho Cordova)

With the City of Rancho Cordova, we also share a Regional Carbon Reduction Program grant that allows us to extend these same services outside of the City's Transit Zones to the rest of the City's residents. That funding became available in October 2024 and will remain for five years.

We also have member employers representing over 95,000 employees along the US-50 corridor and within the City of Sacramento. To all of these constituents, we serve as a point of reference for new innovations and options in sustainable transportation, providing information, education, and direct services to help residents and workers choose sustainable modes of transportation.

50 TMA Approach

We provide information and strategies to help individuals assess their travel habits and identify those trips they can most conveniently shift to sustainable modes. We make these strategies broadly appealing so that everyone has an opportunity to shift their behavior and so that small changes by many people can create change at scale.

Our approach to TDM is backed by the latest research, including best practices, case studies, and academic literature. The gold standard reference for measuring trip reduction and VMT reduction effectiveness in our region is the Handbook for Analyzing Greenhouse Gas Emission Reductions, Assessing Climate Vulnerabilities, and Advancing Health and Equity, published in August 2021 by the Sacramento Air Quality Management District, among other government agencies. Estimates of VMT reduction effectiveness included in the Scope of Services below are taken from this resource, unless otherwise footnoted.

Scope of Services

The 50 Corridor Transportation Management Association will provide the City of Rancho Cordova the following scope of services for Transit Zones 1, 2, and 3 for July 2026 through June 2029. Costs include staff time per the billing rate summary, hard program costs, marketing, data purchase, and reporting. Marketing costs include: printing, postage, and ad-buys. Hard program costs include but are not limited to: subsidies, event expenses (food, rentals, vendor services), incentives, and prizes. Other costs include subcontractors, subconsultants, and legal services. These costs are estimates; funds may be reallocated between tasks and zones with approval from the City.

Task 1 - School Shuttle

Ridesharing programs, including subsidized vanpool or shuttle programs, have been shown to reduce VMT by up to 8%. In Transit Zones 2 and 3, work associated with this task will include subcontracting with a vendor to provide shuttle service to and from Albiani Middle and Pleasant Grove High Schools, which share a campus in Elk Grove, on weekday mornings and afternoons when school is in session. The shuttles will consist of up to three 9-passenger electric vans driven by professional drivers, in compliance with all relevant motor vehicle and operating codes, as well as California Education Code Article 5 Section 39877, which applies to Home to School Transportation; specifically, it applies to drivers of vehicles transportation 10 or fewer passengers (ie, 9 students). Our proposed budget assumes the following costs:

- $272,669-$289,265 per year vendor contract
- $2,000-$4,000 per year for legal assistance
- $4,500 per year for BusWhere tracking app
- $23,571 revenue per year in student fares, subtracted ($5 per student per day, roundtrip, minus transaction fees)

Task 2 - Trip Reduction Services

Trip reduction programs have been shown to reduce VMT by between 4% and 26% depending on the level of reporting and penalties for missing trip reduction targets. Such programs include a standard suite of TDM strategies, including:

- Rideshare matching
- Discounted transit fare
- Encouragement and incentives for bicycling
- Vanpool coordination
- Guaranteed ride

Work associated with this task would include the following:

- Provide incentives to residents and employees within the Transit Zones when they walk, bike, carpool, and take transit. May also include subsidies for vanpools, carsharing, or electric mobility,

such as in-home electric vehicle chargers and electric-assist bicycles when those subsidies are determined to be the most effective emissions reduction strategy for a household.

- Provide transit subsidies to residents and employees within each Transit Zone; we currently offer residents Connect Cards with up to $25 per month.
- Provide guaranteed rides to support mode shift, including subsidized rides by Lyft/Uber, Yellow Cab and Enterprise Rental Car to support residents when they choose sustainable modes and need a ride.
- Bicycle tune-ups, family-friendly bike rides, bike safety and education workshops, ebike demonstrations and test-rides, and/or ebike conversion workshops to encourage bicycling for public health, convert recreational riders into active transportation cyclists, and empower riders to make more trips by bicycling. Up to 9 events per year.
- Support and promote May is Bike Month through NorCal GO online platform and in-person events.
- This task also includes staff time to administer incentives, subsidies, and guaranteed ride, as well as to plan and carry out events.

Task 3 - Marketing & Engagement

Marketing alone to support trip reduction strategies has been shown to reduce VMT by up to 4%. In fact, a pilot carried out in Rancho Cordova in 2003-2004 achieved a 4% reduction in VMT, or about 160,000 miles per year, through individualized marketing to promote light rail as an alternative to driving.[1] Work completed towards this task will continue to take this pilot as inspiration and draw on best practices from other TMAs around the country.

Community-based travel planning is a related trip-reduction strategy that can be integrated with our marketing efforts. This might include sending maps to residents' homes that show transit routes and bikeways from their neighborhood to popular nearby destinations. Such community-based travel planning has been shown to reduce VMT by over 2%.

Work associated with this task would include the following:

- Marketing for these incentive programs, subsidies, events, and guaranteed ride, as well as education around sustainable transportation options and community-based travel planning via direct mail, social media ads, video streaming ads, email, events, and other marketing channels.
- New resident welcome packs and coordination with local real estate agents and developer staff.
- Phonebanking residents to talk to them about how they get around and the programs and services we offer.
- May also include professional services from a creative firm.

[1] *Federal Transit Administration Individualized Marketing Demonstration Program,* 2006. Available at: https://www.transit.dot.gov/sites/fta.dot.gov/files/docs/IMDP_Final_Report.pdf

Task 4 - Smart Routes to School

School pools and smart routes to school programs do not have quantified VMT benefits, according to the *Handbook for Analyzing Greenhouse Gas Emission Reductions*, but the Handbook does include the strategies as options that may have co-benefits when combined with other VMT reduction strategies. It also means there simply may not be enough research to support a quantified VMT reduction.

Work associated with this task would include the following:

- Continue to coordinate Walk and Roll to School Days at McGarvey and Sunrise Elementary Schools, as well as expanding to Cypress Grove Elementary School when it opens in July 2026.
- Support may include using Active4.me barcode scanning technology, bike tuneups, special assemblies, and/or friendly competition between the schools.
- Direct costs may include printing costs, swag, snacks, and other incentives, as well as rewards or prizes and other forms of encouragement.
- May also include subconsultant services from Safe Routes to School education professionals.

Task 5 - Project Management

Work associated with this task would include staff time to participate in monthly check-ins with the City project manager, complete monthly invoices and periodic reports to City staff and/or City Council.

EXHIBIT B
COMPENSATION SCHEDULE

50 Corridor TMA

Exhibit B - Cost Estimate

Cost Estimate - All Zones Combined

	FY 26/27	FY 27/28	FY 28/29	Total
Task 1 - School Shuttle	$325,188	$317,874	$328,016	**$971,078**

MEMORANDUM

ITEM 9.13.

DATE: May 18, 2026

TO: Honorable Mayor and Council Members

FROM: Stefan Heisler, Housing Manager

SUBJECT: **A RESOLUTION APPROVING A LOAN AGREEMENT BETWEEN THE CITY OF RANCHO CORDOVA AND RANCHO CORDOVA OWNER L.P., FOR THE ASTERIA FLATS RENTAL AFFORDABLE HOUSING DEVELOPMENT LOCATED AT ASSESSOR'S PARCEL NUMBER (APN) 067-0430-018-0000**

RECOMMENDATION

Adopt the Resolution.

RESULT OF RECOMMENDED ACTION

Adoption of the Resolution would authorize the City Manager to execute a Loan Agreement, and related documents, between the City of Rancho Cordova and Rancho Cordova Owner L.P., in the amount of Five Million Dollars ($5,000,000), allowing the developer to proceed with the construction of the Asteria Flats affordable housing development project, a 236-unit rental affordable housing development located at APN 067-0430-018-0000.

BACKGROUND

Rancho Cordova Owner L.P., an affiliate of Lincoln Avenue Communities is proposing to build the Asteria Flats affordable housing development (the “Project”) on the southeast corner of Sunrise Boulevard and Chrysanthy Boulevard, APN 067-0430-018-0000. The Project consists of 236 units of multifamily housing, indoor and outdoor on-site amenities, parking, and landscaping. The units will include a mix of 1-,2-,3-, and 4-bedroom apartment homes ranging from 764 square feet to 1,414 square feet. The floorplans include full kitchen, living space, bedroom(s), indoor storage, and laundry closet. On-site indoor amenities include a clubhouse building in the center of the site with leasing office, lounge areas, large-screen television, fitness room, restrooms, leasing office, long-term bike storage, laundry room, package and mail room, and resident services space for after school programs and adult education classes. On-site outdoor amenities include a swimming pool, lounge outdoor restrooms & showers for pool-goers, pergola with grilling area, and two playgrounds in addition to several passive outdoor spaces. The income affordability levels will range from 30% area median income (AMI) to 70% AMI, or annual income of approximately $39,000 to $90,000 for a household of four.

The Project successfully applied for and received an allocation of private activity bonds from the California Debt Limit Allocation Committee (“CDLAC”) and 4% Federal tax credits from the California Tax Credit Allocation Committee (“CTCAC”) on December 10, 2025. The city

subsequently held a public hearing on January 5, 2026 pursuant to the federal Tax Equity and Fiscal Responsibility Act ("TEFRA") where the City Council adopted Resolution No. 4-2026 approving the issuance of multifamily housing revenue bonds by the California Municipal Finance Authority ("CMFA") to finance the construction of the Project. On January 20, 2026 the City Council adopted Resolution No. 18-2026, making a funding commitment to the Asteria Flats project of Five Million Dollars. Adoption of this Resolution (Attachment 1) will take the next step to formally execute a loan agreement for this funding.

This Project is the third multifamily development to apply for ministerial design review approval under the city's new Multifamily Streamlined Design Review process, which was adopted by the City Council on August 16, 2021. On December 5, 2025 the city's Planning Department issued a Notice of Decision providing Design Review approval for the Project and a CEQA exemption as a ministerial project pursuant to section 15268 of the California Environmental Quality Act Guidelines. The Notice of Decision is attached to this report.

The Project will support the city's housing needs and contribute to the 9,067 of affordable housing units needed by 2029 as outlined in the 2021 adopted Housing Element. Asteria Flats will contribute development impact fees and ongoing annual Community Facilities District (CFD) payments, which will support city infrastructure.

This funding will be provided to the Project in the form of a permanent loan bearing 3% annual interest with a term of fifty-five (55) years and will be sourced from the city's Housing Trust Fund, or other city funding dedicated for affordable housing projects.

The total Project costs are approximately $121,000,000. Included in this is nearly $90,000,000 that the Project has already received from state and federal sources in the form of $50,000,000 of tax credit equity and approximately $40,000,000 of tax-exempt bonds. The city's proposed subsidy of $5,000,000 equates to approximately $21,200 per unit, which is lower than the city's typical per unit subsidy. Additional examples are provided below for comparison.

- Asteria Flats - $21,200 per unit
- Mather Veterans Village Phase 1 - $40,000 per unit
- Mather Veterans Village Phase 2 - $21,400 per unit
- Mather Veterans Village Phase 3 - $18,900 per unit
- Mather Veterans Village Phase 4 - $42,850 per unit (ARPA and CPF funding)
- Sunrise Crossing Apartments - $33,500 per unit

The Project will begin construction in June 2026 with occupancy expected in the second quarter of 2028.

For the purposes of Article XXXIV of the State of California Constitution, this City Loan commitment does not constitute a development of a low rent housing project by a state public body.

FISCAL IMPACT AND FUNDING SOURCE

Adoption of the Resolution would commit $5,000,000 from the city's Housing Trust Fund, or other city funding dedicated for affordable housing projects, to the Developer for the Asteria Flats Project. The city's Housing Trust Fund has a current balance of approximately

$9,400,000, with projected annual revenues of approximately $1,100,000 per year for Fiscal Years 25/26 and 26/27.

CITY OF RANCHO CORDOVA

RESOLUTION NO. XX-2026

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA, STATE OF CALIFORNIA, APPROVING A LOAN AGREEMENT BETWEEN THE CITY OF RANCHO CORDOVA AND RANCHO CORDOVA OWNER, L.P., FOR THE ASTERIA FLATS RENTAL AFFORDABLE HOUSING DEVELOPMENT LOCATED AT APN 067-0430-018-0000

WHEREAS, the City of Rancho Cordova (the "city") has recognized the need to provide affordable housing to all economic segments of the city; and

WHEREAS, Lincoln Avenue Communities (the "developer") proposes to develop a housing project, the Asteria Flats, located on the 11.76 acre southeast corner of Sunrise Boulevard and Chrysanthy Boulevard, APN 067-0430-018-0000 (the "property"), which will include two hundred thirty four (234) units of multifamily rental apartments serving families with rents affordable to households earning 30%-70% of area median income ("AMI") two (2) unrestricted manager's units (for a total of 236 units), and resident community space (the "project"), and has submitted a proposal for financial assistance from the city to maximize the affordability and amenities of project units; and

WHEREAS, the developer has requested a permanent loan from the city to develop the project in an amount not to exceed five million dollars ($5,000,000) to be used for project construction costs; and

WHEREAS, the use of the city's funds in the manner described below will be of benefit to the city in assisting in the development of affordable housing opportunities for workforce family households; and

WHEREAS, the developer has secured state tax credit and bond financing and intends to begin construction on the project; and

WHEREAS, on January 5, 2026, the city held a public hearing as required by the Tax Equity and Fiscal Responsibility Act and adopted Resolution No. 4-2026 approving the issuance of multifamily housing revenue bonds to finance the construction of the project; and

WHEREAS, the city's Planning Department issued a Notice of Decision dated December 5, 2025, providing design review approval for the Project through the city's Multifamily Streamlined Design Review process; and

WHEREAS, the proposed project would provide housing that furthers the goals and policies of the city's General Plan Housing Element in a manner consistent with the state-mandated Regional Housing Needs Allocation requirement determined by the Sacramento Area Council of Governments for the city; and

WHEREAS, on January 20, 2026, the City Council adopted Resolution No. 18-2026 making a funding commitment of $5,000,000 from the city's Housing Trust Fund or other city funding dedicated for affordable housing projects, to the Project that would be memorialized with a subsequent Loan Agreement and related documents including the following terms: the loan will bear three percent (3%) annual interest, a term of fifty-five (55) years, with payments to

be made from residual receipt; and

WHEREAS, for the purposes of Article XXXIV of the State of California Constitution this city financial commitment does not constitute a development of a low-rent housing project by a state public body; and

WHEREAS, the project is exempt from the California Environmental Quality Act ("CEQA") under the exemption for ministerial development projects (CEQA Guidelines § 15268); and

WHEREAS, the city desires to enter into a Loan Agreement with the developer for the development of the project on the property.

NOW, THEREFORE, BE IT HEREBY RESOLVED THE BY CITY COUNCIL OF THE CITY OF RANCHO CORDOVA as follows:

1. The City Council finds that the Project is exempt from CEQA under CEQA Guidelines Section 15268, Ministerial Projects. The City Council further finds that the Project is consistent with the city's General Plan, and the city's Zoning Code. The city certified an Environmental Impact Report ("EIR") for the General Plan and conducted additional environmental review for the Zoning Code. Therefore, no additional CEQA environmental review is required.

2. The City Manager is authorized, on behalf of the city, to execute with Developer a Loan Agreement, substantially in the form on file with the City Clerk, and to execute such other instruments including without limitation an Affordable Housing Regulatory Agreement and to take such other actions as are necessary to carry out the intent of this Resolution.

3. If any provision, sentence, clause, section or part of this Resolution is found to be unconstitutional, illegal or invalid, such finding shall affect only such provision, sentence, clause, section or part, and shall not affect or impair any of the remaining parts.

4. The above recitals are true and correct. The City Clerk shall certify the passage and adoption of this Resolution, and the minutes of this meeting shall so reflect the above City Council action.

PASSED AND ADOPTED by the City Council of the City of Rancho Cordova on the 18th day of May 2026 by the following vote:

CITY OF RANCHO CORDOVA, PLANNING DIVISION

NOTICE OF DECISION

Dated: December 5, 2025

Pursuant to Chapter 23.137 of the Rancho Cordova Municipal Code (RCMC) and the Multifamily Design Guidelines, the Community Development Director (or Designee) made a decision to **approve** the Multifamily Streamlined Design Review for Asteria Flats (MSDR-1222-0001), a new 236-unit affordable housing apartment complex to be located at the southeast corner of Chrysanthy Boulevard and Sunrise Boulevard (APN: 067-0430-018-0000). The approval is subject to the conditions of approval attached to this Notice of Decision.

Applicant

Lincoln Avenue Communities
401 Wilshire Boulevard, 11th Floor
Santa Monica, CA 90401

ADDRESS/APN: SEC of Sunrise Blvd. and Chrysanthy Blvd.; APN: 067-0430-018-0000

ZONING: General Commercial (GC)

PROJECT PLANNER: Arlene Granadosin-Jones, AICP

CEQA

Ministerial Activities under CEQA

Pursuant to section 15268 Ministerial Project of the California Environmental Quality Act (CEQA) Guidelines, ministerial projects are exempt from the requirements of CEQA. The proposed project is subject to a ministerial design review process as outlined in Rancho Cordova Municipal Code (RCMC) Sections 23.137. The standards outlined in this section, relate to aesthetic and design standards – architecture, setbacks, landscaping, lighting, and similar features.

PROPOSED FINDINGS & EVIDENCE:

Multifamily Housing Streamlined Design Review

The Community Development Director made the following findings for a multifamily housing project eligible for the Multifamily Housing Streamlined Design Review Permit (RCMC Section 23.137.080) prior to approving this request:

1. **Finding**: The project substantially conforms with the standards of the multifamily design guidelines.

   Evidence: The proposed project has been reviewed using the standards set forth in the Rancho Cordova Multifamily Design Guidelines. Per the guidelines, the proposed project orients building facades to frame streets and public spaces to promote a pedestrian-friendly environment. Overall, the building frontages address the existing land use context and street environment appropriately by locating structures at the front of the street and providing private and common open space that creates visual interest that breaks up the massing of multi-level structures. The proposed project

PLANNING DEPARTMENT
2729 Prospect Park Drive | Rancho Cordova, CA 95670
Phone: (916) 851-8750 | Fax: (916) 851-8762

utilizes a Mediterranean architectural style and provides detailed articulation and enhancements that are consistent with the selected architectural style.

2. **Finding**: The project architectural style is either consistent with one of the type-specific architectural styles as established by the city or presents a cohesive architectural style and design with identifiable design features consistent with the chosen style.

   Evidence: The proposed project features buildings in a Mediterranean architectural style. The selected building materials, such as adobe brick, stucco, concrete roof tiles, accent shutters, and painted steel railings, are consistent with the selected architectural style. The Mediterranean architectural style has been utilized in the City of Rancho Cordova and the surrounding region and complements adjacent neighborhoods creating a cohesive environment. The placement of windows and balconies on the building elevations adds visual interest to the massing and form of the three-story buildings. And the use of a vibrant roof line further breaks down the overall mass and further enhances the facades on both sides of the street.

3. **Finding**: The project presents to fronting streets in a positive manner and provides frontage improvements that will support and encourage pedestrian circulation.

   Evidence: The proposed project orients building facades to frame streets and public spaces to promote a pedestrian-friendly environment. Overall, the building frontages address the existing land use context and street environment appropriately by locating structures at the front of the street and providing private and common open space that creates visual interest that breaks up the massing of multi-level structures. Street trees and landscaping also support a pleasant pedestrian environment that also supports the aesthetic improvement of the neighborhood.

4. **Finding**: The development is harmonious with existing and anticipated development of the area.

   Evidence: The proposed project is located on a site zone General Commercial (GC), which permits multi-family residential uses. The proposed project is adjacent to other parcels zoned for multi-family development. The surrounding neighborhood is a mix of residential uses, open space areas and parks, and commercial centers. The proposed project contributes to the mixed residential character of the area.

5. **Finding**: The project consists of high-quality design and materials, with architectural variety and appropriate articulation of facades.

   Evidence: The proposed project features buildings in a Mediterranean architectural style with dynamic and vibrant facades, adding visual interest to the community. The selected building materials, such as adobe brick, stucco, concrete roof tiles, accent shutters, and painted steel railings, contribute to a timeless and durable aesthetic. The placement of windows and balconies on the building elevations creates an engaging sense of movement, adding visual interest to the massing and form of the three-story buildings. The use of a vibrant roof line further breaks down the overall mass, enhancing the architectural composition and creating a dynamic facade.

PROJECT DESCRIPTION

The project site is south of Chrysanthy Blvd, and east of Sunrise Blvd. The project site consists of APN 067-0430-018.

Site Characteristics: The 11.76-acre project site is roughly square in shape, and vacant.

Surrounding Use: Multi-family development is planned to the east of the proposed project, but it is currently vacant. Treatment plant is to the south of the proposed project.

General Plan and Zoning Designations: In the General Plan, Parcel is designated Commercial Mixed Use (CMU). In zoning, the parcel is designated General Commercial (GC).

Proposed Project: The proposed project is an affordable apartment community with 236 total units which have access to indoor and outdoor amenities, parking, and landscaping. A mix of one, two, three and four-bedroom units are organized into 10 three-story buildings arranged around the site. Additionally, the site includes a clubhouse/amenity building, solar structures and supportive pool building.
The project will include a mix of one, two three and four-bedroom apartment homes ranging from 764 sf to 1,414 sf. The floorplans include a full kitchen, living space, bedroom(s), bathroom(s), indoor storage, and laundry closet.

Community amenities developed include a 6,190 SF one-story clubhouse/amenity building in the center of the site with lounge areas, large screen television, fitness room, restrooms,and leasing office. Outdoor amenities feature a swimming pool, and lounge. In addition to the clubhouse, the site features a supportive pool building with long-term indoor bike storage, outdoor restrooms & showers for pool-goers, and tot-lot.

Design Concept. The project design adheres to the Rancho Cordova Multi-family Design Guidelines for the Courtyard building / Bungalow Court, reviewing compliance with local standards and regulations.

The proposed concept features buildings in Mediterranean style with dynamic and vibrant facades, adding visual interest to the community. The selected building materials, such as adobe brick, stucco, concrete roof tiles, accent shutters, awnings, and painted steel railings, contribute to a timeless and durable aesthetic.

The placement of windows, the traditional balconies on the building elevations creates an engaging sense of movement, adding visual interest to the massing and form of the three-story buildings. The use of a vibrant roof line further breaks down the overall mass, enhancing the architectural composition and creating a dynamic facade.

NOTES:
1. See plant schedules on Sheet L3 for descriptions and proposed species.

PRELIMINARY TREE PALETTE

The schedule provided below indicates the trees proposed for this project. More detailed information for these trees species is included in the Preliminary Plant Schedule provided on sheet L3. The tree symbols in the schedule are at 30-scale.

PARKING LOT SHADE TREE — 42
Trees selected are included on the City`s approved tree list in the Design Guidelines.
Koelreuteria paniculata / Golden Rain Tree
Pistacia chinensis 'Keith Davey' / Keith Davey Chinese Pistache
Quercus shumardii / Shumard Oak
Ulmus propinqua 'JFS-Bieberich' / Emerald Sunshine® Elm
Zelkova serrata 'Village Green' / Village Green Sawleaf Zelkova

MEDIUM SIZE PARKING LOT SHADE TREE — 21
Trees with medium size canopy for locating in 6` wide planters, or underneath power lines
Acer truncatum / Shantung Maple
Pistacia x 'Red Push' / Red Push Pistache
Rhus lancea / African Sumac
Ulmus x 'Frontier' / Frontier Elm
Zelkova serrata 'JFS-KW1' / City Sprite® Japanese Zelkova

STREET TREE — 23
Tree along street frontages to meet CIty requirements and to provide uniform street frontage appearance with adjacent existing development. North-south tree to be evergreen, east-west trees to be deciduous. Species to conform to Design Guidelines.
Acer buergerianum / Trident Maple
Cladrastis kentukea / American Yellowwood
Ginkgo biloba 'Autumn Gold' / Maidenhair Tree
Quercus coccinea / Scarlet Oak
Quercus lobata / Valley Oak
Quercus virginiana / Southern Live Oak

SHADE TREE — 10
Medium to large tree with interesting branch pattern or structure.
Acer rubrum 'October Glory' / October Glory Red Maple
Acer truncatum x platanoides 'Warrenred' TM / Pacific Sunset Maple
Ginkgo biloba 'Autumn Gold' TM / Autumn Gold Maidenhair Tree
Quercus virginiana / Southern Live Oak

ACCENT TREE — 26
Small to medium sized tree with flowers or intersting branch structure for high visibilty areas and entries
Acer palmatum / Japanese Maple
Lagerstroemia indica / Crape Myrtle
Malus x 'Prairifire' / Prairifire Crabapple

UPRIGHT TREE — 10
Trees with a narrow or upright habit for smaller spaces.
Brachychiton populneus / Kurrajong
Carpinus betulus 'Fastigiata' / Upright European Hornbeam
Magnolia x 'Galaxy' / Galaxy Magnolia

EVERGREEN / SCREEN TREE — 10
Medium to large evergreen tree.
Laurus x 'Saratoga' / Saratoga Hybrid Laurel
Magnolia x 'Galaxy' / Galaxy Magnolia
Podocarpus gracilior / Fern Pine
Quercus suber / Cork Oak
Schinus molle / California Pepper

SMALL TREES — 21
Small to medium sized trees for placement under power lines, or to limit potential for shade onto solar facilities, provided to meet City minimum standards or design guidelines.
Laurus x 'Saratoga' / Saratoga Hybrid Laurel
Rhus lancea / African Sumac

CONCEPTUAL LANDSCAPE SCHEDULE

The schedule provided below indicates the landscape treatment for the site. More detailed information for these are included in the Preliminary Plant Schedule provided on sheet L3.

LAWN — 9,523 sf
Natural lawn/sod for resident recreation.
Lawn has a High water use (WUCOLS).
Turf Sod Bolero Plus / Fescue blend

PLANTER AREA — 116,685 sf
Areas with masses of shrubs, grasses, and ground cover of varying height, size, shape, color and texture. See Planting Area Note for additional description.

STABILIZED DECOMPOSED GRANITE — 1,101 sf
DG, 3/8" minus, with stabilizer and metal edging.

Existing landscape and street frontage improvements to remain. Infill holes in landscape with matching species (5-gallon min. container size). Modify/adjust the existing irrigation system to include any new planting, and to provide continued watering throughout the length of construction of this project. Preserve and protect all landscape and built elements; restore any damage that occurs to existing elements to their current state, or as otherwise acceptable to the City.

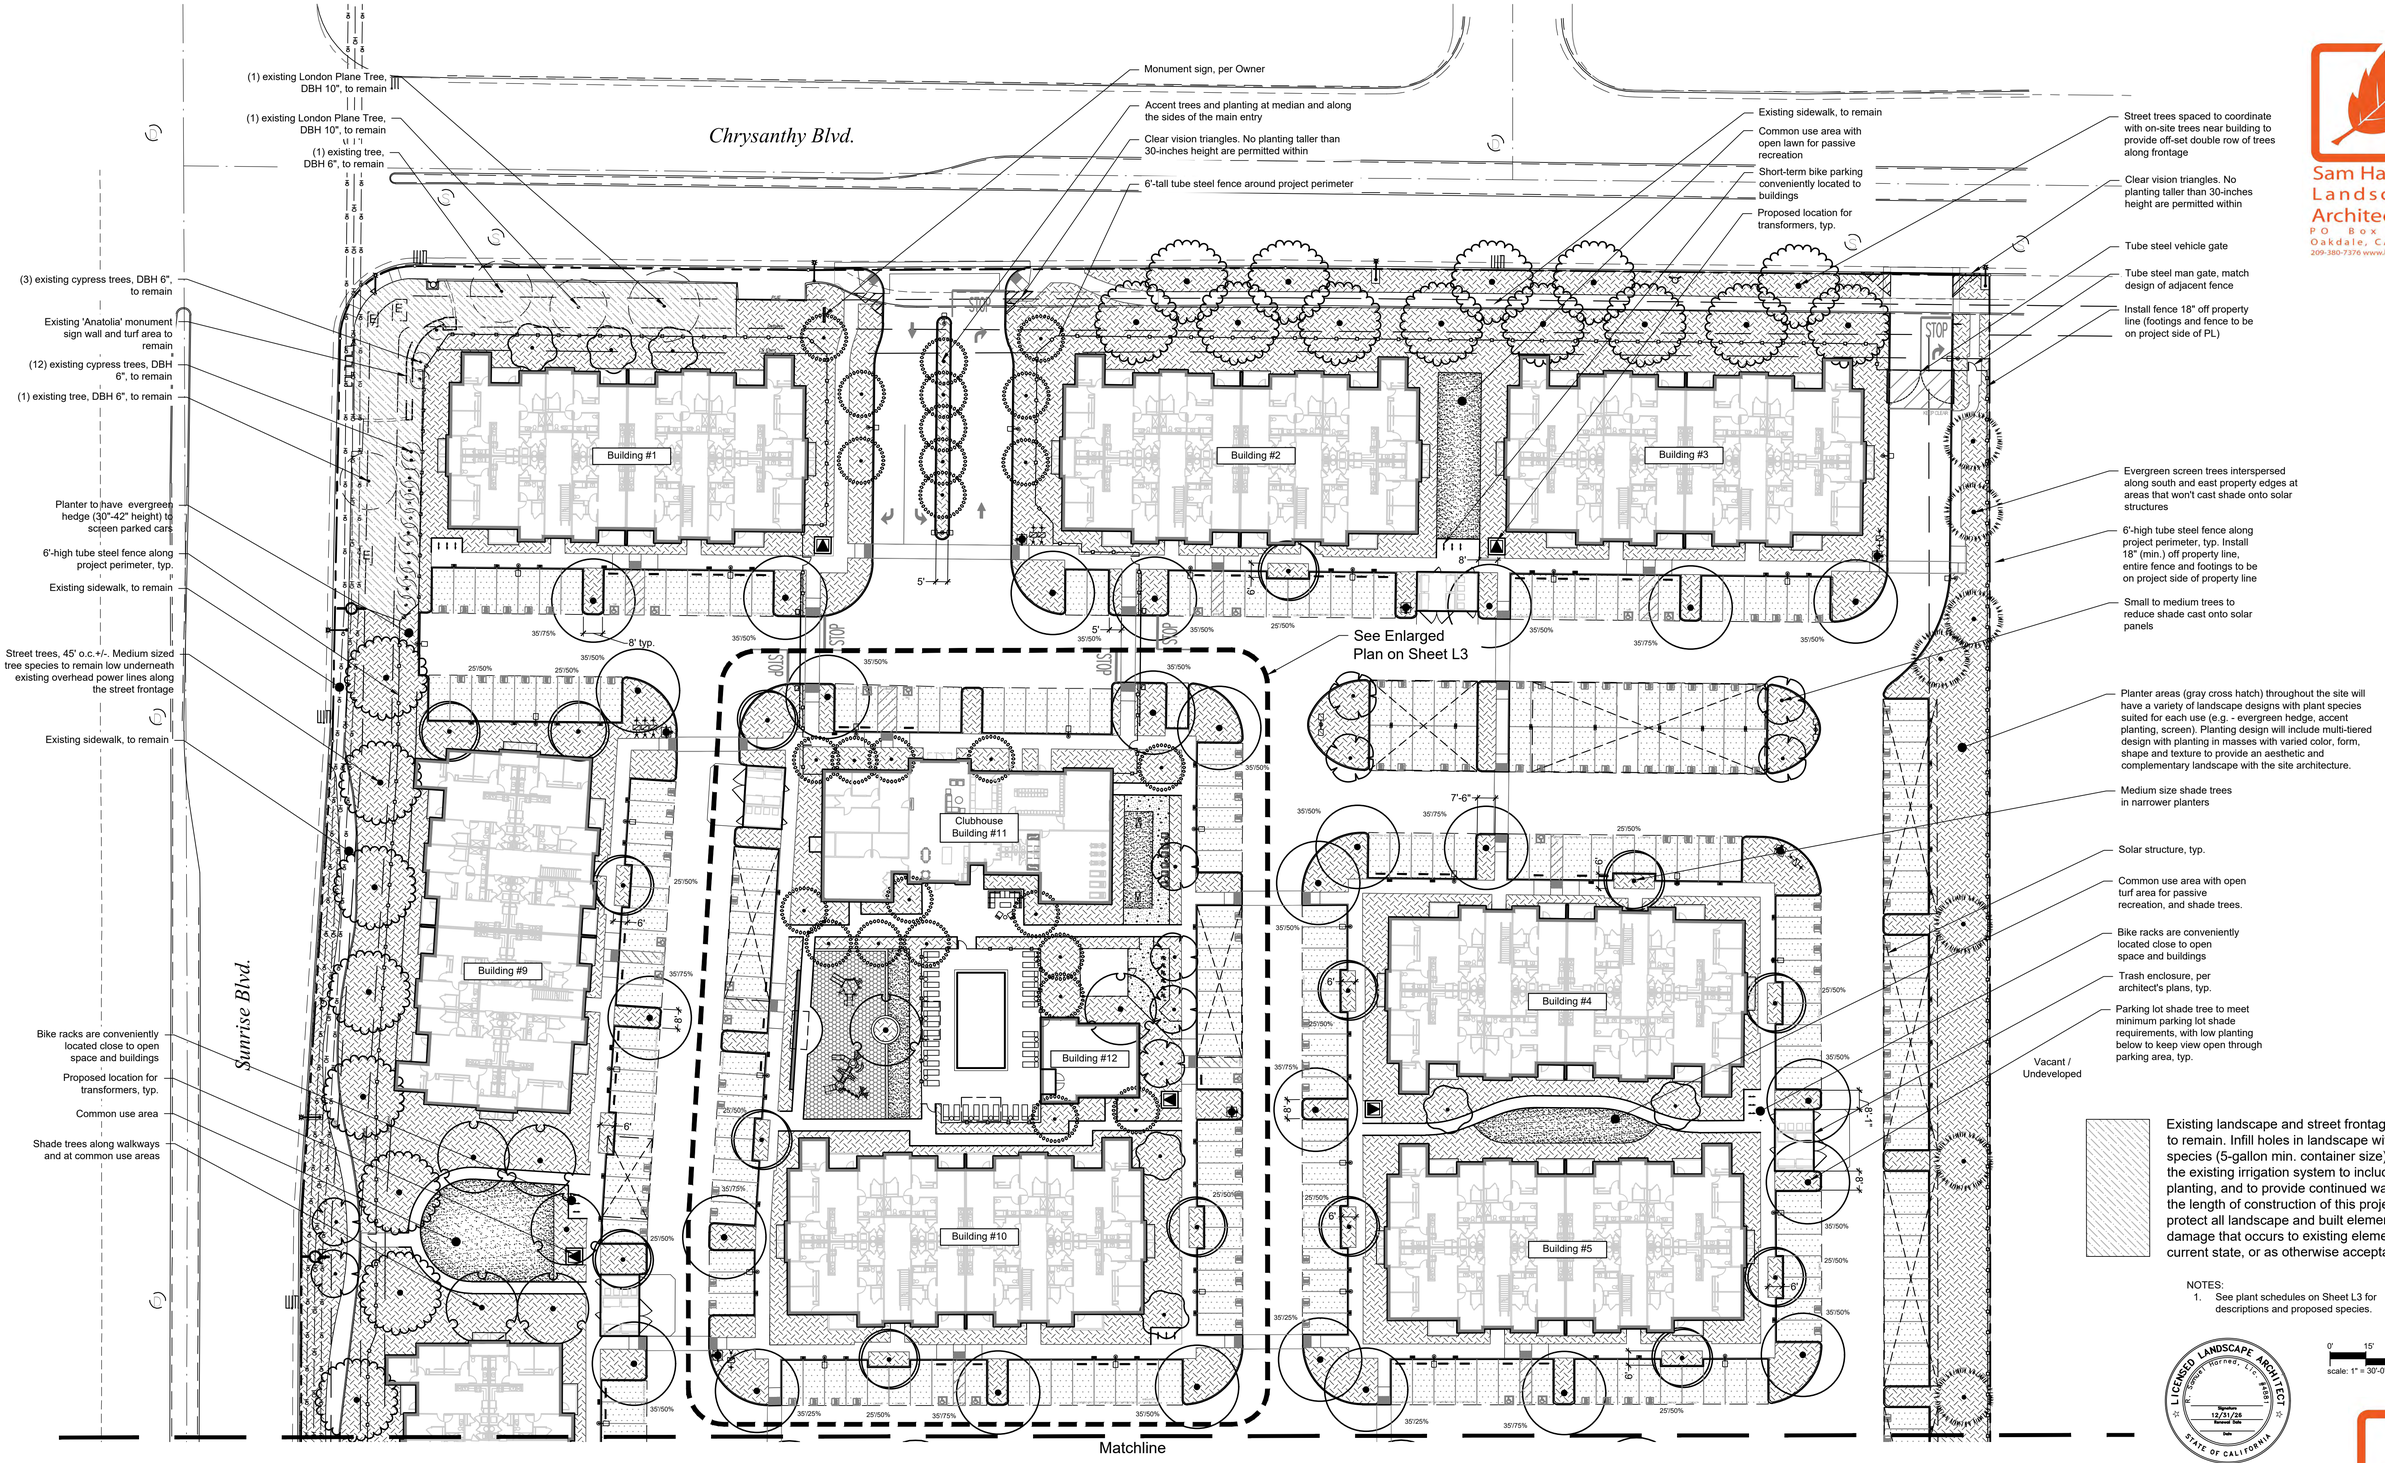

LICENSED LANDSCAPE ARCHITECT — Samuel Harned, R.L.A. #6561 — Signature 12/31/26 Renewal Date — Date — STATE OF CALIFORNIA

MAWA =	(ETo)	(0.62)	[(ETAF	x LA) +	((1-ETAF)	x SLA)]
1,771,165 gal/yr	50.3 in/yr	0.62	0.45	126,208 sf	0.55	0 sf

ETAF

ETAF CALCULATIONS			
Regular Landscape Area (RLA) ETAF		Max Allowed ETAF	
Total ETAF x RLA	56162.24		
Divided by Total RLA	126,208 sf		If Average ETAF is less than Max. Allowed ETAF the Project complies with WELO
Average ETAF (RLA)	0.44	0.45	

WELO COMPLIANCE

This project has been designed to conform with the City's Water Efficient Landscape Ordinance (WELO).

IRRIGATION DESIGN
The irrigation on the site will use drip irrigation, will meet the City's requirements, and will comply with the requirements of WELO. Equipment will include dedicated irrigation meter, smart controller, weather sensor, and efficient irrigation emitters, nozzles, and other equipment.

PLANTING DESIGN
The landscape design uses water-wise plant species suitable for this region and that are low maintenance and durable, uses trees to shade paved areas, and plants have been grouped into hydro-zones. References used for the landscape design include published information from the local jurisdiction, Sunset Western Garden Book and WUCOLS.

LANDSCAPE AREA CALCULATIONS

Total Site Area: 484,822 sf.
Total Landscape Area: 126,208 sf.
Turf area: 9,523 sf (7.5%)
Planter Area: 116,685 sf (92.5%)
Percentage of Total Site as Landscape: 26 %

TREE MINIMUM REQUIREMENTS

- Parking lot and street trees, min. 30% of total to be evergreen species. Final species, location and quantity to be provided with the improvements plans and shall meet or exceed this minimum standard.
- 24" container: a minimum of 25% of the trees on this project will be 24" minimum container size. All trees will be minimum 15-gallon container size. The final species and location of the 24" container size trees will be provided with the improvements plans and shall meet or exceed this minimum standard.

ROOT BARRIER

Provide 24" deep linear root barrier at all trees located within 10'-0" of hardscape. Provide 12 lf of barrier at each required location, center on tree root ball. Root barrier shall be installed in linear fashion along the edge of hardscape; circular placement around the root ball will not be accepted and will be replaced at contractor's expense. Install per manufacturer's recommendations.

Continuous root barriers are required along publicly maintained streetscapes.

NOTES:
1. See plant schedules on Sheet L3 for descriptions and proposed species.

Concept Plant Schedule / Sheet Legend

LAWN — 9,523 sf
Natural lawn/sod for resident recreation.
Lawn has a High water use (WUCOLS).
Turf Sod Bolero Plus / Fescue blend

PLANTER AREA — 116,685 sf
Areas with masses of shrubs, grasses, and ground cover of varying height, size, shape, color and texture. See Planting Area Note for additional description.

STABILIZED DECOMPOSED GRANITE — 1,101 sf
DG, 3/8" minus, with stabilizer and metal edging.

Play ground surfacing, poured-in-place rubberized surfacing

PLANTING AREA NOTE

The notes below apply to the areas of this plan designated as "Planter Area" per the Concept Plant Schedule.

1. As part of the final design, planting areas will be designed to provide an aesthetic and functional landscape that enhances the project, complements the architecture, connects to the adjacent existing development, and provides comfort and interest to the residents and guests of the facility.
2. Planter areas will be designed to conform to City Standards, governing guidelines, and WELO requirements.
3. Planting area will be designed with intent for the landscape (e.g. - accent planting to highlight entries or focal points; evergreen hedge for borders, foundation planting and screens; low planting to keep views open) as well as to complement the architecture.
4. Plant species will be selected per the Preliminary Plant Palette on this sheet.
5. Planter areas will largely be irrigated landscape and will include shrubs and ground cover. Some areas of inert landscape may be included as well, such as decomposed granite, cobble, bark, or other inert material as approved by the City.
6. All landscape planter areas will include a min. 3" layer of bark mulch.
7. Pre-emergent is to be applied in all non-seeded landscape areas.
8. A weed control layer will be included at all bark mulch and/or rock areas.

PRELIMINARY PLANT PALETTE

The Preliminary Plant Palette represents a sampling of the types of plants selected for this project that are suitable for the location and design concept. Plants in the final plan will be selected from this list. Not all plants in the list below will be used and additional plants may be incorporated with the final plans, but the overall design concept represented will be maintained.

Open Space Calculations

Total Site Area:	484,822 sf
Outdoor Common Area:	60,738 sf
Indoor Common Area:	3,927 sf
Outdoor Patio/Decks:	6,200 sf (first floor)
	5,440 sf (second floor)
	5,155 sf (third floor)
Total open space:	81,460 sf (16.8%)
Required Open Space (15%):	72,723 sf

Existing landscape and street frontage improvements to remain. Infill holes in landscape with matching species (5-gallon min. container size). Modify/adjust the existing irrigation system to include any new planting, and to provide continued watering throughout the length of construction of this project. Preserve and protect all landscape and built elements; restore any damage that occurs to existing elements to their current state, or as otherwise acceptable to the City.

Open space area - landscape and common outdoor areas
60,738 sf

Open space area - internal common areas at buildings
3,927 sf

Open space area - outdoor patios
16,795 sf (total of all patios on all floors)

SHORT TERM BIKE SPACES = 46 SPACES
LONG TERM BIKE SPACES = 24 SPACES

SITE PLAN CITY STANDARD DEVIATION STATEMENT

ALL PROPOSED SITE IMPROVEMENTS ARE IN COMPLIANCE WITH CURRENT CITY OF RANCHO CORDOVA STANDARDS AND/OR GUIDELINES, WITH THE EXCEPTION OF THE FOLLOWING DEVIATIONS:

1. DESIGN EXCEPTION FOR DRIVE AISLE AND 3'-6" SOLAR STRUCTURES TO ENCROACH INTO THE ZONING CODE REQUIRED SETBACK OF 25-FEET ALONG THE EASTERN BOUNDARY.

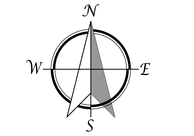

JUSTIFICATION DRIVE AISLE:
* ACCOMMODATE FIRE CIRCULATION AROUND 2 SIDES OF THE BUILDING FOR FIRE ACCESS.
* 25-FOOT SETBACK IS A ZONING SETBACK REQUIREMENT (23.316.2) WHEN COMMERCIAL PROPERTY ABUTS RESIDENTIAL PROPERTY (ADJACENT PROPERTY ZONED RD-20). APPLICANT REQUESTS RELIEF FROM THIS SETBACK REQUIREMENT TO A 10-FOOT SETBACK BASED ON THE PROPOSED USE OF THE SUBJECT PROPERTY BEING MULTI-FAMILY AND THE ADJACENT PROPERTY BEING ZONED RD-20.

JUSTIFICATION SOLAR STRUCTURE ENCROACHMENT 3'-6"
* SOLAR STRUCTURE , SOLAR PANELS HAVE A NOMINAL DIMENSION OF 7'6"x3'9". THIS REQUIRES THAT THE SOLAR STRUCTURE DEPTH BE AN INCRAMENT OF THE DIMENSIONS LISTED ABOVE. USING THE 7'6" LENGTH DIMENSION AND 3' SOLAR PANELS THIS REQUIRES STATED ENCROACHMENT OF 3'6" INTO THE SETBACK.
* PROPOSED PROJECT IS TARGETING A HIGH SOLAR GENERATION THRESHOLD TO BE MADE AVAILABLE TO RESIDENTS. WITH THE LOCATION OF THIS SOLAR STRUCTURE ARRAY ON THE EASTERN PROPERTY LINE AND UNOBSTRUCTED BY BUILDINGS THIS SOLAR STRUCTURE ARRAY IS A KEY FACILITY IN MEETING THE SOLAR NEEDS OF THE PROPOSED PROJECT.

2. DESIGN EXCEPTION FOR 6-FOOT TALL FENCE FRONTING SUNRISE BLVD AND CHRYSANTHY BLVD.

JUSTIFICATION 6-FOOT TALL FENCE
* ENHANCED SERCURITY - ENHANCED PROTECTION FOR THE PROJECTS RESIDENTS. BEYOND THE PHYSICAL DETERRENCE A TALLER FENCE WILL ALLOW FAMILIES WITH PEACE OF MIND FOR CHILDREN AND PETS TO PLAY OUTDOORS WITH CONFIDENCE, KNOWING THE BARRIER IS HIGH ENOUGH TO PREVENT THEM FROM WANDERING OUT OR STRANGERS FROM ACCESSING THEIR SPACE. THIS IS PARTICULARLY IMPORTANT ON THE PROJECTS FRONTAGE ON SUNRISE BLVD AS BEING A MAJOR THOROUGHFARE IN THE REGION WITH HIGH TRAFFIC VOLUMES AND POSTED SPEED LIMIT OF 50 MPH.

* STRONGER PRIVACY - PRIVACY IS A CORNERSTONE OF RESIDENTIAL COMFORT AND DIGNITY. THE SENSE OF A PROTECTED PERSONAL ENVIRONMENT REDUCES STRESS AND FOSTERS A STRONGER FEELING OF "HOME," WHICH IS CRITICAL FOR QUALITY OF LIFE.
* VISUAL SHIELDING: A 6-FOOT FENCE EFFECTIVELY BLOCKS SIGHTLINES FROM STREETS, NEIGHBORING PROPERTIES, OR PUBLIC PATHWAYS. BY CONTRAST, A 40-INCH FENCE BARELY SCREENS RESIDENTS FROM PASSERSBY, LEAVING YARDS AND WINDOWS EXPOSED.
* NOISE BUFFER: ALTHOUGH NOT SOUNDPROOF, A TALLER FENCE PROVIDES A MODEST BUFFER AGAINST TRAFFIC AND STREET NOISE, CREATING A MORE PEACEFUL LIVING ENVIRONMENT.
* OUTDOOR ENJOYMENT: THE INCLUSION OF A 6 FOOT FENCE WILL ASSIST WITH MARKETING EFFORTS IN ATTRACTING FUTURE RESIDENTS AND WILL ALLOW RESIDENTS TO ENJOY THEIR PATIOS AND GREEN SPACES THAT HAVE BEEN THOUGHTFULLY DESIGNED TO FULLEST EXTENT.

DESCRIPTION	PROPOSED	EXISTING
FIRE LANE		
FIRE TURN RADIUS	R=25' (TYP) R=50' (TYP)	
FIRE HYDRANT		
FIRE DEPT CONNECTION		
150' FIRE HOSE REACH		
POSSIBLE FIRE ENGINE APPARATUS STAGING AREA		
AERIAL ACCESS SIDE OF BLDG	AERIAL ACCESS SIDE OF STRUCTURE (TO BUILDING EAVES)	

FIRE ACCESS LANE NOTES

1. FIRE DEPARTMENT CONNECTIONS (FDC) SHALL BE LOCATED ON THE PROJECT SITE AT LEAST 40 FEET FROM THE BUILDING THAT IT SERVES AND WITHIN 10 TO 40 FEET OF A FIRE HYDRANT. FIRE HYDRANT AND FDC SHALL BE LOCATED ON THE SAME SIDE OF THE FIRE ACCESS ROUTE SO THAT HOSES DO NOT OBSTRUCT INCOMING APPARATUS.
2. FIRE DEPARTMENT ACCESS ROUTES SHALL BE CONSTRUCTED TO A 26-FOOT MINIMUM WIDTH WITH NO PARKING ON EITHER SIDE FOR AERIAL FIRE APPARATUS. ROUTES SHALL PROVIDE A MINIMUM 13-FOOT 6-INCH VERTICAL CLEARANCE AND TURNING RADII OF 25-FEET INSIDE AND 50 FEET OUTSIDE. AERIAL APPARATUS ACCESS ROADS SHALL BE PROVIDED ON AT LEAST 2 INTERSECTING BUILDING SIDES.
3. FIRE ACCESS ROUTES WHEN REQUIRED, 'NO PARKING FIRE LANE' SIGNS AND/OR RED PAINTED CURBS SHALL BE INSTALLED PER SMFD GUIDELINES AND THE CALIFORNIA FIRE CODE. ALL RAISED CURBS IN 'NO PARKING FIRE LANE' AREAS SHALL BE PAINTED RED WITH APPROVED TRAFFIC GRADE PAINT. LETTERING SHALL BE WHITE STENCIL, 3 INCHES TALL WITH A ¾ INCH STROKE. STENCILING SHALL BE LOCATED EVERY 25 FEET. SIGNS SHALL BE POSTED EVERY 50 FEET. FIRE LANES WILL BE ENFORCED DURING CONSTRUCTION.
4. VEHICLE GATES & PEDESTRIAN GATES OBSTRUCTING FIRE ACCESS ROUTES SHALL COMPLY WITH THE SMFD EMERGENCY ACCESS GATES AND BARRIERS STANDARD.

PRODUCT OVERVIEW SCAN OR CLICK HERE

FEATURES

- Features field-swappable IES optic distributions for application-specific flexibility.
- Provides field-selectable lumen output and CCT to reduce SKUs and simplify stocking.
- Delivers precise, uniform illumination with advanced optical performance with up to 179 LPW
- Ensures long-term reliability with IP66-rated die-cast aluminum housing and UV-stabilized optics.
- Supports advanced control options, including Bluetooth programmable sensors, photocells, and bi-level dimming.
- Simplifies installation with versatile mounting configurations designed for quick one-person setup.

SPECIFICATIONS

CONSTRUCTION
The Viewpoint series features a slim profile die-cast aluminum housing available in 3 different sizes for a fully scalable solution. The fully gasketed housing is IP66 rated for whole luminaire ingress protection against moisture and environmental contaminants. The Viewpoint's low-profile design results in a low EPA, allowing pole optimization to thinner or smaller size pole shafts. Vibration rated per ANSI C136.31 on all mountings (see table on page 3). The Viewpoint Series is protected with a durable bronze polyester powder coat finish to withstand extreme weather changes without cracking or peeling. Salt Spray tested for 500 hrs.

OPTICS
The IP66 silicone gasket sealed optical chamber utilizes proprietary, Field Swappable, polycarbonate refractive optics to provide exceptional coverage and uniformity in IES Types 3, 4, or 5. Available in Field Selectable 3000K, 4000K, & 5000K color temperatures per ANSI C78.377. Minimum CRI of 80. Optional field installed 3-sided glare shield accessory is available for on-site external house side protection.

ELECTRICAL
Class 1 High-performance drivers features over-voltage, under-voltage, short circuit and over temperature protection. 0-10V dimming (10% - 100%) standard. Standard Universal Voltage (120-277 Vac) Input 50/60 Hz or optional High Voltage (277-480 Vac). L80 >100,000 hrs. in accordance with IESNA TM-21-19 projected values at 25°C Ambient temperature. Total harmonic distortion: <20%. Power factor: >0.90. Input power stays constant over life. Minimum 6kV surge rating meets a minimum Category C Low operation (per ANSI/IEEE C62.41.2). Additional protection is available in 10kV and 20kV options.

THERMAL
The Viewpoint Series features an array of High-efficacy LED's mounted on a metal core circuit board. The LED boards are mounted directly to the cast aluminum housing with heat dissipating fins to provide excellent thermal performance extending the life of electronic components. Operating Ambient Temperature: -40°C to +50°C (-40°F to 122°F).

INSTALLATION
The versatile Viewpoint comes with 4 mounting method options. A fully adjustable Slip fitter (SLPF) to mount to any vertical or horizontal tenon 2" pipe (2-3/8" OD), adjustable pole mounting bracket (PMB) for Square or 4-5" Round Poles, an adjustable wall mount bracket, and an adjustable surface conduit box. 3' 600V power cord(s) provided standard with 0-10V dimming (10-100%).

CONTROLS
Factory installed 3-Pin & 7-Pin ANSI C136.41 Control Receptacle Options available. Dusk to Dawn twist lock photocells sold separately (See accessories). Optional PIR sensors available installed in housing hinged door. See controls section for detailed information on standalone and wireless control options.

WARRANTY
5 Year Warranty Standard; 10 Year Warranty Optional (Terms and Conditions apply).

CERTIFICATIONS
ETL Listed for wet locations. Tested in accordance with IESNA LM-79 and LM-80 standards. RoHS Compliant. Title 24 Compliant; see local ordinance for qualification information. IP66 rated Luminaire per IEC 60598. IP66 rated optical chamber.

CONTROLS OPTIONS

ADVANCED

NUROAir by ILLUMUS

NUROAir Plug n Play Bluetooth Sensor is the optimal groupable controls lighting solution. With main features such as Plug and Play, PIR Motion Sensing, Occupancy/Vacancy and Photocell (BLK) - this flexibility makes the NUROAir Plug n Play Sensor ideal for tailoring lighting to specific space needs, optimizing both ambiance and efficiency. The NUROAir App, available for download on iOS and Google Play Store, offers a user-friendly interface for automatic or manual customization of your space. Through the app, users can configure sensor settings such as the Light Output, CCT, Hold Time, Standby Time/Level, High/Low End Trim, Background Light Level, Set Schedules, and Control Lighting Groups or Zones, all from a mobile or tablet device. Manual control is also available with a range of compatible wireless & wired wall switch options.

NUROAir® Bluetooth Controls

POWERED BY ILLUMUS. BRANDS

NUROAir Bluetooth Controls

BASIC

CRxP

3-Pin or 7-pin ANSI C136.41-2013 control receptacle option available for NEMA twist lock photocontrols or wireless control modules. Control accessories sold separately. Dimming leads from the receptacle will be connected to the driver dimming leads (Consult factory for alternate wiring). x = Number of pins (3 or 7).

FSP301/Lx

Optional Bluetooth Programmable PIR sensor allows for Continuous Dimming, Motion and/ or daylight harvesting, Fully adjustable high/low dimmed light levels, and Adjustable time delay/ cutoff delay. The sensor is programmed via a free iOS® or Android® Sensor Configuration App (compatible device provided by others). Available in 10'-20' or 20'-40' mounting lenses. See coverage patterns below, L7=20'-40', L3=10'-20'.

Default Settings:

- High Mode: 100% Output
- Low Mode: 10% Output
- Time Delay: 5 mins
- Cutoff: 1 hr
- Sensitivity: High
- Photocell: Disabled
- Continuous Dimming: Disabled

ADVANCED

Synapse (TL7)

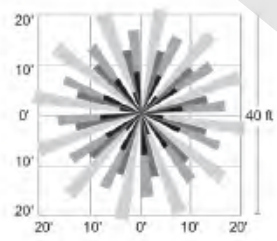

Utilizing a robust 2.4 GHz Self-Healing Mesh Network, Synapse provides flexibility and scalability making it a perfect outdoor solution for both new construction and retrofit projects. The easy-to-use web application is accessible on any device with an internet connection and allows for complete customization of the system and its features. External radio (TL7) includes (1) low voltage input for a Wattstopper sensor, available in both universal(120-277V) or high voltage (480V). Sensors available in 20' or 40' mounting lenses. See coverage patterns below. Sensor mounted on hinged driver cover.

PRODUCT OVERVIEW SCAN OR CLICK HERE

FEATURES

- Features field-swappable IES optic distributions for application-specific flexibility.
- Provides field-selectable lumen output and CCT to reduce SKUs and simplify stocking.
- Delivers precise, uniform illumination with advanced optical performance with up to 179 LPW
- Ensures long-term reliability with IP66-rated die-cast aluminum housing and UV-stabilized optics.
- Supports advanced control options, including Bluetooth programmable sensors, photocells, and bi-level dimming.
- Simplifies installation with versatile mounting configurations designed for quick one-person setup.

- Shopping Centers
- Roadways

CERTIFICATIONS

NURO Air™ Bluetooth Controls · legrand · synapse · CCT SELECTABLE · LUMEN SELECTABLE · QUICK SHIP · IP66 · Intertek · TITLE 24 · 5 YEAR WARRANTY · 10 YEAR WARRANTY

SPECIFICATIONS

CONSTRUCTION
The Viewpoint series features a slim profile die-cast aluminum housing available in 3 different sizes for a fully scalable solution. The fully gasketed housing is IP66 rated for whole luminaire ingress protection against moisture and environmental contaminants. The Viewpoint's low-profile design results in a low EPA, allowing pole optimization to thinner or smaller size pole shafts. Vibration rated per ANSI C136.31 on all mountings (see table on page 3). The Viewpoint Series is protected with a durable bronze polyester powder coat finish to withstand extreme weather changes without cracking or peeling. Salt Spray tested for 500 hrs.

OPTICS
The IP66 silicone gasket sealed optical chamber utilizes proprietary, Field Swappable, polycarbonate refractive optics to provide exceptional coverage and uniformity in IES Types 3, 4, or 5. Available in Field Selectable 3000K, 4000K, & 5000K color temperatures per ANSI C78.377. Minimum CRI of 80. Optional field installed 3-sided glare shield accessory is available for on-site external house side protection.

ELECTRICAL
Class 1 High-performance drivers features over-voltage, under-voltage, short circuit and over temperature protection. 0-10V dimming (10% - 100%) standard. Standard Universal Voltage (120-277 Vac) Input 50/60 Hz or optional High Voltage (277-480 Vac). L80 >100,000 hrs. in accordance with IESNA TM-21-19 projected values at 25°C Ambient temperature. Total harmonic distortion: <20%. Power factor: >0.90. Input power stays constant over life. Minimum 6kV surge rating meets a minimum Category C Low operation (per ANSI/IEEE C62.41.2). Additional protection is available in 10kV and 20kV options.

THERMAL
The Viewpoint Series features an array of High-efficacy LED's mounted on a metal core circuit board. The LED boards are mounted directly to the cast aluminum housing with heat dissipating fins to provide excellent thermal performance extending the life of electronic components. Operating Ambient Temperature: -40°C to +50°C (-40°F to 122°F).

INSTALLATION
The versatile Viewpoint comes with 4 mounting method options. A fully adjustable Slip fitter (SLPF) to mount to any vertical or horizontal tenon 2" pipe (2-3/8" OD), adjustable pole mounting bracket (PMB) for Square or 4-5" Round Poles, an adjustable wall mount bracket, and an adjustable surface conduit box. 3' 600V power cord(s) provided standard with 0-10V dimming (10-100%).

CONTROLS
Factory installed 3-Pin & 7-Pin ANSI C136.41 Control Receptacle Options available. Dusk to Dawn twist lock photocells sold separately (See accessories). Optional PIR sensors available installed in housing hinged door. See controls section for detailed information on standalone and wireless control options.

WARRANTY
5 Year Warranty Standard; 10 Year Warranty Optional (Terms and Conditions apply).

CERTIFICATIONS
ETL Listed for wet locations. Tested in accordance with IESNA LM-79 and LM-80 standards. RoHS Compliant. Title 24 Compliant; see local ordinance for qualification information. IP66 rated Luminaire per IEC 60598. IP66 rated optical chamber.

CONTROLS OPTIONS

ADVANCED

NUROAir by ILLUMUS

NUROAir Plug n Play Bluetooth Sensor is the optimal groupable controls lighting solution. With main features such as Plug and Play, PIR Motion Sensing, Occupancy/Vacancy and Photocell (BLK) - this flexibility makes the NUROAir Plug n Play Sensor ideal for tailoring lighting to specific space needs, optimizing both ambiance and efficiency. The NUROAir App, available for download on iOS and Google Play Store, offers a user-friendly interface for automatic or manual customization of your space. Through the app, users can configure sensor settings such as the Light Output, CCT, Hold Time, Standby Time/Level, High/Low End Trim, Background Light Level, Set Schedules, and Control Lighting Groups or Zones, all from a mobile or tablet device. Manual control is also available with a range of compatible wireless & wired wall switch options.

NUROAir® Bluetooth Controls

POWERED BY ILLUMUS. BRANDS

NUROAir Bluetooth Controls

BASIC

CRxP

3-Pin or 7-pin ANSI C136.41-2013 control receptacle option available for NEMA twist lock photocontrols or wireless control modules. Control accessories sold separately. Dimming leads from the receptacle will be connected to the driver dimming leads (Consult factory for alternate wiring). x = Number of pins (3 or 7).

FSP301/Lx

Optional Bluetooth Programmable PIR sensor allows for Continuous Dimming, Motion and/ or daylight harvesting, Fully adjustable high/low dimmed light levels, and Adjustable time delay/ cutoff delay. The sensor is programmed via a free iOS® or Android® Sensor Configuration App (compatible device provided by others). Available in 10'-20' or 20'-40' mounting lenses. See coverage patterns below, L7=20'-40', L3=10'-20'.

Default Settings:

- High Mode: 100% Output
- Low Mode: 10% Output
- Time Delay: 5 mins
- Cutoff: 1 hr
- Sensitivity: High
- Photocell: Disabled
- Continuous Dimming: Disabled

ADVANCED

Synapse (TL7)

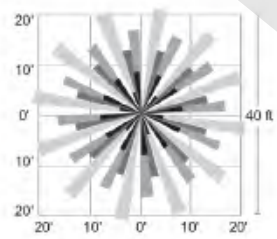

Utilizing a robust 2.4 GHz Self-Healing Mesh Network, Synapse provides flexibility and scalability making it a perfect outdoor solution for both new construction and retrofit projects. The easy-to-use web application is accessible on any device with an internet connection and allows for complete customization of the system and its features. External radio (TL7) includes (1) low voltage input for a Wattstopper sensor, available in both universal(120-277V) or high voltage (480V). Sensors available in 20' or 40' mounting lenses. See coverage patterns below. Sensor mounted on hinged driver cover.

PRODUCT OVERVIEW

SCAN OR CLICK HERE

FEATURES

- Features field-swappable IES optic distributions for application-specific flexibility.
- Provides field-selectable lumen output and CCT to reduce SKUs and simplify stocking.
- Delivers precise, uniform illumination with advanced optical performance with up to 179 LPW
- Ensures long-term reliability with IP66-rated die-cast aluminum housing and UV-stabilized optics.
- Supports advanced control options, including Bluetooth programmable sensors, photocells, and bi-level dimming.
- Simplifies installation with versatile mounting configurations designed for quick one-person setup.

SUITABLE APPLICATIONS

- Parking Lots
- Parking Structure
- Parks
- Education
- Hospitals
- Car Dealerships
- Shopping Centers
- Roadways

CERTIFICATIONS

SPECIFICATIONS

CONSTRUCTION
The Viewpoint series features a slim profile die-cast aluminum housing available in 3 different sizes for a fully scalable solution. The fully gasketed housing is IP66 rated for whole luminaire ingress protection against moisture and environmental contaminants. The Viewpoint's low-profile design results in a low EPA, allowing pole optimization to thinner or smaller size pole shafts. Vibration rated per ANSI C136.31 on all mountings (see table on page 3). The Viewpoint Series is protected with a durable bronze polyester powder coat finish to withstand extreme weather changes without cracking or peeling. Salt Spray tested for 500 hrs.

OPTICS
The IP66 silicone gasket sealed optical chamber utilizes proprietary, Field Swappable, polycarbonate refractive optics to provide exceptional coverage and uniformity in IES Types 3, 4, or 5. Available in Field Selectable 3000K, 4000K, & 5000K color temperatures per ANSI C78.377. Minimum CRI of 80. Optional field installed 3-sided glare shield accessory is available for on-site external house side protection.

ELECTRICAL
Class 1 High-performance drivers features over-voltage, under-voltage, short circuit and over temperature protection. 0-10V dimming (10% - 100%) standard. Standard Universal Voltage (120-277 Vac) Input 50/60 Hz or optional High Voltage (277-480 Vac). L80 >100,000 hrs. in accordance with IESNA TM-21-19 projected values at 25°C Ambient temperature. Total harmonic distortion: <20%. Power factor: >0.90. Input power stays constant over life. Minimum 6kV surge rating meets a minimum Category C Low operation (per ANSI/IEEE C62.41.2). Additional protection is available in 10kV and 20kV options.

THERMAL
The Viewpoint Series features an array of High-efficacy LED's mounted on a metal core circuit board. The LED boards are mounted directly to the cast aluminum housing with heat dissipating fins to provide excellent thermal performance extending the life of electronic components. Operating Ambient Temperature: -40°C to +50°C (-40°F to 122°F).

INSTALLATION
The versatile Viewpoint comes with 4 mounting method options. A fully adjustable Slip fitter (SLPF) to mount to any vertical or horizontal tenon 2" pipe (2-3/8" OD), adjustable pole mounting bracket (PMB) for Square or 4-5" Round Poles, an adjustable wall mount bracket, and an adjustable surface conduit box. 3' 600V power cord(s) provided standard with 0-10V dimming (10-100%).

CONTROLS
Factory installed 3-Pin & 7-Pin ANSI C136.41 Control Receptacle Options available. Dusk to Dawn twist lock photocells sold separately (See accessories). Optional PIR sensors available installed in housing hinged door. See controls section for detailed information on standalone and wireless control options.

WARRANTY
5 Year Warranty Standard; 10 Year Warranty Optional (Terms and Conditions apply).

CERTIFICATIONS
ETL Listed for wet locations. Tested in accordance with IESNA LM-79 and LM-80 standards. RoHS Compliant. Title 24 Compliant; see local ordinance for qualification information. IP66 rated Luminaire per IEC 60598. IP66 rated optical chamber.

CONTROLS OPTIONS

ADVANCED

NUROAir by ILLUMUS

NUROAir Plug n Play Bluetooth Sensor is the optimal groupable controls lighting solution. With main features such as Plug and Play, PIR Motion Sensing, Occupancy/Vacancy and Photocell (BLK) - this flexibility makes the NUROAir Plug n Play Sensor ideal for tailoring lighting to specific space needs, optimizing both ambiance and efficiency. The NUROAir App, available for download on iOS and Google Play Store, offers a user-friendly interface for automatic or manual customization of your space. Through the app, users can configure sensor settings such as the Light Output, CCT, Hold Time, Standby Time/Level, High/Low End Trim, Background Light Level, Set Schedules, and Control Lighting Groups or Zones, all from a mobile or tablet device. Manual control is also available with a range of compatible wireless & wired wall switch options.

NUROAir® Bluetooth Controls

NUROAir Bluetooth Controls

BASIC

CRxP

3-Pin or 7-pin ANSI C136.41-2013 control receptacle option available for NEMA twist lock photocontrols or wireless control modules. Control accessories sold separately. Dimming leads from the receptacle will be connected to the driver dimming leads (Consult factory for alternate wiring). x = Number of pins (3 or 7).

FSP301/Lx

Optional Bluetooth Programmable PIR sensor allows for Continuous Dimming, Motion and/ or daylight harvesting, Fully adjustable high/low dimmed light levels, and Adjustable time delay/ cutoff delay. The sensor is programmed via a free iOS® or Android® Sensor Configuration App (compatible device provided by others). Available in 10'-20' or 20'-40' mounting lenses. See coverage patterns below, L7=20'-40', L3=10'-20'.

Default Settings:

- High Mode: 100% Output
- Low Mode: 10% Output
- Time Delay: 5 mins
- Cutoff: 1 hr
- Sensitivity: High
- Photocell: Disabled
- Continuous Dimming: Disabled

ADVANCED

Synapse (TL7)

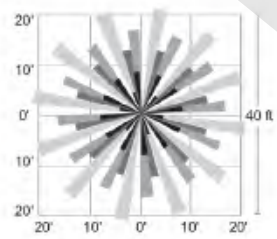

Utilizing a robust 2.4 GHz Self-Healing Mesh Network, Synapse provides flexibility and scalability making it a perfect outdoor solution for both new construction and retrofit projects. The easy-to-use web application is accessible on any device with an internet connection and allows for complete customization of the system and its features. External radio (TL7) includes (1) low voltage input for a Wattstopper sensor, available in both universal(120-277V) or high voltage (480V). Sensors available in 20' or 40' mounting lenses. See coverage patterns below. Sensor mounted on hinged driver cover.

NOTES:

1. DesignLights Consortium® Qualified. Refer to www.designlights.org Qualified Products List under Family Models for details.
2. Transformer used only when ordered with motion sensor or AXCS1 through AXCS5 or AXCL6 fixture wattages.
3. Not available in 347 or 480 VAC.
4. Button photocontrol and any motion sensor (MSP or LWR) not offered together.
5. Only available on AXCL6-AXCL12 models.
6. Used with 277, 347, and 480 VAC options.
7. Only available on AXCS1-AXCS5 models.
8. This configuration may contain materials that are not RoHS compliant. Contact your lighting representative for more information.
9. Uses deep back housing.
10. Sensor passive infrared (PIR) may be overly sensitive when operating below -20°C (-4°F). For the device to be field-configurable, requires WAC Gateway components WAC-PoE and WPOE-120 in appropriate quantities. Only compatible with WaveLinx system and software and requires system components to be installed for operation. See website for more Wavelinx application information.
11. Replace XX with sensor color (WH, BZ, or BK).
12. The ISHH-01 accessory is required to adjust parameters.
13. Ambient operating temperature -20°C to 25°C for AXCL6 through AXCL10. Ambient operating temperature -20°C to 30°C on AXCS4 models. Ambient operating temperature -20°C to 40°C on AXCS1 through AXCS3 models.
14. Not available with AXCS5 or AXCL12 models.
15. Uses deep back housing for AXCS1, AXCLS2, AXCS3, and AXCS4 models.
16. Not to be mounted in upwards / inverted orientation. Downlight wall mount only for AXCS1 through AXCS4.
17. CBP cannot be used with PC and motion sensor (MSP). CBP can be used with PC or motion sensor (MSP).
15. Uses deep back housing for AXCS1, AXCLS2, AXCS3, and AXCS4 models.
16. Not to be mounted in upwards / inverted orientation. Downlight wall mount only for AXCS1 through AXCS4.
17. CBP cannot be used with PC and motion sensor (MSP or LWR). CBP can be used with PC or motion sensor (MSP).
18. Can not be ordered with CBP or PC options.
19. Use dedicated IES files on product website for lumen values and distributions.
20. Requires the use of PC1 or PC2 button photocontrol. See After Hours Dim supplemental guide for additional information.
21. Replace XX with color designation.
22. For use with full cutoff lens configurations only.
23. Lumen Select functionality not available in conjunction with any motion sensor option (MSP). Photocontrol back box not available with any photocontrol or motion sensor options (PC, MSP).
24. Photocell only operates at 120-277V input voltages. Not for use with 347 or 480V systems.
25. This tool enables adjustment to parameters including high and low modes, sensitivity, time delay, cutoff and more. Consult you lighting representative for more information.
26. Only product configurations with these designated prefixes are built to be compliant with the Buy American Act of 1933 (BAA) or Trade Agreements Act of 1979 (TAA), respectively. Please refer to DOMESTIC PREFERENCES website for more information. Components shipped separately may be seperately analyzed under domestic preference requirements.
27. Accessories sold separately will be separately analyzed under domestic preference requirements. Consult factory for further information.
28.Only product configurations with these prefixes are built to be compliant with the Buy American Act of 1933 (BAA) or the Build America Buy America Act (BABA). BABA is the minimum Government compliance requirement for the Build America Buy America standards which is part of the Infrastructure and Investment Jobs Act (IIJA). Individual Government Agencies may have more stringent compliance standards. Please refer to the DOMESTIC PREFERENCES website or consult the CLS Domestic Preferences team for more information. Components shipped separately may be separately analyzed under domestic preference requirements.
29. DarkSky approved when ordered with 3000K or warmer CCT.

Product Specifications

Construction
- Die-cast aluminum housing
- External back fin design extracts heat from the surface to thermally optimize design for longer luminaire life

Optics
- Silicone-sealed optical LED chamber
- Acrylic refractive or full cutoff lens options for Type IV distributions

Electrical
- Standard universal voltage (120-277V, 50/60Hz)
- Driver incorporates 6kV surge protection
- <20% total harmonic distortion
- 0-10V dimming driver is standard with leads external to the fixture

Mounting
- Steel wedge mounting plate fits directly to 4" standard j-box or directly to wall with the "Hook-N-Lock" mechanism
- Stainless steel set screws
- Lumen Select Back Box accessory offers four 1/2" NPT conduit entry wire ways. Resistor Pack combinations allow field-dimming of 75% or 50% when connected to luminaire dimming leads
- Not suitable for indoor use when installed in inverted/uplight orientation

Emergency Egress
- Optional integral cold weather battery emergency egress includes emergency operation test switch, an AC-ON indicator light and a premium, maintenance-free battery pack
- The separate emergency lighting LEDs are wired to provide redundant emergency lighting. Listed to UL Standard 924, Emergency Lighting

Compliance
- cULus certified for use in -40°C to 40°C ambient environments
- Full cutoff models are IDA Certified 3000K and warmer only
- BAA domestic preference option meets BAA requirements. See DOMESTIC PREFERENCES website or consult the CLS Domestic Preferences team for more information
- FHWA and FTA agencies are utilizing their BAA rules for BABA compliance. Cooper's products with a BAA designation are manufactured in the US and utilize a BAA COTS exemption rule for compliance. To verify a configured product with specific accessories and options meet BABA Domestic Preference Requirements; submit this catalog number to Cooper Lighting Quotation team for validation by our Engineering and Manufacturing teams.
- Please refer to the DOMESTIC PREFERENCES website or consult the CLS Domestic Preferences team for more information. Components shipped separately may be separately analyzed under domestic preference requirements.
- Components shipped separately may be separately analyzed under domestic preference requirements.

Finish
- Five-stage super TGIC polyester powder coat paint, 2.5 mil nominal thickness

Shipping Data
- Small fixture=5 lbs. [2.36 kgs.]
- Small with sensor or CBP=10 lbs. [4.40 kgs.]
- Large fixture=12 lbs. [5.45 kgs.]
- Large with sensor or CBP=17 lbs. [7.73 kgs.]
- Large with sensor & CBP=21 lbs. [9.54 kgs.]

Warranty
- Five year limited warranty, consult website for details. www.cooperlighting.com/legal

Control Options

0-10V This fixture is offered standard with 0-10V dimming driver(s) for use with a lighting control panel or other control method.

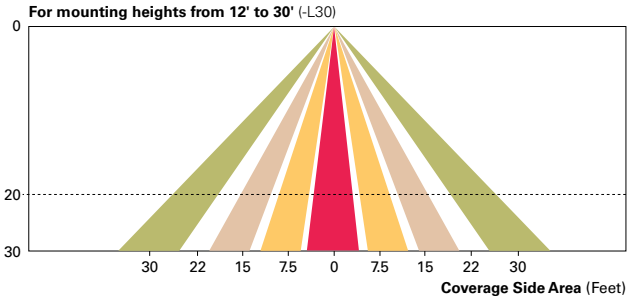

Photocontrol (PC1, PC2 and PC) Optional button-type photocontrol provides a flexible solution to enable "dusk-to-dawn" lighting by sensing light levels.

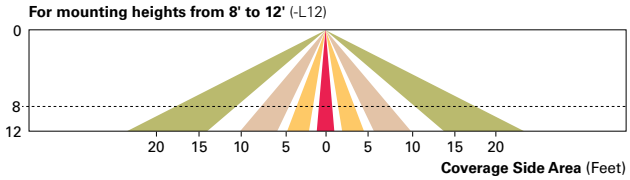

After Hours Dim (AHD) This feature allows photocontrol-enabled luminaires to achieve additional energy savings by dimming during scheduled portions of the night. The dimming profile will automatically take effect after a "dusk-to-dawn" period has been calculated from the photocontrol input. Specify the desired dimming profile for a simple, factory-shipped dimming solution requiring no external control wiring. Reference the After Hours Dim supplemental guide for additional information.

Dimming Occupancy Sensor (MSP/DIM-LXX and MSP-LXX) These sensors are factory installed in the luminaire housing. When the MSP/DIM-LXX sensor option is selected, the occupancy sensor is connected to a dimming driver and the entire luminaire dims when there is no activity detected. When activity is detected, the luminaire returns to full light output. The MSP/DIM sensor is factory preset to dim down to approximately 50 percent power with a time delay of ten minutes. The MSP-LXX sensor is factory preset to turn the luminaire off after five minutes of no activity.

These occupancy sensors includes an integrated photocell that can be activated with the ISHH-01 accessory for "dusk-to-dawn" control or daylight harvesting - the factory preset is ON. The ISHH-01 is a wireless tool utilized for changing the dimming level, time delay, sensitivity and other parameters.

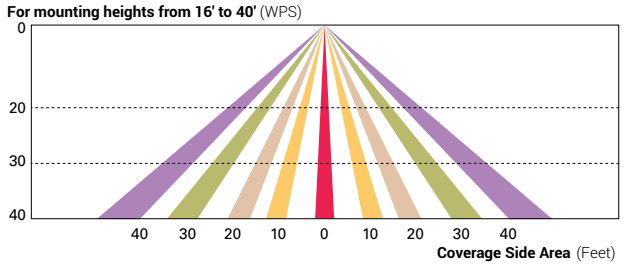

A variety of sensor lens are available to optimize the coverage pattern for mounting heights from 8'-30'.

WaveLinx Wireless Control and Monitoring System The WaveLinx Outdoor control platform operates on a wireless mesh network based on IEEE 802.15.4 standards enabling wireless control of outdoor lighting. Use the WaveLinx Mobile application for set-up and configuration. At least one Wireless Area Controller (WAC) is required for full functionality and remote communication (including adjustment of any factory pre-sets).

WaveLinx Wireless Sensor (WPS2 and WPS4) These outdoor sensors offer passive infrared (PIR) occupancy and a photocell for closed loop daylight sensing. These sensors are factory preset to dim down to approximately 50 percent power after 15 minutes of no activity detected. These occupancy sensors include an integral photocell for "dusk-to-dawn" control or daylight harvesting that is factory-enabled. A variety of sensor lenses are available to optimize the coverage pattern for mounting heights from 7'-40'.

NARROW LINEAR VAPOR TIGHT

PRODUCT OVERVIEW — SCAN OR CLICK HERE

FEATURES

- Operates reliably in extreme conditions with an ambient temperature range from -40°F to 131°F and a robust fiberglass body.
- Maximizes energy efficiency with efficacy up to 156 lm/W and lumen packages ranging from 2,000 to 24,000.
- Adapts to diverse applications with multiple mounting options, including surface, pendant, wall, and suspended configurations.
- Enhances durability with IP65, IP66, IP67, NEMA 4X, IK10, and NSF certifications, along with a 1500 PSI hosedown rating.
- Offers customizable lighting with multiple lens options for glare reduction and CCTs from 2700K to 5000K in 80 or 90 CRI.
- Supports advanced lighting controls with wireless grouping capabilities and occupancy sensors for optimized energy use.

SUITABLE APPLICATIONS

- Coolers & Freezers
- Food & Beverage Prep
- Greenhouse
- Pharmaceutical
- Healthcare
- Education
- Industrial
- Parking Garage
- Natatorium [18]

CERTIFICATIONS

SPECIFICATIONS

CONSTRUCTION
Injection molded one piece 5VA rated fiberglass body with chemical resistant finish for rigidity, durability and prolonged life in rough environments. F1 weatherability rated housing. Toolless removable gear tray for quick and easy access to electrical. Captive latches fastened to housing to safely secure lens to housing. Designed to achieve maximum performance and improved aesthetics.

ELECTRICAL
Class 2 LED light engine for high efficacy and long life. Calculated L70 > 100,000hrs. LED Lumen Maintenance Estimates based on TM-21 projections for the light source at 25C ambient. Power Factor > 0.90. Standard 120-277V ac 0-10V dimmable (10% - 100%) with optional 347V - 480V ac step down transformer. Optional emergency battery backups and generator transfer device available to meet critical life safety lighting requirements. Fixture max ambient reduced for emergency battery backup and step down options.

INSTALLATION
Designed for a variety of mounting applications including surface, pendant, 45 degree wall mount and suspended. Pre-drilled holes on each side of fixture for electrical access and wiring. Hole plugged from factory with rubbed IP rated seal. 1/2" hubs available for threaded power entry from both ends. Toolless hinged removable gear tray for quick and easy access to electrical.

OPTICS
Robust injection molded and impact resistant PMMA lens options for durability and LED glare reduction. Standard Ribbed Acrylic Frosted (RAFL), with optional Smooth Acrylic Frosted (SAFL), Smooth Acrylic Clear (SACL), Smooth Polycarbonate Frosted (SPFL) and Smooth Polycarbonate Clear (SPCL) lens options. Field removeable lens for easy access to LED boards, drivers and maintenance. IK10 rated with SAFL, SACL, SPFL, & SPCL Lenses. IK07 with RAFL lens. 80 CRI Standard (3000K-5000K) with optional 90 CRI (2700K-5000K).

THERMAL
Ambient temperature range -40°F up to 131°F (-40°C to 55°C) on select models with cold start ambient temperature options. Fixture to be mounted at a minimum plenum height of 18" for suspended mounting. Reduced maximum ambient for surface mounting. Reference Ambient Temperature Ratings by lumen package in the Ambient Temperature Range table for more detail.

CONTROLS
Factory installed Advanced & Basic integral occupancy sensor options available. Fully control light levels for both occupied and unoccupied areas with user selectable bi-level dimming options to meet critical life safety lighting requirements. Advanced controls available for grouping capabilities and BAS operation. See controls pg for more detail (pg. 5).

CERTIFICATIONS
ETL Listed to US and Canadian safety standards. Suitable for Wet Locations. American Recovery and Reinvestment Act Funding Compliant. BAA Compliant. IP65, IP66, IP67 Rated. NSF Listed. 1500 PSI Hosedown Rated. NEMA 4X Rated DLC (DesignLights Consortium) Premium Qualified. Please refer to the DLC Qualified Products List at www. Designlights.org/QPL to confirm specific product qualifications.

WARRANTY
5 Year Warranty Standard; 10 Year Warranty Optional (Terms and Conditions apply).

ORDERING GUIDE (Continued)

SHIP WITH ACCESSORIES	
+WTZ-AC6L-KIT	Adjustable 6' Loop Aircraft Cable Set Kit
+WTZ-AC10L-KIT	Adjustable 10' Loop Aircraft Cable Set Kit
+WTZ-AC6L/SS-KIT	Adjustable 6' Loop Aircraft Cable Set Stainless Steel Kit
+WTZ-AC10L/SS-KIT	Adjustable 10' Loop Aircraft Cable Set Stainless Steel Kit
AB45DEG/SS	45 Degree Stainless Steel Angled Mounting Bracket Set
MW/RC	Programming Tool for MWUSBD Sensor
ES/WWS/DR	EasySense Dual Rocker Wireless Wall Switch

FOOTNOTES

[1] Reference Ambient Temp. Range Table for more detail (below)
[2] IP65 Rated
[3] IP66 Rated
[4] IP67 Rated
[5] Does not qualify for NSF
[6] Operating temp down to 32°F
[7] Operating temp down to -4°F
[8] Requires Bluetooth Enabled device for programming (provided by others)
[9] Must be used with MW/RC option for commissioning
[10] Cannot be used with combination of End Mounted sensor & power cord
[11] Cannot be used w/ End Mounted sensor or power cord
[12] One provided per 4ft section
[13] Reference DLC website for current listing
[14] Not available on WTZ2
[15] Not compatible with EM options
[16] When used with PC Lens and SS
[17] Only available in: 2': 2L-4L, 4': 3L-8L, 8':6L-16L
[18] Not available with Emergency options

CONTROLS OPTIONS

BASIC

WLOS
Standard on/off wet location rated PIR occupancy sensor. Comes with 360 degree lens. Sensor mounted off end of fixture.

WLOSPC
Standard on/off wet location rated PIR occupancy sensor with photocell control. When installed, fixture will not activate unless 1. motion is detected and 2. light levels are below the preset level. When activated, fixture will turn on to 100% light output and will only shut off when one of the two levels listed above are met. If no motion is detected and light levels fall below preset level the fixture remains off. Sensor mounted off end of fixture.

USBD
User Selectable Bi-Level Dimming wet location rated PIR occupancy sensor. Allows the end user to manually select the unoccupied dimming level. Once motion is detected, the fixture will return to 100% light output. Sensor mounted off end of fixture.

BDxx
Factory set Bi-Level Dimming wet location rated PIR occupancy sensor. Sensor is set to dim level, as indicated in the "xx" portion of the part number, when the area is unoccupied. Example: BD20 sets the fixture to dim down to 20% lumen output when the area is unoccupied. Once motion is detected, the fixture will return to 100% light output. Sensor mounted off end of fixture.

BDxxPC
Factory set Bi-Level Dimming with motion and photocell. Sensor is set to dim level, as indicated in the "xx" portion of the part number, when the area is unoccupied and will not return to 100% light output unless 1. motion is detected and 2. the light level is below the preset level. Example: BD20PC sets the fixture to dim down to 20% lumen output when the area is unoccupied and will not return to 100% light output unless the above conditions are met for both motion and light level readings. Sensor mounted off end cap of fixture.

MWS
Standard on/off wet location rated microwave occupancy sensor. Sensor installed on LED gear tray behind lens.

MWUSBD
User Selectable Bi-Level Dimming wet location rated microwave occupancy sensor. Allows the end used to manually select the unoccupied dimming level. Once motion is detected, the fixture will return to 100% light output. Requires use of MW/RC programming tool; one needed per project. Sensor installed on LED gear tray behind lens.

CONTROLS OPTIONS

ADVANCED

NUROAir by ILLUMUS

NURO
NUROAir Plug n Play Bluetooth Sensor is the optimal groupable controls lighting solution. With main features such as Plug and Play, PIR Motion Sensing, Occupancy/Vacancy and Daylight Harvesting (WHT) - this flexibility makes the NUROAir Plug n Play Sensor ideal for tailoring lighting to specific space needs, optimizing both ambiance and efficiency. The NUROAir App, available for download on iOS and Google Play Store, offers a user-friendly interface for automatic or manual customization of your space. Through the app, users can configure sensor settings such as the Light Output, CCT, Hold Time, Standby Time/Level, High/Low End Trim, Background Light Level, Set Schedules, and Control Lighting Groups or Zones, all from a mobile or tablet device. Manual control is also available with a range of compatible wireless & wired wall switch options.

NUROAir® Bluetooth Controls
POWERED BY ILLUMUS. BRANDS

NUROAir Bluetooth Controls

EASYSENSE

Philips ESMC/HB
EasySense sensor combines occupancy sensing, daylight harvesting and institutional tuning in one compact solution. This is an ideal control for any high bay application. Each device allows you to turn on/off occupancy and/or daylight harvesting functions as well as set the full light output, background light level, occupancy prolong time, occupancy grace fading time & occupancy time out/hold time. Easily Controlled via Mobile Phone with Philips MasterConnect Bluetooth App. (Sold separately). Sensor mounted off end cap of fixture.

Occupancy Sensing
Based on 52ft mounting height

Default Factory Settings

Occupancy based control	Enabled
Daylight based control	Enabled
Occupancy Mode	Auto-on/off
Group/Zone Occupancy Sharing	Enabled
Zone Occupancy Sharing	Disabled
Group/Zone Lighting Behavior	Background level
Field Task Tuning	100%
Eco-On Level	100%
Background Light Level	20%
Hold Time	10 minutes
Prolong Time	10 minutes
Grace Fading	10 seconds
Fade to Switch-On	1 second (fixed value)
Fade to Switch-Off	1 second (fixed value)

NARROW LINEAR VAPOR TIGHT

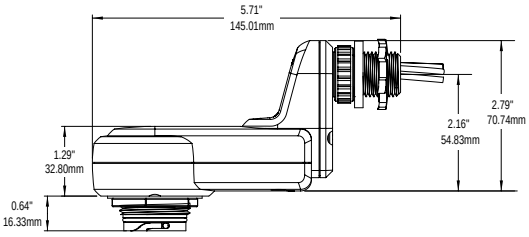

CONTROLS OPTIONS

ADVANCED

DROP NIPPLE SENSOR

FSP311B/Lx

FSP-311 offers fully adjustable high and low dimmed light levels with optional photocell. Hold off setpoint with automatic calibration option. Adjustable time delay and cut off delay. Sensor adjustable programming via iOS® or Android® 'Sensor Configuration' App. Sensor mounted on center driver channel.

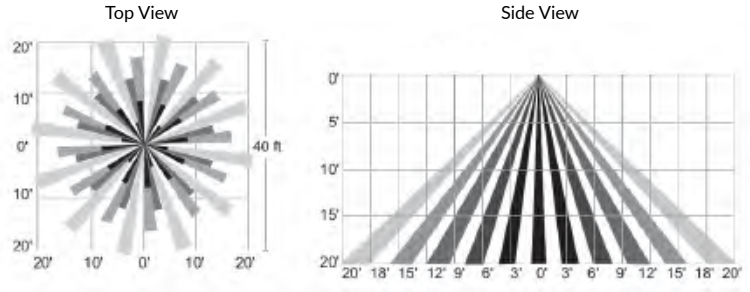

FACTORY DEFAULTS

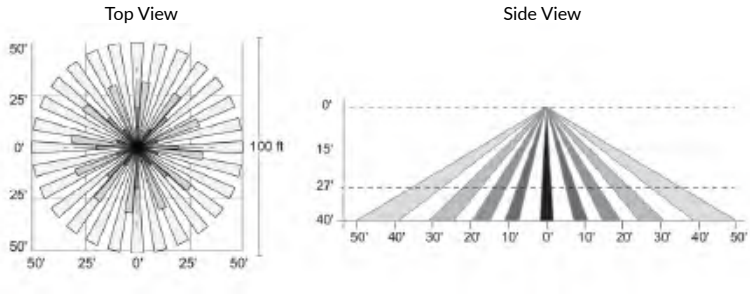

High Mode	10 V
Low Mode	1 V
Time Delay	5 min
Cut Off	1 hr
Sensitivity	High
Hold Off	Disabled
Ramp Up	Disabled
Fade Down	Disabled
Photocell Setpoint for On/Off	Disabled
Continuous Dimming	Disabled

FSP-311/L3

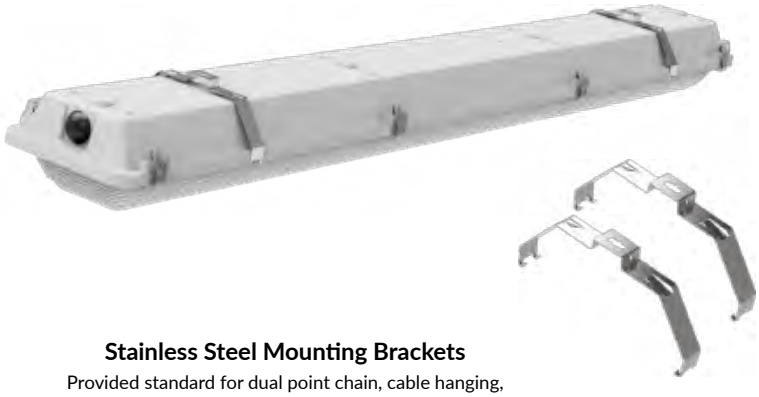

FSP-311/L7

NARROW LINEAR VAPOR TIGHT

MOUNTING OPTIONS

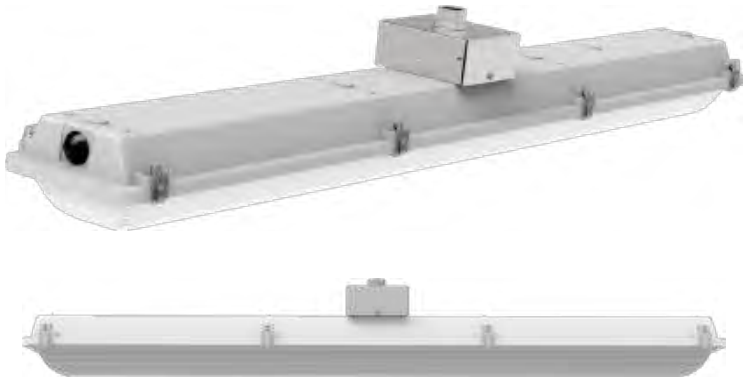

Stainless Steel Mounting Brackets
Provided standard for dual point chain, cable hanging, and surface mount.

AB45DEG/SS
(x = 6' or 10') 45° Stainless Steel Angled Wall Mount Bracket. Two standard per set. One set required per fixture.

+WTZ-ACxL-KIT
Adjustable loop aircraft cable set (x = 6' or 10')

FMB/HUB34 or FMB/HUB12
Fixture Mounting Box utlized when pendant mounting. One needed per 4ft section.

ASTERIA FLATS APARTMENTS
MULTI-FAMILY RESIDENTIAL STREAMLINED DESIGN REVIEW (MSDR-1222-0001)
MULTIFAMILY DESIGN GUIDELINE CHECKLIST COMPLIANCE MATRIX

12-Sep-25

SECTION	STANDARD	SOLUTION - DESCRIPTION	COMPLIANCE			COMMENT
			MET	NOT MET	NA	
CHAPTER 1 - GOALS						
1.2.1	Provide an incentive to construct mixed-use and multi-family housing through a set of design guidelines that can be approved at the staff level, providing certainty of design review approval and a more concrete approvals process time line.	*Following Checklist only includes designguidelines applicable to subject project.*	X			
1.2.2	Elevate, improve, and in some cases, maintain architectural variety, integrity, and quality.	*The proposed Mediterranean style features stucco walls that extend to the ground and are complemented by a variety of window trim articulation. These trims enhance the window expression by adding depth and shadow lines. The design also incorporates varied window sizes, with a high wall-to window ratio. Brick veneer is used to accentuate the entries to the common breezeways, adding texture and emphasis. The roof transitions smoothly with a pitch slope, and water drainage is managed through gutters and downspouts. The overall aesthetic is elevated by a mix of primary and secondary volumes, creating visual interest. See comments for chapter 7 for more details.*	X			
1.2.3	Create human-scale development that contributes to pedestrian-oriented streets and boulevards.	*Pedestrian access is provided at both public streets. The apartments activate the internal streets with balconies, windows, connecting paths, and landscape. A continuous network of internal pedestrian circulation is lined with landscape connecting to key amenity spaces throughout the site.*	X			
1.2.4	Create interest and break up the overall mass of larger buildings.	*The project complies with massing and articulation techniques, resulting in a well-scale and visually engaging design. Building forms are broken up through varied materials, colors, integrated patio and balconies, recessed stairway entrances and a varying roofline.*	X			
1.2.5	Animate building edges on the ground floor to create an inviting public realm with frequent windows, entries and outdoor dining (where appropriate) along the street to provide visual interest and promote a pedestrian-friendly environment.	*The ground floor frontage creates a vibrant public realm through a thoughtfully designed streetscape. A generous setback enhanced with landscape, windows at every 12' of wall or so, varied window treatment for visual interest, wall recesses for massing breaks, and decks and or patios that animate the facade.*	X			
1.2.6	Orient building façades to frame the streets and other public spaces with sufficient building enclosure particularly on the first two floors.	*Strategic apartment placement with ample open space.*	X			
1.2.7	Where multi-family and mixed-use development abuts single-family neighborhoods, provide for graceful transitions between the small-scale increment of the latter and larger-scale format of multi-family and mixed-use structures.	*There is a minimum ±125' separation between our project and the existing single-family homes to the north and the proposed east single family attached development. Our project compliments and seamlessly transitions between styles of the surrounding context.*	X			
1.2.8	Enhance and highlight architectural building features, highlight the entrance and pathway to shops, restaurants, and businesses, create ambiance and visual interest along streets at night, encouraging pedestrians to linger and stroll, and illuminate signing and business address for patrons and emergency service providers.	*The proposed lighting approach will enhance the architectural character of the building while emphasizing key features such as entrances and pathways to site amenities. By creating an visual interest along the streetscape, the design encourages pedestrians to linger, explore, and engage with the surrounding environment. Additionally, illumination of monument signage.*	X			
CHAPTER 2 - SITE PLANNING						
2.2.1	New development on parcels larger than two (2.0) acres in size should provide new streets and sidewalks and street trees along both sides of the street.	*Development and Parcel Exceed 2.0 Acres and Street Frontages on Sunrise and Chrysanthy are complete and in place. Street Trees are proposed for both frontages per the following guidelines with the exception that Sunrise Frontage is encumbered with overhead power lines which restricts tree height to 20-foot max per SMUD Standards.*	X			
2.2.2	New buildings and additions that are fifty percent (50%) or more of existing floor area in size shall construct sidewalks, remove and replace dead or overgrown landscaping, and plant street trees.	*Project proposes new sidewalks and based on our review the existing landscaping at the corner of Sunrise and Chrysanthy is in food condition and no replacement is anticipated.*	X			

2.2.3	All other projects requiring planning permits/approval shall remove and replace missing or dead landscaping (including street trees).	*Project proposes new sidewalks and based on our review the existing landscaping at the corner of Sunrise and Chrysanthy is in food condition and no replacement is anticipated.*	X			
2.2.4	All new streets shall be improved with curbs, gutters, and sidewalks.	*Public Streets on Sunrise and Chrysanthy are complete and in place with vehicle travel lanes, bike lanes, curb & gutter, and sidewalks.*	X			
2.4.1	Length along front street: one-hundred fifty feet minimum (150'-0" min.); five-hundred sixty-five feet maximum (565'-0" max.)	*Please see Sheet C2.0 Context Site Plan for Dimensions of Blocks to include Street Frontage, Length, Depth & Blocks.* *Per communication with the City Planning team on July 14, 2025 we are adhering to the following: "For block length, it should be measured along the street frontage of Sunrise Boulevard and Chrysanthy Boulevard. The shorter parcel line is usually treated as the "front", and the longer parcel line is the "side."* *The length of the block is the distance along a street between two intersecting streets. You can measure this at the centerline of the streets. For your proposed development, we can consider the driveways as "streets." You may count the gated EVA as a "street intersection" along Chrysanthy Boulevard. "*	X			
2.4.2	Depth along side street: one-hundred fifty feet minimum (150'-0" min.); four-hundred fifty feet maximum (450'-0" max.)	*Please see Sheet C2.0 Context Site Plan for Dimensions of Blocks to include Street Frontage, Length, Depth & Blocks.* *Per communication with the City Planning team on July 14, 2025 we are adhereing to the following: "For block length, it should be measured along the street frontage of Sunrise Boulevard and Chrysanthy Boulevard. The shorter parcel line is usually treated as the "front", and the longer parcel line is the "side."* *The length of the block is the distance along a street between two intersecting streets. You can measure this at the centerline of the streets. For your proposed development, we can consider the driveways as "streets." You may count the gated EVA as a "street intersection" along Chrysanthy Boulevard. "*	X			
2.4.3	Blocks longer than four-hundred fifty- feet (450'-0") should provide a pedestrian passage or alley that connects the front street to the rear street or the side street to the opposite side street.	*Please see Sheet C2.0 Context Site Plan for Dimensions of Blocks to include Street Frontage, Length, Depth & Blocks.* *Per communication with the City Planning team on July 14, 2025 we are adhereing to the following: "For block length, it should be measured along the street frontage of Sunrise Boulevard and Chrysanthy Boulevard. The shorter parcel line is usually treated as the "front", and the longer parcel line is the "side."* *The length of the block is the distance along a street between two intersecting streets. You can measure this at the centerline of the streets. For your proposed development, we can consider the driveways as "streets." You may count the gated EVA as a "street intersection" along Chrysanthy Boulevard. "*	X			
2.5.1	Street tree spacing should be between twenty-five and forty-five feet (25'-0" and 45'-0") on center with adjustments in spacing pursuant to public works standards.	*Proposed street trees are shown at 45' o.c., except for where conflicts are with light standards or overhead power lines.*	X			
2.5.2.a	Street trees on a given block shall be of two or three species in order to reduce problems with major pests or disease. They shall be selected per the primary solar orientation of the street as follows: a. Streets oriented primarily in a north-south direction: Deciduous or Evergreen Trees	*The project includes (6) different tree species for street trees, including deciduous and evergreen species, all selected from the City's approved tree list. Final species selection shall occur with final design.*	X			
2.5.2.b	Street trees on a given block shall be of two or three species in order to reduce problems with major pests or disease. They shall be selected per the primary solar orientation of the street as follows: b. Streets oriented primarily in an east-west direction: Deciduous Trees,	*The project includes (6) different tree species for street trees, including deciduous and evergreen species, all selected from the City's approved tree list. Final species selection shall occur with final design.*	X			
2.5.3	Where appropriate, native California tree species shall be used in combination with other drought tolerant species.	*The project includes CA native species, as well as drought tolerant species. All species have either a low or moderate classications (WUCOLS), with the majority having a low water-use classification.*	X			
2.5.4	Irrigation to parkways or tree wells shall be provided as an extension of the on-site system and is the responsibility of the property owner.	*Understood, this will be incorporated into the final design.*	X			
2.6	Pedestrian-scaled street lighting should be provided along public sidewalks and public park pathways. The bottom of a lamp along a sidewalk or other path being lighted should not be more than twenty-feet (20'-0") above the ground.	*Existing Public Street Lights exist along both Sunrise & Chrysanthy along the properties frontages. No changes to these existing street lights are proposed along the street frontage to comply with the subject design guideline.*	X			
CHAPTER 3 - BUILDING TYPE STANDARDS						

3.4	Courtyard Building/Bungalow Court	*Per conversations with City Planning Staff on 3/26/2025 and 7/14/2025, this project most conforms to the Courtyard Building/Bungalow Court building type based on the proposed project being multi-family units arranged around a central courtyard or series of courtyards at grade. Further, pursuant to those conversations, the Applicant has provided proper justification for each of the Building Type Standards for Courtyard Building/Bungalow Court and provided context and justification for the Courtyard Building/Bungalow Court standards that the project does not meet .*	X			
3.4.A	A grouping of townhouses or multi-family units arranged around a central courtyard or series of courtyards at grade or above a parking podium. The building may contain residential or commercial uses, and parking is below ground or accommodated in up to two above-grade podium levels.	*The proposed multifamily development consists of 10, 3 story apartment buildings arranged with open courtyards between or adjacent to each building consisting of active and passive open spaces for residents and at grade parking. The project consists of 236 units with a mix of one, two, three and four bedroom units. Per conversations with City Planning Staff on 3/26/2025 and 7/14/2025, this project most conforms to the Courtyard Building/Bungalow Court building type based on the proposed project being multi-family units arranged around a central courtyard or series of courtyards at grade. Further, pursuant to those conversations, the Applicant has provided proper justification for each of the Building Type Standards for Courtyard Building/Bungalow Court and provided context and justification for the Courtyard Building/Bungalow Court standards that the project does not meet.*	X			
3.4.B.1	Maximum height: sixty-five feet (65'-0").	*The buildings meets the height and massing standards. See elevations A3.0 series*	X			
3.4.C.1	The internal courtyard should be accessible from the street, through the frontage. Where the internal courtyard is located above the ground plane, a grand public stair is encouraged. Access may be gated.	*Internal courtyards are accessed directly from common breezeways, or paths from the street.*	X			
3.4.C.2	The primary entrance to each ground-floor unit should be directly from the street or courtyard. Entrances should occur at a maximum interval of sixty feet (60'-0").	*A continuous path is designed to have access to all courtyards or outdoor amenity spaces.The building is a 3-Story Walk-Up, therefore primary entrance to each ground level unit is not possible directly from the street/ courtyard. Per conversations with City Planning Staff on 7/14/2025, parking-oriented building entrances would be acceptable so long as the Applicant provided proper justification for the decision.*		X		
3.4.C.3	Primary access to units above the ground floor should be through a lobby accessed from the street or the courtyard.	*There are two lobbies per building that are accessed from the internal "street" side of each building for convenient access to parking. The primary access to the units on the upper levels are through a common stairway that serves for 4 units at each due to accessibility, resident convenience, safety, and operational efficiency purposes. Placing the primary building entrances adjacent to the parking lot allows for the shortest, most level path from accessible parking spaces to the front door, reducing travel distance for people with mobility challenges. Per conversations with City Planning Staff on 7/14/2025, parking-oriented building entrances would be acceptable so long as the Applicant provided proper justification for the decision.*	X			
3.4.D.1	Parking may be accommodated in up to two levels of above-ground podium, below ground, or both.	*Parking is located on the ground level internally within the project. All parking stalls meet zoning standards including 9x19 stall size. Refer to sheet A1.1 for dimensions.*	X			
3.4.D.2	A liner of habitable space should conceal above-ground podium parking garages from view.	*The majority of the parking is concealed behind the apartment buildings.*	X			
3.4.D.3	Residential parking should be separate from retail parking, except for any residential guest parking.	*There is no Retail component to the proposed Project.*			X	
3.4.D.4	Parking stalls should meet the construction and maintenance standards of the Zoning Standards.	*Parking Stalls are designed to be 9'X19' with Compact Spaces at 9'X16' and number provided meets the minimum requirements. Ownership agrees to Construct and Maintain per Zoning Standards.*	X			
3.4.E.1	Outdoor Space: Amount required: at least fifteen percent (15%) of the lot area should be provided as outdoor space. This number is calculated as cumulative private and common outdoor space.	*See Sheet L4 which shows 16+% of the site as open space.*	X			
3.4.E.2	Outdoor Space: Common space shall be incorporated into the site plan as a primary design feature and not just as remnant pieces.	*Open space is provided througout the project in areas convenient to the tenants, and their design is such as to allow for varied use by all ages.*	X			
3.4.E.3	Outdoor Space: Types: Permitted outdoor space types that count toward the satisfaction of the required amount of outdoor space are: patios, verandas, and courtyards.	*These types of spaces are included in the outdoor spaces of the projects.*	X			
3.4.E.4	Outdoor Space: Dimensions: The minimum courtyard dimension should be thirty feet (30'-0") on one side for buildings. If the courtyard is surrounded by three (3) or more sides or if the building is three (3) or more stories, the minimum dimension on one (1) side should be forty feet (40'-0").	*The outdoor spaces are of a varied sizes. Not outdoor space open space is less than 3,000-sf in size, with the largest being nearly 20,000-sf (clubhouse area).*	X			

3.4.E.5	Outdoor Space: Encroachments: Encroachments into the outdoor space are permitted on all sides, provided that the minimum thirty feet (30'-0") dimensions is maintained, exclusive of the encroachments.	*The design and layout for the outdoor spaces account for building bumpouts.*	X			
3.4.E.6	Outdoor Space: Design: the outdoor space must be open to the sky, except for any allowable encroachment and any shade structures within the space. Communal outdoor spaces should provide a high quality amenity and be easily accessible for all residents.	*Outdoor spaces are open to the sky and area easily accessible for all users.*	X			
3.4.E.7	Outdoor Space: All outdoor space should be landscaped or hardscaped. In hardscaped areas, the use of permeable paving and planters in encouraged.	*Outdoor spaces include softscape and hardscape, as appropriate for the uses are each space.*	X			
3.4.E.8	Outdoor Space: At least twenty-five percent (25%) of the required on-site outdoor space should be planted with ground cover, shrubs, trees, or a combination of thereof.	*The outdoor space at the clubhouse area includes the most hardscape of any outdoor space, and includes at least 25% of landscape area. The rest of the outdoor spaces include a higher percentage of landsape area.*	X			
3.4.E.9.a	Outdoor Space: Common Outdoor Spaces: Should be readily assessable from all residential units.	*Outdoor spaces are open to the sky and area easily accessible from all units via concrete ADA-accessible pathways.*	X			
3.4.E.9.b	Outdoor Space: Common Outdoor Spaces: Amenities should not be placed in remote, hard to see locations.	*Amenities are provided in easily accessible and open areas between buildings, along walkways and drive aisles, and in open view corridors along drive aisles and walkways.*	X			
3.4.E.9.c	Outdoor Space: Common Outdoor Spaces: Amenities that may be counted toward open space requirements: tot lot/play structure, community garden, picnic tables and BBQ area, swimming pool, indoor recreation facility, sport courts, natural open space, and/or other active or recreation areas that meets the intent of this guideline.	*The project includes play structures, swimming pool, indoor recreation facility and other active/passive recreational amenities and opportunities.*	X			
3.4.E.9.d	Outdoor Space: Common Outdoor Spaces: Buildings with ground floor office or retail use should provide public spaces with the following amenities: weather protection at each building entrance (individual units and buildings); a plaza or courtyard next to the primary buildings entrances.	*There is no Office and/or Retail component to the proposed Project.*			X	
3.4.F.1	Frontage: Portions of façades above forty-five feet (45'-0") in height and greater than one hundred fifty feet (150'-0") in length should occupy no more than eighty percent (80%) of the primary facade plane established on the ground floor.	*The buildings are belwo 45' in height.*	X			
3.4.F.2	Frontage: Permitted frontage types are: forecourt, storefront, storefront cafe, urban frontage, and dooryard. Developments must also comply with the permitted frontage types of the block development stands.	*While not listed as an option for the Courtyard Building/Bungalow Court, the proposed frontage type is Fence and Hedge. We are selecting this frontage type since we plan to implement perimeter fencing to provide privacy and safety for our residents. Further, the Applicant feels that the intent of Fence and Hedge Frontage Type is for residential use and aligns well with the nature of the adjacent uses around the site location, which is less urban than the Design Guidelines account for. The Applicant feels that fencing this site is important for enhanced protection for the project's residents, which is particularly important on the projects frontage on Sunrise Blvd as it is a Major Thoroughfare in the region with high traffic volumes and posted speed limit of 50 mph. A fence will also allow families with peace of mind for children and pets to play outdoors with confidence and provide the privacy necessary for residential comfort and dignity. Per conversations with City Planning Staff on 7/14/2025, we are permitted to select the Fence and Hedge frontage type so long as we provide proper reasoning even though it's not listed as a Frontage option under Courtyard Building/Bungalow Court.*	X			
CHAPTER 4 - BUILDING ARTICULATION AND MASSING STANDARDS						
4.2	Building Massing and Articulation Techniques New buildings should be composed of simple, well-proportioned masses designed according to a combination of a minimum of five (5) of the following massing and articulation techniques:	*A minimum of five massing and arcticulation techniques is provided.*	X			
4.2.1	Horizontal Articulation: Step a portion of the street-facing façade forward or backward from the predominant façade plane a minimum of six feet (6'-0") for a minimum distance of twenty-five feet (25'-0").	*The elevations are designed to have many plane breaks along the length of the street-facing elevations. This is accomplished through patio and balcony pop-outs, which prevent any long length of building frontage from existing uninterrupted. The stairways and associated elements are recessed back greater than 6' to help break up the façades.* *greater than 6' to help break up the façades.*	X			
4.2.2	Vertical Articulation: Step a portion of the street-facing façade upward or downward from the predominant building height a minimum of four feet (4'-0") for a minimum distance of twenty-five feet (25'-0"). This technique is useful for "stepping down" the scale of a new building adjacent to an existing smaller building.	*The façade at the corners steps down from 3rd to the 2nd level, a drop of approximately 10'. The roof features a combination of roof forms, including gable and shed or mono-pitched roof.*	X			

4.2.3	Architectural Projections: Append or project façade elements such as balconies, bay windows, cantilevered rooms, and/or awnings.	*Each unit has either a Patio or Balcony that projects away from the building. Each of the patio & balcony door walls is then recessed back to further provide relief.*	X			
4.2.4	Architectural Recessions: Recess architectural elements or spaces - such as recessed porches, covered passages, recessed balconies, and windows - into the place of the façade.	*Building elevations feature recessed stairways, porches, patios and window trims. These recessed elements create covered passages, shadow lines and recessed outdoor living areas.*	X			
4.2.5	Façade Differentiation: Design the façade to appear as though it is composed of two (2) or three (3) distinct "buildings" with differing material and/or color combinations on each "building."	*The building features 2 different wall colors that divide the elevation into distinct façade sections.*	X			
4.2.6	Height Averaging: Up to thirty percent (30%) of the building footprint area may be one story/ten feet (10'-0") taller than the maximum height allowed in a given zone, provided as equal amount of building footprint area is one story/ten feet (10'-0") shorter than the maximum allowed height.	*The project is a 3-story walkup building, and the required unit count did not allow us to eliminate stories (or units) from our typical building layout to achieve vertical variation. However, we are removing bedrooms from the 3rd level corner unit to reduce the massing at the corners.*	X			
4.2.7.a	Floor Level Articulation: Providing a substantial horizontal articulation of the façade at the top of the first story such as a cornice, belt course, or other such architectural element which is appropriate to the style of the building.	*This base is articulated with group windows and patio walls, the middle is defined by windows that include shutters, trim and top with distinct gable rooflines.*	X			
4.2.7.b	Floor Level Articulation: Provide articulation at the parapet (for buildings with flat roofs) or below the eve (for buildings with sloped roofs) that marks the top of the building with a cornice, color change, or material change.	*Gables and roof eaves provide roofline articulation.*	X			
4.2.7.c	Floor Level Articulation: For buildings or portions of buildings which are three (3) stories in height or taller, provide articulation for the top story of the building. This may be accomplished by a color change, material change, a cornice/belt course at the bottom of the uppermost story.	*Window detailing define the top level.*	X			
4.3.a	Transition to Residential Districts In areas where proposed mixed-use or multi-family buildings are adjacent to existing single-family homes those portions of the mixed-use or multi-family buildings that abut an existing single-family home should abide by the following; a. Along the border of existing single family homes new structures should not extend above a plane starting at thirty feet (30'-0") in height and extending in at a 45-degree angle from vertical toward the interior of the site, up to the maximum building height (see Illustration).	*There is no Single Family Homes and/or Zoned Single Family Property bordering the subject project.*			X	
4.3.b	Transition to Residential Districts In areas where proposed mixed-use or multi-family buildings are adjacent to existing single-family homes those portions of the mixed-use or multi-family buildings that abut an existing single-family home should abide by the following; The thirty feet (30'-0") height measurement should be taken from the same reference grade as determined for the subject site.	*There is no Single Family Homes and/or Zoned Single Family Property bordering the subject project.*			X	
4.4.A	Materials, Color Variation, and Architectural Styles In addition to the articulation and massing strategies, building façades may employ the following material, color, and architectural style techniques: Variety of Materials and Colors Utilize different materials and colors to divide building façades into vertical and/or horizontal increments and/or to emphasize certain architectural elements or features.	*Refer to material board on sheet A7.0 for material and color palette.*	X			
4.4.B	Materials, Color Variation, and Architectural Styles In addition to the articulation and massing strategies, building façades may employ the following material, color, and architectural style techniques: Diversity of Architectural Styles Employ a variety of architectural styles in order to give large buildings the appearance they are comprised of multiple, smaller, attached, village-scale "buildings." See Section 6 (Architectural Standards).	*The buildings are smaller and are not diverse in style.*			X	
CHAPTER 5 - FRONTAGE TYPES						

5.1.a	In order for applications to be approved, each application should meet the following criteria as applicable: Creates or maintains a pedestrian oriented streetscape,	*The proposed Fence and Hedge frontage is consistent with the existing streetscapes along Chrysanthy and Sunrise which consist of wide landscape areas with winding pedestrian pathways and perimeter walls around neighborhoods that are focused inward. The project has been designed be pedestrian oriented while maintaining privacy and security for the residents. The design treats the fence as a subtle frame for public life rather than a barrier. The goal is to maintain an active edge along the street while providing residents with security and privacy. The provided landscaped setbacks provide a green buffer, softens the fence, and offers shade and seasonal interest. Clear sightlines, lighting, and signage will make the pedestrian access points to the site feel inviting. On the interior of the site, a continuous network of internal pedestrian circulation is lined with landscape connecting to key amenity spaces throughout the site creating seamless connections, inviting movement through and around the site. The project has been designed to remain welcoming and pedestrian friendly. The design treats the fence as a subtle frame for public life rather than a barrier. The Applicant feels this is an appropriate design for the context of the neighborhood for this site, which differs from the urban environment assumed in the Design Guidelines.*	X			
5.1.b	In order for applications to be approved, each application should meet the following criteria as applicable: Generates a transition from the public streetscape to each building and its site.	*The proposed Fence and Hedge frontage is consistent with the existing streetscapes along Chrysanthy and Sunrise which consist of wide landscape areas with winding pedestrian pathways and perimeter walls around neighborhoods that are focused inward. The site design intends to guide pedestrians and residents naturally from the active public realm to the semi-private residential environment while reinforcing the character of the neighborhood. The building entrances are designed to create shelter and a strong visual signal of entry. The community building with the leasing office is centrally located with easy access for pedestrians and vehicles. Clear sightlines, lighting, and signage will make the pedestrian access points to the site feel inviting. By layering spaces, integrating landscaping, and providing clear architectural and lighting cues, the design establishes a gradual and intuitive transition from the public streetscape to each building and its site. Internally, the site layout design includes a welcoming sidewalk zone, followed by a landscaped buffer area, and finally the building entrance. The Applicant feels this is an appropriate design for the context of the neighborhood for this site, which differs from the urban environment assumed in the Design Guidelines.*	X			
5.4.A	Fence and Hedge: Intent Statement Fence and hedge frontages provide a green buffer for residential ground-floor uses at heavily-trafficked thoroughfares. The fence and hedge frontages provide privacy.	*The design anticpates the use of hedges to provide privacy and separation between ground-floor residences and walkways. This will be incorporporated as part of the final design.*	X			
5.4.B	Fence and Hedge: Entries should be recessed behind fence and an optional hedge. There should be a break for pedestrian access at least every two-hundred feet (200 ft.) But can be frequent if serving row houses.	*Building entrances are independent of gated entries because of the building typology. As the proposed building lobbies are located on the internal "streets" of the project, there are no breaks in the fence for building entries. There are pedestrian gates in perimeter fence accessible from both Chrysanthy and Sunrise. Reducing the number of access points also provides greater security for the project residents and gives families peace of mind with children and pets playing outdoors. The Applicant feels this aligns well with the nature of the adjacent uses around the site location, which is less urban than the Design Guidelines account for and is particularly important on the projects frontage on Sunrise Blvd as it is a Major Thoroughfare in the region with high traffic volumes and posted speed limit of 50 mph.*	X			
5.4.C	Fence and Hedge: Dimensions Fence and hedges should be no taller than forty-inches (40") tall measured from the sidewalk grade.	*Plant species for hedges will be selected with this criteria in mind as part of the final design for the project. Clear views throughout the project and CPTED guidelines are primary criteria used in the development of the final planting plan.*	X			
5.4.D.1	Fence and Hedge: Paving and Landscaping: Yards should be landscaped with native or adaptive landscaping or hardscape.	*Plant species for this project include native species, and all non-native are well adapted for this region.*	X			
5.4.D.2	Fence and Hedge: Paving and Landscaping: Walks should be paved.	*Walks are paved and will be demonstrated as such as part of the final design.*	X			
5.4.E.1	Fence and Hedge: Additional Standards and Guidelines: If used, hedge should be thick enough to obscure the fence.	*This design criteria will be included in the final planting design. Softening of hard elements (e.g. fencing) by placement of planting is a primary design consideration at these types of locations.*	X			

5.4.E.2	Fence and Hedge: Additional Standards and Guidelines: Fence tops should not be visible above hedge upon maturation of landscaping.	*Project is proposing a 6' fence height, so we do anticipate that the fence tops will be visible above the matured landscaping. The optional hedge is intentionally omitted to maintain both a sense of security and visual connectivity between the street facing buildings and the street. The Applicant feels that a 6' fence is important for enhanced protection for the project's residents, which is particularly important on the projects frontage on Sunrise Blvd as it is a Major Thoroughfare in the region with high traffic volumes and posted speed limit of 50 mph. A fence will also allow families with peace of mind for children and pets to play outdoors with confidence and provide the privacy necessary for residential comfort and dignity. The sense of a protected personal environment reduces stress and fosters a stronger feeling of "home," which is critical for quality of life. Per conversations with City Planning Staff on 7/14/2025, a 6' fence would be acceptable so long as the Applicant provided proper justification for the decision.*		X		
5.4.E.3	Fence and Hedge: Additional Standards and Guidelines: Fences should be metal, wood or vinyl. Chainlink fencing not allowed.	*Fences are propsed to be decorative metal fencing.*	X			
CHAPTER 6 - ARCHITECTURAL STANDARDS						
6.2.1	Roof Guidelines: When used, "cool roofs" should be designed using white or other lightly colored surface to reflect the sun and reduce building temperatures and need for cooling.	*Cool roofs will be provided at flat roofed areas.*	X			
6.2.2	Roof Guidelines: Roof forms and materials that complement the character of the building design should be used.	*Roof material is in character with architectural style.*	X			
6.2.3	Roof Guidelines: The roof edge should be defined with a parapet, cornice, overhang, or some other architectural element.	*Roof edges are made up of gables, tile caps, and overhang details.*	X			
6.2.4	Roof Guidelines: Green roofs should be considered for their ability to treat stormwater, as well as to provide a visual amenity.	*Green roof considered but not implemented.*	X			
6.2.5	Roof Guidelines: Rooftop mechanical equipment should be clustered away from the edge of the building and behind/within an enclosure that is architecturally compatible with other on-site development in terms of colors, materials, and architectural styles so as not to be visible from the street and improve building appearance from surrounding taller buildings.	*Rooftop equipment screened by roof.*	X			
6.2.6	Roof Guidelines: Rooftop equipment not within an enclosure should be painted to match the rooftop, if feasible.	*Roof top equipement will match adjacent color.*	X			
6.2.7	Roof Guidelines: Unenclosed shade structures, and similar amenities should be considered to encourage rooftop use and to provide visual relief. Shade structures should not exceed 16 feet in height from the roof deck floor level and do not count as a Story.	*No shade structures provided on roofs.*			X	
6.2.8	Roof Guidelines: Rooftop amenities such as swimming pools are permitted; rooftop amenities do not count as a Story.	*No rooftop amenities provided.*			X	
6.3.1	Colors and Materials: Changes of exterior color, texture, or material should be accompanied by changes in plane so that buildings appear substantial and integral.	*Changes of exterior color, texture, and material are accompanied by changes in plane and/or utilizations of trim / banding to appear substantial and integral.*	X			
6.3.2	Colors and Materials: Color and material changes at the outside of corners of a building or plane change that give a thin veneer, or faux stone appearance, should be avoided.	*Changes in material on outside corners have been avoided.*	X			
6.3.3	Colors and Materials: Materials that have demonstrated their durability in similar climates, sustainably manufactured, harvested, and/or sourced should be considered.	*Materials have demonstrated durability in similar climates.*	X			
6.4.1	Entrances: The Primary Entrance to buildings should be oriented to the Street front, or courtyard, rather than to the parking lot, Alley, or interior of lot.	*As this is a large site, the proposed project has multiple buildings with building entrances oriented toward it's Internal "Street fronts" to provide convenient access to parking for residents and their guests. Building entrances are also oriented toward the parking for accessibility, resident convenience, safety and operational efficiency purposes. Placing the primary building entrances adjacent to the parking lot allows for the shortest, most level path from accessible parking spaces to the front door, reducing travel distance for people with mobility challenges. The Applicant feels the design still creates a human-scale mixed-use environment by layering spaces, integrating landscaping, and providing clear architectural and lighting cues, which all help establish a gradual and intuitive environment. Per conversations with City Planning Staff on 7/14/2025, parking-oriented building entrances would be acceptable so long as the Applicant provided proper justification for the decision.*	X			

6.4.2	Entrances: Where side or rear building entrances are provided, they should always be accompanied by a front, street-facing entrance.	*As this is a large site, the proposed project has multiple buildings. All of the buildings only have front entrances which are facing the projects internal "Streets". Because we will be implementing a perimeter fence for privacy and security reasons there are no side of rear building entrances*	X			
6.4.3	Entrances: On corner lots with one retail frontage, residential lobby entries should be located on the Side Street of the two Streets, where practical, to allow uninterrupted retail on the Primary Street.	*There is no retail provided.*			X	
6.4.4	Entrances: Residential entries should be well marked and easy to find. Entry doors should be recessed to articulate the entrance, add depth to the façade, and ensure that doors do not swing into the Sidewalk.	*Residential entries are clearly Identifiable.*			X	
6.4.5	Entrances: Residential and/or hotel entries for pedestrians may be accessed from courtyards, which provide additional richness to the streetscape experience.	*This sections states Residential entries for pedestrians "may" be accessed from courtyards. As stated above, the building entries are located fronting the projects internal streets. Residential entries are located from common breezeways at each level. Building entrances are oriented toward the parking for accessibility, resident convenience, safety and operational efficiency purposes. Placing the primary building entrances adjacent to the parking lot allows for the shortest, most level path from accessible parking spaces to the front door, reducing travel distance for people with mobility challenges. The Applicant feels the design still creates a human-scale mixed-use environment by layering spaces, integrating landscaping, and providing clear architectural and lighting cues, which all help establish a gradual and intuitive environment. Per conversations with City Planning Staff on 7/14/2025, parking-oriented building entrances would be acceptable so long as the Applicant provided proper justification for the decision.*			X	
6.4.6	Entrances: Special paving and landscaping should be included at entrances to enhance the overall building design.	*Special landscaping is included at entries and enhanced materials are applied to the buildings surrounding the building entrances, however, there is no special paving considered in the design. The building entrances are designed to create shelter and a strong visual signal of entry. Clear sightlines, lighting, and signage will make the pedestrian access points to the site feel inviting. While not contemplating special paving the building entrances have been enhanced, and the Applicant feels they conform to the intent of the Architectural Standards in creating a human-scale mixed-use environment*		X		
6.7.1	Passageways: Common walkways should be introduced to increase access within and across the blocks.	*Sidewalks have been incorporated into the site design providing residents access routes from Residential Buildings to Common Areas, other Residential Buildings, Clubhouse, and Public Right of Way. Please see Preliminary Site Plan Sheet C2.1.*	X			
6.7.2	Passageways: Common walkways may be open or roofed, and may go between or through buildings, to courtyards, parking areas or public open spaces.	*Sidewalks have been incorporated into the site design providing residents access routes from Residential Buildings to Common Areas, other Residential Buildings, Clubhouse, and Public Right of Way. Please see Preliminary Site Plan Sheet C2.1.*	X			
6.8.1	Windows: Windows should overlook public areas to allow for increased safety.	*Windows face public street frontage.*	X			
6.8.2	Windows: Highly-reflective, mirrored, heavily-tinted and opaque glazing should not be utilized (except that opaque glazing may be used as spandrel glass). Window glazing should be transparent with clear or limited UV tint so as to provide views to and from the inside of the building and the street. Windows into bathrooms are exempt	*Window glazing is intended to be transparent.*	X			
6.8.3	Windows: Outer surface of window frames facing the public realm set within masonry, stucco or simulated masonry or stucco walls should be recessed from the wall or trim surface by at least two inches (0'-2").	*Trim and shutter on the out perimeter of the window frames create a 2" recess.*	X			
6.8.4	Windows: Regardless of architectural style, windows should be located in such a way so as to help avoid blank walls.	*Windows are positioned to avoid blank walls.*	X			
6.8.5	Windows: If exterior shutters are used, they should be sized and mounted appropriately to fit the window.	*Accent Shutters are provided and sized appropriately.*	X			
6.8.6	Windows: Windows and related architectural treatments should be designed, arranged and sized to be appropriate in style, scale, proportion and purpose to the overall architectural form.	*Windows are arranged and proportioned to the overall architectural form.*	X			
6.8.7	Windows: Upper-story windows should be designed to be operable. Typically, upper-story windows should be smaller than ground floor windows.	*Upper story and lower story windows are operable.*	X			
6.8.8	Windows: Lintels, transoms, sills, shutters, trim detailing and mullions should be considered to enhance window elements.	*Window details include header and sill enhancements.*	X			
6.9	Exterior Stairways: Exterior staircases should share compatibility with the architectural style of the building to which they are attached.	*The stairway is recessed within the building and compliments the design.*	X			

6.10.1	Common Open Space: Proposed developments should incorporate site amenities such as linear planting beds or seat walls, street furniture, enhanced paving surfaces, public art, lighting, etc., where appropriate.	*Planting beds, seat walls, and site furniture are included at the common open spaces around the site.*	X			
6.10.2	Common Open Space: Plant species should be selected based on their suitability for an urban environment, for their cleanliness, and for their ability to survive in a healthy state despite constrained growing conditions. Ease of maintenance should also be considered.	*All of these factors are criteria used in making plant species selection. Final planting design will focus on appropriate plant species for the space and desired use, with a primary focus on mature plant size to reduce the need for high maintenance.*	X			
6.10.3	Common Open Space: The majority of plant materials should consist of drought tolerant and/or native plants with minimum water requirements.	*The project includes CA native species, as well as drought tolerant species. All species have either a low or moderate classication (WUCOLS), with the majority having a low water-use classification.*	X			
6.10.4	Common Open Space: Turf should only be utilized where it is to be used for recreational uses. Turf should not be located in continuous planters or in front Street or side Street setback areas between the sidewalk and building facade as shown in "landscaped areas" within the frontage standards.	*Turf is used in limited locations and for the intention of passive recreational use. Turf is not used anywhere for purely aesthetic purposes.*	X			
6.10.5	Common Open Space: The use of canopy trees for shading and cooling is encouraged where appropriate, particularly in publicly accessible open spaces and plazas, to mitigate the urban heat island effect. Where canopy trees are used, site design should provide sufficiently sized tree pits or planting beds and appropriate planting medium to provide for healthy tree growth.	*Shade trees are provided throughout the project for this purpose, especially at common areas. Final design will select tree species per lcoation taking into account the size of the planter at any given location.*	X			
6.10.6	Common Open Space: Artificial trees, shrubs, turf and plants should not be used as landscape within the public right of way, any parking area, or within an open space area directly visible to from the public right of way.	*Artificial plants are not proposed.*			X	
6.10.7	Common Open Space: Decorative water features shall use re-circulating water and, where available, shall use recycled water	*Decorative water features are not proposed with this project.*			X	
6.10.8.a	Common Open Space: Landscaped areas are important components Water Quality Management Plans (WQMPs). These areas should be designed to: Consider the full range of Best Management Practice (BMP) alternatives for addressing drainage, infiltration, and stormwater quality for the site, including drainage from roofs, plazas, courtyards, and any surface parking areas.	*Final planting design for the project will coordinate with the civil engineer's plans to address these items, as feasible. This will be done as part of the final design of the project.*	X			
6.10.8.b.1	Common Open Space: Landscaped areas are important components Water Quality Management Plans (WQMPs). These areas should be designed to: Utilize Low Impact Development (LID) design principles and practices to address infiltration of runoff through the use of: Pervious surfaces in lieu of impermeable surfaces in plazas, courtyards, and common walkways where technically feasible.	*Final planting design for the project will coordinate with the civil engineer's plans to address these items, as feasible. This will be done as part of the final design of the project.*	X			
6.10.8.b.2	Common Open Space: Landscaped areas are important components Water Quality Management Plans (WQMPs). These areas should be designed to: Utilize Low Impact Development (LID) design principles and practices to address infiltration of runoff through the use of: Landscaped areas integrated into the drainage design where runoff can be directed into planters with subsurface features to further enhance storage or towards permeable surfaces	*Final planting design for the project will coordinate with the civil engineer's plans to address these items, as feasible. This will be done as part of the final design of the project.*	X			
6.10.8.b.3.a	Common Open Space: Landscaped areas are important components Water Quality Management Plans (WQMPs). These areas should be designed to: Utilize Low Impact Development (LID) design principles and practices to address infiltration of runoff through the use of: Do not include Surface infiltration basins unless: They are accommodated within an active or passive park or open space that can be closed during flood events.	*Common Open Space will use LID design principles to include pavement disconnect and vegetated planters to treat local runoff from the Common Areas. Surface Infiltration Basins are not proposed and Common Areas are not anticiapted to convey upgradient large stormwater runoff.*	X			
6.10.8.b.3.b	Common Open Space: Landscaped areas are important components Water Quality Management Plans (WQMPs). These areas should be designed to: Utilize Low Impact Development (LID) design principles and practices to address infiltration of runoff through the use of: Do not include Surface infiltration basins unless: They are not visible from a street or public open space and they are in addition to the required on-site open space.	*Common Open Space will use LID design principles to include pavement disconnect and vegetated planters to treat local runoff from the Common Areas. Surface Infiltration Basins are not proposed.*	X			
6.10.9	Common Open Space: Outdoor dining areas should have special paving and/or a row of planters or bollards, or permeable fence to delineate the dining space.	*Outdoor dining areas are not part of this project. That said, for areas similar in nature, such as seating areas, we have provided planters to separate these or otherwise designed to have these spaces be outside of the main flow of pedestrian movement, as much as feasilbe.*			X	
6.10.10	Common Open Space: Interior courtyards should include seating and planting areas. Low walls and steps may be used as alternative forms of seating.	*Open spaces included seating. Seat walls are used in some areas.*	X			
6.10.11	Common Open Space: Interior courtyard landscaping should include shade trees or shading devices, where space permits.	*Shade trees and shade trellises are proposed at common areas.*	X			

6.10.12	Common Open Space: Lighting should be provided that illuminates the courtyard, but does not negatively impact surrounding buildings.	*Lighting will be placed strategically so it doesn't negatively impact surrounding buildings.*	X			
6.11.1	Ventilation: Air ventilation from outdoors is encouraged to improve indoor air quality for occupant comfort and wellbeing.	*Operable windows are provided at all apartment units.*	X			
6.11.2	Ventilation: Windows, vents, and courtyards should be placed and oriented to enhance cross-ventilation and cooling.	*Each bedroom and living room has fenestration, allowing for natural ventilation.*	X			
6.11.3	Ventilation: Operable transom windows are highly encouraged.	*Operable transom window are not included. The residential floor to ceiling heights are 9' with the tops of the operable windows at 8' so there is not enough room for operable transom windows. The applicant understands this is not a firm requirement but rather an encouragement.*		X		
6.12.1	Garden Walls, Perimeter Walls, Hedges, and Fences: Garden walls, perimeter walls, hedges, and fences may be used to define the edge between adjoining private properties. Walls, hedges, and fences facing the public Street should also comply with the Frontage Type standards (see Section 3.4).	*Fences are proposed along the project edge. The fences and hedges will comply with Section 3.4 except where otherwise descrbied herein.*	X			
6.12.2	Garden Walls, Perimeter Walls, Hedges, and Fences: No fence, wall, or hedge should exceed forty-inches (40") in height in front yards and street facing side yards or six feet (6'-0") in height in rear yards.	*Final design will incorporate these items. The project is proposing 6' high fencing, so that is an exception. The reason for this descision as as follows:* *Enhanced Sercurity - enhanced protection for the projects residents. Beyond the physical deterrence a taller fence will allow families with peace of mind for children and pets to play outdoors with confidence, knowing the barrier is high enough to prevent them from wandering out or strangers from accessing their space. This is particularly important on the projects frontage on Sunrise Blvd as being a Major Thoroughfare in the region with high traffic volumes and posted speed limit of 50 mph.* *Stronger Privacy - Privacy is a cornerstone of residential comfort and dignity. The sense of a protected personal environment reduces stress and fosters a stronger feeling of "home," which is critical for quality of life.* *•Visual Shielding: A 6-foot fence effectively blocks sightlines from streets, neighboring properties, or public pathways. By contrast, a 40-inch fence barely screens residents from passersby, leaving yards and windows exposed.* *•Noise Buffer: Although not soundproof, a taller fence provides a modest buffer against traffic and street noise, creating a more peaceful living environment.* *•Outdoor Enjoyment: The inclusion of a 6 foot fence will assist with marketing efforts in attracting future residents and will allow residents to enjoy their patios and green spaces that have been thoughtfully designed to fullest extent.*	X			
6.12.3	Garden Walls, Perimeter Walls, Hedges, and Fences: Garden walls, perimeter walls, hedges, and fences should be built at least eighteen inches (0'-18") from the lot line, to allow room for footings and planting.	*Fences for the project along the property lines have been laid out to accommodate this design item. Final design plans will incorporate this.*	X			
6.12.4	Garden Walls, Perimeter Walls, Hedges, and Fences: Walls and fences should not be used at shopfronts, except where they are necessary to accommodate grade changes.	*There is no Retail component to the proposed Project.*			X	
6.12.5	Garden Walls, Perimeter Walls, Hedges, and Fences: Solid perimeter walls should be constructed of high quality enduring construction materials such as masonry or ornamental metal. Concrete block and interlocking concrete pavers (such as keystone) are not permitted when visible from the street.	*The project is not proposing solid perimeter walls.*	X			
6.12.6	Garden Walls, Perimeter Walls, Hedges, and Fences: No plastic or vinyl fencing should be permitted in front yards or street facing side yards.	*Plastic or vinyl fencing is not proposed with this project.*	X			
6.12.7	Garden Walls, Perimeter Walls, Hedges, and Fences: No chainlink fencing allowed.	*Chainlink fencingis not proposed with this project.*	X			
6.12.8	Garden Walls, Perimeter Walls, Hedges, and Fences: In general, fences, walls, and hedges should complement the architecture of the building that they enclose and be compatible with the land use intensity. For example, residential uses should incorporate a softer texture of enclosure such as wood fences and landscaped hedges, whereas commercial buildings should use masonry or concrete walls.	*This projects proposes hedges and decorative metal fencing, which is appropriate and compatible with the architeture and residnetial nature of this project.*	X			
6.12.9	Garden Walls, Perimeter Walls, Hedges, and Fences: Walls and fences should be architecturally enhanced and complemented by adjoining landscaping. Tiered planting should be provided adjacent to perimeter walls to soften their appearance from surrounding areas.	*Landscaping will enhance the fences and buildings in this project. Tiered landscaping is a common design criteria used by the design team and will be incorporated into the final planting design.*	X			
6.13	Retaining Walls	*There is no Retaining Walls as a component to the proposed Project.*	X			

6.14.1.a	Parking Area Standards: Surface parking areas: Surface parking areas with two (2) rows of parking or fewer should be landscaped with a minimum of one tree per twenty (20) spaces with a minimum of one landscaped island (between spaces) for every ten (10) spaces.	*Please reference Sheet C2.1 Preliminary Site Plan. For Single Row of Parking there is no stretch of parking that Exceeds 10 parking Spaces without a landscape island. At Solar Structure 6 we are exceeding the double row of parking and 20 spaces...we are providing 24 spaces...however this area is covered with a Solar Structure to meet the required solar energy demands of the project.*	X			
6.14.1.b	Parking Area Standards: Surface parking areas: Surface parking areas with more than two (2) rows of parking should include a landscaped median for every other row of parking that extends the entire length of the row. The landscaped median should be planted with shade trees at least every forty-five feet (45'-0") and include a common walkway for access to and from the parked vehicles. Where landscaped medians are present, landscaped islands should also be placed a minimum of every fifteen (15) spaces.	*Project does not propose a scenario of more than 2 rows of parking.*	X			
6.14.1.c	Parking Area Standards: Surface parking areas: Surface parking areas covered in solar panels are allowed to achieve fifty percent (50%) of the shade canopy requirement.	*Solar structures are included in the calculations for parking lot shade, see the table on page L3.*	X			
6.14.2	Parking Area Standards: When unrequired parking spaces are provided, at least five percent (5%) of parking spaces should be equipped for charging of electric vehicles, with signage limiting the use of those spaces to electric vehicles only. An electrical conduit should also be installed at the time of construction to facilitate the future installation of EV charging stations to at least ten percent (10%) of parking spaces.	*Project does not propose any unrequired parking above what the Zoning Code requires. However the project does provide EV Ready and EV Charging Stations (for 50% of parking field) consistent with 2022 CALGREEN Residential Mandatory Measures.*	X			
6.14.3	Parking Area Standards: Permeable surfaces for parking and maneuvering areas are encouraged. Stormwater requirements may identify the need for permeable surfaces. Permitted permeable surfaces include: pervious concrete and pervious pavers.	*Project proponent does not propose any Permeable surfaces for parking and/or maneuvering areas.*	X			
6.14.4	Parking Area Standards: Parking areas should be accessed from alleys, where feasible. Where alleys do not exist, parking areas may be accessed from side streets or narrow driveways that are perpendicular to the street.	*Parking Areas are accessed from private drive aisles throughout the project site and all parking stalls are located behind buildings and/or perpendicular to public streets.*	X			
6.14.5	Parking Area Standards: See Section 8 for approved shade trees.	*See comments in Section 8.*	X			
6.15.1	Service and Auxiliary Equipment: Service, utility, and mechanical functions, including retail loading, should be located in alleys whenever present. When alleys are not present, service, utility and mechanical functions should be placed behind buildings and provisions for access should be made.	*Project has no Functions as listed being a Multi-Family Residential Project.*	X			
6.15.2	Service and Auxiliary Equipment: Service, utility, and mechanical equipment that is visible from the street should be screened from view with landscaping or enclosures. Backflow preventers and fire standpipes, along with utility box transformers should be screened.	*Please reference Sheet C2.1 Preliminary Site Plan. Equipment has been located that such that it would not be visible from the Public Streets. However there some exceptions and screening has been placed in an effort to screen equipment however it should be noted that when screening it compliance with utility/fire department clearances must be complied with.*	X			
6.15.3	Service and Auxiliary Equipment: All screening devices should be compatible with the architecture, materials and colors of adjacent buildings.	*Should equipmennt need to be screeened, it will comply.*	X			
6.15.4	Service and Auxiliary Equipment: Trash areas that are visible from public streets or adjacent properties should be enclosed by walls. Trash area entrances should be enclosed by a door.	*Please reference Sheet C2.1 Preliminary Site Plan. Trash Enclosures have been located such that they would not be visible from the Public Streets. Trash Enclosures are enclosed in a 6-foot tall masonry wall to include access gates.*	X			
6.15.5	Service and Auxiliary Equipment: Service enclosures and retail loading areas should be sited to minimize nuisance to adjacent properties.	*Project does not have a retail loading use.*			X	
6.15.6	Service and Auxiliary Equipment: Roof vent penetrations and mechanical equipment should be located at least ten feet (10'-0") from any exterior building face.	*The schematic design phase is designing a 10' clearance from the exterior wall.*	X			
6.16.1	Architectural Lighting: Lighting should encourage a pedestrian-friendly environment and enhance both community safety and business exposure.	*Site Lighting is designed to be pedestrian friendly and enhance safety and community exposure. Please see Sheet E2.0 (Site Lighting)*	X			
6.16.2	Architectural Lighting: Lighting on buildings should be oriented to pedestrians in terms of scale, design, and location.	*Building Lighting is oriented to pedestrians of scale, design, and location. Please see Sheet E2.0 (Site Lighting)*	X			
6.16.3	Architectural Lighting: All exterior lighting should use full cutoff luminaries and be directed toward the areas to be lit to limit spill-over onto off-site uses.	*Lighting Fixtrures are "Dark Sky" compliant. Please see Sheet E2.1 (Site Lighting Photometric), excessive lighting does not protrude beyond lot lines*	X			
6.16.4	Architectural Lighting: Light quality should not be harsh, glaring, blinking or shed beyond lot lines.	*Please see Sheet E2.1 (Site Lighting Photometric), Light quality is not harsh, glaring, blinking, or protruding beyond lot lines.*	X			
6.16.5	Architectural Lighting: Building lighting may include low-level exterior lights adjacent to buildings and along pathways for security and wayfinding purposes and low-level accent lighting features and landscape elements.	*Low level lighting is not currently utilized*		X		

6.16.6	Architectural Lighting: Alleys should have lights mounted on outbuildings or garages.	*No Alleys or Garages on project*			X	
6.16.7	Architectural Lighting: Lights should use LED and other technologies to maximize energy efficiency.	*All Fixtures are LED Type*	X			
6.16.8	Architectural Lighting: High-pressure sodium lights are prohibited.	*All Fixtures are LED*	X			
CHAPTER 7 - ARCHITECTURAL STYLES						
7.3	Mediterranean	*The style is Mediterranean*	X			
7.3.1.a	Base: Exterior walls reach the ground with an expression of weight, with or without a base.	*Proposed exterior walls reach the ground and is proposed without a base.*	X			
7.3.1.b	Base: An explicit element of base is described either as a painted band of traditional colors or an applied band of stone or cast concrete.	*There is no explicit base considered. Despite this, the design includes other dynamic, contrasting, and vibrant facades, adding visual interest to the community and speak to the Mediterranean style. Low solid walls are utilized at the ground floor patios instead of the open railings used on the floors above to create an expression of weight that grounds the building to the site.*	X			
7.3.1.c	Base: Elements setback within the wall may have their own material connection to the ground, such as tile, plaster or concrete.	*There are no setback areas within the exterior walls. Despite this, the design includes other dynamic, contrasting, and vibrant facades, adding visual interest to the community and speak to the Mediterranean style. The solid walls at the first floor contribute to the visual "weight" of the buildings giving them an implied base.*	X			
7.3.2.a	Primary Walls: Expressed as single-plane expanses of plaster wall.	*Walls are defined by single-plane expanses of plaster.*	X			
7.3.2.b	Primary Walls: May be articulated by traditional moldings or applied ornament of stone or cast concrete to describe the vertical divisions into the base, body and top.	*They are articulated by molding bands and alternating heights.*	X			
7.3.2.c	Primary Walls: Control joints allowed.	*Control joints will be applied accordingly*	X			
7.3.2.d	Primary Walls: Columns are relatively abstract with minimal articulation on the capital and base.	*There are no columns.*		X		
7.3.3.a.i	Roof-Wall Connections: Exterior walls will transition into roof form by one of three devices: a projected wooden eave with exposed wooden rafters,	*Roof transitions include projected wooden eaves with expressed rafters and tile caps at gable ends.*	X			
7.3.3.a.ii	Roof-Wall Connections: Exterior walls will transition into roof form by one of three devices: a plaster molding or,	*There is no plaster molding for roof to wall connections.*		X		
7.3.3.a.iii	Roof-Wall Connections: Exterior walls will transition into roof form by one of three devices: a tile cap.	*Tile caps will be applied accordingly.*	X			
7.3.3.b	Roof-Wall Connections: Foam moldings are permitted only on the second (2nd) floor or above and should not be used in occupied or high-use areas such as doorway trim or facing balconies.	*There is no foam moldings.*		X		
7.3.4.a	Roof: May be pitched at a 3:12 ratio and finished in clay or concrete tile with overhanging eaves typically supported by brackets attached to the façade.	*Roof pitch is designed to be concrete tile at 4:12 pitch.*		X		
7.3.4.b	Roof: Flat roofs are allowed and should be articulated as an explicit exterior wall (tile may be multi-color randomly placed) visual transition to the sky. May be accessible and used as balconies or terraces.	*There is limited flat roof.*		X		
7.3.4.c	Roof: No birdstops allowed at end condition: must be mortar filled.	*There are no brid stops.*		X		
7.3.5.a	Drainage: May be conducted off pitched roofs by a traditional combination of gutters and downspouts.	*Drainage to be a combination of traditional gutters and downspouts as well as scuppers and integral roof drains.*	X			
7.3.5.b	Drainage: Flat roofs may be drained by use of trumpet scuppers. Such roofs draining internally to the roof will need tile or ceramic scuppers on exterior walls.	*Flat roof will have trumpet scuppers*	X			
7.3.5.c	Drainage: Rainwater reaching the ground may be harvested in cisterns or temporarily collected in dry wells.	*Rainwater will not be harvested.*		X		
7.3.6.a	Openings: Windows are generally punched openings with little to no surround. Deep-set (min three inch (0'-3") plaster return) and combined with deeper balcony, loggia, and arcade elements to generate complex building-wide vertical or horizontal compositions.	*There is no 3" recess provided. Only trim configurations include trim combined with shutters matching the aggregate size of the opening, or paired windows grouped vertically with trim and siding in between. Both details provide a recessed depth around the window, enhancing shadow and window conditions include trim applied to the header and sill.*		X		
7.3.6.b	Openings: Such compositions can be symmetrical overall, locally symmetrical or, asymmetrical.	*Windows composition are designed with trims to enhance shadow lines and prevent a flat appearance.*	X			
7.3.6.c	Openings: There is high ratio of wall to window, meaning that the windows are read as "punched."	*The façade features a high wall-to-window ratio, and additional treatments include windows set within deep balconies.*	X			
7.3.6.d	Openings: Shutters are the aggregate size of the associated opening.	*Shutters area provided.*	X			
7.3.7.a	Attached Elements: All allowable urban frontages in the project area can be expressed in terms particular to this architecture.	*Faux clay vents are expressed at gables.*	X			

7.3.7.b	Attached Elements: A number of architectural elements such as balconies, stairs, and chimneys can encroach beyond the primary exterior surface of buildings and into their setbacks. Balconies can either be supported by bracketing or can be entirely metal in construction.	*Archtectural elements are not encroaching.*	X			
7.3.8.a	Massing: Volumetric compositions can be of a single primary volume offset by a variety of lesser ones. Also possible are compositions that are expressed in a single volume.	*The massing is composed of a single primary volume with secondary forms and undulation at the roof level.*	X			
7.3.8.b	Massing: It is common and desirable to articulate building corners on corner lots. Various scales of tower elements are employed as either habitable spaces or as a means of ventilation. They can either protrude above the general building mass or can be engaged to a wall.	*There are no tower elements.*		X		
7.3.8.c	Massing: Such designs can be devised at the geometric corner or adjacent to it.	*Gable elements are expressed near the corners.*	X			
7.3.9.a	Site Definition and Landscape: Buildings typically collect surrounding public and private space into walled precincts consistent with their use. Forecourts, garden walls, and zaguans are common.	*The design does not include walled precincts. As a large Family Project, the amenity spaces are designed as larger open spaces rather than smaller walled in precincts to offer residents areas to congregate in larger groups and foster a sense of community while not infringing on the desires of other residents to maintain and live in a quiet environment. We will accomplish this through scattered green spaces throughout the site and through our centralized outdoor amenity space with recreational spaces for children, a pool area, and interior clubhouse space for recreation and resident programming. The design includes a fenced perimeter, but the site interior remains open to increase resident connectiveness and promote shared experiences, which increase resident quality of life.*	X			
7.3.9.b	Site Definition and Landscape: The landscape of gardens and courtyards heightens the spatial character of each such enclosed exterior room.	*The project design does not include enclosed exterior rooms. The landscape has been designed to provide articulation of the shared amenity spaces and is appropriate and compatible with the architecture and residential nature of this project. As a Family Project, amenity spaces are designed to offer residents areas refuge as well as spaces to congregate and foster a sense of community. We will accomplish this through scattered green spaces throughout the site and through our centralized outdoor amenity space with recreational spaces for children, a pool area, and interior clubhouse space for recreation and resident programming. The design includes a fenced perimeter, but the site interior remains open to increase resident connectiveness and promote shared experiences, which increase resident quality of life.*	X			
CHAPTER 8 - APPROVED TREES						
8.2	The following pages list shade trees that are approved for parking lots in the City of Rancho Cordova. You will need to submit a tree planting plan for review by the City Arborist. When planting, you must adhere to the minimum distances noted below. If you use a tree not on the list, you will be required to go through a more in depth review with the city.	*A planting plan is provided with proposed tree species. This proposed list incorporates previous comments from the the City Arborist. Nearly all tree species are selected either from the MFDG or from the City's Approved Tree List.*	X			

OWNER/APPLICANT

DATE OF DETERMINATION SUBMITTAL:_____
SUBMITTED BY NAME: ___Russell Condas_____

CITY OF RANCHO CORDOVA

DATE OF DETERMINATION:_____
REVIEW COMPLETE BY NAME: _____

CONDITIONS OF APPROVAL – MSDR-1222-0001 Asteria Flats

		Category	Timing/ Implementation	Enforcement/ Monitoring
On-Going Conditions				
1.	The approved entitlement is for a Multifamily Streamlined Design Review Permit for Asteria Flats. The project shall be constructed consistent with the Project Plans (Attachment 1) for a 236-unit multifamily development. Project MSDR-1222-0001.	Project Description	On-Going	Planning
2.	Applicant(s) agree to defend, indemnify and hold harmless with Counsel selected by the City of Rancho Cordova ("City") and its agents, officers, consultants, and employees ("City's Agents") from any and all claims, actions, suits, or proceedings against the City or the City's Agents to attack, set aside, void, or annul an approval by the City, or the City's Agents concerning the project (collectively "Claim"). The City shall promptly notify the Applicant of any Claim and the City shall cooperate fully in the defense. Nothing in this paragraph obligates the City to defend any Claim and the City is not required to pay or perform any settlement arising from any such Claim not defended by the City, unless the settlement is approved in writing by the City.	General	On-Going	Planning
3.	Any future alteration to the buildings, change in use, intensification of the site, or modification to the parking and landscaped area must be reviewed by the City to ensure compliance with all local, state, and federal regulations. Minor modifications that are found to be in substantial conformance with the approved plans such as colors, plant materials, or minor lot line adjustments, may be approved administratively. Major modifications shall be approved by the applicable decision making body.	General	On-Going	Planning
4.	Applicant/Developer shall not carry a negative account balance with the City for the processing of the project. If a	General	On-Going	Planning

CONDITIONS OF APPROVAL – MSDR-1222-0001 Asteria Flats

		Category	Timing/ Implementation	Enforcement/ Monitoring
	negative account balance occurs, it will be the developer's responsibility to pay the balance due, in order to avoid delays in the processing of future permits or recordation of maps. Please email the Finance Department at billings@cityofranchocordova.org for the status of your account with the City.			
5.	The Permit is valid for a period of three (3) years from the date of approval unless an extension is granted by the Community Development Director.	Expiration	On-Going	Planning
6.	Noise sources associated with construction, repair, remodeling, demolition, paving and/or grading of any real property must adhere to the development standards outlined within the City's Noise Element, RCMC 6.68 and RCMC 16.18.1407(F).	Noise	On-Going	Code Enforcement /Building
7.	The removal and replanting of landscape not listed on the approved plan set must be consistent with RCMC 23.716.080 through 23.716.090 and reviewed by the Planning Department prior to the removal. All landscape care, maintenance, and tree pruning must adhere to RCMC 23.716.100 through 23.716.110.	Landscaping	On-Going	Planning
8.	Signage is not approved with this permit. All signage shall comply with the City of Rancho Cordova Zoning Code.	Signage	On-Going	Planning
9.	Applicant shall be responsible for all damage to City streets associated with construction of the project and shall repair any damage as soon as possible.	Infrastructure	On-Going	Public Works
10.	Public lower laterals must not be smaller than the upper laterals, sized according to the California Plumbing Code requirements.	Sewer	On-Going	SacSewer
11.	Construction of a grease trap or a sand oil separator may be required. The applicant must verify with the applicable jurisdiction's building department.	Sewer	On-Going	SacSewer

CONDITIONS OF APPROVAL – MSDR-1222-0001 Asteria Flats

		Category	Timing/ Implementation	Enforcement/ Monitoring
12.	If the proposed trash enclosure will contain a drain to the sewer, it must be covered.	Sewer	On-Going	SacSewer
13.	Applicant shall be responsible for coordinating waterline impacts with the Sacramento County Water Agency (SCWA). A waterline easement exists on the southern property boundary of the proposed development. Confirm location and development criteria with SCWA.	Water	On-Going	Public Works
Prior to Submittal of Improvement Plans				
14.	The project has an approved Level 3 sewer study. The subject parcel has a proposed density higher than what was approved in the sewer study. The proposed changes to the approved sewer study require and addendum to be submitted and approved by SacSewer prior to the submittal of improvement.	Sewer	Prior to Submittal of Improvement Plans	SacSewer
Prior to Approval of Improvement Plans				
15.	Driveway access along Sunrise Boulevard shall be limited to only right-out.	Public Works	Prior to Approval of Improvement Plans	Public Works
16.	**Drainage Study**: Applicant shall prepare and submit a project specific drainage study. The drainage study shall conform to the requirements of the Sacramento City/County Drainage Manual (Volume 2), County of Sacramento Improvement Standards (Section 9), and all other applicable City standards. The drainage study must be consistent with the Anatolia master drainage study.	Public Works	Prior to Approval of Improvement Plans	Public Works

CONDITIONS OF APPROVAL – MSDR-1222-0001 Asteria Flats

		Category	Timing/ Implementation	Enforcement/ Monitoring
17.	**Stormwater Quality- Post Construction:** The improvement plans shall incorporate all applicable post construction stormwater quality measures; including source control (waste management areas, DI stamps, etc.), low impact development, and full capture trash control measures into the site improvement plans in conformance with the most recent version of the Stormwater Quality Design Manual for the Sacramento Region. The applicant shall prepare and submit a Post-Construction Stormwater Quality Control Plan that includes details and sizing calculations of all the proposed post construction stormwater quality measures. In addition, a maintenance covenant is required for all proposed post construction stormwater quality measures, as detailed in Appendix B of the Stormwater Quality Design Manual for the Sacramento Region.	Public Works	Prior to Approval of Improvement Plans	Public Works

CONDITIONS OF APPROVAL – MSDR-1222-0001 Asteria Flats

		Category	Timing/ Implementation	Enforcement/ Monitoring
18.	**Stormwater Quality– During Construction:** SWPPP – the applicant shall prepare a Storm Water Pollution Prevention Plan (SWPPP) to be executed through all phases of grading and project construction. The SWPPP shall incorporate Best Management Practices (BMPs) to ensure that potential water quality impacts during construction phases are minimized. These measures shall be consistent with the City's Improvement Standards and Land Grading and Erosion Control Ordinance. During construction, the applicant shall implement BMPs in accordance with the SWPPP and the City's Improvement Standards. **Advisory Condition: Construction General Permit** The project applicant shall file a Notice of Intent (NOI) to obtain coverage under the National Pollutant Discharge Elimination System (NPDES) General Permit For Storm Water Discharges Associated With Construction And Land Disturbance Activities (Construction General Permit). Permits are issued by the State Water Resources Control Board.	Public Works	Prior to Approval of Improvement Plans	Public Works

CONDITIONS OF APPROVAL – MSDR-1222-0001 Asteria Flats

		Category	Timing/ Implementation	Enforcement/ Monitoring
19.	The SWPPP for the site shall include a contingency plan for the implementation of a process to remove fine clay sediments prior to discharge to the City of Rancho Cordova's storm drain system and/or Waters of the State (e.g., creeks, rivers) to the satisfaction of the City of Rancho Cordova. A polymer treatment system or comparable process shall be incorporated in the erosion and sediment control plan as part of the improvement plans submittal. This system shall be implemented by qualified professionals with training and proven experience in this field. Such treatment shall be accomplished in a manner that does not pose a toxic threat to fish and other aquatic organisms in receiving waters.	Public Works	Prior to Approval of Improvement Plans	Public Works
20.	**Drainage System Design:** The applicant shall submit and obtain City approval of plans and specifications for the construction of public improvements and all grading. The drainage system shall be designed in accordance with the approved Drainage Study to accommodate runoff from the ultimate development and shall meet the City of Rancho Cordova's Improvement Standards, construction standards, and Floodplain Management Ordinances in effect at the time of improvement plans approval.	Public Works	Prior to Approval of Improvement Plans	Public Works

CONDITIONS OF APPROVAL – MSDR-1222-0001 Asteria Flats

		Category	Timing/ Implementation	Enforcement/ Monitoring
21.	All development within the City must comply with the City of Rancho Cordova's Floodplain Management Ordinance. All new structures shall be protected from the 100-year (1 percent) flood event. Certified pad elevations (certified by a registered Civil Engineer or licensed Land Surveyor) shall be set at least one and two tenths foot (1.2') above all sources of 100-year flooding (see Section 9-1 of improvement standards). The overland release path must be shown on the improvement plans and the hydraulic computation must be provided to estimate the flow depths along the overland release paths. The calculations must be in conformance with Section 9-15 of the Improvement Standards.	Public Works	Prior to Approval of Improvement Plans	Public Works
22.	Provide a permanent concrete stamp, or other permanently applied message to the satisfaction of the City not including paint, which reads "No Dumping-Flows to Creek" or other approved message at each storm drain inlet.	Public Works	Prior to Approval of Improvement Plans	Public Works
23.	All storm drain facilities within private lots shall be privately maintained and shall be clearly labeled as "private" in the improvement plans.	Public Works	Prior to Approval of Improvement Plans	Public Works
24.	**Fees:** Pay the drainage impact fees to the satisfaction of the City of Rancho Cordova's Public Works Department.	Public Works	Prior to Approval of Improvement Plans	Public Works
25.	Number, size, and location of driveways are subject to approval by the Public Works Department	Public Works	Prior to Approval of Improvement Plans	Public Works
26.	Enter into a frontage agreement and bond for construction of public improvements per the approved Public Works plans to the satisfaction of the Public Works Department.	Public Works	Prior to Approval of Improvement Plans	Public Works

CONDITIONS OF APPROVAL – MSDR-1222-0001 Asteria Flats

		Category	Timing/ Implementation	Enforcement/ Monitoring
27.	A final landscape plan shall be submitted in conjunction with improvement plan and or building permit submittal and approved by the planning and public works departments prior to issuance of permits and/or any installation of landscape materials RCMC 23.716.020. The final landscape planting and irrigation plan shall be prepared by a registered licensed landscape architect and include the following items per RCMC 22.180.060: • Planting plan to scale that indicate slope • Irrigation Plan • Soils Test • Water Use Calculations • Irrigation Schedule • Permeability test for LID facilities' locations • Soil media specifications (LID features)	Public Works	Prior to Approval of Improvement Plans	Public Works
28.	All landscape strips, medians, etc. that contain trees shall be designed to include continuous root barriers. Trees shall be appropriately sized for their proposed planters.	Public Works	Prior to Approval of Improvement Plans	Public Works
29.	Installation of a public cleanout is required at the right-of-way. These improvements must be shown on the plans.	Sewer	Prior to Approval of Improvement Plans	SacSewer
30.	The minimum size for public sewer mainlines is 8-inch diameter. Public sewer must be located in the right-of-way when possible. The design engineer must satisfactorily demonstrate that placing the main line within a road ROW isnnot possible before locating a main line in a dedicated public sewer easement as approved by SacSewer. These improvements must be shown on the plans.	Sewer	Prior to Approval of Improvement Plans	SacSewer

CONDITIONS OF APPROVAL – MSDR-1222-0001 Asteria Flats

		Category	Timing/ Implementation	Enforcement/ Monitoring
31.	To obtain sewer service, construction of SacSewer sewer infrastructure will be required. Current SacSewer Standards and Specifications apply to any offsite or onsite public sewer construction or modification. These improvements must be shown on the plans. Field modifications to new or existing precast manhole bases are not allowed.	Sewer	Prior to Approval of Improvement Plans	SacSewer
32.	SacSewer requires each building on each lot with a sewage source to have a separate connection to SacSewer's sewer system. If there is more than one building in any single parcel and the parcel is not proposed for split, then each building on that parcel must have a separate connection to a private onsite sewer line upstream of any connection to the SacSewer sewer. These improvements must be shown on the plans.	Sewer	Prior to Approval of Improvement Plans	SacSewer
33.	SacSewer Design Standards and Specifications require a minimum 6-inch lower laterals for apartment buildings.	Sewer	Prior to Approval of Improvement Plans	SacSewer

CONDITIONS OF APPROVAL – MSDR-1222-0001 Asteria Flats

		Category	Timing/ Implementation	Enforcement/ Monitoring
34.	Sewer easements may be required to service this parcel. All public sewer easements will be dedicated to SacSewer in a form approved by the District Engineer. All public sewer easements will be at least 20 feet in width and will require continuous access for installation and maintenance. SacSewer will only provide maintenance in public right-of-ways and SacSewer dedicated sewer easements. No awning or overhang may encroach on the easement area. At minimum, an all-weather access road must be provided to all manholes.	Sewer	Prior to Approval of Improvement Plans Public sewer easements must be assigned prior to plan approval. Recordation of the public sewer easement can occur after plan approval. Private sewer easement and private sewer agreements must be assigned and recorded prior to approval of improvement plans.	SacSewer
35.	Construction of sewer mainlines are prohibited within 100-year flood plains. The location of the 100-year flood plain must be shown on the improvement plan.	Sewer	Prior to Approval of Improvement Plans	SacSewer
36.	All onsite sewer plans and offsite sewer plans must be submitted separately to SacSewer for review and approval.	Sewer	Prior to Approval of Improvement Plans	SacSewer
37.	All manholes not within public right of way must be accessible with an all-weather access road.	Sewer	Prior to Approval of Improvement Plans	SacSewer

CONDITIONS OF APPROVAL – MSDR-1222-0001 Asteria Flats

		Category	Timing/ Implementation	Enforcement/ Monitoring
38.	Alignment of all main lines and structures must provide a minimum of 1 foot vertical clearance and 5 feet horizontal clearance from all other utilities and improvements. Sewer is to be located a minimum of 10 feet (measured horizontally) from any structure or footing. Show public sanitary sewer and water supply facilities in accordance with the Health and Safety Code.	Sewer	Prior to Approval of Improvement Plans	SacSewer
39.	If any proposed garbage enclosure will contain a drain to the sewer, the enclosure must have a roof.	Sewer	Prior to Approval of Improvement Plans	SacSewer
40.	Show on the plan how Fire Lanes will be marked. Fire Lane identification shall be provided along the required fire access roadway. Fire Lane identification shall be in accordance with the Sacramento Metro Fire Districts Fire Prevention Standard #3 and the California Vehicle Code. Vehicle parking is prohibited on any street less than 28 feet in width. Vehicle parking is permitted on both sides of streets 36 feet or more in width. Roadway widths shall be measured between the gutterline or edge of pavement on opposite sides of the road. Identification of fire apparatus access roadways may be required on private roads.	Fire	Prior to Approval of Improvement Plans	Sacramento Metro Fire
41.	Provide a note on the plan that reads, “Fire access roadways shall be built to bear a minimum of 80,000 pounds and meet the Sacramento County Public Works Standards for roadways. A report, prepared by a registered geotechnical engineer, verifying the ability of the road to bear the required minimum weight, shall be submitted with any plan indicating construction of roadway. Verification of constructed roadway shall be provided by a registered geotechnical engineer prior to final of the project.	Fire	Prior to Approval of Improvement Plans Verification of constructed roadway by registered geotechnical engineer will need to be completed prior to vertical construction	Sacramento Metro Fire

CONDITIONS OF APPROVAL – MSDR-1222-0001 Asteria Flats

		Category	Timing/ Implementation	Enforcement/ Monitoring
42.	Show the location of the required fire hydrants for this project on the improvement plans. Approved fire hydrants capable of providing the required fire flow for the protection of any and all structures shall be located along the fire apparatus access roadway. The required fire hydrants shall be installed and operational prior to any construction or on-site storage of combustible materials. The minimum required fire flow for the protection of commercial developments is 1,500 gallons per minute (gpm) at a pressure of 20 pounds per square inch (psi) for a two-hour duration.	Fire	Prior to Approval of Improvement Plans	Sacramento Metro Fire
Prior to Issuance of Building Permit				
43.	A final Photometric Plan shall be submitted and approved as part of the building permit review process. The plan shall adhere to the outdoor lighting standards of Chapter 23.725 of the Rancho Cordova Municipal Code.	Lighting Plan	Prior to Issuance of Building Permit	Planning
44.	Property Owner/Applicant shall participate in or provide a funding mechanism for maintenance services for the project's stormwater drainage and flood protection system. This may be accomplished through annexation to the City's Stormwater Utility Fee District, SWUII, or other financial mechanism as may be proposed and provided by the Property Owner for the same purpose of providing a funding mechanism to fund the operation and maintenance of the Project's stormwater drainage and flood protection system. Costs associated with the annexation shall be borne by the Property Owner/Applicant through payment of the annexation costs in the amount of $7,000 per annexation. Contact Khaliq McClean at (916) 851-8708 with regard to the process to satisfy this condition of approval.	Public Works	Prior to Issuance of Building Permit	Public Works

CONDITIONS OF APPROVAL – MSDR-1222-0001 Asteria Flats

		Category	Timing/ Implementation	Enforcement/ Monitoring
45.	Property Owner/Applicant shall participate in or provide a funding mechanism for maintenance services for the fair share of existing and all new public improvements associated with the project including, but not limited to, streets, bridges/culverts, traffic signals, traffic signs, striping and legends, ITS operations, street lights and safety lighting, public frontage and median and landscape improvements, and trails. This may be accomplished through annexation to the City's Community Facilities District No. 2014-2 (Street, Lighting and Landscape Maintenance), or other financial mechanism as may be proposed and provided by the Property Owner for the same purpose of providing a financial mechanism to fund the operation and maintenance of the Project's public improvements. Costs associated with the annexation shall be borne by the Property Owner/Applicant through payment of the annexation costs of the CFD annexation in the amount of $5,000 per annexation. Contact Khaliq McClean at (916) 851-8708 with regard to the process to satisfy this condition of approval.	Public Works	Prior to Issuance of Building Permit	Public Works
46.	Reservations for bus turnouts will be required along potential bus routes, including areas served by neighborhood shuttle services. Provide bus shelter easements, approximately 10 feet in width by 20 feet in length, for future Regional Transit routes if bus shelters cannot be accommodated within the public utility easements adjacent to public streets right-of-way.	Public Works	Prior to Issuance of Building Permit	Public Works

CONDITIONS OF APPROVAL – MSDR-1222-0001 Asteria Flats

		Category	Timing/ Implementation	Enforcement/ Monitoring
47.	Applicant shall submit improvement plans to the satisfaction of the Public Works Department. Improvement plans shall include, but shall not be limited to, all streets, water, sewer, storm drain, lighting, signage and striping, and other associated facilities for all streets and other public areas depicted on the tentative map or tentative map phase. Design datum shall be NAD-83. Prior to acceptance of the improvements, record drawings of grading and improvement plans in AutoCAD, pdf format, and a GIS Shape file shall be submitted and approved by the Public Works Department.	Public Works	Prior to Issuance of Building Permit	Public Works
48.	Secure City of Rancho Cordova Public Works Department approval of final grading plans, as required by City Ordinance.	Public Works	Prior to Issuance of Building Permit	Public Works
49.	The owner must contact Permit Services Unit at PermitServices@sacsewer.com or by phone at (916) 876-6100 to determine if SacSewer impact fees are due. Fees are to be paid prior to the issuance of building permits unless fee deferral documentation is provided and allowed by law as confirmed by SacSewer Permit Services Unit.	Sewer	Prior to Issuance of Building Permit	SacSewer
50.	The applicant shall meet the following: Civil Site Plans, Fire Service Underground Plans and Architectural Plans shall be submitted and approved prior to Final Building Permit being issued. Fire Sprinkler and Fire Alarm plans shall be submitted prior to Final Building Permit being issued. Please note: The Sacramento Metro Fire District **does not** allow deferred submittals.	Fire	Prior to Issuance of Building Permit	Sacramento Metro Fire

51.	In compliance with the Cordova Recreation and Park District (CRPD) Development Review Ordinance 0607-01 submit to CRPD a Development Review Application and deposit of $500 prior to the City of Rancho Cordova's issuance of a building permit on this project.	Parks	Prior to Issuance of Building Permit	Cordova Recreation & Park District/Building & Safety
52.	To fund mitigation of impacts by new residents in the Asteria Flats complex on surrounding parks the developer will pay a Park Development Fee in the amount of: • $7,543.84 (seven thousand five hundred and fortythree dollars and eighty-four cents) per unit for one, two- and three-bedroom multifamily units. These fees became effective on January 1, 2025. The Park Development Fee will be adjusted on January 1 annually thereafter no later than January 15th by the method provided in City Construction Cost Index (CCI) Index as follows: A "mean" index will be computed by averaging the index for 20 U.S. cities with the index for San Francisco by resort to the October issue of the Engineering News Record Magazine Construction Cost Index of the year in which the calculation is being made. An adjustment factor shall be computed by dividing the "mean" index as calculated in subsection (a) of this Section by the "mean" index for the previous October. The adjusted Park Development Fee shall be calculated by multiplying the adjustment factor, as calculated in subsection (b) of this Section, by the Park Development in place prior to the annual adjustment.	Parks	Prior to Issuance of Building Permit, *Unless fee deferral documentation is provided and allowed by law.*	Cordova Recreation & Park District/Building & Safety

		Category	Timing/ Implementation	Enforcement/ Monitoring
57.	Upon completion of the installation of the landscaping, the designer shall certify that the landscape complies with all city water conserving landscape requirements. Certification shall be accomplished by completion of a certificate of compliance on a form approved by the director of the city public works department. Failure to submit a complete and accurate certificate of compliance will delay final approval of the project and/or discontinue water service per RCMC 22.180.090. Upon receipt of the certificate of compliance and site inspection from City staff, the landscaping performance bond will be released.	Public Works	Prior to Final Building Inspection of the Last Building Permit	Public Works
58.	Record drawings of grading and improvement plans in AutoCAD, pdf format, and a GIS shape file, or equivalent to the satisfaction of the City Engineer shall be submitted and approved by the Public Works Department.	Public Works	Prior to Final Building Inspection	Public Works
59.	Applicant/Owner/Developer shall repair and replace all right-of-way damages caused by the construction of the building to the satisfaction of the Public Works Department. Damages include, but are not limited to: pavement, sidewalks, curbs, and gutters.	Public Works	Prior to Occupancy	Public Works
60.	The Applicant shall request a Final Planning Inspection with the Planning Department prior to granting of Final Occupancy. Final Planning Inspection will ensure final construction is consistent with the approved design review including final installation of landscaping.	Public Works	Prior to Occupancy	Public Works

CONDITIONS OF APPROVAL – MSDR-1222-0001 Asteria Flats

		Category	Timing/ Implementation	Enforcement/ Monitoring
61.	Applicant shall complete improvement plans to the satisfaction of the Public Works Department prior to any occupancy. Improvement plans shall include, but shall not be limited to: • All onsite civil improvements • Civil plan shall include an ADA access plan • All facilities, including but not limited to, sidewalk, driveways, etc. shall be upgraded to meet current ADA requirements and City Standards. • Utility laterals • Replacement of damaged sidewalk and curb and gutter along property frontage to the satisfaction of The Public Works Department. Sidewalk panels shall be replaced to the nearest joint • Replacement of damaged pavement along property frontage to the satisfaction of The Public Works Department • Public improvement plans shall clearly delineate all transitions to existing improvements • Pavement cuts for utility connections in the right-of-way shall be repaired per County Standard. • All improvements to be designed and constructed to the satisfaction of the Public Works Department.	Public Works	Prior to Final Inspection/Final Occupancy	Public Works

ADVISORY:

- Sac Metro Fire: Gates shall be installed in accordance with The County Emergency Access Gates and Barriers Standard. Plan submittal is required prior to installation.
- Sac Metro Fire: Subsequent applications, including time extensions, may be subject to additional SMFD Fire Conditions beyond those listed above. Fire conditions will only be added when significant life safety issues require remediation.
- SacSewer: This project includes planned improvements within the S132 pump station shed area. Due to development in this

shed, improvements to S132 station are required. Lennar Homes of California, LLC is taking the lead in the S132 Pump Station upgrades. Your project may be responsible for the upgrades if Lennar does not complete the upgrades.

- SMUD: SMUD has existing overhead 69kV facilities along Sunrise Blvd and on south side of project site that will need to remain. The Applicant shall be responsible for maintaining all CalOSHA and State of California Public Utilities Commission General Order No. 95 safety clearances during construction and upon building completion. If the required clearances cannot be maintained, the Applicant shall be responsible for the cost of relocation.
- SMUD: SMUD has existing underground 12kV facilities along Sunrise Blvd and Chrysanthy Blvd and on south side of PROJECT SITE that will need to remain. The Applicant shall be responsible for maintaining all CalOSHA and State of California Public Utilities Commission General Order No. 128 safety clearances during construction and upon building completion. If the required clearances cannot be maintained, the Applicant shall be responsible for the cost of relocation.
- SMUD: Structural setbacks less than 14-feet shall require the Applicant to conduct a pre-engineering meeting with all utilities to ensure property clearances are maintained.
- SMUD: Any necessary future SMUD facilities located on the Applicant's property shall require a dedicated SMUD easement. This will be determined prior to SMUD performing work on the Applicant's property.
- SMUD: In the event the Applicant requires the relocation or removal of existing SMUD facilities on or adjacent to the subject property, the Applicant shall coordinate with SMUD. The Applicant shall be responsible for the cost of relocation or removal.
- SMUD: SMUD reserves the right to use any portion of its easements on or adjacent to the subject property that it reasonably needs and shall not be responsible for any damages to the developed property within said easement that unreasonably interferes with those needs.
- SMUD: The Applicant shall not place any building foundations within 5-feet of any SMUD trench to maintain adequate trench integrity. The Applicant shall verify specific clearance requirements for other utilities (e.g., Gas, Telephone, etc.).
- SMUD: In the event the City requires an Irrevocable Offer of Dedication (IOD) for future roadway improvements, the Applicant shall dedicate a 12.5-foot public utility easement (PUE) for overhead and/or underground facilities and appurtenances adjacent to the City's IOD.
- SMUD: The Applicant shall comply with SMUD siting requirements (e.g., panel size/location, clearances from SMUD equipment, transformer location, service conductors). Information regarding SMUD siting requirements can be found at: https://www.smud.org/en/Business-Solutions-and-Rebates/Design-and-Construction-Services
- The Applicant shall dedicate a 12.5-foot public utility easement for overhead and/or underground facilities and appurtenances adjacent to all public street rights-of-ways.

CONDITIONS OF APPROVAL – MSDR-1222-0001 Asteria Flats

- The Applicant shall dedicate any private drive, ingress and egress easement, (and 10-feet adjacent thereto) as a public utility easement for (overhead and) underground facilities and appurtenances. All access roads shall meet minimum SMUD requirements for access roads.
- The Applicant shall dedicate and provide all-weather vehicular access for service vehicles that are up to 26,000 pounds. At a minimum: (a) the drivable surface shall be 20-feet wide; and (b) all SMUD underground equipment and appurtenances shall be within 15-feet from the drivable surface.
- The Applicant shall disclose existing or proposed 69 kV electrical facilities to future and/or potential owners.

LOAN AGREEMENT

by and between

THE CITY OF RANCHO CORDOVA

and

RANCHO CORDOVA OWNER LP

Exhibits

Exhibit A	Legal Description
Exhibit B	[Intentionally Omitted]
Exhibit C	Memorandum of Agreement
Exhibit D	City Loan Promissory Note
Exhibit E	City Loan Deed of Trust
Exhibit F	Regulatory Agreement
Exhibit G	Scope of Development
Exhibit H	Schedule of Performance
Exhibit I	Financing Plan
Exhibit J	Certificate of Completion
Exhibit K	Performance Guaranty

LOAN AGREEMENT

THIS LOAN AGREEMENT (this "**Agreement**") is entered as of _____, 2026 ("**Effective Date**") by and between the City of Rancho Cordova, a California municipal corporation ("**City**"), and Rancho Cordova Owner LP, a California limited partnership ("**Developer**"). City and Developer are hereinafter individually referred to as "**Party**" and collectively referred to as the "**Parties**."

RECITALS

A. Developer owns an approximately 11.13 acre parcel located at on a site located at the southeast corner of Sunrise Boulevard and Chrysanthy Boulevard, APN 067-0430-018-0000, Rancho Cordova, California ("**Property**"). The Property is more fully described in Exhibit A attached hereto and incorporated by reference.

B. Developer desires to construct an affordable housing development (the "**Project**"). The Project will consist of two hundred thirty six (236) apartment units, together with all associated landscaping, parking and associated improvements, including a clubhouse, fitness center, leasing office, and swimming pool. Sixty (60) of the apartment units will be 1-bedroom units, sixty (60) of the apartment units will be two-bedroom units, fifty-eight (58) of the apartment units will be three-bedroom units, and fifty-eight (58) will be 4-bedroom units ("**Improvements**").

C. All of the apartment units in the Project, except for two manager's unit (the **"Affordable Units"**), will be restricted for occupancy by eligible households with incomes at or below 70% area median income (AMI), 60% AMI, 50% AMI and 30% AMI for a period of fifty-five (55) years from issuance of a final certificate of occupancy for the Project. Developer and City will enter into a **"Regulatory Agreement"** which sets forth the affordable housing obligations and other requirements for operation of the Project and Affordable Units.

D. The Parties desire for the City to provide a loan of ***Five Million Dollars ($5,000,000)*** (the "**City Loan**") for the construction and operation of the Project. The City Loan will accrue simple interest at the rate of three percent (3%) per annum on the outstanding principal amount, for a term ending fifty-five (55) years from the date that the Project is placed in service as evidenced by the receipt of a temporary or permanent certificate of occupancy, and will be repaid from a portion of the Residual Receipts of the Project as set forth and defined in the City Loan Promissory Note.

E. Developer has represented to the City, and the City has determined that the Developer has the necessary expertise, skill and ability to carry out the commitments set forth in this Agreement. The City has further determined that this Agreement is in the best interests, and will materially contribute to the improvement of the City by improving the supply of affordable housing therein.

F. A material inducement to the City to enter into this Agreement is Developer's agreement to develop the Project within the time periods specified herein and in accordance with the provisions hereof (subject to Force Majeure and any other extension(s) provided herein), and the City would be unwilling to enter into this Agreement in the absence of an enforceable commitment by Developer to complete the Project in accordance with such provisions and within such time periods, subject to the terms and conditions set forth herein.

NOW, THEREFORE, in consideration of the mutual covenants contained herein and good and valuable consideration the receipt and sufficiency of which are hereby acknowledged, the Parties agree as follows.

ARTICLE I

DEFINITIONS

1. Definitions. The following terms shall have the meanings set forth in the Sections referenced below whenever used in this Agreement and the Exhibits attached hereto. Additional terms are defined in the Recitals and text of this Agreement.

(a) "**Affiliate**" is defined in Section 8.3

(b) **"Affordable Units"** is defined in Recital D.

(c) "**Bankruptcy Law**" is defined in Section 11.1(g).

(d) "**CEQA**" is defined in Section 5.1.

(e) "**Certificate of Completion**" is defined in Section 5.12.

(f) "**City**" is defined in the Preamble.

(g) "**City Council**" means the Rancho Cordova City Council.

(h) "**City Documents**" means this Agreement, the City Loan Promissory Note, the City Loan Deed of Trust, the Regulatory Agreement, and any other debt, loan or security instruments between City and Developer relating to the Property.

(i) "**City Loan**" is defined in Recital E.

(j) "**City Loan Deed of Trust**" is defined in Section 6.1.

(k) "**City Loan Proceeds**" is defined in Section 6.1.

(l) "**City Loan Promissory Note"** is defined in Section 6.1.

(m) "**Claims**" is defined in Section 5.14.

(n) "**Conditions of Approval**" is defined in Section 5.1.

(o) "**Construction Contract**" is defined in Section 4.8(g).

(p) "**Construction Plans**" is defined in Section 5.8.

(q) [Reserved]

(r) "**Developer"** is defined in the Preamble.

(s) [Reserved]

(t) "**Effective Date"** is defined in the preamble.

(u) "**Environmental Laws**" is defined in Section 10.4.

(v) "**Event of City Default**" is defined in Section 11.2.

(w) "**Event of Developer Default**" is defined in Section 11.1.

(x) "**Financing Plan**" is defined in Section 3.4

(y) "**General Contractor**" is defined in Section 4.8(f).

(z) "**Hazardous Materials**" is defined in Section 10.3.

(aa) "**Improvements**" is defined in Section 5.1.

(bb) "**Indemnitees**" is defined in Section 5.14.

(cc) "**Limited Partner**" means U.S. Bancorp Community Development Corporation, a Minnesota corporation, and its permitted successors and assigns.

(dd) "**Management Agreement**" is defined in Section 4.8(k)

(ee) "**Memorandum of Agreement**" is defined in Section 2.2.

(ff) **"Official Records**" means the Official Records of Sacramento County.

(gg) "**Party**" and "**Parties**" are defined in the Preamble.

(hh) "**Partnership Agreement**" means that certain Second Amended and Restated Agreement of Limited Partnership of Developer dated as of June 1, 2026, and as it may be amended from time to time.

(ii) "**Prevailing Wage Laws**" is defined in Section 5.14.

(jj) "**Property**" is defined in Recital B.

(kk) "**Property Manager**" means Cornerstone Residential CA, a California corporation.

(ll) "**Project**" is defined in Recital C.

(mm) "**Regulatory Agreement**" is defined in Section 7.2 and is in the form of Exhibit F.

(nn) "**Request for Notice**" is defined in Section 4.8(l).

(oo) "**Scope of Development"** is defined in Section 5.1, and attached hereto as Exhibit G.

(pp) "**Transfer**" is defined in Section 8.2.

ARTICLE II

REPRESENTATIONS; EFFECTIVE DATE; MEMORANDUM.

2.1 Developer's Representations. Developer represents and warrants to City as follows, and Developer covenants that until the expiration or earlier termination of this Agreement, upon learning of any fact or condition which would cause any of the warranties and representations in this Section 2.1 not to be true, Developer shall immediately give written notice of such fact or condition to City. Developer acknowledges that City shall rely upon Developer's representations made herein notwithstanding any investigation made by or on behalf of City.

(i) Authority. Developer is a limited partnership, duly organized and in good standing under the laws of the State of California. Developer has the full right, power and authority to undertake all obligations of Developer as provided herein, and the execution, performance and delivery of this Agreement by Developer has been duly authorized by all requisite actions. The persons executing this Agreement on behalf of Developer have been duly authorized to do so. This Agreement and the other City Documents constitute valid and binding obligations of Developer, enforceable in accordance with their respective terms.

(ii) No Conflict. Developer's execution, delivery and performance of its obligations under this Agreement will not constitute a default or a breach under any contract, agreement or order to which Developer is a party or by which it is bound.

(iii) No Litigation or Other Proceeding. No litigation or other proceeding (whether administrative or otherwise) is outstanding or, to Developer's actual knowledge, has been threatened in writing which would prevent, hinder or delay the ability of Developer to perform its obligations under this Agreement.

(iv) No Developer Bankruptcy. Developer is not the subject of a bankruptcy or insolvency proceeding.

2.2 Effective Date; Memorandum. The obligations of Developer and City hereunder shall be effective as of the Effective Date. The Parties shall execute a Memorandum of this Agreement ("**Memorandum of Agreement**") substantially in the form attached hereto as **Exhibit C** and incorporated herein by this reference, which shall be recorded in the Official

Records against the Property. The City will not withhold, condition, or delay consent to reasonable requests for subordination of the Memorandum of Agreement to deeds of trust, regulatory agreements and related documents provided for the benefit of Project lenders in accordance with Section 9.1.1 hereof.

ARTICLE III

PREDISPOSITION ACTIVITIES

3.1 Schedule of Performance. Certain tasks described in this Agreement must be completed no later than the dates set forth in the Schedule of Performance attached to this Agreement as Exhibit H, subject to events of forced delay as set forth in Section 13.2 or other extension as applicable. The Schedule of Performance may be modified by the mutual agreement of the Developer and by the City Manager on behalf of the City without formal amendment of this Agreement, with notice to the Limited Partner.

3.2 Financing Plan. Developer has submitted, and City has approved, a financing plan for the Project ("**Financing Plan**"), attached hereto as Exhibit I and incorporated herein by this reference. All financing necessary for the construction of the Project, as approved by the City in the Financing Plan (not including permanent financing), shall be closed by the Developer prior to, or simultaneously with, the disbursement of the City Loan to Developer.

ARTICLE IV

DEVELOPMENT OF PARCEL

4.1 Development of Parcel. Developer shall construct the Project on the Property, substantially in accordance with and subject to the terms and conditions of this Agreement, free and clear of all liens and encumbrances except: (a) for any liens in connection with the Developer's senior financing (the "Senior **Financing**"), including, but not limited to any regulatory agreements or restrictive covenants required by the Senior Financing, California Municipal Finance Authority, Sacramento County Water Agency, or Sacramento Area Sewer District (the "**Authority**" or the "**Agency**"); (b) any liens and encumbrances as of the date hereof included in the [owner's title policy]; (c) any easements, licenses or similar agreements entered into in the normal course of operating the project so long as the City's interests are not subordinated without its consent; and (d) the provisions and effect of this Agreement; and (e) liens for nondelinquent taxes, assessments, and/or bonds; (all of the foregoing collectively referred to as the "**Permitted Exceptions**").

4.2 City's Conditions to Proceeding. City's obligation to deliver payment of City Loan is subject to satisfaction or waiver by the City of all of the following conditions:

a. Execution of Documents. Developer shall have executed and acknowledged the Memorandum of Agreement, the Regulatory Agreement, the City Loan Promissory Note and the City Loan Deed of Trust, and all other documents required hereunder, and shall have delivered all such documents to City.

b. Insurance. Developer shall have submitted to City and City shall have approved Developer's evidence of the liability insurance required pursuant to Article XII hereof.

c. Land Use Entitlements. The City shall have approved the land use entitlements for the Project and Developer shall have approved or be deemed to have approved the same, including without limitation all terms and conditions applicable thereto.

d. Evidence of Development Financing. The City shall have received and reasonably approved the following (to the extent such financing is contained in the Financing Plan): (i) construction loan documents evidencing the obligation of the lender to make the construction loan(s) to Developer, in an amount consistent with the Financing Plan, (ii) a commitment of equity funds (the "**Tax Credit Funds**") from the syndication of the one or more federal or state tax credits (collectively, the "**Tax Credits**") for the construction and operation of the Project, subject only to reasonable and customary conditions as set forth in the Partnership Agreement, (iii) a commitment from a lender reasonably acceptable to City (who may also be one of the construction lenders) to make a permanent loan to Developer, with a term of not less than fifteen (15) years, in a sum sufficient, when added to any Tax Credit Funds to be disbursed for such purpose, to take out any existing construction financing, subject only to reasonable and customary conditions as set forth in the documents evidencing the Senior Financing (the "**Senior Financing Documents**"), and consistent with the Financing Plan, (iv) commitments and documents from other funding sources described in the Financing Plan (if any), .

e. General Contractor. The general contractor for the Project (the "**General Contractor**") shall have been approved by the City, which approval shall not be unreasonably withheld, conditioned, or delayed. The parties hereby agree that CSI Construction Company is hereby approved as the General Contractor for the Project.

f. Construction Contract. City shall have received a true and complete copy of a contract by and between Developer and the General Contractor pursuant to which the General Contractor has agreed to construct the Project at a cost consistent with the costs set forth therefor in the Project budget set forth in the Financing Plan (as the same may be amended from time to time with City's approval (which shall not be unreasonably conditioned, delayed, or denied), unless for non-substantive amendments) (the "**Construction Contract**").

g. Intentionally Omitted.

h. Construction to Commence. The City shall be reasonably satisfied that construction of the Project will commence within the time set forth in the Schedule of Performance and thereafter will be pursued, subject to Force Majeure, to completion in a diligent and continuous manner.

i. Management Plan. Developer shall have submitted a comprehensive management plan for the Project to the City in accordance with the Regulatory Agreement and the City shall have approved the same.

j. Management Agreement. The City shall have received and reasonably approved an executed agreement by and between Developer and the Property Manager (the "**Management Agreement**"), which Management Agreement shall be substantially consistent with this Agreement and the requirements of the Regulatory Agreement.

k. Request for Notice of Default. City shall have received a notice of default pursuant to Civil Code Section 2924(b), requesting that any beneficiaries of liens securing the Project financing notify City of any default under the instrument creating the lien (the "**Request for Notice**").

l. Intentionally Omitted.

m. Representations and Warranties. The representations of Developer contained in this Agreement shall be correct in all material respects as of the Effective Date.

4.3 Developer's Conditions to Closing. Developer's obligation to proceed with the Closing is subject to satisfaction or waiver by Developer of the following conditions:

a. Execution of Documents. City and Developer shall have executed and acknowledged the Memorandum of Agreement, the Regulatory Agreement, and all other documents required hereunder, and shall have delivered all such documents to City.

b. Land Use Entitlements. The City shall have approved the land use entitlements for the Project and Developer shall have approved the same, including without limitation all terms and conditions applicable thereto.

ARTICLE V

DEVELOPMENT OF THE PROJECT

5.1 Scope of Development. Developer shall develop the Project substantially in accordance with the "**Scope of Development"** attached hereto as Exhibit G (as the same may be amended from time to time), the terms and conditions of this Agreement and substantially in compliance with the terms and conditions of all approvals, entitlements and permits that the City or any other governmental body or entity with jurisdiction over the Project or the Property has granted or issued as of the date hereof or may hereafter grant or issue in connection with development of the Project, including without limitation, all mitigation measures imposed in connection with environmental review of the Project and all conditions of approval imposed in connection with any entitlements, approvals or permits (all of the foregoing approvals, entitlements, permits, mitigation measures and conditions of approval are hereafter collectively referred to as the "**Conditions of Approval**").

The Project shall, following completion, consist of the Improvements.

Notwithstanding anything to the contrary contained herein, the construction of the Project is expressly conditioned upon compliance with the California Environmental Quality

Act, California Public Resources Code Section 21000 *et seq*., CEQA guidelines, and implementing regulations, all as amended from time to time ("**CEQA**") to the extent applicable. No physical activity, not otherwise exempt from CEQA, shall commence on the Property without such compliance.

5.2 Timing of Construction. The Developer shall obtain a grading permit ("**Grading Permit**") and building permit and commence construction of the Improvements within the time set forth in the Schedule of Performance (as may be amended in accordance with the terms hereof). The Developer shall diligently prosecute to completion the construction of the Improvements within the time set forth in the Schedule of Performance.

5.3 Project Approvals. Developer acknowledges and agrees that execution of this Agreement by City does not constitute approval for the purpose of the issuance of building permits for the construction of the Project, does not limit in any manner the discretion of City in such approval process, and does not relieve Developer from the obligation to apply for and obtain all necessary entitlements, approvals, and permits for the construction of the Project, including without limitation, the approval of architectural plans, the issuance of any certificates regarding historic resources required in connection with the Project (if any), and the completion of any required environmental review. For the avoidance of doubt, the parties hereby agree that the necessary entitlements, approvals, and permits for the Project have been received as of the date hereof.

Developer covenants that it shall: (i) obtain all necessary permits and approvals which may be required by City, or any other governmental agency having jurisdiction over the construction of the Project or the development of the Property for the applicable stage of construction, (ii) comply with all Conditions of Approval and other design and use considerations as detailed in the City's Design Review approval, (iii) comply with all mitigation measures imposed in connection with any environmental review of the Project, and (iv) not commence construction work on the Project prior to issuance of building permits required for such work (excluding any grading work permitted by the Grading Permit).

City staff shall work cooperatively with Developer to assist in coordinating the expeditious processing and consideration of all permits, entitlements and approvals necessary for development of the Project.

5.4 Fees. Developer shall be solely responsible for, and shall promptly pay when due, all customary and usual fees and charges of City in connection with obtaining building permits and other approvals for the Project, including without limitation, those related to the processing and consideration of amendments, if any, to the current entitlements, any related approvals and permits, environmental review, design review, architectural review, and any subsequent approvals for the Project or the development of the Property.

5.5 Cost of Construction. Developer shall be solely responsible for all direct and indirect costs and expenses incurred in connection with the design, development and construction of the Project and compliance with the Conditions of Approval, including without limitation the installation and construction of all off-site or on-site improvements required by City in connection therewith as evidenced by the Conditions of Approval.

5.6 Rights of Access. For the purpose of ensuring that the Project is developed substantially in compliance with this Agreement, Developer shall permit representatives of the City to enter upon the Property, subject to the rights of tenants, during normal business hours to inspect the Project following forty-eight (48) hours prior written notice, including without limitation inspection for labor standards compliance monitoring as described in Section 5.14 (except in the case of emergency in which case such notice as may be practical under the circumstances shall be provided). Developer or its representative shall have the right to accompany any City representative performing an inspection of the Project.

5.7 City Disclaimer. Developer acknowledges that City shall have the right to monitor, review, or inspect the progress of construction or the operation of the Project. Notwithstanding such right, Developer and all third parties shall rely on its or their own supervision and inspection in determining the quality and suitability of the materials and work, the performance of architects, subcontractors, and material suppliers, and all other matters relating to the construction and operation of the Project. Except as completed as part of the City's plan review and permitting process through the Building or Public Works Departments of the City, any review or inspection undertaken by the City is solely for the purpose of determining whether Developer is properly discharging its obligations under this Agreement, and shall not be relied upon by Developer or any third party as a warranty or representation by the City as to the quality of the design or construction of the Improvements or otherwise.

5.8 Construction Plans. Prior to commencement of Project construction, Developer shall submit to City's Building Department detailed construction plans for the development of the Project. As used herein "**Construction Plans**" means all construction documents upon which Developer and Developer's contractors shall rely in constructing the Project (including the landscaping, parking, and common areas) and shall include, without limitation, the site development plan, final architectural drawings, landscaping, exterior lighting and specifications, materials specifications, final elevations, and building plans and specifications, in each case as such plans may be amended from time to time. The Construction Plans shall be based upon the scope of development set forth herein and as detailed in the approved design review documents in the Scope of Development and upon the approvals issued by the City for the Project, and shall not materially deviate therefrom without the express written consent of City. Provided that the Construction Plans are substantially consistent with the requirements of this Agreement, approval of the Construction Plans by City staff shall be deemed approval thereof by City.

5.9 Construction Pursuant to Plans. Developer shall develop the Project in accordance with the approved Construction Plans, the Conditions of Approval, and all other permits and approvals granted by the City pertaining to construction of the Project. Developer shall comply with all directions, rules and regulations of any fire marshal, health officer, building inspector or other officer of every governmental entity having jurisdiction over the Property or the Project. Each element of the work shall proceed only after procurement of each permit, license or other authorization that may be required for such element by any governmental entity having jurisdiction. All design and construction work on the Project shall be performed by licensed contractors, engineers or architects, as applicable.

5.10 Changes in Construction Plans. If Developer desires to make any material change in the approved Construction Plans that requires any permit be issued or modified by the City, Developer shall submit the proposed permit or permit modification request to City in accordance with its standard review process. Nothing in this Section is intended to or shall be deemed to modify the City's permit review procedures.

5.11 Defects in Plans. City shall not be responsible to Developer or to any third party for any defect in the Construction Plans or for any structural or other defect in any work done pursuant to the Construction Plans. Subject to the last sentence of this Section 5.11, Developer shall indemnify, defend (with counsel approved by City) and hold harmless the Indemnitees from and against all Claims arising out of, or relating to, or alleged to arise from or relate to defects in the Construction Plans or defects in any work done pursuant to the Construction Plans whether or not any insurance policies shall have been determined to be applicable to any such Claims Developer's indemnification obligations set forth in this Section shall survive for the term of this Agreement. It is further agreed that City shall not waive any rights against Developer which it may have by reason of this indemnity and hold harmless provision because of the acceptance by City, or Developer's deposit with City of any of the insurance policies described in this Agreement. Developer's indemnification obligations pursuant to this Section shall not extend to Claims to the extent arising due to the gross negligence or willful misconduct of the Indemnitees. Developer's indemnification obligations set forth in this Section shall not apply to any Construction Plans that are not used by or on behalf of Developer or any entity affiliated with Developer, including without limitation, an entity controlled by or under common control with Developer. In addition, if City uses any of the Construction Plans (or permits a third party to use such Construction Plans), City agrees to release Developer from liability for Claims arising in connection with such use except to the extent any such Claim arises from the gross negligence or willful misconduct of Developer or Developer's employees, agents or representatives. Notwithstanding the foregoing, Developer's aggregate liability under this Section 5.11 shall not exceed the amount of available insurance proceeds plus the outstanding principal balance of the City Loan.

5.12 Certificate of Completion for Project. Promptly after completion of construction of the Project, issuance of a temporary or final Certificate of Occupancy by the City and the written request of Developer, the City will provide an instrument ("**Certificate of Completion**") so certifying such completion, provided that at the time such Certificate of Completion is requested all applicable components of the Project have been completed. The Certificate of Completion shall be conclusive evidence that Developer has satisfied its obligations regarding the development and construction of the Project on the Property.

The Certificate of Completion shall be issued substantially in the form attached hereto as **Exhibit J** and incorporated herein by reference, and, at Developer's option, shall be recorded in the Official Records. The Certificate of Completion shall not constitute evidence of compliance with or satisfaction of any obligation of Developer to any holder of a deed of trust or mortgage securing the Senior Financing or any part thereof and shall not be deemed a notice of completion under the California Civil Code, nor shall such Certificate of Completion provide evidence that Developer has satisfied any obligation that survives the expiration of this Agreement, including without limitation, Developer's obligations pursuant to the Regulatory

Agreement; provided that such Certificate of Completion shall be evidence that Developer has satisfied its construction and development obligations under this Agreement.

5.13 Equal Opportunity. During the construction of the Project, there shall be no discrimination on the basis of race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, genetic information, marital status, sex, gender, gender identity, gender expression, age, sexual orientation, or veteran or military status in the hiring, firing, promoting or demoting of any person engaged in construction of the Project, and Developer shall direct its contractors and subcontractors to refrain from discrimination on such basis. Developer shall satisfy all Federal, State and City requirements in regard to Equal Opportunity including but not limited to noticing, program development and reporting. Developer will notify City in a timely manner of any Equal Opportunity issues arising during the development and operation of the Project.

5.14 Prevailing Wage Requirements. If and to the fullest extent required by all applicable State and Federal laws, rules and regulations, Developer and its contractors and agents shall comply with California Labor Code Section 1720, *et seq*., the Davis-Bacon Act, and the regulations adopted pursuant to each of them, as the same may be applicable to the Project ("**Prevailing Wage Laws**"), and shall be responsible for carrying out the requirements of such provisions (to the extent applicable). Developer, at its own expense, shall prepare and obtain approval from the City of a plan for monitoring, enforcing and reporting on the payment of prevailing wages to the extent applicable by the Prevailing Wage Laws. This plan if prevailing wages are applicable pursuant to Prevailing Wage Laws shall describe penalties, approved by the City, for the Contractor if it fails to implement said plan and to satisfy on a timely basis the reporting requirements included in said plan.

Developer shall indemnify, defend (with counsel approved by City) and hold the City, and its respective elected and appointed officers, officials, employees, agents, consultants, and contractors (collectively, the "**Indemnitees**") harmless from and against all liability, loss, cost, expense (including without limitation reasonable attorneys' fees and costs of litigation), claim, demand, action, suit, judicial or administrative proceeding, penalty, deficiency, fine, order, and damage (specifically excluding consequential, loss of profit, special or other speculative damages, except to the extent paid to a third party) (all of the foregoing collectively "**Claims**") which directly or indirectly, in whole or in part, are caused by, arise in connection with, result from, relate to, or are alleged to be caused by, arise in connection with, or relate to, Developer's failure to comply with the payment or requirement of payment of prevailing wages (including without limitation, all claims that may be made by contractors, subcontractors or other third party claimants pursuant to Labor Code Sections 1726 and 1781), the failure to comply with any state or federal labor laws, regulations or standards in connection with this Agreement, including but not limited to the Prevailing Wage Laws, or any act or omission of Developer related to this Agreement with respect to the payment or requirement of payment of prevailing wages, whether or not any insurance policies shall have been determined to be applicable to any such Claims, in each instance to the extent such prevailing wages are required by the Prevailing Wage Laws. It is further agreed that City does not and shall not waive any rights against Developer which they may have by reason of this indemnity and hold harmless agreement because of the acceptance by City, or Developer's deposit with City of any of the insurance policies described in this Agreement. The provisions of this Section 5.14 shall survive the term

of this Agreement. Developer's indemnification obligations set forth in this Section shall not apply to Claims to the extent arising from the gross negligence or willful misconduct of one or more of the Indemnitees.

5.15 Compliance with Laws. In connection with development and construction of the Project, Developer shall comply, and shall use commercially reasonable efforts to cause its contractors to comply with all applicable federal, state and local laws, rules, ordinances and regulations, including without limitation, all applicable federal and state labor laws and standards, contract compliance and reporting requirements, applicable provisions of the California Public Contracts Code (if any), the City zoning and development standards, building, plumbing, mechanical and electrical codes, all other provisions of the City's Municipal Code, and all applicable disabled and handicapped access requirements, including without limitation, applicable provisions of the Americans with Disabilities Act, 42 U.S.C. Section 12101, *et seq*., Government Code Section 4450, *et seq*., Government Code Section 11135, *et seq*., and the Unruh Civil Rights Act, Civil Code Section 51, *et seq*. Developer shall indemnify, defend (with counsel approved by City) and hold harmless the Indemnitees from and against any and all Claims arising in connection with the material breach of Developer's obligations set forth in this Section to the extent caused by the acts or omissions of the Developer, its agents, employees, contractors, subcontractors, or anyone working on behalf of the foregoing, whether or not any insurance policies shall have been determined to be applicable to any such Claims. It is further agreed that City shall not waive any rights against Developer which it may have by reason of this indemnity and hold harmless agreement because of the acceptance by City, or Developer's deposit with City of any of the insurance policies described in this Agreement. Developer's indemnification obligations set forth in this Section shall not apply to Claims to the extent arising from the gross negligence or willful misconduct of the Indemnitees. Developer's defense and indemnification obligations set forth in this Section 5.15 shall survive the expiration or earlier termination of this Agreement and the issuance of a Certificate of Completion for the Project.

5.16 Liens and Stop Notices. Until the expiration of the term of the Regulatory Agreement, if a claim of a lien or stop notice is given or recorded affecting the Project or the Property, Developer shall within thirty (30) days of Developer's receipt of such recording or service: (a) pay and discharge (or cause to be paid and discharged) the same; or (b) effect the release thereof by recording and delivering (or causing to be recorded and delivered) to the party entitled thereto a surety bond in sufficient form and amount; or (c) provide other assurance satisfactory to City that the claim of lien or stop notice will be paid or discharged, which shall include, but not be limited to, the Developer's right to contest the validity of such lien or stop order in good faith. The provisions of this Section 5.16 shall apply from and after Developer's acquisition of the Property.

5.17 Right of City to Satisfy Liens on the Property. If Developer fails to satisfy, discharge and, if applicable, contest any lien or stop notice on the Property pursuant to and within the time period set forth in Section 5.16 above, the City shall have the right, but not the obligation, to satisfy any such liens or stop notices at Developer's expense with prior written notice to Developer. In such event Developer shall be liable for and shall promptly reimburse City upon receipt of written demand from the City for such paid lien or stop notice. Alternatively, the City may require Developer to deposit with City, promptly following its written demand, the amount necessary to satisfy such lien or claim pending resolution thereof.

The City may use such deposit to satisfy any claim or lien that is adversely determined against Developer. Developer shall file a valid notice of cessation or notice of completion upon cessation of construction of the Improvements for a continuous period of sixty (60) days or more (subject to any Force Majeure stoppages), and shall take all other reasonable steps to forestall the assertion of claims or liens against the Property or the Improvements. The City may (but has no obligation to), with prior written notice to Developer, record any notices of completion or cessation of labor, or any other notice that the City deems necessary or desirable to protect its interest in the Property and the Improvements if it has requested the Developer to do so in accordance with the terms hereof, and Developer has failed to promptly do so.

5.18 Performance Guaranty. On the Effective Date, Developer shall cause Rancho Cordova Owner, LP to deliver to the City an executed performance guaranty in the form of Exhibit K hereto.

5.19 Insurance Requirements. Developer shall maintain and shall cause the General Contractor to maintain all applicable insurance coverage specified in Article XII.

ARTICLE VI

CITY FINANCIAL ASSISTANCE

6.1 City Loan. City agrees to provide a loan to Developer to be used as construction and permanent financing in the total principal amount of ***Five Million Dollars ($5,000,000)*** ("**City Loan**"). The City Loan shall bear simple interest at the rate of three percent (3%) per annum on the outstanding principal amount thereof. The City Loan shall be made upon the terms and conditions and for the purposes set forth in this Agreement. The City Loan shall be evidenced by a Promissory Note ("**City Loan Promissory Note**") executed by Developer. The City Loan Promissory Note shall be secured by a Deed of Trust, Assignment of Rents, Security Agreement and Fixture Filing (the "**City Loan Deed of Trust**") executed by Developer as Trustor for the benefit of City and recorded against the Property. Provided that Developer has complied with all conditions precedent to disbursement of the City Loan, the proceeds of the City Loan ("**City Loan Proceeds**") shall be disbursed pursuant to this Agreement. Annual payments shall be due and payable in accordance with the terms of the City Loan Promissory Note. The entire outstanding balance of the City Loan shall be payable in full on the fifty fifth (55^{th}) anniversary of the date of issuance of the final certificate of occupancy for the Project.

6.2 Use and Disbursement of City Loan. The City Loan Proceeds shall be used solely to fund specific development activities associated with the Project (in an amount and for only such development activities as are approved for funding by the City and granting agencies) and to fund construction of the Project, consistent with the Financing Plan.

ARTICLE VII

USE OF THE PROPERTY

7.1 Use for Affordable Housing. Developer covenants and agrees for itself that the Property shall be used for the development and operation of a multifamily affordable housing project in accordance with the terms and conditions of this Agreement and the Regulatory Agreement.

7.2 Regulatory Agreement. The City and the Developer shall execute the "**Regulatory Agreement**," which shall be substantially in the form attached hereto as Exhibit F, and cause it to be recorded against the Property concurrently with the Closing. The Regulatory Agreement shall provide, among other matters, for the lease of two hundred thirty four (234) income-restricted units in the Property, at an affordable rent, as defined in the Regulatory Agreement, for a period of fifty-five (55) years. Developer may request changes to the mix of affordable units if necessary to obtain competitive sources of financing for the Project. Any such changes shall be subject to the approval of the City Manager, which approval shall not be unreasonably withheld, conditioned or delayed.

7.3 Maintenance. Developer, at its own expense, shall maintain the Property, the Improvements and related landscaping and common areas in good physical condition, in good repair, (reasonable wear and tear excepted), and in decent, safe, sanitary, habitable and tenantable living conditions in conformity with all applicable state, federal, and local laws, ordinances, codes, and regulations. Without limiting the foregoing, Developer agrees not to cause any physical waste with respect to the Project that could materially and adversely affect the use thereof and shall take commercially reasonable efforts to prevent any illegal activity at the Property. Developer shall prevent and/or rectify any physical deterioration of the Property and the Project and shall make all repairs, renewals and replacements necessary to keep the Property and the Improvements in good condition and repair (reasonable wear and tear excepted). Developer shall provide adequate security for the tenants of the Project as contemplated in the Construction Plans. The provisions of this Section 7.3 shall apply from and after Developer's acquisition of the Property.

7.4 Taxes and Assessments. Developer shall pay all real and personal property taxes, assessments and charges (if any) and all franchise, income, payroll, withholding, sales, and other taxes assessed against the Property or the Improvements and payable by Developer, at such times and in such manner as to prevent any penalty from accruing, or any lien or charge from attaching to the Property or the Improvements; provided, however, that Developer shall have the right to contest in good faith, any such taxes, assessments, or charges (including but not limited to taxes under the welfare exemption). In the event the Developer exercises its right to contest any tax, assessment, or charge, the Developer, on final determination of the proceeding or contest, shall promptly pay or discharge any decision or judgment rendered against it, together with all costs, charges and interest.

7.5 Obligation to Refrain from Discrimination. From and after Developer's acquisition of the Property, Developer shall not restrict the rental, sale, lease, sublease, transfer, use, occupancy, tenure or enjoyment of the Property or the Improvements, or any portion thereof, on the basis of race, color, religion, sex, gender, gender identity, gender expression, sexual orientation, marital status, national origin, ancestry, familial status, source of income (for avoidance of doubt this provision will not affect income limitation under the Regulatory Agreement or any regulatory agreement in connection with the Senior Financing or required by

the Agency), disability, veteran or military status, or genetic information of any person. Except as set forth in the immediately preceding sentence, Developer covenants for itself and all persons claiming under or through it, and this Agreement is made and accepted upon and subject to the condition that there shall be no discrimination against or segregation of any person or group of persons on account of any basis listed in subdivision (a) or (d) of Section 12955 of the Government Code, as those bases are defined in Sections 12926, 12926.1, subdivision (m) and paragraph (1) of subdivision (p) of Section 12955, and Section 12955.2 of the Government Code, in the sale, lease, sublease, transfer, use, occupancy, tenure or enjoyment of the Property or part thereof by the Developer, nor shall Developer or any person claiming under or through Developer establish or permit any such practice or practices of discrimination or segregation with reference to the selection, location, number, use or occupancy of tenants, lessees, subtenants, sublessees or vendees in, of, or for the Property or the Improvements or part thereof. Developer shall include such provision in all deeds, leases, contracts and other instruments executed by Developer, and shall enforce the same diligently and in good faith.

Additionally, City reserves the right to require other mandatory contract language necessary to satisfy existing Federal, State and Local requirements.

ARTICLE VIII

LIMITATIONS ON CHANGE IN OWNERSHIP, MANAGEMENT AND CONTROL OF DEVELOPER

8.1 Change Pursuant to this Agreement. Developer and its principals have represented that they possess the necessary expertise, skill and ability to carry out the development of the Project on the Property pursuant to this Agreement. The qualifications, experience, financial capacity and expertise of Developer and its principals are of particular concern to the City. It is because of these qualifications, experience, financial capacity and expertise that the City has entered into this Agreement with Developer. No voluntary or involuntary successor, assignee or transferee of Developer shall acquire any rights or powers under this Agreement, except as expressly provided herein.

8.2 Prohibition on Transfer. Prior to the expiration of the term of the Regulatory Agreement, Developer shall not, except as expressly permitted by this Agreement, directly or indirectly, voluntarily, involuntarily or by operation of law make or attempt any total or partial sale, transfer, conveyance, assignment or lease (excluding the leasing of the Project in the ordinary course of operations and Permitted Exceptions) (collectively, "**Transfer**") of the whole or any part of Developer's interest in the Property, the Project, the Improvements, or this Agreement, without the prior written approval of City, which approval shall not be unreasonably withheld, provided however that so long as one or more of Jeremy Bronfman, Eli Bronfman or Matthew Bronfman continues to control the Developer, no consent from the City shall be required for any Transfer of the interests, direct or indirect, in the Developer. For the purposes of this section the term "control" (including the term "controlled by" and "under common control with") means the possession, direct or indirect, of the power to direct or cause the direction of the management and policies of a Person, whether through the ownership of voting securities, by contract or otherwise. Any such attempt to assign this Agreement without the City's consent shall be null and void and shall confer no rights or privileges upon the purported assignee. In

addition to the foregoing, prior to the expiration of the term of the Regulatory Agreement, except as expressly permitted by this Agreement, Developer shall not undergo any significant change of ownership without the prior written approval of City. For purposes of this Agreement, a "significant change of ownership" shall mean a transfer that results in Jeremy Bronfman, Eli Bronfman or Matthew Bronfman no longer controlling the Developer.

8.3 Permitted Transfers. Notwithstanding any contrary provision hereof, the prohibitions set forth in this Article shall not be deemed to prevent (and the following are hereby expressly permitted without the City's consent): (i) the granting of easements, licenses or permits to facilitate development of the Property; (ii) the dedication of any property required pursuant to this Agreement; (iii) the leasing of individual units to tenants for occupancy as their principal residence in accordance with the Regulatory Agreement; (iv) assignments creating security interests for the purpose of financing, construction or permanent financing of the Project or the Property in accordance with the Financing Plan as it may be updated with City approval, and subject to the requirements of Article VII, or Transfers directly resulting from the foreclosure of, or granting of a deed in lieu of foreclosure of, such a security interest and the first Transfer thereafter; (v) any Transfer so long as there is no "significant change of ownership", (vi) the transfers of the Limited Partner's interest and the removal of the general partner of the Developer by the Limited Partner, in each case, in accordance with the terms of the Partnership Agreement; (vii) Transfers of direct or indirect interests in the general partners of the Developer provided that there is no "significant change of ownership" and (viii) the removal of one or more general partners of Developer by Developer's Limited Partner in accordance with the Regulatory Agreement.

8.4 Requirements for Proposed Transfers. The City shall, in the exercise of its sole but reasonable discretion, consent to a proposed Transfer of this Agreement, the Improvements, the Property or portion thereof if all of the following requirements are met (provided however, the requirements of this Section 8.4 shall not apply to Transfers described in clauses (i) through (vii) of Section 8.3):

(i) The proposed transferee demonstrates to the City's satisfaction that it has the qualifications, experience and financial resources necessary and adequate as may be reasonably determined by the City to competently complete construction of the Project and to otherwise fulfill the obligations undertaken by the Developer under this Agreement.

(ii) The Developer and the proposed transferee shall submit for City review and approval all instruments and other legal documents proposed to effect any Transfer of this Agreement, the Improvements, the Property or interest therein together with such documentation of the proposed transferee's qualifications and development capacity as the City may reasonably request.

(iii) The proposed transferee shall expressly assume all of the rights and obligations of the Developer under this Agreement and the City Documents arising after the effective date of the Transfer and all obligations of Developer arising prior to the effective date of the Transfer (unless Developer expressly remains responsible for such obligations) and shall agree to be subject to and assume all of Developer's obligations pursuant to the Conditions of

Approval and all other conditions, and restrictions set forth in this Agreement and the Regulatory Agreement.

(iv) The Transfer shall be effectuated pursuant to a written instrument satisfactory to the City in form recordable in the Official Records.

Consent to any proposed Transfer may be given by the City Manager unless the City Manager, in his or her reasonable discretion, refers the matter of approval to the City Council. If a proposed Transfer has not been approved by City in writing within thirty (30) days following City's receipt of written request by Developer, it shall be deemed rejected.

8.5 Effect of Transfer without City Consent.

8.5.1 In the absence of specific written agreement by the City, no Transfer by Developer shall be deemed to relieve the Developer or any other party from any obligation under this Agreement, provided however: (i) this Agreement shall remain in effect and (ii) Developer or any other party, as transferor, shall be relieved from any obligation contained in Section 8.2 and 8.3 of this Agreement.

8.5.2 Without limiting any other remedy City may have under this Agreement, or under law or equity, it shall be an Event of Default hereunder entitling City to terminate this Agreement if without the prior written approval of the City, Developer assigns or Transfers this Agreement, the Improvements, or the Property prior to the City's issuance of a Certificate of Completion. This Section 8.5.2 shall not apply to permitted Transfers pursuant to Sections 8.2 and 8.3.

8.6 Recovery of City Costs. In connection with any request for the City's approval of a Transfer that requires the City's approval hereunder, Developer shall reimburse the City up to Ten Thousand Dollars ($10,000) within thirty (30) days following City's delivery to Developer of an invoice detailing the reasonable out-of-pocket costs of the City in connection therewith provided that any such invoices may be delivered only after the construction loan closing is consummated. Costs incurred by the City may include, but are not limited to, activity delivery and reasonable legal costs. Recovery is required, if and only if a Closing is consummated.

ARTICLE IX

SECURITY FINANCING AND RIGHTS OF MORTGAGEES

9.1 Mortgages and Deeds of Trust for Project. Mortgages and deeds of trust, or any other reasonable security instrument in connection with the Senior Financing or as required by the Agency are permitted to be placed upon the Property or the Improvements only for the purpose of securing loans for the purpose of the design and construction of the Improvements, and other expenditures reasonably necessary for the operation and development of the Property. Developer shall not enter into any financing that is not contemplated in the Financing Plan (as it may be updated with City approval), without the prior written approval of the City Manager or his or her designee (which shall not be unreasonably withheld, conditioned,

or delayed). As used herein, the terms "mortgage" and "deed of trust" shall mean any security instrument used in financing real estate acquisition, construction and land development. Notwithstanding the foregoing, the parties hereby agree that the Senior Financing (including any amendments, extensions, refinancings or other changes thereto) shall be permitted and the current Senior Financing is contemplated in the Financing Plan, and the Developer and City shall update the Financing Plan, as applicable, in connection with any future refinancings, extensions or other modifications thereto and upon City Manager or designee approval, which shall not be unreasonably without, conditioned, or delayed.

9.1.1 Subordination of Deed of Trust, Memorandum and Regulatory Agreement. The City agrees that it will not withhold consent to reasonable requests for subordination of the Deed of Trust, Memorandum of Agreement, Regulatory Agreement and related instruments provided for the benefit of (i) any Senior Lenders identified in the Financing Plan as it may be updated with City approval (which shall not be unreasonably withheld, conditioned, or delayed), and (ii) any future Senior Lenders of loans that refinance the Senior Financing currently identified in the Financing Plan, provided that the instruments effecting such subordination include reasonable protections to the City in the event of default. For the avoidance of doubt, the City hereby agrees to enter into customary subordination agreement as may be required by the current and future Senior Lenders, including, but not limited to, Freddie Mac's form subordination agreements (as updated from time to time).

9.2 Holder Not Obligated to Construct. The holder of any mortgage or deed of trust authorized by this Agreement shall not be obligated to complete construction of the Improvements or to guarantee such completion. Nothing in this Agreement shall be deemed to permit or authorize any such holder to devote the Property or any portion thereof to any uses, or to construct any improvements thereon, other than those uses or improvements provided for or authorized by this Agreement.

9.3 Notice of Default and Right to Cure. Whenever City delivers any notice of default hereunder, City shall concurrently deliver a copy of such notice to the Limited Partner (for so long as it is the limited partner of the Developer) and to the current and any future Senior Lenders, provided that City has been provided with the addresses for delivery of such notice. City shall have no liability to any such Senior Lender for any failure by the City to provide such notice to such Senior Lender. Each such Limited Partner and Senior Lender shall have the right, but not the obligation, at its option, to cure or remedy any such default or breach within the cure period provided to Developer extended by an additional sixty (60) days. In the event that possession of the Property or the Improvements (or any portion thereof), or other property of Developer, is required to effectuate such cure or remedy, the Senior Lender and/or Limited Partner shall be deemed to have timely cured or remedied the default if it commences the proceedings necessary to obtain possession of the Property or Improvements within sixty (60) days after receipt of the City's notice, diligently pursues such proceedings to completion, and after obtaining possession, diligently completes such cure or remedy. A Senior Lender and/or Limited Partner who chooses to exercise its right to cure or remedy a default or breach shall first notify City of its intent to exercise such right prior to commencing to cure or remedy such default or breach. Nothing contained in this Agreement shall be deemed to permit or authorize such holder to undertake or continue the construction of the Project (beyond the extent necessary to conserve or protect the same) without first having expressly assumed in writing Developer's

obligations to City under this Agreement. Any Senior Lender and/or Limited Partner must agree to complete, in the manner provided in this Agreement, the Project and the Improvements and submit evidence reasonably satisfactory to City that it has the development capability on staff or retainer and the financial capacity necessary to perform such obligations. Any Senior Lender and/or Limited Partner properly completing the Project pursuant to this Section shall assume all rights and obligations of Developer under this Agreement and shall be entitled to a Certificate of Completion upon compliance with the requirements of this Agreement.

9.4 City Right to Cure Defaults. In the event of a breach or default by Developer under the Senior Financing, City may cure the default, without acceleration of such Senior Financing, following prior notice thereof to the applicable Senior Lender and Developer. In such event, Developer shall be liable for, and City shall be entitled to reimbursement from Developer for all out of pocket costs and expenses incurred by City associated with and attributable to the curing of the default or breach and such sum, provided, however, that if the Developer or the Limited Partner is diligently pursuing a cure, the City agrees that it shall not enforce its rights pursuant to this Section 9.4.

9.5 Holder to be Notified. Developer agrees to use best efforts to ensure that each term contained herein dealing with security financing and rights of holders shall be either inserted into the relevant deed of trust or mortgage or acknowledged by the holder prior to its creating any security right or interest in the Property or the Improvements, or other property of Developer, as applicable.

9.6 Modifications to Agreement. City shall not unreasonably withhold its consent to modifications of this Agreement requested by Senior Lenders or the Limited Partner.

9.7 Estoppel Certificates. Either Party shall, at any time, and from time to time, within fifteen (15) days after receipt of written request from the other Party, execute and deliver to such Party a written statement certifying that, to the knowledge of the certifying Party: (i) this Agreement is in full force and effect and a binding obligation of the Parties (if such be the case), (ii) this Agreement has not been amended or modified, or if so amended, identifying the amendments, and (iii) the requesting Party is not in default in the performance of its obligations under this Agreement, or if in default, describing the nature of any such defaults, as well as any other information that may reasonably be requested by the Senior Lenders and/or Limited Partner.

ARTICLE X

ENVIRONMENTAL MATTERS

10.1 No City Liability; Developer's Covenants. City shall not be responsible for the cost of any soil, groundwater or other environmental remediation or other response activities for any Hazardous Materials existing or occurring in, on, under or at the Improvements, the Property or any portion thereof. Upon receipt of any notice regarding the presence, release or discharge of Hazardous Materials in violation of applicable Environmental Laws in, on or under the Improvements, the Property, or any portion thereof, Developer agrees to timely initiate and diligently pursue and complete all appropriate response, remediation and removal actions for the

presence, release or discharge of such Hazardous Materials within such deadlines as specified by applicable Environmental Laws. Developer hereby covenants and agrees that commencing upon Developer's acquisition of its interests in the Property:

(i) Developer shall not knowingly permit the Project or the Property or any portion of either to be a site for the use, generation, treatment, manufacture, storage, disposal or transportation of Hazardous Materials in violation of Environmental Laws or otherwise knowingly permit the presence or release of Hazardous Materials in violation of Environmental Laws in, on, under, at or from the Project or the Property with the exception of cleaning supplies and other materials customarily used in construction, operation or maintenance of residential property and any commercial uses developed as part of the Project, and used, stored and disposed of in compliance with Environmental Laws, and

(ii) Developer shall keep and maintain the Project and the Property and each portion thereof in compliance with, and shall not cause or permit the Project or the Property or any portion of either to be in violation of, any Environmental Laws.

10.2 Environmental Indemnification. Subject to the terms of this Section 10.2, commencing upon Developer's acquisition of the Property, Developer shall indemnify, defend (with counsel approved by City) and hold the Indemnitees (excluding any third party that takes possession of the Property via a foreclosure or deed in lieu thereof) harmless from and against any and all Claims including without limitation any expenses associated with the investigation, assessment, monitoring, response, removal, treatment, abatement or remediation of Hazardous Materials and administrative, enforcement or judicial proceedings resulting, arising, or based directly or indirectly in whole or in part, upon (i) the presence, release, use, generation, discharge, storage or disposal or the alleged presence, release, discharge, storage or disposal of any Hazardous Materials on, under, in or at, or the transportation of any such Hazardous Materials from, the Property, or (ii) the failure of Developer, Developer's employees, agents, contractors, subcontractors, or any person acting on behalf of any of the foregoing to comply with Environmental Laws or the covenants set forth in Section 10.1; provided, however, Developer's indemnification obligations under this Section 10.2 shall be limited to Claims arising from (a) Hazardous Materials introduced to, released at, or migrating from the Property during Developer's period of ownership or control, and (b) Developer's failure to comply with Environmental Laws. The foregoing indemnity shall further apply to any residual contamination in, on, under or at the Property or affecting any natural resources, and to any contamination of any property or natural resources arising in connection with the generation, use, handling, treatment, storage, transport or disposal of any such Hazardous Materials from the Property. The provisions of this Section 10.2 shall survive the issuance of a Certificate of Completion for the Project and the expiration or earlier termination of this Agreement. Developer's indemnification obligations set forth in this Section shall not apply to (i) Claims regarding the Property arising out of or occurring prior to Developer's acquisition of the Property, (ii) Claims arising solely from the gross negligence or willful misconduct of the City or its agents, or (iii) Claims arising after Developer's dispossession from the Property pursuant to foreclosure proceedings or a deed in lieu thereof.

10.2.1 No Limitation. Developer hereby acknowledges and agrees that Developer's duties, obligations and liabilities under this Agreement, including, without

limitation, under Section 8.2 above, are in no way limited or otherwise affected by any information the City may have concerning the Property and/or the presence in, on, under or about the Property of any Hazardous Materials, whether the City obtained such information from the Developer or from its own investigations, except to the extent a phase 1 environmental site assessment has been provided to the City, in which case, the protections provided thereby to the City shall apply to the benefit of the Developer with respect to its obligations hereunder. It is further agreed that City does not and shall not waive any rights against Developer that they may have by reason of this indemnity and hold harmless agreement because of the acceptance by City, or the deposit with City by Developer, of any of the insurance policies described in this Agreement.

10.3 Hazardous Materials. As used herein, the term "**Hazardous Materials**" means any substance, material or waste which is or becomes regulated by any federal, state or local governmental authority, and includes without limitation (i) petroleum or oil or gas or any direct or indirect product or by-product thereof; (ii) asbestos and any material containing asbestos; (iii) any substance, material or waste regulated by or listed (directly or by reference) as a "hazardous substance", "hazardous material", "hazardous waste", "toxic waste", "toxic pollutant", "toxic substance", "solid waste" or "pollutant or contaminant" in or pursuant to, or similarly identified as hazardous to human health or the environment in or pursuant to, the Toxic Substances Control Act [15 U.S.C. Section 2601, *et seq*.]; the Comprehensive Environmental Response, Compensation and Liability Act [42 U.S.C. Section 9601, *et seq*.], the Hazardous Materials Transportation Authorization Act [49 U.S.C. Section 5101, *et seq*.], the Resource Conservation and Recovery Act [42 U.S.C. Section 6901, *et seq*.], the Federal Water Pollution Control Act [33 U.S.C. Section 1251], the Clean Air Act [42 U.S.C. Section 7401, *et seq*.], the California Underground Storage of Hazardous Substances Act [California Health and Safety Code Section 25280, *et seq*.], the California Hazardous Substances Account Act [California Health and Safety Code Section 78000, *et seq*.], the California Hazardous Waste Act [California Health and Safety Code Section 25100, *et seq*.], the California Safe Drinking Water and Toxic Enforcement Act [California Health and Safety Code Section 25249.5, *et seq*.], and the Porter-Cologne Water Quality Control Act [California Water Code Section 13000, *et seq*.], as they now exist or are hereafter amended, together with any regulations promulgated thereunder; (iv) any substance, material or waste which is defined as such or regulated by any "Superfund" or "Superlien" law, or any Environmental Law; or (v) any other substance, material, chemical, waste or pollutant identified as hazardous or toxic and regulated under any other federal, state or local environmental law, including without limitation, asbestos, polychlorinated biphenyls, petroleum, natural gas and synthetic fuel products and by-products. Hazardous Materials shall not include any materials routinely used in the construction or operations of multifamily housing in accordance with all applicable laws and regulations.

10.4 Environmental Laws. As used herein, the term "**Environmental Laws**" means all federal, state or local statutes, ordinances, rules, regulations, orders, decrees, judgments or common law doctrines, and provisions and conditions of permits, licenses and other operating authorizations regulating, or relating to, or imposing liability or standards of conduct concerning (i) pollution or protection of the environment, including natural resources; (ii) exposure of persons, including employees and agents, to Hazardous Materials (as defined above) or other products, raw materials, chemicals or other substances; (iii) protection of the public health or welfare from the effects of by-products, wastes, emissions, discharges or

releases of chemical substances from industrial or commercial activities; (iv) the manufacture, use or introduction into commerce of chemical substances, including without limitation, their manufacture, formulation, labeling, distribution, transportation, handling, storage and disposal; or (iv) the use, release or disposal of toxic or hazardous substances or Hazardous Materials or the remediation of air, surface waters, groundwater or soil, as now or may at any later time be in effect, including but not limited to the Toxic Substances Control Act [15 U.S.C. Section 2601, *et seq*.]; the Comprehensive Environmental Response, Compensation and Liability Act [42 U.S.C. Section 9601, *et seq*.], the Hazardous Materials Transportation Authorization Act [49 U.S.C. Section 5101, *et seq*.], the Resource Conservation and Recovery Act [42 U.S.C. Section 6901, *et seq*.], the Federal Water Pollution Control Act [33 U.S.C. Section 1251], the Clean Air Act [42 U.S.C. Section 7401, *et seq*.], the California Underground Storage of Hazardous Substances Act [California Health and Safety Code Section 25280, *et seq*.], the California Hazardous Substances Account Act [California Health and Safety Code Section 78000, *et seq*.], the California Hazardous Waste Act [California Health and Safety Code Section 25100, *et seq*.], the California Safe Drinking Water and Toxic Enforcement Act [California Health and Safety Code Section 25249.5, *et seq*.], and the Porter-Cologne Water Quality Control Act [California Water Code Section 13000, *et seq*.], as each of the foregoing now exist or are hereafter amended, together with any regulations promulgated thereunder.

ARTICLE XI

DEFAULTS, REMEDIES AND TERMINATION

11.1 Event of Developer Default. The following events shall constitute an event of default on the part of Developer ("**Event of Developer Default**" or "**Event of Default**"):

(a) Subject to Force Majeure, the availability of financing and City's issuance of permits and approvals, Developer fails to commence or complete construction of the Project within the times set forth in Section 5.8, or subject to Force Majeure, abandons or suspends construction of the Project prior to completion for a period of ninety (90) consecutive days or more;

(b) A Transfer occurs, either voluntarily or involuntarily, in violation of Article VIII;

(c) Developer fails to maintain insurance as required pursuant to this Agreement, and Developer fails to cure such default within ten (10) business days of receipt of notice from the City;

(d) Subject to Developer's right to contest the following charges pursuant to Section 7.4, if Developer fails to pay, prior to delinquency, taxes or assessments due on the Property or the Project or fails to pay when due or bond or insure any other charge that may result in a lien on the Property or the Project, and Developer fails to cure such default within thirty (30) days of the date of delinquency, but in all events upon the imposition of any such tax or other lien that is not bonded or insured over;

(e) Following Developer's acquisition of the Property, a default arises under any Senior Financing, and remains uncured beyond any applicable notice or cure period such that the Senior Lender of such Senior Financing has the right to accelerate repayment of such loan unless and until the same default is waived or cured;

(f) Any representation or warranty contained in this Agreement or in any application, financial statement, certificate or report submitted to the City in connection with this Agreement or Developer's request for City Funds proves to have been incorrect in any material and adverse respect when made and continues to be materially adverse to the City and Developer fails to cure such default within sixty (60) days after the date upon which City shall have given written notice of the default to Developer; provided however, if the default is of a nature that it cannot be cured within sixty (60) days, an Event of Developer Default shall not arise hereunder if Developer commences to cure the default within sixty (60) days and thereafter prosecutes the curing of such default with due diligence and in good faith to completion and in no event later than one hundred twenty (120) days after receipt of notice of the default;

(g) If, pursuant to or within the meaning of the United States Bankruptcy Code or any other federal or state law relating to insolvency or relief of debtors ("**Bankruptcy Law**"), Developer (i) commences a voluntary case or proceeding; (ii) consents to the entry of an order for relief against Developer or any general partner thereof in an involuntary case; (iii) consents to the appointment of a trustee, receiver, assignee, liquidator or similar official for Developer or any general partner thereof; (iv) makes an assignment for the benefit of its creditors; or (v) admits in writing its inability to pay its debts as they become due, and any such proceeding or action is not dismissed within sixty (60) days of initiation;

(h) A court of competent jurisdiction shall have made or entered any final, unappealable decree or order (1) adjudging the Developer to be bankrupt or insolvent, (2) approving as properly filed a petition seeking reorganization of the Developer or seeking any arrangement for Developer under bankruptcy law or any other applicable debtor's relief law or statute of the United States or any state or other jurisdiction, (3) appointing a receiver, trustee, liquidator, or assignee of the Developer in bankruptcy or insolvency or for any of its properties, or (4) directing the winding up or liquidation of the Developer;

(i) Developer shall have assigned its assets for the benefit of its creditors (other than pursuant to a mortgage loan) or suffered a sequestration or attachment of or execution on any substantial part of its property, unless the property so assigned, sequestered, attached or executed upon shall have been returned or released within sixty (60) days after such event (unless a lesser time period is permitted for cure under any other mortgage on the Property or the Improvements, in which event such lesser time period shall apply under this subsection as well) or prior to any sooner sale pursuant to such sequestration, attachment, or execution;

(j) The Developer shall have voluntarily suspended its business or Developer shall have been dissolved or terminated;

(k) An event of default arises under any City Document and remains uncured beyond any applicable cure period; or

(l) Developer defaults in the performance of any term, provision, covenant or agreement contained in this Agreement other than an obligation enumerated in this Section 11.1 and unless a shorter cure period is specified for such default, the default continues for ten (10) days in the event of a monetary default or ninety (90) days in the event of a nonmonetary default after the date upon which City shall have given written notice of the default to Developer; provided however, if the default is of a nature that it cannot be cured within such ninety (90) days, an Event of Developer Default shall not arise hereunder if Developer commences to cure the default within such ninety (90) days and thereafter prosecutes the curing of such default with due diligence and in good faith to completion and in no event later than an additional one hundred twenty (120) days after the end of the initial ninety (90) day cure period t.

11.2 City Default. An event of default on the part of City ("**Event of City Default**") shall arise hereunder if City fails to keep, observe, or perform any of its covenants, duties, or obligations under this Agreement, and the default continues for a period of thirty (30) days after written notice thereof from Developer to City, or in the case of a default which cannot with due diligence be cured within thirty (30) days, City fails to commence to cure the default within thirty (30) days of such notice and thereafter fails to prosecute the curing of such default with due diligence and in good faith to completion.

11.3 City's Right to Terminate Agreement. If an Event of Developer Default shall occur and be continuing beyond any applicable cure period, then City shall, in addition to other rights available to it under law or this Agreement, have the right to terminate this Agreement. If City makes such election, City shall give written notice to Developer and to any mortgagee entitled to such notice and to Limited Partner specifying the nature of the default and stating that this Agreement shall expire and terminate on the date specified in such notice, and upon the date specified in the notice, this Agreement and all rights of Developer under this Agreement, shall expire and terminate.

11.4 City's Remedies and Rights Upon an Event of Developer Default. During the continuance of an Event of Developer Default and the expiration of any applicable cure period, subject to the rights of the Senior Lenders, City shall have all remedies available to it under this Agreement or under law or equity, including, but not limited to the following, and City may, at its election, without notice to or demand upon Developer, except for notices or demands required by law or expressly required pursuant to the City Documents, exercise one or more of the following remedies:

(a) Accelerate and declare the balance of the City Loan Note, and any interest accrued thereon, immediately due and payable;

(b) Seek specific performance to enforce the terms of the City Documents;

(c) Foreclose on the Property pursuant to the City Loan Deed of Trust; and

(d) Pursue any and all other remedies available under this Agreement or under law or equity to enforce the terms of the City Documents and City's rights thereunder.

11.5 Developer's Remedies Upon an Event of City Default. Upon the occurrence of an Event of City Default, in addition to pursuing any other remedy allowed at law or in equity or otherwise provided in this Agreement, Developer may bring an action for equitable relief seeking the specific performance of the terms and conditions of this Agreement, and/or enjoining, abating, or preventing any violation of such terms and conditions, and/or seeking to obtain any other remedy consistent with the purpose of this Agreement.

11.6 Remedies Cumulative; No Consequential Damages. Except as otherwise expressly stated in this Agreement, the rights and remedies of the Parties are cumulative, and the exercise by either Party of one or more of such rights or remedies shall not preclude the exercise by it, at the same or different time, of any other rights or remedies for the same or any other default by the other Party. Notwithstanding anything to the contrary set forth herein, a Party's right to recover damages in the event of a default shall be limited to actual damages and shall exclude consequential, special, loss of profit, or other speculative damages.

11.7 Inaction Not a Waiver of Default. No failure or delay by either Party in asserting any of its rights and remedies as to any default shall operate as a waiver of such default or of any such rights or remedies, nor deprive either Party of its rights to institute and maintain any action or proceeding which it may deem necessary to protect, assert or enforce any such rights or remedies in the same or any subsequent default.

ARTICLE XII

INDEMNITY AND INSURANCE

12.1 Indemnity. Developer shall indemnify, defend (with counsel approved by City) and hold Indemnitees, except third party contractors and consultants, harmless from and against any and all Claims arising directly or indirectly, in whole or in part, as a result of or in connection with Developer's or Developer's contractors, subcontractors, agents or employees development, construction, improvement, operation, ownership or maintenance of the Project or the Property, or any part thereof or otherwise arising out of or in connection with Developer's performance under this Agreement. Developer's indemnification obligations under this Section 12.1 shall not extend to Claims resulting solely from the gross negligence or willful misconduct of, or to any breach of a warranty or representation of this Agreement by, one or more Indemnitees, nor shall it apply to any Claims that arise from actions that first occur after the Developer is no longer in possession of the Property. The provisions of this Section 12.1 shall survive the issuance of a Certificate of Completion for the Project and the expiration or earlier termination of this Agreement. It is further agreed that City will not and shall not waive any rights against Developer that they may have by reason of this indemnity and hold harmless agreement because of the acceptance by City, or the deposit with City by Developer, of any of the insurance policies described in this Agreement.

12.2 Liability and Workers' Compensation Insurance.

(a) Prior to initiating work on the Project and continuing through the issuance of the Certificate of Completion, Developer and all contractors working on behalf of Developer on the Project shall maintain a commercial general liability policy in the amount of

One Million Dollars ($1,000,000) each occurrence, Two Million Dollars ($2,000,000) annual aggregate, together with Three Million Dollars ($3,000,000) excess liability coverage, or such other policy limits as City may require in its reasonable discretion including coverage for bodily injury, property damage, products, completed operations and contractual liability coverage. Such policy or policies shall be written on an occurrence basis and shall name the Indemnitees as additional insureds.

(b) Until issuance of the Certificate of Completion, unless waived by City, Developer and all contractors working on behalf of Developer shall maintain a comprehensive automobile liability coverage in the amount of One Million Dollars ($1,000,000), combined single limit including coverage for owned and non-owned vehicles and shall furnish or cause to be furnished to City evidence satisfactory to City that Developer and any contractor with whom Developer has contracted for the performance of work on the Property or otherwise pursuant to this Agreement carries workers' compensation insurance in an amount not less than One Million Dollars ($1,000,000), including a Waiver of Subrogation. Automobile liability policies shall name the Indemnitees as additional insureds.

(c) Upon commencement of construction work and continuing until issuance of a Certificate of Completion, Developer and all contractors working on behalf of Developer shall maintain a policy of builder's all-risk insurance in an amount not less than the full insurable cost of the Project on a replacement cost basis naming City as loss payee. Such insurance shall include coverage for risks of direct physical loss or damage, excluding the perils of, flood, and earth movement.

(d) Upon completion of construction, Developer shall maintain property insurance covering all risks of loss (other than earthquake and flood) for one hundred percent (100%) of the replacement value of the Project with an AOP deductible no greater than Two Hundred and Fifty Thousand Dollars ($250,000), naming City as loss payee.

(e) Companies writing the insurance required hereunder shall be licensed to do business in the State of California. Insurance shall be placed with insurers with a current A.M. Best's rating of no less than A: VII. The Commercial General Liability and comprehensive automobile policies required hereunder shall name the Indemnitees as additional insureds. Builder's Risk and property insurance shall name City as loss payees as their interests may appear.

(f) Prior to commencement of construction work, Developer shall furnish City with certificates of insurance in form acceptable to City evidencing the required insurance coverage and duly executed endorsements evidencing such additional insured status. The certificates shall contain a statement of obligation on the part of the carrier to notify City of any material adverse change, cancellation, termination or non-renewal of the coverage at least thirty (30) days in advance of the effective date of any such material adverse change, cancellation, termination or non-renewal.

(g) If any insurance policy or coverage required hereunder is canceled or reduced, Developer shall, within twenty-one (21) days after receipt of notice of such cancellation or reduction in coverage, but in no event later than the effective date of cancellation

or reduction, file with City a certificate showing that the required insurance has been reinstated or provided through another insurance company or companies. Upon failure to so file such certificate, City may, without further notice and at its option, procure such insurance coverage at Developer's expense, and Developer shall promptly reimburse City for such expense upon receipt of billing from City.

(h) Coverage provided by Developer shall be primary insurance and shall not be contributing with any insurance, or self-insurance maintained by City, and the policies shall so provide. Unless waived by City, any Workers' Compensation insurance policies shall contain a waiver of subrogation for the benefit of the City. Developer shall furnish the required certificates and endorsements to City prior to the commencement of construction of the Project, and shall provide City with certified copies of the required insurance policies upon request of City.

ARTICLE XIII

MISCELLANEOUS PROVISIONS

13.1 No Brokers. Each Party warrants and represents to the other that no person or entity can properly claim a right to a real estate commission, brokerage fee, finder's fee, or other compensation with respect to the transactions contemplated by this Agreement, except as identified in the Financing Plan. Each Party agrees to defend, indemnify and hold harmless the other Party from any claims, reasonable expenses, out-of-pocket costs or liabilities arising in connection with a breach of this warranty and representation. The terms of this Section shall survive the expiration or earlier termination of this Agreement.

13.2 Enforced Delay; Extension of Times of Performance. Subject to the limitations set forth below, performance by either Party shall not be deemed to be in default, and all performance and other dates specified in this Agreement shall be extended where delays are due to the following (each a "Force Majeure"): war, insurrection, strikes, lockouts, riots, floods, earthquakes, fires, casualties, acts of God, acts of the public enemy, epidemics, pandemics, quarantine restrictions, freight embargoes, governmental restrictions or priority, litigation, including court delays, unusually severe weather, acts or omissions of the other Party, acts or failures to act of the City or any other public or governmental agency or entity (other than the acts or failures to act of City which shall not excuse performance by City), or any other cause beyond the affected Party's reasonable control. An extension of time for any such cause shall be for the period of the enforced delay and shall commence to run from the time of the commencement of the cause, if notice by the Party claiming such extension is sent to the other Party within thirty (30) days of the later of commencement of the cause or such Party's acquiring actual knowledge that such cause will necessitate such extension. Neither Party shall unreasonably withhold consent to an extension of time pursuant to this Section.

Times of performance under this Agreement may also be extended in writing by the mutual agreement of Developer and City (acting in the discretion of its City Manager unless he or she determines in his or her discretion to refer such matter to the City Council). City and Developer acknowledge that adverse changes in economic conditions, either of the affected Party specifically or the economy generally, changes in market conditions or demand, and/or inability

to obtain financing to complete the work of Improvements (all except in the event of Force Majeure) shall not constitute grounds of enforced delay pursuant to this Section. Each Party expressly assumes the risk of such adverse economic or market changes and/or financial inability, whether or not foreseeable as of the Effective Date.

13.3 Notices. Except as otherwise specified in this Agreement, all notices to be sent pursuant to this Agreement shall be made in writing, and sent to the Parties at their respective addresses specified below or to such other address as a Party may designate by written notice delivered to the other Parties in accordance with this Section. All such notices shall be sent by:

(i) personal delivery, in which case notice is effective upon delivery;

(ii) certified or registered mail, return receipt requested, in which case notice shall be deemed delivered on receipt if delivery is confirmed by a return receipt;

(iii) nationally recognized overnight courier, with charges prepaid or charged to the sender's account, in which case notice is effective on delivery if delivery is confirmed by the delivery service; or

(iv) facsimile transmission, in which case notice shall be deemed delivered upon transmittal, provided that (a) a duplicate copy of the notice is promptly delivered by first-class or certified mail or by overnight delivery, or (b) a transmission report is generated reflecting the accurate transmission thereof. Any notice given by facsimile shall be considered to have been received on the next business day if it is received after 5:00 p.m. recipient's time or on a non-business day.

Attention: Bennett P. Applegate

13.4 Attorneys' Fees. If either Party fails to perform any of its obligations under this Agreement, or if any dispute arises between the Parties concerning the meaning or interpretation of any provision hereof, then the prevailing Party in any proceeding in connection with such dispute shall be entitled to the costs and expenses it incurs on account thereof and in enforcing or establishing its rights hereunder, including, without limitation, court costs and reasonable attorneys' fees and disbursements.

13.5 Waivers; Modification. No waiver of any breach of any covenant or provision of this Agreement shall be deemed a waiver of any other covenant or provision hereof, and no waiver shall be valid unless in writing and executed by the waiving Party. An extension of time for performance of any obligation or act shall not be deemed an extension of the time for performance of any other obligation or act, and no extension shall be valid unless in writing and executed by the Party granting the extension. This Agreement may be amended or modified only by a written instrument executed by the Parties.

13.6 Binding on Successors. Subject to the restrictions on Transfers set forth in Article VIII, this Agreement shall bind and inure to the benefit of the Parties and their respective permitted successors and assigns. Any reference in this Agreement to a specifically named Party shall be deemed to apply to any permitted successor and assign of such Party who has acquired an interest in compliance with this Agreement or under law.

13.7 Survival. All representations made by Developer hereunder and Developer's obligations pursuant to Sections 5.14, 5.17, 5.18, 10.2, 12.1, 13.1 and 13.18 shall survive the expiration or termination of this Agreement and the issuance and recordation of a Certificate of Completion.

13.8 Construction. The section headings and captions used herein are solely for convenience and shall not be used to interpret this Agreement. The Parties acknowledge that this Agreement is the product of negotiation and compromise on the part of both Parties, and the Parties agree, that since both Parties have participated in the negotiation and drafting of this Agreement, this Agreement shall not be construed as if prepared by one of the Parties, but rather according to its fair meaning as a whole, as if both Parties had prepared it.

13.9 Action or Approval. Whenever action and/or approval by City is required under this Agreement, the City Manager or his or her designee may act on and/or approve such matter unless specifically provided otherwise, or unless the City Manager determines in his or her discretion that such action or approval requires referral to the City Council for consideration.

13.10 Entire Agreement. This Agreement, including Exhibits A through J attached hereto and incorporated herein by this reference, together with other City Documents contains the entire agreement between the Parties with respect to the subject matter hereof, and supersedes all prior written or oral agreements, understandings, representations or statements between the Parties with respect to the subject matter hereof.

13.11 Counterparts. This Agreement may be executed in one or more counterparts, each of which shall be an original and all of which taken together shall constitute

one instrument. The signature page of any counterpart may be detached therefrom without impairing the legal effect of the signature(s) thereon provided such signature page is attached to any other counterpart identical thereto having additional signature pages executed by the other Party. Any executed counterpart of this Agreement may be delivered to the other Party by facsimile and shall be deemed as binding as if an originally signed counterpart was delivered.

13.12 Severability. If any term, provision, or condition of this Agreement is held by a court of competent jurisdiction to be invalid or unenforceable, the remainder of this Agreement shall continue in full force and effect unless an essential purpose of this Agreement is defeated by such invalidity or unenforceability.

13.13 No Third Party Beneficiaries. Nothing contained in this Agreement is intended to or shall be deemed to confer upon any person, other than the Parties and their respective successors and assigns, any rights or remedies hereunder.

13.14 Parties Not Co-Venturers. Nothing in this Agreement is intended to or shall establish the Parties as partners, co-venturers, or principal and agent with one another.

13.15 Non-Liability of Officials, Employees and Agents. No officer, official, employee or agent of City shall be personally liable to Developer or its successors in interest in the event of any default or breach by City for any amount which may become due to Developer or its successors in interest pursuant to this Agreement.

13.16 Time of the Essence; Calculation of Time Periods. Time is of the essence for each condition, term, obligation and provision of this Agreement. Unless otherwise specified, in computing any period of time described in this Agreement, the day of the act or event after which the designated period of time begins to run is not to be included and the last day of the period so computed is to be included, unless such last day is not a business day, in which event the period shall run until the next business day. The final day of any such period shall be deemed to end at 5:00 p.m., local time at the Property. For purposes of this Agreement, a "business day" means a day that is not a Saturday, Sunday, a federal holiday or a state holiday under the laws of California.

13.17 Governing Law; Venue. This Agreement shall be governed by and construed in accordance with the laws of the State of California without regard to principles of conflicts of laws. Any action to enforce or interpret this Agreement shall be filed in the Superior Court of Sacramento County, California.

13.18 General Indemnification. Developer shall indemnify, defend (with counsel approved by City) and hold harmless Indemnitees from all Claims (including without limitation, reasonable attorneys' fees) arising in connection with any claim, action or proceeding to attack, set aside, void, or annul any approval by the City or any of its agencies, departments, commissions, agents, officers, employees or legislative body concerning the Project or this Agreement. The City will promptly notify Developer of any such claim, action or proceeding, and will cooperate fully in the defense. The City may participate in the defense of any such claim, action or proceeding, and if the City chooses to do so, Developer shall reimburse City for

reasonable attorneys' fees and expenses incurred. Developer's indemnification obligation hereunder shall not apply to gross negligence or willful misconduct of an Indemnitee.

13.19 Limitation of Liability. Notwithstanding anything to the contrary contained herein, (a) the Developer shall not be liable to the City to the extent any liability arose from the gross negligence or willful misconduct of the City or any Indemnitee, (b) the obligations of the Developer hereunder shall not be recourse to the members, partners, shareholders, agents or employees of the Developer unless authorized by law; and (c) the Developer shall not be liable for any event first occurring after Developer is no longer in possession of the Project.

IN WITNESS WHEREOF, the Parties have entered into this Agreement effective as of the date first written above.

MEMORANDUM OF LOAN AGREEMENT

This **MEMORANDUM OF LOAN AGREEMENT** ("Memorandum") is entered into as of _____, 2026, by and between the **CITY OF RANCHO CORDOVA**, a California municipal corporation (the "City"), and **RANCHO CORDOVA OWNER LP**, a California limited partnership ("Developer").

This Memorandum is made with reference to the following:

1. The City and Developer have entered into that certain unrecorded Loan Agreement dated as of _____, 2026. The Loan Agreement provides for the development of a rental multifamily housing development which is affordable to lower income and very low income households on certain real property located in the City of Rancho Cordova, California and more particularly described in Exhibit "A" attached hereto, and referred to in the Loan Agreement as the "Property". Any capitalized term used, but not defined, in this Memorandum shall have the meaning provided in the Loan Agreement.

2. The Loan Agreement provides for City and Developer to enter this Memorandum and to record the same in the Official Records of Sacramento County, California, to provide notice to all persons of the existence of the Loan Agreement, which Loan Agreement is binding on Developer and Developer's successors-in-interest as to the Property.

3. This Memorandum is not intended as a full description of the terms and conditions of the Loan Agreement. This Memorandum shall not replace, alter, or modify any term or condition set forth in the Loan Agreement, nor shall it be used to interpret the terms and conditions of the Loan Agreement.

4. This Memorandum may be executed in several counterparts, and all so executed shall constitute one agreement binding on both parties hereto, notwithstanding that both parties are not signatories to the original or same counterpart.

IN WITNESS WHEREOF, City and Developer have entered into this Memorandum as of the date first set forth above.

PROMISSORY NOTE
(Asteria Flats)

$5,000,000 Rancho Cordova, California
June ___, 2026

FOR VALUE RECEIVED, the undersigned RANCHO CORDOVA OWNER LP, a California limited partnership ("Borrower"), hereby promises to pay to the order of the City of Rancho Cordova, a California municipal corporation ("Holder"), 2729 Prospect Park Drive, Rancho Cordova, California, 95670, the principal amount of Five Million Dollars ($5,000,000), plus interest thereon pursuant to Section 2 below (the "City Loan").

1. Borrower's Obligation. This promissory note (the "Note") evidences Borrower's obligation to pay Holder the principal amount of up to Five Million Dollars ($5,000,000) with interest for the funds loaned to Borrower by Holder pursuant to the Loan Agreement between Borrower and Holder dated June ___, 2026 (the "Loan Agreement"). All capitalized terms not otherwise defined in this Note shall have the meanings set forth in the Loan Agreement.

2. Interest. The City Loan bears simple interest from the date of this Note at a rate of three percent (3%) per annum on the outstanding balance, until full repayment of the outstanding balance of the City Loan.

3. Term and Repayment Requirements. Principal and interest under this Note is due and payable as follows:

a. Annual Payments. No payments shall be required with respect to the period commencing as the date hereof ending on the end of the calendar year in which there occurs the fifteenth (15^{th}) anniversary of the date on which the Project receives its final permanent certificate of occupancy. Thereafter the Borrower shall make payments of principal and interest to the Holder in the following amounts: Twenty-Five Percent (25%) of Residual Receipts for each of the following fifteen (15) years; Thirty-Five Percent (35%) of Residual Receipts for each of the following ten (10) years; Forty-Five Percent (45%) of Residual Receipts for each of the following ten (10) years; and Fifty Percent (50%) of Residual Receipts for each of the following five (5) years. Such annual payments shall be due and payable in arrears no later than April 1 of each year with respect to the previous calendar year. The Borrower shall provide the Holder with any documentation reasonably requested by the Holder to substantiate the Borrower's determination of Residual Receipts. Repayments shall be credited first to interest, then to principal.

b. Definitions.

(i) "Residual Receipts" means the excess of annual Operating Revenues over annual Operating Expenses for the Project.

(ii) "Operating Revenues" means all income derived from the Project, and includes, without limitation: (i) rents; (ii) rent subsidy payments received on behalf of tenants; and (iii) receipts from laundry, parking, vending, or other services in which a fee is charged.

(iii) "Operating Expenses" means all direct costs and expenses necessary to operate the Project including: (1) debt service on any loans secured by the Property as described in the Final Financing Plan or otherwise approved by Holder, provided that such loans have been used to develop or improve the Project (or to refinance loans used for development or improvement of the Project); (2) resident service program and property management fees and costs; (3) property taxes and assessments (if any); (4) insurance premiums; (5) maintenance and repair; (6) reasonable payments to reserves for operating contingencies, replacement of capital items, and other reserve uses in such amounts as are required by the loans described in paragraph (1) and/or by Borrower's tax credit investor limited partner; (7) deferred developer fee to the Borrower or its affiliate for development services for the Project in such amount as set forth in the Financing Plan as such amount may be updated by the final cost certification upon completion of construction; (8) credit adjuster payments, limited partner loans, and developer loans all as set forth in the Partnership Agreement; (9) advertising, legal, accounting, security and other general office administration expenses; (10) payroll, benefits and payroll taxes, (11) utility costs; and (12) payments for partnership management fee, asset management fees, and other fees payable to a partner of the Partnership pursuant to the Partnership Agreement in such amounts as are set forth in the Financing Plan, including any annual inflationary increases included in the Financing Plan.

c. Payment in Full. Borrower shall pay all outstanding principal and accrued interest on the City Loan, in full, on the earliest to occur of (i) an Event of Developer Default that continues beyond all applicable notice and cure periods for which the Holder exercises its right to cause the City Loan indebtedness to become immediately due and payable, and (ii) the date that is the fifty-fifth (55^{th}) anniversary of the date that a final certificate of occupancy is issued by the City of Rancho Cordova to certify that the construction of the Project is complete and the Project may be legally occupied (the "Completion Date"); provided, however, if a record of the Completion Date cannot be located or established, the City Loan is due and payable on the fifty-seventh (57^{th}) anniversary of the date of this Note.

4. Disbursements. All proceeds of the City Loan shall be disbursed to or on behalf of the Borrower as of the closing date.

5. Prepayment. Borrower may prepay the City Loan in full or in part at any time without penalty or fee.

6. Assumption. This Note shall not be assumable by the successors and assigns of Borrower without the prior written consent of Holder (which shall not be unreasonably withheld, conditioned, or delayed) unless the assignment complies with Article VIII of the Loan Agreement. Holder may assign its interest in the Note to a public agency or nonprofit entity in Holder's upon City's written approval .

7. Security. This Note shall be secured by the City Loan Deed of Trust on the Property, wherein Borrower is the trustor and Holder is the beneficiary. The terms of the City Loan Deed of Trust are hereby incorporated into this Note and made a part hereof.

8. Terms of Payment.

(a) All payments due under this Note shall be paid in currency of the United States of America, which at the time of payment is lawful for the payment of public and private debts.

(b) All payments on this Note shall be paid to Holder at the address set forth in the first paragraph of this Note, or to such other place as Holder of this Note may from time to time designate.

(c) All payments on this Note shall be without expense to Holder, and Borrower agrees to pay all costs and expenses, including re-conveyance fees and reasonable attorney's fees of Holder, incurred in connection with the payment of this Note and the release of any security hereof.

(d) Notwithstanding any other provision of this Note, or any instrument securing the obligations of Borrower under this Note, if, for any reason whatsoever, the payment of any sums by Borrower pursuant to the terms of this Note would result in the payment of interest which would exceed the amount that Holder may legally charge under the laws of the State of California, then the amount by which payments exceed the lawful interest rate shall automatically be deducted from the principal balance owing on this Note, so that in no event shall Borrower be obligated under the terms of this Note to pay any interest which would exceed the lawful rate.

(e) Notwithstanding anything to the contrary in the City Loan Documents, the Borrower shall be permitted to refinance any Senior Financing (as defined in the Loan Agreement)(each a "Refinanced Loan"), and the Holder agrees that the City Loan Deed of Trust and other documents evidencing and/or securing the City Loan shall remain subordinate to any such Refinanced Loan.

(f) Notwithstanding anything to the contrary in the City Loan Documents, The indebtedness evidenced by this Note and City Loan Deed of Trust is and shall be subordinate in right of payment to the prior payment in full of the indebtedness evidenced by (a) that certain Promissory Note (USB dated as of _____, 2026 (the "Senior Note A") in the original principal amount of [$32,000,000] issued by Borrower, and payable to the U.S. Bank National Association ("US Bank"); and (b) that certain Promissory Note (Deutsche Bank) dated as of _____, 2026 (the "Senior Note B" and together with Senior Note A, collectively, the "Senior Note") in the original principal amount of [$56,000,000] issued Borrower, and payable the Deutsche Bank AG, New York Branch ("Deutsche Bank", and together with US Bank, "Senior Lender"), or order, to the extent and in the manner provided in that certain Subordination Agreement (City) dated a of _____, 2026, (the "Subordination Agreement") by and among the payee of this Note, Borrower, and U.S. Bank

National Association, in its capacity as "Administrative Agent" for Senior Lender (in such capacity, "Administrative Agent") and recorded in the Official Records of Sacramento County, California ("Official Records"). The Senior Note is secured by that certain Construction Deed of Trust, Assignment of Leases and Rents, Security Agreement and Fixture Filing dated as of _____, 2026 (the "Senior Deed of Trust"), executed by Borrower for the benefit of Administrative Agent, and recorded in the Official Records. The City Deed of Trust (the "Subordinate Deed of Trust") securing this Note is and shall be subject and subordinate in all respects to the liens, terms, covenants and conditions of the deed of trusts securing the Senior Note as more fully set forth in the Subordination Agreement. The rights and remedies of the payee and each subsequent holder of this Note under the Subordinate Deed of Trust securing this Note are subject to the restrictions and limitations set forth in the Subordination Agreement. Each subsequent holder of this Note shall be deemed, by virtue of such holder's acquisition of the Note, to have agreed to perform and observe all of the terms, covenants and conditions to be performed or observed by the "Subordinate Lender" named under the Subordination Agreement.

9. Default.

(a) Any of the following shall constitute an event of default under this Note:

(i) Any failure to pay, in full, any payment required under this Note when due following written notice by the Holder of such failure and ten (10) business days opportunity to cure;

(ii) Any failure in the performance by Borrower of any material term, condition, provision or covenant set forth in this Note and Borrower's failure to cure such default within thirty (30) days of receiving written notice thereof from the Holder; and

(iii) The occurrence of any Borrower event of default under the Loan Agreement, the City Loan Deed of Trust, the Regulatory Agreement, or other instrument securing the obligations of Borrower under this Note or under any other promissory notes hereafter issued by Borrower to Holder pursuant to the Loan Agreement or the Deed of Trust (the "City Loan Documents"), subject to notice and cure periods, if any, set forth therein.

(b) Upon the occurrence of one or more of the foregoing events of default, the entire unpaid principal balance, together with all interest thereon, and together with all other sums then payable under this Note and the Deed of Trust shall at the option of Holder become immediately due and payable upon written notice by Holder to Borrower without further demand.

(c) Holder's failure to exercise the remedy set forth in Subsection 9(b) above or any other remedy provided by law upon the occurrence of one or more of the foregoing events of default shall not constitute a waiver of the right to exercise any remedy at any subsequent time in respect to the same or any other default. The acceptance by Holder hereof of

any payment which is less than the total of all amounts due and payable at the time of such payment shall not constitute a waiver of the right to exercise any of the foregoing remedies or options at that time or at any subsequent time, or nullify any prior exercise of any such remedy or option, without the express consent of Holder, except as and to the extent otherwise provided by law.

(d) Notwithstanding anything herein to the contrary, Holder hereby agrees that any cure of any default made or tendered by Limited Partner (as defined in the Loan Agreement) shall be deemed a cure by Borrower and shall be accepted or rejected on the same basis as if made or tendered by Borrower. Copies of all notices which are sent hereunder to Borrower shall be sent to the Limited Partner at the address set forth in the Loan Agreement and to the Senior Lenders (as such addresses may be updated from time to time):

10. Non-Recourse. The Borrower shall not have any direct or indirect personal liability for payment of the principal of, or interest on, the City Loan or the performance of the covenants of the Borrower under the City Loan Deed of Trust and Regulatory Agreement. The sole recourse of the Holder with respect to the principal of, or interest on, this Note and defaults by the Borrower in the performance of its covenants under the City Deed of Trust and Regulatory Agreement shall be to the property described in the City Deed of Trust. Notwithstanding the foregoing, however, the foregoing shall not in any way affect any rights Holder may have (as a secured party or otherwise) hereunder or under this Note and City Loan Deed of Trust to recover directly from Borrower any amounts, or any funds, damages or costs (including without limitation reasonable attorneys' fees and costs) incurred by Holder as a result of fraud, intentional misrepresentation or bad faith, waste, and any costs and expenses incurred by Holder in connection therewith (including without limitation reasonable attorneys' fees and costs).

11. Waivers.

(a) Borrower hereby waives diligence, presentment, protest and demand, and notice of protest, notice of demand, notice of dishonor and notice of non-payment of this Note. Borrower expressly agrees that this Note or any payment hereunder may be extended from time to time, and that Holder may accept further security or release any security for this Note, all without in any way affecting the liability of Borrower.

(b) Any extension of time for payment of this Note or any installment hereof made by agreement of Holder with any person now or hereafter liable for payment of this Note shall not operate to release, discharge, modify, change or affect the original liability of Borrower under this Note, either in whole or in part.

(c) The obligations of Borrower under this Note shall be absolute and Borrower waives any and all rights to offset, deduct or withhold any payments or charges due under this Note for any reason whatsoever.

12. Miscellaneous Provisions.

(a) All notices to Holder, Limited Partner, or Borrower shall be given in the manner and at the addresses set forth in the Loan Agreement, or to such addresses as Holder and Borrower may therein designate.

(b) Borrower promises to pay all costs and expenses, including reasonable attorney's fees, incurred by Holder in the enforcement of the provisions of this Note, regardless of whether suit is filed to seek enforcement.

(c) This Note may not be changed orally, but only by an agreement in writing signed by the party against whom enforcement of any waiver, change, modification or discharge is sought.

(d) This Note shall be governed by and construed in accordance with the laws of the State of California.

(e) The times for the performance of any obligations hereunder shall be strictly construed, time being of the essence, subject to Force Majeure.

(f) This document, together with the City Loan Documents, contains the entire agreement between the parties as to the City Loan. It may not be modified except upon written consent of the parties.

(g) Section 13.19 of the Loan Agreement is hereby incorporated with the same force and effect as if set forth herein in its entirety.

[SIGNATURES TO FOLLOW ON NEXT PAGE]

DEED OF TRUST WITH ASSIGNMENT OF RENTS, SECURITY AGREEMENT, AND FIXTURE FILING
(Asteria Flats)

THIS DEED OF TRUST WITH ASSIGNMENT OF RENTS, SECURITY AGREEMENT AND FIXTURE FILING ("Deed of Trust") is made as of June __, 2026, by and among RANCHO CORDOVA OWNER LP, a California limited partnership ("Trustor"), Old Republic National Title Insurance Company, a California corporation ("Trustee"), and the City of Rancho Cordova, a California municipal corporation ("Beneficiary").

FOR GOOD AND VALUABLE CONSIDERATION, including the indebtedness herein recited and the trust herein created, the receipt of which is hereby acknowledged, Trustor hereby irrevocably grants, transfers, conveys and assigns to Trustee, IN TRUST, WITH POWER OF SALE, for the benefit and security of Beneficiary, under and subject to the terms and conditions hereinafter set forth, the property located in the County of Sacramento, State of California, that is described in the attached Exhibit A, incorporated herein by this reference (the "Property").

TOGETHER WITH all interest, estates or other claims, both in law and in equity which Trustor now has or may hereafter acquire in the Property and the rents;

TOGETHER WITH all easements, rights-of-way and rights used in connection therewith or as a means of access thereto, including (without limiting the generality of the foregoing) all tenements, hereditaments and appurtenances thereof and thereto;

TOGETHER WITH any and all buildings and improvements of every kind and description now or hereafter erected thereon, and all property of the Trustor now or hereafter affixed to or placed upon the Property;

TOGETHER WITH all building materials and equipment now or hereafter delivered to said property and intended to be installed therein;

TOGETHER WITH all right, title and interest of Trustor, now owned or hereafter acquired, in and to any land lying within the right-of-way of any street, open or proposed,

adjoining the Property, and any and all sidewalks, alleys and strips and areas of land adjacent to or used in connection with the Property;

TOGETHER WITH all estate, interest, right, title, other claim or demand, of every nature, in and to such property, including the Property, both in law and in equity, including, but not limited to, all deposits made with or other security given by Trustor to utility companies, the proceeds from any or all of such property, including the Property, claims or demands with respect to the proceeds of insurance in effect with respect thereto, which Trustor now has or may hereafter acquire, any and all awards made for the taking by eminent domain or by any proceeding or purchase in lieu thereof of the whole or any part of such property, including without limitation, any awards resulting from a change of grade of streets and awards for severance damages to the extent Beneficiary has an interest in such awards for taking as provided in Paragraph 4.1 herein;

TOGETHER WITH all of Trustor's interest in all articles of personal property or fixtures now or hereafter attached to or used in and about the building or buildings now erected or hereafter to be erected on the Property which are necessary to the complete and comfortable use and occupancy of such building or buildings for the purposes for which they were or are to be erected, including all other goods and chattels and personal property as are ever used or furnished in operating a building, or the activities conducted therein, similar to the one herein described and referred to, and all renewals or replacements thereof or articles in substitution therefor, whether or not the same are, or shall be attached to said building or buildings in any manner; and

TOGETHER WITH all of Trustor's interest in all building materials, fixtures, equipment, work in process and other personal property to be incorporated into the Property; all goods, materials, supplies, fixtures, equipment, machinery, furniture and furnishings, signs and other personal property now or hereafter appropriated for use on the Property, whether stored on the Property or elsewhere, and used or to be used in connection with the Property; all rents, issues and profits, and all inventory, accounts, accounts receivable, contract rights, general intangibles, chattel paper, instruments, documents, notes drafts, letters of credit, insurance policies, insurance and condemnation awards and proceeds, trade names, trademarks and service marks arising from or related to the Property and any business conducted thereon by Trustor; all replacements, additions, accessions and proceeds; and all books, records and files relating to any of the foregoing.

All of the foregoing, together with the Property, is herein referred to as the "Security." To have and to hold the Security together with acquittances to the Trustee, its successors and assigns forever.

FOR THE PURPOSE OF SECURING THE FOLLOWING OBLIGATIONS (the "Secured Obligations"):

(a) Payment to Beneficiary of all sums at any time owing under or in connection with the Note (defined in Section 1.3 below) until paid or cancelled and any other amounts owing under the Loan Documents (defined in Section 1.2 below). Said principal and other payments shall be due and payable as provided in the Note or other Loan Documents, as applicable. The

Note and all its terms are incorporated herein by reference, and this conveyance shall secure any and all extensions thereof, however evidenced;

(b) Payment of any sums advanced by Beneficiary to protect the Security pursuant to the terms and provisions of this Deed of Trust following a breach of Trustor's obligation to advance said sums and the expiration of any applicable cure period, with interest thereon as provided herein;

(c) Performance of every obligation, covenant or agreement of Trustor contained herein and in the Loan Documents; and

(d) All modifications, extensions and renewals of any of the Secured Obligations (including without limitation, (i) modifications, extensions or renewals at a different rate of interest, or (ii) deferrals or accelerations of the required principal payment dates or interest payment dates or both, in whole or in part), however evidenced, whether or not any such modification, extension or renewal is evidenced by a new or additional promissory note or notes.

AND TO PROTECT THE SECURITY OF THIS DEED OF TRUST, TRUSTOR COVENANTS AND AGREES:

ARTICLE 1
DEFINITIONS

Terms used but otherwise not defined herein shall have the meaning ascribed in the Loan Agreement (defined below). In addition to the terms defined elsewhere in this Deed of Trust, the following terms shall have the following meanings in this Deed of Trust:

Section 1.1 The term "Loan Agreement" means that certain Loan Agreement between Trustor and Beneficiary, dated June ___, 2026, providing for the Beneficiary to loan to Trustor Five Million Dollars ($5,000,000).

Section 1.2 The term "Loan Documents" means this Deed of Trust, the Note, the Loan Agreement, the Regulatory Agreement, and any other debt, loan or security instruments between Trustor and the Beneficiary relating to the Property.

Section 1.3 The term "Note" means the Promissory Note in the principal amount of Five Million Dollars ($5,000,000), of even date herewith, executed by Trustor in favor of the Beneficiary, as it may be amended or restated, the payment of which is secured by this Deed of Trust. (A copy of the Note is on file with the Beneficiary and terms and provisions of the Note are incorporated herein by reference.)

Section 1.4 The term "Principal" means the amount required to be paid under the Note.

Section 1.5 The term "Regulatory Agreement" means the Regulatory Agreement and Declaration of Restrictive Covenants of even date herewith by and between the Beneficiary and the Trustor.

ARTICLE 2
MAINTENANCE AND MODIFICATION OF THE PROPERTY
AND SECURITY

Section 2.1 Maintenance and Modification of the Property by Trustor.

The Trustor agrees that at all times prior to full payment and performance of the Secured Obligations, the Trustor will, at the Trustor's own expense, maintain, preserve and keep the Security or cause the Security to be maintained and preserved in good condition, reasonable wear and tear excepted. The Trustor will from time to time make or cause to be made all repairs, replacements and renewals deemed proper and necessary by it. The Beneficiary shall have no responsibility in any of these matters or for the making of improvements or additions to the Security.

Trustor agrees to pay fully and discharge (or cause to be paid fully and discharged) all claims for labor done and for material and services furnished in connection with the Security, diligently to file or procure the filing of a valid notice of cessation upon the event of a cessation of labor on the work or construction on the Security for a continuous period of thirty (30) days or more, and to take all other reasonable steps to forestall the assertion of claims of lien against the Security of any part thereof. Trustor irrevocably appoints, designates and authorizes Beneficiary as its agent (said agency being coupled with an interest) with the authority, but without any obligation, to file for record any notices of completion or cessation of labor or any other notice that Beneficiary deems necessary or desirable to protect its interest in and to the Security or the Loan Documents; provided, however, that Beneficiary shall exercise its rights as agent of Trustor only in the event that Trustor shall fail to take, or shall fail to diligently continue to take, those actions as hereinbefore provided.

During the continuance of an Event of Default under this Deed of Trust, upon demand by Beneficiary, Trustor shall make or cause to be made such demands or claims as Beneficiary shall specify upon laborers, materialmen, subcontractors or other persons who have furnished or claim to have furnished labor, services or materials in connection with the Security. Nothing herein contained shall require Trustor to pay any claims for labor, materials or services which Trustor in good faith disputes and is diligently contesting provided that Trustor shall, within thirty (30) days after the filing of any claim of lien, record in the Office of the Recorder of Sacramento County, a surety bond in an amount 1 and 1/2 times the amount of such claim item to protect against a claim of lien.

Section 2.2 Granting of Easements.

Trustor may not grant easements, licenses, rights-of-way or other rights or privileges in the nature of easements with respect to any property or rights included in the Security except those required or desirable for installation and maintenance of public utilities including, without

limitation, water, gas, electricity, sewer, telephone and telegraph, or those otherwise required by law, and as approved, in writing, by Beneficiary.

Section 2.3 Assignment of Rents.

As part of the consideration for the indebtedness evidenced by the Note, Trustor hereby absolutely and unconditionally assigns and transfers to Beneficiary all the rents and revenues of the Property including those now due, past due, or to become due by virtue of any lease or other agreement for the occupancy or use of all or any part of the Property, regardless of to whom the rents and revenues of the Property are payable. Trustor hereby authorizes Beneficiary or Beneficiary's agents to collect the aforesaid rents and revenues and hereby directs each tenant of the Property to pay such rents to Beneficiary or Beneficiary's agents; provided, however, that prior to written notice given by Beneficiary to Trustor of an Event of Default by Trustor, Trustor shall collect and receive all rents and revenues of the Property as trustee for the benefit of Beneficiary and Trustor to apply the rents and revenues so collected to the Secured Obligations with the balance, so long as no Event of Default is continuing, to the account of Trustor, it being intended by Trustor and Beneficiary that this assignment of rents constitutes an absolute assignment and not an assignment for additional security only. Upon delivery of written notice by Beneficiary to Trustor of an Event of Default by Trustor, and without the necessity of Beneficiary entering upon and taking and maintaining full control of the Property in person, by agent or by a court-appointed receiver, Beneficiary shall immediately be entitled to possession of all rents and revenues of the Property as specified in this Section 2.3 as the same becomes due and payable, including but not limited to rents then due and unpaid, and all such rents shall immediately upon delivery of such notice be held by Trustor as trustee for the benefit of Beneficiary only; provided, however, that the written notice by Beneficiary to Trustor of the Event of Default by Trustor shall contain a statement that Beneficiary exercises its rights to such rents. Trustor agrees that commencing upon delivery of such written notice of Trustor's Event of Default by Beneficiary to Trustor, each tenant of the Property shall make such rents payable to and pay such rents to Beneficiary or Beneficiary's agents on Beneficiary's written demand to each tenant therefor, delivered to each tenant personally, by mail or by delivering such demand to each rental unit, without any liability on the part of said tenant to inquire further as to the existence of an Event of Default by Trustor.

Trustor hereby covenants that Trustor has not executed any prior assignment of said rents (except in connection with the Loans described in the Financing Plan, that Trustor has not performed, and will not perform, any acts or has not executed and will not execute, any instrument which would prevent Beneficiary from exercising its rights under this Section 2.3, and that at the time of execution of this Deed of Trust, there has been no anticipation or prepayment of any of the rents of the Property for more than two (2) months prior to the due dates of such rents. Trustor covenants that Trustor will not hereafter collect or accept payment of any rents of the Property more than two (2) months prior to the due dates of such rents. Trustor further covenant that Trustor will execute and deliver to Beneficiary such further assignments of rents and revenues of the Property as Beneficiary may from time to time request.

Upon Trustor's breach of any covenant or agreement of Trustor in the Loan Documents beyond any applicable notice and cure periods, Beneficiary may in person, by agent or by a court-appointed receiver, regardless of the adequacy of Beneficiary's security, enter upon and

take and maintain full control of the Property in order to perform all acts necessary and appropriate for the operation and maintenance thereof including, but not limited to, the execution, cancellation or modification of leases, the collection of all rents and revenues of the Property, the making of repairs to the Property and the execution or termination of contracts providing for the management or maintenance of the Property, all on such terms as are deemed best to protect the security of this Deed of Trust. In the event Beneficiary elects to seek the appointment of a receiver for the Property upon Trustor's breach of any covenant or agreement of Trustor in this Deed of Trust, Trustor hereby expressly consents to the appointment of such receiver. Beneficiary or the receiver shall be entitled to receive a reasonable fee for so managing the Property.

All rents and revenues collected subsequent to delivery of written notice by Beneficiary to Trustor of the breach by Trustor of any covenant or agreement of Trustor in the Loan Documents shall be applied first to the costs, if any, of taking control of and managing the Property and collecting the rents, including, but not limited to, attorney's fees, receiver's fees, premiums on receiver's bonds, costs of repairs to the Property, premiums on insurance policies, taxes, assessments and other charges on the Property, and the costs of discharging any obligation or liability of Trustor as lessor or landlord of the Property and then to the sums secured by this deed of Trust. Beneficiary or the receiver shall have access to the books and records used in the operation and maintenance of the Property and shall be liable to account only for those rents actually received. Beneficiary shall not be liable to Trustor, anyone claiming under or through Trustor or anyone having an interest in the Property by reason of anything done or left undone by Beneficiary under this Section 2.3 except resulting from the gross negligence or willful misconduct of Beneficiary or its agents.

If the rents of the Property are not sufficient to meet the costs, if any, of taking control of and managing the Property and collecting the rents, any funds expended by Beneficiary for such purposes shall become part of the Secured Obligations pursuant to Section 3.3 hereof. Unless Beneficiary and Trustor agree in writing to other terms of payment, such amounts shall be payable upon notice from Beneficiary to Trustor requesting payment thereof and shall bear interest from the date of disbursement at the rate stated in Section 3.3.

Any entering upon and taking and maintaining of control of the Property by Beneficiary or the receiver and any application of rents as provided herein shall not cure or waive any default hereunder or invalidate any other right or remedy of Beneficiary under applicable law or provided herein. This assignment of rents of the Property shall terminate at such time as this Deed of Trust ceases to secure the Secured Obligations.

ARTICLE 3
TAXES AND INSURANCE; ADVANCES

Section 3.1 Taxes, Other Governmental Charges and Utility Charges.

Trustor shall pay, or cause to be paid, prior to the date of delinquency, all taxes, assessments, charges and levies imposed by any public authority or utility company which are or may become a lien affecting the Security or any part thereof; provided, however, that Trustor

shall not be required to pay and discharge any such tax, assessment, charge or levy so long as (a) the legality thereof shall be promptly and actively contested in good faith and by appropriate proceedings, and (b) Trustor maintains reserves adequate to pay any liabilities contested pursuant to this Section 3.1. With respect to taxes, special assessments or other similar governmental charges, Trustor shall pay such amount in full prior to the attachment of any lien therefor on any part of the Security; provided, however, if such taxes, assessments or charges may be paid in installments, Trustor may pay in such installments. Except as provided in clause (b) of the first sentence of this paragraph, the provisions of this Section 3.1 shall not be construed to require that Trustor maintain a reserve account, escrow account, impound account or other similar account for the payment of future taxes, assessments, charges and levies.

In the event that Trustor shall fail to pay any of the foregoing items required by this Section to be paid by Trustor, Beneficiary may (but shall be under no obligation to) pay the same, after the Beneficiary has notified the Trustor of such failure to pay and the Trustor fails to fully pay such items within fifteen (15) days after receipt of such notice. Any amount so advanced therefor by Beneficiary, together with interest thereon from the date of such advance at the maximum rate permitted by law, shall become part of the Secured Obligations secured hereby, and Trustor agrees to pay all such amounts.

Section 3.2 Provisions Respecting Insurance.

Trustor agrees to provide insurance conforming in all respects to that required under the Loan Documents during the course of construction and following completion, and at all times until all amounts secured by this Deed of Trust have been paid and all Secured Obligations secured hereunder fulfilled, and this Deed of Trust reconveyed.

All such insurance policies and coverages shall be maintained at Trustor's sole cost and expense. Certificates of insurance for all of the above insurance policies, showing the same to be in full force and effect, shall be delivered to the Beneficiary upon demand therefor at any time prior to Trustor's satisfaction of the Secured Obligations.

Section 3.3 Advances.

In the event the Trustor shall fail to maintain the full insurance coverage required by this Deed of Trust or shall fail to keep the Security in accordance with the Loan Documents, the Beneficiary, after at least fifteen (15) days prior notice to Trustor, may (but shall be under no obligation to) take out the required policies of insurance and pay the premiums on the same or may make such repairs or replacements as are necessary and provide for payment thereof; and all amounts so advanced therefor by the Beneficiary shall become part of the Secured Obligations (together with interest as set forth below) and shall be secured hereby, which amounts the Trustor agrees to pay on the demand of the Beneficiary, and if not so paid, shall bear interest from the date of the advance at the lesser of ten percent (10%) per annum or the maximum rate permitted by law.

ARTICLE 4
DAMAGE, DESTRUCTION OR CONDEMNATION

Section 4.1 Awards and Damages.

All judgments, awards of damages, settlements and compensation made in connection with or in lieu of (1) taking of all or any part of or any interest in the Property by or under assertion of the power of eminent domain, (2) any damage to or destruction of the Property or in any part thereof by insured casualty, and (3) any other injury or damage to all or any part of the Property (collectively, the "Funds") shall be used to repair or restore the Property, but if the property cannot be repaired or restored such Funds are hereby assigned to and shall be paid to the Beneficiary by a check made payable to the Beneficiary. The Beneficiary is authorized and empowered (but not required) to collect and receive any Funds and is authorized to apply them in whole or in part upon any indebtedness or obligation secured hereby, in such order and manner as the Beneficiary shall determine at its sole option. The Beneficiary shall be entitled to settle and adjust all claims under insurance policies provided under this Deed of Trust and may deduct and retain from the proceeds of such insurance the amount of all expenses incurred by it in connection with any such settlement or adjustment. All or any part of the amounts so collected and recovered by the Beneficiary may be released to Trustor upon such conditions as the Beneficiary may impose for its disposition. Application of all or any part of the Funds collected and received by the Beneficiary or the release thereof shall not cure or waive any default under this Deed of Trust. The rights of the Beneficiary under this Section 4.1 are subject to the rights of any senior mortgage lender. Notwithstanding the foregoing, the Beneficiary shall release the Funds to Trustor to be used to reconstruct the improvements on the Property provided that Beneficiary reasonably determines that Trustor (taking into account the Funds and any other amounts made available to Trustor) has sufficient funds to rebuild the improvements in substantially the form they existed prior to the casualty or condemnation.

ARTICLE 5
AGREEMENTS AFFECTING THE PROPERTY; FURTHER ASSURANCES; PAYMENT OF PRINCIPAL AND INTEREST

Section 5.1 Other Agreements Affecting Property.

The Trustor shall duly and punctually perform all terms, covenants, conditions and agreements binding upon it under the Loan Documents.

Section 5.2 Agreement to Pay Attorneys' Fees and Expenses.

In the event of any Event of Default (as defined in Section 7.1) hereunder, and if the Beneficiary should employ attorneys or incur other expenses for the collection of amounts due or the enforcement of performance or observance of an obligation or agreement on the part of the Trustor in this Deed of Trust, the Trustor agrees that it will, on demand therefor, pay to the Beneficiary the reasonable fees of such attorneys and such other reasonable expenses so incurred by the Beneficiary; and any such amounts paid by the Beneficiary shall be added to the Secured

Obligations, and shall bear interest from the date such expenses are incurred at the lesser of ten percent (10%) per annum or the maximum rate permitted by law.

Section 5.3 Payment of the Principal.

The Trustor shall pay to the Beneficiary the Principal and any other payments as set forth in the Note in the amounts and by the times set out therein.

Section 5.4 Personal Property.

To the maximum extent permitted by law, the personal property subject to this Deed of Trust shall be deemed to be fixtures and part of the real property and this Deed of Trust shall constitute a fixtures filing under the California Commercial Code. As to any personal property not deemed or permitted to be fixtures, this Deed of Trust shall constitute a security agreement under the California Commercial Code.

Section 5.5 Financing Statement.

The Trustor shall execute and deliver to the Beneficiary such financing statements pursuant to the appropriate statutes, and any other documents or instruments as are required or requested to convey to the Beneficiary a valid perfected security interest in the Security. The Trustor agrees to perform all acts which the Beneficiary may reasonably request so as to enable the Beneficiary to maintain such valid perfected security interest in the Security in order to secure the payment of the Note in accordance with its terms. The Beneficiary is authorized to file a copy of any such financing statement in any jurisdiction(s) as it shall deem appropriate from time to time in order to protect the security interest established pursuant to this instrument.

Section 5.6 Operation of the Security.

The Trustor shall operate the Security (and, in case of a transfer of a portion of the Security subject to this Deed of Trust, the transferee shall operate such portion of the Security) in full compliance with the Loan Documents.

Section 5.7 Inspection of the Security.

At any and all reasonable times upon forty-eight (48) hours' notice, the Beneficiary and its duly authorized agents, attorneys, experts, engineers, accountants and representatives, shall have the right, without payment of charges or fees, to inspect the Security.

Section 5.8 Nondiscrimination.

The Trustor herein covenants by and for itself, its heirs, executors, administrators, and assigns, and all persons claiming under or through them, that there shall be no discrimination against or segregation of, any person or group of persons on account of race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, genetic information, marital status, sex, gender, gender identity, gender expression, age, sexual orientation, or veteran or military status in the sale, lease, sublease, transfer, use, occupancy, tenure or enjoyment of the Security, nor shall the Trustor itself or any person claiming under or

through it establish or permit any such practice or practices of discrimination or segregation with reference to the selection, location, number, use or occupancy of tenants, lessees, subtenants, sublessees or vendees in the Security. The foregoing covenants shall run with the land.

ARTICLE 6
HAZARDOUS WASTE

Trustor shall keep and maintain the Property in compliance with, and shall not cause or permit the Property to be in violation of any federal, state or local laws, ordinances or regulations relating to industrial hygiene or to the environmental conditions ("Environmental Laws") on, under or about the Property including, but not limited to, soil and ground water conditions. Trustor shall not use, generate, manufacture, store or dispose of on, under, or about the Property or transport to or from the Property any flammable explosives, radioactive materials, hazardous wastes, toxic substances or related materials, including without limitation, any substances defined as or included in the definition of "hazardous substances," hazardous wastes," "hazardous materials," or "toxic substances" under any applicable federal or state laws or regulations (collectively referred to hereinafter as "Hazardous Materials") except (x) as expressly permitted under Environmental Laws; (y) such of the foregoing as may be customarily used in construction or operation of a multi-family residential development; or (z) such of the foregoing as was present on the Property prior to Trustor's acquisition of the Property.

Trustor shall immediately advise Beneficiary in writing if at any time it receives written notice of (i) any and all enforcement, cleanup, removal or other governmental or regulatory actions instituted, completed or threatened against Trustor or the Property pursuant to any applicable federal, state or local laws, ordinances, or regulations relating to any Hazardous Materials, ("Hazardous Materials Law"); and (ii) all claims made or threatened by any third party against Trustor or the Property relating to damage, contribution, cost recovery compensation, loss or injury resulting from any Hazardous Materials (the matters set forth in clauses (i) and (ii) above are hereinafter referred to as "Hazardous Materials Claims").

Beneficiary shall have the right to join and participate in, as a party if it so elects, any legal proceedings or actions initiated in connection with any Hazardous Materials Claims. Beneficiary shall have its reasonable out-of-pocket attorneys' fees in connection therewith paid by Trustor, only if Trustor has failed, based on reasonable evidence produced by Beneficiary, to adequately defend such Hazardous Materials Claims. Trustor shall indemnify, defend, and hold harmless Beneficiary and its councilmembers, supervisors, directors, officers, employees, agents, successors and assigns from and against any loss, damage, cost, expense or liability directly or indirectly arising out of or attributable to the use, generation, storage, release, threatened release, discharge, disposal, or presence of Hazardous Materials on, under, or about the Property arising or occurring upon or after the Trustor's acquisition of the Property, including without limitation: (a) all actual, non-consequential damages; (b) the costs of any required or necessary repair, cleanup or detoxification of the Property and the preparation and implementation of any closure, remedial or other required plans; and (c) all reasonable costs and expenses incurred by Beneficiary in connection with clauses (a) and (b), including but not limited to reasonable attorneys' fees and consultant's fees. This indemnification applies whether or not any government agency has issued a cleanup order. Losses, claims, costs, suits, liability, and expenses covered by this indemnification provision include, but are not limited to: (1) losses

attributable to diminution in the value of the Property; (2) loss or restriction of use of rentable space on the Property; (3) adverse effect on the marketing of any rental space on the Property; and (4) penalties and fines levied by, and remedial or enforcement actions of any kind issued by any regulatory agency (including but not limited to the costs of any required testing, remediation, repair, removal, cleanup or detoxification of the Property and surrounding properties). Notwithstanding the foregoing, Trustor's indemnity obligations under this paragraph shall not apply with respect to any loss, damage, cost, expense, liability or suit to the extent the same either (i) results from the gross negligence or willful misconduct of the Beneficiary or its agents, or (ii) occurs after the dispossession of the Trustor from the Property pursuant to foreclosure proceedings or a deed in lieu thereof.

Without Beneficiary's prior written consent, which shall not be unreasonably delayed or withheld, Trustor shall not take any environmental measure or other remedial action in response to the presence of any Hazardous Materials on, under or about the Property, nor enter into any settlement agreement, consent decree, or other compromise in respect to any Hazardous Material Claims, which remedial action, settlement, consent decree or compromise might, in Beneficiary's reasonable judgement, impair the value of the Beneficiary's security hereunder; provided, however, that Beneficiary's prior consent shall not be necessary in the event that the presence of Hazardous Materials on, under, or about the Property either poses an immediate threat to the health, safety or welfare of any individual or is of such a nature that an immediate remedial response is necessary and it is not reasonably possible to obtain Beneficiary's consent before taking such action, provided that in such event Trustor shall notify Beneficiary as soon as practicable of any action so taken. Beneficiary agrees not to withhold its consent, where such consent is required hereunder, if (i) a particular remedial action is ordered by a court of competent jurisdiction, (ii) Trustor will or may be subjected to civil or criminal sanctions or penalties if it fails to take a required action; (iii) Trustor establishes to the reasonable satisfaction of Beneficiary that there is no reasonable alternative to such remedial action which would result in less impairment of Beneficiary's security hereunder; or (iv) the action has been agreed to by Beneficiary.

The Trustor hereby acknowledges and agrees that (i) this Article is intended as the Beneficiary's written request for information (and the Trustor's response) concerning the environmental condition of the Property as required by California Code of Civil Procedure Section 726.5, and (ii) each representation and warranty in this Deed of Trust or any of the other Loan Documents (together with any indemnity applicable to a breach of any such representation and warranty) with respect to the environmental condition of the property is intended by the Beneficiary and the Trustor to be an "environmental provision" for purposes of California Code of Civil Procedure Section 736.

In the event that any portion of the Property is determined to be "environmentally impaired" (as that term is defined in California Code of Civil Procedure Section 726.5(e)(3)) or to be an "affected parcel" (as that term is defined in California Code of Civil Procedure Section 726.5(e)(1)), then, without otherwise limiting or in any way affecting the Beneficiary's or the Trustee's rights and remedies under this Deed of Trust, the Beneficiary may elect to exercise its rights under California Code of Civil Procedure Section 726.5(a) to (1) waive its lien on such environmentally impaired or affected portion of the Property and (2) exercise (a) the rights and remedies of an unsecured creditor, including reduction of its claim against the Trustor to

judgment, and (b) any other rights and remedies permitted by law. For purposes of determining the Beneficiary's right to proceed as an unsecured creditor under California Code of Civil Procedure Section 726.5(a), the Trustor shall be deemed to have willfully permitted or acquiesced in a release or threatened release of hazardous materials, within the meaning of California Code of Civil Procedure Section 726.5(d)(1), if the release or threatened release of hazardous materials was knowingly or negligently caused or contributed to by any lessee, occupant, or user of any portion of the Property and the Trustor knew or should have known of the activity by such lessee, occupant, or user which caused or contributed to the release or threatened release. All costs and expenses, including (but not limited to) attorneys' fees, incurred by the Beneficiary in connection with any action commenced under this paragraph, including any action required by California Code of Civil Procedure Section 726.5(b) to determine the degree to which the Property is environmentally impaired, plus interest thereon at the default rate specified in the Loan Agreement until paid, shall be added to the indebtedness secured by this Deed of Trust and shall be due and payable to the Beneficiary upon its demand made at any time following the conclusion of such action.

ARTICLE 7 EVENTS OF DEFAULT AND REMEDIES

Section 7.1 Events of Default.

The following shall constitute events of default ("Events of Default") following the expiration of any applicable notice and cure periods: (1) failure to make any payment to be paid by Trustor under the Loan Documents; (2) failure to observe or perform any of Trustor's other covenants, agreements or obligations under the Loan Documents, including, without limitation, the provisions concerning discrimination; (3) failure to make any payment or observe or perform any of Trustor's other covenants, agreements, or obligations under any other debt instrument or regulatory agreement secured by the Property, which default shall not be cured within the times and in the manner provided therein; or (4) a default is declared under the Approved Financing by the lender of such Approved Financing, subject to any notice and cure rights. Notwithstanding anything to the contrary contained herein, Beneficiary hereby agrees that any cure of any default made or tendered by Trustor's Limited Partner shall be deemed a cure by the Trustor and shall be accepted or rejected on the same basis as if made or tendered by Trustor. Copies of all notices which are sent to Trustor hereunder shall be sent to Limited Partner at the address set forth in the Loan Agreement.

Section 7.2 Acceleration of Maturity.

If an Event of Default shall have occurred and be continuing, then at the option of the Beneficiary, the amount of any payment related to the Event of Default and all unpaid Secured Obligations shall immediately become due and payable, upon written notice by the Beneficiary to the Trustor (or automatically where so specified in the Loan Documents), and no omission on the part of the Beneficiary to exercise such option when entitled to do so shall be construed as a waiver of such right.

Section 7.3 The Beneficiary's Right to Enter and Take Possession.

If an Event of Default shall have occurred and be continuing, the Beneficiary may:

(a) Either in person or by agent, with or without bringing any action or proceeding, or by a receiver appointed by a court, and without regard to the adequacy of its security, enter upon the Security and take possession thereof (or any part thereof) and of any of the Security, in its own name or in the name of Trustee, and do any acts which it deems necessary or desirable to preserve the value or marketability of the Property, or part thereof or interest therein, increase the income therefrom or protect the security thereof. The entering upon and taking possession of the Security shall not cure or waive any Event of Default or Notice of Sale (as defined below) hereunder or invalidate any act done in response to such Event of Default or pursuant to such Notice of Sale, and, notwithstanding the continuance in possession of the Security, Beneficiary shall be entitled to exercise every right provided for in this Deed of Trust, or by law upon occurrence of any Event of Default, including the right to exercise the power of sale;

(b) Commence an action to foreclose this Deed of Trust as a mortgage, appoint a receiver, or specifically enforce any of the covenants hereof;

(c) Deliver to Trustee a written declaration of default and demand for sale, and a written notice of default and election to cause Trustor's interest in the Security to be sold ("Notice of Sale"), which notice Trustee or Beneficiary shall cause to be duly filed for record in the Official Records of Sacramento County; or

(d) Exercise all other rights and remedies provided herein, in the instruments by which the Trustor acquires title to any Security, or in any other document or agreement now or hereafter evidencing, creating or securing the Secured Obligations.

Section 7.4 Foreclosure By Power of Sale.

Should the Beneficiary elect to foreclose by exercise of the power of sale herein contained, the Beneficiary shall deliver to the Trustee the Notice of Sale and shall deposit with Trustee this Deed of Trust which is secured hereby (and the deposit of which shall be deemed to constitute evidence that the Secured Obligations are immediately due and payable), and such receipts and evidence of any expenditures made that are additionally secured hereby as Trustee may require.

(a) Upon receipt of the Notice of Sale from the Beneficiary, Trustee shall cause to be recorded, published and delivered to Trustor such Notice of Sale as then required by law and by this Deed of Trust. Trustee shall, without demand on Trustor, after lapse of such time as may then be required by law and after recordation of such Notice of Sale having been given as required by law, sell the Security, at the time and place of sale fixed by it in the Notice of Sale, whether as a whole or in separate lots or parcels or items as Trustee shall deem expedient and in such order as it may determine unless specified otherwise by the Trustor according to California Civil Code Section 2924, at public auction to the highest bidder, for cash in lawful money of the United States payable at the time of sale. Trustee shall deliver to such purchaser or purchasers thereof its good and sufficient deed or deeds conveying the property so sold, but without any covenant or warranty, express or implied. The recitals in such deed or any matters of facts shall be conclusive proof of the truthfulness thereof. Any person, including, without limitation, Trustor, Trustee or Beneficiary, may purchase at such sale.

(b) After deducting all reasonable costs, fees and expenses of Trustee, including costs of evidence of title in connection with such sale, Trustee shall apply the proceeds of sale to payment of: (i) the unpaid Principal amount of the Note; (ii) all other Secured Obligations owed to Beneficiary under the Loan Documents; (iii) all other sums then secured hereby; and (iv) the remainder, if any, to Trustor.

(c) Trustee may postpone sale of all or any portion of the Property by public announcement at such time and place of sale, and from time to time thereafter, and without further notice make such sale at the time fixed by the last postponement, or may, in its discretion, give a new Notice of Sale.

Section 7.5 Receiver.

If an Event of Default shall have occurred and be continuing, Beneficiary, as a matter of right and without further notice to Trustor or anyone claiming under the Security, and without regard to the then value of the Security or the interest of Trustor therein, shall have the right to apply to any court having jurisdiction to appoint a receiver or receivers of the Security (or a part thereof), and Trustor hereby irrevocably consents to such appointment and waives further notice of any application therefor. Any such receiver or receivers shall have all the usual powers and duties of receivers in like or similar cases, and all the powers and duties of Beneficiary in case of entry as provided herein, and shall continue as such and exercise all such powers until the date of confirmation of sale of the Security, unless such receivership is sooner terminated.

Section 7.6 Remedies Cumulative.

No right, power or remedy conferred upon or reserved to the Beneficiary by this Deed of Trust is intended to be exclusive of any other right, power or remedy, but each and every such right, power and remedy shall be cumulative and concurrent and shall be in addition to any other right, power and remedy given hereunder or now or hereafter existing at law or in equity.

Section 7.7 No Waiver.

(a) No delay or omission of the Beneficiary to exercise any right, power or remedy accruing upon any Event of Default shall exhaust or impair any such right, power or remedy, or shall be construed to be a waiver of any such Event of Default or acquiescence therein; and every right, power and remedy given by this Deed of Trust to the Beneficiary may be exercised from time to time and as often as may be deemed expeditious by the Beneficiary. Beneficiary's express or implied consent to breach, or waiver of, any obligation of the Trustor hereunder shall not be deemed or construed to be a consent to any subsequent breach, or further waiver, of such obligation or of any other obligations of the Trustor hereunder. Failure on the part of the Beneficiary to complain of any act or failure to act or to declare an Event of Default, irrespective of how long such failure continues, shall not constitute a waiver by the Beneficiary of its right hereunder or impair any rights, power or remedies consequent on any Event of Default by the Trustor.

(b) If the Beneficiary (i) grants forbearance or an extension of time for the payment or performance of any Secured Obligation, (ii) takes other or additional security or the payment of any sums secured hereby, (iii) waives or does not exercise any right granted in the Loan Documents, (iv) releases any part of the Security from the lien of this Deed of Trust, or otherwise changes any of the terms, covenants, conditions or agreements in the Loan Documents, (v) consents to the granting of any easement or other right affecting the Security, or (vi) makes or consents to any agreement subordinating the lien hereof, any such act or omission shall not release, discharge, modify, change or affect the original liability under this Deed of Trust, or any other obligation of the Trustor or any subsequent purchaser of the Security or any part thereof, or any maker, co-signer, endorser, surety or guarantor (unless expressly released); nor shall any such act or omission preclude the Beneficiary from exercising any right, power or privilege herein granted or intended to be granted in any Event of Default then made or of any subsequent Event of Default, nor, except as otherwise expressly provided in an instrument or instruments executed by the Beneficiary shall the lien of this Deed of Trust be altered thereby.

Section 7.8 Suits to Protect the Security.

The Beneficiary shall have power to (a) institute and maintain such suits and proceedings as it may deem expedient to prevent any impairment of the Security and the rights of the Beneficiary as may be unlawful or any violation of this Deed of Trust, (b) preserve or protect its interest (as described in this Deed of Trust) in the Security, and (c) restrain the enforcement of or compliance with any legislation or other governmental enactment, rule or order that may be unconstitutional or otherwise invalid, if the enforcement for compliance with such enactment, rule or order would impair the Security thereunder or be prejudicial to the interest of the Beneficiary.

Section 7.9 Trustee May File Proofs of Claim.

In the case of any receivership, insolvency, bankruptcy, reorganization, arrangement, adjustment, composition or other proceedings affecting the Trustor, its creditors or its property, the Beneficiary, to the extent permitted by law, shall be entitled to file such proofs of claim and other documents as may be necessary or advisable in order to have the claims of the Beneficiary allowed in such proceedings and for any additional amount which may become due and payable by the Trustor hereunder after such date.

Section 7.10 Waiver.

The Trustor waives presentment, demand for payment, notice of dishonor, notice of protest and nonpayment, protest, notice of interest on interest and late charges, and diligence in taking any action to collect any Secured Obligations or in proceedings against the Security, in connection with the delivery, acceptance, performance, default, endorsement or guaranty of this Deed of Trust.

ARTICLE 8
MISCELLANEOUS

Section 8.1 Amendments.

This Deed of Trust cannot be waived, changed, discharged or terminated orally, but only by an instrument in writing signed by Beneficiary and Trustor.

Section 8.2 Reconveyance by Trustee.

Upon written request of Beneficiary stating that all Secured Obligations have been paid or forgiven, and all obligations under the Loan Documents have been performed in full, and upon surrender of this Deed of Trust to Trustee for cancellation and retention, and upon payment by Trustor of Trustee's reasonable fees, Trustee shall reconvey the Security to Trustor, or to the person or persons legally entitled thereto.

Section 8.3 Notices.

Formal notices, demands, and communications between the parties shall be sufficiently given if and shall not be deemed given unless (a) dispatched by registered or certified mail, postage prepaid, return receipt requested, (b) delivered by express delivery service, return receipt requested, (c) delivered personally, or (d) sent by electronic mail, provided that any notice sent by electronic mail must be followed by notice delivered under either (a), (b), or (c) within 2 business days. All such notices shall be delivered to the principal office of the parties as follows:

Such written notices, demands and communications may be sent in the same manner to such other addresses as the affected party may from time to time designate by mail as provided in this

Section. Receipt shall be deemed to have occurred on the date shown on a written receipt as the date of delivery or refusal of delivery (or attempted delivery if undeliverable) except that any electronic mail received after 5:00 p.m. shall be deemed to have been received on the next business day.

Section 8.4 Successors and Joint Trustors.

Where an obligation created herein is binding upon Trustor, the obligation shall also apply to and bind any transferee or successors in interest. Where the terms of the Deed of Trust have the effect of creating an obligation of the Trustor and a transferee, such obligation shall be deemed to be a joint and several obligation of the Trustor and such transferee. Where Trustor is more than one entity or person, all obligations of Trustor shall be deemed to be a joint and several obligation of each and every entity and person comprising Trustor.

Section 8.5 Captions.

The captions or headings at the beginning of each Section hereof are for the convenience of the parties and are not a part of this Deed of Trust.

Section 8.6 Invalidity of Certain Provisions.

Every provision of this Deed of Trust is intended to be severable. In the event any term or provision hereof is declared to be illegal or invalid for any reason whatsoever by a court or other body of competent jurisdiction, such illegality or invalidity shall not affect the balance of the terms and provisions hereof, which terms and provisions shall remain binding and enforceable. If the lien of this Deed of Trust is invalid or unenforceable as to any part of the debt, or if the lien is invalid or unenforceable as to any part of the Security, the unsecured or partially secured portion of the debt, and all payments made on the debt, whether voluntary or under foreclosure or other enforcement action or procedure, shall be considered to have been first paid or applied to the full payment of that portion of the debt which is not secured or partially secured by the lien of this Deed of Trust.

Section 8.7 Governing Law.

This Deed of Trust shall be governed by and construed in accordance with the laws of the State of California.

Section 8.8 Gender and Number.

In this Deed of Trust the singular shall include the plural and the masculine shall include the feminine and neuter and vice versa, if the context so requires.

Section 8.9 Deed of Trust, Mortgage.

Any reference in this Deed of Trust to a mortgage shall also refer to a deed of trust and any reference to a deed of trust shall also refer to a mortgage.

Section 8.10 Actions.

Trustor agrees to appear in and defend any action or proceeding purporting to affect the Security.

Section 8.11 Substitution of Trustee.

Beneficiary may from time to time substitute a successor or successors to any Trustee named herein or acting hereunder to execute this Trust. Upon such appointment, and without conveyance to the successor trustee, the latter shall be vested with all title, powers, and duties conferred upon any Trustee herein named or acting hereunder. Each such appointment and substitution shall be made by written instrument executed by Beneficiary, containing reference to this Deed of Trust and its place of record, which, when duly recorded in the proper office of the county or counties in which the Property is situated, shall be conclusive proof of proper appointment of the successor trustee.

Section 8.12 Statute of Limitations.

The pleading of any statute of limitations as a defense to any and all obligations secured by this Deed of Trust is hereby waived to the full extent permissible by law.

Section 8.13 Acceptance by Trustee.

Trustee accepts this Trust when this Deed of Trust, duly executed and acknowledged, is made public record as provided by law. Except as otherwise provided by law the Trustee is not obligated to notify any party hereto of pending sale under this Deed of Trust or of any action of proceeding in which Trustor, Beneficiary, or Trustee shall be a party unless brought by Trustee.

Section 8.14 Tax Credit Provisions.

Notwithstanding anything to the contrary contained herein or in any documents secured by this Deed of Trust or contained in any subordination agreement, the Beneficiary acknowledges and agrees that in the event of a foreclosure or deed-in-lieu of foreclosure (collectively, "Foreclosure") with respect to the Security encumbered by this Deed of Trust, the following rule contained in Section 42(h)(6)(E)(ii) of the Internal Revenue Code of 1986 (26 USC 42 (h)(6)(E)(ii)), as amended, shall apply:

For a period of three (3) years from the date of Foreclosure, with respect to any unit that had been regulated by a Regulatory Agreement with the California Tax Credit Allocation Committee, (i) none of the tenants occupying those units at the time of Foreclosure may be evicted or their tenancy terminated (other than for good cause), (ii) nor may any rent be increased except as otherwise permitted under Section 42 of the Code.

Notwithstanding anything to the contrary in the Loan Documents, the Trustor shall be permitted to refinance any indebtedness secured by the Property under any superior deed of trust in an amount equal to the then outstanding principal balance of such superior loan plus the costs of such refinancing (the “Refinanced Loan”), and the Trustee and Beneficiary agree that this Deed

of Trust and other documents evidencing and/or securing the City Loan shall remain subordinate to any such Refinanced Loan.

[SIGNATURES TO FOLLOW ON NEXT PAGE]

IN WITNESS WHEREOF, Trustor has executed this Deed of Trust as of the day and year first above written.

REGULATORY AGREEMENT AND DECLARATION OF RESTRICTIVE COVENANTS
(Asteria Flats)

This Regulatory Agreement and Declaration of Restrictive Covenants (the "Agreement") is made and entered into as of June __, 2026, by and between the City of Rancho Cordova, a California municipal corporation (the "City"), and Rancho Cordova Owner LP, a California limited partnership (the "Owner").

RECITALS

A. The City and Owner have entered into that certain unrecorded Loan Agreement (the "Loan Agreement"), dated as of June __, 2026, which is incorporated by this reference as if fully set forth herein.

B. Pursuant to the Loan Agreement, City has made a loan to Owner for the construction of an affordable housing development (the "Project") on a site located at the southeast corner of Sunrise Boulevard and Chrysanthy Boulevard, APN 067-0430-018-0000, Rancho Cordova, California, which is comprised of an approximately 11.13 acre parcel which Owner has acquired (the "Property"). The Property is more fully described in Exhibit A attached hereto and incorporated by reference.

C. The Project upon the Completion Date will consist of two hundred thirty six (236) apartment units, together with all associated landscaping, parking and associated improvements, including a clubhouse, fitness center, leasing office, and swimming pool. Sixty (60) of the apartment units will be 1-bedroom units, sixty (60) of the apartment units will be two-bedroom units, fifty-eight (58) of the apartment units will be three-bedroom units, and fifty-eight (58) will be 4-bedroom units.

D. All of the apartment units in the Project, except for two manager's units , will be restricted for occupancy by eligible households with incomes at or below 70% area median

income (AMI), 60% AMI, 50% of AMI and 30% of AMI for a period of fifty-five (55) years from issuance of a final certificate of occupancy for the Project.

E. The Loan Agreement requires the Owner to place specified restrictions upon the use and transfer of the Property in order to ensure continued Project affordability.

F. The Parties intend that the covenants set forth in this Agreement shall run with the land and be binding upon Owner and Owner's successors and assigns as further provided herein.

THEREFORE, City and Owner hereby agree as follows.

ARTICLE 1.
DEFINITIONS

Section 1.1 Definitions. When used in this Agreement, the following terms shall have the respective meanings assigned to them in this Article 1.

(a) "60% Low Income Household" shall mean a household with a Household Income that does not exceed sixty percent (60%) of Area Median Income applicable to Sacramento County, adjusted for family size, as published and periodically updated by HUD .

(b) "60% Low Income Unit" shall mean the Units which pursuant to Section 2.1(c) below, are required to be occupied by 60% Low Income Households.

(c) “70% Low Income Household” shall mean a household with a Household Income which does not exceed seventy percent (70%) of the Area Median Income applicable to Sacramento County, adjusted for family size, as published and periodically updated by HUD as of the date of initial occupancy.

(d) “70% Low Income Unit" shall mean each of the Units which pursuant to Section 2.1(d) below, are required to be occupied by 70% Low Income Households.

(e) "Agreement" shall mean this Regulatory Agreement and Declaration of Restrictive Covenants.

(f) "Affiliate" means any person or entity directly or indirectly, through one or more intermediaries, controlling, controlled by or under common control with Owner which, if Owner is a partnership or limited liability company, shall include each of the constituent members or partners, respectively thereof. The term "control" as used in the immediately preceding sentence, means, with respect to a person that is a corporation, the right to the exercise, directly or indirectly, of more than fifty percent (50%) of the voting rights attributable to the shares of the controlled corporation, and, with respect to a person that is not a corporation, the possession, directly or indirectly, of the power to direct or cause the direction of the management or policies of the controlled person.

(g) "Area Median Income" shall mean the median gross yearly income adjusted for Assumed Household Size as specified herein, in Sacramento County, California, as determined by HUD. In the event that such income determinations are no longer published or are not updated for a period of at least eighteen (18) months, City shall provide the Owner with other income determinations which are reasonably similar with respect to methods of calculation to those previously published by HUD.

(h) "Assumed Household Size" means the household size "adjusted for family size appropriate to the unit" in accordance with the California Tax Credit Allocation Committee rules and regulations.

(i) "City" shall mean the City of Rancho Cordova, a California municipal corporation.

(j) "City Loan" shall mean all funds loaned to Owner pursuant to the Loan Agreement.

(k) "Completion Date" means the date a final certificate of occupancy, or equivalent document is issued by the City to certify that the construction of the Project is complete and the Project may be legally occupied.

(l) "Loan Agreement" shall mean the Loan Agreement entered into by and among the City and Owner and dated of the date hereof.

(m)"Deed of Trust" shall mean the Deed of Trust with Assignment of Rents, Security Agreement and Fixture Filing of even date herewith by and among Owner, as Trustor, Old Republic Title Company, as trustee, and the City as beneficiary, that encumbers Owner's interest in the Property to secure repayment of the City Loan and Owner's performance of the Loan Documents.

(n) “Extremely Low Income Household” shall mean a household with a Household Income which does not exceed thirty percent (30%) of the Area Median Income applicable to Sacramento County, adjusted for family size, as published and periodically updated by HUD at the time of initial occupancy.

(o) “Extremely Low Income Unit" shall mean each of the Units which pursuant to Section 2.1(a) below, are required to be occupied by Extremely Low Income Households.

(p) "Fifteen Year Compliance Period" means the fifteen (15) year compliance period as described in Section 42(i)(1) of the Internal Revenue Code of 1986, as amended.

(q) "Household Income" shall mean the total anticipated annual income of all persons in a household, as calculated in accordance with the California Tax Credit Allocation Committee rules and regulations or pursuant to a successor State housing program that utilizes a reasonably similar method of calculation of adjusted income. In the event that no such program exists, City shall provide the Owner with a reasonably similar method of calculation of gross income as provided in 25 California Code of Regulations Section 6914.

(r) “HUD” means the United States Department of Housing and Urban Development.

(s) "Investor Limited Partner" means U.S. Bancorp Community Development Corporation, a Minnesota corporation, and its successors and assigns.

(t) "Loan Documents" shall mean this Agreement, the Loan Agreement, the Note, and the Deed of Trust.

(u) "Note" shall mean the promissory note from the Owner to City evidencing all or any part of the City Loan.

(v) "Owner" shall mean Rancho Cordova Owner LP, a California limited partnership, and its successors and assigns to the Project.

(w) "Partnership Agreement" means the Second Amended and Restated Agreement of Limited Partnership of the Owner, dated as of June 1, 2026 hereof with this Agreement, as amended from time to time.

(x) "Project" shall mean the Property and the two hundred thirty-six (236) units (inclusive of two (2) managers’ units) to be developed on the Property, and any additional improvements and all landscaping, roads and parking spaces existing thereon, as the same may from time to time exist.

(y) "Property" shall mean the real property described in Exhibit A attached hereto and incorporated herein.

(z) "Rent" shall mean the total of monthly payments by the tenants of a Unit for the following: use and occupancy of the Unit and land and associated facilities, including parking; any separately charged fees or service charges assessed by Owner which are required of all tenants, other than security deposits; the cost of an adequate level of service for utilities paid by the tenant, including garbage collection, sewer, water, electricity, gas and other heating, cooking and refrigeration fuel, but not cable or telephone service; any other interest, taxes, fees or charges for use of the land or associated facilities and assessed by a public or private entity other than Owner, and paid by the Tenant. Utility allowances may be determined by use of the utility allowance published by the local public housing authority or the California Utility Allowance Calculator ("CUAC") model allowed by the California Tax Credit Allocation Committee regulations, if the Property qualifies.

(aa) "Tenant" shall mean a household occupying a Unit.

(bb) "Term" means the term of this Regulatory Agreement, which commences as of the date of this Regulatory Agreement and shall remain in effect until fifty-five (55) years after the final certificate of occupancy for the Project is issued .

(cc) "Units" shall mean the two hundred thirty-six (236) rental units (inclusive of 2 managers’ units) to be constructed by the Owner on the Property.

(dd) "Very Low Income Household" shall mean a household with a Household Income that does not exceed fifty percent (50%) of Area Median Income applicable to Sacramento County, adjusted for family size, as published and periodically updated by HUD as of the time of initial occupancy.

(ee) "Very Low Income Units" shall mean the Units which, pursuant to Section 2.1(b) below, are required to be occupied by Very Low Income Households.

ARTICLE 2.
AFFORDABILITY COVENANTS

Section 2.1 Occupancy Requirements.

(a) Extremely Low Income Units. Twenty-nine (29) of the Units shall be rented to and occupied by or, if vacant, available for occupancy by Extremely Low Income Households.

(b) Very Low Income Units. Twenty-nine (29) of the Units shall be rented to and occupied by or, if vacant, available for occupancy by Very Low Income Households.

(c) 60% Low Income Units. Sixty-four (64) of the Units shall be rented to and occupied by or, if vacant, available for occupancy by 60% Low Income Households.

(d) 70% Low Income Units. One hundred twelve (112) of the Units shall be rented to and occupied by or, if vacant, available for occupancy by 70% Low Income Households.

(e) Manager's Unit. Two (2) Units shall be reserved for an on-site manager and shall not be subject to affordability or occupancy restrictions.

(f) Intermingling of Units. All Units shall be intermingled and of comparable quality. Tenants in all Units shall have equal access to and enjoyment of all common facilities of the Project.

(g) Disabled Persons Occupancy.

(1) Owner shall cause the Project to be operated at all times in compliance with all applicable federal, state, and local disabled persons accessibility requirements including, but not limited to the applicable provisions of: (i) the Unruh Act, (ii) the California Fair Employment and Housing Act, (iii) the United States Fair Housing Act, as amended, (iv) the Americans With Disabilities Act of 1990, and (vi) Chapters 11A and 11B of Title 24 of the California Code of Regulations, which relate to disabled persons access (collectively, the "Accessibility Requirements").

(2) Owner shall indemnify, protect, hold harmless and defend (with counsel reasonably satisfactory to the City) the City, and its city council, officers and employees, from all suits, actions, claims, causes of action, costs, demands, judgments and liens arising out

of Owner's failure to comply with the Accessibility Requirements. This obligation to indemnify survives termination of this Regulatory Agreement, repayment of the City Loan, cancellation of the Promissory Note, and the reconveyance of the Deed of Trust.

Section 2.2 Allowable Rent.

(a) Extremely Low Income Rent. Subject to the provisions of Section 2.3 below, the monthly Rent payable by Tenants of Extremely Low Income Units shall not exceed one-twelfth ($1/12^{th}$) of thirty percent (30%) of thirty percent (30%) of the Area Median Income applicable to Sacramento County, adjusted for Assumed Household Size.

(b) Very Low Income Rent. Subject to the provisions of Section 2.3 below, the monthly Rent payable by Tenants of the Very Low Income Units shall not exceed one-twelfth (1/12th) of thirty percent (30%) of fifty percent (50%) of Area Median Income applicable to Sacramento County, adjusted for Assumed Household Size.

(c) 60% Low Income Rent. Subject to the provisions of Section 2.3 below, the monthly Rent payable by Tenants of the 60% Low Income Units shall not exceed one-twelfth (1/12th) of thirty percent (30%) of sixty percent (60%) of Area Median Income applicable to Sacramento County, adjusted for Assumed Household Size

(d) 70% Low Income Rent. Subject to the provisions of Section 2.3 below, the monthly Rent payable by Tenants of 70% Low Income Units shall not exceed one-twelfth ($1/12^{th}$) of thirty percent (30%) of seventy percent (70%) of the Area Median Income applicable to Sacramento County, adjusted for Assumed Household Size.

Section 2.3 Notice of Rent Amounts. Owner will provide City with a schedule of maximum permissible Rents for the Units prior to the expected date for receipt of a temporary certificate of occupancy and annually thereafter.

Section 2.4 Increased Income of Occupying Households.

(a) Increased Income. In the event that, upon recertification of an occupant household's income, the income of a tenant increases above the qualifying limit for such household, Owner may increase the rent of such household to the extent permitted by applicable law, the Project Regulatory Documents (as defined below) and the regulations promulgated by the California Tax Credit Allocation Committee.

(b) Termination of Occupancy. Upon termination of occupancy of a Unit by a Tenant, such Unit shall be deemed to be continuously occupied by a household of the same income level (e.g., Extremely Low Income Household, Very Low Income Household, 60% Low Income Household, or 70% Low Income Household) as the initial income level of the vacating Tenant, until such Unit is reoccupied, at which time the income character of the Unit (e.g., Extremely Low Income Unit, Very Low Income Unit, 60% Low Income Unit, or 70% Low Income Unit) shall be redetermined.

(c) Continued Compliance. If the income of the occupants of a qualifying unit increases to more than 140% of the applicable income limitation, the unit may continue to be

counted as an Extremely Low Income Unit, Very Low Income Unit, 60% Low Income Unit or 70% Low Income Unit, as applicable, as long as said Unit continues to be rent-restricted and the next Unit of comparable or smaller size (in the same building) is occupied by a qualified low-income tenant..

Section 2.5 Lease Provisions. Owner shall include in leases for all Units provisions which authorize Owner to immediately terminate the tenancy of any household one or more of whose members has misrepresented any fact material to the household's qualification as a household with incomes at or below 70% area median income (AMI), 60% AMI, 50% of AMI or 30% of AMI. Each lease or rental agreement shall also provide that the household is subject to annual certification in accordance with Section 3.1 below, and that, if the household's income increases above the applicable limits for a Extremely Low Income Household, Very Low Income Household, 60% Low Income Household or 70% Low Income Household, as applicable, such household's Rent may be subject to increase.

Section 2.6 Condominium Conversion. The Owner shall not convert the Project or any Units to condominium or cooperative ownership or sell condominium or cooperative conversion rights to the Property during the Term of this Agreement.

ARTICLE 3.
INCOME CERTIFICATION AND REPORTING

Section 3.1 Income Certification. The Owner shall obtain, complete and maintain on file, immediately prior to initial occupancy and first year annual recertification, income certifications from each Tenant renting any of the Units (excluding the two managers' Units). Subject to applicable laws, with respect to any Tenant that has been at the Project for more than 10 years, City may request a recertification. The Owner shall make a good faith effort to verify that the income provided by an applicant or occupying household in an income certification is accurate by taking one or more of the following steps as a part of the verification process: (1) obtain a pay stub for the most recent pay period; (2) obtain an income tax return for the most recent tax year; (3) conduct a credit agency or similar search; (4) obtain an income verification form from the applicant's current employer; (5) obtain an income verification form from the Social Security Administration and/or the California Department of Social Services if the applicant receives assistance from either of such agencies; or (6) if the applicant is unemployed and has no such tax return, obtain another form of independent verification. Self-certifications for all subsequent years are acceptable. Copies of tenant income certifications shall be available to City upon request.

Section 3.2 Annual Report to City. Each year by July 1 Owner shall submit an annual report to City, in a form approved by City. The annual report shall include for each Unit covered by this Agreement, the Rent and the income and household size of the household occupying the Unit and shall have the income certifications for each Tenant, prepared pursuant to Section 3.1 above available upon request. The report shall also state the date the tenancy commenced for each rental Unit, the number of bedrooms in such Unit, and such other information as City may be required by law to obtain.

Section 3.3 Additional Information. Owner shall provide any additional information reasonably requested by City. City shall have the right to examine and make copies of all books, records or other documents of Owner which pertain to any Unit during normal business hours upon reasonable prior written notice to the Owner.

Section 3.4 Records.

(a) Owner shall keep and maintain at the principal place of business of the Owner set forth in Section 6.11 below, or elsewhere, full, complete and appropriate books, records and accounts relating to the Project. Owner shall cause all books, records and accounts relating to the Project to be kept and maintained in accordance with sound accounting principles consistently applied, and to be consistent with requirements of this Regulatory Agreement. Subject to applicable law and reasonable prior written notice from the City, Owner shall cause all books, records, and accounts to be open to and available for inspection and copying by the City, its auditors or other authorized representatives at reasonable intervals during normal business hours upon reasonable prior written notice. Owner shall cause copies of all tax returns and other reports that Owner may be required to furnish to any government agency to be open for inspection by the City upon reasonable prior written notice during normal business hours at the place that the books, records and accounts of Owner are kept. Owner shall preserve such records for a period of not less than five (5) years after their creation. If any litigation, claim, negotiation, audit exception, monitoring, inspection or other action relating to the use of the Project is pending at the end of the record retention period stated herein, then Owner shall retain the records until such action and all related issues are resolved. Such records are to include but are not limited to:

(1) Records documenting compliance with the fair housing, equal opportunity, and affirmative fair marketing requirements;

(2) Financial records; and

(3) Records demonstrating compliance with the marketing, tenant selection, affordability, and income requirements.

(b) The City shall notify Owner of any records it deems insufficient. Owner has thirty (30) calendar days after the receipt of such a notice to correct any deficiency in the records specified by the City in such notice, or if a period longer than thirty (30) days is reasonably necessary to correct the deficiency, then Owner must begin to correct the deficiency within thirty (30) days and correct the deficiency as soon as reasonably possible.

ARTICLE 4.
OPERATION OF THE DEVELOPMENT

Section 4.1 Residential Use. The Project shall be operated only for residential use and ancillary uses thereto including but not limited to [community facility space or other minor use]. No part of the Project shall be operated as transient housing.

Section 4.2 Compliance with Loan Documents and Project Regulatory Agreements. Owner shall comply with all the terms and provisions of the Loan Documents and any other regulatory requirement imposed on the Project, including but not limited to regulatory agreements associated with the Low Income Housing Tax Credits provided by the California Tax Credit Allocation Committee (the "Project Regulatory Documents"). Owner shall promptly notify the City in writing of the existence of any default by Owner under any Project Regulatory Documents and provide the City with copies of any such written notice of default.

Section 4.3 Property Tax Exemption. Owner shall not apply for a property tax exemption for the Property under any provision of law other than Revenue and Taxation Section 214(g) without City's prior written consent.

Section 4.4 Taxes and Assessments. Owner shall pay all real and personal property taxes, assessments, if any, and charges and all franchise, income, employment, old age benefit, withholding, sales, and other taxes assessed against it, or payable by it, at such times and in such manner as to prevent any penalty from accruing, or any lien or charge from attaching to the Property; provided, however, that Owner shall have the right to contest in good faith, any such taxes, assessments, or charges. In the event Owner exercises its right to contest any tax, assessment, or charge against it, Owner, on final determination of the proceeding or contest, shall immediately pay or discharge any decision or judgment rendered against it, together with all costs, charges and interest.

Section 4.5 Nondiscrimination. All of the Units shall be available for occupancy on a continuous basis to members of the general public who are income eligible (except for the two managers' units). There shall be no discrimination against or segregation of any person or group of persons, on account of race, religious creed, color, national origin, ancestry, physical disability, mental disability, medical condition, genetic information, marital status, sex, gender, gender identity, gender expression, age, sexual orientation, or veteran or military status in the leasing, subleasing, transferring, use, occupancy, tenure, or enjoyment of any Unit nor shall Owner establish or permit any such practice or practices of discrimination or segregation with reference to the selection, location, number, use, or occupancy, of tenants, lessees, sublessees, subtenants, or vendees of any Unit or in connection with the employment of persons for the operation and management of the Project. All deeds, leases or contracts made or entered into by Owner as to the Units or the Project or portion thereof, shall contain covenants concerning discrimination as prescribed by the Loan Agreement.

Section 4.6 Section 8 Certificate Holders. The Owner shall accept as tenants, on the same basis as all other prospective tenants, persons who are recipients of federal certificates for rent subsidies pursuant to the existing housing program under Section 8 of the United States Housing Act, or its successor, or similar programs. The Owner shall not apply selection criteria to holders of Section 8 certificate or similar certificates or vouchers that is more burdensome than criteria applied to all other prospective tenants, nor shall the Owner apply or permit the application of management policies or lease provisions with respect to the Project which have the effect of precluding occupancy of units by such prospective tenants.

Section 4.7 Marketing Plan. No later than six (6) months prior to the date construction of the Project is projected to be complete, Owner shall submit to the City for approval its plan for

marketing the Project to income-eligible households as required by this Regulatory Agreement (the "Marketing Plan"), subject to the controlling requirements of the California Municipal Finance Authority. The Marketing Plan shall be in compliance with all applicable fair housing, equal opportunity and affirmative fair marketing laws and requirements.

Upon receipt of the Marketing Plan, the City shall promptly review the Marketing Plan and shall approve or disapprove it within fifteen (15) days after receipt. If the Marketing Plan is not approved, the City shall give Owner specific reasons for such disapproval and Owner shall submit a revised Marketing Plan within fifteen (15) days of notification of the City's disapproval. Owner shall follow this procedure for resubmission of a revised Marketing Plan until the Marketing Plan is approved by the City. If the Owner does not submit a revised Marketing Plan that is approved by the City at least three (3) months prior to the date construction of the Project is projected to be complete, Owner will be in default of this Regulatory Agreement.

Section 4.8 Environmental Requirements. Owner shall comply with the environmental requirements set forth in Article X of the Loan Agreement and Article 6 of the Deed of Trust, which are incorporated herein.

ARTICLE 5.
PROPERTY MANAGEMENT AND MAINTENANCE

Section 5.1 Management Responsibilities. The Owner is responsible for all management functions with respect to the Project, including without limitation the selection of tenants, certification and recertification of household size and income, evictions, collection of rents and deposits, maintenance, landscaping, routine and extraordinary repairs, replacement of capital items, and security, provided, however, that nothing herein shall prevent the Owner from delegating such responsibilities to the Management Agent. City shall have no responsibility over management of the Project. The Owner shall retain a professional property management company approved by City in its reasonable discretion to perform its management duties hereunder. A resident manager shall also be required.

Section 5.2 Management Agent. The Project shall at all times be managed by an experienced management agent with demonstrated ability to operate residential facilities like the Project in a manner that will provide decent, safe, and sanitary housing (as approved, the "Management Agent"). The parties hereby agree that the initial Management Agent shall be Cornerstone Residential CA.

Section 5.3 Performance Review. City reserves the right to conduct an annual (or more frequently, if deemed reasonably necessary by City) review of the management practices and financial status of the Project. The purpose of each periodic review will be to enable City to determine if the Project is being operated and managed in accordance with the requirements and standards of this Agreement. The Owner shall cooperate with City in such reviews.

Section 5.4 Replacement of Management Agent. Subject to the rights of the Senior Lenders, Investor Limited Partner, and the Authority (each as defined in the Loan Agreement), if, as a result of a periodic review, City determines in its reasonable judgement that the Project is

not being operated and managed in accordance with any of the material requirements and standards of this Agreement, City shall deliver notice to Owner of its intention to cause replacement of the Management Agent, including the reasons therefor. Within thirty (30) days of receipt by Owner of such written notice, City staff and Owner shall meet in good faith to consider methods for improving the financial and operating status of the Project. If after a reasonable period as determined by City (not to exceed sixty (60) days), City determines that the Owner is not operating and managing the Project in accordance with the material requirements and standards of this Agreement, City may require replacement of the Management Agent.

If, after the above procedure, City requires in writing the replacement of the Management Agent, Owner shall (subject to obtaining any necessary consents from the Investor Limited Partner, the Senior Lenders, the Agency and any other applicable government agency that has approval rights over the replacement of the Management Agent) promptly dismiss the then Management Agent, and shall appoint as the Management Agent a person or entity meeting the standards for a Management Agent set forth in Section 5.2 above.

Any contract for the operation or management of the Project entered into by Owner shall provide that the contract can be terminated as set forth above. Failure to remove the Management Agent in accordance with the provisions of this Section shall constitute default under this Agreement, and City may enforce this provision through legal proceedings as specified in Section 6.5.

Section 5.5 Management Policies. The Owner shall submit its written management plan with respect to the Project to City for its review, and shall amend such policies in any way necessary to ensure that such policies comply with the provisions of this Agreement subject to the senior rights of the Agency.

Section 5.6 Property Maintenance. The Owner agrees, for the entire Term of this Agreement, to maintain or cause to be maintained all interior and exterior improvements, including landscaping, on the Property in good condition and repair (and, as to landscaping, in a healthy condition), reasonable wear and tear excepted, and in accordance with all applicable laws, rules, ordinances, orders and regulations of all federal, state, county, municipal, and other governmental agencies and bodies having or claiming jurisdiction and all their respective departments, bureaus, and officials.

In the event that the Owner breaches any of the covenants contained in this section and such default continues for a period of thirty (30) days after written notice from City with respect to graffiti, debris, waste material, general maintenance, landscaping or minor repairs, then City, in addition to whatever other remedy it may have at law or in equity, shall have the right to enter upon the Property, subject to the rights of the tenants, and perform or cause to be performed all such acts and work necessary to cure the default. Pursuant to such right of entry, City shall be permitted (but is not required) to enter upon the Property, subject to the rights of the tenants, and perform all acts and work necessary to protect, maintain, and preserve the improvements and landscaped areas on the Property, and to attach a lien on the Property (if not timely reimbursed for such costs upon demand from the Owner), or to assess the Property, in the amount of the expenditures arising from such acts and work of protection, maintenance, and preservation by City and/or costs of such cure, which amount shall be promptly paid by the Owner to City upon

demand. Notwithstanding the foregoing, all rights of the City set forth in this paragraph are expressly subject and subordinate to the rights of the Senior Lenders and the Authority.

Section 5.7 Social Services. Owner shall provide a variety of social services at the Project. Such social services are subject to the prior written approval of the City, in its reasonable discretion. Owner shall use commercially reasonable efforts to create a comprehensive social service program that is targeted to the needs of the residents of the Project which may include, but is not limited to, the following services: after-school programs of an ongoing nature for school age children, financial planning skills, job coaching, and/or the availability of a bona fide services coordinator to the tenants. Owner shall ensure that all personnel providing or coordinating all social services shall be adequately trained and counseled, including with respect to the appropriate means and methods of communicating and interacting with residents. Any substantive change in the scope, amount, or type of social services to be provided at the Property shall be subject to prior reasonable approval of City and approval shall not be unreasonably withheld.

ARTICLE 6.
MISCELLANEOUS

Section 6.1 Transfers.

(a) For purposes of this Agreement, "Transfer" means any sale, assignment, or transfer, whether voluntary or involuntary, of: (i) any rights and/or duties under the Loan Documents; and/or (ii) any interest in the Project, including (but not limited to) a fee simple interest, a joint tenancy interest, a life estate, a partnership interest, a leasehold interest, a security interest, or an interest evidenced by a land contract by which possession of the Project is transferred and Owner retains title. The term "Transfer" excludes the leasing of any single unit in the Project to an occupant in compliance with this Regulatory Agreement.

(b) Except as otherwise permitted in this Section 6.1 and Sections 8.2 and 8.3 of the Loan Agreement, no Transfer is permitted without the prior written consent of the City, which the City may withhold in its sole reasonable discretion. The City Loan shall automatically accelerate and be due in full upon any Transfer made without the prior written consent of the City. Notwithstanding anything to the contrary in this Agreement, any transfer permitted under Sections 8.2 or 8.3 of Loan Agreement shall be permitted hereunder without the City's approval.

(c) The City hereby approves the admission of the Investor Limited Partner to Owner as limited partner. The City hereby approves future Transfers of the limited partner interest of Owner provided that: (i) such Transfers do not affect the timing and amount of the Investor Limited Partner capital contributions provided for in the Partnership Agreement (as such capital contributions may be adjusted pursuant to the terms of the Partnership Agreement); and (ii) in subsequent Transfers, the Investor Limited Partner or an Affiliate thereof, retains a membership or partnership interest and U.S. Bancorp Community Development Corporation, a Minnesota corporation serves as a managing member or general partner of the successor limited partner. In addition, once all capital contributions of the Investor Limited Partner are made pursuant to the Partnership Agreement, the Investor Limited Partner shall be permitted to transfer

its limited partnership interest in Owner to any entity upon notice to the City and approval within thirty (30) days of receipt, which approval shall not be unreasonably withheld.

(d) The City hereby approves a Transfer of the Property from Owner to Lincoln Avenue Communities, or an Affiliate of Lincoln Avenue Communities, and an assumption of the City Loan by such transferee at or prior to the end of the Fifteen Year Compliance Period upon notice to the City and approval within thirty (30) days of receipt, which approval shall not be unreasonably withheld, provided that: (i) such Transfer is pursuant to an option or right of first refusal agreement referenced in the Partnership Agreement, (ii) the assignment and assumption agreement evidencing such Transfer requires the transferee to expressly assume the obligations of Owner under the Loan Documents, and (iii) the City is provided executed copies of all documents evidencing the Transfer.

(e) The City hereby approves the purchase of the Investor Limited Partner interest by Lincoln Avenue Communities, or an Affiliate of Lincoln Avenue Communities at or prior to the end of the Fifteen Year Compliance Period upon notice to the City and approval within thirty (30) days of receipt, which approval shall not be unreasonably withheld, provided that (i) such Transfer is pursuant to an option or right of first refusal agreement referenced in the Partnership Agreement, and (ii) the City is provided executed copies of all documents evidencing the Transfer.

(f) In the event a general partner of Owner is removed by the limited partner of Owner for cause following default under the Partnership Agreement, the City hereby approves the Transfer of the general partner interest to (i) (A) with respect to a removed managing general partner (but not a removed co-general partner), a 501(c)(3) tax exempt nonprofit corporation or other entity with a 501(c)(3) tax exempt nonprofit corporation member or partner, (B) with significant experience in the ownership and operation of affordable housing projects similar to the Project, and (C) with financial resources sufficient for the ownership of the Project, as selected by the Investor Limited Partner and approved by the City, and (ii) the Investor Limited Partner or an Affiliate thereof, but only for a period not to exceed ninety (90) days from the date of removal of the general partner, during which time such entity shall diligently seek a replacement general partner meeting the requirements of subsection (i)(A) above.

(g) The City hereby approves the grant of the security interests in the Project for financing approved in the Financing Plan as such term is defined in the Loan Agreement, including, but not limited to those security interests in favor of the Senior Lenders (and any future Senior Lenders that hold a Refinanced Loan (as defined in the Note)) and the Agency.

Section 6.2 Term. The provisions of this Agreement shall apply to the Property for the entire Term even if the entire City Loan is paid in full prior to the end of the Term, . This Agreement shall bind any successor, heir or assign of Owner, whether a change in interest occurs voluntarily or involuntarily, by operation of law or otherwise, except as expressly released by City. City makes the City Loan on the condition, and in consideration of, this provision, and would not do so otherwise.

Section 6.3 Notice of Expiration of Term.

(a) At least six (6) months prior to the expiration of the Term, Owner shall provide by first-class mail, postage prepaid, a notice to all Tenants containing (a) the anticipated date of the expiration of the Term, (b) any anticipated increase in Rent upon the expiration of the Term, (c) a statement that a copy of such notice will be sent to City, and (d) a statement that a public hearing may be held by City on the issue and that the Tenant will receive notice of the hearing at least fifteen (15) days in advance of any such hearing. The Owner shall also file a copy of the above-described notice with City.

(b) In addition to the notice required above, Owner shall comply with the requirements set forth in California Government Code Sections 65863.10 and 65863.11. Such notice requirements include: (i) a twelve (12) month notice to existing tenants, prospective tenants and Affected Public Agencies (as defined in California Government Code Section 65863.10(a)) prior to the expiration of the Term, (ii) a six (6) month notice requirement to existing tenants, prospective tenants and Affected Public Agencies prior to the expiration of the Term; (iii) a notice of an offer to purchase the Project to "qualified entities" (as defined in California Government Code Section 65863.11(d)), if the Project is to be sold within five (5) years of the end of the Term; (iv) a notice of right of first refusal within the one hundred eighty (180) day period that qualified entities may purchase the Project.

Section 6.4 Covenants to Run with the Land. City and Owner hereby declare their express intent that the covenants and restrictions set forth in this Agreement shall run with the land, and shall bind all successors in title to the Property, provided, however, that on the expiration of the Term of this Agreement said covenants and restrictions shall expire. Each and every contract, deed or other instrument hereafter executed covering or conveying the Property or any portion thereof shall be held conclusively to have been executed, delivered and accepted subject to such covenants and restrictions, regardless of whether such covenants or restrictions are set forth in such contract, deed or other instrument, unless City expressly releases such conveyed portion of the Property from the requirements of this Agreement.

Section 6.5 Enforcement by the City.

(a) If Owner fails to perform any obligation under this Agreement, and fails to cure the default within 30 days after City has notified the Owner in writing of the default or, if the default cannot be cured within 30 days, fails to commence to cure within 30 days and thereafter diligently pursue such cure, City shall have the right to enforce this Agreement by any or all of the following actions, or any other remedy provided by law:

(1) Calling the Loan. City may declare a default under the Note, accelerate the indebtedness evidenced by the Note, and proceed with foreclosure under the Deed of Trust.

(2) Action to Compel Performance or for Damage. City may bring an action at law or in equity to compel Owner's performance of its obligations under this Agreement, and/or for damages.

(3) Remedies Provided Under Loan Documents. City may exercise any other remedy available at law or provided under the Loan Documents.

(b) The City shall provide notice of a default to the Senior Lenders and the Investor Limited Partner and any limited partner of Owner who has requested written notice from the City in the manner set forth in Section 13.3 of the Loan Agreement.

Section 6.6 Attorney's Fees and Costs. In any action brought to enforce this Agreement, the prevailing party shall be entitled to all costs and expenses of suit, including reasonable attorneys' fees. This section shall be interpreted in accordance with California Civil Code Section 1717 and judicial decisions interpreting that statute.

Section 6.7 Recording and Filing. City and Owner shall cause this Agreement, and all amendments and supplements to it, to be recorded against the Property in the Official Records of the County of Sacramento. This Agreement encumbers only the Owner's leasehold interest in the Property and does not encumber the City's fee title to the Property.

Section 6.8 Governing Law. This Agreement shall be governed by the laws of the State of California.

Section 6.9 Amendments. This Agreement may be amended only by a written instrument executed by all the parties hereto or their successors in title, and duly recorded in the real property records of the County of Sacramento, California.

Section 6.10 Notice. All notices given or certificates delivered under this Agreement shall be in writing and be deemed received on the delivery or refusal date shown on the delivery receipt, if: (i) personally delivered by a commercial service which furnishes signed receipts of delivery or (ii) mailed by certified mail, return receipt requested, postage prepaid, addressed as shown on the signature page. Any of the parties may, by notice given hereunder, designate any further or different addresses to which subsequent notices, certificates or communications shall be sent.

Section 6.11 Severability. If any provision of this Agreement shall be invalid, illegal or unenforceable, the validity, legality and enforceability of the remaining portions of this Agreement shall not in any way be affected or impaired thereby.

Section 6.12 Multiple Originals; Counterparts. This Regulatory Agreement may be executed in multiple originals, each of which is deemed to be an original, and may be signed in counterparts.

Section 6.13 Revival of Agreement after Foreclosure. In the event there is a foreclosure of the Property, this Regulatory Agreement will revive according to its original terms if, during the Term, the owner of record before the foreclosure, or deed in lieu of foreclosure, or any entity that includes the former owner or those with whom the former owner has or had family or business ties, obtains an ownership interest in the Project or a leasehold interest in the Property.

Section 6.14 Limitation of Liability. Section 13.19 of the Loan Agreement is hereby incorporated with the same force and effect as if set forth in its entirety herein.

IN WITNESS WHEREOF, the City and Owner have executed this Agreement by duly authorized representatives, all on the date first written above.

SCHEDULE OF PERFORMANCE

Task/Event	**Time for Performance**
1. Developer and City open Escrow.	Prior to Closing.
2. Closing Date.	On or about June 3, 2026.
3. Developer commences construction of Project.	Notice of Commencement will be issued within three (3) business days of Closing.
4. Developer completes construction of Project.	June 2028.
5. Developer commences leasing the Units.	February 2028.
6. Developer completes leasing of all Units.	December 2028.

It is expressly understood and agreed by the Parties that the foregoing schedule of performance is subject to all of the terms and conditions set forth in the text of the Agreement including, without limitation, extension due to Force Majeure. Times of performance under the Agreement may be extended by request of any Party memorialized by a mutual written agreement between the Parties, which agreement may be granted or denied in the non-requesting Party's sole and absolute discretion (subject to events of Force Majeure set forth in this Agreement).

SOURCES AND USES OF FUNDS

Financing Plan – Asteria Flats

Asteria Flats plans to finance the project with the following sources:

Senior Tax-Exempt Bond Loan:
California Municipal Finance Authority shall be the issuer for the tax-exempt bonds in the amount of **$40,000,000,** which consists of $32,000,000 in Qualified Private Activity Bonds from CMFA plus the $8,000,000 in recycled bonds. The bonds will be publicly offered to outside investors and held during the construction phase. Upon construction completion, the initial bondholders then tender their bonds to Capital One, N.A., who is also the Permanent Lender.

First Mortgage – Tax-Exempt (Permanent):
Freddie TEL permanent first mortgage serviced by Capital One, N.A in the amount of approximately **$40,000,000**.

First Mortgage – Taxable (Permanent):
Permanent first mortgage taxable tail in the amount of approximately **$12,000,000** also serviced by Capital One, N.A.

Taxable Construction Mortgage:
Construction financing in the amount of approximately **$90,276,974** during the construction period provided by U.S. Bancorp Impact Finance.

GP Capital Contribution:
General Partner capital contribution in the amount of approximately **$4,570**.

LIHTC Equity Investment:
The equity investor, U.S. Bancorp Community Development Corporation, will provide Low-Income Housing Tax Credit equity in multiple installments throughout construction and stabilization. Anticipated installments include:

- 1st Installment: **$6,747,114**
- 2nd Installment: **$32,835,956**
- 3rd Installment: **$449,808**
- 4th Installment: **$4,847,884**
- 5th Installment: **$100,000**

City of Rancho Cordova Subordinate Loan:
Subordinate public financing in the amount of approximately **$5,000,000** issued by the City of Rancho Cordova.

Solar Credit Equity:
Solar tax credit equity will be provided by U.S. Bancorp Community Development Corporation, in the amount of approximately **$2,432,362**.

Short-Term Bond Reinvestment Proceeds:
Bond reinvestment proceeds in the amount of approximately **$3,875,000**, including **$2,750,000** available during construction. The proceeds from sale of the bonds will be reinvested for a period of 36 months in Treasuries or SLGs. The bond reinvestment will cover the bond coupon, and generate positive earnings equal to the difference between the bond coupon and the reinvestment rate, which will be contributed to the deal.

Cashflow From Operations:
The project is anticipated to generate approximately **$1,928,864** from operations during lease-up and stabilization.

Deferred Developer Fee:
The Developer shall defer payment of approximately **$10,044,455** of the developer fee, to be repaid from project cash flow pursuant to partnership and loan agreement terms.

Please see the below Sources and Uses table for the complete project financial model.

Summary Sources	Construction	Permanent
First Mortgage - Tax-Exempt	–	$ 40,000,000
First Mortgage - Taxable	–	$ 12,000,000
GP Capital Contribution	4,570	4,570
LIHTC Equity - 1st Installment	6,854,303	6,854,303

City Soft Funding	5,000,000	5,000,000
Solar Credit Equity	–	2,432,362
LIHTC Equity - 2nd Installment	–	33,357,607
LIHTC Equity - 3rd Installment	–	456,954
LIHTC Equity - 4th Installment	–	4,926,489
LIHTC Equity - 5th Installment	–	100,000
Short-Term Bond Reinvestment Proceeds	2,750,000	3,875,000
Cashflow From Operations	1,928,864	1,928,864
Deferred Developer Fee	–	10,044,455
Total Sources	**$ 106,814,710**	**$ 120,980,603**

Summary Uses	Construction	Permanent
Acquisition	$ 6,065,000	$ 6,065,000
Construction Hard Costs	79,819,564	79,819,564
Project Soft Costs	5,364,676	5,483,190
Tax Credit Fees	110,198	275,398
Bond Costs	670,188	670,188
Taxable Construction Loan Costs & Reserve	12,428,362	12,428,362
Land Acquisition	643,072	643,072
Permanent Loan Costs	1,028,500	1,028,500
Closing Costs	187,000	187,000
Escrows and Reserves	385,354	1,623,077
Developer Fee	112,798	12,757,253
Total Uses	**$ 106,814,710**	**$ 120,980,603**

PERFORMANCE GUARANTY

This Performance Guaranty ("***Guaranty***") is given as of _____, 2026, by Rancho Cordova Owner LP, a California limited partnership ("***Guarantor***"), in favor of **The City of Rancho Cordova**, a California general law city (the "**City**").

Preliminary Statement. The undersigned, Guarantor is the owner of the Project**.** As a material inducement to and in consideration of the City entering into that certain Loan Agreement (the "**Loan Agreement**"), dated as of the date hereof, between the City and Guarantor ("**Borrower**") pursuant to which City loaned Borrower Five Million Dollars ($5,000,000) ("**Loan**") as evidenced by a promissory note executed by Borrower ("**Note**"), whereby the "**Project**" will consist of two hundred thirty six (236) apartment units, together with all associated landscaping, parking and associated improvements, including a clubhouse, fitness center, leasing office, and swimming pool. Sixty (60) of the apartment units will be 1-bedroom units, sixty (60) of the apartment units will be two-bedroom units, fifty-eight (58) of the apartment units will be three-bedroom units, and fifty-eight (58) will be 4-bedroom units. All of the apartment units in the Project, except for two manager's unit, will be restricted for occupancy by eligible households with incomes at or below 70% area median income (AMI), 60% AMI, 50% AMI and 30% AMI for a period of fifty-five (55) years from issuance of a final certificate of occupancy for the Project. Borrower and City will enter into a **"Regulatory Agreement"** which sets forth the affordable housing obligations and other requirements for operation of the Project.

NOW, THEREFORE, to induce the City to extend credit under the Loan Agreement and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, Guarantor hereby agrees as follows:

Section 1. Guaranty.

(a) Guarantor irrevocably and unconditionally fully guarantees the due, prompt and complete payment and performance of all of the obligations relating to the development and construction of the Project, free and clear of any liens or claims of liens, in the manner and within the time necessary to comply with all of the terms, covenants and conditions of and of the applicable provisions of the Regulatory Agreement subject to Force Majeure. In furtherance, but not in limitation of the Guarantor's obligations hereunder, if there are any construction cost overruns or if any lien is filed against the Project, the Guarantor hereby absolutely and unconditionally guarantees the prompt, absolute, and unconditional payment of such sums as are necessary to fully satisfy such obligations (or bond over such obligations to the City's satisfaction) and satisfy all other amounts payable pursuant to the Regulatory Agreement and the Loan Documents. For the avoidance of doubt, this Guaranty does not guarantee the repayment of the Loan or the payment of any sums due under the Note or other Loan Documents, except to the extent such payment obligation arises directly from construction of the Project.

(b) Guarantor hereby unconditionally guarantees the performance of Borrower in accordance with Section 5.9 of the Loan Agreement.

(c) Subject to the Section 20(j) hereof, if Guarantor fails to promptly perform any of the above-described obligations under this Guaranty, the City may bring any action at law or in equity or both, or commence any appropriate proceeding, to compel Guarantor to perform its obligations under this Guaranty, and in such event, the City shall be entitled to collect from Guarantor compensation for all actual loss, cost, damage, and expense which the City may incur as a direct consequence of Guarantor's failure to perform those obligations. The City may bring any such action or commence any such proceeding regardless of whether the Regulatory Agreement is in default or City has exhausted any and all security for the Loans. This Guaranty is not secured by the Deed of Trust.

All such obligations described above, and all replacements, renewals, consolidations, amendments and other modifications thereof, are collectively referred to herein as the "***Obligations***". Guarantor further agrees to pay any and all expenses (including counsel fees and expenses, whether or not litigation is commenced, and during both the trial and any appellate phases of litigation) incurred by the City in enforcing any rights under this Guaranty.

Section 2. Guaranty Absolute. Guarantor guarantees that the Obligations will be paid and performed strictly in accordance with the terms of the Loan Documents and/or such other documents or agreements in connection to the Project as may be applicable thereto, regardless of any law, regulation or order now or hereafter in effect in any jurisdiction affecting any of such terms or the rights of the City with respect thereto. To the extent permitted by applicable law, the liability of Guarantor under this Guaranty shall be absolute and unconditional irrespective of, provided, however that no change to the Loan Documents shall increase the Obligations of the Guarantor hereunder without the express written consent of the Guarantor:

(a) any lack of validity or enforceability of the Regulatory Agreement, the Loan Agreement, the Notes or any of the other agreements between the parties;

(b) any change in the time, manner or place of payment of, the interest rate payable under, or in any other term of, all or any of the Obligations, or any other amendment or waiver of or any consent to departure from the Loan Agreement, the Notes or any of the other agreements between the Parties;

(c) any exchange, release or non-perfection of any collateral, or any release or amendment or waiver of or consent to departure from any other guaranty, for all or any of the Obligations; or

(d) any other circumstance which might otherwise constitute a defense available to, or a discharge of, Borrower or Guarantor (except for full payment and performance).

This Guaranty shall continue to be effective or be reinstated, as the case may be, if (i) at any time any payment of any of the Obligations is rescinded or must otherwise be returned by the City upon the insolvency, bankruptcy or reorganization of Borrower or otherwise, all as though such payment had not been made, or (ii) this Guaranty is released in consideration of a payment of money or transfer of property or grant of a security interest by Guarantor or any other Person and such payment, transfer or grant is rescinded or must otherwise be returned by

City upon the insolvency, bankruptcy or reorganization of such Person or otherwise, all as though such payment, transfer or grant had not been made.

Section 3. Waiver. Guarantor hereby waives promptness, diligence, notice of acceptance and any other notice with respect to any of the Obligations and this Guaranty and any requirement that the City protect, secure, perfect or insure any security interest or lien or any property subject thereto or exhaust any right or take any action against Borrower or any other Person or any collateral.

Additionally, except as may be prohibited by applicable law, Guarantor waives:

(a) All statutes of limitations as a defense to any action or proceeding brought against Guarantor by the City pursuant to this Guaranty;

(b) Any right it may have to require the City to proceed against Borrower, proceed against or exhaust any security held from Borrower, or pursue any other remedy in the City's power to pursue, and any defense based on any homestead exemption or other exemption under applicable law, whether available to Borrower or Guarantor;

(c) Any defense (excluding defense by the members, partners, shareholders, agents, or employees of the Guarantor) based on any limitation of liability or recourse in any other Loan Document or arising under law or any claim that Guarantor's obligations exceed or are more burdensome than those of Borrower;

(d) Any defense based on (i) any legal disability of Borrower, (ii) any release, discharge, modification, or impairment of Borrower to the City from any cause, whether consented to by the City, respectively, or arising by operation of law or from any Bankruptcy or other voluntary or involuntary proceeding, in or out of court, for the adjustment of debtor-creditor relationships, including any proceeding under the Bankruptcy Reform Act of 1978, as amended or recodified (the "***Bankruptcy Code***"), or under any other present or future state or federal law regarding Bankruptcy, reorganization or other relief to debtors (collectively, "***Debtor Relief Laws***") (any such proceeding referred to as an "Insolvency Proceeding" as further defined in Section 17 hereof), or (iii) any rejection or disaffirmance of the Loan, or any part of it, or any security held for it, in any such Insolvency Proceeding;

(e) Any defense based on any action taken or omitted by the City in any Insolvency Proceeding involving Borrower, including any election to have the City's claim allowed as being secured, partially secured or unsecured, any extension of credit by the City to Borrower in any Insolvency Proceeding, and the taking and holding by the City of any security for any such extension of credit;

(f) All presentments, demands for performance, notices of nonperformance, protests, notices of protest, notices of intention to accelerate, notices of acceleration, notices of any suit or any other action against Borrower or any other person, notices of default, notices of dishonor, notices of acceptance of this Guaranty and of the existence, creation, or incurring of new or

additional indebtedness, and demands and notices of every kind except for any demand or notice by the City to Guarantor expressly provided for elsewhere in this Guaranty;

(g) Any defense based on or arising out of any defense that Borrower may have to the payment or performance of the Obligations or any part of them (except for payment and performance in full);

(h) Any defense based on any lack of authority of the officers, directors, partners, members or agents acting or purporting to act on behalf of Borrower or any principal of Borrower or any defect in the formation of Borrower or any principal of Borrower;

(i) Any and all rights Guarantor may have under any anti-deficiency statute or other similar protections, including, without limitation, to the fullest extent permitted by law, all rights and benefits under (A) Section 580a of the California Code of Civil Procedure purporting to limit the amount of any deficiency judgment which might be recoverable following the occurrence of a trustee's sale under a deed of trust and any right to a fair value hearing or any fair value limitation or other limitation on liability or a deficiency based upon the fair value of any collateral after a nonjudicial foreclosure of the Deeds of Trust, (B) Section 580b of the California Code of Civil Procedure stating that no deficiency may be recovered on a real property purchase money obligation, (C) Section 580d of the California Code of Civil Procedure stating that no deficiency may be recovered on a note secured by a deed of trust on real property in case such real property is sold under the power of sale contained in such deed of trust, and (D) Section 726 of the California Code of Civil Procedure stating that there may be but one form of action on an indebtedness secured by real property, if such sections, or any of them, have any application hereto or any application to any Guarantor;

(j) Any and all rights and benefits under Section 2809 of the California Civil Code purporting to reduce a guarantor's obligations in proportion to the principal obligation; (i) waive, to the fullest extent permitted by law;

(k) Any and all rights and benefits which might otherwise be available to the undersigned under California Civil Code Sections 2810, 2819, 2839 2845, 2849, 2850, 2899, and 3433;

(l) Any and all rights arising under Section 359.5 of the California Code of Civil Procedure; and

(m) Any failure by the City to inform Guarantor of any facts the City may now or hereafter know about Borrower, the Project, the Loans, or the transactions contemplated by the Regulatory Agreement or the Loan Agreement, it being understood and agreed that the Borrower has a duty so to inform and that Guarantor is fully responsible for being and remaining informed by Borrower of all circumstances bearing on the risk of nonperformance of Borrower's obligations.

Without limiting the foregoing, Guarantor hereby waives all rights and defenses arising out of any election of remedies by the Regulatory Agreement, even though that election of remedies, such as nonjudicial foreclosure with respect to security for a guaranteed obligation, has destroyed Guarantor's rights of subrogation and reimbursement against Borrower by operation of

Section 580d of the California Code of Civil Procedure or otherwise. In accordance with California Civil Code Section 2856(c), Guarantor hereby waives all rights and defenses that Guarantor may have because Borrower's debt to the City is secured by real property. This means, among other things: (a) the City may collect from Guarantor without first foreclosing on any real or personal property collateral pledged by Borrower; and (b) if the City foreclose on any real property collateral pledged by Borrower: (1) The amount of the debt may be reduced only by the price for which that collateral is sold at the foreclosure sale, even if the collateral is worth more than the sale price. (2) the City may collect from Guarantor even if the City, by foreclosing on the real property collateral, has destroyed any right Guarantor may have to collect from Borrower. The foregoing is an unconditional and irrevocable waiver of any rights and defenses Guarantor may have because Borrower's debt is secured by real property. These rights and defenses include, but are not limited to, any rights or defenses based upon Section 580a, 580b, 580d, or 726 of the California Code of Civil Procedure.

The City may terminate the Regulatory Agreement in accordance with the terms thereof and claim damages from the Borrower thereunder, including payment of past due and future rent under the Regulatory Agreement.

Section 4. Subrogation. Guarantor shall not exercise any rights which Guarantor may acquire by way of subrogation under this Guaranty, by any payment made hereunder or otherwise, until all of the Obligations shall have been paid in full and the City shall not be under any duty to extend credit to or for the benefit of Borrower. If any amount shall be paid to Guarantor on account of such subrogation rights at any time when all of the Obligations shall not have been paid in full, such amount(s) shall be held in trust for the sole benefit of the City, and shall forthwith be paid to the City to be applied to the Obligations, whether matured or unmatured, in accordance with the terms of the Regulatory Agreement and the Loan Agreement, respectively. If (i) Guarantor shall make payment to the City of all or any part of the Obligations and (ii) all the Obligations shall be paid in full and the City shall be under no duty to extend credit to or for the benefit of Borrower, then the City will, at Guarantor's request, execute and deliver to Guarantor appropriate documents, without recourse and without representation or warranty, necessary to evidence the transfer by subrogation to Guarantor of an interest in the Obligations resulting from such payment by Guarantor.

Section 5. Amendments. No amendment or waiver of any provision of this Guaranty nor consent to any departure by Guarantor therefrom shall be effective unless the same shall be in writing and signed by the City, and then such waiver or consent shall be effective only in the specific instance and for the specific purpose for which given.

Section 6. Notices. All notices, demands, requests or other communications to be sent by one party to the other hereunder or required by law shall be in writing and shall be deemed to have been validly given or served by delivery of same in person to the addressee or by depositing same with Federal Express for next Business Day delivery or by depositing same in the United States mail, postage prepaid, registered or certified mail, return receipt requested, addressed as follows:

All notices, demands and requests shall be effective upon such personal delivery or upon being deposited with Federal Express or in the United States mail as required above. However, with respect to notices, demands or requests so deposited with Federal Express or in the United States mail, the time period in which a response to any such notice, demand or request must be given shall commence to run from the next Business Day following any such deposit with Federal Express or, in the case of a deposit in the United States mail as provided above, the date on the return receipt of the notice, demand or request reflecting the date of delivery or rejection of the same by the addressee thereof. Rejection or other refusal to accept or the inability to deliver because of changed address of which no notice was given shall be deemed to be receipt of the notice, demand or request sent. By giving to the other party hereto at least ten (10) calendar days' written notice thereof in accordance with the provisions hereof, the parties hereto shall have the right from time to time to change their respective addresses and each shall have the right to specify as its address any other address within the United States of America.

Section 7. No Waiver; Remedies. No failure on the part of the City to exercise, and no delay in exercising, any right hereunder shall operate as a waiver thereof; nor shall any single or partial exercise of any right hereunder preclude any other or further exercise thereof or the exercise of any other right. The remedies herein provided are cumulative and not exclusive of any remedies provided by law.

Section 8. [Reserved]

Section 9. Continuing Guaranty; Transfer of Obligations. This Guaranty is a continuing guaranty and shall (a) remain in full force and effect until the lien free completion of the Project and the issuance of a temporary or permanent certificate of occupancy for the entirety of the Project, provided that there has been payment in full of the Obligations and all other amounts payable under this Guaranty, (b) be binding upon Guarantor and its successors and assigns, and (c) inure to the benefit of and be enforceable by the City, its successors, assigns and transferees. Without limiting the generality of the foregoing clause (c), the City may assign or otherwise transfer the Regulatory Agreement or any interest of the City therein to an entity controlled by the City or, with the consent of the Borrower, to a third party, and the City may assign or otherwise transfer any of the Loan Documents, or any interest of the City therein, to an entity controlled by the City or, with the consent of the Borrower, to a third party, and such other Person (upon receipt of consent from the Borrower to the extent required) shall thereupon become vested with all the rights in respect thereof granted to the City herein or otherwise.

Section 10. Governing Law. This Guaranty shall be governed by the internal laws of the State of California and shall be construed in accordance with and governed by the laws of said State, without regard to the choice of law rules of that State, except to the extent that any of such laws may now or hereafter be preempted by Federal law.

Section 11. Consent to Forum. As part of the consideration for new value this day received, Guarantor hereby consents to the jurisdiction of any state court located within the county of Sacramento, California or the United States District Court for the Eastern District of California, and any appellate court from any thereof, and waives personal service of any and all process upon Guarantor and consents that all such service of process be made by certified or registered mail directed to Guarantor as provided in Section 6 hereof and service so made shall

be deemed to be completed upon actual receipt thereof. Guarantor waives any objection to jurisdiction and venue of any action instituted against Guarantor as provided herein and agrees not to assert any defense based on lack of jurisdiction or venue. Guarantor further agrees not to assert against the City (except by way of a defense or counterclaim in a proceeding initiated by the City) any claim or other assertion of liability with respect to this Guaranty, the Obligations, the Regulatory Agreement, any of the Loan Documents, the City's conduct in respect of any of the foregoing or otherwise in any jurisdiction other than the foregoing jurisdictions. Nothing in this Section shall affect the right of the City to serve legal process in any other manner permitted by law or affect the right of the City to bring any action or proceeding against Guarantor in the courts of any other jurisdictions.

Section 12. Waiver of Jury Trial. **TO THE FULLEST EXTENT PERMITTED BY APPLICABLE LAW, GUARANTOR WAIVES TRIAL BY JURY IN ANY ACTION OR PROCEEDING TO WHICH GUARANTOR AND CITY MAY BE PARTIES, ARISING OUT OF, IN CONNECTION WITH OR IN ANY WAY PERTAINING TO, THIS GUARANTY OR THE OTHER LOAN DOCUMENTS. IT IS AGREED AND UNDERSTOOD THAT THIS WAIVER CONSTITUTES A WAIVER OF TRIAL BY JURY OF ALL CLAIMS AGAINST ALL PARTIES TO SUCH ACTIONS OR PROCEEDINGS, INCLUDING CLAIMS AGAINST PARTIES WHO ARE NOT PARTIES TO THIS GUARANTY. THIS WAIVER IS KNOWINGLY, WILLINGLY AND VOLUNTARILY MADE BY GUARANTOR, AND GUARANTOR HEREBY REPRESENTS THAT NO REPRESENTATIONS OF FACT OR OPINION HAVE BEEN MADE BY ANY INDIVIDUAL TO INDUCE THIS WAIVER OF TRIAL BY JURY OR TO IN ANY WAY MODIFY OR NULLIFY ITS EFFECT. GUARANTOR FURTHER REPRESENTS AND WARRANTS THAT IT HAS BEEN REPRESENTED IN SIGNING THIS GUARANTY AND IN THE MAKING OF THIS WAIVER BY INDEPENDENT LEGAL COUNSEL OR HAS HAD THE OPPORTUNITY TO BE REPRESENTED BY INDEPENDENT LEGAL COUNSEL SELECTED OF ITS OWN FREE WILL AND THAT IT HAS HAD THE OPPORTUNITY TO DISCUSS THIS WAIVER WITH COUNSEL.**

Section 13. Time is of the Essence. Time is of the essence in the performance of this Guaranty by Guarantor, and each and every term thereof.

Section 14. Revival and Reinstatement. If all or any portion of the Obligations are paid, the obligations of Guarantor hereunder shall continue and shall remain in full force and effect in the event that all or any part of such payment is avoided or recovered directly or indirectly from the City as a preference, fraudulent transfer or otherwise under the Bankruptcy Code or under any other Debtor Relief Laws or other similar laws, regardless of (a) any notice of revocation given by Guarantor prior to such avoidance or recovery, or (b) full payment and performance of all of Obligations. If the City is required to pay, return, or restore to Borrower or any other person any amounts previously paid on any of the Obligations because of any Insolvency Proceeding of Borrower, or any other reason, the obligations of Guarantor shall be reinstated and revived and the rights of the City shall continue with regard to such amounts, all as though they had never been paid.

Section 15. Information Regarding Borrower and the Property. Before signing this Guaranty, Guarantor investigated the financial condition and business operations of Borrower, the present and former condition, uses and ownership of the Property, and such other matters as Guarantor deemed appropriate to assure itself of Borrower's ability to discharge its obligations under the Loan Documents. Guarantor assumes full responsibility for that due diligence, as well as for keeping informed of all matters that may affect Borrower's ability to pay and perform its obligations to the City. The City has no duty to disclose to Guarantor any information which the City may have or receive about Borrower's financial condition or business operations, the condition or uses of the Property, or any other circumstances bearing on Borrower's ability to perform.

Section 16. Subordination. Any rights of Guarantor (including but not limited to any rights as subrogee of the City or resulting from Guarantor's performance under this Guaranty), whether now existing or later arising, to receive payment on account of any indebtedness (including interest) owed to it by Borrower, any owner or member of Borrower, or any subsequent owner of the Property, or to withdraw capital invested by it in Borrower, or to receive distributions from Borrower, shall during the term hereof be subordinate as to lien and time of payment and in all other respects to the full payment and/or performance in full of the Obligations owed to the City. Guarantor shall not be entitled to enforce or receive payment of any sums hereby subordinated until all the Obligations have been paid and performed in full and any such sums received in violation of this Guaranty shall be received by Guarantor in trust for the City.

Section 17. Bankruptcy of Borrower. In any bankruptcy, receivership, or other voluntary or involuntary proceeding, in or out of court, for the adjustment of debtor-creditor relationships (each, an "***Insolvency Proceeding***") in which the filing of claims is required by law, Guarantor shall file all claims which Guarantor may have against Borrower relating to any indebtedness of Borrower to Guarantor and shall assign to the City all rights of Guarantor thereunder. If Guarantor does not file any such claim, the City, as attorney-in-fact for Guarantor, is hereby authorized to do so in the name of Guarantor or, in the its discretion, to assign the claim to a nominee and to cause proof of claim to be filed in the name of the City's nominee. The foregoing power of attorney is with full power of substitution and coupled with an interest and cannot be revoked. The City or their respective nominees shall have the right, in its reasonable discretion, to accept or reject any plan proposed in such Insolvency Proceeding and to take any other action which a party filing a claim is entitled to take. In all such cases, whether in administration, bankruptcy or otherwise, the person or persons authorized to pay such claim shall pay to the City the amount payable on such claim and, to the full extent necessary for that purpose, Guarantor hereby assigns to the City all of Guarantor's rights to any such payments or distributions; provided, however, that Guarantor's Obligations hereunder shall not be satisfied except to the extent that the City receive cash by reason of any such payment or distribution. If the City receives anything hereunder other than cash, the same shall be held as collateral for amounts due or to become due under this Guaranty. In the event that acceleration of the time for payment of the Loans is stayed under a debtor relief law, Guarantor's obligations hereunder shall nonetheless be payable immediately upon demand of the City.

Section 18. Term. Subject to Section 14, this Guaranty shall terminate upon (i) the completion of the Obligations, as evidenced by the executed and recorded Certificate of

Completion by the City, and (ii) acceptance by the City of such completion as evidenced by written acknowledgement of satisfactory completion by the City to be provided upon reasonable request from or on behalf of the Guarantor, which shall not be unreasonably withheld, conditioned, or delayed. Further, if the City fails to respond to the Guarantor's request made in accordance with the preceding sentence within thirty (30) days from its receipt thereof, then this Guaranty shall be deemed to have automatically terminated at the end of such 30-day period.

Section 19. Severability. The parties hereto intend and believe that each provision in this Guaranty comports with all applicable local, state and federal laws and judicial decisions. However, if any provision or provisions, or if any portion of any provision or provisions, in this Guaranty is found by a court of law to be in violation of any applicable local, state or federal ordinance, statute, law, administrative or judicial decision, or public policy, and if such court should declare such portion, provision or provisions of this Guaranty to be illegal, invalid, unlawful, void or unenforceable as written, then it is the intent of all parties hereto that such portion, provision or provisions shall be given force to the fullest possible extent that they are legal, valid and enforceable, that the remainder of this Guaranty shall be construed as if such illegal, invalid, unlawful, void or unenforceable portion, provision or provisions were not contained therein, and that the rights, obligations and interest of the City under the remainder of this Guaranty shall continue in full force and effect.

Section 20. Additional Guarantor Covenants. The Guarantor represents, warrants and covenants to and for the benefit of the City as follows:

(a) Guarantor's correct legal name is as shown next to Guarantor's signature below;

(b) The address of Guarantor is correct and is shown next to Guarantor's signature below;

(c) This Guaranty is valid, binding and enforceable against Guarantor in accordance with its terms and any instrument or agreement required hereunder or thereunder, when executed and delivered, shall be similarly valid, binding and enforceable;

(d) The Guarantor shall immediately notify City in writing of any fact that may jeopardize Guarantor's ability to discharge the Obligations.

(e) Guarantor will receive a material benefit and advantage from the making of the Loan, and Guarantor has received at least "reasonable equivalent value" (as such phrase is used in §548 of the Bankruptcy Code, in §3439.04 of the California Uniform Fraudulent Transfer Act, and in comparable provisions of other applicable law) and more than sufficient consideration to support its obligations hereunder with respect to the Guaranteed Obligations;

(f) The financial information provided by Guarantor to City, if any, is complete and accurate in all material respects as to the financial condition of Guarantor (and, if applicable, any partners, shareholders, members, or other principals of Guarantor) and since the date such financial information was provided to City, there has been no material change in the financial condition of Guarantor (and, if applicable, such other persons);

(g) All other information submitted to City by or on behalf of Guarantor in connection with this Guaranty is correct, complete, and not misleading in any material respect;

(h) Guarantor has filed all tax returns (federal, state, and local) required to be filed and has paid all taxes, assessments, and governmental charges and levies thereon to be due, including interest and penalties; and

(i) Guarantor has not received any notice of violation of any and all existing and future laws, orders, ordinances, rules and regulations, and there are no claims, actions, proceedings or investigations pending or, to Guarantor's knowledge, threatened against Guarantor with respect to any violations of applicable laws.

(j) Section 13.19 of the Loan Agreement is hereby incorporated by reference with the same force and effect as if set forth herein in its entirety.

The above referenced items are direct obligations of the Guarantor in favor of the City.

[REMAINDER OF PAGE INTENTIONALLY LEFT BLANK]

MEMORANDUM

ITEM 12.1.

DATE: May 18, 2026

TO: Honorable Mayor and Council Members

FROM: Adam Lindgren, City Attorney
Stacy Leitner, City Clerk

SUBJECT: **DISCUSSION OF BROWN ACT UPDATES UNDER SB 707 AND A RESOLUTION AUTHORIZING THE HANDLING OF DISRUPTIONS OF TELEPHONIC OR INTERNET SERVICE DURING COUNCIL MEETINGS**

RECOMMENDATION

Receive an informational report on new requirements of the Ralph M. Brown Act that impact the manner the City Council and other legislative bodies of the city conduct public meetings and adopt the Resolution approving the City of Rancho Cordova's Telephonic or Internet Service Disruption Policy, in accordance with the Ralph M. Brown Act.

RESULT OF RECOMMENDED ACTION

Adoption of the Resolution, and the information in this report, will assist the Council and city staff to comply with newly enacted requirements of the Ralph M. Brown Act.

BACKGROUND

California Senate Bill 707 ("SB 707"), signed into law on October 3, 2025, revised the requirements of the Ralph M. Brown Act (California Government Code § 54950 et seq.) ("Brown Act") to enhance public accessibility and expand the use of technology in local government meetings. Some of the changes apply to all legislative bodies covered by the Brown Act, while others apply only to "eligible legislative bodies," which, for the City of Rancho Cordova, is the City Council.

The new requirements take effect in two phases:

Phase One: which became effective on January 1, 2026, includes the majority of the changes Act (e.g., expanded teleconferencing and reporting requirements) and impacts all legislative bodies covered by the Brown Act.

Phase Two: which takes effect on July 1, 2026, presents the most significant changes (e.g., mandatory teleconferencing and community outreach obligations) and applies only to the City Council, as an eligible legislative body.

DISCUSSION

Effective July 1, 2026, until January 1, 2030, the City Council, as an eligible legislative body, must comply with the following new public meeting requirements:

- **Offer Remote Participation Options at All Open and Public Meetings:** Provide remote options for the public to participate at City Council meetings and provide public comment via a 2–way telephonic service or a 2–way audiovisual platform, with equal opportunity and time to participate as in-person attendees. If an eligible legislative body elects to provide a 2-way audiovisual platform, the eligible legislative body shall publicly post and provide a call-in option, and activate any automatic captioning function during the meeting if an automatic captioning function is included with the 2-way audiovisual platform. Otherwise, the eligible legislative body shall provide a 2-way telephonic service for the public to participate in the meeting. Noticed agenda must now include remote participation instructions.
- **Approve a Technology Disruption Policy:** On or before July 1, 2026, adopt a disruption policy at a noticed public meeting, in open session (and not on the consent calendar) regarding disruption of telephonic or internet services occurring during meetings. As part of this policy, City Council must comply with certain requirements related to disruption, including for certain technological disruptions, recessing the open session for at least one hour and making a good faith attempt to restore the service.
- **Engage in Community Outreach:** Encourage participation in public meetings, including from underrepresented and non-English-speaking communities. These activities must include, but are not limited to the following:

    1. Electronically accept requests for meeting agendas and related documents.
    2. Maintain a webpage dedicated to public meetings that includes a general explanation of the public meeting process; public comment procedures; agendas; and a calendar of meeting dates, times, and locations.
    3. Provide a direct link on the City's primary homepage explaining how to request materials and access the dedicated webpage.
    4. Provide a space on a freely accessible posting board made available by the City where members of the public may post their own translation of City Council agendas.
    5. Reasonably assist members of the public who wish to translate a public meeting into any language or wish to receive interpretation provided by another member of the public, so long as the interpretation is not disrupting to the meeting. The eligible legislative body shall publicize instructions on how to request assistance. This section does not require an eligible legislative body to provide interpretation of any public meeting.

- **Translate Meeting Information Into Applicable Languages Not Required at This Time:** If applicable, eligible legislative bodies must now translate the agenda, remote joining instructions, and postings for each meeting of the City Council into all applicable languages (meaning languages, according to data from the most recent American Community Survey ("ACS"), that are spoken by 20% or more of the applicable population— provided that 20% or more of the population that speaks that language speaks English less than "very well.") The city does not currently have any applicable languages, as defined.

Effective January 1, 2026, provisions of the Brown Act scheduled to expire (or sunset) were extended indefinitely. All legislative bodies covered by the Brown Act must comply with the following updated meeting requirements:

- **Indefinite Social Media Exception:** A member of a legislative body can communicate, outside of a meeting, on an internet-based social media platform to answer questions and provide information to – or solicit information from – the public. Members cannot use social media to discuss among themselves or respond directly to anything another member of the same legislative body posts regarding agency business.
- **Mandatory Brown Act Distribution:** A local agency is now required to provide a copy of the chapter to any person elected or appointed to serve as a member of a legislative body.
- **Reporting Requirements Regarding Compensation:** Prior to taking final action, legislative bodies must now provide an oral summary report of a recommendation for a final action on compensation decisions for not just a local agency executive, but also a department head or other similar administrative officer of the local agency.
- **Expanded Public Comment and Access to Meetings:** New exceptions to the general rule that a legislative body can bypass public comment for items already considered by a committee comprised exclusively of legislative body members have been added. Now, an opportunity to address previously considered items must be given if: 1) the committee's primary subject matter jurisdiction focuses on elections, budgets, police oversight, privacy, removing from – or restricting access to – materials available in public libraries, or taxes/related spending proposals; or 2) the item was not previously considered by the committee at a meeting with a physical, in-person quorum. The updated requirements also allow for an elected legislative body to impose greater access requirements onto appointed legislative bodies without exceptions.
- **Reaffirmed Public Recording Rights:** The public's right to record open legislative body meetings is reaffirmed to now include any device used to record meetings. This right exists unless the legislative body makes a reasonable finding that the recording cannot continue without causing a persistent disruption to the proceedings.
- **Expanded Special Meetings Requirements Regarding Compensation:** For special meetings, the requirement that the agenda be posted on the local agency's internet website, if the local agency has one, now applies to all legislative bodies, without exemptions. Prior law prohibited calling a special meeting to discuss specified compensation of local agency executives. New law expands the exception to include the legislative body itself.
- **Reaffirmed Authority to Remove Disruptive Participants:** The existing authority of a legislative body – or its presiding officer – to remove or limit participation of a disruptive person now explicitly includes teleconference meetings and members of the public participating in a meeting via a two-way telephonic service or a two-way audiovisual platform.
- **Expanded Teleconferencing Options for Remote Participation:** All legislative bodies covered by the Brown Act remain authorized to attend meetings remotely under existing provisions. In addition, new teleconferencing provisions have been added that can be used by a legislative body, in addition to or instead of the traditional provisions. These teleconferencing provisions are cumulative, and would authorize a legislative body to elect to use any teleconferencing provisions that are applicable to a meeting, regardless of whether any other teleconferencing provisions would also be applicable to that meeting. Each teleconferencing option has its own requirements. For any member who participates in an option, the minutes for the meeting must identify the specific provision

each member relied upon to participate remotely. Below are options available to appear remotely:

1. Gov. Code § 54953(b): Permits the use of teleconferencing for all purposes in connection with any meeting or proceeding of the legislative body.
2. Gov. Code § 54953(c): Permits a member with a disability to appear remotely as a reasonable accommodation.
3. Gov. Code § 54953.8.2: Permits a teleconference meeting during a state of emergency, provided that it complies with certain requirements.
4. Gov. Code § 54953.8.3: Permits a teleconference meeting and a member's participation remotely if "just cause," (e.g., a contagious illness or caretaker responsibilities) exists for remote participation and at least a quorum of the members of the legislative body participates in person from a singular physical location clearly identified on the agenda.

- **Expanding Just Cause Definition For Remote Participation:** The changes remove the requirement that the legislative body formally approve a member's request to participate remotely due to a qualifying "just cause" circumstance. Now, where a quorum of members are in person from a single physical location, a member can notify the body at the earliest opportunity of their need to participate remotely for just cause. A member of a legislative body cannot participate in meetings solely by teleconference for just cause for more than two meetings per year, if the legislative body regularly meets once per month; or five meetings per year, if the legislative body regularly meets twice per month; or seven meetings per year, if the legislative body regularly meets three or more times per month. The "Just Cause" definition now reads as follows:

    1. Childcare or caregiving of parent, grandparent, grandchild, sibling, spouse, or domestic partner.
    2. A contagious illness.
    3. A need related to a physical or mental condition.
    4. Travel while on official business of the legislative body.
    5. An immunocompromised child, parent, grandparent, grandchild, sibling, spouse, or domestic partner of the member that requires the member to participate remotely.
    6. A physical or family medical emergency.
    7. Military service obligations.

- **Teleconferencing as a Reasonable Accommodation:** Legislative body members may participate by teleconference as an accommodation for a disability. A member must participate through both audio and visual technology, except when a disability results in a need to participate off camera. The member must also disclose any other individuals 18 years of age or older present in the room at the remote location, and the general nature of the member's relationship with any of those individuals. Remote participation under this subdivision shall be treated as in-person attendance at the physical meeting location for all purposes, including any requirement that a quorum of the legislative body participate from any particular location.

IMPLEMENTATION STATUS

The City Clerk's Department, with assistance from the City Attorney's Office, is leading implementation efforts and has done the following:

- Determined the City Council qualifies as an eligible legislative body. This means that the City Council has additional Brown Act requirements that other legislative bodies of the City (e.g., the Planning Commission) do not have.
- Distributed Brown Act copies to all Council Members and appointed members of boards, commissions, and committees.
- Distributed a list of meeting locations to all Council Members and appointed members of boards, commissions, and committees.
- Updated onboarding procedures to include Brown Act distribution to new member orientation materials.
- Proposed for adoption a resolution to address any technology disruption aligned with SB 707.
- Initiated internal coordination with the City Manager's Office, City Attorney, Communications, and Information Technology. For City Council meetings, staff plans to continue to utilize audiovisual or telephonic service for all public meetings beginning July 1, 2026.
- Establish and post instructions on how members of the public who wish to translate a public meeting into any language or wish to receive interpretation provided by another member of the public, can request reasonable assistance from the City.
- Briefed Council on social media limitations and reminded members of permanent prohibition on responding to/reacting to other members' posts about agency business.
- Reviewed ACS language data to determine that no applicable languages, as defined, currently exist within the city. This means that the new translation provisions do not apply to the city at this time.

Additional compliance actions currently taking place include:

- Designate freely accessible location for the public to post additional translations of meeting information.
- Establish ADA accommodation process for members requesting remote participation.
- Update minutes templates to accommodate reporting requirements for remote participant names and statutory authority for each remote participation.
- Website special meeting posting: Ensure procedures for 24-hour website posting of all special meeting notices.
- Train clerks, IT, Council, and commission members on new procedures and technology.

FISCAL IMPACT AND FUNDING SOURCE

The fiscal impact of the updates would be approximately $12,000 for upgrading the noticing board at City Hall, and an annual cost of approximately $46,785 annually for additional staff time and webinar license fees.

CITY OF RANCHO CORDOVA

RESOLUTION NO. XX-2026

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA, STATE OF CALIFORNIA, ESTABLISHING PROCEDURES FOR ADDRESSING DISRUPTIONS OF TELEPHONIC OR INTERNET SERVICE OCCURRING DURING PUBLIC MEETINGS

WHEREAS, the Ralph M. Brown Act, California Government Code Section 54950 *et seq.* ("Brown Act"), requires all open and public meetings held by the City Council, as the eligible legislative body of the City of Rancho Cordova, include an opportunity for members of the public to attend via a remote telephonic or audiovisual platform service; and

WHEREAS, on or before July 1, 2026, the Brown Act requires the City Council to adopt a policy that addresses how the eligible legislative body will respond when there are disruptions in telephonic or internet service, that prevents members of the public from attending or observing a meeting remotely; and

WHEREAS, this policy addresses the procedures for recessing and reconvening a remote public meeting in the event of service disruption, and the efforts that the eligible legislative body must make to attempt to restore access and participation at the meeting; and

WHEREAS, the Brown Act also expands remote participation options for all legislative bodies covered by the Brown Act, pursuant to specified requirements; and

WHEREAS, this policy also aims to address the procedures for legislative bodies, other than the City Council, to follow when an open and public meeting which offers remote participation experiences service disruption that prevents members of the public from attending or observing a meeting remotely; and

WHEREAS, the policy herein is adopted to comply with the updated requirements of the Brown Act and to ensure the continuity of public participation during public meetings.

NOW, THEREFORE, BE IT HEREBY RESOLVED BY THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA as follows:

1. PURPOSE

This policy sets forth clear procedures and expectations for addressing disruptions of telephonic and internet service occurring during open and public meetings, as required by the Brown Act (Gov. Code § 54953.4). This policy affirms the city's commitment to maintaining transparency, accessibility, and continuity of government during technology disruptions.

2. SCOPE

This policy applies to open and public meetings at which remote public participation is required or offered under the Ralph M. Brown Act, unless otherwise specified.

3. DEFINITIONS

3.1 "Service disruption" is any failure, outage, or other interruption of the city's telephonic or internet service that prevents the legislative body from broadcasting the meeting, or the public from attending, observing, providing public comment, or otherwise participating in a meeting through the city's remote access services.

3.2 "Remote access services" or "service" is the two-way telephonic service and/or two-way audiovisual online platform used to provide real-time remote public attendance, observation, and participation at meetings.

3.3 "Two-way telephonic service" is a telephone service that does not require internet access and allows the public to listen to and verbally participate in a meeting.

3.4 "Two-way audiovisual platform" is a platform that allows remote participants to see and hear the meeting and allows the legislative body to see and hear remote participants.

4. PROCEDURES

In the event of a service disruption during open and public meetings of the City Council (*i.e.*, the "eligible legislative body"):

4.1 Response to service disruptions:
If any member of the eligible legislative body or city staff becomes aware of a disruption to the agency's remote access services that prevents the public from attending or observing the meeting remotely:

4.1.1 The Presiding Officer of the eligible legislative body or staff should promptly announce the disruption to the public.

4.1.2 The Presiding Officer of the eligible legislative body or staff may then call a recess of the open session or convene in closed session, in accordance with the Brown Act.

4.1.3 Staff should begin efforts to identify and restore the disrupted service.

4.1.4 The open session shall remain in recess for at least one hour to make a good faith attempt to restore the service. The eligible legislative body may meet in closed session during this period. The eligible legislative body shall not reconvene the open session of the meeting until at least one hour following the disruption, or until telephonic or internet service is restored, whichever is earlier.

4.2 Efforts to restore service:

4.2.1 Staff shall make good faith efforts to restore remote access services, which may include:

- Troubleshooting teleconferencing platforms or software
- Resetting or replacing audiovisual equipment

- Attempting alternative connection methods
- Contacting appropriate support staff or service providers
- Using back-up equipment or platforms, if available

4.2.2 The staff should document the restoration efforts undertaken.

4.3 Reconvening the open session:

4.3.1 Timing:

The open session may be reconvened after at least one hour of time has passed from the time of disruption, or until service is restored, whichever comes first.

4.3.2 If service has been restored:

If service is restored before or at the time the meeting reconvenes, the meeting will continue as normal.

4.3.3 If service is not/cannot be restored:

If service has not been restored after one hour, the City Council may either continue efforts to restore service or reconvene and:

1. Adjourn the meeting; or

2. Continue the meeting in open session by adopting, by roll call vote, the following, or a similar, finding:

"The City Council has made good faith efforts to restore telephonic or internet service in accordance with its adopted policy and Government Code Section 54953.4(b)(A)(i), and the public interest in continuing the meeting outweighs the public interest in remote public access because . . . . .";

Upon adoption of the finding, the eligible legislative body may continue the open session even though remote access services have not been restored.

4.4 Documentation:

4.4.1 The City Clerk must enter a brief statement into the meeting minutes, which includes the following:

- The nature and time of the disruption
- Restoration efforts undertaken
- The time the meeting was reconvened (if applicable)
- Any finding adopted pursuant to section 4.3.3 (2)

4.4.2 This documentation should be retained in accordance with the city's record retention policies.

In the event of a service disruption during open and public meetings of legislative bodies, not including the City Council (*i.e.*, "non-eligible legislative bodies"):

4.5. When a legislative body chooses to use remote teleconferencing option, any disruption in service that prevents the legislative body from broadcasting the meeting to members of the public using the call-in option or internet-based service option, or in the event of a disruption within the local agency's control that prevents members of the public from offering public comments using the call-in option or internet-based service option, the legislative body shall take no further action on items appearing on the meeting agenda until public access to the meeting via the call-in option or internet-based service option is restored.

4.5.1. If service has been restored:

If service is restored, the meeting will continue as normal.

4.5.2. If service is not/cannot be restored:

No agenda actions may be taken until service is restored. If service has not been restored after one hour, the City Council must reconvene and adjourn the meeting.

4.5.3. Actions taken on agenda items during a disruption that prevents the legislative body from broadcasting the meeting may be challenged pursuant to California Government Code Section 54960.1.

4.6. Review and updates:

This policy may be amended by the City Council at a noticed public meeting during open session, not on the consent calendar.

PASSED AND ADOPTED by the City Council of the City of Rancho Cordova on the 18th day of May 2026 by the following vote:

City Clerk

MEMORANDUM

ITEM 12.2.

DATE:	May 18, 2026
TO:	Honorable Mayor and Council Members
FROM:	Adam Lindgren, City Attorney Stacy Leitner, City Clerk
SUBJECT:	**RESOLUTIONS RELATED TO THE TIME AND LOCATION FOR REGULAR CITY COUNCIL MEETINGS AND ESTABLISHING RULES FOR THE MEETINGS**

RECOMMENDATION

Adopt the Resolutions.

RESULT OF RECOMMENDED ACTION

Adoption of the Resolutions would set the standing time and location for Council meetings and would update the rules of meetings for the Council to align with recent updates made to the Ralph M. Brown Act.

BACKGROUND

Due to updates in City Council practices and state law regulating the conduct of meetings, the city is proposing the subject Resolutions. Adopting the Resolutions would replace the existing Resolutions relating to the time and location for regular meetings and the rules for the conduct of meetings.

FISCAL IMPACT AND FUNDING SOURCE

There is no fiscal impact.

2. Resolution for Rules of City Council Meetings

CITY OF RANCHO CORDOVA

RESOLUTION NO. XX-2026

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA, STATE OF CALIFORNIA, DESIGNATING THE PLACE AND TIME FOR REGULAR CITY COUNCIL MEETINGS

WHEREAS, the City Council of the City of Rancho Cordova desires to encourage and maximize participation of the public in the proceedings and discussions of the City Council.

NOW, THEREFORE, BE IT HEREBY RESOLVED BY THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA as follows:

1. Resolution No. 113-2004 and Resolution No. 02-2003 are hereby rescinded.

2. The Regular Meeting days for the City Council of the City of Rancho Cordova shall remain the first and third Monday of the month, provided that if a regular meeting lands on an official holiday, the meeting will be held on the following day.

3. The Regular Meeting time of the City Council of the City of Rancho Cordova shall be 5:30 p.m. During a Regular Meeting of the City Council, no new item of business will be considered after 11:00 p.m.

4. The Regular Meeting place of the City Council of the City of Rancho Cordova is at Rancho Cordova City Hall, David B. Roberts Council Chambers, located at 2729 Prospect Park Drive, Rancho Cordova, California 95670. For meetings conducted virtually by teleconference, options for remote public participation via a 2–way telephonic service or a 2-way audiovisual platform (*e.g.*, Zoom) is offered, in accordance with the Ralph M. Brown Act. Instructions for remote participation will be included in the noticed agenda.

PASSED AND ADOPTED by the City Council of the City of Rancho Cordova on the 18th day of May 2026 by the following vote:

AYES:

NOES:

City Clerk

CITY OF RANCHO CORDOVA

RESOLUTION NO. XX-2026

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA, STATE OF CALIFORNIA, ESTABLISHING RULES FOR MEETINGS OF THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA

WHEREAS, Government Code Section 36813, authorizes a City Council to establish rules for the conduct of its meetings.

WHEREAS, the City Council adopted rules and procedures regarding meetings by Resolution No. 31-2003 that it wants to update.

NOW, THEREFORE, BE IT HEREBY RESOLVED BY THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA as follows:

1. The City Council rescinds Resolution No. 31-2003.

2. REGULAR MEETINGS

a. Time. Regular meetings of the City Council shall be held on the first and third Monday of each month at 5:30 p.m. Whenever the day fixed for any regular meeting of the Council falls on an official holiday, the meeting will be held at the same hour on the next day that is not a holiday.

b. Place. All regular meetings of the City Council shall be held at the Rancho Cordova City Hall, David B. Roberts Council Chambers, located at 2729 Prospect Park Drive, Rancho Cordova, California 95670. For meetings conducted virtually by teleconference, options for remote public participation via a 2-way telephonic service or a 2-way audiovisual platform (e.g., Zoom) is offered for each meeting. Instructions for remote participation will be included in each noticed agenda.

c. Public. All meetings of the City Council shall be open to the public; provided, however, the City Council may hold closed sessions as provided by State law.

3. SPECIAL MEETINGS

A special meeting may be ordered at any time by the City Manager, Mayor, or by a majority of the members of the legislative body, whenever in his/her/their opinion the public business may require it, or upon the written request of any three members of the Council.

Whenever a special meeting is called, written notice of the meeting shall be delivered personally or by any other means by the City Clerk to each member of the Council and to each local newspaper of general circulation, radio/television station requesting notice in writing, and posting a notice on the local agency's internet website, if the local agency has one. The notice must be delivered at least twenty-four (24) hours before the time of the meeting, as specified in the notice. The notice shall specify the time and place of the special meeting and the business to be transacted or discussed. No other business shall be considered at such meetings by the

Council. The agenda for special meetings shall contain the information set forth in Section 4(a)-(d) below. At least twenty-four (24) hours before each special meeting, the City Clerk shall post a copy of the agenda, including the call and notice of the special meeting, at the same location identified in Section 4 below.

4. AGENDA

The City Manager, in consultation with the City Clerk and the City Attorney shall arrange an agenda. The City Clerk shall provide a copy of the agenda packet at least 72 hours prior to a regular Council meeting, and at least 24 hours prior to a Special Council meeting.

The agenda prepared by the City Clerk shall, at a minimum, include:

a. The date of the meeting;

b. The time of the meeting;

c. The location of the meeting;

d. For meetings conducted virtually by teleconference instruction for remote participation and public comment via a call-in option or an internet-based service option;

e. Procedures for receiving and resolving requests for accommodation;

f. A brief general description of each item of business to be transacted or discussed at the meeting;

g. Specified period of time for members of the public to address the Council on items of interest to the public within the jurisdiction of the Council, including a provision that, absent direction of the Council, each person may speak for three (3) minutes, and include language that the Council can only briefly respond with questions, refer to staff, or place on a future agenda;

h. A specified section under which Councilmembers and staff may present informational only reports.

At least seventy-two (72) hours before each regular meeting, the City Clerk shall post a copy of the agenda at City Hall (2729 Prospect Park Drive). Effective July 1, 2026 the city must also provide a physical location, within reasonable proximity to where the agenda is posted, that is open and accessible for the public to post translations of the agenda in languages other than English in accordance with recent updates to the Ralph M. Brown Act.

The City Clerk shall mark or denote "Consent Calendar" items on the agenda to identify those items on the agenda which can reasonably be expected to generate no discussion by members of the City Council, city staff or interested persons in the audience. The Council shall consider all of the items on the Consent Calendar portion of the agenda at one time by a vote after a motion has been made and seconded. If any member of the City Council, city staff or interested person in the audience requests to speak on an item on the Consent Calendar, the Council will first vote by one motion on the remaining Consent Calendar items, and following the

vote, any items on which there was a request to speak shall be taken up for comment and consideration, in the order listed on the agenda.

5. PRESIDING OFFICER

The Mayor presides at all City Council meetings and performs such other duties consistent with his/her office, as may be imposed by the Council. The Mayor is entitled to vote, but possesses no veto power. The Mayor is recognized as the official head of the City for all ceremonial purposes, by the courts for the purpose of serving civil process, and by the Governor for military purposes. In times of public emergency, the Mayor, with the consent of the Council, shall maintain order and enforce laws.

6. CALL TO ORDER

The Mayor, or in his/her absence, the Vice Mayor, shall take the chair precisely at the hour appointed for the meeting, and shall immediately call the Council to order. In the absence of the Mayor or Vice Mayor, the City Clerk shall call the Council to order, whereupon a temporary chair shall be elected by the members of the Council present. Upon the arrival of the Mayor or Vice Mayor, the temporary chair shall immediately relinquish the chair upon the conclusion of the business immediately before the Council.

Before proceeding with the business of the Council, the City Clerk shall enter into the minutes the names of the members present or absent.

7. QUORUM

A majority of the members of the Council shall constitute a quorum for the transaction of business. The Council may adjourn any regular, adjourned regular, special or adjourned special meeting to a time and place specified in the order of adjournment. If all members are absent from any regular or adjourned regular meeting, the City Clerk may declare the meeting adjourned to a stated time and place. If he/she does, he/she shall cause written notice of the adjournment to be given in the same manner provided for regular meetings. A copy of the order or notice of adjournment shall be posted in the same location identified in Section 4 and other places designated by the Council within seventy-two (72) hours after the time of adjournment.

Whenever a regular or adjourned regular meeting is adjourned as provided in this section, the resulting adjourned regular meeting is a regular meeting for all purposes. When an order of adjournment of any meeting fails to state the hour at which the adjournment meeting shall be held, it shall be held at the hour specified for regular meetings.

City Council members may participate remotely by teleconference as an accommodation for a disability. Remote participation for this reason shall be treated as in-person attendance at the physical meeting location for all purposes, including any requirement that a quorum of the legislative body participate from any particular location.

8. ORDER OF BUSINESS

Promptly at the hour set on the day of each regular meeting, the members of the Council, City Clerk (or Designee), City Attorney (or Designee), and City Manager (or Designee) shall take their regular stations in the Council Chambers, and the business of the Council shall be

taken up for consideration and disposition in the following order, unless it is determined by the Mayor that matters may be taken up out of order:

a. Call to Order – Roll Call

b. Meetings Recording and Playback Schedule

c. Pledge of Allegiance

d. Invocation

e. Presentations

f. Public Comment

g. Council Reports

h. City Manager's Report

i. Consent Calendar

j. Consent Public Hearing

k. Public Hearings

l. Regular Calendar

m. Council Requests for Future Agenda Items

n. Adjournment

The order of business may change for a special meeting or for the addition of closed session items.

9. MATTERS TOO LATE FOR THE AGENDA

a. No action or discussion shall take place on any item not appearing on the agenda for a regular meeting as posted, unless:

i. The City Council determines by majority vote that an emergency situation exists, as defined in Government Code §54956.5;

ii. The City Council determines by vote of two-thirds vote of the members of the legislative body present at the meeting (or a unanimous vote if less than two-thirds of the members are present) that there is the need to take action immediately; and the need for action came to the attention of the "local agency" after the agenda was posted;

iii. The item was included in a posted agenda for a prior meeting held not more than five (5) calendar days prior to the meeting at which the item is acted upon.

b. When an item not on an agenda is raised by a member of the public, the City Council may briefly respond, may ask questions for clarification, provide a reference to Staff or other resources, or request Staff to report back at a subsequent meeting. Furthermore, a member of the City Council may take action to place a matter of business on a future agenda.

10. READING OF MINUTES

Unless the reading of the minutes of a Council meeting is requested by a member of the Council, the minutes may be approved without reading if the City Clerk has previously provided each member with a copy thereof.

11. RULES OF DEBATE

a. Presiding Officer may debate. The Mayor or such other member of the Council as may be presiding may move, second, and debate from the chair, subject only to the limitations of debate imposed upon all members. He/she shall not be deprived of any of the rights and privileges of a Councilmember by reason of his/her acting as the Presiding Officer.

b. Getting the floor. Every member desiring to speak shall address the Mayor, and upon recognition by the Mayor, shall confine himself/herself to the question under debate.

c. Interruptions. A member once recognized, shall not be interrupted when speaking unless it be to call him/her to order, or as herein otherwise provided. If a member, while speaking, be called to order, he/she shall cease speaking until the question of order be determined, and if in order, he/she shall be permitted to proceed.

d. Privilege of closing debate. The Councilmember moving the adoption of an ordinance or resolution shall have the privilege of closing the debate.

e. Motion to reconsider. A motion to reconsider any action taken by the Council may be made at any time. The motion must be made by one of the prevailing side, but may be seconded by any member, and may be made at any time and have precedence over all other motions or while a member has the floor; it shall be debatable. Nothing herein shall be construed to prevent any member of the Council from making or remaking the same or other motion at a subsequent meeting of the Council.

f. Remarks of Councilmember. A Councilmember may request through the Mayor, the privilege of having an abstract of his/her statement on any subject under consideration by the Council entered in the minutes. If the Council consents thereto, the statement shall be entered in the minutes.

g. Synopsis of debate. The City Clerk may be directed by the Mayor with the consent of the Council, to enter in the minutes a synopsis of the discussion of any question coming regularly before the Council.

h. Rules of Order. Except as otherwise provided in this Resolution, the current edition of "Roberts Rules of Order" shall govern the conduct of the meetings of the City Council.

12. ADDRESSING THE COUNCIL

Any person desiring to address the Council at a meeting shall first secure the permission of the Mayor to do so; provided, however, that under the following headings of business, any qualified and interested person shall have the right to address the Council upon obtaining recognition by the Mayor.

a. Written Communications. Interested persons or their authorized representative may address the Council by written communication on any matters concerning the city's business, or any matters over which the Council has control.

b. Oral Communications. Interested persons in the audience or their authorized representatives may address the Council by oral communications on any matters over which the Council has control; provided, however, that preference shall be given to those persons who have notified the City Clerk in advance of their desire to speak in order that the same may appear on the agenda of the Council.

13. ADDRESSING THE COUNCIL AFTER A MOTION IS MADE

After a motion is made by the Council, no person shall address the Council without first securing the permission of the Mayor to do so.

14. MANNER OF ADDRESSING COUNCIL

Each person addressing the Council at an in-person meeting may stand at the podium and may give his/her name if they choose to. A Speaker Slip shall be completed in order to facilitate preparation of the minutes. For meetings conducted virtually by teleconference, the legislative body shall allow members of the public to access the meeting and provide an opportunity to address the legislative body via a 2-way telephonic or 2-way audiovisual platform. All remarks shall be addressed to the Council as a body and not to any member thereof. No person, other than the Council and the person having the floor, shall be permitted to enter into any discussion, either directly or through a member of the Council, without the permission of the Mayor. No question shall be asked of a Councilmember except through the Mayor.

15. VOTING

a. Members of the Council shall vote by a "voice vote" on all ordinances, resolutions and other matters, unless a roll call vote is required by law or is requested by a Councilmember. The Mayor shall announce the result of the vote. The City Clerk shall show on ordinances and resolutions the names of Councilmembers voting "Aye" and "No."

b. The vote on any matter being considered by the Council may be delayed by the Mayor until all members of the Council present for a meeting, and not excused as herein provided, are actually present at the Council dais.

c. A member of the Council who has a conflict of interest regarding any matter being considered by the Council shall declare the conflict and excuse himself/herself from participating in the Council's deliberations and decisions regarding that matter.

16. ORDER AND DECORUM

a. By Councilmembers. While the Council is in session, the members must preserve order and decorum. A member shall not, by conversation or otherwise, delay or interrupt the proceedings or the peace of the Council or disturb any member while speaking or refuse to obey the orders of the Council or Mayor, except as otherwise herein provided.

b. By Persons. The Mayor may remove, or cause the removal of, an individual for disruptive behavior. “Disruptive Behavior” means engaging in behavior during a meeting of the City Council that actually disrupts, disturbs, impedes, or renders infeasible the orderly conduct of the meeting and includes, but is not limited to one of the following: (A) A failure to comply with reasonable and lawful regulations adopted by City Council; or (B) Engaging in behavior that constitutes use of force or a true threat of force. Prior to removing an individual, the Presiding Officer, or their designee, shall warn the individual that their behavior is disrupting the meeting and that their failure to cease their behavior may result in their removal. These procedures apply to members of the public participating in open and public meetings both in-person and remotely.

c. Enforcement of Order and Decorum. A law enforcement officer shall be designated as Sergeant-at-Arms of the Council meetings when requested by the Mayor. He/she shall carry out all orders and instructions given at the Council meeting. Upon instruction of the Mayor, it shall be the duty of the Sergeant-at-Arms, as to any person who violates the order and decorum of the meeting, to remove and bar the person from the Council meeting. Willful disruptions of a public meeting is unlawful and a misdemeanor under the California Penal Code.

d. Smoking. Smoking is prohibited at all times in all city-owned facilities.

e. Code of Conduct Policy. The City Council shall adopt a code of conduct policy which, in the event of a conflict with this Resolution, shall control.

17. SPECIAL COMMITTEES/TASK FORCES

All special committees/task forces shall be appointed by the Mayor, subject to approval of the City Council.

18. COUNCILMEMBER VACANCIES

When a vacancy occurs on the City Council, in the office of Councilmember or Mayor, and the Council determines to consider filling the vacancy by appointment, the Council will make the appointment in accordance with the provisions of the Government Code. This rule shall not preclude the Council from calling a special election to fill the vacancy or from adopting an ordinance to fill the vacancy pursuant to Government Code §36512 at a meeting at which one of the remaining Councilmembers (including the Mayor) is absent.

19. PROTESTS

Any Councilmember shall have the right to have the reasons for his/her dissent from, or protest against, any action of the Council entered in the minutes.

20. ADJOURNMENT

A motion to adjourn shall always be in order and decided without debate.

21. RULES AVAILABLE FOR PUBLIC REVIEW

A copy of this Resolution shall be available at all meetings of the Council for review by the public.

22. RESCIND PREVIOUS RESOLUTION

This Resolution replaces Resolution No. 31-2003.

MEMORANDUM

ITEM 12.3.

DATE: May 18, 2026

TO: Honorable Mayor and Council Members

FROM: Amanda Norton, Economic Development Director

SUBJECT: **A RESOLUTION OF INTENTION TO MODIFY THE RANCHO CORDOVA TOURISM BUSINESS IMPROVEMENT DISTRICT**

RECOMMENDATION

Adopt the Resolution.

RESULT OF RECOMMENDED ACTION

Adoption of the Resolution would result in a public meeting on June 15, 2026, and a public hearing on July 6, 2026, on the modification of the Rancho Cordova Tourism Business Improvement District (RCTBID) and the levy of assessments on certain lodging businesses.

BACKGROUND

The Rancho Cordova Tourism Business Improvement District (RCTBID) is a benefit assessment district proposed to continue a revenue source to help fund marketing and sales promotions and destination development programs for assessed Rancho Cordova lodging businesses. This approach has been used successfully in other destination areas throughout the state to improve tourism and drive additional room nights to assessed businesses.

The Property and Business Improvement District Law of 1994, Streets and Highways Code §36600 et seq., allows for the Owners' Association to request that the city modify the Management District Plan (Plan). As the RCTBID Owners' Association, Rancho Cordova Travel and Tourism Corporation (RCTTC) provided a written request to the City Council to modify the RCTBID Plan. This written request was submitted on February 17, 2026. The proposed modification of the RCTBID Plan will include modifying the boundaries of the RCTBID to establish two benefit zones and increasing the assessment rate within DOVA Zone from four and one-half of one percent (4.5%) to six percent (6%). The modified RCTBID will continue to include all lodging businesses with two (2) rooms or more located within the boundaries of the City of Rancho Cordova.

TOURISM BUSINESS IMPROVEMENT DISTRICTS

Tourism Business Improvement Districts (TBIDs) utilize the efficiencies of private sector operation in the market-based promotion of tourism. These special assessment districts allow assessed business owners to organize their efforts to increase tourism. Business owners within the TBID fund the TBID, and those funds are used to provide services that are desired by and

benefit the assessed businesses within the TBID.

TBID benefits:

- Funds cannot be diverted for other government programs;
- They are customized to fit the needs of each destination;
- They allow for a wide range of services; including: destination marketing, tourism promotion, and sales lead generation;
- They are designed, created and governed by those who will pay the assessment; and
- They provide a stable funding source for tourism promotion.

In California, TBIDs are primarily formed pursuant to the Property and Business Improvement District Law of 1994 (94 Law). This law allows for the creation of special benefit assessment districts to raise funds within a specific geographic area. The key difference between TBIDs and other special benefit assessment districts is that funds raised are returned to the private non-profit corporation governing the TBID.

RCTBID MODIFICATION PROCESS

May 18, 2026	Adopt Resolution of Intention to Modify Upon the submission of a written request from the Owners' Association of the RCTBID, the City Council (Council) may initiate proceedings to modify the RCTBID by the adoption of a resolution expressing its intention to modify the RCTBID.
No later than May 22, 2026	NOTICE The 94 Law requires the City to mail written notice to the owners of all businesses proposed to be assessed within the RCTBID. Mailing the notice begins a mandatory forty-five (45) day period in which assessed business owners may protest RCTBID modification.
June 15, 2026	PUBLIC MEETING Allow public testimony on the modification of the RCTBID and levy of assessments. No Council action required.
July 6, 2026	FINAL PUBLIC HEARING If written protests are received from the owners of businesses in the modified RCTBID which will pay fifty percent (50%) or more of the assessments proposed to be levied, and protests are not withdrawn so as to reduce the protests to less than fifty percent (50%), no further proceedings to levy the proposed assessment against such businesses shall be taken for a period of one (1) year from the date of the finding of a majority protest by the Council. If the Council, following the public hearing, decides to establish the modified RCTBID, the Council shall adopt a resolution of modification.

FISCAL IMPACT AND FUNDING SOURCE

None immediately. The city will continue to receive a fee of two percent (2%) of the amount collected to cover its costs of administration. Because the RCTBID programs are intended to increase visitation to the city, there may be an increase in transient occupancy tax and sales tax collections.

CITY OF RANCHO CORDOVA

RESOLUTION NO. XX-2026

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA, STATE OF CALIFORNIA, DECLARING ITS INTENTION TO MODIFY THE RANCHO CORDOVA TOURISM BUSINESS IMPROVEMENT DISTRICT, FIXING THE TIME AND PLACE OF A PUBLIC HEARING THEREON, AND GIVING NOTICE THEREOF

WHEREAS, the City of Rancho Cordova (City) created the Rancho Cordova Tourism Business Improvement District (RCTBID) on December 6, 2010, by Resolution No. 136-2010; and

WHEREAS, on April 19, 2021, the City Council subsequently adopted Resolution No. 44-2021 adopting the Management District Plan (Plan) and renewing the RCTBID for an additional ten (10) year term; and

WHEREAS, the Property and Business Improvement District Law of 1994 (Streets and Highways Code §36600 et seq.) authorizes cities to modify the Plan at the request of the Owners' Association; and

WHEREAS, the RCTBID Owners' Association, Rancho Cordova Travel and Tourism Corporation (RCTTC), has requested modification of the Plan.

NOW, THEREFORE, BE IT HEREBY RESOLVED BY THE CITY COUNCIL OF THE CITY OF RANCHO CORDOVA as follows:

1. The recitals set forth herein are true and correct.

2. The City Council declares its intention to modify the RCTBID Plan.

3. The proposed modifications of the RCTBID Plan will include implementing updates to modernize the Plan, modifying the boundaries of the RCTBID to establish two benefit zones and increasing the assessment rate within DOVA Zone from four and one-half of one percent (4.5%) to six percent (6%), as described below.

a. The boundaries of the RCTBID shall be modified to establish two benefit zones, as shown on the map attached hereto and incorporated herein by reference.

b. The current annual assessment rate levied on all lodging businesses with two (2) rooms or more within the RCTBID is four and one-half of one percent (4.5%) of gross room rental revenue. The modified annual assessment rate for lodging businesses with two (2) rooms or more located within DOVA Zone shall be increased from four and one-half of one percent (4.5%) to six percent (6%) of gross room rental revenue, as shown in the table below:

Zone	Assessment Rate
DOVA Zone	6.0%
Zone 1	4.5%

4. The time and place for a public meeting for comments on the modification of the RCTBID Plan are set for June 15, 2026, at 5:30 PM, or as soon as possible thereafter as the matter may be heard, at Council Chambers located at 2729 Prospect Park Drive, Rancho Cordova, CA 95670.

5. The time and place for a public hearing on modification of the RCTBID Plan is set for July 6, 2026, at 5:30 PM or as soon thereafter as the matter may be heard at Council Chambers located at 2729 Prospect Park Drive, Rancho Cordova, CA 95670.

6. At the public meeting and hearing, the testimony of all interested persons for or against the modification of the RCTBID may be received. If at the conclusion of the public hearing, there are of record written protests by the owners of the lodging businesses within the modified RCTBID that will pay fifty percent (50%) or more of the estimated total assessment of the entire RCTBID, no further proceedings to modify the RCTBID shall occur for a period of one (1) year.

7. This Resolution shall take effect immediately upon its adoption by the City Council.

PASSED AND ADOPTED by the City Council of the City of Rancho Cordova on the 18th Day of May 2026 by the following vote:

CORDOVA
CALIFORNIA

I. OVERVIEW

Developed by Rancho Cordova Travel & Tourism Corporation (RCTTC) and Rancho Cordova hoteliers, the Rancho Cordova Tourism Business Improvement District (RCTBID) is an assessment district proposed to provide specific benefits to payors by funding marketing, sales promotion efforts, and destination development for assessed businesses. This approach has been used successfully in other destination areas throughout the country to provide the benefit of additional room night sales directly to payors.

This Management District Plan, as modified in 2026, reflects updates to the structure, assessment methodology, and programmatic elements of the RCTBID, including the establishment of benefit zones to reflect differing levels and types of benefit expected to be received by assessed lodging businesses.

Dova Zone is intended to accommodate concentrated visitor-serving, hospitality, entertainment, event, and related destination development anticipated to generate overnight visitation and room-night demand.

Location: The RCTBID includes all Lodging Businesses with two (2) rooms or more located within the boundaries of the City of Rancho Cordova, as shown on the map in Section IV. The RCTBID includes two benefit zones; assessments, services, and expenditures shall be administered in a manner consistent with the benefits anticipated to be conferred within each benefit zone.

Services: RCTBID is designed to provide specific benefits directly to payors by increasing awareness and demand for room night sales. Marketing and sales promotions and destination development programs will increase demand for overnight tourism and market payors as tourist, meeting and event destinations, thereby increasing demand for room night sales. For Dova Zone, such destination development programs may include visitor-serving capital improvements, public realm improvements, event and entertainment infrastructure, transportation and mobility improvements, programming, marketing, and related facilities, uses, and activities intended to support overnight visitation and lodging demand.

Budget: The total RCTBID annual assessment budget for the initial year of its ten (10) year operation is anticipated to be approximately $2,464,000. This amount may fluctuate as room sales do, as businesses open and close, and if the assessment rate is increased pursuant to this Plan. At the time of this modification, this budget reflects assessments generated from existing Lodging Businesses and does not include revenues attributable to Dova Zone, for which assessments will commence upon the operation of Lodging Businesses within Dova Zone.

Cost: The annual assessment rate is a percentage of gross room rental revenue, varied by benefit zone. The initial annual assessment rate for each benefit zone is shown in the table below.

Zone	Assessment Rate
Dova Zone	6.0%
Zone 1	4.5%

At the City of Rancho Cordova City Council's discretion, assessments collected may be used to repay a capital infrastructure bond if the City Council chooses to issue bonds. Until and unless bonds are issued, any funds collected by the RCTBID will be used towards the services outlined in this Plan. The assessment levied pursuant to this Plan will also not be collected on stays pursuant to contracts executed prior to July 1, 2021. Stays pursuant to contracts executed between September 1, 2013 and June 30, 2021 shall instead be subject to assessment at the rate of $1.50 per paid occupied room per night. During the ten (10) year term, the assessment rate may be increased annually by the RCTBID Owners' Association by a maximum of one percent (1%) of gross room rental revenue per year, as described in Section IV. The total assessment rate may not exceed ten percent (10%) in any zone.

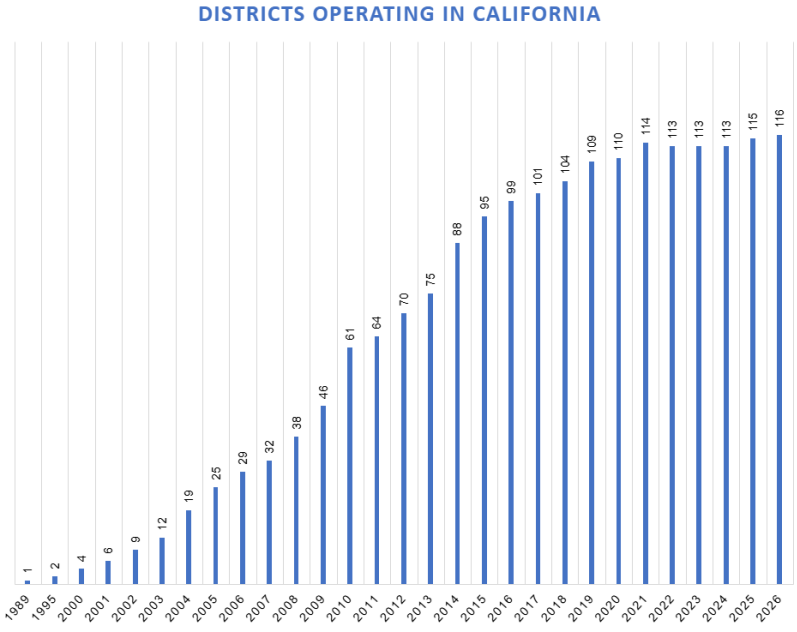

Collection: The City of Rancho Cordova (City) will be responsible for collecting the assessment on a monthly basis (including any delinquencies, penalties and interest) from each assessed Lodging business located in the boundaries of the RCTBID. The City shall take all reasonable efforts to collect the assessments from each Lodging Business.

Duration: RCTBID will have a ten (10) year life, beginning July 1, 2021 through June 30, 2031. Once per year, beginning on the anniversary of RCTBID renewal, there is a thirty (30) day period in which owners paying fifty percent (50%) or more of the assessment may protest and initiate a City Council hearing on RCTBID termination. This provision shall be read together with the governance provisions applicable to Dova Zone pursuant to Section VI.

Management: Rancho Cordova Travel and Tourism Corporation (RCTTC) will continue to serve as the RCTBID Owners' Association. The Owners' Association is charged with managing funds and implementing programs in accordance with this Plan and must provide annual reports to the City Council. This provision shall be read together with the governance provisions applicable to Dova Zone pursuant to Section VI.

II. BACKGROUND

TBIDs are an evolution of the traditional Business Improvement District. The first TBID was formed in West Hollywood, California in 1989. Since then, over 100 California destinations have followed suit. In recent years, other states have begun adopting the California model – Montana, South Dakota, Washington, Colorado, Texas and Louisiana have adopted TBID laws. Several other states are in the process of adopting their own legislation. The cities of Wichita, Kansas and Newark, New Jersey used an existing business improvement district law to form a TBID. And, some cities, like Portland, Oregon and Memphis, Tennessee have utilized their home rule powers to create TBIDs without a state law.

California's TBIDs collectively raise over $300 million annually for local destination marketing. With competitors raising their budgets, and increasing rivalry for visitor dollars, it is important that Rancho Cordova Lodging Businesses continue to invest in stable, lodging-specific marketing programs.

TBIDs utilize the efficiencies of private sector operation in the market-based promotion of tourism districts. TBIDs allow lodging business owners to organize their efforts to increase demand for room night sales. Lodging business owners within the TBID pay an assessment and those funds are used to provide services that increase demand for room night sales.

In California, most TBIDs are formed pursuant to the Property and Business Improvement District Law of 1994. This law allows for the creation of a benefit assessment district to raise funds within a specific geographic area. *The key difference between TBIDs and other benefit assessment districts is that funds raised are returned to the private non-profit corporation governing the district.*

There are many benefits to TBIDs:

- Funds must be spent on services and improvements that provide a specific benefit only to those who pay;
- Funds cannot be diverted to general government programs;
- They are customized to fit the needs of payors in each destination;
- They allow for a wide range of services;
- They are ***designed, created and governed by those who will pay*** the assessment; and
- They provide a stable, long-term funding source for tourism promotion.

III. RANCHO CORDOVA TRAVEL & TOURISM CORPORATION ACCOMPLISHMENTS

Established in 2010, but formally organized in 2011, the Rancho Cordova Tourism Business Improvement District (RCTBID) set out to increase the number of district visitors, improve the brand of the destination and increase market share for the hotels in Rancho Cordova. Through robust marketing, business development, brand positioning and consistent relationship management, the Visit Rancho Cordova brand, managed by Rancho Cordova Travel & Tourism Corporation (RCTTC) has accomplished these goals and continues to serve as an asset to the Rancho Cordova community. Since the formation of RCTBID in 2011 through year- end 2019, Occupancy rate increased 49.2%, Average Daily Rate (ADR) increased by 44.1%, and RevPAR increased by 77.6%. Over this same timeframe, nationally the Occupancy rate increased 15.1%. At the time of the 2026 modification of this Plan, occupancy has trended close to national averages with a slight decrease to 61.1%, while ADR has continued to climb, resulting in flat RevPAR for hotels. (Source: Statista).

Mission:
To drive sustainable tourism in Rancho Cordova that increases economic impact, supports local hotels and businesses, and enhances the quality of life for residents and visitors alike.

Vision:
To put Rancho Cordova on the map as a must-visit hidden gem destination.

Values:
Ambassadors of Community, Collaboration-Fueled, Inclusive at the Core, Always Trustworthy, Possibility-Minded, Unapologetically Joyful.

Brand Promise:
Stunning landscapes, cultural richness, and quirky experiences make Rancho Cordova one-of-a-kind.

Visitor Promise:
In Rancho Cordova, every traveler belongs and there is something for everyone.

Marketing Impact:

- Website impact of 1.4 million sessions, 1.9 million views, and engagement rate of 32.7% since January 1, 2019; influencing, from July-December 2025, over $1,318,321.25 in visitor spending.
- Social media impact of 37,000+ followers across all channels, including a reach of 888,000 on Meta platforms since January 2023 and 1.7 million views on Instagram collaboration posts from 2024-2025.
- Paid commercial CTV advertisement impact surpassing 174,229 total plays since November 2025.
- Ongoing direct booking campaigns with Expedia, resulting in over 2,048,466 impressions, 1,845 hotel nights, and $247,514 in bookings from 2024-2025.
- Leisure media and PR impact resulting in a printed distribution of more than 1.5 million and more than a digital distribution of 1.8 million from 2024-2025.
- Promotional impact of over 30,000 items distributed to assessed hotels, residents, travelers, and Sacramento International Airport from 2024-2025.
- UGC (User Generated Content) online photo galleries garnered 196,700 views since January 1, 2025.
- Virtual tour impact of 2,794,838 Google views and 876,887 clicks via Threshold 360 since January 1, 2023.

Sales & Business Development Impact:

- Since 2022, we have hosted 40 meeting and event planners from 11 states across the U.S. and Mexico for Meeting Planner Familiarization Trips
- Since 2022, we have hosted 5 partner Destination Analysis immersions
- Since 2022, we have conducted over 700 tradeshow appointments
- In 2025 generated 195 leads consisting of 76,785 room nights and $51,083,905.38 in potential economic impact and support 14,064 jobs

IV. BOUNDARY

The RCTBID will include all Lodging Businesses existing and in the future that have two (2) rooms or more, available for public occupancy within the boundaries of the City of Rancho Cordova. The RCTBID is divided into two (2) benefit zones based on the benefits conferred on Lodging Businesses within each zone. Lodging Businesses in Dova Zone are assessed at a higher rate due to their location within Dova Zone and the greater benefit they are expected to receive from RCTBID funded services. Dova Zone is intended to include concentrated visitor-serving and destination-generating development, including future lodging, hospitality, entertainment, event, meeting, sports, mobility, and related improvements, all of which are expected to materially enhance overnight visitation and lodging demand. Any future Lodging Businesses located within Dova Zone, whether or not affiliated with any existing Dova Zone development, shall be subject to the Dova Zone assessment structure and governance provisions set forth in this Plan.

"Lodging Business" means: any structure, or any portion of any structure, which is occupied or intended or designed for occupancy by transients for dwelling, lodging or sleeping purposes, and includes any hotel, inn, tourist home or house, motel, studio hotel, bachelor hotel, lodging house, rooming house, apartment house, dormitory, public or private club, mobile home or house trailer at a fixed location, or other similar structure or portion thereof.

The boundary, as shown in the map below, currently includes seventeen (17) Lodging Businesses. A complete listing of Lodging Businesses within the RCTBID can be found in Appendix 2.

V. BUDGET AND SERVICES

A. Annual Service Plan

Assessment funds will be spent to provide specific benefits conferred or privileges granted directly to assessed Lodging Businesses, that are not provided to those not charged, and which do not exceed the reasonable cost to the City of conferring the benefits or granting the privileges. The privileges and services provided with the RCTBID funds are sales and marketing promotions and destination development programs available only to assessed Lodging Businesses. Funds attributable to each benefit zone shall be administered in a manner consistent with the specific benefits to be conferred on assessed Lodging Businesses within that benefit zone.

A service plan assessment budget has been developed to deliver services that benefit the assessed Lodging Businesses. A detailed annual assessment budget will be developed and approved by RCTTC. The table below illustrates the initial annual assessment budget allocations. The total initial assessment budget is $2,464,000. Assessments for Dova Zone are not reflected in the initial assessment budget because there are currently no operating businesses within the Zone.

Although actual revenues will fluctuate due to market conditions, the proportional allocations of the budget shall remain the same. However, the City and the RCTTC board shall have the authority to adjust budget allocations between the categories by no more than fifteen percent (15%) of the total budget per year; provided, however, that any exercise of such authority by RCTTC with respect to Dova Zone funds shall be subject to the Dova Zone governance provisions of this Plan. Dova Zone funds shall not be commingled with Zone 1 funds. A description of the proposed improvements and activities for the initial year of operation is below. The same activities are proposed for subsequent years. In the event of a legal challenge against the RCTBID, any and all assessment funds may be used for the costs of defending the RCTBID.

Each budget category includes all costs related to providing that service. For example, the sales and marketing budget includes the cost of staff time dedicated to overseeing and implementing the sales and marketing program. Staff time dedicated purely to administrative tasks is allocated to the administrative portion of the budget. The costs of an individual staff member may be allocated to multiple budget categories. The staffing levels necessary to provide the services below will be determined by the RCTTC on an as- needed basis.

Sales and Marketing

A sales and marketing program will promote assessed–Lodging Businesses as tourist, meeting, and event destinations. The sales and marketing program will have a central theme of promoting Rancho Cordova as a desirable place for overnight visits. The program will have the goal of increasing demand for overnight visitation and room night sales at assessed Lodging Businesses, and may include the following activities:

- Internet marketing efforts to increase awareness and optimize internet presence to drive demand for overnight visitation and room sales to assessed Lodging Businesses;
- Print ads in magazines and newspapers, television ads, and radio ads targeted at potential visitors to drive demand for overnight visitation and room sales to assessed Lodging Businesses;
- Attendance of trade shows to promote assessed Lodging Businesses;
- Sales blitzes for assessed Lodging Businesses;
- Familiarization tours of assessed Lodging Businesses;
- Preparation and production of collateral promotional materials such as brochures, flyers and maps featuring assessed Lodging Businesses;
- Attendance of professional industry conferences and affiliation events to promote assessed-Lodging Businesses;
- Lead generation activities designed to attract tourists and group events to assessed Lodging Businesses;
- Director of Sales and General Manager meetings to plan and coordinate tourism promotion efforts for assessed Lodging Businesses;
- Development and maintenance of a website designed to promote assessed Lodging Businesses;
- Coordination of press pitching, curated media trips, and influencer opportunities to drive visitation to assessed Lodging Businesses;
- Development of social media, video, and photography content to promote assessed Lodging Businesses; and
- Strategic development and maintenance of e-newsletters for leisure, meeting, and advocacy audiences to drive visitation to assessed Lodging Businesses.

Destination Development

Destination Development ("DD") shall be administered separately for Dova Zone and Zone 1 in a manner consistent with the benefit zone structure and governance provisions set forth in this Plan. DD funded from Zone 1 or other non-Dova Zone revenues will be eighteen percent (18%) of the applicable annual budget, unless otherwise adjusted in accordance with this Plan. As the total number of rooms sold and room prices increase over time, the amount of available funds for projects is anticipated to increase. With respect to DD projects funded from Zone 1 or other non-Dova Zone revenues, RCTTC, working collaboratively with the City Manager, shall develop specific DD funding criteria. The City and RCTTC may provide input regarding such projects, and any public works project contract shall be awarded in accordance with Public Contract Code and Municipal Code requirements.

Notwithstanding the foregoing, DD projects, improvements, activities, programs, and related expenditures funded in whole or in part from Dova Zone revenues shall be governed in accordance with the Dova Zone governance provisions of this Plan. With respect to Dova Zone funds, the Dova Zone Special Committee shall establish project criteria, priorities, and approvals for Dova Zone improvements, activities, programs, and related expenditures funded from Dova Zone ~~1~~ revenues. RCTTC shall have a role limited to administration, implementation, and compliance with this Plan and applicable law, and shall not have discretion to approve, deny, reallocate, or reprioritize Dova Zone projects, activities, programs, or expenditures except as directed by the Dova Zone Special Committee or as required for compliance with applicable law. These DD projects may include:

- Comprehensive and integrated wayfinding signage system including signage to parking decks and lots;
- Transportation programs connecting hotels with downtown and other attractions, to increase room night sales at assessed Lodging Businesses;
- Art and cultural projects, to attract overnight visitors;
- Gateway enhancements, to attract overnight visitors;
- Enhancements to environmental experiences which attract overnight visitors, and shall expose visitors to the value of the vital ecosystems;
- Improvements to existing parks and sports facilities utilized by overnight visitors;
- Safe and fun entertainment complex for young teens and adults utilized by overnight visitors;
- Live music venue which attracts overnight visitors;
- Infrastructure improvements that enhance Destination competitive position to attract desirable special events year around and attract overnight visitors;
- Public gathering and festival spaces;
- Convention, meeting, and conference facilities;
- Youth and amateur sports facilities and complexes;
- Mobility, circulation, and transportation improvements, including innovative transportation systems intended to improve access to visitor-serving destinations;
- Structured parking, utilities, security, lighting, wayfinding, public realm, and related visitor-serving infrastructure; and
- Other facilities and improvements designed to support tourism, events, entertainment, and overnight visitation.

Dova Zone Use of Funds

Dova Zone funds shall be used for any improvements, activities, and programs permitted under this Plan and applicable law, including, without limitation, capital improvements, destination development, and other visitor-serving uses, in each case designed to drive overnight visitation to assessed Lodging Businesses. Funds raised within the Dova Zone are authorized for disbursement and/or allocation if approved by the Dova Zone Special Committee. Dova Zone expenditures may fund, but are not limited to, the following: financing, bonding, or other funding mechanisms associated with the development, construction, or operation of arena or stadium facilities, meeting and conference spaces, youth sports facilities, and ancillary visitation infrastructure situated within the Dova Zone and benefitting assessed Lodging Businesses. Dova Zone funds shall be separately accounted for. Permitted Dova Zone uses may include, without limitation, visitor-serving capital improvements, destination development improvements, and related infrastructure designed to drive overnight visitation to assessed Lodging Businesses within Dova Zone, including event venues, public plazas and festival areas, convention and meeting facilities, youth and amateur sports facilities, transportation and mobility improvements, parking, utilities, lighting, security, signage, wayfinding, public realm improvements, programming, marketing, operations, and related visitor-serving facilities, improvements, and activities. Dova Zone funds may be used for construction, programming, marketing, operations, financing, and other permitted uses within Dova Zone, including associated debt repayment. An amount equal to five percent (5%) of the revenue derived from the Dova Zone assessment in any year shall be allocated to RCTTC to pay for renewal and benefits received from the RCTTC programming including, but not limited to, sales activities related to the proposed arena.

Administration and Operations

The administration and operations portion of the budget shall be utilized for administrative staffing costs, office costs, advocacy, and other general administrative costs such as insurance, legal, and accounting fees. Shared staffing, contracting, administrative services, programs, and other resources may be used for Dova Zone, Zone 1, or both benefit zones, provided that all costs are separately accounted for and charged or allocated on a reasonable basis consistent with the benefits conferred on each benefit zone, including direct charges for costs attributable solely to Dova Zone and incremental shared costs reasonably allocable to Dova Zone based on the direct benefits conferred on Dova Zone.

City Administration Fee

The City of Rancho Cordova shall be paid a fee equal to two percent (2%) of the amount of assessment collected, to cover its costs of collection and administration.

Contingency/Reserve

The budget includes a contingency line item to account for uncollected assessments, if any. If there are contingency funds collected, they may be held in a reserve fund or utilized for other program, administration or renewal costs at the discretion of the RCTTC Board. Policies relating to contributions to the reserve fund, the target amount of the reserve fund, and expenditure of monies from the reserve fund shall be set by the RCTTC Board. Contingency/reserve funds may be spent on District programs or administrative and renewal costs in such proportions as determined by the RCTTC Board. The reserve fund from both zones shall be used for the costs of renewing the RCTBID. Any contingency or reserve funds attributable to Dova Zone-shall be separately accounted for.

Annual Budget

The total ten (10) year improvement and service plan budget is projected at approximately $2,464,000 annually, and for a total amount of $64,760,489 through 2031 if the maximum assessment rate increases are adopted. This budget is expected to fluctuate as room sales change and if the assessment rate is increased. The initial annual assessment rate is a percentage of gross room rental revenue, varied by benefit zone.

The initial annual assessment rate for Dova Zone is six percent (6%) of gross room rental revenue and for Zone-1 is four and one half of one percent (4.5%) of gross room rental revenue. At the time of the 2026 modification of this Plan, the projected budget does not reflect any adjustment attributable to Dova Zone, as there are currently no operational Lodging Businesses subject to the Dova Zone 1–6% assessment. The absence of currently operating Dova Zone Lodging Businesses shall not limit the future administration, segregation, budgeting, governance, or use of Dova Zone funds once assessments are generated within Dova Zone. Separate Dova Zone budget reporting shall commence upon the first collection of Dova Zone-assessments.

The Owners' Association may increase the assessment rate by a maximum of one percent (1%) per year to a maximum rate of ten percent (10%) for any zone. If the maximum annual assessment increases are adopted by the Owners' Association upon approval from City Council, the annual budget will increase as illustrated in the table below. The assessment rate might not increase starting in 2022, the increases may be implemented in later years at the discretion of the Owners' Association. The table below demonstrates the maximum with the assumption that the rates will be increased in annually from 2022 through 2027 as it is a required disclosure, it is not the anticipated course of action. Alternate courses of action may be taken in regards to implementing the assessment rate increase other than what is demonstrated in the chart below, within the parameters of this Management District Plan. For example, increases may be implemented in years 2028-2031, with the stipulation that each annual increase is no more than one percent (1%) and that the total assessment rate may not exceed ten percent (10%) for any zone.

Tables A and B below reflect the historical budget from 2021 through 2025. Beginning in 2026 as a result of the modification of this Plan, the budget structure has been updated to consolidate Destination Recovery and Crisis Response funding into the Sales and Marketing category, and this revised structure is reflected in Tables C and D on the following pages. Additionally, a three percent (3%) annual increase in the total budget is shown, to account for estimated increased room night sales as a result of RCTBID efforts. This three percent (3%) annual increase is a conservative estimate based on the effects of similarly sized TBID budgets.

Table A
Estimated Annual Budget If Maximum Assessment Rates Are Adopted 2021-2026

Year	Sales & Marketing	Administration	Destination Development	Destination Recovery	Contingency/ Reserve	City Fee	Total
2021-22	$1,158,080	$492,800	$443,520	$197,120	$123,200	$49,280	**$2,464,000**
2022-23	$1,457,868	$620,369	$558,332	$248,148	$155,092	$62,037	**$3,101,846**
2023-24	$1,774,595	$755,147	$679,632	$302,059	$188,787	$75,515	**$3,775,734**
2024-25	$2,109,136	$897,505	$807,754	$359,002	$224,376	$89,750	**$4,487,524**
2025-26	$2,461,993	$1,047,657	$942,891	$419,063	$261,914	$104,766	**$5,238,283**
Total	**$8,961,672**	**$3,813,478**	**$3,432,129**	**$1,525,392**	**$953,369**	**$381,348**	**$19,067,387**

The table below demonstrates the annual improvement and service plan budget with the assumption that the rates will not be increased during years 2021-2026 of the district's ten (10) year term. Additionally, a three percent (3%) annual increase in the total budget is shown to account for estimated increased room night sales as a result of RCTBID efforts.

Table B
Estimated Annual Budget If Maximum Assessment Rates Are Not Adopted 2021-2026

Year	Sales & Marketing	Administration	Destination Development	Destination Recovery	Contingency /Reserve	City Fee	Total
2021-22	$1,158,080	$492,800	$443,520	$197,120	$123,200	$49,280	**$2,464,000**
2022-23	$1,192,822	$507,584	$456,826	$203,034	$126,896	$50,758	**$2,537,920**
2023-24	$1,228,607	$522,812	$470,530	$209,125	$130,703	$52,281	**$2,614,058**
2024-25	$1,265,465	$538,496	$484,646	$215,398	$134,624	$53,850	**$2,692,479**
2025-26	$1,303,429	$554,651	$499,186	$221,860	$138,663	$55,465	**$2,773,254**
Total	**$6,148,403**	**$2,616,343**	**$2,354,708**	**$1,046,537**	**$654,086**	**$261,634**	**$13,081,711**

The following tables reflect the consolidation of the Destination Recovery and Crisis Response category as a result of the 2026 modification of this Plan.

Table C
Estimated Annual Budget If Maximum Assessment Rates Are Adopted 2026-2031

Year	Sales & Marketing	Administration	Destination Development	Contingency/ Reserve	City Fee	Total
2026-27	$3,316,760	$1,206,095	$1,085,485	$301,524	$120,609	**$6,030,473**
2027-28	$5,214,242	$1,896,088	$1,706,479	$474,022	$189,609	**$9,480,441**
2028-29	$5,370,669	$1,952,971	$1,757,674	$488,243	$195,297	**$9,764,854**
2029-30	$5,531,790	$2,011,560	$1,810,404	$502,890	$201,156	**$10,057,800**
2030-31	$5,697,744	$2,071,907	$1,864,716	$517,977	$207,191	**$10,359,534**
Total	**$25,131,205**	**$12,952,098**	**$11,656,888**	**$3,238,024**	**$1,295,210**	**$45,693,102**

The table below demonstrates the annual improvement and service plan budget with the assumption that the rates will not be increased during years 2026-2031 of the district's ten (10) year term. Additionally, a three percent (3%) annual increase in the total budget is shown to account for estimated increased room night sales as a result of RCTBID efforts.

Table D
Estimated Annual Budget If Maximum Assessment Rates Are Not Adopted 2026-2031

Year	Sales & Marketing	Administration	Destination Development	Contingency/ Reserve	City Fee	Total
2026-27	$1,571,048	$571,290	$514,161	$142,823	$57,129	**$2,856,451**
2027-28	$1,618,180	$588,429	$529,586	$147,107	$58,843	**$2,942,145**
2028-29	$1,666,725	$606,082	$545,474	$151,520	$60,608	**$3,030,409**
2029-30	$1,716,727	$624,264	$561,838	$156,066	$62,426	**$3,121,321**
2030-31	$1,768,229	$642,992	$578,693	$160,748	$64,299	**$3,214,961**
Total	**$8,340,909**	**$5,649,400**	**$5,084,460**	**$1,412,350**	**$564,940**	**$15,165,287**

B. California Constitutional Compliance

The RCTBID assessment is not a property-based assessment subject to the requirements of Proposition 218. Courts have found Proposition 218 limited the term 'assessments' to levies on real property.[1] Rather, the RCTBID assessment is a business-based assessment, and is subject to Proposition 26. Pursuant to Proposition 26 all levies are a tax unless they fit one of seven exceptions. Two of these exceptions apply to the RCTBID, a "specific benefit" and a "specific government service." Both require that the costs of benefits or services do not exceed the reasonable costs to the City of conferring the benefits or providing the services. The assessment imposed by this Plan is a business-based assessment used to provide specific benefits directly to assessed Lodging Businesses.

1. Specific Benefit

Proposition 26 requires that assessment funds be expended on, "a specific benefit conferred or privilege granted directly to the payor that is not provided to those not charged, and which does not exceed the reasonable costs to the local government of conferring the benefit or granting the privilege."[2] The services in this Plan are designed to provide targeted benefits directly to assessed Lodging Businesses, and are intended only to provide benefits and services directly to those Lodging Businesses paying the assessment. These services are tailored not to serve the general public, businesses in general, or parcels of land, but rather to serve the specific businesses within the RCTBID. The activities described in this Plan are specifically targeted to increase demand for room night sales for assessed Lodging Businesses within the boundaries of the RCTBID, and are narrowly tailored. RCTBID funds will be used-to provide specific benefits directly to the assessees that increase room night demand. Assessment funds shall not be used to feature non-assessed Lodging Businesses in RCTBID programs, or to directly generate sales for non- assessed businesses. The activities paid for from assessment revenues are business services constituting and providing specific benefits to the assessed-Lodging Businesses.

The assessment imposed by this RCTBID is used to provide specific-benefits directly to the payors that are not provided to those not charged. Those specific benefits include increased demand for room night sales for assessed Lodging Businesses. Those specific benefits, including increased demand for room night sales for assessed Lodging Businesses, will be provided only to–Lodging Businesses paying the district assessment, with marketing and sales programs promoting Lodging Businesses paying the RCTBID assessment. The marketing and sales programs will be designed to

[1] *Jarvis v. the City of San Diego* 72 Cal App. 4th 230
[2] Cal. Const. art XIII C § 1(e)(1)

increase room night sales at each assessed Lodging Business. Because they are necessary to provide the marketing and sales promotions and destination development programs that provide specific benefits to assessed Lodging Businesses, the administration and contingency services are also necessary to provide those specific benefits, including increased demand for room night sales, to assessed Lodging Businesses

Although the RCTBID, in providing specific benefits to payors, may produce incidental benefits to non-paying businesses, the incidental benefit does not preclude the services from being considered a specific benefit. The legislature has found that, "A specific benefit is not excluded from classification as a 'specific benefit' merely because an indirect benefit to a nonpayor occurs incidentally and without cost to the payor as a consequence of providing the specific benefit to the payor."[3]

2. Specific Government Service

The assessment may also be utilized to provide, "a specific government service or product provided directly to the payor that is not provided to those not charged, and which does not exceed the reasonable costs to the local government of providing the service or product."[4] The legislature has recognized that marketing and promotions services like those to be provided by the RCTBID are government services within the meaning of Proposition 26.[5] Further, the legislature has determined that "a specific government service is not excluded from classification as a 'specific government service' merely because an indirect benefit to a nonpayor occurs incidentally and without cost to the payor as a consequence of providing the specific government service to the payor."[6]

3. Reasonable Cost

RCTBID services will be implemented carefully to ensure they do not exceed the reasonable cost of such services. The full amount assessed will be used to provide the services described herein. Funds will be managed by the RCTTC, and reports submitted on an annual basis to the City. Only assessed Lodging Businesses will be featured in marketing materials, receive sales leads generated from RCTBID-funded activities, be featured in advertising campaigns, and benefit from other RCTBID-funded services. Non- assessed Lodging Businesses will not receive these, nor any other, RCTBID-funded services and benefits.

The RCTBID-funded programs are all targeted directly at and feature only assessed businesses. It is, however, possible that there will be a spillover benefit to non-assessed businesses. If non-assessed Lodging Businesses receive incremental room nights, that portion of the promotion or program generating those room nights shall be paid with non- RCTBID funds. RCTBID funds shall only be spent to benefit the assessed businesses, and shall not be spent on that portion of any program which directly generates incidental room nights for non-assessed businesses.

C. Assessment

The annual assessment rate is a percentage of gross room rental revenue, varied by benefit zone. The initial annual assessment rate for each zone is shown in the table below.

Zone	Assessment Rate
Dova Zone	6.0%
Zone 1	4.5%

[3] Government Code § 53758(a)
[4] Cal. Const. art XIII C § 1(e)(2)
[5] Government Code § 53758(b)
[6] Government Code § 53758(b)

At the City Council's discretion, assessments collected may be used to repay a capital infrastructure bond if Council chooses to issue bonds. Until and unless bonds are issued, any funds collected by the RCTBID will be used towards the services outlined in this Plan. Based on the benefit received, assessments will not be collected on: charges incurred by a person in the performance of official duties as an officer or employee of a local, state or federal government entity, or by government-sponsored corporate charge card. The assessment levied pursuant to this Plan will also not be collected on stays pursuant to contracts executed prior to July 1, 2021. Stays pursuant to contracts executed between September 1, 2013 and June 30, 2021 shall instead be subject to assessment at the rate of $1.50 per paid occupied room per night. During the ten (10) year term, the assessment rate may be increased annually by the Owners' Association by a maximum of one percent (1%) of gross room rental. The total assessment rate may not exceed ten percent (10%) for any zone. Assessments collected from Lodging Businesses within Dova Zone shall constitute Dova Zone funds and shall be separately accounted for in accordance with this Plan. This requirement shall apply to all Lodging Businesses located within Dova Zone, whether or not affiliated with any existing Dova Zone development.

The term "gross room rental revenue" as used herein means: the consideration charged, whether or not received, for the occupancy of space in a Lodging Business valued in money, whether to be received in money, goods, labor or otherwise, including all receipts, cash, credits and property and services of any kind or nature, without any deduction therefrom whatsoever. Gross room rental revenue shall not include any federal, state or local taxes collected, including but not limited to transient occupancy taxes.

The assessment is levied upon and a direct obligation of the assessed Lodging Business. However, the assessed Lodging Business may, at its discretion, pass the assessment on to transients. The amount of assessment, if passed on to each transient, shall be disclosed in advance and separately stated from the amount of rent charged and any other applicable taxes, and each transient shall receive a receipt for payment from the business. If the RCTBID assessment is identified separately it shall be disclosed as the "RCTBID Assessment." As an alternative, the disclosure may include the amount of the RCTBID assessment and the amount of the assessment imposed pursuant to the California Tourism Marketing Act, Government Code §13995 et seq. and shall be disclosed as the "Tourism Assessment." The assessment is imposed solely upon, and is the sole obligation of the assessed Lodging Business even if it is passed on to transients. The assessment shall not be considered revenue for any purpose, including calculation of transient occupancy taxes.

Bonds may be issued.

D. Penalties and Interest

The RCTBID shall reimburse the City of Rancho Cordova for any costs associated with collecting unpaid assessments. If sums in excess of the delinquent RCTBID assessment are sought to be recovered in the same collection action by the City, the RCTBID shall bear its pro rata share of such collection costs. Assessed Lodging Businesses which are delinquent in paying the assessment shall be responsible for paying:

1. *Original Delinquency*. When an assessment becomes delinquent, any owner who fails to remit any assessment imposed by this Plan within the time required shall pay a penalty of 10 percent (10%) of the amount of the assessment in addition to the amount of the assessment.
2. *Continued Delinquency*. Any owner who fails to remit any delinquent remittance on or before a period of thirty (30) days following the date on which the remittance first became delinquent shall pay a second delinquency penalty of ten percent (10%) of the

amount of the assessment in addition to the amount of the assessment and the ten percent (10%) penalty first imposed.

3. *Fraud.* If the City determines that the nonpayment of any remittance due under this chapter is due to fraud, a penalty of twenty-five percent (25%) of the amount of the assessment shall be added thereto in addition to the penalties stated in subsections (1) and (2) of this section.
4. *Interest.* In addition to the penalties imposed, any owner who fails to remit any assessment imposed by this Plan shall pay interest at the rate of one and one-half percent (1.50%) per month or fraction thereof, compounded, on the amount of the assessment, exclusive of penalties, from the date on which the remittance first became delinquent until paid.
5. *Penalties Merged with Assessment.* Every penalty imposed and such interest as accrues under the provisions of this section shall become a part of the assessment herein required to be paid.

E. Time and Manner for Collecting Assessments

The RCTBID assessment will be implemented beginning July 1, 2021 and will continue for ten (10) years through June 30, 2031. The City will be responsible for collecting the assessment on a monthly basis (including any delinquencies, penalties and interest) from each Lodging Business. The City shall take all reasonable efforts to collect the assessments from each Lodging Business. The City shall forward the assessments collected to the Owners' Association. The City's monthly remittance and reporting shall separately identify collections, penalties, interest, delinquencies, and other amounts attributable to each benefit zone, including Dova Zone. Funds attributable to Dova Zone shall be deposited into the separate Dova Zone account or sub fund maintained pursuant to this Plan.

Concurrent with the remittal of assessment funds to the Owners Association, the City shall also provide monthly reports stating details surrounding businesses that are default on expected payments, as well as the term of their delinquency and any other relevant information for the Owners Association to reasonably determine which assessed Lodging Businesses are in compliance with the RCTBID assessment.

VI. GOVERNANCE

A. Owners' Association

The City Council, through adoption of this Management District Plan, has the right, pursuant to Streets and Highways Code §36651, to identify the body that shall implement the proposed program, which shall be the Owners' Association of the RCTBID as defined in Streets and Highways Code §36612. The City Council has determined that Rancho Cordova Travel and Tourism Corporation (RCTTC) will serve as the Owners' Association for the RCTBID.

1. *Dova Zone Special Committee.* Notwithstanding RCTTC's role as the Owners' Association, and unless and until the Dova Zone Lodging Businesses elect an alternative governance structure pursuant to the Future Governance Flexibility provisions below, all Dova Zone funds shall be administered pursuant to this subsection. The Dova Zone Special Committee shall have primary authority over Dova Zone fund governance as provided herein. The Dova Zone Special Committee is required to pay its proportionate fair share of any litigation costs regarding the district and any city collection costs for collecting and enforcing the assessment, identified as no more than 2% in the budget. A Dova Zone Special Committee shall be established consisting of not fewer than three (3) members, all of whom shall be appointed by the assessed Lodging Business within. If the Dova Zone Special Committee consists of three (3) members, at least one (1) member shall also be a current member of the RCTTC Board. If the Dova Zone Special

Committee consists of five (5) members, at least two (2) members shall also be current members of the RCTTC Board. In all cases, appointment authority shall remain solely with the Dova Zone assessed Lodging Businesses. Any such member or members who are also current members of the RCTTC Board shall nevertheless serve on the Dova Zone Special Committee solely by appointment of the Dova Zone assessed Lodging Businesses. The Dova Zone Special Committee may be established and convened earlier with the consent of the City and the Owners' Association and shall be established and convened no later than upon when construction breaks ground of a Lodging Business within Dova Zone. Subject to the general provisions in this plan requiring all district funds be available for legal defense of the district, and renewal. The Dova Zone Special Committee shall have primary authority over the budgeting, prioritization, approval, allocation, commitment, and expenditure of Dova Zone funds, including approval of Dova Zone projects, activities, programs, project criteria, annual budgets, reallocations within Dova Zone, reserves, and the use of Dova Zone funds to support financing or debt for permitted Dova Zone uses. RCTTC shall administer and implement the determinations of the Dova Zone Special Committee and shall not reallocate, encumber, expend, or otherwise commit Dova Zone funds except as directed by the Dova Zone Special Committee, subject only to compliance with applicable law, public contracting requirements, financing requirements, bond covenants, and related ministerial or compliance obligations. No action of the RCTTC Board shall be required to approve, ratify, or validate any determination of the Dova Zone Special Committee with respect to Dova Zone funds. No action of the Dova Zone Special Committee is intended to and does not supersede the City's legislative and land use authority under state law and its municipal code. This includes, but is not limited to, the requirement for Dova Zone projects to receive all required and applicable City approval and entitlements.

2. *RCTTC Board.* RCTTC shall include at least one member of its Board of Directors who is appointed by the owners of Lodging Businesses located within Dova Zone, effective upon no later than upon when construction breaks ground of a Lodging Business within Dova Zone. Any such member or members who are also current members of the RCTTC Board shall nevertheless serve on the Dova Zone Special Committee by appointment of the Dova Zone Owners.

3. *Future Governance Flexibility*. In light of the anticipated phased development of lodging within Dova Zone, including the possibility that Dova Zone Lodging Businesses may not commence operations immediately, the Dova Zone Special Committee shall serve as the governance structure for Dova Zone. Upon the commencement of operations of any Lodging Business within Dova Zone, the appointment structure of the Dova Zone Special Committee may be revised by amendment to this Plan; provided, however, that Dova Zone funds shall remain subject to Dova Zone governance.

B. Brown Act and California Public Records Act Compliance

An Owners' Association is a private entity and may not be considered a public entity for any purpose, nor may its board members or staff be considered to be public officials for any purpose. The Owners' Association is, however, subject to government regulations relating to transparency, namely the Ralph M. Brown Act and the California Public Records Act. These regulations are designed to promote public accountability. The Owners' Association acts as a legislative body under the Ralph M. Brown Act (Government Code §54950 et seq.). Thus, meetings of the RCTTC board and certain committees must be held in compliance with the public notice and other requirements of the Brown Act. The Owners' Association is also subject to the record keeping and disclosure requirements of the California Public Records Act. Accordingly, the Owners' Association shall publicly report any action taken and the vote or abstention on that action of each member present for the action.

To the extent applicable, the Dova Zone Special Committee shall be treated as a committee of the Owners' Association for purposes of transparency, recordkeeping, and public meeting requirements relating to matters within the subject matter of the district.

C. Annual Report

The RCTTC shall present an annual report at the end of each fiscal year of operation to the City Council and shall file the annual report with the City of Rancho Cordova City Clerk, pursuant to Streets and Highways Code §36650 (see Appendix 1). The annual report shall include:

- Any proposed changes in the boundaries of the improvement district or in any benefit zones or classification of businesses within the district.
- The improvements and activities to be provided for that fiscal year.
- An estimate of the cost of providing the improvements and the activities for that fiscal year.
- The method and basis of levying the assessment in sufficient detail to allow each business owner to estimate the amount of the assessment to be levied against his or her business for that fiscal year.
- The estimated amount of any surplus or deficit revenues to be carried over from a previous fiscal year.
- The estimated amount of any contributions to be made from sources other than assessments levied pursuant to this part.
- Separate reporting for Dova Zone revenues, expenditures, reserves, carryovers, and commitments.
- A description of Dova Zone projects, activities, and financing approved or proposed for the applicable fiscal year.
- Any proposed changes to the governance, budgeting, or administration of Dova Zone, including any election by the Dova Zone assessed Lodging Businesses to pursue a separate Dova Zone owners' association or successor governance structure.

APPENDIX 1 – LAW

CURRENT THROUGH CH. 790 OF THE LEGISLATION FROM THE 2025-2026 REGULAR SESSION, EFFECTIVE AS OF OCTOBER 13, 2025

STREETS AND HIGHWAYS CODE
DIVISION 18. PARKING
PART 7. PROPERTY AND BUSINESS IMPROVEMENT DISTRICT LAW OF 1994

CHAPTER 1. General Provisions

ARTICLE 1. Declarations

36600. Citation of part

This part shall be known and may be cited as the "Property and Business Improvement District Law of 1994."

36601. Legislative findings and declarations; Legislative guidance

The Legislature finds and declares all of the following:
(a) Businesses located and operating within business districts in some of this state's communities are economically disadvantaged, are underutilized, and are unable to attract customers due to inadequate facilities, services, and activities in the business districts.
(b) It is in the public interest to promote the economic revitalization and physical maintenance of business districts in order to create jobs, attract new businesses, and prevent the erosion of the business districts.
(c) It is of particular local benefit to allow business districts to fund business related improvements, maintenance, and activities through the levy of assessments upon the businesses or real property that receive benefits from those improvements.
(d) Assessments levied for the purpose of conferring special benefit upon the real property or a specific benefit upon the businesses in a business district are not taxes for the general benefit of a city, even if property, businesses, or persons not assessed receive incidental or collateral effects that benefit them.
(e) Property and business improvement districts formed throughout this state have conferred special benefits upon properties and businesses within their districts and have made those properties and businesses more useful by providing the following benefits:
(1) Crime reduction. A study by the Rand Corporation has confirmed a 12-percent reduction in the incidence of robbery and an 8-percent reduction in the total incidence of violent crimes within the 30 districts studied.
(2) Job creation.
(3) Business attraction.
(4) Business retention.
(5) Economic growth.
(6) New investments.
(f) With the dissolution of redevelopment agencies throughout the state, property and

business improvement districts have become even more important tools with which communities can combat blight, promote economic opportunities, and create a clean and safe environment.
(g) Since the enactment of this act, the people of California have adopted Proposition 218, which added Article XIII D to the Constitution in order to place certain requirements and restrictions on the formation of, and activities, expenditures, and assessments by property-based districts. Article XIII D of the Constitution provides that property-based districts may only levy assessments for special benefits.
(h) The act amending this section is intended to provide the Legislature's guidance with regard to this act, its interaction with the provisions of Article XIII D of the Constitution, and the determination of special benefits in property-based districts.
(1) The lack of legislative guidance has resulted in uncertainty and inconsistent application of this act, which discourages the use of assessments to fund needed improvements, maintenance, and activities in property-based districts, contributing to blight and other underutilization of property.
(2) Activities undertaken for the purpose of conferring special benefits upon property to be assessed inherently produce incidental or collateral effects that benefit property or persons not assessed. Therefore, for special benefits to exist as a separate and distinct category from general benefits, the incidental or collateral effects of those special benefits are inherently part of those special benefits. The mere fact that special benefits produce incidental or collateral effects that benefit property or persons not assessed does not convert any portion of those special benefits or their incidental or collateral effects into general benefits.
(3) It is of the utmost importance that property-based districts created under this act have clarity regarding restrictions on assessments they may levy and the proper determination of special benefits. Legislative clarity with regard to this act will provide districts with clear instructions and courts with legislative intent regarding restrictions on property-based assessments, and the manner in which special benefits should be determined.

36602. Purpose of part

The purpose of this part is to supplement previously enacted provisions of law that authorize cities to levy assessments within property and business improvement districts, to ensure that those assessments conform to all constitutional requirements and are determined and assessed in accordance with the guidance set forth in this act. This part does not affect or limit any other provisions of law authorizing or providing for the furnishing of improvements or activities or the raising of revenue for these purposes.

36603. Preemption of authority or charter city to adopt ordinances levying assessments

Nothing in this part is intended to preempt the authority of a charter city to adopt ordinances providing for a different method of levying assessments for similar or additional purposes from those set forth in this part. A property and business improvement district created pursuant to this part is expressly exempt from the provisions of the Special Assessment Investigation, Limitation and Majority Protest Act

of 1931 (Division 4 (commencing with Section 2800)).

36603.5. Part prevails over conflicting provisions

Any provision of this part that conflicts with any other provision of law shall prevail over the other provision of law, as to districts created under this part.

36604. Severability

This part is intended to be construed liberally and, if any provision is held invalid, the remaining provisions shall remain in full force and effect. Assessments levied under this part are not special taxes.

ARTICLE 2. Definitions

36606. "Activities"

"Activities" means, but is not limited to, all of the following that benefit businesses or real property in the district:
(a) Promotion of public events.
(b) Furnishing of music in any public place.
(c) Promotion of tourism within the district.
(d) Marketing and economic development, including retail retention and recruitment.
(e) Providing security, sanitation, graffiti removal, street and sidewalk cleaning, and other municipal services supplemental to those normally provided by the municipality.
(f) Other services provided for the purpose of conferring special benefit upon assessed real property or specific benefits upon assessed businesses located in the district.

36606.5. "Assessment"

"Assessment" means a levy for the purpose of acquiring, constructing, installing, or maintaining improvements and providing activities that will provide certain benefits to properties or businesses located within a property and business improvement district.

36607. "Business"

"Business" means all types of businesses and includes financial institutions and professions.

36608. "City"

"City" means a city, county, city and county, or an agency or entity created pursuant to Article 1 (commencing with Section 6500) of Chapter 5 of Division 7 of Title 1 of the Government Code, the public member agencies of which includes only cities, counties, or a city and county, or the State of California.

36609. "City council"

"City council" means the city council of a city or the board of supervisors of a county, or the agency, commission, or board created pursuant to a joint powers agreement and which is a city within the meaning of this part.

36609.4. "Clerk"

"Clerk" means the clerk of the legislative body.

36609.5. "General benefit"

"General benefit" means, for purposes of a property-based district, any benefit that is not a "special benefit" as defined in Section 36615.5.

36610. "Improvement"

"Improvement" means the acquisition, construction, installation, or maintenance of any tangible property with an estimated useful life of five years or more including, but not limited to, the following:
(a) Parking facilities.
(b) Benches, booths, kiosks, display cases, pedestrian shelters and signs.
(c) Trash receptacles and public restrooms.
(d) Lighting and heating facilities.
(e) Decorations.
(f) Parks.
(g) Fountains.
(h) Planting areas.
(i) Closing, opening, widening, or narrowing of existing streets.
(j) Facilities or equipment, or both, to enhance security of persons and property within the district.
(k) Ramps, sidewalks, plazas, and pedestrian malls.
(l) Rehabilitation or removal of existing structures.

36611. "Management district plan"; "Plan"

"Management district plan" or "plan" means a proposal as defined in Section 36622.

36612. "Owners' association"

"Owners' association" means a private nonprofit entity that is under contract with a city to administer or implement improvements, maintenance, and activities specified in the management district plan. An owners' association may be an existing nonprofit entity or a newly formed nonprofit entity. An owners' association is a private entity and may not be considered a public entity for any purpose, nor may its board members or staff be considered to be public officials for any purpose. Notwithstanding this section, an owners' association shall comply with the Ralph M. Brown Act (Chapter 9 (commencing with Section 54950) of Part 1 of Division 2 of Title 5 of the Government Code), at all times when matters within the subject matter of the district are heard, discussed, or deliberated, and with the California Public Records Act (Division 10

(commencing with Section 7920.000) of Title 1 of the Government Code), for all records relating to activities of the district.

36614. "Property"

"Property" means real property situated within a district.

36614.5. "Property and business improvement district"; "District"

"Property and business improvement district," or "district," means a property and business improvement district established pursuant to this part.

36614.6. "Property-based assessment"

"Property-based assessment" means any assessment made pursuant to this part upon real property.

36614.7. "Property-based district"

"Property-based district" means any district in which a city levies a property-based assessment.

36615. "Property owner"; "Business owner"; "Owner"

"Property owner" means any person shown as the owner of land on the last equalized assessment roll or otherwise known to be the owner of land by the city council. "Business owner" means any person recognized by the city as the owner of the business. "Owner" means either a business owner or a property owner. The city council has no obligation to obtain other information as to the ownership of land or businesses, and its determination of ownership shall be final and conclusive for the purposes of this part. Wherever this part requires the signature of the property owner, the signature of the authorized agent of the property owner shall be sufficient. Wherever this part requires the signature of the business owner, the signature of the authorized agent of the business owner shall be sufficient.

36615.5. "Special benefit"

(a) "Special benefit" means, for purposes of a property-based district, a particular and distinct benefit over and above general benefits conferred on real property located in a district or to the public at large. Special benefit includes incidental or collateral effects that arise from the improvements, maintenance, or activities of property-based districts even if those incidental or collateral effects benefit property or persons not assessed. Special benefit excludes general enhancement of property value.

(b) "Special benefit" also includes, for purposes of a property-based district, a particular and distinct benefit provided directly to each assessed parcel within the district. Merely because parcels throughout an assessment district share the same special benefits does not make the benefits general.

36616. "Tenant"

"Tenant" means an occupant pursuant to a lease of commercial space or a dwelling unit, other than an owner.

ARTICLE 3. Prior Law

36617. Alternate method of financing certain improvements and activities; Effect on other provisions

This part provides an alternative method of financing certain improvements and activities. The provisions of this part shall not affect or limit any other provisions of law authorizing or providing for the furnishing of improvements or activities or the raising of revenue for these purposes. Every improvement area established pursuant to the Parking and Business Improvement Area Law of 1989 (Part 6 (commencing with Section 36500) of this division) is valid and effective and is unaffected by this part.

CHAPTER 2. Establishment

36620. Establishment of property and business improvement district

A property and business improvement district may be established as provided in this chapter.

36620.5. Requirement of consent of city council

A county may not form a district within the territorial jurisdiction of a city without the consent of the city council of that city. A city may not form a district within the unincorporated territory of a county without the consent of the board of supervisors of that county. A city may not form a district within the territorial jurisdiction of another city without the consent of the city council of the other city.

36621. Initiation of proceedings; Petition of property or business owners in proposed district

(a) Upon the submission of a written petition, signed by the property or business owners in the proposed district who will pay more than 50 percent of the assessments proposed to be levied, the city council may initiate proceedings to form a district by the adoption of a resolution expressing its intention to form a district. The amount of assessment attributable to property or a business owned by the same property or business owner that is in excess of 40 percent of the amount of all assessments proposed to be levied, shall not be included in determining whether the petition is signed by property or business owners who will pay more than 50 percent of the total amount of assessments proposed to be levied.
(b) The petition of property or business owners required under subdivision (a) shall include a summary of the management district plan. That summary shall include all of the following:

(1) A map showing the boundaries of the district.
(2) Information specifying where the complete management district plan can be obtained.
(3) Information specifying that the complete management district plan shall be furnished upon request.
(c) The resolution of intention described in subdivision (a) shall contain all of the following:
(1) A brief description of the proposed improvements, maintenance, and activities, the amount of the proposed assessment, a statement as to whether the assessment will be levied on property or businesses within the district, a statement as to whether bonds will be issued, and a description of the exterior boundaries of the proposed district, which may be made by reference to any plan or map that is on file with the clerk. The descriptions and statements do not need to be detailed and shall be sufficient if they enable an owner to generally identify the nature and extent of the improvements, maintenance, and activities, and the location and extent of the proposed district.
(2) A time and place for a public hearing on the establishment of the property and business improvement district and the levy of assessments, which shall be consistent with the requirements of Section 36623.

36622. Contents of management district plan

The management district plan shall include, but is not limited to, all of the following:
(a) If the assessment will be levied on property, a map of the district in sufficient detail to locate each parcel of property and, if businesses are to be assessed, each business within the district. If the assessment will be levied on businesses, a map that identifies the district boundaries in sufficient detail to allow a business owner to reasonably determine whether a business is located within the district boundaries. If the assessment will be levied on property and businesses, a map of the district in sufficient detail to locate each parcel of property and to allow a business owner to reasonably determine whether a business is located within the district boundaries.
(b) The name of the proposed district.
(c) A description of the boundaries of the district, including the boundaries of benefit zones, proposed for establishment or extension in a manner sufficient to identify the affected property and businesses included, which may be made by reference to any plan or map that is on file with the clerk. The boundaries of a proposed property assessment district shall not overlap with the boundaries of another existing property assessment district created pursuant to this part. This part does not prohibit the boundaries of a district created pursuant to this part to overlap with other assessment districts established pursuant to other provisions of law, including, but not limited to, the Parking and Business Improvement Area Law of 1989 (Part 6 (commencing with Section 36500)). This part does not prohibit the boundaries of a business assessment district created pursuant to this part to overlap with another business assessment district created pursuant to this part. This part does not prohibit the boundaries of a business assessment district created pursuant to this part to overlap with a property assessment district created pursuant to this part.
(d) The improvements, maintenance, and activities proposed for each year of operation of the district and the estimated cost thereof. If the improvements, maintenance, and activities proposed for each year of operation are the same, a description of the first

year's proposed improvements, maintenance, and activities and a statement that the same improvements, maintenance, and activities are proposed for subsequent years shall satisfy the requirements of this subdivision.
(e) The total annual amount proposed to be expended for improvements, maintenance, or activities, and debt service in each year of operation of the district. If the assessment is levied on businesses, this amount may be estimated based upon the assessment rate. If the total annual amount proposed to be expended in each year of operation of the district is not significantly different, the amount proposed to be expended in the initial year and a statement that a similar amount applies to subsequent years shall satisfy the requirements of this subdivision.
(f) The proposed source or sources of financing, including the proposed method and basis of levying the assessment in sufficient detail to allow each property or business owner to calculate the amount of the assessment to be levied against their property or business. The plan also shall state whether bonds will be issued to finance improvements.
(g) The time and manner of collecting the assessments.
(h) The specific number of years in which assessments will be levied. In a new district, the maximum number of years shall be five. Upon renewal, a district shall have a term not to exceed 10 years. Notwithstanding these limitations, a district created pursuant to this part to finance capital improvements with bonds may levy assessments until the maximum maturity of the bonds. The management district plan may set forth specific increases in assessments for each year of operation of the district.
(i) The proposed time for implementation and completion of the management district plan.
(j) Any proposed rules and regulations to be applicable to the district.
(k)
(1) A list of the properties or businesses to be assessed, including the assessor's parcel numbers for properties to be assessed, and a statement of the method or methods by which the expenses of a district will be imposed upon benefited real property or businesses, in proportion to the benefit received by the property or business, to defray the cost thereof.
(2) In a property-based district, the proportionate special benefit derived by each identified parcel shall be determined exclusively in relationship to the entirety of the capital cost of a public improvement, the maintenance and operation expenses of a public improvement, or the cost of the activities. An assessment shall not be imposed on any parcel that exceeds the reasonable cost of the proportional special benefit conferred on that parcel. Only special benefits are assessable, and a property-based district shall separate the general benefits, if any, from the special benefits conferred on a parcel. Parcels within a property-based district that are owned or used by any city, public agency, the State of California, or the United States shall not be exempt from assessment unless the governmental entity can demonstrate by clear and convincing evidence that those publicly owned parcels in fact receive no special benefit. The value of any incidental, secondary, or collateral effects that arise from the improvements, maintenance, or activities of a property-based district and that benefit property or persons not assessed shall not be deducted from the entirety of the cost of any special benefit or affect the proportionate special benefit derived by each identified parcel.
(3) In a property-based district, properties throughout the district may share the same special benefits. In a district with boundaries that define which parcels are to receive

improvements, maintenance, or activities over and above those services provided by the city, the improvements, maintenance, or activities themselves may constitute a special benefit. The city may impose assessments that are less than the proportional special benefit conferred, but shall not impose assessments that exceed the reasonable costs of the proportional special benefit conferred. Because one or more parcels pay less than the special benefit conferred does not necessarily mean that other parcels are assessed more than the reasonable cost of their special benefit.
(l) In a property-based district, a detailed engineer's report prepared by a registered professional engineer certified by the State of California supporting all assessments contemplated by the management district plan.
(m) Any other item or matter required to be incorporated therein by the city council.

36623. Procedure to levy assessment

(a) If a city council proposes to levy a new or increased property assessment, the notice and protest and hearing procedure shall comply with Section 53753 of the Government Code.
(b) If a city council proposes to levy a new or increased business assessment, the notice and protest and hearing procedure shall comply with Section 54954.6 of the Government Code, except that notice shall be mailed to the owners of the businesses proposed to be assessed. A protest may be made orally or in writing by any interested person. Every written protest shall be filed with the clerk at or before the time fixed for the public hearing. The city council may waive any irregularity in the form or content of any written protest. A written protest may be withdrawn in writing at any time before the conclusion of the public hearing. Each written protest shall contain a description of the business in which the person subscribing the protest is interested sufficient to identify the business and, if a person subscribing is not shown on the official records of the city as the owner of the business, the protest shall contain or be accompanied by written evidence that the person subscribing is the owner of the business or the authorized representative. A written protest that does not comply with this section shall not be counted in determining a majority protest. If written protests are received from the owners or authorized representatives of businesses in the proposed district that will pay 50 percent or more of the assessments proposed to be levied and protests are not withdrawn so as to reduce the protests to less than 50 percent, no further proceedings to levy the proposed assessment against such businesses, as contained in the resolution of intention, shall be taken for a period of one year from the date of the finding of a majority protest by the city council.
(c) If a city council proposes to conduct a single proceeding to levy both a new or increased property assessment and a new or increased business assessment, the notice and protest and hearing procedure for the property assessment shall comply with subdivision (a), and the notice and protest and hearing procedure for the business assessment shall comply with subdivision (b). If a majority protest is received from either the property or business owners, that respective portion of the assessment shall not be levied. The remaining portion of the assessment may be levied unless the improvement or other special benefit was proposed to be funded by assessing both property and business owners.

36624. Changes to proposed assessments

At the conclusion of the public hearing to establish the district, the city council may adopt, revise, change, reduce, or modify the proposed assessment or the type or types of improvements, maintenance, and activities to be funded with the revenues from the assessments. Proposed assessments may only be revised by reducing any or all of them. At the public hearing, the city council may only make changes in, to, or from the boundaries of the proposed property and business improvement district that will exclude territory that will not benefit from the proposed improvements, maintenance, and activities. Any modifications, revisions, reductions, or changes to the proposed assessment district shall be reflected in the notice and map recorded pursuant to Section 36627.

36625. Resolution of formation

(a) If the city council, following the public hearing, decides to establish a proposed property and business improvement district, the city council shall adopt a resolution of formation that shall include, but is not limited to, all of the following:
(1) A brief description of the proposed improvements, maintenance, and activities, the amount of the proposed assessment, a statement as to whether the assessment will be levied on property, businesses, or both within the district, a statement on whether bonds will be issued, and a description of the exterior boundaries of the proposed district, which may be made by reference to any plan or map that is on file with the clerk. The descriptions and statements need not be detailed and shall be sufficient if they enable an owner to generally identify the nature and extent of the improvements, maintenance, and activities and the location and extent of the proposed district.
(2) The number, date of adoption, and title of the resolution of intention.
(3) The time and place where the public hearing was held concerning the establishment of the district.
(4) A determination regarding any protests received. The city shall not establish the district or levy assessments if a majority protest was received.
(5) A statement that the properties, businesses, or properties and businesses in the district established by the resolution shall be subject to any amendments to this part.
(6) A statement that the improvements, maintenance, and activities to be conferred on businesses and properties in the district will be funded by the levy of the assessments. The revenue from the levy of assessments within a district shall not be used to provide improvements, maintenance, or activities outside the district or for any purpose other than the purposes specified in the resolution of intention, as modified by the city council at the hearing concerning establishment of the district. Notwithstanding the foregoing, improvements and activities that must be provided outside the district boundaries to create a special or specific benefit to the assessed parcels or businesses may be provided, but shall be limited to marketing or signage pointing to the district.
(7) A finding that the property or businesses within the area of the property and business improvement district will be benefited by the improvements, maintenance, and activities funded by the proposed assessments, and, for a property-based district, that property within the district will receive a special benefit.
(8) In a property-based district, the total amount of all special benefits to be conferred on the properties within the property-based district.
(b) The adoption of the resolution of formation and, if required, recordation of the

notice and map pursuant to Section 36627 shall constitute the levy of an assessment in each of the fiscal years referred to in the management district plan.

36627. Notice and assessment diagram

Following adoption of the resolution establishing district assessments on properties pursuant to Section 36625, the clerk shall record a notice and an assessment diagram pursuant to Section 3114. No other provision of Division 4.5 (commencing with Section 3100) applies to an assessment district created pursuant to this part.

36628. Establishment of separate benefit zones within district; Categories of businesses

The city council may establish one or more separate benefit zones within the district based upon the degree of benefit derived from the improvements or activities to be provided within the benefit zone and may impose a different assessment within each benefit zone. If the assessment is to be levied on businesses, the city council may also define categories of businesses based upon the degree of benefit that each will derive from the improvements or activities to be provided within the district and may impose a different assessment or rate of assessment on each category of business, or on each category of business within each zone.

36628.5. Assessments on businesses or property owners

The city council may levy assessments on businesses or on property owners, or a combination of the two, pursuant to this part. The city council shall structure the assessments in whatever manner it determines corresponds with the distribution of benefits from the proposed improvements, maintenance, and activities, provided that any property-based assessment conforms with the requirements set forth in paragraph (2) of subdivision (k) of Section 36622.

36629. Provisions and procedures applicable to benefit zones and business categories

All provisions of this part applicable to the establishment, modification, or disestablishment of a property and business improvement district apply to the establishment, modification, or disestablishment of benefit zones or categories of business. The city council shall, to establish, modify, or disestablish a benefit zone or category of business, follow the procedure to establish, modify, or disestablish a property and business improvement district.

36630. Expiration of district; Creation of new district

If a property and business improvement district expires due to the time limit set pursuant to subdivision (h) of Section 36622, a new management district plan may be created and the district may be renewed pursuant to this part.

CHAPTER 3. Assessments

36631. Time and manner of collection of assessments; Delinquent payments

The collection of the assessments levied pursuant to this part shall be made at the time and in the manner set forth by the city council in the resolution levying the assessment. Assessments levied on real property may be collected at the same time and in the same manner as for the ad valorem property tax, and may provide for the same lien priority and penalties for delinquent payment. All delinquent payments for assessments levied pursuant to this part may be charged interest and penalties.

36632. Assessments to be based on estimated benefit; Classification of real property and businesses; Exclusion of residential and agricultural property

(a) The assessments levied on real property pursuant to this part shall be levied on the basis of the estimated benefit to the real property within the property and business improvement district. The city council may classify properties for purposes of determining the benefit to property of the improvements and activities provided pursuant to this part.
(b) Assessments levied on businesses pursuant to this part shall be levied on the basis of the estimated benefit to the businesses within the property and business improvement district. The city council may classify businesses for purposes of determining the benefit to the businesses of the improvements and activities provided pursuant to this part.
(c) Properties zoned solely for residential use, or that are zoned for agricultural use, are conclusively presumed not to benefit from the improvements and service funded through these assessments, and shall not be subject to any assessment pursuant to this part.

36633. Time for contesting validity of assessment

The validity of an assessment levied under this part shall not be contested in an action or proceeding unless the action or proceeding is commenced within 30 days after the resolution levying the assessment is adopted pursuant to Section 36625. An appeal from a final judgment in an action or proceeding shall be perfected within 30 days after the entry of judgment.

36634. Service contracts authorized to establish levels of city services

The city council may execute baseline service contracts that would establish levels of city services that would continue after a property and business improvement district has been formed.

36635. Request to modify management district plan

The owners' association may, at any time, request that the city council modify the management district plan. Any modification of the management district plan shall be made pursuant to this chapter.

36636. Modification of plan by resolution after public hearing; Adoption of resolution of intention

(a) Upon the written request of the owners' association, the city council may modify the management district plan after conducting one public hearing on the proposed modifications. The city council may modify the improvements and activities to be funded with the revenue derived from the levy of the assessments by adopting a resolution determining to make the modifications after holding a public hearing on the proposed modifications. If the modification includes the levy of a new or increased assessment, the city council shall comply with Section 36623. Notice of all other public hearings pursuant to this section shall comply with both of the following:
(1) The resolution of intention shall be published in a newspaper of general circulation in the city once at least seven days before the public hearing.
(2) A complete copy of the resolution of intention shall be mailed by first class mail, at least 10 days before the public hearing, to each business owner or property owner affected by the proposed modification.
(b) The city council shall adopt a resolution of intention which states the proposed modification prior to the public hearing required by this section. The public hearing shall be held not more than 90 days after the adoption of the resolution of intention.

36637. Reflection of modification in notices recorded and maps

Any subsequent modification of the resolution shall be reflected in subsequent notices and maps recorded pursuant to Division 4.5 (commencing with Section 3100), in a manner consistent with the provisions of Section 36627.

36638. Assessment as government imposed fee on Civ C § 1770 transaction

(a) A business assessment pursuant to this part is a fee imposed by a government on the transaction for purposes of paragraph (29) of subdivision (a) of Section 1770 of the Civil Code.
(b) This section shall become operative on July 1, 2024.

CHAPTER 3.5. Financing

36640. Bonds authorized; Procedure; Restriction on reduction or termination of assessments

(a) The city council may, by resolution, determine and declare that bonds shall be issued to finance the estimated cost of some or all of the proposed improvements described in the resolution of formation adopted pursuant to Section 36625, if the resolution of formation adopted pursuant to that section provides for the issuance of bonds, under the Improvement Bond Act of 1915 (Division 10 (commencing with Section 8500)) or in conjunction with Marks-Roos Local Bond Pooling Act of 1985 (Article 4 (commencing with Section 6584) of Chapter 5 of Division 7 of Title 1 of the Government Code). Either act, as the case may be, shall govern the proceedings relating to the issuance of bonds, although proceedings under the Bond Act of 1915 may be modified by the city council as necessary to accommodate assessments levied

upon business pursuant to this part.
(b) The resolution adopted pursuant to subdivision (a) shall generally describe the proposed improvements specified in the resolution of formation adopted pursuant to Section 36625, set forth the estimated cost of those improvements, specify the number of annual installments and the fiscal years during which they are to be collected. The amount of debt service to retire the bonds shall not exceed the amount of revenue estimated to be raised from assessments over 30 years.
(c) Notwithstanding any other provision of this part, assessments levied to pay the principal and interest on any bond issued pursuant to this section shall not be reduced or terminated if doing so would interfere with the timely retirement of the debt.

CHAPTER 4. Governance

36650. Report by owners' association; Approval or modification by city council

(a) The owners' association shall cause to be prepared a report for each fiscal year, except the first year, for which assessments are to be levied and collected to pay the costs of the improvements, maintenance, and activities described in the report. The owners' association's first report shall be due after the first year of operation of the district. The report may propose changes, including, but not limited to, the boundaries of the property and business improvement district or any benefit zones within the district, the basis and method of levying the assessments, and any changes in the classification of property, including any categories of business, if a classification is used.
(b) The report shall be filed with the clerk and shall refer to the property and business improvement district by name, specify the fiscal year to which the report applies, and, with respect to that fiscal year, shall contain all of the following information:
(1) Any proposed changes in the boundaries of the property and business improvement district or in any benefit zones or classification of property or businesses within the district.
(2) The improvements, maintenance, and activities to be provided for that fiscal year.
(3) An estimate of the cost of providing the improvements, maintenance, and activities for that fiscal year.
(4) The method and basis of levying the assessment in sufficient detail to allow each real property or business owner, as appropriate, to estimate the amount of the assessment to be levied against his or her property or business for that fiscal year.
(5) The estimated amount of any surplus or deficit revenues to be carried over from a previous fiscal year.
(6) The estimated amount of any contributions to be made from sources other than assessments levied pursuant to this part.
(c) The city council may approve the report as filed by the owners' association or may modify any particular contained in the report and approve it as modified. Any modification shall be made pursuant to Sections 36635 and 36636.
The city council shall not approve a change in the basis and method of levying assessments that would impair an authorized or executed contract to be paid from the revenues derived from the levy of assessments, including any commitment to pay principal and interest on any bonds issued on behalf of the district.

36651. Designation of owners' association to provide improvements,

maintenance, and activities

The management district plan may, but is not required to, state that an owners' association will provide the improvements, maintenance, and activities described in the management district plan. If the management district plan designates an owners' association, the city shall contract with the designated nonprofit corporation to provide services.

CHAPTER 5. Renewal

36660. Renewal of district; Transfer or refund of remaining revenues; District term limit

(a) Any district previously established whose term has expired, or will expire, may be renewed by following the procedures for establishment as provided in this chapter.
(b) Upon renewal, any remaining revenues derived from the levy of assessments, or any revenues derived from the sale of assets acquired with the revenues, shall be transferred to the renewed district. If the renewed district includes additional parcels or businesses not included in the prior district, the remaining revenues shall be spent to benefit only the parcels or businesses in the prior district. If the renewed district does not include parcels or businesses included in the prior district, the remaining revenues attributable to these parcels shall be refunded to the owners of these parcels or businesses.
(c) Upon renewal, a district shall have a term not to exceed 10 years, or, if the district is authorized to issue bonds, until the maximum maturity of those bonds. There is no requirement that the boundaries, assessments, improvements, or activities of a renewed district be the same as the original or prior district.

CHAPTER 6. Disestablishment

36670. Circumstances permitting disestablishment of district; Procedure

(a) Any district established or extended pursuant to the provisions of this part, where there is no indebtedness, outstanding and unpaid, incurred to accomplish any of the purposes of the district, may be disestablished by resolution by the city council in either of the following circumstances:
(1) If the city council finds there has been misappropriation of funds, malfeasance, or a violation of law in connection with the management of the district, it shall notice a hearing on disestablishment.
(2) During the operation of the district, there shall be a 30-day period each year in which assessees may request disestablishment of the district. The first such period shall begin one year after the date of establishment of the district and shall continue for 30 days. The next such 30-day period shall begin two years after the date of the establishment of the district. Each successive year of operation of the district shall have such a 30-day period. Upon the written petition of the owners or authorized representatives of real property or the owners or authorized representatives of businesses in the district who pay 50 percent or more of the assessments levied, the city council shall pass a resolution of intention to disestablish the district. The city council shall notice a hearing on disestablishment.

(b) The city council shall adopt a resolution of intention to disestablish the district prior to the public hearing required by this section. The resolution shall state the reason for the disestablishment, shall state the time and place of the public hearing, and shall contain a proposal to dispose of any assets acquired with the revenues of the assessments levied within the property and business improvement district. The notice of the hearing on disestablishment required by this section shall be given by mail to the property owner of each parcel or to the owner of each business subject to assessment in the district, as appropriate. The city shall conduct the public hearing not less than 30 days after mailing the notice to the property or business owners. The public hearing shall be held not more than 60 days after the adoption of the resolution of intention.

36671. Refund of remaining revenues upon disestablishment or expiration without renewal of district; Calculation of refund; Use of outstanding revenue collected after disestablishment of district

(a) Upon the disestablishment or expiration without renewal of a district, any remaining revenues, after all outstanding debts are paid, derived from the levy of assessments, or derived from the sale of assets acquired with the revenues, or from bond reserve or construction funds, shall be refunded to the owners of the property or businesses then located and operating within the district in which assessments were levied by applying the same method and basis that was used to calculate the assessments levied in the fiscal year in which the district is disestablished or expires. All outstanding assessment revenue collected after disestablishment shall be spent on improvements and activities specified in the management district plan.
(b) If the disestablishment occurs before an assessment is levied for the fiscal year, the method and basis that was used to calculate the assessments levied in the immediate prior fiscal year shall be used to calculate the amount of any refund.

APPENDIX 2 – ASSESSED LODGING BUSINESSES*

Business Name	Address	
Best Western Plus Rancho Cordova Inn	10713 White Rock Rd	Rancho Cordova
